## TWO KILLED IN AUTO ACCIDENT.

### Victims were Mr. and Mrs. Samuel Clabaugh, of Ladiesbrg,

An automobile accident occurred near New Oxford, Pa., on the Lincoln Highway, last Sunday morning, in which Mrs. Samuel Clabaugh, of Ladiesburg, Frederick County, was so severely injured that she died from a freetward shall and integral injuries. diesburg, Frederick County, was so severely injured that she died from a fractured skull and internal injuries at the Gettysburg Hospital, Sunday evening, and her husband died on Monday. James Crum, a brother of Mrs. Clabaugh, and Mrs. Crum were seriously hurt, but will recover.

The accident was caused by a car going in the

The accident was caused by a car going in the same direction sidewip-ing the Clabaugh car and overturning it, the driver going on at a high rate of speed without stopping to give aid, and has not yet been found.

The roadway at the time was filled with Sunday traffic, but nobody seems to have secured the car number, or its make. The victims of the accident were on their way to New Oxford to visit the home of Mr. and Mrs. J. C.

The accident was due to the second car passing the Clabaugh car from the rear, on a curve, and meeting a third car coming, causing the driver of the second car to swerve in order

ing in and out of the traffic for a coning in and out of the traffic for a considerable distance west of the place where the accident occurred; that no car struck the Clabaugh car, but that it was wrecked by getting off the macadam into soft ground, and that the machine toppled over trying to get hack on the road. get back on the road.

of this week were unusually full of automobile accidents, many of them of a serious character. The excess in accidents was due largely to the crowded condition of the highways, on Sunday and Labor Day. The fact has been amply demonstrated, for several years, that Sundays and holidays are always greatly more dangerous for travel than ordinary week days, even though much of the heavy week-day traffic is absent.

This also demonstrates the fact that those who drive cars, on Sundays, are largely of the inexperienced class; also that many cars on the road invites racing and chance-taking. During the week, even with heavy traffic, most drivers are accustomed to the work as part of their business, and are more careful.

The lesson to be drawn from results

even by careful drivers, on Sundays

### Auto Accident near Taneytown.

An automobile accident occurred on the Emmitsburg road, near Sauble's, on Sunday evening, in which Theo-dore K. Miller, member of the firm of Daniel Miller & Co., Baltimore, whole sale dry goods, was severely hurt. Mr. Miller was driving toward Taneytown at about 35 miles an hour, and

upset, pinning the occupants underneath. Mr. Miller was cut on the knee, leg and face, requiring several stitches. The other occupants, Mrs. Miller and son, were but little hurt, points. but the car was considerably damag-ed. Geo. R. Sauble took the party to their home in Baltimore, on Universitv Parkway.

### The Penna. Headlight Law.

The new headlight law is now in for the championship on the last day. Parksley and Cambridge won both which requires certain lenses to be used on motor vehicles, and only such anti-glare lenses are now legal. Members of the motor patrol will operate along all main highways and stop every motorist whose lights do not comply with the law, and advise them to be corrected at once. to be corrected at once.

The lenses approved in Pennsylva- Va. nia are those approved by the Eastern Conference of Motor Vehicle Administrators, and are the only legal lenses in thirteen eastern states and

# ORGY OF WASTE

Ever since the world war, stories have been persistently afloat concerning the exorbitant costs and wages paid, during the building of Camp Meade. In fact, Camp Meade work and wages are very widely blamed for raising to extravagant figures, labor of many kinds, and for a general dis-organization of the labor situation in Maryland. The probability is, the ex-periences at Camp Meade have been duplicated at the building of other like

camps throughout the country.

A suit is now being instituted against New York contractors who built the cantonment, to be prosecut-

Thus the Government pictures conditions at Camp Meade during its constructions in 1917 in a bill of particulars filed in the United States District Court in connection with the Government's \$7,000,000 suit against Smith, Hauser and McIsaac, Inc., New York contractors who built the can-

The camp cost the Government approximately \$18,000,000. In the de-claration of its suit, the Government claims \$7,000,000 as alleged excess

selves warm, the bill charges.

oiles, and that wallboard and cement a prosecution under its provisions. were wasted and thrown on the dump

The bill further charges that great quantities of nails were lost because workmen formed the habit of dump-The lesson to be drawn from results is, that those who can as well use the roads other days than Sundays, ought to do so, for safety's sake; and that more than usual care should be taken, even by careful drivers, on Sunday. ranges were hauled to the scrap heap

Following the charge that more than 40 percent, of the material furnished the defendants by the Government was wasted, the bill alleges that over 40 percent, of the labor employed at the camp was "not used for the advancement of the project." Much labor was wasted willfully, it is charged, and laborers were allowed to leave their tasks during working hours for pleasure expeditions.

"Large numbers of men," the bill continues, "were directed to and did loaf on the job, walk around camp carrying a piece of board or a hand tool, and were permitted to and did sleep go fishing, swimming, shoot craps and otherwise gamble, leave their work and go to the canteens for cigars, tobacco, something to eat, return to work to smoke and eat, otherwise refrain from working, and absent themselves from their work.'

### Complaints of Bad Roads.

Reports of the growing bad condition of the State Road from Taney-town to Westminster, and of the retown to Westminster, and of the remarkably bad condition of the dirt roads in the northern section of this county, have been made at this office, by many, throughout the summer. It is commonly stated that the state road is disintegrating largely because of the need of concrete shoulders, or when and that the broken down edges curbs, and that the broken down edges

curbs, and that the broken down edges of the road are extending into the road bed itself, at a number of places.

The dirt roads are said to have been left, practically all of the year, with little or no work on them, and that they are now full of deep ruts in many places and are in a generally many places, and are in a generally bad condition. We personally know but little about the condition of the roads, but if they are anything like as bad as claimed, they surely need attention before the opening of winter.

What is said to be the second pipe organ built in the United States, in 1807, is still in use in Old Peace Church, near Mechanicsburg, Pa. The church, one of the oldest in the country, for 50 years was used as a school try, for 50 years was used as a school try, for 50 years was used as a school 28—Sunday.

### LAWS AGAINST TRESPASSING. The State's Attorney Quotes the Laws in Each Cases.

In order to get definite information on the subject of "Trespassing" and the notices required by law, we requested the State's Attorney to give us the facts, and have received his reply, which we give below. It is not quite clear to us just what "posting in a conspicuous manner" means. Whether it should be by signs, or notices, actually posted up on the premises, or whether a newspaper notice, inserted continuously, constitutes
"conspicuous posting" within the
meaning of the law.
We therefore revise the heading to

our "Trespass Notice" advertising, so that it at least constitutes a warning, This and the desire of property that no trespassing be indulged in their premises.

Editor Carroll Record :-Your favor of yesterday in which you ask what the law is with respect

acted by Chapter 549 of the Acts of Presidential elections, is as follows; 1922, and in this Act the provision requiring the written permission of the owner of the land is omitted.

### NATIONAL POLITICAL NOTES

### Main Events of the Week Affecting the Parties.

Labor Day was the time for political speeches by the various candidates on the National tickets. John W. Davis spoke at Wheeling, West Va.; Charles W. Bryan, at Elk Point, S. Dakota; Robert M. La Follette broadcasted from radio station W. C. A. casted from radio station W. C. A. P. Washington; Senator Wheeler spoke in Boston; President Coolidge addressed a group of labor leaders, at Wash-

La Follette attacked both old parties as being under the influence of "special interests," and promised that if elected he would "speedily remove the burdens that have been put on the mass of the people." Mr. Davis promised to seek the recall of the labor board, opposed the fixing of hours of labor by law, and asked for the satisfication by the states of the child labor by law, and asked for the ratisdation by law, and saked for the ratisdation by law, and asked for the satisfication by law, and asked for the ratisdation by law, and asked for the ratisdation by law, and asked for the satisfication by law, and asked for the satisficati La Follette attacked both old par-

and relief. Mr. Dawes will invade La Follette's state—Wisconsin—and make a speech in Milwaukee, on Sept. 15. on the "Constitution of the United States." It is quite probable that he will have something to say on "dangerous radicalism," as it relates to the Constitu-

Mr. Slemp, private Secretary of President Coolidge, issued a statement, this week, in which he stated that the President is not a member of the Ku Klux Klan, and that he has repeatedly stated that he is not in sympathy with its aims and purposes; also, that his letter of acceptance clearly outlined his stand against "race prejudice."

### The Losing of Money.

Money actually lost on the roads and streets, totals millions of dollars each year, the most of which is lost to the owner. Some is found and returned, some is found and not returned, but most of it is likely never found Add to this, other millions lost in fires, shipwrecks, and by complete destruction of various kinds, and the sum total, annually, would be almost beyond belief.

Much of the money lost is due to absolute carelessness—to the lack of use of proper containers, to carrying bills in rolls, coins loose in pockets, and to having no system based on care and regularity—to hurry and thoughtlessness in general. in the handling of money.

on our persons, especially when at strives for. our ordinary work and often when not having secure pocket containers Women are especially frequent money losers, for reasons easy to enumerate, due to modern dress; and automobilof losses.

in "Lost and Found" advertisements, but somehow human nature has not tion of "Found" notices, perhaps largely due to the rather ill-founded excuse that "finders are keepers."

or in money losing. We rush about | says; too much and fail to keep the mind on safety of person or personal belongings. Perhaps, too, we handle a great deal more money than we once did; it may "come easy," and in this way loses a portion of its value to us. Those things hardest to get, are usually cared for best.

No matter what the cause of increased money losses, they are the fact as never before, and we need to be more careful and methodical in our practices with reference to the handling of money. As a good beginning toward preventing loss, we suggest the greater use of banks as depositories, and the use of check books, whenever possible. Carrying a large lot of money about, is almost sure to encourage unnecessary expenditures.

### Take Your Choice.

President Coolidge makes an address. Candidate J. W. Davis picks it to pieces. Senator La Fallotte says both are wrong.

Republican leaders praise party achievements. Democratic leaders say they are bad. Progressive leaders say both old parties are corrupt -not fit to govern.

The ins wants to stay in. The outs then, create an expert tribunal want to get in-two lots of outs, against one lot of ins.

Dawes is too erratic and peppery. Bryan is a light weight edition of Brother Bill. Wheeler is a deserter,

La Follette started the against the inal, why not the criminal?" and too full of radicalism. Ku Klux Klan stand. Davis came along a good second. Dawes hopped in self-defense, is insane, at least

idge to dodge- and all are wondering how it will work, for votes.

Coolidge is too slow to make up his mind-wants to sound party leaders first. La Follette makes up his own, and his followers' minds at the same time. Mr. Davis has the advantage of a party back of him pretty sure to take his views.

Chairman Butler claims Coolidge will carry all of the states except perhaps Wisconsin and a few in the South: and La Follette claims these. Clem Shaver, for Davis, has not yet claimed any, but Davis is to be elect-

These are a few of the opinions going the rounds. Either take your choice now-or wait a while.

### "Too Rich to Work."

This little paragraph appeared recently in a column of short ones, and is worth more than a passing thought:

"Many a man's idea of prosperity is when everybody is too rich to work." Get the full meaning of "Everybody too rich to work," and that it is "many a man's idea of prosperity." Here it is, "Everybody too rich" to cultivate farms, to dig coal, to build houses, to run trains, to care for the sick, to sell merchandise, to teach children, to carry the mails, to hold public office, to arrest and punish criminalsto engage in any one of the hundreds of occupations we now call "work." REP

Quite a silly and impossible condition? Well, so is the idea of "prosperity" that many people have—and they do have the idea, just as stated REP. by the quoted writer.

Most of the striving to be "rich," is based on the thought of quitting work and living a life of spending and ease. But, it could last only a very short time, if all succeeded. There would soon be nothing to spend for, for nothing would be made-nothing would be moving-everything dead.

So, the saving thought is that this "many a man" and not to all men. To the idle rich, and to those so inclined. Fortunately, the world is largely peopled with those having better sense; with those finding pleasure in work; with those who know stagnation to be death.

that enumerates from them, that sets up this god of wealth—this false idea | of "prosperity"—which causes most of the ills, the crimes, the false philosophy, the wrong idea of legislation and government, that is turning the world topsy-turvy by arraying one class against another-and men in high position are largely responsible for it.

The man who is after a non-working prosperity, and riches, is the greatest danger in the whole world; he is striving for it without caring for anybody else, and his complete success would As a rule, we carry too much money destroy even that which he foolishly

"The court was told solemnly and learnedly, that day-dreams, pre-cocities, childhood fantasies and the dream-life of adolescence should be considered in fixing responsibility for murder. The men so testifying were employed and paid by the defense.

Just as learnedly and solemnly the court was told by other alienists that these young men were able to tell right from wrong, were accountable they did and dreamed and played in childhood were the usual and normal ways of childhood. The alienists so testifying were employed and paid by

Both groups were advocates for one side or the other. Clarence Darrow's alienists were trying to save two necks from the rope. The State's experts were helping to knot two nooses. Two sets of advocates, both equally partisan, fought it out in terms of law and psychiatry.

Attorneys are paid for their services, not their opinions. The alienist, however, is paid not for his services, but his opinion. Here is a stern question of ethics, however thorny it may be that is knocking at the door of Medicine. If that profession is unable to deal with it, then sooner or later society must find a way.

Insanity is a great factor in crime. The findings of the alienist will continue to play a part in every instance where mental disease can be used in the criminal's defense. Why not, pass upon snch questions outside the courtroom and away from the bickerings of attorneys? Society deter-mines the sanity of the non-criminal suspected of insanity. It examines him, takes testimony and a qualified board sends him to the asylum or

Every person who kills another, not in and made it impossible for Cool- temporarily; for no sane, well-bal- F. J. CHENEY & CO, Toledo, Ohio

anced human being, will voluntarily take life, even under extreme provocation. The matter, therefore, of establishing insanity, after a crime, will always to a large extent, depend upon the ability of counsel-which largely means the ability of the parties interested, to employ brilliant counsel.

It may be a harsh view to take, but we believe that unless a man was known, unquestionably, to have been insane before the crime, he is not insane enough after the crime to escape the penalty of it; and if known to be been removed from opportunity to rooms. commit crime, by being confined. All insane persons, at large, ought to be considered sane enough to pay the penalty of law for the crime commit-

### Why Bootlegging Flourishes.

If there were no buyers of liquor the bootleggers would soon be out of business, and those who encourage the illicit traffic by their patronage are as morally guilty of breaking the law as the bootleggers themselves.

It has long been an axiom that in the case of theft the receiver of the stolen goods is held to be equally guilty with the thief himself, and frequently his punishment is just as severe, in some cases even more so.

It is therefore a cause for national humiliation to find that those who are considered "respectable citizens" aid and abet this pernicious and unlawful traffic in bootlegging whisky, making regular purchases from underground

How can these men free themselves from the charge of being instigators of crime? How can they square such conduct with the ethics of Christianity? Is it not high time that the citizen who violates the law of the land and outrages common decency in this fashion should examine his conscience, object—this idea—applies only to should ask himself if he is playing

We are quite well aware that there are those who abide by the theory that if a law with which they do not agree is put on the statute book they are at liberty not only to ignore it but to break it to their heart's content. But, it is "the many" and the poison | Just imagine, however, what it would mean to this country, or any other country, were any very large section of the population to adopt this code. Nothing could follow but administrative chaos and lawlessness, and to this twofold abyss those who in their folly wilfully set the liquor laws at naught are driving the nation.

It is essential to the proper government of any country that the laws should be obeyed. If the people think that they are not good laws, they have their remedy at the polls, but while these laws are allowed to remain and are considered necessary by the majority for good government, it is the duty of every citizen to obey tial income-tax law.

Bootlegging flourishes upon what it The recent trial in Chicago, of two feeds; it is fostered and nourished by wealthy young Jews, who had con- the people who accord it support, not whose counsel did not attempt to es- tive, but merely for their own self-

This is selfishness, and selfishness status of the accused, and their evi- most despise, for it lies at the root of yet risen to a very strong demonstra- dence was decidedly conflicting, to much of the misery in the world. Let

### Doing What You Dislike.

Baseball has greatly increased the average boy's knowledge of mathematics. A more probable explanation is that this lad is not interested in mathematics for the very simple reason that he is "not cut out for it." There is such a thing as having no "arithmetic sense"—just as some people never can learn to play cards, not having "card sense." As long as the boy is reasonably bright in other studies, don't worry too much if he is backward at arithmetic. Chances are, when he strikes out in the world for himself, he will follow the line of work he likes best. And, not being "good at figures," he'll hire someone to do his figuring for him-possibly the schoolmate who stands at the head of the arithmetic class.

Real education is mental training. rather than filling the brain with facts like pouring water into a jug with a funnel. It is important to know things. But it is more important to know where to look for and find knowledge when needed. The world is full of star mathematicians anxious to work for \$35 a week, the same as every poorhouse has several good fiddlers. So it goes with other studies.-Wilkesbarre Times-Leader.

dicine is a Combined Treatment, both local and internal, and has been successful in the treatment of Catarrh for over forty years. Sold by all druggists.

### Zebra Mongoose Has

Almost Human Speech

One of the most wonderful attributes of zebra mongooses is their copia verborum. They dispose of so many different sounds, uttered in so great a variety of intonations, and with such convincing expressiveness, of joy, of sorrow, of expectation, of longing, of desire, of surprise, of anxiety and fear, that it amounts to a language.

Unlike any other mammals known to me, they converse at a distance, even when they are out of sight of one another, as, for instance, when insane before, then he should have they happen to be in two different

They often talk in their sleep, and Rikki-Tikki (the writer's male mongoose) from time to time, gave vent, while sound asleep, to an endless lament, a series of long drawn though not unharmonious wails in a rising and falling cadence, expressive of heartrending sorrow and distress, painful to listen to in the silence of the night.

Yet another curious peculiarity of theirs is, that they look, intently, and with evident interest, at stretches of country lying in front of them, when they find themselves at the top of a hill or of a mountain where they have not previously been. Their eyesight is marvelously sharp, and they detect birds of prey-the only thing in the world which they fear, apart from leopards and servals-at incredible altitudes in the sky.—Hans Coudenhove in the Atlantic Monthly.

### Good Detective Work on Part of Chemist

An epidemic of abusive anonymous letters broke out in a small suburban town near Albany recently. The town's chief of police finding he was making no progress in his investigations, enlisted the aid of consulting a chemist interested in curious problems of crime susceptible to scientific detection.

Scrutiny of a hundred or more of the letters convinced the scientist the unknown writer was a middle-aged woman, says Capper's Weekly. All kinds of writing paper were used, but always a sharp-pointed steel pen and the same kind of ink.

Dust in the ink indicated an open ink-well was used by the writer. At this point the chemist made up a lot of pelets, using a different chemical for each, but every chemical capable of identification if mixed with ink. Then, in the guise of an inspector of electric wiring, the chemist gained access to the houses of all suspects. Whenever he found an open ink-well he dropped a pellet in it.

The next anonymous letter led him to the woman responsible for it. And in a few days she was trapped in the act of sending off another one. That ended the case in a regular Sherlock Holmes style.

### Old Income Taxes

There were state income-tax laws in colonial days and divers federal income-tax laws were enacted by congress during the Civil war time, but in 1894 congress made its first attempt to provide a permanent and substan

The first successful attempt to provide a federal income tax was in 1909, says the Detroit News, when congress passed a law for the purpose of placing a tax against corporations, but which was in fact a tax against the entire net income of corporations amounting to more than \$5,000 a year.

This law was succeeded by the 1913 income law and the Sixteenth amendment to the Constitution empowered congress to pass income-tax laws as we know them today.

### Homer as Historian For the mere hard purposes of his-

tory, the Iliad and the Odyssey are the most effective books which ever were written. We see the hall of Menelaus. we see the garden of Alcinous, we see Nausiciaa among her maidens on the shore, we see the yellow monarch sitting with ivory scepter in the marketplace dealing out genial justice. . . Could we enter the palace of an old Ionian lord we know what we should see there; we know the words in which he would address us. We could meet Hector as a friend. If we could choose a companion to spend an evening with over a fireside, it would be the man of many counsels, the husband of Penelope.-Froude.

### KEEP YOUNG MALES AND FEMALES APART

Unless the young males are of especially good breeding and show promise of exceptional merit, it is in the long run more profitable to sell them on the early market for fries than to hold them as breeders. The day of dollar and dollar-and-a-half cockerels for the farm flock is passing. There is no profit in hatching, rearing, holding for several months, possibly advertising, and selling at such prices. Let them go early, keeping only the best to make sure of one's own breeding stock and birds that are worthy a good price as breeders.

Separate these from the pullets. They do better when not running after the pullets, and the pullets make a quicker growth when separated.

Lack of shade will mar the plumage of all growing stock. The early fall fairs show up sunburned young stock which would have a better chance of winning if the owner had done his part. "A good bird in the hands of a poor breeder," an observer at a poultry show said of a sumburned cock. Little details add greatly to the chances of winning. We have heard breeders complain of prizes going to the back-yard poultry keeper, says the Indiana Farmer and Guide. These are without reason. The object of showing is to exhibit the chickens at their best-to show how perfect they may become. The handiwork of the back-yard poultryman is bound to show in the grooming, but the farmer has the advantage of range, live meat in the shape of bugs and worms, and variety of seeds, which gives him the advantage if he does not scorn the details such as separating the sexes, giving shade and more than stanchion room to his flock.

# Feeding Young Turkeys

During First Few Days In order to prevent the heavy losses which occur among young turkeys, greater care is necessary, especially during the first four weeks. Poults should not be fed for 48 to 60 hours, then they should be given some fine grit or finely-chopped egg shell. Care should be exercised that an ample supply of sour milk, milk curd, or cottage cheese is available.

For feeding the first few days, much the same feeds and methods as are used for baby chicks may be followed, the only difference being that in feeding little turkeys even greater care should be exercised not to overfeed. Oatmeal, hard-boiled eggs, crumbled shell and all, and johnny cake have been found satisfactory. The poults may be gradually changed to a good-grade chick scratch, sifted finelycracked corn, cracked wheat and pinhead oats, with a mash mixture such as is used for little chicks.

### Infertile Eggs Favored

for Shipping to Market Thousands of dollars' worth of

eggs are needlessly lost during hot weather. It is the farmer and poultryman who bear the cost of spoiled eggs. It is not unusual for cases of eggs to contain a few hatched chicks when they reach the produce house, and for other eggs to be well on the way toward hatching.

Incubators and broody hens are not necessary to start the process of incubation. Fertile eggs will begin to develop chicks at a temperature of 70 degrees Fahrenheit.

The way to do away with fertility in eggs is to remove all males from the flock for two or three weeks previous to shipping eggs. An infertile egg will not batch and will keep much longer than a fertile one.

### Poultry Hints

\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\* Swat the males and produce infer-

Sour skim milk is one of the best

feeds for small chicks. Watch for lice and mites and get rid of them as early as possible.

Inbreeding has ruined many a flock or family of turkeys. Use strong, unrelated toms every year.

Don't crowd too many poults in a coop or in a brooder-and keep them warm and dry the first few weeks. Drafts and dampness cause most losses among young turkeys.

Ground that the adult fowls and early chicks have been running over gets foul and sour. It is of special importance that young stock as well as the old birds be gotten onto new ground or on renovated ground from time to time.

Eggs contain a large proportion of water. If you want your hens to lay heavily, see that they have all the water they can drink.

It is as easy to overfeed fowls as it is to underfeed them. The happy medium can be learned only by experience and close observation.

The best way to kill off lice is to prevent them from getting a start. This is much easier than it is to give them a chance and then fight them afSignificant Words on

First American Coin

After the American colonies had achieved independence, the provision of a coinage became their own sovereign right. The devices for the first coin struck by authority of congress were prescribed by a committee of that body in the following terms: ". . . On one side of which piece . . thirteen circles linked together, a small circle in the middle, with the words United States around it; and in the center 'We Are One.' On the other side of the same piece the following device, viz, a dial with the hours expressed on the face of it; a meridian sun above, on one side of which is to be the word 'Fugio,' and on the other the year '1787'; below the dial, the words, 'Mind Your Own Busiiness." The types of this piece are very similar to those of the dollar pattern of the proposed continental currency, which bears date of 1776, and which were probably designed by an artist, who on the earlier piece placed the signature E. G. Fecit. The types are interesting as a commentary on the state of mind of the times. The political hope, for it could be only a hope still at that time, of an inseparable union, expressed in the obverse type, was probably not less prevalent than the caution so graphically set forth by the other that "Time is Flying," so "Mind Your Business" affairs. This terse expression of practical sense, because so much in the spirit of Poor Richard, has wen for the coin the name of "Franklin cent," but Franklin probably had nothing to do with the designing of it.

### Early New Englanders Fond of Their Beans

In the absence of positive information on the subject of the origin of Boston baked beans and their place on New England breakfast menus this conjecture is offered: In the early days of the Plymouth colony people did their baking in brick ovens. These ovens were heated on Saturday and enough baking for the week was done at that time. As the oven cooled off the temperature was just right for beans, which need long, slow cooking, so they were thus ready to be eaten on Saturday night and were probably put back into the oven to keep hot and these were eaten for breakfast on Sunday morning. Many New England people reheat them and eat them for breakfast each morning until they are gone, and some people who bake them on Wednesday continue to serve them for breakfast until the Saturday beans are baked. In northern New England beans have been baked from time immemorial in a hole in the ground, the hole having first been lined with stones and the stones made very hot with a fire built in the hole. In lumber camps the beans are usually put in to bake the night before they are to be served for breakfast.

### Truth Prevailed

The criminal lawyer believed in being absolutely frank with his clients, and accordingly when a man came to him charged with stealing a pig he

"Now, I will be perfectly open with you. If I take your case you must in the first place tell me honestly: Did you or did you not steal this pig?" "Well, yes, sir, I did," the man ad-

mitted; "but I have a big family and no money, and I was in need of meat for them."

"That's all right," replied the lawver. "You bring me half that pig and I'll take on your case."

When the case came into the court the lawyer addressed the jury thus: "This man did not get any more of the pig than I did."

The verdict was "Not guilty."

### Inventor Unknown

The history of the monkey-wrench is obscure. Even the origin of the term "monkey" in the name is unknown. It is commonly believed, however, that a London blacksmith named Moncke (pronounced "Munke") made some of the first wrenches with movable jaws adjustable by a screw. Such wrenches were called Moncke wrenches. Owing to ignorance of the origin and spelling of the name it was easily corrupted into "monkey." But this story is not supported by any definite information. The United States patent office says it can find no record of a patent having been granted by the British government to Moncke for such a wrench.-Pathfinder Magazine.

### Works of Art in Copper

Copper ornaments that were made between 6.500 and 9.000 years ago are dug up near Ur, city of ancient Babylonia. Made thousands of years before King Tut was born, these copper ornaments are among the earliest works of art. They express the infancy of the creative spirit. The Babylonian copper objects represent men and oxen. In addition to being art, they were intended as a history of accomplishment-main motive of which is vanity.—Farm and Fireside.

### Honey Once Main Sweet

It is only within the last few centuries that sugar has become known, and within the last generation or so that refined sugars have become so low in price that they may be commonly used in the poorest families. Formerly honey was the principal sweet, and it was one of the items sent as a propitiatory offering by Jacob to his unrecognized son, the chief ruler of Egypt 3,000 years before the first sugar refinery was built.

## Medford Grocery Co., MEDFORD, MARYLAND.

Schools in Early Days The first schools were started in the early history of mankind. Schools were first held out of doors and the teaching was conducted orally, similar to the Hindu Brahman schools. Among the Hebrews the laws were expounded by oral teaching from the porches of the temples. The amount of instruction greatly increased from the mere oral teaching of the law until it inthe Spartans the education was almost entirely along new lines. Elementary schools became common after the Christian era and in 64 A. D. they were made obligatory. In Athens nearly all of the schools were private, teaching music and literature, reading, writing, arithmetic, geography and drawing. In early Rome the schools taught reading and writing and sometimes arithmetic.

### Somali Fond of Song

Musical instruments-even the tomtom, so dear to the heart of most African natives—are unknown to the Somali, who, none the less, take great pleasure in singing and dancing. Their songs are not by any means casual chants but have special significance, and are applicable to certain occasions. For example, there is a "Song of Thanksgiving for the finding of water, after a long journey," and songs for the loading and unloading of caravans, but most of their music is of a religious nature; and there is a "Song of Burial," sung when the 20-foot mound is raised above the remains of a chief and fenced around with a strong palisade of logs placed transversely between stout posts. Of all their dances the Somali place the war dance first.

### Ancient Heathen Deity

Beelzebub was a heathen deity to whom the Jews ascribed the sovereignty of the evil spirits, calling him the "prince of the devils" (Matthew XII, 24). Beelzebub-or more correctly Beelzebul—is the name by which the god Baal was worshiped by the Ekronites. The word meant "lord of flies," it being the office of this deity to protect his worshipers from the volved letters and arithmetic. Among | files and gnats with which Ekron was infested. As the Jews regarded all heathen deities as devils, the name "Beelzebub" was applied by them to the chief of the demons. Milton, however, in "Parachse Lost," makes Beelzebub second in power to Satan.-Kansas City Star.

### Shark's Hide Valuable

A valuable part of the man-eating shark is the skin. The thin outer skin is removed by a secret process, and when dried it has a remarkable hardness, and is used by cabinet-makers for giving polish to hard woods, ivory and so on.

The inner skin is tanned so carefully that it eventually yields a waterproof, non-cracking leather. Different parts of the skin give different shades of color, and the tanning process succeeds in preserving these dark greens and browns so that shoes, traveling bags, purses, belts and similar articles made of the skin have quite a handsome appearance.

### Sidewalk Conversation

"Boss, I don't know where my next meal is owning from.'

"I don't either. My wife never sticks long to one dealer."-Louisville Courier-Journal.

### Community Center Idea Is Old as Schoolhouse

The development of the community center, both as a city and as a rural institution, is comparatively recenttwenty or thirty years, perhaps, counting from the modest beginnings made by pioneers in the movement; but the essential idea is old, almost as old as the western country schoolhouse. In fact the community center, whatever its name or form, is essentially the early prairie schoolhouse. Often it was the old sod schoolhouse.

Devoted to lessons from the school books by day, for five days of the week, on Sunday it became the "meeting house" for church services and Sunday school; and on Wednesday or Thursday night it housed the prayer meeting. On Friday night there was the "spelling school," or maybe the "lyceum" or "the debating society." Saturday night it was the meeting hall of the Grange or the Farmers' alliance. More than likely something else was going on some of the other nights.

This was an excellent thing for the community. It gave opportunity for the satisfaction of the gregarious instinct, the social craving. But it was likely to be a hardship upon the poor teacher, and trial to her soul.

Thus the institution flourished, even if unnamed. The schoolhouse was the natural center, and is yet, of community interest and around it revolved the community's social activities. The result was a very real community feeling and spirit.

The growth of towns and cities; the multiplication of churches, lodges theaters, the increased facility in traveling eventuated in the gradual desuetude of the country schoolhouse as a center of interest other than that for which it was primarily instituted-the education of the children of the com-

munity.

In the cities there is no longer a real community life any more than there is in the country. Without such a community interest there can be little concerted action looking toward the conservation of community and larger civic concerns. To re-establish community solidarity and bring opportunities not otherwise available into the community, especially poor neighborhoods, "social settlements" were invented and developed.

The next step was to revive the idea of using the school building to house community activities. Syracuse, N. Y., was one of the first cities to try to work it out. Milwaukee did a good deal. New York gave lecture courses and conducted a few other activities more or less under the educational administration.

### Tells How to Grow Grass

Chicago's parks and boulevards, the wonder and admiration of all visitors, are an illustration of the power of trees and grass and flowers to beautify and please.

Too frequently Chicago's home yards are the opposite. Too often the front lawn shows a high degree of care and the stem therefore takes up water attention, while the backyard is left a dreary waste.

The lot is an essential part of the home, and in the beauty of the surroundings is enhanced the beauty and value of the home itself.

More and more as we study the development of ornamental gardening does the necessity and beauty of stretches of velvety greensward become apparent, particularly in places of larger extent. In the small backyard of the city dwelling the grass problem is more difficult than in larger places.

It will be necessary to give more fertilizer in comparison to the grass plot, if it is decided to grow one, than to the annuals, and it needs to be dug into the soil pretty thoroughly so the roots may delve for it, and there are also fertilizing formula to be sprinkled on the surface from time to time.

As the little backyard gets harder and more constant usage than a larger place, a mixture of durable grass is necessary, sacrificing something in fineness of texture, possibly, to be assured of fast growing, close knitting grasses that form a firm and resistant sod.—Chicago American.

### Fine Community Spirit Community spirit is always a fine

thing and to be commended. It is the one outstanding civic virtue through which true progress is made—the leaven from which all community greatness must rise. In its most exalted form it carries the Godlike attributes of sacrifice-sacrifice of the present that the future may be made the more glorious. And this is the spirit that was displayed by a company of Florence business men when they pledged themselves and their possessions for the future greatness of their beloved city.-Florence (Ala.) Daily News.

### Work for Home Town Let us display a sign-"Your Home

Town First." This means we must work for our city. We must encourage our merchants by trading with them. We shall not lose by this, for they can do as well by us as the merchants of any other town. We shall gain by it, because whatever helps one man in the city helps others. The more money we spend at home, the more is likely to come back to us. in Times-News.

### HOW=

TIME HAS BROUGHT ABOUT THE WORLD'S VOLCANOES. -Etna, the "burning mountain," recently active after several years of comparative quiet, is Europe's biggest and most dreaded volcano. It is 10,800 feet high-150 feet lower than it was 50 years ago—and measures no less than 91 miles in

circumference at its base. Although volcanoes are often referred to as burning mountains, in reality they do not burn at all. Neither are they mountains in the true sense of the term. The scientific definition of a volcano is "an opening in the earth's crust, through which heated matter is thrown up from the earth's interior to the surface, where it usually forms a hill, more or less conical in shape, and generally with a hollow or crater at the top."

Where eruptions frequently occur, the heated materials forced upwards pile themselves to heights which cause them to be classed as mountains.

What looks like fire belching forth is merely the reflection of the molten lava on the clouds of steam which hang over the crater. The steam itself is often wrongly spoken of as smoke.

The cause of volcanic action is not known. The most popular theory is that it is brought about by water getting into the white-hot furnace below the earth's crust. In support of this the fact is cited that nearly all the most active volcanoes are close to the sea.

Volcanoes are really safety valves. Without them we could hardly have existed at all, for scientists say it is due to volcanic action that the continents emerged from the sea. Earthquakes, which are usually more terrible in their effects than volcanoes, would occur much more frequently but for these safety

### How Cut Flowers May

# Be Kept for Many Days

Plunging garden flowers into a deep vase of cold water just as soon as they are cut and then leaving them for an hour or more in a cool room where there is no draught, is the secret of keeping them fresh when they are brought inside to be used in decorating the home, according to Harry Mohlman, a member of the floricultural division of the college of agriculture, University of Illinois.

Following this practice allows the stems and flowers to be filled with water and they can then be arranged in bowls, vases or baskets with the assurance that they will last for several days, provided they are given a

little care each day, he explained. "A wilting flower may be revived in most cases by cutting off about three-fourths of the stem under water," Mr. Mohlman said. "Holding the stem under water when cutting prevents the air from entering and more rapidly."

### How Torches Are Tested

A reservoir of water was provided for testing oxyacetylene torches, and a diver, equipped with air tubes, entered the tank. When under the water the operator applied an oxyacetylene flame to an iron plate for a few moments. The metal was seen to disintegrate in the water. It is claimed that this underwater operation of the oxyacetylene torch will prove of great value in salvaging sunken ships, and in connection with other marine work. A report of this experiment is being prepared for the academy, and it is thought that the results of the work will be made public in a short time .-Pure Iron Era, Chicago.

### How He Was Recognized

Forty-five years ago a cow stepped on Sterling P. Sharp as he lay asleep in a hayfield. The resultant scar just saved him from being haled into a Los Angeles police court by his own sister. He had not seen his sister, Mrs. A. J. Bishop, since they parted 25 years ago, and in that time his appearance had so altered that she refused to believe that he was her brother when he unexpectedly called upon her. He laughed and kissed her. She called for the police. Then he showed her the cow's hoof print on his arm and cordial relations were re-estab-

### How Faces Have Changed

Man's jaw has dropped half an, inch since prehistoric days, owing to contraction of the palate and alteration in the setting of the teeth, according to Sir Arthur Keith, who has made many minute experiments with skulls, ancient and modern. He can, however, give no reason for this change, except that it may be due to the industrial system. "Lack of light and modern diet may be responsible, but soft food, which is often stated to be the cause, is not," he asserts.

### How Colonists Got Salt

The extraction of salt from sea water is a process known to all the nations of the Old world, and when the colonists came to America they brought this industry with them and introduced one way or another .- Gadsden (Ala.) it wherever the conditions were favor-

Don't miss it.

### The Unforgivable Sin.

A liberal chap, as a general rule, The Mexican always has been He doesn't belong to the Puritan

Which teaches that murder is sin. He has no unyielding objection to

No hate for the grafter he feels, If the grafter is only sufficiently deft To escape with whatever he steals It is none of a Mexican father's affair Though his sons may behave like old Nick.

But as soon as his daughter starts bobbing her hair. His morals are cut to the quick.

When the son of a Mexican household comes in.

And, using the floor for a seat, Observes with a roguish and mischievous grin That he just shot a man down the

No terms of reproval, no word of dis-

The head of the family employs, But says in a calm and a casual way:
"Oh, well, I guess boys must be boys!" But let his young daughter appear at

the door,
With her locks even partially shorn
And the father gives voice to a terrible roar

And curses the day she was born. To battle and murder and violent

deeds
The Mexican gives little thought. placid existence the criminal leads, As long as he doesn't get caught.

The men of the nation may do as they please;

They may pilfer whatever they crave; They may pillage and plunder and nohody sees

Any harm in the way they behave. The bandit is highly respected down And his trade is esteemed as an art,

But when senoritas start bobbing their hair, The nation is hurt to the heart. -Washington Star.

### The Effect of Moonlight.

Hiram walked four miles over the mountain to call on the lady of his dreams. For a long time they sat silent on a bench by the side of her log-cabin home; but soon the moon, as moons do, had its effect, and Hiram sidled closer to her and picked up

her hand.
"Mary," he began, "y'know I got a good clearin' over thar an' a team an' wagon an' some hawgs an' cows, an' I cal'late on building a house this fall

Here he was interrupted by Mary's mother, who had awakened.
"Mary!" she called in a loud voice.

"Is that young man thar yit?"

Back came the answer, "No, Ma, but he's gittin' thar."—Everybody's Magazine.

### Some Good Short Ones.

"How do you find marriage?"
"During courtship I talked and she listened. After marriage she talked and I listened. Now we both talk

Raymond returned from Sunday School in a state of great excitement.

Ike: "Vereffer you go, over da world you vill find Jews."
Pat: "Faith, and Oi wouldn't say that. I never heard of a Jew at the

north pole."

Ike: "Oh, is dot so! How about dot guy, Iceberg? He's no Presbyterian". The stingy farmer was scoring the hired man for carrying a lighted lantern to call on his best girl.

"The idea," he exclaimed, "when I

was courtin' I never carried no lantern, I went in the dark." "Yes," said the hired man, sadly, 'and look what you got."

### The Dawes Plan Accepted.

The acceptance of the Dawes plan by the German Reichstag, on the 19th., makes the way clear for meas-ures of reconstruction that will put Germany on her feet, financially and industrially, and assure the payment of reparations to France and the allies, and generally relieve the European situation, and to some extent

that of the whole world. The agreement will result in the early retirement of French troops from the Rhine land, and the restora tion of German authority. The final vote in the Reichstag was a decisive Miss Anna Smith, who survives her, defeat for the Nationalists, and a consequent victory for all other parties interested in getting back to a

normal Germany. The part America played in the settlement now being arrived at is fully appreciated by the French Government. While no direct action was taken by the United States as a Government, it is pointed out that the indirect and semi-official influence of the United States, both during London negotiations and in the Reichstag voting in Berlin, had an important effect on the result and might even have been the decisive element.

Of our dear mother gone to rest, And the ones who think of her today, Are the ones that loved her best. By her daughters,

NETTIE S. ANGELL CARRIE V. WAGNER.

Resolution of Respect. on the Death of Joshua Koutz.

Whereas, In the dispensation of Divine Providence, we are called upon to express our sorrow and loss by the death of our fellow-director, Mr. Joshua Koutz. Resolved, That we express our appreciation of his long services to the Taneytown Savings Bank, and while time may have dimmed some of his faculties, it never lessened his sense of what was right toward both God and man. Resolved, That while we recognize the futility of human efforts, we nevertheless offer our sincere condolences to the family of Mr. Koutz.

Resolved, That these resolutions be printed in The Carroll Record and a copy be sent to the family, and a clipping entered on the minutes of the Taneytown Savings Bank.

NORMAN R. HESS. NORVILLE P. SHOEMAKER, DAVID H. HAHN, Committee.

### CARD OF THANKS.

We take this means of thanking our neighbors and friends for their sympathy and assistance during the sikness and burial of our father, Joshua Koutz. Also for floral tributes, and to those who furnished automobiles for the funeral BY THE FAMILY. Amanda, of Hanover, Pa.

### A Surprise Party.

Obituaries, poetry and resolutions, charged for at the rate of uve cents per line.

The regular death notices published free. Home of Mr. and Mrs. Herbert Smith on Thursday evening, Aug. 28. The evening was spent in playing games Mr. John Calvin Hollenberry, a and music, after which refreshments

well-known resident of Uniontown, Md., died on Saturday at 4 P. M., at the Union Memorial Hospital, Baltimore, following an operation for peritonitis which was performed shortly after his admission. Mr. Hollenberry had been ill but a short time at his home before removal to the hospital. He was aged 68 years, ten months and 14 days.

Were served.

Those present were: Mr. and Mrs. Thomas Weishaar, Mr. and Mrs. Oliver Lambert, Mr. and Mrs. Mervin Feeser, Mr. and Geary Bowers, Mr. and Mrs. Edgar Fink, Mr. and Mrs. Joseph Frounfelter, Mr. and Mrs. Joseph Frounfelter, Mr. and Mrs. William Kramer, Mr. and Mrs. William Kramer, Mr. the hospital. He was aged 68 years, ten months and 14 days.

Surviving are his wife, two daughters, Mrs. Romaine Brodbeck and Mrs. Gorene Robinson, Philadelphia; two brothers, Charles B. Hollenberry, Wilkinsburg, Pa., and Grant Hollenberry, Pikesville, Md.; also two grand-children. The funeral was held on Tuesday with services at the house at 10:30 A. M. The Rev. J. H. Hoch officiated, assisted by the Rev. J. Earl Cummings and the Rev. ### jealousy Proved Fatal to English Musician

Certainly the most destructive of numan emotions is that of jealousy. With the exception of love and war nothing seems to be so provocative to the green-eyed monster, who seems to ave the faculty of consuming all those who admit him to their souls, as music. A list of the famous musical jealousies would be interesting. It would run into the hundreds. Opera companies are usually nests of jeal-

Possibly one of the most famous ases of musical pealousy is that of Henry Cooke, deceased (1672). Cooke was a fighter who gloried in the term of captain. He joined the king's army and fought bravely, it is said, but when the commonwealth came into existence he was obliged to make his living teachin; music. Eventually he became gentleman and master of the hildren when the chapel royal was established again in 1660. There he had as his pupils no less than Purcell, John Blow and Pelham Humphrey.

Humphrey so closely imitated the vork of his master that after some time he was able to supplant him in his state position. Captain Cooke flew into a rage of jealousy, and this continued until in his death notice there appeared the significant line, "died of jealousy."

# Great Statesman Had

Genius of Invention

Thomas Jefferson, signer of the Declaration of Independence and third President of the United States, was of an inventive turn of mind as well as being a fairly good violinist and something of a scientist, remarks the Detroit News. On one of his tours of Europe he was struck by the bad construction of the plows in use by the peasants of France.

The moldboard, a device above the share to turn over the earth, he decided, required redesigning. He spent the greater part of his leisure time for two years evolving a moldboard that would be most effective.

Satisfied, at length, that he had succeeded, Jefferson sent a plow equipped with his new device to the Royal Agriculture Society of the Seine. A medal which the society awarded him —for the plow proved to be all he had hoped for-followed him to New York, and 18 years later, the society sent him a specially made plow containing his improvement as a token of appreciation for what he had done for agriculture in France.

### SEASONABLE GOOD THINGS

DO NOT fail to put up for the family some of the choice cherry recipes. Cherry olives is one which will be enjoyed in the winter and is very simple to prepare.

Cherry Olives. erries with the stems left on-the finest and largest cherries are kept time Egypt was a French protectorate, receiving an insistent encore. for this. Fill jars with them and then cover with good, strong cider vinegar the French power in India was greater and water in equal parts; add a tablespoonful of salt to each quart jar, seal and set away for winter.

Uncooked Conserve. Take any amount of pitted cherries and cover them with good vinegar over night. In the morning drain off the vinegar and add as much sugar as cherries by measure. Stir until well dissolved, place in a stone crock, cover with a cloth and plate and they are ready to serve in a few weeks. They will keep all the year and are a delicious zest for meats. The richest, best-flavored cherries are, of course, the kind to put up in this way. The sour cherry is fine canned as usual for pies.

Light Rolls. To two cupfuls of bread flour add one-quarter of a cupful of yeast, one and one-half cupfuls of milk and water mixed, one teaspoonful of salt, two tablespoonfuls each of sugar and butter; beat well and let stand until light and full of bubbles. Knead, adding a well-beaten egg and flour enough to make a dough stiff enough to handle. Let rise again until double its bulk. form into rolls, brush with butter and when light bake in a hot oven.

The Century Plant

The belief that the century plant blooms every 100 years is a myth, according to Pathfinder Magazine. The flowering of this interesting plant depends upon the climate and rapidity of growth. In warm climates such as Mexico and Central America, the original home of the century plants. they grow rapidly and usually bloom about the seventh of eighth year, seldom later than the twelfth. In colder climates the period before bloom is much longer. Some authorities. say that in hot houses 80 to 100 years may elapse before the plant flowers, a fact which probably gave rise to the century myth from which the plant gets its popular name. After flowering the century plant dies down to the ground. However, new plants arise from lat-

### Dutch Unfortunate in Colonization Ventures

The celebration on the continent commemorating the tercentenary of he foundation of New York recalls the not until 1604 that it was captured by New Amsterdam was changed to New

Dorothy, aged five, had been given pretty blue-silk sash and the first v she wore it she was constantly unning to her mother to have it tied. "Why, Dorothy," said her mother, This makes the fifth time I've tied our sash this morning. You must urn to tie it yourself."

"But how can I, mamma," replied he little miss, "when I'm standing around in the front all the time?"

The young lady across the way says some people don't seem to realize that there's any difference between an outand-out atheist and a mere acrostic. (©, McClure Newspaper Syndicate.)

### Otis Skinner Tells of Successful Stage Hoax

In the fall of 1887 the theater was opened with Dandy Dick, a racing play by Pinero. In it I had to play the violin, and I do not and never t that the great American city was | could play the violin! The Elusion, originally a Dutch settlement. It was however, was well managed. I tuned my fiddle and was accompanied by the British, and the original name of Effie Shannon-a charming actressupon the piano. I bowed the instrument pantomimically against an opening in the window curtains, behind which Widmer, our leader, played "My

Pretty Jane" with great sweetness. Heavens knows how many times we rehearsed it. Miss Shannon didn't play the piano any too well, but she really had to play and she was nerv-Other instances of lost colonies ous. I was praying that the audience could be given, especially if those would not detect the trick and jeer at which changed hands during or after me. It was fearfully difficult, for we Take fresh well-washed, unbruised the great war were included. But had lines to speak through the music. The trick finished. I was astounded at

We could not repeat without repeating the scene, lines, business and all. The house had taken the bait and bepean settlements in India, indeed, were lieved it real. I bowed repeatedly in agony and depreciation, while Daly was tying himself into knots of mirth down, in the front entrance. Widmer had been altogether too good!-From Footlights and Spotlights. By Otis

### Word Not Always to Be Taken Literally

Skinner.

An intangible thing is literally a thing which cannot be touched, an article on which you cannot lay your finger.

The word is related to the word

"tango," in which dancers closely touch each other-too closely, in fact, some moralists complain. The little particle of negation, "in," gives "intangible" the opposite sense. The thing that cannot be touched

or have a finger laid on it is not always a material object. It is sometimes a mental or a moral quantity, such as an argument.

Some of the most impressive things in the world are intangible, but that does not mean that they are not real. You cannot touch, for instance, one of the most beautiful things in nature, such as a glorious sunset. But it is none the less real.—Chicago Journal.

Messages in Patches

The little black "patch" that was imported from France in the days of powdered wigs and brocaded gowns did more than draw attention to the beauty of the wearer.

Formerly ladies used to patch to convey messages to their courtiers. For example, according to an old-world book, a writer in London Answers discovered recently, a patch on the left cheek bone meant to say: "I love you always;" and one on the right cheek bone: "I have not quite decided yet."

A patch on milady's dainty chin represents love given to another, while "a message for you alone" was conveyed by a discreet beauty spot placed near the ear, and "no hope at all for you" by a patch on the temple.

Quite a dainty language of love, isn't it? Will it ever be revived?

ONCE there was a little girl named Neva, so very poor that she had to sell matches for a living, and even that could not be called a living, because many times she went hungry to her bed in a poor room in an attic which the hard-hearted landlady could not rent to any one else.

One night Neva came back to her attic room and found everything changed. On the floor was a soft rug, warm blankets on the bed, soft slippers and a bathrobe lay before a bright fire burning in the grate.

At first she thought she was in the

wrong room, but that could not be, because this was the attic room under

While Neva slipped into the soft robe and slippers she was still more surprised to see at one side of the fire-

Am So Unhappy!" Cried the Little Creature.

place a table with a nice hot supper on it!

Neva rubbed her eyes. "It must be the fairies," she thought. "It wasn't here when I came in. Perhaps the landlady will know."

But the hard-hearted landlady only told her if she didn't pay her rent she would have to leave and she knew nothing about hot suppers or soft blankets and could not furnish beggars with such things.

Neva ran back to her attic and ate said: "Thank you." her supper. Then she wrapped herself in the blanket and went to sleep. It was so nice and warm she did not awake until the sun was streaming in through the one little window in

That night when she returned again the hot supper was waiting, and now Neva was sure it was the fairies. But even fairies must be thanked, and as she did not see them Neva went to the window before she went to bed

What's in a Name?"

nificance; your lucky day, lucky jewel

**MELISSA** 

MELISSA is literally one of the

comes from the Greek word meaning

to soothe or sweeten, and hence,

honey of the honey-bee. Melissa was

sometimes said to have been the name

of the nymph who first taught the use

of honey, and the pretty fancy arising

from this belief made bees the symbol

of nymphs. Strangely enough, Melis-

sa came to be the title of a priestess,

as well as a feminine name, in classic

sweetest of feminine names. It

and opened it. "Dear fairies, I thank you," she whispered.

Every night for a long time she did this, but after a while so many things came to her that Neva became careless about the thanks and many nights went by and she did not open the window to whisper her thanks for all the good things the fairies gave her.

One night she opened the door of ner attic room, but no hot supper orwarm fire was waiting for her. The room was cheerless and still and on the window sill Neva saw by the light outside a tiny little creature weeping.

It was a fairy; she was sure of that. But why should a fairy be crying? Neva was wondering as she walked toward the window.

"Oh, I am so unhappy!" cried the little creature. "I was so sure she would never forget to thank us, and now the Queen is angry with me because I picked out this poor girl to

"Please don't cry," said Neva, knowing at once she was the cause of the little creature's grief. "I am sorry I forgot to thank you for all the nice things every night. I guess it was because you gave me so many

The little fairy jumped up. "Yes, that is the reason," she said. "The Queen told me I was giving you too much, but I was so sure you would never forget to be grateful that I persuaded her to let me keep on giving and now she has made me take every-

"Don't cry," said Neva. "I am glad the Queen has taught me a lesson. will never again forget to give thanks no matter how much I have or how little. I wish I could become a fairy and see your Queen."

"That wish I cannot grant," said the fairy, "but I can help you by telling you a secret our Queen has told us-that a 'thank you' and a smile will bring happiness. Try it and see."

The fairy had disappeared, but somehow the room did not seem cheerless. She had left something behind for Neva to think about, and the next day as she sold her matches she smiled at everyone who bought and

'It was not long after this that a lady stopped to buy matches one day and was so won by Neva's cheery 'Thank you" that she took her to live with her, where she had all the comforts the fairy had given her and more. And when she remembers the fairy and the attic Neva wonders if after all it was not a dream in which some good fairy whispered to her the charm

of a smile and a "thank you." (©, 1924, McClure Newspaper Syndicate.)

### Fires Are Known as Friendly and Unfriendly

Friendless can hardly be associated with the cry, "Fire, fire." But the fire department, as it rushes down the street with bells clanging and siren shrieking, may be responding to the alarm from a "friendly fire."

The eye of the law, ever alert to make fine distinctions, long ago found it necessary to distinguish between fires which in the ordinary course of events would be considered harmless and those flames which were entirely out of their proper spheres. It thus came about that the law says: "Fire, in the language of a fire insurance policy, means the same as the ordinary accepted definition, unless otherwise specified; that is, it means the principle of combustion as manifested in light or heat, especially flame. However, employed for the ordinary purposes of lighting, heating or manufacturing, while the same is contained within its proper receptacle, is to all intents and purposes a friendly fire. All others are, of necessity, unfriendly

As a result of this distinction on the part of the law it has been held that damage done by a lamp when the flames get too high, resulting in smoking or charring, could not be collected upon, because it was "friendly fire," and at no time out of its proper place. So, too, the destruction of food upon a stove, or damage occasioned by someone putting the wrong sort of fuel into a furnace, which caused excessive heat and smoke, were held to have resulted from similar friendly flames and were not collectable from the fire insurance company.

It is interesting to know, in this connection, that a certain individual attempted to collect on a fire insurance policy because of damage to his building, caused by a fire truck colliding therewith while on its way to a fire. The plaintiff claimed that the damage was the result of the fire. He, of course, lost the case.

Inasmuch as the moment one of these "friendly fires" leaves its customary, or proper place, it becomes an "unfriendly" one and must be treated as such, it is a simple matter to distinguish the friendly from the unfriendly, even among fires.

### Why Shortcomings in Speech Are Frequent

Americans are "lip-lazy," says President Southwick of the Emerson College of Oratory. To this laziness he lays our shortcomings in speech.

To the charge that most Americans slur or mumble their words, show little regard in conversation for the structural niceties of language, and rely heavily on slang to convey a meaning, we might as well plead guilty. The charge is true. But there are more factors involved than "lip-

Excessive fatigue, for instance, will affect one's speech. Worry and undue excitement are factors, also. At any time when the mental or physical state is disturbed there is a letting down of morale in speaking. The man who thought he had banished "gin't" from his vocabulary lets it slip off his tongue and then wonders where it came from. It was there all the time-ever since he had acquired it in childhood.

So it all comes back to child train-The language one uses under stressful conditions is the language he acquired before 12 years old. That is the golden period in the formation of speech. "Give the child good English then," says a former head master of Eton college, "and he will learn to hate bad English." More than that, he will not find himself slipping now and then into habits that are humiliating. In speech as in character, the tree follows the bending of the twig. -Milwaukee Journal.

Why the Test Failed

A gruff old practitioner of the type of the last generation, who is official physician of the public s hools of a nearby town, was examining the aural faculties of the pupils one day recently and, with watch in hand, gripped a little girl of ten taking the test. "Hear that?" he asked, with the timepiece at arm's length.

"No, sir," came the timid reply. "Hear that?" he repeated, bringing

it slightly nearer. There was no response and he carried the watch nearer and nearer with no better results. Finally, jamming it against the child's ear, he exclaimed with some heat: "Now, don't you hear

There was the same monosyllabic reply, and, with an air of deep disgust, the old doctor held the watch to his own ear with the exclamation: "Gosh, the old thing ain't goin' !"-Philadelphia Record.

Why Woodpecker Is Friend Woodpeckers play an important part

in destroying the round-headed appletree borer, according to T. L. Guyton, bureau of plant industry, Pennsylvania department of agriculture. Soon after the borers hatch, the woodpeckers find them beneath the bark of apple trees. The birds start right after the worms, continuing to drill for them as long as the borers are in the wood. In several orchards where count was made, 50 to 75 per cent of the borers had been destroyed by the woodpeckers. The downy woodpecker and the hairy woodpecker are said to be the chief varieties of the species that feed on round-headed apple-tree \*\*\*\*\*\*\*\*\* borers.

"Fairy Music" May Not

Stories of fairy music in the forest, of haunted waterfalls, and mermaids singing near the seashore, long thought mere figments of the imagination, may have a sound basis in fact. In an issue of Science, Dr. Alexander Forbes of the Harvard medical school reports numerous cases in

which trees seem to have separated

discordant shouts and noises and giv-

Be Mere Imagination

en back echoes in musical tones. "In every case," he says, "the source of the sound-waves on a beach, roar or a river, exhaust of motor boat or discordant human voices-was one in which many pitches were present. Something in the surroundings, usually trees, must have separated the sounds according to pitch, placing those of one pitch in one place and those of another pitch elsewhere. In this respect the phenomenon appears analogous to that of white light being broken up into pure spectral colors by

a prism. This reflection of absorption of sound waves of different pitches, Doctor Forbes explains, is only rarely observed. Sometimes the phenomenon is distinct and clear in one spot, yet a few paces backward or forward only the ordinary noises are heard.

The frequent association of trees with these musical echoes is thought to be due to the lack of uniformity they present as a reflecting surface for the sounds. Each tree apparently sends back part of the sound, and this reflection is boken up into innumerable parts on account of the varying element of distance.

### Boy Was Right There After Job He Wanted

He was a clean-cut, wide-awake young chap and he wanted a job. "I have nothing at present," said the corporation manager, "but leave your name and if anything turns up you will be notified.'

"May I ask if you have made the same promise to many others," said the applicant.

"Yes, quite a few," was the reply. The boy grinned and remarking that it was no monopoly he went out.

A few days later a young man was needed in a hurry and seven telegrams were dispatched to seven waiting applicants. Hardly had these left the secretary's office when in walked Johnny on the Spot, holding his tele-

"How in the world did you get it?" gasped the executive.

"Well, sir," he answered, "the other day as I was going out I stopped and got a job as errand boy. I thought it would be a good plan to be where I could get the news quicker than the

"You'll do!" said the manager .-Boston Transcript.

Observant Japanese Lady

A Japanese woman has given to a newspaper her reasons for always applying the feminine gender to ships, motors, trains, etc.: "Yes, they call 'she' for many becauses: They wear jackets with yokes, pins, hangers, straps, shields, stays. They have apron, also cap. They have not only shoes but have pumps. Also hose and drag train behind; behind time all time. They attract men with puffs and mufflers. Some time they foamrefuse to work when at such time they should be switched. They need guiding-it always require man manager. They require man to feed them. When abuse are given they quickly make scrap. They are steadier when coupled up, but my cousin say they h-ll of expense."

### Franklin Set Style

When Eighteenth-century Paris was still wearing the picturesque threecornered hat Benjamin Franklin came to represent the new republic of the United States, wearing on his head a queer thing derived from the steeple crowns of the Puritan Pilgrim fathers. Paris copied it and turned it into the cylinder which Christendom has worn ever since, says the Detroit News.

In the Eighteenth century when partisans of France and of Russia were fighting it out in Sweden the French faction wore hats, the Russians caps. The Middle ages, as a familiar ballad reminds us, knew a Pilgrim by his "cockle hat."

### Lamb's Merry Jest

One of Lamb's jobs on the Morning Post was to supply half a dozen jokes a day, for which Dan Stuart paid him 6 pence each, and held him well paid. Six fresh-baked jests a day is a tall order. The fashion of flesh-colored stockings for the women proved a tolerable help in time of trouble, and Lamb boasts justifiably of his masterpiece, inspired by pink stockings. He wrote that "Modesty, taking her final leave of mortals, her last blush was visible in her ascent to the heavens by the tract of the glowing instep."-Manchester Guardian.

### "Little Rock"

The principal city of Arkansas derived its name (originally "Le Petit Roche" and "The Little Rock") from the rocky peninsula in the Arkansas, distinguished from the "Big Rock," the site of the army post, Fort Logan H. Roots, one mile west of the city. The big rock is said to have been first discovered and named "Le Rocher Français" in 1822 by Sieur Bernard de la Harpe, who was in search of, an emerald mountain; the little rock is now used as an abutment for a railway bridge.

# Fields that Feed Us Are Plowed One Furrow at a Time.

When one sees the farmer and his faithful team plowing, little does he realize the food which feeds the world, is grown in fields that are turned over one furrow at a time.

The saving of One Dollar at a time with the regularity the farmer turns his furrows will start a money supply, which will feed opportunities' demand for cash.

to keep chickens. Mr. Justwed-Chickens! You mean ostriches.

# RINGING IN THE EARS

THAT a ringing in the ears is a prognostic of death is a very general superstition in this country and in many parts of Europe. It is not supposed to foretell the death of the one who hears the ringing but that he-or she-will, within a week, learn of the death of a relative, friend or acquaintance. The superstition is merely the result of association. The ringing in the ears, which is simply due to a sensitiveness of a nerve in the auricular cavity, by association recalls the "passing bell" which in old times it was customary to ring from the parish church when a parishioner was dying. In fact in many localities one who has this ringing in the ears will say: "I have heard the death-bell." In some localities the direction of the apparent ringing indicates the direction from which the news of death will come. It is an undoubted fact that all superstitions connected with death have a deep root in popular belief, are very widespread and vary but little in different localities. In this connection William Wells Newell in an introduction to Mrs. Bergen's collection of current superstitions, says: "It is always found that an especial conservatism attaches to customs and ideas associated with death; the disinclination to exercise independent thought on a subject so serious leaves the field open to the continuance of ancestral notions and practices."

### Lesson for September 7

JESUS HEALS A NOBLEMAN'S SON

GOLDEN TEXT—"I am the way, the truth, and the life."—John 14:6.
PRIMARY TOPIC—Jesus Heals a

JUNIOR TOPIC-Jesus Heals a No-

INTERMEDIATE AND SENIOR TOP-C—Belief in Jesus—What It Has Done YOUNG PEOPLE AND ADULT TOPIC
—What Should We Expect From Faith?

The glorious revival among the Samaritans being over, Jesus, with heart yearning for His countrymen, goes back into Galilee. When He began His work there it was not appreciated as it should have been. His own testimony is that a prophet hath no honor in his own country. Having made a reputation elsewhere He now came back to them.

I. The Nobleman's Earnest Plea (vv. 46, 47). This father's heart was in deep anguish because of the critical illness of his son, but he had the good sense to go to Jesus in his distress. Parents should eagerly bring their children to the Great Physician. This affliction was used to bring him to Jesus. Many do not think of Jesus until overwhelmed with grief and distress. It is need that always brings men to Jesus. Even when human physicians fail the case is not hopeless, for there is no case too hard for Christ and there is no disease too difficult nor sorrow too great but relief can be found in Him. This is true of our physical ills, but it is pre-eminently true of our souls. We see here that a rich and influential man is in distress, showing that the rich and exalted are no more exempt from afflictions and anxiety than are the poor. Cares and trouble come to all alike. The young are liable to disease and death as are the old. This nobleman learned of Jesus through the testimony of another (v. 47). Had not some one told him about Jesus he would not have called upon Him. Before lost men can call upon the Lord some one must tell them about Him (Rom. 10:14, 15).

II. The Testing of the Nobleman's

Faith (vv. 48, 49). In his experience we find an illustration of the development of belief. He had faith, but not an intelligent faith. Before help could be given his attitude of mind must be changed. Jesus declared, "Except ye see signs and wonders, ye will not believe," showing that the nobleman's faith was such as was based upon signs nad wonders. The man needed something more than the healing of his son. He must needs know Christ as Savior as well as Healer. He did not allow himself to be put off, but insistently demanded, "Sir, come down ere my child die." This shows that he was now willing to make any experiment to save his boy. His very impotency forced him to lay man to possess a falth which was based upon His naked word, not mere signs and wonders. The way of Jesus

III. The Nobleman's Faith Victorious (vv. 50-54).

is to first reveal Himself as a Savior

and then as a Healer.

Through his testing he passed with good advantage. He is now ready to receive the Lord's own word, "Go thy way; thy son liveth." These words created true faith and the man stepped out upon them. Because he believed the words that Jesus spoke unto him he went his way. Faith increases in brightness the longer it is exercised. The foundation upon which he reposed his faith was the words of Jesus. On his return his faith met with confirmation. His servant met him and told him that his son was alive. Upon inquiry he found that the recovery of his son was from the very hour in which Jesus spake the words. This was such an unmistakable evidence of the deity of Jesus that not only the nobleman, but his household, was won for Christ. This affords us an example of the beauty of household religion. May we all learn that the words of Jesus are reliable. That which He promises is just as sure as though it had already come to pass. The salvation of the one who believes in Jesus is just as sure as though he had been in heaven and seen his name in the Book of Life. Anxiety for the son brought salvation to the whole house.

### Evangelism

"Evangelism is not merely a work of love. It is the sheer law of selfpreservation. The heathenism which is creeping along the fences of society is scattering its seeds on both sides. If Christians do not make the world better, the world will surely make the church worse."-Herald of Holi-

### Innocent Revenge

He that has learned with meekness and quietness to forgive injuries and pass them by, has found the best and surest way of baffling and defeating them; nay, it is a kind of innocent revenge.-Matthew Henry.

September 7 In His Steps (9) How Jesus Helped Sinners Luke 15:1-7; Luke 19:1-10

1. Our Lord helped sinners because he had a right conception of their need. No false philosophy blind-ed His vision. No foolish theory of sin deceived Him. Sin as "a weight or incubus from which the human race will be freed by its evolutionary progress," was and is abhorrent to His thought and teaching. He knew the real condition of sinners, and described that condition in a word which occurs three times in our Scripture lesson—"lost," "lost," "lost,"—lost to God, lost to holiness, lost to heaven.

2. Our Lord helped sinners by attracting them to Himself. "They drew near to hear him." He was no cold-hearted teacher with a theory to pro-He loved men, as seen in the words, "This man receiveth sinners and eateth with them." His was the shepherd's heart that went out after the lost sheep and rejoiced with joy

unspeakable when it was found.
3. Our Lord helped sinners by giving Himself for them in the death of the cross. Without this all other help were vain. The sheep are men and women who through sin have become estranged from God, and who need a mediator, one who can put away sin by meeting its righteous penalties in such a way that con-science will be satisfied and the heart find rest. This He did when "He bore our sins in his own body on the tree." "He appeared to put away

tree." "He appeared to put away sin by the sacrifice of himself." 4. Jesus helped sinners by dealing with them not in mass, but individually. "Zacchaeus, make haste and come down, for today I must abide in thy house." Entreaty, immediacy, urgency, are all found in the invitation that comes from Him who "the same yesterday, today, and for-

### Famous Old Church

This year sees the three hundred and sixty-fourth anniversary of the demolition of the magnificent Church of St. John at Perth, the restoration of which is now contemplated.

This is without doubt one of the most interesting churches in Scotland, says the Weekly Edinburgh Scotsman. Tradition ascribes its foundation to the Picts, but, whoever founded it, it is one of the earliest stone churches built in the country; and, in the Twelfth and Thirteenth centuries, as evinced both by ancient documents and by the surviving remnants of the edifice of that time, it was magnificent and extensive. The monk of Dunfermline, to whom it was granted, allowed it to fall into disrepair-a state of affairs which Robert the Bruce set about remedying, but the restoration was stayed by his death.

### Viands Have Many Names

The wiseacre says that the expression "Welsh rabbit" is a perversion of Welsh rarebit, but this is a mistake. The man who first made this suggestion had no sense of humor.

As a matter of fact, the table furnishes many examples of names of viands which have an alias of the same humorous description as Welshrabbit. Sailors, for instance, call a shark steak "Folkestone beef, and fisher folk commonly call smoked herring "Digby chicken."

A similar instance to Welsh rabbit is provided by poached egg on toast being known as "Scotch woodcock," and an Australian leg of mutton as "Colonial goose."-London Times.

### No Secrets in His Life

A man who had amassed a fortune by his own efforts liked to annoy his wife by telling credulous acquaintances about fictitious early hardships. Placed next to a dowager at dinner, he was sure to tell the following story:

"I never learned to read or write until I was twenty-one. My principal garment up to the age of twelve was a coffee bag. Down in the mountains where I was raised a brand popular in those days was triple X, and you can see a triple X across my shoulders to

### Many Uses for Myrrh

Myrrh is a substance which exudes from the bark of a gum resin tree known as the myrrh tree, which grows in Arabia and eastern Africa. Its smell is balsamic, its taste aromatic and bitter. Myrrh was commonly used by the ancients for fumigation. Myrrh is used in medicine as a tonic and stimulant, in disorders of the digestive organs, excessive secretions from the mucous membrane, etc., also to cleanse foul ulcers and promote their healing, and as a mouth and throat gargle.

### Farewell, Old Scout

Roaring Rip-Ki, whoop! At last I'm goin' boys! Bury me deep-if yer find me dead!

Pizen Pete--Whar is Roarin' Rip goin'?

Prairie Rat-Woll, yer see, Hurricane Gal has turned down all the boys wot proposed marriage, now Rip is goin' ter take a chance. Fetch out the picks an' shovels, boys. Dig the grave deep. Poor ol' Rip.

# major's Man Knew How

Garvino dug around till he found another scorpion. He broke the critter in two, tore off the major's legging, rolled up his pants and drawers and applied the raw end of half the broken scorpion to the spot on the major's leg where the sting had entered, writes Leo P. Cook in Adventure Magazine. The pain ceased immediately and the major felt no further discomfort. Thereafter we knew how to treat a scorpion sting. This may be

Another little trick of Garvino was to catch a scorpion, hold it by the head from beneath with thumb and finger, and with his other hand tear out the muscle that actuated the scorpion's sting. You know the scorpion must flip his tail up over his head to strike. After Garvino had performed this operation the scorpion was helpless to sting, though his locomotion was not interfered with.

# Writing on Pinhead

Wandering about town one might get the idea that America had developed a new industry-that of engraving the Lord's prayer on pinheads. The impression is strengthened if one takes to visiting the regions in which sideshows flourish, near town or along the rustic routes of the traveling

almost pause to ask if all this pin engraving were not dangerous. There is no fear, however; the engraved pin business has been placed on a safe and sane basis, remarks the New York

### Legend of Pontius Pilate

named after Pontius Pilate. Country people say that it is haunted by Pilate's ghost. According to legendary lore it appears that after the Crucifixion Pontius Pilate fell from imperial favor and killed himself in prison, whereupon his body was cast into the Tiber, which immediately rose and almost burst its banks. The body was taken to a lonely pool at the top of the mountain which now bears its name near Lucerne. According to another version Pilate retired there during his lifetime and was thrown into the pool by the Wandering Jew. In any case his presence caused terrible trouble, avalanches and floods devastating the district amid a thunderous noise in the recesses of the mountains. In the Sixteenth century the ghost was finally laid, and a procession went up every year, headed by the vicar of Lucerne, to cast stones into the pool.

where, after Ahaz introduced the wor-Moloch, the Jews, under Manasseh, were continually gendering." A perpetual fire was kept burning to consume this putrefying matter; hence

### Hidden Love Messages

There have always been parents and guardians to hinder and thwart the hapless lover, and many girls have been obliged to resort to methods of deception.

The simplest means ever employed was to write the love messages with fresh milk instead of ink. On the receipt of a blank sheet of paper, all the recipient needed to do was to sprinkle it with soot or charcoal. The grit stuck to the lines traced by the pen.-Exchange.

law upon the resistance of solid bodies,

# to Deal With Scorpion

The major acquired a body servant named Garvino while we were soaking up malaria in the kills back of Santiago. One day the major was stung by a large scorpion-stung through his leather legging at that. Major Latimer was probably one of the world's greatest technicians in the art of profanity. He tore loose with his entire vocabulary when the virus of the scorpion made itself felt. Then he concluded he was going to die, as many other scorpion stingees had.

# No Longer Novelty

Considering that the man who engraved the prayer on a pin a few years ago was reported to have gone blind and insane as a result of his three years of application, one might

The original pin was all that has been said for it. On a disk forty-

seven one-thousandths of an inch in diameter there were engraved 65 words with 254 letters, and nearly 2,000 lines had to be cut in doing it. The original might conceivably have got lost in a sewing basket and gone the way of all pins. But a die was made of it -no inconsiderable job in itself-and the market is now supplied from the

Among the Swiss Alps is a mountain

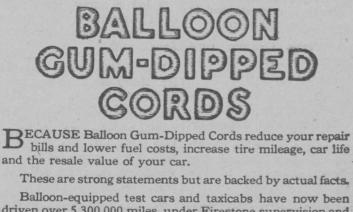

### Gehenna Place of Horror

The word Gehenna is translated "hell" in the Bible. Gehenna, strictly speaking, was the valley of Hinnom, a deep narrow glen south of Jerusalem, ship of fire gods, the Sun, Baal and made their children pass through the fire and offered them as burnt offerings. "So Josiah defiled the valley making it a receptable of carcasses and criminals' corpses, in which worms it became the image of that awful place where all that are unfit for the holy city are supposed to be cast out.

### Study Woods Again

When iron ships came into use the study of woods began to decline and the decline was steady until recently when the United States Department of Agriculture placed wood upon a footing of a "principal product." Galileo, upon his visit to the arsenal in Venice, which visit had much to do with his was one of the first eminent students of woods. Leonardo da Vinci was an-

# It's Economy to Trade Your Old Tires For FULL-SIZE rirestone

Balloon-equipped test cars and taxicabs have now been driven over 5,300,000 miles, under Firestone supervision and show reduction in fuel consumption, and less delay, because

of fewer punctures and quicker starts and stops. Many leading automobile makers have standardized on these full-size Balloons-pioneered by Firestone and made practical and economical through the special Firestone

gum-dipping process. Over 100,000 motorists are today using and enjoying the satisfaction of genuine, full-size Balloon Gum-Dipped Cords. In fact, in three months the sales of Firestone Balloon

Gum-Dipped Cords increased 590%. Have your car equipped now-for comfort and for the safety of driving this Fall and Winter. Be prepared for mud holes, frozen ruts, dangerous snow and ice. We can equip your car immediately at the new low prices now in effect.

NOW-

By DOUGLAS MALLOCH

\* FOR old sake's sake, when far asun-

A thought shall leap from heart to We suddenly shall stop and wonder, For old sake's sake, when years

apart, Shall wonder how the other's faring, What world we live in, path we take, And find ourselves a little caring, A little yet, for old sake's sake.

For old sake's sake in some December We still recall the skies of May; Minds may forget but hearts remember

Each lovely hour, each golden day. We thought it all forgot forever, New worlds we find, new paths we

make, And then, some day, we find we never Can quite forget, for old sake's sake.

New lands, new loves, new plans, new

New roads to travel, work to do, New hopes, new dreams, new friends, new faces. New griefs that come to me and

you. Then comes a memory beguiling, Then comes perhaps a little ache-

Some tender thought that starts us smiling. Yet brings a sigh, for old sake's

### Too Much for Him An officer in one of the Seventh

(©, McClure Newspaper Syndicate.)

sake.

street banks says he answers questions all day long and is always glad to be of service to clients.

"But I wish you would tell me," he said, "what I should have told the woman who came up to my desk this morning. I was rushing to get a statement finished that was already overdue, but I left off and asked her what I could do for her. And in an anxious voice she replied:

"'Please, have you seen in here this morning an elderly lady with heart

### Framed Motto Helpful

Real joy of spirit with which to meet the day's journey may be brought through a framed motto that hangs beside the mirror as one dresses in the morning. As we leave the house for the day's business we love to carry with us either a few bars of melody, or a line of a beautiful poem, lilting in the mind. A motto, or a poem, properly framed and hung where it catches the eye often, has carried a message of gayety or courage to many a one who thus remembers its words.

### Glory Long Departed From Ancient Cities

The residents of ancient Sidon believed in coolness and comfort and their highways were vaulted. Solid vaulted masonry gave the city a subterranean appearance. Today sarcophagi are so abundant that they are used for watering troughs and for building walls and houses. Tyre and Sidon were once towns of great wealth and importance. Today Tyre is only an inconsiderable town of about 6,000 inhabitants, although it was once the prize for which kings and conquerors contended. Pharaohs of Egypt, kings of Assyria and Babylon and Persia and Greece and Rome, as well as the Crusaders and the Moslems, all fought furious battles and maintained incredible sieges for the capture of Tyre. Although encrusted with historical associations and literary traditions, this once-powerful Tyre, which planted Carthage and established colonies in Europe, and was mistress of the Mediterranean, is now a ruin with few traces of its ancient grandeur, all having been submerged by sand and sea.

### Smelling Salts

Fainting indicates that the action of the heart has for some reason become disturbed, with the result that the blood is no longer properly and regularly pumped up to the brain. The essential feature of "smelling salts" is the ammonia—the other ingredients being added to make the effect more pleasant-and when we sniff this ammonia we irritate and stimulate a special group of nerve cells called the "respiratory center," situated at the base of the brain. This center, feeling irritated, immediately sends out a message to the lungs, telling them to take in more air to counteract the effects of the ammonia. So we are forced to breathe more deeply, and the oxygen that we thereby take in enriches the blood, restarts the proper circulation to the brain, and so restores full consciousness.

### Had Odd Affliction In "Ten Years' Experience in a

Sanitorium," published by the Medical Research Council, Sir St. Clair Thompson describes a case believed unique. An accountant was taken to the hospital suffering from an affliction of the throat believed to be tuberculosis. He was very husky, and was gradually losing his voice. Then the doctors noticed small black bodies about the size of millet seeds. Under the microscope they showed a fungus called aspergillus fumigatus, and soon cured the patient. This disease is chiefly met with in birds. It has been found in ducks, geese, fowls, pigeons, pheasants, bustards, swans, flamingoes, jays, and golden plover. Sir St. Clair Thompson declares that he had never known a case recognized and described in the larynx before.

### Staple Mexican Dish Is Chili and Beans

Before banditry and revolution became the hobby of old Mexico the natives were the largest producers of chili in the world. Chili was canned for the first time at Las Cruces, N. M., more than 280 years ago, it is said. Now the big California packing houses feature red and green pimentos as one of their specialties. New Mexicans prefer their local variety to any other because, they say, it has more fire to the ounce than the milder, sweet peppers. At home the fresh green pods are blistered and the outer skin peeled off. This is stewed down into a sauce, with the never-failing addition of a clove or garlic. In the winter the dried scarlet pods are roasted and ground by hand into powder, the fineness of the powder being one of the tests of the Mexican housekeeper. Chili and beans-the large brown Mexican beans—is a staple dish in the Mexican home. Enchiladasthick pancakes spread with the hotterthe-better chili sauce between and running over them. Eggs with chili, meat with chili (chili con carne), tamales, these and many more are peppery delicacies which make the chili crop of economic importance.

### In Ancient Oxford

There is, perhaps, no more interesting place in the whole world than Oxford the ancient English university town. Any one who likes quaint old things can agreeably spend weeks there. Oxford university is not a single institution like practically all American schools, but a group of 20 separate colleges, all linked together in a sort of league. The oldest one, Baliol, was founded away back about 1260. The buildings of Christ Church college are the largest and most imposing of the lot. Many of the stone steps of these old Oxford buildings have been worn nearly through by the footsteps of succeeding generations of students and have had to be replaced.

### Straight Tip

A young sport who answered an advertisement offering to send some tips on the horses, received for his dollar a card with this advice on it:

Horses to follow-Hearse horses. Horses to back-Hobby horses, Horses to put something on-Saw

Horses to let alone-Race horses .-Western Christian Advocate.

### What He Lacked

A fat man who was headed for the depot four blocks away stopped a moment on a corner to mop his beaded brow. Puffing heavily he inquired of a policeman standing by if he had time to catch the 3:45 train. The officer consulted his watch. "You've the time, all right," he replied, "but I don't think you have the speed."-Boston Tran-

# TANEYTOWN LOCALS

Dr. A. G. McCall, Director of Soils, Maryland Experimentation gave a very interesting and profitable talk before the Hampstead local, Friday night. He gave the results obtained at the Dougheran Manor plots, lizer. He advised home mixing, buying only high grade fertilizer and ! using less per acre.

LAST PAGE EDITORIAL. The Home Weekly.

The Publishers Auxiliary, a weekly published in the interests of country weekly newspapers, is conducting an open forum for publishers to give their reasons why people should take the home-town paper. These articles that have been appearing for several weeks, are strangely alike in conclusions. sions, and are summed up, largely,

(1) Because, as a financial invest-ment for personal profit, the home weekly is apt to pay back many times over in one year, the cost of a year's subscription, through the intelligent reading and use of advertisements.

(2) Because, there are many emergency uses for the home paper that can not be supplied otherwise, and the more prosperous the home paper is, the better it can serve home people. (3) Because, it has a news value all

its own,to subscribers and to the home town; hence nothing can take its place, and as a matter of local pride it should be generally supported. (4) Because, there is nothing else like if as a "letter from home" for those living away from the old home. It never forgets, and is never too busy to send its weekly letter.

These are undeniable reasons given by editors throughout the United States—a composite, based on years of experience and effort; and yet, there are too many in every community who withhold their support, likely because they think they know better, or because they do not realize the benefit of a home enterprise that they seem to have, anyway, whether they support
