The High School Project.

The High School proposition for Taney-OF GENERAL INTEREST. town has been popularly received, as it deserves to be, and the indications are that with the opening of the Fall Term, 1916, the school will be a reality. During Gleaned from the County and State the winter, a number of events will be held in order to give the miscellaneous public an opportunity to help, during which time voluntary contributions will also be received.

According to complete accounts filed, the Democratic campaign cost \$22,456 in Baltimore city, and \$21,652 in the state. Subscriptions of cash may be made at any time, payable when needed, all of which will be announced in the RECORD. Let all friends of the project come for-ward, now, with their voluntary gifts, and close the effort quickly. Former Congressman J. L. -.... Don't Let Yourself Owe it !

We mean that little bill that you owe, because of carlessness. A great deal of the credit business of every town is credit that is not needed; little bills are bought, or "sent in for," that can just as easily be paid for on the spot; and an accumu-lation of such bills—small separately— hurts the dealers more than the average

Never make the mistake of thinking that the dealer does not care whether you pay cash, or not. *He does care* ! He would rather, every time, have your would rather, every time, have your money, and not a charge against you-even that small charge that you think don't count for much. Fifty, or a hun-dred, small charges, means a big total. Never accept credit, carelessly. It is the little forgotten charges that often create the most trouble. The dealer don't like to ask you for so small an amount. like to ask you for so small an amount, and after a while you are apt to forget it, and perhaps deny that you owe it. Don't do business that way ! You can pay cash, lots of times when you don't, just because you have formed the very bad habit of being careless about such matters, or perhaps because you think you will "put

fi" paying out the money. The Dollar for the weekly paper is one of these unnecessary credits. We have hundreds of dollars due the RECORD, right now, that could be just as easily paid, as unpaid.

IMPRISONED IN HER HOME FOR TWELVE YEARS.

Inhuman Treatment by Parents of Talbot County Girl.

A case of apparently almost inhuman treatment on the part of a father and step-mother, in Talbot county, has been one of the chief items of news this week. As the story goes, a Miss Grace Marshall, aged 28 years, had been confined in a small dark room by her parents for al-most 12 years, and when found weighed but 57 pounds, and had almost entirely

most 12 years, and when round weighed but 57 pounds, and had almost entirely lost her power of speech. She is said to have been confined be-cause of a love affair, when she was 16 years old, to which her father and stepyears old, to which her latther and step-mother objected. The discovery was made by an uncle who spent a night in the house, and who heard groans from an adjoining room. He reported the fact to the authorities, who demanded entrance and removed the young woman to a place where she is now receiving food and medical treatment.

Stories in detail of the appearance of the victim, and the manner of her con-finement, are pitiful in the extreme. All of these years she has been in almost complete darkness, and apparently with-

The father puts up the defense that she was insane, and that he was unable to keep her at an asylum, but the physicians who have examined her say that she is no more insane now than any normal person would be under like treatment. It had been generally believed in the com-munity that Miss Marshall had been dead for years.

Public sentiment is strong against Mr. and Mrs. Marshall for their treatment of the girl, even to the point of doing them violence. It seems probable that part of the story has been exaggerated, but the evidence is such that at the very best the Marshalls stand convicted in public opin-ion of inhuman treatment. Both have been arrested and will have to stand trial.

Later accounts of the condition of Miss Later accounts of the condition of Miss Marshall are to the effect that she has had a relapse, and may die. She is now at the Easton Hospital. It is thought that transfusion of blood may be resorted to in order to try to save her life.

A Union Thanksgiving Service Ends in GREATER SAFETY FOR War Argument.

A union service held in Catonsville, on Thanksgiving day, ended in an open rupture in the congregation before the rupture in the congregation before the close of the service, over a discussion of the war by the preacher on the occasion, Rev. S. Reese Murray, of the M. E. church. The service was held by the Presbyterian, Lutheran and Methodist Episcopal congregations, according to custom. Rev. John C. Bowers of the Lutheran congregation, had left the church to take a train for Philadelphia, before the trouble occurred.

efore the trouble occurred. Before he began his sermon Rev. Murray warned the united congregations that

ray warned the united congregations that nothing he was about to say was to be construed as a personal affront to any in-dividual or class of individuals. But as he progressed there were noticeable stirs throughout the church, and before he had finished several people rose from their seats and left.

The text of the sermon was "This is the day which the Lord hath made." He set off against the freedom which America enjoys through her free speech and free worship principles the condition of Ger-many, under the domination of militar-ism. He pictured the Kaiser as a "War Lord," and the German conception of Germany's world position as that of "a divinely commissioned superior race, whose destiny is to rule the world."

And when, near the close of his address, he described the basis of German "self-conceit" as "that exaltation of beer," and "that glorification of the lust of drink," former Senator Hubner, who, to use his own statement, made after the service, was, by that time, "boiling over," rose from his pew, stepped out in the aisle, and called upon Mr. Murray to

halt. Rev. Mr. Nesbitt, Presbyterian, apparently expecting a clash between the minister and the ex-Senator, immediately minister and the ex-senator, immediately stood up, hymn book in hand, and be-gan, in a loud voice, to announce the closing hymn. He was too late. Mr. Murray had already proposed to meet the ex-Senator's argument, and stopped his sermon and told Mr. Hubner to proceed. Ex-Senator Hubner declared he was greatly distressed at the trend and tone Mr. Murray's sermon had taken, and he Mr. Murray's series the the third and he wished to answer the 'slanders' of the German nation. He denied vigorously Mr. Murray's statement that 'millions of Germans were not in sympathy with the war," declaring that although that might have been true when the struggle started, every German-born citizen was now in hearty sympathy with the cause of the

Fatherland And when Mr. Murray, answering him from the pulpit, declared that Germany's next blow, if she were the conqueror in the present conflict, would be at the United States, ex-Senator Hubner cried that his German birth would never temper his allegiance to America. About twenty-five people followed Mr. Hubner from the church.

Rev. Mr. Murray was reticent about the occurrence, but defended his stand

stanchly. "What I said about German militarism was simply a statement of facts gathered in my theological studies and in my reading about German psychology. I thought I had showed clearly the applicability of what I was saying to the Ameri-can spirit of Thanksgiving. I had no intention of offending anybody; I made that clear before I started the sermon. am exceedingly sorry about the whole affair and I think Senator Hubner's course was uncalled for, although I have the greatest personal respect for him."

OUR PUBLIC HIGHWAYS.

One of the most important things that the coming legislature should do, is to give to the state greater protection of life and property on our public highways, and to make the prosecution and conviction of road law violators much less difficult than at present. The frightful harvest of fatalities and serious accidents, during the past Summer and Fall, urges the neces ity for stringent protective legislation, without further argument.

The situation represents a case of humanity against reckless speed and the uncertain safety of machine driven ve-hicles, often in the hands of inexpert and otherwise unfit drivers. Plain common sense and every day justice demands that the present conditions be looked at square-ly from the "safety first" point of view, and not from that of the autocrats of the road who have a growing contempt, apparently, for all who do not get out, or stay out, of the way of their fast-travel power cars.

There are too many recent examples of death and disaster to make it necessary to specially mention any. The danger is with us, and promises to grow with another year-everybody knows this true, and we fear that there is a growing dis-position not to care. Perhaps the butchery in Europe is making us callous to butchery here, and perhaps we are begin-ning to believe it can't be helped. It It must be helped, and we look to our law-

makers to do it. Let those who yet regard safety on our streets and highways as a legitimate public right, protest vigorously against the road machine danger ! It is time for the majority of our citizens and tax-payers to begin to make the laws defining the prop-er use of the roads we pay for ! The Frederick *Post* has the following

to say on the subject; "It is more than probable that the next

legislature of Maryland will be asked by those in authority for some radical legis-lation for the regulation of the running of automobiles in this state. Upon good authority it is stated that in all liklihood a law will be asked to make it a criminal offense for one automobile to pass anoth-er, going in the same direction, on or near the crest of a hill. It has been ob-served that many of the accidents happening on the public highways occur under such conditions, and it is contended that no automobile should pass another unless the driver of the machine has full view of the road ahead of him. A large proportion of the accidents happening now occur either on or near the crest of hills, or at road and street crossings, and there is little doubt that some radical legislation will be asked to overcome this

William Logan, of Hagerstown, who is the traffic officer in this section of the state, is authority for the statement that in the future he will be required, by the directions of the State Automobile Commission, to swear out warrants for all persons who figure in an automobile accicase tried dent and to have the magistrate. This will give a judicial de-cision to all accidents. It is stated that in case the verdicts of the magistrates do not seem to agree with the facts as under-stood by the automobile commissioners, this official can suspend the licenses of the drivers of vehicles. -----

Martha Washington's Will.

After an absence of more than half a century, the will of Martha Washington, taken during the Civil War by a federal soldier from the office of the clerk of Fair-The Legislature Should Give us More Effective Protection. One of the most important things that Soldier from the once of the clerk of Fail fax County, was returned last week to the county's custody. Following dis-missal by the Supreme Court of the United States of the action brought by the State of Virginia against J. P. Mor-gan of New York, son of the late J. Pier-Mer J. Pier J. pont Morgan, to recover posession of the will, the document was brought to Fairfax by John Garland Pollard, attorney-general of Virginia. Mr. Pollard had moved dismissal of the legal proceedings, Mr. Morgan having returned the will to Governor Stuart without waiting for the cause to come to trial.

No advance arrangements had been made for any ceremonies, but when news came to the dismissal of the action in Washington, word was telephoned throughout the county, and by the time Mr. Pollard arrived members of the D. A. R., who had initiated the movement for the return of the will, and a consider-

able gathering of prominent citizens of the county were on hand to greet him. Mr. Pollard said that Mr. Morgan con-tended that the will had come into his father's possession legally, and that he considered his title to it sound, but that considered his title to it sound, but that he yielded to the wishes of the people of Virginia in returning it. It had been Mr. Morgan's wish that the will should be placed at Mount Vernon, where he offered to provide for it a fireproof re-ceptacle, but the Virginia legal authori-trop decided that as the document was tres decided that as the document was part of the records of Fairfax County, its return to the custody of the elerk of the

court was required by law. The will of Martha Washington will be set in the wall of the new ''clerk's house,'' beside that of George Washington. There are five pages of the document, in the hand-writing of the testatrix, each page being signed. The records of the county show that the will was probated June 21, 1802.

..... Tramps Barred From Montevue.

The County Commissioners of Freder-ick county have decided that hereafter, Montevue, the County's Home for the poor, can not be made use of by tramps. All applications for admission to the home must be made before the Commissioners in regular session, and show that they are real objects of charity, and have some legitimate claim on the county. This is hard on the wandering Willie's, but it is fair, as the tramp army is largely an un-necessary one, composed of self-elected "bums" who do not want work.

If it be considered that wanderers of all classes are proper wards of county homes, then work of some kind should be provided whereby they would at least earn their board, and not be a burden for the tax-payers. "No work, no board," would be a fair motto, except for the de-serving poor and unfortunate who have a legitimate residence claim on a county. Tramping around, from choice, during the Summer season, but boarding free during the Winter, is a one-sided proposition not in the true charity class.

Flag Presentation at Piney Creek Public School.

The presentation of a flag to the Piney Creek school, by Washington Camp No. 2, P. O. S. of A., of Taneytown, on erty Thursday afternoon, was quite an entertaining event to several hundred persons who gathered to witness the program. The part taken by the School, Miss Mabel I. Lambert, teacher, was especially well rendered, the pupils acquitting themselves in their various parts, with fine skill.

A very nice pole of galvanized iron, well stayed and equipped for the purpose, was erected through the work of the patrons of the school, and the flag presented was 5x8 feet, good grade of wool bunting. The school room was too small to accommodate the crowd, necessitating a division of the program—part was held inside and part outside, as follows:

-0-Frederick County Farmers are Alive.

Showing a marked interest in approaching sessions of the Maryland Legislature and the character of contemplated laws for this county, nearly one hundred farmers, representing the Farmers' association, the Dairymen's association, and the Threshmen's association, met on Saturday afternoon, and among other things, went on record favoring a fixed salary for county officers. The bills which are to be introduced at

the next sessions of the Legislature were thoroughly threshed out. Many of the farmers took an active part in the dis-cussion. The following measures were endorsed and referred to the legislative committee of the farmers' association for consideration:

county-wide dog tax; a poll tax, which may become state-wide in scope; the reduction of the membership of the board of county commissioners from five to three members with fixed salaries: the repeal of that section of the law which provides that farmers must secure permission from the State forester to trim roadside trees.

The question of repealing the mortgage tax or making some revision so that the mortgagee and mortgagor will be taxed equally, was discussed. There was con-siderable sentiment in favor of taxing the mortgagor for his property less the total amount of the mortgage. It is understood that such a measure should include all the counties of the state.

The legislative committee has been instructed to report to the farmers' associa-tion at the next meeting, Saturday December 11. The members of the three associations are invited to attend and take part in the general discussions.

Saturday's meeting indicates that the farmers of Frederick county are going to take an active part in the sessions of the Maryland Legislature. Two years ago the farmers fathered a schedule of economy legislation, a part of which was enacted.

These discussions of needed legislation have a tendency to show the sentiment of the public on proposed new laws. An idea of just what the public desires is in this way given to members of the Fred-Assembly. - Frederick Post.

Objects of Charity.

....

Space, and copies of his paper, go to make up the newspaper man's entire stock in trade. These two are all that he has to offer for sale to the public, and no one has as yet given any sort of satisno one has as yet given any sort of satis-factory reasons why he should ever be asked by anyone to donate them. One thing newspaper people will never be able to understand is, why any person

will walk into a newspaper office and make himself or herself an object of charity and insist upon what they would dis dain to ask for in any other shop or place of business in the town. The principle is the same in the newspaper office as in the dry goods store, the grocery, the drug store, and what a great many people need is to recognize it as the same and get off the newspaper list.

Advertising space in the newspaper is for sale, not to give away. It has a cer-tain value in itself that makes it worth money. Copies of the newspaper are for sale—not to give away. If they are worth having, they are worth the exceedingly small price asked for them. The public, or at least a large portion

of it, has some very erroneous ideas about these matters, and it is but just to the newspaper folk that their ideas be corrected in accordance with the same busi-ness principles that prevail in all other business establishments.

In a vast majority of cases this generous charity on the part of the news papers is blissfully taken for granted, and the paper's liberality is abused. That which is purely a favor is accepted as a matter of course, and what should be requests are couched as demands. When the courtesy has been performed there is rarely appreciation and more often dissatisfaction—generally silence. The result in many other towns and

cities is that a ban has beeen put upon all free publicity, no matter what its object—even upon church notices. In these cities such favors as the press bestows are properly appreciated and valued.-The Fourth Estate.

The Meanest Of All.

There is probably no place on earth better than a country newspaper office to learn the kinds of people there are. Some get huffy if a statement is sent; others will not pay until they receive a state-ment. Some will pay without a state-ment and others will not pay whether a statement is sent or not. Some thought they owed more and some thought they didn't owe so much. Some say they couldn't get along without the paper, and others say it doesn't amount to much. But the meanest, scrubbiest in the list is the man who takes it until he is shut off for non-payment and then spends half his time explaining how he used to take "the thing, but stopped it because it was no 'count."—Middletown Valley Register

Anxious to Dress the President.

Washington, Nov. 23.—The White House is being deluged with letters from boot makers, shirt makers, tailors, hat manufacturers and others who make wearing apparel for men, each petitioning President Wilson to permit the writer to furnish some particular part of the President's wedding wardrobe. A shirtmaker was at the executive offices today in the hope of getting the privilege of making the shirt in which the President would be married. His presence there recalled a story about President Ulysses S. Grant. Walking down Pennsylvania Avenue in company with General Schenck, President Grant was approach-ed by a man who took his hand and shook it warmly.

"Probably you don't rember me, Mr. President," said the man. "We used to know each other-made your shirts, sir." 'Remember you very well indeed,' re-

THE TAXPAYERS in this county are "easy." From present indications to the contrary, they will quietly accept what they get from the next legislature, without opening their mouths in advance as to what they want. Taxes are not yet high enough to cause an open rebellion.

Their "Wires Were Crossed."

Two queer things happened in the columns of our respected county exchanges, last week, which shows that even in the best regulated establishments the wires sometimes get crossed.

The Advocate found it necessary to disavow the parentage of an "editorial" appearing in a previous issue that was strongly complimentary to School Examiner Morelock, saying that "it was not inserted with the knowledge of the

management" of the paper, but that on the other hand "Mr. Morelock should lose his place and it be given to a Democrat.'

The Sentinel, the Times and the Enterprise (Hampstead) came across with the glad hand for the Advocate's now recanted editorial, and will evidently be compelled now to recatalogue that journal in the "To the victors belong the spoils" class.

The other "queer" thing was that a little item from the RECORD, commenting on the action of the P. O. Department in fining patrons of postoffices \$200.00 for removing mail of an other from an office. was printed in the Pilot and credited to the Advocate, thus giving the latter another chance of making denial, but with a little better cause for it.

-0-Just One Thing After Another.

Every season has its "busy" time, or of work to another-sometimes more hard pressed than at others-but to the resourceful, industrious man, there is always time for rest, too. We simply must take rest, for by so doing we are the better able to work. But, we make a pretty big mistake, when we imagine a condition of "nothing to do," for after all "Life is just one thing after another." as someone has said.

When hard work at any particular season slacks up, there is always before or general preparedness for emergencies. The farm, the shop, the plant, the home, the store, the office, is always waiting for DIPLOMACY is a great thing. The Anti-Saloon League's Review

The summing up of the results of the recent election, with special reference to the activities and aims of the Anti-Saloon League in Maryland, is given in the following form by the current issue of The American Issue. The review is especially interesting in view of the meeting, within a few weeks, of the legislature. The editor of the Issue says:

"Not for years has there been in Maryland such a tremendous amount of independent voting as shown by the returns from the recent contest at the ballot box. Spellbinders throughout the state used every argument known to astute political leaders: orators thundered from a hun-dred platforms; the crack of the party lash was heard everywhere; money was spent freely, and whiskey was given away in great quantities, but the manhood of the state was like adamant in its deter-mination to make itself heard above the clamor and noise raised everywhere by the powers that prey in their futile effort to befog the real issue. It was clearly a case of manhood against machine politics and manhood won a glorious victory.

In Allegany county the whiskey ele-ment, the Personal Liberty League and other forces fought with the desperation of demons but in spite of their best efforts the two candidates pledged to the sub-mission of prohibition to the people were handsomely elected.

In Washington county Democrats and Republicans were lost sight of. The real issue was between the wets and drys and the wets met an inglorious defeat, the dry forces electing the entire delegation. In Frederick county practically the

same situation obtained, and the forces of righteousness were enabled to elect ought to have. We go from one period the entire delegation to the lower House, as well as the Senator.

The outcome in Carroll county is very gratifying. The liquor traffic overreached itself in its effort to put over two wet men. The result was that four dry men, all of whom were acceptable to the temperance forces, as well as the Senator, were

A desperate fight was made in Prince George's county and, thanks to the manhood of that great county, although not all for which we contended was won, we split the delegation in half.

Harford county has redeemed herself. It has cut loose from the liquor-race trackgambling interests and declared that it would have no more of that sort of thing and has sent to the Legislature a solid delegation squarely opposed to the forces that prey

On the Eastern Shore of Maryland the battles were fought in the primaries and every candidate for the Legislature from every candidate for the Legislature from that section of the state and every man nominated in the primaries was pledged to stand by the proposition of submission to the people of the whole state the ques-tion of prohibition.

Perhaps the most significant victory recorded on election day in Maryland was that won in Baltimere county in the Senatorial contest. The tragic death of John S. Ensor brought great discourage ment to many of our friends but the Lord of Hosts was with His people and raised up a man in the emergency pledged to carry out the policies for which Mr. Ensor stood and, although tremendously handi-capped by the brief time left in which to make any sort of a campaign, he won a splendid victory.

Many factors contributed to the defeat of the whiskey representative in Baltimore county, but perhaps no greater service was rendered by any than the John Watson, Jr., T. B. Todd, Jr. and Edwin S. Choate, with able lieutenants in every section of the county.

What the "Von" Means.

before a surname was in feudal times the privilege of the landed barons, who thus designated, as in other countries with like prefixes, their ownership of lands. In modern times, however, the prefix "von" may be granted as a title of nobility by the German emperor or the kings of the various kingdoms of the empire. It does not carry any privileges or emoluments with it. It is recorded in the heraldry office in Berlin if granted by the emperor as kaiser or as king of Prussia, in Munich if granted by the king of Bavaria, Leipzig if conferred by the king of Saxony, etc. The recipient is not given a diploma with it. It may be, like the English title of baronet, personal or hereditary-that is, it may be granted to a man for his lifetime only or may descend to his sons. It cannot be assumed by any one, but may be earned by any deserving German subject and conferred as a reward for service or eminence.-San Francisco Chronicle.

An Ancient Tragedy.

A historical paper in Lord Montagu's collection in London tells of a strange tragedy "done in Holborn, a little before Christmas," several centuries ago: "A boy seven years old came up into a gentleman's chamber and prattled to him and drew his sword and flourished with it. The gentleman, being in bed, wondered to see the boy toss his blade so and said: 'So, good boy, thou hast done well. Put in the sword.' The boy persisting, the gentleman rose and held him the scabbard, and the rude handed lad, thinking to sheath the sword, lustily chopt it into his body. Company were called. One offered to strike the child. 'Let him alone,' quoth the gentleman. 'God is just. This boy's father did I kill five years since and none knew. Now he hath revenged it.' And the gentleman died the second dressing."

The Last of the Ruffs. In 1762 the rage for ruffs, such as are seen on many monumental effigies,

began to decline. A writer in the London Chronicle of that year says of gentlemen's dress, "Their cuffs entirely cover their wrists, and only the edges of their ruffles are to be seen." It is said that a distaste for ruffs was first created so far back as 1613, when a woman named Turner wore them on her trial for the murder by poison of Sir Thomas Overbury. The French revolution of 1789 much influenced British fashion, and the picturesque cocked hat and ruffles then gave way generally to round hats and small cuffs. The period of their final disuse cannot be easily determined, as men of old fashioned or eccentric habits have worn ruffled shirt fronts within quite recent

Tricky Fox.

A gentleman while hunting near a river one winter day saw a fox run out on the ice and make at full speed for an opening in the ice where the rushing water of the river could be plainly seen from the bank, says the Scotsman. At the edge he stopped, turned, followed his tracks back to the bank and then ran some distance down the stream and sat there. Soon a dog came crashing out of the woods, bay ing finely, hot on the fox's trail. Now, dogs when on a chase of this kind trust almost entirely to their noses. This one was no exception. He ran along the ice, head down, and when he reached the hole he could not stop, but plunged into the water and disappeared forever. Then the fox trotted away with every sign of satisfaction.

Battles upon the outcome of which hung great issues have been lost by failure to properly estimate the strength of the enemy. Let us not for one moment forget that behind the effort to prevent the forces of righteousness from "cash-ing in" on their victory is allied every evil interest in the state. Not only so, but these interests are resourceful, powerful and subtle. Money, self-interest, some deluded business men, astute legal minds -hired for the purpose-certain political bosses, purchasable labor, gamblers, red lighters, bums, thieves, the saloon keeper, the distiller and the brewer will all line up in a last desperate effort to abort the

A Lightning Result.

During the lessons one afternoon in a public school a thunderstorm arose, and, seeking to lessen the fright of the children, the teacher began an entertaining discourse on the wonder of the elements.

"Jimmy," said she, finally turning to a bright little youngster, "can you tell me what lightning is?" "Yes, ma'am," was the ready re-

joinder of little Jimmy. "Lightning is streaks of electricity."

"That's right," smiled the teacher encouragingly. "Now, tell me why it is that lightning never strikes twice in the same place."

such a failing in a family of short milkers is to cross them with a bull that is known to come from a long milking ancestry. Some cows have the characteristic of holding out a long time. Another cow I had for many years could scarcely be dried off at all. It seemed to me best to give my cows a time of rest every year after a long period of lactation. But when I tried to dry that cow off I found I had a job of no small proportions on my hands. She was as persistent in keeping on as

and bought in a local market, under conditions determined largely by local needs, when crops were staple and methods of production were standardized, there was little need for extended credit. Each crop paid the way for the next, and store credit was sufficient for his needs. Nowadays this is all changed. The commercial farmer of today produces his crops under conditions that are affected by world-wide influences. He sells in a market that is fixed by national and international conditions and he buys under conditions similarly fixed. Further, the old, careless, slipshod methods of production are no longer efficient. The impoverished land demands more intensive cultivation, drainage, fertilizers, more live stock and more labor. All of these call for more capital; and the question is,

Why not from the banks? it may be asked. The answer is that our whole banking system has been created and organized to meet the needs of commerce, trade and manufacturing industry, and is not suited to the re-

To carry on his business effectively the farmer must have two distinct types of credit, neither of which is adequately provided by our present banking system: first, long term credit, by means of which he may secure capital to buy his land or to make permanent improvements; second, short time credit which will supply him with capital for the purchase of seeds, fertilizers, machinery, live stock, labor, etc. He needs long time credit because the returns from one or two or five years' crops cannot be expected to repay capital invested in the form of permanent improvements. He needs short time credits because crops do not mature within the limited credit periods customarily allowed by our commercial banks. The farmers of European countries are provided with two distinct types of credit agencies which are especially designed to meet these needs. The one is the Land Mortgage Association, which enables him to issue and sell bonds, running for long periods of years, bearing a low rate of interest and secured by the value of his land. The other provides a special form of personal credit not limited to thirty, sixty or ninety days or even six months, but extending from six months to three years. These are the Rural Credit Banks which play so important a part in the

it means to have a cow finish up her season's work several months before she should. Parsnips For Dairy Cows.

Most all root crops are excellent stimulant food for dairy cattle. Parsnips rank close to the top, because they are richer in food nutrient than most of the other roots. Unless cows are being fed exceptionally well the addition of parsnips or any other roots will cause them to increase in their milk flow. If parsnips can be raised or purchased at a cost within reason we recommend very highly their use. -Kimball's Dairy Farmer.

Again Petticoats. The smart petticoat for wear with sport skirts is of kersey silk in vivid stripes. These petticoats have a good flare at the ankle, but at the hip they are attached to a smoothly fitting yoke. and the edge is finished simply with a deep hem, no ruffles or flounces breaking the smooth, trim line. For golf and all other out of door sports they are ideal, since their silk texture is so beautifully light and the flare at the foot prevents their clinging about the limbs in active exercise. Tailored skirts call for more elaborate petticoats, and those of pussy willow taffeta, with scant ruffles put on with cording, are the most distinctive sort. All petticoats measure two and a half to three yards at the edge now. and some of the more elaborate dancing petticoats of lace own to five and ever six yards of width.

Have you ever gone to a party and faced the problem of where to put your handkerchief? Party dresses as a rule are not provided with pockets. In selecting ten ears for exhibition the first thing to remember is that the sample will be judged as a whole and not in part on the merits of a few exceptionally good ears. Two or three unusually fine ears cannot make up for the deficiency of the rest of the sample. They will bring out more prominently the poor qualities of the other ears and therefore detract from, rather than add to, the appearance of the sample.

Uniformity s be one of the principal considerations in selecting corn for exhibition. Have every ear like every other ear in shape, size, character of kernel, color of cob and in shade of color of the grain. When selecting sample, first pick out in the field while husking or from the wagon or crib, one hundred or more of the best ears to be found. Lay them out on a table or floor side by side, and having in mind all the characters of a good ear, study each carefully and eliminate the poorest ones. Two or three hours can be spent very profitably at this. Next, select two or three of the most ideal ears in the pile, using each as a standard, match them with as many good ears as can be found. Finally, out of these lots, choose the best ten ears that will match.

The ear should be cylindrical, or at least only slightly tapering, with rows running straight from butt to tip. A tapering ear has either less rows on one end than on the other, or the kernels are shorter or narrower on the tip end. In either case, the yield of grain is less than that of a cylindrical ear; besides, in the latter case, there is the additional objection of lack of uniformity in shape of kernel which makes it impossible for the planter to drop them evenly .--Nickolas Schmitz, Maryland Agriculural Experiment Station.

Rev. T. H. Wright had a quiet wedding at the M. P. parsonage, last Satur-day evening, when Carroll Fritz and Miss Sarah Hoover, of near Wakefield, were married. They were unattended and only a few guests witnessed the ceremony. Several months ago, three guineas be-longing to B. L. Bookson disappeared, and they knew nothing more of them until two weeks ago when they came marching home with a flock of young guineas, some nearly grown and others quite small. Ambassadorial Indiscretions.

The first rule of an ambassador's office is that he shall abstain from all interference in the affairs of the country in which he is living. A breach of that rule makes him persona non grata. In English diplomacy the best known case is that of Bulwer at Madrid. Bulwer had, by order, transmitted to the Spanish government in 1848 an impertinent dispatch in which the actions of the Spanish government were strongly criticised. Bulwer received a reply stating among other things: "Your conduct in the execution of your important mission has been rep. robated by public opinion in England, censured by the British press and condemned in the British parliament. Her Catholic majesty's government cannot defend it, and that of her Britannic majesty has not done so." Whereupon Bulwer received his passports with peremptory orders to quit the country within forty-eight hours .-Manchester Guardian.

When Cheese Was Vulgar.

There was a time when cheese was regarded as too vulgar a diet for well bred ladies. This belief is referred te in Mrs. Gaskell's "Wives and Daughters" and also in "The Visits of Elizabeth," where Mrs. Elinor Glyn makes her heroine write: "I was glad to have a nice piece of cheese. All the time was with godmamma I was not allowed to, as it isn't considered proper for girls." A correspondent of Notes and Queries for April 24, 1909, writes: "When I was living in Jamaica some years ago a friend of mine who would now if living be about ninety-five told me that before he left England as a young man it was not the custom for ladies to eat cheese. Though he had been in England so lately as 1874, he believed that ladies suffered the same privation at that time and almost refused to believe me when I told him that they did not."-London Chroni-

Mice That Subsist on Scorpions.

Among the queer forms of animal life that inhabit Death valley is a mouse that has acquired such a taste for scorpions that they form its entire bill of fare. The scorpion carries its formidable armament at the end of its slender, elongated abdomen in the shape of an exceedingly venomous hooked sting. When disturbed it elevates this in the air and goes in search of its disturber. But it is comparatively slow in its motions, while mice are proverbial for their quickness the world over. The mouse learned many generations ago where the scorpion carries its weapon, and when he meets it he leaps at the uplifted abdomen, takes off the sting at a single bite and proceeds to make a meal of his helpless prey. It is supposed to be the only animal that relishes scorpions.

Moral Suasion and a Strap.

"She seems to have abandoned her moral suasion ideas relative to the training of children." "She has."

Touchy About Their Rank. No ambassador can be arrested or sued for debt. However much he may get credit, or even defraud a tradesman, he cannot be prosecuted. It is the same with an ambassador's wife. The wife of a Spanish ambassador at Turin once had her goods seized by a creditor, whereupon Spain at once demanded the most profuse and abject apologies from the Italian government! We have mentioned the ambassa-

dor's wife. She is almost as important as her husband. Any attack on her is reckoned by her husband's government as being an affront to itself. She is very susceptible, too, on matters of predecence, and her susceptibilities must be regarded. The wives of the British, the French

and the Austrian ambassadors all left ball given by the Princess Palavicini at Rome, and left it before the departure of the king and queen because they had not been placed at the royal supper table while ladies of lesser position had .-- Pearson's Weekly.

Nothing Coming.

The teacher was instructing a junior class in arithmetic when she started to give the youngsters some mental exercises.

"Johnny," said she, turning to a youngster of ten, "if you went to the grocery store and bought 10 cents' worth of sugar, 5 cents' worth of soap, 25 cents' worth of coffee and 10 cents' worth of crackers and gave the proprietor a dollar bill in payment for these articles how much change would you get?'

"I wouldn't get any change, Miss Mary," was the rather surprising response of the boy.

"You wouldn't get any change!" exclaimed the teacher. "How do you figure that out?" "Storekeeper wouldn't give up," an-

swered Johnny. "He would freeze on to it for the old bill."-Philadelphia Telegraph.

The Most Popular Sin.

The most popular sin, according to high authority, is selfishness. At least this was the conclusion reached by a number of prominent public men, including lawyers, editors, religious workers and others in response to an inquiry of Rev. Dr. Reisner of Grace Methodist Episcopal church, in New York, "What is the most popular sin and the best method to offset it?" Of all the ignoble traits of humanity selfishness works the greatest evil. It finds its root in envy, malice, extravagance and its fruit in sin. If we could analyze the causes of crime, of poverty, of wretchedness and of war itself we would find at the bottom of them all the evil spirit of a selfish purpose. The best text for the preacher today is "Render unto Caesar the things that are Caesar's and unto God the things that are God's."-Leslie's.

Edward Everett.

Edward Everett was one of the most purely literary of all American orators. Among the more eminent scholars and statesmen of our land no one has ever been more deservedly honored for intellectual power, purity of character, public and private, and for clearness and perception of judgment than Everett. To the efforts of Edward Everett. more than to any other one person to be credited the raising of funds sufficient to purchase the home of Washington at Mount Vernon. He delivered a lecture on the character of that great man more than a hundred times and gave the proceeds to the Ladies' Mount Vernon association. He personally placed over \$60,000 in the treasury. It is probable that his oratory won for benevolent purposes at least \$100.000.

Buy an Enterprise. You may save a little (at. first) by pur-chashing an inferior machine, but if you want one that is everlastingly satisfactory, buy an Enterprise. The Iron Cyclinder, that's bored true; the Plunger Plate, that fits close but can't jam, and the Patented Corrugated Spout that keeps all air out of the sausage casing, preventing spoilage, are features putting the Enterprise in a class by itself, and demanded by those who know. The Nebular Hypothesis.

The nebular hypothesis assumes that the matter composing our sun and planets once existed as a vast gaseous nebula. spiral in form, having an inconceivably high temperature and slowly revolving on an axis passing through its center of gravity. As the mass cooled by radiating heat into space a contraction of volume with accelerated axial rotation would ensue, in accordaxial rotation would ensue, in accord-ance with well known dynamic princi-ples. The centrifugal force thus rap-idly increased would cause the separa-tion of large masses which would, by bouLAR BROS. & Co. mutual attraction of their own particles, gradually assume a spherical form and become planets. By a repetition of this process planet after planet would be thrown off and the central glowing sun would remain.

The earliest experiments in the direction of photography were made by Wedgwood and Day, but the first photograph was actually produced in a camera made by Daguerre and a partner about 1839. In 1840 the first photograph portrait was made by Professor John W. Draper, an American. Progress was made in the work of Fox Talbot, 1841, and Scott Archer, 1851, with the glass plate. The gelatin bromide dry plate was invented in 1871 by Maddox and greatly improved by Bennett in 1878. As in many other inventions, it is practically impossible

to lay one's finger on one man and one date for the specific "invention" of photography; it has been so largely a work of experiment and improvement.

Pretty Expensive Steak. The highest known price ever paid for beefsteak was at Circle City. Alaska, a town that sprang up almost in the night during the Klondike gold excitement. The first steak to reach there sold for \$48 a pound. It was a ten pound steak and was sent from a point fifty miles away. It was placed on exhibition and was such a curiosity that all the miners turned out in a body to see it.

Of course every one wanted a piece of the precious meat, and the prices offered might have resulted in a general mining camp quarrel had not some one thought of raffling the steak for the benefit of a bospital which a bishop was trying to establish for the miners at Circle City. Bids started at \$5 a pound and rose quickly to \$35. At last, in order to avoid possible trouble, ranging from 50 cents to \$2.50 for the \$480 worth of tickets had been sold the drawing began, and to the relief of those in charge of the enterprise no serious consequences resulted.-Detroit Free Press.

What pleasure and profit he would find in recalling the poetry he once so enjoyed or in turning to such essays as he had hitherto overlooked! He would find, 1 am sure, that the very things he long roneously supposed that it was visible wanted to know, the poetry that had almost faded from his memory, the had stirred his youth, now grown dim in his mind as "an ancient tale, although the words were strong." All this had stood silent and unnoticed on his walls for years and years, while he had been stuffing himself with the last short story, the lives of royal laundry women or it may be an article in a magazine.-Frederic Harrison.

ECLIPSES OF EARLY DATE Astronomers Hold Differing Opinions as to When They Were Officially Observed in China.

Messrs. Hiyarama and Ogura have published in the proceedings of the Tokio Mathematico-Physical society the results of their attempts to fix the dates of some early eclipses recorded in Chinese literature. The earliest is mentioned in one of the books of the Shu Ching, where it is recorded that in the reign of Chung K'ang, the fourth emperor of the Hsia dynasty, there occurred an eclipse of the sun which had not been predicted by the astronomers, who were alleged to have been drunk and to have neglected their duties. Hence the customary it was decided to sell tickets at prices rites for delivering the sun, which should have been arranged by the asprivilege of drawing a slice. After tronomers, were in the emergency performed by other officials without proper preparation. The emperor accordingly odered the army to punish the astronomers. A later document makes it possible to fix the date of this event as October 13, 2127 B. C. (Julian calendar)-the earliest recorded eclipse in the world. Calculation shows that there actually was a solar eclipse on that date, but probably not in China, though the elements of the motions of the sun and moon are not accurate enough to indicate certainly the path of so remote an eclipse. The authors are inclined to think that the information fixing the date of the eclipse is due to Chinese astronomers of a later age, who calculated that an eclipse occurred on that date and erin China.

When Fred Heiskell was city editor of the Arkansas Gazette, a cub reporter turned in a "story" that ran like this: "Buck Seymour was seen with a two-inch auger going down the river road this morning. Wonder what Buck is after now?"

"Here, young man," called out the city editor, "this story is incomplete. We don't print that kind of items in the Gazette. Tell what Buck was doing with the auger."

"I-I didn't find out," the cub stammered.

"Well, I'll tell you this one time. Plainly, he was going after grease fish. You catch 'em by boring a hole in the water and baiting the surface with dried prunes. The grease fish comes out, eats the prunes and swells up so he can't get pack in the hole."-New York Evening Mail.

PLAN NEW CITY FOR CHINA LITTLE JIMMY MUCH KISSED

Hankow Destroyed in Revolution, May Be Rebuilt in the Form of a Triangular Island.

The recent agitation regarding the proposed rebuilding of that part of Hankow, China, destroyed during the revolution, has developed into plans which may make the city a triangular island, and for this an English company offered (in July, 1914) to furnish \$50,000,000 at the close of the war then pending.

Commissioner Yan Tu has drawn up a comprehensive plan of improvement. One preliminary survey and one minute survey have been made, and all preparations for laying out the sites, digging the new canal and constructing the river bridges are being actively pushed on.

The best part of the city is now a strip of land along the river Yangtze, and this has been turned into concessions, so that nothing can be done in regard to it.

Next in importance is the land between the river and the old market place, which is the only area on which developments can be made. As the lower end of the market place is connected with the concessions, no extension can be made on that side.

At the rear is a shallow lake, and without great effort it cannot be turned into a market.

A comprehensive review of the situation which recently appeared in the Chinese National Gazette has met with widespread approval. It says: "The strip of land behind the concessions and the site of the lake are all distant from the river, hence transportation is difficult. Chinese commerce should extend and expand, and other undertakings must be effected. "Those in charge of the project now intend to open a canal, beginning at the upper part of the Han river, extending along the rear of the concessions and joining the Yangtze river. Thus Hankow will be a triangular island.

Disclaimed Any Intention of Rubbing Off Caress of Noted Woman-Was Trying to Rub It In.

Little Jimmy had reached the conclusion that everybody in the world had kissed him or wanted to yery badly. He could not help being a boy that all the ladies wanted to pet and bestow their kisses upon. In fact, Jimmy longed for the day when he would have a say so in the matter of being kissed. One day a famous woman came to call upon his mother. Jimmy chanced to enter the parlor and was directed by his mother to come up and see the noted Mrs. So and So. Jimmy knew what was coming, but he could not prevent the occurrence. The visitor took him by the hand and gently gathered him up into her lap, and as she let him down to the floor again she graciously bestowed a kiss upon his pouting lips. Jimmy jumped away from her and began to rub his lips in a vicious man-

ner. 'What, you are not rubbing my kiss off, my little man?" questioned the woman. Jimmy was puzzled for a few moments, then replied:

"No, ma'am; I'm just rubbing it in," and then vanished through the door .---Louisville Times.

Not to Be Repeated.

Shakespeare's contention that "there was never a philosopher who could en dure the toothache patiently" was disproved by Canon Liddon. After an experience that would have closed the mouths of most of us, Liddon found it possible to write to a friend: "I have been quite laid up with trouble with my few remaining teeth, of which 1 had five taken out the day before yesterday As only four remain, this par ticular experience cannot be repeated in this present life." WAR RELICS HELD OF VALUE

Gruesome Mementoes That Have Brought High Prices When Disposed Of at Auction Sales.

There was sold by auction a few years ago the spear that was used by a rebel dervish to kill General Gordon.

On another occasion the sword used by Lord Cardigan in the battle of Balaclava was disposed of at the same auction mart.

A very different war relic realized a very different price. This was the silver-gilt table service used by Napoleon in the course of his many campaigns, and it went for \$3,250.

A really extraordinary war relic was brought to light in an English court some years ago. A woman applied to the magistrate for a summons against a pawnbroker for damage to a hearthrug. She explained that during a campaign on the Indian frontier, her son had made a large hearthrug out of the garments of his slain comrades, and sent it home to her.

A few years ago a relic of the siege of Paris was discovered in a windmill near Besancon. This was the mummified body of a pigeon, to one of the wings of which a quill was attached. Inside this was a brief message, dated 1870, which read:

"Darling-All well, but starving.-P. P. G." The pigeon was one of the homers which had been released during the siege, and maybe shot by the Germans.

"It is mere flattery."

"Well, maybe it is," said the girl, 'but it sounds good. I'd rather listen to that sort of talk than literary conversation or opinions about the length of the war."

Hope.

Politics was running high in Paris. A candidate was speaking to an audience, inveighing against the demagogues who, he asserted, were corrupting the masses. "Money," he said, "is flowing like water. There is a man in this audience who I know has received 100 francs for his vote. Just think of it-100 francs for the surrender of the invaluable privilege he enjoys under the republic of expressing his wish in national affairs!"

After the meeting the speaker, Victor Daroux, was sitting in a restaurant on the Boulevard des Italiens with a couple of friends, partaking of a supper. He was just raising a glass of wine to his lips when a man stepped up to him and said:

"M. Daroux, I am the bearer of a message to you from my friend M. Charlier. He demands a retraction from you in tomorrow morning's journals of your accusation in your speech this evening that he has sold his vote. In case you refuse"-

Daroux, who was staring in wonder at the speaker, broke in-

"Why does M. Charlier assume that I referred to him in my remarks?" "Because you looked directly at him

when you made the accusation." Daroux was deliberating what to do

in the matter when a waiter approached and informed him that a gentleman in another part of the room desired to speak to him privately. Excusing himself. Daroux went to this newcomer.

"M. Daroux," said the man, "I represent M. Arnoux. He demands an immediate retraction of your accusation made this evening that he has sold his vote for 100 francs.

Daroux was tempted to laugh, but the speaker was so serious that he refrained.

"Why does M. Arnoux assume that I referred to him in my remarks?" he asked.

"Because you were looking directly at him."

Daroux was silent a few moments, then said:

"And if I refuse to retract?"

"In that case M. Arnoux expects that you will give him the satisfaction due from one gentleman who has wrongfully accused another."

"Let me have your address," said Daroux. "I will send an early reply." Returning to his table, Daroux received the same announcement from M. Charlier's friend of what was expected in case of a refusal to retract and called also for his address. The man had scarcely gone when a third came and demanded a retraction for M. Blanc for the same offense and received the same answer as the others. "It seems." said Daroux to his

friends, "that if a guilty conscience counts for anything there has been a good deal of vote selling." During the next half hour three more men demanded a retraction of M. Daroux for accusing them of selling their votes, and the accuser, after being informed that a refusal would be followed by a challenge, called for the party's address and promised to send an early reply. "It does not seem so remarkable," said Daroux after the last man had been disposed of, "that so many men have sold their votes, but that the price in each case should have been a hundred francs. I had heard before rising to speak that 10,000 francs had been distributed among certain influential voters, but I did not know that a hundred francs was the current price paid. I fancied that some one of the persons bribed might be in the meeting, and it occurred to me to fire an effective shot by making a pointed accusation. It seems that I have killed half a dozen birds with a single stone.' These words were spoken to friends who were with Daroux when the avalanche of demands for retraction fell upon him. One of the party suggested that if the matter were properly handled sufficient capital might be made out of it to win the election. Daroux was running for the corps legislatif, but his opponent was so lavish with money that he had no hope of being elected. However, those gentlemen now gathered about him at the restaurant were shrewd politicians, and they set themselves to find a method of procedure by which the incident at home might be used to turn the scale in his favor. It was decided to stave off the matter till the day before the election, which was to take place in four days. The day after the demands for satisfaction were made no reply was sent. The second day each one of the conscience stricken men received word that M. Daroux refused to retract. A reply to his refusal was returned by each one of the six men accused in the shape of a challenge to mortal combat. Daroux chose six seconds to represent him, and since, being the challenged party, he was entitled to choice of weapons, time and place of meeting he instructed each second in accepting the challenge to choose foils, to appoint the time at 10 o'clock on the morning before the election and the place the Place de la Concorde. Every challenger was struck with amazement that so public a place ed, no action was sver taken in the should have been chosen for the meet- matter.

"how he expects to make capital out of so great publicity. He has made an accusation which is thrown back in his teeth, and he must answer for it under the code. Surely there is no advantage in this." M. Arnoux was much puzzled at the choice of place of meeting. and M. Blanc-who, by the bye, had distributed the money used to buy votes-began to fear that some game was to be played. Nevertheless he did not see how he could do anything to prevent it. At a quarter to 10 on the morning ap-

pointed for the fight M. Daroux, surrounded by his six seconds and a surgeon, appeared in the Place de la Concorde, near the base of the obelisk. Paris was quite alive at that hour, and many persons were passing and repassing. Seeing the party at the foot of the obelisk, the seconds with foils under their arms, the surgeons with their boxes of instruments, persons stopped to learn what it all meant. Gradually a crowd collected, and the word was passed from one to another that there was to be a duel.

"Can you tell me," asked one of another, "who that distinguished looking man is, with his arms folded, waiting?"

"That, monsieur, is M. Victor Daroux, candidate for election tomorrow for the corps legislatif."

"And why so many attendants?" "That I do not know; I am waiting

to find out.' At the moment a carriage drove up, and M. Arnoux, attended by his second and a surgeon, alighted. He seemed quite chagrined at seeing the crowd, but it had been not entirely unexpected. He supposed that Daroux was intending to make a display of his skill and bravery on the eve of the election. Arnoux, seeing that no one of the other party made any advance to begin the fight, said:

"Pardon me, gentlemen. If we are to fight so publicly it may be well to begin at once and have it over with." "There is another ahead of you, monsieur." replied one of Daroux's seconds.

"Another! What other?"

"One who took M. Daroux's accusations to himself."

Arnoux winced.

Another carriage rolled up, and another challenger alighted. He, too, was delayed, and before the cause of his delay could be explained to him four other defenders of their honor arrived in quick succession. The crowd by this time had swelled and was in a fever heat of expectation. No one understood why so many men, each attended by a second bearing foils, should continue to pour in. It happened that M. Charlier, who was the first challenger, arrived last. As soon as he came M. Daroux's second begged the crowd to make room, since the duel was about to begin. The other five challengers protested, and the crowd began to hoot and yell, at the same time pressing the duelists so closely

that there was no room for the fray. Finally some one of the crowd yelled: "What's it all about?" "It's a put up job!" cried one of the

hystanders. "There's half a dozen of 'em picking

CHEAPER AND GENERALLY BET-TER THAN CAN BE BOUGHT.

Suggestions Here That Are Well Worth Making Note Of - Dipped Chocolates Among the Best-Various Ways to Prepare.

Homemade candies are cheaper than those one buys in the shops. Of course, dipped chocolates made at home cost a good deal, but even they do not cost as much as good chocolates from the shops. And homemade peanut brittle is as much cheaper, relatively, than homemade dipped chocolates as "storemade" peanut brittle is cheaper than good chocolates.

An inexpensive and delicious sort of peanut brittle is made from shelled peanuts and granulated sugar. Spread the peanuts, shelled and skinned and broken in halves, in buttered pans. Melt granulated sugar and cook it until it turns brown, but do not let it burn. As soon as it is all brown, but before any of it has begun to burn, pour it over the nuts. A few drops of vinegar may be added just before removing the sugar from the fire.

Dipped chocolates are most easily made with an uncooked foundation. Break the white of an egg in a big bowl and add to it three tablespoonfuls of cream. Mix a little and add a pinch of cream tartar and confectioners' sugar enough to make a stiff cream. Then divide it into several smaller bowls and flavor each differently.

Into one pour a little very strong coffee, or coffee extract, and add enough more sugar to stiffen sufficiently to handle with a teaspoon. Then form with a teaspoon and place in little mounds on waxed paper. If you add enough confectioners' sugar to make the cream dry enough to handle with the fingers it does not taste quite so soft and creamy as when it

is handled softer with a spoon. To another batch of the fondant add some raspberry jam and form into mounds. To another add grated orange rind and a little juice. To another add essence of peppermint. To another the juice from maraschino cherries. To another chopped nuts. To another cocoa powder enough to color rich chocolate. Add enough sugar always to make the cream stiff enough to handle with a spoon. A little vanilla may be added to any of the other flavorings. Stiffen some of the fondant and mold it around candied fruit and nuts and maraschino cherries drained of their juice.

Let the cream forms harden overnight in a cold place, and the next day melt the special coat chocolate sold for the purpose. Don't use it too hot. Take each form on a fork, dip it into the chocolate and slip on waxed paper to dry.

Decorate the tops of some of the chocolates with nuts and candied fruits.

Meanwhile Daroux stood silent with folded arms, the only person whose dignified appearance commanded respect. When the gendarme arrived Daroux said something to him in a low tone, to which the officer assented. Then M. Daroux, raising his hand to impose silence, made an explanation. He began by telling of hearing on good

authority that a large sum was being used to land his political opponent in office and of his having made a blind charge. Then he told how each of six different men in the audience had taken the accusation to himself and demanded a retraction or satisfaction.

"And now, my friends," continued the speaker. "I am here to back my words. I have accused none of these gentlemen. They have accused themselves. For we all know that a guilty onscience needs no accuser."

The men who had come to fight Daroux got away as fast as they could. amid the jeers of the crowd. Daroux entered his carriage with his attendants and drove across the Seine to the legislative building on the other bank, attended by an enormous crowd. There he alighted and made a political speech. in which he told the story to a multitude of voters.

Every evening paper in Paris had an account of the affair, and the cafes were filled with persons laughing at the way Daroux had exposed the corruption of his opponents. That night he spoke to an immense concourse. who demanded again and again to hear the story from his own lips.

The journals the next morning al published editorials upon the low grade to which Paris politics had sunk and the iniquity of using money at elections. During the day Daroux drove from ever poiling place to another and where, he appeared was greeted with shouts of applause mixed with laughter at the way he had turned the tables on his opponents.

Before 9 o'clock at night it was known all over Paris that Daroux had been elected, and when the papers came out the next morning they announced a landslide in his favor.

What became of the six self accusers was never known. They got away from under the limelight as quickly as possible, and on the day after the election not one of them was to be found in Paris. Daroux was urged to proceed against them for bribery, but, since the only evidence against them was what they had themselves furnishFried Chicken.

Cut the chicken in pieces, lay it in salt and water, which change several times; roll each piece in flour; fry in very hot lard or butter, season with salt and pepper; fry parsley with them also. Substitute for Cream.

If a recipe for soup calls for cream, and it is not at hand, try milk and egg as a substitute. Boil a cupful of milk, and when it is cooled add a beaten egg. Strain, and add a tablespoonful of butter. Add this mixture to the soup, bring it to the boiling point and serve at once.

THE INTERNATIONAL SERIES.

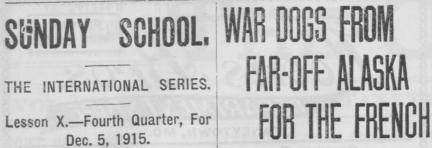

Lesson X .- Fourth Quarter, For Dec. 5, 1915.

Text of the Lesson, Il Chron. xxvi, 8-21-Memory Verse, 16-Golden Text, Prov. xxix, 23-Commentary Prepared by Rev. D. M. Stearns.

Our studies thus far have made us acquainted with many people, good and bad, some better than others and some worse than others, but none without failure, and no rest for our souls but in the God of Israel, who often appeared as a man and in the fullness of time became man for us, God manifest in the flesh. Our study today concerns a king whose reign was the longest of any, being fifty-two years, but he became proud and self willed and died a leper. The study of these lives is helpful only as, by analogy or contrast, we learn to know the Living God, the God of Israel, for the whole Bible is intended to make us acquainted with God that we may love and trust and serve Him and make Him known. Let us give a few minutes to Amaziah, the son of Joash and the father of Uzziah, whose record is in chapter xxv. He did right in the sight of the Lord in a measure and for a time (verse 2), but his record on the whole is bad. He turned away from following the Lord, bowed down to idols and burned incense to them, and when the Lord sent a prophet to reprove him he compelled him to forbear (verses 14-16, 27).

There was one incident in his life the record of which contains a saying which has often helped me and which I have often passed on to others. He hired 100,000 mighty men of valor out of Israel to help him in battle, and he paid them 100 talents of silver. A man of God was sent to him to say that he would not use these men, for the Lord was not with them and that God had power to help and to cast down. In reply to his question, "But what shall we do for the 100 talents paid to Israel?" he was told, "The Lord is able to give thee much more than this" (verses 6-9). We need to remember that God Himself hath power to help, and if we make an unwise investment or lose anything we may find comfort in the fact that the Lord is able to give us much more.

As to Uzziah, although his reign is the longest of any, his record is one of the shortest, for there seems to be but little to record. In some lives much is accomplished in a few years, while in others a long life is comparatively fruitless because God is not in it. It is said that he did right in the sight of the Lord, and, as long as he sought the Lord, God made him to prosper (xxvi, 4, 5). God helped him against the Philistines and Arabians; he built towers in Jerusalem and in the desert, digged many wells (for he had | faced youth with the thick burr of much cattle) and loved husbandry. His the Highlands in his voice, "fer ye ken

"Scotty" Allan, Famous Driver, Supplies Consignment for **Dispatch Service.**

"MUTS" BRING GOOD PRICE

Fine-Looking, Alert Animals, Some Weighing as Much as 80 or 90 Pounds-One of Them Was a Contender in Last Sweep-Stakes.

Winnipeg, Man .- A slight little man, with a small, lean frame, keen features and iron gray hair, stood in the door of a box car at the stock yards. He wore yellow overalls and a coat to match. Little feet, encased in square-toed, custom-made shoes, protruded from beneath his trousers. In fact, he looked like a stock yard attendant, and yet he is renowned throughout America, for this was A. A. ("Scotty") Allan, the world's greatest dog driver.

With Lieutenant Haas of the French army, he was passing through Winnipeg with 400 malamutes from Nome, Alaska, to be used in France this winter for dispatch service and the transportation of supplies and ammunition to the firing line. A stop was made here to rest the dogs, and they were unloaded into the stock yards with a guard from the Seventy-(Cameron) Highlanders to ninth watch over them.

Thrice out of eight times "Scotty" Allan has won the All-Alaska sweepstakes, the greatest long-distance dog race in the world-408 miles from Nome to Candel and return. In three instances he was second and twice he was third.

"I have been in every race yet held," he said, "and I have not run out of the money yet.

In the first race which he won the stake was \$11,000, but last year the stake had dwindled, because of the pinch from the war, to \$3,750. "Scotty's" best time in the event has been 76 hours, while the record of 74 hours was made over better trails.

Genial Little Scotchman.

Geniality and sociability seemed bred in this vigorous little Scotchman, and he is as active as a boy despite his forty-eight years. The kilties on guard had not been on the ground an hour before they were fast friends, and they pressed upon him an invitation to the dance at the armories.

"Ye c'n dance the Hielan' fling an' hoot for all ye're worth," said one redname spread far abroad, and he was we have the pipes and ye'll hae a

large, padded feet.

Some of the dogs were pure white; some were of a brownish color, with round, fat faces and squatty-looking bodies, and there was one pup, a pure Siberian, three months old, that was being taken along as a mascot. He had a head shaped like a fox. From nine to sixteen of these dogs are used to a sleigh, and the highly prized lead dogs are in a class by themselves. "Scotty's" Career.

Morayshire, in Scotland, was the home of "Scotty" Allan. He came to North Dakota with an assignment of thoroughbred horses in 1887. He recalled that his first experience in dog driving was in the Turtle mountain of Manitoba, when he drove a mail route. Subsequently he wandered over the western states, engaged principally in railway building. He helped build the Great Northern railway, and in the spring of 1897 he went to the Klondike in the gold rush, going over the Skagway trail, which he helped to build. He is now a member of the hardware firm of Darling & Dean at Nome, and Mrs. Darling, wife of one of his partners, is interested financially with him in racing dogs. They have sold 20 of these dogs to the French government, and have 27 left.

Allan and his assistants are going only as far as Quebec with the dogs, and on his return he will spend the winter in California-the first winter in almost twenty that he has spent ouside the Arctic circle. He has one daughter, a girl of eighteen, attending the university at Berkeley. There is another daughter, aged seventeen, and a boy of nine.

He says that gold mining at Nome is not being conducted on the same scale as formerly. Most of the work is being done by big syndicates working with dredges. The war has hit the country hard, and there is not much ready cash in sight.

Lieutenant Haas, who will take the dogs to France, spent eight years in the Klondike, and he was eleven months in the trenches before he was sent on his mission to Alaska. The explosion of a shell rendered him deat in one ear.

Some of the Most Strange, and to This Age Foolish, Were Those of Middle Ages.

"If a prosperous modern man, with a high hat and a frock coat, were to solemnly pledge himself before all his clerks and friends to count the leaves on every third tree in Holland walk, to hop up to the city on one leg every Thursday, to repeat the whole of Mill's 'Liberty' 76 times, to collect 300 dandelions in fields belonging to anyone of the name of Brown, to remain for 31 hours holding his left ear in his right hand, to sing the names of all his aunts in order of age on the top of an omnibus, or make any such unusual undertaking, we should immediately conclude that the man was mad, or, as it is sometimes expressed,

was 'an artist in life.' So writes Gilbert K. Chesterton, who goes on to say: "Yet these vows are not more extraordinary than the vows which in the middle ages and in similar periods were made, not by fanatics merely, but by the greatest figures in civic and national civilization -by kings, judges, poets and priests. One man swore to chain two mountains together, and the great chain hung there, it was said, for ages as a monument of that mystical folly. Another swore that he would find his way to Jerusalem with a patch over his eyes, and died looking for it.'

BIG MEN IN BRITISH ARMY

Ulster Volunteers Said to Hold the Record-Soldiers of Large Stature All From Ireland.

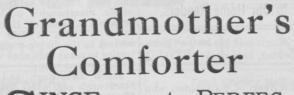

The Ulster volunteer force, unbeaten in its record of giving recruits and money since the war began, is also unbeaten in the record for big men. Sergeant J. Bryan Stewart of the Eleventh Royal Inniskilling Fusiliers, thirty-two years of age, is 6 feet 41/4 inches in height, chest 43.45 inches. He is believed to be the biggest man in the whole British army at home or abroad. Though of such great stature, he is an international water polo player, an old varsity Rugby man, a keen motorist and a sports enthusiast. Sergeant Stewart is an Enniskillen man and has two brothers in the army, one a veterinary surgeon, Lieut. Charles Stewart, serving at the front, and another, Lieut. Jack Stewart, in Kitchener's army. Few regiments could beat the record of the Eleventh Inniskillings in the stature of their men.

The A and B companies, which are all drawn from Donegal and Fer managh, have several men over six feet.

Nearly Got the King. The Tribuna states that the king of Italy, who is an excellent soldier, was present recently at the bombardment of an Austrian fort.

marvelously helped till he was strong | braw time." (verses 7-15). His works seem to be of the Lord and nothing enduring, and all the time he seemed to be growing more self important, growing away from the Lord, seeing himself and those who praised him.

What a contrast to Saul of Tarsus. who from the day that he saw the Lord Jesus on the way to Damascus could see no one else unless he might draw them to Him, for whose excellency he counted all things but dross and in whom alone he gloried. The whole story of the daily life is either self or Christ. The true life is denying self and magnifying the Lard. What an utter failure man is apart from God, for when this man became strong his heart was lifted up against God, and he transgressed against the Lord his God and even dared to burn incense in the holy place in the temple of the Lord, a thing which only the priests were authorized to do. When the priests ordered him out he became angry, and then the Lord smote him in his forehead with leprosy, and he himself hastened to go out. He dwelt in a separate house and died a leper (verses 16-21). In Gehazi the sin was covetousness and lying, but in this man it was pride, self conceit, self will. All consummation of sin, as in these and similar cases, points us onward to the man of sin, the greatest representative of the devil that ever was. or will be, who will oppose and exalt himself above all that is called God or that is worshiped. * * * showing himself that he is God (II Thess. ii, 3-12; Dan. xi, 36; Rev. xiii). But he shall be overcome and cast into the lake of fire at the coming of the Lord (Rev. xx).

1

Many who have died lepers have gone home to heaven because redeemed with the precious blood of Christ, and we may meet Gehazi and Uzziah there, too, for the suggestion in their sins need not imply the loss of the soul, but, rather, the loss of service, as in I Cor. iii, 9-11. It is our privilege to walk with God all the way, to serve Him without turning aside and to receive a full reward at the coming of our Lord (II John viii; I John ii, 28). Isaiah seems to have begun his prophecy in the days of Uzziah, and he has much to say about loftiness being humbled, haughtiness bowed down and the Lord alone exalted.

When I think of Uzziah I feel led to pray that I may never be strong except in the Lord and always remember that His strength is made perfect in weakness. I also think of the record of Uzziah's death in Isa. vi. 1, and eyes and wagged its tail in affectionhear the propher say what amounts to ate greeting. When this dog stood up this, "I saw a king that never dies."

"I hae nae doot o' it," said Scotty, more for his ows name than the name and he gave his solemn promise to be on hand. He said he loved the dance.

Three cars are used to transport the dogs, and each car is divided into a series of compartments so that each animal is separated from his neighbors. There has not been a dog lost since they started. In one car is kept the supplies, consisting of three and one-half tons of sun-dried salmon caught at Kotzebue on the Arctic ocean. Here, too, were stored eight of the long sleds, some of them of the toboggan type, which have been made famous by many authors in the tales of the North. There were also 150 sets of harness, together with several Eskimo "parkas," or reindeer and squirrel skin coats, with a hood that fits snugly over the head in stormy weather. In addition there were several pairs of "mukluks," or high-waterproof boots, made of sealskin tops with the hair exposed, and soles made from tough sea lion hides.

Price From \$30 to \$50.

"Scotty" said that he had with him several of the dogs that took part in the All-Alaska stakes. He had refused \$200 for two of these just before he left Nome. Many of the malamutes were purchased, he said, for as high as \$40 and \$50, but on an average the price paid was about \$30. The animals, he said, were coming through in fine shape. At first they had been fed on one fish a day, but as they were getting too fat, this had been reduced to half a fish daily.

Every dog was tied by a chain to the fence of the stock pens and widely separate from his neighbors. They were a miscellaneous lot. Allan explained that they were mostly "breeds," but for the most part they were of one type-big, wolflike fellows, with narrow eyes, ears crooked and pointed, and a long, protruding snout. Some of them weighed as much as 80 or 90 pounds. A remarkable fact was that several of them were of a very marked setter strain, and the great dog driver said there was no better dog in the north country than a setter crossed with a malamute --"that is," he added, "if he gets the malamute feet.'

Reliable Old "Irish."

"Ah, Irish, old boy!" he called to one handsome animal, and the dog with the red touches of the Irish setter strain looked up at him with big, soft his legs were seen to be long and north, range 7 east. a general, who asked the lieutenant's name, which was told him.

Photograph of Meteor Trail.

Perhaps the most remarkable photograph of a meteor trail that has yet been taken is reproduced in a recent issue of L'Astronomie. The meteor in question was seen from many points in South Africa about 5 p. m. on June 2, 1912-i. e., in broad daylight-and the trail that it left behind it remained visible until some time after sunset, becoming more and more conspicuous as the daylight faded. The photograph in question, which shows the trail as an immense serpentine ribbon in the western sky, was taken at Tempe, Orange Free state, about an hour after the passage of the meteor.

The Chauffeur a Robber.

No woman would have cared to take on the job of the earliest chauffeurs. For long before the arrival of the motor car the chauffeur existed. The name was applied to bands of robbers practicing in the border lands between France and Germany at the close of the eighteenth century. They earned the name (and lived up to it) by a habit of scorching their victim's feet to expedite the revelation of the hiding place of his money. Rumor had it that the bands were encouraged by the exiled royalists of France, and, at any rate, their extermination was one of Napoleon's first tasks when he became first consul.

Cause for Bellicosity.

"Well, I'll be slammed!" ejaculated Lester Greenshaw of Petunia in the midst of his perusal of the village newspaper. "The Weekly Palladium has all along been for peace at any price, and here, this week, every editorial in it is defying somebody and yelling that everybody must apologize to us!"

"Yep!" returned Hod Durnitt. "A feller paid the editor two years' subscription in hard cider day before yesterday!"-Kansas City Star.

Not That Week.

An Irish private in France asked a subaltern to write a letter for him to his wife. This was what he took down: "Dear Bridget-This is a terrible war. I am sending you ten francs, but not this week."

SHOWING HOW TO DO THINGS

Much That Could Be Accomplished by Woman County Agent in a Community.

The United States department of Agriculture has started a movement to place a woman county agent in every community in this country. And why shouldn't it? Mother needs help just as well as father.

The woman county agent is to do for women, girls and the home what the farm demonstration agent dces for the men and the boys on the farm. The aim in each case is to get done some definite worth-while things, which teach a lesson and inspire to greater achievements. In the girls' canning-club work the girls are instructed how to grow tomatoes and other vegetables on one-tenth of an acre, and how to can, preserve, pickle, and in other ways utilize the products. Winter garden clubs and poultry clubs have naturally followed the work in canning and summer gardening. Bread making and many other forms of homeimprovement work have also been taken up. This work trains girls to become efficient home makers, develop the resources of the farm, to improve the quality of the country life and to become economically independent. From the girls' garden to the mothers' kitchen and the home is a short and easy step. The work with girls has opened the way for systematic home-economics work in the rural home, and has developed the logical organization and method for doing this work.

Making Resin in a New Way.

A new method of extracting resin from pine wood has been discovered by Newton Crites, a student in the University of Washington. In the South the solvent used is gasoline, but from 25 to 30 gallons of gasoline are lost in the treatment of each cord of wood. Crites substituted ammonium hydroxide for the gasoline and worked out a process by which complete extraction of the resin is possible, together with the recovery of practically all the ammonia.

Prof. H. K. Benson, under whose tutelage the young inventor worked, expresses the belief that the waste of Seattle lumber mills will supply 12,000 barrels of resin annually at a lower price than it can be made for in the southern states.

The navy must be the equal of Germany's as a fighting force, not because there is special reason to anticipate hos-tile action on Germany's part, but be-cause war with England is unlikely, by reason of an established policy of arbi-trating international differences, and the German nave represent the lower will Those present were: Jacob Stambaugh and wife, Harry Stambaugh and wife, John, Cleve and Charles Stambaugh and wives, Clifford Hahn and wife, Jones Ohler and wife, Linach Witharow and wife Dollar and German navy represents the largest mili-taristic policy. The navy, Mr. Taft would have developed on a basis of offensive requirements. Actual defence of the sea-board cities he would leave to coast fortifications, and he would revive the faith in these that was felt at the time of the Spanish-American War, basing his stand on the demonstrated efficiency of coast fortifications against naval guns at the Dardanelles, the single notable test in the European war. For the land forces he would have a regular army of availables of 100,000 men, and a first reserve of militia or National Guard of 125,000 more, or a total of 225,000 men to supplement the coast fortification forces and stand off any attacking enemy until a larger army could be raised.

port in the report of the General Staff on the organization of the land forces of the United States issued three years ago under the approval of Secretary Stimson, in which, after recognizing that a national citizen soldiery organized under the constitutional power to raise and support armies is the most complete solution of the problem, declared that "the immediate provision of such a force involves serious practical difficulties' and that the utilization and development of the National Guard under the militia pay bill and other reform measures is "the basis for a practical solution."

deserves more consideration than can be given it here, because it directs attention given it here, because it directs attention to phases of the nation's military prob-lem that sometimes are overlooked. De-fence is not entirely a domestic matter. As the professor of Yale says, "We have a good deal of hay out when a world storm is breaking." There are the Phil-ippines, Hawaii, Alaska, Guam, the Pan-ama Canal not to excell of commercial ama Canal, not to speak of commercial rights and interests in the four quarters of the world. Adequate national defence does not consist merely in keeping con-tinental United States safe from assault. Citizens and interests of the United States must be protected the world over, wher-ever they may be, and the navy of the United States must be equal to that duty. For that reason, even more than for the defence against invasion, the needs of the navy come first, and Mr. Taft's plan of preparedness demands consideration for balance and effectiveness. - Phila.
