No. 7

PRESIDENT ISSUES WARNING, ASKS FOOD CONTROL

Both Profiteers and Labor Must Keep Within Reason.

President Wilson delivered a message before Congress, last Friday ,in the interest of reducing the cost of food, as well as to meet the demands of union labor, the whole being a warning against profiteering, as well as against force and violence.

The message in general has been well received by those who have the welfare and peace of the country at heart, and is a distinct warning to those who have not. If the message is followed in the right spirit, by Congress, and without attempts at strained criticism, or the manufacture of partisan campaign material, the whole situation may be controlled

The address has been criticised for its lack of practical suggestions; that it sounds well, and promises well, but the methods proposed will require a great deal of time to work out and enforce. Perhaps the very desire of the President, and the conclusions he favors, will in themselves create a turn of the tide, even though he has not definitely, and outspokenly, laid bare -conditions that inevitably cause high costs. Serious criticism, how-ever, is out of place at this time—it is the one thing the country has a cheap surplus of.

Neither the President, nor Congress nor anyone else having political power can ever reduce the cost of living and retain all of their present friends; for this reduction can never come about through any agreement to shorten the days of labor, nor to increase wages, nor to establish a kind of laboring-man's aristocracy. Neither can capital and "big business" beoutlawed, for both are absolutely necessary and can not be had from men not having capital, nor the capacity for conceiving and managing big propositions. The cost of living will be reduced when men produce more in a day's work, and at less cost, and not until then—and when we stop trying to supply and control the food markets, and other markets, of the world.

Aside from any recommendation as to the advisability of cutting down exports to Europe, the message is broadly comprehensive, even though its terms are general rather than specific. We are of the opinion that in the best interests of this country there should be restrictions or our exports of food, especially in cases in which South America and Australia, for instance, have surplus stocks that

can easily be disposed of in Europe.

High prices, the President told Congress, were not justified by shortage of supply either present or prospective but were created in many cases "artifically and deliberately" by "vicious practices." Retailers, he said, were responsible in large part for extor-

tionate prices. Strikes, the President warned the labor world, would only make matters worse and those who sought to employ threats or coercion were only "preparing their own destruction." Leaders of organized labor, the President said, he was sure would present-

ly yield to second sober thought.
"Illegal" and "criminal" were the words the President used in characterizing the methods by which some present-day prices have been brought

He recommended that the food control act be extended to peacetime op-eration and that Congress exclude from interstate commerce, as well as intrastate shipment, goods which did not comply with its provisions.

The President also recommended that a substantial penalty for profit-eering be provided, and that a law be enacted placing a time limit on cold storage. He suggested that all goods released from cold storage be marked with the price prevailing at the time they were placed in storage, and that goods in interstate commerce be marked with the prices at which they left the producer

He proposed a federal licensing system for corporations engaged in interstate commerce, which would embody regulations to insure competitive selling "and prevent unconscionable profits in the method of marketing.

He expressed the hope that the sale of the surplus government food and clothing supplies would, with the food control law, force vast stores of hoarded goods out of storage.

Pigeon Hills "Moonshine."

A report is current on the streets of Hanover that a number of strangers who have been stopping there are government revenue agents who are collecting evidence to be used against a band of persons operating a still in the Pigeon Hills.

The blockade runners are supposed to have a cleverly concealed plant somewhere in the rocky fastnesses where they make the colorless moonshine whisky which is said to have powerful "kick." It is thought they load barrels of the illicit liquor at night and haul it on motor trucks to Baltimore. Always near a still of this kind the air is, at the time of distallation, filled with the peculiar sour smell of the corn mash from

which the whisky is made. The strangers in question have been operating there in the guise of traveling salesmen and would, of course, not admit that they are connected with the secret service.-Gettysburg Star.

A SERIOUS POTATO DISEASE. Growers Should Report Cases as soon

as They Appear.

The potato wart disease, one of the most serious enemies of the potato growing industry has been recently found in the United States. In Europe it has been known for some time and has caused increasing losses in crops of England and Ireland. Probably the disease was introduced to this country by infected seed brought from Europe. Importation of pota-toes is now prohibited and other measures have been taken toward the eradication of this pest. In Pennsylvania a strict quarantine has been

imposed on the infected area making it illegal to sell suspected potatoes. A campaign of publicity and investigation has been undertaken by the Plant Disease Survey, a branch of the Department of Agriculture, the purpose of which is to make possible the extermination, or at least control, of the potato wart by determining the extent of prevalence of the disease and by calling the attention of the public to its serious nature. In this connection Mr. A. C. Martin, an employee of the Department, is making a survey in Maryland and spent a few days last week in Westminster. With County Agent Fuller 19 counties in the state have been visited and thus far no indication of the disease has

Affected potatoes have rough, irregular, spongy, outgrowths which us-ually start at the eyes, but may event ually cover the whole tuber. These so-called warts are light brown at first, but later become black, and finally decay with age. They are produced by the action of a parasitic fungus. The disease does not affect the vines above the ground, materially, so it is not easy to detect before

After infection has appeared, it is difficult to eradicate since the disease can exist for many years, in the soil. An ounce of prevention in the form of investigation, is worth several pounds of cure. There is no known remedy for the disease in the form of treatment, and since it is hard to get rid of when once acquired, it is important to ascertain the places where it exists and prevent the invasion of new territory: It is quite possible that the disease is present in localities where

it has not been reported, since comparatively few have heard about it, and are aware of its dangerous character. In Pennsylvania it was found first in city gardens but it has been creeping into the sections where potatoes are raised commercially. It is the duty of every grower,

whether farmer or gardener, to be, on the watch for the disease and to report all suspected cases immediately. Reports may be sent to Mr. F. M. Fuller, County Agent, Westminster, or to Prof. C. E. Temple, State College, College Park, Md., or to the Plant Disease Survey, U. S. Department of Agriculture, Washington,

Consider the Printer.

customers and writers who give "the force" plenty of time to attend to their needs. It is not pleasant to be in the position of being expected to be glad for "eleventh hour" work. Those who are chronic late-comers, but who ed. want to be served "today or tomorrow," are tiresome, to put it mildly. It is strange, but nevertheless true, that a good many patrons of newspaper offices place themselves-without intending it—in the light of asking a favor, almost every time the go to the printer for work, or service of

All well conducted offices, and especially those not abundantly equipped with help, must plan their work several days ahead, which means their time. When an insistent late-comer puts in his claim, office plans are correspondingly broken into; and, while the manager will likely conceal his real feelings and meet the requirements, he nevertheless has an unexpressed opinion that is not always very compli-

mentary to the cause of it. From long experience, this office knows that there are very few genuine emergency cases applying to either printing or publishing. By far the greater number of "hurry jobs" are those that have been held up through neglect to come to the office earlier—placing all of what is called "suiting convenience," on one side and when these "conveniences" come on the busy days, there is reasonable excuse for shortness of temper on the part of the office force.

The Record does not very greatly complain of a large percentage of -cases; but we fear that our good friends do not always fully realize the great amount of work that a few men have to do, in our office. If they did, we are reasonably sure some would help to make that work easier.

Marriage Licenses.

Chas. E. Kinney, of Middleburg, and Gladys H. Maldeis, of Baltimore. Chas. L. Loats, and Irene M. Sherman, both of Manchester.

Lewis A. Myers, and Edna B. Barber, both of Finksburg. Vincent S. Biggus, of Taneytown, and Myrtle L. Biggus, of Union Bridge, both colored.

The Emmitsburg Chronicle says the reason why some papers keep on at a \$1.00 subscription price, is "because their list is big, and quantity counts." Only partly true, Brother Sugars. Quantity helps, but the main reason why \$1.00 papers don't advance, is because they don't have sense enough to

HOWLING SUCCESS OF THE BIG VICTORY FAIR.

A Clean, Modern and Intensely Interesting Occasion.

Under conditions the most favorable the 23rd. Annual Carroll County Fair opened Tuesday of this week at Grove, near Taneytown. Weeks ahead—the management of the Victory Fair were busy with their tireless formulating of plans to make the occasion both enjoyable and profitable to its many patrons. Nothing was neglected that might raise this year's affair to a very high standard of excellence along all lines properly constituting a monster meeting. Premium lists were early scattered broadcast in a supreme effort to stimulate stock and poultry, home and farm exhibits to the high water mark. The newspapers of three counties kept their readers informed of the purposes and plans of the Carroll County Agricultural and Fair Association both by unique advertisements and breezy "write ups." Window and Window and pole cards, posters and dodgers into Enforce Peace, the Maryland Agricultural College, the State Board of Health, the Community War Service Commission, the United States Bureau of Labor, the Public Athletic League of Maryland—all were lined up enthusiastically behind the four days of institutes, furnishing their best speakers, experts, specialists, officers to contribute in the making of a program unique in conception, practical in subjects, broad in vision, deep in thought, wide in scope, high in excellence, notable in character, educational in theme, informational in treatment, inspirational in

appeal, splendid in spirit. Amusements, though very difficult to obtain, were secured to make of the midway a merriment lane of laughs and jollification.

Daily demonstrations with farm tractors and labor-saving appliances added interest to the practical plans promised all patrons.

Everything was done for the convenience and comfort and pleasure of the guests of the Fair that any fairminded seeker for such things might with anything like reasonableness expect. Sanitary precautions under health officer supervision were taken with unusual care.

Home demonstration and extension service tents of ample proportions, and suitably placed with reference to easy accessibility, were provided for the Agricultural College and the U. S. Bureau of Labor. Daily lectures, "quizzes," talks and conferences were placed at the disposal of all-who were interested in the feeding and care of children, the feeding and care of the sick, home conveniences, soil, stock and grain problems. Specialists of state and national note were present to make these daily features mat-ters of actual help to all who came to Newspaper offices especially like hear and see and ask. Modern methods of meeting and solving the great questions of all home and farm activities were viewed from every possible angle and none needed to go back to life's labors dissatisfied or unhelp-

> The cattle exhibit was far superior to that of any previous year and was the equal of any shown at all of the

> neighboring fairs.
>
> Tuesday was "Welcome Home Day" and fulfilled to the letter all promises made, catering to those who enjoy and appreciate a really highclass

Senator Wade H. D. Warfield presided most acceptably and added much to the splendid spirit of the opening session. Briefly and in happy vein, he was introduced by Rev. Seth Russell Downie, Publicity Promoter and Director of each day's At the close of an extended Band concert, teeming with rapturous airs that expelled all cares, Captain Charles G. Woolsey, Camp Meade song leader and U.S. A. Organizer for County Singing, was introduced and led a wonderful halfhour of song in his enthusiastic manner. Long will all who helped make this feature a most remarkable event, remember the thrill of those 30 minutes. Mrs. Woolsey sat at the piano and contributed very materially to the great success of the afternoon.

After some intimations of the feast in store throughout the four full days Institute—Rev. D. J. March spoke eloquent "Welcome" to everybody. He stressed the unusual outlook stretching before the farmer in this new age, reminding his hearers that while the farmer had come to be thought better of by the world than in all past ages, the farmer had also come to view himself and his task in a much more exalted light. All this augured well for the world's prosperity and peace.

Dr. Downie said "thank you" on behalf of the Association, stressing the volue of such gatherings, and with characteristic, succinctness and conviction, pictured the lesson of the visible success of the farmer's labor, seen on every hand in fields of golden grain and ladened orchard, to the great wark-a-day world of toiling

humanity. Attorney-General Albert C. Ritchie, Democratic candidate for Governor of Maryland, made an admirable address. He said there were great controversial questions ahead of us needing solution. Just as the war was won through the co-operation of all National forces by means of the stick-together spirit so would it be times. Her solution of the problem with the tangled problems in front of l

us. Exchange of ideas and crystallius. Exchange of ideas and crystallization of sentiment, such as this Vic- ANDREW CARNEGIE CROSSES tory Fair gives opportunity for, is

the work of every community.

The State Road system, proper agricultural aid, reclamation of forest lands, prison reform, proper employment for released prisoners, these are some of the controversial State A Long and Useful Career in Busiquestions facing us. Then there are questions of National import. What are the future obligations of America? Exactly what-no one knows. Yet in any crisis the world of to-morrow will always ask—"What does America think?"

Whatever happens, we must first keep our own house in order. The unrest that shakes Europe must be John Poynton, a private Secretary, were at the bedside when the end came. He was born at Dunfermline, kept from spreading to our country. Profiteering must be speedily put an end to. Not more laws, but a more economical, capable administration of laws existing is the need of the hour. To solve all such questions, demands clear-seeing, sane-thinking and fear-less action. To this end let us remember that our Constitution is the best form of government yet devised. Now that the great war is over, let us get back to the principles of that Constitution which the war has compelled us to disregard and made us To this end ask yourself-Am I doing an honest day's labor for a fair day's wage? Then let us numerable spread the news far and a fair day's wage? Then let us wide. By hard pounding the League cling to the principles of our American government; let us cling to that old American spirit of a hard honest

dav's work. In words glittering with unmistakable earnestness and deep feeling, Senator Warfield spoke of the lads in brown, in whose honor the day was celebrated and whose deeds commemthe New York Independent, and Vice President of the League to Enforce to gather it, was a purpose of the League to Enforce to gather it, was a purpose of the League to Enforce to gather it. his mission and message. Dr. Holt's address was a literary gem, clothed in language so simple and delivered with spirit so captivating and kindly. It was a notably contribution to the really big National messages to the his memory. times. So clearly did he picture the scene at the signing of the Peace Treaty that no detail of that unique and historically exceptional drama was lost by his enraptured listeners. Quietly, but with the force and insistence of a master mind mastering great assemblies, Dr. Holt launched out into a discussion of the great document, analyzing its content bit by bit, driving straight to the heart of everybody, point by point, with exactness, conviction and brevity, the items of great achievement now won, for the first time in history, for the uplift of mankind, the perpetuity of free governments, the demolition of

by a remarkable person.

His tribute, at the close, to President Wilson for the part played at square perches, for \$286. the Peace Conference, and his sober, stinging rebuke to the President's opponents in the Senate, name by name, though Dr. Holt is a staunch Republican, was good to hear. A summary of his address will appear in next

week's Record. Wednesday morning—the gods of lius Hull, 8 acres, rain and wind locked arms to put a perches, for \$450. crushing crimp into the doings of the Woman's Day program, the Child Welfare Conference and the Better Baby Contest. Chilling winds clasped their icy hands about the throats of tree and shrub, shaking them hither and you like a man caught with a fit of oldtime ague. Rain dashed wildly aginst widowpane and on street and The outlook was far from joyprovoking. Spite of all the "sky juice" outpour on soil, society and shrubbery-noon found the weather quieting down and roads rid of the istressing dust.

Though the Baby Contest had to be eliminated for the day—theConference in the Home Demonstration tent and the program at the auditorium went on with little change in the pre-Fair

The Band concert, though shorten-

ed, was thoroughly enjoyed by the good-sized gathered who had come out to make merry and enjoy the outing.
A notable feature of the afternoon at the auditorium was the music rendered by Ed. Nace on the playerpiano, assisted by the sizzling, sensational, smashing, swift, speedster Arno M. Pfaff, Hanover's only Jazz Drummer, with drums, traps and bells. Mr. Pfaff came to the Fair to help Mr. Nace, piano merchant, of Hanover, demonstrate his wares. Mr. Pfaff is a wonder and his performance furnished his hearers every thrill in the gamut of a glad, gleeful, glorious, gigantic holiday. Dr. Downie introduced Miss Venia

Kellar, State Home Demonstration Agent, who presided with characteristic grace and efficiency. In her opening remarks she spoke of the home as the centre of all life and said the function of the department she represented was helath promotion and the betterment of the home-the halfway house between heaven and earth The heavenside must be made ideal, the earthside practical.

Miss Ola Day, Distrcit Agent of the seven Western Maryland counties, connected with the Extension Service of our State Agricultural College, spoke on "The Challenge of the 20th Century to the Home." It was a truly fine address, replete with telling ilustration, superb word pictures practical solution and good commonsense. Her tribute to the mothers was worthy of the occasion and the

THE GREAT DIVIDE.

ness and Philanthropy Ends.

Andrew Carnegie, the world's greatest philanthropist, died on Monday, at his summer home, at Lenox, Mass., after an illness of only a few days, aged 84 years. Mrs. Carnegie and a little homelet in Scotland, and with his family emigrated to the United States, and settled in Alleghany, Pa., in 1848.

One of the latest and greatest ideals was the abolition of war, a hope that he cherished in the face of international conflicts He gave \$10,000,000 toward an International Peace Fund, and built the Peace Palace at The Hague, which was dedicated in 1913. He gave \$750,000 for the Bureau of American Republics at Washington. His love of music moved him to equip hundreds of churches and institutions with pipe organs. He never gave directly any large sum to re-

ligious purposes. Andrew Carnegie began against time, when, in 1901, at the age of sixty-five, he resolved to give away his enoumous fortune. He held it "disgraceful" for a man to keep on gathering idle millions. His was then a fortune of just about a quarter billion dellars.

President of the League to Enforce Peace, author, lecturer and organizer of international note, was then introduced in manner befitting the man, his mission and message. Dr. Holt's money away at the rate of over address was a literary gene clothed \$20,000,000 a year, or more than \$50,000 a day. No man left at his death such an unique and such a scattered series of monuments to perpetuate

A Deserved Tribute.

The retirement of George W. Yeiser from the Presidency of the Carroll County Sunday School Association, and of George Mather from the Secretaryship, after thirteen years of effort, should not be permitted to pass unshould not be permitted to pass unnoticed by the Christian forces of the county. These two men have given all these years of hard work for the development of Sunday School interests and to them belongs the credit for the fact that Carroll county stands at the head of all the counties in the state in the efficiency of its organization. Both are not only devout Christian men, but practicularly well fitted for the positions they have so long and so faithfully filled. They lay aside their labore with enrollment of about 14,000 members in the Sunday Schools of the County, out of a population of 34,000, truly a most remarkable showing. Sunday School workers everywhere will regret that they are to lay aside their responsibilities, but it is not fair to expect them to longer carry the burden, for it has involved many sacrifices on their part. Mingled with this feeling of regret is one of satisfaction because they will continue to give their encouragement and the value of their experience to the Association, as they will still be identified with it in other positions. The Association is fortunate in the choice of their successors, Mr. J. Walter Englar, who was chosen to the Presidency, and Mr. C. Edgar Nusbaum to the Secretaryship. These men are abundantly well equipped for their duties and will no doubt hold the organization to its present high standard of efficiency.

The Homecoming Celebration planned for Friday, Aug. 15th., at Thur-mont, has been postponed, because of the epidemic of scarlet fever in the community. It is hoped that it may be held within the next few weeks.

A MILLER ON FLOUR COSTS. Wheat at \$1.26 Would Mean Flour at \$9.05 a Barrel.

Minneapolis, Aug. 7.—In view of statements made in Washington that with the price of wheat remaining at \$2.26 a bushel flour can be bought fairly by the government at \$8 a barrel, allowing for all by products and a fair profit to the millers, James Ford Bell, vice-president of the Washburn-Crosby Company, flour millers, has prepared figures showing that the production —of flour at this price is an impossibility. Figures produced by Mr. Bell show the following costs;

Wheat for milling (four and a half bushels,) \$10.17; manufacturing costs, \$1.20; packing and packages, 60 cents; jobbing and distribution, 75 cents; retailing and handling costs \$1.25; total, \$12.97. Minus the millfeed byproducts, valued at \$1.75, the net cost of a barrel of flour without freight costs would be \$11.22, according to Mr Bell. The cost of flour with freight added would amount to a considerably higher figure per barrel, Mr. Bell points out. The freight on a barrel of flour to New York city is 69 cents. This would make the is 69 cents. This would make the flour there cost \$12.91.

Bakers in Minneapolis, who have been able to make bread to sell at relatively low prices on account of the proximity of the flour mills, assert that it would be difficult to produce a twelve-ounce loaf of bread for five cents, even if the price of flour should be set at \$6 a barrel by the government. They say everything from labor to material has jumped in the last twelve months.

Even though the government might decide to resell grain for \$1 a bushel less than the fixed price, flour would sell in New York for approximately \$9.05 a barrel with wheat at \$1.26 a bushel, according to millers.

Meeting of the Board of Education.

A regular meeting of the Board of Education was called to order in the office of the Board at 10:30 A. M., on Wednesday, August 6th., 1919. All members were present except Commissioner Feeser.

After the reading and approval of the minutes of the previous meeting the regular order of business was taken up.

All bills presented to the Board Palmer and wife, 2 lots, for \$400. were ordered paid as soon as the fund are available.

The appointments of Scholarships were made as follows: Charlotte Hall, 1 year, Jesse D. Smith, Westminster District; W. M. College, 1 year, Wilbur Yingling, Woolery's district; W. M. College, 1 year, Charles Stonesifer, Woolery's district; W. M. College, free governments, the demonstron of organized tyranny, the crushing of hateful war, the chance of the individual to live his life unhindered and vidual to live his life unhindered and look of the individual to live his life unhinde State Normal, Helen Dorsey, Freedom district.

A report was made by Attorney Clemson on Mandamus proceedings instituted against the County Commissioners for the recovery of three bonds and accrued interest withheld Kaulfman Waskins and wife, to by them from the Budgets for the

the coming year showing the scarcity lius Hull, 8 acres, 1 rood and 22 square of teachers throughout the county, and stating his inability to secure J. Cornelius Hull, to Peter Myers, et al., 8 acres, 1 rood and 22 square perches, for \$575. too low to attract candidate from

Attendance Officer Taylor rendered Ross E. Taylor and wife, to James a statistical report on his visit to Elserode, 16 acres, 3 roods and 6 vacant schools, and it was decided by the Board that the coal, at these various schools that would be closed this coming year, should be distributed to other schools some time later in the

The vacancies in the board of trus tees at various schools were filled as follows: Pleasant Valley, Edward Yingling and Edward Hahn; Bearmount, Edward Keefer; Mt. Ventus, Charles Monath; Union St., colored. Luther Woodyard and Elmer Myers; Fairview, George Dorsey; Pleasant Grove, George Bankert and Joseph Brown; Winfield, A. J. Stem; Houcksville, R. P. Buchman, Luther Davidson and C. E. Elseroad.

It was decided that the date for opening the schools should be fixed on Monday, September 15th.

After individual reports of the Commissioners, the Board adjourned

To Returned Sailors, Soldiers and Marines.

In order to preserve a record of the valuable military services of the men and women of Maryland during the war, the historical section of the Council of Defense is preparing a history of the deeds and accomplishments of those who served, and it is necessary that the individual record of every man and woman be gotten so that all names may appear in the book when it is published. As so many of our boys are inclined to be very modest about what they have done, an appeal is hereby made to their mothers, sisters, sweethearts and friends to see to it that each

man's record is promptly sent in. Those having charge of assembling these military records of the Carroll county contingent will mail a questionaire to each man who served in the army or navy from this county. The men are requested to answer the questions and return them to the secretary. Any one who served in any capacity who fails to receive a questionaire is requested to maily his name and address to Miss Nettie Seboure, Westminster.

All articles on this page are either original, or properly credited. This has always been a fixed rule with this Office, and we suggest the adoption of it by our exhapses.

This country needs more of the executive, and not so much of the legislative and judicial, in its Presidents. If we are to have a democratic form of government, "the people" should do the law-making and ruling, through Congress. It will be a relief if we can get back to that standard, with the President largely as an advisory official, and not one who feels it to be incumbent on him to run the whole

Among the queer conditions in this country, is that of workmen continuously boosting up wages on account of the high cost of living, and at the same time investing in the securities of concerns charged with being responsible for the high costs. Recently, about 17,000 employees of a big meet packing concern in Chicago, bought stock in the Company, thereby apparently playing to win at both ends of the game.

Both Democrats and Republicans appear to be without a reasonably sure candidate for the Presidency, next year. There need be no occasion to worry over this, as this country contains some thousands of men with necessary mental and business equipment for the office, even though they may not be prominently before the public eye, in a National way. Any man capable of conducting "big business," and with good judgment in selecting his department heads, can be President enough. We have had too much of the super-President and "big stick" kind.

"Profiteering."

quently misused, than properly used. with the Bolshevist element in labor Every man who asks, and gets, a circles. high price, is far from being a issue clearly, and strongly intimates profiteer. Most of our high prices the dangerous position of unionists. grow out of high costs of production, and it is foolish to say that because a manufactured product is forced up by high wages and expense, that the manufacturer is a profiteer. If this is not fully understandable, then, it is perhaps more understandable to say that everybody is profiteering.

Real profiteers, since the close of the war, are perhaps few in number. | methods of procedure establish bind-War contracts of all sorts, and the tremendous war demands on short notice, gave birth to the real thing; but, since that time, the country has largely been following the pace set by the war methods, and those who have seen others getting big money, have in turn entered the same class, until the whole scheme has become epidemic; and it is difficult to say, now, who is actually "profiteering" unjustifiably, if we consider that what everybody does, who can, is justifiable for one as well as another.

In all probability, some large coneerns in a position to control the markets and prices, are about the only real profiteers. It does not fit, and is not true, for labor, for instance, to charge the cost of living to "profiteering"; nor is it true, in all cases, to charge labor unionists with the same opprobrious feat. Everybody who can, is using force to get more, and still more, for his product, whatever it may be, whether it be labor, or just food. We are all engaged, more or "profiteers" for the purpose of drawing attention away from ourselves, or at least to cover up the fact that we are doing our best not to let the other fellow "put it over on us," withand saving ourselves.

What the country needs is some plan of making prices, both of labor and products, come to a dead standstill. Strikes, based on claimed higha point. Everybody should not be the judge of his own worth, no matstaying still long enough to see what happens.

As long as every fellow does his it is put, the daring threat flaunted | tenants.

the Irishman's plan of "dividing up," getting "our share"; and to our imemploy all of the force we can command. It may seem a radical solution to the present mix-up, but, we believe making it a criminal offense to advance the selling price of anything, or of any service, would be worth trying out. This would mean, first, establishing the right price, and then we might be going again. But, we believe the idea is workable, at least in part. We must have stopping points, to stop "profiteering."

Let Us Get It Straight.

The Baltimore Sun, of Saturday, crowded as much hard logic and exact truth into a short editorial, as it is possible to get, in the following:

"The railroad men demand a reduction in the high cost of living. In the same breath they demand nearly a billion-dollar increase annually their wages, and an increase in rail-Also at the same time road rates. they are striking to enforce the wage demand, tying up or crippling trans-portation, shutting down coal mines and other industries, and preventing the shipment of foodstuffs as well as of all other commodities. How can the Government reduce the cost of living when the railroad men are doing precisely the things that must in-evitably increase it? Who is actually raising the price of living at this crisis? We are actually in league with the profiteers? How much sincerity is there in the demand for lower prices when those who demand them are doing their best to boost them higher ?

If the railroad people do not call back their strikers and agree to make their wage increase dependent on the success of the Government's efforts to reduce prices, they will class themselves with the profiteers, with the people who make forced levies on helpless consumers."

The public is not deceived by the average union demand for more wages, in order to meet increased living costs. The demands are barefaced held-ups, backed by threats of force, and clearly accentuate the fact that this country must soon announce its policy, through Congresswhether this Nation is to be ruled by organized force, or by representative democracy. Perhaps the situation will result in a battle with ballots, with organized labor on one side and the rest of the voters on the other, causing the breaking up of old party lines for the time being.

We are not likely to have to use bullets, instead of ballots, in this country, as our labor is not dangerously impregnated with bloody murder, as a weapon, as is the case in some of the European countries. The bulk of union membership, we believe, means to be orderly, and, should the The word is perhaps more fre- necessity arise, would not align itself The Sun editorial states the

Let Us Resist.

There is a great deal to think about in one Senator's assertion that the demand of the Railway Brotherhood constitutes a deliberate treason to the United States. There is a great deal in the way things are done, as ing precedents just as surely as official results.

Regardless of the propriety of the taking over of the railroads by the government in the manner suggested by the Brotherhood, the clear issue is raised whether or not the American people in government establishment can afford to permit any clique or segment of citizenship to deliberately threaten them with industrial chaos and nation-wide suffering if their preemptory demands are not granted forthwith.

It is useless for the American people, individually and in conference, to attempt to dodge the fact that some such departure from the old order of things (as the proposition made by the Brotherhood) is not in line for realization sooner or later. No one is satisfied with present conditions and no one will ever be; some radical remedy must soon be tried, but the fact remains that the very sovereignty of our people is bluntly poo-hooed at by the Railway Brotherhood by the manless, in calling everybody else ner in which they advance their demands. The first thing for the people of this country to do is to secure and safeguard an orderly society and surround it with such bulwarks of pro- to Mesopotamia that much if not the tection that it will ever be impossible out our getting back, as best we can, for any such threat to be made by any crowd of hold-up artists with any tion of the war was to a great extent assurance of success.

As a partial or probable remedy able for the country's peaceful internfor existing dissatisfaction we confess that we are not ready to oppose the er costs of living, are apt to be based | railway men's proposition in the abon fallacies-mere argument-to gain | stract, as it certainly appears in some | measure in harmony with the sugges- | homes, each with from 13 to 17 rooms, tion of President Wilson on the co- numerous baths and all the modern ter what he does. own leveling up, there will be no fair in the faces of the entire American level. We will simply be pursuing people by a well-organized clique of self-seeking citizens is a challenge every time we imagine we are not that the people cannot afford to ignore if we are to preserve law, order and agination in this direction, we will stability of our society against any ruthless array of brigandage that happens to have a good organization. Organization never changed highway robbery into financiering, and if the American people are year in and year out to submit to one depredation after another in the fool's happiness of immediate expediency, this country will soon be in all the throes of revolutions and counter-revolutions by opposing bands of industrials and capitalists until Russia and Mexico will be compelled to hang their heads in | the animals would not be surprising." shame as beginners and novices in a field that heretofore they have claimed to be supreme.

It is the duty of the American people to resist the pre-emptory demands of the railroad men to the utmost, temporary inconvenience, loss and even suffering come as it may .--Ellicott City Times.

A Great Remedy.

The merits of Chamberlain's Colic and Diarrhoea Remedy are well known and appreciated, but there is occasionally a man who had no acquaintance with them and should read the following by F. H. Dear, a hotel man at Dupuyer, Mont. "Four years ago I used Chamberlain's Colic and Diarrhoea Remedy with such wonderful results that I have since recommended it to my friends." —Advertisement

Getting Rid of Easy Money.

One answer to the high cost of living problem is that people are holding their money too cheaply. Thousands of Americans who never were more than a dozen paces from the breadline are today owners of Liberty Bonds or some other form of securities, and they have never learned the lessons which Ben Franklin sought to teach a growing nation. Some of the people are spending their Liberty Bonds. Their savings in these securities represent money that came comparatively easy, that is to say, the holdings were accumulated in small weekly or monthly payments-money that was hardly missed from the pay envelope.

The people are spending as furiousy as they fought and worked in war times. They are on a spending 'jag," so to speak, not only in this country where the fruits of victory seem to make spending a necessary part of the peace program, but in the rest of the world, not even omitting the countries of the Entente. The money of the times is apparently very cheap, it seems to come easily and to go easily, but this condition can't last

When spenders are free and easy, prices go up with equal ease. Those who hold their "easy" money too cheaply make hard buying for those who must part sparingly with their limited funds and, and, by the same token, those who demand luxuries without accounting the cost may expect to pay more for necessaries. The trouble is not so much the high cost of living, but the cost of highliving.

Some one remarked very sagely that if all the wealth of the rich were equally distributed among those who have little or nothing, the rich would soon have it back again, and the other class would be in the same position as before the division was made. This is the natural consequence because the rich, or the great proportion of that class, learned to accumulate wealth by habits of savings and would no doubt recognize the necessity of saving more quickly than the class that had never been accustomed to it. -War Loan Organization.

An Old Fault Finder.

An irritable and fault-finding disposition is often caused by indiges-tion. A man with good digestion and bowels that act regularly is usually good natured. When troubled with indigestion or constipation, take Chamberlain's Tablets. They strengthen the stomach and enable it to perform its functions naturally. also cause a gentle movement of the

How "Flu" Destroys Game. Governor Riggs of Alaska says that all the Eskimos round Nome City are dead of the "flu." Why? And is it to be true that even the wild game is

to suffer? A dispatch of January 6,

from Big River, Saskatchewan, says: "Hunters returning from the wild egions in northern Saskatchewan report that influenza is decimating big game, and that for some time smaller animals in the district have shown marked symptoms of the disease. Investigation has disclosed diseased lungs among moose that became exhausted quickly when pursued. After investigating conditions around Pelican Lake and Witchikan Lake, in the biggame country, Doctor Nichols of Dedben reported that heavy losses among

How Music Affects Cows.

Phonograph music, occasionally supplanted by orchestra music, has become a regular milking-time feature in the dairy barn on a large stock farm in Ohio. Commercial, rather than artistic, reasons have prompted the introauction of this feature, it having been found after repeated tests that the yield of the cows is greater when milked to the tune of some soft, melodious selection. On several occasions an orchestra has played for the cows with the same result, namely, an increase over the previous normal yield of milk.

How Scrap Iron Is Recovered. Magnetic separators are now being used for the recovery of scrap iron from many kinds of waste material and rubbish. By the aid of such apparatus a great deal of refuse commonly discarded in the neighborhood of steel and iron works can be made to yield a considerable amount of iron -as much as 50 per cent, being obtained from refuse from steel works in some cases. Cupola furnace slag is said to give 5 to 15 per cent, and ordi-

How Big Logs Were Handled.

In one of the great Virginia walnut groves where thousands of feet of lumber have been felled to meet government requirements, a ton-and-ahalf truck was continuously in service hauling the logs out of the woods over rough mountain roads to the mills. To facilitate the work of loading the heavy logs on the truck, the owner devised a novel contrivance that proved highly efficient.

By attaching a bracket to the propeller shaft, on which he fastened an ordinary log chain, it was only necessary to jack up the rear end and shift into low gear to hustle the logs aboard. Winding the chain around the shaft, which with the bracket made a very serviceable pulley, rolled the logs off the skids and on to the truck quickly and with little effort.

Naturally this method of loading put a tremendous strain directly upon the propeller shaft, but, according to the owner, without in the least damaging the truck or causing any mechanical trouble whatever.

Why Ostrich Raisers Are Anxious. Since the slump in the ostrich feather market occurred in 1914, schemes have been devised in this country to minimize the losses to ostrich farmers, many of whom had no other capital than their flocks of these giant birds. The eggs of the ostrich have long been a staple product on the market of Port Elizabeth and other ostrich centers, and have been mixed with hens' eggs by bakers in the manufacture of cakes and pastry. Lately two sealed cans, each containing 20 ostrich eggs in liquid form, have been shipped to London as an experiment. The results are awaited with interest. In large quantities, ostrich eggs packed are quoted at Port Elizabeth as 14 to 18 cents each. One of these eggs weighs between two and three pounds, and is equivalent to about two dozen

Why Some Never Reach the Top. "There are very few who ever rise to the top anywhere." Rabbi Leo M. Franklin said that to the members of the Open Forum recently, whereupon, someone demanded, "What is the top

and what is the bottom?" "The top is the place where the man does an honest day's work for an honest day's pay," said Rabbi Franklin, "and through which honest day's work he realizes the best in himself and at the same time adds something to the sum in the meaning of life. The bottom is the place where the man does the least he can with the most thought of himself and least thought of somebody else."

Why Pigeons Are Useful in War. Besieged Paris, as somebody has pointed out, taught Bismarck the value of homing pigeons in war, when some 800 pigeons were sent in balloons to Tours and provided communication between the two cities. After the peace,

Bismarck established pigeon lofts in every fortress and in many of the cities of Germany. Other European nations, although less thoroughly, followed the example, but it was only about a year ago that the United States naval air service instituted 14 lofts in different parts of the country, with a total of about 8,000 pigeons in training for war service.

HESSON'S DEPARTMENT STORE

Dress Ginghams

A beautiful assortment of good quality Plaid, Striped and Plain Colored Ginghams, suitable for House or School Dresses. These Ginghams have been bought right, and we offer them at the same very reasonable prices—much lower than they are being sold at in other places. Don't wait too long before making your purchases in this Department, for we believe we can save you money on Ginghams.

White Dress Goods

A very nice lot of Organdies, Voiles, Poplins, India Linons, Etc., can always be found on display in our store.

Ladies' Waists

Just received a new assortment of very nicely made Waists of the best styles. We have them made in Voile, Georgette, Crepe and Crepe-de-chine, in White, Blue and Flesh Color.

Dress Shirts for Men

We aim to always have this Department well supplied with a nice We aim to always have this Department well supplied with a nice line of well-made, full-cut Shirts, made from Madras, Percale and Silk, in very pretty patterns.

Dress and Work Shoes

For Men, Women and Children. We have the up-to-date Dress Shoes, in the very best styles, and in the latest colors, at moderate prices. Our Shoes are made by very reliable manufacturers, which means a saving to you when you purchase your Shoes from us. We means a saving to you when you purchase your Shoes from us. CONCRETE-LINED FARM RESERVOIR

Precaution Should Be Taken to Prevent Injury by Frost and Settlement.

COBBLESTONES MADE USE OF

To Safeguard Structure It Is Recommended That Completed Earthwork Be Thoroughly Soaked Before Lining Is Laid.

(From the United States Department of

If durable water reservoirs are desired, they may be lined with concrete or built of cobblestones. In form, the concrete-lined type may be either rectangular or circular. A circular reservoir lined with concrete, having a diameter of 134 feet at the bottom, a depth of 8 feet, and a capacity of 2 acre-feet, or 651,658 United States gallons, is somewhat similar in design to one built under the supervision of the office of public roads and rural engineering at Fort Collins, Colo. Precautions are necessary, in order to prevent damage by settlement and frost. If the reservoir is formed partly in excavation and partly in fill, it is difficult to treat each class of material in such a way that both will be equally stable and impervious. If the material in the fill, for instance, settles more than the natural earth, the concrete lining is apt to be ruptured along the division line. Not only uneven settlement in different parts of the earth embankment, but settlement in any one part tends to rupture or otherwise dam age concrete lining.

Concrete for Lining.

A concrete suitable for lining should contain an ample percentage of good cement in order to make it water-A mixture of 1 part by volume of cement, 2 parts of sand and 4 parts of gravel or broken rock is recommended. A measured volume of sand is dumped on the mixing platform, half as much cement is added to it and both ingredients are mixed dry until the mixture is of one color. It is then moistened and worked into a soft mortar, and the rock or gravel, having been previously moistened, is added. The mortar and rock or gravel then are turned over with shovels at least twice or until the entire mass is thoroughly mixed. The concrete should be sufficiently moist at this stage so that when shoveled into a wheelbarrow or other means of con-

Construction of Cobblestone Masonry

veyance it will assume a water-level on top. At the same time it should not be so wet as to flow readily.

The thickness of the lining needed depends upon the severity of the climate, the care and skill used in preparing the foundation, the character of the concrete and other factors.

Reservoirs Built of Cobblestones.

Many small reservoirs have been built in southern California to store water pumped from wells over night for use in irrigation the following day. In the Pomona valley, which includes an area of valley land comprising something like 67 square miles, of which about one-third is irrigated, there were in 1912 over 50 of these reservoirs owned and operated by individual orchardists or by small groups of orchardists co-operatively. In the preparation of much of the land for citrus orchards on the benches of this valley large quantities of cobblestones are removed and dumped into ravines or piled up in long rectangular walls. Years ago some one conceived the idea of making use of this rock to give stability to reservoir walls, and out of this conception has been developed a more or less distinct type of farm reservoir. This type consists in the main of a wall of cobblestone masonry laid in cement mortar in which a small amount of lime is incorporated, a concrete floor and an earth embankment around the ex-

From an engineering standpoint the crucial tests of a reservoir may be said to be such features as efficiency, durability, first cost, and maintenance.

VERY IMPORTANT TO FILL SILO PROPERLY

Cut Corn When Kernels Have Passed Milk Stage.

Kceping of Silage Depends Upon Thoroughness With Which It Is Packed -Fine Fodder Is Most Satisfactory.

(Prepared by the United States Department of Agriculture.)

Cat corn for silage when the kernels have passed the milk stage and are beginning to dent. At this period the greatest amount of food material can be obtained and the best quality of silage made.

The cutter should be adjusted to cut the corn in short lengths, with threefourths of an inch as the maximum length. In general, the finer the fodder is cut the more easily and more compactly it can be packed and, in consequence, the better the quality of the silage.

Too much stress cannot be laid upon the necessity of thoroughly packing

Cutting Fodder for Silo.

the fodder in the silo so as to exclude the air as much as possible. It is upon this one thing that the keeping of silage largely depends. A device consisting of a jointed pipe, or some variation of it, attached to the top of the blower pipe is at present in use for distributing the cut corn fodder in the silo. By the use of this distributor it is possible at the same time to scatter the cut corn evenly and at the same time tramp it. Without the use of this device it is necessary to have at least one extra man in the silo to fork the material over so that it is evenly packed. Besides the saving of one man's labor, the distributor does away with the nuisance of having the loose material flying sround, thus annoying the man in the silo, and also lessens the danger of being struck by some foreign object that may have passed through the

Oftentimes the corn fodder is so dry when it is cut that it is neces add water to make up for the deficiency in moisture and provide for the proper packing of the silo. This water is most easily added to the blower when the corn is being cut, and it is also more thoroughly mixed with the cut material in this way.

For the top layer of the silo it is good practice to use heavy green stalks from which the ears have been removed. This forms a heavy layer that packs well and at the same time centains a smaller amount of food material so that the minimum loss is sustained if it spoils. Various metheds and materials have been used for covering the top of the silage to prevent its spoiling. None has given complete satisfaction, but the one mentioned above has given as good results as any, especially when the top layer was thoroughly wet down and racked firmly by tramping. The best practice is to commence feeding as soon as the silo is filled, in which case there will be no loss of silage through

OATS PREFERRED FOR FOWLS

In Nearly All Parts of United States, Under Normal Conditions, Corn Is Cheapest

(Prepared by the United States Depart-

ment of Agriculture.) Under normal conditions corn is, in nearly all parts of the United States, the cheapest poultry feed. But at times like the present oats are to be preferred. When corn is worth \$1.50 a bushel oats should be 75 cents and barley \$1.20 a bushel to give the same value for the money when fed to poultry, as corn.

CHANGING VARIETY OF WHEAT

Should Be Done Only for Purpose of Getting Better Kind for Certain Localities.

(Prepared by the United States Department of Agriculture.)

Changing the kind of wheat grown should be done only for the purpose of getting a proved better variety. It is often desirable to do this, provided it is proved beyond question that the new variety is better for that locality. So-called "new" varieties, extravagantly advertised at fancy prices, should be disregarded completely.

SENATOR WARFIELD IS AGAIN IN THE FIELD

In Cogent Statement to Carroll County Voters He Stands Unreservedly upon his Record and Asks for its Approval.

TO THE VOTERS OF CARROLL COUNTY:-

I hereby announce my candidacy for re-election to the State Senate, subject to the Democratic Primaries.

The people of Carroll County, to whom I am grateful, elected me to the Senate in 1915, pledged to economy and efficiency in the public service and to advocate the abolishing of needless offices and to a business administration of public affairs. How well I discharged the trust then reposed in me, I leave to you, whom I have served, to decide.

As a member of the Finance Committee I did my part in reducing the expenses of the legislative sessions of 1916 and 1918 as compared with the sessions of 1912 and 1914, over one hundred and fifty thousand dollars.

The same committee also approved the Budget System of finance, which system I consider a great safe-guard surrounding the receipts and expenditures of public money.

Our State appropriated, and placed at the disposal of the Council of Defense, two million dollars to meet emergencies arising from the world war and, notwithstanding this fact our State taxes did not advance, which still leads me to believe that under normal conditions our taxes can be reduced.

I believe in encouraging agricultural interests in every possible way. I am in sympathy with the advanced position our State has taken in the building of our highways, in the strengthening of our educational system and other constructional legislation.

I am better prepared from experience to serve you now than before, and I ask your support that I may be returned to the Legislature to complete the work I have started in the interest of our State and County.

Mr. and Mrs. R. B. Ohler and family recently visieed his parents, Mr. and Mrs. Cameron Ohler, of near Emmitsburg.

The Best Physic.

When you want a pleasant physic, try Chamberlain's Tablets. They are easy to take and mild and gentle in They are highly prized by people who have become acquainted with their good qualities. They only cost a quarter. -Advertisement

KEYMAR

Mr. and Mrs. R. W. Galt, accompanied by R. P. Dorsey and family, of Baltimore, motored to Atlantic City, last week. R. P. Dorsey and R. W. Galt returned home Wednesday—the ladies will stay several weeks.

Miss Alice Engle was taken to the Frederick hospital, last week, where she was operated on for appendi-

Miss Lulu Birely left, Thursday, for Atlantic City, where she will spend a fortnight.

Perry Lowman, who has been confined to his bed, is able to be out again.

Carroll Cover and family have returned from a motor trip to Washington county.

Mrs. Marshall Bell visited her sister, Mrs. Ambrose, at Deerfield, last Harry Stonesifer and wife spent

Sunday at Wilbur Otto's.

Miss Stella Tollenburger is visiting her sister, Mrs. Robert Rowland, in Hagerstown.

KUMP.

Visitors, on Sunday, at the home of Mr. and Mrs. Filmore Bowers, were: Mr. and Mrs. William Hankey and sons, Luther and John, and Wesley Kelley, of Getysburg; Mr. and Mrs. Robert Becker and children, Joseph, Viola and Pauline, and Mrs. Clint Lightner and children, Raymond and Ethel, of Hanover; Mr. and Mrs. Paul Myers and sons, Kenneth and Paul, and Mr. and Mrs. Maurice Bowers and daughters, Alice, Margie, Elva and Mary, of Kump; Mrs. Jesse Park-er and children, Ruby and Roswell, of Paso Robles, Cal.

A Traveling Man's Experience. You may learn something from the following by W. H. Ireland, a traveling salesman of Louisville, Ky. "In the summer of 1888 I had a severe attack of cholera morbus. I gave the hotel porter fifty cents and told him to buy me a bottle of Chamberlain's Colic and Diarrhoea Remedy and to take no substitute. I took a double dose of it according to the directions and went to sleep. At 5 o'clock the next morning I was called by my order and took a train for my next stopping place, a well man."

MARRIED

MELODIE-McKINNEY.

Miss Gladys Melodie, of Baltinore, and Mr. Emory McKinney, of Middleburg, were united in marriage, on Friday, August 8th, in Westmin-ster, by Rev. Mr. Day.

Railroads Storing Coal.

Looking ahead to a severe winter, both the Pennsylvania and the Reading railroads are now storing up great quantities of soft coal for use in locomotives. The Pennsylvania will store up 500,000 tons east of Harrisburg and west of Philadelphia, in addition to what it expects to store west of Altoona and Harrisburg.

The Reading is storing anthracite,

but its bituminous hoard will also be very large. By the time cold weather comes it will have veritable mountains of fuel at various convenient places along the main line.

At the same time the Reading system is keeping up its experiments with fuel. The heavy freight engines are the worst consumers of coal, and the experiments have centered with success on the Mallet and other types of large capacity pulling machines. It is stated that there have been instances this summer when an engine has been able to make a run with but one-fifth of the fuel used in the old, wasteful days for the same tonnage and distance, and all of the runs are using less coal now than formerly.

How to Wash Corduroy.

Corduroy is a kind of cotton velvet which may be washed providing it is not rubbed, squeezed, or ironed. If it is made at home stitch the seams with a loose stitch to prevent puckering when washed. Before laundering babies' coats or other lined garments loosen the lining at the bottom to avoid bagging. Use a solution of mild soap, or for dark colors which may streak or fade a solution of soap Souse the garment up and down in a soapy water, changing the water as it becomes soiled. Rinse in several clear waters until no more dirt and soap come out. Hang the garment up dripping wet and so that it will dry in the shape in which it is worn. Dry in the wind if possible. When dry brush brisky to raise the

Facts as to Fires.

It has long been realized that the majority of fires occur in the home -that they are the fruit of household carelessness in one form or another, the most common individual causes varying only according to local conditions. Where electricity is in general use, for example, it is safe to say that electricity and electrical devices will be among the chief causes of fire, and that where there are many houses roofed with wooden shingles it can be predicted that they will constitute one of the principal fire causes

It is nothing but carelessness that permits defective furnaces or flues to continue in disrepair, and it is carelessness that allows the isolated wooden dwelling to remain unpro-tected against lightning when it could be safeguarded by the installation of lightning rods, to mention but two phases of personal laxity.

In the general statistics of fire causes -that have been compiled in the past, all varieties of occupancies have been included in the totals, and these figures have made plain the reasons for most fires. It is possible now, however, for the first time, to present analysis of the number of fires in dwelling houses in a recent year, together with the losses incurred the data having been gathered from the reports of the Actuarial Bureau of the National Board.

These statistics, which include farm properties, show that during 1917 there were 232,021 dwelling house fires with a consequent loss of \$66. 166,420, the number representing 65% of the total number of fires and the loss 28.5% of the whole. figures make it clear that although the heaviest fire losses are the result of the burning of large manufacturing plants and other business properties, the greatest number of fires occur in the home.

August Crop Report Shows Decrease.

Washington, Aug. 8.—The country's corn crop showed a decrease of 27. 052,000 bushels as a result of weather and other conditions during July. The Department of Agriculture in its August forecast announced the crop promised 2,788,378,000, based on conditions existing August 1, compared with a forecast of 2,815,430,000 bushels made early in July.

The spring wheat forecast was for 225,000,000 bushels, as compared with 322,000,000 bushels estimated a month ago. Winter wheat estimate was reduced from 839,000,000 bushels as of July 1 to 715,000,000 bushels on August 1. Thus the total wheat production fell off 221,000,000 bushels, as compared with the July forecast, the being placed at 1,161,000,000 bushels, compared with 940,000,000 bushels on August 1. There was a decrease of 124,000,000 bushels of winter wheat and 97,000,000 bushels of spring

Locating the Poultry House.

In locating a poultry house it is best to select an elevation having a natural drainage away from the building, for damp ground means cold ground. If the house can be built in the lee of a windbreak or a hill, or in front of farm buildings, so much the better. A dry, porous soil, such as sandy or gravely loam, is preferable to a clay soil, for the former is more easily kept in a sanitary condition. If it is impracticable to select a soil that is naturally dry, the soil should be made dry by thorough underdrainage. A purely sandy soil should not be select-

One of the differences between a primary election, and a convention to name candidates, is, that the former settles the contest for the aspirants and passes several thousands in costs to the tax-payers; while the latter settles the contest, and the defeated candidates "lay" for the fellows they think licked 'em, while the tax-payers perhaps get just as good servants, it acquired from its big hotel. without any costs to pay.

Song-Bird Pot Pie.

Robin pot-pie will probably not be popular among the residents of the State of New York, for sometime to come, as the Conservation Commission of New York, through the Federal authorities, have just administered a lesson costing \$500 in the form of a penalty imposed on John Verza, of Marlboro, N. Y., that Robins are not a legal article of food in New York State.

This party was prosecuted by E. P. Nolan, one of the Commission's game protectors. Information was given Mr. Nolan by a farmer who had seen Verza shooting at a flock of Robins. A search was made of his residence, and there were found hidden in a wine vat 83 Robins and 2 Cedar Waxwings. Verza was arrested and placed by Judge Hutchins, under \$1000 bail.

Verza's liability for this violation aggregated \$2000, however, a compromise was agreed to by W. T. Moore, Deputy Attorney-General, who handled the case, and action was dismissed upon Verza's settlement of

Mr. William B. Seabrook, of New York, arrived in Westminster, on Monday, on a short visit to his parents, Mr. and Mrs. W. L. Seabrook. On Tuesday, he received from the French Secretary of War, a distinguished service decoration and medal, awarded by the French War Department.

Twenty-seven hundred airplanes bought by the government from the Curtiss Company during the war for \$20,800,000, recently were sold back to that concern for \$2,720,000, Major General Charles T. Menoher, chief of the army service, testified today before a branch of the House special committee investigating War Department expenditures. Individual buyers were not permitted to purchase any of the planes, he said, because the War Department could not guarantee the safety of the machines.

Social Gathering.

A very pleasant time was spent at the home of Evan T. Smith, near Union Bridge, on Wednesday eve, Aug. 6, the occasion being his 70th birth-Mrs. Smith planned it very successfully, that he should be absent a short time, and it was then that about 75 neighbors and friends gathered at his home. Upon his return, he expressed himself as being agreeably surprised, and seemed to enjoy the evening along with the rest. Later, all were invited to the table, which was heavily laden with cake, candy, ice cream and lemonade. At a late hour all departed for their homes, wishing Mr. Smith many more happy birthdays.

Those present were Mr. and Mrs. John Miller, Mr. and Mrs. William Nusbaum, Mr. and Mrs. Harry Lambert, Mr. and Mrs. Chas Wilson, Mr. and Mrs. Roy Crabbs, Mr. and Mrs. Frank Boone, Mr. and Mrs. Joe Wilson, Mr. and Mrs. Harry Yingling, Mr. and Mrs. Harry Eckard, Mr. and Mrs. Chas. Bowers, Mrs. Shaw, Mrs. Addie Yingling, Mrs. Edw. Yingling, Mrs. Edgar Wolfe, Mrs. Mollie Yingling, Mrs. Edw. Coleman, Mrs. Marcus Wolfe, Mrs. Wm. Jones, Mrs. Minnie Harris, Mrs. Winifred Strawsburg, Mrs. Hannah Smith, Mrs. Daniel Leakins, Mr. Chas. Crabbs; Misses Margaret and Catherine Bowers, Catherine Lambert, Anna Wolfe, Mary O'Dell, Mildred and Hattie Coleman, Annie Miller, Lola Boone, Mary Smith, Mildred Blaxsten, Carrie Mill-Erma Wolfe, Thelma Lambert, Gladys Yingling, Esther Wolfe, Helen Lambert, Helen Yingling, Evelyn Biddinger; Messrs Thornton Yingling, Robert Yingling, Richard Wolfe, Earl Crabbs, Wilson Harris, Evan Smith, Paul Yingling, Lester Nusbaum, Reno Coleman, Donald Lambert, Earl Boone, Malcolm Yingling, Frank Coleman, Harry Buffington, John Yingling, Raymond Yingling, John Eckard, Edgar Wolfe, Ralph Smith and Elmer Wilson; also, Rev. V. K. Lewis and wife, of Uniontown; Mrs. Marcus Wolfe and children, of Washington, and Mrs. Rosa Gilbert, of Linwood, visited at the Smith home, on Wednesday.

Citizens of Alexandria, La., Have Right to Boast of Their Magnificent Caravansary.

Alexandria, La., is known throughout the South as the little town with the big hotel. Strangers always remark the incongruity of the metropolitan edifice apparently fallen by accident into this quiet little place.

It seems that in Alexandria's antehotel days, a wealthy man and his small dog were stopping at the town inn. One day the innkeeper and guest had a lively argument over the dog. Its owner replied that he and his dog would not be among those present at the inn in the future and departed proudly, intimating darkly that the innkeeper would be sorry. He then made good his threat by building a hotel such as Alexandria had never dreamed of seeing, and here dog and master took up their residence and gathered to themselves all the transient trade of the town.

Alexandria wears its hotel proudly, a trifle self-consciously. It is the show place of the town and its assertive stone grandeur commands respect and deference. A town that boasts a hotel inclosing marble halls ending in a grand staircase and a Spanish patio adorned with a fountain as an extra attraction must assume an air of dignity in keeping with its importance.

Alexandria's other claim to notice is the fact that only a few years ago the Louisiana legislature conducted a series of spirited arguments as to the removal of the state capital from Baton Rouge to Alexandria, In the end Alexandria lost out and was forced to console itself with the fame

DELCO-LIGHT NEWS

in Carroll and Howard Counties

The local Delco-Light representative 110-Volt Systems, and embracing every model, is the only independent well water. electric Farm Lighting Plant that is so constructed as to have the approval stamp of that Board.

Wm. Numsen Son, Inc., Canners, located at Asbestos, after using a certain make of independent electric lighting plant, are replacing it with one of the Delco-Light heavy models. It will be in operation in 10 days. They express their troubles with the former plant as lack of service.

The John Robinson's "10" Big Shows, which paid our county a visit last week, had its entire train lighted by a score of Delco-Light plants. The manager, Mr. Jerry Muggins, re-marked to the local dealer, that they had tried almost everything that could generate electricity, but that they found that something only when they made their purchase of Delco-Light.

Mr. Denton Leister lost but little in making his purchase. Yes, Mr. time in purchasing Delco-Light Mercer, Delco-Light will put water when he learned that it could pump on the roof of anything you may water, operate the washer, turn the erect. grindstone, do the ironing, light his buildings, etc., with a gallon or two of coaloil, per week. Mr. Leister, you will soon have joined in with a family of 80,000 happy farm-users of

Mullinix, Leatherwood & Weller, Light and Water will serve you, long after buying a plant constructed something of a pattern of Delco-Light, decided to buy the real thing, rather than a sample copy. Their new store building, at Woodbine, will soon be lighted by Delco-Light.

Mr. Chas. Maus, while having under consideration the erection of a con-crete tank on a hill, chanced to hear of the Delco-Light way of directfrom-the-well water. He thinks that to one of the local Delco-Light Dealwill be an advantage over running er's offices, recently, and wanted a 10the water through expensive pipes to year guarantee on his storage bat-get warm and stale in a warming tery. He was informed that the battank on a hill.

The Domestic Engineering Co., the builders of Delco-Light, are improving and enlarging their present facilities to accommodate 100% more farm electrical appliances than they are able to take care of at present.

Mr. E. O. Davidson, Green Mount, is having Delco-Light and Deco-direct-from-the-well water installed. direct-from-the-well water installed. needless to say he no longer doubted He has watched the service of his the sincerity of the dealer's arguneighbor for two years, and now he ment, that selling on a strong guarfeels satisfied that it is the proper

We have been challenged to prove that Delco-Light is the only electric farm lighting plant that has the approval of the National Board of Fire Underwriters. A GOOD INVESTMENT— Use the RECORD'S Columns

(Continued from First Page.) she handled was co-operation—the taking of the boy and girl into an active partenership, the finding of a ng out of the vocation and value of

the family task. Miss Elizabeth McCracken, Literary Editor of the U. S. Children's Bureau, Department of Labor, spoke on The Care of Children." Miss Mc-Cracken is the author of a number of books—"The American Child," "How to Teach Children Through Stories, The Women of America,' and an "Anthology of Mother Verse," being of special value to students of child

Her contention was that only the mother can properly care for the child. To delegate the care of our children's health to institutions is neither feasible nor desirable and is actually an impossibility. The Government, the school, the church finds greatest humanitarian calling in getting behind the home and backing up its whole effort in this primary fundamental and noble labor.

Dr. W. C. Stone, State Board of Health officer, took "The Great Causes of Ill Health" as his theme. His address was couched in simple and engaging language and was worthy of a very much larger hearing than that of a local gathering. He specified five direct items as causing bad

1-Children don't breath through the nostrils and don't get enough

2-Teeth aren't properly taken care of and food isn't properly taken care of and food isn't properly masticated.

3—We don't give the children enough water to drink. Here he launched out into an illuminating appeal to the older folks as well-a nost interesting and convincing display of knowledge that went straight to the heart of a great need.

4—Irregularity in sleeping, eating and attending to the calls of nature. The discussion of this phase of his subject dealt with folk of mature age and proved most interesting and enlightening.

In point 5, Dr. Stone touched strongly on the matter of "cutting teeth." He said that many of the ailments in childhood were due to our carelessness along sanitary lines and not to the idea that "the second summer" was the dangerous period in babyhood. The fly came in for a sound swatting here, and outside toilets were handled by the speaker with a keen two-edged sword.

Thursday, Aug. 14, 1919, will long be remembered in the annals of this community. Before 8 o'clock in the morning, the pageant of pleasure-seeking folk "hit the pike" leading Fairward. Estimates vary in matters of crowd counting, yet cold figures show a larger attendance than the biggest record heretofore booked. The weather man certainly handed out his best wares. Room for parking machines gave out long before the time set for the program. It was a really big day in every way. Of course, Governor Harrington's failure to materialize brought keen disappointment, but it didn't halt the victorious doings one iota. There was enough and to spare, something going on all the while, in fact several things at the same time.

A message from Senator Warfield Wishes the statement made that Gov. Harrington had fully expected to be present and speak, and that some expression from His Excellency would shortly be forthcoming, explaining his absence.

troduced by Dr. Downie, presided most pleasing and promptly over the Agricultural Aid Day Institute. All speakers and demonstrators were members of the Agricultural College

Prior to the program hour, there was a much-enjoyed and extended Band concert, followed by the Jazz orchestra, who so greatly delighted Tuesday's groveites.

Demonstrations dealing with farm and fireside problems divided the program into two most practical parts. Part One was devoted to short talks preparatory to the stock and grain judging demonstrations, and a clear and cogent blackboard demonstration on the cost of milk production. The demonstrations in Part Two centred about interests in the home.

Dr. S. S. Buckley's talk on "Ham Curing and Horse Buying," was very informing, even to the timorous tyro. He pled to keep Maryland to the front in the ham and bacon business, and related how last year at the first National Ham Show, in Cedar Rapids, Iowa, Mr. Clark, of Howard Co. Md., won a first prize of \$35 for one ham. Out of 15 prizes, Maryland won 10: viz, 1st through 6th, through 10th, 12th, 13th and 15th. By a very convincing set of proofs, made it clear that sugar curing was by far the best method as over against salt or saltpetre. He warned against the use of much borax to keep out skippers, as it hardens ham worse than the use of either salt or saltpetre. No ham (home-cured) reaches its best qualtiy until ten months old. Ageing has as much to

do with meat as curing. Regarding the purchase of horseflesh, Dr. Buckley went into minute details, giving specific and easy rules for thorough guidance. Dr. Buckley, as a specialist in Animal Industry, conducted a demonstration in horse judging, at the close of the program, in the Fair stables.

The cost of milk production treated by Prof. J. A. Gamble, Specialist in Farm Husbandry, by means of blackboard blackboard computations, mathematically showed his hearers how not more, but better cows is the need of dairymen, demonstrating the fact that the low producing cow makes milk

Prof. F. W. Oldenburg took very little time for his few statements as Specialist in Agronomy, simply urging the superlative timeliness of grain grading and then introduced Harold Anderson, Grain Supervisor in charge of the Baltimore office of Federal Grain Supervision, who dealt entirely with the application of the U. S. Grain Standards' Act. This Grain Standards' Act. act authorizes the Secretary of Agri-culture to investigate the handling

and grading of grain, to establish standards of qualtiy and condition, to license inspectors of grain and to handle appeals and disputes under the real interest and a real income to hold act. The present standard for shelled our children to the worth and work- | corn, wheat and oats is based on information secured from samples taken at every stage of marketing with information secured from an intensive study of the work of a number of inspection departments and the consensus of opinion secured from the grain trade at public hearings.

The establishment of Federal standards has increased the prestige of American grain in European mar-

To secure uniform application of standards, a Board of Review, centrally located at Chicago, interprets standards and functions on all matters pertaining to grain grading. There are 35 supervising districts in the U. S., with offices at all principal markets. This community belongs to District No. 6, with headquarters at Baltimore.

Anyone desiring to learn how a particular sample is graded, must submit that sample to any licensed inspector. The sample must be two quarts in size, of which at least one and one-eighth pints must be inclosed in an airtight container.

In the Extension Service tent, assited by L. M. Carr, U. S. Grain Sampler, Mr. Anderson demonstrated how grains are graded according to Federal Standards, with appliances used uniformly by grain inspectors and supervisors in determining those grades.

To Fred. Fuller, County Demonstration Agent, is due much praise for his untiring zeal in making the Thursday and Friday programs meritorious.

The second part of the afternoon's program consisted of a demonstra-tion on "Helps in Caring for the Sick in the Home," with particular refer-ence to proper bed making. Miss Florence Garner, Public Health Nurse of Frederick, was assisted in this work by Miss Helen Hearne, the new work by Miss Helen Hearne, the Ren Carroll Co. Public Health Nurse, who starts her class work in Home Nurs-ing, Hygiene, Care of the Sick, in Papertown next Wednesday. Miss Taneytown next Wednesday. Miss Hearne spoke briefly of the matter at the request of Miss Rachel Everett, Home Demonstration Agent, this county, who presided over this session with much ease and charm. Miss Everett deserves great credit for her herculean efforts to make great success of the Woman's Day program, the Better Baby contest, and the Child Welfare Conference.

The illustrated talk on "Making the Home Attractive," given by Miss Ola Day, of the Md. Agricultural college, very "attractively" told of the value of color, the selection of wall paper, convents and contains carpets and curtains, the proper placing of old furniture to the best advantage, in order that harmonious, restful, labor-saving rooms may result, together with short cuts easily made in time and money relative to curtains, hangings and pillows in contrast with those ordinarily in use in the average home.

Today's (Friday) athletic events, with addresses on Public Health, by Drs. Burdick and W. C. Stone, ends a truly successful venture to link all hearts more closely to this glorious Nation, the home, our life-work and the public school.

Houses of Presidents.

In connection with the efforts to restore the birthplace of Theodore Roosevelt, at 28 East Twentieth street, New York, it is recalled that an attempt was made several years ago to acquire the old house in which President James Monroe died. The project never got beyond the placing in 1905 of a memorial tablet on the house.

The old house, one of the archaic structures in the city, and much the worse through years of neglect, is on the northwest corner of Lafayette and Prince streets. For years the lower portion was used as a junk shop. It still presents the characteristics of the well-to-do residence during the early part of the last century-three stories high, with dormer windows protruding from the attic. The house was built by Samuel L. Gouverneur, who married one of Monroe's daughters.

The Green-Eyed Monster. Europe's growing jealousy of America is revealing itself more plainly every day. Even France is not immune from the propaganda of the green-eved monster, for Le Matin, one of the largest and most influential of Paris newspapers, has come forward with the assertion that the jazz band idea did not originate in the United States, but that French cats were trained to emit the same kind of discords more than a century ago. We expect to be informed next that the Declaration of Independence was copied from a French almanac, and that Abraham Lincoln's famous Gettysburg oration won second prize at a French high school commencement in the era of Louis XIV.

WELL-FED WHEAT PLANTS RESIST INSECT ATTACK

Mr. V. V. Clark, county agricultural agent of Marshall county, Indiana, has made some extended demonstrations on the use of commercial fertilizer combined with a good seedbed for wheat as a preventative measure against the attack of Hessian fly and joint worm. He considers the use of proper tillage and proper fertilizers the best method available for counteracting the attack of these wheat pests. Mr. Clark says that his observation is that the well-fed plant is more resistant to attacks by both insects and diseases. Mr. Clark recomends ammoniated fertilizers for use on wheat because it is desirable to have ammonia to force the growth of wheat so that it will be better able to withstand winter conditions.

had hoped that after four years of penny

Eight years ago, many Republi-cans urged me to seek the nomination for the office. I declined to do Johns Hopkins Hospital. I became so, and Mr. Theodore F. Brown was delirious in February and was absonot opposed by me in the Primary. lutely unconscious of my surround-the received the Republican nomina-ings, for nearly two months. I did tion, but was defeated by his Demo- not appoint an assistant, either Recratic opponent. Four years ago, I sought the nomination and was op-posed by Mr. Brown, and defeated him in the Primary by a majority of 299. I was elected in November, 1915, by a majority of 1040.

Again, in the present campaign, Mr. Brown is seeking to defeat me for the nomination. This is his privilege, and I have no personal word to speak of him except in the spirit of kindness.

Some of his professed friends, however, are making unfair and untruth-ful criticisms of me personally and fice officially, in order to influence the

LIE NO. 1.

The most serious, unjust, unfair and false charge made against me is best made known by quoting from a letter which I received August 5th, written by a prominent Republican, closely identified with the State Republican organization, a man, who has been a Republican candidate for Congress, who wrote to me as fol-

fairs politically in Carroll at this time, but feel sure that carrying the county four years ago by the majority you did, you certainly would be re-elected, if re-nominated.

"I have heard from some of your warmest admirers that the fight against you is an inner party affair, and that it is largely due to the fact that your assistant, selected by you when you were in ill health and unable to discharge the duties of office, was a Democrat, and should

have been a Republican.

"If this is being said against you, it will be a hard argument to answer, if so, in the Primaries.

"Because I believe you have done your whole duty as State's Attorney, ing fruit in their effort to discredit and because I realize you need it, I hope you may secure the re-nomina-

Very Sincerely Yours,

THE TRUTH:

I had no assistant, "selected by me, when in ill health and unable to discharge the duties of office." For years I had been doing the work of two men, working every week day in my office, and as a Minister of the Gospel, preaching on the Lord's Day. In War Service, I was active in every recruiting drive before the draft; and in Red Cross, Liberty Loan and other drives. Then my burdens were increased by my appointment by President Wilson and Governor Harrington, as Government Appeal Agent and member of Legal Advisory Board in the administration of the Selective Service. Hundreds of young men in

In view of the fact that every the county and their parents and em-State's Attorney in this county, who ployers know how much work I did has desired a second term in office, for them, willingly, cheerfully, and has been re-elected by the people, I without charging any of them a

faithful service it might not have been necessary for me to enter a contest in the Primary for renomination.

All this work brought on a collapse. I was stricken with fever. From Febtest in the Primary for renomination. perately ill, not expected to recover, at my home in Westminster, and in publican or Democrat. Until the lat-ter part of April, I did not know who was discharging the duties of the office of State's Attorney. The Court, as was its duty, appointed a State's Attorney. I am informed that the Court gave consideration to the names of three Attorneys, two Democrats and a Republican, and appointed the man whom it regarded as most efficient and available. He filled the position from the time of his oppointment until August 1, when he resigned and I resumed the duties of my of-

I believe that fair-minded Republicans, when they learn of this unfair, untruthful and unjust attack upon me, should and will take the trouble to go to the Primary on the 8th of Sep-tember, and rebuke such underhanded political methods by giving me their

That I would not do my duty in the prosecution of those who violated the Anti-saloon Law, and that it became "I do not know the condition of afattorneys to prosecute these cases."

THE TRUTH:

I have done my duty in relation to this law, as to all others: Many indictments were found by Grand The Anti-saloon League request ed me to allow it to employ assistant counsel. I consented, provided they would employ two of the best criminal lawyers at the Bar, and suggested Mr. Steele and Mr. Weant. They were employed. Some of Mr. Brown's friends, because he had been a leader in the campaign in the county seeking to put the saloons out of business, asked me as a special favor to allow him to enter his appearance with me. I consented, and now this me before the people for doing the very thing they asked me to do.

A REQUEST.

Without unduly neglecting the duties of my office, I cannot see many of the voters, personally. I am deeply appreciative of the assurances of support which I am receiving from every section of the county, and will be most grateful if the Republicans who read this open letter will take the trouble to go to the Primary, on September 8th, and give me their votes. The experience I have gained during the past four years qualifies me the better to serve the people of the county in the future, and, I pledge myself, if re-elected, to continue faithful in the performance of

Respectfully Yours, WILLIAM L. SEABROOK.

CARROLL RECORD 8-15-3t

The Johns Hopkins University BALTIMORE, MD.

ENTRANCE EXAMINATIONS State Scholarships in Engineering Courses

Entrance Examinations for the Department of Engineering, as well as for the College of Arts and Sciences, will be held in Gilman Hall, Homewood, Monday-Thursday, Sept. 15-18, 1919, beginning at 9 A. M. each day.

Applications for Scholarships in the Department of Engineering, established under the provisions of the Laws of Maryland, Chapter 90, 1912, will now be received. If there is more than one applicant for a particular scholarship, a competitive examination must be taken Friday, Sept. 19, 1919, beginning at 9 A. M. Appointments will be made soon there-

Each Legislative District of Baltimore City and each county of the State, with the exception of Howard, Queen Anne's, and Somerset Counties, will be entitled to one or more scholarships for the year 1919-1920, in addition to those which have already been assigned to resident students. In the three counties mentioned above, all the available scholarships have been awarded.

Under the provisions of the Act of Assembly, the County and City Scholarships in the department of Engineering are awarded only to deserving students whose financial circumstances are such that they are unable to obtain an education in Engineering unless free tuition be granted to them. The scholarships entitle the holder to free tuition, free use of text-books, and exemption from all regular fees. One of the scholarships in each county and each Legislative District of the City carries also the sum of \$200. The expense of attendance for those who do not receive scholarships is not greater than at other Maryland

institutions. Scholarships may be awarded to graduates of Loyola College, St. John's College, Washington College, Western Maryland College, Maryland Agricultural College, Mt. St. Mary's College, Rock Hill College.

One scholarship will be awarded

'At Large.' Applicants should address The Registrar, The Johns Hopkins University for blank forms of application and for catalogues giving information as to examinations, award of scholarships, and courses of instruction. The next session begins Tuesday, Sept. 30, 1919.

PUBLIC SALE

So not alone for the preservation of your sight, but also for the improvement in very superior to the improvemen bored well, one at house with pump house built over it, and can go from pantry to pump house without going out doors, and one at barn with wind pump. Beautiful location, 1 mile from State road, land crops well, or if wanted more land will sell 52 acres adjoining it for sale by

A. C. ECKARD, near Basehoar's Mill, Taneytown, Carroll County, Md.

By DOROTHY DOUGLAS

(Copyright, 1919, by the McClure News paper Syndicate.)

In one back garden little Joy Ransom played at doll house and just over the fence Harold Ainley struggled with tracks and engines.

In the room above and overlooking both gardens Joy's father struggled to finish his novelette that a check might find its way to his front door.

The back room in the other house held Harold's lovely mother, who typed other people's plays and wished with all her heart that she could have an office so that she would earn more money for the maintenance of her loved boy.

"Oh, mumsey, I can't make my switch work-the train won't turn!" wailed Harold from below to his mother, who was endeavoring to end the third act before she must go down to prepare her boy's supper.

Daddy, daddy, I've torn Julia's bestest party dress-and can't fix it," cried a small voice, thereby distracting her author father into hopelessness.

The continued interruptions to his work, the tenderness and pity he felt for his tiny daughter and his most complete disability to help her fatigued him and made him unfit for the work that must be accomplished if the pretty house was to be kept.

He dragged himself from his typewriter and went downstairs and out into the garden where his five-year-old offspring was weeping now with her doll held close in her wee arms.

And next door Helen Ainley had abandoned hope of finishing her typing and had gone out to her small son in a vain effort to help him with his railway system.

The high garden fence hid the small domestic tragedies from each other, but if a birdman had happened to fly overhead most any day in the week he would have seen two large gardens each with a tiny bit of lonesome humanity struggling to make a day happy without anyone to play with. There was not even the smallest of openings in the great fence, nor yet even a broken board through which childish

curiosity might peer. * Had the fence been less perfect a most harmonious pair of lonesome children might have found each other and made the long days short. Also it would have given two distracted parents more opportunity to pursue their fortunes free from an ever-recurring demand on their time.

But one day, because it must always be the male who hunts, young Harold decided that he would like to know what lay on the opposite side of his confining wall. At seven years old a six-foot fence seems a regular Jackin-the-Beanstalk climb. The vines were strong, or seemed so to Harold's venturesome mood.

Mumsey was not looking when he began the ascent; otherwise-well, doubtedly have been different.

Harold gained the top with only minor struggles. His delight at seeing Joy in all her young beauty as a re ward for his climb almost succeeded in sending him headlong into her garden. As it was, he perched himself like a squirrel on a branch and opened shameless conversation with the young lady with her dolls.

Joy made suitable replies and made no effort to conceal the delight his arrival on the fence gave her. She held her doll up for his inspection, only to be told that his railway track was much more fun. Joy only tossed her sunny curls.

Perhaps it was her disdain that unbalanced him, for a second later he thumped down into Joy's garden and lay in a heap among the pink geraniums that bordered the wall.

Joy's shriek of dismay was so terrifying that her daddy flew down the stairs at top speed, scattering the pages of his novelette and leaving his heroine in a scandalous, wholly uncompromising position.

And Harold's mother flung a frantic glance at the two gardens, suspected the worst and barely escaped falling out of her window in an effort to see where her boy lay.

But the author had been so swift to the rescue that before she could withdraw from her window and dash down the stairs he had Harold in his arms. There were no bones broken and a most manly smile crept through the fright that lingered in the small adventurer's eyes.

Mrs. Ainley nearly collapsed over the window ledge in her relief.

"Sound as a bell," Ransom called up when he caught sight of her. In a flash he wondered why he had never before known that his next-door neighbor was a charming mixture of poetic loveliness and earthly reality. Her hair was sunkissed and reddish, her color delicate as hawthorne blooms and her nose had a smear of typewriter ink on it. He hoped that she, too, was not a poor struggling writer.

"How shall I get him back?" she

was calling. "Now that he has found his way ever, may he not play with my daughter? I think they both need companionship." Ransom meantime had got rid of young Harold and was gazing straightway into Harold's mother's

eyes." "Poor little lonesomes," was what she softly answered, "if they don't disturb you I am happy to let him stay." Her eyes were suddenly appealing. "I

am so terribly disqualified as a father," she added; "my boy does so need some one to help him with engines and tracks."

Ransom found himself shaking with sympathy for Harold.

"And my tiny daughter," he told her, "has one tragedy after another with her dolls. Only yesterday she tore what she calls her very bestest dress. Poor little soul, she certainly needs more mothering than I seem able to give her."

Mrs. Ainley's blue eyes were posttively glistening with tears of sympathy for motherless little Joy.

"Still," she suggested, "if they can just play together perhaps they will manage to be more contented."

"I will have to make a small opening in the fence for them," Ransom said; "we don't want them scrambling over the fence.

"Oh! If you only would it would be a splendid way out of the difficulty. Do you think you can saw through those thick boards?"

"I'm sure I can," Ransom said, and decided his next heroine should have reddish hair and that peculiarly magnetic smile which was being wafted to him from the window. He decided also that he must see the smile often if he were to describe it worthily in his novel. "But if the boards are too awfully heavy I may have to remove a couple of them, which would make a gate quite big enough for grownup people to pass through; that is, if I have your consent?"

It was then that Mrs. Ainley chose to blush.

"I suppose it would be much simpler

than sawing them," she said. Ransom thought swiftly. If he could just finish off his story late that night he could work on the gate during the afternoon. The story must be complet ed. He sent another glance up at his neighbor and realized that the gate, too, must be finished-it was essential to his happiness. So long as the fence remained in its present perfect dividing state he would fret, and if he fretted he could not write stories. Something gentle and lovable about his neighbor's personality told him that he was going to have to write many stories. He seemed to sense that a greater income was going to be most necessary soon.

"It really should be done right away," he told her; "the children won't be happy now that they have found each other until they can play together, and I will try to help the boy with his tracks."

"And I will mend the bestest dress,"

said his heroine. Ransom's neck was getting a bit crooked from continued looking up to his neighbor's window, but somehow he knew the outcome was going to be worth getting a stiff neck over. He felt that he must come in for more bodily discomfort after his carpentering efforts. Authors are not built for manual labor.

"Tonight's sun will set on two gardens made into one," he informed her, "and our children will be happy as the day is long."

"Some falls are all for the best," she said laughingly, while her eyes rested with added tenderness on her son.

"The very, very best," Ransom supplemented, while his eyes rested on the mother of her son. And if there was ss in them it could not be seen from so great a distance as the window next door.

However, the gate would be finished

Worked for Centuries,

The fisheries of Ceylon, Madagascar and the Persian gulf, from which the best quality of Oriental pearls come, have been worked for centuries. Fine small pearls are taken there, but no more large ones. The world's hopes of finding large pearls of the best grade are now centered on Australia and the islands of the South seas.

Pearl fishing is an industry of importance on the coasts of Mexico, Central America and the West Indian islands and fresh-water pearls found in the rivers of the United States command good prices.

Why Diamonds Burst.

That diamonds burst is an old idea, which has been variously explained. It has been thought that the stones have been fractured by violent eruptions in the inclosing rocks, by sudden removal of pressure around them, or in the smoky specimens by spontaneous breaking up. Dr. J. R. Sutton concludes that the breaking usually results from the minerals inclosed. These may be garnet, zircon, ilmenite or iron pyrites, and such crystals, under ordinary heating at least, have so much greater expansion than the diamond that they would exert great

Duty. There are persons who love to do everything good but that which their immediate duty requires. There are servants that will serve everyone more cheerfully than their masters; there are men who will distribute money liberally to all except their creditors, and there are wives who will love all mankind better than their husbands. Duty is a familiar word which has little effect upon an ordinary mind; and, as ordinary minds make a vast majority, we have acts of generosity, self-denial and honesty, where smaller pains would constitute greater virtues.-Mrs.

Ants' Remarkable Biting Power. Every one has observed trees that have been hollowed out by ants, and it is apparent that their bitting powers are equal to working in the hardest woods. In tunneling, ants are expert, and authentic cases are known of their tunneling under ditches and streams.

LITTLE USE MADE OF RIVERS

Great Waterways of United States Seem to Visiting Europeans to Be Negrected.

A Chinaman who travels in the United States is certain to remark; "What grand rivers, but how lonely!" By utilizing their rivers 400,000,000 Chinese have managed to get along without railroads, a feat incomprehensible in occidental countries. A visitor from continental Europe would say: "Your rivers of the Mississippi valley are unequaled as a gift of nature. But where is the commerce? Where the permanently deepened channels, united with correspondingly deep canals for heavy freight, like those connecting the Rhine, Danube, Rhone, Loire and others?" Our only answer could be that we have as yet scarcely made a beginning with our splendid streams in the most productive valley on earth, says the St. Louis Globe-Democrat. Yet with remarkable energy, promptness and success we constructed the great canal between the Pacific and Atlantic oceans, paying the entire cost ourselves and opening it on equal terms to all nations. One reason for the backwardness with our majestic rivers and their many navigable tributaries is that we have never taken up the subject with due seriousness and decisive purpose. We have been dismayed when told that the problem involved hundreds of millions in money. But since 1914, including the next fiscal year, congress has appropriated \$47,000,000,000. The word "impossible" should not be reserved for use against a profitable investment like improved waterways.

Necessity knows no law. A vast emergency presented itself that demanded the expenditure of the \$47,-000,000,000 in five years. One of the first problems in the national emergency was transportation. The railroads, of course, were pushed so hard that the government felt compelled to take them in hand. Adequate waterways would have been of enormous advantage, but the big rivers heard little sound save their own dashing.

"We can't afford to improve the rivers," was the old view. The obvious truth is that we can't afford not to improve them.

CHART OF GREAT USEFULNESS

Record Said to Have Saved Many Thousands of Dollars for Big Telegraph Company.

One of the big telegraph companies not long ago completed a chart that shows all the wires used in the land service of the company. There are about 1,000,000 miles of wires in all. Each wire is represented by a line on the chart, and a number, with figures to indicate the material and the gauge. The chart also shows the route of every cut-in, whether it is for operation or for testing. Besides that, the map shows the cross connections between the various wires in each office, and even the office assignments of the various circuits.

The chart covers 70 sheets, each three feet by five. If mounted edge | grabbing was good. to edge it would form one map 27 feet high and 65 feet long. In order to handle the record conveniently, the sheets are mounted in steel frame panels that swing like the leaves of a gigantic book. It is said that this chart is the first single comprehensive record of the material, the size, the position and the purpose of every wire operated by the Western Union Telegraph company. Having such a record has already saved thousands of dollars that might have been spent in construction work had not the chart shown an alternative scheme that was

The Parlor Bolshevik. A parlor bolshevik at a tea in Greenwich village shrilled:

"Our army of occupation is tyrannical and unjust. All the other political parties are permitted to hold meetings and canvass for votes, but the Spartacists are rigorously forbidden to push their cause in any way." "Quite right, too," said Novelist

Theodore Dreiser. "Why?" shrieked the parlor bolshevik. "Why is it right to squelch the Spartacist movement in this manner?" "Because," said Novelist Dreiser, "the Spartacists are putting too much

ruction in reconstruction."

To Boost U. S. Food Products.

The first agricultural trade commissioner to work in foreign lands for the interest of American food producers has been named by the United States department of agriculture. He is Edward A. Foley of San Francisco, Cal., who has been appointed to represent the department's bureau of markets in the United Kingdom. Mr. Foley will investigate conditions in the United Kingdom and study the marketing and distribution of farm products with a view to the development and improvement of foreign trade in American agricultural products.

Economy in lodine. Instead of throwing away the hundreds of gauze and cotton "mops" used in the surgical ward of a great army hospital, they are now treated in an apparatus, shown in Popular Mechanics Magazine, in order to recover the lodine in them. Alcohol evaporates and condenses in the cooled upper tube, then falls back through the mops, carrying the iodine down with it in the bottom of the flask in the form of a

tincture. The mops are saved, too, by

subsequent washing and sterilizing.

Dogs That Bring News From Home to the Lonely Men in Alaska Get Little for Work.

There is a good deal of talk over the meager pay received by mail carriers, but the most poorly paid of Uncle Sam's mail carriers receive far less than the familiar postman, yet never make complaint. They get a pound and a half of dried salmon for a full day's pay.

They are the husky and the Malamute, the native Eskimo and the native Indian dogs in the great Yukon country. Without them the gold-seekers, the fur traders, the shopkeepers and the mission workers in the interior of Alaska (except for the more fortunate ones who live along the lines of the few railroads) would receive no mail from the time the ice forms over the rivers in October until it breaks up Even the most inaccessible of post-

offices receive mail once a month in winter (though only one mail is carried then), and for those in the interior of Alaska the husky and the Malamute are mail carrier and Santa Claus combined. They would be without word from the outside world for eight months every year if it were not for the mail dogs.

These animals are pushed to their utmost by considerate and cruel driver alike, for there is a prescribed task for them every day, and all they got out of it is a pound and a half of dried salmon at the end of the day.

When they are not working their allowance of fish is cut down. In the summer they are fed on the refuse of fresh salmon at the fishing dumps, where the mail contractor boards them out until the rivers freeze again.

IMPORTANT PART OF BUILDING

Ceremonies More or Less Elaborate Generally Accompany Laying of Cornerstone.

The United States government puts up public buildings all over the country, and a cornerstone is customarily laid. But there is no hole in the latter unless it be requested by the local authorities, or a Masonic body desires to conduct a ceremony.

The Masons take a special interest in cornerstones. On such an occasion they appear in full regalia, and a copper box is used to hold the articles interred. The box is soldered up and placed inside the cornerstone, which is then sealed with cement.

In Europe it is a part of the business of monarchs to lay cornerstones. In this country the services of a president are always in demand for the purpose, if obtainable. On a conspicuous corner in Washington is a cornerstone laid by Mr. Taft when he was president. It was meant for a church that remains yet unbuilt.

Colonel Roosevelt, when president, laid the cornerstone of the Masonic temple in Washington. Oddly enough it was 30 feet in the air at the time of the ceremony, upheld by timbers, the ground beneath it having been dug away to that depth. But it was necessary to grab the president while the

Feeding Pigs by Machinery.

A hogmeter is not a motor-hog; it is a pig self-feeder. Two of these ingenious inventions have been tried by the Western Australian minister for agriculture on his farm, with eminently satisfactory results.

The machine is a combination of a hopper, a grinder, and a delivery platform, which has ten divisions. ground wheat is equally distributed by delivery chutes. The snouting instinct of the pig has been requisitioned to supply the motive power, the divisions on the platform being so arranged that the animal, in trying to snout it out of the way for more feed, forces the platform round, thus grinding for itself more wheat, which falls in the next and succeeding divisions, and so on.

Ten pigs can fed at the same time. There is no waste. The pig does not crush more than he can eat, and he cannot possibly eat more than he

Buried Treasures in Arizona.

What is believed to be the first clue to the reputed buried treasures of the padres of the Tumacacori mission, built by the Spanish Jesuits high up in the Tumacacori mountains, less than three hours' journey from Tucson, Ariz., has been discovered by Frank Pinckley, custodian of the ruins. It is the gateway to the mission cemetery. From this gateway, it is said, the plans and maps left by the padres start to outline the way to the buried gold and

The Tumacacori mission was built near what are believed to be the ruins of one of the Seven Cities of Cibola. The center region is said to show evidences of rich mineral deposits, which, declare those who have inspected the mountains, doubtless led the padres to build their mission there.

Still, It's Well to Try. What is said to be the record for re-

suscitation from drowning was accomplished by United States life-savers after the victim had been submerged for six minutes. Among a great many persons the erroneous belief exists that persons can be resuscitated after having been in the water a great length of time. Cases have been known where resuscitation methods were used for hours after the drowned persons had been under water for a half-hour, or even longer. Thus it will be seen that drowning is a quick death and the hazard of the water correspondingly great.—Exchange.

POORLY PAID MAIL CARRIERS | ALPS HAD THEIR REVENGE | J. S. MYERS

Famous Airman Who Had Defied Great Mountains at Last Meets His Death There.

Few of the men who have given their lives to the air have met a more impressive end than the handsome, golden-haired young Captain Natale Palli. He was the favorite pilot during the war of Maj. Gabriel d'Annunzio, the Italian poet who became one of the greatest airmen.

Palli evidently had motor trouble when right over the Alps. With extraordinary skill he landed his machine on a glacier 9,000 feet high. Getting out of it unhurt, he started to climb down the mountain side. A snowstorm soon set in around him, but on he plodded through the floundering drifts towards the little village of Bourg St. Moritz, in the valley below. For a whole day at least he stumbled forward, without food and pierced by the bitter cold.

Then, when he was 200 yards from mountain hut, and within sight of the Alpine village, his strength gave out and he sank down into the snow. His courage urged him to another effort; the snow was found with the marks of his struggles to rise again. But he could do no more, and there, two days later, a passing peasant found the gallant young Italian pilot lying with his head on his arm as if asleep, half-covered by the snow, and without a bruise on his body.

So did the Alps which he had conquered revenge themselves upon Natale. Palli, who had escaped death in 140 raids over the enemy lines in war.

EASY TO IMPROVE MEMORY

Whole Secret Is to Concentrate the Mind Entirely on the One Thing in Hand.

People of poor memory are generally inattentive and fail to concentrate. Systems like Pelmanism help to good memory in that they focus the mind on the thing at hand. Dreamers read, and for the life of them cannot tell what the last sentence was, unless it was something in which they were vividly interested waking them out of their dream, and then it is fixed for good, thus showing that memory is conditioned on attention and concentration. To cure this requires heroic treatment. Make it a religious resolve to attend only to the thing in hand. If it is reading, concentrate on the book so thoroughly that every sentence takes clearly defined meaning in the mind. One cannot think of something else and at the same time understand and remember what he is reading. The trick in the game of memory is to overcome dreaming, abstraction, inattention. It can be done by persistent, patient, long-continued effort.

Getting Acquainted With America. The United States has been getting the greatest advertising during the last two years that any nation has ever received, and the results of this should be reaped in foreign trade, just as any merchant obtained custom from an advertising campaign.

Since the beginning of the war there has been a steady stream of foreign missions on tour in the United States, headed by men of prominence in their respective countries. They have visited the shipyards, the steel mills, the camps and the industrial cities, and they have seen the miles of fertile farm lands and gained a new conception of the vastness of America and its ability to put over big things on a big scale. A convention of the League of Nations in Washington will add still more to this world knowledge of America's resources. The chief thing now to be sought is the holding of the advantage gained.—Ferbes Magazine.

Big Brother Movement.

The "Big Brother" movement was started in 1904, by Ernest K. Coulter, in New York city. Since that time the work has been taken up in over 100 cities. There is a staff of paid workers, supplemented by volunteerslawyers, physicians, merchants, etc. The object is to obtain the cause of the boy's troubles-whether It be truancy, stealing, lying, running away from home, etc. Then with the cooperation of parents, through the medium of the "Big Brothers," an effort is made to build up within the boy a sense of honor and good citizenship. The headquarters are at 200 Fifth avenue, New York city.

Discharging a Cook.

One result of the bolshevist law that persons who are employed cannot be removed arbitrarily is instanced by the Bulletin Russe, published by the League for the Regeneration of Russia at Lausanne, Switzerland. It declares that at Smolensk a bachelor had a cook whom he wished to discharge. She refused to leave her place and he was unable to turn her out. On the advice of a bolshevist friend the bachelor married his cook and immediately afterward divorced her. As a divorced woman she was legally compelled to leave the prem-

Prevalency of Deafness.

The last census showed that there are in the United States 89,287 persons who are totally deaf. Dr. Wendell C. Phillips of New York told the Philadelphia College of Physicians recently that in New York city there are at least 100,000 persons more or less incapacitated as a result of partial deafness, and of these probably 80 per cent are of the working class.

LESSON FOR AUGUST 17

CHRISTIAN MISSIONS.

LESSON TEXTS—Acts 1:8; 13:1; 14:28. GOLDEN TEXT—Go ye into all the world and preach the Gospel to every creature.—Mark 16:15.

ADDITIONAL MATERIAL—Matthew 28:18-20; Luke 24:45-58; Acts 26:12-20. PRIMARY TOPIC—Helping everybody to know Jesus

JUNIOR TOPIC-The whole world needs INTERMEDIATE TOPIC-Taking the gospel to the whole world. SENIOR AND ADULT TOPIC-Chris-

The Obligation of Missions (Mark 16:15).

God saves men for a purpose. That purpose is to be laborers together with him in the salvation of others. Christ's parting message, yea, his final commission to the disciples was, "Go, preach the Gospel to every creature." This obligation still rests upon the church. Since the command is to preach the Gospel to every creature, this obligation will obtain as long at there is one unreached soul.

II. The Power of Missions (Acts

This power is the supernatural inducement of the Holy Spirit. Missionary endeavor without the Holy Spirit is doomed to failure. Power to witness for Christ is the purpose of the gift of the Spirit. Success will crown the efforts of those who go forth under the leadership and power of the Holy Spirit. The Spirit was not given primarily to make Christians happy, but to make them strong to carry the Gospel to the heathen. However, those who go forth in this blessed service in the Spirit's power are truly happy.

III. The Scope of Missionary Endeavor (Acts 1:8).

The disciples were to begin their witnessing where they were when the Holy Spirit fell upon them-Jerusalem. But they were to go out from there to the "uttermost parts of the earth." This is the program for every disciple of Christ. Begin witnessing where Christ saves you, and then go to your neighbors next to you, and on to the remotest bounds of the earth. There is no such thing as "home missions," except that you begin at home. IV. The First Foreign Missionaries (13:1-14; 28).

1. Who they were (13:2). Barnabas and Saul were selected-the very best two men in the church. The evangelization of the world is a task of such tremendous importance that it challenges the church to offer her best men and women. Since an institution is judged by its representatives, it becomes the church to put her most capable men to the front.

2. By whom sent (13:2, 4). The Holy Spirit chose these men an them forth to their work. The church at Antioch seemed to have deliberately planned this missionary enterprise. It was after prayer and fasting that the Spirit ordered the church to send forth these missionaries. It should be the business of the church to constantly seek the mind of God relative to sending forth laborers into the Lord's vineyard. The Spirit calls and sends men forth, but he does this through the church.

3. Some experiences of the first for elgn missionaries:

(1) Withstood by Elymas the sorcerer (13:6-12). Elymas moved by the devil, sought to turn the mind of Sergius Paulus from the faith, thus barring the Gospel as it enters upon its widest mission of salvation. The most villainous act which one can commit is to turn a soul from the Gospel. (2). Worshiped as gods (14:8-18). (a) The oecasion (vv. 8-10). God accompanied the testimony of these missionaries by. his mighty power. He wrought a miracle through Paul. At his call the inveterate cripple-one who had never walked-leaped up and walked. The cure was instant. (b) The method (vv. 11-13). They called Barnabas, Jupiter, and Paul, Mercury, because he was the chief speaker. They declared that the gods had come down in the likeness of men, and they brought oxen and garlands to offer sacrifice. (c) Their efforts foiled (vv. 14-18). 1. The missionaries rent their clothes and ran in among the people, saying they were not divine but beings of like passions with themselves. 2. They urged the people to turn to God. 3. Paul stoned (vv. 19-22). Stirred up by wicked Jews from Antioch and Iconium, the rabble who a moment ago were worshiping are filled with satanic hate. Doubtless Paul remembered Stephen's experience. God raised him up and he went forth to discharge his duties as a missionary. Such men of courage are needed today.

Without Loyalty to Christ.

A Christianity without loyalty to the Christ, as its motive and inspiration, may be likened to-well, may we say, our solar system minus the sun.

An Inward Beauty.

There is an inward beauty, life, and loveliness in divine truth, which cannot be known but when it is digested into life and practice.-John Smith.

Take heed of the first stumble, for it is ominous; and at best there is a good step lost.—Benjamin Whichcote.

— THE — CHRISTIAN ENDEAVOR TOPIC

— From --The Christian Workers Magazine, Chicago, Ill.

August 17. How do Men Sell Their Heritage? Genesis 25:27-34.

Esau's birthright involved spiritual blessing as well as material good. His heritage as the first born included the right of preisthood, the exerise of priestly right for himself and others, as well as a double portion of his father's inheritance. This herit-age he despised or lightly esteemed. It should have been prized as more than life itself, but was bartered for a moment's gratification. Esau had no sense of real values. Esau saw only that which he saw. He did not have "the eye of faith." He could not see afar off. The things of the fathers were ignored, the permanent future were ignored, the permanent exchanged for the transient and lasting good, was forfeited for present

The shores of time are strewn with many such wrecks, yet the warnings are unheeded and the work of destruction continues. The character of Satan as "the deceiver" is clearly seen here. As "the god of this world" he hath blinded the minds of them that believe not (2 Cor. 4:4). The glitter and glare of things present obscure the glory of things to come. Satan fishes with the bait of present. gratification. The hook of "selling our heritage" is skillfully covered and hid. The word of God's warning is either unknown or unheeded, and men sell their heritage for "that which is not bread," and "labor for that which satisfieth not."

The spiritual heritage of the Christian believer is in Christ and cannot be sold in the sense in which a natural birthright can.

His boundless welath is mine; All the wealth of free salvation, all

the joy that He can give,
All the gladness of His Presence are
my portions while I live." Nevertheless the riches of the inheritance may remain unapproached and the life be impoverished when it ought to be rich. Such a Scripture passage as Colossians 1:9-14 will show something of the wealth of our spiritual inhertance. This is in addition to the gift of eternal life. "Filled with the knowledge of His will in all wisdom and spiritual understanding; that ye might walk worthy of the Lord unto all pleasing, being fruitful in every good work, and increasing in the knowledge of God; strengthened with all might, according to his glorious power, unto all patience and longsuffering with joyfulness; giving thanks unto the Father, which hath made us meet to be partakers of the inheritance of the saints in light; who hath delivered us from the power or darkness, and hath translated us into the kingdom of His dear Son: in whom we have redemption through His blood, even the forgiveness of

BIRDS OBSERVE ROAD RULE?

Why There Are Few or No Collisions Between the Feathered Travelers in the Air.

"Collisions between airplanes are not uncommon, and a satisfactory 'rule of the road' seems a very difficult problem. If we could find out what the birds know of this matter it would be invaluable knowledge, for it is probable this risk of collision will eventually be the greatest of all in the air."

So writes Wilson Armistead, an Engfish naturalist, in the course of an article on the effect of storms and wind currents upon the flight of birds.

"I have often wondered," he says, whether teal flying down in a gale ever come to grief. I know nothing living that travels at such speed, for they are small compact birds and may not really be going as fast as they seem to be. There is one place in which I sometimes sit, where whenever there is a strong southwest wind, these birds pass me like bullets, and what is more they sound very like them, but I have never yet seen an involuntary collision between two birds in the air.

"This assuredly opens up an interesting question. We know that birds have flight lines. Have they by any chance a 'rule of road' or air? I think they must have. Among all the thousands of birds closely packed along our coasts in winter, there would undoubtedly frequently be collision if some such rule did not exist. As it is, one never sees a case of hesitation. Birds pass each other at full speed without the slightest sign of slowing

Why He Hadn't Registered. A chap who ran a little general store

at a certain crossroad in New Mexico was reported for failing to register. An official swooped down upon him who asked: "Don't you want to fight for your country?"

"Of course I do," was his reply. "Be you a recruitin' man? I was figurin' on enlistin' the first chanst I

"Well, I'm afraid you've got into trouble, as you failed to register." "Shucks, you don't say so! I never had any use for them new fangled things. I puts the money in a cigar box an' gives the customer his change. But I don't see why the fack that I haven't a register oughter prevent me from havin' a chanst to lick them

Huns." He got the "chanst."

SEED TREATMENT

Productive Power of Corn Plant Influenced by Attention Given to Kernel.

MUTILATION MOST HARMFUL

Chipping, Cracking and Breaking That Take Place in Shellers and Planters Reduce Productiveness of Plants.

(Prepared by the United States Depart-

ment of Agriculture.) Conclusive evidence has been obtained from several lines of work conducted by the United States department of Agriculture to prove that the productive power of a corn plant is influenced by the treatment received by the kernel from which the plant grew from the time it ripened until it was planted. It has been common knowledge that injury to seed corn would reduce its germinability. These investigations have extended beyond germinability and determined the effects of seed treatment upon productivity independent of germinability.

Obtain Good Stand. A good stand may be obtained by the thick planting of poor seed, but with an optimum stand of plants from injured seed such plants are less productive than the same number from uninjuréd seed. These results follow when the seed is injured by normal weather conditions as well as when injured by subjection to moisture, freezing and thawing. Mechanical mutilations of kernels similar to the chipping, cracking, and breaking that al birthright can.

"I am a child of noble kinship of the Lord and King divine,
I am an heir to His dominions, and of the plants that grow from such

Reduce Power of Seed.

The point of value that has been established is that, independent of heredity and independent of germinability, any injury to dormant seed corn reduces the power of such seed to produce a good crop. Seed corn of 100 per cent germination, 'laboriously secured from injured seed by individual ear-germination tests, is less produc-

Basket of Seed Corn.

tive than seed that matured well and was so cared for as to make individual ear testing unnecessary.

Tests under the same environmental conditions of widely dissimilar varieties have brought out the value in long-season districts of making plantings at different periods and using at least two varieties of different seasonal requirements in order better to meet the exigencies of the season and to insure a crop.

FEED BOXES AND HAY RACKS

Faulty Construction Cause of Animals Not Getting Feed Intended for Them.

(Prepared by the United States Department of Agriculture.)

In many instances animals do not get the feed actually intended for them, due to improper and faulty construction of boxes and hay racks. Many feed boxes are so shallow and small that much feed is wasted as the animals eat from them. In order to prevent this waste the feed boxes should be repaired. They should be at least 18 inches wide and 24 inches long and 12 to 14 inches deep. It is often advisable to feed the concentrates with

silage to prevent waste. Hay racks should be constructed to prevent animals from tossing or pulling hay under their feet. All hay racks should have a tight bottom to prevent the loss of leaves and finer particles of hay. The leaves of hay, especially of the legumes, contain most of the protein and are, therefore, that part of the roughage which the animals need. A few hours work in repairing boxes and hay racks, and at a very small cost, will result in saving sufficient feed to maintain the animals in a satisfactory condition.

AT SERVICE OF ALL FARMERS

United States Department of Agriculture Gives Assistance Costing Nothing.

(Prepared by the United States Department of Agriculture.) The United States department of agriculture is at the service of every farmer. Not every farmer, however, takes advantage of that service. The department's advice costs the farmer nothing, but the assistance given may save him a great deal-both in time and money.

TRUSTEES' SALE — OF VALUABLE —

HOUSE AND LOT OF LAND

By virtue of the power and authority of a decree of the Circuit Court for Carroll County, in Equity, passed in a cause therein pending in which William Chester Shoemaker, by Annie B. Shoemaker, his mother and next friend, is Plaintiff, and John Henry Shoemaker et al are Defendants, the undersigned Trustee will offer at public sale upon the premises

SATURDAY, AUGUST 30th., 1919, at 2 o'clock, P. M., all that Lot or Parcel of Land, containing

11,556 SQUARE FEET OF LAND, more or less, improved by a Frame Dwelling, Chicken House, Small Stable, and Summer House. This is a most desirable property, convenient to churches and schools, and is located on George street, in Taneytown, Md. It is the same property which was conveyed to the late Mary J. Shoemaker by Benjamin Fleagle, Jr., and wife, by deed dated April 1, 1882, and recorded among the land records of Carroll county, in Liber F. T. S. No. 58, folio 126, etc, and was occupied by Mary J. Shoemaker at the time of

her death.

TERMS OF SALE.—One-third cash on the day of sale, or upon the ratification thereof by the Court, and the residue in two equal payments, the one to be paid in one year and the other in two years from the day of sale, with interest, and to be secured by the notes of the purchaser or purchasers, with security to be approved by the Trustee, or all cash at the option of the purchaser or purchasers.

EDWARD O WEANT her death.

EDWARD O. WEANT,

Michael E. Walsh and Daniel E. Walsh, Solicitors. J. N. O. Smith, Auct.

PUBLIC SALE

The undersigned, acting as surviving ex-ecutor of Isaiah Copenhaver, deceased, will sell at public sale, on the premises of Elizabeth E. Copenhaver, deceased, situ-ated in the village of Mayberry, on

at 1 o'clock, P. M., the following personal property: THURSDAY, AUGUST 28th., 1919.

ONE BEDROOM SUITE, good as new; 1 single bed, 1 double bed, 2 mattresses, 1 set bed springs, 2 large chests, 1 dressing bureau, 1 wash bowl and pitcher 1 commode, 7 rocking chairs, 6 wooden chairs, 6 cane-seat chairs, small stand, looking glasses, 1 plush couch, 1 corner cupboard 1 wire cupboard, 1 good Single Heater Coal Stove, 1 good small Cook Stove, for wood or coal; 1 extension table, 1 leaf table, sink, washtubs, on 3-burner New Perfection oil stove with oven, 5-gal coal oil can, meat saw, frying pans, kettles, window screens, oilcloth mattings, lot of ½-gal, quart and pint glass jars, lard can, hoe, shovel, lot of wood sawed up, ready for use lamps, umbrella and many other articles.

TERMS.—All sums of \$5.00 and under, ONE BEDROOM SUITE,

TERMS.—All sums of \$5.00 and under, cash; all sums above \$5.00, a credit of 6 months, on notes with approved security, bearing interest from day of sale. No property to be removed until settled for. C. M. COPENHAVER, Surviving Executor

J. N. O. Smith, Auct.

At the same time and place, the undersigned will offer for the heirs of Elizabeth E. Copenhaver, the property situated in the village of Mayberry Carroll county, Md., containing about

40 PERCHES OF LAND, improved by a Frame Dwelling, in first-class order, containing 6 rooms, several closets, front and back porches, never-failing well of water at the kitchen door, on back porch, which is screened in. The house has been recently painted and has good roof cement walks from house to stable.

GOOD STABLE AND SHED, Combined;

good fencing and an up-to-date property in every way; well located for school, and church, store, mills, and in a very good neighborhood.

Anyone desiring a small property will miss a good opportunity to secure a good home, by letting this chance go by.

TERMS.—One-third cash, balance in 6 and 12 months, or all cash at option of purchaser.

THE MOST

DANGEROUS DISEASE

No organs of the human body are so important to health and long life as the kidneys. When they slow up and commence to lag in their dutties, look out! Find out what the trouble is—without delay. Whenever you feel nervous, weak, dizzy, suffer from zleeplessness, or have pains in the back—wake up at once. Your kidneys need help. These are signs to warn you that your kidneys are not performing their functions properly. They are only half doing their work and are allowing impurities to accumulate and be converted into uric acid and other poisons, which are causing you distress and will destroy you unless they are driven from your system.

EXECUTOR'S SALE OF -

Valuable Lot of Ground IN TANEYTOWN, MD.

By virtue of the power and authority contained in the last will and test-ament of Catherine Shoemaker, duly admitted to probate and of record in the office of the Register of Wills for Carroll county, and by virtue of an order of the Orphans' Court of said Carroll county, the undersigned David M. Shoemaker, executor of said will will sell at public sale upon the premises, situate on George street, in Taneytown, Carroll county, Md., on

SATURDAY, AUGUST 30th., 1919, True Copy Test: EDWARD O. CASH, Clerk. at 2 o'clock, P. M., all that valuable Lot or Parcel of ground, fronting 54 feet on George street, with a depth of 214 feet, containing 11,556 SQUARE FEET OF LAND.

Don't Send Your Order Out of Town Until You See What We Can Do

NO. 5109 EQUITY. In the Circuit Court for Carroll County, in Equity:

VERGIE M. SENTZ and Husband, WILLIAM BASSETT SHOEMAKER, et al

Ordered this 6th day of August, A. D., 1919, by the Circuit Court for Carroll County, in Equity, that the sale of the property mentioned in these proceedings, made and reported by George L. Stocksdale and Guy W. Steele, Trustees, appointed by a Decree of this Court to make sale, be ratified and confirmed, unless cause to the contrary thereof be shown on or before the 8th day of September next; provided a copy of this order be inserted in some newspaper published in Carroll County, for three successive weeks, before the 1st day of September, next.

The report states the amount of sale to be \$5597.14.

ROAD NOTICE

11,556 SQUARE FEET OF LAND, more or less, being the same land described in the deed from James Davidson and wife to Catherine S. Shoemaker, dated April 13, 1883, and recorded in Liber F. T. S. No. 59, folio 224 This is a very desirable building lot, being located on George St., adjoining the property formerly occupied by Mary Jane Shoemaker, and at her death, authorized to be sold by said last will and testament. TERMS OF SALE.—One-third of the purchase money to be paid to said David M. Shoemaker on the day of sale, or on the ratification thereof by the said court, and the residue in two equal payments, the one payable in 12 months, from the day of sale, or on the roadbetween John Case and brother and John Staley, on the road between John Case and brother and John Staley, on the road between John Case and brother and George Hitterbrick, on the road between Calvin T. Mrs. Mollie Keffer, of Baltimore, spent some time with John W. Stouffer and wife.

Mr. and Mrs P. B. Englar, left, on Monday, on their annual vacation at Mt. Lake Park.

Mervin Ashenfelter, of Cumberland, is spending the week-end with J. A. Thomson and wife.

Col. Upton Birnie and family, who have been visiting Miss Amelia Birnie, have returned to their home in Washington.

Misses Amelia and Elizabeth Annan are visiting Mr. and Mrs. Lamberton, at their home near Washington, D. C.

William Scarborough and Miss Marian Scarborough, of Stuebenville, Ohio, are visiting at the home of Miss Amelia Birnie.

Taneytown is said to be officially maintaining a mosquito hatchery, on a large scale, in connection with the pumping station outfit.

Cletus Spangler, of Erie, Pa., arrived in town, Sunday morning, having been summoned here by the serious illness of his father, Mr. Samuel

Miss Anna Galt and Miss Elizabeth Crapster, returned home, last Friday, from their auto tour through New England and Canada. They had quite a delightful time.

· Frank P. Palmer will begin the construction of a new dwelling on his Baltimore St., lot, as soon as possible; in order to have it ready for occupancy next Spring.

Chas. Sommer and family will remove, in a few weeks to North Stricker St., Baltimore, where Mr. Sommer has bought a property. They will not go to Philadelphia, as reported.

Albert Horner, wife and daughter, of Mt. Joy, Pa., spent Saturday and Sunday at the home of Mrs. Jesse Myers. Miss Fannie Yingilng, of Shaeffer, of Mt. Ples, Pa. rizellhurg visited at the same place on last Tuesday.

Mrs. Jacob Null was operated on at the Frederick Hospital, on Thursday. She is getting along as well as can be expected. Carrie Winters, daughter public health work and instruction Phone 11-3 New Windsor. of Mr. and Mrs. Herbert Winters is at the same place for treatment.

Rev. and Mrs. Guy P. Bready, left, on Monday, on a two weeks vacation. Mr. Bready will spend most of his time with relatives in Frederick county, while Mrs. Bready will visit her folks in Lancaster.

Mrs. Addie Kerr and Mr, Emil Stout, of Hanover; Mr. and Mrs. Jas. D. Mitchell, Mr. U. L. Reaver and daughters, Elizabeth and Mary, of Westminster, visited Miss Emma Reaver, during the week

On Tuesday evening, as W. K. Eckert was crossing Pipe Creek bridge on the Westminster-Tanevtown State road, he ran into an auto occupied by four young people-two from Union Bridge-resulting in a damaged car for the latter. Fortunately no one was hurt.

Your attention is called to an article telling about the class to be organized in Taneytown, by Miss Hearne, Carroll County's Public stand that such stamps stand in the Health Nurse. This class is in "Home Care of the Sick," and is free -an opportunity every woman should take advantage of.

On Monday morning about 9:15 A. M., the auto car of Mr. Jacob Null, occupied by himself, wife, Mrs. John E. E. Hess and Dr. F. H Seiss, was struck by a north bound freight engine on the tract road crossing on the Middleburg road near the pic-nic grounds. No personal injury was sustained by any of the occupants, but the auto car received a severe dent in the body and a badly smashed hind fender. Had it not been for the rapid speed of the auto car given by the level head and timely action of the chauffeur, Mr. Null, the accident would have been surely destructive, if not fatal to all the occupants. This is a dangerous crossing, and better safeguards should be provided to avoid future accidents.

Mrs. Wm. H. Terry and daughter, Helen; Garland Terry, wife and daughter, of York, Pa.; Mrs. Mervin Ashenfelter, of Cumberland; C. H. Thomson, wife and son, and Dorothy Thomson, spent Sunday with J. A. Thomson and wife.

Last Friday afternoon, a party of children playing on the lawn made a pretty picture for passers-by, with Sue and Margaret Birnie as hostesses. The guests were Louise and Jane Pierson, Katherine Pitzer, Florence Fiske, Jane Long, Ethel Sauble, Charles Hesson, and Jack and Vir-

Welcome Home Dinner.

On Sunday, 10th, John A. Yingling and wife, of Taneytown, gave a welcome home dinner to Chas. Yingling and Clark Mathias, two of his nephews, who recently returned from overseas. The menu was served by his estimable wife, assisted by his sisters, Misses Maggie and Jane Yingling, and consisted of fried spring chicken, potato salad, slaw, roast potatoes, sugar corn, sliced tomatoes, apple sauce, apple butter, home-made jellies and preserves, without which no Maryland table is complete, and last but not least, that "Purity" ice cream. Well, I'll say no more, your readers can guess the rest.

Those present were Richard Kane and daughter, Maggie, of Westmin-ster; Geo. C. Harman and wife and grand-son, and Lloyd Yingling, wife and little daughter, and Paul Ying-ling and wife, of Hanover; Chas. Yingling and brother, Wallace, Clark Mathias and wife, Thos. Yingling and wife, of Penville, Pa.; Miss Lena

Course in "Home Care of the Sick."

A public health nurse has been em along this line, throughout the whole county, holding classes in the schools

and also among adults.

Miss Hearne is ready to start at once in Taneytown a class in "Elementary Hygiene and Home Care of the Sick." This is a regular Red the Sick." This is a regular Red Cross course of fifteen lessons of about an hour and a half each. One half of the period is ordinarily de-voted to instruction and the other half to practical work and demonstration. This course is open to everyone and is a wonderful opportunity, for certainly every woman is anxious to give intelligent care to the members of her own household. The course is free, except for the original fee of \$1.00, and will consist of one or two lessons each week.

Anyone wishing to join the class will please give her name to Miss Eliza Birnie, or to Miss Anna Galt, Miss Hearne will be at the Firemen's Hall, on Wednesday, 20th, at 2 o'clock to avalent the action of the stand of third Tuesday each month. See ad. 3-7-tf before Wednesday, Aug. 20.
Miss Hearne will be at the Fire-

o'clock, to explain the course and to meet all who are interested.

Registered War-Savings Stamps.

Owners of War Savings Stamps who have had them registered at some postoffice, should fully undersame relation to redemption as does a registered government bond. This means, payable only to the person in whose name registry is made; and that in case of the death of that person, payment will not be made, either before or at maturity, to any per-son presenting the same for payment, unless said person is the executor, or administrator, of the estate of the

person having the stamps registered. We understand that the only exception to this rule, is when an estate amounts to less than \$500.00; when, on making formal application to the postoffice of registry, and presenting certain evidence supported by affidavits before a Notary, actual adgood as new; 1 set Yankee Harness, ministrate on an estate to secure the good as new; 1 Horse, one 1-horse

before the maturity of their investment, it will be best to have the one other person, jointly, in order to avoid legal red-tape, and perhaps heavy costs, in case of death of the owner.

a toll of coal, lot of boards of two-horse wagons, brushes, pads, Clucks and Chicks, and many other articles.
