Liver pills have their good and bad side. They cleanse the bowels and clean out the system, but they leave the patient weak, exhausted and unstrung, with no appetite and no strength.

If you were to go to a physician he would tell you that your liver pills were all right but that they did not go far enough. You need something else to restore the appetite, repair the waste, purify the blood and build up the system. He would give you a tonic.

We supply you with the regular physician's medicine for an entire treatment of nearly three weeks. There is one small case of ten of the Liver Pills (the finest in existence) and there is another box containing fifteen of the Tonic Pellets. You get them both for 25c.
