FIRE COMPANY SUBSCRIPTIONS

Have You Made, and Paid Yours Toward the Truck?

Property owners within five miles of Taneytown, are likely to derive more benefit from the new La France Fire Truck, than are property owners in Taneytown. To a very large extent town property is protected by the standpipe pressure, while district property gets a protection it never

For this reason, those living within easy reach of the town should pay very liberally toward the equipment. Some have, but many others have not, done this. Do it now, and help the Company to retire the debt on the new

Some may say—"We will pay, when some service is rendered." That is very commendable; but we rather think it probable that those who have contributed liberally, before, are apt to receive the most prompt service, when they call for it. A promise, is not as good as cash in advance, in such cases. The Record is not speaking authoritatively, for the Fire Com-

pany—only on "general principles."
The Firemens' Supper, this Saturday night, will be a good time to hand in donations-not only for suppers, but cash besides. Up to this time, contributions have been excellent—all that were expected—now let us make a big clean-up, this Saturday night.

To Pea Growers.

"The pea, in common with certain other food crops, undergoes a change during maturity that is marked by a loss of sugars and an increase in starch. This change is closely associated with changes in quality and takes place rather rapidly during warm weather so that a few days delay in harvesting is frequently suffi-cient to account for a noticeable de-crease in the quality of the crop. A delay in the date of maturing is there-

fore advantageous.
"All available evidence serves to emphasize the importance of harvesting peas promptly upon the attainment of marketable size. Delay in order to obtain a possible increased weight of shelled peas can only result in a decided loss of quality. Progressive canners recognize this fact. Consequently they are paying the grower a sufficiently high price for peas of quality, based upon a size method of grading, that the grower can afford to harvest his peas in a less mature condition, obtain fewer pounds than if harvest had been delayed, and still make an equal or even better

profit per acre." T. B. SYMONS, Director.

Major Hall Honored.

The following, from last week's Sykesville Herald, will be of interest to many who knew Maj. Hall, while he was Editor of the Sykesville Her-

"It may be of interest to the friends of Major A. M. Hall to know that Governor John W. Martin has just appointed him to the office of Supervisor of Electors for Orange county, Florida, carrying a salary of \$2,000, with a four year term. Governor Martin and Major Hall became warm personal friends soon after the latter's removal to Florida, and when the primary election came on the Major was very active in his friend's behalf. With voice and pen he put forth every effort, and when the victory was won Governor Martin visited at Major Hall's home and expressed his gratitude for what had been done in his behalf. He then proposed to have Major Hall become a part of his administration at Tallahassee, but his interests in Apopka and his duties as editor of The Chief would not permit this without sacrifice, as it would have meant his leaving Apopka. The Governor then named him for the position stated above, the duties of which will not interfere with his editorial work. His office will be in the Orange County Court House at Or-

To the above, we add our congratulations, as we feel that the honor has been fully earned and deserved.

Rev. Geo. W. Nicely, D. D., Accepts Williamsport Call.

Rev. Geo. W. Nicely, D. D., pastor of St. Mark's Lutheran Church, Hanover, presented his resignation to the Church Council, last Friday evening, and at a second meeting, on Sunday, following morning worship. The Council and congregation accepted the resignation, Sunday evening, expressing their deep regret that there

was nothing else to do. Dr. Nicely has been pastor of St. Mark's for more than twelve years. The change will take effect in about A call to the Williamsport church has been under consideration for several weeks, and after giving it full consideration, was accepted.

Public Sale Advertisements.

Sale advertising is now appearing pretty extensively, so read up the sale offerings, each week, until the last of March. The advertising of a sale is not solely for the benefit of the seller -but may be just as much benefit to the buyer. It is just as important for This is true of all kinds of advertising-public, or private sales. | Royal Mint in London.

CANNER-GROWER MEETING.

Committees of Three Counties to Confer with Canners.

Farm Bureau representatives and county agents of Frederick, Howard and Carroll counties, held a meeting at Mt. Airy, Feb. 10, with the view of ascertaining the situation regarding canning crops for the present year, and looking toward a closer understanding and co-operation with pack-

It was decided that committees of representatives of each county meet with the canners, and work out an arrangement in reference to a price for corn and tomatoes, satisfactory to all concerned. Arrangements are being made for a meeting in the near fu-

Howard Kulm, Howard county, was chairman of the meeting, and addresses were made by Albert Radebaugh, canning crop specialist of he University of Maryland, and County Agent Peter W. Chichester, of Frederick.

Mr. Radebaugh, who recently returned from the Middle West, gave a summery of canning even condition.

summary of canning crop conditions throughout the country. He said, while farmers should take every step possible to get a maxium price for corn and tomatoes, the uppermost thought should be to maintain the industry, and that it would react to the disadvantage of farmers should their organizations arbitrarily set a price canners could not afford to pay. "Maryland," said Mr. Radebaugh,

"is a great canning crop State and we should look toward developing the industry so as to make it more profitable for both farmer and canner." He told of the work now being done in the Middle West, and because the industry was developing out there it should be highly important that nothing be done that would injure the development of the canning crop industry in this State.

County Agent Fuller says, "This meeting should be the beginning of closer co-operation between the three counties. The farming and canning conditions are alike for this entire area both as to production and markets; that greater results could be secured by such a tri-county move-

The results secured last year by the Farm Bureau was a big advantage to the producer, many of whom failed to live up to their contracts. "Bootlegging" is a dangerous proposition whether it be "Booze," sugar corn, or tomatoes and beans.

The Carroll County Committee will ask the canners to meet with them in conference. A bigger and better canning county should be our aim.

Special Days in 1925.

Fourth-of-July, the first real summer holiday, will this year be on Sat-Easter this year comes eight days earlier than last year, the date being

April 12. Lent starts on February 25. Fixed and movable holidays for 1925 follow: Washington's birthday, Sunday, February 22; Shrove Tuesday, February 24; Ash Wednesday (First Day of Lent), February 25; First Sunday in Lent, March 1; St. Patricks Sunday in Lent, March 1; St. Patricks Day, Tuesday, March 17; Palm Sun-day, April 5; Maundry Thursday, April 9; Good Friday, April 10; Eas-ter Sunday, April 12; Patriot's Day Sunday, April 19; Grant's Birthday, Monday, April 19; Grant's Birthday, Monday, April 27; Mother's Day, Sunday, May 10; Ascension Day, Thursday, May 21; Memorial Day, Saturday, May 30; Whit-Sunday, June 7; Flag Day, Sunday, June 14; Trinity Sunday, June 14; Bunker Hill Day, Wednesday, June 17; Corpus Christi Thursday, June 18; First Day of Summer, Monday, June 22; Independence Day, Saturday, July 4; Orangeman's Day, Suhday, July 12.

Labor Day, Monday, September 7; First Day of Autumn, Wednesday, September 23; Jewish New Year's Day, Tuesday, September 29; Mi-chaelmas Day, Tuesday, Septecber 29; Discovery of America (Columbus Day), Monday, October 12; Halloween October 31; All Saint's Day, Sunday, November 1; Armistice Day, Wednesday, November 11; Thanksgiving Day, Thursday, November 26; First Sunday in Advent, December 6; First Day of Winter, Tuesday, December 22; Christmas Day, Friday, December

Former Garage Man Arrested.

Robert Black, former owner and operator of the Thurmont Motor Co., of Thurmont, for whom special officers of the State Motor Vehicle Commission have been searching for the past three months or more, was arrested on the Thurmont-Frederick pike last Friday afternoon on warrants on false statement charges in obtaining titles, coming into possession of cars with obliterated serial numbers and selling

cars with changed engine numbers. He was arraigned before Magistrate Sherman P. Bowers, Frederick, Friday afternoon and was released in \$1,000 bond for a hearing on February 27th. Black is charged with having in his possession or having sold at least a dozen cars with defaced engine numbers. Officers of the State police have been on the trail of cars for many months, all of which were traced to Black's garage. Investigations which led to the arrest of Black have been in progress for nearly two years, it was said.—Brunswick Times.

Natives of the Gold Coast use nickel coins with a hole drilled through the center, so that these folk, one to know where to get what he possess no pockets and few clothes, to the borrower who needed some wants, as it is to tell what one has to may string their money round their money but did not care to relinquish The coins are made by the

BEEF WILL BE HIGH BY SEPTEMBER.

Scarcity of Cattle will bring an Acute Shortage.

According to a New York correspondent of the Baltimore Sun, beef will be scarce and high, this Fall. The

report says in part;
"The American family's "T-bone steak" and "prime roast beef" will be both scarce and dear by next September, a delegation of cattle raisers and dirt farmers from Texas, Kansas, Missouri and Illinois told Wall street financiers at a luncheon at the Bankers' Club today.

The American housewife, the Westerners brought word, would go to market with a smaller basket and longer purse, her harassed butcher being forced to put on the screws by then because of herds dispersed dur-

ing the post-war slump.

The national meat shortage, the visitors agreed, threatens to become so acute by fall that it may cost North America its position in world markets

as a meat producer.

E. P. Swenson, a banker-ranch owner in Stamford, Texas, told how cattlemen during the war were in-duced to increase their land holdings and herds of cattle. They financed themselves by short-term notes, but, with the armistice money tightened,

they were "sold out" and the bottom fell out of the cattle business. W. O. Mitchell, who was introduced as an expert on "animal eugenics," said that 95 per cent of the cattle on Texas ranges were less than a year old. At that, he warned, the calf crop had fallen to 55 or 60 percent, which spelt failure in building up adequate herds.

Good times were in sight for meat producers if not consumers, according to J. W. Frazier, a farmer of Charles ton, Ill.—Balt. Sun.

Protective Activities.

Speaking of the protective activities that are carried on quietly but without any let-up throughout the counties, by the State Department of Health, Dr. John S. Fulton, Director of the Department, referred a few days ago to the vaccines that are supplied as a model for the department. plied, as needed, for the control or prevention of communicable diseases. In 1924, enough material to vaccinate 25,000 persons-2,955 to be strictly accurate, was distributed, for the control of smallpox in the counties. During the same time, sufficient typhoid vaccine to immunize 11,457 persons, was prepared and distributed throughout the counties, from the State Bac-

teriological Laboratory. As a result of the activity along these two lines, the number of smallpox cases in 1924 was held down to 56, and the number of cases of typhoid fever was cut from 980 in 1923 at all times.

to 830 in 1924. Diphtheria anti-toxin, for use in controlling that disease, and the closely related substance, toxin-anti-toxin which is used in immunizing against the disease were also furnished in large quantities. Diphtheria accordingly came down from 1030 in 1923 to

The list that follows of the vaccines and similar materials that are furnished by the State Department of Health, either entirely free of charge, or at cost, gives some idea of the scope of this protective work:

Smallpox vaccine free. Typhoid vaccine, free. Diphtheria anti-toxin—for the treatment of persons who have contracted the disease or who have been 5,000 units, 70c; 10,000 units, 35c; 20,0000 units, \$2.00. in contact with it—1000 units,

Diphtheria toxin-anti-toxin-for the immunization of chidren, free. Lockjaw (tetanus) vaccine—preventive doses free; curative doses, at

Hydrophobia (rabies) pasteur treatment—\$20 plus 25 cents postage, to County Commissioners, or to physicians for pay cases; free on physician's certificate that the person is

unable to pay.
Salvarsan—for the treatment venereal diseases (indigent and clinic cases)-free. The prices that are given in the above list are for the vaccines only, and do not include the physician's fee

for administering them. Radio Helps Egg Production.

A firm of two brothers, who are enterprising poultry experts, in Pennsylvania, has introduced radio entertainment for laying hens, with good results. A news report of the experiment says;

"These hens go to roost at sunset as per the traditional schedule, but at 9 o'clock, P. M., the laying house is flooded with light and a tasty bran mash is laid. This is not exactly an innovation. The lighted coop was introduced some time ago and a few of the biddies, it is thought, got wise to So the brothers have supplemented the light with a radio set.

This clinches the delusion. The hens become convinced that the radio output is furnished by summer boarders talking and singing on the porch, and they get busy. The night yield of eggs is large."

A Kansas man pawned a ten-dollar bill for nine dollars. The broker told the police that the bill was a present his rights to the bill by spending it. The bill is genuine.

SELLER MUST GIVE WEIGHT

Shipper Responsible for Short Weight Containers.

Use of short measures of round stave bushel baskets in the Eastern Shore districts of Maryland and Virginia has recently been brought to the attention of officials of the United States Department of Agriculture.

"Use of short baskets in interstate shipments may get the grower or shipper into difficulty," the depart-ment says. "Many growers seem to think that if they use short baskets the manufacturer, and not the grower or shipper, is responsible. This is not the case, unless the grower os shipper can produce a guaranty signed by the manufacturer or dealer.

"Growers should require the person from whom they obtain baskets to guarantee that the containers are of proper capacity. The net weight Amendment to the Food and Drugs Acts also holds the shipper responsi-ble for marking the correct volume on the basket and growers should assure themselves that the baskets are of such capacity that the marking on them is correct."

Safety Advice for Autoists.

The following recommendations have been issued Safety Council, following the announcement that 20,000 persons were killed in the U.S. during 1924, in motor accidents;

"Hurrying to get ahead of a train, a street car or another vehicle saves only a moment or two at the ultimate destination and the gain is not worth the price—there is too much danger

of accident.
"The best drivers are especially careful at dusk or twilight. "Slow up for all turns in the road. Blind corners are dangerous. When it is impossible to see what is coming from around the corner, be prepared to stop. Sound horn a short distance

before reaching the intersection. "Don't zig-zag from one side of the street to the other.

"Use chains of the Weed type whenever there is danger of skidding. Install chains on both rear wheels or none at all. Only one chain is sometimes worse than none.

"Hitting ruts at too high a speed may cause the driver to lose control of the car.

"Drive slowly at bridges and at

"When attempting to pass another vehicle going in the same direction start turning out (to the left) at least 75 feet to the rear. If you get too close your view of the road ahead is obstructed and you may turn directly in front of another car coming toward you. When you have passed a car do not cut back into the road nor slow

down too soon.
"Always be careful when backing. Sound horn, signal other cars and look back (not ahead) to see where

view ahead. Every car should have a secondary windshield (rain visor) or windshield wiper.

'When driving do not attempt to carry on a conversation with others in the car. Small children should preferably sit in the rear of the car; they should never be held in or between the arms of the driver. Safe driving demands your full and undivided attention.

"Be sure to signal when driving toward or away from the curb."

C. & P. Directors Elected.

Two well-known Baltimoreans were added to the Board of Directors of the Chesapeake and Potomac Telephone Company, of Baltimore City, at the annual meeting of the Stockholders by the election of General Henry M. Warfield, and ex-Governor

Phillips Lee Goldsborough. General Warfield is prominent in the industrial life of Baltimore City and is identified with insurance and other business institutions. Ex-Governor Goldsborough is President of the National Union Bank of Maryland, a directory in several banks and other business institutions, and for years has been prominent in civic ac-

The Maryland members of the Board re-elected at today's meeting were: Charles H. Carter, and Albert The non-resident members of the Board as now constituted are: Walter S. Gifford, President of the American Telephone and Telegraph Company, and Eugene S. Wilson, Vice-President of the same Company, and Charles J. Bell, President of the American Security and Trust Com-

pany of Washington, D. C. With the Board as now organized, four out of the seven members live in

The Child Labor Amendment.

We advise the reading of the article under the above caption on our edittorial page, by those who have not yet made up their minds as to the exact value of the proposed amendment to the Constitution. It contains our own views on the question, as stated in a previous issue, in different words.

Changes in Address.

Changes in address may be handed in now, to be used on or after April Give the old address and Route No, as well as the new one, and when the time designated comes, we will make the changes in our mailing list.

Half of the foreign-born women and one-third of the foreign-born men in the United States are still aliens.

AGRICULTURE IN MARYLAND.

General Review of the Situation for the Past Year.

College Park, Feb. 16—A review of the agricultural situation in Maryland at the close of the year 1924 and a summary of the noteworthy developments in the agriculture of the State are included in the annual report of Dr. T. B. Symons, director of the University of Maryland Extension Service, which is being transmitted to Dr. A. F. Woods, president of the University of Maryland, the State Board of Agriculture and the Govern-or of the State.

"A marked improvement in the price of most farm crops has been the outstanding factor in the agricultural situation of the past year," says the report. "While the increase has affected farm crops chiefly and has been but partially reflected in the income of the Maryland farmer, the higher tone of the markets and the upward turn of prices have given fresh encour agement to agriculture after a long and serious period of depression.'

Dr. Symons points out that the unfavorable factors of the year were the comparatively low yields as a result of unseasonable growing weather and the fact that prices for livestock and livestock products failed to keep pace with the advancing prices of crops. Corn, the major crop of the state, was particularly susceptible to the unseasonable weather conditions and not only was the average yield per acre greatly reduced but the continuous rains of the early spring prevented the planting of a normal acreage.

"Progress during the year, however was evident in the economical methods of production employed by farmers throughout the State," says Dr. Symons. "The use of good seed corn was more general and more sources of good seed were established. Wheat, likewise, received closer attention and fifteen growers in eight counties produced seed wheat that was certified by the Maryland Crop Improvement Association while numerous others produced fine crops that fell just short of the requirements for certification. The production of home grown soybean seed of varieties adapted to Maryland conditions increased and the quality of the seed was demonstrated at the International Grain and Hay Show at Chicago where Maryland growers won first, second and four other prizes in the soybean classes.

"Eleven cow testing associations operated in the State during the year and gave evidence of the interest that has been aroused in the economical production of milk while much progress was made in improving the quality of the supply as a result of campaigns to promote better production, handling, transportation and distribution. Co-operative marketing of Lloyd B. Shipley, deceased, settled "Clean windshields give you a clear enterprises completed the year in his second and final account. good condition financially and otherwise and every county in the State is now served by one or more forms of co-operative marketing enterprise.

"Shipping point inspection, inaugurated during the year and given a trial with peaches and apples, proved advantageous to growers in marketing their products and did much to impress on them the importance of careful grading and packing. stress laid on the value of good seed as a factor in the production of the potato crop resulted in the certifica-tion of 14,000 bushels of seed potatoes, the largest quantity ever certified in the State. The potatoes were grown by twenty-six growers in six counties.

"While demoralized market conditions and unfavorable weather conditions were detrimental to the canning tomato industry of the State, hundreds of growers had the opportunity of discovering the value of well grown plants. Approximately nine million plants were produced in the forty-one community plant beds operated in the State during the year. Much seed of superior quality likewise was saved as a result of the Extension Service work for in connection with the tomato crop.

"The introduction of purebred sheep, including a carload of purebred "The introduction of Hampshire ewes from Idaho, and the improved interest evidenced in sheep production in the State promises well for the future of this phase of agriculture."

In concluding, Dr. Symons points to the effective co-operation that existed between the Extension Service the farm organizations of the State, including the Farm Bureau and the Grange, and the appreciative interest shown by the banking interests in the promotion of the State's agriculture.

THE CAVE HIS TOMB.

Floyd Collins found Dead, but the Body not Recovered.

The story of Floyd Collins, who was entombed in a Kentucky cave since January 30, was ended, on Monday, by the rescue party finding him, dead, after 17 days. Collins met with his death in an effort to explore the cave, by crawling down a tunnel extending about 125 feet from the surface, his object being to find a new cavern.

On attempting to return, a boulder fell and firmly held one foot, and he was not found for about 24 hours; and after efforts were started to rescue him, several cave-ins occurred that compelled starting all over again with new plans. The work was both difficult and dangerous, and finally, when the body was reached, death

had intervened. After finding and fully recognizing the body, and after physicians decided that death had taken place fully 48 hours before, a conference of min-ing experts and all of the parties con-cerned, was held, and the final con-clusion was reached that there would be too much risk to life to pursue the excavations sufficiently to release the body. His parents and other relatives concurred in the decision and plans were made to hold funeral ser-

vices at the mouth of the tunnel. Regulation services were held by three ministers during which tributes of praise were rendered the brave men who so earnestly engaged in the rescue work. It was a strange funeral, but none the less a very sol-

American Kings.

Some declare that they came to America to get rid of kings. But America is not without its kings. The American king was defined by Thomas Carlyle, who said, "The king is

the man who can." Such a king was present at a slight accident on the Pennsylvania Railroad. An express train from New York to Philadelphia stopped suddenly. After some delay the passengers alighted and came up to find the engine crew attempting to make a minor repair. The job was baffling to the crew. Just then there stepped forth from the crowd a commanding gray-haired gentleman, who demand-

ed peremptorily: 'Give me a hammer!" He went to work, and in a short time the trouble was rectified.
"Who's that man?" asked a pas-

"That is Sam Vauclain," was the

The volunteer repairman was president of the Baldwin Locomotive Works, a man who had come up from the bottom to be the head of the greatest locomotive plant. He was a true American king, ruling by the divine right of "the man who can." The dynasties of the West remain with those who come to power by the

Pennsylvania Against Amendment

gift of talent, rather than by gift of

blood.—Collier's Magazine.

The Pennsylvania Senate, on Monday, killed the ratification of the Child Labor Amendment by a vote of 43 to 4, after a spirited debate. Sentiment in the House is also adverse to the Amendment, but the vote in the Senate shows conclusively that Pennsylvania will not ratify it. So far, 5

states have ratified, and 2 rejected. The amendment appears hopelessly beaten. No State east of the Mississippi has accepted it. Only one Northern and no Eastern State has ratified. The trend against it shows no trace of sectionalism. The Pacific Coast, the Mountain West, the Southwest, the Northwest, the Middle West, the Lake States, the North, New England and the Atlantic seaboard-all are contributing to its defeat.

Five hundred dollars was paid for the destruction of a wolf which had killed \$25,000 worth of cattle and sheep in Arizona.

Churches in Business.

It is noticable that the churches are becoming more active along business lines, publicity and profit-making,

and why not? Many of the public sales of the past year have contained announcements that the sale of refreshments would is it not equally true, that when minor be limited to a certain Society, connected with a certain church; no doubt in most cases the church in which the person having the sale held his membership. We see nothing wrong about this, and nothing unchurchly, as most churches must now raise a great deal of expense revenue from the public; of more important laws? and if profit is to be made by somebody, at public sales by dispensing refreshments, why not the church?

It is also increasingly noticable that large congregations, especially, have divided up their adherents, especially among the young folks, and that these are holding socials and other programs, in a way catering to those who seek amusement, or entertainment. Again, we say, why not? Naturally, these events secure publicity in the newspapers, and help to advertise the churches and their activitiesthe church in action.

The churches are becoming alive to the fact that they must, in a sense, compete with secular attractions, make money, and "advertise" themselves. Holding aloof, and making the church formally exclusive, is largely out-ofdate, with churches that are growing in membership and popularity.

There is the danger that this movement may be overdone, at the expense of minimizing the sacredness of the occur through either of the activities named, especially when programs and business activities are scrupulously held to the legitimate.

"Get That Man."

Major Lynn G. Adams, superintendent of the Pennsylvania State Police, at a Bankers' meeting held in Phila-Smart newspaper writers, in their delphia, last week, memorialized

Major Adams paid a fine tribute to this trooper, whose last words were. "He shot me, Get that Man," and ceived the prominent notice and com-

mendation it deserved. But, what is the frequent attitude he pays the "supreme sacrifice." But, offences are involved, such as gambling, bootlegging, violation of speed neral. or road laws, or of the game laws, lations of such laws, and the escaping of penalties, encourage the violation

up a gambling device at a Fair, or who catches an offender violating road | life, of the evil he had done. To me or trespass laws? Is he not, more fre- the handling of this incident by the 10-pk Bag Potatoes, \$2.39 quently than otherwise, accused of newspapers would not tend to elimibeing over-officious? Unquestionably | nate crime and decrease the number of he is, and the fellow who is caught, the criminally inclined, but rather it gets slushy sympathy.

It is impossible to maintain an at- criminals." titude favoring the enforcement of set up a defensible code for law enually oppose, and an attitude of contempt for laws that we perhaps enjoy violating, in our own case. The prinlaws, in the minds of good people, should be, "Get the Man!"

The Child Labor Amendment.

Dr. H. E. Woolever, a Methodist syndicate editorial writer, in a recent letter to his readers regarding the Child Labor Amendment to the Federchurch, but we do not believe this will al Constitution, has passed the line of

"The only opposition," he says, "comes from sources interested in cheap labor and those opposed to popular education."

It is such statements as this that Very few are fortunate enough to have destroyed the influence of the comes to selling produce, or any other years. They are the mouthpieces of market price commodity. The ten- certain standardized opinions supplied trimmed their appropriations. Govdency is for people to hold stocks of to them wholesale by propagandist anything, when prices are ad- distributing centers, and being only vancing, with the hope of get- mouthpieces their service consists in

in a hundred or more Methodist pa-What we call "holding" crops, is as pers (a centralization which Method-

There are three considerations he tunity. The Constitution defines and establishes the sovereignty of the

ment. Of 48 States, 46 have stringent child labor laws. All the States have stringent school laws. Eight States East, to sell during the past month; fix the school age at 18; five at 17; twenty-eight at 16; one at 15, and six Granulated Sugar, 6120 lb. would have been sold at the over at 14. The States have done their \$2.00 price. There would have been duty, but their duty does not provide for another Socialistic Bureau at Washington, hence this new attempt at Government by Amendment.

Another consideration is the child. Loafing has come about too widely through our national prosperity, to be further encouraged by law. The ernment, on account of her violent boy and girl under 18 have the right anarchistic preachings, would like to to begin their career without an return to this country. She is now as American law curtailing their liberty. much opposed to the Russian form of There is no useful American today government as she was to that of the who would not have been handicapped United States, and now says it is by a legal barrier against initiative in his youth. This Amendment does not regulate child labor as its pro- Cocoa, 5c lb ponents with knowing and deliberate misrepresentation assert; it regulates a land where liberty and justice are the child. It gives the child over to the foundation stones of a free socie- the United States Government until he is 18.

It is quite easy to succumb to angry indignation which Americans feel at such a suggestion. But, there is a She is therefore opposed to all third consideration; this Amendment's drop out of sight, as a big feature. It "government," for to her, government | proposal will never come to pass. Easy means coercion, force—the invasion going legislators may pass it, just as at least of some real value, if not en- of personal liberty. In other words, easy-going clergymen may indorse it, but it will be a dead letter in the Constitution. And it is playing into alien freedom and liberty" means. As long and revolutionary hands to fill the Constitution with dead articles that inspire disrespect in the people. This country has too many undigested Amendments as it is.

The opposition to this Amendment is not fostered by those whose interest is in cheap labor, as Dr. Woolever misinformingly says. The opposition is from those whose interest is in Home Rule, in Constitutional integrity in the liberty of initiative in American youth, and in keeping the country as free as possible from an overloaded incompetent and too easily handled centralized control.—Dearborn Inde-

A Lesson in Journalism.

In a talk before the Sunday Evening Club of Chicago recently Mayor So much for this incident, that has re- a lesson in good journalism. "Recent- 3-lbs Ginger Snaps for 25c ly," said his honor, "a man was murdered in Chicago, and the murdered man was himself but a brutal murderof the public toward law enforcement | er, a man who had terrorized the city, officers? Perhaps in extreme cases, the acknowledged head of a gang of such as this, it is strongly on the side criminals. The newspapers of the city of the officer-and especially when devoted many columns to the life of this murderer; they made a romance | Piedmont Cigarettes, \$1.20 per carof it; they printed many pictures of the great crowd that attended his fu-

That little statement was a lesson in certain laws, and excusing the non- good journalism, a lesson that is sadly enforcement of others. We can not needed by very many of the metropolitan newspapers. The makers of the forcement against things we individ- city newspapers are looking for opportunities. They severely condemn the law enforcing officials because a crime has been committed, but the ciple back of the enforcement of all story of the crime itself is handled in such a way as to create more criminals. In the same way they play up the story of the criminal who escapes, but, as a rule, they have but little to say of those who are convicted. The city press could help materially in the suppression of crime if it would look less for the sensational news story and more to the interest of the community it is supposed to serve.—Publishers' Auxiliary.

Washington Does Not Like It.

Washington does not like the Coolidge economy program. The landlords are frantic when they think of his lower rent proposals. The army and navy are hurt because he has ernment employes resent his demands that their number be lessened. All Washington is peevish because he has taken the street fair and carnival hokum out of the inaugural ceremon-

The rest of the country is not worrying about Washington's feelings all. The Nation believes the way to economize is to economize, and is en-

Didn't See It

Recently I asked a man, who has arrived from Europe on one of the frivolous hotels that are now used as ferries, whether there were any rough days. "I haven't the slightest idea," said he; "I never saw the sea from port to port." It appeared that he was on one of the enclosed decks some 60 feet above the water. There is an insulting contrast between the artificiality of the modern floating palace and an element so primitive as the ocean; it is like a dining car passing through infinite miles of sagebrush.—Scribner's Magazine.

Women as Inventors

American women have patented from hooks-and-eyes to artificial eyelashes, including road-building equipment and intricate machinery. When Howe was trying to invent the sewing machine he reached the point of where he was stumped. His wife, tiring of having him sitting around glowering, shoved him aside, sat down before the machine, gave it a few whirls and said, "Put the thread eyelet in the other end of the needle down by the point." That solved the problem.

Value of Self-Control Self-control is self-direction, as well

as self-restraint. The engineer controls nearly 1,400 devices. Women have his engine not simply by preventing it patented contraptions all the way from running off the track or from colliding with an obstruction. It is rather by making it do the work for which it was constructed and intended -in pulling the train and getting somewhere—that he establishes his reputation as an efficient engineer. Once give the boys and girls this positive side of the matter of self-control and you set them on the path to development, of operation and a large measure of success. Do not be a prohibitive teacher.-Education.

PUBLIC SALE

The undersigned, will offer at public sale, on the premises, the Weant farm, now occupied by me, 1 mile north of Haugh's Church, on

When Barrett Wendell

Was Roused to Anger

For all his scholarly dignity, Barrett Wendell, Harvard professor, now and then lost his temper and especially at football games. In his biography, M. A. DeWolfe Howes recalls an occasion when Doctor Wendell and his daughter were greatly annoyed by an excited fan directly in front of them, who kept leaping up and cutting off

When protests proved of no avail, Wendell upraised his professorial cane and brought it crashing down on the man's head, breaking his hat.

A roar of laughter went up from the delighted students who witnessed the incident, increasing when the man turned around shouting furiously:

He is survived by four sisters and two brothers; Mrs. P. A. Gable, of Columbia, Pa.; Mrs. Sylvester Auman turned around shouting furiously:

"Who did that?" "I did," replied Wendell calmly. "Come out and I'll buy you a new

They exchanged cards and were gone from the game long enough to make the necessary purchase.

Sewing Machine Inventor

The father of the modern sewing machine was Elias Howe, who died in 1867. The patent for his first machine was taken out in 1846, and its principles still form the basis of most modern ones. Howe came from Massachusetts, and earned his living in a factory for making cotton machinery; but the honor of inventing the first sewing machine is not entirely American, since various clumsy machines for sewing leather and stuff had been France. Howe visited England, but only managed to sell his patents for a bagatelle of \$1,250. The descendants of his machine can do anything from ; button-holing and darning to the finest embroidery.

That Boston Joke

A number of boys were playing baseball in a vacant lot in Boston, when the ball crashed through the window of an adjacent house. The wrathful householder stormed out in pursuit of the guilty ones. He managed to capture one spectacled, slowfooted youth.

"I didn't do it, mister! I wasn't playing with them," the lad panted. "Then what did you run for?" roared

the injured man. "I-I'm afraid that I was a victim of the prevailing mob hysteria, sir."-Country Gentleman.

That's the Question

Here is de message fer you—
Hard on de head it may hit you;
Ef you will give de devil his due,
Ain't you afraid he will git you?

Something Wrong

"There's a lie out somewhere!" growled the imprisoned thug. "What do you mean?" asked the keeper, who was something of a stu-

dent of human nature. "Why, I've been reading in a paper a visitor gimme that the law is a laughin' stock."

Bishop's light rises near the Scilly islands and gives a grim warning of the dangers of the coast. It is one of the most exposed lighthouses in the world and the three tenders have a lonesome time. During a recent storm the beams from Bishop's rock came near to failing. The light weighs several tons and revolves on supports resting in a circular trough of mercury. It is balanced so delicately a child may turn it by a touch of the finger. On this night the tower was so shaken by the heavy seas that much of the mercury was spilled out over the concrete floor of the light chamber. The three guards fell on their knees, scooped up the mercury in their hands and poured it back into the trough.

Sunrising

When the sun approaches towards the gates of the morning, he first opens a little eye of heaven, and sends away the spirit of darkness, and gives light to a cock, and calls up the lark to matins, and by and by gilds the fringes of a cloud, and peeps over the eastern hills, thrusting out his golden horns, like those which decked the brows of Moses when he was forced to wear a veil because himself had seen the face of God; and still, while a man tells the story, the sun gets up higher, till he shows a fair face and a full light, and then he shines one whole day.—Jeremy Taylor.

Making Fine Distinctions

"A woman does not mind being called a kitten, but hates to be named a cat. A man, on the contrary, is flattered at being thought a dog, but resents being referred to as a puppy."

"When a man describes a woman as a 'sympathetic soul.' you know that she has placed herself like a silent and succulent sponge full in the flow of his eloquence for a considerable number of hours, while he declaimed to her his conquests, glories, triumphs, spoils,' in an uninterrupted monologue of complacency."-"Mere Man," by Honor

Obituaries, poetry and resolutions, charged for at the rate of live cents per line. The regular death notices published free

FLOYD B. WEISHAAR.

Floyd, son of Mr. and Mrs. Cleve Weishaar, near Taneytown, died on Monday evening, after a very brief illness, aged 9 months and 5 days. He is survived by his parents, one brother and two sisters, Marion, Helen and Thelma, and by both sets of grand-parents, Mr. and Mrs. James Weishaar and Mr. and Mrs. Chas. A. Foreman. Funeral services were held this Thursday morning, at the home, in charge of Rev. Guy P. Bready. Interment in the Reformed cemetery,

MR. JOSEPH STORM.

Mr. Joseph Storm, son of the late Mr. and Mrs. Jerome Storm, formerly of Taneytown, died on Monday, at Springfield Hospital, aged 49 years. The body was brought to the home of his sister, Mrs. Ulysses Bowers, on George St., and funeral services were held at St. Joseph's Catholic Church, on Thursday.

of Littlestown; Mrs. John S. Gable. of So. Bethlehem, Pa.; Mrs. Ulysses H. Bowers, Taneytown, and George Storm, of New York; and John, of Columbia, Pa.

MR. JOHN THOMAS KEMP. Mr. John Thomas Kemp died at his home in Waynesboro, on Wednesday, Feb. 11, aged 71 years, 2 months and 4 days. He had been in poor health

for some time, but pneumonia just developed on Sunday before his death He was born Dec. 7, 1853 near Ladiesburg, Frederick, and was the son of Mr. and Mrs. Hanson Kemp. For some years he lived in Taneytown, and for the past 35 years lived in Waynesboro. He was a carpenter, and practically all of the time he lived in Waynesboro he was employed

in the Geiser shops. He was a prominent member of the Lutheran Church. Surviving, are evolved previously in England and in his second wife, Mrs. Bertie Kemp, and three children by his first wife, Mrs. Elam Fitz and Mrs. Clarence Wilkes, of Hagerstown, and Mrs. William Poffenberger, of Bellvue, O., and one sistes, Mrs. John A. Yingling of Taneytown. His only brother, Dr. Luther Kemp, of Uniontown, died

> Funeral services were held on Friday, Feb. 19, followed by interment in Green Hill cemetery, Waynesboro.

In Sad But Loving Remembrance of my Dear Husband, GEORGE ROOP, who departed this life two years ago, February 25th., 1925.

Surrounded by friends I am lonesome In the midst of pleasure I am blue, A smile on my face and a heartache, Always thinking of you.

Your picture I look at each day,
And looking into your dear eyes they
seem to say,
Don't grieve so hard for me dear wife,
For we will meet again some day. BY HIS LOVING WIFE.

We miss you from our home dear father,
We miss you from your place,
A shadow o'er our lives is cast,
We miss the sunshine of your face.

We miss your kind and willing hand, Your fond and loving care, Our home is dark without you, We miss you everywhere. BY HIS DEVOTED DAUGHTERS.

How sweet the name of father sounds, To us who feel so sad, To speak of friends upon this earth, Father was the best friend we had.

He wore a crown of patience, Through the years he struggled on, Those hands that rest forever Are the hands that made our home. By His Loving Sons, CHARLES and LESTER ROOP.

Birds' Eggs of Varied Size

the humming bird, the largest is that hol for my stove was in the corner beof the extinct aepyornis, which held hind the washstand, that the butter six times as much as the ostrich's and and milk were on the window ledge a hundred and fifty times as much as a and that the eggs and other foods were fowl's," says Prof. J. Arthur Thomson in a box on the bottom shelf of the in his "Biology of Birds." "It is said wardrobe. When we were cooking she that the egg of the extinct moa some- went straight to the spot and got times measured 9 inches in breadth every one of those things without askand 12 in length, but that of the ing once where they were, which is aepyornis was far larger. Of European birds, the swan has the largest kept house in one room could never egg, the goldcrest the smallest. What have done." is the biological significance of the

difference in size? "When a bird lays only one egg it is likely to be relatively large, as in guillemot, gannet and puffin, it may be noted that these birds lay in places where enemies are few and where it is not dangerous that the egg should have a conspicuous size. The eggs of the wingless kiwi of New Zealand are larger in proportion to the bird's size than in any other case, and it is interesting to notice that they (usually two) are stowed away in a nest at the end of a tunnel in the ground."

Dangerous Duty, Breaking Bad News to Old Kings

One of the most unpleasant duties in royal courts of the Middle agesnews to the sovereign; not only unpleasant, in fact, but actually danger-Caesarea is mentioned nine times ous. Monarchs had not then arrived in the Book of Acts. The city bearing at the state of enlightenment which this name was situated on the coast of they are alleged to have reached now-Palestine, on the line of the great road adays. They really believed themfrom Tyre to Egypt, and about half- selves to be as described in their way between Joppa, the Jaffa of to- titles-God-appointed, Ever-Victorious, day, and Dora. The road skirted the and so on. And, often being in point of character either unmitigated physical brutes or feeble-minded results of inbreeding, they experienced the reactions of ill-bred children when their vanities or their purses were touched. On receipt of bad news, they felt like smashing something; and the most obvious something was the messenger. To dash out the kneeling man's brains with a mace or slash his head Roman emperor, Claudius Caesar. It off with a sword was a most convenwas the political capital of Palestine | ient and logical method of revenging

Our Letter Box

Under this heading we will be glad to publish letters from former Carroll-counpublish letters from former Carroll-coun-tians, who are now away from home; and especially letters from those whose home was Taneytown. These letters are very interesting, to many, and we should be glad to publish one or more each week. On account of their length, it is not always convenient to use letters on first page, and will hereafter use the 4th. or 5th. page.

FOUR DAYS IN CUBA. (Concluded)

The failure of the proof-reader to decipher some of my letter was apparent; as I referred to the "medical board" as a "misnomer," instead of
"a nuisance," as quoted. Also the
Fords were "flying," the homes beautiful "pal-a-ces," etc. However, I
suppose he should be congratulated, rather than censured.

Just a few more lines on the country tour, that extended over 40 miles. We passed through La Lisa, El Cano, Wajay and Marianao; a city with a of mill. population of 40,000. Visited Trop- Our fi ical Gardens, one of the show-places of Cuba, with its beautiful flowers and shrubbery. Thence to Vento Springs, the source of Havana's water supply. We also viewed the Havana Country Club, and park; Madam Aubreus magnificent estate; Oriental Park and race-track, owned by the Cuban American Jockey Club, erected at a cost of \$2,000,000, having a seating capacity of 12,000. During the racing season, 700 horses are quarter-

Cabana Fortress. Morro is built on water 120 feet above the sea. It is surrounded by a moat, hewn from the We saw one young girl p rock, about 30 feet wide and 70 feet | ey, in a big stack; and then it began deep; and is surmounted by a house 175 feet in height. Most of the party climbed its steps to the tower, which affords a beautiful view of city and harbor. During Cuba's war with Spain, the prison cells and dungeons, were overcrowded with political prisoners. It is now used by the Cuban army as a West Point, for the training of cadets. Cabana was twelve years in building, and cost \$14,000,000 It is a repetition of dungeons, prisons

and winding passages. We shall not soon forget the long, narrow, dark passage the guide led us through (he only having a dim candle) calling out frequently, "Keep your hand on the wall," as the road circled. "Now stoop," which meant if we were not pretty active, our heads ing up an ascent," "Now we are going up an ascent," "Now down." We were quite indignant, when we learned later, other guides had furnished their tourists each a candle, for we read the second we wouldn't have gone to see if it were there. Many folks, including Americans, thought we should see the races, and the Spanish national ball-game, Jai Alai, (pronounced by the second sec

Prisoners were crowded in this place to die of suffocation. Both forts are dismantled now with the exception of several old guns interesting for their age, and general appearance | (some dating back two centuries) that fire the salutes to entering ships, and sound the nine o'clock signals. We were shown the place where the bat-tleship "Maine" was destroyed. Two guns from the "Maine" mark the site on shore, where a monument is to be erected, to commemorate that event.

On our fourth tour, we visited Hershey sugar mill; some thirty odd miles from Havana, going over the to take back with them to the States, miles from Havana, going over the Hershey electric railroad, passing through many plantations of sugarcane. We saw the Cuban farmers plowing, with a yoke of oxen, and of tobacco. You are given declaration hauling the cane in heavy two wheeled carts, with two or four oxen, ac- | be cording to size of load. No yoke is will be confiscated and a heavy pen-Ropes pass around the horns alty imposed.

The attached to the pole, or Upon our return to Key West, we and are attached to the pole, or Upon our return to Key West, we tongue of cart. The drawing of load again pass through Custom House. and plow, is by the head. The driver walks by the side of team, and directs | a small bundle of sugar cane from a and keeps it on the move with a long | man's grip, and from my sister, and

harness. There are plenty of goats and cat-tle, to be seen. The goats furnish the milk for children. There is so the milk for children. There is so little butter fat, that all butter is imported. Clover and timothy will not grow on the island, and the stock have only a very coarse grass, and the blades of the cane to feed upon. No fences anywhere. Cattle grazing are tied to stakes driven in the ground. The homes are small huts of bark, thatched with the leaves of the palm. The better homes are made of boards,

meals are cooked out in the open. You see no carriages, only men riding horseback, and occasionally a dilapidated old car. We were told the sugar-cane makes a stand of thirty years. Thus it does not require annual planting. However, the usual practice on large estates, is to renew a part of the plantation each year. The cane is propagated from cuttings, planted in rows 3 or 4 feet apart, and at intervals of about 2 feet in the row. It stools somewhat like wheat. In appearance it closely resembles corn, excepting the tassel, which is fine and feathery, and a drab or smoke color, when cane is ready for harvesting.

It requires a rich, and moist soil, and attains a height of from 8 to 15 feet, and thickness of 1½ to 2 inches, according to fertility of soil. The planting season extends from June to October, and the cane is not cut until the second year of growth. Harvesting begins the latter part of December. It is cut low to the ground, and again into uniform lengths of about 31/2 feet. The blades are stripped off, and used for fodder. Twenty tons per acre is regarded as good average crop.

Mr. Hershey, proprietor of the chocolate plant of Harrisburg, Pa., owns thousands of acres of sugar plantations, and one of the largest and most upto-date mills on the island. We were shown the process of sugar making: from the raw cane to the finished product. Elevators carry the cane to the grinding crusher rolls. Then pass with lime, to prevent souring, and to | dress," he said.—Indianapolis News. clarify it. When the foreign matter i

is precipitated, it is passed to another tank, and treated with quick lime to clarify, sulphur to whiten, and acid to prevent too coarse a crystal.

It is pumped to the boiling tank and boiled rapidly. Then strained through bag filters, and is now ready for crystallizing. It is boiled at a low temperature. As the liquid is evaporated, the sugar crystals form. When crystalization is completed, the syrup is drawn off, and the sugar is run through the centrifugal machines, the sides of which, are made of a very fine sieve, to separate the remaining syrup. It is then dried in large revolving drums, filled into 100 lb sacks, ready for market; all at a cost of 3c per pound. Chocolate also, is made on a small scale, but machinery is being installed to increase the production. Nothing is wasted. The fiber is dried, combined with crude oil and furnishes the fuel for power. A large power station supplies the electricity for mill, electric railroad and the town of Hershey, the home of the employes

Our final trip was taken at night. through Chinatown. The only stop made, was at the theatre. Of course, it was only a matter of curiosity, to silk and embroidered robes, and hear the weird music. There are about 40,000 Chinamen in Cuba, and only 100 Chinese women. So they marry negro and Indian women. We pass on to the Grand Casin, the Monte Carlo of Cuba, and one of the finest gambling houses in the world. Here, Havana's '400" gather nightly. In the first We saw many other places of inter- room we entered, were various kinds est, too numerous to mention. Our of gambling games, such as Roulette, next trip was to Morro Castle and Klondike, Chuch-a-Luck, Raffles, etc., and men and women were playing at erations in Camargo. This line then solid rock, rising abruptly out of the the different tables. Fortunes are

We saw one young girl pile up monlight- to dwindle, and soon every dollar had of the disappeared. Another large room was filled with people, all gambling at the same game. In the ball room, supper was served at \$5.00 a plate. The waiters were all in broadcloth evening suits. After the meal, an orchestra furnished music dancers. The gambling and dancing often continues throughout the entire night. Some people may be shocked that we entered such places, but we were out to "see Cuba," and not to partake of its vices. The cost of the tours, \$3.00 and \$4.00; aggregate I have been asked, if we saw

Virtue of Imagination

There is something romantic in the plans for using an army airplane to race the moon's shadow during the eclipse of the sun, January 24. A high-powered plane, with a photographer aboard, will cross New York state in an effort to lengthen for but a brief time the opportunity given stationary cameramen. Just a minute, or even a half minute more means additional photographs. And more photographs means greater opportunity for scientists to study the most spectacular phenomena of this earth. It is a vivid bit of imagination, but it is only through imagination that men conquer, and, conquering, acquire more imagination.—Exchange.

Knew She Was a Flapper

One day when members of the famlly were sitting on the porch, a young woman passed attired in a red hat, red dress, red hose and red pumps. Lewis' father remarked: "There goes a flapper." A short time later the minister's daughter was calling and she had on a red dress. Lewis watched her very intently and after a while, walked over to her, looked her over and said: through a succession of rolls, that press out the juice. It is then pumped into huge setting tanks, and treated that?" "'Cause you got on a red "Well you're a flapper." The young

FORT RINGGOLD AN INTERESTING POST

Important Outpost in Line of Indian Defense.

San Antonio, Texas.-Nestling in the foothills of Starr county, lying snugly against the banks of the somber and treacherous Rio Grande, rubbing shoulders with the quaint and typically Mexican town, Rio Grande City, just midway between Brownsville and Laredo, is located one of the most dignified and stately of army posts-Fort Ringgold, Texas. Chaplain R. W. Rogers, who prepared the history of this post for the United States Army Recruiting News, says that while having enjoyed a varied but quiet career, it nevertheless is considered a very strategic border post. Fort Ringgold was established when the Rio Grande was navigable, boats bringing the first detachment of men to Davis Landing which later was called Ringgold Barsee the strange acting, the beautiful racks. In those early days the nearest railroad was at Laredo something more than 100 miles away, while new she boasts a railroad at Sam Fordyce, only 20 miles away.

Camargo, Mex., six miles south of Fort Ringgold, was founded March 5, 1749, by Jose de Escandon. The first survey and map was made for the king of Spain in 1765. It shows a line running north 8,624 varas (33 1-3 inches) from the cross, the central point of opran northeast including the Fort Ringgold reservation. With the withdrawal of Texas from Mexico and its admission to the United States, the original title changed over to the state. In the early 40's, H. Clay Davis, a restless young wanderer, drifted to that section of the country and purchased a large tract of land. He soon established a prosperous ranch and settled down to make his fortune.

Capt. J. H. La Motte, First United States infantry, took a small detachment of soldiers up the Rio Grande to Davis Landing, arriving on October 26, 1848. Not until 1853 was the first lease made. A tract 400 yards square, surrounded by a brush fence, containing 33 acres was surveyed. The lease was bull-fights. No, I am thankful I can signed by H. Clay Davis, owner of the land, and W. W. Chatman, represent-

Bandits Cross Border.

Immediately following the annexation of Texas to the United States bandits began to cross from Mexico, killing, looting and burning at will. In repulsing one of these invasions on the battlefields of Palo Alto, an extensive prairie nine miles north of Brownsville, Maj. David Ringgold was killed wine are the principle drink, not May 8, 1846. Honoring Major Ringmuch whiskey is consumed. Men, gold, the camp at Davis Landing was called Ringgold Barracks in 1849, and more recently designated as Fort Ring-

gold. In September, 1854, the second lease was made, and operated five years. During this period log huts were erected for the use of the troops. Early in 1859 the soldiers were ordered further down the river owing to the Cortina trouble. The old lease having expired during the absence of the troops, another lease was made upon their return. This one was to operate for ten years, granting the owner \$600 per year. It further provided, the government had the privilege of buying the land for \$23,000. Two years later the Civil war started and the federal troops were taken from the Ringgold barracks. Immediately after the war troops were again sent to that post, arriving in 1867. The property was

purchased outright. In 1906, a brigade post was established at San Antonio. Fort Ringgold with other border posts was dismantled and abandoned. The property was turned over to the Department of the Interior. It was laid off in a town-site and about to be sold when border disturbances again took soldiers to Fort Ringgold. From 1911 to the present soldiers and National Guardsmen have constantly been on watch there. However, no improvement was made until 1917, when the property was again turned back to the War department. In 1918, congress appropriated \$250,000 for the improvement of the post and in the following years other appropriations have been sufficient to repair and improve the post until today it is one of the most attractive reservations on the border.

Where Lee Lived.

The most interesting building is the three-room frame cottage on the hill near the signal station. This building was used by Robert E. Lee, when he was in command there as a colonel just before the Civil war. The building is still in a perfect state of preser-

Many prominent and notable army men have seen service at Fort Ringgold. Two or three years before the Civil war Col. Robert E. Lee and Second Lieutenant Ulysses S. Grant were stationed there at the same time. It was a strange coincidence that two leaders of later opposing forces should have been in the same post at the same time. Other prominent officers who have seen service there are: Jefferson Davis, General McCullough, General Hood, Lieutenant Colonel Sedwitch, General Buell, General Bee, Admiral Semmes, and, more recently, both Generals Pershing and Harbord, who served there as lieutenants. Troops which have been stationed there since the rehabilitation are, besides the National Guard: Third cavalry, Thirteenth cavalry, Twentyeighth infantry; Second squadron, Thirteenth cavalry and at present the Sec-

ond squadron of the Twelfth cavalry.

"HELP YOURSELF" HOTEL IS A SUCCESS

Guests Select Own Room and Drop Pay in Box.

Pearsall, Tex.—In this town is a "help yourself" hotel. This hostelry has been in successful operation two years. It is owned by H. L. Brooks, sheriff and tax collector of the county.

Mr. Brooks is so well pleased with his experiment of running a hotel on the honesty of his guests that he plans to add more rooms to accommodate the growing list of visitors. Brooks seldom goes about the hotel. He unlocks the box where the guests have deposited their money for rooms once every week or so. The housekeeping, such as making beds and cleaning rooms, is done by a servant.

The hotel is convenient to the business section of the town. It is an attractive building and the rooms are large and well fitted.

On entering the lobby the guests at once see the rules and regulations hanging on the wall. First is the book where the name of the guest and the number of the room he takes are registered. Then on the wall is a small blackboard, on which is a list of numbers of the occupied rooms and the unoccupied rooms. When a guest takes a room he erases it from the list of unoccupied rooms and writes the number of the room with the list of the occupied.

On the table is a container holding envelopes. Each guest takes an envelope and writes the number of his room on it, places the money he owes for the room in it and seals it, then, before leaving the hotel, drops it in a lock box on the table.

Oftentimes, Mr. Brooks says, he gets letters from persons who have stayed at his hotel saying how they enjoyed being a guest in such a unique hotel. He also says that he has been cheated out of only \$2.

Predicts Man Will Lose Teeth, Toes, All His Hair

Boston.-Man will lose many, if not all, his teeth, he will be absolutely hairless and he undoubtedly will lose certain toes and fingers. These predictions are based on scientific study by E. E. Raymond, professor of paleontology and geology at Harvard university.

These changes will not come until man has passed through a series of evolutionary phases, which probably will cover 40,000 to 75,000 years, according to Professor Raymond. He predicts heightening and broadening of the forehead and enlarging of the skull for bigger brain and longer face.

"The future man," he said, "is as certain to lose his teeth as the ape man of the past lost his tail. The ape man used his teeth to tear sinews, break nuts and as weapons of offense in fighting. Civilization has done away

with these conditions. "Hair is a defense given by nature against cold. Civilization gave man coats and artificial coverings. Baldness is on the increase, while it probably never existed on ancient man. In 40,000 years man may be as bald as a billiard ball.

"That man will lose certain fingers and toes also seem to be a biological certainty. When man climbe? trees to escape from animals his toes were needed to give him footholds. Now they are quite useless. The shape of the human skull and man's erect position are designed to promote an increase in the size and weight of the

Yank Forbids Samoans to Use Lordly Title

Apia, Samoa.-The title of "tuimanu'a" of the Manua district of American Samoa has been prohibited by the governor, Capt. Edward S. Kellogg, United States navy.

Manuans who claim the right to bestow the title are aggrieved.

The governor explained he would not allow the title to be held for the reason that it was equivalent to a kingship, and under the American government there could be no king.

A large number of Samoan titles are designated at "tui." The word is Tongan, introduced into the Samoan language. A dictionary of the Samoan language defines it is "high chief" or "king." But the Samoan word for king is "tupu."

A tuimanu'a does not exercise any political power, but his person is considered sacred and he commands the highest respect.

***** Find Footprints Made 10,000,000 Years Ago

Washington, D. C .- Dinosaur tracks made approximately 10,-000,000 years ago, during the Triassic age, probably the first footprints of this geological period found in the Rocky mountains area, have been identified on the Navajo Indian reservation in Arizona, near the Grand Canyon National park.

An announcement by the Interior department recently said the tracks occur in a thin layer of rocks about seven miles from Tuba City. The footprints measure 16 inches in length with a spread of 13 inches. The stride is shown to be 53 inches. The toes bore sharp claws, indicating the animals belonged to the bipedal carnivorous dinosauria.

Lans Returned Big Profit in Ohio

Importance of Inocculation Is Clearly Shown.

Soy beans returned a profit of \$20 an acre on the farm of John Boatman, Gallia county, Ohio, last summer, according to his cost account sheets kept in co-operation with the county agent, P. A. Young. Soy beans are a comparatively new crop in this county, and some farmers have been skeptical to start growing them till they found how much the return would be, says the Ohio Farmer.

The various items of cost for an acre of mid-west beans were as fol-

Seed\$	1.50
Preparing soil	6.00
Cutting	.75
Raking	.50
Threshing	3.25
Hauling	1.50
Shocking	.85
Other labor	1.40

\$15.75
The yield was only 13 bushels per acre, but at that they were valued at \$2.75 a bushel, or \$36.75 an acre.

The importance of inoculation for soy beans when grown on ground where they have never been grown before was shown clearly in another demonstration field in Gallia county, one owned by D. D. McClellan. Where the field was inoculated, the yield was at the rate of half a ton more hay per acre than where it was left without inoculation. The nodules on the roots of the inoculated plants were far larger. The soil was inoculated by using a quart of soil from another soy bean field for each bushel of seed. This dirt was stirred into some water and then sprinkled over the seed just prior to planting.

More than 4,000 bushels of soy beans were seeded in the county last year, in the opinion of Mr. Young. Not counting what seed was grown in the county, and then used last spring on the farms for seed, about 3,000 bushels of soy beans were used for planting above what was grown the year previous.

Rag Doll Tester Can Be

Used to Good Advantage The rag doll tester, which can be used to good advantage in testing seed corn, consists of a piece of cloth from 12 to 15 inches wide and of any convenient length-6 to 12 feet. "This should be ruled into squares at least two inches from each edge," says A. H. Larson, seed analyst at University farm at St. Paul, Minn., "and the squares numbered. The samples from each ear of corn are placed on these squares and the whole carefully rolled up and tied in a bundle, especial care being taken that the seeds do not mix The bundle is soaked in water a few minutes and then set on end in a pail or other vessel which is at least as deep as the width of the cloth. Then add one-half inch to one inch of water. The rolls must be inverted twice a day. The whole should be covered with a cloth so as to prevent too much evaporation. This is then put in a place with a temperature of 70 to 80 degrees. Too high temperature is as bad as too low. A germination count should be made after five or six days."

Three Classes of Pests

Controlled by Poisons

Insects are in a general way divided into three classes relative to control measures and there are classes of in secticides for each. Insects that devou the plant tissues outright can usually be killed by a stomach poison such as paris green, arsenate of lead, arsenate of zinc, etc. Those that suck the juices from the plant must be controlled by a contact spray, such as kerosene emulsion, tobacco decoctions, miscible oils etc., while the secluded or hidden class such as bedbugs, grain weevils, clothes moths, etc., must usually be controlled with a fumigant.

Feeding Alfalfa to Sows

Sometimes brood sows experience difficulty in eating enough alfalfa out of the rack to insure the kind of litters hog men want. In such a case it is advisable to grind the alfalfa, if possible, and feed it in a slop, or in some other way force the sow to consume a half-pound to one pound or more apiece each day.

Purebreds are 40 to 50 per cent more profitable than scrubs, according to the established facts of experience.

Milk should be kept from freezing in the cans. Frozen milk is difficult to sample, and cream frozen in the necks of the cans may result in a lower test * * *

Getting manure this winter for fertilizing the home garden next spring is a good progressive practice. Provide for the home garden before your neighbor beats you to the supply. * * *

Ten years ago the highest yearly record for butterfat was 1,058 pounds. Now there are 90 cows that have made over 1,000 pounds of fat in a year and 30 that have made over 30,000 pounds of milk in a year.

Use plenty of bedding for the cows. It is practically impossible to produce clean milk if the cows' flanks and udders are soiled. Bedding also absorbs liquid manare and saves it for use on land that needs it.

Water Denizen That

Has Few Vital Organs

The little creature called the lancelot is slender and pointed at both ends and not very easy to see, since it is almost transparent and is only from an inch and a half to two and a half inches in length.

It lives in shallow water and likes to stick its head end into the sand, into which it burrows with great rapidity. It remains thus for a long time with its tail sticking out. When on the surface of the water it lies on its side.

While it can neither see nor hear, there is reason for believing that it possesses the senses of smell and taste. Its eggs are laid about sunset and the larvae hatch out early the next morning.

The lancelot has no head. Moreover, it has neither legs nor pairs of fins. It has a mouth, however, placed at one end, which, therefore, may be called the head end of the body.

It has a stomach, a very simple form of liver and another simple organ which takes the place of a heart, since it is capable of contracting and thus forcing the blood, which is quite colorless, forward to the area of the gills, where it is purified.-Review of Reviews.

Business Now Made of Producing Spider Silk

Spider farming is one of the little known industries of modern times. The end in view is not the intensive fighting of the fly peril, but the production of spider silk, than which there is nothing better for the cross lines of surveying and other instruments.

Supplies in vastly larger quantities are needed for the manufacture of spider-silk stockings, and it is to meet this demand that special spider farms have been started from time to time, says Tit-Bits.

It is no easy matter to keep and feed the spiders, to prevent them from engaging in mortal combat, and to collect their silk in suitable form. The process of "silking" the spider amounts to playing catchball, with the spider as ball. In its passage through the air the spider instinctively pays out silk, and it can be induced to part with a hundred yards or more during a succession of such flights.

Secret Safe

"Oh, Alice!" Virginia exclaimed, "have you heard about Gladys?" "No; what about her?" Alice de-

manded.

"Well, she and Dick Rodney are going to be married in June!" "You don't say! Well, I always knew Dick thought a lot of Gladys,

but I never did think she would agree to marry him." "And Alice," Virginia continued, "the engagement is a secret just now. I promised Gladys I wouldn't tell a living soul, so don't you breathe a

word of it to anyone.' "Why, Virginia," Alice replied, "you know I wouldn't any more think of telling it than you would!"

Genuine Article

ful and yet lack knowledge of the useful in catching a bird or two, as goods they are expected to sell. This is a sad fault and a handicap to good salesmanship. A story is told of a genial storekeeper in central Ohio whose education in selling was of the kindergarten variety. A customer came in and asked for a little cheesecloth.

The storekeeper disappeared, but came back lugging a large specimen of a New York cheese. "Here's the cheese," he said, "but I'll be dingbusted if I know how I'm goin' to get the cloth offen it!"

Bog Ornaments Irish Asset

One of the industries of Ireland has long been the manufacture of bog oak ornaments. Before the period of upheaval in Ireland the export of these goods from the Emerald isle through the port of Dublin equaled a value of \$100,000 a year. The trade originated in the reign of George IV, soon after his visit to Ireland in 1821, London Tit-Bits says. At first all the ornaments were hand carved and polished, but machinery was used with the increased demand. Yew, fir and birch, as well as oak, are woods used by the makers of the ornaments. The one necessity is that the logs shall have been long buried in the bogs.

Wedding Season in India

Customs in India bring annually a wedding season, marriages being practically unknown at other seasons. The wedding bells there ring from summer to late autumn, and the bride must wear gold and silver trinkets and decorations, no man being so poverty stricken as to contemplate marriage without making the silver and gold presents. The metal must be imported from other countries, and this year there has been sent from New York to London for India more than \$2,000,-000 each of gold and silver.—Ohio State Journal.

Plant Relations

If we throw a simple glance on plants, we shall perceive that they have relations to the elements which promote their growth; that they have relations to each other, from the groups which they contribute to form; that they have relations to the animals which derive nourishment from them; and, finally, to man, who is the center of all the works of creation. To these relations I give the name of harmonies.—Bernardin de Saint-Pierre.

FIRST REQUIREMENT FOR SANITARY COOP

The first requirement for a sanitary hen house is a roomy, dry building with plenty of window space and easy means of ventilation.

Dropping boards under the roosts are quite essential for the proper maintenance of cleanliness. They should be made of tongued and grooved flooring well laid, and should be at least three feet above the floor of the house. If nests are under the dropping boards, three feet six inches would be better height. In the case of heavy breeds runways up to the roosting perches should be used, but with leghorns and other light breeds they are not necessary.

Dropping boards should be level, and the perches arranged about six inches above them. The perches should be on a level, also, and of 2 by 2 material. They should be fastened to 2 by 4 supports that are hinged at the back end of the house so that the roosts can be raised out of the way while scraping the dropping boards.

A hoe with 15 or 18-inch blade is very satisfactory for scraping the dropping boards, and if used regularly once or twice a week will assist materially in maintaining the health of the flock. A small box arranged to hang from and slide along the front edge of the dropping board platform, to receive the droppings as they are scraped from the board, will help to

preserve the fertilizer for the garden. One nest should be provided for each five or six birds, and even more if trap nests are used. Twelve by twelve inches is large enough and one-fourth inch mesh hardware cloth is excellent for the bottom. Wall nests are to be preferred to those located under the dropping platform, but the wall nests require a top place at an angle of at least 45 degrees, to prevent the chickens roosting on them. The runways along the front of the nests can also be made to fold up in front of the nest openings, which will keep the young birds from roosting in the nests at night and fouling them.

Dry mash hoppers are essential to the economical feeding of the flock; they should be raised on legs 18 inches to 2 feet from the floor.

Water stands should be raised the same as the mash hoppers, and are best made with a slatted top in the middle of which an opening is left to receive a 12-quart pail. The support for the bucket should be about six inches lower than the top of the plat-

A broody coop where feverish hens can be confined and fed is much to be preferred to ducking them or to starvation.

A catching coop is very desirable and almost necessary where any regular and consistent effort at culling is attempted. A heavy wire with one end bent to form a hook and the other Salesmen may be gracious and cheer- end tied to an old broom handle is

occasion may demand A bin where two or three hundred pounds of scratch grain may be stored in the chicken house is also a labor

Details as to the construction of different items mentioned above must of course vary with the size of the flock and local conditions.

Difficult to Determine

Sex of Goose or Gander Ganders are usually a little larger and coarser than geese. The head of the gander is apt to be larger and the neck thicker. The cry of the goose is rather harsh, while the gander makes a shrill cry. The only accurate

way is examination of the organs, or

observation of the flock at mating

time. Laying ability of geese depends on the breed and the individuals. Toulouse geese will usually average about twenty eggs, and some produce thirty to thirty-five. White Chinese geese will lay from fifty to one hundred eggs. The Emdens are not generally quite as good layers as Toulouse, although very similar.

The lameness may be due to rheumatism caused by spending the night in a damp roosting place. Goslings sometimes become lame, due to faulty feeding methods caused by lack of mineral matter or animal feed in the

Early Hatching Favored

Hatching in March and April instead of May and June has several advantages. In the first place, the early hatches do not meet the strenuous competition of chicks that are incubated by hens later in the season. The incubator can be made to yield more profitable returns by running it during the early months when farm work has not become heavy.

Winter Egg Production

Winter egg production does not depend entirely on the number of hens you keep. Regardless of the size of the flock they will all do the same thing without a balanced ration. Nearly everyone knows what is needed to feed hens a balanced ration. The problem is to keep all the different items on hand all the time. It really takes skillful management to do it, as many poultrymen work on limited capital and something is always running short.

Strength Plus a Willingness to Save.

Great financial strength is important in the

safe conduct of a bank. It represents an element of safety that the depositor who entrusts his savings to an institu-

tion is entitled to look for, and has a right to The Taneytown SavingsBank, with its Capital, Surplus and Undivided Profits of over SIX-TY-SIX THOUSAND DOLLARS, offers great financial strength. Total resources over SEVEN HUNDRED THOUSAND DOLLARS.

A genuine willingness on the part of officers and employes to serve, to the best of human ability.

Lesson for February 22

GOOD CITIZENSHIP (Temperance Lesson.)

LESSON TEXT-Rom. 13:1-14. GOLDEN TEXT—"Thou shalt love thy neighbor as thyself."—Rom. 13:9. PRIMARY TOPIC-Love One An-

JUNIOR TOPIC-Rewards of Obedi-

INTERMEDIATE AND SENIOR TOP-IC—Obeying the law.
YOUNG PEOPLE AND ADULT TOP-IC—Obeying and Enforcing the Law.

It is highly important that the disciple of Christ should realize that he is a citizen as well as a Christian. Intelligent Christians will show loyalty to the state as well as to the church. In fact, the better the Christian, the better the state. The failure to recognize this truth has brought Christian-

ity into disrepute in many quarters. I. The Christian's Obligation to the

1. Obedience to the Rulers (vv, 1-4). This obligation is upon all Christians. The reason this obligation is universal is that civil government is ordained of God and the rulers are His representatives. It is God's purpose that man should live under authority. It is His purpose because man's highest good civil authority is to resist God. This of course does not mean that a Christian at the behest of the state should do that which is morally wrong, just as parental authority does not imply that the child is under obligation to do that which is morally wrong at the command of parents, but it does demand submission as the law of the believer's life. The Christian frequently has need to call upon the rulers for help and personal protection (Acts 18:12-17; 19:35-41; 22:25).

2. The Spirit of Such Obedience (v. 5), It is to be conscientious, that is, it is to be regarded, not merely as serving a good purpose, but morally right.

3. The Nature of This Obedience (vv. 6-7).

(1) Payment of personal and property taxes. The citizens who enjoy the benefits of government are morally bound to support it.

2) Payment of duties upon merchandise and license fees. The business exchange between nations must be regulated. For such regulations expenses incur for which benefits the citizens shrould pay.

(3) Veneration for magistrates-"fear to whom fear." Those who fear God should venerate His representatives, that is, civil rulers.

(4) The proper attitude—"honor to whom honor." This means that civil servants, officers of the law, should be honored because of the ministry they

II. The Christian's Obligation to His Fellow Citizens (vv. 8-10).

This is summed up in the word "love." Love is a perpetual obligation. Paying of debts is obligatory upon all. Christians are judged by their promptness in paying debts. The only debt that is right to owe is that of love. Although we give love to the full each day, each succeeding day calls for it over again. Love works no ill to one's neighbor. This love forbids defrauding in matters of property; it forbids going into debt where there is no reasonable certainty of being able to meet the obligation; it forbids defrauding in matters of moral purity. Where there is real love, adultery cannot be committed, for it is a crime against one's neighbor. Love forbids murder. It forbids stealing. It forbids coveting. It forbids working ill to one's neighbor.

III The Grand Incentive of the Christian's Life (vv. 11-14).

This is the coming of the Lord. The supreme call is to the Christian to awake out of sleep. The picture here presented is of one asleep when the sun is high in the heavens. Life's duties can only be properly executed when one is awake. The one going through life without thinking of eternity is asleep. Each day is bringing us nearer to the eternal goal and since that day is at hand, we should

1. Cast Off the Works of Darkness (v. 12). The works of darkness are the sins of the flesh such as dishonest dealing in business, rioting and drunkenness.

2. Put on the Armor of Light (vv. 12-13). With this armor on the Christian will (1), walk honestly, (2) not in rioting and drunkenness, (3) not in chambering and wantonness, (4) not in strife. (5) not in envying.

3. Put on the Lord Jesus Christ (v. 14). The only way to be free from the works of darkness is to put on Christ.

Fatal Prosperity

Often our trials act as a thorn-hedge to keep us in the good pasture; but our prosperity is a gap through which we go astray.—Presbyterian Record.

Our Love of God Our love of God would be idolatry if we did not believe in His love for us-His responsive love.

His Written Word God never leads us to do anything that is contrary to His written Word.

February 22 Friendliness as Expressed Through Industrial Missions

Isaiah 61:1-4

The words of the Scripture lesson were quoted by our Lord and applied to Himself and His mission (Luke 4:18, 19). In a secondary sense it has application to the Christian missionary and messenger who proclaim the good tidings of One who died for our sins, who was raised again in acknowledgment of our justification, and who is "able to save to the uttermost all them that come unto God by

him. The industrial side of life is an important factor everywhere and especially on the foreign mission field. Industrial missions as a supplement to the gospel are most desirable. As a substitute for the gospel, it is to be dreaded. The following letter from Willis R. Hotchkiss, of Lumbwa Industrial Mission in East Africa, puts the matter in its proper light:
"When we started work in Lumb-

"When we started work in Lumb-wa they grew absolutely nothing but a millet called wimbe, which took eight months to grow and another two or three months to harvest—one head at a time. Every year they starved for a part of the year. How could such a people contribute any-thing toward the evangelization of their fellows? Not a blade of corn was grown, not a fowl was to be seen, so that we actually had to send to demands it. To refuse obedience to kisumu, sixty miles away, for our civil authority is to resist God. This eggs, until we got our own fowls. Our boys were the first to grow corn and the first to use plows, and this year some thousands of tons of corn have been sold by the Lumbwa and shipped out of the country. Fowls are everywhere, and great quantities of eggs are sold. Hunger has been unknown for years. They are now putting in flour mills of their own, run by water power. At the present moment I am getting no less than four such mills ready to install for our Christian boys They pledge themselves to give a tenth of the products to the Lord's

"There seems to be an impression that because we call ourselves an in-dustrial mission evangelism is regarded as a secondary thing. On the contrary, I cannot emphasize too strongly my conviction that the only thing that justifies our being here at all is the preaching of the gospel, to the end that the Holy Ghost may gather out of Lumbwa a people for His name. The mainspring of all my service is the hope of His coming. I have strongly felt that industrial teaching, parti-cularly along agricultural lines, was necessary among a people aptly characterized by that phrase of the prophet Jeremiah concerning Egypt, 'Their strength is to sit still.'"

"Laborers' Land" Real Meaning of Labrador

According to Scandinavian sagas, Biorn and Eric the Red discovered Labrador about the year 1000, a writer in the Pathfinder Magazine tells us. They named it Helluland, land of slate or naked rocks. The modern discoverer of Labrador was John Cabot who visited it in 1497, the year he discovered Newfoundland. There are two explanations of how the region received its present name. According to tradition, a Basque whaler named La Bradore settled in the bay of that name about 1520. Afterward the whole region came to be called Labrador after the name of this first visitor. But this account of the naming of Labrador is not generally accepted by historians. The more probable origin of the name is as follows: The name is of Portuguese origin and means "laborer." In 1500 Cortereal took to Portugal a cargo of natives from this region. Many say they were Eskimos, but it is more probable that they were ordinary Indians. At any rate, the natives seemed so well adapted for laborers that King Emmanuel thought that he had come into possession of another slave coast whence slaves might be exported to the Portuguese colonies. Hence the name 'Labrador," or laborers' land.

Few Old Wells Found on the Modern Farm

The old well, always concealed except as one might peer down its dusky depths and speculate vainly as to the mysteries it might conceal, imagination heightened by tales of murders committed and the victims thrown into the abandonéd hole, is now rarely marked by curb and more rarely by sweep, says a writer in the Springfield Republican.

The invention of the bucket and chain, by which one turned a crank and caused the water to flow forth in unbroken stream, ended the wellsweep's day. Then came the pump, and the pump came to have its place indoors. And others laid water pipes to springs, and pressure obviated the use of pumps with them. And the town grew, and arrived the day of the water system, and even the semidetached farmhouse "connected up." So at last, with all these encroaching changes, the old well became covered with thick stone slabs, and so most of them remain, safely concealed form view, unless, still in use, the welfare even of the cattle requires a renovation, and it is somehow safely accomplished.

HEAVY DEATH RATE IN DARK CONTINENT

Conditions in French Colonial Possessions Bad.

The Journal des Debats is distressed over the apparent decline of the native population in France's black possessions. French Equatorial Africa now has less than one inhabitant per square kilometer, and the death rate appears to be considerably higher than the birth rate, writes the Living

Doctor Boye, chief of the health service from 1920 to 1922, characterizes the depopulation of these territories "de plus en plus angoissante," and reports that "tribes formerly prosperous and vigorous are today on the verge of extinction."

According to a provincial governor, where populous and flourishing villages and broad acres of cultivation were numerous 15 years ago, only "skeletons of villages" now remain, their cabins in disrepair and their fields neglected. One territory having 23,950 inhabitants, in which an accurate record has been kept, reports that the deaths exceeded the births in a single year by 2,425. A larger enumeration shows, per 100,000 natives, 4,-470 births and 6,524 deaths per an-

Conditions are somewhat better in French East Africa, where the population is denser—about 3.5 inhabitants per square kilometer-but unequally distributed. Even here the recruiting officers report that only one adult male out of every five or six of army age is fit for military service. In the sole district where an actual enumeration has occurred, out of a population of 25,000 there were 1,007 births and 1,-161 deaths.

The two principal scourges of the African native in his own home are social diseases and malaria. Malaria appears to be the chief cause of infant mortality. Pneumonia and tuberculosis are also devastating scourges, "the spread of tuberculosis being closeby associated with the increasing use of alcoholic liquors."

One of the most significant and disturbing features of this gloomy survey is the evidence of a rapidly decreasing birth rate, due to the diseases already mentioned, the sleeping sickness, alcoholism and artificial restriction of births. In case of 563 negro families impartially selected on the Gold coast, 133 were childless and 244 had but a single child. At Daker 10 per cent of the infants born die at birth and 50 per cent during the first four years.

Aluminum Tramcars

One of the electric tramways companies of Switzerland has built cars of aluminum. One reason for using this metal is that the weight of the car is much lessened and another point is that the painting of the car lasts much longer, says the Railway Age.

It was found that cars built with iron plates soon showed rusting and the paint suffered much from this. In Zurich, where the method is being tried, this is an important point, as the cars are painted in a light color. In the first place the metal was used for the roofs of the cars, and the rethe absence of rust that it was decided to go further and to employ it for the body covering of the car and part of the flooring. A metal known as duraluminum is used and it has a small amount of copper added so as to make it harder.

Russia's Sugar Production

The production of sugar in Russia from the harvest of 1924 was originally expected to reach 30,000,000 poods (1 pood equals 36.1 pounds), but weather conditions immediately after planting seriously impaired the plantations and greatly reduced the yield, reports Economic Life. The combined effects of intense heat followed by prolonged drought, with insect and other damages, reduced the area originally sown from 318,822 dessiatines to 272,-958 dessiatines (1 dessiatine equals 2.7 acres), or 14.3 per cent. The original planted area was divided between that on which land, seed, labor and money were furnished by the factories (39,057 dessiatines) and that of individual planters who raised crops on shares, sometimes on factoryowned land.

Dick Whittington's Seal

The seal of Dick Whittington, the famous lord mayor of London, has been found on a legal document discovered among a bundle of old deeds by a London expert on parchment. In the center of the seal is a bust of a young man, encircling which is the name "Ricari Whityngton," and the date 1402. An expert of the public record office said that he was confident the seal was genuine, and so far as he knew, unique. It must have been the seal used by Whittington before he was knighted and received armorial bearings. He was made lord mayor first in 1397.

Take Baths in Tea

Bathing in tea is the latest fad of some Parisian beauties. The idea was greeted with great laughter when first heard of, but its advocates explained that their doctors assured them the pores of the skin acted as so many little mouths, and they had concluded that if the stimulation of tea was worth while when taken internally it ought to have a wonderful effect if the whole body could have a chance at it. Another argument, and not the least, was that the fashlonable ochre skin tint and the expensive beach tan could thus be had at home.

PUBLIC SALE

TUESDAY, MARCH 10th., 1925, at 11 o'clock, sharp, the following property

consisting of 9 milch cows, 1 red cow, comes in in January, carrying 6th. calf; 1 black cow, will be fresh by day of sale, 5th. calf; 1 Guernsey cow, will be fresh on day of sale, 4th. calf; 3 Holstein cows, carrying 3rd., 4th. and 6th. calf, respectively will be fresh by day of sale; 1 Holstein cow, comes in, in December; 2 fine heifers, both were fresh in January; 9 stock bulls, large enough for service, these bulls are good stock, anyone wanting a good bull should look these over.

26 HEAD OF HOGS.

26 HEAD OF HOGS, 25 shoats, ranging from 30 to 75 lbs; one fine young boar hog, weighing about 200. FARMING IMPLEMENTS.

FARMING IMPLEMENTS.

Deering binder, 8-ft. cut, has cut about 150 acres; 5-ft. Deering mower, used three seasons; Keystone side-delivery rake; Keystone hay loader, good as new; International corn planter, with fertilizer attachment, will hill drill or checker; Crown grain drill, Moline self-dump hay rake, Moline riding corn plow, 1 Rock Island riding corn plow, Brown walking corn plow, 2 Wiard furrow plows, No. 80; two 20th. Century manure spreaders, 3-section 25-tooth Osborne harrow, 3-block land roller, 4-in. tread 4-ton Weber wagon and bed this wagon has been used very little; 4-in. tread wagon, 3-ton capacity; 2-horse wagon spring wagon, set hay carriages, 20-ft long; one man hay rack, corn worker, single shovel plow, square back sleigh, old buggy, buggy pole, wheelbarrow, good dung sled, grain cradle, mowing scythe, digging iron, 2 dirt shovels, scoop shovel, mattock, axe, wedges, crosscut saw, hand saw, dung hook, straw knife, forks of alkinds; hay rope, 125-ft. long; bag truck, lot sacks, single, double and triple trees, grindstone, lot good chicken coops, bushel basket, half bushel, wash machine, belt, pump belt, rope machine, 2 vinegar barrels some vinegar, 2 meat barrels, 120 R. I. Red laying hens.

2 sets breechbands, 4 sets front gears, 6 bridles, 7 collars, 6 halters, 3 single lines, 2 pair check lines, 6-horse line, wagon saddle, wagon whip, 2 lead reins, 6 sets flynets, set buggy harness.

EDWARD P. SHORB.

PUBLIC SALE

. The undersigned, intending to quit farming, will sell at public sale, on the David F. Wetzel farm 1 mile north of Stambaugh's Bridge, near the road leading from Detour to Appold's School-house, on

WEDNESDAY, MARCH 4th., 1925. at 10 o'clock, all that personal property,

8 HEAD OF GOOD WORK HORSES, "Harry," black horse, 10 years old, works anywhere hitched; "Skadoo," a black horse, 13 years old, works anywhere hitched; "Bess," brown mare, 7 years old, good offside mare, 7 years old, good offside worker, has been worked some on near-side, in foal by Cletus Fogle's Percheron horse; roan mare, "Pet," 7 years old, good offsde, also has been worked some in lead, safe for any woman or child to drive; Gray mare "Maud" 11 years old, works any where hitched, in foal by Cletus Fogle's horse; sorrel horse "John" 10 years old, good offside worker; 2 heavy draft colts, coming 2 years old.

19 HEAD OF CATTLE, 13 head milch cows, 3 of which are spring cows, the rest Fall and Winter cows; 4 heifers, 3 of them will be fresh in the Fall, the other a yearling; 1 stock large enough for service; 1 fat bull.

19 HEAD OF HOGS,

17 shoats that will weigh from 60 to 100 lbs.; 2 fine brood sows, that will farrow in May. FARMING IMPLEMENTS.

Leaf That Will Hide a Man

The ape-man plant is a giant growth which once grew all over the world, but now it is found only on the volcanic slopes of Hawaii, where it grows in great profusion. It covered the entire earth millions of years ago, when gigantic animals roamed over the surface. The best specimens at present are found on the sides of Haleakala, in a gulch, where the conditions resemble those of a hothouse. A fully developed leaf of this plant is sufficient to hide a full-grown human standing behind it.

The undersigned intending to quit farming, will sell at public sale on my fathers farm, situated along the Taneytown and Keysville road about 4½ miles from Taneytown and ½ mile from Keysville, on

6 HEAD HORSES AND MULES, consisting of 1 bay mare, 8 years old, work anywhere hitched, excellent saddle mare and a fine leader; 1 bay horse, 10 years old, work anywhere hitched; 1 bay mare, 6 yrs. old, good near side worker and has been worked a couple times in lead; 1 bay mare 6 years old, excellent strap mare; pair of mules, 16 years old, both leaders, safe for a child to handle.

THE CARROLL RECORD CO., TANEYTOWN, MD.

THE story of Pithole is typical of the mushroom growth and as sudden disap-THE story of Pithole is typical of the mushroom growth and as sudden disappearance of countless Oil towns back in the sixties. In 1865 the first well to be drilled in the vicinity began flowing Oil. The mad rush began, and within ninety days Pithole's population jumped from one pioneer family to 16,000 inhabitants! Hotels, saloons, theaters and churches appeared over night; the Post Office ranked third in Pennsylvania, only those at Pittsburgh and Philadelphia being larger. Transactions involving millions of dollars took place daily; new wells "came in" by the score and adventurers from all parts of the world arrived, eager for their play with Luck. ¶ In less than a year the Oil production ceased, and Pithole vanished entirely. The Danforth Hotel that had cost \$90,000 to build was sold as firewood for \$16! The Oil rush moved to other parts, and in 1876 only six voters could be found at Pithole!

While Pithole lasted it was a good value. But it was only temporary. The Red C Oil and The White C Oil, same except in color, has been a recognized Kerosene value for a generation and half. Wise buyers everywhere, for satisfaction, service and economy, demand it for all their

Value of Stable Manure.

One of the most important by-products of the farm is the manure that accumulates each year in the stables and yards. Stable manure offers a ready and a relatively cheap means of increasing crop production, since it not only supplies important elements of plant feed, but also improves the physical condition of the soil, and encourages highly important bacterial

Extensive field experiments conducted on the Maryland Experiment Station farm at College Park, and on a number of fields located in different parts of the State, show that under present conditions a ton of ordinary sable manure judiciously used will produce increases in crop worth from \$2.00 to \$18.00. The value of the increase will vary with the fertility of the land, the rate of application, the crop for which it is used and with the way in which the manure is handled.

A calculation based on the results of these experiments and upon the 1920 livestock census of the State shows that the manure produced in the stables and feed lots of Maryland is worth at least \$20,000,000 annually. It has been conservatively estimated It has been conservatively estimated that fully one-third of the value of the manure is lost through careless handling, which means an annual loss of at least more than \$6,000,000 to the farmers of Maryland. Much of this loss can be prevented by the employment of proper methods of stor-

age and handling. One of the best ways to prevent losses through fermentation and on the land as rapidly as it is pro-

Every barnyard where manure is allowed to accumulate should have a tight bottom to hold the moisture and prevent leaching. When necessary to store in the open the manure should be built into a compact pile at least 4 feet high and dished on top to catch and hold rain water.

Manure exposed to the weather in

loose, shallow piles for a few months may lose more than half of its fertil-izing value through fermentation and leaching.-Md. Ag. Station.

LAST PAGE EDITORIAL. Will It Pay?

This is the question we are continually asking, and worrying about Just what do we mean by "pay?" Well, the most of us mean money—financial pay—but, there are other and better kinds of pay. Sometimes, courses of action really pay us less when we think they pay most. We sell some things for money, that we can't afford to sell—our honesty, our status as good citizens, our self-re-

But, even when we mean "money pay," and do nothing absolutely contrary to the civil or moral law, we often make poor decisions. We make the mistake of thinking it an easy matter to make money without work -just by a little smart financieringwhich shows that we underestimate the importance of chance, in order to make our money "pay" usurious inter-

Then we get the idea that when a thing, or action, will "pay" financially, considerations of conscience, and the why? of it, do not count. We simply exaggerate the importance of making a little more money. Well, the realization of our blunder comes early, sometimes, and sometimes may not definition so firmly fixed in mind, that we fail to realize that there is any other, worth considering.

If we would study our dictionaries

more, we would find certain words with very common and generally understood meanings, which also have many other less well understood meanings. Even the word "pay," means pay others, as well as pay ourselves-it also may mean punishment

Dairying and T. B.

That old song "Everybody doing it now" sure does apply to the dairy in-dustry in Carroll today. Making out applications and sending them to the State Board of Agriculture. If you have not received an application, you can get one at the County Agent's office, or from Dr. Henderson.

Everybody has about fifty questions to ask about the test. The only one we can answer here is "when the test-ing is to be done?" Not before the

middle of April.

The rest of the questions will be answered at the following meetings which have been arranged over the county, so that everybody will have an opportunity to attend. All the dairy cattle of the county will be T. B. tested regardless of what the milk is being used for. The county will be cleaned up on the accredited plan.

Hon. John W. Davis, defeated candidate for President, has been elected a director of the National Bank of Commerce, New York. This may mean that he will resume several oth-er connections that he resigned in order to be a candidate.

A girl in Texas has entered suit for \$11,500 against a Railroad, for an injury and scar she received as the result of an accident, one of the specifications being that she can't wear thin silk hosiery, on account of the

Legend Traces Hyacinth to Sorrow of Apollo

The wild hyacinth was originally found in Greece and Asia Minor. The ancient Greeks had a story about its origin to the effect that one day the god Apollo was playing a game of quoits with a young mortal. Hyacinthus, of whom he was very fond, when Zephyrus, the god of the west wind, passed by. Zephyrus was jealous of Apollo and blew the latter's quoit aside, and caused it to strike Hyacinthus and inflict a mortal wound. In his memory Apollo caused these beautiful and fragrant clustered blossoms to spring from the fallen drops of the youth's blood.

The hyacinth was brought to western Europe in the Sixteenth century, and extensively cultivated by Dutch horticulturists. The original blue and purple blossoms were varied to numerous shades of pink, rose, yellow, scarlet and pure white.-Kansas City A Study in Contrasts.

The Metropolitan Life Insurance Company says; "Beware of March, the danger mouth."

The National Casket Company says to its salesmen; "March, the month of opportunity.

FREE POULTRY BOOK GIVES NEW IDEAS.

1000 Helpful and Money-Making Methods Show the Poultry Rais-ers just what to do Every Month of the Year.

It has been discovered in feeding white rats, that by depriving them of certain food elements you can positively rot their teeth in a short time. Prof. T. E. Quisenberry was the first to discover if a poultry food was not properly balanced that a hen could not lay, that baby chicks developed diarrhea and leg weakness. He found that certain parts of poultry feeds and ingredients made yolks, some whites and some shells. He found if a feed contained 100 whites and 50 yolks, that the hen could lay only 50 eggs. But by balancing the ration so that it contained an equal number of yolks, whites and shells that the hen would and could lay twice what the average hen ordinarily laid.

Mr. Quisenberry has put these Mr. Quisenberry has put these ideas into a poultry book, "From Chick to Laying Hen," which we will be glad to send you FREE. Call at Reindollar Bros. & Co., or write the Quisenberry Feed Mfg. Co., Dept. B. Buffalo, N. Y., and you will get your copy by return mail. Contains 1000 money-making, helpful ideas, and tells you just what to do every month in the year.

Thousands of poultry raisers say that the QUISENBERRY QUALITY Poultry Feeds produce more eggs, better fertility, better hatches, healther chicks, better growth, keeps the flock in better health and makes more profit for them than any feed they have ever mixed themselves or been able to purchase.

If you want better results, healthier chicks and more profit then try the QUISENBERRY QUALITY Poultry Mashes. They are palatable, higher in digestibility and provide more nutrition than any feed on the market at the priue. Call, phone or write Reindollar Bros. & Co., at once and try a sack. Order today! Keep your hens in condition! Start your chicks right!
