GONE FROM HOME.

VOL. 32

TANEYTOWN, MARYLAND, FRIDAY, JULY 24, 1925.

NO. 4

## COUNTY S. S. CONVENTION.

### Many Schools of County Show Increased Membership.

The annual convention of the Carroll County Sunday School Association was held on Tuesday in Centenary Methodist Episcopal Church, Westminster, Rev. R. N. Edwards, pastor. Nearly all of the Sunday Schools of the county were represented by delegates, and many pastors also were in attendance.

At the morning session, Rev. W. V. Garrett, pastor of Trinity Lutheran Church, Taneytown, spoke on Sunday School work. Most of the morning session was given to group conferences as follows: Children's division, conducted by Miss Lillian E. McCorn, Baltimore, and Miss Ethel Steele, Westminster; young people's division, the Rev. J. N. Link, Baltimore; adult division, C. H. Gundersdorf, Baltimore; home department, Mrs. A. W. Karnell, Philadelphia, and Mrs. Samuel D. Haines, Westminster; administrative, Rev. Maurice R. Hamm, Baltimore; and George Mathers, Westminster; teacher training, Mrs. Frances R. Brown, Baltimore.

The Rev. G. A. Dorman, pastor of the Methodist Protestant Church, Gamber, conducted the afternoon devotional services. An address was delivered by Mrs. Karhell on the duties of parents, and C. H. Gundersdorf told how a class of 400 men was built up at St. Paul's Lutheran Church, Baltimore, Rev. P. A. Heilmann, pastor.

Mrs. Frances R. Brown addressed the teacher training graduates of the year, and State Secretary Abner H. Brown, of Baltimore, presented diplomas and certificates. County Secretary George Mather exhibited a map showing the 13 Sunday School districts of the county and the location of 107 schools. Seventy schools have cradle roll departments, 24 home departments and 28 teacher training classes. Twelve schools show a 10 percent gain in membership during the year. Taneytown had a 10 percent gain, not only for the town, but for the whole district. New Windsor has the largest percentage of population in the Sunday Schools and made the largest per capita contribution to Sunday School work.

### Taneytown Home-maker's Club.

The June and July meetings of the Club were of especial interest. At the former, a baby clinic was held. Twenty-seven babies were examined to find if they were needing medical care in any way, or if they were, or were not, developing as they should. Dr. Stone and Dr. Cliff, of the State staff, were the examining physicians. Miss Manahan our County nurse, was in attendance.

Miss Emerson was present in the interest of forming a Girls' Club under the extension service. There was splendid attendance at this meeting.

At the July meeting there was a demonstration of the steam pressure cooker. A chicken was properly cut up for canning, and canned. Incidentally, another benefit of our extension service was demonstrated. The owner of this big beautifully plump bird had learned how to determine why it didn't lay eggs, and never would lay enough to even pay for her board. It was decided that after September we would have fortnightly meetings, instead of monthly.

### More About the Plank Road.

Mrs. Mary L. Motter, of Washington, writes us the following information concerning the builder of the old Plank road:

"Peter Grabbill who built the plank road was married to my father's sister (Rudisil). He was a fine looking man, and of most pleasing manners. I was under the impression that Absolom Smith was his partner in the building of the road. Uncle had the farm, saw mill and the distillery; the latter was his undoing. They moved to Missouri. He bought timber land and when he sawed the lumber it was no good—called wind-shaken. Some years later they came back, and he died at his daughter's, the wife of Dr. Rinehart, at Frizzellburg."

### The Piney Creek Cemetery.

(For the Record). In the announcement of last Sunday's service at Piney Creek Presbyterian Church, there was no mention of the offering, or its object—repairs to the cemetery wall.

In this very old cemetery there are good old names of people doubtless tried and true, of whom we, of this time, have not the slightest knowledge.

Many Presbyterian families, who in years gone by had large representation in this church have almost entirely left the community.

Pride of ancestry is universal; we cherish records of noble deeds; but sometimes in the hurry and rush of twentieth century life, we forget our duty to these resting places of our forebears. Pride demands that we do not leave this privilege to a stranger, so, "Lest we forget," the treasurer is Mr. Truman Bowers.

It is said that but few people in India know how old they are, having but little interest in their own age, or that of others.

## SUICIDE NEAR TANEYTOWN.

### Mr. Charles H. Stonesifer Ends his Life by Hanging in Barn.

Mr. Chas. H. Stonesifer committed suicide, some time Wednesday, by hanging himself in the barn at his home, near Taneytown. The body was found at about 5 o'clock, in the afternoon, by his son, on going to the barn to do some work, evidently some time after the act had taken place.

Justice Davidson and Dr. R. F. Wells were called, and after viewing the body it was decided that no inquest was necessary, death having been due to suicide.

Mr. Stonesifer, who has been operating a bread route for the Everhart Bakery, left on his route, Monday, for Thurmont, apparently in the best of spirits. Just what happened during all of the time, is something of a mystery; but, he left his truck in Thurmont, and was next found on Tuesday morning in the barn on his farm at Keysville, occupied by Harry Welty. In the evening Mr. Welty brought him part of the way home. Mr. Stonesifer saying he would walk the rest of the way.

He was not seen at his home, however, until found hanging in the barn. Recently, he had some financial trouble over the attempted sale of his bread route, and other matters, and this may have temporarily unsettled his mind.

He is survived by his wife, a daughter of the late Mr. and Mrs. Henry Hilterbrick, one son, Wilbur, and his father, H. Oliver Stonesifer, of Keymar; also by one brother, Wm. J. Stonesifer, of Keysville, and one sister, Miss Carrie, of Baltimore.

Funeral services will be held this Saturday morning, meeting at the house at 9:30, followed by further services and interment at the Lutheran Church, Taneytown, in charge of his pastor, Rev. W. V. Garrett.

### Middletown Church Rededicated.

During this week, and ending with Sunday, 26th., the Middletown Lutheran congregation, Rev. Wm. C. Day, pastor, held a rededication program, celebrating at the same time the 185th anniversary of the congregation.

Addresses were delivered by Walter C. LeGore, President of S. S. Conference, Rev. John Weidley, D. D., President of Synod; Rev. W. L. Rensburg and Rev. S. A. Hedges, of Middletown; Rev. G. E. Williams, D. D., of Hagerstown; Rev. A. E. Cooper, Rev. Carl Mumford, Rev. Clarence Neal, Rev. Robert Long, Rev. H. C. Erdman; Rev. J. A. Singmaster, D. D., Gettysburg Seminary, and by the Pastor.

Various services were accompanied by anthems and special music, quartets, solos and choruses. The recent improvements to the church comprised a new roof, church and Sunday School frescoed, art glass windows in gallery, wood work refinished, new carpet and other furnishings purchased.

The congregation dates back to 1740, and the first church building to about 1750. The first Sunday School was organized in 1827. The first church on the present site was erected in 1772.

### I. O. O. F. Home Dedication.

One hundred and twelve lodges have reported to the committee in charge of the dedication of the Odd Fellows Home, Sunday, July 26, and signified their intention of participating in the parade prior to the dedicatory ceremonies, which does not include the uniform branches of the order.

In addition to the high dignitaries of the order, Governor Albert C. Ritchie, Mayor Howard W. Jackson, of Baltimore, and other state officials are expected to attend. Amplifiers will be used to enable the crowd assembled on the grounds to hear distinctly the addresses and other details of the ceremony of dedication. Indications are that more than 2,000 Patriarchs Militant, the highest branch of Odd Fellowship, in the line of parade. The parade, which will be divided in six divisions, is expected to move off promptly at 1:30 P. M.

### The License Tag.

We wonder how many auto drivers ever stop to consider the significance of the auto license tag they carry on their car. It does not give him a right to use the highways—he already had that before there were autos. It doesn't give him immunity from further taxation—they are apt to pass new laws hitting the auto for other things besides tags.

What this tag should signify, and the impression it should convey, is an assurance to the public at large that the man who is operating the car to which it is fastened is fit to drive, that the state has satisfied itself of his ability, and that he will not, either maliciously or by wilful negligence, cause injury to others. A few pertinent changes in our state laws can make the auto license tag mean all that, and it would then convey a message of some importance to everybody on the highway.—Ellicott City Times.

### Drop in Price of Wheat.

Harvesting in Canada, the Dakotas, Minnesota and Montana, has caused a glut in the wheat market, and prices have dropped. Too much selling for the demand. Good rains in the corn belt, together with the wheat market depression, have also lowered the price of corn and oats. The prevalence of good weather in the late Spring wheat belt, has influenced all grain prices.

## FARM OUTLOOK BETTER THIS YEAR

### Conditions More Favorable Than for Past Five Years.

Officials of the Agricultural department, and others whose business it is to study the agricultural situation, say that the present year is the best since 1920, and that the general outlook for farming is decidedly encouraging. There is more confidence, less dissatisfaction, and more cheerful prospects in general.

Farmers are reported to be in much better financial shape, taking the country as a whole, while the year's crops and prices promise to show fair returns. Some sections have been hard hit by the drouth, and there are local crop failures, notably in potatoes and hay, but the wheat crop has been good, while the corn crop promises well; and the purchasing value of the dollar, while still below par, has increased during the year.

The South is growing a fine cotton crop, except in a few drouth sections, and the West and Northwest have little to complain of. Less improvement seems to exist in the east, than elsewhere, but financial standards are best in the east.

### Proceedings of the Orphans' Court.

Monday, July 20, 1925—Calvin E. Bankert, administrator of David A. H. Tagg, deceased, returned inventory of debts due and settled his first and final account.

Elsie L. Wilson, administratrix of Frank G. Wilson, deceased, settled her first and final account.

Charles Starner and Jacob D. Starner, administrators of Calvin Starner, deceased, reported sale of personal property.

Edward O. Weant, executor of John T. Strevig, deceased, returned inventory of current money.

Edna (Null) Beaver received order to draw funds.

Mary S. Leigh, executrix of Martin J. Leah, deceased, received order to transfer stocks.

Tuesday, July 21, 1925—Letters of administration on the estate of Jas. T. Shorb, deceased, were granted unto Sarah A. Shorb, who received warrant to appraise and order to notify creditors.

George L. Stocksdale, executor of Andrew W. Cullison, deceased, reported sale of personal property and also sale of real estate on which the Court issued an order ni. si.

Letters of guardianship of William A. Shorter, infant, were granted unto Edith A. Shorter.

Annie M. Hood, executrix of Oscar R. Hood, deceased, settled her first account and received order to invest funds.

Ruby R. Boone, guardian to Margaret H. Merryman, infant, received order to draw funds.

### Boy and Girl Club Work.

College Park, July 22—Approximately three hundred boy and girl club members from farms and rural communities in every county of the State are expected here August 6 to 11 to take part in the annual club week. A program of instruction in the production of farm crops and in the raising of livestock and poultry is being planned by E. G. Jenkins, State Boys' Club Agent, for the boys. For the girls an equally interesting program is being arranged by Miss Dorothy Emerson, Girls' Club Agent, in the household arts.

Thousands of boys and girls throughout the State are enrolled as members in the clubs that will be represented at College Park during Club Week. All of them are engaged in conducting some practical demonstration to show what can be accomplished in agriculture and the household arts by using the best known methods.

The 4-H Clubs, as they are known, are organized in the various counties by the county and home demonstration agents. The clubs usually hold regular meetings and are given systematic instruction in the various phases of agriculture and home work. In many of the counties the club members are given encouragement by Farm Bureaus and other local farmers' organizations as well as by banks, business men's organizations and public spirited individuals. For several years, the club work in the State, has received the support of the Maryland State Bankers' Association which annually appropriates money for its advancement.

### Bible Case in Washington.

A suit has been brought in Washington, D. C., involving a law passed by Congress for the District, against any teaching of "disrespect for the Holy Bible." The suit has been brought in a bill barring the payment of salaries to teachers or to any public school official in the city, who teaches evolution. The suit is brought by an avowed atheist, who has as his purpose legalizing the teaching of atheism, or to get a decision that such teaching does not show "disrespect for the Bible." The interests of the government will be represented by the U. S. Department of Justice.

Paper is still 100 percent or more, above its average prewar price, but paper "scrap" is down about as low as it ever sold at—from 20c to 25c per 100 lbs.

## STATE ROAD WORK.

### Various Contracts in Process of Completion this Year.

The Frederick News, says; "The work of grading for concrete shoulders between this city and Braddock on the old National highway, has been commenced. Three-foot shoulders will be laid on each side and the macadam will be brought up to the shoulders. The north or right side of the road will be shouldered first and three weeks later the macadam will be brought up to the concrete. Later the south or left side will be treated in the same manner. The shoulders will add six feet to the width of road, making it 21 instead of 15 feet wide. The macadam between the shoulders will be patched and repaired where this is needed.

"Grading for concrete shoulders between South Mountain and Hagerstown, a distance of approximately 12 miles, has also begun. Both sides of the road of this stretch will be shouldered, also adding six feet to the width of the road.

"A concrete link of the Liberty-New Windsor road is being laid. This road from this city to Liberty is a macadam highway and from the latter place to Oak Orchard, a distance of about 3,000 feet has been concreted. From Oak Orchard to New Windsor, a distance of four miles, will be concreted and at the latter place it will connect with the Westminster road, which runs to Baltimore a distance of about 31 miles.

"Concrete shoulders have been laid on one side of the road from Westminster to Reisterstown, a distance of 11 miles. The other side will also be shouldered. This road is the nearest route from this city to Baltimore by way of Emmitsburg.

"About 1,000 feet of concrete has been laid on the gap between this city and Washington by way of Buckeystown, near Dickerson station. This route from Frederick to the National Capital is 52 miles, the same distance as the Ridgeville route. It is expected that the gap will be completed by the middle or latter part of August and will soon afterward be opened to traffic.

"Grading has been started on the one-mile gap between Hyattstown and Washington, by way of Urbana. This gap starts at the intersection of the Frederick and Montgomery county line at Hyattstown and runs south into Montgomery county. Work on this gap is being pushed in order to be completed as soon as possible. When these stretches of one mile are built, there will be three improved state highways from this city to Washington. Work on this gap, however, has been delayed on account of considerable rock encountered in grading. This route is 43 miles from Frederick to Washington, nine miles shorter than the other two routes."

### Somerset County Refuses \$35,000 for New School Building.

The County Commissioners of Somerset county have refused to appropriate \$35,000 for a new school building at Crisfield, or to increase the tax rate, or take other means of raising the money; and a movement has been inaugurated to incorporate a private company to sell \$50,000 worth of stock to provide funds for the erection of the building. A bond issue that would have relieved the situation was voted down, at the fall election last year. The County Commissioners, therefore, are acting on the majority sentiment expressed then.

It is said that school facilities are inadequate in Crisfield, and that 300 children, last year, were able to attend school only 90 days. The town voted for the bond issue, but the Northern county farming sections voted strongly against it. If the stock subscription plan carries, it is believed to be the first instance of the kind in Maryland.

### Pope Pius Urges Modesty.

The Holy Father renewed his condemnation of immodest un-Christian fashions, on the occasion of receiving a large Spanish delegation of pilgrims which included many ladies and young girls of the aristocracy.

His Holiness invited his guests to join in a crusade, by example and word, against the prevailing tendency of today to go beyond the limit of modesty in dress.

Since the first days of his pontificate Pope Pius XI has been an apostle for modesty in women's dress. A few months after his exaltation he gave strict orders that no woman clad in too worldly a manner should be admitted to his audiences.

While this order was in exact accord with Christian teaching and tradition through the centuries, there was some objection. It was pointed out that Pope Benedict XV had never issued rules to govern women's dress, but those who brought out this point failed to remember that in the days of Pope Benedict women's fashions were not so extreme. Others objected that the women must follow the fashions or be ridiculous.

But Pope Pius never wavered from his stand, strong in his conviction of right. Several ladies were refused admittance to the Pontifical Apartments because they had not observed the rules of Christian decency in their dress.

A radio sermon, last Sunday, contained this expression, "we prefer to go to the Garden of Eden for our great-grand-parents, than to a menagerie."

## SCOPES GUILTY IN EVOLUTION CASE

### An Appeal Will be Taken to a Higher Court.

In a brief written opinion, Judge Ralston refused to permit the jury to hear the evidence of expert scientists on evolution. The substance of his opinion was that as the state of Tennessee had by law made it unlawful to teach evolution in the public schools, the opinions of experts could not change that fact. After a half-hour of cross fire between the counsel, and tart allusions to Judge Ralston, the court was adjourned until Monday.

Attorney Darrow, whose expressions on Friday conveyed an attitude of contempt for the Court, greatly enraged the Tennessee Bar Association and the press of the state, and Judge Ralston was criticised for not disciplining him. On Monday, Darrow expressed his regret at having made such remarks, placing his remarks in the form of complete apology, which the Judge accepted, after Darrow had been formally cited for contempt of Court.

The sensation of the day was the placing of Wm. Jennings Bryan on the witness stand, and his cross examination by Darrow who does not seem to resent being called on the stand, nor deny that he disbelieves most, if not all, of the Old Testament. Bryan's examination was stormy from beginning to end, and finally became so violent that Court was suddenly adjourned.

Most of the evidence in the case was mere publicity argument, and did not go before the Jury. As a law suit, the case is largely a farce, and the theory of evolution discussed in such a spirit as to have degenerated into the calling of names, and the asking of fool questions.

The case closed on Tuesday morning, and a verdict of guilty was promptly rendered. Judge Ralston imposed a fine of \$100.00 fixed bail at \$500.00 pending the filing of an appeal. In commenting on the verdict Scopes said he had been "convicted of violating an unjust statute."

As Scopes had admitted the charge of teaching evolution contrary to law, there was no other verdict possible, the only question being as to the constitutionality of the law of the state. A verdict could have been arrived at in a day, had it not been for the opportunity given to evolutionists to gain publicity, through the newspapers.

As one of the outcomes of the case, a bill will be presented before Congress providing that Federal aid be withdrawn from all schools teaching the theories of evolution.

The Philadelphia Ledger commented, caustically, on the disgraceful features of the case, and particularly on the part played by Bryan and Darrow. It said in part; "If these are leaders of the two forces which met at Dayton, then the whole issue is an empty quarrel. If they are, in fact, the representative champions of Science and of Religion, it is a shameful confession of America's intellectual bankruptcy."

Neither is a true representative of the cause in which he fights. William Jennings Bryan is an aging politician who does not represent the greater Christian or religious forces of America.

Clarence Darrow is a tired, disillusioned and vitriolic advocate, who made his reputation in the field of criminal law. He may represent unbelief, but he does not represent the true Science which has no quarrel with spiritual life and Religion.

The happenings at Dayton on Monday were a disgrace to a civilized Society, to Religion and to Science. They were a humiliation to the Nation, to Tennessee and to the Law. It was time for the issues to be transferred to a higher tribunal and for this small-town farce to end. It was high time for the curtain to be rung down on this hippodrome of self-advertisers in a publicity-crazed community and on this clownish travesty that was making Science, the Law and the State of Tennessee ridiculous."

### Lottery Advertising.

The solicitor to the Postoffice Department states that propositions wherein the merchants give tickets with purchases made in their stores entitling the holder to participate in drawing for prizes are a lottery, and that matter relating to it is unamenable under Section 213 of the Penal Code of the United States. He also states that so-called box sales in which a number of boxes containing articles of merchandise of different values sold at a uniform price are a lottery, and make advertising for the same unamenable.

These instructions are very plain but the trouble with them is that they are not enforced. The conscientious publisher obeys the law and loses business. A man who is willing to take a chance gets the advertising and, as far as we know, no prosecutions have resulted. Every publisher, however, should obey the law and take no chances.—N. E. A. Bulletin.

When our ancestors did away with pack trains to replace them with the stage coach, horse owners were fearful that the horse would have its end, since the coach could carry so much more than could be packed on a horse.

## MIXING OF CONCRETE.

### Use Smallest Quantity of Water that Will Mix Properly.

One can no more get good concrete by mixing cement, sand, rock and water indiscriminately than one can get good bread by mixing flour, water and yeast without attention to the proportions or the manipulation.

While this fact is generally recognized by experienced concrete users, there is still much misunderstanding as to the accuracy of mix required. Particularly is this true with regard to water. Many persons imagine the amount of water in the mixture is unimportant—that any concrete which is really wet will harden properly.

Nothing could be less accurate. The hardening of concrete is a chemical process, and for the best results the proportions of materials must be gauged as accurately as for a cooking recipe. Concrete does not harden by drying out; it hardens by the chemical combination of the water with the cement in it. Too much water prevents the cement from hardening properly, just as it prevents glue or paste from sticking effectively, yet a certain amount is absolutely essential. The rule on ordinary work is to use as little as will give a workable mixture. Concrete that has to be shoveled will harden much stronger than concrete that can be poured.

Carefully performed experiments have proved that concrete made with too much water will have only a part of the strength it might otherwise have attained. Mix one bag of cement with sand and rock, and put in even a pint more water than is necessary, and you will weaken the finished concrete as greatly as though you had left out two pounds of cement. After the concrete has solidified, however, it should be kept moist for ten days or so by sprinkling water over it. This aids it greatly in "curing" and the amount of water, so it is sufficient to keep it moist, is unimportant.

The proper amount of water to use in any concrete mixture is the smallest quantity that will give a mix sufficiently plastic for the work in hand. Concrete must be mixed thoroughly, and plenty of time should be taken to insure that this feature is not slighted. Under no circumstances should the time of mixing be less than one minute after the ingredients are all in the mixer. The speed or energy with which concrete is mixed does not count so much as the time allowed for the materials to be thoroughly blended.

The sand and stone should be graded carefully, and above all should be free from organic material. Strong concrete cannot be made from dusty or dirty sand and stone. Gravel should be washed and screened into sand and pebbles.—Portland Cement Association.

### Extension Service News.

At last, the Bovine Tuberculosis Eradication among dairy cattle in Carroll County is under way. Dr. E. B. Simonds with his force of veterinarians started to work, Monday. These men have just completed cleaning up Baltimore County, which reached about 20 percent. The plan is to test all the 28,000 cows in Carroll by October 15th., but this can only be done by close co-operation upon the part of the dairymen in having their cattle stabled for the veterinarians.

The following veterinarians were assigned to their respective districts; where they will be assisted by the men who solicited the names of cow owners in their neighborhoods. Dr. Gross, U. S. B. A. I., from Harford County, Manchester District; Dr. Gregory, U. S. B. A. I., of Westminster, Hampstead District; Dr. Breininger, U. S. B. A. I., Eastern Shore, Woolery District; Dr. Henderson, Carroll County, Westminster, Freedom District. Two more veterinarians are expected in the near future and will start New Windsor District, Middleburg and Union Bridge Districts. One of these men will be the Harford County man.

The prompt removal of reactors, and a thorough clean up at once, will put the dairymen in position to replace reactors at once. Care should be exercised by dairymen buying cattle, and go slow and investigate, not only T. B. test, but also quality of cattle. Now is the time to improve the dairy herd.

The three reel film "Weighed in the Balance" has been shown at most of the Farm Bureau meetings this month. This is a very interesting as well as an educational picture. All the Farm Bureau meetings are open to the public, you are invited to attend these meetings.

The boy and girl club members are getting ready for Club Week at the University of Maryland, August 6th. to 11th. All boys and girls doing club work are invited to spend this week at the University. The Farm Bureau will pay transportation expenses, taking the young Carroll Countians to College Park in a bus. County Agent Fuller will spend the week at the University this year. All club members should attend this meeting.

### Marriage Licenses.

John H. Werner and Blanche E. Seigman, Codorus, Pa.  
William E. Thompson and Viola Catherine West, Frederick.  
Clarence E. Eckenrode and Dorothy H. Fuss, York.  
William L. Donaldson and Helen M. Eigenbrode, Waynesboro, Pa.

# THE CARROLL RECORD

(NON-PARTISAN)

Published every Friday, at Taneytown, Md., by The Carroll Record Company.

P. B. ENGLAR, Editor and Manager.

BOARD OF DIRECTORS.

GEO. H. BIRNIE, Pres. JOHN S. BOWEN, G. A. ARNOLD, V. Pres. D. J. HESSON, JAS. BUFFINGTON, P. B. ENGLAR, G. WALTER WILT, Secretary.

TERMS.—Strictly cash in advance. One year, \$1.50; 6 months, \$1.00; 3 months, 50c; single copies, 3c.

The label on paper contains date to which the subscription has been paid. All subscriptions will be discontinued on expiration, according to Governmental orders.

ADVERTISING rates will be given on application, after the character of the business has been definitely stated, together with information as to space, position, and length of contract. The publisher reserves the privilege of declining all offers for space.

All advertisements for 2nd, 3rd, 4th, and 7th pages must be in our Office by Tuesday morning each week; otherwise, insertion cannot be guaranteed until the following week.

FRIDAY, JULY 24th., 1925.

Entered at Taneytown Post-office as Second Class Matter.

All articles on this page are either original, or properly credited. This has always been a fixed rule with this Office, and we suggest the adoption of it by our exchanges.

It is said that the majority of anti-evolutionists are "dry," and that the majority of evolutionists are "wet." Very likely true; and there is nothing to be proud of in the fact, for the "wets." The line up of humanity might be carried much further, and with the same result.

Mr. Bryan may be a "has been" so far as great influence is concerned, but none the less, on questions of righteousness—if not on all questions of politics—he takes the best side. In his whole public career, no sign of moral degeneracy attaches to any of his positions, and he has been entirely free from entering into crooked deals.

It may be a serious question, whether man has "descended" or "ascended," no matter what his origin—whether the Garden of Eden, or a menagerie. There is evidence on both sides, and an army of "expert scientists" can not reach an agreement adequate to satisfy the whole of the present race. By the way, who is an "expert scientist," and how and where did he get it?

The Westminster Times thinks the Republicans of Maryland are playing for a "first-class licking" at the next election by entering upon a campaign of mud-slinging between factions representing candidates for Senator and Governor, and we guess The Times is about right. We are not strong for primary elections for picking the best men, but it seems to us that this would be a good time for Repub leaders, so called, to keep quiet, and let the people—who are interested enough—to pick the candidates, without having a knife-sharpening time of it so long before the voting is done.

## Uncle Sam Needs the Money.

Many printers and publishers are finding fault with the present rates of postage—the new laws passed in order to secure revenue enough with which to pay increased salaries for postal employees. The job is an easy one; but the critics should remember that "Uncle Sam needs the Money" and must get it from mail patrons, by juggling with rates in order to get more income with the least amount of kicking.

The most unfortunate thing about the new rates is, they do not seem to be bringing in the hoped-for increased revenue. They are said to be, in fact, insufficient to anything like meet the increased expenditures. President Coolidge and his postal officials were afraid of the job, but Congress thought otherwise, passed the present rates, and no doubt now feel that they no longer have any responsibility in the matter.

That is a fine way Congress has about such things. It is easy to pass laws to satisfy constituents, then let the difficulties of the laws—the objections to them—be met by somebody else. Passing a law, then "getting the money," are often two very different propositions.

## "A Law Suit, Not a Prayer Meeting"

Clarence Darrow, noted lawyer and counsel for Scopes in the evolution case, who is reported to have but slight leanings toward religion, objected to the opening of the court with prayer, saying "This is a law suit, not a prayer meeting." In our humble judgment, the eminent counsel did not gain anything worth while, by indulging in such an expression.

Entirely aside from this particular case, there might very appropriately be much more real prayer in Court than is commonly heard there, and much less of specious "prayers" of counsel. We think Mr. Darrow was unfortunate in his joke, considering the two varieties of prayers, and his part in the case.

At any rate, his remark was a

gratuitous fling at a custom that religious folks regard very highly, and the learned counsel might have been big enough to have refrained from his sarcasm, as the customary formal prayer had nothing to do with the legal side of the case, that he must have thought was infringed upon—if he had any thought at all about the appropriateness of the remark.

The incident seems to us to have been a fair illustration of the old saying about trials, that when an attorney has a bad case he always has the alternative of abusing counsel on the other side. Mr. Darrow accepted the opportunity of finding fault with the custom of the Court, perhaps for want of something else to object to, and perhaps because he consistently disbelieves in prayer. In either case, the effort was wasted.

## Personality.

One man can sell goods in certain quantities to a certain number of customers. Let him be "off the road" for any cause and put a substitute on the same rate with the same goods, and he will return less orders. The difference is largely in the "personality" of the men—"the goods" do not sell themselves.

Start out two men on a speaking tour, each with the same message to the public, word for word, and the one will put his message "over," to a much greater extent than the other. The difference is largely in personality, the messages, in themselves, do not carry conviction.

One may read a profoundly logical and forceful sermon, written by a highly competent intellectual person, and yet not be influenced so much by it as in hearing the same material personally delivered by a less noted author. In a variety of ways, it is the personal touch, the tone of a voice, the mannerisms of an individual, that creates influence and carries weight.

We rather boast of our ability to "see through" problems and intricate debates, strictly on evidence plain before us; we deny that we are influenced by such things as oratory and "personality," but we thereby misrepresent facts. We will read over a circular, for instance picturing the attractiveness of an investment, and toss it aside with scarcely more than passing interest; but, let the right man see and talk to us personally, on the same subject, and before we know it, almost, we have made an investment.

"Personality"—the human touch—the human voice—the very appearance of an advocate, counts for vastly more than we think, or admit, and this is the reason why one man is worth more than another, and draws a larger salary. We profess great wisdom when we say, "No man is worth \$25,000 a year salary," but it is merely a wisdom growing out of ignorance. There are men—hundreds of them, worth much more than that, because they produce the results justifying their salary.

"Personality" may be an accomplishment of value, or one of danger. Some men use their personal qualifications—their "magnetism" we sometimes say—for dishonest purposes. There is a sort of hypnotism attaching to some people, and it is capitalized; it influences us, perhaps only for the time while under its spell, but for long enough for us to tie ourselves to dangerous propositions. We simply let our admiration overcome our calm judgment, and surrender to a superior "personality."

It is an extreme statement that some can persuade others that "black is white," but in effect the statement is true. It is the old story of the tempter, that started away back in the Garden of Eden. Fortunately, all men with strong "personality" are not merely tempters. The most of them, we believe, make proper use of their power, and the world is the better for them; but, it behooves all of us to cultivate strong personalities of our own and not be easily "taken in" by glib tongues and persuasive tones. We owe it to ourselves, and to our circle of influence, to be conservative enough to avoid being easily placed on the "sucker list."

## The Coal Problem Again.

The present coal situation is merely another chapter in a story that has been familiar in this country, for years—a fight between organized miners and the coal operators, with the consumers of coal ultimately paying the price of the outcome, and perhaps more besides. What this country, and the whole world, needs, is a substitute for coal, and it is likely to be found. Already, the harnessing of water power and the use of oil, have cut down coal demands, and perhaps in the near future electricity will largely solve the problem and reduce the use of coal to the extent that threats of "strikes" will largely be a negligible fear.

The whole situation between the

miners and operators is becoming unbearable, and a species of force that the country as a whole has long been weary of, with popular sentiment divided as to where the blame rests. Then, there is government operation of the coal fields; but, relief in that event is not by any means assured—it would mean still greater political influence by unionism, and trouble for the government and candidates, and coal users would still "pay the price."

The situation is largely the same on both sides of the Atlantic, as a big problem. The Philadelphia Ledger says of it editorially, in part, as follows:

"This is another summer of coal troubles on both shores of the Atlantic. King Coal's supremacy is challenged in many fields by oil and threatened in others by a coming hydro-electric age, but he keeps the power of troubling the waters of statesmanship, politics and industry. The situation in America and Great Britain are similar. In both countries wage agreements have been disastrous to miners and operators. Every shipload of coal exported from British ports in months has meant the loss of a shilling a ton. On this side, American soft-coal operators have been unable to compete with nonunion mines. Their cost of production has been too great.

In America the soft-coal industry is a chaos. Ruin is staring British mine owners in the face. In American soft-coal fields tens of thousands of miners are jobless. Since last fall 67,000 British miners have been thrown out of work by closing pits. Scores of British and hundreds of American mines are shut.

British operators cannot pay the none too generous minimum scale and keep their export business. Unless it is kept, British miners go jobless. They refuse, however, to surrender the advantages they fought so long and bitterly to get.

American soft-coal operators tried to pay the 1924 scale and non-union competition hamstrung them. American miners, like the British, refuse to surrender their hard-won gains."

## Prohibition Enforcement.

We have turned the corner in prohibition enforcement and may expect steady improvement until a satisfactory condition is established.

When prohibition came the government had various clearly defined problems to solve. There was the problem of caring for the vast amount of bonded liquors existing. These liquors were contained in a large number of warehouses scattered over the country, most of them being inadequately guarded. Robberies were frequent and there was much evidence indicating collusion. Whiskey being transported by motor trucks was seized in considerable quantities by hi-jackers. Approximately eight million gallons of bonded liquors were released under permits for supposed legitimate purposes during the first year of prohibition. There was not even any proper paper for the printing of permits so that the counterfeiting of these documents was not difficult.

That problem was solved. By new legislation, bonded liquors were concentrated in a few warehouses where they could be adequately guarded. Transportation of liquor by truck was stopped. A permit system was evolved which reduced counterfeiting to a minimum. Liquors released on permit declined from approximately eight million gallons to approximately one and one-half million gallons.

The problem of home brew, which it appeared at one time would be considerable, solved itself because palatable home brew could not be made and people simply stopped trying. It is true that a good deal of wine is made today in the large cities by foreign born people, chiefly by Italians and Greeks.

The next important problem was that of smuggled liquors. When Congress added approximately three hundred vessels to the Coast Guard and signed treaties with other nations largely increasing the powers of the United States in dealing with smugglers, the problem of smuggling from sea was practically solved and when the control of Customs and Coast Guard was put in the hands of the same man who controlled prohibition, the way was cleared for the solving of the entire smuggling problem. After all, the entire amount of liquor smuggled in the United States in recent years has totalled only a few million gallons. Most of the stuff bought as smuggled was redistilled denatured alcohol.

This is the present big problem.

The arrest of a large number of people in Philadelphia, where this traffic centers, indicates that the government is trying to take effective measures. It is doubtful if this problem can be solved without additional legislation. The control of the output of denatured alcohol must be strengthened. It is interesting to note that the production and output of dena-

tured alcohol in the United States has increased largely since prohibition, not simply because a great deal of this commodity has been redistilled for bootlegging, but because legitimate industries requiring large quantities of alcohol have sprung up upon the ruins of German "industries" and to supply an expanding demand for goods of many kinds.

It is true that we have with us the problem of moonshine, but it is believed that the consumption of moonshine will in time be restricted only to the very lowest classes of people. The product is almost unbelievably filthy. It is a fact that much of the moonshine produced is prepared from mash to which stable manure has been added to hasten fermentation. These facts are coming to light and they certainly tend to restrict consumption. Many a "good citizen" is drinking this product today in the belief that he is getting "pre-war stuff," for it is easy to color it, flavor it and bottle so that it appears to be "good liquor."—Board Temperance M. E. Church.

## Important Agreement

The Webster-Ashburton treaty was a treaty between the United States and Great Britain, negotiated by Daniel Webster and Lord Alexander Baring Ashburton in August, 1842. By this treaty the frontier line between the state of Maine and Canada was definitely agreed to. By this treaty, also, seven-twelfths of the disputed ground and the British settlement of Madagaska were given to the United States and only five-twelfths of the ground to Great Britain, but it secured a better military frontier to Canada and included heights commanding the St. Lawrence, which the award of the king of Holland, who had been chosen arbiter, had assigned to the Americans. By the eighth and ninth articles provisions were made for putting an end to the African slave trade, and the tenth article provides for the mutual extradition of suspected criminals.

## Absurdity of Man

Really, when it comes to glory there is no limit to the absurdity of man. A man will glory in a disease, a vice, the wealth of an ancestor when he is himself poor or the poverty of an ancestor when he is himself rich; the street in which he lives; the color of his hair, of his eyes; the possession of something which he picked up in the street—even the abuse of some one more notorious than himself. Men will glory in anything, just as the famine-struck will eat anything. Such is the appetite for glory. And why is it there? I say again, to make men achieve, to make them write bad verse, build hideous houses, put up impossible monuments, pass bad laws, and in general destroy their kind.—Hilliard Belloc in the New Statesman.

## Telegraph Terrified Many

When Prof. Samuel F. B. Morse, inventor of the practical telegraph instrument and code, first put them into practice in 1845 many intelligent citizens were actually terrified. Some of the more skeptical spoke of him as being in league with the devil. The first message sent over the line that had been constructed for the practical tryout was: "What hath God wrought!" Morse was a painter, and not an electrician, but he combined the principles and devices that electrical scientists had produced up to that time and in that way won credit for the idea. He met with great opposition in getting the idea accepted.

## The Cow-Tree

In Colombia there is a tree known as the cow-tree. It is treated much as we treat a cow, or, this vegetable cow is bled; rather, its veins are cut, that is to say, the bark of the tree is incised. Immediately the laciferous vessels thus bisected yield an abundant flow of white liquid which as regards its appearance, taste and nourishing properties hardly differs from ordinary milk. Evaporated by gentle heat, this vegetable milk yields a delightful sort of marzipan with a slightly aromatic odor.—From the Wonder Book of Plant Life, by Jean Henri Fabre.

## Words! Words!

Some very beautiful choral music we heard recently reminded us of a little speech Sir Henry Wood once made to Sheffield choristers. "Now for your greatest fault!" he exclaimed. "Words! Words are your master. When you go and hear a bad comic opera and you listen with rapt attention to the principal comedina, what attracts you? You are able without effort to hear every word he sings. You forget that he has no voice. Now think when you are singing choruses at the next festival what a delight it will be to the public if they hear every word you sing!"

ATTORNEY'S SALE OF Valuable Farm in Uniontown District, Carroll County, Maryland. Two Good Short Ones. The day before she was to be married a negro servant came to her mistress and ask her to keep in safety some money she had saved. "But why should I keep it for you?" asked the mistress. "I thought you were going to be married tomorrow." "Dat's just it. I don't want to keep all that money around, wid a strange niggah in de house." Judge: "So you weren't doing anything when arrested?" Rastus: "No sah. Ah was jest walking along down de street and singing a little song when dis big Irish policeman come along and started to beat me up." Judge: "What were you singing?" Rastus: "Just a little song called 'Ireland must be heaven, cause mah mohah came from theah.'"

Old Mr. Carter Helped by Simple Mixture "After taking Adlerika I feel better than for years. At my age (60) it is ideal—so different from other medicines." (signed) W. W. Carter. Adlerika is a simple mixture of buckthorn bark, glycerine, etc., which removes GAS in ten minutes and often brings surprising relief to the stomach. Stops that full, bloated feeling. Brings out old waste-matter you never thought was in your system. Excellent for chronic constipation. R. S. McKinney, Druggist. Advertisement

Didn't Know How to Talk. The kind of weather we enjoyed during June—or rather, that some of us didn't enjoy—brings to mind a little story that was popular a few years ago. A well-known gentleman was in the habit of saying the wrong thing every time he went out in society, so finally his wife insisted that he talk about nothing except the weather. He tried it one hot evening in June, and when he got home his wife was indignant. "I'll never go out with you again," she said, "until you learn how to talk." "What have I done now?" he wanted to know. "Done! Why, you asked Mrs. Upstage how her husband is standing the heat, and he's been dead for more than a year." Advertisement

**FOR SALE**—Fine Homes, improved by Brick and Frame Houses and all improvements, in and out of town.—D. W. Garner, Real Estate Broker. 10-5-1f

**WIPING RAGS WANTED**—Will pay 8c per pound for large clean cotton rags—calico, gingham or muslin—old garments, free from buttons and hooks, small scraps not wanted. Light weight knit goods will do, if free from lint. Not over 50 lbs. wanted, in all, for prompt delivery.—The Record Office, Taneytown.

## Midsummer Care of Your Baby.

A bulletin just issued by the Bureau of Child Hygiene of the State Department of Health gives this advice to mothers on the midsummer care of the baby.

"For many years, the latter part of the summer, from the middle of July to the end of September, has been the time of the year when there has been the greatest amount of sickness and death from intestinal diseases among babies and young children.

"The experience of recent years in many parts of the country has shown that illness from these causes is not necessary and can be prevented. Where babies are brought up under medical direction, if proper care is given to their food, and to their daily routine, this dreaded summer complaint is largely done away with. In many communities the danger to the lives of babies is considerably less even in hot weather than at other times of the year.

"The precautions to be observed by mothers in the care of their children in warm weather are so simple that they can be carried out easily everywhere. They can be summarized briefly as follows:

1—"Intervals between feedings should never be more frequent than three hours, and most babies would do better if fed at four intervals, that is, five or at most, six times in twenty-four hours. This gives an opportunity for the food to pass from the stomach into the intestines, which takes three or four hours, before additional food is given. Cooled, boiled water can be given freely in hot weather between feedings.

2—"Mother's Milk. No food is comparable to mother's milk; it is especially useful in hot weather. Mother's milk is exactly suited to the needs of the baby; it is practically without germs and is usually given in just the quantities that the baby requires. A baby should not be weaned during the summer if it is possible to feed it on mother's milk.

3—"Clean Cows' Milk. The next best substitute for mother's milk is clean cows' milk diluted with water according to the doctor's direction. The mixture should be boiled for two or three minutes and then cooled before feeding the baby. It is impossible to prevent germs from entering cows' milk, even if it is produced under good conditions. Boiling will practically destroy these harmful germs and make the milk safer for young children. When cows' milk is used, it is especially advised that the feeding intervals be four hours apart.

4—"Clothing. The baby and young child should be dressed according to the temperature and not according to the season. During very warm weather, when the thermometer hovers around 90 degrees, a little baby requires nothing but its napkin. A light blanket or a dress should be at hand to put on the baby if there is a sudden fall in temperature.

5—"Sponging. Babies are made much more comfortable during hot weather if they are stripped and sponged with tepid water two or three times a day. Very young babies, especially in warm weather, should be brought up under a doctor's care. The mother should notify her doctor of even slight changes in the baby's condition.

"Intestinal disease can usually be cured if treated promptly, but if allowed to run on, it is always a serious matter in hot weather."

## Contesting Brookhart's Election.

The legal battle to oust Senator Brookhart, of Iowa, and to seat his Democratic contestant, Steck, is now under way, the first step being the recount of about 750,000 ballots, which is expected to require about six weeks time. Brookhart, insurgent Republican was given a majority of 755 votes on first count, and 1385 by a second count.

Steck rests his claims on the rejection of some 2000 ballots, marked for him, but which were invalidated under the state laws because of certain distinguishing marks on them. Many of Steck's votes came from regular Republicans, who refused to support Brookhart because he bolted the regular Republican ticket and joined La Follette. Steck says that many such regular Republicans, seeking to vote the straight Republican ticket with the exception of Brookhart, marked an "X" at the top of the ballot for the Republican nominee and then marked an "X" before Steck's name, with an arrow to attract especially the attention of the election official.

Under a strict interpretation of the Iowa law, these "arrow" ballots are considered mutilated and invalid. Steck contends that the intention of the voter was obvious, and that if the committee allows the counting of the "arrow" ballots he will be declared winner. Brookhart men, on the other hand, say that virtually all such ballots were counted for Steck, and that the few that were thrown out change the final result.

"Hobson's choice" is so called because of the practice of Thomas Hobson, of Cambridge, England, who in 1631 conducted a livery and required every customer to take the horse which stood nearest the door.

## Some Rattler.

"Back where I come from," declared the backwoodsman, "my pap he tamed him a rattlesnake; and you wouldn't believe how fond that there reptyle got of him. Followed him around like a dog and et from his hand. Folks come from miles away to see. Pap took Rattles along when we moved to town. One night a burglar broke into the house and threwed a gun on pop. Looked like his time had come. But all of a sudden that there snake made a spring, wropped hisself around the burglar's arms and then rattled his tail out of the window until a policeman come and got the thief."—Country Gentleman.

## Madge Bellamy

Charming Madge Bellamy was born in Hillsboro, Texas, and received her education in San Antonio. She is 5 feet 3 inches tall, weighs 112 pounds, has dark hair and brown eyes. One of the most beautiful of "movie" stars, she has been seen in some of the most popular pictures.

Your Health

By ANDREW F. CURRIER, M. D.

## RICKETS

RICKETS, or rachitis, is the result of bad nutrition, affects all the tissues of the body, and chiefly leaves its mark on the bones—which it softens and then deforms.

It usually occurs before the third year, but the bone deformities appear later.

It is caused by food which is not assimilated, but also by neglect of the skin, bad air, insufficient sleep, etc.

The children of the poor have it, but so do those of the rich. In this country, it is common among negroes and Italians, but not among Irish or Germans.

In the great European cities one sees it everywhere. The urine of rachitic children contains phosphates in abundance and the bones, being deficient in lime, bend and break easily.

Rachitic children have soft spots in the bones of the skull; and the membranous portions of the skull, where you notice throbbing and pulsation in an infant, and which ought to harden during the first few months of life, remain soft.

All the bones of the skull, instead of being firmly united, are loose and easily moved.

The face of a rachitic baby is small, and the head seems disproportionately large. The liver, spleen and lymphatic glands are enlarged, the muscles soft, and the ligaments weak.

The child's appetite may be good, he may even seem voraciously hungry, but his food doesn't appear to nourish him, he becomes fretful, gets diarrhea and this alternates with constipation.

He is sensitive, cries when touched, his diarrhea is offensive, the appearance of his teeth is delayed, and when they break out, they are irregular and of poor quality.

When he begins to walk, the weakness of the bones of the legs becomes apparent and they bend or break easily; the joints are weak and he falls frequently.

When he tries to move himself with his arms, the arm bones bend or break and there may be an outward hump on the spine.

On the ends of the ribs there are knobs or bead-like structures, the breast bone projects and the child becomes pigeon breasted.

The pelvis may become deformed and, in females, this has a very important bearing upon the successful delivery of offspring, if impregnation should ever occur.

Rachitic children are frequently bow-legged, knock-kneed or flat-footed; they are also sensitive to bronchitis and croup, and die from these diseases more frequently than children who have better physical development.

If they reach maturity, they are short and poorly formed and their limbs often reveal the marks of early disease.

Rachitic children should be taken to the mountains or seashore, if possible, and should have abundance of good plain food which they can assimilate—which will be indicated by the change in their stools and in their general nutrition.

Fats in the form of cod-liver oil, or olive oil, should be given them; also as much of eggs, milk and cereals as they can dispose of. Treatment with mechanical apparatus is important to prevent deformities, and they should have all possible benefit from public parks, sea-baths, sleep, fresh air, and life in the country when this can be provided.

(© by George Matthew Adams.)

Pneumatic linings for automobile cushions have been invented that can be inflated to take the place of springs and padded upholstery.

## Famous Royal Cords for Heavy and Extra Heavy Service

THE reports you hear every day about the remarkable service of U. S. Royal Cords indicate how well they are doing the job.

Their Latex-treated Web Cord construction gives them wear-fighting quality that stands up under the hardest kind of service over all kinds of roads.

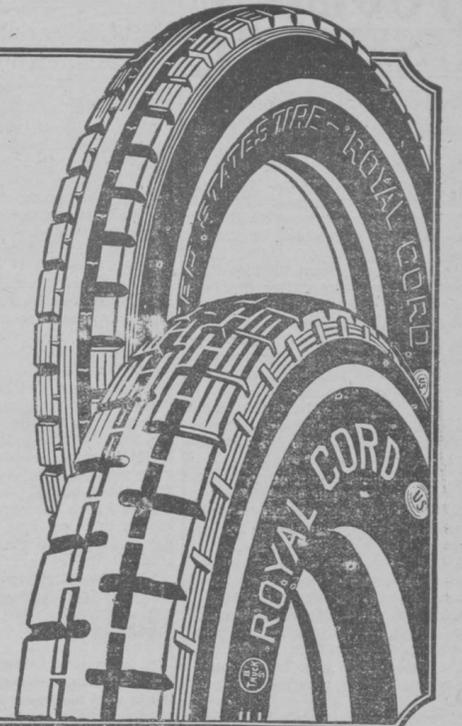

For heavy service in all sizes choose the U. S. Royal Cord; for extra heavy service on larger cars, buses and light trucks—the U. S. Bus-Truck Tire; for specially severe service on light cars the U. S. Royal Cord Extra Heavy in 30 x 3 1/2 Clincher and 32 x 4 Straight Side.

On account of our stock being too large we are offering the \$110.00 Victrola and ten records for \$100.00. Other models reduced. Terms easy.—Nace's Music Stores. 7-17-3t

### NOTICE TO CREDITORS.

This is to give notice that the subscriber has obtained from the Orphans' Court of Carroll County letters of administration upon the estate of

JAMES T. SHORB, late of Carroll County, deceased. All persons having claims against the deceased, are hereby warned to exhibit the same, with the vouchers properly authenticated, to the subscriber, on or before the 21st. day of February, 1926; they may otherwise by law be excluded from all benefits of said estate.

Given under my hands this 24th. day of July, 1925.

SARAH A. SHORB, Administratrix. 7-24-5t

### Avoid Touching a Live Wire.

While touching a live wire is a thing for all of us to avoid, street railway linemen sometimes find it useful to know just how to test wires by the sense of touch. When a trolley line is down and a repair crew arrives it is not at all uncommon for a "hand test" to be tried, in order to determine whether or not the wire is a "live" or a "dead" one.

Old linemen say that in hand testing the workman may touch or tap the wire with the back of the hand, but never with the palm or the inside of the fingers. The reason for this rule is simple. If the wire is charged with electricity, and one touches it with the inside of the hand, the muscles of the hand will be contracted toward the wire, causing the hand to close tightly about the dangerous strip of metal.

## FORCED PULLETS ARE BEST EGG PRODUCERS

James E. Rice of the Cornell university experiment station issued a bulletin relative to the possibilities of feeding early hatched pullets during the summer by retarded or forced feeding.

By retarding is meant the idea that feeding is necessary during the late summer to check the early tendency of laying, with the hope of getting a larger egg yield in the early winter.

By forced feeding is meant the giving of a rich stimulating mash to induce egg production.

Concerning the results of his work Mr. Rice has certain findings drawn from data which are submitted below:

1. Forced pullets made a better profit than retarded pullets.
2. Forced pullets ate less food per hen at less cost per hen than retarded pullets.
3. Forced pullets produced more eggs of a larger size, at less cost per dozen than retarded pullets.
4. Forced pullets produced more eggs during early winter than retarded pullets.
5. Forced pullets have better hatching results of eggs than retarded pullets.
6. Forced pullets made a better percentage of gain in weight than retarded pullets.
7. Forced pullets showed less broodiness than retarded pullets.
8. Forced pullets had less mortality than retarded pullets.
9. Forced pullets showed better vigor than retarded pullets.
10. Forced pullets showed the first nature molt earlier than retarded pullets.
11. Retarded pullets gave better fertility of eggs than forced pullets.
12. Hopper-fed dry mash gave better results in gain of weight, production of eggs, gain in weight of eggs, hatching power of eggs, days lost in molting, mortality, health and profit per hen, than wet mash.
13. Wet mash and grain-fed pullets consumed slightly less food at less cost, and produced eggs at slightly less cost per dozen than dry mash and grain-fed pullets.
14. Wet mash and grain-fed pullets produced slightly larger eggs of slightly better fertility, and showed less broodiness than dry mash and grain-fed pullets.
15. Dry mash and grain-fed pullets laid eggs of good size at an earlier period than wet mash and grain-fed pullets.
16. Hopper-fed pullets ate more than hand-fed pullets.
17. Pullets having whole grain ate more grit and shell than those having a proportion of ground grain.
18. Pullets fed on grain were more inclined to develop bad habits than those having a mash.
19. Earliest producers did not give as many eggs in early winter.
20. Early layers gained as rapidly in weight as those beginning later to lay.
21. Prolificacy made by slight difference in weight of hen and weight of egg.
22. The most prolific pullets did not always lay earliest.

## Give Pullets Best Feed and Careful Attention

"The success of the poultryman is measured very largely by the quality of the pullets with which he replenishes his flock," says Martin Decker, poultry research specialist at the New Jersey agricultural experiment station.

"Great care should be exercised to keep the pullets growing uniformly from hatching to maturity, as a check or setback will cause them to mature too late for winter laying. Development is best promoted by free range with an abundance of shade and green food.

"We feed grain and keep mash before the growing stock continually. The mash is composed of nearly the same combination as our laying mash, but the pullets tend to begin laying too early if allowed too much of it. We must figure on having the pullets come into production about the middle of October, or before cold weather sets in.

"The pullets should be transferred to winter quarters, gradually—a few at a time. Do not put on the lights until they have become accustomed to their new surroundings. Then feed the laying flock the following rations:

Mash	
100 lbs. wheat bran	
100 lbs. wheat middlings	
100 lbs. cornmeal	
100 lbs. ground oats	
100 lbs. meat scrap	
Grain	
100 lbs. wheat	
100 lbs. cracked corn	
100 lbs. oats	

## Hens Pasture Feeders

Hens are pasture feeders, though seldom considered such on many farms, in that they are fenced away from good pasture. J. G. Halpin of the poultry department of the University of Wisconsin says that a heavy-laying hen will not last long unless the bowels are kept in a laxative condition. Most poultry keepers find green stuff more practical than drugs. Green feed adds the necessary bulk to the ration and apparently assists in the assimilation of minerals.

## Pure-Bred Sires Bring Improvement

### Use of Better Bulls Increases Milk Production.

(Prepared by the United States Department of Agriculture.)  
"No other great improvement in our dairy herds can be obtained at so low a cost as the improvement by the use of better bulls." This comment is made by the bureau of dairying, United States Department of Agriculture, in the foreword of a new directory of co-operative bull associations in the United States.

The statement is based on the comparative milk and butterfat records of large numbers of cows and of their daughters sired by pure-bred bulls. In milk production the daughters excelled their dams by 14.5 per cent, on an average, and in butterfat production by 16 per cent. These figures represent an increased milk yield of 966 pounds and an increased butterfat yield of 48 pounds. That the increases are due to qualities inherited from the pure-bred sires is a fair conclusion based on the knowledge that in nearly every case the dams and daughters were in the same herd and received the same care.

The new directory shows that at the beginning of this year there were 220 co-operative bull associations in the United States. These associations owned 1,003 carefully selected pure-bred dairy sires. While the increase in production because of good breeding is very noticeable in the first generation, the benefits are also accumulative, though the gains are usually less rapid in subsequent generations.

## Ten Commandments for Owners of Dairy Cows

1. Thou shalt feed the milk cows enough—all they will eat.
2. Feed the cows according to their production; about one pound of grain to from three to four pounds of milk.
3. Thou shalt grow a balanced ration for the cows on your farm; sweet clover and alfalfa are necessary.
4. Feed the cows a ration made up of several feeds for variety.
5. Thou shalt strive to provide a succulent feed—corn silage is best.
6. Feed a bulky, palatable ration, including salt.
7. Weigh and test the milk and estimate the cost of the feed to determine which cows are helping you pay the bills.
8. Thou shalt not allow the cows to stay out of doors until they are chilled; provide a comfortable shelter.
9. Thou shalt not force the cows to drink ice cold water—and water them at least twice a day.
10. Thou shalt not covet thy neighbor's cows, thou shalt not covet thy neighbor's feed supply, nor his cream check, nor his barns, nor anything that is thy neighbor's, but shall plan to produce plenty of farm-grown feed, get a pure-bred bull, and hustle to outdo thy neighbor at producing butterfat profitably that thy days may be long and happy in the Land of the Dakotas.—J. R. Dice, North Dakota Agricultural College.

## Prevention Best Remedy for Chicken Diseases

When one goes into a chicken house and hears the birds singing, it is a pleasant contrast to the appearance of a flock that is droopy, with pale combs and indicating a general unhealthy condition. The difference in the majority of cases is not due to one producer curing the disease and the other not curing it, but rather to the fact that one breeder prevents the trouble that is affecting the other person's flock.

Most cases of roup and similar contagious diseases are the result of the disease being brought to the farm with new fowls which were not isolated until they had been proved to be healthy. Sometimes the disease comes from an outbreak of a previous attack after which the premises were not properly cleaned up and disinfected.

Lice and mites can do a great amount of harm if they have their own way. The good poultryman does not wait until they get a strong foothold in the flock, but carries on a preventive war on such pests.

## FARM FACTS

Keep liquid manure containers covered so flies and mosquitoes can't breed in them.

Sweet clover and alfalfa are well adapted to the upland portion of the cut-over lands.

The raising of legumes presents the only feasible method of supplying nitrogen to the soil.

Bury dead fowls deep in the ground where dogs and hogs cannot get at them, or better still, burn them to ashes.

Poison gets woodchucks ten times as fast as you can shoot them. Ask your county agent for information about poisons and methods.

Cracked yellow corn contains more heat and energy value for baby chicks than rolled or pin-head oats, and is considerably cheaper.

Dairymen find that it pays to keep records of their cows. Some of the boarders are being sold for beef and better sires are being purchased.

## African Oil Palm Has Great Variety of Uses

Unlike the date and the coconut palm, the oil palm is not at all well known. Nevertheless, it is exceedingly useful. In the Congo, writes Mr. Isaac F. Marcosson in "An African Adventure," and for that matter in virtually all of the West Africa, it is the staff of life.

Thousands of years ago the Egyptians used the sap for embalming the bodies of their kingly dead. Today the oil palm not only represents the most important agricultural industry of the colony—it has long since surpassed rubber as the premier product—but it has an almost bewildering variety of uses. It is food and drink and shelter. From the trunk the native extracts his wine; from the fruit comes oil for soap, for salad dressing and for margarine; with the leaves the native makes a roof for his house; with the fiber he makes his mats, his baskets and his strings for fishing nets. The wood itself he uses in building.

An oil palm will bear fruit within seven years after the young tree is planted. The fruit comes in what is called a regime, which resembles a huge bunch of grapes; each fruit in the cluster is approximately the size of a large date. The outer part, which is called the pericarp, is almost entirely yellow oil incased in a thick skin. Imbedded in the oil is the kernel, which contains a finer oil. The fruit is boiled down, and the kernels are dried and exported in bags to England, where they are broken open and the oil in them used for making margarine.

For hundreds of years the natives have gathered the fruit of the palm and have extracted the oil. The waste at first was enormous; the blacks threw away the kernels because they were unaware of the valuable substance inside.—Youth's Companion.

## Legends of First Man Common to All Races

Almost every race of people has legends regarding the first man and woman. Among North American Indians myths are common. Traditions trace back our first parents to white and red make; another is that man, searching for a wife, was given the daughter of the king of the muskrats, who in being dipped into the waters of a neighboring lake, became a woman. One of the strangest stories concerning the origin of woman is told by the Madagascarenes. Insofar as the creation of man goes, the legend is not unlike that related by Moses, only that the fall came before Eve had arrived. After the man had eaten the forbidden fruit he became affected with a boil on the leg, out of which, when it burst, came a beautiful girl. The man's first thought was to throw her to the pigs; but he was commanded by a messenger from heaven to let her play among the grass and flowers until she was of marriageable age, then to make her his wife. He did so, called her Barbara, and she became the mother of all races of men.

## Fowl Names

The fat plumber was in a philosophical mood.

"There is simply no understanding woman," he observed.

"Whaddye mean?" the thin carpenter asked, just to start the conversation.

"Well, for instance, a woman does not object to being called a duck."

"No."

"And she even smiles if some one happens to refer to her as a chicken."

"Too true."

"And most of them will stand for being called squab, broiler or turtle-dove."

"Yes, yes, but what's the idea?"

"It's just this," the fat plumber exclaimed, "a woman objects to being called a hen, and a hen is the most useful bird of the whole blooming bunch."—Popular Poultry.

## Ancient College Custom

A person who fails to pass an examination is said to have been "plucked." This meaning of the word has a curious origin. In olden days when degrees were conferred in Oxford two proctors marched solemnly down the hall and back. Tradesmen with grievances—namely, unpaid bills—would sit on the benches and pluck the proctor's gown as he passed. If the bill was big enough and the tradesman proved his case, the undergraduate was refused his degree. Hence the term "plucked," which, now that its origin is forgotten, is used for failing in examinations of any kind. The proctors still march up and down the hall, but of course their gowns are no longer plucked.

## Why the Strife?

We are told that Cineas the philosopher once asked Pyrrhus what he would do when he had conquered Italy.

"I will conquer Sicily."

"And after Sicily?"

"Then Africa."

"And after you have conquered the world?"

"I will take my ease and be merry."

"Then," asked Cineas, "why can you not take your ease—and be merry now?"—Sir John Lubbock.

## Judge for Yourself

"How old is she?"

"I can't say, but on her last birthday, when they brought on the cake with the candles, several of the visitors nearly fainted with the heat."

## The Correspondent

John McCormack, the famous singer, receives a great many letters from aspirants to musical fame.

At a dinner in New York Mr. McCormack read a letter that had been sent to him under the erroneous impression that he taught voice production. The letter, dated from the Middle West, ran:

"Friend John—Please let me know your lowest rates for full correspondence course in voice production. I have no voice, but as the efficiency engineer business is not what it was represented to me by the International Efficiency School of Correspondence, I desire to abandon same in favor of grand opera, and if you can produce me a fine tenor voice I will be glad to pay, in addition to regular charges, a cash bonus and a generous percentage of salary receipts for a term of years. Answer by return."

## PUBLIC SALE

—OF—

### Fine Farms & Apple Orchard NEAR MAYBERRY, MD.

The undersigned, executor of Dr. Luther Kemp, late of Carroll Co., Md., deceased, by virtue of a power of sale contained in last will and testament of said deceased, and also by virtue of an order of the Orphans' Court of Carroll County, Maryland, will offer at public sale, on

TUESDAY, JULY 28, 1925,

at 1 o'clock, on the premises on the Stone Road from Littlestown pike at Mt. Pleasant to Marker's Mill, about 3 miles from the former, and 2 miles from the latter, that very desirable farm No. 1 of which the late Dr. Luther Kemp died, seized and possessed, containing

144 ACRES, 3 ROODS, 34 PERCHES of land, more or less. The improvements consist of a fine Weatherboarded Dwelling House, large bank Barn, Wagon Shed, Corn Crib, Wash House, Large Hog Pen, and other outbuildings; a never-failing water supply. The land is in a high state of cultivation.

APPLE ORCHARD 22 ACRES. On this farm is a fine young apple orchard in good bearing condition. The properties will be offered separately and as a whole. Also No. 2 Farm containing

11 ACRES 20 SQ. PERCHES of land, more or less, improved by a Weatherboarded Dwelling House, new Barn, Wash House and all necessary outbuildings. This farm will be sold, the purchaser receiving the estate's share of growing yellow corn, also the right to put out fall crop.

TERMS OF SALE ON REAL ESTATE.—One-third of the purchase money to be paid on the day of sale, or upon the ratification of the sale by the Court, and the residue in two equal payments of 6 and 12 months, on the notes of the purchasers, with approved security, bearing interest from the day of sale, or all cash at the option of the purchasers.

PERSONAL PROPERTY. Also at the same time and place will sell the following personal property:

SAMSON MODEL M. TRACTOR, power 10-20; gasoline engine, Lambert, 2½ horse power; Nonpariel lime drill, tractor disc harrow, Oliver tractor plow, 200 locust posts, lot half inch galvanized piping.

TERMS OF SALE on personal. Sums of \$5.00 and under, cash; on larger sums a credit of 6 months will be given on note with security bearing interest from day of sale. No property to be removed until settled for.

JOHN A. YINGLING, Executor of Dr. Luther Kemp, Deceased. J. N. O. SMITH, Auct. 7-3-4t

## TRUSTEES' SALE OF VALUABLE REAL ESTATE in Uniontown District, Carroll County, Maryland.

By virtue of a decree of the Circuit Court for Carroll County, passed in cause No. 5611 Equity, wherein John H. Utermahlen, et. al., are plaintiffs and Margaret S. Flickinger, et. al. are defendants, the undersigned Trustees appointed by said decree will sell at public sale on the premises, located near Bearmount School-house, in Uniontown District, Carroll County, on

SATURDAY, AUGUST 15, 1925, at 2 o'clock, P. M., all that valuable little farm of which William H. Utermahlen, died, seized and possessed, containing

38 ACRES, 2 Rds. and 33 SQ. PER. OF LAND, more or less, which was conveyed unto the said William H. Utermahlen by John Utermahlen and wife by deed dated December 23rd, 1890, and recorded among the Land Records of Carroll County in Liber B. F. C. No. 72, Folio 130, etc., it adjoins the lands of Charles Black, Charles S. Marker, David E. Myerly and others; it is improved by a two-story weatherboarded

DWELLING HOUSE, bank barn, hog pen, chicken house, and other necessary outbuildings; there is good water at the house and barn, there is an orchard of good fruit, about 5 acres in meadow and 6 acres in timber land, the remainder is tillable land. Except the land which is now in growing crops, possession can be given as soon as the terms of sale are complied with.

TERMS OF SALE—One-third cash on the day of sale or upon the ratification thereof by the Court, the residue in two equal payments of one year and two years respectively, the credit payments to be secured by the notes of the purchaser, with approved security, bearing interest from the day of sale, or all cash at the option of the purchaser.

JOHN H. UTERMÄHLEN, MAURICE E. UTERMÄHLEN, Trustees. THEO. F. BROWN, Attorney. J. N. O. SMITH, Auct. 7-17-4t

**Sunday School**  
**'Lesson'**

(By REV. P. B. FITZWATER, D.D., Dean of the Evening School, Moody Bible Institute of Chicago.)  
(©. 1924, Western Newspaper Union.)

**Lesson for July 26**

**THE COUNCIL AT JERUSALEM**

LESSON TEXT—Acts 15:1-35.  
GOLDEN TEXT—"We believe that through the grace of the Lord Jesus Christ we shall be saved, even as they."  
—Acts 15:11.

PRIMARY TOPIC—Jesus the Friend of Little Children.  
JUNIOR TOPIC—A Great Gathering at Jerusalem.  
INTERMEDIATE AND SENIOR TOPIC—The Council at Jerusalem.  
YOUNG PEOPLE AND ADULT TOPIC—What Is Christian Liberty?

**I. The Controversy in the Church at Antioch (vv. 1-5).**

This difficulty was a most serious one for it threatened the disruption of the church into a Jewish and a Gentile division. It was not a question of the admission of the Gentiles into the church. That had been settled some years before when Peter received Cornelius and his household. The question now was, on what ground could they be received? Should Gentile converts be required to keep the Mosaic law as a condition of salvation? This issue was brought on by the coming of certain men from Jerusalem, who declared, "Except ye be circumcised after the manner of Moses, ye cannot be saved (v. 1)." The question was so difficult that Paul and Barnabas were unable to put the men to silence. These Jewish legalists had the letter of the Scripture on their side. They could point to the command in which this was enjoined upon believers (Gen. 17:14). Paul could not point to any Scripture where it had been abrogated. If Paul could plead that Abraham was justified before he was circumcised, his antagonists could answer, "Yes, but after justification the rite was divinely imposed." The brethren at Antioch decided to refer the matter to the mother church at Jerusalem. Accordingly, Paul and Barnabas and others were sent as a deputation to Jerusalem. At an informal reception by the church at Jerusalem they rehearsed the things which God had done for them.

**II. The Deliberations of the Council (vv. 6-21).**

1. Peter's Speech (vv. 6-11).  
He argued that God had borne witness to His acceptance of the Gentiles by giving the Holy Spirit to them as unto the Jews (Acts 10:34-47). Since, therefore, God had not made a difference it would be folly for them to do so.

**2. Paul and Barnabas Rehearsed Their Experience (v. 12).**

They told how God had set his seal of approval on their preaching of salvation by grace through faith, apart from works, by the working of signs and wonders through them.

**3. The Argument of James (vv. 14-21).**

He took the declaration of Peter and showed how it harmonized with the prophecy of Amos (Amos 9:11-15). He showed that the reception of the Gentiles was not in conflict with God's plan, but in strict harmony therewith. As set forth by James, God's plan is as follows:

(1) To take out from among the Gentiles a people for His name (v. 14). This is what is now going on—the preaching of the gospel to the ends of the earth, and the calling out of the church.

(2) After the church is completed and removed, the Hebrew nation will be converted and restored to its own land and privileges by the Lord Himself at His return (vv. 16-17).

(3) Following this will be the conversion of the world through the agency of converted Israel (v. 17, cf. Rom. 11:15). He showed that there is no conflict when the Scriptures are rightly divided.

His judgment was that the Gentiles should not be troubled with things that are Jewish, but should be warned against the perils of heathenism, such as meat offered to idols, fornication and blood.

**III. The Decision (vv. 22-29).**

The Mother church came to unanimous agreement and accepted the resolution offered by James. The apostles and elders not only sent a letter stating the decision of the conference, but took the wise precaution to send influential men along with Paul and Barnabas to bear the same testimony by word of mouth. The letter denied the authority of the Judaizing teachers (v. 24), and stated the method by which this decision had been reached (vv. 25-27). They put the Holy Spirit first.

**IV. The Decision Delivered to the Church (vv. 30-35).**

The church was called together to hear the report. Its reading brought rejoicing. They were now free to prosecute the great missionary work.

**Spiritual Growth**

July 26  
The Progress and Achievement of the Negro in America

Psalms 40:1-5; Proverbs 22:29  
From a lecture given at the Moody Bible Institute by Rev. John Little, of Louisville, Ky., we gather the following items of information and interest.

The history of the Negro in America is divided into three general parts. The first period dates from the time when about twenty Negroes were landed on the coast of Virginia, a little over three hundred years ago, up to the time of the Civil War. During that period, the Negro made three distinct gains, namely, the value of continuous labor, the knowledge of the English language and an introduction to the Christian religion which has been accepted and generally adopted by the Negroes in America.

The second period begins with the Civil War and is known as the reconstruction period. This lasted until about the year 1900. During this time, the Negro made some important improvements. He began and continued to establish three fundamental institutions, namely, the home, the church, and the school.

The strengthening of these institutions has been the chief work of the Negro race during the third period, which covers the past twenty-five years. There has been, in that time, a wonderful development of the Negro home. During the war many of them made splendid wages and invested their money in homes. They have also greatly improved their churches. The Negro has invested more money in his church than in any other institution. Dr. Little says that while driving through Alabama, he was impressed with the fact that the church building where the Negroes worshipped was the main institution of the whole neighborhood and was well kept.

The educational problem has perhaps been the greatest the American Negro has ever faced. Hampton and Tuskegee Institutes have figured largely in the intellectual development of the colored people. Hampton Institute was founded about the year 1876. General Armstrong, the son of a missionary, was sent to Hampton, Va., to take charge. The first order that he issued was that nobody was to eat that did not work. Following this order, the General began a system of education that was fundamental to the progress and prosperity of the Negro race. A certain amount of cooking had to be done, so he established a cooking camp; they must be clothed, so he established sewing classes; it was necessary to have vegetables so he started a garden; the wagons must be repaired so he established a repair shop. The emphasis laid upon industrial education has been a great factor in the progress of the Negro in America.

The spirit of Christ has triumphed over the spirit of prejudice and intolerance, and as a result the Negroes in America are making progress.

**Old Legends Tell of**

**Men Who Lived Long**

A belief in the longevity of the human race, at an early period of the world, was the natural product of the feeling of the ancients that they were superior to each other, as well as to a desire to live as long as possible. In every religion of every period there have been men who lived for almost unknown ages.

In the Hebrew books Methuselah lived for about a thousand years, but his years are tame and insignificant when compared to some of the ancients. On this subject the Hebrews' imagination failed miserably when compared to the imaginings of the Hindus.

We find in the Hindu bibles bold statements that during the early periods of the earth the average life of man was 80,000 years, and that Holy men often lived for a hundred thousand years.

Of one king whose name was Yudhishtir, it is carelessly remarked that his years were only 27,000, while another king named Alarka reigned only 66,000 years, both being cut off before their prime, because at that period many men were living to be about a million years old.

The most remarkable case in Indian history was a saintly old fellow who lived in such a pure and virtuous way that his days upon this earth were indeed many.

He was two million years old when he first became king and he reigned 6,300,000 years before he abdicated, after which he lingered for one hundred and some odd years before becoming the first saint of which we know.

He went to heaven from the top of a mountain named Ashtapada in a fiery cloud.

**King's Power Nominal**

In England the veto is a remnant of the more extensive power formerly exercised by the king, but which has gradually been cut down until only the negative power of disapproval is left. Since 1708 the right has never been exercised. Nonuse, however, does not imply that the power does not exist at the present time, although the system of responsible cabinet government makes its use out of place.

ABSOLUTE.....

**AUCTION SALE**  
**100 CHOICE BUILDING LOTS**  
**AND SMALL TRACTS OF LAND**

**Smut Diseases**  
**Cause Big Loss**

Variety Known as Markton  
Discovered to Be Immune  
From Ailment.

(Prepared by the United States Department of Agriculture.)

An effort to supply farmers of the oat-producing areas with varieties of oats immune from or highly resistant to the smut diseases, which are very widespread and cause annual heavy losses to the crops, has been given encouraging impetus by the discovery recently of a variety immune from covered smut. The immune variety, known as Markton, is a selection from an unnamed variety of oats with yellowish kernels, obtained from Turkey about twenty years ago. It has been tested at the Oregon and Washington stations, where it has not only proved to be immune from covered smut, but has also shown the highest yielding ability of any variety tested at these stations. The discovery of immunity from covered smut in a variety with desirable kernel characteristic in combination with high yielding power is a decided step toward a solution of the smut problem in oats.

**Reduction of Crop.**

In 1923 the smut diseases caused an annual reduction in the total oat crop of the United States estimated at 35,278,000 bushels, or 2.55 per cent. This percentage of reduction varies in different sections, amounting to as much as 10 per cent in Kentucky, 8 per cent in Massachusetts and Arkansas, between 5 and 6 per cent in Virginia, South Carolina, Georgia, Illinois and Minnesota. Iowa, the greatest oat-producing state in point of total bushels produced, suffered a loss of 1 per cent, which means a loss of more than 2,000,000 bushels. Oregon, where the immune variety Markton has been grown commercially, showed no loss in 1923.

**Greatly Reduce Loss.**

Hybrids of the Markton variety have been developed by the United States Department of Agriculture by crossing with it a number of the best standard varieties. These have been sent to four leading agricultural experiment stations in the oat-producing areas, where they will be tested for their resistance to the disease. Marked and satisfactory progress has been made by plant breeders in developing varieties of cereals which are resistant to various diseases, and it is hoped that the annual loss to the oat crop from smut diseases will be greatly reduced by subsequent development of resistant varieties.

**Practical Suggestions**  
**to Keep Calves Growing**

The calf should be left with its dam two to four days and get the colostrum or "first milk." Then it can be fed two to five pounds of the dam's milk three times daily, which is preferable to feeding larger amounts twice a day. Grain and hay can be offered when the calf is ten days old. Keep the feeding utensils, manger and calf pen scrupulously clean and the calf comfortable and thrifty. Substitute one pound of skim milk for one pound of whole milk daily until the calf gets all skim milk, and then feed six to ten pounds twice a day. Gradually increase the amount of hay and grain and add the finer parts of silage if available after the calf is six to eight weeks old. See that the calf has free access to fresh water and salt. Do everything that will encourage a most thrifty growth. Keep the calf free from lice and protected as much as possible from lice, flies, and other annoyances.

Continue feeding skim milk if available. Good roughage like clover and alfalfa hay and a good quality of silage tends to keep calves growing best during the first summer. Good pasture may be substituted for silage if calves can be turned into shaded paddocks or out only nights. Feed enough grain to keep the calves in nice condition of flesh, which insures a good rate of growth.

**Cucumber Beetles Most**  
**Destructive of Pests**

Striped cucumber beetles, the most destructive pests of cucumbers, melons, squashes and other vine plants, are readily controlled by dusting the young plants with a mixture of one part of calcium arsenate and 20 parts of gypsum, according to Dr. Carl J. Drake, Iowa State college.

Dust the young plants when they first come up and follow with two or three applications per week and again after every rain. Ten to twelve applications during the season will usually hold the beetles in check.

The dust may be applied with a shaker made by punching holes in the bottom of a small can with an 8-penny nail, or may simply be scattered by hand. Circular No. 90, which describes in detail the common melon and cucumber insects and gives control measures for each, may be secured on request from the Bulletin Section, Iowa State College, Ames, Iowa.

**Feed for Dairy Cattle**

Soy-bean meal proved to be fully as valuable as oilmeal as a feed for dairy cattle in an experiment conducted recently at South Dakota State college. Feeding soy-bean meal in moderate quantities did not have a damaging effect on the butter made from the milk, although if fed in excess it has a tendency to produce a soft, salty butter.

## TANEYTOWN LOCALS

Items of news from town, or vicinity are always wanted for this column. Special accidents, sales of real estate, fires, important happenings, visits to or from the community social events, and all matters of general interest to those at home, and away from home.

Miss Mary Brining is visiting friends in Boonsboro

Miss Virginia Miller, of Pittsburg, Pa., is visiting at the home of George K. Duttera and family.

Mr. and Mrs. Nace Stem, of Williamsport, spent Sunday afternoon, with Mr. and Mrs. John W. Stouffer.

Clarence Eckard, wife and son, John and Norman Eckard, wife and children, motored to Pen-Mar, on Sunday afternoon.

Mrs. C. M. Benner, who was operated on at the Frederick City Hospital, last Thursday, is getting along very nicely.

Mr. and Mrs. John Bower, of Hanover, Pa., spent Sunday with Mr. and Mrs. William Bricker and other friends in town.

Mr. and Mrs. William Naill have taken two of their children to a Baltimore Hospital for the removal of their tonsils.

Mr. and Mrs. Gus Crabbs and Mr. and Mrs. Oscar Sell were among the number that spent Sunday at Tolchester Beach.

Miss Clara Reindollar, of Baltimore, is spending some time with Mr. and Mrs. M. A. Koons and other friends in town.

Charles L. Stonesifer, Kenneth Koutz and Edward Morelock, spent Sunday at Bay Shore, and enjoyed a dip in the Bay.

Robert S. Reindollar and family, and Miss L. Ada Reindollar, of Fairfield, Pa., were visitors at Harry I. Reindollar's, last Sunday.

Robert, son of Mr. and Mrs. Ernest Bankard, was taken to Union Bridge, on Sunday afternoon, and had his adenoids and tonsils removed.

Mr. and Mrs. Charles Albaugh and children, of Walkersville, spent Monday evening with Mrs. Albaugh's mother, Mrs. Minervia Harman.

Hampstead now has a band that has been named the "P. O. S. of A." band. It has 25 pieces and is under the leadership of N. Vernon Hoffacker.

Mr. and Mrs. Wesley Shoemaker, spent the week-end with Mr. and Mrs. Guy Ditto, at College Park, and also spent some time in Washington.

Mr. and Mrs. Steiner Englebrecht, Mrs. Helen Englebrecht and Buddie Harman, spent the week-end with George Nau and wife, at Carlisle, Pa.

Mrs. John Shreeve and daughter, Miss Margaret, left on Saturday morning, for Cleveland, Ohio, to visit her son, Philip Shreeve, wife and family.

Mr. and Mrs. Birnie W. Fair and son, Theodore, Mrs. Margaret Rentzell and Mrs. Laura Vaughn, visited friends in Hagerstown, last Sunday.

Maryland weather may be afflicted with too much variety and too many extremes—but we do have a very large number of perfect days, and no earthquakes.

Emmitsburg is complaining of a big crop of mosquitoes this summer. Taneytown, for some reason, has suffered less from the pests than during other years.

The contract cost of the Taneytown school building is reported to be \$46,000. The building is expected to be finished, ready for occupancy, about January 1.

Mr. and Mrs. Jesse W. Fuss and daughter, Pauline, and Mr. and Mrs. Willis R. Zumbun, of McKinsty's, spent last Sunday at the home of Mr. and Mrs. P. B. Englar.

Mrs. M. A. Koons spent several days last week with her sister, Mrs. Charles Eyley and other friends in Baltimore, and on Friday attended a Convention at Love Point.

Percy V. Putman, of Asheville, N. C., arrived home on a two week's vacation, last week. He met with what might have been a very serious accident, Monday morning, when he went to his garage to get his car, and while attempting to crank the car, not knowing it was in gear, the car ran forward, the bumper mashing one leg against the brick wall, tearing a gash in the skin nine inches long and tearing the calf of the leg from the bone; but fortunately the bone was not broken. The wound, required eleven stitches to close it. Fortunately Mr. Putman had one leg inside the bumper, or both legs would have been caught. He is resting as well as can be expected at this time.

George Wilbur Shipley, Jr., is visiting his grand-parents, Rev. and Mrs. G. Wilbur Shipley.

Mr. and Mrs. Geo. I. Harman had as their guests, Wednesday and Thursday of last week, Mr. and Mrs. A. S. Dorsey, of Manitoba, Canada, a half-sister of Mrs. Harman.

Mr. and Mrs. Jacob Null and daughter, Grace, and son, Hubert, spent Sunday with Miss Gladys Zepp, at College Park, and Mr. and Mrs. Charles Watson, of Mt. Rainier, near Washington.

Mr. and Mrs. Harold Mehring entertained, to supper, Saturday evening, Mr. and Mrs. Harry Veit, son, Theron, Dr. Percy Mehring, of Philadelphia, and Mr. and Mrs. David Mehring and son, Wilbur.

Mr. and Mrs. George L. Harner and Mr. and Mrs. Clarence E. Dern, visited Mr. and Mrs. W. O. Ibach, at Salona, Pa., on Sunday. Clarence Ibach accompanied them home to spend some time here.

A letter to the Editor from Rev. Wm. E. Wheeler, D. D., Atchison, Kansas, says: "I am taking my vacation this year up in Minnesota, where the fish are as big as sharks wait to be pulled out from the water. Am going to drive up and spend four weeks at this sort of thing."

The Editor received a Post Card, this week, from Prof. H. E. Slagen, who is touring Great Britain and France, accompanied by his wife. The card is dated at Chester, Wales. He says "We will attend the world Federation of Educational Associations, at Edinburg, Scotland, July 20-28."

Large reflector danger signals were erected here at the railroad crossing approaches, on Monday. These reflectors are lighted up by the headlights of approaching cars. These signals are being placed at all extra dangerous places along the state roads—railroad crossings, curves, crossroads, etc.

Mr. and Mrs. D. M. Mehring entertained, on Sunday: Mr. and Mrs. Harry Veit, son Theron, Dr. Percy Mehring, of Philadelphia; Mr. and Mrs. William Mehring, son, Luther; Mr. and Mrs. Samuel Mehring, Miss Mary Reindollar, Mr. and Mrs. Norman Baumgardner and daughter, Mr. and Mrs. Harold Mehring and family.

The visitors at the home of Theodore Warner, on Sunday, were: Mr. and Mrs. John Warner, of York; Mr. and Mrs. Howard Diehl and children, Emma and Ervin, of Abbotstown; Mr. and Mrs. Eugene Pence and daughter, Ruth; Mrs. Henry Erb, George Diehl, Edward Warner, Erwin Stambaugh, Mr. and Mrs. George Brown and children, Milton, Arlene and Viola.

C. E. Easterday, local manager of the Union Bridge Electric plant, the majority of the stock of which has been sold to the Potomac-Edison Co., was here last Saturday and bought quite a lot of the old stock at \$15.00, par value \$10.00. Mr. Easterday thinks the new ownership will mean better service in the future. A considerable amount of this stock had been bought up, some time ago, at a small advance above par.

Those who spent Monday evening at Geo. I. Harman's were: Harry Lambert, John Harman and wife, of Taneytown; Mrs. Carl Johnson, and Miss Doris Myers, of town, and Miss Ruth Reifsnider, of Union Bridge; Miss Alice Adelsberger, of Emmitsburg; Franklin Ohler, of town; Mr. and Mrs. Harry E. Clabaugh and daughter, Wilhemina, of Ladiesburg; Mr. and Mrs. Maurice E. Clabaugh and daughter, Pauline, and sons, Melvin, Lester and Stanley, of Middleburg.

Lachlan McArthur Cattanaeh, of Baltimore, Md., graduated from the Medical School of Johns Hopkins University, receiving his degree on June 9. On Oct. 1 he begins a two year internship in the department of surgery in the University of Virginia at Charlottesville, Va. Dr. Cattanaeh has been engaged for the summer as the camp doctor and instructor in first aid in Camp Acahela, the Boy Scout Camp of the Ywoming Valley Council of Boy Scouts, located near Wilkes-Barre and will be in camp from June 18 to Aug. 18.

Mr. and Mrs. Charles Zeigler, Mrs. Anna Brown, Miss Elizabeth Kiser, Master Charles Brown, of York, Pa.; Mr. and Mrs. C. J. Tanner, Mr. and Mrs. Leon Tanner, Mr. and Mrs. Robert Imhoff and daughter, Ruth, Miss Bessie Arnold, Miss Katherine Tanner, Leon, Elsworth, Eugene, Sherman and Helen Tanner, of Mt. Washington, Baltimore; Mr. and Mrs. Loy Harman and family, Mr. and Mrs. David Harman, Mr. Edgar Harman, of Morris Plains, New Jersey; and Miss Alice Harman, Taneytown, spent Sunday at the home of Mr. and Mrs. Wm. T. Kiser and family.

Frank Harman has been on the sick list, since Sunday.

E. T. Ritter, of Hagerstown, visited several days at the U. B. Parsonage this week.

Dr. Artie Angell, of Baltimore, is spending ten days with his mother, Mrs. Nathan Angell.

Mrs. M. C. Fuss and daughter, visited her parents, in Littlestown, several days this week.

Miss Ethel Wolfe, of Baltimore, is visiting her grand-parents, Mr. and Mrs. Chas. O. Fuss.

Clifford Ott, who has been quite ill, this week, threatened with appendicitis, is better this Friday morning.

Rev. W. V. Garrett has been elected Superintendent of Young People's work by the Carroll County S. S. Association.

Miss Elizabeth R. Elliot, Miss Leila Elliot and Mrs. Margaret Franquist, were visitors at Dr. Elliot's, several days this week.

A large number of Taneytown Odd Fellows are expected to attend the dedication of the Home, at Frederick, this Sunday afternoon.

Mr. and Mrs. Elvin D. Dern and daughter, Miss Oneida, of Athens, Ohio, and Miss Margie Baumgardner, of Dayton, are here on a visit to relatives.

A fire alarm was sounded on Thursday morning, due to a small oil-stove blaze at Sargent Bankard's. The fire was extinguished without the aid of the Fire Company.

The Ford automobile, recently stolen from Dr. N. A. Hitchcock, has been found in a woods near Reisters-town. The thief evidently wanted to go to Baltimore, and was afraid to try to sell the car.

A delegation of hooded Ku-Klux paraded our streets, Monday night, distributing circulars announcing a public meeting in the movie Theatre, Tuesday night. The meeting was well attended by the curious.

Earl Longly, of near Belair, a grand nephew of Mrs. Hezekiah Hawk, met with an accident on Wednesday which resulted in his death. Mrs. Hawk went to Baltimore to attend the funeral, which will be held on Saturday.

Three girls from Carroll County, left, Monday, to spend ten days at Camp Royal, Edgewater, Md. Two of them—Hazel Hess and Ruth Young—were sent by the Taneytown Lutheran S. S.; the other by the M. E. Church, Westminster. There are eighty girls at the Camp.

### CHURCH NOTICES.

### A DAY'S WORK

Sinclair Lewis relates the following incident. An English brother of the craft remarked that he had spent a very busy day correcting the proofs of his new essay.

"Make any changes?" asked Lewis. "I made one very important change. I took out a comma."

The American smiled. "And is that all you did today, take out a comma?" "Oh, no," said the other. "After deep reflection I put the comma back." —Boston Transcript.

## KEYSVILLE PIC-NIC

Music all-day and in the evening by the famous

DETOUR BAND. 7-24-2t

## Maryland Farms FOR SALE

Guaranteed to the End of Time.

Splendid farm lands are for sale, and prices are not extreme, but rather much lower than one would expect, considering all the advantages offered.

The large cities and resorts are easily and quickly reached; railroads and motor bus service is excellent, giving easy access to all markets.

HOSPITABLE.

Our people are kindly disposed, hospitable and giving a cordial welcome to the new comer, and he is made to feel at home here.

IMPROVEMENTS.

Since the war of the sixties, Maryland has steadily improved, disposing of the old slave holders and wild animals, and made the fields to bring forth two blades of grass where one used to grow. However, improvements are being made, and have been to the road system; and as stated above, Maryland has gradually come to the front and stands second to none.

D. W. GARNER,  
REAL ESTATE BROKER,  
TANEYTOWN, MD.

## New Theatre PHOTO-PLAYS

SATURDAY, JULY 25th.

REGINALD BARKER'S PRODUCTION

"The Dixie Handicap"

WITH

CLAIRE WINDSOR,

FRANK HEENAM,

FLOYD HUGHES.

A true blue story of the blue grass country. A story of Kentucky thoroughbreds. Hits the dramatic stretch in nothing flat. It's a sure bet.

A story of the sweepstakes and the love stakes. A bit o' the old turf.

A drama of flying hoofs and throbbing hearts.

The horse's heels clicked to the melody of Virginia's romance. Screened at the Latonia tracks.

COMEDY

"Uncle Sam"

THURSDAY, JULY 30th.

PARAMOUNT PRESENTS

RICHARD DIX

—IN—

"Manhattan"

COMEDY—LARRY SEMON

"Hindoos and Hazards"
