Vol. 6., No. 3.

TANEYTOWN, MARYLAND, SATURDAY, JULY 15, 1899.

\$1.00 Per Year.

Local and Personal.

This is meant to be a purely LOCAL NEWS column, to which the RECORD invites contributions. Events of local importance, whether current or in the near future, accidents, cases of extreme illness, society and church happenings, marriages, deaths, etc., should be reported to the RECORD in writing, otherwise they may not appear.

Harry L. Feaser, a popular teacher of this district, is suffering with inflammatory rheumatism.

John E. Smith, one of the purchasers of lots on Middle street, has staked off a dwelling and will commence building at once.

The fire that was seen from this neighborhood, on Wednesday afternoon, was the barn of Mr. Dougherty. See Double Pipe Creek items.

Henry Galt, treasurer of the Taneytown Savings Bank, will attend the Maryland Bankers convention which meets at Ocean City next week.

James Neely has removed the stone wall and paling fence from the front of his Baltimore street property, and will replace it with a handsome iron fence.

The Fire Company made several practice runs, on Wednesday evening making plug connections, and demonstrated the fact that they can "get there," even if some of the horses fall.

Charles A. Elliot has repaired the gentleman's waiting room of his hotel which adds greatly to its appearance. Clayton H. Harner has accepted the position of clerk and bar tender at the house.

George P. B. Englar, of New Windsor, in renewing his subscription to the RECORD, says: "I have been receiving your paper for the last six months, and must say that I think it is in my home to stay."

Colonel Wm. A. McKellip and wife sailed for Bremen, on Wednesday, the trip being made for the benefit of Mrs. McKellip's health. On their return, it is said that they will again locate in Westminster.

Prof. White, a blind musician and piano tuner, in the employ of J. M. Birely, of Frederick, has been here during the week assisting Mr. Boller, who has charge of Birely's branch store in this place. The professor is a brilliant performer.

The following Taneytown pastors enjoyed an outing, on Thursday, at the Gettysburg battlefield: Revs. James Cattanch, J. O. Clippinger, A. D. Bateman and Charles A. Britt. It was a regular basket picnic affair and very much enjoyed.

Mr. and Mrs. Robert S. McKinney left on Monday for Ocean City, at which place the annual meeting of the Maryland Pharmaceutical Association was held this week. Mr. McKinney is President of the Association and delivered the customary address.

A petition to the School Commissioners, for a High School for Taneytown, was circulated here a few days ago and received numerous signatures. It very concisely enumerated our claims for the school, presenting the matter in such a forcible light that we do not see why this town should not be the next in the county to be given High School advantages.

Mrs. Samuel Birely, of Thurmont, a sister of J. Hanson Kemp, of this place, was buried at Haugh's church, July 4th, her death having occurred on the 1st. She is survived by five children, as follows: Mr. Samuel M., and Dr. Morris A. Birely, of Thurmont; Mrs. Wm. Dutta, of Gettysburg; Mrs. Robert Koons, of Baltimore; and Mrs. Kissinger, of Maria Furnace, Pa.

Last Saturday morning, Ptolomy S. Hiltzbrick, of this district, met with an accident which resulted in a dislocated shoulder and a number of severe bruises. He had gotten into his cart, near the square, and before gathering up the horse, hoisted an umbrella which he had been carrying, and it ran at a rapid gait, and in making the turn into Emmitsburg street, the vehicle was upset, throwing Mr. Hiltzbrick out with great force, with the result as stated. Drs. Sess and Birnie reduced the dislocation, which was a bad one, it being necessary to administer chloroform.

On Wednesday morning, Mary, daughter of Amos Flickinger, of near Kump, who has been of unsound mind for some time, wandered away from home, no knowledge of her whereabouts being ascertained by her friends until Thursday, when it was learned that she had been apprehended at Mrs. A. Warner's near Winter's church, and removed to Westminster by the sheriff. Naturally, her relatives instituted a search, and were fearful that some injury had overtaken her, owing to her mental condition. She will likely be placed in some institution for the treatment of the insane.

Church Notices.

Rev. Jesse Shreve will preach in the Uniontown M. P. church, Sunday at 10.30 a. m. and Rev. George Englar, in the evening, at 8 o'clock. Rev. B. W. Kindley, pastor, is on a brief vacation.

Uniontown Church of God. Sabbath school at 9 a. m.; preaching at 10.30. A special subject in the evening at 7.30. "The miracle of the cure of the deaf man." At Frizzellburg at 2.30.

Regular quarterly communion service will be held in the Presbyterian church, next Sabbath morning at 10 o'clock. A full attendance is requested.

Exchange of pulpits has been arranged between Rev. L. F. M. Myers and Rev. Robt. L. Patterson for Sunday, July 16th. The former will preach morning and evening in St. James' Lutheran church, Union Bridge, and the latter in St. James' Lutheran church, Frederick.

COUNTY AND STATE.

News Notes of General Interest from Various Sources.

Union Lodge No. 57, I. O. M., will hold their annual picnic in Gilbert's grove, at Uniontown, on Saturday, July 22nd.

Mrs. Ann Bowers and Mr. Charles Bowers, of York, Pa., are spending a few weeks visiting Mr. Wm. H. Hess and family, of Double Pipe Creek.

Elmer W. Fleagle, formerly of this section, now of Yonkers, N. Y., is a guest of Mr. William Swart of the Tenbrook House, Ulster Co., N. Y., where he intends to spend his vacation.

Harrisburg Council will pass an ordinance to prevent the free distribution of sample patent medicines, on the ground that much harm results from their use by persons without any knowledge of medicine or how to use it.

Rev. Dr. Luther Kuhlman returned to Frederick, from a visit to his father, at Martinsburg, Neb., the scene of the recent terrific cyclone. Dr. Kuhlman says the work of the cyclone is almost beyond description, the home of his father being a complete wreck, but fortunately none of the family received serious injuries.

Mr. C. E. Birely, Ladiesburg, Maryland, proprietor of the Vendemont Hotel, has a homing pigeon "Red Jacket," only nine months old, that was liberated at East Point, Georgia, on June 30th, and was home on the morning of July 4th, flying a distance of 700 miles. Since May 1st, this bird has flown over 2500 miles in the different races, and won a diploma in each one.

Governor Lowndes and Attorney General George R. Galt, Jr., have accepted the invitation of Governor Sayres, of Texas, which invitation has been extended to the governors and attorney generals of all the states to attend the anti-trust convention which will meet in St. Louis, Mo., on September 20th, next.

A statement of Westminster's financial shows that for the fiscal year ended May 15, 1899, the total expenditures were \$7,507.04 and receipts, \$18,582.26. It was necessary to borrow \$6,860 for street improvements, \$9,670.61 being spent for this item alone. The liabilities of Westminster are \$25,000 bonded indebtedness, \$6,233 floating indebtedness, a total of \$31,233.34, with total assets of \$11,445.22.

In a criminal prosecution recently tried in York, Neb., the jury, after a brief deliberation, returned the following remarkable verdict: "We, the jury in the above named case, do not believe one word that the witnesses have sworn to; neither do we believe that any of the attorneys have spoken the truth, nor that either of them could do so even if he should care to take the trouble to try."

Frank Liddle, one of the four men who broke out of Frederick jail, was arrested in Hagerstown Saturday morning by officer Brill. He was brought to Frederick Saturday night. He said they all four went as far as Steelton, Pa., when he boarded a freight and was carried to Hagerstown. He said they were to meet in the stockyards at Pittsburgh Sunday and continue on to the West.

The Baltimore County Union, had the following notice of a well known citizen of Carroll county, in its issue of last week: "Mr. Thomas Tipton, of Hampstead, Md., who has held the office of justice of the peace continuously since 1861, was a visitor to Towson on Wednesday. He is also known far and wide as a conveyancer and a sort of 'fireside lawyer.' It is said that not a single decision rendered by Mr. Tipton in his official capacity has ever been set aside or reversed by the higher courts."

Gen. Joseph Wheeler is as happy as a boy with his first lovers, or a girl who has just snubbed a man she knows loves her. He has been ordered to the Philippines for duty and will sail from San Francisco on the 20th inst. He says he will not resign his seat in the House as he expects the campaign will be short and successful and that he will be back before Congress meets. Others say that if he returns by the time Congress meets, he will have to leave before the fighting is finished, and that is about the last thing he would wish to do.

A resident of the Klondike, writing to a relative in Hagerstown, says: "The number of idle and hopelessly poor people here is estimated at 20,000. We have had nice warm weather since about the middle of March with a few cold days. The nights are cool. Flour is now \$6 to \$7 a sack, sugar \$1 a pound, canned milk \$1.25 a can, canned goods \$1 to \$1.25 a pound, dried fruits and vegetables 30 to 40 cents, fire wood \$16 to \$20 a cord, soft coal \$8 a ton, horse feed \$6, brooms \$2.15, mining shoes \$9 to \$15 a pair, fresh meat 50 to 75 cents a pound, fresh fish \$1 a pound, apples and oranges 50 cents apiece, eggs \$2.50 a dozen, lemons \$4 a dozen."

MARRIED.

WHITMORE-MCKINNEY.—On July 9th, 99, near Union Bridge, by Elder E. M. Senseney, Mr. John W. Whitmore to Miss Emma McKinney.

DIED.

Obituaries, poetry and resolutions, charged for at the rate of five cents per line. The regular death notices published free of charge.

BIRELY.—On July 1st, 99, in Thurmont, Mrs. Samuel Birely. Interment on the 4th, at Haugh's church.

TANEYTOWN EXTENDED.

The Survey and Sale of New Building Lots.

The laying off and sale, of over twenty lots, within a week, in Taneytown, is quite an event in its history, and one not likely soon to be repeated. That such a transaction was possible, is simple evidence of the confidence of the purchasers in the future of the place, as well as a matter of satisfaction to our citizens in general. As is usually the case, a considerable number of the lots were bought for speculation, but it is probable that the new owners will not hold for a big advance, as that method has not heretofore proven wise or profitable.

The new addition is desirable as a residence section, and has been about as well laid out as could have been done. The new street—temporarily, at least, named High street—runs east at right angles with the Littlestown road, until it intersects Middle street extended, the lots sold lying on both sides of these streets, the whole number offered being sold at private sale, the most of them on last Saturday.

The following were the purchasers. On Middle street, west side, Ezekiah D. Hawk, one lot; John E. Smith, two lots; Geo. H. Birnie & Co., two lots; east side, about one acre, to P. B. Englar. High street, north side, Dr. G. T. Motter and Edward Kemper, nine lots; Geo. H. Birnie & Co., one lot; south side, James B. Galt, two lots; Motter and Kemper, three lots, and Geo. H. Birnie & Co., one lot. From present indications, a number of the lots will soon go into other hands, as there is a demand for them from persons who desire to build. Daniel Fair, John J. Crapster and James Reinhold have bought lots, each containing nearly four acres, along the Littlestown road, beyond High street.

A Free Scholarship Contest.

Mandamus proceedings have been instituted against the trustees of Western Maryland College, by F. Webb Griffith, through his father and next friend, Louis A. Griffith, of Prince George's county, to compel them to accept him as a student at the college under a free state scholarship. The petition alleges that F. Webb Griffith, who has been a student at Western Maryland College since September, 1898, presented his certificate of appointment by the School Commissioners of Prince George's county, approved by Senator W. B. Claggett to the trustees of the college, and has given his bond, with security, which has been approved by President H. L. Lewis, but they have refused to accept. The certificate of appointment, with the bond attached, is exhibited. It is signed by the School Commissioners and has the signature of W. B. Claggett, Senator from Prince George's county, approving the appointment.

The answer of the trustees recites that the college is not a party to the contract, but is willing and ready to receive and furnish any one who is duly appointed. It admits that the certificate of appointment and bond were received, but that a few days later, which was in April, 1899, a letter was received by President Lewis from the president of the School Board of Prince George's county, protesting against the appointment of Griffith and demanding that his name be erased from the certificate. A telegram was also received from Senator Claggett disavowing his signature to the certificate. The answer also recites that a certificate of the attending physician of Senator Claggett was received stating that at the time of signing the certificate of appointment the Senator was ill and was incompetent to know what he was doing.

The hearing of the case will be before Judge I. Thomas Jones. Messrs. Bond and Parke will represent Griffith, and William H. Thomas the college.

C. E. at Devil's Den.

On Tuesday, July 25th, 1899, the Adams County C. E. Union will hold their annual open air assembly and re-union at Tipton's Park, (Devil's Den) on the battlefield of Gettysburg. Arrangements have been made to make this the best meeting yet held. Prof. and Mrs. J. J. Lowe, of Philadelphia, will have charge of the music and will sing a number of duets during the day. A large choir composed of the best singers in the societies will assist in the music, also a large orchestra with Prof. H. J. Taylor as director.

A special effort is being made to make the junior rally a success. An orchestra composed entirely of children, with Prof. A. Gardner, as director, will assist in the music at the junior rally, with cornet, flute and violins.

A number of eminent speakers have been secured for the day. Rev. H. C. Allen will deliver the address of welcome. Rev. N. E. Yeiser, of the Centitor Mission Field, will speak on "Mission Work in India." Rev. C. A. Oliver, State Sup't of Evangelistic Work, will address the junior endeavorers. Rev. Roop, president of Lebanon Valley College, of the United Brethren church, will speak on "Christian Citizenship," and Rev. Geo. W. Enders, D. D., will speak on the part of our pledge, "I promise to be true to my own church."

A number of Sunday schools have decided to attend the re-union, and all members of Sunday schools, Epworth Leagues, other young people's societies, and everybody interested in work for young people, are invited to attend. COMMITTEE.

FROM-DETROIT '99.

Sketches of the Trip, the City and the People.

Amid the goodbyes and well wishes of numerous friends left behind, the Maryland delegation pulled out of Mt. Royal Station at 6.30 p. m., July 4th, with 119 on board. It was quite a relief to get away from the noise of the "glorious Fourth." Very little can be told about the first part of the trip, as we spent the time sleeping, while the train was speeding onward.

About 9.30, devotional exercises were held in the different coaches. Rev. Dougherty, of Trappe, Talbot county, had charge of the services in car B.

Youngstown, O., the first large city we saw after arising in the morning, is some relation to Pittsburgh, in regard to smoke. Quite a number of furnaces and factories are here, with piles and piles of pig-iron.

At Cleveland, we boarded a D. & C. steamer—city of Cleveland. The Cleveland delegation joined us here. Lake Erie is a beautiful sheet of water. The coloring is wonderful. Light green, dark green, blue, changing to purple. About 2 o'clock in the afternoon a storm arose, and we had the delightful experience of a storm on Lake Erie.

Owing to the rain we were unable to get a good view of the scenery along the Detroit river, which we were told is very fine. We were fortunate in having in our party a gentleman who is a native of Detroit. He tried to show us the interesting points along the river.

On arriving at Detroit we went directly to our headquarters, Central Christian church, where we were assigned to our homes. Detroit is the most beautifully clean city we have ever seen. The street cleaners are busy from morning till night.

The homes of Detroit are lovely. Nearly all are detached houses, and have very smoothly kept lawns around them. The Detroit churches are wonderful pieces of architecture. The people have welcomed us with open arms. They have thrown wide the doors of their homes and churches, and have given us everything their city affords.

The meetings are held in two large tents accommodating about 1000 each, with special meetings in the churches. The favorite convention hymn is "Showers of Blessings," which has been particularly appropriate, as we have been favored with an abundance of rain. R. H. L.

Presbyterian Reunion.

All the arrangements for the Presbyterian Reunion, which is to be held at Pen-Mar on the 25th of July, have been completed. This re-union promises to be the largest of any yet held. Apart from the place, which is one of the most beautiful and popular resorts in the country, the program is most attractive. Three speakers have been secured. They are the Rev. W. W. Moore, D. D., of Richmond, Va., the Rev. R. G. Ferguson, D. D., of New Wilmington, Pa., and the Rev. George B. Stewart, D. D., of Harrisburg, Pa. Dr. Moore is professor of Hebrew literature in the Union Theological Seminary, of Richmond. A letter will be "Presbyterianism and Education." Dr. Ferguson is the retiring Moderator of the United Presbyterian church and the president of Westminster College. His subject will be "Presbyterian Breadth and Narrowness." Dr. Stewart is pastor of the Market Square Church, Harrisburg. His subject will be "The Working Church."

The music will also be a special feature of this re-union. There will be a trained chorus choir of the leading singers and soloists of Harrisburg, under the leadership of Prof. E. J. Deever, instructor in the Harrisburg Conservatory of music. There will be special trains on the railroads and low rates of fare.

Orphans' Court Proceedings.

MONDAY, July 10th, 1899.—Letters of administration on the estate of Angelina Bowers, granted unto Samuel D. Bowers.

Letters of administration on the estate of Elizabeth Forsythe deceased, granted unto Henry Galt, who returned inventory of debts.

Final ratification of the sale of the real estate of Susanna Evans.

TUESDAY, July 11th, 1899.—Francis J. Shriner and Mary E. Norris, executors of Peter H. Shriner, reported sales of personal property, bonds, &c., and settled second and final account.

Francis J. Shriner, administrator of Rebecca Shriner, returned inventory of money.

Rosa Belle Mahala, administrator of Noah D. Mahala, returned list of sales of personal property and settled first and final account.

Margaret Erhard, administratrix of James Erhard, received orders to transfer mortgages, &c., and settled first and final account.

Ground-glass in his Soup.

Monday's American contains the following, which, it true, justifies the action taken:

Mrs. Catharine Cornell, of Emmitsburg, made an attempt on the life of her husband, Jesse Cornell, on Saturday last, by putting ground-glass in his soup. By a timely discovery he refused to eat. She has kept a loaded gun around, supposedly for the purpose of taking his life. Her little five-year-old child was burned in a horrible manner, the child saying its mother set fire to it with a match. Her husband, with two others, appeared before justice this morning, testifying to the above. She was adjudged incapable of taking care of her child and as being unsafe, with regard to life and property. She and the child were committed to Montevue, Frederick.

OUR HAVANA LETTER.

American Occupation of Cuba Progressing Quietly.

I am a little tardy in writing, this week, owing to the fact that yesterday was "The day we celebrate." Like all good Americans, I laid every care aside and rejoiced in the anniversary of the natal day of the great American Republic. It was worth while being in Havana to see how joyously the day was observed. Having been growing tobacco, it is used only for chewing, and is shipped largely to Europe. We have five types of cigar tobacco, which go by the names of Collected Seed Leaf, Sumatra, from department at Washington, D. C.; Sumatra, from Florida; Vuelta and Havana, from Henderson.

These tobaccos were originally imported, perhaps in some cases directly from South America. In spite of the efforts of our station to do so, we have been unable to retain their original flavor, but we may be able to find out some way, in the future, that will enable us to accomplish the desired end. Maryland tobacco is planted in rows 3 feet apart, each way, while the Cuban tobacco is planted from 2 by 2, down to 3 by 1 feet apart. We have two ways of curing tobacco; one is called air curing, and the other, flue curing.

The latter has the advantage, on account of being able to secure an even temperature during the curing process, as the latter way, however, is used and burned in a kind of oven and watched day and night. A thermometer is hung up in the house and the heat is regulated at a temperature of 90 degrees. The seed is sown in a hot bed, early in the Spring, and when the plant is large enough it is set out in the field, where it is bagged and cultivated about in the same way as corn. We go over it at least once a week in order to keep it clear of weeds.

We cut a bunch of wheat out of each of our experiment plots, as well as our variety wheat, for the purpose of putting it on exhibition at the Paris Exposition in 1900. Our dairyman, Prof. Doane has obtained leave of absence for two months, for the purpose of canvassing six states in the Northwest, his business being to gather a fair sample of the cereals in the states, which he has been selected to canvass, for the purpose of putting them on exhibition at Paris. His method of selecting wheat, however, is different from ours, we having cut it close to the ground, whereas he has pulled up by the roots and carefully washed in water.

Prof. Johnson has secured another assistant, in place of Prof. Sanderson, who resigned to accept a position in the Entomological department at Washington. He comes well recommended, and promises to be a valuable assistant; in fact, Prof. Johnson will not have anything but the best. As is well known, the island around and near Washington produces an immense amount of vegetables and small fruits, and we cannot help but think that the marketing of it is a slavish business.

The Station buildings lie directly along the pike, and there is scarcely an hour in the night that we cannot hear wagons going to market. It is no rare occurrence to see a number of teams going in the direction of Washington anywhere, from 4 to 5 o'clock in the evening, up to perhaps midnight, they having already in some cases come 4 to 5 miles, with eight miles more to drive before they reach their destination. The wagons are hay and other feed in their wagons, and blankets for themselves; this becomes necessary in order to get a good start when they wish to retail their goods.

The men who wholesale their loads do not have to slave themselves so much; to make things worse for those who sell, the Government has issued an ordinance in Washington requiring them to keep their horses to their wagons, so as to be able to move them at a moment's notice in case of fire. Before this precaution was taken the wagons caused serious inconvenience in a number of cases of fires, on account of being in the way of the firemen.

In returning from market, the truckmen are so worn out that they notice a great many of them asleep in their wagons, in fact in some cases, their horses have turned in at the station before their owners were aware of it. We are informed that they have in most cases paid for the use of the station, but that the owners have not been paid for the use of the station.

Captain Silvester met with a misfortune, on Saturday last, when his horse was killed by a runaway. He was spending the greater part of his time with his family in St. Mary's county, where he has two or more farms. They had heavy rain, which caused the streams to be very much swollen, one of which he undertook to ford, and not only he, but both his horse and buggy, came very near being carried down the stream. To use his own words, "The Trustees came very near being under the necessity of electing another President."

I see by the RECORD that the Farmers' Club, at Copperville, is making preparations for a big day on the 29th of July. We hope that they will have a good time and be well repaid for their trouble. We think that the editor of the RECORD is still a little mixed with regard to our election here, and that he is wrong in his opinion. He would get slightly wrong, for it would take a Philadelphia lawyer to settle the status of one or two men here. E. O. G.

COLLEGE PARK NOTES.

Tobacco Culture Described, and other Interesting Items.

We take notice that the editor of the RECORD was not fully informed with regard to the cigars which we sent him; the cigars were made from tobacco raised here at the college. We planted several kinds of tobacco here. The regular Maryland tobacco is a luxuriant grower, and has to be planted wider apart than the smaller growing tobacco; it is used only for chewing, and is shipped largely to Europe. We have five types of cigar tobacco, which go by the names of Collected Seed Leaf, Sumatra, from department at Washington, D. C.; Sumatra, from Florida; Vuelta and Havana, from Henderson.

These tobaccos were originally imported, perhaps in some cases directly from South America. In spite of the efforts of our station to do so, we have been unable to retain their original flavor, but we may be able to find out some way, in the future, that will enable us to accomplish the desired end. Maryland tobacco is planted in rows 3 feet apart, each way, while the Cuban tobacco is planted from 2 by 2, down to 3 by 1 feet apart. We have two ways of curing tobacco; one is called air curing, and the other, flue curing.

The latter has the advantage, on account of being able to secure an even temperature during the curing process, as the latter way, however, is used and burned in a kind of oven and watched day and night. A thermometer is hung up in the house and the heat is regulated at a temperature of 90 degrees. The seed is sown in a hot bed, early in the Spring, and when the plant is large enough it is set out in the field, where it is bagged and cultivated about in the same way as corn. We go over it at least once a week in order to keep it clear of weeds.

We cut a bunch of wheat out of each of our experiment plots, as well as our variety wheat, for the purpose of putting it on exhibition at the Paris Exposition in 1900. Our dairyman, Prof. Doane has obtained leave of absence for two months, for the purpose of canvassing six states in the Northwest, his business being to gather a fair sample of the cereals in the states, which he has been selected to canvass, for the purpose of putting them on exhibition at Paris. His method of selecting wheat, however, is different from ours, we having cut it close to the ground, whereas he has pulled up by the roots and carefully washed in water.

Prof. Johnson has secured another assistant, in place of Prof. Sanderson, who resigned to accept a position in the Entomological department at Washington. He comes well recommended, and promises to be a valuable assistant; in fact, Prof. Johnson will not have anything but the best. As is well known, the island around and near Washington produces an immense amount of vegetables and small fruits, and we cannot help but think that the marketing of it is a slavish business.

The Station buildings lie directly along the pike, and there is scarcely an hour in the night that we cannot hear wagons going to market. It is no rare occurrence to see a number of teams going in the direction of Washington anywhere, from 4 to 5 o'clock in the evening, up to perhaps midnight, they having already in some cases come 4 to 5 miles, with eight miles more to drive before they reach their destination. The wagons are hay and other feed in their wagons, and blankets for themselves; this becomes necessary in order to get a good start when they wish to retail their goods.

The men who wholesale their loads do not have to slave themselves so much; to make things worse for those who sell, the Government has issued an ordinance in Washington requiring them to keep their horses to their wagons, so as to be able to move them at a moment's notice in case of fire. Before this precaution was taken the wagons caused serious inconvenience in a number of cases of fires, on account of being in the way of the firemen.

In returning from market, the truckmen are so worn out that they notice a great many of them asleep in their wagons, in fact in some cases, their horses have turned in at the station before their owners were aware of it. He would get slightly wrong, for it would take a Philadelphia lawyer to settle the status of one or two men here. E. O. G.

Birthday Surprise.

(For the Record.)
The family and friends of Mr. Geo. F. Sites gathered together at his home near Fairfield, Pa., on Thursday, July 13th, and took him completely by surprise. He had just arrived at his fifty-ninth milestone, and is still enjoying good health. The old gentleman was somewhat disconcerted when so many buggies drove up at the same time, but being an old veteran, he did not run, and finding they were friends, he surrendered to their attentions.

After dinner, the table was loaded with an abundance of good things to eat, which the guests had brought with them, and to which all did ample justice. The afternoon was spent in social intercourse, and in due time all started for home, having enjoyed a very pleasant day, and wishing Mr. Sites many returns of the same day. He was the recipient of many presents.

Those present were: George F. Sites and family, Rev. J. F. Mackley, Mr. Louis Sites, Milton Hull and family, and James Krive and wife, of Fairfield; John C. Sites and wife, of Virginia Mills; James B. Boyd and wife, and Sherman Sites and family of Taneytown; James M. Boyd and family, of Emmitsburg; James Hoffman and wife, and Mrs. Frank Hoffman, of Smithsburg; and John H. Sites and family, of Ortanna.

Correspondence.

All communications for the RECORD must be signed by the writer, and must necessarily for publication, but as an evidence that the matter and facts are legitimate and correct. Items of a miscellaneous character are not wanted.

Harney.

Last Sunday morning, while Mr. William Weaver's son, Edward, was working in the yard, he found a piece of the lock broke off, flew back and struck the young man in the eye. It is feared that the wound will cause at least a partial blindness.

Through the efforts of Hon. D. J. Hesson, Mr. Thurlow W. Hull has received a free scholarship at St. John's College, Annapolis. Mr. Hull is a young man gifted with an unusually bright mind, and is certainly deserving of encouragement. We are authorized to say that while he is not certain that he will accept the scholarship, he certainly appreciates the personal kindness of Mr. Hesson in his behalf, and extends to him his hearty thanks.

Mr. Andrew Stonestifer informs us that he will run his big hydraulic cider press, on all working days except Friday and Saturday of each week, during the season. On these two days he positively will not run, because he has plenty to do to clean up his machinery, etc., on the above named days. On Wednesday and Thursday are poor days to make cider for butter boiling, anyway.

On last Sunday evening, while Mr. J. Hill was riding past the windmill, a dog ran out and frightened his horse which commenced to kick and broke in the front part of the buggy, striking both shafts and bent up several boys in the top. Warren thinks that the dog bit the horse in the heels, and also thinks that he was kicked on the forehead; at least he has a large bump on his forehead. His arm was also badly skinned up.

Mr. Frank Shryock, our popular steam thrasher, had a horse that was much afraid of steam. On Tuesday it ran away and broke things up generally; this being about the third runaway he has had, he decided that it was not wise to risk his life any longer, and on Wednesday he traded him off, for one that is not afraid of steam.

On Wednesday afternoon, while Mr. J. Hill was riding past the windmill, he had the misfortune to fall from the top of the load, down on the floor. He said that he threw his weight into the windmill, and he fell on his head, when the rope broke and down he went, head foremost. He is bruised up considerably, but his escape from serious injury was almost a miracle, owing to the distance he fell and the bareness of the barn floor.

On Thursday morning, we witnessed something that our oldest citizens have never seen before. The United Brethren, Reformed, Presbyterian and Lutheran ministers of Taneytown, all passed through this place on their way to the annual conference. This shows that the reverend gentlemen are all in harmony, and that all are working together for one great object—that of winning the world for Christ.

Double Pipe Creek.

Mrs. Joseph Kemler, of Hagerstown is visiting her aunt, Clara Young. Her husband, who is one of the Western Maryland Railroad messengers, is under treatment at a hospital in Baltimore, this week.

On Wednesday evening, the barn on the farm of Charles Daugherty, 2 miles southwest of D. P. Creek, was struck by lightning,

Our Home Circle.

Original articles solicited for this department, whether of a social, decorative, culinary or general character. Also articles pertaining to Agriculture, Stock-raising, the Dairy, and other kindred topics. Contributions must be received not later than Tuesday morning to be guaranteed insertion the same week.

The Editor is not responsible for the opinions expressed by contributors, nor does the publication of them make him their endorser. The public is entitled to the free use of this medium for the ventilation of personalities, or for the publication of articles of no general interest or benefit. All communications must be signed by the writer, or authorship acknowledged in the margin.

We do not disclose the identity of any writer in this department. In order to gratify curiosity, therefore the "nom de plume" may be used with a feeling of security at the same time it must not be used as a cloak behind which to deal out "personal cuts." Write only on one side of the paper, and, as possible, communications should be limited to 500 or 600 words at most.

Gettysburg.

(Continued.)

THIRD DAY.

Day-dawns—in the east is the flush of the morn.
And westward the night on her pinions is borne;
There is beauty in forest, in meadow and field,
By the twilight of that summer morning revealed.

On the eastern horizon the sun is in sight,
In a silvery robe and a halo of light;
On the clouds that encircle the blue mountain
The beams of morning resplendent appear.

And they dart through the greenwood and dapple the eye
With the varied bright colors of rainbow on high;
The glittering rays through the spaces between
The green, dewy leaves on the branches are seen.

The world that was calm in her nightly repose
Is spirit and gay since the day-kings arose.
Creation's astral and alert is mankind,
Life's animate music is borne on the wind.

And Nature her splendor and glory displays,
And her face is as smile with the day's early rays.
And her hands are entwined with the mid-summer bloom
That she scatters around in her own royal room.

And she is arrayed in the drapery of light,
And the colors of roses, rich, varied and bright,
The green of the leaflet, the gold of the wheat
And the sparkle of dewdrops bedecking her seat.

O man! she invites thee to rest in her bowers
And to breathe the perfume of her sweet-scented flowers,
But pause—little heed will be given to-day
To aught that is lovely in nature's display.

For on the great issue is centered all thought,
And the great tug of battle is yet to be fought.
All listen with eagerness, earnest, intense,
For the opening hour they expect to commence.

J. W. SLAUGHTER.

To Dora E.

(For the Home Circle.)

Dear Dora: I was thinking all this time that you owed me a letter, but that taking the time this afternoon to visit our mutual friend, "Hey," and discussing current events connected with this paper, she informed me that I was indebted to you; so I will not delay in having one more chat before the time comes that I will be too busy to write, and almost too busy to think about anything or anybody outside of my own home.

I would like to know how you are spending these sweet vacation days. I would love to enjoy a ramble with you on the beach—it might not be a luxury to you, but I know I would enjoy it. I have a great desire to see the Pacific Coast. I have some beautiful shells in my cabinet of curios, that were gathered there, and by the way, dear afflicted Hey showed me some pressed flowers you sent her—California Poppies, I believe they were. They looked very much like some blue bells sent me from Scotland by a friend.

I have quite a collection of dried grasses and pressed flowers from different parts of Europe. I have ferns from Germany and roses of Sharon from Bunsy, India; also flowers from the Apian Way, near Rome, and some strange looking plants from the Forum, that ancient history tells us about. All these were gathered by dear friends travelling in foreign lands and are highly prized.

Hey gave me some of the pepper tree berries with directions how to plant them, and I am successful in having five very pretty plants in a pot. Now I will ask you to tell me how to treat them—if I shall transplant them to a garden bed, or keep them potted; and if they will stand our winter climate, or must I take them in doors before the cold weather. I am so anxious to have a pepper tree from California.

About 20 years ago my son brought

me a banana root from Florida, I planted it in a tub and it grew and put up three stalks, which put out the most beautiful leaves over a yard long and twelve inches wide. It grew very large the first summer, while in the yard. In the winter I kept it in my parlor, and it grew so large it took up too much room; finally after bothering with it three or four years, I decided to put it in the cellar in winter time; but one winter we had a very cold snap, and fearing it would freeze, I wrapped the stalks with guano sacks to protect the plants, but a gale mouse crept under the wrapping and ate the stalks down into the heart, and that was the last of my beautiful banana.

I find my letter is growing too lengthy, yet there are so many things I would like to say, but some future day I may write you another letter, and have something new to talk about. Your description of the different vessels was very interesting to me—in fact every part of your letter was beautiful and I was delighted. Write me whenever you find time; your letters always find a hearty welcome.

Try to Speak Well of People.

(For the Home Circle.)

It is very natural for us to be delighted to have nice things said about us, and just as natural for us to feel hurt when expressions are cold and cruel. It is a human nature, for the writer in the New York Herald. For instance, you can take an ordinary kite and upon it, with brush dipped in phosphorus, trace a face. When the kite is high up in the air, there grinning down upon you will be a face of fire. Or you can trace a circle upon the paper, cover it with the phosphorus and then you will have far up in the air a pale yellow globe, bearing a very strong resemblance to another moon. Many very striking effects which your ingenuity will suggest to you can be obtained in this way.

In using the phosphorus, however, be very careful, as it is a chemical. If you fly the new box kites a very pretty effect can be obtained by hanging a little Chinese lantern to each corner and also along the string with which you hold it. As the box kite is very steady, there is comparatively little danger of your lanterns being thrown out, and the appearance of these many twinkling colored lights high up in the air is very beautiful.

Aids to Feminine Beauty.

Cucumber peelings, boiled in water, will be found good for the skin. A slice of cucumber may be rubbed on the face, instead of soap. Lemon juice will remove sunburn. Dill-water is as good for the complexion as rose-water, though it makes the skin paler.

Elderflower-water is famous for its cooling properties, as is also lavender-water.

Never go out in blustery weather without a veil unless you wish a tanned skin or freckles.

Do not forget, when drying the face after washing, to rub upward toward the nose. This will prevent wrinkles, and will help to smooth out to a great extent the crease alongside the nose.

Use neither hot nor cold water exclusively for bathing. A good rule to follow is a hot bath at night and a cold one in the morning, but be sure to take a bath daily if you wish to keep your skin in good condition.

Do not wear tight shoes if you desire a graceful carriage; no woman can walk comfortably or well in shoes that are too small for her feet. Do not wear too small gloves.

Avoid tight lacing and any form of dressing which compresses any organ of the body.—MRS. HUMPHRY in the July Ladies' Home Journal.

Free of Charge.

Any adult suffering from a cold settled on the breast, bronchitis, throat or lung troubles of any nature, who will call at John McKellip's, Taneytown, Md., will be presented with a sample bottle of Boschee's German Syrup, free of charge. Only one bottle given to one person, and none to children without order from parents.

No throat or lung remedy ever had such a sale as Boschee's German Syrup in all parts of the civilized world. Twenty years ago millions of bottles were given away, and the druggists will tell you its success was marvelous. It is really the only Throat and Lung Remedy generally endorsed by physicians, and one cent bottle will cure or prove its value. Sold by dealers in all civilized countries.

Etiquette of Conversation.

Do not argue nor appear to notice other people's inaccuracies in speech. Do not interrupt others while speaking, but listen patiently until they have finished. Remember that the good listener is generally more appreciated than the clever talker.

Do not talk of your private and family affairs except to intimate friends, and then be careful not to do so often.

Do not always begin a conversation by remarking on the weather.

Do not talk of things that the company present cannot be interested in. By so doing you may show yourself a clever and superior person, but you will be voted a bore.

Do not find fault needlessly, even with the weather. The habit of grumbling is disagreeable.

Do not speak mockingly of personal defects. Somebody present may have the same.

Do not talk loudly or fast.

Do not cross-question people. It is bad form to force a confidence.—Philadelphia Times.

The Growth of Man.

Professor Brinton's observations regarding the growth of man have determined the following interesting facts:

The most rapid increase takes place immediately after birth, the growth of an infant during the first year of its existence being about eight inches. The rate of increase gradually lessens until the age of 18 is reached, at which time the size attained is such that which the child is to become a full grown man in five years. The succeeding increase is very regular till the sixteenth year, being at the rate, for the average man, of two inches a year. Beyond 16 the growth is feeble, being for the following two years about three-fifths of an inch a year. From 18 to 20 the increase in height is but one inch, and at the age of 25 the growth ceases, except in a few rare cases.—Popular Science.

Experiments in Dreams.

Psychologists have undertaken the scientific study of dreams. When the olfactory sense of a sleeper is stimulated by an odor, such as that of heliotrope, not only does he dream of "sweet violets," but visual images of flowers appear to him. If the experiment is prolonged, the dream visions become complex and filled with strange imagery. A vibrating tuning fork held near a sleeper's ear made him dream of a lion roaring, and when a little salt and water were put on his tongue he dreamed that he was eating olives.—Youth's Companion.

Discovered by a Woman.

Another great discovery has been made, and that too, by a lady in this country. "Disease fastened its clutch upon her and for seven years she withstood its severest tests, but her vital organs were undermined and death seemed imminent. For three months she coughed incessantly, and could not sleep. She finally discovered a way to recovery, by purchasing of us a bottle of Dr. King's New Discovery for Consumption, and was so much relieved on taking first dose, that she slept all night; and with two bottles she was completely cured. Her name is Mrs. Luther Lutz. This writes W. C. Hannick & Co. of Shelby, N. C. Trial bottles free at R. S. McKinney's drug store. Regular size \$1.00 and \$1.50. Every bottle guaranteed.

Kite Flying by Night.

You have all flown kites in the day-time, but have you ever done so at night? Many very pretty and very weird effects can be obtained by this night kite flying, says a writer in the New York Herald. For instance, you can take an ordinary kite and upon it, with brush dipped in phosphorus, trace a face. When the kite is high up in the air, there grinning down upon you will be a face of fire. Or you can trace a circle upon the paper, cover it with the phosphorus and then you will have far up in the air a pale yellow globe, bearing a very strong resemblance to another moon. Many very striking effects which your ingenuity will suggest to you can be obtained in this way.

In using the phosphorus, however, be very careful, as it is a chemical. If you fly the new box kites a very pretty effect can be obtained by hanging a little Chinese lantern to each corner and also along the string with which you hold it. As the box kite is very steady, there is comparatively little danger of your lanterns being thrown out, and the appearance of these many twinkling colored lights high up in the air is very beautiful.

Floral Antiseptic

TOOTH POWDER.

Efficient and Exceedingly Agreeable, Arrests Putrefaction and destroys malarious effluvia; prevents decay and sweetens the breath.

Manufactured only by JOHN MCKELLIP, TANEYTOWN, MD.

Price 10 Cents.

Cure Your Corns with Our 10-cent Corn Killer.

WOMAN AND FASHION.

An Attractive Silk Gown—Startling Oddities—Bonnet For The Little Summer Girl.

Many a silk is the material selected for creating this gown. The long, clinging underskirt is trimmed at the bottom with three scalloped rows of narrow silk fringe the same shade as the gown. The long tunic has no seams

A Whole Family Cured.

Mrs. C. H. Kingsbury, who keeps a millinery and fancy goods store at St. Louis, Gratiot Co., Mich., and who is well known throughout the country, says:

"I was badly troubled with rheumatism, catarrh and neuralgia. I had liver complaint and was very bilious. I was in a bad condition; every day I began to fear that I should never be a well woman; that I should have to settle down into a chronic invalid, and live in the shadow of death. I had JOHNSTON'S SARSAPARILLA recommended to me. I TOOK FOUR BOTTLES AND IT CURED ME, and cured my family both. I am very glad that I heard of it. I would cheerfully recommend it to every one. I have tried many other kinds of medicine, but JOHNSTON'S is all of them."

MICHIGAN DRUG CO., Detroit, Mich.

Sold by WEANT & KOONS, TANEYTOWN, MD.

NEARLY FIFTY-EIGHT YEARS OLD !!!

It's a long life, but devotion to the true interests and prosperity of the American People has won for it new friends as the years rolled by, and the original members of its family passed to their reward, and these admirers are loyal and steadfast to-day, with faith in its teachings, and confidence in the information which it brings to their homes and firesides.

As a natural consequence it enjoys in its old age all the vitality and vigor of its youth, strengthened and ripened by the experience of over half a century. It has lived on its merits, and on the cordial support of progressive Americans. It is "The New-York Weekly Tribune," acknowledged the country over as the leading National Family Newspaper.

Recognizing its value to those who desire all the news of the State and Nation, the publishers of the RECORD (your own favorite home paper) have entered into an alliance with "The New-York Weekly Tribune" which enables them to furnish both papers at the trifling cost of \$1.25 per year.

Every farmer and every village owes to himself, to his family, and to the community in which he lives a cordial support of his local newspaper, as it works constantly and untriflingly for his interests in every way, brings to his home all the news and happenings of his neighborhood, the doings of his friends, the condition and prospects for different crops, the prices in home markets, and, in fact, is a weekly visitor which should be found in every wide-awake, progressive family.

Just think of it! Both of these papers for only \$1.25 a year. Send all subscriptions to "THE CARROLL RECORD," Taneytown, Md.

McKELLIP'S CHOLERA AND DIARRHOEA SYRUP.

The Great Remedy For all Bowel Complaints.

Girls With Thin Arms.

Thin arms should be carefully concealed. They have an impoverished look that tells the owner of some of her dignity. If the arms are unduly long, as they occasionally are, the effect may be neutralized by wearing wide bands of black velvet fastened with pretty buttons or clasps or buckles. This reduces the apparent length of the arms. "Thin arms," says M. Charles Blanc, the artist at French authority on dress, "denote bad health and an enfeebled race. The best remedy is to wash the arms with a fine lather of soap at least twice a day and to dry them thoroughly and rub them vigorously. This treatment brings the blood into action and induces a healthy condition of the skin. Rubbing with a soft chamois leather is excellent for the skin, giving it both smoothness and gloss.—Mrs. Humphry in Ladies' Home Journal.

A Ton of Cakes.

Queen Victoria did not limit her birthday party refreshments to one cake with 80 candles. She commanded the royal confectioner to make no less than 20 cakes, each to weigh 100 pounds, and all of them were duly consumed at Windsor by the crowd of grandchildren and great-grandchildren assembled there on her birthday.

Gowns of Manville Silk.

and fastened at the left side, where it falls in a point while at the back there are two points. The fastening and edge are scalloped, adorned with a row of fringe and bordered with an application of cream lace.

The bodice has the silk cut away in front to display a flat collar of the cream lace, which in turn, discloses a glimpse of tucked cream silk. The bodice is scalloped in front, edged with fringe and bordered with lace applique. The collar band of cream silk is tucked and headed with a rounded, empuccament, edged with fringe. The narrow folded belt is of the manville silk, and the big bow on the bust is of manville tulle. The sleeves are quite close fitting, but this unbecoming fact is concealed by a double epaulet, the upper one being cut in scallops and edged with fringe. The sleeve is bordered with lace and two long, white algeists—Philadelphia Ledger.

Starting Oddities.

This year the toddlers' hats and the turbans have been the one, and from this model spring half of the hats on exhibition. Then there is the Trelawny hat, which first appeared in felt and which now comes out in straw, turned down in front and up on both sides and usually very much trimmed. Modifications of this hat appear which are rather startling to modest folk who have not limitations of nature in headgear. The modifications are nothing more nor less than hats trimmed to simulate owls. Some of them frankly have the owl's head at the extreme point, where the hat turns most over the face, while others are content with making the hat resemble like a bird's head and fashioning the eyes out of
