

## PHONE RATES GOOD FOR SIX MONTHS.

### Future Rates May be Affected by Needed Expansion.

Present telephone rates will be given "a further trial of at least six months" to determine if the Company can provide necessary expansion with the revenue thus derived, it was stated in the annual report of the Chesapeake and Potomac Telephone Company, filed with the Public Service Commission on Monday.

The report stated required extensions and improvements of the system which are to be made this year will necessitate a considerable outlay of money, which might affect future rates.

The report stated, in part: "As to future telephone rates the pace at which the company is being called upon to make additions and replacements of property and the financial effort of caring for this program will be the determining factors."

"The labor and material cost involved in this work continue at the high levels of recent years, and as the older portions of the plant installed at pre-war prices become a smaller proportion of the total system the average investment back of each telephone is steadily increasing."

The company's most serious concern, according to President A. E. Berry, "is not for the past, but for the future." He said:

"We must continue the expansion of the system with heavy capital expenditures if we are to meet the public's demand for service, and this will have the almost certain effect of reducing the return on the business during the year 1926 and thereafter."

The net return on the property for 1925 was 5.83 percent, according to the report. Gross capital expenditures during 1925 amounted to \$5,782,273, and as plant retirements were charged against this the net additions to the property during the year amounted to \$3,645,984.

### Shall I Use Sale Bills?

Every year, this question is asked by those who will have a public sale of stock and implements, and we invariably say, "yes." At first thought, this is apt to represent our selfish interest. As a matter of fact, we do not figure that we make any money on sale bills; when busy with other work, it certainly does not pay us to take up our time printing the bills, so, the advice does not wholly represent self-interest, but is actually backed by our honest opinion, for the interests of those having sales.

Sale bills pay, if they are handled right. We know all about the argument that "they are hung up, and get covered up" in very many cases; but, they cost too little for anybody to hesitate much about the investment. Of course, everybody should advertise in the Record, first of all; but, the sale bill properly used, is still a good investment.

They should be sent far on the outside points—outside of the largest circulation of the newspaper advertising. Ten or even twenty miles is not too far away, in these days of the automobile; and they should go especially into towns that have no newspapers, and to small village stores and shops, where they are looked over more than some think.

Sale bills, for a sale near Taneytown should be sent to such points as Silver Run, Union Mills, Pleasant Valley, Mayberry, Detour, Rocky Ridge, Motters, Linwood, Two Taverns, Bonneville, Keysville, Frizellburg, Uniontown, New Midway, Ladiesburg, Liberty, Johnsville, and even to the larger places like Union Bridge, Emmitsburg, Littlestown, Manchester, Hampstead, Thurmont and New Windsor.

### Late Items Especially Wanted.

It very frequently happens that our correspondents send in their weekly letter about the middle of the week, then later in the week something important occurs that does not get sent in, or if at all, a week later.

We would appreciate it very much if correspondents would send us second letters, just so they reach us on Friday morning, or telephone at our expense, such items as deaths of well known persons, or other important single items of news. We desire real news, up to the latest minute.

When making a phone call, on which there is a toll charge, we will be glad to send the amount to the correspondent by mail.

### Revised List of Jurors.

Revised list of Jurors as drawn by Chief Judge Parke. Reuben H. Alexander, Calvin T. Fringer, Charles J. Maus, William Arthur, John F. Maus, Charles M. Kay, Ivan H. Sayers, Emil Amos Ruch, Conrad T. Hersh, Frank H. Miller, Harvey S. Wineholt, Nicholas S. Hill, Wm. H. Hutting, Ernest J. Sponseller, D. Snider Babylon, E. Sterling Brown, John J. Brehm, Thomas G. Hoffman, Upton F. Mehring, Charles W. Moore, Charles H. Cartzendafner, Guy S. La-Forge, George W. Clay, and Ralph E. Benson.

England, with her love for open fire places, consumes three times as much coal per capita, for domestic purposes, as does Germany with closed stoves.

## SPECIAL C. E. PROGRAM.

Held in Lutheran Church Three Nights this Week.

The C. E. Society of the Lutheran Church presented three programs this week, marking the Christian Endeavor Founding Anniversary week—Tuesday, Wednesday, and this Friday night—which so far have been largely attended.

On Tuesday night, the famous male quartet of Gettysburg Theological Seminary had entire charge. The members were, Messrs. Perry, Robinson, and two brothers—Simon, with Mr. Yost, organist. Their program was high-class in every particular. They have filled radio engagements, as well as with the Victor Talking Machine Co. Rev. Simon gave a talk on "Gettysburg College," and Rev. Perry on "What It Means to be a Christian." The voluntary offering amounted to over \$37.00.

The services on Wednesday night were greatly interfered with by the snow and wind that nearly approached a blizzard; but the speaker, Rev. J. S. Hollenbach, pastor of Manchester Reformed Church, bravely kept his engagement, and those who turned out were amply repaid by hearing the excellent address he gave. Merwyn C. Fuss, president of the County C. E. Union, presided.

This Friday night, Rev. Philip Bower, pastor of Elias Lutheran Church, Emmitsburg, will address the meeting, and the Union Bridge quartet will render a number of special selections. This will be a meeting well worth attending by all members of Christian Endeavor, and the public generally.

### An Urgent Appeal.

An urgent appeal for help for children and women under care of the Near East Relief is made by Harold F. Pellegrin, Maryland Director, following receipt of cable gram from several sections of the relief work.

From Barclay Archeson, Director General of Overseas work, comes this appeal:

"Critical situation greatly intensified by winter weather; the chains between the foothills of Mount Hermon and Lebanon are again echoing with the beseeching cries of children."

From the Governor of a Macedonian province:

"Utterly impossible for refugees to live through the winter without continued and immediate help; especially families having come recently from Turkey, who needs everything."

From Salonica: "It is roughly estimated that in Salonica alone there are 80,000 widows and children—an army of unfortunates."

Many of these women and children are in rags without food or heat in deep snows. Mr. Pellegrin asks that emergency subscriptions be made for them as quickly as possible and that all checks or registered letters be sent to Maryland Headquarters, 14 W. Franklin St., Baltimore, Md.

### Takes Course in Bee-keeping.

Rockward Nusbäum, our well known bee man, attended the advanced bee-keeping short course at Cornell University, Ithaca, N. Y. He reports having had a most interesting visit with the New York, Pa., and Ohio bee-keepers. The lectures and demonstrations continued throughout the week. Mr. Nusbäum was entertained by the bee experts who were here last summer making a study of the bee louse.

He was called upon to discuss his methods in keeping bees commercially and we are quite sure he could hold his own in any discussion pertaining to bees. In announcing a two minute speech at the banquet, the King Bee toastmaster dubbed him as being "the best bee-keeper and the loudest bee-keeper in America." The lavish entertainment in typical Cornell style impressed Mr. Nusbäum, especially stunt night, the bee-keepers banquet and the grand ball.

### Farmers Warned on Clover Seed.

College Park, Md.—Unless farmers can be sure of the source of their red clover seed this spring they had best plant a mixture of alsike clover and alfalfa, according to J. E. Metzger, agronomist for the University of Maryland experiment station.

There have been so many failures with the red clover crop in recent years.

As a result, rather exhaustive trials have been conducted by many State experiment stations in co-operation with the United States Department of Agriculture to locate the cause of the trouble, says Mr. Metzger.

Recent reports on these tests, in which seed from many domestic and foreign sources was used, show that red clover seed produced in Tennessee and Ohio gave slightly better crops than Maryland seed. Minnesota-grown seed, however, produced less than half as much as seed from nearby sources. In fact, Maryland red clover seed produced as well in Michigan and Ohio as seed grown in those States.

Seed from Maryland or nearby States is recommended whenever it is available. If it cannot be obtained from these sources, a mixture of alsike clover and alfalfa is suggested as likely to be more satisfactory than poor quality red clover.

## PUBLIC SCHOOL PROPERTY FIGURES.

### A Big Increase Shown in the State Since 1922.

Maryland public school property on last July 31 was worth \$33,623,000, according to an estimate by the State Department of Education.

Of this amount the estimated value of property in use by white pupils was \$30,447,000, and by colored pupils \$3,176,000. Property in the counties which was used by white pupils was valued at \$14,104,000, and that used by colored pupils \$843,000. In Baltimore the worth of property used by white pupils aggregated \$16,343,000, and by colored pupils \$2,333,000.

The valuation of \$33,623,000 for public school properties throughout the State last year is an increase of \$13,169,354 over the 1922 figure, the Department of Education records show.

During the last three years the value of public school properties in this State increased sixty-five percent, the records show. The average per pupil for Maryland in 1925 was the same as the average for all the States in 1922.

The average value of property per pupil used by white students "belonging" in the counties was \$124 last year, the amount ranging from \$249 in Allegany county, to \$48 in Dorchester county.

For the county colored pupils "belonging," the average value of school property was \$32, ranging from \$256 in Allegany, to \$14 in Dorchester county, and to \$8 in Howard county. The latter counties rent much of the property used in the education of colored children.

In Baltimore city the value of property used by white pupils "belonging" was \$199, and by colored pupils \$139. The value of school property per pupil in Baltimore was exceeded in the counties only by Allegany.

During the year ended July 31, 1925, capital outlay expenditures in the counties reached \$2,528,000—the largest amount ever expended by Maryland counties in any year. In Baltimore the amount disbursed—\$3,225,000—was less than the amount expended in either of the two preceding years.

In the counties \$99,700 was expended for land, \$2,250,200 for new buildings and their equipment, \$173,300 for alteration and equipment of old buildings and \$4,700 for other capital outlay costs. The purchase of land in Baltimore cost \$224,000; new buildings, \$2,996, and equipment, \$1,035,000.

Of the total county expenditure \$1,217,500 was used by the white elementary schools, \$1,170,100 for white high schools and \$110,500 for colored schools. The larger elementary schools having at least three teachers required \$1,007,000 of the expenditure for white elementary schools, leaving \$165,000 for two-teacher schools and \$46,000 for one-room buildings.

### Proceedings of the Orphans' Court.

Monday, Feb. 1, 1926—Arthur C. Brown, executor of Lloyd Brown, deceased, reported sale of personal property and settled his second and final account.

Thaddeus A. Wastler, administrator of William H. Englar, deceased, returned inventory of current money and settled his first and final account.

John J. Cookson, executor of Joseph Cookson, deceased, returned inventory debts due, reported sale of personal property and settled his first and final account.

The last will and testament of Charles M. Schaeffer, deceased, was duly admitted to probate and letters testamentary thereon were granted unto Ida L. Schaeffer, who received warrant to appraise personal property and order to notify creditors.

Linnie E. Snyder, administratrix of John E. Snyder, deceased, settled her first and final account.

Tuesday, Feb. 2, 1926—Laura J. Taylor, administratrix of David E. Taylor, deceased, returned inventory debts due.

Edward J. Rinehart and William C. Rinehart, surviving executors of Israel C. Rinehart, deceased, settled their second and final account.

Mandilla C. Brillhart, executrix of Michael S. Brillhart, deceased, received order to transfer stock.

Letters of administration on the estate of Lewis V. Phillips, deceased, were granted unto William C. Phillips, who returned inventory of debts due.

Edward O. Weant, executor of Jno. T. Strevig, deceased, settled his first and final account.

William C. Rinehart, administrator with the will annexed of Lucinda Rinehart, deceased, reported sale of personal property settled his first and final account and received order to transfer stocks.

Joseph D. Brooks, administrator of Elizabeth Bruce, deceased, settled his first and final account.

Calvin E. Cook and Clifton J. Cook, executors of Eliza Cook, deceased, settled their first and final account.

Calvin E. Cook and Clifton J. Cook, administrators of Rezin F. Cook, deceased, reported sale of personal property and settled their first and final account.

## WESTERN MD. COLLEGE.

### Successfully Completes its Campaign for \$625,000.

The authorities of Western Maryland College announce the successful completion of their campaign for \$625,000. \$125,000 of this amount was appropriated by the last Legislature of Maryland on the condition that the college should raise additional endowment of \$250,000. The Rockefeller Foundation made a pledge of \$125,000 conditioned on the college raising \$375,000 for endowment. The appropriation by the State is for a new building, while the Rockefeller gift is for endowment. The successful conclusion of the campaign means that \$500,000 will be added to the endowment fund of Western Maryland College, and a new building erected on the campus.

The making of a greater Western Maryland College is assured. The college has had an enviable success from its very beginnings, and with these added resources the future is very bright for this institution. A revision of the curriculum is being worked out and will be announced within a few weeks. This revision will raise the standards of the institution considerably, making it possible for the work given at Western Maryland College to be done as efficiently as in any other institution.

The friends of the college are to be congratulated upon the success of a campaign which means so much for the college and for its service to the State and to the Nation.

Western Maryland College has taken a lead in the State of Maryland in the preparation of high school teachers. The work done in this department will be carried forward even more efficiently. Western Maryland College meets the highest requirements in education, not only in the State of Maryland, but in all surrounding States. But the work offered in the other departments, preparing for all the professions, will be of the highest standards also. The aim of the institution is to provide the courses in a Liberal Arts College of high grade that prepare for admission into the graduate and professional schools of the highest standards. It is proposed to establish in Western Maryland College educational advantages equal to those offered anywhere. The citizens of the State at large have the grateful thanks of all friends of the college for their generous gifts in making possible the fine achievements of this campaign.

A. N. WARD, President.

### Frederick County Snow Blockade.

Frederick, Feb. 4.—This county is slowly recovering from the worst blizzard of the winter. After having removed huge drifts that tied up traffic on the State roads, shifting winds this afternoon blew back the snow and it will probably be two days until all highways are opened. No cars have passed over the Middletown and Jefferson divisions of the Hagerstown and Frederick trolley road since last night, although the Middletown division is expected to be opened tomorrow. The Thurmont division was opened today.

No attempt may be made to open the county roads for the present. The County Commissioners announced today that no funds are available for road work and that future accounts will not be paid until after the next levy in July. Because of this there is little likelihood that the dirt roads will be opened except by the persons whose farms line these highways.

Balt. Sun.

### A Steer on Rampage.

Excitement was caused at the farm of Altona C. Shafer, Rockville, south of Middletown, when Mr. Shafer together with several other men, attempted to kill one of Mr. Shafer's steers, which suddenly appeared to be of the opinion that it belonged to a wild west show.

The steer could not be approached close enough to effect its capture and dashed madly up and down the roads attacking everyone and everything in general. In an attack on the fenders the car was badly damaged and the machine came near being upset.

Albert Nichols, colored, who was employed by Mr. Shafer, was thrown by the steer, as well as Edward Boyer, who was not nimble enough to keep out of the animal's way.

The animal was finally run down and killed on the farm of Walter Poole, about a mile away from the Shafer farm, after two shots had taken out both of the animal's eyes.

—Frederick News.

### Shake-up at Gettysburg College.

Gettysburg College authorities have expelled thirty-seven students, and twelve others may be expelled after all of the marks for the first semester are tabulated. There is also a large number who have been placed on "probation."

No names have been given out, but it is said that a large number of the students are members of the football, basket-ball, other athletic teams which may be responsible for low scholastic standing.

### Agricultural Year Book.

Congressman J. Chas. Linthicum will be glad to send a copy of the latest Agricultural Year Book (1924 edition) to anyone interested in reading this valuable book. Representing a City District, he has few calls from his own constituents for this book. Address him—House of Representatives, Washington, D. C.

## RITCHIE CANDIDATE FOR RE-ELECTION.

### Reasons Announced for Seeking a Third-term Honor.

Governor Ritchie, in an address to the 11th. Ward Democratic Club, on Wednesday night, set aside all doubt as to his political desires by stating that he had decided to enter the Democratic primary for the nomination for Governor. He said in part:

"Maryland is the finest State I know, to live in, and no one could have a higher ambition than to be her Governor. It is not unnatural that I should feel that way, because, like my father and his forefathers for generations before him, I have lived in Maryland all of my life."

I have, however, been honored with the high office of Governor twice, and I told my friends in the counties and in Baltimore City who asked me to run again that I did not feel I had the right to do so without convincing evidence that the Democratic sentiment in the State was favorable of it.

I felt also, and so stated in Frederick last September, that I ought to give all others who might want to be candidates the fullest opportunity to come out and to develop sentiment for themselves.

I think that recent events in Baltimore City, where I have been honored by a public expression of confidence from many hundreds of representative citizens, and also in the counties, in most of which the leading organization and independent Democrats have united in asking me to run again, fully justify the decision I am making tonight.

As different questions arise from time to time I will state my position upon them. Tonight I simply want to summarize where I stand on what now appear to me to be the more important things of a State-wide nature. I will do this very briefly, but I hope so clearly that misunderstanding will not be possible.

It is hardly necessary to say that I am opposed to all encroachments by the Federal Government upon the rights of the State of Maryland and the liberties of our people.

I am opposed to the Volstead law as a State enforcement measure. I am opposed to the ratification of the Child Labor Amendment, because I believe that the welfare of the child is much better subserved if each State has the responsibility of passing its own needed legislation in conformity with its own labor conditions.

I am opposed to any action by this State approving a Federal Department of Education, or accepting for this State the provisions of any Act of Congress enabling the Federal Government to interfere, or to get a foothold here which may lead to interfering, with the free and unrestricted right of the people of Maryland to continue to educate their children in their own way as they have always done.

The State tax rate was 36 31/72 cents when I took office in 1920. This year it is slightly less than 27 1/3 cents, showing a reduction in seven years of 25 percent, the greatest reduction in any period since the Civil War. Every effort must be made to reduce the rate still further through the strictest economy consistent with the needs of the State.

The necessary measures must be adopted for the preservation and replenishment of Maryland oysters, crabs and fish. More has been done towards this end during the last few years than ever before. For the first time interests which were hostile for years have been brought into co-operation.

The aim of our State road program must be more, better and safer roads, and it must provide, among other things, for the elimination of railroad grade crossings on State highways under a fair and proper plan. The plan is being studied now and will, of course, be submitted to the public for constructive criticism.

The last six years have lifted the Maryland public schools from the rut they were in to a position which has made them notable everywhere in the country. Other States send here to study them now. Teacher training is the keynote.

There must be adequate development for the University of Maryland, including, of course, its agricultural activities, and for the smaller State colleges.

Suitable action must be taken to meet the situation which will result if Johns Hopkins University abandons its undergraduate courses. I conferred at length with Dr. Goodnow and the Hopkins trustees on this subject last April and have had it under consideration since. The proposition is difficult to work out, and it cannot be done until the Hopkins plans mature.

Experience and new conditions have made changes in the Public Service Commission law advisable for the protection of the public. The law must keep pace with these conditions. It does not believe in State ownership, because that generally means greater burdens on the people and less efficient service. But the only alternative to it is adequate and effective regulation.

There must be adequate facilities for the care of the prisoners, including the criminal insane, and for the care of the mentally afflicted, and particular study of the difficult and far-reaching problem presented by the feeble-minded.

## MARYLAND DAIRYMEN.

### Need Not Fear Competition from West, says Larrowe Institute.

The western farmer can never successfully compete with the eastern dairy farmer in the sale of milk in the eastern territory. Freight rates will always form a natural barrier to any big movement of milk from one section of the United States to another.

These are the twin contentions of Charles Staff, executive secretary of the Larrowe Institute of Animal Economics, in a hearing statement to the dairy farmers of this section. The statement is intended to counteract the pessimism current on the Atlantic seaboard as a result of the proposed erection of a huge pasteurizing plant at Newark, N. J., by the Sheffield Farms Company.

"There is nothing to justify the dark pessimism that prevails among the large number of eastern dairy farmers as a result of the opening of this new plant," says Mr. Staff in his statement. "Certain dairymen see in the coming of this plant a development for securing milk outside the metropolitan area with a view of breaking the hold which the eastern producer has on his natural outlet. The publication by railroads of a freight rate on milk from Chicago is also cited as evidence of the movement by those who fear that the difference in the cost of production between the two sections is represented by the difference in the freight rate and that the price level of the eastern producer will be brought down to the Middle West price level. Let us study the situation a little more carefully."

"What is the difference in the cost of production in the Middle West and in the East? Feed is a big factor. The freight rate from Chicago to New York on feed in carload lots is approximately 35 cents per cwt. A hundred pounds of feed is needed to produce 300 pounds of milk; consequently the freight rate on the feed necessary to produce 100 pounds of milk is not over 12 cents. Deducting this from the freight rate of \$1.14 per cwt. of milk leaves a comfortable margin of \$1.02 per cwt. of milk for other expenses. The hay and silage are produced on the farm; farm land is cheaper in Maryland than it is in the Middle West, and these roughages can be produced as cheaply if not cheaper than in the Middle West; labor is no higher in Maryland than it is in Michigan, Indiana, and Illinois; cows can be purchased or raised as cheaply in Maryland as in Middle West. A difference of about 12 cents per cwt. of milk in purchasing feed represents the entire difference in the cost of production in the Middle West and the heart of the eastern milk area. Besides a survey of milk prices in the East and West discloses that in many sections the eastern dairy farmer is getting less money for his milk than is the western farmer."

Good will is another factor that speaks against the possibility of bringing in milk from the Middle West by the Sheffield people, Mr. Staff says. "Dairymen frequently forget the high value that distributors place on the good will of their nearby producers. Theoretically it might be possible for a distributor to scour the country and pick up cheap milk but it is not practical. Milk distributors want a nearby and dependable supply and are generally willing to pay a fair price. They don't shop around and buy milk one week in one place and the next week somewhere else. It is absolutely necessary for them to have a reasonable assurance of the source of their milk supply from month to month, and they are not likely to depend on the uncertain supply of producers hundreds of miles away."

A Good Little Problem.

The following appeared in the Baltimore Sunday Sun, last Sunday. We commend it to the readers of the Record who like brain-twisters.

Smith did a little shopping for his wife at the department stores, and in describing his experience, says:

"Half of my money was gone in just thirty minutes, so I had left just as many cents as I originally had dollars, and but half as many dollars as I originally had cents. Then I bought our son Tommy a radio set, and that left me 99 cents to take back to the Missis."

What price was the radio set?

Good Prices for Antiques.

At the recent sale of personal property, in Frederick, of the late Emma Biser and Mary Wichter, some of the prices realized were as follows:

One tea not brought \$26.50, pitchers were sold for prices ranging from \$16 to \$20, a half dozen wineglasses netted \$10.50, one very old bedstead was sold for \$16, plates were sold for prices ranging from \$5 to \$10 apiece. The personal property alone netted \$654.

Marriage Licenses.

Charles Wesley Fritz and Laura Fisher, Poolesville, Md.  
Lester H. Myers and Mary Esther Hesson, Littlestown, Pa.  
Clarence M. Beaver and Susanna E. Caples, Westminster.  
Cleveland G. Knight and Myrtle E. Green, Patapsco, Md.  
John D. Harman and Esther Hoover, Union Bridge.  
Charles Edward Brenner and Grace Fuss, York, Pa.

There has been a decrease in U. S. Internal Revenue on high-priced cigars. The largest revenue is from "Class A" cigars retailing at 5c and less.

## THE CARROLL RECORD (NON-PARTISAN)

Published every Friday, at Taneytown, Md., by The Carroll Record Company.

P. B. ENGLAR, Editor and Manager.

BOARD OF DIRECTORS.  
G. A. ARNOLD, V. Pres. JOHN S. BOWER  
G. W. WILT, Sec'y. D. J. HESSON  
JAS. BUFFINGTON. P. B. ENGLAR

TERMS—Strictly cash in advance. One year, \$1.50; 8 months, \$1.00; 6 months, 75c; 4 months, 50c; 3 months, 40c; single copies, 3c.

The label on paper contains date to which the subscription has been paid.

All subscriptions will be discontinued on expiration, according to Governmental orders.

ADVERTISING rates will be given on application, after the character of the business has been definitely stated, together with information as to space, position, and length of contract. The publisher reserves the privilege of declining all offers for space.

All advertisements for 2nd, 3rd, 6th, and 7th pages must be in our office by Tuesday morning each week; otherwise, insertion cannot be guaranteed until the following week.

FRIDAY, FEBRUARY 5, 1926.  
Entered at Taneytown Postoffice as Second Class Matter.

All articles on this page are either original or properly credited. This has always been a fixed rule with this Office, and we suggest the adoption of it by our exchanges.

In the World Court—Right or Wrong.

Going into the World Court, by some, is considered much the same as going into war, National bankruptcy, chaos, and to the Devil generally. Those who take this view must believe Europe—or the rest of the world outside of the United States—is chiefly a hot-bed of devilry, planning specially to seduce this country into an orgy of world-wide war, death and horrors in general. To accept their point of view, there is no safety anywhere in the world, save in the United States; and for us to accept membership in the Court, or any agreement with England, France, Italy, or any other country, is but to guarantee being on the road to every condition that is dangerous.

Fortunately for the present at least comparatively few hold such horrific ideas. If the step is wrong, then the preponderance of wisdom in this country is wrong, and the few irrationals are right. If they are right, diplomacy and statesmanship in this country is at a low ebb indeed. So, we shall be compelled to wait and see what the future of the story will be.

The calamity howlers have done their best. If the country is on the road to destruction, it will not be the fault of the Reeds, Borahs, Bleases, Hursts, and a few others. Evidently, somebody is wrong. Somebody has burned the safety bridges back of them.

Equally emphatic Moses' have written their verdicts on both sides—and in the course of the years to come one side or the other will have the right to say "I told you so."

And, while we wait, we will be on the alert to continue doing all the business we can, with the God-forsaken nations. We will welcome their orders for merchandise and our products, and their cash for them. We want their trade, but no part in—let us say—trying to civilize them.

We want absolute freedom for our money-makers to go over there, and anywhere, but no part in helping to police the countries with which we trade. Literally, we want everything free and open, and one-sided—our side, and our way. We want all the profit we can get, but none of the responsibility attached to getting it. It is a nice vision, but one that we do not enforce, even at home. Perhaps, after all, the old Bible rule, still applies; if we would "reap," we must first "sow."

Mr. Weller or Mr. Hill.

The Record is not boosting any candidate for the Republican Senatorial nomination this Fall. This is a job out of our line. The battle will be between Senator Weller and Congressman John Philip Hill, from present indications; and because of our "on the fence" position perhaps it would be best becoming on our part not to say anything about it.

But, circumstances seem to appeal even to non-combatants, at times, and this is one of the "times," and this is one of the "circumstances." Mr. Hill in his eagerness to pull himself up by pulling Mr. Weller down, seems to be operating a campaign of telling how many "roll-calls" Mr. Weller has missed, the object being no doubt to show that the latter is not a good representative Senator.

Well, there are roll-calls and roll-calls; some of them unexpected, and some unimportant. We like the idea that a Senator should always be present in his seat, and on the alert; but, the people of a state make a great many demands on a Senator, and there are also many committee meetings. Some of these demands require a great deal of a Senator's time, so that he can not always be

in his seat, if he would look after the interests of his constituents.

Besides, considering the many long-winded, tiresome, and often merely obstructive, speeches made in the Senate by some Senators, there seems to be quite a bit of justification for members who want to do business, to become disgusted, and "play hooky" at times.

Another little thing that may be right and proper, but somehow it does not seem quite the right thing to do. These letters of Mr. Hill are sent out free, through the use of the "franking" privilege accorded to members of the House, presumably in the conduct of public business. Is it actually legitimate "public business" to prosecute a personal campaign for the nomination for Senator? It seems to us that this ought to be strictly a "private" expense.

No doubt Mr. Hill is following a general precedent in this plan of letter writing, but just the same it seems to us not quite the proper sort of ethics—campaigning at public expense—no matter by whom the plan may be practiced.

### School Attendance.

During the recent observance of National Education Week, the people were constantly told that they must help promote educational progress. But many of them do not know of any special thing they can attempt for the benefit of the schools, much as they would like to do something.

There is one very practical thing that all families having children in school can do, and it will accomplish more than almost anything else. And that one thing is to get their children to school every day except when they are sick, and get them there on time.

The idea is well established that people holding any kind of a job or position must go to work every business day unless they are sick. If they take days off to suit themselves for their various diversions, they would naturally expect that their employers would not care to employ them any longer.

It is the business of boys and girls of school age to go to school. The hours are easy, so that they can attend every day when school is in session, except in case of illness. There should be the same realization that they must attend in this regular way, as if they were holding down a job in some store or factory.

Irregular and unpunctual attendance hampers a school just as the operations of a factory or store are interfered with if people are absent. When anyone is absent from a class, time has to be taken to help that absent one make up the lost ground. This holds back a school. Families with children can get more of the worth of their money, if they stop taking their children out for trifling reasons. The schools of Frederick could do the same work in less time, or more work in the same time, if they could have as near 100 percent attendance as the health of the children will permit.—Frederick News.

### Absentee Congressmen.

Washington, D. C.—In regard to the absence of the members of the Senate and House of Representatives from the sessions of Congress, a clause from the Revised Statutes reads as follows:

"The Secretary of the Senate and sergeant-at-arms of the House, respectively, shall deduct from the monthly payments of each member or delegate the amount of his salary for each day that he has been absent from the Senate or House, respectively, unless such a member or delegate assigns as the reason for such absence the sickness of himself or some of his family."

(The probability is that there is a great deal of "sickness" in our legislature family, while Congress is in session.—Ed.)

### Concerning Drunken Drivers.

The drunken automobile driver is running wild the American Automobile Association has found in a nation wide survey.

Taking the position that such drivers should be treated as dangerous criminals, the association, in a statement declared the law-enforcement authorities seemed to be much more adept in fining motorists for trifling and technical traffic violations.

There were 967 convictions for drunken driving in Detroit during the first ten months of 1925, as compared with 292 convictions in New York in nine months, the statement said.

"This contrast is glaring," it continued. "It does not necessarily mean that there were more intoxicated drivers in Detroit than there were in New York. It may well mean that Detroit is more keenly alive to the seriousness of the offense."

"The same explanations may account for the fact that there were 526 convictions in Boston on this charge in 1925 and 293 in Washington, as

compared with 56 in Philadelphia for the first seven months of the year and 184 for the whole of the previous year. Otherwise we would have to assume that Detroit, Boston and the national capital are particularly notorious in this respect."

Thomas P. Henry, president of the association, said there were 732 such arrests in New York for the first nine months of last year, compared with 282 convictions; that the convictions in Philadelphia were even lower in proportion.—Exchange.

### Republicans Hope for Florida.

For some months Republican leaders have been playing with the idea that possibly Florida might be the first State to break the Democratic "Solid South." Northern immigration was the basis of that hope. Chairman Will Wood, of the Republican Congressional Committee, hails from Indiana, where politics is, in a manner of speaking, taught in the kindergarten. He has been down in Florida studying the situation. He is not as hopeful as he might be.

There are plenty of Northern Republicans there, but they are not interested in politics. Still, the optimistic Mr. Wood feels it may be possible to chip off a couple of congressional districts from the Democratic delegation this fall. He has hopes based on Miami's territory and that of the Tampa West Shore. Anyway, he is going to have a try at it, and it is not beyond the bounds of reason that one of these days the "Gentleman from Florida" may rise from his seat on the Republican side to address the House.—Phila. Ledger.

### Delicious Humor of

### Nye Fooled English

On the seventy-fifth anniversary of Bill Nye's birth, a tablet, a memorial window and a granite monument were unveiled at Fletcher, near Asheville, showing his quaint humor and lovable personality have not been forgotten.

At one time he served as postmaster at Laramie, Wyo., an appointment which incidentally brought forth his famous letter addressed to President Arthur and containing his resignation. In the letter he directed the President where to find everything, explaining that the postal cards he had read were carefully pigeonholed apart from the unread ones. He continued: "If Deacon Hayford does not pay up his box rent you might as well put his letters in the general delivery, and when Bob Head gets drunk and insists on a letter from one of his wives every day in the week, you can salute him through the box delivery window with an old Queen Anne tomahawk that you will find near the Etruscan water pail."

So tickled were the officials at Washington with this letter that they published it far and wide. To Nye's huge delight an English paper editorially commented in shocked amazement on the ways of American postmasters.

### Matter of Numbers

### Didn't Daunt "Uncle"

In a certain New England town there lived an eccentric individual whom everyone called "Uncle Lige." In his old age Uncle Lige "experienced religion," and one night he was asked to lead the prayer meeting.

As he could neither read nor write, the request might easily have daunted him had he been a less courageous man. But Uncle Lige was not one to be daunted.

Very solemnly he rose, and drawing his unusually tall form to its greatest height, he said:

"Brethren, sing the one thousandth Psalm."

After a silence, broken only by an occasional titter, someone said, "There aren't as many as that."

"Sing as many as there be, then!" thundered Uncle Lige.

### Wanted Information

A lecture was being delivered in a village hall. The folly of every form of gambling was to be exposed once and forever!

The chief speaker, stamping up and down the platform, specially erected for the occasion, launched forth into the very heights of rhetoric.

"Behold the serpent of gambling!" he shouted. "See his hungry fangs, ready to strike! But I will crush him!"

Down came his heel upon the imaginary viper. There was a rending of timbers and the speaker disappeared.

It was a select audience, however, and not a titter was heard as he scrambled into view. But the voice of a small boy broke the awful silence.

"Please, mister," he asked, meekly, "have you killed the serpent?"

### Local Pride

will induce you to try Rein-o-la Laying Mash—the good results will keep you a regular feeder of it. It actually does all we claim. Contains high-grade beef scraps—no tankage. Makes all the difference between profit and loss. A trial is convincing—Reindollar Bros. & Co. 10-16-tf

## Small Grain Seeded to Withstand Frost

### Order of Resistance Wheat, Oats and Barley.

Observations made at the Nebraska experiment station and reported in Bulletin 201 show that the order of spring frost resistance is spring wheat, oats and barley. The Nebraska station agronomists suggest, therefore, that the grain be seeded in that order. At the Nebraska station, at Lincoln, the best results have been secured by seeding small grain during the last week in March or the first week in April. Eastern Nebraska corresponds in season to much of Iowa and Illinois and other middle-western states, and the Nebraska recommendations ought to be of interest to farmers throughout the Middle West.

Results at the Nebraska station indicate that the best rates of seeding per acre are eight to ten pecks for oats, six pecks for spring wheat and eight to ten pecks for barley. Little difference in yield was found between broadcasting and drilling.

From the standpoint of using the grains as nurse crops, the average date of ripening is of interest. At the Nebraska station, barley has ripened earlier than any other spring grain, the average date for barley being from July 2 to 4. Early oats has, on the average, ripened about July 7, spring wheat about July 10 to 13, and late oats on July 14. When grown as a nurse crop, barley thus has an advantage of several days over other spring grains.

The Nebraska agronomists found that whenever a good quality of grain is obtained from the threshing machine free of noxious weed seeds or trash, fanning or grading is not regarded as important in preparation for seeding. Use of an established treatment for smut is always desirable, and especially when smut is known to have appeared in the preceding crop.

### Milk House Is Decided

### Advantage to Dairyman

A milk house on the dairy farm properly fitted with separator, tester, hot and cold water and ice box with sink and drains is a decided advantage to the dairyman, but many of us are unable to afford such equipment. Many of us have milk houses supplied with well water but may not have ice. An ice house with ice supply is a thing to look forward to but without one it is necessary to keep the cream at a low temperature until it is made into butter or taken to the creamery.

If no milk house is on the farm, a handy place can be fitted up for temporary use in caring for the cream by enclosing the windmill frame. The four posts make a good framework for support and an opening can be left for the rod to work through at the top. This will keep the sun off and the running water will keep the place quite cool. The door should be kept closed either by a spring or a weight on a rope so the wind will not whip it open. This little precaution will also avert the danger of leaving it open by carelessness and will help to keep out the flies.

With a good floor and troughs arranged for drainage it can be made quite sanitary. A tank can be obtained having a lid, and large enough to set two or four large cream cans in, and by running the pipe directly from the pump into this tank then another pipe from there out into the stock tank the water will be kept circulating and cool and keep the cream at a reasonably low temperature. Such an equipment as this is quite cheap and will answer the purpose very nicely until a milk house can be built.

## SUGGESTIONS ON EGG INCUBATION

Incubation is the natural process through which the egg must pass to produce the chick. Our object, when hatching larger numbers of chicks, is to substitute for the natural method of hatching with hens. The incubator has solved the problem. It has grown from the mere hatching boxes to machines that are capable of producing a large percentage of strong, healthy chicks. Some hatching boxes are still on the market; the medium to high priced incubators are the ones to purchase. The initial price is of small consideration when compared with good, livable chicks.

The hen prepares the egg. Her owner generally receives it in good condition. What he does to the egg before it is actually placed in the incubator, greatly influences its hatchability. The fresher the eggs, the larger the percentage of hatch will be and the stronger the chicks.

The proper care of hatching eggs will increase the hatch. They should be turned daily if kept longer than five days. The best temperature is from 50 to 60 degrees Fahrenheit. Germ development starts at 68 degrees, so care should be taken to see that the eggs do not reach that point.

More eggs are ruined by becoming too warm before they are set than by chilling. When an egg is kept in a room where the temperature is 70 to 80 degrees, germ development starts. There is not enough heat to continue incubation; consequently many embryos die then or during the first few days in the incubator. Under such conditions, the eggs will show clear or nearly clear when candled on the eighth day.

When selecting an incubator, be governed to a large extent by the machines that are giving the best results in the community, not only for number of chicks hatched but for the condition of the chicks as well.

There are two general types of smaller incubators—the hot-water and the hot-air. The greatest problem with hot-water machines in general is proper ventilation; moisture is the greatest problem in the hot-air machine. The water in the water-heated incubator does not influence moisture in the egg chamber. Lack of moisture means that there has been too great an amount of evaporation. In the water-heated machines the air does not circulate so freely. With slower moving air, there will be less evaporation. The fact that many of the smaller hot water incubators have very little ventilation, makes it necessary to air and cool the eggs daily.

The hot-air incubators are quite different. The heat is furnished by the air so it is necessary that the air be in more rapid motion. This causes greater ventilation and evaporation, hence moisture usually must be added.

In operating the incubator follow directions. Most incubator companies give very complete directions regarding the operation and control of their machines.

Uniformity of temperature is a great controlling factor. An incubator run at a uniform temperature of 102 degrees will do better than one varying from 101 to 105 degrees. Gradual variation is not detrimental.

Too high temperature lowers the vigor of the chicks. In some machines, it is considered best to start at 101 degrees, increase to 102 degrees the second week, and only allow the standard of 103 degrees to be reached a few days before the hatch. Above everything, the eggs should not get too hot.—Noel Hall, Extension Specialist, Missouri state poultry experiment station, Mountain Grove.

### Sanitary Poultry House

#### Is Necessary for Eggs

Chickens will not give adequate returns in eggs or growth when kept under insanitary conditions.

The construction of the poultry house should receive first attention. Sufficient air space, lighting, and ventilation should be provided, and the entire house cleaned at frequent intervals.

While these precautions cannot be depended upon to control mites and lice, they aid the poultryman in determining when these pests are present. Furthermore, the fowls are kept in vigorous condition, which in itself aids in controlling pests. Dirty and insanitary houses provide ideal breeding conditions for insects and germs which are detrimental to poultry. Diseased fowls, or those with malformed bills or feet, fall ready prey to lice, mites, and other insect pests, and should be removed as soon as discovered.

### Proper Feed for Pullets

It is a mistake to let the pullets forage for themselves. Grain alone will not supply the necessary feed for building the framework and the body of the birds which are to become a part of the future laying flock. A mash containing a liberal supply of protein and minerals is needed. If the pullets are on good range they will not consume so much mash of this sort as they would without range, but it should be constantly before them.

## TANEYTOWN, MD.

### PUBLIC SALE

The undersigned, intending to quit farming will offer at public sale, at his barn on the Littlestown road near Taneytown, on

TUESDAY, FEBRUARY 16, 1926, at 12 o'clock, sharp, the following personal property:

11 HEAD GUERNSEY CATTLE, all Tuberculin tested; consisting of 2 pure-bred bulls, one 4 years old, one 1 1/2 years old; 1 cow carrying 4th. calf, 1 springing heifer, 2 bred heifers, 2 heifers, 8 months old; 1 heifer, 4 months old, 2 heifer calves.

#### IMPLEMENTS.

1 horse rake, wood frame harrow, lever harrow, 2 Keystone single-row corn planters, power churn, falling-top buggy, surrey, spring wagon, 2 buggy poles, set double harness, set single harness, 3 molasses barrels, lot of White Rock Hens, Pullets and Cockerels, lot of brooms, lot of seed corn.

#### HOUSEHOLD GOODS.

consisting of bedroom suit, 2 wardrobes, 3 bedsteads, lot stands, 2 rockers, lot chairs, lot carpet and matting, double heater, chunk stove, brooder stove, and many other articles not mentioned.

TERMS—All sums of \$5.00 and under, cash. Sums above \$5.00 a credit of 6 months will be given, with security, bearing interest from day of sale. No goods to be removed until settled for.

JACOB D. NULL, J. N. O. SMITH, Auct. 1-29-3t

### PUBLIC SALE

The undersigned, will sell at public sale, on the W. H. Dem farm, 1/2 mile south of Fritzelburg, on the road to Morelock's School-house, on

THURSDAY, FEBRUARY 18, 1926, at 12 o'clock, M., sharp, the following personal property:

2 MULES, ONE HORSE, one pair mules, one a good leader; 1 horse, good worker and driver.

5 HEAD OF COWS, these cows are T. B. tested and are a clean herd. NINE SHOATS.

#### ONE MILBURN WAGON.

1 1/2-ton; light two-horse wagon, one buggy, 6-ft. Deering binder, in good running order; 5-ft. Deering mower, 10-ft. hay rake, grain drill, Syracuse plow, No. 361; wood frame spring-tooth harrow, lever harrow, corn plow, shovel plow, 15-ft. hay carriage.

#### HARNESS.

3 Sets harness, buggy harness, check lines, 3 collars, 4 bridles, 3 halters, lead rein, triple, double and single trees, 2 jockey sticks, straw hook, hay knife, dung and pitch forks, log breast and cow chains, grain cradle, 2 scythes, crosscut saw, one-man saw, grindstone, wheelbarrow, about 15 barrels corn.

#### 100 CHICKENS.

by the pound; Davis swinging churn, 2 cold water cream separators, 3 milk buckets, meat bench, kitchen cabinet, walnut leaf table, couch, sink, apple butter.

TERMS—Sums of \$5.00 and under, cash. On sums above \$5.00 a credit of 6 months will be given, on notes with security, bearing interest from day of sale. No goods to be removed until settled for.

LUTHER O. ECKARD, J. N. O. SMITH, Auct. 1-29-3t

### PUBLIC SALE

The undersigned, intending to quit farming, will offer at public sale, on his farm, 1/4 mile from Uniontown, on

THURSDAY, FEBRUARY 25, 1926, at 11 o'clock, the following live stock and farming implements, consisting of

#### 6 HEAD OF WORK HORSES.

"Frank", grey horse, 15 years old, works anywhere hitched, and one of the best in the county; "Nell", a black mare, 10 years old, works anywhere, an extra good saddle and lead mare; "Queen", black mare, 6 years old, a good off-side worker, and a real block; "Tops", bay mare, 6 years old, a real blocky mare, works most anywhere, has been in the lead a few times; "Bill", brown horse, 13 years old, an extra good off-side worker; "Jack", bay horse, 11 years old, a good work horse, will work anywhere hitched. These horses are all of a good blocky type, and one of the best pulling teams in the county.

#### 9 HEAD OF CATTLE.

These cows are all good heavy milkers, and good testers. The other will be fresh in May, and 4 in the Fall; 1 stock bull.

#### 3 BROOD SOWS.

2 with pigs by their side, and the other will farrow in March.

#### FARMING IMPLEMENTS.

3 good farm wagons, one a road wagon and bed, holds 12 bbls. of corn, the other wagon and bed, holds 8 bbls. of corn, one 2-horse wagon, holds 5 bbls. of corn, one spring wagon, good International manure spreader, good McCormick binder, 7-ft. cut; Deering mower, horse rake and hay tedder, hay carriage, good corn planter, with fertilizer attachment; 2 good Ontario drills, one 8-hoe drill and one 4-hoe drill; disc harrow, 23-tooth lever harrow, two 18-tooth wood frame harrows, one smoothing harrow, 3 barshare, Syracuse plows, land roller, 2 double walking corn plows, good riding corn plow, 2 single corn plows, grain cradle, corn sheller, grindstone, 3-horse evener, two 2-horse stretchers, 3-horse double tree, 2 triple trees, 3 double trees, single trees, jockey sticks, fifth, log and breast chains, dung, straw and pitch forks, digging iron, shovels, mattock, pick, scoop shovel, crosscut saw, wagon jack, bushel basket, half bushel measure, sledging hammer and wedge, lot good milk cans, buckets, and strainer, corn by the barrel, barley by the bushel.

#### HARNESS.

2 sets breechbands, 6 sets of front gears, 8 bridles, 8 collars, one good set spring wagon harness, 6 choke straps, carrying straps, 7 halters, 6-horse line, 4-horse line, 2 pair check lines, wagon saddle, good wagon whip, new pair Stewart horse clips, and one hand clipper, and many other articles too numerous to mention. All these articles are as good as can be found on any farm.

TERMS—All sums of \$10.00 and under, cash. On larger sums, a credit of 6 months will be given, the purchasers to give their notes with satisfactory security, bearing interest from day of sale. No goods to be removed until settled for.

**CORRESPONDENCE****Latest Items of Local News Furnished By Our Regular Staff of Writers**

All communications for this department must be signed by the author; nor for publication, but as an evidence that the items contributor are legitimate and correct. Items based on mere rumor, or such as are likely to give offense, are not wanted. We desire correspondence to reach our office on Thursday, if at all possible. It will be necessary, therefore, for most letters to be mailed on Wednesday, or by first mail, west, on W. M. R. Thursday morning. Letters mailed on Thursday evening may not reach in time.

**PLEASANT VALLEY.**

On Saturday evening, January 30, at 7:30, Lester Myers, son of Mrs. Gertrude Myers, of Pleasant Valley, and Miss Mary Esther Hesson, of near Littlestown, were married at the Lutheran Parsonage, in Silver Run, by Rev. A. G. Wolf. They were attended by Miss Elsie Schildt, of Littlestown, and Clarence Hesson, of Baltimore. The ring ceremony was used. The bride was becomingly attired in blue tulle and cream.

Mary Katherine and David Petry, children of Mr. and Mrs. Herbert Petry, had the misfortune to sustain severe fractures of their right arms, while cranking a Ford.

Frederick Myers is much improved after having a case of gripple.

Clarence Welk has been removed to his home, from the Maryland General Hospital, where he underwent an operation for appendicitis.

Leander Wanz, son of Mr. and Mrs. Robert Wanz, has purchased a Dodge coupe.

Frank Kain, of this place, has had an Atwater Kent radio installed in his home.

Mr. and Mrs. Sylvester Clingan and little daughter, Margaret, spent the week-end with the latter's parents, Mr. and Mrs. Theo. Welk.

John Senft, with his truck, moved the furniture of his nephew, Walter Senft, to Westminster, where he will be permanently located.

Sunday School, Sunday, 1:00; Service at 2:00, by Rev. J. W. Reincke. Y. P. meeting, at 7.

There were a large number in attendance at the Communion Service, on Sunday last, notwithstanding the inclemency of the weather.

Those in the cast of the coming High School play are busy rehearsing, and hope to present it in the near future.

**UNIONTOWN.**

Mr. and Mrs. Harry Wilson entertained at dinner, Sunday, in honor of Mr. and Mrs. Vernon Schaffer, nee Larue Wilson, who were recently married. Those present were: Mr. and Mrs. Harry Wilson, Miss Catherine and James Wilson, Mr. and Mrs. Vernon Schaffer, Mr. and Mrs. Willard Schaffer, Mr. and Mrs. John Arbrough, Rev. and Mrs. J. E. Lowe, Jr., Mr. and Mrs. Ray Nushum and daughters, Elizabeth and Helen, Mr. and Mrs. Walter Marker and son, Kenneth, Mrs. Mollie Crabb and Miss Mabel Lincoln.

Mrs. Bailey Fleagle, is spending some time with relatives in Baltimore.

C. W. Binkley, of Linwood, Samuel Talbott, of this place, spent Thursday in Baltimore.

The Parent-Teachers' Association met at the school-house, on Thursday evening.

Rev. J. H. Hoch delivered a sermon at the Church of God, in Westminster, Wednesday evening, for Rev. C. A. Byler, who is holding a series of evangelistic services.

Mrs. Carlton Fleming is visiting her parents, Mr. and Mrs. John Bural.

Paul Lindsay spent the week-end with his cousin, Kenneth Harman, of near New Windsor.

Mr. and Mrs. David Lindsay, spent Sunday with their son, Russell Lindsay and family, of near New Windsor.

Mr. and Mrs. D. Myers Englar, Mr. and Mrs. Russell Fleagle and William Haines, spent Friday in Baltimore.

Mr. and Mrs. Solomon Myers celebrated their 50th anniversary, on Monday evening.

**NFW WINDSOR.**

Mrs. Hann has gone to Baltimore and Annapolis, for a visit.

The Parent-Teachers' Association held their monthly meeting, on Tuesday afternoon. Miss Krimm, the district supervisor, gave the address.

One of the heaviest snows of the season fell on Wednesday.

Howard C. Roop and family spent Sunday last with relatives in Taneytown.

Miss Lottie Englar spent Sunday last with Miss Marianna Snader.

Charles Hesson was taken to a Baltimore Hospital, this week, for an operation.

Mrs. Edward Bixler, who is at a Baltimore Hospital, is improving, and expects to be brought home shortly.

On Tuesday evening the Foreign Missionary Society of the M. E. Church held their meeting, in the church, and entertained the Society from the Presbyterian Church.

Charles Fritz and bride are staying with his parents, Thomas Fritz and wife.

**BRIDGEPORT.**

Allen Fuss, of Akron, Ohio, and Charles Fuss, of Greentown, S. C., are visiting their grand-mother, Mrs. Wm. Fuss, and other relatives.

Lewis D. Baker, of near Gettysburg, Pa., is visiting his brother, Harry Baker.

H. W. Baker, wife and son, Jones, and Mrs. Wm. Hoover, of Philadelphia, Pa., attended the funeral of John Delaplaine, at Union Bridge, on Friday.

Loy Hess and wife gave a dinner, on Saturday, in honor of his sister and husband, Clarence Waybright and wife, who were recently married.

**NORTH EAST CARROLL.**

Services at St. David's (Sherman's) Sunday morning, at 10:00 o'clock, by Rev. A. M. Hollinger. Sunday School at 8:45; Christian Endeavor, at 7:00. The shooting match on Saturday last, at Paul Klinedinh's, was well attended.

George Bowman, a student of Millersville State Normal School, spent the week-end at the home of his parents, Howard Bowman and family.

Clarence Nace and wife, Mrs. Charles Fuhrman, of Green Valley, and Archer Zentz, of Cherry Hill, attended the automobile show at Baltimore, last Wednesday.

Pleasant Hill dramatic Club decided to present a home talent play, in the near future. "Deacon Dubbs," a rural comedy drama, has been assigned; Charles Weinberg, coaching. Mr. Weinberg has had marked success in coaching two former plays, and it is expected that "Deacon Dubbs" will surpass the former productions.

Milton Sterner had a radio installed in his home, last week.

Sunday visitors at the home of Clinton Monath, were: Mr. and Mrs. Harry LeGore, Charles Monath, Norman Monath, Annie LeGore, Annie Monath and Catherine Monath.

Ervin Stegner, of Kridler's, is enjoying a radio, which he installed recently.

**DID YOU START WORKING THE \$30,000.00 "MAKERS OF HISTORY CONTEST?" IF YOU DID NOT YOU WILL HAVE ANOTHER OPPORTUNITY THIS WEEK BECAUSE SET NO. 1 AND THE NEW SET NO. 2 WILL BE PRINTED IN THE SUNDAY'S BALTIMORE AMERICAN. ORDER YOUR SUNDAY AMERICAN IN ADVANCE.** —Advertisement

**SEEKS VETERAN IN ASYLUMS AND JAILS****Mother Hunts for Son, World War Soldier.**

Marquette, Mich.—Traveling about the country visiting penal institutions and asylums, hoping to find some trace of her son, Joe Anderson, World War veteran, who disappeared from Detroit, March 6, 1924, Mrs. Margaret Anderson, sixty-seven, has arrived here.

Her son enlisted when he was not yet sixteen and was assigned to Company K of the One Hundred and Thirty-ninth infantry. He was gassed overseas. Later he was charged with desertion, convicted and sent to Leavenworth prison. Mrs. Anderson walked from her home at Sioux Falls to Washington, where she sought clemency for her son from President Harding. She contended Joe was not responsible for his act because of having been gassed. President Harding paroled him.

After his parole Joe went to work at his trade as machinist. At the end of nine months he suddenly disappeared and the mother has never heard anything of him since.

Mrs. Anderson visited the Ford plants here at L'Anse and the asylum at Newberry. She said her son might be going under the name of John E. Johnson and has always given his address as Stevens Point, Wis. He is over six feet tall, thin and of blond complexion and has a scar on his chest on the left side where he was wounded in the war.

She said she is making her way to Chicago, visiting asylums and industrial centers in hope of finding some trace of her missing son.

**Irregular Attendance at Schools Causes Big Waste**

Washington—Irregular attendance in the schools throughout the United States caused the waste of approximately \$250,000,000 last year, according to an estimate made by the Department of the Interior through the bureau of education.

A study conducted by this bureau of 72,120 country children in 70 counties of 10 states indicates the median number of days of actual attendance of these children was 141.7 days. Half of the children attended school less than seven and one-half months, over one-fourth of the children attended less than five months, and over one-eighth of them attended less than three months. Attendance in consolidated schools was slightly better than in one-teacher schools.

The median daily attendance, 73 and 60 per cent, respectively, was higher in schools providing nine-month terms for their pupils than in those providing seven-month terms, thereby indicating that longer terms usually mean better daily attendance. Pupils with less than 130 days of schooling averaged one and one-half years below grade in reading and spelling ability.

Other studies show poorer attendance among younger than older children. Many people expect this since the older children are more likely to attend school during bad weather. A more probable factor, no doubt, is the erroneous attitude of parents in considering it less serious for the younger children than for the older children to miss school. Trivial excuses such as "went to town," "ran an errand," "got up too late," "had shoes repaired," etc., are worse than none. Closer cooperation between the teacher and the parent should result in better attendance.

The bureau of education in connection with the estimate of waste stated that the effectiveness of a school system depends on the regularity of attendance of the pupils enrolled as well as on such factors as the quality of instruction and the length of school term.

**Death Rate for 1925 Below 5-Year Average**

Washington—Despite an unusual number of deaths in June attributed to "heat waves," preliminary figures made public by Surgeon General Cumming, indicated the official death rate for the first seven months of 1925 would be lower than the average for the last five years.

Health conditions were said by Doctor Cumming to have been "generally good," with reports indicating that "most of the more common communicable diseases have been less destructive than usual."

A decided decrease was shown in diphtheria for the eight weeks since the first of July. During the surveyed period of 1925 approximately 6,400 cases were reported against 8,100 for the same time in 1924.

**Earth Round, Monk Said Long Before Columbus**

Oxford, England—Had Christopher Columbus known as much of English theological literature as he knew of navigation he might have saved himself a deal of pains in his effort to prove the world was round. He might have consulted a musty tome recently dug out of the dust of Oxford's hoary libraries, a "Metrical Lives of the Saints," written by a monk at the end of the thirteenth century, in which it is set forth that:

"As an appeal the urthe is round, so that evermo Half of the urthe the sonne bishyneth, hou so hit evere go."

He would have been told that the moon itself gives no light, that the earth is bigger than the moon, and the sun 165 miles bigger than the earth.

**A Birthday Surprise.****(For the Record.)**

Mrs. Helen Engelbrecht was given a surprise in honor of her birthday, Jan. 22. The evening was spent in music and conversation, and at a late hour refreshments were served.

Those present were: Mr. and Mrs. John W. Stouffer, Mr. and Mrs. B. J. Hyser, Mr. and Mrs. Lloyd Lambert, Mr. and Mrs. Steiner Engelbrecht, Mrs. Charles Kemper, Mrs. Pierce Garner, Mrs. Ida Landis, Mrs. Gertie Rowe, Miss Loretta Jackson, Miss Minnie Allison, Miss Anna May Kemper, Miss Anna Harman; Mr. Harry Hilterbrick, Mr. Samuel Lambert, and Master George B. F. Harman, and at a late hour all returned home wishing Mrs. Engelbrecht many more happy birthdays.

**DIED.**

Obituaries, poetry and resolutions, charged for at the rate of five cents per line. The regular death notices published free.

**MR. WM. B. CRAPSTER.**

Mr. Wm. B. Crapster died suddenly, from heart trouble, at his home in Washington, on Jan. 30. He was a son of the late Mr. and Mrs. Woods Crapster, of Taneytown, and had been living in Washington since boyhood. He is survived by his wife, (nee Kain) one brother, Thaddeus G., and two sisters, Mrs. Alice Cox, of Washington, and Mrs. Nina Wright, of Philadelphia. (Also see Keymar correspondence).

**MR. ROBERT FINK.**

Mr. Robert Fink, youngest son of Mr. Pius J. Fink, of Lebanon, Pa., formerly of Taneytown, was killed Jan. 31, in a railroad accident, the details of which have not been reported to us. He is survived by his father, his wife, and the following brothers and sisters: Clarence, Edward, Basil, Sylvester, Mary, Anna Maire and Josephine.

**MRS. MARY J. GARDNER.**

Mrs. Mary J., wife of the late John P. Gardner, of Taneytown, died at her home in Baltimore, on Jan. 31. She is survived by the following children: two sons, Bernard and Leo; six daughters, Marie, a sister of Charity; Irene and Eugenia, Sisters of St. Joseph's; Gertrude, Helen and Kathleen; also by two brothers, Pius J. Fink, of Lebanon, Pa., and Joseph F. Fink, of Taneytown.

Funeral services were held on Thursday morning at St. Paul's Catholic Church, where a solemn Requiem High Mass was said, followed by interment in the New Cathedral cemetery, Baltimore.

**MISS ANNA C. LAMBERT.**

Miss Anna C., daughter of Mr. and Mrs. Harry A. Lambert, of Mt. Union, died early Monday morning from plural pneumonia, after only a few days illness aged 9 years, 5 months, 9 days.

She is survived by her parents, and two sisters; Mrs. Paul Crouse, of Union Bridge, and Miss Thelma, at home, and by her grand-mother on her father's side, Mrs. Deborah Lambert, and by her grand-father on her mother's side, Mrs. Evan T. Smith of Bark Hill.

Funeral services were held at the home and at Mt. Union Church, on Thursday morning, by her pastor, Rev. J. E. Lowe. Interment in Mt. Union cemetery.

**MRS. GRANVILLE HARNER.**

Mrs. Anna M., widow of the late Mr. Granville Harner, died at her home near Kump, on Feb. 3, from pneumonia, aged 73 years, 1 month, 19 days. She is survived by two daughters, Mrs. Edward D. Fogle, who is ill with an advanced stage of cancer, and Anna, who has been an invalid since childhood, both of whom were cared for by their mother.

She is also survived by two sisters, Mrs. Joseph Bucher, and Mrs. F. O. Duttera, of Littlestown, and by three half-sisters and two half-brothers, Mrs. John Gippich, of Philadelphia, and Mrs. E. C. Sauerhammer, of Taneytown; Mrs. Laura Epplenan, and John W. Little, of Littlestown, and Mrs. L. D. Little, of Hanover.

Funeral services will be held this Saturday afternoon from the home of her brother, John W. Little, services in St. John's Lutheran Church, in charge of her pastor, Rev. J. L. Hummer.

**MR. JOHN E. DELAPLANE.**

Mr. John E. Delaplaine died at the home of Mr. Reese Metcalfe, near Union Bridge, on Jan. 27, aged 77 years, 6 months, 24 days. He had long been ailing with rheumatism and troubles incident to advancing years. He was a native of near Bridgeport, Frederick county, but since young manhood had lived in Union Bridge and vicinity.

He was a carpenter by trade, and for many years was employed in the wood-working shop of the W. M. R. R., at Union Bridge. His wife, who died about a year ago, was a daughter of Mr. and Mrs. Samuel Anders, of Union Bridge.

He is survived by two sisters, Mrs. Mary Hoover, of Norristown, near Philadelphia, and Mrs. Alice Kiser, of Taneytown; and by two brothers, Albert S., of Colorado, and Isaac, of Hampton, Va. Funeral services were held last Friday in the Lutheran Church, Union Bridge, followed by interment in Mt. View cemetery.

In Loving Remembrance of my grand-father.

REUBEN BOHN, who died Feb. 6, 1922.

You are resting in peaceful slumber Four years have passed away You are gone but not forgotten As we think of you each day.

Even death has a wonderful mission Though it rob us of those we love It draws us from our surroundings To long for the meeting above.

His Grand-daughter, DOROTHY A. HAUGH.

**THE WINCHESTER STORE****Canker-Roup Epidemic! Protect Your Poultry**

Danger time for poultry. Biting, chilly weather, stuffy quarters, poor ventilation means millions of germs attacking your flock, reducing vitality and cutting down egg production.

When chickens sneeze and froth at nostrils, that's roup. Unless checked the disease quickly devitalizes the flock and finally develops into the loathsome condition known as canker. But these conditions can be avoided.

**Conkey's Roup Remedy and Conkey's Canker Special**

Use both remedies for quick results. Keep Conkey's Roup Remedy in the drinking water and treat all affected birds with Conkey's Canker Special, an oily prescription which is squirted into the nostrils.

**Guaranteed**

All Conkey Poultry Remedies are sold on a guarantee to refund your money if you are not entirely satisfied.

**Poultry Book Free**

Ask for Conkey's Poultry Book, free of charge at our store, or mailed to your address for 6c in stamps.

**BUCKEYE COAL BURNING BROODERS OIL BURNING BROODERS**

POCOHONTAS COAL will burn satisfactorily in Coal Burning Brooders.

**TRACING ANCESTRY OF THOROUGHBRED****Famous Race Horses Go Back to Three Stallions.**

The Darley Arabian, the Byerly Turk, and the Godolphin Barb are the progenitors of all the great thoroughbred families.

Each of these three stallions produced a line of breed. Incidentally it is interesting to know that the thoroughbred, as a separate breed of horse just as distinct from its Arabian ancestry as it is from a Clydesdale or a Percheron, was practically created in England, during the space of 100 years by careful breeding and a system of great race meetings, practically continuous throughout the year, which rigorously weeded out the unfit. A thoroughbred is a horse or mare whose pedigree is registered in the Stud Book started in 1791 by Messrs. Weatherly, the official agents of the English Jockey club. In it ancestries are traced back as far as 1689.

The Byerly Turk, a magnificent charger ridden in the Irish wars of King William III in 1689 by a Captain Byerly, after whom he was named, was the ancestor, among others, of a famous race horse named Herod, founder of a line of thoroughbreds. The Darley Arabian, a genuine Arab, was a bay stallion imported from Aleppo by a Mr. Darley of Yorkshire about ten years later. He was the sire of Flying Childers, an unbeaten race horse, and also the ancestor of Eclipse, one of the greatest race horses of all time—Eclipse first and the rest nowhere. Eclipse, a tall chestnut, never beaten in 18 great races, had an enormous number of descendants, many of them derby winners, and his line is now scattered all over the racing world still bearing occasionally the distinctive black markings of their ancestor.

The third of these founders of the thoroughbred was the Godolphin Barb, a brown bay of 15 hands with an unnaturally high chest, whom a breeder discovered dragging a cart in the streets of Paris and sold to Lord Godolphin. He had been foaled on the Barbary coast about 1742 and was another ancestor of Eclipse as well as of Matchem, the founder of another line of thoroughbreds. All race horses on the turf today trace their ancestry in the direct male line to the Byerly Turk, the Darley Arabian or the Godolphin Barb.—Everybody's Magazine.

**First Comic Papers**

The first comic journal was the *Merie Mercurie*, which was established in London 225 years ago. Its existence was very brief.

During the following 150 years a number of humorous weeklies were started in England, and the *Scourge*, founded in 1811, enjoyed a brief popularity, but it was not until 1841 that *Punch* was born.

**Wouldn't Bear Out Theory**

Theoretically, a head-on collision between two freely moving bodies of the same weight and type would result in an equal shock to both, regardless of their speeds. The forces of impact act equally on both bodies, and in the case of two automobiles would tend to throw all occupants forward in their respective cars with equal violence. However, in an actual collision between autos involving speeds as high as 50 miles per hour, so many unevaluated factors would enter that it is probable that results would seldom, if ever, be exactly as expected from the ideal theoretical case.

**Slam at Patent Lighter**

H. G. Wells is responsible for the following story: At a certain fancy dress ball all the costumes were intended to represent names of famous books. The majority of book titles were promptly recognized, but everyone was puzzled by the costume of one charming young lady. It was designed to look like a patent cigarette lighter. All sorts of titles were suggested, but to each one the girl shook her head. Finally, someone ventured to ask her outright the title of the book represented by her dress. "Why!" she laughed. "Don't you see? It's 'The Light That Failed.'"

**Beautiful Mosaic**

Pliny's doves is a superb and perfectly preserved specimen of ancient mosaic in the Capitoline museum at Rome. It is described in Pliny's writings, and is on that account called "Pliny's Doves." This mosaic, representing four doves in the act of drinking, was discovered in the Villa Adriana in 1737 by Cardinal Furietti, and was purchased from him by Pope Clement XIII for the museum of the capitol. The stones composing it are so minute that, on an average, 160 pieces are required to cover one square inch.—Kansas City Star.

**Birds Flock to England**

Winter birds have been flying over the British Isles in great numbers recently, replacing the birds of summer, which have flown long since to southern Europe or Africa.

Starlings, thrushes, red wings and field fares are the most numerous among the birds that seek a winter home in England and Scotland. During mild winters they live on insects, and so are of great service to farmers and fruit growers, and when the winter is severe, as this one has started out to be, they feed on the berries from England's numerous hedges. Farmers are complaining of a falling off recently of the number of lapwings in England, since this bird is one of their greatest aids in the battle against insect life. Most of the lapwings go to southwestern Europe during the winter, and there it is reported they are being killed in great numbers by hunters.

**SPECIAL NOTICES**

SMALL ADVERTISEMENTS will be inserted under this heading at One Cent a word, each week, counting name and address of advertiser—two initials, or a date, counted as one word. Minimum charge, 15 cents.

26-12:30. W. & G. Stansbury, Trustees, Keymar. Real Estate and Personal. J. N. O. Smith, Auct.

27-12 o'clock. Harry G. Lambert, Sr., Taneytown. Household Goods. J. N. O. Smith, Auct.

23-10 o'clock. Edward Essick, Detour. Household Goods, Harness, Dwellings, Etc. Also 6-room Brick Dwelling and 1/2 Acre of Land at 12 o'clock sharp. J. N. O. Smith, Auct.

**MARCH.**

1-9:30 o'clock. C. Scott Bollinger, one mile east Wakefield Station. Accredited Herd of 27 Grade Guernsey Cattle, 6 Horses and Mules; large line Farming Implements. J. N. O. Smith, Auct.

2-11 o'clock. Herbert Smith, near Taneytown. Stock, Implements and Household Goods. J. N. O. Smith, Auct.

4-11 o'clock. John Moser, near Bridgeport. Stock and Implements. J. N. O. Smith, Auct.

5-12 o'clock. Wm. P. Halter, 1 mi. from Marker's Mill, on formerly Troxell farm. Stock and Implements. Wm. Warner, Auct.

8-11 o'clock. R. A. Yingling, near Otter Dale. Stock and Implements. J. N. O. Smith, Auct.

9-11 o'clock. Edward Harner, on road from State road to Sell's Mill. Stock and Implements. J. N. O. Smith, Auct.

10-10 o'clock. D. A. Stull, 1 mile north Bridgeport. Stock and Implements. B. P. Ogle, Auct.

10-12 o'clock. Clarence Mayers, on Taneytown and Littlestown road. Stock and Implements. J. N. O. Smith, Auct.

11-12 o'clock. Frank Houck on Sharetts farm, Bruceville. Stock and Implements. J. N. O. Smith, Auct.

11-9 o'clock. Willis F. Sterner, 3 miles N. E. Gettysburg. Stock, Implements, Household Goods. G. R. and Robert Thompson, Auct.

12-11 o'clock. Roy Crabbs, near Otter Dale Mill. Stock and Implements. J. N. O. Smith, Auct.

13-11 o'clock. Oliver J. Waybright, Freedom Twp., Pa., 2 mi. south Moritz's Store. Stock and Implements. Robt. Thomson, Auct.

15-12 o'clock. Mrs. Margaret Witherow, near Harney. Stock and Implements. Luther Spangler, Auct.

16-11 o'clock. Geo. W. Harner, near Emmittsburg. Stock, Implements and Household. B. P. Ogle, Auct.

16-11 o'clock. C. F. Simpson, 1/2 mi. south Uniontown. Stock and Implements. J. N. O. Smith, Auct.

16—Mervin G. Boyd, 2 1/2 mi. north Harney, Mt. Joy Twp. Stock, Implements, Furniture, etc. Fair & Spangler, Aucts.

17-10 o'clock. J. D. Kaufman, on Royer farm at Meadow Branch Church. Stock and Implements. J. O. N. Smith, Auct.

18-11 o'clock. Maurice W. Hahn, near Keysville. Stock and Implements. J. N. O. Smith, Auct.

20-12 o'clock. Mrs. David Vaughn, near Taneytown. Stock, Implements and Household Goods. A. J. Baumgardner, Auct.

23-12 o'clock. William Copenhaver, on Taneytown and Littlestown road. Stock and Implements. J. N. O. Smith, Auct.

24-12 o'clock. P. G. Hiltnerbrick, near Hoffman Orphanage. Stock and Implements. Luther Spangler, Auct.

25-11 o'clock. Chas. O. Dickensheets, near Frizellburg, on Wm. H. Wantz farm. Stock and Implements. J. N. O. Smith, Auct.

27-12 o'clock. Joseph Mummert, 2 miles north Taneytown. Household Goods, also House and Lot. J. N. O. Smith, Auct.

**SCHOOL DAYS**

**SOMETHING TO THINK ABOUT**  
By F. A. WALKER

**PLAYING THE GAME**

LYCHEE, SON OF PEEH KAN

IF WE could see ourselves as others see us, look upon our rude manners, our derelictions and aspirations with the same cold, fault-finding eye employed by our critics in measuring our frailties, what a sorry picture would confront us each morning as we gaze in the mirror!

The graceful curves about our mouth and the various excellences we intuitively glimpse in our heart would be surely distorted into monstrous disfigurements which would cause us to gasp in amazement at our reflection.

Perhaps it is better for our peace of mind and our temporal happiness that this cannot be done.

For if we could observe our distorted selves clearly, we might lose hope in playing the game of life and become even more displeasing to others than we are now, and perchance, add to our already formidable list of delinquencies still another more appalling than the original. In spite of our long schooling in the doctrines of spiritual life and morality, there cling to us many traits of our barbarian ancestors, which crop out quite unexpectedly and make us, in our reflective moments, thoroughly ashamed of ourselves.

We cannot wash out the spots of the leopard or yet control fully our animal nature, though the good within us fights unceasingly for mastery.

Between doubt and hope, the faithful soul plays the game gallantly up to the final moment of success or failure.

To play the game rightly is to discountinue covetousness, piracy of our neighbor's character and indulge in unworthy thoughts and deeds, an exceedingly difficult course for the saint or the sinner, but not impossible, otherwise life and effort in the flesh would be of no avail.

As likely as not you have often been tempted to withdraw from the game and wait a more propitious season, falling back in discouragement. And then in a sudden veer of the wind, which fanned the dying spark of faith within you into a glorious flame, changed your mind, stripped yourself of doubt and won, giving faith the credit for your splendid victory.

**UNDER THE COLD**  
By DOUGLAS MALLOCH

UNDER the cold the roses,  
Under the snow the grass—  
More than a man supposes  
Who carelessly may pass.  
Under the winter's chill are things  
Of green and yellow that are the  
spring's.

So, let us go on smiling,  
We who can smile through tears,  
Sorrows of men beguiling,  
Though through the weary years  
Under the snow men's hearts may  
hide,  
Showing us only their wintry side.

For I am sure forever,  
Though they may scoff at song,  
Even the very clever  
Under the ice may long  
For tear-wet daisies, for heart-blown  
flowers,  
For some of the spring that is al-  
ways ours.

So, let us go on singing,  
Even though men disdain,  
Into life's silence flinging  
Some little glad refrain—  
Under the snow perhaps somewhere  
A soul may hear, or a heart may care.  
(© by McClure Newspaper Syndicate.)

(The following short story was written by Choo Choo Kar, the great Chinese tale writer, about the middle of the Buck and Wing dynasty, or about 3,200 years ago.)

LYCHEE NUT was a notorious malefactor who pillaged and robbed even in his dreams, and great was the rejoicing when Goo Bong, the great detective of Chow Ming, finally caught him red-handed, after eating a peck of strawberries stolen from the Widow Ding Dong Dell.

Under the wise laws of that province a prisoner, no matter how guilty, could not be punished unless he first promised not to be bad again, and this Lychee Nut refused to do. So he was hung up by the thumbs for 90 hours and the soles of his feet continuously tickled. And yet he would not promise to be good and they could not legally punish him.

So they dipped him in boiling oil, and still he would not promise, for he had a great dread of being punished, and they withheld food and drink from him for 18 days and 19 nights, but he promised not. And so they said to him:

"Lychee Nut, son of Peeh Kan, if you do not promise to be good we will pray to the great Joss Billie Kin to keep you 3,200 years, after your death without another incarnation, and then to put you upon the earth again a citizen of a country which shall be called the States of Merry Ka, where nothing save the name shall be merry."

"I'M DONE," cried the Hotel Stenographer.

"Huh?" said the House Detective.

"The next time I see that Denny Haloran, I won't," snapped the girl.

"A guy who stands me up never has another chance. My Uncle Patrick used to say that the first time a dog bites you it's the dog's fault and the second time he bites you it's your own fault."

"He made a date to take me to the 'movies' last night. He said at the dance at Harmony hall last week that he would come around at eight and we could catch a nine o'clock show and I could pick the place."

"I forgot all about it and made another date with a fair-headed boy I met after church last Sunday. He wanted to come and take me to a dance and I told him I would go with him last night."

"I was putting on my glad young clothes to go to the dance with him when I remembered I had the date with Denny. I didn't know the new guy's last name or how to get him on the telephone. There was only one thing to do and I did it."

"I wanted to see which one would come first. The new boy showed up early. I did not get out of my chair when he came in and told him I had sprained my ankle so we could not go to the dance, and he would have to sit it out at home or go to the shindig by himself. He pretended to be glad and sat down to chat and hold my hand, me expecting Denny any minute. That's all the good it did me. I sat anxiously for two hours and Denny never showed up. He forgot his date with me. That's one thing no gentleman ever does. If he does not care enough about me to remember when he is dated up with me, I am through with him forever. He's got no more chance than a goldfish in a wrestling match."

## THE YELLOW TUFT

By DAVID B. FITZGERALD

(© by Short Story Pub. Co.)

THE new colonel at Fort Wingate, in the desert of northwestern New Mexico, was very unlike the veteran major, who had been a dozen years at the post, and their points of view differed in almost every conceivable particular.

As they sat one evening, at the close of a blazing, fiery day, in a corner of the long veranda of the commandant's quarters, the colonel discoursed on his favorite theme—which he had studied on Pennsylvania avenue, exactly eight-hundred miles distant as the crow flies—"The only good Indian is a dead Indian," until the major began to revolve the question of applying for leave of absence. He hated argument—and there was not a pound of ice within two hundred miles.

Just then Sergt. James Maguire made an official report to the colonel, saluted, clicked his heels and was marching off, when the major brought him up standing with a word and requested him to tell the colonel what happened at the Little Chusca canyon. The sergeant flattened himself against the white weather-boarding, and in a deprecating manner complied.

"Well, sir," he said, "it was at the time of the second Navajo uprising, with which, for pure devilishness, the first wasn't in it for a minute. About six o'clock one evening a ranchman came in from Manuelito with the news that the Navajos were out along the Arizona border, moving eastward and leaving an unpleasant trail. We mounted four companies and were off on the stroke of ten. But, Lord! we didn't dream what was ahead. When we halted at dawn next morning for breakfast, two half-breed Zuni scouts came in and told us that we were up against the whole Navajo nation, with its war-paint on in broad streaks.

"The captain considered a bit, and then ordered us to saddle and mount. We thought that meant falling back on the fort, but it really meant going ahead and holding the Indians in check till reinforcements could come up. With half a dozen scouts a mile in advance, we rode westward.

"At nine o'clock we sighted a fairly good-sized bunch of Indians—about two to our one—but that was nothing in those days. They made off to the north, intending to ride around and get between us and the fort, so we clapped the spurs in and went after them. I don't remember a nastier ride. This desert is a warmish sort of a place at the best—that day it was a furnace. The sun was so blazing hot it raised fever blisters on our souls. One poor fellow went clean daft. We couldn't have been wetter or steamier if one of the post washerwomen had poured boiling water over us.

"We brushed the reds three times that day, first at Jewett's stage station, next at Yucca creek, and again at Gibson's, near the beginning of the foothills. Each time we rushed them, because there was nothing else to do, but they didn't stand worth a cent. Spotted Owl was the only Indian I ever knew who would stand out in the open and fight like a man, but he had too great a fancy for green paint. It drew the fire of every man within range; he had eight bullets in him the day he died.

"About two hours before sundown the reds halted in the mouth of the Little Chusca canyon. From their own standpoint, it was a beautiful place for a fight. The steep walls, a thousand feet high, protected their flanks. The gorge behind them ran back twenty miles into the mountains, and the floor of the canyon, near its mouth, was strewn with great boulders. An Indian just dotes on shooting through a crevice in the rocks.

"When our captain—it was the major, here—saw the situation, it worried him—begging his pardon—and he called the lieutenants aside for a talk. The upshot was that the captain made us a little speech, the gist of which was that we were not going to round up that bunch of reds, and might as well be going, as the real circus was to be down on the plains. But he said that before we left he would like to give the Indians in front a scare that would keep them from hanging on to our trail.

"We saw it meant crawling, and answered by slipping from our horses. We had half a mile to cover before the light failed, but the ground was covered with big rocks, and we crawled and dodged and made little runs, the reds taking snapshots, but doing no particular damage.

"A hundred and fifty yards from the mouth of the canyon we reached an open place, sand-floored and bare as the palm of your hand, except for one big boulder in the center. It would have been just simple suicide to try crossing. The lieutenant shook his head, and sent back a sketch of the ground to the captain.

"While we waited for instructions, I noticed two Indians behind the big boulder. It was a devil-may-care place to be, for if we charged they were done for, no matter what happened to us individually, and they had no way of knowing what we would do. They were safe enough for the time, so long as they kept behind the rock, and I sized them up as a couple of bucks anxious to distinguish themselves.

"Billy Krim, I said to the man

next me, 'keep your sights on that big rock; there are a couple of reds behind it. Pass the word.'

"He nodded, squinting along his barrel. Presently he leaned over and laid his hand on the shoulder of Kelso, the man next beyond. I saw the two whispering together, and wondered, knowing they were not good friends. But, Lord bless you, sir, I was as unprepared as a child for what happened. The next moment I heard Kelso cry, 'I don't take a dare from no man, and least of all from you, Billy Krim.' Before I could more than rub my eyes, Krim and Kelso were up and running neck and neck for the rock, trailing their carbines and with their knives in their teeth. The lieutenant yelled to them to come back, as we all did, but if they heard they paid no attention.

"Well, sir, that famous charge of Krim and Kelso was over in less time than it takes to tell it. The reds in the mouth of the canyon must have thought we were trying to play some trick, for they held their fire until the men had almost reached the boulder. Then there were half a dozen sputtering shots, and Kelso went down on his face. Krim ran clear past the rock, turned, raised his carbine and fired. Then he clubbed his piece and closed in. There was another shot, and Krim, when we found him next morning, had a bullet through his lungs and was dead. Also the two reds, one shot in the eye and the other with his skull smashed. We always thought Krim must have gone mad with the heat that day.

"Of course, we couldn't think of drawing off and leaving the bodies of our men to be scalped. So the lieutenant sent a detail to bring up food and water, and we spent the night behind our shelters, watching the open space between us and the mouth of the canyon, with instructions to shoot at anything that moved. Soon after daybreak we discovered that the Indians had decamped up the gorge, and the lieutenant ordered half a dozen of us to bring in the bodies of Kelso and Krim."

"And you found them scalped?" It was the colonel who spoke. The major rubbed his hands softly together in the darkness.

"No, sir," answered the sergeant, "we found all four bodies, reds and our men alike, wearing the yellow tuft."

"The yellow tuft! What is that?" inquired the colonel.

"I think, sir," said the sergeant, "it is what you would call a decoration for bravery in action. When a Navajo is killed in battle, and his people can't bring his body in and bury it with honors, they try at any rate to give him the tuft. It is a little bunch of yellow feathers, sir, bound with a string and tied on the forehead. Krim and Kelso both had it. Some red had risked his life in crawling out to the boulder during the night—and he had not overlooked the fact that our fellows were also in the scrimmage. Under the circumstances, we decorated the two dead Indians with a cavalry button apiece, tied around their necks, and buried all four in the same grave."

### Great Work Now Done by Plastic Surgeons

Patients are flocking to England from all parts of the world to avail themselves of the skill of Britain's plastic surgeons.

No greater surgical triumph was achieved during the World war than the building up of new faces on men whose features had been blown away or were so mutilated as to make the unfortunate soldiers unrecognizable.

Plastic surgery was known before the war, but was never used to such an extent as during the later stages of the conflict. Noses, jaws and cheeks were reconstructed out of pieces of flesh, bone and cartilage taken from other parts of the patient's body with entire success, and many men now walking about with features given to them by the surgeon would hardly have dared to venture forth a few years ago.

Plastic surgery performs a legitimate and most useful work in repairing the ravages of disease which affect the flesh and cartilages of the face, nose and ears, and in restoring good looks to the victims of accidents.

Fads there will always be, such as that of remodeling and reshaping the nose, which came into prominence a few years ago. Some of the operations undertaken for that purpose then were successful; others were not, for plastic surgery undertaken by surgeons skilled in that particular branch of medicine is a different thing from the operations of so-called "beauty-specialists."

### Berlin Public Houses

Statistics show that the city of Berlin contains 16,350 restaurants and saloons. This represents a proportion of one public house for every 250 inhabitants. As most of these restaurants or saloons are located in the city proper, the proportion is really 1 to 116. The suburb of Steglitz can boast of being the most temperate of all Greater Berlin's districts, for there the proportion is only one public house to every 428 inhabitants.

### Late Days for Witchcraft

At Landskron, Germany, a new instance of belief in witchery has developed among the peasants. When the cows ceased to give milk the peasants suspected witchcraft. Their suspicions fell upon an old woman supposed to be possessed of a devil. She was lured into a house and beaten and much of her hair was torn out. But that did not renew the supply of milk.

### How Butter Fat in Milk Is Broken Up

Do you know what the word homogenization means?

Ninety-eight out of 100 housewives to whom the question recently was put admitted they couldn't answer. Can you?

But here it is explained by Miss Meta H. Given, food authority doing research work at the University of Chicago.

"Homogenization," says Miss Given, "is the name of the process which breaks up butter fat in evaporated milk into tiny particles so they blend evenly with the solids. Homogenization causes the butter fat globules to adhere to the albumin and the casein of the milk. In the process, milk is forced through countless numbers of openings at a pressure of around 3,500 pounds.

"In addition to preventing a cream and skim milk line, this breaking up of fat contributes to smoothness and perfect blending of foods such as cream sauces, soups, ice cream and in baked products.

"It also has a digestive advantage for those who have difficulty in assimilating milk. Many pediatricians recommend evaporated milk as a baby food, although, like other substitutes for the natural supply, it should not be considered as a food complete in itself. Addition of orange or tomato juice, barley water or lime water are important in providing adequate diet for the infant.

"All authorities recognize that normal mother's milk is the best food for infants, but this natural milk is frequently inadequate in quality and quantity. Scientists say cow's milk is the best substitute. But cow's milk must be modified and supplemented with other foods. The fat in mother's milk is in homogeneous suspension and being flocculent forms small curds in the stomach, but the fat in cow's milk is in relatively large globules, forms large tough curds in the stomach and is much harder to digest. In evaporated milk the fat is broken up by homogenization and the curds softened until in size and digestibility they resemble natural infant food."

Fat Globules in Raw Milk.

Globules After Homogenization.

### Men's and Women's Clothes

A professor in Berlin recently had the curiosity to weigh first the wearing apparel of his assistant and the wearing apparel of the assistant's wife. He found that the man's boots alone weighed as much as the woman's entire clothing, and that in every detail the woman's garments were greatly lighter than her husband's. The result attained has led a woman critic to write on men's dress in the Spectator, London. She points out that it is remarkable that while in the last twenty years woman has steadily decreased the amount of clothing that she wears, there has been little fundamental change in male attire, and asserts that it may possibly be that man catches cold because he wears too much clothing and clothing of the wrong kind.

### Honey From Thistles

The lowly thistle, commonly considered an obnoxious weed, has turned out to be a pretty good friend after all, according to the honeybee. Thistles grow in abundance in the Sacramento valley, especially Butte county, Cal. After the close of the southern California season the bee comes north to these acres of prickly flowers, which hold a nectar that produces a large amount of honey suitable for marketing as well as for winter stores. This year's thistle honey crop in the Oroville district of California will aggregate 100 tons, it is estimated. This is as great as the output of the entire state has been in lean years. This year reports show an abundance of this nectar, due to heavy winter and spring rains.—Christian Science Monitor.

### Britain Still Has Hold

Arrangements for building a park in Hawaii brought to light the fact that a small area of land in this country is owned by Great Britain. It was deeded to the British government in 1877 by the late A. S. Cleghorn and his wife and has remained British territory ever since. It stands a peculiar instance of British-owned land in American territory.

### Use for Discarded Hair

Bobbed hair that formerly was thrown away, the Goodwill Industries of Los Angeles now turns into a profit. This charitable organization in one week received more than fifty pounds of hair in contributions. It was made into wigs and switches, sold and the proceeds devoted to work among the poor.

### Little Need to Fear Bite of Brown Spider

Though spider bites may often be painful, especially to certain individuals, they do not justify the fear many persons exhibit for the eight-legged creatures, as most spiders are harmless; few of them are dangerously poisonous. All of the 400 or 500 species that a persistent seeker may find within easy reach of most American communities have poison glands, but none are so poisonous as they are reputed to be. Such poisons as they have are intended for defense against others in the spider's world of miniature life and for killing or rendering harmless the tiny creatures which supply her diet. Man's organism is so great that it will not succumb to this dose of poison that suffices to kill an insect. The bites of a few species, nevertheless, do cause severe pain. The danger of their being inflicted, however, is offset to some extent by the color warning given to most of us by this class of arachnida. The more dangerous species display brilliant and sometimes very beautiful colors which at once attract attention; but of the ordinary little brown spiders we need have no fear.

### Scorpion Bite Seldom Fatal, but Unpleasant

Centipedes and millipedes have more than eight pairs of jointed legs. Millipedes look like centipedes, but they have two pairs of legs to what appears to be each segment of the body. They are vegetarians and harmless. Centipedes have no more than one pair of legs to each segment of the body. They are carnivorous and, like spiders, have poison glands in connection with their jaws. The story about them is just the same as those about the spiders and the true scorpions. They are rarely, if ever, fatal, but they are not pleasant when they get through a successful attack, which is their defense. I have never been bitten by them, but a man I know has gone to a great deal of trouble to get large ones for the sake of having them bite him so that he can see what it is like. He is welcome to the job so far as I am concerned, but he is still very much alive.—Frank E. Lutz, in Adventure Magazine.

### Cabin-Mate Exonerated

Two men, although unacquainted, were obliged to share a cabin during a voyage from New York to London. One of them, a gruff, self-contained fellow, resisted the efforts of his cabin-mate to strike a friendship. For the first day or two they did not speak a word.

At last the gruff, self-contained man broke the silence.

"Smoke cigars?" he inquired.

"No," said his cabin-mate.

"Quite sure you don't?" the first insisted. "I've got a box of fifty here. Prime quality. Sure you don't smoke cigars?"

The affable one was sure he didn't. "Then it must have been the steward. There are five missing from the box," said the self-contained man.

### Tattlers

It is commonly supposed that women are more vindictive than men, that women's tongues are the destroyers of reputations. I have proved that this is a fallacy. No woman in the world is as unforgiving and malicious as a man whose advances have been repulsed. And this type of man is not confined to any particular nation or race, although, of course, it is rarer among the Anglo-Saxons. It is not the man to whom a woman gives herself who maligns her—it is the one to whom she has refused herself.—Clare Sheridan, in Hearst's International-Cosmopolitan.

### Historic English Bells

Bells of Carlisle (Eng.) cathedral have been rehung and supplemented by two new bells to complete the octave. The silence of 180 years in the cathedral tower, is however, still maintained. The old bells were sentenced to silence for 100 years because they were rung when Prince Edward Charles Stuart crossed the border in 1745. The oldest was cast in 1410, and is one of the most ancient bells in the country. Another was of special interest because it was cast in Carlisle by order of Oliver Cromwell and it is believed to be the only bell sanctioned by the Protector.

### Real Frigidity

Johnny was in the habit of swearing mildly when anything did not please him. One day the minister heard him and said:

"Johnny, don't you know you must not swear. It is naughty of you to do so. Why, every time I hear you swear a cold chill runs down my back."

"That's nothing," said Johnny. "If you'd been at my house the other day when my dad caught his nose in the clothes wringer, you'd have froze to death."

### Asbestos Long Known

Asbestos, a native fossil stone which may be split into threads, is endowed with the property of remaining unconsumed by fire. Cloth was made of it by the Egyptians, and napkins by the Romans at the time of the philosopher Pliny, 74 A. D. The spinning of asbestos was known in Venice in the sixteenth century. Extensive deposits of asbestos are being worked in the eastern part of the province of Quebec.

## GLASSES

### Plants Introduced Here

Explorations in southern China, Burma and Siam resulted in the collection of trees from which chaulmoogra oil, a successful specific for leprosy, is obtained, and the establishing of those trees in the American tropics. Numerous varieties of Chinese chestnuts have been imported for testing for blight resistance in the hope that they will replace the rapidly disappearing American species. Many native Chinese apples, pears, cherries, plums and roses were also obtained, which, because of their vigor and hardiness, will be of special interest to plant breeders. Varieties of barley and wheat likely to prove of value at high altitudes or for growing under dry-farming conditions in the western states have also been introduced.

### Heard Truth for Once

"I saw a mighty queer fight in town this afternoon," related Farmer Fumblegate, upon his return from the county seat. "A fat young feller and a thin old one fit mighty near all around the public square tumbling down, rolling around getting up and whacking away at each other some more, and so on." "Mercy sakes!" ejaculated his wife. "What was the fight about?" "That was the funny part. Both said they weren't fighting for the principle of the thing, but 'cuz one had cheated the other out of \$2."—Kansas City Star.

Owing to increased patronage, and also to give better service, Hudson & Bell, of Frederick, Md., successors of C. L. Kefauver, will give Optical Service in Taneytown, every 1st and 3rd Friday in each month. Next visits

FRIDAY, FEBRUARY 19, 1926,

If you need a change of glasses, or new ones, ask any of our satisfied customers, for we guarantee absolute satisfaction at a very reasonable price, as any of our satisfied customers will tell you.

Mr. Bell is a registered optometrist and was associated with Mr. Kefauver for some years. Appointments can be made before these dates at Sarbaugh's Jewelry Store.

Also don't forget we do all kinds of repairs, Optical, Watch, Clock and Jewelry. Also a fine line of everything that is carried in a first-class Jewelry Store. See us and save money in your needs.

SARBAUGH JEWELER, TANEYTOWN, MD. Main Store, Hanover, Pa.

IMPROVED UNIFORM INTERNATIONAL

(© 1926, Western Newspaper Union)

## Lesson for February 7

### JESUS HEALS AND SAVES A BLIND MAN

LESSON TEXT—John 9:1-41.  
GOLDEN TEXT—"I am the light of the world, he that followeth Me shall not walk in darkness, but shall have the light of life."—John 9:12.

PRIMARY TOPIC—The Blind Man Made to See.  
JUNIOR TOPIC—Jesus Helps a Blind Man.  
INTERMEDIATE AND SENIOR TOPIC—What Jesus Did for the Blind Man.  
YOUNG PEOPLE AND ADULT TOPIC—Jesus Christ the Light of the World.

I. Working the Works of God While It Is Day (vv. 1-5).

1. The Disciples' Problem (vv. 1, 2). In their minds all affliction, negative and positive, was God's retribution for sin. Therefore, they argued that this man's blindness proved his sin. They recognized, too, that the effect of sin is sometimes hereditary. No doubt they inferred this from the second commandment (Ex. 20:5). The implication is that they held the view that men have a pre-existence, and that suffering in this life may be the result of sins committed in that pre-existent state.

2. The Lord's Answer (vv. 3-5). The Lord affirmed that in this case there was neither sin on the man's part, nor that of his parents, but that it was an occasion for the display of the works of God and that He had come to execute this task while it was day, because the night would come when no man could work. Since Christ is the light of the world, the task which challenged His attention was the opening of this man's eyes. The purpose of Jesus in working miracles was not a mere exhibition of miraculous power, but "to illustrate in the physical sphere His power in the spiritual sphere." This man's absolute helplessness in bettering his physical condition is illustrative of man's utter helplessness in the salvation of his own soul. The natural man is blind and dead (II Cor. 4:4; Eph. 2:1). God by His spirit must quicken the soul dead in trespasses and sin before it can see to take hold on Christ, the remedy for sin.

11. The Man's Eyes Opened (vv. 6, 7).

1. The Means. Jesus spat on the ground and made clay of the spittle and anointed his eyes. Observe that the means used in this miracle were little less than foolish in themselves. The object must have been to teach this man the utter inadequacy of the means to the accomplishment of the end, that he might be caused to look from the means to the One who used them, that he might be convinced that the power was of God.

2. His Obedience (v. 7). He immediately obeyed. He did not stop to question the reasonableness of the command.

III. The Man's Testimony (vv. 8-30). In his testimony we have a fine example of the development of faith. The opening of this man's eyes aroused inquiry among his neighbors. When a man's spiritual eyes are opened, there will be a stir among his friends.

1. He Testified to His Personal Identity (v. 9). This was very easy. His self-consciousness enabled him to know that he was the same man who was born blind.

2. He Testified as to How It Was Done (vv. 11-15). So definite was his experience that he was able to tell just how it was done. When he repeated it there was no conflict.

3. He Testified That the One Who Opened His Eyes was a Prophet (v. 17).  
4. He Testified That This Healer No Doubt Was Sent of God (vv. 30-33). He declared that He was the greatest worker of miracles who had appeared since the world began.

5. He worshipped Him as the Son of God (v. 38).

IV. The Results of His Confession.  
1. As to the People, They Were Divided in Sentiment (v. 16). Some believed He was from God because of His works, others that He was a sinner because He did His work on the Sabbath day.  
2. As to the Man, They Cast Him Out (v. 34). Faithful testimony will often result in ostracism from even religious people.  
3. As to Jesus, He Found the Man (v. 35). Being cast out by men he found himself in the arms of Jesus. It is quite often true that separation from human fellowship results in more vital fellowship with Jesus. He was led on to a deeper faith. He first saw Him as a miracle worker, then as a prophet and finally as the Son of God and when he perceived Him to be the Son of God, he worshipped Him.

### Religion

Religion, in its purity, is not so much a pursuit as a temper; or rather it is a temper, leading to the pursuit of all that is high and holy. Its foundation is faith; its action, works; its temper, holiness; its aim, obedience to God in improvement of self and benevolence to men.—Tryon Edwards.

### Satan's Deadliest Foe

Time well employed is Satan's deadliest foe; it leaves no opening for the lurking fiend.

## —THE— CHRISTIAN ENDEAVOR TOPIC —From— Moody Bible Institute Monthly Chicago, Ill.

February 7  
What Does Christian Endeavor Mean to Me?  
Matthew 20:25-28  
(Christian Endeavor Day)

What is true of Christian Endeavor is equally true of other Christian young people's societies having similar aims but bearing other names. The fellowship of Christian young people in the life and work of the church has been and is a tremendous factor in the advancement of that work throughout the world. Wherever the movement has had the sympathy and intelligent direction of the pastor the societies have done much to make the church a real force for good in the community.

At the International Endeavor Convention in London twenty-five years ago Dr. F. B. Meyer said: "Christian Endeavor presents an almost unparalleled opportunity to young men and women of this generation to deal with the abuse and immorality of their age. The movement combines the spiritual power and practical wide-awakeness necessary for the translation of the Sermon on the Mount into actual practice."

Christian Endeavor has made good, at least in part, along the lines indicated by Dr. Meyer. It has another unparalleled opportunity today, namely, to stand against the blighting effects of Modernism, which denies every essential truth of the gospel. Not long ago the Christian Century, the leading journal of Modernism in America, made an attack upon the Christian Endeavor movement. The charges were that its leadership was mature, its statistics padded, its journalism hesitant and feeble, and that whole sections of its membership were too closely allied with Fundamentalism. Dr. Francis E. Clark replied to the editorial containing these charges, and proved conclusively that they were without foundation. The animus of the whole indictment is seen in the last count, namely, that whole sections of the Christian Endeavor membership were too closely allied with Fundamentalism. This may not be true if Fundamentalism be considered as an organized movement, but if it be considered as representing the great truths of redemption through the blood of Christ, then the chief glory of Christian Endeavor would be found in such an alliance. A wise leadership of the Christian Endeavor movement will cultivate and encourage such an alliance, because the whole strength of that movement has been derived from the great center in a Christ who died for our sins and was raised again for our justification. From these central things Christian Endeavor has moved out to the circumference of a great service and ministry. To depart from these great truths would be like severing a tree from its roots. Decay and death would inevitably follow.

### Simple Mixture Makes Stomach Feel Fine

Simple buckthorn bark, magnesium sulph. c. p., glycerine, etc., as mixed in Adlerika, helps stomach trouble in TEN minutes by removing GAS. Brings out a surprising amount of old waste matter you never thought was in your system. Stops that full, bloated feeling and makes you happy and cheerful. Excellent for CHRONIC constipation. Adlerika works QUICK and delightfully easy. R. S. McKinney, Druggist.

### Movement for New Era

Italy's Mazzinian league, which, despite the radicalism and republicanism of its namesake, is profascist and pro-monarchial, has made an interesting proposal to Sig. Mussolini. It suggests that the premier summon from all parts of the world representatives of the Italian race, and from the Capitoline hill, the hearthstone of the ancient Roman empire, proclaim the "charter of the new era, the duties of man." The "rights of man," proclaimed by the French revolution, was only half of what the modern world needs, according to the Mazzinians, and the French revolution, whose work was continued by Mazzini, has been completed and made perfect by the Fascist revolution. Discipline, obedience and absolute loyalty to the nation and the state are among the duties the league wishes to have proclaimed.

### Canary Honored in Death

While carrying out repairs to a wall of a Brighton (England) house workmen came across the grave of a canary. A brick had been removed and a coffin with glass panels inserted. The canary was reclining on a bed of cotton wool, the inscription on the coffin being: "Died January 4, 1880.

### Eligible to High Position

Miss Enid Russell-Smith, who has the distinction of being the first woman to pass a civil service examination for one of the higher posts in the British government, is now eligible for eventual appointment to a position paying from \$15,000 to \$17,500 a year.

### An Honest Laying Mash

strictly high-grade, always fresh made, high in protein, Rein-ola Laying Mash excels in the results it produces. Try it—Riendollar Bros. & Co.

## Proper Time to Cut Alfalfa Hay

### Continuous Early Mowing of Crop Makes Big Decrease in Yield.

Cutting alfalfa in the bud stage, if this practice is made continuous, markedly decreases vigor of growth of the plants, the stand, and the yield, and permits encroachment of grasses, workers of the Kansas agricultural experiment station have determined through experiments carried on over an eight-year period.

"Considering all factors," says a report written by Prof. S. C. Salmon, Dr. C. O. Swanson, and C. W. McCampbell, authors of technical bulletin 15, "Experiments Relative to the Time of Cutting Alfalfa," of the agricultural experiment station, "it is doubtful if any farmer can afford to cut continuously or even generally earlier than tenth-bloom stage in fields which it is desired to maintain in alfalfa.

Full Bloom Too Late. "On the other hand, it is doubtful if the difference in yield in favor of full-bloom cutting is sufficient to justify delaying the beginning of cutting until that stage of growth is reached, especially in view of the poorer quality of hay and the lower yield if cutting is unexpectedly delayed by bad weather or other factors.

"Where the crop can be harvested promptly a safe plan will be to permit the alfalfa to reach one-fourth or one-half bloom stage before cutting is begun. If the mow can be started in some fields before a safe stage is reached, injury can perhaps be prevented by seeing to it that the same field is not cut early for successive crops. If the hay is to be fed to horses, the best practice, without doubt, is to cut when the plants are in full bloom.

Cut First Crop Early. "Results cutting suggest the possibility of securing the first crop early—when in tenth bloom or in the bud stage—and delaying successive cuttings in the same season until the crop reaches full bloom or nearly so. It is quite probable that permitting the second and later crops to reach full bloom will prevent the damage which would otherwise result from early cutting of the first crop."

## PATIENTLY AWAIT ANOTHER MIRACLE

### But Missionaries in Bagdad Have Hopes.

A delightful story comes from the Christian medical missions in Bagdad to the Youth's Companion. In the lovely date-palm gardens of the city a thief was discovered, not long ago, robbing one of the trees of its luscious fruit. The owner, a hasty, passionate man, promptly shot him, and the man fell from the top of a lofty palm to the ground. He was hurried away to the Christian hospital, with a bullet in his leg, a broken arm and a shattered leg. On his way he begged to be put beneath a Moslem roof, even if it were a prison, rather than be left in the clutches of dogs of Christians. But, as he was a criminal, his captors paid no attention to his wishes.

At the hospital they speedily put him under an anesthetic, extracted the bullet, set his broken limbs, and before long he was comfortably settled on a palm-fabric cot, trussed up with dressings, but alive and likely to get well. For a long time he was very suspicious and surly and would have little to say to the missionary whenever he was attempted to converse with him. But gradually he yielded to the kind treatment he received and one day he astonished the missionary with the remark: "This is a miracle! It's a place of miracles!"

"We deal," replied the missionary, with much more diffident cases than yours, Ibrahim. You should see some of them."

"Ah! That is not my meaning," replied the man. "As I have been lying here I have seen rich men come to the door of this hospital and offer jewels even to half their wealth to the surgeon to come and attend their wives and children; but always he says, 'The poor must come first'; and he who might be so rich slaves here in the heat night and day for wretches like me, who can give them nothing. That is a miracle!"

Indeed, so touched was Ibrahim by the loving sacrifice of his new friends that he simply had to be turned away from the hospital when he was recovered.

"But what can I do for you, sir?" he begged. "Is there nothing I can do?"

"Yes," replied the surgeon, "send me some more patients."

"Allah!" cried Ibrahim. "Here is a man who might have all the world if he asked for it, and all he wants is more work. You are a miracle, sir! But I will do something for you. Do you like dates, sir?"

"Yes, I like dates," said the surgeon, smiling.

"Then, sir, let me know when you want some, and I'll always steal them for you!"

## Nourishing Drink for Children

BABIES and children, the same as adults, grow weary of being fed the same food in the same way each day. It is true that most children take naturally to milk, but that does not mean that they must be fed it ad nauseam. On the contrary, that is the very thing to be avoided.

Pediatricians advise consumption by children of a quart of milk a day in one form or another. This does not mean skim milk, but whole milk, for the skimmed product is lacking both in butter fat and the essential food element known as vitamin A, which is found in butter fat. Many mothers do not appreciate that removal of cream from the top of a bottle of milk results in skim milk.

In evaporated milk, a product recommended by many leading doctors for the use of infants and children and which is simply pure cow's milk sterilized in cans and with sixty per cent of the water removed, there is no cream line. The milk in the top of a can is the same as it is in the bottom of the container. This results from a process called homogenization, in which the fat globules in the milk are broken up into such microscopic bits that they remain in homogeneous suspension. Every drop of homogenized milk has a buttery taste because it contains butter fat. For this reason, in evaporated milk, there is none of the flat taste one finds in drinking from the bottom of a bottle of market milk.

In order to avoid feeding the baby or child plain milk three or four times a day, many authorities recommend the use of a mixture of fruit juice and milk, a highly palatable and refreshing drink.

Following is a recipe worked out by experts for an orange-milk drink: Mix in a fruit jar 1/3 of a cupful of orange juice, 1/4 of a cupful of evaporated milk, three teaspoonfuls of sugar, 1/2 teaspoonful of lemon juice and a few grains of salt. Shake well before serving.

### Water Power in Sweden

A Swedish waterfall now runs the trolleys in Copenhagen, the capital of Denmark, thanks to the completion recently of the most powerful electric cable ever laid under water. Replacing a smaller cable that had been in use since 1914, it is capable of transmitting 50,000 volts and thereby adds "white coal" on a large scale to the list of Swedish articles of export. Besides the Copenhagen trolleys, the electricity transmitted under water also runs factory machinery and gives light to the city and the surrounding countryside. Crossing the sound, or strait, that separates Sweden and Denmark at its narrowest point, the new cable leaves Sweden at Helsingborg and enters Denmark at Elsinore within sight of the hamlet castle Kronborg. In length it is about three and a half miles, and its weight is more than 200 tons. It was made in six sections, and the "sleeve"-covered joints, completed as the cable was being laid, are of a new type. To hold the cable ship steady, six anchors were used. The cost of the new cable is about \$500,000, defrayed jointly by the Swedish power company and Danish municipalities. The power comes from the River Lagan, in southwestern Sweden.

### Cheap at Half Price

Sadie, the less attractive of two sisters. But her lack of looks had not detracted from her ability to win a husband, as she was happily married while her more attractive sister was still single. Because of the favoritism shown the married sister, the "bachelor girl" was continually "peeved." One day her mother urged her to "stop sulking and get some sense and marry a dry-goods merchant as Sadie had done."

"Married, married, that's all I hear any more. Why, I wouldn't marry a guy like Sadie's husband with a half-dead business in a dying town for six like him," the unmarried sister exploded.

"Why, he's a nice man," her mother replied. "And whenever she wants a new dress, she can get it wholesale."

### Hookworm in Holy Land

The present methods of agriculture are blamed for the introduction of hookworm into the Holy Land. Dr. A. Felix, of the Rothschild hospital in Palestine, who found that about one out of every twelve workmen in the orange groves is affected by the disease, attributes it to the increased use of irrigation in the land. "It is very difficult to trace the source of the infection," said Doctor Felix, "but Egypt, where the hookworm disease is known to exist, is the most likely source because of the large number of Egyptian soldiers who worked here during the war."

### Able Woman Lawyer

The first woman to appear in practice before the Supreme Court of the United States was the late Marilla M. Ricker, the famous woman lawyer of Dover, N. H., of whom Robert Ingersoll said that had she been a man she would have done chief justice of the United States.

## Soldier Stole Gems From Hawaiian Crown

After resting in the vaults of the archives of Hawaii since 1905 in a more or less battered condition, the crown of Hawaii, last worn by King Kalakua, has been restored to beauty.

Last January the commissioners of the archives broke the seals on the leather case containing the royal headpiece and examined the contents. They found that the crown was badly battered and twisted and that several of its beautiful gems had been removed. Tracing back records, it was found that in 1893, after the overthrow of the monarchy, a man named Ryan, a regular in the enlisted forces of the new government, had discovered the leather case in a room attached to that of the former royal chamberlain. He broke the lock and stripped the crown of many of its gems.

According to the history of the case, the largest diamond was sent by Ryan to a woman friend in Missouri. It was later recovered by the attorney general of Hawaii through the attorney general of Missouri. The theft remained a mystery for some time, until detectives found a paper containing \$2,500 worth of diamonds in Ryan's room.

A story was afterward current that Ryan had used some of the jewels as stakes in "seven come eleven." Ryan was arrested, tried and convicted. He later escaped from prison, but was recaptured and deported.

The 1925 territorial legislature appropriated \$350 for the restoration of the crown. This has been done with "synthetic" gems, but nevertheless the former beauty and glory of it seems to have returned. After a public exhibition of the crown in a Honolulu jeweler's window it was again placed in the archives building on the capitol grounds.

### Floating Stock

Some Angelenos who recently paid a visit to Manila were talking politics with the governor general. Inevitably the conversation turned to the politics of Japan and their relation to the Philippines. The governor general smiled.

"Expansion, the necessity for more room, is at the root of all present-day Japanese diplomacy," he summed up the situation, adding:

"Japan's plight reminds me of a dinner I attended at which the hostess was the wife of a Moro chief. In honor of the occasion she had prepared for me the one white man's food she knew of—beans.

"They were served hard and dry and a puzzled frown spread over the brow of my hostess as she noted them. Finally light dawned and calling the cook, she said: 'You boy, take 'em back. Put on more water. Beans too crowded.'"

### "Movies" in Schools

Geography is being taught in the Sophie Charlotte lyceum (high school) in Berlin by the use of motion pictures. As an introduction to the geographical study of Spain, for example, the pupils show first a film recording a trip through that country. Pictures of the different types of people in the various districts were exhibited, then a series of superb views of landscapes, from the high mountains to the tropical gardens of Seville. There were picture excursions to Parsifal's Monsalvati and other points, pictures of the fight of Christendom against the Moors and finally visits to the modern cities of Toledo and Granada. It is safe to say that never before in a Berlin class has geography been the interest so intense. It is planned to introduce this method in all Berlin schools.

### Modern War Methods Unknown to Druses

Notwithstanding their incredible courage, the Druses are inefficient soldiers, not so much tactically as strategically. Their war against France was in no way prepared for, and so they could not benefit by their victory.

It was a criminal folly of Sultan Pasha, and a treachery to his small, courageous people, to assume the fight under such circumstances, without any sort of preparation. I realized this first when Sultan Pasha asked me to stay a few days longer in the Djebel Druz to examine the seriously wounded and to attend them.

There was not a single physician among the whole people, nor any medical instruments to be had, no bandages, not even any medical material to treat a first-aid case. The army was no better equipped in any other direction. They had, for instance, neither hand grenades nor guns; and, having captured a number of machine guns (not only light guns, as the French communicate stated; I myself saw a 105 mm. operative field gun not far from Sueda) they did not have a single officer who knew how to use them.

They attacked tanks and captured five of them—the writer saw three burned French tanks on the road between Es Sijn and Mezraa—but they trusted themselves against the vehicles, caught them with their naked hands, overturned them, and put them to ashes. . . . I was shown one of their leaders who threw away his flint, and, sword in hand, attacked the French infantry at the front of his men.

Thus is war conducted in the Djebel Druz.—Wolfgang von Weisl in the Atlantic Monthly.

## WANTED FAT CATTLE OF ALL KINDS.

We are in a position to handle your Fat Cattle to an advantage and will pay the highest cash prices for Fat Cows, Bulls and Bologna Cows. If you have any, call us up on the Phone, or drop us a card.

Poole & Lambert  
NEW WINDSOR, MD.  
Phone 21-W 1-8-tf

## Victor Records

Hear the New Victor Records received every week. Hear "No Man's Mamma," "Mighty Blue" by Aileen Stanley. "That Certain Party," "Why Aren't You Eatin' More Oranges" by the Happiness Boys. Call and hear the new Orthophonic Victrola, the Wonder Machine.

VIOLIN INSTRUCTION.  
All; Latest Sheet Music in Stock.  
JOHN R. SARBAUGH  
Taneytown, Md.  
SARBAUGH'S JEWELRY STORE.  
Main Store Hanover, Pa. 1-8-tf

## A Small Property For Sale.

Small Property consisting of FIVE ACRES, of very productive land, located along the county road midway between Ladiesburg and New Midway, Frederick County, Va. This property is improved with a

FIVE ROOM HOUSE, large Stable and Shed, Hog House, Poultry House, Shop and other necessary outbuildings, fruit of all kinds. A good well, and a never-failing spring of water, nearby. A most desirable home for a small family or elderly couple. For further particulars apply to J. RAYMOND ZENT, near Keymar, Md. 1-22-tf

## MEMORIALS

Joseph L. Mathias  
PHONE 127

## Mark every grave

NOTICE TO CREDITORS. This is to give notice that the subscriber, has obtained from the Orphan's Court of Carroll County, in Md., letters testamentary upon the estate of ROBERT C. HOTTSON, late of Carroll County, deceased. All persons having claims against the deceased, are hereby warned to exhibit the same, with the vouchers properly authenticated, to the subscriber, on or before the 26th day of August, 1926; they may otherwise by law be excluded from all benefit of said estate. Given under my hands this 29th day of January, 1926. GRACE E. HOTTSON, Executrix. 1-29-26

## SPECIAL \$1.00 Stationery Offer.

It is socially proper as well as business-like to use printed stationery. It is also economical and apt to result in having paper and envelopes on hand, when needed. We have filled hundreds of orders received by mail for our \$1.00 offer, and have not had a single complaint. 200 sheets Hammermill Bond paper, 5 1/2 x 8 1/2 unruled, padded on request, with 100 size 6 1/2 envelopes to match. Priced either in dark blue, or black. Not over 4 lines neat type, the same form on both paper and envelopes. Envelopes printed on back or front. Unless otherwise directed, orders for ladies will be printed on back, and for gentlemen, on front. Instead of name, an Old English initial letter can be used, if desired. Initial stationery should have a box number, or street address. When desired, ruled paper will be furnished (107 sheets) with 100 size 6 1/2 envelopes. We do not print envelopes alone, or paper alone, at 50c. Cash with order, when sent by mail. Write instructions, and copy for the printing, very plainly. When mailed to 3rd and 4th Zones, add 5c; to 5th Zone, or further, add 10c. THE CARROLL RECORD CO., TANEYTOWN, MD.

### Agriculture's Charm

What pursuit is more comfortable for a man's servants, more delightful to his wife, more attractive to his children, or more gratifying to his friends? I should be surprised for my own part, if any man of liberal feelings has met with any possession more pleasing than a farm, or discovered any pursuit more attractive, or more conducive to the means of life than agriculture.—Socrates.

## TANEYTOWN LOCALS

Items of news from town, or vicinity are always wanted for this column. Especially accidents, sales of real estate, fires, important happenings, visits to or from the community social events, and all matters of general interest to those at home, and away from home.

Miss Mabel Leister entertained on last Friday evening at "500."

Miss Eliza Birnie left Monday for Cambridge, Mass., to resume her work.

The outlook is that dwellings will be very scarce, for rent, in Taneytown this Spring.

Revival services are under way in the U. B. Church, and will continue for some time.

Mr. and Mrs. Walter Hape removed to their new home, in Frederick, on Wednesday afternoon.

John O. N. Crapster attended the funeral of his cousin, Wm. B. Crapster in Washington, on Monday.

Miss Malva Duttera, of Littlestown, spent several days at the home of George K. Duttera and daughters.

The Home-maker's Club held a meeting Thursday afternoon at 2:00 o'clock, at the home of Mrs. Harvey Ohler.

Mrs. Evelyn Loggins, of Washington, spent the week-end with Miss Mary Hesson and Mrs. Lavina Fringer.

Charles Stambaugh, of Harney, was taken to Frederick Hospital, on Thursday, for an operation for appendicitis.

Ernest Hyser is re-building the house, on his farm, near town, on the Gettysburg-Harney road, which replaces one of the oldest dwellings in that section.

Miss Nora Miller and Mrs. Nelson Zimmerman and daughter, Maxine, of Waynesboro, were week-end visitors at the home of their sister, Mrs. Roy Baker and family.

Mrs. L. W. Mehrling and Mrs. S. H. Mehrling, returned, on Wednesday, from a visit to Philadelphia, Pa., to Dr. P. L. Mehrling, the former's son, and other relatives.

George P. Ritter who recently returned from a trip to Florida, is reported to be of the opinion that what he saw of Florida does not begin to compare favorably with Carroll county.

The second large snow of this winter fell on Wednesday, accompanied at times with wind squalls. Some of the country roads were considerably drifted at favorable points. The cold was not severe.

The C. E. Society of the Presbyterian Church gave a shower to Mrs. Harry E. Feaser, who was recently married. The affair was a complete surprise and was given at the home of Mr. and Mrs. Curtis G. Bowers.

The "groundhog" weather sign, in which we have not the slightest belief, calls for six weeks delay of Spring weather, as he could have seen his "shadow"—providing he was out at the right times—on Tuesday.

Hearing Mexico City, and Havana, without the use of ear-phones, seems to be about the standard test, in this city, for a good radio. So far as we know, Raymond Davidson is the only one who can boast of reaching Porto Rico.

The Blue Ridge bus overturned at Harry Babylon's, Fountain Valley, on Monday morning, due to the breaking of the steering gear. The bus was not much damaged, and the three passengers and the driver escaped injury.

Mrs. Louisa Fuss and Mrs. Mahlon Stonesifer, of near Emmitsburg, visited Mrs. Mary Stover and family, on Friday, and also attended the funeral of Mrs. John Cluts. Mrs. Samuel Overholtzer, of New Midway, spent Wednesday at the same place.

The meeting of the Parent-Teacher's Association, held Monday evening of last week, was not reported to us for publication; but it was a fine meeting and program, just the same. The musical numbers and readings were high-class—some said, equal to Chautauqua standard. Attend the next chance, and judge for yourself.

John Shaum, one of the Rural Carriers out of Union Bridge, had an exciting experience, on Tuesday morning with two unknown hold-up men on the Johnsville-Liberty road, but by quick wit and nerve made a getaway from both. He struck one of them in the face with a heavy buckled strap, scared the other out of his car with a motion and threat to shoot, then stepped on the gas. He was unarmed, but the hold-ups were not aware of the fact. Their purpose was evidently a robbery of the mails.

The Pythian Sisters will have a special meeting on Tuesday evening, Feb. 9. All members try and be present.

Misses Margaret Crouse and Janet Crebs, and Norval Shoemaker, students at Millersville State Normal School, spent the week-end with their parents.

(For the Record). Recent visitors at the home of Harvey Lockner and family, near Silver Run, were: Mr. and Mrs. Curtis Harner, son Milton, and Samuel Smelser, Littlestown; John, Aquilla, Viola, Catherine and Evelyn Lockner, all of Baltimore; Mrs. Harvey Wildasin, Paul and Irene, near Mayberry.

Mr. and Mrs. John S. Bower accompanied Rev. and Mrs. Tome, of Hanover, to the joint meeting of the Usher's League and Mite Society of the Lutheran Church, Thursday night. Rev. Tome, pastor of St. Mark's, Hanover, delivered an excellent address on some of the characteristics of Abraham Lincoln. Refreshments were served after the program.

### CHURCH NOTICES.

This column is for the free use of all churches, for a brief announcement of services. Please do not elaborate. It is always understood that the public is invited.

Railroad Brotherhoods Demand Increases.

The country may be facing another big strike, this time by the Brotherhood of Trainmen and Conductors, apparently covering all of the railroad systems of the country, according to dispatches from Chicago, published this week. The demand is for increased pay, amounting, it is said to about \$1.00 a day, which, according to Railroad officials, would amount to about \$500,000,000 a year, while representatives of the employees say the amount would not exceed more than half that much.

This movement appears to be independent of about 70 cases now before the U. S. Labor Board from telegrams, dispatches, yardmen, switchmen, and others, all seeking increased pay.

Exposition Wants \$6,000,000.

An appropriation of \$6,000,000 has been urgently asked from Congress for the Philadelphia Sesqui-centennial Exposition. Without this appropriation it is pointed out that the plans will be very materially interfered with. It is claimed that the amount asked for is not as much as was given to Chicago and St. Louis expositions. Those promoting the Exposition claim it will be a National disgrace if the appropriation is not made.

Many home yards and country roads in Europe are shaded by fruit trees, the law and sense of property rights being strong enough to protect the fruit from theft.

### LAST PAGE EDITORIAL.

#### What is Popularity?

Who is popular? Is popularity a virtue? Should it be a main object in life? Are our best and wisest men necessarily popular? Is it possible to be popular with all classes of people? Can one hold his self-respect, and still be popular with all? What do we mean, usually, when we say a man, or woman, is very popular? When a man is popular, as a politician, what sort of man is he, in fact? Are we popular because we manage to side-step making disagreeable decisions, and dodge supporting moral or "reform" movements? Does popularity consist in trying to please everybody, and in not having decided opinions, or preferences, about anything? What virtues should we hold to, and what practices discard, in order to be popular? What is popularity, as you understand the common acceptance of the word? Tell us about it, if you will, over your own name—in a write-up of not over 250 words—for publication.

### Mausoleum to Be Built for Hero of Buena Vista

Louisville, Ky.—The body of Zachary Taylor, hero of the Mexican war and twelfth President of the United States, is at last to rest in ground owned by the government he served. A mausoleum is to be built to house the bodies of the victor of Buena Vista and his wife, giving lasting recognition to the man who defeated Gen. Santa Anna's army of 21,000 with 5,000 volunteers and added millions of square miles to the area of his native land. General Taylor's grave since 1850 has been marked with a granite shaft 21 feet high, six miles northeast of here. The future shrine of General Taylor, to be near the old one, will be of Indiana limestone and will inclose sarcophagi of verde antique marble to contain the bodies. Bronze doors with glazed upper panels will permit the interior, illuminated by a window in the rear wall, to be seen. The length of the mausoleum will be 16 feet.

### Rheims Backward in Recovering Its Status

Rheims—Rheims is among the few cities in France with empty apartments and a slumping industrial real estate market. The return of the population has not kept pace with rebuilding and restoration, as there are only 75,000 inhabitants, as compared with 117,000 before the war. To the world, Rheims generally is associated first with cathedrals, and then champagne. Before the war, however, it was an important industrial city, where wool weaving, spinning and bleaching employed 10,000 persons, now reduced to about one-third of that number. Land which at armistice time sold for 10 to 30 francs the square meter, when it was thought the city would be itself again in a short time, is now offered at from 5 to 10 francs. The "League for the Industrial, Commercial and Labor Development of Rheims" has been formed to come to the rescue.
