TANEYTOWN, MARYLAND, FRIDAY, APRIL 14, 1922.

No.1142

GARTRELL'S BODY FOUND IN RIVER.

The Mysterious Disappearance at Last Cleared Up.

The body of Harvey Gartrell, who shot and killed Miss Arta I. Jenkins, at the home of her grand-parents, Mr. and Mrs. George W. Hess, at Buckeystown, six weeks ago, was found in the Monocacy river in a badly decomposed condition, near Frederick Junction, last Sunday.

The body had washed about a mile and a half down stream and lodged against an old fish pot. In his pockets were found two waterspeaked later.

ets were found two watersoaked let-ters signed "Arta," a locket contain-ing a small picture of the girl, a wrist watch, another small watch and an automobile registration card bearing his name.

The discovery was made by Walter Harman, who at once notified the sheriff, and he will receive the \$100. reward offered by the county for the recovery of the body. The body was taken to the home of his parents, Mr. and Mrs. Sankey Gartrell, of Morgan's station, and was buried from

Baseball for Tanevtown.

Taneytown will again have a baseball team, this year, as a subscription list, this week, was liberally signed, pledging financial support. The field has been donated by Mr. Sauble— last year's location—and the ground will be improved and a grand-stand built. The organization is as follows: Dr. N. A. Hitchcock, president; A. G. Riffle, Curtis Bowers, S. C. Ott, George R. Sauble, Wm. E. Burke and W. Rein Motter, directors; W. R. Motter manager, and John Leister, assistant; G. Walter Wilt, treasurer. Uniforms for the team have been ordered.

The exact make-up of the team has not yet been determined, as this will largely depend on practice try-outs. Games will be played with the several teams of Hanover, Baltimore amateurs, New Windsor, Union Bridge, and other county teams. The season will open in about four weeks.

Robberies at Pen-Mar.

More robberies at Pen-Mar during the winter have been discovered and reported to property owners, according to word received from the resort. The last places robbed were the Pen-Rock Hotel and the Mar-Rock Cottage, both owned by Randolph Debrick, of Baltimore. The thieves raided the buildings from top to bottom, taking with them many articles of value, including bedding, mattresses, china, silverware, linen and pieces of furniture.

Mr. Debrick, who come to Pen-Mar Park recently, soon learned of the depredations of the thieves when he had entered the hotel and cottage. Not only were articles of value carried or carted off, but the vandals seemed to enjoy themselves by smashing up chinaware, bric-abrac, pictures and scattering other articles over the floors.—Frederick News.

Hanover R. R. Safe Blown.

The safe in the ticket office of the Pennsylvania Railroad Company, at Hanover, Pa., was blown by yeggmen some time Tuesday night. Only a comparatively small amount of money was secured by the burglars, and they Were scarcely compensated for the trouble they went to. The cash, which amounted to about \$90.00 represented returns on ticket sales

for but two trains.
The safe was blown with nitroglycerin. A soap cup was placed near the door crack and the crack itself sealed. The explosion wrecked the door, tearing the sections apart and Scattering the filler material on the The wall opposite was spattered with soap. Although nothing was used to deaden the noise of the explosion and prevent damage, not a Dane of glass was broken in office. That morning the clock, which hangs over the safe, was ticking away. Aside from the safe the ex-Plosion caused no damage.

The yeggs took nothing but money Mileage books and other contents of the safe lay on the floor, where they had been scattered by the explosion. The ticket racks and desks were not disturbed. A cushion, that was used on a chair, was torn to bits and the air stuffing scattered all over the office. This was too small to have been used as a means to deaden the explosion and why or how it was

orn to pieces is a mystery. The Record's Buy-at-Home Campaign

A "home town" advertising cambaign will be started in The Record, lext week, containing twenty-two, or ore, separate announcements, all diected toward the same end—an inviation to community residents to paronize their places of business. It epresent a pull, all together, by home Usiness men, in a proper effort for own and community prosperity.

Big Forest Fire near Thurmont.

Thurmont was in great danger from a big forest fire, on Monday, that started early in the morning, about three miles off, near Harman's bridge. The fire spread rapidly and burned a path about a mile wide directly to-ward Thurmont. Considerable timber and hundreds of cords of cut wood were burned. It was at one time feared that the fire would reach the town, but well directed efforts prevented this. A number of farm buildings were saved by heroic efforts.

GOVERNOR VETOES THIRTY EIGHT ACTS

Legislature Passes 549 Bills and 20 Resolutions.

The Governor, on Thursday, acted on all the bills left by the General Assembly, signing in all a total of 511, and vetoing 38, of which 30 were vetoed at the last examination. Most of the vetoes were of local interest only, among the latter being the bill relating to marriages in Cecil and oth-

Among the important bills signed by the Governor were the \$9,000,000 Soldiers' Bonus Bill, the Full-Crew Law Repealer, which was fought to the last ditch by the labor organiza-tions, the Child Hygiene Bill, the State Budget, the State Road Loan, the Southern Maryland Road Loan, the Immigration Commission Bill, the Mining Bureau Bill, the amendment to the Moving-Picture Censor Law, the State Building Loan, the Fewer Elections amendment, and the bill for the purchase by the State of the Sus-

quehanna river bridge. Among the bills vetoed was one of the two bills creating an additional judge for Baltimore city, the Governor considering one new judge enough; the amendments to the motor vehicle law giving an appeal to the court in case of revocation of licenses and eliminating minimum fines; requiring the Motor Vehicle Commissioner to supply list of registered cars to the County Commissioners of each county; the bill reducing the license fees on motor trucks; the bill authorizing special markers on automobiles; bill creating a Roads Engineer Commission for Charles W. Spencer and wife to George F. Shamer and wife, \$10, for 3 acres.

Geo. E. M. Warehime to George W. Sharrer and wife, \$10 for 8910 sq. ft. Geo. E. M. Warehime to Emory C. Leister, \$10 for 9475 sq. ft. Reverdy N. Snader to Ada R. Man-Commission; several local pension bills relating to Baltimore city, local fish, oyster and game bills relating to Washington, Frederick, Charles and St. Mary's counties and a bill creating the office of Road Director for Allegany county in place of the Board now in charge of the roads.

The Legislature passed 549 bills and 20 joint resolutions, about 100 less than two years ago.

Musical Cantata.

(For the Record.) A cantata entirely solemnly, majestically commemorating the Passion, death and resurrection of Jesus the Christ, our Saviour and Lord, entitled "Redemption's Song" by Fred B. Holton, will be rendered in St. Paul's Lutheran Church, of Uniontown, Easter, at 8 P. M. Stirring choruses, interspersed with unison men's and women's choruses, soprano obligato solo, ladies' trio, ladies' and men's duets, bass, tenor, soprano and alto

solos, and hosannas by the children. Not long after Christmas did the choir begin rehearsing and faithfully have they prosecuted this work under the patient leadership of Will Sittig, until now, and in the interest of better and more sublime and more beautiful church music, we invite your

William Jennings Bryan has announced that he will not be a candidate for a seat in the U. S. Senate from Florida, giving as his reason that as most of the great issues he has stood for have already been enacted into laws, he could not, at his age. give up his present enjoyable work for personal politics.

Stop knocking the other fellow, and instead knock some of the conceit, and false reasoning, out of yourself. Suggested for a modern prov-

BOARD OF EDUCATION . Minutes of the Last Regular Meeting,

Held April 6.

The regular meeting of the Board of Education was called to order in the office of the Board on Thursday, April 6, at 7:30 P. M. Commissioners Glover and Koons were absent.

After reading the minutes of the two previous meetings, the regular order of business was taken up.

The list of bills presented to the Board was approved and ordered pand Requests for contributions to local funds for libraries, etc., were presented to the Board which contributed \$10.00 to the amount already raised in each case, except in the case of Harney, to agreed to make the contribution 10% of the amount raised by the school, which amounted to

Deer Park, Mrs. Laura Wagner, playground equipment, \$34.00; Mahlon's, J. C. Wailes, library \$10.12; Ebbvale, May Gettier, phonograph, \$45.00; Taylorsville, Lena Angell, phonograph, \$24.00; Snydersburg, Jane Ecker, library, \$10.00; Sykesville Grammar, Esther Six, library, \$13.81; Harrney, Harry Feeser, playground equipment, \$108.02; Alesia, Ruth Hyson, globe, etc., \$55; Greenmount, Treva Wink, library, \$12; Old Fort, Gertrude Abkens, maps \$45; Woodbine, Frankie Wetzel, athletic equipment, \$10.01; Baust, Anna Sire, maps, \$15; Springdale, Joseph Langdon, volley ball, etc., \$10; Stonesifer's, Thelma Deal, dodge ball library, \$21.72.

The offer of Mr. Columbus Cover to purchase the Four Corners school lot was laid on the table for further consideration.

A petition of the Mechanicsville community requesting that more adequate school facilities be granted their community in order that it might be possible to organize a junior high school, was placed before the Board. Supt. Unger was authorized to inform them that it would be given

due consideration at the proper time. The request of the Mayor and Council of Mt. Airy to purchase a portion of land 125x60 on the corner of the property of the Board of Education for the purpose of boring wells and erecting a tank for a water supply for Mt. Airy, was considered. Supt. Unger, through a committee consisting of Commissioner Glover, Allender and Wantz, was instructed to request Dr. W. C. Stone, District Health Of-ficer, to make an inspection of this situation, and upon a satisfactory report from the State Board of Health the committee is authorized to take up the matter of transfer of property

to the Mayor of Mt. Airy. Supt. Unger reported to the Board that he had authorized Mr. B. E. Starr, Architect, to work out the details of the high school building to be constructed in Freedom district. The

rd approved of this ac The salary schedule for all posi-Stanislaw Sabko, deceased, settled his tions in the service, revised to conform with the minimum in the new law of 1922, was confirmed by the Mary E. Slaugenhaupt, deceased, set-tled his first and final account.

Board. It, however, allowed the in-crease of \$50.00 to high school teachers authorized in the salary schedule adopted April 6, 1921. This salary schedule will take effect beginning

with the school year of 1922-23. The Board has reaffirmed its position with respect to the janitor fees for one, two and three room schools in authorizing the Superintendent to place in the budget a sufficient amount to raise the janitor fees from \$8 to \$20 for each room. The Board has taken this position, because great hardship has operated upon the one room teacher during the past year.

The Board has recognized the efficient service to the schools of Miss Sara Hayman, the County Nurse, and desires to go on record in placing itself in a position to co-operate to the fullest possible extent with the Red Cross Chapter, and the tuberculosis association in giving whatever assistance it can to this most important work, and it authorized the Superintendent to offer these societies its assistance to the extent of paying the salary of the nurse, with the understanding that the other expenses will be carried by these organizations jointly, and the amount of this salary is to be placed in the budget.

The Superintendent laid before the Board a full report of the standard tests applied to the schools of Car- as follows: roll County during the last two weeks of March. While this report indicates some decidedly defective conditions in various parts of the county, on the whole the report is pretty satisfac-The report brings out distinctly, however, that the children in Carroll County in every grade, except the first and second, are very much over age. As a result of this report the Superintendent was authorized strengthen the service in at least three directions; namely, in supplying adequate supplementary reading material, standard arithmetic practice tests, general testing material, and very much more extensive sanitary and hygienic equipment. The Board adjourned at 9:50 P. M.

TO THE VOTERS OF CARROLL COUNTY

Bond Issue for Roads and Schools Officially Explained.

(The following statement is published as an advertisement, by Order of the County Commissioners.—Ed. Record).

On Monday, May 15, 1922, a special election will be held in Carroll County at which at the regular polling. ty, at which, at the regular polling places in all the districts of the county, between the hours of eight o'clock A. M. and six o'clock P. M., the voters of the county will be given the opportunity to vote upon the question as to whether the County Commission sioners shall be given authority to issue bonds to raise the money necessary for erecting needed public school buildings, and constructing and permanently improving county public roads.

This election will be held under an Act passed by the Legislature of 1922.

The purpose of this circular is not to influence the voters of the county either for, or against, the bond issue bill, but solely to give them such in-formation as will enable them to vote intelligently upon the merits of the

There is imperative and immediate need for new school buildings in many sections of the county. The tax-payers of the whole county have had to contribute to the building of state roads. The masses of the people of the county, especially in outlying sections, benefit only indirectly by these state roads. Scarcely a week passes, that large delegations from various parts of the county do not appear before the County Commissioners, demanding that hard-surfaced county roads be built to connect with the

main-travelled State roads. None of these demands can be met, or school buildings erected, or county roads improved, without money. Money can be raised only by taxation. If all the school and road work that must be done within the next five years must be paid for by direct levy of taxes within that period, the tax-rate must be so high that it will be an intoler-

able burden on the people.

The only equitable method to meet the cost of these improvements, is by the borrowing of the necessary mon-ey and the issuing of bonds to secure the payment thereof through a long series of years.

The bond issue bill, if made a law by the vote of the people of the county, will provide the most economical method for meeting the county's demands and need for new public

schools and county roads. The bill was framed by the County Commissioners and Board of Education, jointly, and everyone of its pro-visions had the unanimous approval of the members of both boards. The bill itself was in the hands of the Legislature from February 15, for more than a month before the date of its passage. It was not only scrutinized by the members of that body, but a synopsis of its provisions was published in the county newspapers, with invitation for friendly criticism, that it might be made the best possible law in the interest of the whole body of the people of the county. It was finally passed and signed by the Governor of the State, exactly as presented in its original draft.

It is now "up to" the voters of the county to determine by their vote on this bill whether they want an extremely high tax rate during the next five years, or whether they prefer the more moderate increase that will be possible if the County Commissioners

shall be authorized to issue the bonds.

HOW THE BILL WAS FRAMED. The idea that seems to have been circulated that the figures \$350,000.00 for school buildings, and \$350,000.00 for county roads, are amounts arbitarily fixed upon, and that lesser sums might have been provided for, is incorrect. The idea that these amounts were fixed, and the gross amount then pro-rated among the districts, is also

The amount was arrived at in the following manner. The Board of Education knows what school buildings are imperatively needed, and believes that the buildings named in the bill should be erected within the next five years, and that the maximum cost of each of these buildings should be

For Taneytown, \$10,000.00. For Woolery's district, \$20,000.00. For Freedom district, \$40,000.00. For Pleasant Gap, \$10,000.00.

For Manchester, \$20,000.00. For Lineboro, \$7,500.00. For Roller, \$7,500.00. For Westminster, \$150,000.00. For Middleburg district, \$15,000.00.

For New Windsor, \$15,000.00. For Union Bridge, \$40,000.00. For Mt. Airy, \$15,000.00.

The County Commissioners fixed the amounts for road purposes in the various districts, taking into consideration the public improvements in State roads and school buildings already enjoyed or contemplated in the various districts, and so distributed the funds to be derived from the proposed bond issue as to as equitably as possible equalize the advantages of An illustration of the manner in which the proposed sums are arrived at is seen in the fact that Franklin district has not, at present, a single mile of State or hard-surfaced roadway, nor one modern school building; whereas through Myers district runs one of the main State road arteries,

(Continued on Eighth Page.)

CROP REPORT FOR MD.

Crops and Fruit in Generally Satisfactory Condition.

College Park, Md., April 10, 1922.

Condition of the winter sown crops is on the whole satisfactory. Germination in some quarters has been irregular, delayed by dry weather last fall. And in a few areas the cereals have been injured somewhat by the severe winter colds, where there was a lack of sufficient snow-covering; according to a statement issued to the press today by John S. Dennee, agri-cultural statistician for the United States Bureau of Markets and Crop estimates, co-operating in crop statis-tics with the Extension Division of the University of Maryland.

On April 1 the growing condition of wheat in Maryland was found to be 89 per-cent of a normal, against 95 on April 1 a year preceding, and 88 per-cent, the average condition on April 1 for the past ten years. Average price paid the farmer was \$1.31 per bushel, against \$1.44 on April 1 last year. Condition of rye was 90 percent, against 93 a year ago, and 88 per-cent, the ten-year average of condition of April 1

dition on April 1. March was generally favorable to crops and fruits. Locally, heavy rains fell hindering farm activities. The land was so wet as to be practically unworkable. Towards the end of the month mild and drier weather prevailed and field work became general. Preparations for spring plowing went forward briskly, though somewhat delayed behind the seasonal average in some districts due to the unfavorable

Highly optimistic reports concerning the fruit prospect pour in from all portions of the State. Southern Maryland growers say they are looking for a bumper crop this year as a result of the seasonal weather.

Tobacco farmers are now sowing their beds. Many farmers are sowing several beds because of the crop shortage last year, thereby assuring enough plants for transplanting when the proper time arrives.

The Eastern Shore says early truck crops are advancing satisfactorily.
Live stock are in good condition.
There is plenty of feed.
Pastures over the State are green-

ing nicely,
Brood sows are slightly (2 percent) in excess of the number on the farms a year ago. Better prices of late for hogs have made farmers optimistic, with a tendency to increase

the number of hogs.

Farm labor is reported in adequate supply—107 per-cent of what was available a year ago, and 95 per-cent in comparison with the normal supply. The demand for labor is ply. The demand for labor is reported as 90 per-cent. of what it was one year ago, indicating a ratio of 119 of supply to demand. But farmers insist that they are short of funds; that the continued low prices farm products are fetching prohibit employment of all the farm help they need, necessitating their doing much of their work themselves with the aid of their families. Few workers, reports say, are willing to desert the city streets for the farms at the wages farmers are able to pay at this time.

Giant Distillery Captured.

A monster moonshine distilling outfit was captured, last Sunday, in the lower part of St. Mary's county, the largest and most complete outfit yet found in Maryland. It had a capacity of 1400 gallons of corn whiskey a week, which at present prices would

bring about \$16,000. It is thought that the plant had been in operation less than two weeks. It was located about the centre of a wooded tract of 250 acres. The capture was made by Prohibition agent John Whitehead, and assistants, who arrested two negroes, one of them a cook. More arrests are sure to follow, as the place seems to have been operated as a community affair, farmers furnishing the corn, and others disposing of the product, the most of which went to Washing-

Do You Want Farmers' Bulletins?

Senator Weller will be very glad to forward to any resident of Maryland, who will write him, by postal or letter, a list of Farmers' Bulletins, issued by the United States Department of Agriculture. This gives publications on a variety of subjects, among which will be found pamphlets on gardening, live stock raising, canningl and preserving, poultry, and many other subjects of interest.

Those who would like to have any of these instructive booklets should send their correct name and address, plainly written, to Senator O. E. Weller, Senate Office Building, Washing-

Where the Automobiles Are.

According to the latest figures, there are 135,460 automobiles in Maryland, the state standing 22nd. in the list. New York leads with 754,085, Ohio 742,713, Pennsylvania 689,589, etc. California has a car for every five of her population, and comes after Pennsylvania, with 674,830. The total for the U. S. is given as 10,449,785.

General John J. Pershing will be the guest of the American Legion in Frederick, Md., one day during the week of April 17 which has been designated there as "American Leg-ion Week." He has written to Col-onel John D. Markey that he would be in Frederick during the week.

All articles on this page are either original, or properly credited. This has always been a fixed rule with this Office, and we suggest the adoption of it by our exchanges.

The legislature, in its juggling with race-track gambling, saved the present Burke law that brings the state approximately \$700,000, while the increased salaries it approved are said to aggregate some \$900,000. Does this prove why the state needed the gambling revenue?

It is About Like This.

If the voters of Carroll County pass favorably on the \$700,000 Bond issue for roads and schools-and we are not saying that this would not be a proper thing to do-nobody should forget that it would simply be buying more roads and more schools on credit, and that the whole \$700,000, with interest added, must be eventually paid by the taxpayers.

And this means, that the debt must be provided for in the tax rate; so, if the bill is approved, do not blame the County Commissioners for going after the money, hereafter, on the instalment plan, with which to retire

It is quite the custom, in politics, to lambast public officials for increased taxes, even though the very people who do so, want the improvements that the public money is spent for. If we would dance, we must pay the

The Unruly Member.

Every town, or community, has its irresponsible, and at times mischievous and meddlesome, persons who talk too much and too recklessly, wherever they can find an audience. Usually they are so well known, and so properly sized-up, that their is going to touch off a conflagration biles are the most important factor so properly sized-up, that their plethora of mouth exercise is estimated at its true value, and but little harm actually results; but, the probability is that these people eventually create trouble, and have some little influence at least toward creating false impressions regarding persons and things.

There appears to be no remedy, nor protection, against such windjammers. Their accomplishment is usually a fixed habit, if not a mental disease, and about the only thing to do with such cases, is to plainly ignore and discourage them.

Not nearly so objectionable, but still a class to be regretted, is the one that talks too little, when talking means dissent from plainly made, misstatements. Silence sometimes appears to give assent. No one can afford to aid, by silence, any wrong, public or private. A few words of proper defense, at the right moment, may often prevent great harm.

In general, perhaps most of us are indiscreet in our talk, at times. It seems almost inborn that the tongue is an unruly member, and requires constant watching. Even those who are the best intentioned make "bad breaks," as we sometimes say, and the higher the mental and moral character, the more unfortunate these breaks are, because they are the ones likely to have the most influence.

The Poor Farmers?

It is rather amusing, at times, when those outside of the business of farming, put up a plea for the farmers, and plaster it on thickly as to how terrible a plight the farmers are in just now, when the farmers themselves are not saying much, and not very loudly complaining over the hardness of their lot.

As a matter of fact, there are people who use the hard-up-ness of farmers either as a cover to their own interests, or to place themselves in the spot-light as champions of the

be kin to love—for business purposes. The farmers are not having an easy time, just now, as everybody knows; but, just the same there are still many compensations in the job, and it is still the best industry in the betterment."

country, even if it is now less profitable than for a few years past. Especially farmers who have exercised good financial sense during the war period, are not badly off. True, they are meeting with losses this year, on account of putting out expensive crops, and selling their grain products at a low price; but, every storekeeper or business man with a stock of merchandise on hand, is suffering the same loss. It is a widespread con-

dition. So, this sympathetic dodge on the part of outsiders, is rather "thin." Farmers are not yet objects of charity, and they are very far from being inclined to expect any such consideration. They are also wise enough to 'see through" such silly commiseration, and in a general way are well able to take their own part, both when in need, and when not in need.

___×_ The "Flapper" and War.

We are not quite sure what is meant by "flapper," as it is currently used, except that it is some sort of a female, and not the best sort. Our new dictionary says;

"Flapper. One who, or that which, waves loosely to and fro, a young bird when first trying its wings; hence, colloquially, a young girl in her teens.'

By using our imagination a little, we can get the idea that a "flapper" is a girl who "waves loosely about" and creates a sensation, if not trouble. But, our purpose is not to go into the question, but to state what Rev. Dr. J. Frank Norris, of Texas, who is now trying to reform New York City, says about hervery much as Billy Sunday might - as follows;

"The cause of the next war-the flapper-struts up Fifth avenue today and her sister out on Main street

"The flapper will bring about this country's downfall just as surely as Delilah caused Sampson's," said Dr. Norris. "Every great war has been traced to the depravity of woman, and they never were as bad as they are

"When a woman shows her knees, of the nation as well.

The Dry Mash System for feeding hens is fully indorsed by us. We have advocated it, have manufactured and advertised it for ten years. Keep Rein-o-la Dry Mash before your hens all the time and give them a small mess of Rein-o-la Scratch Feed morning and evening and you cannot fail to get eggs. This is the system with the least work and brings the greatest results. Modern methods bring modern returns. Give it a trial. \$2.50 per 100 lbs.—Reindollar Bros. & Co. 3-3-tf

The Woman Office-seeker.

Harbaugh, editorial writer for the Middletown Valley Register, is always interesting, and always has something pointed to say. In last week's issue under the caption, "The Spring Candidate," he touches up professional candidates especially, as to how they want to save the country, and naturally takes cognizance of the newcomer into the field, the equal rights woman. He says, in a facetious vein;

"Since woman has received the franchise she, too, has felt the gnawing of the office rat. She is running for almost everything in sight, from the road supervisor to police judge. We say, "let her run." Who knows but in course of time she may get into the White House as the successor of some hornible man. She cessor of some horrible man. She has broken the bonds of matrimonial slavery and is free at last. The culinary department of the house-hold is thrown aside for the legisla-

ture on the bench. Woman now sits on the jury and passes on the innocence or guilt of those who have trodden her under those who have trodden her under foot for many years. She chews gum in the jury room with a free-dom which has been denied her for a century, while the man of the fam-ily makes the fires and feeds pare-goric to the kids. We rejoilee that woman has come into her own at least oppressed, in order to profit thereby woman has come into her own at last through the sympathy that is said to seekers. We may expect cleaner and better laws now. Already several women have reached Congressional chairs and the country hasn't suffered a loss. If she ever reaches a Cab inet position we may have a depart-ment of national morals or civic

Creating Prosperity.

There is too much tendency, when business difficulties of any kind are faced, for people to look to the government and outside sources for help, accomplish a large measure of prosprinciples of economic law. An old proverb says that if every man sweeps in front of his own door, the whole world will be clean.

Every business man and every worker, instead of imagining himself drawn from years of experiments the helpless victim of world wide with the rodent by Dr. Milton H. forces which he can not affect or Greenman, director of the Wistar inremedy, should realize that he has his own success and welfare largely in his own hands.

The communities and the industries, that deal most intelligently with tute is building a \$30,000 home for the business conditions that they rats. The building will be a one-story meet, will gain full prosperity a great wing to the present structure, and deal quicker and more completely than those that sit down and wait for the rising tide to float them on to success.-Frederick News.

A Farmer Cured of Rheumatism. "A man living on a farm near here came in a short time ago completely doubled up with rheumatism. I handed him a bottle of Chamberlain's Liniment and told him to use it freely" says C. P. Rayder, Patten Mills, N. Y. "A few days later he walked into the store as straight as a string and handed me a dollar saying, give me another bottle of Chamberlain's Lin-iment; I want it in the house all the

time for it cured me."

Speed and Highway Costs.

The United States government is investigating the causes for the rapid wearing out of highways. One of the army officers who has been studying the subject in co-operation with the Massachusetts Institute of Technology, states that light weight automobiles operated at high speeds, cause more damage than heavy trucks running at low speed.

There is no doubt that heavy trucks have done a great deal of damage to more of silver than the year's producyou can see the finish of her and that highways, but if their speed were retion. The total distribution on these stricted probably this damage would be largely avoided. Merely fining truck drivers and owners for excessive speed, however, would fail to check many reckless ones. To keep them all within proper speed imits it would be necessary to build the cars so they "Our statesmen are scrapping the could not be operated beyond a cer-

This investigation suggests that the people are paying a tremendous cost for allowing all kinds of cars to tear, the country girl is just as bad as her city cousin. Once upon a time country diverse around the country like mad, with

SEX OF EGGS AND CHICKENS

Department of Agriculture Says There Is No Dependable Method to Determine Sex.

(Prepared by the United States Department of Agriculture.)

Raisers of poultry have long wished for a reliable means for determining the sex of chicks and of eggs to be used for hatching, but, in spite of the promise of various manufacturers of devices, the United States Department of Agriculture says there is no very dependable method for determining the sex of chicken that a certain egg will produce, and that it is extremely difficult to determine the sex of chicks of

The department has made tests of a number of devices claimed by the

Barred Plymouth Rock Cockerel.

makers to give good results in sorting out male, female and infertile eggs. In all cases they have been found to be useless for the purpose, as two persons could never get the same result with a lot of eggs, and hatching tests showed that one could do just as well by closing his eyes and picking out the eggs at random.

On account of the difference in the color of the down of the sexes it is often possible to select with considerable accuracy the hens and cockerels of the Barred Plymouth Rock as soon as they are hatched, but in the case of most other breeds and varieties this selection cannot be made with any certainty until some time later. Those who know the breed well are able to distinguish between the sexes of Leghorns when they are three to four weeks old. The sexes of the mediumweight breeds, with the exception given above, have the same appearance until the chicks are 10 or 12 weeks old. The surface sex differences in the Asiatic breeds are not as apparent up until the birds are three or four months old.

There may be differences that will make it possible to sort the sexes earlier, but so far poultrymen have found no reliable basis for selection.

GREAT IMPORTANCE OF OATS

Used in Ration of Growing Chick It Does Much to Build Up Strong Frame and Muscle.

The importance of oats in the poultry ration cannot well be overlooked. It forms the backbone in many rations It is chiefly important in the growing ration for young chicks, for it will grow frame and muscle more economically than any other grain. Steelcut oats, rolled oats, or growing mashes having ground oats or oatmeal as a base are exceptionally economical feeds for growing stock. Fed in connection with buttermilk, it makes the best growing ration now known. Of course, a grain mixture should be fed

Confine the hen until the chicks are weaned.

The busy hen is the one that lays the most eggs.

Chicks should not receive feed until they are 36 hours old.

The baby chick will not stand chilling. It must have access to heat whenever it desires.

Toe-mark the chicks as soon as they are hatched. This enables one to tell their ages later.

Disease control and sanitation are among the most important things in poultry management.

Chicks chilled at some time early in their development keep dropping off even after attaining considerable size.

The coop for hen and chicks should be well ventilated, easy to clean and of sufficient proportions to insure com-

BLUE RIDGE COLLEGE.

The Blue Ridge baseball team met first defeat of the season on Saturday when it lost to St. John's College, in a loosely played contest, by a score of 15-4. All went smoothly for Blue Ridge during the early innings, and they held a two run lead until the fatal fifth when Peters' arm went bad, and in the next two innings six runners crossed the plate. This lead was too much for the local lads to overcome especally with St. Johns' star twirler, Tall, hurling airtight balls. Hitchcock with three hits to his credit, was easily the star for Blue Ridge, while the fine work of Markel behind the plate was commendable.

Just to show that the game with St. Johns' was a freak, the Blue Ridge team came back strong on Monday, and overwhelmed Manhattan College by the score of 18-10. After piling up a lead of fifteen runs, coach Bonsack called upon a number of his second string men to continue the game, and this accounts for the visitors scoring six runs in the ninth inning. The game though a slugfest was not entirely devoid of thrills. Aside from the brilliant hurling of Metzgher for Blue Ridge, who fanned fourteen of the eighteen batsmen who faced him, and allowed but three hits, Captain Hitchcock brought the crowd to its feet when he stole home in the second inning. Revot, who was hurling for the New York boys, took a healthy windup, and the fleet-footed Blue Ridge leader, who was on third, darted for home. Sullivan, the Man-hattan catcher, had the ball waiting for Hitch, but in one of the most artistic hook slides ever witnessed in New Windsor, he got around the catcher by three feet. Stup and Smith also did some timely hitting for Blue Ridge, and Wilson, in center field

A large audience witnessed the de-bate between Blue Ridge and Colby College, Wednesday night. This was Colby's eleventh debate on the same subject, viz: That trade unions are unjustifiable. However, in spite of the vast experience which they had obtained in meeting some of the big-gest colleges in the East, they were forced to the limit to secure the decision of Dr. Abner Brown, Dr. C. E. Forlines and Supt. M. H. Unger. The Blue Ridge debaters are now preparing for the final debate of the season with Elizabethtown at both Elizabethtown and New Windsor on April

Easter vacation begins at Blue Ridge Thursday evening and continues until Tuesday morning.

DETOUR.

Mrs. Roberta Smith and daughter, Mrs. Roberta Smith and daughter,
Thelma, of New Windsor, visited Dr.
and Mrs. R. R. Diller, on Sunday.
Visitors at P. D. Koons', Jr., on
Sunday, were: Mr. and Mrs. Wm.

MRS. IDA M. LAMBERT.

Mrs. Ida M., wife of Mr. Samuel S. Lambert, died at her home near Taneytown, on Friday, April 7, 1922, following a stroke of paralysis receiv-ed on Sunday the 2nd. Mrs. Lambert had a light stroke about a year ago, and had been in failing health ever

She is survived by her husband, and one son, Lloyd S., and by three sister, Mrs. Simon Benner, Mrs. Gertie Rowe, and Miss Mary M. Smith also by one brother, O. Harry Smith,

all of this district. Funeral servies were held Sunday afternoon in the Lutheran Church, by her pastor, Rev. L. B. Hafer, assisted by Rev. Guy P. Bready. Interment was made in the Reformed cemetery.

In Loving Remembrance of our dear sor CHARLES RICHARD VAN FOSSEN, who departed this life two years ago, March 27, 1921.

Easter once more is here; To us, the sadest of the year; Because one year ago Our darling baby was so suddenly called

Oh, how sudden was the summons When word came that he was dead: Time was too short to say farewell, To those we loved so well.

We often sit and thing of you, When we are all alone: For memory is the only friend, That grief can call its own.

Dear Richard, we are so sad and lonely, Since you have gone from us.

And it seems there is no pleasure
In this dreary world for us.

By his heart-broken Father and Mother,
MR and MRS, CHAS, VAN FOSSEN

Loving Remembrance of our dear mother, MRS. JOHN W. DeBERRY,

who departed this life one year ago, April 3, 1920. O mother, could we open wide your grave And see your face once more, And hear your voice, is all we crave, As in the days of yore.

Out in Keysville cemetery,
Beneath the cold dark clay,
They laid our loving mother,
Just two years ago at Easter.
A faithful mother, both true and kind
A more loving and devoted mother
could not find.

By her Loving Son and daught

By her Loving Son and daughter, MR. and MRS. CHAS. VAN FOSSEN CARD OF THANKS.

We hereby extend our thanks to kind neighbors and friends for their assistance during the illness and following the death of my wife; and also to the choirs of the Lutheran and Reformed churches for their SAMUEL S. LAMBERT.

Studies Ant Control on Ships.

An odd assignment given to a scientific research worker is that of making a study of the control of ants on shipboard. As guest of the Pacific Mail Steamship company, Warren T. Clarke, professor of agriculture extension in the University of California, has sailed on the steamship Columbia on a two months' trip through the Panama canal, coming on by way of Havana to Baltimore, to study the problem at first hand.—New York Eve-

MIGHT BE WORSE OFF.

"Thankfull What have I to be thankful for? I can't pay my bills."
"Then, man alive, be thankful you aren't one of your creditors."

"1 Franc Or." Numismatists have been gladdened by the news that a single gold franc has been struck as the monetary unit which is the basis of all financial transactions of the League of Nations,

It is a piece of gold about one-third the size of an English farthing, with the inscription on one side, "S. des N. (Societe des Nations), 1921;" and 30 the other "1 franc or." In American currency it is equal to 0.1925 dollar. Apart from there being only one gold franc, the remarkable thing about is the short is the shape, which is octagonal, and maybe it will act as a protest against the continued use of round coins which does not enable one, say, to tell the difference by feeling between six-pence and a half-sovereign.—Chris-

tian Science Monitor. The British government recents Airplanes Sold for 60 Cents. sold a number of airplanes for cents apiece at the Lincoln airdrome

disposal sale in London. The machines had become out of date after several years of service and had been junked, the wings and the engines being removed. Neverthe less, the purchasers who paid 60 cents for an airplane received the body of the machine with the copper fittings and pipes, which in all originally cost

several hundred dollars. The purchasers, for the greater part, were anxious to buy the planes to break up for firewood during the coal shortage. Small boys dragged their fathers their fathers along to buy a plane that they might get the wheels to use on scooters and home-made automo-

ALL INTERESTED IN ZONING

Matter in Which Every Citizen and Property Owner Is Concerned, for Many Reasons.

Zoning, which has proved advantageous for a number of American communities, notably, it is said, for the city of New York, has lately been proposed for other towns, large and small, of the United States. A constitutional movement, zoning seems to seek that equipoise of relations between the people and the state, bebetween one group of citizens and another, and between one individual and another which the growth of industry has disturbed. Primarily a land question, zoning is declared to make for stability of investment value to owners, and stability of tax values to the

More intimately, as described in a pamphlet issued by the Cambridge (Mass.) planning board, Prof. William F. Harris, former chairman, zoning is a question of a man's right to be protected in the occupancy of the place where he lives or where he conducts his work. Particularly, it is a question of his being able to enter his premises without having to stumble. over obstructions put in his way by neighboring proprietors, to breathe the air of his garden without annoyance from the fumes of mill chimneys, and to look out of the windows of his house without having unsightly objects imposed on his view.

SELECTING SITE FOR HOME

Prospective Builder Should Remember That Value of the Land Is Highly Important Point.

After it has been decided that a certain site meets the requirements reasonably as to location, the next consideration is that of cost. The cost of an article, whether it be real estate or merchandise, is relative. A piece of land, the price of which appears to be very fair for its location, may increase the cost of building to such an extent that it is in the end expensive, and had this been foreseen would have prevented its purchase. On the other hand, the reverse is often true; the natural characteristics may be such that the construction is facilitated, thus saving to a greater or lesser degree the excess on the initial cost of the land, writes Gordon Robb in the House Beautiful. It is difficult to estimate with any degree of accuracy just how much can be gained or lost, but the following rule is a good one to follow. It is a generally accepted theory that the cost of the land should be from 20 to 25 per cent of that of the house. The investment is safer when the land bears the higher proportion. It is comparatively easier to ose of property and the banks will lend money more readily on a homebuilding project when the land has - Charles

The City and Its Builders.

The picture once painted or the poem once sung, it stands henceforth by itself; the artist can do no more for it. It must live or die without further help from him. But the city is never thus entirely separated from us, its builders. It remains tied to us by the visible cord of nourishing passions. It grows with us or it dies with us. It is in a more real and personal sense a part of us, as we are of it. It becomes then the reflex of the lives and aspirations of the people who dwell in it. So that a cityits streets, its highways, its buildings, its public places, as well as its business and life-is an embodiment of ourselves. It is this living spirit that may hearten and inspire us; that may delight and enchant us, and that may also break and destroy us .- Temple Scott.

Select Shrubs.

Now is the time to select those shrubs that you are going to set out around the house and around the borders of the lawn in the spring. Just allow your imagination to work a little and remember how the premises looked last summer and how the appearance could be improved. Then get a nursery catalog and make your selection of plants.—Farm Life.

Fordville.

Henry Ford says he will build a city 75 miles long in the Muscle Shoals region. It will be a chain of small

Ford is looking ahead 20 years, when factories will get out of the cities so that workers will not altogether lose that great joy of life-contact with the open country.

Size .doesn't make a town. The best American city is the village.—Chicago Evening Post.

Chinese Tongs.

Chinese tongs are societies of many kinds. Some are composed of the men of a province, much like state societies; others are fraternal. In the early days of Chinese on the Pacific coast Chinese who were not members of strong families, or clans, organized a tong to protect themselves against the aggressions and impositions of the four families. Later there were many tongs and Chinese tongs were organized as easily and readily as any fraternal society of

white men.

FOOLISH ADVICE

"Sorry, sir," telephoned the butcher, "but we are out of sirloin. Why don't your wife order you a round?" "What's that?" exploded Harker, at

the other end of the line. "Why don't your wife order you a round?"

"Why don't my wife order me around? Man, that is all she does from morning until night! If you were nearer I'd-" But the startled butcher had hung up the receiver.

Even If-

The loving husband was about to start on a long journey. His young wife, a very modern type, stood disconsolately on the platform. The whistle blew. He gave her a last kiss.

"I'll write to you," he said, "from every place we stop at on the way." "Yes, do," she said, "do, darling, even if it's only a check."

Good News for the Patient.

"Sam, shut off that phonograph a moment, will you?" said the barber who provides music with shaves. "Don't you like that jazz record?" asked his assistant.

"Sure, but I'm fixing to go around the gentleman's chin. I can't keep time with short strokes."-Louisville Cour-

Snappish.

"So your daughter has become a soloist."

"Of course. She couldn't very well become a trio or a quartet, you know."

EQUAL TO ALL EMERGENCIES

Little Thing Like the Running Out of Oil for His Engine Easily Overcome by Traveler.

How we all enjoy stories with a resourceful hero! No cornered hero of romance ever showed more ingenuity than Mr. Roy Chapman Andrews showed when he ran out of motor oil on the Gobi desert. We quote Mr. Andrews' exploit as he narrates it in Natural History:

We were returning to Kalgan from Urga, the capital of Mongolia, when we made our discovery. Since the oil had all leaked out of the cans, and we could not go much farther, we were debating what to do. Then as our car swung over the summit of a rise we saw the white tent and the grazing camels of an enormous caravan. Of course Mongols would have mutton fat; why not use that for oil?

The caravan leader assured us that he had plenty, and in ten minutes a great pot of fat was warming over the fire. We poured it into the motor and proceeded merrily on our way, but there was one serious obstacle to our enjoying that ride. We had had little food for some time and were very hungry, and when the engine began to warm a most tantalizing odor of roast lamb rose from the car. Shortly I imagined that I could even smell mint sauce

On another occasion when we were without cup grease for the cars Mrs. Andrews sacrificed all the cold cream and vaseline that she had prepared for a summer in the field. We also substituted Mongol cheese with good results.-Youth's Companion.

FIRST AMERICAN GOLD COINS

What Are Known as Eagles Placed in Circulation in the Year 1792-Bird as a Symbol.

The first American gold coinage of eagles, half-eagles and quarter-eagles, of the value of \$10, \$5 and \$2.50, respectively, was placed in circulation in 1792. Since that date the United States mints have turned out 117,629,-365 double eagles, or \$20 gold pieces; 49,611,289 eagles, 74,360,570 half-eagles and 15,580,208 quarter-eagles. One and three-dollar gold pieces were formerly coined, but they were discontinued in 1890.

The first coin called an eagle was used in Ireland in the Thirteenth century, and was so called from the figure of an eagle impressed upon it, but it was made of base metal. The standard of the eagle was borne by the ancient Persians, and the Romans also carried gold and silver eagles as ensigns and sometimes represented them with a thunderbolt in their talons.

Charlemagne adopted the doubleheaded eagle as the standard of the holy Roman empire. The eagle was the standard of Napoleon I and Napoleon III, as well as Austria, Prussia and Russia.

An Easy Problem.

"May She Invite Him Into the House?" asks an advertisement for the Book of Etiquette; and explains the illustration thus: "They have just returned from a dance. It is rather late, but the folks are still up. Should she invite him into the house or say good night to him at the door? Should he ask permission to go into the house with her? Should she ask him to call at some other time?" One answer crowds upon another's heels, so fast they follow. First, we shouldn't take seriously the laws of etiquette laid down by anybody who, speaking of the not-yet-retired parents, says "the folks are still up." What sort of girl has "folks"? Dear, dear! not to say Fie, fie! Second, if it's the kind of dance now current the folks wouldn't be still up; they'd be up already. And as to what she should do, no book ever published can help her. The questions are all local issues, depending on her and him. Our solution is that she should ask him in to breakfast.-New York World.

Starboard and Port.

The ancient rule of the road was to keep to the right and drive from the left, because the first animals driven in civilized countries were cattle and the driver, walking beside his oxen, plied his gad with the right hand. Italian sailors made starboard the right side of a ship in their earliest voyages. The term was evolved by the British from "esta borde," meaning this side, while larboard came from the helmsman, first probably with gestures of the hand accompanying the call.

In heavy weather, and under other adverse conditions, the two terms became confounded frequently in speech. Larboard was dropped and in its place port was employed, for port meant port wine, which is red, and red is the color of the light on that side of the

Mystery Explained.

In Lake Manitoba there is a little island from which issues a mysterious sound. The Indians supposed this island to be the home of Manitoba, the speaking god, and from this is derived the name of the lake and the province. The real cause of the sound is the beating of the waves upon the huge pebbles lining the shore. On the northern coast of the island is a long low cliff, composed of fine-grained limestone, which, beneath the stroke of a hammer, rings like steel. The waves breaking at the foot of the cliff cause the falling limestone fragments to clash one against the other, and the sound thus produced resembles the chiming of distant bells.

Defends Puritan Architecture.

Wallace Nuttings' book on "Furniture of the Pilgrim Century" is an argument to disprove the fallacy that the Puritans were insensible to beauty and art.

Of the rugged substantial relics of their building, Mr. Nutting says, "There is solidity in them, durability, freedom from caprice, and an expression of that sober rationality everywhere characteristic of the Puritan genius.

"For adaptation to climate, wise use of accessible materials, inner cons venience obtained at low cost and freedom from discordant lines, Puritan domestic architecture deserves high

This is no less true of their furniture accessories. It is wrong to assume that their austerity and simplicity were forced upon them by mere hardship. Rather were they the outward expression of an inner nobility and spiritual exaltation.

Amusing, but What About Musicians?

An unrehearsed scene was enacted during the production of the revue "Splash Me" at the Tivoli Music hall at Hull, England. A spectacular feature is a great glass tank, said to hold 20,000 gallons of water, in which "bathing belles" disport themselves. As the tank was being prepared for the performance the rear side burst and water flooded the stage. The revue artists scampered off, but many of the musicians were drenched. The water found its way to the basement beneath the stage, and stood at such a level that the orchestra, on an elevated platform, had to play with their feet in several inches of water when they returned to their places. The consternation of the audience gave way to amusement when the orchestra was overwhelmed. The bathing scene, of course, had to be abandoned.

Wasseley and Gordon.

There was nothing that Wolseley loved better than to recount the adventure of his seeing Gordon off to the Soudan on November 18, 1883, and his dramatic conversation at the London railway station, says Edmund Gosse, in an appreciation of Lord Wolseley. Gordon was settled in the train when Wolseley asked: "By the way, general, I suppose you have plenty of money?" "Not a penny!" And Wolseley, adds Mr. Gosse, would recount how he dashed in a hansom to his bank, and brought back the banknotes just in time for the indifferent Gordon to slip them into his pocket as the train went off.

PUBLIC SALE

The undersigned will offer at public

Will buy any number of bees in any kind of hives. Write card at once, saying how many you will sell.

ROCKWARD NUSBAUM, 3-17-tf Uniontown, Md.

International 8-16

A Two-Plow Tractor That PULLS Two Plows And THEN SOME

Performance of the International 8-16 in hundreds of competitive tests on farms proves that this Tractor can and does pull its rated load-regardless of soil conditions. Working alongside of some so-called 2-plow Tractors, the International has repeatedly out-performed them.

International owners say-"I use it on farm land where other Tractors wouldn't go"-"I have used an International 8-16 for three years and it is the best all round Tractor that I have seen"-"We purchased an International 8-16 because it excelled other 2-plow Tractors in power, equipment, safety and ease of operation."

This proved performance is one of the reasons why we are justified in saying that the International 8-16 is the greatest 2-plow Tractor value ever offered.

\$670.00

FREE PLOW OFFER EXPIRES MAY 1st.

Between now and May 1st., we will give to every purchaser of an International 8-16 Tractor a genuine 2bottom P. & O. Plow FREE, f. o. b. Chicago. But this is a special offer only until May 1st. and demands quick action. See us today.

(Under the same conditions a 3-bottom plow will be given free with each Titan 10-20 Tractor at \$700. Both Tractor and Plow f. o. b. Chicago.)

Gallatin brought back to Templeton the news that Fred Ballard had got those Tulsa oil wells of his by marrying a squaw. Gallatin and Ballard had had nothing in common in Templeton; moved in quite different circles. Judging from what Gallatin said to Mary Holden at the Kimmet house Wednesday dance they had had nothing in common in Oklahoma.

"The fellow was no crony of mine, either here or there, so I don't mind tattling. Of course, I wouldn't tell the story to a friend of his, but you probably never heard of him till he went away and struck the oil."

"You may tell it to me quite safely," remarked Mary, indifferently.

According to Gallatin, Ballard was one of a party of prospectors that guessed out a pool of oil under a quarter section owned by a drunken Cherokee. They found the Indian fighting snakes in his shack and being fed teaspoonful of doses of Jamaica ginger by his stolid, moon-faced daughter. The others left Ballard to make a deal with the Cherokee as soon as he came out of his jim-jams. Instead of which Ballard rushed the girl off to Tulsa that evening and married her, leaving the old man alone with his snakes. When they got back next day the Cherokee had gone to the Happy Hunting Ground and Ballard's wife was the owner of a couple of million dollar's worth of remarably fine oil land. "Sweet way to get your money—what?" commented Gallatin. "Nice country, that! lovely ethics!"

"You're not going back?" inquired

"No. Only the blackguards succeed out there. Besides. it's a rotten hole for a fellow's wife." It was a boldly significant look that Gallatin bent on the girl, and he pressed her fingers as he took her hand to lead her out on the floor, for the music had begun

But Mary, declaring the orchestra's selection "simply dreadful," sent Gallatin off to dance with neglected little

I Don't Mind Tattling.

Edith Prince. Then, finding her wrap, she went out on the long veranda to be alone in the crisp, starlit night.

So that was the sort of man Fred Ballard was, after all! Gallatin could have had no reason to invent or embellish the story, for neither he nor any of her friends was aware that she was even acquainted with Fred. Oh, well, what had she known about him, really? Only he had seemed so genuine, so dependably fine and honorable. Andyes, she might as well admit it-she had loved him. Thank God she had kept her love a secret, even from

So ran the girl's thoughts bitterly. Ballard had been rather a nobody in Templeton, from the viewpoint of her set-just an under-executive in her father's factory. But their eyes had met one day last spring, and since then -well, she had had her dream. What a cad he must be! Yet how secretly proud of him she had been, when on the one accasion when he had called on her he had said so manfully.

"Miss Holden, I am going away to try to make some money. If I succeed I shall come back and try to make you love me.

She had been perilously near to saying something then that she would have been sorry for now. What she did say, however, was: "That is your right, Mr. Baliard."

He had never written. There had been a sort of tacit understanding that e should not. But word had come back that he had prospered immensely. In her secret heart she had been looking for his return.

And now! A taxi relled up to the curb fifty feet away. Even while its occupant was paying the driver Mary recognized him and shrank back into the deepest stadows. Gallatin, searching for Mary, met Ballard face to face under

I the electric globe in front of the entrance. It was strange, Mary thought, that Gallatin, after what he had said, should greet Ballard so effusively; stranger yet that it should be Ballard who withheld his hand, ignoring that of the other man.

"I have shaken hands with squaw men," she heard Fred say, "but it was when they stuck." Then she saw him pass Gallatin by and enter the hotel. Gallatin stood uncertainly under the light for a moment, then he too went in and almost immediately emerged again, hat and coat on, and hurried

For a single instant there came to Mary Holden the longing that Ballard would come to her there and tell her Gallatin's tale was a lie. It did not tarry. Why should Gallatin so libel another man gratuitously? And how weak and silly it would be, with Ballard likely to appear at any moment! No, she didn't want him to come. She didn't want to see him, ever again. All she wanted, now, was to escape without encountering him. For she had loved him. She had! She had! And it was all a disgraceful, horrible affair! She would get away, now, at once, without going indoors again. There would be taxis at the corner. But when she had almost gained the steps at the front Ballard came out.

He was strong and sturdy looking and not too big. Mary stopped short in her tracks, unintending, and looked at him, straight in the eyes. Ballard stopped, too, futilely speechless. But into his eyes there came a look, so glowing with candor, so full of the frank worship that had sent him away and brought him back, that all at once Mary knew, so well that 10,000 proofs could not have made her surer, that Gallatin had indeed lied.

"You didn't marry an Indian girl out there," she cried, shaking her head slowly. It was as if she were talking to herself, with nobody about, and there was a queer little shaky tremble in her voice that told Ballard what he would gladly have given all his oil wells to know. "No, you didn't marry

"No," said Ballard. "Gallatin did." "You see," said Ballard afterward. "Gallatin thought I was starting, with some other oil men, for China and wouldn't be back here for many months. It was an easy story for him to tell, because he knew it from experience. He came to me broke, out there. I gave him a job with a scouting party. It happened just as he told you. Only it was he that tried to turn the trick for himself instead of for his employer. He married the girl, all right. But there wasn't any oil under her land, after all. A month ago he sold the land to a speculator for his carfare and jumped out, deserting the squaw."

"But I don't understand, even yet, what made him tell me that horrid lie. He didn't know that we-that I-oh, you know just what I mean!. I'm just as sure you never mentioned my name to him as I am that I'm alive!"

Success had brought composure to Fred Ballard, given him an air of quiet self-confidence. But he was suddenly as disconcerted as a boy at his first dancing class. "Why, er-r," he stam-I was spilled and knocked out. They ripped my clothes off, looking for the damage. There was a picture—a snapshot. Gallatin was along. He must have seen. Do you think-it was taking a—a liberty?

"Next to your heart? All this time?

FELT PRESENCE OF ANOTHER

Sir Ernest Schackleton and His Companions Buoyed Up by Thought of Providential Guide.

In the late Sir Ernest Schackleton's book "South," which was the story of his dramatic expedition of 1914-1917, the following passage occurs in a chapter describing the loss of his ship Endurance and of his 300-mile journey in a twenty-foot boat through snow blizzards and a heavy sea:

"When I look back at those days I have no doubt that providence guided us not only across those snow-fields, but across the storm-white sea that separated Elephant island from our landing place on South Georgia. I know that through that long and racking march of thirty-six hours over the unnamed mountains and glaciers of South Georgia it seemed to me often that we were four, not three. I said nothing to my companions on the point, but afterward Worsley said to me. 'Boss, I had a curious feeling on the march that there was another person with us. Crean confessed to the same idea. One feels 'the dearth of human words, the toughness of mortal speech' in trying to describe things intangible, but a record of our journeys would be incomplete with. out a reference to a subject very near to our hearts."

It is men who travel in the wilderness and the loneliness of great spaces who oftenest report experiences like these. Perhaps the reason why we who do not have this consciousness of the "other side" is that "the world is too much with us."

Was Offense Meant?

The ex-kaiser made himself extremely unpopular the Easter after he purchased the late empress of Austria's magnificent palace, now a British military hospital, in the island of Corfu. He sent Easter eggs, together with his "best wishes," to nearly all the inhabitants of that picturesque isle. The eggs were made of soap, which it seems is the one thing the natives hate most. In consequence they regarded the ex-kaiser's eggs in the light of a deadly insult.

WHY=

Condensation of Moisture Results in Fogs

What is fog? The average person would say it is low clouds resting on the earth's surface. This is quite true, but the question is usually dropped at this point and little thought is given to why these clouds form so much nearer the ground at some times than

As the weather bureau explains it, both fog and clouds are formed when condensation of moisture takes place in the atmosphere. Fog is composed of minute particles of visible vapor. They were once believed to be hollow spheres, but science now declares that each individual drop is a solid body of water enveloping a particle of dust in the air and supported by the upward tendency of air currents and the resistance of atmosphere to the falling of minute spherical particles. The diameter of the smallest visible particles of fog has been estimated to be 1-180

Fogs are seldom more than 1500 feet in depth, and sometimes they only extend 20 to 30 feet above the ground. They have been known to form in a

stratum to only the height of a man. In accordance with the conditions under which fogs develop they are di vided into two general classes, "radi ation fogs" and "advection fogs." The former kind, which may also be designated as "land fogs" and "summer fogs," are likely to occur along streams and rivers and in mountain valleys during any clear, still night in summer and fall. In such regions during a warm, calm day, considerable water becomes evaporated into the lower atmosphere, where, if the weather remains calm, a large portion of it lingers after sundown. This moist air, together with the heat from the earth at night is cooled rapidly by radiation into the clear sky, and they often cool to a degree below the dew point, which condenses the moisture into a visible vapor known as fog .-Indianapolis Star.

FOUND BALLAST LOST WEIGHT

How Ship Captain Discovered Properties of What Are Known as the "Barking Sands."

Fifteen miles from Waimea, Kauai, where Captain Cook first landed on Hawaiian soil, are a line of windswept sand hills called the Barking sands. When dry, the wind on the sands makes them rustle like silk; to stamp on them brings forth different cadences; while to slide down them produces sounds like a dog barking.

For many years the problem of this phenomenon remained unsolved until the captain of a sailing vessel, one day, used the sand for ballast. Sailing out to sea, his ship became unmanageable against the wind. On examination, the captain found that his ballast had greatly reduced in weight. Further examination revealed the presence of minute cavities in the sand granules.

The captain had filled his ship's hold with water-soaked sand. When the moisture evaporated, nothing was left mered, "you see, my car got ditched but the hollow grains, which were too

The injection and ejection of air into and out of the cavities are supposed to produce the curious sounds.

Why Heat Turns Iron Red. Probably more than one small boy has "stumped" his father by asking him what makes iron turn red when it is heated sufficiently. The reason is simpler than most fathers suspect.

Heat, if there is enough of it, al ways produces light. The heat of the sun surpasses all calculation and con jecture. It is the film inside the glass globe, heated to incandescence, which gives the electric light. As iron absorbs heat it first becomes a dull. brownish red. Then it becomes & bright red and finally, as it is heated to the melting point, it becomes a white so dazzling that it inflicts pain on the eye looking at it. The varying shades of color are produced by the varying heat.—Cleveland News-Leader.

Why Ship Is Feminine.

A ship is invariably spoken of as of the feminine gender. This is traced to the ancient Greeks, who called all ships feminine names out of respect to Athens, goddess of the sea. Friday is believed to be an unlucky day by those who are superstitious. It is derived from the fact, it was the day of Christ's crucifixion, as well as the one on which Adam and Eve ate the forbidden fruit. Few, perhaps, are aware why a weathercock is frequently attached to a church steeple. This is believed to remind people of Peter's denial of Christ. It is a common belief that peacock's feathers are unlucky. This is due to the tradition that the bird opened the gate of paradise to the serpent.—Exchange.

How Watches Are Affected.

A strange phenomenon, due, according to scientific authorities, to still unexplained magnetic influences, has for a whole month been observed daily in London. Watches and chronometers have been stopping suddenly. It has been useless to take them to the watchmaker, who could not detect the trouble nor remedy it.

After the lapse of an hour of two, however, the watches begin going again, and all that is needed is to set them at the right hour.

Why He Was Jovial. "Hooray!" exclaimed Mr. Crosslots. "We're going to have a long, hard blizzard!

"Why should that cause you to rejoice?" inquired his wife. "Cook can't possibly leave till it's

BACKERS ARE KEPT GUESSING

About One of the Most Uncertain Sporting Events Imaginable is a Cockroach Race.

Russian refugees in Constantinople turn their hands to all sorts of moneymaking devices. The latest and most successful are ceckroach races. These are held in rooms which the Russians hire along the Grand Rue de Pera. The story as told by Kenneth L. Roberts in the Saturday Evening Post, is that in the center of each room is a large table with a miniature race track built on it. The owner places a box at one end of the track and waits until his patrons have made their bets on five contestants. Then he opens the box and discloses five enormous cockroaches attached to diminutive sulkies. As the box is opened four of the contestants may start briskly around the track, while the fifth may turn abruptly and canter in the wrong direction amid heart-breaking groans from those who are backing his colors. Then the leader of the four racers who are headed in the right direction may stop short and twiddle his feelers pensively, and the other three may also stop and cluster around him to investigate the cause of the delay. While the conference is in progress the cockroach that started the wrong way may change his mind, turn and come dashing past the four idlers with his eyes flashing and his tail up. Then the four idlers may recover from their momentary ennui, start briskly up the track again and pass the fifth contestant, who has probably fallen into a brown study and leaned up against the race-track wall with crossed legs and weakly waving feelers. And so it goes, until one of the cockroaches finally pulls himself together and scuttles across the finish line.

SEES POSSIBLE FALL OF MAN

Scientist Points Out How the Race May Sink to the Level of Lower Savages.

"Some millions of years from now an entirely new and more highly organized animal may spring from some ancestral stock now relatively obscure and rise, at first slowly and then more rapidly, to even greater heights of achievement than anything which lies within the capacity of the human species.'

After tracing the geologic evolution of the earth so far as man knows it, Dr. Eliot Blackwelder of Harvard university, at the meeting of the geological societies of the American Association for the Advancement of Science, in Toronto, Canada, in these words suggested the possibility of a future usurper of man's pre-eminent place on

"As our modern civilization becomes more and more specialized and diversified, our relations to our environment become more and more complex and our adjustments more delicate," Doctor Blackwelder said.

"Eventually, after all the latest possibilities for advancement possessed by the human species have been exhausted, the race may conceivably back to the general level of the lower savages, which are but little above the other mammals."-Kansas City Star.

EASTER LESSON

LESSON TEXT-John 20:19-31 GOLDEN TEXT-The Lord is risen in-deed.-Luke 24:34. PRIMARY AND JUNIOR TOPIC-The

INTERMEDIATE AND SENIOR TOPIC

Why We Observe Easter Day.

YOUNG PEOPLE AND ADULT TOPIC The Effect of Belief in the Resurrec-

I. Jesus Manifests Himself to the Disciples, Thomas Being Absent (vv.

He appeared to several of His disciples at several different times during that day. This is the first appearance to the disciples as a body. The rumors of His several appearances on that day caused the disciples to assemble to talk over the matter. For fear of the Jews, they met in a private room and barred the door. While they were discussing the strange happenings of the day, the Lord mysteriously appeared before them with the greeting of good cheer, "Peace be unto you." He did not come with censure for their failure and desertion. At His birth the angels announced "Peace." Just before he took His departure, He said: "Peace I leave with you; my peace I give unto you" (John 14:27); "Let not your heart be troubled" (John 14:1); and now the first word after His resurrection is "Peace." Having calmed their fears, He gave them an unmistakable evidence of His resurrection. "And when He had so said, He showed unto them His hands and His side. Then were the disciples glad when they saw the Lord." Their doubts needed to be scattered, and His peace needed to be upon them. Consider:

1. The disciples' commission (v. 21). "As my Father hath sent Me, even so send I you." This commission was not simply to a class, as the eleven, but is to all Christians. In Luke 24:33 we find that there were others there in that meeting besides the eleven when Jesus showed himself to them and commissioned them, showing that the commission is not confined to a class or order, but is wide as the Christian body itself. All Christians, therefore, are envoys and representatives of Christ. The exercise of this great function is not merely optional with the individua, but is obligatory upon him. The Lord placed it upon a plane with His own commission from the Father-"As my Father hath sent me, so send I you."

2. The disciples' equipment (v. 22). "He breathed on them, and saith unto them, Receive ye the Holy Ghost." The mission of the disciple is a very great one, but every one who goes forth in its execution He clothes with the power of a new life by the bestowment of His spirit. No one who has this equipment shall ever fail. The Lord's representatives have His life in them. The barrenness of our efforts is due to our failure to take by faith our equipment.

3. The disciples' authority (v. 23). "Whose soever sins ye remit, they are remitted unto them; and whose soever sins ye retain, they are retained." This authority was not by virtue of office, but by virtue of having the Holy Ghost. This would give the spiritual discernment to know who had or who had not repented, and consequently, to pronounce pardon or not.

II. Jesus Manifests Himself to the

Thomas was absent at the first appearance of Jesus. His absence deprived him of a vision of the Lord. Absence from the assembly of believers always occasions loss. The other disciples go to Thomas at once with the glad news of the resurrection, but he will not believe. His stubborn disbelief is such that he doggedly declares that unless he sees the prints of the nails, etc., he will not believe. It is right to demand evidence, but to pre-

scribe terms is rank unbelief. Note: 1. The Lord's kindness to those who have difficulties. Thomas deserved rebuke, but the Lord kindly supplied the evidence which he demanded.

2. The revelation of the Lord transforms a doubter into a possessor. III. The Conclusion of the Gospel

(vv. 30-31). In these verses John's arguments are summarized, and an explanation is given as to why he wrote this Gospel. Many other things could have been written, but these that he wrote he judged adequate to prove his point: To prove that (1) Jesus of Nazareth was the expected Messiah; (2) that He was divine-the very Son of God; (3) that those who believe on Him as God's only Son-the Messiah-would receive eternal life. Eternal life is in Him and only as He is appropriated by faith can men be saved.

What Christ Saw in World. Christ saw much in this world to weep over, and much to pray over; but He saw nothing in it to look upon with contempt.

Happiness in Our Heart. The happiness that we vainly seek the world over is all the time within us, nestled close to our own hearts .-Bruce Calvert.

Our Comforts. Most of our comforts grow up be tween our crosses .- Young.

THE -**CHRISTIAN ENDEAVOR** TOPIC

--- From---Moody Bible Institute Monthly Chicago, Ill.

April 16 Citizens of Two Worlds Romans 12:1-2; Philippians 2:13, 14, 20; 1 Peter 1:3-5

Looking at our Scripture verses in the reverse order from that given, the sum and substance of their teaching is this: Christians are begotten of God they are partakers of the divine nature, and are the children of God not in name only, but * in reality. The Fatherhood of God is to them not a high-sounding and meaningless phrase but a great reality, truth of experience and a matter of joy.

A child of God is also a member of the spiritual body of Christ with a citizenship in heaven from whence he looks for the Saviour, the Lord Jesus. Because of these things, the Christian believer is called to present himself unto God as a living sacrifice and to "be not conformed to this world." Even though a citizen of this present world, he has to go through it as a pilgrim, looking as did Abraham for the city that hath foundations whose builder and maker is God." This does not mean that a Christian is without obligations to governments and those in authority or that the rightful duties of a good citizen may be ignored or neglected. As a matter of fact, intelligent Christians make the best citizens in all countries and at all times. The love of God is shed abroad in the hearts of Christians. God's law is written there. The Holy Spirit abides there, and as a consequence there is a ready support of every righteous cause and a response to all righteous requirements. But in all this a true Christian keeps himself separate from the world's spirit, and does not conform to the world's ways.

The testimony of Scripture concerning this world is worthy of careful study. The word itself is a trans-lation of the word "cosmos" which occurs in the New Testament 186 times and also of the word "aion' which occurs at least 100 times. "Cosmos" signifies the material world, the world people and also the world system. According to our Lord's own words in John 14:30, Satan is the prince of this world. Concerning his own discipes, Christ said, "They are not of the world even as I am not of the world," and the apostles' testi-mony gives further light concerning the world system under which world-dwellers live. This includes society, politics, business and the world's religion. For further scriptures, see Ephesians 2:2; Galatians 1:4; 6:14, James 1:27; 4:4; 1 John 2:15; 5:19.

Much Sickness May Be Prevented by Adoption of a Few Preventive Measures.

A few precautions will decrease the Hability of catching cold from exposure to the rains of winter—as well as its snows. Some of the simplest preventatives are those that nature herself furnishes. None needs to catch a cold when wet if he or she will walk or run home briskly. Wet clothing draws the heat from the body and lowers the temperature below normal. This is dangerous. But if the heat of the body is maintained by exercise, little or no harm results from the wet clothing. If obtainable, two or three lumps of sugar should be eaten. This helps the heart's action and supplies considerable heat to the body.

Many deride the popular belief that it is impossible to catch cold from a wetting with sea water, but the statement holds much truth. The salt retards evaporation, and thus chilling of Disciples, Thomas Being Present (vv. the body is delayed. Obviously, that is an advantage. Further, the salt acts as a stimulant, and assists the circulation of the blood. That is another advantage. Thus, unless in unusual circumstances, there is much less chance of a cold resulting from an immersion in the sea than in fresh

Those who feel much depressed in wet weather should form the habit of increasing their rate of breathing. The depression is due to the increase of vapor in the air, and the consequent proportionate decrease of oxygen. Quicker breathing, as is obvious, pumps more oxygen into the system, and the depression departs.

TAKE GUDE'S PEPTO-MANGAN

It is the Safe and Reliable Tonic used by Physicians for 30 Years

There are "new styles" even in medicines. A new "fad" comes, is popular for a while, and then fades out of public view. A remedy that has stood the test for thirty years must have remarkable merit and cannot be called a "fad." Such is Gude's Pepto-Mangan, originated by Dr. A. Gude over a quarter century ago, which has helped many thousands of people back to good health by improving the Pepto-Mangan is an iron tonic blood. It contains iron in a special form easily absorbed by the system. It puts color into the lips and cheeks and im-proves the entire body by improving and enriching the blood. It is sold by druggists in both liquid and tablet form. If you want to be well and strong and look fine and healthy, take Gude's Pepto-Mangan.

ALMOST WORSHIP THE MANGO

Natives of India Have Good Reason to Think Highly of That Really Wonderful Tree.

Mango trees line the roads on the hot Indian plains which stretch out level "like the palm of a hand," as far as the eye can see. These trees, about 40 feet in height, clothed in thick, heavy foliage, not only afford a welcome cool shade in the hottest day, but a variety of fruit which is said to have no rival in sweetness, flavor, deliciousness and food value. Under these trees the village school is kept in the forenoon, and the village children learn to love them from their childhood.

Nature is very prolific in the tropics, for one mango tree may yield almost half a ton of fruit in one season. The mango is a fruit varying in size from a small pear to a large coconut. The thick skin protects the flavor, and except for the stone, the entire fruit is used in many ways. It is eaten raw, or rather sucked, cut in slices, made into jam, pickles and mango cakes, and is used as a flavor for both sour and

Mango ice cream is a very delicious food, but, perhaps, of all the tree's products, mango chutney is the most famous. Mango is also used as a medicine, and is a specific for sunstroke, which it cures almost instantly. The poor Indian peasant loves this tree to almost adoration because of its wonderful qualities.

BEGIN "GOING" AND KEEP ON

Life's Prizes Belong to Those Who Get a Good Start and Refuse to Be Sidetracked.

It isn't a good thing to see everything. Make "this one thing I do" your motto and keep on going. A few extra criticisms will only smart you up a little and supply the grit that keeps folks

And hearing everything won't help you to advance, either. Suppose folks do complain. Remember, they wouldn't feel happy if they didn't have something to whine about. Let them whine. You're too busy to do anything but to keep on going.

If you're ever going to lead, you must start going now. Every fellow is going to wear the blue ribbon one of these days. To excel, you must begin as a youth to make good. Old-age

prodigies are scarcer than hen's teeth. The habit of success will spare you many a heart-ache. Thoughts of failure are the best means of insuring it. Vision that sees only life's promise, and will that thinks only in terms of victory, rises from what threatens defeat able to cope with any circumstance. It keeps on going.—Grit.

Elephants on Rampage.

Stories of how an elephant occasionally upsets a circus are not uncommon, but one rarely hears of an orgy of destruction like that which occurred in the Malay peninsula. A herd of wild elephants attacked a railway station, pulling down the stationmaster's kitchen and bathroom. They did the same to the clerk's quarters and then tackled the station while the office force looked on from trees. One elephant took off an automatic welghing machine as a souvenir of the raid, but finding it heavy, threw it down on the track. One of the elephants trumpeted the recall and they all went back into the jungle except one who fell in a well and had to be got out by human aid, but was not detained. By the time help arrived after a general telegraphic alarm the huge beasts had entirely disappeared.

Fireworks Development.

Few industries have shown more development within a century than that of making fireworks. The fireworks makers have not only made important contributions to the art themselves, but have taken advantage of discoveries and refinements made by others in chemistry and mechanics.

The colors given to fireworks are produced by mineral salts, copper being made to produce green and blue; barium, green; sodium, yellow; calcium, red, and strontium, crimson. These salts are arranged in combination with meal gunpowder and the recipes for star compositions, rockets, squibs, roman candles and the like are almost without number. Among the "set pieces" are portraits, lettered designs, "fixed suns," fountains, palm trees, mosaic work and ships.

First Method of Advertising.

In Old Testament times, when the countries bordering on the Nile, the Euphrates and Tigris rivers were the center of trade, the Carthaginians used to sail along the Mediterranean with a boatload of their manufactures which they would unload on the coast of Lybia, and having lighted a bonfire near the goods, returned to their ships. The inhabitants, knowing by the bonfire that the Carthaginians had something to sell, would come out of their city to inspect it. Then they would pile up gold near the merchandise and retire into the city. The Carthaginians would land again, examine the gold, and if in their judgment it was equal in value to the goods they left, they would take it and sail away. This bonfire custom is the first method of advertising of which his-

Worth Trying, Anyway. Cheerful smiles not only help those who see them, but actually help those who smile them to accomplish more. Try it.

tory tells.

FLOWERS FOR ALL PURPOSES

Some Simple Rules, the Observance of Which May or May Not Lead to Popularity.

"What you figuring on?" asked the

florist of his advertising writer. "On an elaboration into details of our plan to say it with flowers. I have arranged to state that the man who wants to smile at his wife should use smilax, that the man that wants to growl at her ought to say it with tiger lilies or dog-tooth violets, that the bird who wants to sweeten her up without the expense of a box of chocolates may use candytuft, that instead of giving her a wrist watch you can present her with a bunch of four o'clocks, that he who wants to serve notice on his spouse that he is out of funds needs only hand her a cluster of touch-me-nots, that when the larder is low and the grub money gone he can slip her some butter-and-eggs plucked from the roadside, that if he is bewildered by his love for the sweet young thing he can express his feelings by sending around a nosegay of love-in-a-mist, that if he thinks his girl is a cat and is afraid to say so otherwise he can endow her with a vase of pussy-willows, that if she has a lowdown opinion of him she can have a corsage bouquet of skunk cabbage delivered at his house—that's about as far as I have it worked out now."-Retail Ledger, Philadelphia.

NOT FOR PUBLIC PERUSAL

New York Girl Who Kept a Diary Found Means to Hide Homecomings From Mamma.

Ruth was approaching her nineteenth year and she considered herself old enough to remain at social affairs as long as she pleased. Her tolerant mother contended that a girl her age should be home at 11:30.

Ruth kept a diary. When she came home one night after mother had gone to bed mother took the liberty of reading her daughter's diary. "To bed at 12:15 a. m.," she said, the New York expert knowledge.

When Ruth returned from the office that evening mother and daughter had a quarrel. It was not long afterward that Ruth again came home from a dance after every one had gone to bed. Faithfully she sat down and wrote in her diary. Mother arose next morning earlier than the remainder of the family and rushed to the closet which held the diary. Quickly she turned the page until she came to the last contribution.

to the office. To lunch with Al, my the wars of Charles XII. It is part of country Romeo. Home to dinner at a collection of more than 30,000 speci-

6. To dance at the Center with Flos-sie at 8:30. Fine time, Home And then mother could read no more. What followed was written in shorthand.

Drama Democratic.

It is the good fortune of the drama that it is the most democratic of the arts, since it must direct itself to the people as a whole. Yet this appeal to the multitude has never debased the drama. "Hamlet" and "Tartuffe" are most popular plays; and they are also masterpieces of dramatic art. Shakespeare and Moliere did not condescend to the public; they gave that public the best they had in them, but with the utmost care to give it also what they knew it relished. Of course, very few pieces have ever had the breadth of appeal of "Hamlet" and "Tartuffe"; and the modern dramatist, when he is building his play, is likely to have in mind some subdivision of the throngeither the larger segment that craves the fierce joys of melodrama or the smaller cross-section that is ever eager to discuss the problem-play.-Brander Matthews.

Rubber and Maple Sugar.

An interesting parallel has been drawn between the different varieties of rubber trees in the tropics and still long and strenuous, but the boys those of maple trees in this country. Out of about 1,000 varieties of trees, all of which produce more or less rubber sap, only forty or fifty have been any curriculum whatsoever. Their nafound whose product is considered commercially valuable.

When a would-be cultivator of rubber goes to a tropical country and sets out a plantation of rubber trees, which the natives know do not belong to the right variety, he causes amused comment, such as would be excited by a South American who came to the United States and bored holes in soft maples with the expectation of obtaining sugar sap. Experience has shown that excellent rubber trees transplanted from their native habitat or other regions having apparently identical soil and climate may flourish in growth, yet lose their producing power. Rubber culture requires great

Largest Known Coin,

Probably the largest coin in the world is one belonging to Farren Zerbe, internationally famous expert on rare coins. It is a piece of stamped copper plate 10 inches square, and weighs 61/2 pounds. It has a value of "4 Daler" (the daler was a coin of varying value) stamped on it, and the date 1730.

Such coins were commonly used in "Arose at 7:30," she read "and went | Sweden for some time during and after

mens, representing mediums of change of all countries and periods from the earliest times to the present day. The total face, or original exchange, value of the collection in counted in millions, but no present value has ever been placed on it.

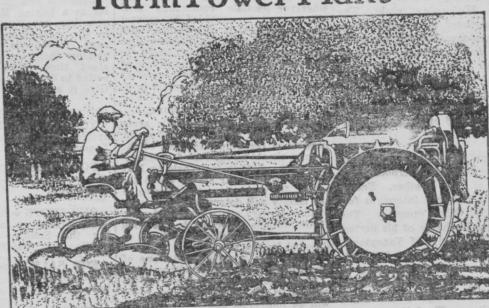

COREAN BOY MATURES EARLY

Youngster May Be Married at Age of Seven, According to Custom of the Country.

Any time after a Corean boy is seven he may be married, and he is seldom still unengaged at 12 or 14. At that time he winds his pigtail-if he still wears one in these crop-headed days -into a topknot and swaggers a bit in the presence of the unbetrothed. Formerly, if a Corean boy had any schooling at all he squatted all day on the schoolroom floor, learning to read and write, but not to speak Chinese, and he would have thought himself well educated if he acquired a vague knowledge of the maxims of Confuclus. He often felt content to carry a "jiggy" or to drive a pack pony or even to act as nurse to the baby while his older brother wrestled with the Chinese classics. Under the new regime the school hours are pursue a Japanese course of study in Japanese. They probably would vote their games more interesting than tional sport is stone-fighting, which they carry on during the first fifteen days of the New Year. At the same season they have sky tournaments, in which they cut the string of one another's kites and take the falling kites as prizes.—Marietta Neff in Asia Magazine.

When Ingenuity Triumphed. Caught short on time with a New York opening date booked, and facing a huge loss for each day's delay, a moving-picture producer made arrangements to edit, title, and cut the play en route between Los Angeles and the eastern metropolis recently. With a special car equipped as a laboratory and attached to a limited train, the work was found entirely practical even while speeding eastward at a mile a minute or more, Twenty-eight heavy steel containers carried the original film, which remained in the "can" all the time it was not actually in use. Editors and cutters worked continually, stopping only for meals and for a few hours' sleep at night, and on these occasions every scrap of film was returned to Its proper container. The work was entirely successful; and by the time the train arrived in New York the film was finished and ready for delivery. -Popular Mechanics Magazine.

MOLINE The Universal Farm Power Plant

3-2 PLOW CAPACITY

The Moline is a 3-2 plow tractor that does all belt and field work, including cultivating, with ONE MAN. It is the correct farm power unit.

Records of performance made by owners with this tractor show that it eliminates an average of 4.7 horses per farm and saves on the yearly cost of crop production. That much money saved is just that much money made, in addition to the regular profit made from crop income.

If you want to make a profitable investment in farm power, come in and look at the MOLINE. And remember that-

If desired you can use the "drag behind" or horse-drawn implements you now have with the Moline tractor the same as with other types of tractors.

This Tractor is reduced to \$1000.00 including Plows, Self-starter and Electric

Moline 3000-lb. Truck: it will pay you to get prices and have it demonstrated before buying. All kinds of Moline Machinery on hand. It will pay you to get prices on Ma-

nure Spreaders and all Machinery, before buying elsewhere.

GEO. R. SAUBLE

PHONE 7-J

AGENT,

John L. Zimmerman is acting as office man, or store-keeper, for H. A. Allison.

Those who spent the week-end with William Ohler and family, were: Mr. and Mrs. Clyde Morningstar and son, Bobby, Mrs. Edward Shorb and son, Ralph, and Miss Nellie Kiser.

Mrs. W. F. Cligan, Mr. and Mrs. John Smith and Mr. and Mrs. Frank Gise and son, of York, spent Sunday with Mr. and Mrs. Robert W. Clingan and Mr. and Mrs. Curtis Reid.

Read the detailed statement of the County Commissioners, in this issue, with reference to the Bond proposition. It may throw a new light, to some, on the whole question.

Miss Daisy Formwalt, near Fairview, spent last Saturday with her sister, Bassett Shoemaker and family, near Taneytown; Miss Irene Shoemaker accompanied her home to spend some time with her.

Garden-making and lot plowing started off with a rush, the first of this week, for the townites, while the farmers are as busy as a lot of bees, with all sorts of Spring work pushing to the front to be done.

The many friends here, of J. Frank Weant, of Baltimore, were very sorry to hear that he suffered a light stroke of paralysis, while in his office, on Monday of last week. From last report, he was improving.

It is the belief of some that illicit distilling of "bootleg" stuff is being hunted by the use of airplanes. Our impression is that this plan would be of very slight help, and doubt whether it is very much used, if at all.

Norval Rinehart, was arrested, on Tuesday and taken to Justice Walsh, of Westminster, charged with the larceny of hives of bees from one or more persons. He was released from custody on bond being furnished for his appearance before the Grand

The Taneytown High School team, of the County H. S. baseball league, lost its first games of the series; one to Union Bridge, last Friday, score 5 to 1, and the other to Hampstead, on Thursday, score 8 to 1. The locals played an excellent fielding game but lar district to aid by advice and sugfailed at the bat. In both cases they met much larger and heavier players -were outclassed in age. Better luck next time, boys-go at 'em hard!

ed. The U. B. Church is also donning a new dress outside, to correspond with its new interior. Wm. G. Feeser's dwelling is ready for paint as soon as the artists are ready. Chas. E. H. Shriner is remodeling the old Grange Hall into an apartment house, and some others are looking around, likely to get the habit any time. So, Middle St., is saying to the town-we're going-come on!

Mrs. Marian Sherald, of Annapolis, daughter of Mr. and Mrs. John E. E. Hess, of Taneytown district, was very seriously burned, last Sunday, by the explosion of a gas range. She had explosion of a gas range. She had been using a can of liquid stove polloaf, you know." ish, likely containing gasoline, or benzine, and temporarily placed it in the oven of the range, then forgot it, and lighted the burners in preparation to place a roast in the oven. On on the range of the range, then forgot it, and lighted the burners in preparation to place a roast in the oven. On on the range of the range, then forgot it, and why should I? Don't you see I didn't take the loaf man alive?" And away he quietly walked, leaving the worthy dealer lost in a brown study.—Alliance News. ish, likely containing gasoline, or to place a roast in the oven. On opening the oven the flames shot out and burned her severely about the arms and body. She is at the Annapolis Hospital, and is reported to be improving.

(Continued From First Page.) the Westminsttr and Littlestown road and between Silver Run and Union Mills has been erected one of the most attractive and modern school buildings in the county. Consequently, under the proposed bond issue the sum of \$45,000.00 is allotted to Frank-lin for roads, and to Myers' only

The sums therein allotted to the several districts are as follows:

For Taneytown district, \$25,000.00. For Uniontown district, \$35,000.00. For Myers' district, \$15,000.00.

For Woolery's, \$20,000.00. For Freedom, \$25,000.00. For Manchester, \$15,000.00. For Westminster, \$20,000.00.

For Hampstead, \$15,000.00. For Franklin, \$45,000.00. For Middleburg, \$25,000.00.

For New Windsor, \$20,000.00. For Union Bridge, \$20,000.00. For Mt. Airy, \$20,000.00. For Berrett, \$35,000.00. HOW THE MONEY IS TO BE SPENT.

The bill does not provide for the borrowing a lump sum of \$700,000.00. The money, if borrowed at all, must be borrowed within five years as need-When the Board of Education shall notify the County Commissioners that any one or more of the above named school buildings are to be constructed; and that contracts have been awarded, to the contractor, who is the lowest bidder, and whose bid is less than the sum above named for the said school building, the contractor giving bond for the faithful performance of his contract; then and only then shall the County Commissioners borrow the money and issue the nec-essary bonds. The bill makes it impossible to spend more than the amount specified for the respective buildings, and does not permit the use of money provided for one building to be spent on another; nor the money provided for roads in one dis-

trict to be spent in another.

HOW BONDS ARE TO BE ISSUED AND REDEEMED.

The bonds are to be issued in series; the first series of \$35,000.00 to become payable on the 1st. day of July 1927; and a series of \$35,000.00 on the 1st. day of July in each and every year thereafter; the last series to fall due on the 1st. day of July 1947. In short, after the issuing of bonds, it will be necessary for the County Commissioners to provide in the annual levy of taxes for the interest of whatever bonds may be issued; and in 1926 to levy a sufficient amount to redeem \$35,000.00 of bonds in 1927; and the same amount annually, or about 10 cents on the \$100 annually for the redemption of bonds until the whole are redeemed. AS TO ROADS.

It was possible to name specifically the school buildings, the erection of which is contemplated. The reason why this could not be done with reference to roads is self-evident. The County Commissioners could do no more, in advance, than name some specific amount for each district. As to when, how, and where within the several districts the several amounts shall be expended, it will be necessary for the residents of the particugestion in determining what road building is most imperatively needed. It is believed that wherever possible, district should co-operate with district so that wherever practicable the mon-The Metropolitan Glee Club delight- ey expended on road construction in one district should be linked up with

Look Up!

The country publishing business is no cinch. It is not an easy game. The country town editor must build a paper with meager facilities and make it interesting when the interest is not there. He must watch the pennies forever, and be satisfied at the end of the year with modest returns for his labors.

But he has no business to be low spirited. He is a leader of his com-munity. He is performing for his community that which is expressed in one of the three greatest words in any language—SERVICE, the other two being "love" and "home." If he respects himself, he is respected and honored. Life is much fuller to him of the best things than to the city newspaperman who dogs his weary way along as the salaried hound of some millionaire paper owner. Look up! Cheer up!—American Press.
