

THE CARROLL RECORD.

Vol. 1., No. 52.

TANEYTOWN, MARYLAND, SATURDAY, JUNE 29, 1895.

\$1.00 Per Year.

LOCALS AND PERSONALS.

The baby is a year old, and healthy.

The family of Mr. H. M. Clabaugh is at Antrim for a portion of the summer.

Mr. and Mrs. Nathan Angell returned home last week from a visit to relatives in Ohio.

Mr. Thad Crapster, has been named as captain of cadets for next year at the Maryland Agricultural College.

Uncle Jimmy Rodgers has left Taneytown for a while, and will be with his son Frank, at Morgan's station, until his return.

The Western Maryland Railroad commenced running its regular daily excursion train from Baltimore to Pen Mar, on Wednesday.

Cherries would meet with ready sale here; as yet but few have been offered. Fruit of all kinds will not be as plenty as it first promised to.

Mr. Wm. B. Dutera graduated at Ursinus college this year. His parents, Mr. and Mrs. Amos Dutera, attended the commencement exercises last week.

Mr. and Mrs. John Bushey have taken up their abode for the summer at Mr. C. M. Hess's. They will return to Mr. Luther Bushey's at Porters, in the fall.

The Lutheran reunion will be held at Pen-mar on July 25th., and the Reformed, on the 18th. These events promise to be the largest ever held by these denominations in this state.

The Carroll County Prohibition convention will be held in Carroll Hall, Westminster, on Friday afternoon, July 12th. A full county and legislative ticket will likely be nominated.

We acknowledge the receipt of a neatly framed and very complete map of the Western Maryland Railroad, from Mr. J. E. Lambert, the agent of the company at Union Bridge.

Mr. Jesse P. Garner, of Linwood, paid us a pleasant visit on Thursday, and handed in the first instalment of the history of the Linwood section. His writings will appear in course of time, possibly not until the latter part of August.

The Lutheran Sunday school, and C. E. Society, expect to have a picnic some time in July. All members interested in such an occasion should attend a preliminary meeting to be held in the lecture room of the church, this Saturday evening.

Friends, interest yourself in the RECORD. With the next issue we begin a new volume, and we need your assistance during the year. It takes cash to run a newspaper such as ours, and you can help us, by inducing your neighbors to subscribe.

On Thursday night the P. O. S. of A. at this place elected its officers for the ensuing term, as follows: L. D. Reid, P.; Norman Reindollar, V. P.; John J. Reid, M. of F.; Charles G. Brown, C.; W. F. Clingan, L.; Charles Lambert, G.; Jno. S. Bower, Trustee.

Reports from parts of Frederick county indicate that the electric storm of Thursday afternoon was very severe. Several barns were struck by lightning, and much damage done to crops and fencing. Between Middletown and Myersville 24 telephone poles were struck, some of them being split from top to bottom.

We will soon begin a Picnic Register, like our sale register last spring, in which all picnics for which bills are printed at this office, will be entered free of charge, and continued until the event comes off. Hand in your orders now, as this may prevent any delay from coming on the same date. When the bills are printed elsewhere, the charge for use of the register will be 50cts.

The showers of Wednesday and Thursday were very beneficial to the growing corn and potatoes. An immense crop of fine hay has been harvested in this section, and next week grain harvest will be in full operation. The storm which accompanied the rain on Tuesday, has done much damage to crops and will try the cutting and handling powers of new binders.

A magistrate should be appointed for Harney. Suspicious persons may think that it is suggestion may imply doubts as to the truthfulness of our correspondent's fish item—but it doesn't, it's simply a coincidence. Some people are always ready to jump to incorrect conclusions, and we would be willing to bet that those fish would, in fact, have measured and weighed a little more, if it would have been supposed that any one would think that the statement ought to be sworn to.

The coming Fourth of July will not be celebrated in any special manner. Our citizens should display the National colors, and in connection with the matter of course big and little fire-cracker, in the hands of the big and little boy, will serve to remind us of the passing of the great National holiday. It should be remembered that the fire-cracker is a dangerous institution, when carelessly handled, and may easily cause a fire, which would be particularly unwelcome in our defenseless condition. Don't let your enthusiasm lead you to forget the dangerous character of the cracker.

During the thunder gust on Thursday afternoon the dwelling of Dr. C. W. Weaver was struck by lightning and a large section of slate roof torn off, and a chimney and attic window demolished. The stroke was a terrific one, and it is almost miraculous that it did not cause fire, or more damage. Mr. A. H. Zollicoffer who was looking directly at the roof of the house at the time, says he saw what appeared to be a ball of fire form, apparently about 15 feet in the air, above the roof, and then drop, with the exact effect of an explosion. It is probable that two electric currents met in the air, and that the house did not get the full force of the concussion. The amount of the damage is likely about \$75.00.

NOTES HERE AND THERE.

Monuments to Generals Meade and Hancock, will be erected on the Gettysburg battle field this summer.

R. Q. Taylor, the celebrated Baltimore hatter, died from heart trouble on Sunday last, in his seventy-seventh year.

The receipts of the Baltimore post-office for the past year were \$27,102, an increase of \$32,414 over the year before.

The salary of the Postmaster of Hanover is now \$1900. The York office has been raised to first-class with a salary of \$3900.

The Baltimore Belt Line tunnel was illuminated with electric lights for the first time on Wednesday, and the result was very satisfactory.

The Blue Ridge Zephyr, will appear as a Pen-Mar daily, on July 1. Editor Martin has evidently not been discouraged by the results from volume first, last year.

Another gasoline stove exploded, this time in Hagerstown. No one was injured, and the damage by fire was slight. The accident occurred in a dwelling tenanted by Mrs. Cornelius Pearl.

The Reformed charge at Emmitsburg is now vacant, owing to the resignation of Rev. A. M. Schaffner. Revs. J. R. Lewis of Highlands, A. Bateman of Taneytown, and H. J. McAllister of Westminster, were appointed a committee to supply the charge.

The Telephone Protection Association of America was organized in Pittsburgh on the 25th., in opposition to the Bell Company. It will contest the Bell long distance patents, and will work for the universal and unrestricted use of the telephone by local companies.

Governor Brown has inherited \$150,000, on account of the death of Mr. James Carroll. A sister, Mrs. Mordecai, receives the same amount. This would supply the Governor with a very large "barrel" for campaign purposes, should he place himself in the "hands of his friends."

An exchange gives the following advice: "Kissing the baby may result in deforming its nose or bringing on near-sightedness. The safest plan is not to kiss a baby of the feminine persuasion, but to let it attain the age of eighteen years. The cartilage of the nose is much stronger then."

The Antietam Valley Register published at Keedysville, is announced for sale by its owner, Mr. J. A. Miller. The office says, that other business prevents the owner from giving journalism the proper attention, and that it is a good opening for the right person. Circulation 400, advertising patronage \$200.

An unsuccessful attempt was made to burglarize the large iron safe in the Union depot at Bruceville, on Saturday night last. Two money drawers were robbed of their contents of small change, and a penny in the slot machine broken open, but the sum obtained from all did not amount to more than a few dollars.

The last Pennsylvania Legislature passed a bill, which has become a law by the signature of the Governor, abolishing days of grace on notes, drafts, and the like, and also the obligation falling due on Sunday, or a legal holiday, shall be deemed due on the next secular business day thereafter, and notes, checks or drafts due on Sunday, cannot be protested on Saturday.

Mr. Charles W. Miller, a former postmaster of Frederick city, had copyrighted a form for keeping post-office accounts, while he was postmaster. The book was indorsed by the Department, and has been in use in all post-offices of the country for several years. Recently it has been decided to use the work in third and fourth-class offices, and Mr. Miller has received an order for 20,000 books.

The Frederick city election held on Wednesday was an exciting contest, and resulted in a victory for the democrats by small majorities. Yeakle (dem) for mayor was elected over Hinks (rep) by 11 majority. The republicans worked hard, and succeeded in considerably reducing majorities, electing two councilmen, and gain of one. Biser and Ebert, republicans, and Tyson, Rice and Difendal, democrats, compose the new board of aldermen.

Dr. James W. Eichelberger, Sr., the oldest citizen of the city, celebrated his ninety-first birthday on Monday. The doctor is enjoying unusually good health for one who has attained such an advanced age, and the Chronicle joins his many friends in wishing him continued good health. In 1827, sixty-eight years ago, Dr. Eichelberger graduated in medicine at the University of Maryland, and is, probably, the oldest living graduate of that institution.—Emmitsburg Chronicle.

Members of the Dunkard, River Brethren, Seven-Day Baptist, and Mennonite churches in Franklin county are fearful lest Governor Hastings might sign the religious garb bill passed by the recent Legislature. A number of school teachers belong to the above denominations, and they could not teach any longer, and remain true to their religious beliefs should the bill become a law. The membership of these churches is largely republican, and it is asserted that that party would be hurt should the measure prevail.

Mayor Latrobe on Wednesday received a communication from the executive committee of the Board of Underwriters, requesting him not to issue permits for fireworks on the Fourth of July. It states that last year the Fire Department was frequently summoned to fires, which was an expense to the city, and the fires caused losses to the insurance companies, and that the fireworks are dangerous to life and property. The Mayor decided not to issue any permits for fireworks on July 4th. This he said, would apply to the Annex, as well as to the city proper.

Telephones in Operation.

During the week a force of workmen have been here, placing the telephones of the Western Maryland Company subscribed for by our citizens. A number of extra poles had to be planted, in order to reach all the points, and some "kicking" was indulged in by property owners, but now everything seems to be settled, and there will not likely be any further trouble. Although the ordinance passed by the authorities required the main lines of the company to be on the alleys, five poles are on Baltimore street between the John Reindollar property and the square. While many thought that the company should be allowed to come straight through town from the Westminister road, very few desire to have the poles in front of their buildings, when it comes to placing them, and like most other questions, this has been shown to have two sides.

Sixteen phones in all have been subscribed for, as follows: C. A. Elliot, exchange, John McKelip, Jr., T. Motter, Thos. B. G. Huber, Jas. Buffington, Savings Bank, Edward Kemper, Geo. H. Birnie & Co., W. Jesse Roberts, two, (one at mill) Franklin Bowersox, Reindollar & Co., A. H. Zollicoffer, Dr. C. W. Weaver, Dr. C. Birnie, and Dr. M. C. Smith.

The Chesapeake & Potomac Company is planting its poles between here and Uniontown, and in a short time we will be connected with its main line, by which we will be able to do long distance telephoning. The Company will establish a pay station here, and the streets will be used as a manager, and it is said, contemplates the extension of the line to Harney and Gettysburg. The town officials will admit this Company on practically the same terms as the Western Maryland Company, so far as the location of the poles on the streets is concerned. We are now in a position to hear, and be heard, as we never have before, and our advantages in this particular will likely prove beneficial to the town in many ways. Water works, and better rail road facilities, would give us a very desirable modern town.

Orphans' Court Proceedings.

MONDAY, June 24th, 1895.—Caveat to the last Will and Testament of Enan Arter, deceased, filed. Elias O. Grimes, guardian of Elsie H., Nellie G. and Ethel V. Grimes, settled second account.

The last will and Testament of Thomas J. Bond, settled 33rd account. Francis L. Hering, executor of Catharine Hedges, deceased, returned inventory of money and list of debts.

Alice H. Lamotte, Herschel F. Lamotte and L. Howell Lamotte, executors of Lewis A. J. Lamotte, deceased, reported sale of real estate.

TUESDAY, June 25th, 1895.—George P. Wentz, executor of George Bixler, deceased, settled first and final account.

Safe Deposit & Trust Co. of Baltimore bonded as guardian of Franklin T. Wade H., Bessie Alice and Jessie M. Cover.

Daniel R. Saylor, executor of Catharine Cheesman, deceased, returned list of goods and chattels, and settled first account.

The last will and Testament of Mary E. Engleman, deceased, admitted to probate and letters testamentary granted to Eliza J. Founfelter.

Letters testamentary on the estate of Nicholas Parker, deceased, were granted to Ellen E. Parker and Wm. Lowry.

John W. Tracy, administrator of Margaret Tracy, deceased, returned inventory of goods and chattels, and received order to sell goods and chattels.

Letters of administration on the estate of John Peter Woods, deceased, were granted to Charles R. Woods.

Flint Mill Burned.

The Patapsco flint-mill, located at Hood's Mill, in Carroll county, on the Baltimore and Ohio Railroad, was burned Wednesday afternoon, the fire having been started, it is supposed, from a carelessly smoldering fire. The building was a large frame structure on high stone walls. It was formerly a flour-mill, and gave the village of Hood's Mill its name. The valuable machinery was converted into a flint-mill several years ago, the product being used in the manufacture of pottery and chinaware. Some time back this mill gave rise to a discussion because of the alleged death of thirteen employees from inhaling dust in the mill. The Edwin Bennett Pottery Company will be the proprietor, and the proprietors persistently neglected to use the appliances provided for their protection. It is not known whether the works will be rebuilt. The machinery was worth about \$5,000. The fire delayed railroad trains for two hours and one of the tracks was partly destroyed for a distance of about fifty yards. The store of E. J. Hammond, which is located opposite the mill, across the railroad tracks, was in considerable danger and narrowly escaped destruction.—Sun.

MARRIED.

REINDOLLAR—BEALMEAR.—On the 25th, at the residence of the bride in Baltimore, Mr. Harry A. Reindollar to Miss Mazie B. Bealmear. Ceremony by Rev. O. C. Roth.

GRUMBINE—ZEPP.—On the 25th, in the M. P. church, Westminster, Mr. George R. Grumbine to Miss Nettie Zepp, daughter of Mr. Thomas Zepp. Ceremony by Rev. A. D. Melvin.

APPLER—GRAHAM.—On the 27th, in St. James' church, Union Bridge, Mr. Abram B. Appler to Miss Mattie M. Graham. Ceremony by Rev. R. L. Patterson.

DIED.

Obituaries, poetry and resolutions charged for at the rate of five cents per line. The regular death notices published free of charge.

JELLY.—On the 27th., at New Windsor, Rev. Alexander M. Jelly, D. D., in his 64th year. Interment in Philadelphia on the 28th.

REISLER.—On the 22nd., near Johnsville, Mrs. Margaret Reisler, in her 71st year. Interment in Union Bridge cemetery on the 25th.

HYMENEAL.

APPLER—GRAHAM. (Special to the Record.)

One of the most brilliant weddings of the season took place at the Lutheran church in Union Bridge, on Thursday afternoon, June 27th. The contracting parties were Miss Mattie M. Graham, an accomplished daughter of Archibald Graham, and Mr. R. L. Appler, son of Elias Appler, a machinist in the W. M. R. R. shops in Union Bridge. The church was tastefully decorated with an evergreen trimmed arch, and cut and potted flowers forming a mound in the rear of the pulpit. The ushers were Messrs. Harry Chew, Preston Rinehart, Edw. Phillips and Chauncey Zumburn. The best man was Mr. Orville Wright, and Miss Lillie Phillips was maid of honor. The bride wore a handsome gown of white silk, trimmed with buff and ribbon, and wore gloves and slippers to match and carried a bunch of Marechal Niel roses. The maid of honor wore orange yellow silk, with flowers and gloves to match. The groom wore the usual black, with white bow and white kid gloves.

As the bridal party approached the altar, the wedding march from Lohegrin was rendered on the organ, by Mrs. Letitia Wood, assisted by Mr. J. E. Lambert on the cornet, also Mendelssohn's March as the newly-wedded couple and their attendants retired from the church. Rev. R. L. Patterson, the pastor, performed the ceremony.

The bride received some handsome and valuable presents consisting in part of a gold watch and chain from the groom, silver butter dishes, silver knives and forks, and linen in different styles. Mr. and Mrs. Appler left on the 4 p. m. train for Baltimore and Washington and the South. After their return from their bridal tour, they will reside in Union Bridge.

Among those at the reception were Mr. A. B. Appler and wife, Mrs. Samuel Galt and daughter of Copperville; Misses Mary and Effie Appler of Baltimore; Mr. Oliver Garner and daughter of Taneytown; Mr. E. G. Shoemaker and wife, Mr. Theo. Fowble and family, Mr. W. J. Graham and wife, Mr. Peter Graham and wife, Mr. J. F. Baker and wife, Mrs. H. Williams, Miss Mollie Williams, Rev. R. L. Patterson and wife, Mrs. Letitia Wood, Mr. Reuben Saylor and wife, Mr. J. E. Young and wife, Mr. H. D. Fowble and wife, Mr. W. H. Roth, past J. E. Lambert, Misses Nellie and Gertrude Rowe, Miss Lillie Phillips, Messrs Orville Wright, Preston Rinehart, Harry Chew, Edward Phillips and Chauncey Zumburn.

REINDOLLAR—BEALMEAR.

Mr. Harry A. Reindollar and Miss Mazie B. Bealmear were married on Tuesday, at the residence of the bride's parents, 1438 West Lanvale St., Baltimore. Rev. O. C. Roth, pastor of Grace Lutheran church, performed the ceremony.

The bride is a daughter of Mr. Wm. R. Bealmear, and a niece of Mr. Wm. R. Brewer, clerk of Circuit court No. 2. The groom is a Carroll county, a son of Mr. C. E. Reindollar of York Road; he is a graduate of the Maryland College of Pharmacy, and has for several years been in the drug business in Baltimore.

The bride was the recipient of numerous, handsome and valuable presents from relatives and friends of the couple. After the ceremony, Mr. and Mrs. Reindollar left for a short stay at Atlantic City. Relatives and friends of the groom in Taneytown extend congratulations.

Death of Dr. Jelly.

Rev. Dr. Alexander M. Jelly, ex-president of New Windsor College and of the Maryland Theological Seminary, died after an illness of long standing, in his 64th year. He was a graduate of Washington College, and his theological training was received in Allegheny Theological Seminary, where he graduated in 1861.

After serving a number of important Presbyterian churches, he in 1877 assumed control of the New Windsor college, and continuously held the office of president of the institution until his resignation on account of ill health in 1894, when he was succeeded by Dr. J. E. Lambert.

Dr. Jelly's administration of the affairs of the College was attended with success, largely because he was an untiring and zealous worker. He made a specialty of assisting those who were financially unable to take the college course, and which illustrated his natural kindness and sympathy toward those who were deserving and ambitious, though poor. While his duties to the college were exacting and laborious, he did not wholly give up active ministry, but served in the pulpits of a number of churches beside the one at New Windsor.

He leaves a widow and three children. Funeral services were held in the College Thursday evening, and the interment was in Laurel Hill cemetery, Philadelphia, on Friday afternoon.

Taxes for 1895.

The county commissioners have announced the tax rate for the year as follows: for school purposes, 17 cents; courts, officers salaries, magistrates &c., 12 cents; jails, almshouses and pensions, 8 cents; miscellaneous, 5 cents; total 42 cents.

The road tax, is, of course, in addition to this; the rates for which have been fixed by the road commissioners, as follows: Taneytown 10 cents; Uniontown 8 cents; Middleburg 12 cents; New Windsor 8 cents; Union Bridge 8 cents; Myersville 10 cents; Woodlery 17 cents; Freedom 16 cents; Manchester 11 cents; Hampstead 16 cents; Franklin 17 cents; Westminster 8 cents, Mount Airy 17 cents.

Sabbath Notices.

Owing to the illness of the pastor, Rev. K. G. Murray, there will be no church services at either Middleburg or Double Pipe Creek, on Sunday the 30th.

Regular church services will be held in the U. B. church, Taneytown, at 7.30 p. m., instead of 8.30 p. m., on Sunday, June 30th.

COUNTY CORRESPONDENCE.

Harney.

Last Friday and Saturday, while a party of gentlemen from Harney, of the Groves, Seal's station, Gate Station and Harney, were fishing at Stoniesfer's dam, luck seemed to be in their favor, and they succeeded in landing six fine carp weighing respectively 19, 15, 11, 11, 10 and 8 pounds; also 47 black bass and 7 eels. The largest carp measured 35 inches length and 20 inches in circumference. This is the largest haul we have heard of for some time, but we would just say that it will not be necessary for the pleasure seeking public to allow this statement to excite them, because the big fish are not there; they were taken away and we have no assurance that any more such large ones can be caught.

A party of ladies and gentlemen from Littleton have encamped at Mr. W. E. Myers' beautiful camping ground near this place, and are informed that they are nicely fixed and will remain for several weeks.

Mr. Andrew DeGroot has purchased a good second hand steam threshing outfit. Mr. DeGroot is an experienced hand in the business, and we know, will do good work.

On last Tuesday morning about 4 o'clock Mr. Pius Spangler, a well known citizen near this place, died from typhoid fever. Mr. Spangler was only a young man, but has been a very hard working farmer, and we are told that this system was entirely broken down, so that he had not been enjoying good health for nearly a year; therefore when the fever attacked him, his system was in no condition to endure it. He leaves a wife and three children to mourn his loss.

Mr. J. Newcomer is off on a trip in the interest of his cigar business.

Mrs. E. S. Eyer is home, spending a few weeks while Mr. Eyer is traveling through the west on a business trip for the Lutz Manufacturing Co., of Shippensburg, Pa.

Mr. Chas. Eckenrode, who has been attending college at Rock Hill, Md., is home for his summer vacation.

Charley is looking well and likes school very much.

Report has it that Mr. Harry Wolf and Miss Flora Shirley are to be married this week, and that they will make their future home in Baltimore.

Mr. Stoniesfer killed several large black snakes at his mill this week, one measuring about 5 feet in length.

Linwood.

Most of our farmers are through making hay; all report a bountiful crop. Mr. L. C. Rinehart harvested 100 tons and Mr. E. L. Shriner 80 tons.

Mr. Arthur, tenant on the farm of Jos. L. Haines, lost a mule last Sunday, by its falling in the lime kiln; it was badly injured and had to be shot, and before they could move it, had to cut it up and take it off by pieces.

Mrs. Frank J. Englar pulled her first ripe tomatoes ("Earliest in the world") on June 25th.

Miss Carrie L. Englar, who has been spending the winter in Baltimore at school, has returned home on Sunday.

Mr. John Morrison, wife and son, Mrs. Maurie Tucker and daughter, of Baltimore, and Mrs. Edward Chase and daughters of New York, are summing with Mrs. E. L. Shriner—Linwood Shade.

Mr. Jos. Englar is building a new coal chute. Mr. E. is always up to date with improvements.

Mr. Wm. Neidig and daughters, of Frederick city, were the guests of Mrs. Jos. Englar last week.

At this writing we are having a fine rain accompanied with a great deal of thunder and lightning. The weather prophet ("who passed here this eve and said, "no rain; too much thunder," had better take his sign in, or he might get it wet.

Bruceville.

Mr. Gregg Eichelberger and Mr. Sheridan Biggs, of Rocky Ridge, spent Sunday with S. Weant's.

We all wished for rain but when the storm came, we all were in dread; it has washed out many fields in the neighborhood and blown over trees, splitting a large locust tree in front of Mr. S. Weant's, and throwing it partly against the house. It came with such a crash that the inmates thought their last hour had come.

Master Mervin Weant, who has been suffering the last week with congestion of the brain, we are glad to say is much improved.

The young ladies and gentlemen of our surrounding neighborhood will hold a festival on the nights of July 4th and 5th, in the grove of Mr. James White, 3 miles south of Taneytown. Are looking forward to a good time.

Union Bridge.

The funeral of Mrs. Thos. Reisler, who died near Libertytown, on last Saturday, took place from the M. P. church in this place, on last Tuesday morning. The deceased was a sister to Mrs. Hannah Saylor and Mrs. Mary Hartsock of this place, and the mother of Mr. Edward Reisler, editor of the Carroll News. The interment was made in Mountain View cemetery.

Mr. A. W. Benchoff, agent for the W. M. R. R. at Edgemont, and Miss Mettie Harbaugh of Deerfield, spent last Tuesday with Mr. and Mrs. S. H. Little.

Mr. F. L. Stover and wife of Frederick spent several days this week with Mr. John S. Repp and family.

Miss Blanche Radcliffe of Frederick, is sojourning with the Misses Wagner.

On next Thursday, July 4th., an exceptional gala time will be celebrated in this place. There will be two games of base ball between the Frederick city and U. B. clubs; games to be called at 10 a. m., and 2.30 p. m. A street parade in the evening at 6 o'clock by the fire company, the different secret orders, and the base ball clubs all headed by the Union Bridge band, and at night an ice cream festival will be held in the town hall, for the benefit of the base ball club. A general good time is anticipated by all. The business houses will be closed during the entire day, and the buildings will be decorated with U. S. flags and bunting, which in all will make our "Independence day" a very pleasant one.

Littleton, Pa.

Harvest has commenced in this section, and farmers report a good crop. Our town, during the last few months, has had more than its share of visits from travelling troupes. One of them spent about a week a short time ago. They run out of money and could not draw a crowd to replenish their purse, so as a last resort they collected from the citizens to enable them to leave town.

The funeral of Mr. Pius Spangler of near Harney, took place to-day, at St. John's church near town. It was one of the largest funerals ever held at that church.

Mr. Wm. Stoner has recently been appointed sexton for St. Paul's Lutheran church.

Mr. Wm. Robinson, a former citizen of Littleton, but for several years living in Dauphin Co., removed with his family to our town again this week. Mr. Robinson has accepted the position of assistant cashier in our bank. Being well qualified for this position, we welcome him in our midst.

The third Quarterly Meeting of the United Brethren church, under the old constitution, took place over last Sabbath. Rev. B. G. Huber, P. E. of Chambersburg, preached three excellent sermons. The Communion service, on Sunday afternoon, was especially interesting and inspiring. The finances were met without any effort, simply by a basket collection, and a nice surplus remaining. At the evening service, four new members were added to Littleton class. On the whole it was one of the most successful quarterly efforts held in the history of Littleton United Brethren church.

Emmitsburg.

On last Sunday, Rev. A. M. Schaffner preached his farewell sermon in this place, taking his text from II Corinthians 13:11. On Monday a special meeting of Maryland classes met to dismiss him; those present were Rev. A. L. Weber of Baltimore, President of the class, Rev. Lewis of Sabillasville, Dr. A. Bateman of Taneytown, Rev. Whitmore of Thurmont and Rev. Motter of Adams-town. Revs. Lewis, Bateman and McAllister were appointed a committee to supply this vacant charge. Rev. Schaffner and family left Tuesday morning to visit his father for a few days, after which he will enter upon his new duties the first of July.

Our town is filled with visitors attending the commencements at Mount St. Mary's College and St. Joseph's Academy, which took place on the 26th and 27th. The closing exercises of St. Euphemia's school took place Tuesday afternoon.

Mr. Daniel Sheets, who had been seriously ill, is much improved and is able to be up again.

On Wednesday night, a very heavy thunder and rain storm, with much lightning, came on about 6 o'clock and continued until about 10 o'clock without any cessation.

Uniontown.

We had a heavy rain on Wednesday which did much damage to the corn fields.

Mr. Chas. Gosnell of Waverly, Md., is visiting relatives in town.

J. W. Rodkey, who has been sick for some days past is convalescing.

Dr. J. J. Weaver, Sen., and wife are at Atlantic City for a few weeks.

Norris Fussell of New York, is the guest of H. B. Merig.

Mrs. Lewis Selby is suffering very much from an attack of rheumatism.

Geo. A. Davis has taken to the road again, in the interests of the smokers.

Norman R. Eckard has taken a position as travelling salesman with John E. Heck.

James T. Lassell, Jr., of Baltimore, is home on a short vacation.

The children's service in the Church of God on Sunday evening last, was well attended. The programme was very creditable, especially when it is considered that the time of preparation was brief.

Misses Anna Motter of Taneytown, and Ellen Thomas of Sandy Springs, are visiting Miss Florence Weaver.

Roy Singer accidentally shot himself with a rifle on Thursday, the ball passing through the muscles of the left arm producing a painful but not serious wound.

Porters.

News scarce, everybody busy picking peas, harvesting and plowing corn.

Mr. Jonathan M. Dorsey, (better known as Sonny) has the past week erected a large substantial hay-barn on his farm. Mr. G. R. Rhinehart contemplates raising his new barn this week.

The Carroll Record.

PUBLISHED EVERY SATURDAY AT TANEYTOWN, MD.
BY THE CARROLL RECORD PRINTING AND PUBLISHING COMPANY.

BOARD OF DIRECTORS:
DR. JESSE ROBERTS, DR. G. T. MOTTER
DR. F. H. BEISS, GEORGE M. BIRNIE,
G. A. ARNOLD, DR. C. BIRNIE, P. B. ENGLAR.

P. B. ENGLAR, EDITOR and MANAGER.

TERMS \$1.00 PER ANNUM IN ADVANCE.

ADVERTISEMENTS will be inserted under contract at the rate of \$2.50 per inch per annum. Rates for Special Advertisements given on application.

FINE JOB WORK a specialty, at lowest rates. Samples and estimates furnished on all classes of work.

CORRESPONDENTS must avoid personal reflections, of a non-complimentary character, and only make statements which can be easily verified. All communications must be signed by the writer's own name, otherwise they will not be used.

SUBSCRIPTIONS will be continued, as a rule, after the time for which the paper has been paid, has expired. Subscribers who wish to discontinue should notify us, or ask their Postmaster to do so. The label on paper contains date to which the subscription has been paid.

ADVERTISEMENTS and contributions for the inside of the paper should be handed in by Tuesday evening to be guaranteed insertion.

ENTERED AT TANEYTOWN POSTOFFICE AS SECOND CLASS MATTER

SATURDAY, JUNE 29th, 1895.

Attention Stockholders!

In accordance with previous notice, the stockholders of the Carroll Record Printing and Publishing Company, will meet at the office of the Editor and Manager, this Saturday afternoon at 3 o'clock (up stairs) for the purpose of electing a Board of Directors for the ensuing year. A report of the business of the Company for the year will then be made, as well as a statement of its present financial condition. A dividend of 3 per cent on the capital stock has been declared.

P. B. ENGLAR.

Editor and Manager.

LARGE ADVERTISERS are the ones who seldom complain that advertising does not pay—moral, increase your space.

WHEN YOU SEE a picture of a handsome young lady in a magazine or newspaper, nowadays, one has to look carefully to see whether it represents a society belle, or a corset advertisement, as both look very much alike.

WHY IS IT THAT Taneytown district never has many candidates on the county tickets? This must mean that our people are modest, as they certainly do not lack ability. There are plenty of good men here in both parties, who would fill our county offices with honor, and we can't see any good reasons why a fair share of the "loaves and fishes" should not come in this direction.

ONE OF OUR county contemporaries perpetrated a rather gruesome error last week, by publishing among the deaths, a notice of a festival for the benefit of a base ball club, and an advertisement of reduced rates by rail to Washington. This is an illustration of the saying that "accidents will occasionally happen in the best regulated families." Not so long ago, one of our city exchanges had a report of some religious body, under the head of Sporting Notes.

IT IS RELIABLY stated that John Lincoln, a near relative of Abraham Lincoln, died last week in the Berks county, Pa., almshouse, at the age of eighty-one years. It seems strange that in this country of hero worshippers, and where patriotism is supposed to abound to a large degree, that even a distant relative of the great Lincoln should be allowed to pass his days in an almshouse and die a pauper. If the statement be true, it is certainly not creditable to either the present descendants of the martyr president, or to the American people.

BY THE CONFESION of one of the principals, it is shown that there is a gang of criminals at work in New York city, whose fiendish business has been to burn buildings in order to secure insurance money. It has long been suspected that the enormous increase in fire losses in the past few years, both in city and country, has been caused by firebugs. This has caused the companies, in many instances, to lose heavily in both dividends and surplus, and to combine in raising rates to meet the situation. Every person who pays for insurance is interested in running down these miscreants, who are entitled to neither mercy or pity.

Volume First.

With this issue, volume first of the CARROLL RECORD closes, and with it, all doubts of the ultimate success of the enterprise seem to have vanished. The paper from its first issue has been well received, and has met with such a measure of encouragement and support, both from the immediate community and the county, that the present management feels that its efforts have been appreciated as fully as could be expected, and that the future may be depended on for still greater success.

As was to be expected from inexperienced hands, mistakes have been made, and unforeseen difficulties encountered; the former have been rectified, and the latter overcome, as best we could. At the outset we stated that our errors would be those of mistaken judgment, rather than of design, and, while it has not been,

and will not be in the future, a special mission on our part to try to accomplish the impossible—to please everybody—we simply ask that we be given credit by the people for honest intentions and opinions, as cheerfully and freely as we respect the opinions of others, even if we cannot agree with them.

The rock on which it was predicted the RECORD would split—partisan politics—has been successfully steered clear of, and the future contains no fears in that direction. We believe now, as we did in the beginning, that the true course for a local paper which aims to accomplish most in the direction of supplying in a general way that which will be for the greatest interest and benefit of the whole people, is best attained by treating the subject of politics in the same manner as any other great public topic, giving important occurrences in that field simply as news matter, and, when comment seems necessary, to give it from an impartial standpoint, without evasion or the injection of extreme personal preference or opinion.

We do not speak boastfully of the result of our first year's work—it is scarcely great enough for that, even if we had such an inclination—but we do look back with satisfaction over what has been accomplished, and feel that to a certain extent the RECORD has fairly earned its diploma—its present mailing list—which contains the names of more subscribers than the Carrolltonian had, which was printed in Westminster with the same outfit now owned by our Company. We can say too, that this result has been attained without any great effort in the way of solicitation, or by the offer of great pecuniary inducements of any kind. The growth of the paper has been steady and healthy, and it will continue to win additional strength, unless all signs fail.

For the future, we promise our patrons that the present standard of the RECORD shall not be lowered, and, as we gain in support and experience, so will we give our friends increased service. There are a number of ideas in contemplation for the improvement of the paper during the coming year—among which is increased size—which may materialize, if the Board of Directors can see its way clear to the adoption of them. All that is necessary is patronage, and the co-operation of the citizens of the county, and the RECORD will close its second, and succeeding volumes, with a standing and reputation such as will be a credit and honor to country journalism.

Whatever has been the true measure of our success, a large portion of it is due to our contributors, both local and otherwise, and we desire to publicly thank our corps of correspondents for their very efficient services during the year, hoping that they may continue as heretofore, to lend us their aid. Particularly are we under obligations to those who have written the several town histories which have appeared in our columns, as their work has possibly been the leading feature of the paper, and has given it a prominence which it would otherwise have taken it much longer to gain.

How is it with us?

The Hyattsville Herald has for its motto, "We must have a water works system." Pocomoke City is also engaged in an agitation for water works. This is as it should be, and every town in Maryland as large as Hyattsville and Pocomoke should have water. Various considerations make it important. A single fire, which could be prevented by a supply of water, may cost a town more than a plant. The prosperity of a town depends largely upon its healthfulness, and nothing is more essential to this than pure water. Town wells are always liable to contamination, and have time and again spread disease.—*Balt. Sun.*

The Country Newspaper.

The Boston Herald, reviewing the recent meeting of the Massachusetts Society for Promoting Good Citizenship and discussing the means by which public spirit in the country towns may be revived, has this to say about the country newspapers:

The country newspaper is an important agency in the cultivation of public spirit, and however humble it may seem beside the metropolitan daily, it has a place in popular education which is too little regarded. While the editor is often not above the rank of a practical printer, there are many persons in most of the suburban towns, clergymen, lawyers, teachers and others, who have the leisure and the ability to use the paper as the vehicle of influence over their fellow-citizens. The country newspaper is usually local in its news and the very people who might make it fresh and suggestive are those who complain most loudly of its meager character. Short articles pertaining to local interests are always welcome in its columns, and the men and women who most desire to make home life in the country rich and influential can best do so by contributing freely to its columns, of what they have in mind. In some places this has been done, and the result in the quickened life of the community has been gratifying.

A town is very apt to be judged by the character of its journalistic representative. If it appears that the people are trying to make it interesting and helpful to the town, and are using it to forward the interests of social and industrial life, the town will get a good name from its newspaper. As a general rule, a flourish-

A Remarkable Cure of Rheumatism

WESTMINSTER, Cal., March 21, 1894.—Some time ago, on awakening one morning I found that I had rheumatism in my knee so badly that, as I remarked to my wife, it would be impossible for me to attend to business that day. Remembering that I had some of Chamberlain's Pain Balm in my store I sent for a bottle, and rubbed the afflicted parts thoroughly with it, according to directions, and within an hour I was completely relieved. One application had done the business. It is the best liniment on the market, and I sell it under a positive guarantee. R. T. HARRIS. For sale by R. S. McKinney, druggist, Taneytown, Md.

\$100 Reward \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer the Hundred Dollar reward for any case that it fails to cure. Send for list of testimonials. Address, F. J. CHENEY & CO., Toledo, O. Sold by Druggists, 75c.

D. W. Garner,

GENERAL AGENT

for Carroll and Frederick counties, Md., and Adams Co., Pa.

Have you Five or more Cows?

If so a Hand Cream Separator will earn its cost for you every year. Why continue an inferior system another year at so great a loss?

Handing is now the only feature of agriculture that is profitable. Properly conducted it always pays well, and must pay you. You need a Separator, and you need the BEST, viz: THE DAVIS HAND SEPARATOR.

TESTIMONIALS.

Taneytown, Md., June 10, 1895.

DEAR SIR: I would like to tell the public some facts about the Cream Separator purchased from you last Spring. It was set up April 30, and I have been using it since.

The gain the first week over the old way was 7 pounds of butter from 6 cows. After we were done skimming the milk which had set 24 hours, it was run through the Separator by the Agent, D. W. Garner, and he took from it 12 inches of solid cream in a gallon paint bucket; this would have been fed to the pigs at 16c per pound. Farmers, count up the gain from 6 cows at a gain of 7 pounds a week, multiplied by 52 weeks equals 364lbs. at an average of 20c, and you will save \$72.80, saving nothing about the washing of 15 or 20 milk crocks, and the warm food you have for the pigs and calves, with the animal heat in it, which is worth 10 per cent. I wouldn't haul my milk to a Creamery when I can get a Separator for \$125.

PROLOMY S. HILTEBRICK.

Frederick, Md., June 4, 1895.

DEAR SIR: I have been using the Davis Hand Separator for the past month, and find it to run smooth, easy and simple in construction, and of first-class workmanship, and no trouble to separate 12 gallons of milk in 15 to 18 minutes. I find it will pay for itself with 10 cows, over old style, in 6 months, without taking into consideration the warm food we have in the milk for our calves and pigs.—A. C. McCARDLELL.

Harney, Md., June 12, 1895.

DEAR SIR: The 140lbs. of milk run through your Davis Cream Separator made 7 pounds of butter, and the same quantity of milk through crocks, made 52 lbs.—EDW. P. MYERS.

Bridgeport, Md., June 11, 1895.

DEAR SIR: I have given the Davis Hand Separator bought of you May 24, 1895, a thorough trial and am very well pleased with it.—M. HUMBERT.

So we might go on giving one testimonial after the other. It is the best paying machine the farmer has. I sell all kinds of Creamery supplies: Butter Workers, Barrel Churns, Rectangular Churns, Butter Prints, Cream Thermometers, Butter Shipping Boxes, &c. For further information call on address D. W. GARNER, General Agent for Dairy Fixtures.

FARM FIELD AND GARDEN

CULTURE OF THE POTATO.

A Summary of the Leading Points in Utilization For This Tuber.

The key to the highest success in potato culture is abundant fertilization with just the right sort of plant food—a gross feeder. The potato can maintain its rank and hungry foliage and produce a big crop of fine tubers only under excessive fertilization, giving the plant an unstinted supply of the food just suited to it. The result of 53 analyses of the ash of the potato (tubers) gives the average of potash which it contains as 40 per cent., phosphoric acid 17 and sulphuric acid 6 1/2 per cent. To produce the potato crop in its perfection potash is required in larger proportion than either nitrogen or phosphoric acid. A study of 60 reports of the largest yields of potatoes grown for the prizes offered by American Agriculturist, in 14 different states, gives some very interesting results.

A summary of the leading points in fertilization for the potato gathered from these experiments makes it appear, first, that coarse, fresh stable manure is not a good fertilizer for potatoes. Yet this does not imply that it is worthless for this crop. At the same time, if used for the potato, it must be applied in a fine, decomposed condition, spread on the surface, fall before the crop is to be planted, thoroughly worked into the soil and supplemented at planting time by from 800 to 1,200 pounds of commercial fertilizer or complete manure. Second, fall manuring is generally a good preparation for the potato crop, but not without the application in spring of wood ashes, lime, plaster or commercial fertilizers. Third, some experience with one's soil and with different fertilizers is necessary to the best results. If one knows from previous experiments whether his soil be lacking in potash, nitrogen or phosphoric acid, it will only be necessary to supply the element wanting. Of these three indispensable elements the soil may be deficient in only one or two. The practical value of soil experiments is the guide they furnish to subsequent cropping. Fourth, one thing seems to have been settled—in nearly all instances commercial fertilizers or complete potato manures furnish the best and most direct food for the crop in most cases and in the cheapest form and almost invariably produce the largest yields. This statement applies only to manufactured fertilizers or home mixtures of the highest grade, as none of the contestants was foolish enough to use low grade goods, which for the potato as for other quick growing crops are often the most expensive in the end though cheap at first cost.

In the method of applying the plant food the reports show interesting details. A few of these will indicate the system of application, the results being among the largest yields reported: 1. Total amount used three tons, two tons broadcast and cultivated in, half a ton put in drills and half a ton distributed along the rows when the potatoes were up. 2. One ton, 700 pounds in furrow, 400 pounds on top of furrow, 400 pounds spread and hoed in and 500 pounds between the rows at the time of hoeing. 3. One and three-fourths tons were used per acre, one ton broadcast on the surface and cultivated in, half a ton in the drills, and 600 pounds applied near the plants at hoeing. 4. One and one-half tons used, 2,300 pounds in drills, 800 pounds around the plants before or when the plants were up. 5. One ton and a half used, one ton in drills before planting, and the rest placed around the plants at the second hoeing. 6. One ton, 800 pounds broadcast before harrowing, 1,200 pounds in and on the sides of the drills and mixed with the surface soil.

Pullets or Hens.

"Pullets excel for eggs, hens for anything else," says a writer for Farm Poultry, who explains as follows: Starting out in the spring of the year, pullets in the average case lay many more eggs than hens and are not so persistent in sitting. In summer the balance is about even, and in the fall the hen, as a rule, lays the first part before she molts, the pullet the last part after she molts. It usually being the case that the pullet is the first molter. This leaves the chances in favor of the pullet as a winter layer.

With the spring hatched pullet a great deal lies in the individual, for some are naturally more enterprising than others, and taken miscellaneous they would not do a bit better during the winter months than an equal number of early molters at any age. Hens throw stronger and more vigorous chicks than pullets, are more experienced and less foolish. Hence a greater percent of their eggs will be fertile. They are better mothers and usually better sitters. In a word, pullets for layers, old fowls for breeders.

Seed Germination.

It has been ascertained by an extended series of experiments that rye and winter wheat will germinate in soil the temperature of which is as low as 32 degrees. Barley, oats, flax, clover and peas will sprout at 35 degrees. The turnip is as cold blooded as the rye and winter wheat, but the carrot needs 38 degrees and the bean 40 degrees before they will make the initial effort to send the life shoot in search of air and light.

Lysol, the New Insecticide.

Lysol has not received much attention as yet in this country, but it has been in use in Europe for some years. Surely it would be worth giving it a trial at some of the experiment stations. This is another substance prepared from coal tar. American Gardening gives, as a formula for making this new insecticide, "four ounces of lysol to 420 ounces of water."

Brighten.

Of the action of certain members of the Massachusetts legislature in forming themselves into a committee to canvass the house against woman suffrage, the Springfield Republican says: "This procedure is disagreeable, no doubt, but woman suffragists must not mistake about its nature—it is simply politics."

Having used Chamberlain's Cough Remedy in my family and found it to be a first class article, I take pleasure in recommending it to my friends. J. V. FOSTER, Westport, Cal. For sale by R. S. McKinney, druggist, Taneytown, Md.

FARM MORTGAGES.

The First Adequate and Comprehensive Report Ever Made on the Subject.

We begin at last really to know something about farm mortgages and the burdening of American homes with debt. Census bulletin No. 98 gives the first adequate and comprehensive report ever made on the subject, and that report refutes statements that have been made and accepted. Here are the facts as gleaned from the bulletin alluded to by the New York World:

There are about 4,750,000 farm families in the country. Only about 900,000 of them have any mortgages at all. And these mortgages, as clearly appears, represent for the most part energy and thrift rather than impoverishment. They are mortgages given for deferred payments in purchasing land or for capital borrowed to enlarge operations. Less than 3 per cent of all the mortgages represent borrowing for expenses or because of poverty. The rest represent profitable business enterprise.

This mortgage indebtedness lies almost wholly north of the Potomac and Ohio line. New York farms are mortgaged for \$138,960,903. Those of Iowa carry a burden of a little more than \$100,000,000; those of Illinois, a trifle less. In Pennsylvania and Kansas the figures fall to about \$75,000,000, in Ohio to \$70,000,000, in Michigan to \$64,000,000, in Wisconsin to \$55,000,000, in Missouri to \$53,000,000, in Nebraska to \$47,000,000, in California to \$46,000,000, in Indiana about the same, in Minnesota to \$37,000,000, in New Jersey to \$25,000,000, South Dakota \$15,000,000 and Vermont and Massachusetts \$11,000,000 each.

Among the southern states West Virginia heads the list with \$5,000,000 mortgage debt. Virginia, the two Carolinas and Louisiana owe between \$3,000,000 and \$4,000,000 each, Mississippi less than \$3,000,000, Arkansas about \$2,000,000, Alabama and Georgia less than \$2,000,000 and Florida less than \$1,000,000.

Cottonseed Meal Fertilizers.

Professor Voorhees of the New Jersey station, writing to The Rural New Yorker, says: Cottonseed meal at present prices is one of the cheapest sources of organic nitrogen at the farmer's command. It is, too, one of the best organic forms, experiments having shown that it is almost as readily available as when contained in what are regarded as the best materials furnishing organic nitrogen. Cottonseed meal contains on the average:

	Per cent.
Nitrogen.....	6.8
Phosphoric acid.....	3.0
Potash.....	2.0

Disregarding the phosphoric acid and potash, the cost of nitrogen in cottonseed meal at \$20 per ton is 15 cents per pound. The phosphoric acid is practically all "available," while the potash is quite as good as that contained in forms free from chlorides. Placing a proper value upon these constituents, the cost would be reduced, for nitrogen, to less than 12 cents per pound. Its best use as a general fertilizer would probably be secured when mixed with phosphates and potash. As a simple mixture for potatoes I would suggest the following:

	Pounds.
Cottonseed meal.....	1,000
South Carolina rock, superphosphate.....	650
Muriate of potash.....	350

This would give a mixture showing:

	Per cent.
Nitrogen.....	3.4
Phosphoric acid.....	5.4
Potash.....	0.75

This is a really high grade material, both in quality and amount of plant food, and one which would cost, at prevailing prices for the superphosphate and potash, not more than from \$23 to \$24 per ton. If not more than 600 pounds per acre of this mixture are used, I would recommend applying in the drill. Where larger amounts are used, part may be applied in the drill and part broadcast.

Smut in Corn.

The smut in corn will reproduce itself the next year if sown with seed. It is a little remarkable that there should have been so much smut last year in view of the character of the season. The commonly received opinion is that wet weather makes a smut year, but we are hearing of a great deal of smut in spite of the abnormal drought. As has been said, the seed of smutted corn will undoubtedly contain smut spores. It is also true that the ground will contain them and make a smutty crop the next season, although perfectly clean seed is procured.

The only way to get rid of smut that we know of, says the Iowa Homestead, is to put land that has grown a smutty crop into some other crop than corn for a year or two. Smut left on the ground will produce smut the next year and in increased quantity if the ground again be put in corn. To get rid of it, therefore, it is necessary to change the crop, and the corn smut will then die out because it cannot subsist on any other host than corn. By cleaning the ground in this way and then getting clean seed smut can be eradicated.

News and Notes.

The Peerless Junior potato is a cross between the Peerless and the Snowflake, yielding like the old Peerless with the fine quality of the Snowflake.

Clover seed is becoming an export product of considerable importance. Vick's Abundance, Early Excelior, American Wonder, Carman Nos. 1, 2 and 3, American Beauty, Maggie Murphy, Vick's Early Advancer, Harvest Queen and Early Pride are novelties to which the attention of potato growers is called this season.

Special claims are made for the new Waite Maine oat.

The new tomato, Liberty Bell, is described as "the earliest, most productive and smoothest tomato ever introduced."

In the town of Southampton, N. Y., there are grown each year over 100,000 ducks.

A Great Man.

"What a perfectly charming man Mr. Twitter is."
"I never heard him say a clever thing."
"No; but he can move about the room without stumbling over the rugs."
—Chicago Record.

Satisfaction is a mild word for the mental state of that man who has banished all sick-leadenings by a single course of Ramon's Tonic Liver Pills. Instead of sallow cheeks and dull eyes he has now rosy cheeks and bright eyes, and in place of a sour stomach he has a healthy appetite and good digestion. Have you never tried this famous remedy? R. S. McKinney, your druggist, keeps it. Get a free sample dose.

As a Doctor Does.

The one great fault with all Liver Pills is that they act suddenly and sharply instead of quietly and continuously. They produce a violent relief and then leave you weakened, with an empty stomach and no appetite for food. This is not what a doctor does.

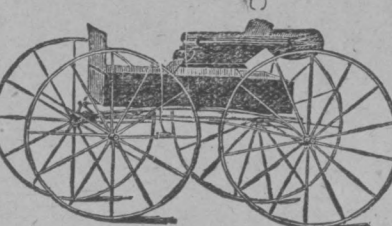

Every physician prescribes a powerful remedy for a disordered liver, but he then orders also a strengthening tonic, which acts as a purifier, restoring the appetite, toning up the system, and making you feel like a new creature.

This is exactly what is done by Ramon's Tonic Liver Pills and Ramon's Tonic Pellets. Two boxes, two separate medicines, and both at the cost of one. A three weeks' treatment for 25c. Ask your druggist about it.

At all dealers, or mail, for 25c., 5 boxes \$1.00.

HISTORY OF NEW WINDSOR.

By Frank J. Devilliss.

PART VI.

In 1830, the building lots on Main or Bath St., belonging to Mr. Atlee had been principally sold, and buildings erected thereon. His possessions terminated at the line now existing between Dr. Geo. H. Brown and Marshall Lambert. The land binding to the east of this line, was at this time densely covered with woods, and was owned by Allen Hibberd, father of the late Josiah Hibberd. As this was the most available space upon which to still further enlarge and improve the town, Mr. Hibberd, in 1830, had it surveyed, and laid out into lots from Dr. Brown's corner to where the Union church had been built—in the rear of Jacob Frounfelder's. These lots, unlike Mr. Atlee's, were sold in fee simple, without the ground rent, and were readily disposed of at remunerative prices. The work of clearing commenced immediately, and the wood-chopper's axe, felling the sturdy oaks, made a merry din, which to present ears, would have been grotesque.

At the time this ground was surveyed, several large oak ovens were on the immediate premises now owned by Dr. Brown. Much of the timber which was cut in clearing, being sold to the mill, and after, was converted into coke, in these ovens, and what use was made of it at that time can be surmised unless it was hauled to Baltimore. Mr. John Schweigart was the original purchaser of the corner lot and built the present residence of Dr. Brown's thereon. This residence was sold to Samuel Hoffman in 1843 for \$825, and he sold it to Henry Haines in 1848 for \$1000. The next lot sold, was purchased by Levi Devilliss. He erected a building for his sister, Mrs. Skiles, which is at present a part of Jacob Frounfelder's residence. The next building was erected by Miles Mitten, which is the one recently vacated by Edwin Snader. Elijah Bond purchased several lots on the building now occupied by Fred. Mayer, was built by him in about 1835. In 1840 Samuel Ecker built a machine shop, the first in New Windsor. This is now occupied by Mrs. Hassett. He conducted a lumber yard in the rear, and was assisted in this by his son, John. In 1843, at the first municipal election held in May following, the following officers were elected; Burgess, Henry W. Dell; Commissioners, Samuel Ecker, Jesse Lambert, and Isaac Bizzard; Collector, Samuel Hoffman. The following is a list of subsequent burgesses in chronological order: 1844—43 Henry W. Dell; 1846—47 Samuel Ecker; 1847—48 Jonas Ecker; 1849—50 Henry W. Dell; 1850—51 Jonas Ecker. During the year 1855 the corporation died out, and lapsed for five years. But in 1860, through the instrumentality of Dr. John P. Buffington and Andrew H. Baker, it was revived, and its limits extended by an Act of the General Assembly of Maryland in the March session.

Its boundaries were then enlarged as follows: "Beginning at a sycamore tree on Dickinson's branch, opposite the foot of Main St., south-east of said branch, thence with the north-east side of the mill dam to Chew's bridge, leaving the dam and bridge outside of the corporation, thence north-east on the west side of the road to the division line between Jesse Lambert and E. W. Englar, leaving said road outside of said corporation, thence with said line to a point directly opposite the line between Andrew H. Baker and Joseph Lambert on the east side of Calvert college, thence from this point northerly through the lands of Andrew H. Baker, and the division line between the said Baker and Hibberd, to the north-east corner of the land of said Baker, a ten pin alley, and westwardly with the lines between said Baker and Hibberd, Frowfelter and others to the lands of D. H. Maynard, thence with a straight line parallel with said Maynard's garden fence, and to said Maynard's corner, thence with a straight line to a sycamore tree, the place of beginning."

The first officers elected under the new charter of greater New Windsor in 1860, were; Burgess, Jacob Roop; Commissioners, Dr. John P. Buffington, David S. Drach, and Vincent Brown; 1861—62 Burgess, Henry W. Gearty; 1863—64 Jacob Roop; 1865—64 James Erhard; 1865—67 Levi N. Snader; 1867—68 Joseph A. Stouffer; 1868—69 Andrew H. Baker; 1869—70 Jesse Lambert; 1870—71 James Lambert; 1871—77 Peter Baile; 1877—78 Charles P. Baile; 1878—84 Peter Baile; 1884—87 Charles E. Norris; 1887—88 Wm. A. Lambert. At a special election held Oct. 17th, 1888, on account of the death of Mr. Lambert, Windsor S. Drach was elected to fill the unexpired term of the deceased; 1889—90 Winfield S. Drach; 1890—91 J. Winfield Snader; 1891—95 Dr. John W. Helm; 1895 Winfield S. Drach; Commissioners, Louis H. Dietman, Isaac H. Dietman, and W. W. Hawk. It will be noticed that Peter Baile served as Burgess thirteen years, the longest incumbency. A street sprinkler was purchased by the corporation in 1894.

ELECTIONS.
For several years prior to 1856 our citizens voted at general elections, in Uniontown. During this year, however, a portion of each of the second, seventh and ninth districts was made into a separate district, and called New Windsor district No. 11. In that year, Buchanan and Filmore were candidates for the Presidency. New Windsor district gave 122 votes for the former and 221 for latter, thus plainly showing the political complexion of the new district. At the next Presidential election in 1860, one of the candidates, Abraham Lincoln, received but one single vote in this district. The voters of this district cast this ballot, very probably secreted himself a fortnight to get breath. At any rate, his identity should have been preserved and honored, and I regret being unable to do either. The community was in a state of ferment then. The turbulent passions of those times cannot be better instanced, than at a general election, held probably in 1864, Daniel Engel and Jonas Ecker were the judges, and both strong Unionists. The rickety laws that then existed, and the candidates for county and state, as well for president.

The day passed quietly away, and the battle of ballots ended, but not the battle of words. After lengthy consultation and debate, it was decided that considering the length of the ticket and the merciless "cutting" of the candidates, the counting would be deferred until the following day. The lights were extinguished, and darkness was supreme, as Jonas Ecker retired from the room with the ballot-box in custody. Soon, he was in his home (now the residence of Mr. Peter Engel) and had lain himself down on his bed of slumber after the arduous duties of the day. But, very soon, "like a thief in the night" came the "trap" after "trap," but thinking why, he awaited, but not long. A sea of voices loud and tumultuous, clamoring for the ballot-box explained the message and the messenger. Opposite voters, suspecting the security of the ballot-box, had agreed to demand it from the hands of Mr. Ecker, and place it in the custody of Mr. Joseph A. Stouffer, the cashier of the Bank. Having no alternative, Mr. Ecker readily acceded, and accompanied the crowd up town to the residence of Mr. Stouffer. After calling him from his slumber, their purpose was made known. They entreated him to take the ballot box and secure it in the bank until morning. Mr. Stouffer was not an officer of the election, and was a Union man too; Mr. Ecker was an election officer, a Unionist, and a gentleman of honor and respectability. After prolonged entreaty Mr. Stouffer reluctantly stowed away the box in the bank, and when the crowd heard the heavy grating of the lock as the key was turned, peace was restored, and there was a calm and solemn joy. Among the leaders of the procession, which waited upon Mr. Ecker for the ballot-box were William W. Stouffer, Geo. W. Fritz and William Steiner.

NEWSPAPERS.

While New Windsor has never developed a full-fledged journalist, it has always been foremost in its appreciation of the highest expression of contemporaneous thought. The newspaper spirit has been evinced frequently by the starting of different periodicals, but the field is too small to admit of prosperous growth and existence. Dr. Roberts Bartholomew, a graduate of Calvert College, edited the first newspaper in our town in 1852. It was called "The True American." It was a weekly paper, and its articles were trenchant and vigorous. The Doctor was a very intelligent man, and his paper was ably edited and well received. This journal and outfit was finally sold to Hamilton Gearty, who conducted it until his death, but unfortunately it languished and died.

In 1856 Josiah Banker, a brother of our fellow townsman, Alfred Banker, started "The Carroll County Herald." This paper was published from the old residence of Jonas Ecker, which was located where the bank building now stands. It existed for a year or so, when Mr. Banker sold the entire outfit to Mr. Jacob Christ of Uniontown, who removed it to that place. We were without a paper until 1880, when a literary magazine, called "The Spectator," was published, edited by E. O. Cooke and F. J. Devilliss. The sale story was written by Prof. James A. Diffebaugh of Westminster. This, of course was too good to last long, and the "Spectator" was discontinued. It took its place. The Herald was edited by W. R. A. Koehl and F. J. Devilliss, and published in the College printing office. It received liberal patronage from the college, town and community. In 1883 it merged with "My Maryland," with Dr. A. M. Jolly, editor, and F. J. Devilliss, corresponding editor. This last little weekly was published a year or more, but followed the way of all its predecessors, "Like a waft of wind that'er me breathed, and was no more."

A Rooster that Actually Lays Eggs.

John Minin, residing at No. 103 South Queen St., is the possessor of a Legion rooster that actually lays eggs. To satisfy himself as to the truth of the story, the reporter called at Mr. Minin's residence to make an investigation. He was shown a full-grown red and brown bird, with long sickle feathers, a drooping comb, and spurs an inch long. Mr. Minin says he several times noticed the rooster going on the nest, and after waiting about half an hour, and each time found an egg, somewhat larger than a pigeon's egg in the nest. This did not convince him that the rooster laid the eggs, so he took him away from the other chickens and penned him in a separate cage. The result was that he found an egg in the coop each day. This settled the matter to his satisfaction. Mr. Minin says the bird is about 6 years old, and that he raised it. It maintained the appearance of a speckled hen up to last April, a year ago, when it took sick and lost all its feathers. It sickened caused a complete transformation, for when its feathers again made their appearance they were of an entirely different color and precisely like those of a rooster. The color of its legs, which at first was blue, changed to a bright yellow, and its comb and spurs grew exactly like those of a male bird. The rooster, or hen, or whatever you may call it, lays an egg each day. It is certainly a wonderful freak of nature.—York Press.

The Stone-cutter Refused.

Kentuckians are always proud of their state in whatever department of human labor they may hold place. Not long ago a widow went to see a marble-cutter to get a tombstone for her late husband. She selected a plain one from his stock, and gave him an inscription to put on it. "Can't do that, ma'am," he said politely, when he had read it. "Why not?" she asked in surprise. "I'm paying for it." "Yes, but I can't put that on. I stretch my conscience a good many times in what I put on a tombstone, but I ain't going to tell a plin in lie when I know it." The widow was greatly shocked and insisted on his explaining what he meant. "Well, ma'am," he said, "you've got here 'Gone to a better land,' and that ain't so, ma'am. There ain't any better land than Kentucky."

A VALUABLE FIND.

After years of study and labor, there has at last been discovered a sure and never-failing remedy. It has been tested on patients, who have despaired of ever being cured, the results have been, in every case, wonderful. Groat's Rheumatic Cure is unequalled as a positive remedy in all cases of Chronic and Acute Inflammation of the Joints, Gout, Lumbago, Sciatica, Neuralgia, especially Ovarian Neuralgia, Rheumatism, and all kindred affections. It is also a valuable Blood Purifier, being especially useful in Eczema, Psoriasis, Scrofula, all Glanular Enlargements and diseases of the Liver and Kidneys. It is absolutely free from all narcotics. Severe attacks are relieved in from one to three days and a positive cure effected in from five to eighteen days. For sale by J. McKellip, Druggist, Taneytown, Md.

When Casey Slugged the Ball.

Oh, you have heard of Mudville, heard of mighty Casey, too! Of the groans and the bleachers As the ball flew by him; how; But you haven't heard the story, The best and the truest of all; Of the happy day in Mudville, When Casey slugged the ball.

"'Twas the day they played the 'Giants,' And the score stood ten to eight; Two men were on the bases, And great Casey at the plate. 'Swipe her, Casey,' yelled the rooters, And the hero dived his car; Three to win and two to tie, And Casey at the bat.

'Mid a hush of expectation, Now the ball flies past his head, Great Casey grips a sickly grin; 'Strike one,' the umpire said; Again the pitcher raised his arm, Again the braceful field; Great Casey was not from the ground, And the umpire said, 'Strike two.'"

"It's a roast," came from the grand stand, "He's bought without a doubt." "He is rotten," roared the bleachers, "Throw the day's work on him; 'I'll break yer face,' says Casey, 'I want one win below me knee; If I'm so next ye blackguard, Ye want live long to see.'"

The next one came like lightning, And the umpire held his breath, He well he knew if Casey missed, 'Twould surely mean his death; But Casey swung to meet it, Backed by all the nerve a gall; Oh, if you had but heard the yell, As Casey slugged the ball!

He caught the piskin on the nose, It cleared the high chair tower, In vain the ballers sought, And Casey's bat was in the air, He stopped awhile to tal', And then amid the deafening cheers He came round in a walk.

And now he keeps a bear saloon, He is Mayor of the town, The people look to see him, From all the center round, And you need not look for Mudville, On the map upon the wall, Because the town's called Caseyville, Since Casey slugged the ball.

Swarming Bees.

All insects, as well as the animal kingdom, have some means of reproducing their like, that their race may not become extinct. Nature and their instincts have taught them how, and the time of season when the means and solar heat can assist them best. Perhaps the wisest and most intelligent of insects is the honey bee. In midwinter, when the mercury drops down to 15 and 20 degrees below zero, they are making preparation to multiply their race in a wise and cunning way. Before the solar heat can assist them they begin, first by only using a small space of comb, perhaps not larger in diameter than a quarter dollar and not containing more than fifty cells, and then direct to the opposite side of the comb the same amount of eggs are deposited. If the cluster is large enough the opposite comb is used in the same way. Now, after the eggs are hatched into grubs and the temperature of the hive so warm, the bees will be enlarged and perhaps the adjoining comb used.

This process is constantly repeated every twenty-one days, every time enlarging the circle. The queen is not so particular when the days begin to warm up, and the solar heat can assist them. The entire hive will soon be used to multiply their number, but the population itself is not sufficient to divide themselves into colonies, unless all things are favorable. They will not divide themselves into colonies by themselves, they are numerous. In our grandfather's time the population of the colony was a sure sign of the colony casting a swarm, and many a day, week and perhaps month, was faithfully watched for the cast of the swarm. In these days all enterprising bee-keepers can tell the very condition of the colony, and whether they are preparing to swarm within eight days or not, by simply opening the hive. An expert can tell the condition of the colony by the noise of the bees without making an examination inside. An expert can also tell the colony to cast a swarm at his command with out dividing.

A colony of bees, in their normal condition, to cast a swarm, must consist of one good, prolific queen, from 50,000 to 80,000 workers, and a few hundred drones. Next there must be a continuous flow of nectar to be gathered, and the bees must have a daily gathering of honey and pollen from one to five pounds. To bring out a natural, prime swarm, it must continue for ten to twenty days, as this is essential for the queen to develop her full laying capacity. She must lay from 2,000 to 3,000 eggs daily for a certain length of time to have the colony in normal condition to cast a prime swarm. Brood must be in all ages, from the egg to the maturing bees, and the queen must use all the comb in the hive and all things must be favorable in the field. If all these things exist, you may look for your bees to swarm, but if they do not, you do your watching in vain.

The "Careless" Creatures.

He came home the other night tired from a busy day's work, and his wife waited till he had got his overcoat off and had sat down. "Did you get that piece of silk I asked you to bring up to-night?" she asked, seeing he had not laid it before her. "Yes, dear, I left it out there in the hall."

"Did you get the pins?" "Yes, dear."

"And the ribbon?" "Yes."

"And Bobbie's shoes?" "Yes."

"And the whisk broom?" "Yes."

"And a wick for the kitchen lamp?" "Yes."

"And some matches?" "Yes; they are with the other bundles."

"And did you see the man about the coal?" "Yes; it will be up on Monday."

"And the man to see the grate in the dining room?" "Yes; he's coming as soon as he can."

"Did you see Mrs. Smith about the sewing society meeting?" "She said she'd come."

"And—oh, yes, did you get a new shovel for the kitchen stove?" "N—no," he hesitated; "I forgot it."

"What!" she cried. "What did you forget? You know I need that shovel, and I told you about it the very first thing when you went down town this morning. I do think men are the most forgetful and careless creatures that ever lived." And she flopped out to see about supper.

Some time ago I was taken sick with a cramp in the stomach, followed by diarrhoea. I took a couple of doses of Chamberlain's Colic, Cholera and Diarrhoea Remedy and was immediately relieved. I feel it the best medicine in the market for all such complaints. I have sold the remedy to others and every one who uses it speaks highly of it. J. W. STRICKLER, Valley Center, Cal. For sale by R. S. McKinney, druggist, Taneytown, Md.

M. Schneebberger's
33 EAST MAIN STREET, BALTIMORE
TRADE PALACE
"JUNE"
Slaughter Sale
OF
High, Medium and Low
Priced Merchandise.

Will hold the balance of power during this sale. We must unload now—right in the very heart of the season—the very time when there is a chance for us to sell and you to buy. Don't overlook this appeal; it is made in a true and honest sense, and means even more than Printer's Ink can tell. Read! Reflect! And then come and buy.

SILKS.
There's a peculiar magic about a Silk Dress or Waist. When you've worn one once, you are never satisfied until you have 'em constantly. That's why it pays to save as much on 'em as possible, and if you come to us we will make your savings possible.

The 60c. Habutai and Check Silks we've been selling at 50c, now 29c.
The 65c. Fancy Effect we've been selling at 48c, now 33c.

WASH GOODS.
If you have the same ambition as most people these days—to keep cool—we can assist you toward the attainment you desire. If you wear a pretty "Wash goods" Dress you will not only feel cool, but others will think you so, also.

Beautiful Crepes, in plain or fancy, at 11c.
Lovely Dimities, worth 15 and 18c, at 11c.
Nobby Lawns and Challies, 10c.
Stylish White Duck Suitings 10c.
Newest Pique, 14c.

MEN'S GOODS.
When a man buys furnishings he expects furnishings. He expects quality, beauty and finish—he don't bother much about the price. Therefore we seek to attract them by the low prices of ours. We give the quality, and the beauty, and the finish, too.

15 dz Men's Laundered Percale Shirts, worth 75c, at 43c.

One lot Men's Laundered Percale and Striped Shirts, worth \$1.00; during this sale at 58c.

1895. THE SUN! 1895.
BALTIMORE, MD.

The Paper of the People,
For the People and with the People

HONEST IN MOTIVE.
FEARLESS IN EXPRESSION.
SOUND IN PRINCIPLE.

UNSWERVING IN ITS ALLEGIANCE TO
RIGHT THEORIES AND
RIGHT PRACTICES.

The Sun publishes all the news all the time, but it does not allow its columns to be degraded by unclean, immoral or purely sensational matter.

Editorially, The Sun is the consistent and unchanging champion and defender of popular rights and interests against political machines and monopolies of every character, independent in all things, extreme in none. It is for good laws, good government and good order.

By mail 50 cents a month, \$6 a year

THE BALTIMORE WEEKLY SUN
The Weekly Sun publishes all the news of each week, giving complete accounts of all events of interest throughout the world. As an Agricultural paper the Weekly Sun is unsurpassed. It is edited by writers of practical experience, who know what farming means and what farmers want in an agricultural journal. It contains regular reports of the work of the agricultural experiment stations throughout the country, of the proceedings of fairs, clubs and institutes, and the discussion of new methods and ideas in agriculture. Its market reports, Poultry Department and Veterinary column are particularly valuable to country readers. Every issue contains Stories, Poems, Household and Puzzle Columns, a variety of interesting and instructive selected matter and other features, which make it a welcome visitor in city and country homes alike.

One dollar a year. Inducements to getters up of clubs for the Weekly Sun. Both the Daily and Weekly Sun mailed free of postage in the United States, Canada and Mexico. Payments invariably in advance.
