DERR & LAMBERD. Our Finest Goods the Best Bargains. DERR & LAMBERD.

Expected of a Newspaper. The public is insistent in its demands. It expects the newspaper to pack a horse, a digger, a special policeman, a detective bureau, a dog chaser, a sidewalk fixer, a council regular, a trax, a street sweeper, a panic preventer, an obituary preacher, chief tally pouter at weddings and social functions, sporting mascot, fish bar, big egg preparator, snails and grasshopper, judge on earliest gardens, business boomer, husband finder, sweetheart securer, school inspector and general all round hand-man for the community. In fact, if there is a single thing of importance to human life and human happiness that doesn't go through the newspaper it has never yet been discovered. It touches every feature of human endeavor from the cradle to the grave. It smiles with those who smile and weeps with those who mourn. It is everywhere all the time the most busy, the most useful of all public agencies. It makes mistakes. All human agencies do. Sometimes it is dishonest. But it stands out so in the glare of the arc light of publicity that it can but half succeed if dishonest—and then only for a brief time.

MAPLE SUGARING.

How They Do It in Vermont—From Sap Gathering to Sugaring-Off. Maple sugar and sirup are favorite sweets the country over, and this gives a general interest to some information about the maple sugar industry which has practical value also for the sections where this particular kind of sugar making prevails. An American Cultivator correspondent supplies the following details: Some sugar places in this immediate vicinity number over 7,000 trees.

TREES TAPPED AND BUCKETS HUNG.

The evaporator is the first and most important consideration. The point to be considered in an evaporator is the velocity number over 7,000 trees. The evaporator is the first and most important consideration. The point to be considered in an evaporator is the velocity number over 7,000 trees.

How to Remove Vaseline Stains. Vaseline stains seem quite hopeless, but they may be removed. Place two thicknesses of blotting paper on the ironing board, and over them place the material with the spot saturated with benzine. Cover this with two more pieces of blotting paper and press with a moderately hot iron.

Comb Honey Not Manufactured. A statement has been going the rounds of the press to the effect that nearly all the comb honey on the market is manufactured by a "cute machine" that the combs are filled with glucose and capped over by a mechanical process.

CHOICE MISCELLANY

Canned Goods in the Southwest. The southwestern gets his living from tin cans. The surely never was such a region for canned vegetables, canned meat, canned fruit, canned soup, canned milk, canned cheese. Empty tin cans form a charmed circle about every southwestern town and camp. Even where he can profitably and easily produce his own food the ranchman seems to prefer to raise some exclusive crop, sell his product and buy canned goods.

A Remarkable Case. A remarkable instance of the loss and recovery of speech is recorded in Glasgow, says a London paper. A police constable was arrested on a series of charges of theft from warehouses, and, as a result of the shock caused by his apprehension, he lost his power of speech. He was found not guilty of the charge laid against him, but, being dumb, was unable to resume his duties as a policeman, and a gratuity of 603 was given him. After the lapse of several weeks his power of speech has returned to him.

Saved from an Awful Fate. "Everybody said I had consumption," writes Mrs. A. M. Shields, of Chambersburg, Pa. "I was so low after six months of severe sickness, caused by Hay Fever and Asthma, that few thought I could get well, but I learned of the marvelous merit of Dr. King's New Discovery for Consumption used it, and was completely cured." For desperate Throat and Lung Diseases it is the safest cure in the world, and is infallible for Coughs, Colds and Bronchial Affections. Guarantees bottles 50c and \$1.00. Trial bottles free at R. S. McKinney's, Taneytown, Md.

Paint and Soap Mites. A natural soap mite and a paint mite are two of the latest mineral discoveries in northwest Canada. Several soda lakes have been found in the foothills near Ashcroft, B. C. Their hotlands and shores are incrustated with a natural washing compound containing soda. No two analyses agree exactly as to the composition of the material. A New York analysis gives 26 per cent borax, while a Montreal chemist from the same sample gives 16 per cent borax. Tests prove the substance to be equal to the washing powders in common use. Trials by blacksmiths and farm workmen show that it will remove grease and dirt better than soap. A syndicate of British Columbia men has been formed to put the product on the market.

How to Make Tea Frappe. Put two teaspoonsful of tea into one quart of milk; bring this to a boil; let it stand five minutes; strain it and sweeten to taste. When it is cold, put it in the ice cream freezer and freeze to a very soft mush. Serve with whipped cream.

Read It in His Newspaper. George Schaub, a well known German citizen of New Lebanon, Ohio, is a constant reader of the Dayton Volkszeitung. He knows that this paper aims to advertise only the best in its columns, and when he saw Chamberlain's Pain Balm advertised therein for lame back, he did not hesitate in buying a bottle of it for his wife, who for eight weeks had suffered with the most terrible pains in her back and could get no relief. He says: "After using the Pain Balm for a few days my wife said to me, 'I feel as though born anew, and before using the entire contents of the bottle the unbearable pains had entirely vanished and she could again take up her household duties.' He is very thankful and hopes that all suffering like-wise will have a little more lenient fate, so that it may be for sale by R. S. McKinney, Druggist, Taneytown, Md.

How to Make Honey Muffins. Rub one cupful of cold boiled hominy with a fork until separated; add one teaspoonful of salt, one teaspoonful of lard melted and one teaspoonful of sugar; beat this mixture to a cream; then add two eggs beaten until thick; then add one cupful of sour milk, with half a teaspoonful of soda dissolved in it; then add three-fourths of a cup of flour; beat very thoroughly and bake quickly in hot greased muffin pans; to be eaten as soon as baked.

How to Make Dandelion Cordial. Four quarts of dandelion blossoms, four quarts of boiling water, four quarts of granulated sugar, three tablespoonfuls of compressed yeast, two lemons, grated fine, one orange. Let the blossoms and water stand until lukewarm; mix the sugar, lemons and yeast together and add; strain and put in a cool place for two days; then strain again. Put into a keg and let it work, without tight corking, until as clear as water.

How to Iron Silk. Silk or pongee should be allowed to dry thoroughly before ironing, and great judgment must be exercised in order not to scorch the garment. If ironed while wet, silk becomes hard and stiff and loses its luster. For any corded material or any raised pattern the thicker the padding of the ironing board the better the result.

THE SPORTING WORLD

Princeton's Able Twirler. W. H. Underhill, the leading pitcher at Princeton this year, should lead the intercollegiate twirling list at the close of the season. He wound up last year's playing in sensational style, winning

W. H. ("BUTS") UNDERHILL OF PRINCETON the two championship games against Yale, and he appears to be rounding into the best form of his career. Underhill hails from East Orange, N. J., where he won fame in various branches of amateur sport. He has played on the Princeton varsity football team for two years and is no unimportant figure in track athletics. Underhill's pitching is the "Tigers' chief dependence this season, and, although an unfortunate accident on the team's southern tour laid him out of the game temporarily, "Buts" as he is best known, is now in his old time condition. Harvard is on the Princeton baseball schedule this year, and, together with Yale, will endeavor to defeat the Tigers in their own den during commencement week. Underhill is certain to pitch in both games, and Princeton money galore will be on hand to back the chances of the orange and black.

WESTERN MARYLAND R. R.

Table with columns: Read Out, STATIONS, Road Up. Lists train schedules between various stations including Cherry Run, Fairfield, New Windsor, etc.

Advertisement for Scott's Emulsion in Cuba, featuring an image of a man carrying a large fish on his back.

ASHES AND STRAWBERRIES. We have not found wood ashes best for strawberries except on very sour or damp soil. The strawberry seems to do best on a soil that is neutral—neither very sour nor very alkaline. The ashes contain lime, which will make an ordinary soil too alkaline for the strawberries to do their best.

OUR JOB PRINTING HAS A deservedly wide reputation. Why? Because it is always clean, first-class work. The proof that it is appreciated, and in demand, is the fact that we are always busy. We rarely solicit—the work simply comes.

Advertisement for E. W. Snow, featuring a signature and text: "This signature is on every box of the genuine Laxative Bromo-Quinine Tablets the remedy that cures a cold in one day."
