Red flannel, for underwear, is doomed, owing to the impossibility of getting the necessary dyes. All city jobbing stocks are practically exhausted, and what little is to be had is extremely high in price.

Dr. Earl E. Peck, a physician at Phil-adelphia Hospital for Contagious Diseases, died on Tuesday of infantile paralysis, due to his attendance on sufferers from the disease, and the exhausting amount of time he spent on the cases.

A meeting of the Union Temperance League of Carroll County will be held in the Opera House, Westminster, Saturday, Sept. 16, at 2.30 p. m., to make arrangements for the campaign to combat the return of saloons to Carroll county. -....

The woman who left her little child in the Hanover, Pa., station, recently, is said to be Mrs. Mamie Nalley, a widow, thirty-three years old, who has been arrested in Hagerstown, and who is report-ed to have confessed that the child is

..... In Pennsylvania, it is illegal to sell fruit or potatoes by the crate or basket, without being weighed, measured or counted, the insistence of the law apparently being on weight. Peaches must weigh 48 lbs to the bushel, and potatoes 60 lbs.

....

The longest petition ever presented to Parliament arrived the other day from Ulster county, Ireland. It was two and one-half miles long and bore the signature of 115,000 persons who asked for the prohibition of the sale of intoxicating iquors for the term of the war and at least six months thereafter in Great Britain and Ireland.

---- C---

100 miles, then overtime, or mileage, applies. A railroad day is either 10 hours or 100 miles. The wage is fixed on what-ever basis that will yield the most. An engineer running a fast freight which can travel 150 miles in ten hours will secure a mileage rate. A men running a clow

a mileage rate. A man running a slow preight that will go only 75 miles in ten hours will secure 10 hours wages." "The average wages of engineers in 1915 were \$1,892.00 a year, the conductors \$1,719.00 a year, the firemen \$1,117.00 a year, and the brakemen \$1,013.00 a year. These figures represent the actual amounts paid trainmen that year."

Information as to Trainmen.

The RECORD has condensed, below, a

lot of information concerning the train-mens threatened strike, the wages of

trainmen, etc., from an article in the

"The trainman receives a full ten hours wage whether he works only six hours or

ten hours, or operates his train 60 miles or 100 miles. But in the event of his working beyond 10 hours or running over

many during the past two weeks.

paid trainmen that year." "The trainmen represent 18 per cent of the railroad army. This 18 per cent now gets 28 per cent of all the wages paid out by railroads. The other 82 per cent receives an average salary of \$700.00 a year, while the brotherhood members taken together seeure an average salary taken together secure an average salary of \$1260.00 a year. Every additional dollar that the trainmen demand means lower wages for the clerks, station men, signal men, trackmen and hosts of other

employes.'' ''The Interstate Commerce Commission loes not allow the railroads to increase their rates. They contend that the rates are high enough and that the public can pay no more. When 18 per cent of the trainmen employees, however, demand \$100,000,000 more a year, which is equiv-alent to a 5 per cent increase in freight rates, the Commission must be ready to grant higher rates."

Sunday School Convention and Reunion.

The ninth annual Sunday School Con-vention and Reunion of the Sunday Schools of Carroll county, will be held at Leister's church, in the grove adjoining the church, on the state road from West-minster to Manchester, $3\frac{1}{2}$ miles from Westminster, on Thursday, September 21. Great interest has been taken in these

annual meetiugs. From 20 to 25 minis ters and from 60 to 65 Sunday School superintendents, as well as many officers and teachers and thousands of Sunday School members and church members, have been together at same time in song, in fellowship, in conference, in addresses,

The Sunday School being the Bible School of the church for christian training of the children, and the moulding of character according to the teaching of the Bible, qualifying the boys and girls for service in the vineyard, and the cares and duties of the homes of the next generation, and the christian training of the children, the Sunday School assumes an important command: "Feed the flock important command: "Feed the flock of God which is among you, taking the oversight thereof." The convocation program, which will be held in the College Chapel, at 10.30

oversight thereof." Considering the issue that is before the

THREE PERSONS KILLED AT RAILROAD CROSSING

Well Known Citizens of Carroll

County the Victims.

Theodore Logue, of Pleasant Valley, and Mr. and Mrs. David Warehime, of Bachman's Valley, are dead as the result of a Pennsylvania railroad train, on Tuesday afternoon, striking an automobile driven by Mr. Warehime, and occupied by Mr. and Mrs. Warehime and Mr. and Mrs. Logue. The accident occurred about three-fourths of a mile north of Glen

Mr. Logue was instantly killed, while Mr. Warehime died several hours later at York hospital. Mrs. Warehime received several fractures and internal injuries and died on Wednesday morning at the Hospital, while Mrs. Logue was cut and bruised, but will likely recover.

The accident occurred at a grade crossing, and was due to a freight train ob-structing Mr. Warehime's view of the track, and the auto ran on the track im-mediately in front of the passenger train. The parties were on their way to York and intended to return home in the evening.

Mr. Logue and Mr. Warehime each

Mr. Logue and Mr. Warehime each leave a number of children. The automobile that figured in the tragedy was completely wrecked, and was owned by Mr. Warehime, and Mr. and Mrs. Logue, neighbors, were guests of the Warehime's on the trip. The men occu-pied the front seat of the machine while the women were in the rear. Although there were several signal renaimen workthere were several signal repairmen work. ing near the place at the time, the only direct eye witness to the accident was Miss Gertrude Bortner, who resides at Centerville, and close to the crossing. Miss Bortner told the railway officials that when the machine went to cross the track in front of the train it appeared to have stopped, as if the engine stalled for some Whether the driver of the mareason. chine actually saw the approaching train and sought to get across ahead of it, or whether he failed to notice it, will probably never be known.

Opening of Blue Ridge College.

Blue Ridge College, New Windsor, will hold its opening exercises, next Tuesday, with a very bright outlook for the coming school year. In fact, the prospect is that the buildings will be more than full, a situation not previously met with.

The music department has been espe-cially strengthened. Prof. W. Z. Fletcher, formerly of Brandon Musical Institute, will teach Voice and Theory. Mrs. Fletcher, of Peabody Conservatory, will teach Piano. Mr. Essers, a native of Holland, and a graduate of several institutions, will teach Violin. The College Faculty has also been strengthened in the addition of Prof. J. Clyde Zeigler, of Ohio University.

a. m., will be as follows: Eider C. D. Bonsack. Mr. Essers. Elder J. G. Royer. Miss Garber. Rev. Francis R. Bayley. Prof. Fletcher. Pres. Bowman.

defects.

CONGRESS SURRENDERED

The Western Maryland counties are receiving a visit, this week, from the State Forester, F. W. Besley. Mr. Besley is making a tour of the State for the purpose of extending the valuable work being done by the Maryland State Board of Forestry, and of stimulating a practical interest in it on the part of the local resi-dents and owners of woodland.

Visit of State Forester.

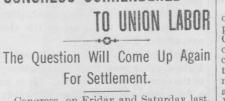

At each point touched by the State Forester a careful study is being made of such special timber problems as may confront the farmers and other landowners with stands of valuable timber, or timber which through a little practical care of the right sort might readily become so. The Board of Forestry has a well-defined plan for woodlot improvement and the marketing of forest products, and it is the purpose of Mr. Besley to explain the operation of this plan to all who may have an interest in it, through owning forest lands not in their highest state of productivity. Such lands may be inspected at this time, free of charge, and at any time at no cost but the travel expense of the State Forester from his office and return. Actual improvement work-and this includes the marking for removal of the trees which should come out, their estimate, and a list of timber buyers-is done at a very low per diem charge, representing perhaps a cost of 30 cents or less per acre. Such work should be taken up during the Forester's stay, or by com-municating with his office at Johns Hop-kins University, N. Howard St., Balti-

In addition to this special field of work Mr. Besley is also taking a complete cen-sus of sawmill operators and all wood-using industries; securing the names of woodland owners and examining their properties where it is so desired; calling apon the State's Forest Wardens, and visiting ones whom it has been suggested be given this office; taking up the ques tion of better fire protection with County officials and private individuals; securing local timber, wood and lumber prices logging and milling costs; making a study of local shade trees problems in towns and cities; visiting planting projects; calling upon Granges, societies, and civic clubs who may be expected to take a helpful interest in the forest problems of the State. In other words, Mr. Besley is making a careful study of all such ques-tions with the idea of furthering the work of the Board throughout the State.

It is hoped that all woodland owners or those owning worn-out lands which should be wooded, will not miss this opportunity of securing such helpful suggestions and practical assistance as they may require during the visit of the Forester.

Lutheran Missionaries Barred from India

The Lutheran Board of Foreign Missions of the General Synod, is meeting with many difficulties in its work in India because of the restrictions which the British Government has placed upon every-

Congress, on Friday and Saturday last, surrendered to the demands of the rail-road trainmen, by passing a bill that provides, briefly, as follows:

"That eight hours shall be deemed a day's work and the standard for reckoning compensation of railroad employees

operating trains in interstate commerce after January J, 1917; and That a commission of three, appointed by President Wilson, shall investigate the effects of the eight-hour standard from six to nine months and then report to Congress, present wages not to be re-duced during the investigation or for 30 days thereafter, and overtime to be paid at a pro rata rate." The Senate first voted down amend-

ments giving Congress power to fix length of days and wages, and making it a mis-demeanor to interfere with the running of trains. The vote in the Senate was 43 to 28, and was a strict party vote, except that two Democrats, Hardwick and Clark, voted against, and one Republican LaFollette, voted for the bill. The President signed the bill, on Snn-

day, using four pens, which he presented to the leaders of the labor unions as trophies of their victory. The strike order was officially rescinded a couple of hours after the bill passed. In the debate in the House and Senate on the bill it was fracuently stated that

on the bill, it was frequently stated that Cingress was surrendering to the railroad labor unions, and in doing so was storing up trouble for itself and the country. Senator Underwood (Dem.) admitted that he was supporting the measure against his will, but did so to prevent suffering to women and children and innocent persons. He expressed the opinion that the present measure was only a temporary make-shift, and that likely in a year or less, the whole question would

have to be fought over again. Senator Borah (Rep.) said: "If Con-gress cannot proceed to consider this de-liberately and with all the facts at hand, then it is truly yielding to dictation. If that is the situation, then Congress has reached the greatest crisis of its whole istory. If we are met with the demand that we cannot postpone action beyond tonight, then indeed the spirit of the fathers has departed and the halo that has hovered over this body for years will soon be dissolved.

soon be dissolved." In the House, Representative Gillett, of Massachusetts, expressed a wish of "Oh, for an hour of Grover Cleveland or Theo-dore Roosevelt," while Representative Bennett (Rep.) of New York—successor to Joseph A. Goulden—said: "I correct with Mr. Gompers in one

"I agree with Mr. Gompers in one statement that he made yesterday. He said there are some things worse than thing suspected of having a Teutonic flavor. Rev. Dr. L. B. Wolf, Secretary of the Board, said that two missionaries —both Americans—are being held up at Carlon because they cannot get into strikes. There are, and one of those things is the destruction of the American also Americans—are now in this country because the British Government will not when even the use of a brake stick was give them the necessary permission to go to their fields of religious work. prohibited by the railroad rules. I was put into public life by union labor men. o their fields of religious work. Those who cannot get the British per- I have not always agreed with laboring men, but I have never deceived them, and so they have been my loyal supporters. I shall not deceive them now for who have been able to go no farther | this proposed legislation is the worst blow than Ceylon, although they started out from here with what was regarded as labor. I for one do not propose now or complete credentials, passports and other at any time to cast my vote with a pistol documents, are Rev. J. P. Pfleuger and against my head. This bill is revolution-Today you are trying to fix the pay arv. of 400,000 men employed in one industry to give them an increase of 20 per cent. If you want to fix their pay today you nust fix the pay tomorrow of 2,000,000 men in that industry, and within a short time you will come to a situation where you must fix the pay of every employe in factories making goods for interstate commerce.

Hearing on Reassessment.

At Annapolis on Thursday, the Court of Appeals heard arguments on the ap-peal from the Circuit Court for Frederick County, by whose decision the county commissioners were restrained from pro-ceeding with a re-assessment of real es-tate as instructed by the State Tax Com-mission, which claims to be acting under authority of acts of the legislature in 1914 and 1916. Attorney General Albert C. Ritchie appeared with Edward M. Hammond, counsel for the Tax Commis-sion, and D. Princeton Buckey, counsel for the Frederick County Commissioners, in agent the legisl rights of the in arguing for the legal rights of the commission to proceed with the revaluation. Leo Weinberg, of Frederick, ap-peared for the complainants, David Low-enstein and Charles Wertheimer, both of Frederick county.

The higher court will hold an extra session in order to hear arguments. A proforma decision is expected, possibly this week. The decision is desired by the Tax Commissiun at as early date as pos-sible in order that it may proceed, if the decision is favorable to its stand with the reassessment of real estate in all the counties for which plans have already been completed. If the commission is been completed. If the commission is sustained the assessment will be com-pleted in time for the new levy next year. If the court's opinion is adverse to the commission an extra session of the legis-lature may be necessary at once in order to supply deficiencies in legislation by which there can be a reassessment. The question has been raised whether there can be a levy in the counties in 1917 can be a levy in the counties in 1917 without remedial legislation. All the counties are holding back reassessment until the Court of Appeals shall hand down its decision.

A Movement Toward Peace.

Attached to the appropriation bill, which calls for the Construction of a navy by the United States to be the sec-ond largest in the world, is a provision which gives the President the power to suspend building of warships if the na-tions want peace. This moye is a long step toward world peace, and is in fact a triumph for peace. It is the outgrowth of the efforts of the National League to Enforce Peace to whose platform Presi-dent Wilson committed himself last dent Wilson committed himself last Spring. The Republican National plat-form also endorsed it. Former President form also endorsed it. Former President William H. Taft is President of the League. Former Governor Warfield is President of the Maryland branch of the League. By Executive and Con-gressional action the United States would be willing to put its bulk of force in the arch that would support the peace of the world world.

Such an arrangement, however, must take into consideration the limitation im-mediately of naval armaments since this is the most costly item of all. The Wash-ington Government is preparing to move decisively toward this end as soon as the European war is over. Hence the bill for national preparedness carries with it a move for peace. It carries a specific provision for the peace of the world. The bill says:

"Upon the conclusion of the war in Europe, or as soon as it may be done, the President of the United States is authorized to invite all the great govern-ments of the world to send representatives to a conference which shall be charged with the duty of suggesting an organiza-tion, a court of arbitration or other body, to which disputed questions between na tions shall be referred for adjudication and peaceful settlement and to consider the question of disarmament and submit their recommendations to their respective governments for approval. The bill further provides that if this effective tribunal shall have been established prior to award of contracts for warships, thus rendering unnecessary maintainance of competitive armaments, the construct tion of the new navy may be suspended, -Md. League to Enforce Peace.

rank Scott and his wife, of Kensett, Arkansas. have been married ten years. Nineteen boys have been born to them. Six died at birth. Of the thirteen living there are three sets of triplets and two sets of twins. The parents have been partial to the letter "A" in naming them. Ashbell, Archer and Austin are 4[±]/₂ years old, Arthur and Arnold, 3[±]/₂; Alfred, Albion and Adolph, 18 months, and Abel and Abner, 6 months.

All of the station agents and foremen of section gangs on the W. M. Railroad have been supplied with emergency, or first aid kits, with instructions how to use the contents in the case of accident happening to any employe within their reach. The cases contain bandages, absorbent cotton and other necessaries for instant use. The section foremen are required to carry their cases with them whenever they go out with their men and the agents keep their cases convenient in the stations. -0.53-0-

Officials of the Tressler Orphans' Home, Loysville, Pa., are making every effort to keep infantile paralysis away from the institution. Special efforts are in order for the keeping of the home and the surroundings in such a high state of sanitation that it will be almost impossible for the disease to start from within the school. At the same time discouragement is being made to visitors. so that the plague cannot come into the home from outside sources. In speaking of the con-ditions at the school, Charles A. Widle, the superintendent, stated that the 250 children in the home are all well, and that he will do his utmost to keep them

mission to go back to India are George H. Trundle, of Frederick, and Rev. S. C. Burger, of Quincy, Pa. The two mission-Rev. John Schmidt of the Ohio Synod. The board some months ago raised \$10,000 for supporting the German mis-sions in India, which were cut off from support by the conditions in Germany. All the native German missionaries over 45 years old were sent back to Germany and all under 45 were interned as prison ers of war. The American Lutherans at once set about raising funds for the support of these missions and enlisting men and women of unquestioned American status to serve in them.

> WHY NOT?

A subscriber dropped in the other day with a new subscription, saying he se-cured it from a man who borrowed his RECORD, by simply asking "Why don't you take it yourself?" Sure enough. Why should there be so many borrowers? and why should not

more of our friends put the same question

The average country weekly is having "hard times" these days and needs every-body's help, and more dollars. By doing this sort of missionary work, a raise in the cost of our regular subscribers' own papers may be prevented.

Another man came in, who had been on our free list, and paid his dollar, saying, "I don't blame you a bit, I want the RECORD anyway." Now let a lot more come to such con-

The Santa Fe Railroad system has declared formally that it will not comply with the Adamson eight-hour law until ordered to do so by the U. S. Supreme Court. The President of the Company says the law is nothing more than an advance of 20 to 25 per-cent in wages to men who now receive the most money in the railroad service. He has made this statement to the public. Other roads may

Schools to Open Sept. 25.

By order of the State Board of Health, the public schools of Carroll County will not open until Monday, September 25th. The order is no doubt partly due to the fact that there are two cases of infantile paralysis, at present, in Westminster.

The whole matter, and its temporary settlement, is almost generally regarded as being only the opening chapter of a great fight, and great question, that has been precipitated and must be settled. It may mean, eventually, government ownership of railroads, unless there can be sufficient strength mustered in Congress to fix a minimum wage scale, covering railroads and industrial pursuits generally

Mr. Hughes, in a speech at Nashville, Tenn., made a bitter attack on the administration for surrendering to the demands for an eight hour day, without arbitration and a full investigation of facts. He said in part:

"Now, then, I stand for two things-first, for the principle of fair, impartial, thorough, candid arbitration, and second, for legislation on facts according to the necessities of the case, and I am opposed to being dictated to either in the executive department or in Congress by any power on earth before the facts are known and in the absence of the facts. We have

a great country and a great future, but it can only be preserved in one way. That way is the way of all honest, fair investigation and candid treatment. Show me the way that is right and I will take it; but I won't take any way that I do not know anything about."

The "Wets" Petition Filed.

Petitions containing 2657 names were filed on Tuesday, in Westminster, asking for a vote as to whether "this county shall continue to be anti-saloon territory." There are about 8200 voters in the county,

sent 25 per cent of the voters. It is claimed by the "dry" leaders that many of these names do not represent qualified voters, and that even qualified voters have not singed their names as they appear on the registration books. The lists wifl he investigated closely, and it is likely that the Court will be asked to restrain the supervisors of election from placing the referendum on the ballot, if

Substitutes For Leather.

Shoe manufacturers are in search of a successful substitute for leather, which is becoming more scarce and higher in price with each season. And on top of the shortage of hides the height of the boot tops of women's shoes have climbed faster than the price in a vain effort to keep shortening skirts to shoe-top length, says the Christian Herald. Every day is said to bring nearer the higher-priced shoe, and nearly every day sees a new substitute for leather.

Rubber has been accepted as a substitute, and one tire manufacturer is even now advertising widely a special brand of rubber soles for shoes. Imitation leather, such as has been used for upholstery for a number of years, is now being used in shoes, and has endured severe tests. A composition material is being used for shoe soles which is declared to wear better than leather and to cost less, to be more flexible than leather and, in addition, to be waterproof and noiseless. The heels of women's shoes in recent seasons have required considerable leather. A substitute for real leather has been offered in fiber board, which can be shaved and burnished and is waterproof. With all these substitutes the manufacturers have been experimenting.

DEMOCRAT DAVID J. LEWIS For House of Rep's.

WILLIAM H. LAWRENCE REPUBLICAN DEMOCRAT JOSHUA F. C. TALBOTT -0-5.70.

AN ITEM OF NEWS not generally known, is, that this country has already appropriated \$125,000,000 on account of our little administrational mix-up with Mexico. The kind of peace policy we employ seems extraordinarily expensive, for so small an enemy

WAS THE SURRENDER of Congress to the trainmen a case of "too proud to fight ?" Was it merely one of putting off the affair until after the election ?" or was it another exhibition of the "big stick," opposition to which represented disloyalty to the administration at a time when disloyalty would be fatal to success in November ?

-....

FOR THE MAJORITY of people, higher prices do not actually mean more prosperity, but only larger sums of money to handle; and when conditions are adjusted properly, this is about the right situation-the trouble is to get the "proper adjustment." The human race is in a continuous fight, in some way or other, over prices, trying to get the better of each other-trying to get their own, and then some.

There is so much work to be done, and

ing how it could have been improved; and that in general he advances nothing new, has been a failure as an interest awakener and as a leader of the shouting element, and that all of his speeches have been destructive rather than constructive. Generally speaking, the Republicans of

the country feel quite satisfied with him. The business interests, especially, are satisfied that his Americanism and his announced policies generally, are safe, and that his judicial cast of mind can be depended on to stand for an even and dignified consideration of the multiplicity of questions that come before the chief executive of the Nation.

That he has not taken the place of highest favor with the shouting element of the country is equally true. He is not a Roosevelt; not inventing hair-raising sentences in every speech, nor entertaining his audiences with spectacular stunts. By comparison with a standard of this kind, he has not been wildly cheered, nor repeated for his extravagances. There is, in fact, a tendency on the part of former 'Bull-Moosers'' to draw uncomplimentary comparisons, likely as a lingering farewell tribute to their old idol, but hardly explainable in definite terms.

Mr. Hughes, however, has not yet met the severest test, which will come in the campaign in the East, and in the great Middle West; as yet, he has been doing little more than getting acclimated, as it were, and it is rather too early to take his exact measure as a great campaigner. and his calibre for discussing the great questions before this country,

Appendicitis.

The layman is not in a position to speak advisedly on the subject of appendicitis, as he is not acquainted with the liar sanctity of economic logic or appeal extent of the investigation that is being to the law of supply and demand as made by the medical fraternity, as to the cause of the disease, but certainly he is is not a machine, and he cannot be in position to state that no advice has been given publicity as to measures that should be taken for its prevention, and ing up. that State Boards of Health are apparently ignoring it, although it appears almost less than an increase in the rate of pay, to be epidemic throughout the country. inevitably adds to the cost of living

We are of the opinion that it any disease would attack cattle, to the extent that appendicitis is attacking the human family, there would be all sorts of experiments and investigations, and preventive measures recommended. About the only explanation of the disease that we hear, is, that in former times it was diagnosed as "cramp colic," and that there were frequent deaths, whereas, now the rule is for recovery to take place after an operation

This is hardly a satisfactory point at which to stop, even if it be a good thing for the surgeons and hospitals, both very | ideal. If you eat your pudding you will necessary modern improvements, so far as life-saving is concerned. Within Carroll county, in the last ten years, there were hundreds of cases of the disease, which cost many thousands of dollars for treatment, as well as a percentage of than the time necessary for performing it, deaths, and this, we presume, has been which counts most. No man ever accomthe history of other counties and other plished much in the world by figuring out

before the public, three months. He has appendix chopped out; but, what is take to the public forum, even for the out? office of President.

He is placed, also, in the position of being the man preferred by his party to Col. Roosevelt, which naturally causes the country to look to what he now says with a peculiarly critical eye. He is also the result of anxious conferences and the most careful sifting, as being the one man over all others who could harmonize party factions and who could be depended on to give the country a safe administration in these unusually strenuous times.

What, then, is the popular verdict at this time, as to his having filled public expectations? His first message to the public at once relieved everybody's mind of any disinterest, or half heartedness, he might have as a candidate. It was a message that might have originated from Roosevelt himself, so far as its blunt statement of personal policy was concerned; and following it was a period of silence that now seems to have been broken for as long as the campaign lasts.

Naturally, the Democratic leaders are not sounding his praises. They say he has only one issue-condemnation of the | majority.

POULTRY

HENS IN THE WHEAT FIELD.

was \$66.27. The flock numbered fifty to sixty. The eggs sold for \$157.17, giving a total profit of \$90.90. At an average price of 23.4 cents a dozen, the hens returned a profit of \$1.50 each above the cost of feed.

They were fed as a scratch food a mixture of two parts cracked corn and one part wheat. The mash consisted of equal parts of bran, shorts, cornmeal and beef scraps. Grit, oyster shells and water were kept before the birds all the time.

These conditions were about what the ordinary conditions are when raising a small flock of fowls, and can be duplicated by most persons. A \$1.50 profit on each hen per year is quite a fair remuneration when everything in the way of feed is bought. Where there are table scraps and other waste material to feed to the hens the profits are, of course, larger.

SHIPPING POULTRY.

Advice to Poultrymen Desiring to Build Up a Parcel Post Trade.

[Prepared by United States department of agriculture.]

All poultry should be carefully picked to avoid torn flesh and all pinfeathers removed. Dry picked poultry usually presents a much better appearance than that which is scalded. It is very important that poultry be thoroughly cooled before shipping. If desired the head and feet may be left on, but in parcel post marketing it is more economical to ship with heads and feet off. If heads are left on they should be neatly wrapped in parchment paper. If removed the skin of the neck should be first drawn back so that after the head is taken off the neck skin will completely cover the neck. This should then be tied and wrapped in parchment paper. Poultry ships and keeps much better if undrawn. It should not be drawn unless the customer insists on having it that way or unless state or local law requires it. No diseased poultry should be offered for sale. It is desirable to offer only plump, well fattened birds. Old stock of doubtful eating quality should be disposed of in some other manner. Dressed poultry may be roughly divided as follows: Chickens, hens, ducks, geese and turkeys. The term "chickens" includes broilers, fryers and roast-

W.

POULTRY NOTES For freshening up the premises, as well as guarding against

the red mite, lice and other vermin, nothing is so good as whitewashing. Body lice on fowls are reached with lice or insect powders, and

the fowls must be dusted often to keep them free from vermin. There is no good reason for

doping a healthy flock with medicines

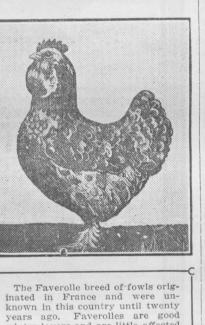

Lard, sulphur and a little coal oil mixed are recommended as an effective cure for scabby legs.

Bowel trouble thrives among * broods of chicks that get sloppy mashes, especially when some of & it is left from one feeding to another.

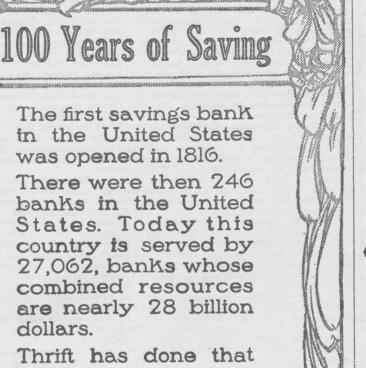

FATTENING ROOSTERS The "old rooster" is the poorest of all table poultry, so poor that when crated and shipped separately to market the returns received are almost

nothing. If mixed with other poultry a few pounds of old rooster may so cut down the price that the rooster is a dead loss. For home consumption the old roost.

er may be made over into almost a new chicken by caponizing. This method, however, is slow if sure. A shorter cut recommended by W. Theo. Wittman, poultry expert of the Pennsylvania department of agriculture, and one bringing a great improvement is to coop him in a darkened, cool quiet place (a coop with a slatted bottom and a barn basement are good) and feed him regularly three times a day on soft or wet mash for a period of ten to twenty days. This wet mash

winter layers and are little affected by climatic conditions. The chicks are rapid growers and hardy, weigh-

much in one century but there is much greater work for thrift to do.

VALUE OF VEGETABLES IN THE DIET

Suggestions For The Use And Prepara tion Of Vegetables For The Table.

KATHLEEN C. CALKINS Maryland Agricultural Extension Service.

Vegetables are valuable sources of heat and energy, protein and mineral matter. By careful choice of vegetables a person may eliminate meat from his diet entirely. People who suffer from auto-intoxication are advised to reduce the meat in the diet and substitute vegetable protein. The vegetables, rich in protein, may be cooked in many appetizing ways to give variety to the diet. Vegetables and fruits as well, are especially adapted for stimulating the activity of the intestines and by increased bulk of the food mass help the eliminative processes.

Vegetables with large quantities of raw starch should not be given to children. Indeed, it is difficult for most grown people to digest raw starch.

The source of vegetables which are to be eaten raw should be examined carefully, for vegetables which are grown on sewage-sick soil cause disease. Sewage-sick soil may be brought about from septic tanks or outside closet drainage into the garden.

Principles Of Cookery.

The most important principle of vegetable cookery is softening the vegetable fiber without destroying the flavor or dissolving away the ash constituents of the vegetable. The walls of the individual starch cells when in contact with moist heat; i. e., boiling or stewing, expand and break so that the saliva and other digestive juices attack the starch more readily.

The starch should be thoroughly cooked, because cooking not only makes the food more easily digestible, but also makes it more palatable.

Food is cooked to develop the flavors. Any method whereby flavor is lost is not satisfactory. Both flavor and mineral matter are lost by boiling vegetables. The only way to retain this valuable material is to use the water in which they are boiled for soups and sauces

Cooking Vegetables.

Baking and steaming are both very good methods of cooking vegetables, for no nutritive value is lost.

In cooking vegetables in a large amount of water and then draining the water off, the mineral matter and flavors are lost because they are dissolved in the water. For an economical dietary this method should not be followed because it is wasteful. In cases where the housewife can afford to get the necessary mineral matter from meats or other sources, it may be allowable. This method may also be used for old potatoes, beets of rank flavor and strong onions.

A better method for fresh vegetables is stewing or cooking in a small

Broilers usually weigh from one to two and one-half pounds, fryers from two to three and one-half pounds and roasters from three and one-half pounds

Hens for roasting must be in desirable condition and not so old that the flesh is not tender. Hens for stewing may include the older fowls.

Old roosters, unless specially ordered, should not be marketed by parcel post, as they are not of a satisfactory quality.

Turkeys may be classed as young hens or toms and old hens or toms. Ducks and geese should be sold at such an age and in such condition as required by the customer.

Farmers' bulletin No. 703, "Suggestions For Parcel Post Marketing," can be secured from the division of publications, United States department of agriculture.

Sulphur For Gapes.

A woman writing in Farm and Fireside about gaping chicks says: Here is my simple remedy for gapes, which is a relief to both chickens and the poultrywoman in charge. I use a large teaspoonful of flowers of sulphur mixed with about a pint of cornmeal or any mash food. This quantity is sufficient for twelve chicks, to be fed three mornings in succession, then omit three days. Continue the treatment until you see good results.

Feed Chicks Liberally.

A growing chick will not thrive on whort rations. It must be fed liberally and that several times a day. If the right kind of food is fed there is little danger of overfeeding, especially if they have plenty of range. But care should be taken that they have no musty, moldy, sour or decayed food. for such is bound to cause trouble.

g up to two pounds at two Faverolles are bred in several colors, the hen here shown being of the salmon variety.

should be either finely ground oats and red middlings, half and half, wet down with either sweet or sour milk. or buckwheat middlings and ground oats.

If a rich, oily table bird is wished cornmeal and middlings should be fed, and not only so much as will be eaten up clean each meal, but such only as, the weather being warm, has been fresh mixed. It is also important that the birds be freed of lice by dusting with insect powder, that the start on heavy mash feeding be done slowly and that one sort of milk be used, not sour one day and sweet the next. The bird or birds must be where they are quiet and out of sight and sound of

other poultry. A little fresh water, green stuff, charcoal and a very little tallow or suct daily are desirable. The coop should be small, and if in a semidark place, as it should be, three or four birds can usually be handled successfully in each coop.

If properly handled according to above instructions your tough old rooster will be a fat, tender and juicy table bird at the end of two or three weeks.

Bran a Good Poultry Feed.

Bran is one of the very best foods that can be given to chickens, and especially is it good in the summer time, for it is not so heat producing as grain. Bran can be placed before the fowls all the time and they will not eat too much of it. One of the main advantages of feeding bran is that it contains more mineral matter than ordinary ground grain and supplies that which may not be abundant in the ration. It is customary to add one pint of linseed meal to two quarts of bran, mixing this with four quarts of ground grain. When made into a mash bran need not be fed over once a day, and it is excellent when given with clover hay or alfalfa leaves or cooked potatoes.

When Hens Lay Best.

Twice as many eggs are laid in the first six months of the year as are laid in the last six months. The first six months give us part of winter, all of spring and part of summer. This is the time when laying is most prolific and when the most profit is made. The last six months include the time of molting and the maturing of the pullets to lay fug age and is consequently the least profitable part of the poultryman's year.-Kansas Farmer.

CARROLL RECORD.

Shaving on One Side.

The shaving on one side only of the heads and beards of prisoners of war 5-1-10 was obviously done to prevent any at tempt at escape. But there have been other motives for such half shaving, which occurs at all sorts of points in history. Sometimes the act has been pure insult, as when Hanun, king of the children of Ammon, shaved off half of the beards of David's servants. In these days the victims would have mended matters by shaving the other half. But Jewish reverence for the beard forbade that, and David told the men to "tarry at Jericho until your beards be grown." Demosthenes, when he shut himself up for months in a subterranean chamber to practice oratory, shaved half of his head to cut off all temptation to go abroad .-- London Chronicle.

a small, high-perched crown on a childish head. The smaller the hat itself the lower it must descend to be smart. Very soft Milans are worn by children who can afford the best in millinery and there are new plaid Milans, made of strands of colored straw, that are very distinctive. Some of these are in the Glengarry or Scotch shape. A red and white plaid Glengarry is trimmed with a band and streamers of red velvet ribbon and a cluster of bright red cherries near the front. Sailor hats of colored Milan with crown top and trimmed band of colored glazed kid are also very smart. Children's sailor hats this year are saucy and dashing in shape, especially those of the jack tar or coast guard type. Picture hats for special wear are of Leghorn, or very fine white Milan hemp, with wide, supple brims and rather low crowns. A band of black velvet ribbon tied in a small

Ornaments of a Distinctive Sort Are Being Made to Go With the Costume.

For a long time there has been much talk anent the fact that jewelry, to be most effective, should be chosen with especial reference to the frock with which it is to be worn. The intrinsic value of jewels means less and less, and their decorative value means more.

At least the jewelry makers have realized the trend of popular opinion-and the result is jewelry of distinctive sort, made especially to bring out the best points of summer frocks. This new jewelry is not expensive; the whole object of its being is to have it inexpensive enough so that different pieces may be worn with different frocks. But it is very pretty and very effective.

There are rings, there are pins, there are bracelets and pendants and chains. And they are all made to emphasize different color schemes. Many of the pendants are elaborately set, little round or oval pieces being set on criss-cross backgrounds of silver or black enamel. They hang from silver or black chains in most effective fashion. Enamel and the cheaper stones are largely used for this new jewelry, which deserves attention from every woman who likes the details of her costume to be just right.

amount of water so that it is almost boiled away by the time the vegetables are cooked.

Points To Remember.

1. The general rule is to allow one teaspoon of salt to each quart of water.

2. Violent boiling water is no hotter than boiling water, and violent boiling mashes and breaks the vegetables.

3. With some vegetables like corn. it is more satisfactory to add the salt toward the end of the process, otherwise it hardens the fiber.

4. Drain the vegetables as soon as tender.

5. Cook strongly flavored vegetables; i. e., onions and cabbage, in an uncovered dish.

6. Vegetables that should be cooked with a small amount of water are greens, tomatoes, and tender young peas.

7. The less tender vegetables, such as the peas, carrots and the outer pieces of celery and celery tips may be cooked and put through a sieve for soups. Left-over vegetables may be used for soups.

WHEN AND HOW TO SOW ALFALFA.

The best time for seeding alfalfa in all of Maryland, excepting the mountain section, is between August 1st and September 1st; preferably between the middle and last of August. In the mountain section seeding may commence after June 15th, but usually it is better to wait until about the middle of July. Nothing is gained by spring seeding, for little or no hay is obtained that season, because weeds usually crowd out the young alfalfa plants during the hot summer. On the other hand, fall seeding will yield full crops the following spring and is seldom subject to serious injury by weeds the first year.

The rate of seeding should be 25 pounds per acre. The seed should be sown by itself; never with a nurse crop. The method of seeding may be broadcasting by hand or with one of the various makes of machines on the market for that purpose. Among these the Wheel-barrow seeder gives good satisfaction. The seed should be covered to a depth of about 1/2-inch. and for doing this no implement is better suited than spike tooth harrow with the teeth slanting back, or a weeder.

THE CARROLL RECORD

FRIDAY, SEPTEMBER 8th., 1916.

SPECIAL CORRESPONDENCE.

Latest Items of Local News Furnished by Our Regular Staff of Writers.

All communications for this department must be signed by the author; not for publi-cation, but as an evidence that the items con-tributed are legitimate and correct. Items based on mere rumor, or such as are likely to give offense, are not wanted. The Record office is connected with the C. & P. Telephone from 7 a, m. to 5 p. m. Use telephone at our expense, for important items on Friday morning. We prefer regular let-ters to be mailed on Wednesday evening, but in no case later than Thursday evening

UNION BRIDGE.

Luther Beck, of Columbus, Ohio, was in town Tuesday morning. He is visit-ing at Woodsboro, Md., where he was born. At the time of the Civil War he enlisted in the 6th Md. Regiment and participated in the battle of Gettysburg. hortly after the close of the war he went to Columbus and opened a carriage factory, which he recently sold, and is now visiting the scenes of his youth in and

around Woodsboro. Mrs. Mollie Birely, of Ladiesburg, with her son-in-law and daughter, Calyin and Agnes Binkley, and grand-daughter, Lola Madaline Binkley, of Funkstown, visited at the homes of her aunts, Mrs. O'Connor

and Mrs. Sinnott, Saturday afternoon. Mrs. Clytie Etzler accompanied by her friend, Mrs. Kaufman, daughter, Audrey, and son, Gilbert Kaufman, of Baltimore, were very acceptable visitors at the homes of Mrs. Kate O'Connor and Mrs. Addie Sinnott, Tuesday.

Walter Strasburg made the trip on a watter Strasburg made the trip on a motorcycle from his home in Springfield, Ohio, to Johnsville, Md., arriving at the latter place, Friday. On Wednesday, he visited his mother, Mrs. Jos. Delphy, and his sister, Mrs. Sally Pittinger, in town. Miss Elsie Kelly is visiting Pearl John-on and rife at their homeone Only

sister, Mrs. Patterson, of Washington. D. C. Rev. Earle Riddle and bride, expect to

return from Indiana, Saturday, and will be located at the hospitable home of Mrs.

Rubber, Felt, Paper and Composition roofs do "dry out"-

There is no doubt about it. Every reputable manufacturer of roofing readily confesses it.

Some few do advertise their particular roofing "never needs paint," but it requires only brief thought to realize the folly of supposing that any roof will last indefinitely without attention.

How long has that roof of yours been in service? Do you think it is as strong today as it was a year ago? Why not take a few minutes right now and look it over Remove a little piece from the edge on the sunny side of the building and examine it carefully. See how the coating is worn away. Tear it and see how brittle, or dried out it is. You will be surprised. It will pay you to give it a coat. now, of

Valdura Asphalt Paint 99.5 Per-cent Pure

This will give you a practically new roof, which will last longer than many offered for sale at the present time. You see, it builds it up with the very material a good roof should be made of. VALDURA contains no coal tar, benzine, gasoline, rosin, or other short-lived materials. It is made of Gilsonite Asphalt and Linseed Oil.

IT COVERS MORE SURFACE

than other roof paints and works well under the brush even in cold weather. It is sold with a guarantee and will prove a good investment. Ask for a sample. Prices \$1.25 a gallon, in small packages, and less in larger ones.

intimately connected with the doings along the Weldon Railroad, in the Wil-derness, on the road to Richmond and the work which eventually led to the apple tree at Appomattox Court House and Peace. Through all this he escaped unharmed and at 84 hale and hearty was able to appear for a photograph with four generations of his descendauts.

> ------SILVER RUN.

Fire destroyed the barn on the farm of Samuel Cratin, at noon on Tuesday, Sept. Mr. Cratin had been away from home and returned home and put his mules in the stable and had just returned to the house when he saw smoke coming from one corner of the barn. He quickly returned to the barn and released the horses and cattle just as the fire was fall-ing through the floor. Nearly all the machinery, together with a surrey, buggy, wagon, spring wagon, several piles of lumber and 70 bushels of wheat, were consumed. The other buildings were saved through the help of neighbors. The origin of the fire is unknown. The loss is

partially covered by insurance. The remains of Charles Mackey, who died suddenly in Baltimore, were brought here and interred beside his wife, who died several years ago. Mrs. Milton Morelock accidently fell,

last week, and sprained her ankle. Miss Edith Kimmelshue, of Ill., is spending some time with Edw. Flickinger and wife

Miss Gertrude Jacoby, of Allentown, Pa., returned home after spending some

time with Mrs. Amelia Bowersox. Millard Basehoar, wife and children, Grace and Leroy, of Sell's Station, visited Irving Kroh and family. Mrs. Gertrude Englar, of Washington, D. C., visited Wm. J. Zacharias and

wife.

Rev. and Mrs. J. L. Hoffman and family, returned on Friday from their vacation.

Last Sunday Mr. and Mrs. Irving Kroh and children, Kermett, Catharine and Helen, and Jerome Koontz and wife, motored to Harrisburg, Pa.

Thorough academic course preparing for entrance to any college. Strong courses in Expression, Agriculture, Manual Training, and Bible. Campus and general location unsurpassed in beauty; modern buildings; strong faculty; fine student body; home-like atmosphere; excellent religious influence. Terms extremely moderate. Next session opens September 12.

WRITE FOR CATALOG. 7-28.tf Rumania as a War Factor.

R. L. McCallum, a representative of a large oil company in Rumania, who is now in New York, in speaking of the entry of that country into the European

war, says: "I was in Rumania when the present European war broke out, and I know that at that time Rumania would not have flasted much more than four weeks had she gone into the conflict. She was short of equipment, and also of ammunition, and the Central Powers would have made quick work of any resistance she might have put up. But today it is all different. For more than a year and a half every factory, every mill, every plant that could be used in the turning out of munitions has been working day and night, and the result is that Rumania is

ready. "All of these plants and factories were commandeered by the Government, and the one object in view has been to create a reserve of supplies that would stand any test to which Rumania might be put. In addition, Rumania has also been getting large consignments of supplies from England, France, the United States, and other countries, most of it via the trans-Siberian route. Before Bulgaria declared war on Serbia the Rumanians were able to lay in other large stores via the Salonica route.

00000000000

"The Rumanian army is one of the best officered armies in the world. I say this without qualification. As regards the soldiers I know of none, except perhaps those of Japan, who are so hardy and healthy. In the oil fields we employ thousands of these big peasants, and it is a common thing for a workman to walk 12 miles through the snow to his work, work 11 hours, and then walk back home work 11 nours, and then walk back home at night. The principal food of the Rumanian army is a dish they call 'marmeliga,' which is nothing but boiled corn meal. With this they have dried meats, cascaral, which is cheese made rom goat's milk, and dried fish, with a little tea or coffee on the side. These things are plentiful in Rumania, and the menu' is itself the best proof of the simple problem that confronts Rumania when it comes to the subsistence of her fighting men.

"The equipment of the army is up to date in every particular. They received, just before the war broke out, 350,000 modern German rifles, and to show how tricky the Germans are when it comes to arming the other fellow, I need only mention that the extractors used to with-draw the shells were missing in every gun. But the Rumanians got busy and months ago had remedied the deficiency. I might mention that without the extracting mechanism the rifles were entirely useless. The artillery equipment is good, and the Rumanians have some fine field pieces of the larger calibers. Their mountain artillery is particularly efficient and well equipped."

PUBLIC SALE REAL AND PERSONAL PROPERTY in Taneytown. The undersigned intending to move from town, will sell at public sale on

THURSDAY, SEPT. 21st., 1916, at 3 o'clock, a fine home, situated on

George street, Taneytown, consisting of an 8-ROOM BRICK HOUSE, newly roofed with slate, 2 pantrys, clothes room, good wash house, snoke house, stable with buggy shed, chicken house, hog pen, good well of water and cistern, fruits of all kind. Also at the same place, at 1 o'clock, will sell the following personal property, consisting of

2 BED-ROOM SUITES, single bed, bed and spring, cradle, crib,

Cooperative Dairying.

There are so many leaks in the dairy business that only by the use of the best business principles can it be made perma-nently profitable. Individual cows must each make a profit over the cost of feed; this can be determined only by weighing each cow's milk and the feed that she consumes. The old argument that the best cows are known may have some best cows are known may have some foundation, but few men know the poor-est cows, and the latter go to make up the average as well as the good cows. No dairy is better than its average pro-duction. If this is too low, the herd is not paying a profit. Business principles must therefore be applied to lowering the cost of milk production. Efficiency is as much a necessity on the

farm as in the factory. Few men feed their cows in proportion to the quantity of milk produced, yet what could be more simple and more nearly right? With little regard for her needs, feed is put before the cow in plenty if it is cheap and in less quantity if the price is high. Cows use about 60 per cent of their feed merely to keep their bodies working, and it is the quantity that is fed above this fixed necessity that furnishes the material for the mill. the milk. Too often the dairyman says "I would do all the up-to-date things if I had the time." Can the storekeeper af-ford to run his business without keeping books? Yet that is what the farmer is

doing.

Working in cooperation, dairymen can obtain the benefits of business methods at a very small cost through the organization of a cow-testing association. An organization of this kind that hires an expert to determine the feed cost of milk or fat production for each cow in the herds of the members is easily possible. Such an expert travels from farm to farm, spending usually one day at a place. Each cow's milk is weighed and tested, as is her feed. An account is opened in the ledger for each animal and at the end of the year the profit or loss of each one can be ascertained. The heifers of good cows should be selected and the poor cows should go to the slaughterhouse, other wise they may be the means of ruining the owner's business. A cow-testing asso-ciation is a cooperative organization with ocal officers, and one that can be of use also for advertising the sale of cattle. The results obtained with such advertising have often been remarkable. Dairy-

men and breeders are certain to be interested in such a movement for the bettering of the business. The dairy business is well adapted for

cooperative organization, and concerted effort by dairymen usually means much greater profits on milk and cream through the elimination of waste, the application of more economical methods of production and manufacture, and the development of more productive cows. -U.S.ment of more p. Dept. Agriculture.

Don't Neglect Your Cold

Neglected colds get worse, instead of better. A stuffed head, a tight chest must be relived at once. Dr. Bell's Pine-Tar-Honey is Nature's remedy. Honey and glycerine heal the irritated membrane, antiseptic tar loosens the phlegm, you breathe easier and your cold is broken up. Pleasant to take, Dr. Bell's Pine-Tar-Honey is an ideal remedy for chil-dren as well as grown-ups. At your Druggist, 25c. Advertisement.

A Surprise Party.

.....

For the RECORD. A surprise party was given on Friday evening, at the home of E. G. Sterner and wife, in honor of their daughter, Douglas. The evening was spent in playing games. Those present were, E. G. Sterner and wife, Walter Snyder and wife, George Wagner and wife, Edward Staley and wife, Walter Fowble and wife, Roy Dou-can and wife, Milton Lady and wife,

TO AVOID A DULL LIFE

Commit Murder for Excitement.

I used to think when I was a boy that we all had been born at about the least interesting period in the annals of man. Clarence Day, Jr., writes in Metropolitan. If I had foreseen the war I might have felt less depressed, I suppose; but so far as I could then see, things were going to be dull all our lives. According to the history books this earth had been a good fierce exciting place to live in the past. But it was my luck to land here, I thought, in its stupidest epoch. If there were headlines in the papers, it was only about the tariff, or some old excursion steamer sinking, or a shake-up in the police.

It was the same way in our household. Things were dull to a degree. We boys had good times on our games -but nothing ever happened. There wasn't even a burglar or a shooting affray in the parlor, or a private detective across the street, watching our door. I used to think that if one of the family would only die that would be something.

I had an uncle, a stout, kindly man, who used to have me sit on his knee, and give me a nickel, and ask me what books I was reading. He and I liked each other. And I would stare earnestly at him, feeling glad of the nickel, and thinking it would be nice if I might find him foully murdered, on a Saturday, say. There was no school on Saturday, so I could have the whole day to ferret out the assassin in. And we'd have had some excitement.

HOW GAS JET ORIGINATED

Emergency Use of Woman's Thimble Gives an Inventor the Idea.

A woman's thimble is said to have been the means of suggesting the first gas burner.

William Murdock, the inventor, first burned the gas simply as a flame from the end of a pipe. One day in an emergency he wished to stop the illumination. Hurriedly looking around for something, Murdock seized his wife's thimble and thrust it over the light, which was immediately extinguished.

There was a strong odor of gas, however, says the Popular Science Monthly, and the experimenter applied a light to the thimble, discovering that it was full of holes, through which tiny jets of flame appeared. The importance of the result was that the illumination from those two or three tiny jets was much brighter than had been given by the great flare from the end of the pipe. Acting on the principle which this chance discovery revealed, he constructed what was known as the Cockspur burner.

How Mines Are Laid and Fired.

On one deck of a vessel are several narrow tracks supporting the mines, each of which is mounted on wheels. tilting. One mine of this character is made up of three parts-a spherical floating chamber containing the explosives, etc.; an anchor chamber which is connected with the former by a cable and a weighted sounding line. The length of the latter is equal to the depth at which the mine is to float. When the end of the sounding line strikes bottom the lessening of its pull throws a pawl which prevents the drum in the anchor chamber from paying out more cable to the sphere. Consequently the latter is drawn under water to a depth equal to the length of the sounding line, as the anchor chamber settles to the bottom .- Popular Mechanics.

County Agents Demonstrate Value of Improved Varieties in Many Sections

Selected Seed Grown at State Experiment Station

Average Increase Of Five Bushels Per Acre Secured-Wheat Growers Should Get In Touch With Their County Agents.

College Park, Aug. 24 .- Farmers in many sections of Maryland have increased their wheat yield during the last year by the use of improved varieties. These varieties have been on test at the Maryland State Experiment Station for a number of years and during the last two seasons, have been grown extensively in most wheat sections of the State under the direction of the County Demonstration Agents.

In regard to selecting wheat of superior varieties. Prof. Nickolas Schmitz, of the Maryland State Experiment Station, says, "Of the many varieties originally under test, some have been found to be very inferior and in consequence, have been discarded. Others were found that yielded well in a favorable season, but did not stand up when conditions were at all unfavorable. Still other varieties produce well almost every year, regardless of conditions and even in a very unfavorable season maintain a much higher yield than the poor varieties. It is in these last varieties that we are the most interested, since the record of their yields has been uniformly high, and they have proven their yielding qualities, not only at the Experiment Station, but in many seotions of the State, where they have been grown on private farms side by side with the native varieties.

At a late hour all were invited to the dining room for refreshments, and all seemed to enjoy themselves. -----

To Wash White Gloves.

The following is an excellent method for cleaning washable white gloves, whether of doeskin, chamois or the newer kid. First put the gloves on the hands and wash, using any white soap that lathers freely. A soft-bristled brush may be used, especially on finger tips and wrists, but the nail brush type has altogether too stiff bristles. When perfectly clean this soapsuds may be rinsed off, but immediately rub on more soap until the gloves are covered with a thick lather like whipped cream. With a towel pat this into the glove and remember that the more of this the glove can be made to absorb the softer and more pliable it will be and the longer service it will give. Dry without rinsing.-Good Housekeeping.

The Antidote.

Hulda's mistress often boasts of her readiness of resource.

"She's the best nursemaid in the world," is the enthusiastic commendation from her employer. "One day I returned from a motor trip through the park to be met with the startling news that the baby had swallowed a

button. "'And what did you do, Hulda?' I asked, in some anxiety, although trusting that it had been the right thing.

"'Why,' sad Hulda, 'I made him swallow a buttonhole right away."

SIMPLE, HARMLESS. EFFECTIVE Pure Charcoal Tablets, for Dysp spsia, Acid Stomach, Heartburn and Constipa-Subscribe for the RECORD tion. 10c and 25c-at McKellip's.

Blissful Depravity.

In a border southern town lives an elderly negro carpenter, who is locally distinguished for two things-his use of large words and his abiding fear of his wife, who is big, impressive and of crops is very beneficial. On farms domineering. In this town a trio of young professional men keep bachelor quarters together.

"Boss," inquired the old man, in the midst of his work, "does you white gen'l'mens live heah in total depravity of de feminine sex?"

"We do," was the answer.

From the bottom of his henpecked soul the old darky fetched up a long, deep sincere sigh.

"Well, suh," he said, "ef I wuz ez you is, I should suttingly remain so."-Saturday Evening Post.

Dilemma.

"What's the trouble?" asked the friend. "You seem to have something on your mind."

'I have," replied the conscientious citizen. "I'm trying to figure out a proper course of action. If I neglect to apply for enlistment my wife will say I don't love my country. And if] display a willingness to leave home and march away to the wars, she'll say I don't love her.'

Incredulity.

"Don't you know it's wrong to believe in ghosts?" "I don't believe in 'em," replied Eras-

tus Pinkly. "Why, suh, I wouldn't trust a ghost as fur as I could see 'im."

Hot Menu.

"Is that Mexican general a fireeater?"

"Mighty close to it. I've seen him devour chile con carne with great relish."

Dates for Sowing Wheat

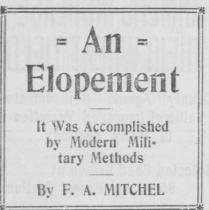

College Park, Md., Aug. 24 .- The Hessian Fly has caused more or less severe injury in all parts of the State the past season. In some cases, it has reduced the crop of wheat from 25 to 50 per cent. The general increase of the pest makes it necessary for farmers to exercise every care in preventing, as far as possible, severe injury another year.

In regard to the pest, Director T. B. Symons, of the Maryland Agricultural Extension Service, says, "The insect passes the summer in the wheat stub. No volunteer wheat should be allowed to grow during the summer. Rotation where the pest has been serious, a narrow plat of wheat should be sowed along one side of the field about September 1st to 10th, depending on locality, as baits for the Fly. Later, this can be plowed down.

"From observations and records, and considering the latitude and altitude at the various points, wheat should not be sowed in the surrounding country of the following cities and towns of the State before the dates given:

OaklandSept. 12th-19th HagerstownOct. 1st- 7th FrederickOct. 3rd-10th Westminster ... Sept. 26th to Oct. 5th RockvilleOct. 2nd-8th GermantownOct. 2nd-8th Ellicott CityOct. 2nd-9th La PlataOct. 9th-18th CockeysvilleOct. 3rd-10th Bel AirOct. 2nd-9th ElktonOct. 2nd- 9th ChestertownOct. 6th-16th EastonOct. 9th-16th SalisburyOct. 10th-17th "Dates of sowing for adjoining sections to the above can be figured by moving forward the date of sowing one day for each one-quarter degree latitude North, and one day for each 100 feet gain in altitude from a given point.

"A wet September may cause an early disappearance of the Fly, while a protracted fall drouth and warm weather may cause a later disappearance. The adoption of a uniform, safe period for sowing wheat in each locality by all the farmers is of the greaiest importance.

There are certain persons who have the power of attracting the opposite sex indiscriminately.

Sadie Ludlow at eighteen attracted men as a candle attracts moth millers. Some said (including herseld) that she dld nothing whatever to draw them to her, others that there was a certain witchery in her she could exercise at will. Whichever of these propositions was true, certain it is that they all fell before her. And certain it is that she was an incorrigible flirt.

Naturally enough, this proclivity gave her mother great concern. She no sooner noticed spooning going on between her daughter and some desirable party than the swain was replaced by one who would be especially undesirable. This was succeeded by other similar transactions. In consequence the poor lady was kept in a constant state of worriment.

Finally, when Sadie became the object of attention on the part of a young lieutenant in the army with nothing but his pay, Mrs. Ludlow decided to give up her residence in town and take a place in the country. A house in the center of large grounds was secured in a dedcidedly rural region, and mother and daughter, with the necessarv servants, removed there.

One thing about the place that rendered it especially desirable for Mrs. Ludlow's purpose was a high wall surrounding it. The gateway was imposing and was protected by a lodge. Mrs. Ludlow took with her a man who had long been a servitor in the family and placed him in the lodge with instructions to admit no young man without first calling for his card. He was given a list of names of Sadie's admirers, so far as known, and directed to inform any one of them who might call that the family were "not at home." this being a convenient form adopted by well bred and truthful persons of avoiding a deliberate lie.

Idlewild-the name of the country seat-was on a good road and at a convenient distance from the city for autos. Many a car rolled up to the pillared gateway to be stopped by the sentinel guarding the fair damsel imprisoned within. Among the callers was Lieutenant Whitehead, who was the immediate cause of the imprisonment.

Now, the lieutenant had but recently been graduated from West Point and had during the latter part of his course there spent much of his time studying the new military status demonstrated by the pan-European war. He was much impressed with the German method of holding the offensive, which maxim, the hills, that there is an irresistible power in the initial force. He assumed Idlewild to be a fortification to be taken. By constant pressure by various methods to be tried successively till a way was found to effect an entrance the fortress must at last fall. Nevertheless the reduction of Idle wild was more difficult than in the usual elimination of objective points. To surround and starve the garrison was not a part of the problem. To batter down the wall would not result in securing the prize. On the contrary, it would render ultimate defeat cer tain. The conditions were more like those attending the capture of ancient cities. As the Greeks obtained admission to Troy within an immense wooden horse, so must Whitehead obtain access to Idlewild by stratagem. On the lodgekeeper's list of persons to be refused admission to Idlewild was the name of Lieutenant Beverly Whitehead; and it was marked by a double star. James, the lodgekeeper. when callers came always referred to his list. When Whitehead drove up in an automobile the keeper held the list in his right hand while he fumbled in his vest pocket with his left for his glasses. Since he was standing by the car, the upper part of his body on a level with the visitor, the latter caught a glimpse of his name with the two stars attached. "It seems," said the young officer to himself, "that in this army of suitors I am a major general," this facetious idea being based on the fact that the insignia of a major general's rank in the United States army is two silver stars. "However," Whitehead added, "I shall be an army unto myself, both general and private." It was when turned away on this visit that the lieutenant resolved upon effecting an entrance to Idlewild and carrying off the fair Sadie. Turning from the gate, he drove around the place, seeking some weak spot. None appeared. The wall was continuous and rose to the same height on every side. It might be climbed or it might be burrowed. In either case if he succeeded in persuading the lady to fly with him she must be carried either over or under it. As a soldier neither of these methods seemed sufficiently heroic, and he did not believe they would appeal to Miss Ludlow. It was not a case where a girl has been won and is kept locked up from the lover she would mate with; it was a case where she must be both won and carried away by some brilliant maneuver.

formation of an objective point or an enemy's movements had been greatly developed by the aeroplane. It seemed a long process for him to apply for admission into the United States army aeroplane corps and practice flying, but the only plan of operations that appealed to him rendered this course essential, and he straightway became a military aerial cavalryman. The ancients ascended into the upper air on a winged horse for fun. Why should not Whitehead ascend in a modern aeroplane for love?

It was autumn before the young officer became an aeronaut and made his first flight over Idlewild. It was a sunny afternoon, and Sadie was walking in the grounds without head covering save her hair, on which the sun shone with a warm glow. She was plucking flowers form a chrysanthemum plant. A girl plucking a flower is at any time a thing of beauty. but a girl on a soft October afternoon, robed in corresponding colors, viewed by a man from an aerial height above her, especially if that man is a lover. is especially entrancing. Whitehead, not thinking of the distance between them and that sound rises rather than falls, coughed. Miss Ludlow, not hearing the sound, paid no attention to it and, after dawdling about among some late plants that were in bloom, went into the house.

Whitehead saw another sight, an automobile standing at the gate, the porter holding a card in one hand and a list of Mrs. Ludlow's forbidden visitors in the other. The officer sailed about till he saw the occupant of the car drive away, then turned and swooped down like a bird toward the point from which he had started.

The wooer regretted that he had not provided himself with means of communicating with the object of his love. He might fly over Idlewild a dozen times without again meeting with so favorable an opportunity. The season when a young girl would likely be strolling about in the open air was passing, and winter was not far away. Before he made his next trip over Idlewild he wrote a note to Sadie announcing his entrance into the army aviation corps and inviting her to an aerial ride with him. This note he attached to a contrivance designed to carry it to earth not too swiftly and in the direction he wished it to fall. He also provided himself with a small bomb with a time fuse that would explode before reaching the earth. This was intended to attract the young lady's attention.

He chose for his next flight over Idlewild a day after a cold storm, when the sun came out bright and warm, thinking it likely that the prisoner might go out for an airing. Nevertheless he spent a whole morning flitting over the place high in the air before seeing her. Then she came out on the porch and, reclining in a couch hammock, began to read a book. This was unfortunate, for Whitehead had hoped to find her at a distance from the house, where he might more safely communicate with her. He dared not drop her note to her where she was; but, making a virtue of necessity, he dropped it at a distance from her, but where he expected it would fall within the grounds.

Suddenly Sadie heard an explosion

FOR COOLING WATER BEEF SERVED WITH MACARONI Nutritious and Appetizing Dish That

INEXPENSIVE AND SATISFYING APPARATUS IS THIS.

Comparatively Inexpensive and May Be Made Serviceable for Milk If Desired - Illustrations Show Method of Construction.

How many times have we stopped at the farmhouse along our way in the hot summer time and called for a drink of water, and been told to go to the spring, or drink spring-water that had been standing in a pail for several hours?

For those who have not the convenience of the icehouse, or a cool cistern, the following description of how to make an inexpensive and satisfy-

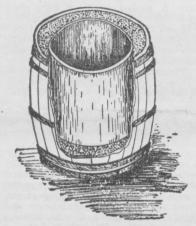

Suitable for Milk or Water.

ing water cooler will prove interesting, Any keg or barrel will do for ordinary purposes, but for the dining room or sitting room in any home the following will make a neat piece of furniture.

Secure a 10 or 15-gallon cask or keg, hardwood, preferably oak. A new one, one that may be stained, filled and varnished. Next secure a stone jar, one of which the diameter is three or four inches less than the keg, and the length of which is four or six inches

Fill the keg with charcoal until the jar sets in level with the top. That is, have the tops of each on a level. If any difference, let the jar be one-quarter of an inch the lower.

Have the jar in the exact center of the keg, and pack charcoal tightly around the jar until within two inches of the top. Then fill in the rest of the

Homemade Water Cooler.

Keen Sight of the Gull. There is perhaps no other bird of and or sea so keen of sight as the common gull. To convince a skeptical friend of this an American naturalist

once made some interesting experiments. Two men were passengers on Two pounds of shank (or any presteamer making twenty miles an ferred cut). Have saucepan very hot, hour. A dozen gulls followed them in fry out a piece of fat or grease botthe steamer's wake without apparent tom with butter, cut up meat and effort and circled in graceful curves place in pan, allowing to fry until over the water. Breaking a cracker seared on every side. Salt and pepbiscuit into four parts, less than an per, dredge with flour, pour on boiling inch square each, the naturalist handwater to just cover meat, cover close ed one piece to his friend and told him to drop it into the seething waters ou the starboard. Immediately the bit of biscult became invisible to human eyes, and yet be-

fore it had gone thirty yards astern a gull detected it and, dipping into the foam, secured it. One by one it picked up the other bits of biscuit, though neither of the two men could see them. Tearing off a postage stamp from an old envelope the naturalist dropped it overboard. The gull detected the waif and made as if to pick it up. But when within a yard or so of it the bird saw that it was nothing in his line and glided upward again to his favorite station on a line with the topmost ruck.

A Moneyless Man.

A man without money is a body without a soul, a walking death, a specter that frightens every one. His countenance is sorrowful and his conversation languishing and tedious. If he calls upon an acquaintance he never finds him at home, and if he opens his mouth to speak he is interrupted every moment so that he may not have a chance to finish his discourse, which it is feared may end with his asking for money. He is avoided like a person infected with disease and is regarded as an incumbrance to the earth. Want wakes him up in the morning, and misery accompanies him to bed at night. The ladies discover that he is an awkward booby, landlords believe that he lives upon air, and if he wants anything from a tradesman he is asked for cash before delivery. - Bruno's

Genius and Mediocrity.

Corneille did not speak correctly the language of which he was such a mas ter. Descartes was silent in mixed society. Themistocles, when asked to play on a lute, said, "I cannot fiddle, but I can make a little village into a great city." Addison was unable to converse in company. Vergil was heavy colloquially. La Fontaine was coarse and stupid when surrounded by men. The Countess of Pembroke had been often heard to say of Chaucer that his silence was more agreeable to her than his conversation. Socrates, celebrated the can and pour the milk, the entire for his written orations, was so timid that he never ventured to speak in public. Hence it has been remarked, "Mediocrity can talk; it is for genius to observe.'

The Louis Styles.

It was the French King Louis XI. who invented gold lace, and it was Louis XIV. who ordered all the silk without heating, but there are better upholsteries of the palace done in white with figures of gold and blue and a touch of red. The louisine silks are named after him, and all the rench kings of the name of Louis have had their names brought down to posterity through the invention of some article of dress whether it he a Louis Quinze heel or a Louis Seize coat, while to Louis Quatorze belongs the honor of a cuff and a hat .- London Telegraph.

NOT A COMFORTABLE ABODE

First White House, According to Reports, by No Means a Desirable Place of Residence.

The formal transfer of the national capital from Philadelphia to Washington took place in October of 1800. A few months before that time, on May 27, President John Adams left Philadelphia to visit the new capital. He was much feted en route, not only as the president of the United States, but also because he had been one of the committee of five appointed in 1776 to prepare a declaration of independence, and because he had seconded Richard Henry Lee's resolution that the United States "are and of right ought to be free and independent."

The capital at that time was referred to as "a great Serbonian bog," and even the plucky Mrs. Adams-who by her admirers was sometimes called the "Portia of the rebellious provinces" on account of her unselfish devotion to the cause of the revolution-was somewhat dismaved when she arrived at the new White House as its first mistress. She evidently considered it a dreary prospect, judging from her first letter to her daughter after her arrival. The house was cold and drafty, and

though it was surrounded by a forest, there seemed great difficulty in getting wood cut and carted for the president's use, as there was also difficulty in getting grates made and set, they could not burn coal, so the mansion was not comfortable.

Mrs. Adams made a brave effort to have the house put in order by the new year, when she held her first large reception, and the people came from miles around to see the president's new house. Before the next national reception day Mr. Jefferson had taken possession of the mansion. and open house was the order of the day from the beginning of his occupancy.

The apostle of democracy was worshiped by the people, and held this first general reception on July 4, following his election.

MARK TWAIN NO FINANCIER

Humorist Lost Money in All Sorts of Wild Schemes and Rejected Golden Opportunity.

Mark Twain, as most people know, was, during a number of years before his financial downfall, an exceedingly prosperous literary man, but unfortunately there were moments when he forgot that his lot was satisfactory and tried to improve it. His Colonel Sellers imagination, inherited from both sides of his family, led him into business adventures that were generally unprofitable. When a man came along with a patent steam-generator that would save 90 per cent of the usual coal supply, Mark Twain invested his whole bank surplus and saw that money no more forever. Then came a steam-pulley, a small affair, but powerful enough to relieve him of \$32,000 in a brief time. A new method of marine telegraphy, a promising contrivance, failed to return the \$25,000 invested in it by the humorist; and so on and so on. Every scheme was plausible enough to catch Mark Twain, according to Albert Bigelow Paine, writing in St. Nicholas, except the one that would have made his fortune. A certain Alexander Graham Bell appeared one day offering stock in an invention for carrying the human voice on an electric wire. But Mark Twain had grown wise. He refused to invest even \$5,000. Instead, he lent \$5,000 to a friend, who went bankrupt three days later.

ly and simmer slowly until nearly done. Do not add more water unless there is danger of going dry for you only want enough for gravy and not a

stew. Twenty minutes before serving pare potatoes and add whole with small pieces of onions. At the same time put macaroni to cook in rapidly, boiling water and allow to boil 15 minutes, stirring often with a fork so as not to break, then drain and add to meat. Cook all together until potatoes are done; take out thick part on deep platter, thicken gravy with tablespoonful of flour dissolved with little cold water, beat very smooth, then pour contents in platter and serve very hot. Dumplings can be added, but we never eat them. We like it made of round steak, but cheaper cuts are just as good, and really it is a delicious dish .- Boston Globe.

May Be Prepared at Compara-

tively Small Cost.

GOOD THINGS TO KNOW

When ironing table linen, iron with the selvage and not across the grain. To clean bamboo furnture use a brush dipped in warm water and salt. The salt prevents the bamboo from turning color.

Salt rubbed on tea cups will remove tea stains, and discoloration on crockery or china will respond to the same treatment.

To clean collars apply benzine and after an hour or more, when the grease has become softened, rub it or remove with soapsuds.

A little clear coffee can be added to starch for tan or cream materials, Weekly. and this is better than pure white starch in many colored things.

For black garments black starch is sold that is quite satisfactory. White starch is almost sure to give unsatisfactory results on black material. Iron saucepans should be cleaned as soon as possible after use, and if anything greasy has been boiled in them put in some soda and boil up.

To Whip Condensed Milk.

Place one can of condensed milk in water and heat to boiling. Remove promptly and thoroughly chill by placing the can on ice. When cool, open contents of a small can or half the contents of a large one, into a chilled bowl, placed in another bowl filled with cracked ice. After the milk has become thoroughly chilled whip in the regular way with an ordinary egg beater for five minutes. Sweeten and flavor if desired. Keep it on ice until served. Condensed milk will whip results when following the above directions.

One thing Whitehead had learned from his observations of the European war-that the methods of obtaining in-

in the air and, looking up, saw a tiny parachute descending from the sky; but, not dreaming that it supported a letter for her, on seeing it drop at some distance from her she turned again to her book.

Whitehead's failure only spurred him on to new devices. Fearing that winter would come on before he could attract Sadie's attention from the air, he considered how he could communicate with her by mail. He was by this time familiar with the rocket camera used in war to photograph an enemy's position, and, taking one of these ingenious devices to a point near Idlewild, he sent it up. He had the satisfaction to see the camera it contained detached from it by an explosion and sail down under a parachute to a point near his feet. After developing the plate he obtained a photograph of Idlewild taken from a point several hundred yards above it. On the print he wrote in minute characters a day and hour and mailed it to Miss Sarah Ludlow, with an advertisement of a camera manufacturing firm in the same envelope.

Mrs. Ludlow received the letter and, supposing it to be merely an ad., permitted her daughter to have it. Sadie recognized in the address on the envelope the handwriting of Lieutenant Whitehead. Naturally she suspected the contents to contain a hidden meaning. Bringing a hand glass to bear on the date written on the photographic print, she knew that something would happen at that time. The print she recognized as a photograph of Idle wild from above, and this eventually gave her the key to the puzzle.

The day named proved propitious, and Sadie kept a watch above and below. Seeing an aeroplane soaring, she went out in the grounds to a point where she was screened by a clump of trees. An object dropped from the machine and unfolded into a parachute which fell at the lady's feet. She took a note from it, containing an invitation to an aerial ride and a request that she would take position in an open space suitable for landing and rising.

By this time the heronaut was within call, and she accepted the invitation. Miss Ludlow stritioned herself in a field containing half a dozen acres. and Lieutenant Whitehead descended to her. He pleaded his cause so ably that the lady took a seat beside him. and the pair were soon sailing among the clouds.

Mrs. Ludlow the next morning received a telegram announcing the marriage of the fugitives.

way with Portland cement and sand three parts sand and one part cement. Finish off smooth and level, keep a linen towel dampened and spread over the jar, hold in place by a tight-fitting cover. Fill the jar with cool water early in the morning, and it will keep cool for days .-- J. W. Griffin in Exchange.

Prune Gelatin.

One pound of prunes, one-half box of gelatin, two lemons, one cupful of sugar. Soak the prunes over night, stone them and simmer for 15 minutes. Soak the gelatin in a cupful of water for ten minutes, then nour over it a pint of boiling water and add the juice of the lemons. Place half of the gelatin into a wet mold and set it away to harden. When it is firm lay the prunes upon it, pour over them the remainder of the gelatin and allow to harden. Serve with whipped cream.

Hawaiian Fish Stew.

Four cupfuls of milk, one cupful of grated coconut, one tablespooonful of chopped onions, one tablespoonful of butter, one tablespoonful of curry and one teaspoonful of ginger.

The coconut is soaked in the milk for about one hour. In the meantime the onions are browned in butter and the curry and ginger are added; then the milk from the soaking coconut is drained and poured into the saucepan with the other ingredients, the fish is added and the whole is cooked until tender.

Asparagus Boilers.

Everybody is aware of the beneficial results obtained by eating asparagus. and while it is in season we should all serve this toothsome vegetable as often as possible. Asparagus boilers, with a rack that can be lifted out, thus draining the water from the vegetable, are excellent to use, as they insure the tips from breaking. These little boilers are of the best grade of tin and only cost 35 to 50 cents, according to size.

Berry and Lettuce Salad.

A pretty salad is made with strawberries and lettuce. Clean and hull the berries, then put them on the ice until they are quite chilled. Take the heart out of a crisp head of lettuce, washing the outer leaves well and chilling thoroughly by setting them directly on the ice in a paper bag until they are ready to be used. Fill in the center of the lettuce with the berries, cover with powdered sugar or a sweet mayonnaise.

Suet Pudding With Sterling Sauce. One cupful finely chopped suet, one cupful molasses, one cupful milk, three cupfuls flour, one teaspoonful soda, one and a half teaspoonfuls salt, onehalf teaspoonful each ginger, cloves, nutmeg and one teaspoonful cinnamon. Mix and sift dry ingredients; add molasses and milk to suet; combine mixtures. Turn into buttered mold, cover and steam three hours. Serve with sterling sauce. Raisins and currants may be added.

Sterling Sauce-half cupful butter, one cupful brown sugar, one teaspoonful vanilla, four tablespoonfuls cream or milk. Cream the butter, add sugar gradually and milk and flavoring drop by drop to prevent separation.

Creole French Dressing.

Four tablespoonfuls of the best olive oil, one tablespoonful of vinegar, one teaspoonful of dry mustard, yolk of one hard-boiled egg, salt and pepper to taste. Rub the oil into the mustard, a drop at a time, until mustard is moistened and smooth, then alternate the oil and vinegar until all is in. When smooth add the hardboiled egg, salt and pepper to taste, and beat well. If the oil seems to separate, a few drops more of vinegar and a hard beating will make it smooth

Using Left-Overs.

again.

Here is a good way to use cold tongue, even if there is only an end left that is too small to slice: Cut the cold tongue into small dice. Now put two tablespoonfuls of butter into a saucepan and let it melt slowly. Add the same amount of flour, salt, pepper, and the juice of half a lemon. Add a cupful of strained tomato pulp. Simmer slowly for ten minutes. Strain, then return to the saucepan, lay in the tongue, and let it stand where it will keep hot without boiling for five minutes. Serve in a hot platter.

Homemade Cork Cleaner.

When cleaning steel knives I have found that a cork is much better than a cloth for rubbing on the soap or scouring powder. It cleans the knives quickly and at the same time polishes them. A cork from an olive bottle is the best.-Exchange.

Prune Salad.

Mix fine quality prunes, steamed. stoned and cut in pieces, with shredded nuts-pecans, walnuts or almonds. Serve on lettuce with a cream mayonnaise in which is mixed a little celery, very finely minced, or run through the finest cutter of the meat grinder.

High Tribute.

"Don't you think Miss Sweetthing's complexion is perfectly lovely?" inquired the infatuated youth.

"I do, indeed," replied the cynical young woman. "In fact, I have told her several times that that shade harmonizes best with the present color of her hair."-Richmond Times-Dispatch.

Falling Leaves.

When leaves fall they are actually cut off from the stems by a layer of cork that forms across the base of their stalks. No nourishment is left in the dead leaf, but only the waste products of vitality, of which the tree is well rid.

Summer Homes in Federal Forests.

To promote a more general use of the national forest lands for summer home and recreational purposes, a federal law has been put into effect which allows the leasing at nominal fees of tracts of ground of not more than five acres for periods up to 30 years. This plan replaces that hitherto in effect which provided for the issuance of revocable permits. Because it was impossible under that system for an individual to be certain of the duration of his tenure, many persons showed restraint in making material improvements on the grounds they held. It was largely because of this that the present law was made. The term permits now granted necessitate the yearly payment of fees ranging upward from \$5 according to the location of the ground selected. Persons anticipating making improvements not in excess of \$1,000 are able to obtain land permits from district foresters which are effective for 15 years. Other leases must be approved at Washington. When land is to be used for hotel or resort purposes the application is accompanied by the plans, specifications, and estimated cost of the buildings to be erected and improvements to be made .- Popular Mechanics Magazine.

Salt and Pellagra.

A sharp increase in the number of cases of pellagra among the poor of Italy is expected to follow the issuance of a royal decree, adding an addltional tax of 1 cent on a pound of salt. There are about 120,000 cases of pellagra in Italy at present. Twenty per cent of the cases brought under observation are fatal. Pellagra develops almost exclusively among the poorer classes who subsist almost entirely on cornmeal in one form or another.

Investigation has convinced Italian medical men that the use of salt in cooking of corn products prevents fermentation and checks the disease. The new tax will put salt out of the reach of many thousands of Italians.

) the

SUNDAY SCHOOL

Lesson XII.-Third Quarter, For Sept. 17, 1916.

THE INTERNATIONAL SERIES.

Text of the Lesson, Acts xxii, 17-29. Memory Verses, 27-29-Golden Text, Ps. xci, 2-Commentary Prepared by Rev. D. M. Stearns.

This chapter is the record of Paul's account of himself and his conversion given to the people from the castle stairs. The chief captain having given him permission to speak after he found out that he was not the leader of a band of murderers, he stood on the stairs, and, beckoning with his hand till there was a great silence, he spake unto the people in the Hebrew language, and, hearing him speak in their own language, they kept the more silence (xxi, 40; xxii, 1, 2). It was the Jews from Asia who started this riot, exile who was in the camp at Jaoand the fact that the Lord had spoken to him from heaven at the time of his conversion in the Hebrew language may have led him thus to decide at this time (xxi, 27; xxvi, 14).

When the Spirit records an event or a bit of history several times He must have some special reason for so doing and desire that we give special attention to it. Note the threefold repetition of Paul's story in chapters ix, xxii and xxvi and partially in Phil. iii and I Tim. i and compare the three times repeated record of Hezekiah and Sennacherib in Kings, Chronicles and Isaiah and other repeated records. 1 have no doubt that the conversion of Saul was typical of the conversion of all Israel, when our Lord shall appear to them in His glory, and on that event hangs the conversion of all nations through Israel. The miraculous deliverance of Hezekiah and his people from the army of the Assyrians by an angel from heaven is suggestive of the future deliverance of Israel from all nations at the second coming of Christ.

100

÷

Paul acknowledged that he had been a great persecutor of the followers of Jesus Christ, with the consent and indorsement of the high priest and the elders, and that with letters from them he was on his way to Damascus to bring those of that way bound to Jerusalem to be punished when this great event happened to him, and his whole life was changed (verses 3-5). He was full of the spirit of persecution until he had nearly reached Damascus, when suddenly a great light from heaven, above the brightness of the sun at noonday (for it was about noon), shone upon him and caused him to fall to the ground, and he heard a voice saying to him in Hebrew, "Saul, Saul, why persecutest thou me?" The repetition of the name was unusual, being used in the Old Testament only of Abraham, Jacob, Moses and Samuel (Gen. xxii, 11; xlvi, 2; Ex. iii, 4; I Sam. iii, 10), and I have wondered if it caused Saul to think of the God of Israel as revealed to these men To Saul's question, "Who art thou, Lord?" the reply came promptly, "I am Jesus of Nazareth, whom thou persecutest" (verses 6-8). What a thrilling reply, what an eye opener, Jesus Christ really alive from the dead, and all that He said He was, and His followers believed Him to be! Then the persecuted ones were right, and Saul was all wrong. Quickly came the heart cry, "What shall I do, Lord?" And being told to go into Damascus and there he would be further instructed, he, having become blind by the great light, was led by the hand of them that were with him into Damascus (verses 9-11). Many in the city were fearing the arrival of this persecutor and no doubt praying to be delivered from his cruel hands. Perhaps some prayed for his conversion. even thuigh he seemed such a hopeless one to pray for. Now, see what God had wrought, and let all who are praying for the salvation of others who are laid on their hearts be of good courage, for when God's clock strikes the hour the thing shall be done-not in your way perhaps, but in His own time and way. He will see to it (Ps. cxlv, 19). Ever since I wrote on this lesson last, some six or seven years ago, the words of verse 11 have been much with me, "I could not see for the glory of that light." Paul was three days without sight and did neither eat nor drink (chapter ix, 9), but for all the rest of his life he was blind to all but the face of Jesus and deaf to every voice but His, just as Jesus Himself was blind and deaf to all but His Father's face and voice (Isa. xlii, 19). Did you ever pray to be thus blind and deaf? At the hands of Ananias, one of the devout brethren at Damascus, Saul received sight, was baptized and heard his commission, as a chosen vessel of God, to see Jesus, know His will, hear His voice and be His witness to all men of what he had seen and heard (verses 12-16). Straightway he preached Christ in the synagogues, that He is the Son of God (chapter ix, 20). The incident of verses 17-21 concerning the trance and vision at Jerusalem in the temple tells us that Saul never forgot the day when he kept the raiment of them that stoned Stephen. Who can tell how many incidents lead up to and have part in the conversion of a soul? The multitude listened until Paul spoke of being sent unto the gentiles, and then the uproar became so great that the captain had him brought into the castle and would have scourged him to find out what it was all about, but Paul was saved from this as a Roman citizen.

Dents In Wood Furniture. When wood is badly dented or scratched it is often a problem to know how to get rid of the marks. This is quite easy if the following plan, suggested by the Scientific American, is adopted. First of all fold a piece of blotting paper at least four times, then saturate with water, finally allowing the superfluous moisture to drip away. Now heat a flatiron until it is about the warmth required for laundry work. Place the damp blotting paper over the dent and press firmly with the iron. As soon as the paper dries examine the mark. It will then be found that the cavity has filled up to a surprising extent. Where the dent is very deep a second or even a third application on the lines indicated might be tried. Sooner or later even serious depressions can be drawn up, and most people who have not tried this plan will be surprised at the result of the treatment. Repolishing

A Chinese Hero.

will clear away even the slight marks

that might finally remain.

At Loping Hsien is a statue draped in full dress of a mandarin (the pu ting or police master) named Chin, who gave his life for the people. An chow and who owed the hsien (district magistrate) a grudge, rode a black horse to Loping and, having killed the hsien, got back for the Jaochow roll call next morning. As the murderer could not be found orders came from the capital that a large number of the people should be killed. To prevent this slaughter of innocent folk the pu ting, a good old man, said he stabbed the hsien after a few words over the the winter. wine cups. and he was consequently beheaded. No resident of the district would deal the fatal blow, but an itinerant cobbler or bamboo worker did it for a reward of 40 taels. Tradition adds that he was struck dead by lightning after leaving the execution ground.

Tennyson's Tactlessness.

Several stories are told of Tennyson's thoughtless speeches. "What fish is this?" he once asked his hostess where he was dining. "Whiting," she replied. "The meanest fish there is," he remarked, quite unconscious that he could have wounded any one's feel-

Yet his kindness of heart was such that when his partridge was afterward given him almost raw he ate steadily through it for fear his hostess might be vexed.

On one occasion Tennyson was very rude to Mrs. Brotherton, a neighbor at Freshwater. The next day he came to her house with a great cabbage under each arm.

"I heard you like these, so I brought them," he said genially. It was his idea of a peace offering.

Quick Hitting.

Dr. White was once a champion boxer in Philadelphia. One day he asked a big teamster to move his wagon forward about two yards, but the teamster, instead of doing that, called the physician a wicked name.

Like a flash White knocked him flat in the gutter, and of course the teamster had him arrested. Magistrate Devlin heard the case, and the inared man complained bitterly that Dr. White had struck him so quickly he had no time to defend himself. "Well," said the hardheaded magistrate, "what did you expect him to do -send you a postal card to tell you he intended to knock you down?" The doctor was discharged without a fine.-Philadelphia Ledger.

FOR SEASIDE WEAR

PARISIAN DESIGN THAT IS BEAU. TIFUL IN EFFECT.

Of Ivory White Jersey Cloth, With Embroideries of Soft White Silk -Coat Will Be a Favorite for the Winter.

My sketch shows one of Redfern's new models for seaside wear, writes Idalia de Villiers, Paris correspondent of the Boston Globe. In this case a beautiful quality of ivory white jersey cloth was used and the embroideries were worked entirely in soft white silks. The smart coat, which molded the figure, was finished off with a large white linen collar and cuffs to match.

This was a really exquisite suit. In the best of taste, in accordance with the traditions of the Maison Redfern and very new in outline. These shaped coats will be much worn all through the winter. They are tight, without being too tight, and the basque is given a distinct flare at the hem. Redfern is making coats of this order in fine serge and in pale-hued linens, and always with the greatest success.

Redfern, like all our other really good tailors, is making a number of plaited skirts-accordion plaits, box plaits, kilted plaits. Indeed, the plaited skirt is now an established favor-Ite. It will certainly play a leading role in the world of dress all through

The Parisiennes are asking for white costumes, and white costumes only. Very brilliant colors are being shown by all the leading dressmakers and tailors, but these are for the foreign markets. The really exclusive Parisiennes wear only black, navy blue. white or gray.

And this is easily understood. France is in mourning for her brave sons. Someone is missing in almost

Straw forms the foundation of this fascinating chapeau, which is bordered with satin ribbon and a wreath of flowers, with a bunch at one side.

CROCHET RUGS ARE PRETTY Just the Amount of Material That Is

Required to Make a 30 by 40-Inch Oval.

The pretty oval braided Japanese rugs seen everywhere now suggested to an ingenious girl the idea of using up the odds and ends of rags in the house and crocheting them together instead of braiding them. While it may not appeal to one as a summer fancy work, still it's a good time to get one's strips together in balls and plan for long winter evenings.

To make a rug 30 by 40 inches oval requires 34 yards of material 36 inches wide. It is much prettier to choose two different colors, white and another solid color or 17 yards of white and the rest divided among two or three harmonizing shades. It must, however, always be remembered that in rug designing, like bouquet making or quilt patching, certain rules are infallible. There must be a distinct touch of dark, black or very dark blue or brown. Yellow and green set off all other colors and the prettiest rugs are divided equally between white and another color or group of colors.

To make a white and blue-striped rug, for example, tear 17-yard strips of white cheesecloth and blue calico into one-inch widths.

Begin with a chain eight inches long, crocheted with a heavy wooden crochet needle costing 10 cents or one of amber which costs 15 cents. Turn and put in eight stitches at the end. Repeat at the other end after crocheting back the eight inches of chain. Add eight stitches at the ends with every other row and this will form the oval. When the first piece of 17 yards of white is consumed, begin with the blue strip and alternate the two colors until all the strips are finished. This produces a graduated stripe rug.

A girl who has three brothers and a great many brothers' friends has made a rug of neckties, cut into inch strips and sewn together in harmonizing combinations. This rug is very beautiful and, being of silk, is quite valuable. The really loveliest and most durable ones of all are made of woolen materials, but if one buys outright for them it makes it more expensive and it takes a good while to ac-

HEROISM WINS HIM BRIDE

Youth Who Furnished Skin for Grafting Upon Little Girl Weds the Nurse.

Denver .-- A romance-like those you read about in novels-culminated recently when Miss Leilah Alma Peck, a nurse at the County hospital, formerly of Madison, Ind., was married to Vincent Brunner, Jr. of Mishawaka, Ind. Several months ago Brunner read

in an Indiana paper that little fiveyear-old Mary Lena Lewis, who was badly burned in a Colorado forest fire; needed healthy skin grafted on to her seared little body. The appeal touched his heart, and he being a healthy young man, came to Denver and gave a portion of his skin that the child might recover.

During the skin grafting operation he met Miss Peck, and the romance began that ended in their marriage: In the spring the couple will take up a homestead for their future home.

FEEDS APRICOTS TO HOGS Fruit Market Is Glutted, but Francis Finds Way to Use His.

Pomona, Cal .- Apricot ham is the latest novelty in this community. C, C. Francis, who has a ranch near here, is the producer. Last summer his apricot crop was going to waste because the market was glutted, so he fed the apricots to his hogs.

He butchered two shoats the other day. They each tipped the beam at 245 pounds. He got 15 gallons of lard, seven pounds of sausage, four splen did hams, some spareribs, a quantity of side meat, eight pigs' feet and 100 pounds of soap out of the kill.

The hogs were carried through the summer and fall on waste fruit, and this winter they were finished on oranges and cornmeal slop. Mr. Francis declares that the high cost of living won't worry him for a while at least.

Why She Objected.

"I hear that Florrie has broken off her engagement with you, old chap,' said one man to another.

"Yes," replied the second. "I say, I'm awfully sorry to hear it. Whatever did she do it for?"

"Just because I stole a kiss," said the disconsolate one, sadly.

"Great Scott!" exclaimed his friend. "Surely she must be crazy if she objects to her fiance stealing a kiss from her.

The abandoned one sighed deeply. 'Eut that's just the trouble," he said. "I didn't steal it from her."

Order Nisi on Sale

In the Circuit Court for Carroll County. Edmund F. Smith, Collector of State and Coun-ty Taxes for the First Election District of Carroll County, Maryland,

Jacob Ridinger and Edward Ridinger.

Jacob Ridinger and Edward Ridinger. Ordered this 29th day of August, in the year ninetcen hundred and sixteen, that the sale of the real estate made and reported in the above entitled cause by Edmund F. Smith, Collector of State and County Taxes for Taneytown Dis-trict, being Election District No. 1 in Carroll County, in the State of Maryland, be ratified and confirmed, unless cause to the contrary thereof be shown on or before the 30th day of September, next, providing a copy of this order be inseited in some newspaper published in Carroll County. Maryland, once in each of three successive weeks prior to the 25th day of Carroll County, Maryland, once in each of three successive weeks prior to the 2bth day of September, next, warning the said Jacob and Edward Ridinger and all persons interested in said real estate reported as aforesaid to be and appear in this Court in person, or by Solicitor, on or before the said 30th day of September, next, and show cause, if any he or tney may have, why said sale should not be ratified and confirmed.

The JOHNS HOPKINS UNIVERSITY

Entrance Examinations

State Scholarships in Engineering Courses

Entrance Examinations for the Department of Engineering, as well as for the College of Arts and Sciences, will be held in the Academic Building of the Johns Hopkins University, Homewood, Balti-more, September 18-21, 1916, beginning

at 9 a. m., each day. Application for Scholarships in the Department of Engineering, established in the Johns Hopkins University under the provisions of the Laws of Maryland, Chapter 90, 1912, may now be made. If there is more than one applicant for a particular scholarship, a competitive ex-amination must be taken in the Academic Building, Homewood, on September 22,

1916, beginning at 9 a. m. Each County of the State and each Legislative District of Baltimore City, with the exception of Charles, Harford, and Queen Anne's Counties will be entitled to one or more scholarships for the year 1916-17, in addition to those which have already been assigned. In the three counties mentioned above all the avail-

able scholarships have been awarded. Under the provisions of the Act of As-sembly, the County and City Scholarships in the Department of Engineering are awarded only to deserving students whose financial circumstances are such that they are unable to obtain an education in Engineering unless free tuition be granted to them. The scholarships entitle the holders to free tuition, free use of text-books, and exemption from all regular fees. The expense of attendance for those who do not receive scholarships is no greater than at other Maryland institutions.

Scholarships may be awarded to gradscholarships may be awarded to grad-uates of Løyola College, Maryland Agri-cultural College, Mt. St. Mary's College, Rock Hill College, St. John's College, Washington College, and Western Maryland College; and one scholarship will be awarded "At Large."

Applicants should address the Registrar, The Johns Hopkins University, for blank forms of application and for further in-formation as to examinations, award of scholarships, and courses of instruction. 8-25,4t

Executor's Sale - OF ----**REAL ESTATE**

By virtue of an order of the Orphans' Court of Carroll County, Maryland, passed on the 17th day of July, 1916, and in pursuance of a power of sale contained in the last will and testament of Miranda R. Bishop, late of Carroll County, de-ceased, the undersigned, executor named in said last will and testament, will sell at public sale, on

SATURDAY, SEPT. 9th, 1916, at 2 p. m., on the premises described beow: the Real Estate of which the said Miranda R. Bishop died, seized and possessed, situated in the village of Harney, Carroll county, Md., on the South side of the public road leading there-from to Littlestown, Pa., adjoining the from to Littlestown, Pa., adjoining the property of George Spriner on the East, and the property of William Slagenhaupt on the West, which was conveyed to the said Miranda R. Bishop by John W. Slaugenhaupt and Mary E. Slaugen-haupt, by their deed dated the 15th day of October 1892 and recorded in Liber of October, 1892, and recorded in Liber B. F. C., No. 75, folio, 426, one of the land records of said Carroll county. The improvements are a 2-Story

FRAME DWELLING HOUSE,

Stable, Hog Pen and Chicken House.

Moving Pictures and Silver.

The moving picture industry is using a large amount of silver. There are about 20,000 picture houses in the United States, using approximately 120,000,000 feet of film regularly. The average life of a film is three weeks. Silver salts, used for sensitizing, are Jost forever on being exposed to the light. It is estimated that 15,000,000 ounces of silver a year-a figure equal to Utah's total production-are used for this purpose .- Metal Mining Journal.

Insurance a Luxury.

To an old darky haled before him a southern judge put this question: "Why did you burn your house down just after getting it insured?"

Whereupon the darky replied: "Yo' honah, a pore man like me can't afford to have a house and insurance too."-Case and Comment.

Alligators' Eggs.

Alligators often lay from thirty to sixty eggs in a single nest. The eggs are similar in shape to those of a duck and about three inches in length. When they first appear the young al ligators are about the same size as lizards and almost as lively.

Ambiguous.

When Bilkins was away from home on a long business trip he got a letter from his wife that still puzzled him.

It ended thus: "Baby is well and lots brighter than she used to be. Hoping that you are the same, I remain, your loving wife."

He Succeeded.

"Is that Eddie Jones, the artist, with an automobile? I never thought he would succeed." "He succeeded to a million dollars

from his grandmother."-Puck.

Summed Up.

Knicker-Of what does a shad consist? Bocker-A backbone, a wishbone, a funny bone and then some.-Chicago Herald.

Nothing is more simple than greatness. Indeed, to be simple is to be great.-Emerson.

Redfern Coat and Skirt of Ivory White Jersey Cloth, Embroidered With White Silks.

every home. How then can one expect the Parisiennes to appear in gay colors?

But even for the foreign markets an immense number of white costumes are being made this year. Among these white jersey cloth, white linen and ivory white crepe de chine take the lead.

Large black taffeta hats are taking the position which was held by black velvet picture hats last autumn. Taffeta hats look specially well when worn with a neat linen costume-and It is certainly true that taffeta is more suitable than velvet for the hot days of August. But this latter fact has nothing to do with the popularity of the taffeta hat.

Women of fashion have long ago thrust aside the idea of wearing summer things in summer and winter things in winter. Never I think were expensive furs more in evidence than at this moment-at midsummer. Ermine, sable, chinchilla and skunk-all these furs are now worn in the guise of long straight ties, or cape collars of considerable size. White fox is another favorite summer fur.

Cutaway coats are coming in to a limited extent.

The latest handkerchief has rounded corners.

The sheer weaves of silk will continue to be worn.

Unbleached rep is a good material for boys' middles.

A fisherwife sleeve is rather short and the cuff is turned back.

A washable beachcloth will be more or less used for summer suits.

Dolman-like coatees are ruched all around in the true old-fashioned way. Blazer stripes, combined with plain colors, are much used for summer suits.

Coffee is a new shade of brown, and other favorites are russet, cinnamon, mole and African.

Some of the quiet, prim-looking little dress bodices are almost childlike in simplicity.

The sleeves of some evening dresses are puffs, while others are loose and hang like a cape.

cumulate just the right colors here and there.

SUIT ALMOST ALL WOMEN Large Hat's Return to Favor Will Be Generally Welcomed, for Very

Good Reason.

True Copy, Test: EDWARD O. CASH, Clerk. Almost all women are heartily glad that larger hats are the fashion. **R**ATIFICATION NOTICE There is a mysterious allure about the

big shady hat which shadows the face that is wonderfully softening and becoming. To young faces the new hats which curve deeply down at each side

as now. For, according to your re-

quirements and what becomes you best, you can have either the close-fitting swathed toque, the tall, practically brimless hat of Cossack frame, surmounted by a cockade or a chou of ribbon; the dainty drooping Watteau or Dolly Varden, the charming and less exacting bell shape, or the great "cart wheel," always dear to the feminine heart-and head.

EARRINGS OF ODD DESIGN

For the Daytime the Drop Style Is Distinctly in Order-Three-Story Affairs Also Seen.

It is quite evident, judging from the fashionable women at the Belmont race meet, that drop earrings are a daytime fashion. While they often made the faces of those who wore them look a little bit older, on the other hand they gave a mischievous, piquant or quaint expression which went well with the 1830 or 1860 modernized lines of this season. The prettiest noted were those with two swaying chains dropping from each pearl ear-stud almost to the shoulders, each end tipped with a round pearl. Another interesting pair of earrings were three-story affairs. From each

ear-stud of pink cameo dropped a long chain with two cameos, one in the middle of the chain, one on the end. Another odd pair, evidently antique, were long almond-shaped topaz stones, which swung to and fro through a frame of Etruscan gold .- New York Herald.

The report states the amount of sale to be \$335.00.

John Smeltzer, in West Va., returned home on Tuesday evening, accompanied by Mr. and Mrs. Guy A. Ourand, of ing her sister.

evening for a visit to her brother-and the new Miss Englar-in Portland. Oregon. She will stop in Chicago, en route, and visit Mrs. C. A. Britt and family, and Rev. and Mrs. Wm. E. Wheeler.

Mrs. President Wilson's donation to St. Joseph's church festival, Taneytown, of a ladies' fancy handkerchief, was raffled off at the pic-nic at Ohler's grove, Saturday. The lucky winner was Mr. A. B. Blanchard, son-in-law of the late Congressman Goulden, of New York City. Mr. and Mrs. Blanchard and son, Joseph, are summering at the Goulden farm, "Glenburn."

(For the RECORD.)

The home of Mr. and Mrs. Wm. H. Marker was the scene of a happy gathering when a number of their friends came to spend the day last Sunday with them. The guests were, N. A. Brown and wife, Wm. E. Brown and wife, Miss Bessie Brown, Harry and George Brown, of Silver Run; Mrs. John Humbert and grandson, of Middleburg; John H. Brown, wife and daughter, Mabel, of New Windsor; Theo. Brown, wife and daughter, Mildred of Westminster; Oliver Brown, wife and two daughters, Alice and Evelyn, of Tyrone; Charles Brown and wife, of near Littlestown; Mrs. Grant Yingling, of Tauevtown.

Quite a number of our citizens have re-ceived communications from an Electrical Engineering and Development Co., of New York, relative to the installation of an electrical light and power plant in Taneytown, the idea being to secure a franchise from the authorities and to construct a plant costing about \$15,000, to be paid for through the sale of stock, and evidently displacing the present gas plant. We are not sure, in our own mind, whether a separately owned and operated plant is what we need, or whether the current can be more economically obtained from some other source; but we are sure of this, that ultimately we must have electric light, power and heat, or take a back seat as a live, progressive town.
