

## NEW HIGH SCHOOL BUILDING DEDICATED.

First Commencement Exercises held in the Auditorium of the New Building.

The opening and dedication of the new High School building, last Friday afternoon, was a decided success, the unfinished condition of the building and grounds not interfering with the program. Only expressions of approval were heard from the hundreds of visitors who viewed the building and its many commodious, well ventilated and lighted rooms.

The following program was carried out, with Supt. M. S. H. Unger, presiding:

Music—Chorus by School Children  
Invocation Rev. George A. Brown  
Presentation of New Building to Community, Supt. M. S. H. Unger  
Acceptance for the Community Rev. W. V. Garrett  
Dedication of the Building Rev. Guy P. Bready  
Music—Chorus of School Children  
Address Rev. Dr. A. N. Ward  
President Western Md. College  
Presentation of Flag and Bible by Washington Camp No. 2, P. O. S. of A.  
Address by Rev. W. L. Seabrook  
Acceptance for the School Rev. George A. Brown  
Benediction Rev. George A. Brown

Prof. Unger, in presenting the building to the community, made it clear that a modern school building such as this, not only conforms to the modern school plan, but represents a community center, for its benefit; not for partisan political or sectarian purposes, but for the betterment of social life; a place for meetings in the interest of farmers, or other community gatherings requiring an auditorium.

Rev. W. V. Garrett, in his acceptance of the building for the community, expressed general thanks to everybody who had part in the consummation of the project. He spoke of the home, the church and the school, as being essential to the best civilization, and that all should function harmoniously together; that when either one failed in its part of the triangular duty, the whole suffered in the total of best results possible; and the school, especially when properly equipped, was a most vital help to church and home.

The formal dedication was conducted by Rev. Guy P. Bready, using the following formula:

"By reason of the authority vested in me, I do now dedicate this building under the name of 'The Taneytown High and Elementary School Building,' to the glory of God, and to the cause of the education of youth in this community; through appointed and accepted methods, for the development of the latent physical, mental, and moral powers in our boys and girls; for the gaining of useful knowledge; for the promotion of citizenship; that by the inculcation of those principles upon which our organization as a nation rests, and by holding up the virtues of those who in times past have laid the broad foundations of our national and community life, and have passed on to us the generous inheritance of a wise government, a wholesome respect for law, and a sure sense of patriotism which guarantee forever our liberties, there may go

forth from this place, from year to year, young men and women, well fitted to uphold anywhere and under any conditions, the highest ideals of true Americanism.

We dedicate this building to the cause of helping boys and girls to find themselves, to find their own place in the economy of things or people, to give to society the best that is in them and thus pay their just debt to civilization, and at the same time to have for themselves all the joys of the higher life.

We dedicate this building to the cause of the mounding of noble character, a keen sense of honor, an unswerving consciousness of duty, in order that those who receive the instruction about to be given here, may take their rightful places as thinkers and leaders, and in whatever way destiny allows, help to recast the ideals and practices of society into finer and nobler forms.

Finally, we dedicate this building to the service of the community as a whole, that through its use, there may be developed a better community consciousness, a keener appreciation of the opportunities of education which the building and its equipment present to us, and that next to the Christian churches and our homes, it may be a sort of shrine to represent the best and truest in community life.

May God's blessing be upon it. May it stand for many years, and fulfil in every particular all our fondest hopes of what it shall mean for good. Amen.

The main address by Rev. Dr. A. N. Ward, president of Western Maryland College, represented the authoritative expressions of one widely experienced in educational affairs. He said the school was a Divine institution second only to the church; that it was Biblically incumbent on the grown-ups to care for the children, and do their full duty by them—the development of the child into mature citizenship; that what the children today will think of us 15 or 20 years hence, depends on our performance today. He stated that Carroll county, per-capita, was one of the richest counties in the whole United States—which meant in the world—but it was a regrettable fact that its schools were away below the average of the less able counties, in buildings and equipment. The future citizens of our country are in our care, and what has been done for Taneytown, should be done throughout the county and state.

Rev. W. L. Seabrook in his remarks presenting for the P. O. S. of A., a bible and flag to the school, quoted Van Dyke's "What Constitutes a School" leading up to the presentation of the thought that many of the wise expressions of the Bible represent wisdom today; that the presentation of Biblical ideals stands for easing the burdens that rest upon the shoulders of men; that the visions that our young people ought to have are exemplified in the bible and the flag—a forward-looking vision, a love of coun-

try, embodying patriotism, hope, faith and beauty; beauty of character, love and kindness, all the product in large part of well regulated schools based on the teachings of God's word.

Rev. Bready made a brief speech of acceptance, thanking the order for its appropriate gift. He also took occasion to express the thanks of the school to the Parent-Teachers' Association for the gift of the curtain for the stage, and for its other activities in behalf of the school.

At night the attendance was too large for the seating capacity of the auditorium, even with the use of many extra chairs. The program, in charge of Prof. J. L. Hunsberger, was as follows:

Processional High School  
Invocation Rev. T. T. Brown  
Selection by School Orchestra  
Chorus Boys' Glee Club  
Address Rev. Dr. Jos. Shubert  
Solo David Hess  
Presentation of Diplomas Prof. Unger  
Chorus Girls' Glee Club  
Benediction Rev. T. T. Brown

The address by Dr. Shubert was quite lengthy and very liberally interspersed with humor, and illustrative stories. He said that many who had passed through the experience of graduation, and some who had not, have made the mistake of losing ambition and not making a new start; all of us are students in the school of life, and all should be building castles and having dreams and ambitions; diplomas are not a guarantee of the future, but merely a recommendation of the holder's present ability; the world is waiting to discover whether you went through school, or whether the school went through you.

There are three persons naturally interested in the present proceedings—yourself, your parents and teachers. Parents are especially to be remembered for their sacrifices that made possible the graduation of their children; cited instances in which such sacrifices paid; suggested various good books for reading, and in various lines of thought gave the graduates excellent advice.

Prof. Unger presented diplomas to the graduates; in the order in which they appear in the cut, are as follows: Rear, Ralph Baumgardner, David Hess; Second row, Ira Witherow, Kenneth Gills, George Lambert, Charles Hesson, Herman Koutz; Centre, Viola Ohler, Margaret Crouse, Mary Shriver; Front row, Geneva Boyd, Thelma Hahn, Dorothy Spangler, Helen Fink, Helen Eyer, Helen Roop, Ida Edwards.

Prof. Unger made it clear to the graduates that their education was not free—except to them; the average cost of each graduate to the county is approximately \$1000., therefore the cost of the present class is \$15,000, and the public has a right to expect adequate return from the graduates, through their influence on society at large. He also made it clear that the expensive new school building and equipment, made possible by the taxpayers of the county, demanded

(Continued on Fifth Page.)

THE GRADUATING CLASS

### TO CANNERS AND GROWERS.

Laws and Regulations Concerning Canned Food Products.

To the end that ignorance of the law may not be pleaded as an excuse by those who may be apprehended in its violation. The State Department of Health deems it important to address the canners and the growers of canning crops of Maryland, calling their attention to the Acts of the Legislature of 1890, 1910, 1914 and 1920. "These acts," said Mr. A. L. Sullivan, Chief of the State Bureau of Food and Drugs:

"Prohibit the sale of decomposed and unwholesome or otherwise adulterated food products, require good sanitary conditions in food producing establishments, such as canneries, and prohibit the adulteration of canned tomatoes with water, skin and core juice, pulp or other substitutes.

"Canneries are subject to regular inspection and are required to comply with the law. Canners are urged to improve sanitary conditions where necessary and to provide a pure water supply for canning processes and for their employees, where living quarters for employees are provided it is required that such living quarters shall be in a dry, well-drained location. Sanitary toilets, cleaned regularly, must be available, together with a regular garbage disposal system. Canner waste must be disposed of in such a manner as not to create nuisances nor pollute streams.

"The laws of Maryland prohibit the sale of fresh fruits and vegetables which are decomposed, mouldy or tainted or otherwise unwholesome. Anyone selling such fruits or vegetables which are rotten, mouldy, worm infested or otherwise unfit for human consumption, in whole or in part, violates the state food laws and subject himself to prosecution.

"The inspectors of the Department are now preparing for the work they are to do in the canneries and among the growers of canning crops of Maryland during the coming season. The Department asks for them the attention which, as officers of the law, they are entitled to receive. It expects each inspector to be courteous and frank in calling to the attention of either canners or growers any objectionable conditions found.

"As to the State food laws, the Department is without choice, solemnly pledged to their enforcement. It must and will enforce them. Canners may greatly aid to the usefulness and efficiency of the Department by co-operation with its constructive purposes and by making known such illicit and unfair practices as may come to their attention so that they may be investigated and removed.

"The Department urges that a spirit of co-operation be maintained between growers and canners to the end that the reputation of Maryland canned foods will be greatly increased, and the industry made prosperous. Many thinking persons connected with the canning industry believe that Maryland canners must take a step forward and establish a reputation for quality if the industry is to grow and maintain its markets. Every year brings increasing competition from progressive States which are enlarging their canning industry.

"It is hoped that canners will comply fully with the laws and take progressive steps for the betterment of the industry."

### Firemen's Convention Ends.

The State Firemen's convention closed, last Friday. At the business session, the standardization of coupling threads on all fire apparatus and plugs throughout the state, was urged. Discussion of the best methods of fighting fire was engaged in by both city and county speakers.

Following the adjournment of the convention there was a parade of decorated automobiles in the afternoon. The prizes offered by the association for the best decorated cars were awarded as follows: First, John C. Kemper; second, Mrs. Paul Wimer; and third, Leslie Brown.

J. Pearre Wantz was awarded the prize for the best decorated residence and the Times Printing Company received the prize for the best decorated business establishment.

A 750-yard hose reel run was won by the Brunswick Fire Company with a time of 44½ minutes. The Taneytown Fire Company was second, with 45 minutes. Taneytown would have easily won this race had it not been that one of the men fell, causing another to fall, and this accident with the penalty attached, was responsible for second place. Taneytown also won second prize in fat-man's race, \$2.50; second in 200-yard foot race \$5.00; and first in 40-yard equipment race, \$5.00; making a total for 6 prizes won by the Company \$122.50.

Clarence Eckenrode, of the Pikeville Fire Company, won the 100-yard dash for fat man, and John Welsh, of the Reisterstown company, won the 200-yard dash. The 320-yard relay race was won by the Brunswick Company.

### An Appreciated Letter.

A letter from H. C. Edwards, National Military Home, Dayton, O., in renewing three subscriptions, to The Record, says:

"Many thanks for your good paper, I want it as long as I live. A friend of mine here, from Indiana, says it is the best paper that comes to Company 8, and we have a good many."

I get mine every Monday morning and would miss it so much. Keep up the good work; the "drys" are sure to win in the end. With best wishes for health and success."

## THE C. E. CONVENTION IN TANEYTOWN.

County Endeavorers Will Hold a Fine Program.

The annual Carroll County C. E. Convention will be held in the Lutheran Church, Taneytown, next Thursday, June 24. The program indicates an unusually excellent offering of features, and the arrangements made are such that those who attend will be well cared for. The chairmen of committees are as follows: Registration, Miss Mabel Leister; Entertainment, Mrs. Lavina Fringer; Decoration, Miss Carrie Winter; Music, Miss Mary Hesson; Nomination, Harry B. Fogle.

One of the features of the convention will be the presence of C. Harold Lowden, prominent music composer and editor, of Philadelphia, who will serve as song leader. The Union Bridge Male Quartet will be present at the night session.

The opening session begins at 9:00 o'clock, followed by a devotional service in charge of Rev. Byler, of Westminster; address by County President, M. C. Fuss; Greetings by the pastor, Rev. W. V. Garrett, and reports of county officers. The address of the morning will be made by Rev. E. A. Sexsmith, Secretary of young people's work of the M. P. Church, Baltimore.

Afternoon session, 1:45; Devotional service by Dr. Elderdice, of Westminster; reports of committees, and addresses by Rev. John S. Adam, of Middletown; Miss Brenda L. Melhouse, Jr., Sec. United Lutheran Church; Rev. Roland B. Lutz, Baltimore, pastor Faith Presbyterian Church.

Evening session, 7:00; Devotional service by Rev. George Brown, Taneytown; pageant "God's Beautiful World" under the direction of Mrs. W. V. Garrett, Taneytown; Address by Rev. H. H. Beidelman, Baltimore, pastor Calvary Lutheran Church, and various routine events.

### Proceedings of the Circuit Court.

No. 32, Emma E. Blizard vs. Laura Frick, action of tort. Tried before a Jury; verdict for the Plaintiff with damages assessed at \$5000. and costs of suit. Brown for Plaintiff and Weant and Shipley for defendant.

No. 57, Jacob S. Gorsuch vs. Bernard Singer, assumpsit. Tried before the Jury; verdict for plaintiff, with damages assessed at \$200.00 and costs of suit. Steele for plaintiff and Weant and Shipley for defendant.

No. 60, John L. Bennett, for his use and the use of the Aetna Casualty & Surety Co., vs. Norris C. Taylor and Walter L. Taylor, co-partners trading as the Behtel Heights Canning Co., damages. Tried before the Court; verdict for the plaintiff with damages assessed at \$1200.00 and costs of suit. Tschudi and Steele for plaintiff and Weant & Shipley for defendant.

Jury discharged until Thursday morning of June 17, 1926, at 10:00 o'clock, A. M.

### Proceedings of the Orphans' Court.

Susie Vansant, executrix of Rebecca Vansant, deceased, received order to set stock and bonds.

Augustus E. Wright, administrator of Eugene C. Wright, deceased, reported sale of personal property.

Arthur S. Stevenson, administrator of Elizabeth A. Rodkey, deceased, returned inventories of personal property, debts and money.

Ellen C. Wantz and Walter J. Wantz, administrators of Harvey J. Wantz, deceased, returned inventories of personal property and money and received order to sell personal property.

Charles A. Nightingale and George D. Nightingale, executors of George Nightingale, deceased, returned inventory of personal property.

Cora B. Franklin and Grace M. Bair administrators of Catharine E. Franklin, deceased, returned inventories of personal property and debts and received order to sell personal property.

R. Russell Rupp, William E. Miller, and Westminster Deposit and Trust Company, executors of George R. Rupp, deceased, settled their first account.

Westminster Deposit and Trust Company was appointed guardian of Lawrence Myers Russell.

The sale of real estate of Elizabeth C. Metz, deceased, was finally ratified by the Court.

The sale of real estate of B. Peyton Poole, deceased, was finally ratified by the Court.

### A Great Catholic Congress.

The greatest assembly of Catholics ever held in the world, will be the Eucharistic congress, in Chicago, beginning next Sunday, with attendance not only from this country but Canada and Mexico. Eight foreign Cardinals will be present. The meetings will be open to the public, except the opening service Sunday morning at the Holy Main Cathedral. The attendance is expected to run away up into the hundreds of thousands.

Artificial fogs are used in Norway to prevent the freezing of crops.

The world's population is increasing at the rate of about twenty million a year.

### KENT REDUCES TAXES.

One Maryland County Cuts Tax Rate 16 Cents.

Taxpayers of Kent county are wondering how it happened that the County Commissioners have made the very substantial reduction of 16 cents in the tax rate for this year, but it appears largely due to the fact that about \$25,000 in delinquent taxes have been collected during the year.

The assessable basis of all real and personal property in the county is given as \$14,214,567; ordinary business corporations are assessed at \$464,295, bank shares owned by individuals at \$455,662, the Mutual Fire Insurance Company, of Kent county, assessed at \$96,930 and securities owned at \$477,296.

No material reductions have been made in any of the large appropriations, but these are very much less than for many other counties—notably the appropriation of \$114,000 for schools and \$28,429 for roads.

The question will now be asked, whether other counties might not also collect up back taxes?

### Doctors Are Advertising!

Good, legitimate and entirely "ethical" physicians are joining in running large advertising copy for the entire profession in some communities. Des Moines papers have recently been carrying large spaces for the doctors of that city and some newspapers in smaller towns have also had good spaces paid for by the local physicians.

The copy is not for individual advertising, but collectively it is the best thing the doctors ever had done for them, no doubt. It calls attention to their long study and preparation for the profession; how they stand ready day and night for service to the community and suffering humanity; how they are there with skill and advice when the baby comes and how they serve to alleviate pain and bring comfort and save life and all that.

Then they get their direct returns by asking if the reader has paid his doctor for services rendered, or if he is letting the doctor wait till everybody else is paid first, and suggesting that if so, why not pay the doctor a little each month and thus "take the mortgage off their baby." It is mighty good propaganda, and while no individual doctor's name is signed to such advertising, the newspaper gets pay from them individually by dividing up the account and collecting from each one. Five doctors at three dollars each may thus pay for a good-sized space that will do them a lot of good, and at the same time be legitimate and ethical.—Iowa Press Bulletin.

### The Present Week's Issue.

We have no apology to make for giving such large space in the present issue to the dedication of the new High School building, and to the graduation program, as the event is one of much more than local interest. Necessarily, the customary make-up of the issue has been interfered with, and a number of articles that would ordinarily have been given first page space, will be found elsewhere, largely on page 5.

### "Drys" Win in New Jersey.

Notwithstanding two "wet" U. S. Senators, and a Governor, the New Jersey primaries, this week was a victory for "dry" candidates, taking the result as a whole. The vote was light, however, and there were other issues that obscured the "wet" and "dry" question. The Democratic candidates nominated were mostly "wet."

### Heavy Crop Damages.

Storm and rain in the mid-west, this week, damaged crops and property estimated at \$2,000,000. The heaviest losses were in Illinois, Iowa, Missouri and Nebraska, and loss to the wheat crop was the heaviest. Wind, as well as lightning, supplemented the rain loss. Several persons are reported killed. At Rockford, Ill., four inches of rain fell in a half-hour, on Monday.

### \$3,000,000 Lutheran Seminary.

What is said to have been the largest gathering of Lutherans ever assembled in this country, was at the dedication of Concordia Seminary, in St. Louis, last Sunday. The Seminary is to cost \$3,000,000, and is being built by Missouri Synod Lutherans, who are not part of the United Lutheran body.

### New Shoe Factory at Hanover.

The Newark Shoe Company is planning for the erection of a large shoe factory at McSherrystown, Pa., just outside of Hanover. The plant, it is said, will be larger than the one at Westminster, and will have a considerably larger payroll. Our information is that the location has been secured, and estimates are being made for construction work.

### Free Training in Bible.

Young men and women are offered a free training by the Moody Bible Institute, of Chicago, for almost any kind of Christian service in the home or foreign field. The Institute has an efficient employment bureau which also helps students to obtain work for their spare hours, by which they are able to earn enough to pay their board and lodging. The present is the best time to secure reservations for the opening of the Fall term in September.

## THE CARROLL RECORD

(NON-PARTISAN)

Published every Friday at Taneytown, Md., by The Carroll Record Company.  
P. B. ENGLAR, Editor and Manager.

### BOARD OF DIRECTORS.

G. A. ARNOLD, V. Pres. JOHN S. BOWER  
G. W. WILT, Sec'y. D. J. HESSON  
JAS. BUFFINGTON. P. B. ENGLAR

TERMS—Strictly cash in advance. One year, \$1.50; 6 months, \$1.00; 3 months, 50c; 1 month, 25c; 4 months, 50c; 3 months, 40c; single copies, 3c.

The label on paper contains date to which the subscription has been paid.

All subscriptions will be discontinued on expiration, according to Governmental orders.

ADVERTISING rates will be given on application, after the character of the business has been definitely stated, together with information as to space, position, and length of contract. The publisher reserves the privilege of declining all offers for space.

All advertisements for 2nd, 3rd, 6th, and 7th pages must be in our office by Tuesday morning each week; otherwise, insertion cannot be guaranteed until the following week.

FRIDAY, JUNE 18, 1926.

Entered at Taneytown Postoffice as Second Class Matter.

All articles on this page are either original, or properly credited. This has always been a fixed rule with this office, and we suggest the adoption of it by our exchanges.

### Un-real Americans.

If we enter into a thorough study of the various great questions that agitate and disorganize public sentiment in this country, it will be found to lead, directly or indirectly, to un-real Americans—the class of citizens who wield the ballot, but who were either foreign born, or not many stages removed from it.

This is demonstrated in the fact that in agricultural states—states without very large cities, or without the manufacturing concerns that largely employ foreign, or near-foreign, labor—there is comparative peace and order and obedience to law. This is the rule; and where there are exceptions to it, it is largely because citizens have imbibed the foreign spirit—are not real-Americans in thought and purpose.

This is not always apparent on the face of things, but we do not stop at surface indications when hunting for underlying causes. Leadership is one thing, but the influences back of leaders is often quite a different thing. Men who seek power, influence, preferment—leadership, in fact—use the material at hand with which to make up a following, or a means to an end; so, we have leaders vehemently urging measures that they would not think of urging, had they come from some other constituency, and they do it for the sake of "their job."

Foreign influences are growing in this country—growing insidiously—and they are not coming from the better classes, the old-time foreigners who came here to take up the work of pioneering and to build up homes and a genuinely free government. The point of saturation, when the wrong influences will predominate, has not yet been reached, and perhaps never will be, but there is enough of it to cause thoughtful good citizens to do a lot of wise thinking and acting.

### Taxes and Prohibition.

The reason why these two questions are so much in evidence in all newspapers and periodicals that aim to keep their readers informed with the progress of events, is because these questions are so much before the public. Newspapers do not make news—they publish it.

So, if at times we become weary of the "wet" and "dry" questions, and of the one concerning taxation, we must look elsewhere than to the public press for the cause of the monotony. Both these questions would be greatly less long-lived if the people themselves would waken up and go right at their settlement; and so far as law-making bodies are concerned, they are waiting to hear the voice of the people on them in an unmistakable verdict.

Congress has been killing many days of valuable time at the present session listening to long-winded speeches on prohibition, pro and con; and the public has in turn been merely listening to the same speeches, second-hand, with the result that neither side has been getting anywhere.

But, after the November elections there will be a great deal less heard about "wet" and "dry." The question of taxes, however, is one for real practical discussion during the Fall and early winter, before the legislature meets; if indeed it should not come up before the candidates are nominated, and before their election.

### Republican Party Troubles.

The outlook for the Republican party in the Congressional and Senatorial elections this Fall, as well as in some elections for state officers, is not as bright as it might be. The Republican party, next to the regular prohibition party—that now cuts very little figure—has always been considered the "dry" party, by comparison with the Democratic party. And this

year promises a split in the party, serious in dimensions, over the prohibition enforcement issue.

The "farm bloc" also, are strongest in Republican states, and these, in connection with certain "insurgent" brands of Republicans, are quite apt to give the regular, or administration end of the party, serious trouble. In a number of otherwise rock-ribbed Republican states, these two splits are present, either singly or together, and the G. O. P. is apparently facing uncertain results, where ordinarily there should be perfect assurance of success.

Even in Pennsylvania, where the road to the U. S. Senatorship is usually a walk-over, thousands of "dry," and other kinds of Republicans, say they will not support Mr. Vare, who won the nomination in a triangular fight, but will vote for any fully qualified "dry" Democratic, or independent candidate. A lot of these supported Gov. Pinchot for the Senatorship.

There is also a political apathy that so far has shown itself strongest in Republican ranks; and, there is not the working together of the party, especially in the Senate, that stands for encouragement for this fall's elections. Now the Iowa upset, in which Senator Cummins was beaten by the La Follette brand of Republican—Brookhart—further muddles the horizon, and there is more than a clear-sighted vision needed to predict how things are going to wind-up in that state.

Perhaps the time is here when the Republican party needs to have an old-time house-cleaning, and when the disgruntled minorities in both parties ought to get together in a party of their own, instead of using labels that do not belong to them. When Republicanism does not mean the same thing, practically in all the states; and to a perhaps lesser extent when Democracy does not mean the same thing, it is time for a new political religion to start up.

The situation is not particularly one for Democratic rejoicing, except temporarily and on the ground that anything that afflicts the enemy is desirable; for 1928 is coming along and is apt to be "loaded" just as was 1924, with trouble a plenty about the time of the Presidential nominating convention. It is also specially the fact that the Democratic outlook is not improved because of its increased party solidarity, but because of Republican wrangling.

### Logical Result of Direct Primary System.

The recent primary election contest in Pennsylvania, is but another of the direct primaries held in recent years that resulted in tremendously heavy expenditures by, or for, candidates. We heard it argued, years ago that a "poor man" had no chance to get a good nomination because he did not have enough money to buy the necessary influence at party conventions; hence, the direct primary would give him an equal show with the "rich" candidates.

The "equalizing" result for the "poor" man has not materialized; in fact, he has less show than ever, and the only change is, the "rich" ones have to spend more. Another opening for money in the direct primary, is the chance to finance campaigns for party "vote splitters," as an excellent method of killing off the most promising candidates and at the same time splitting up a party into factions.

In a few years, if the primary law continues in operation, our legislative bodies and high official positions will be filled by untried soldiers of fortune, and men who have spent their lives in a study of politics and the needs of the country as a whole, will be strictly out of the running. Speaking of the Pennsylvania primary, the Philadelphia Ledger says:

"Gifford Pinchot testifies he expended about \$200,000 in his ill-starred attempt to become Senator from Pennsylvania."

W. L. Mellon admits the Pepper-Fisher campaign in the thirty-one western counties cost at least \$310,000. The Mellon-Pepper-Fisher-Grundy expenditures in the thirty-six eastern counties will hardly be less.

In this battle royal of the dollars the Vare campaigners were doing their best to keep up the Pinchot bank roll and the Pepper-Fisher fund.

All factions raised as much money as they could and spent all they could get. Votes may not have been bought, but the results were the same as if money had been handled direct to the voter. So-called "watchers" everywhere were subsidized. Hundreds of thousands of dollars went for "getting out the vote." A golden tide rolled over Pennsylvania, seeping and flowing into every county, ward and division of the Commonwealth.

A primary is supposed to be a battle of ballots. They have become a battle of checkbooks. This is not the fault of the candidates. Most men would prefer not to wear the golden collar around their necks which the primary forges.

Nor is it the fault of political organizations and machines. The direct primary forces these expenditures. A candidate without funds, who has no political "angel," may as

well not offer himself. He is whipped before he starts.

These revelations from the Pennsylvania primary are the logical results of the direct primary system. If the outraged citizen who looks with horror on this buying and selling of nominations does not like it, he should move to wipe out that hypocritical, wasteful and dangerous system."

### The Best Feed in the World

is fresh feed, properly compounded Rein-o-la Buttermilk Starting Food is made from sound grains only, and made fresh each week. Try it and be safe.—Reindollar Bros. & Co. 4-9-ff

### Alchemists of Middle

#### Ages Not Charlatans

"The alchemists of three or four centuries ago were the chemists of their day," says Dr. E. E. Free, writing in the Forum. "They were honest, industrious, respected. It is always unwise to imagine that the great men of another age were either knaves or fools. We define gold, today, in a chemical fashion. We know of certain chemical tests to which the atom of no element except gold will respond. We apply these tests. If they fail we say that the substance before us is not gold, no matter how gilt it may be nor how gold-like may be its properties."

"This is a new way to define gold. The alchemists had no acquaintance with atoms nor were they much concerned with chemical tests. When they wanted gold, what they wanted was something which would look like gold, would feel like gold, would behave like gold against the air and water and fire. Such tests constituted their definition of gold. If a metal met them, that was enough."

"It is distinctly possible that a number of the alchemical procedures really did produce just this—not gold as we define it, but something just as good; something that was gold as the alchemists defined it. A number of them recorded that they had made gold; they left directions for making it. Either they were frightful liars or they had made something that suited them. And it is not very probable that they were liars. We know how to make today a number of alloys that look enough like gold to be their twin. Even jewelers have been fooled by some of these alloys. Probably this is just what a few of our ancient fellow chemists did and what they considered, rightly enough, to be a considerable success."

### Sierra Leone as Home

#### for Liberated Slaves

The first attempt to found an African settlement for liberated slaves was made 139 years ago, when Sierra Leone, on the west coast of Africa, was organized for that purpose. Doctor Smeathman was author of the scheme, and Captain Thompson, in 1786, purchased the territory from "King Tom" of the Timmanehs, and began the settlement with 400 negroes and 60 Europeans.

The hostility of the natives and the complete shiftlessness of the black colonists resulted in the complete failure of the first settlement. In 1791 the survivors were collected and a new one was started with a colony of 1,200 negroes from Nova Scotia and the Bahamas. The American negroes were more successful than the improvident blacks from English territory had been, and Sierra Leone became a prosperous colony. The present republic of Liberia was started as a refuge for escaped slaves and freed blacks by the American Colonization society in 1822, but it was not until 1847 that it became an independent republic.

### When Greville Slipped

Few diaries have evoked more bitterness than that of Charles Greville, whose unexpurgated records are about to be published in America. It will be interesting to see whether one incident is set down in them, for it very closely concerned the diarist himself. When Lord Clarendon became a privy counselor he called on Greville, then clerk to the council, with a check to pay the fees he thought were due. "What a good fellow you are!" exclaimed Greville incautiously. "You have no idea of the trouble I have to get them from some people. You know I have no legal right to recovery." "Haven't you?" said Clarendon, who had no reason to love the diarist, and threw his check in the fire. The story became known and it is doubtful if Greville ever received another fee.—Manchester Guardian.

### Sorry Now

Gowanda, N. Y.—Some sixteen Indian maids are sorry they had their hair bobbed. Because of their short tresses a movie company would not take them to Florida with 125 others.

### Woman Afraid to

#### Eat Anything

"I was afraid to eat because I always had stomach trouble afterwards. Since taking Adlerika I can eat and feel fine." (Signed) Mrs. A. Howard. ONE spoonful Adlerika removes GAS and often brings surprising relief to the stomach. Stops that full, bloated feeling. Removes old waste matter from intestines and makes you feel happy and cheerful. Excellent for obstinate constipation. R. S. McKinney, Druggist.

# Hesson's Department Store

ON THE SQUARE

## A FINE DISPLAY

— OR —

## High Grade Merchandise FOR SPRING NEEDS.

You will find on display in our store a very attractive lot of Merchandise to care for the Spring needs. Quality, the best styles and attractive prices have been kept in mind, in making our selections for this season, and we feel sure you will be convinced that we have not failed in our efforts. It will pay you to look over our line of Spring Merchandise before making your purchases.

### Dress Goods.

We have a fine assortment of the newest materials in Silk and Cotton for Spring. Color fast materials of beautiful designs in good widths and at lower prices.

### Hosiery for Spring.

We are showing a complete line of Silk Hose for women, in all the leading shades for Spring for 49c per pair up.

For Silk Hose of quality and merit that will measure up to all that is claimed by the door to door canvasser we would recommend "Humming Bird, Silver Star, or Kayser brands."

Also a large assortment of Half Hose in Silk and Lisle threads and fancy designs for men, three-quarter and half Hose for children in pretty colors.

### Taylor Made Suits.

There is a lot of satisfaction in knowing that the Suit you wear is made to fit. That is the way "Taylor" makes them. He is not satisfied for them to be any other way.

When you are ready for that new Suit for Spring it will pay you to call and look over our line of samples and note the beautiful fabrics, excellent styles and the wonderful values.

### Railway Gauge Varies

The standard gauge of railways is 4 feet 8½ inches in the United States, Canada, Great Britain, a number of countries on the continent of Europe, etc., it being the gauge which prevails on probably three-fourths of the railways of the globe. There have been various different gauges, and in fact a number thereof are in use at the present day. The old broad gauge was 7 feet. There are narrow-gauge lines of 3 feet. In Ireland the usual gauge is 5 feet 3 inches; in France there are lines of 4 feet 9 inches; in Spain and Portugal the normal gauge is 5 feet 5½ inches; in Russia, 5 feet; in India, the prevailing gauge is 5 feet 6 inches; in the British colonies, 3 feet 6 inches; in South America, 5 feet 6 inches, with various others.

### Celtic History

Celtic-speaking peoples occupied a very wide territory of old, spreading from central Europe, where the first records of them exist, far to the west, southwest and even southeast. They settled in Gaul perhaps about 1000 B. C., and were probably at the height of their power about 400 B. C. Later they were under constant pressure from the Germanic tribes to the north, and saw most of their territories conquered by the Romans, from the south. They maintained their independence in the British Isles, though, for centuries.

### State's Big Fur "Crop"

The conservation department of Louisiana says that the annual yield of Louisiana muskrats is about \$6,000,000, and put that state at the head of all in the Union in fur production. But the trade hardly hears of Louisiana muskrats. Instead, the furs are marketed as Southern muskrats.

### ON THE HONOR ROLL OF BANKS

## About Planting Things

Corn grows because it is planted in the ground and taken care of. Its the same with wheat, cotton and other crops. Just a matter of planting and cultivation.

The same thing is true of money. Place it on deposit in a good bank and they will safeguard it for you. Is there anyone so destitute that they could not deposit a dollar once a month? That amount deposited regularly for a period of 50 years would amount to \$3,693.00 at compound interest. That's how money grows.

Resources Over \$1,300,000.00.

## FOR SALE

Stucco Bungalow, on York St., 7 Rooms, Bath, Closets. Built-in Bath and all modern plumbing. Hot water Heating Plant. Built-in Breakfast Alcove and Kitchen Cabinet. Reasonable price.

## SPECIAL \$1.00 Stationery Offer.

It is socially proper as well as business-like to use printed stationery. It is also economical and apt to result in having paper and envelopes on hand, when needed. We have filled hundreds of orders received by mail for our \$1.00 offer, and have not had a single complaint.

200 sheets Hammermill Bond paper, 5½x8½, unruled, padded on request, with 100 size 6½ envelopes to match.

Printed either in dark blue, or black. Not over 4 lines neat type, the same form on both paper and envelopes. Envelopes printed on back or front. Unless otherwise directed, orders for ladies will be printed on back, and for gentlemen, on front.

Instead of name, an Old English initial letter can be used, if desired. Initial stationery should have a box number, or street address.

When desired, ruled paper will be furnished (167 sheets) with 100 size 6½ envelopes.

We do not print envelopes alone, or paper alone, at 50c.

Cash with order, when sent by mail. Write instructions, and copy for the printing, very plainly. When mailed to 3rd and 4th Zones, add 5c; to 5th Zone, or further, add 10c.

THE CARROLL RECORD CO., TANEYTOWN, MD.

The Shoe and Hat Man,

22 West Main St.,

Westminster, Md.

### Telling a Stranger

My daughter was to be married at home and we had to borrow some chairs for the guests. I spoke to a neighbor and she promised to loan me some. The day before the big event I spoke to her daughter on the car. During the conversation I asked her to remind her mother of the promise.

The girl looked puzzled, but finally said she would do so. A few moments later a friend of the girl entered the car and greeted her with the words, "Hello, Marie!"

I was stunned, as the daughter of my friend was Alice. I looked at the girl more closely and discovered she was not Alice at all, and with that I felt quite a hot wave, as I had been telling a perfect stranger all the details of the oncoming event.—Chicago Tribune.

### Nothing Wrong

They met for the first time for some months.

"Where have you been, John?" said James. "Haven't been laid up, have you?"

"Yes; I've been laid up for a bit." "You're not looking fit; hope it's nothing serious."

"Oh, nothing much—but this is the first time I've been out for three months."

"Really? What was wrong?" "Nothing, really, only the jury wouldn't believe it!"

### Glass-Making Secret

The manufacture of flaked glass for office partitions and windows is based on the use of automatically controlled gas heating.

The process is similar to that employed by the American Indians in making flint arrowheads. The flint was shaped by heating the stone and dropping cold water on it, each drop causing a chip of stone to fly off because of the sudden contraction caused by the water.

The glass to be treated is first sand-blasted. This produces a milky frosted surface. The glass is then coated with glue and subjected to a gradual drying process in a gas-fired oven. The drying causes the glue to contract and this in turn makes the glass shrink and shrivel off in flakes.

### Whale Long Pursued

Whale fishing is a far more ancient calling than most people know. Primitive man's first acquaintance with the creature was probably gained from stranded specimens; exactly when the first boat put to sea in pursuit of one of the monsters history does not record. But King Alfred's description of Other's voyage to the White sea is an indication that the Norwegians were expert at whaling a thousand years ago. The Basques of certain Pyrenean districts carried on a lucrative trade in whale oil in the Tenth century; they were fearless hunters of the black, or Atlantic, whale.

### "Ghost-Fear" Strong

Among Real Romanys

If, during a country stroll, you come to a clear-running stream or river, and notice at the bottom a collection of broken crockery, kettles, pans, and so on, you may be sure that a gypsy camp is near, and that a gypsy has died there.

On that day after the funeral of a real Romany, the relations burn all the clothes and other consumable belongings of the dead person. Then all the crockery and utensils are broken and solemnly thrown into the nearest running water.

Behind this queer custom lies "ghost-fear." It is believed that, so long as any of the possessions of a dead gypsy remain intact, his ghost will "walk," and ill-luck and misfortune will dog the camp. Sometimes, so strong is this superstition, even the horse of a dead gypsy is destroyed.

Gypsies never utter the names of the dead, and for a long time after a death will not eat or drink anything that was a favorite with the departed. This is "ghost-fear" again.

Rarely, if ever, are flowers placed on a gypsy's grave. Some little possession that they loved in life—a toy for a child, or a blackened teapot, broken first, for an old woman, and so on—is the usual choice.

### Huguenot Was First

New York Physician

Dr. Johannes La Montagne was the first educated man of medicine to settle down in the little Dutch town of what is now New York and hang out his shingle officially. He was a Huguenot gentleman of forty-two, a man who had obtained a splendid medical and general background at the University of Leyden. He had married a girl named Rachel DeForest, whose family had moved to this new country, and the letters home had told of such promise that he decided to try it for himself.

So in 1637 he came. Almost immediately he assumed an important place in the community life. His reputation gave him professional as well as social position and he became one of the big men of the day. Governor Kieft appointed him to his council within a year after his arrival, and he was retained also by Governor Stuyvesant when that slightly crusty Dutchman took the reins.

Doctor La Montagne treated his first case in what are known as these parts as long ago as 1637.—New York Evening Post.

### Wood-Carved Deer

A pair of wood-carved deer, more than 100 years old, are on exhibition at Bath, Maine. The carving is perfect down to the minutest detail, even to the ruffled hair on their backs. They are the work of an artist possessed with an abundance of patience.

## CORRESPONDENCE

Latest Items of Local News Furnished  
By Our Regular Staff of Writers

All communications for this department must be signed by the author; nor for publication, but as an evidence that the items contributor are legitimate and correct. Items based on mere rumor, or such as are likely to give offense, are not wanted. We desire correspondence to reach our office on Thursday, if at all possible. It will be necessary, therefore, for most letters to be mailed on Wednesday, or by Fast Mail, sent on W. M. R. R. Thursday morning. Letters mailed on Thursday evening may not reach us in time.

## UNIONTOWN.

Children's-day exercises will be held Sunday, June 20, in the M. P. Church at 8:00. A Missionary program will be given.

A cantata entitled, "Praiseful notes from Summer Land," will be given by the Lutheran S. S., on June 27, at 8. Offering for Loysville Orphan's Home.

Charles Crumbacker, who has been ill with double pneumonia the past week, is gradually improving. Sister Ethel, of the Deaconess' Mother House, and Miss Annie McMahon, of this place, have been helping nurse him.

Miss Ida Mering spent several days in the city, latter part of week.

Dr. J. J. Weaver, left for Washington, Monday, having spent last week here. His friends are always glad to see him back in his home town.

George Slonaker further improved his property by having a concrete pavement laid in front of his lawn and house.

Miss Catherine Gilbert entertained a number of her young friends to tea, on Sunday evening.

Luther Hiteshew visited in town, Sunday. Howard Myers spent the day with his parents, Mr. and Mrs. Solomon Myers.

Mr. and Mrs. Robert Roland and daughter, Lois of Hagerstown, visited at C. Edgar Myers', on Sunday.

Miss Anna Baust entertained the M. P. Missionary Society, Tuesday evening.

Miss Blanche Devilbiss had as guests, on Sunday, Misses Ethel Royer, Margaret Bush, Ruth Owens, of near Westminster.

Mr. and Mrs. Roy Beck and son, of Baltimore, are visiting at Charles Fritz's.

Mrs. Sophia Staub returned home, Tuesday, after some months stay with her daughter, Mrs. Guy Babylon, having been on the sick list most of the time. Miss Florence Warehime is staying with her.

Mrs. Flora Shriner is spending some time helping care for Mrs. Louisa Weaver, in Westminster.

Mr. and Mrs. C. E. Steele, Frederick, visited at D. Myers Englar's, for the week-end.

Mr. and Mrs. Harry Fowler entertained, on Sunday, Mr. and Mrs. Raymond Brown, Mrs. Charles Fowler, Misses Ivy and Vera Fowler, New Windsor; Mr. and Mrs. Harry Billmyer, Mrs. Moore and daughter and Luther Hiteshew, Baltimore.

B. L. Waltz is suffering from a very sore leg. Among the visitors at his house, on Sunday, were: Mr. and Mrs. Isaac Waltz, Miami, Fla.; George Waltz, N. Y.; Herbert Waltz and daughter, Ethel, Waynesboro.

Katherine Dickensheets is visiting her grand-parents, Mr. and Mrs. Benton Flater.

Mrs. Elizabeth Billmyer is spending some time with her sister, Mrs. Shellman Saltrider, Greenmount.

Tressler Orphans' Home, Loysville, Pa., a Lutheran institution, supported by six Synods, founded in 1868, now has 323 children, with an annual expense of \$173,975.00. The boys' band of forty-one instruments from this institution gave a concert at Winter's, for Union Bridge Fire Company and Grange, Saturday, June 12, offering to band \$96.00. Sunday, June 13, band gave a concert for St. Luke (Winter's) offering to band \$160.00. Monday, June 14, 8:00, band gave concert for Baust Lutheran, offering \$106.76. The home of the band, and the local pastor greatly appreciates such local support and band entertainment.

## PLEASANT VALLEY.

Sunday School, Sunday morning, at 9:00, followed by church, at 10:00, by Rev. A. G. Wolf. Young People's Meeting, Sunday evening, at 7:30. Leaders, Mrs. Jacob Frock and Mrs. Paul Myers.

A very large crowd attended the Children's-day Service, Sunday evening. A very good program was rendered by the children of the Sunday School.

The Pleasant Valley Packing Company will open on Thursday, by canning peas.

## KEYSVILLE.

Two events are arranged to be held at Stonesifer's Grove, near Keysville, in the near future. The first is a Sunday School rally, under the auspices of the State S. S. Association on the afternoon of Sunday, June 27, at 2:00.

On the evening of Sunday, July 4, the Detour Band will give a sacred concert at 7:30 o'clock. The public is cordially invited to attend both these gatherings.

Little Miss Mildred Baumgardner is spending a few days with her grand-parents, Peter Baumgardner and wife, Roscoe Kiser and wife, of Overlea, spent Sunday at the same place.

Our school teacher, Miss Mary Noonan, has returned to her home, at Savage, Md., after spending a week with Charles Cluts and wife, after the close of school.

Little Madeline Boller, of Rocky Ridge, is spending some time with her cousin, Virginia Cluts.

Children's-day service at the Lutheran church, this Sunday evening, at 8 o'clock, Preaching in the afternoon at 2 o'clock.

Nathan Baile, who is a student at George School, Philadelphia, Pa., is home for the summer.

Russell Warner had his hand badly cut, on Tuesday, at the Railroad shops at Union Bridge.

Quite a number of persons from here attended the concert given by the Boys' Band, from the Tressler's Orphan Home, on Sunday afternoon last.

## BRIDGEPORT.

Ruth Stambaugh, of Taneytown, spent several days with Pauline Ohler. Thomas Motter and father, Elmer Motter spent Sunday at Endless Caverns, Va.

Harry Baker, wife and daughter, recently visited Joseph Baker, wife and family, at Hagerstown.

Miss Carrie Naill is visiting her cousins, Oliver Lambert and sister, Mabel Lambert, near Walnut Grove School-house.

H. W. Baker, wife and daughter, and Ruth Stambaugh, spent Wednesday in Frederick.

Miss Roseanna Sites, of Taneytown, is visiting friends here.

Chester Ohler, wife and son, Clyde, were recent guests of Edgar Miller, wife and family.

H. W. Baker, wife and daughter, and George A. Ohler, made a trip to Park Mills and the Potomac, on Sunday.

Wilbur Stull and cousin, have gone on a trip to Kansas, by auto.

## KEYMAR.

Mervin Wilhide, of Middletown, Ohio, is spending some time at the home of his father, Mr. Charles Wilhide, near Bruceville, who is confined to his bed, but is improving slowly.

Mr. and Mrs. Drenning and daughter, and grand-daughter, little Louise Drenning, of Wrightsville, spent last week-end at the home of the former's son, John Drenning, at Bruceville.

Mrs. Fannie Sappington and daughter, Miss Cora, and grandson, of this place, and Claude Weaver, of Littleton, attended the funeral of the former's brother-in-law, Charles Sappington, Unionville, on Wednesday.

Mrs. Wilbur H. Otto and son, Thomas, made a business trip to Baltimore, last Friday.

Oliver Leakin, of Akron, Ohio, spent last week-end at the home of his brother and sister-in-law, Mr. and Mrs. John Leakin, this place.

## Chick Raising is Made Safe

by feeding Rein-ola Buttermilk Starting Food. Sound wholesome grains only are used—no by-products. No possibility of damage on account of shipping. Always good, always fresh. 15 years manufacturing experience back of it. Try it.—Rein-dollar Bros. & Co. 4-9 ft.

Excepting the Bible, Pilgrim's Progress has been translated into more languages than any other book.—The number now exceeds 107.

## A Birthday Social.

(For the Record).

A very pleasant surprise social was held at the home of J. Cleve Weishaar, on Tuesday evening, June 15, in honor of Mrs. Weishaar's birthday. The evening was spent with games and social conversation, and about 10:30 the table was spread with cakes, bananas, etc., to which all did ample justice, and at a late hour all departed for their homes, wishing Mrs. Weishaar many more happy days.

Among those present were: Mr. and Mrs. J. Cleve Weishaar, Mr. and Mrs. Wm. Simpson, Mr. and Mrs. Wilbur Wantz, Mr. and Mrs. Chas. Foreman, Mr. and Mrs. Wm. Rittase, Mr. and Mrs. Howard Foreman, Mr. and Mrs. John LeGore, Mr. and Mrs. Jacob Strawsburg, Mr. and Mrs. Norman Fox, Mr. and Mrs. Geo. Deberry, Mr. and Mrs. C. O. Foreman, Mrs. Sargent Bankert, Mr. and Mrs. Lavern Rittase, Mrs. Samuel Clingan; Misses Mamie Bollinger, Luella Deberry, Mabel and Mary Baker, Marguerite Deberry, Margaret and Alvina Null, Mildred Simpson, Anna and Catherine Foreman, Mildred Wantz, Carrie Frownfelter, Helen and Thelma Weishaar, Ethel Clingan, Lavalia and Inez Wantz, Dorothy Bankert and Louise Foreman; Messrs Robert Smith, Jessie, Edward, Charles, Donald, Raymond and Junior Clingan, Marvin Weishaar, David Bankert, William, David and Carroll Foreman, Walter Stonesifer, Levi Maus, Guy, Henry and Atwood Feeser, Russell and Ray Frownfelter, Raymond Baker, Paul Deberry, George and Russell Fox, Robert Hilterbrick, Joseph Slick, Jno. LeGore, Jr., Harry Clingan.

## Convention Luther League July 20-21

The fifth annual convention of the Luther League of the Maryland Synod will be held at Smithsburg, Washington county, on Tuesday and Wednesday, July 20 and 21, in Trinity Lutheran Church, Rev. Ferdinand Hesse, pastor.

Approximately two hundred delegates and visitors are expected to attend and will represent Luther Leagues and Lutheran Christian Endeavor Societies in Baltimore and Washington, D. C., and also the counties in the state comprising the territory of the Maryland Synod.

According to the program now being arranged, the convention will open Tuesday afternoon at two o'clock when reports of officers and standing committees will be heard, new officers elected, and other business transacted. Tuesday evening at 7:30 when the regular Vesper Service will be held, Rev. S. J. McDowell, D. D., pastor of the Third English Lutheran Church, of Baltimore, preaching the sermon. There will be three sessions Wednesday, the morning and afternoon sessions being given over largely to conference and informal discussions dealing with the more important problems confronting the local leagues. These will be conducted by experienced and active workers.

The officers and heads of departments of the Luther League of the Maryland Synod are: President, Virgil W. Doub, Middletown; vice-president, William F. Smith, Jr., Baltimore; recording secretary, Miss Mabel B. Smith, Smithsburg.

The booster inflates; the knocker deflates. The man with a sense of values has no patience with either of them.

## MARRIED

## MYERS—MITZEL.

Mr. Romanus Myers and Miss Grace Mitzel, both of York, Pa., motored to Westminster, on Saturday last, and were married at the Court House by Rev. Wm. L. Seabrook. The bride's mother and other relatives were present.

## ENGLAR—MESSLER.

Mr. Seward Englar and Miss Adelaide Messler, of Linwood, were married on Thursday, June 10, in Hagerstown, by Rev. J. M. Tombaugh, pastor of the Progressive Brethren Church. Both bride and groom are highly respected young folks of the neighborhood. They will reside at Linwood.

## DIED.

Obituaries, poetry and resolutions, charged for at the rate of five cents per line. The regular death notices published free.

## MISS MARTHA J. HANN.

Miss Martha J. Hann, whose death was noted briefly in our local column, last week, as having died at Springfield Hospital, was about 57 years of age. She is survived by the following sisters and brothers; Mrs. John M. Koons, Mrs. Daniel S. Crabbs, Mrs. Walter Beam, Mrs. Maude Collins, Miss Jessie Hann, and Thomas and Edward Hann.

Funeral services were held from the home of her nephew, George Crabbs, on Saturday afternoon, in charge of Rev. Guy P. Bready. Interment in the Reformed cemetery.

## MRS. CLARA V. SHORE.

Mrs. Clara Virginia, wife of Mr. Edward P. Shorb, of Taneytown, died at Frederick Hospital, on Tuesday night, from hemorrhages, aged 25 years, 7 months, 15 days, after about a week's illness.

She is survived by her husband and three children, Ralph, Elizabeth and Harvey; her parents, Mr. and Mrs. Wm. M. Ohler, Jr.; grandfather and grandmother, Mr. and Mrs. John T. Shriner, and grandmother, Mrs. Mary C. Ohler; two sisters, Mrs. Carroll Shoemaker and Miss Catharine Ohler.

The funeral will be held this Friday afternoon, meeting at the home at 1 o'clock, with services in the Lutheran Church, by her pastor, Rev. W. V. Garrett. Interment in the Lutheran cemetery.

## EARTH FAULTS IN GREAT OIL FIELD

## Little Danger of Earthquake Says Expert.

Cheyenne, Wyo.—"Faults" in the earth's crust criss-cross one of the largest oil fields in the United States—the Salt Creek field—and the Teapot Dome, the naval oil reserve. But there is little danger of earthquake occurring in these oil regions, in the opinion of A. B. Bartlett, Wyoming state geologist.

The faults are described by him as "dead." There are nine small faults on the east side of the Salt Creek field and another three miles long between the Teapot and Salt Creek fields. Three faults have been located on the Teapot Dome structure.

"Wyoming is not in a region of present earthquake activity, although slight tremors do occur," Mr. Bartlett said. "The 1925 tremors increased the flow of oil wells and in some cases the tremors caused water to flow in with the oil."

The largest "dead fault" in the state is that along Casper mountain, six miles south of Casper. It has a displacement of 10,000 to 11,000 feet, and is 21 miles long, and was once responsible for the elevation above Casper of the 3,000-foot pile of solid rock now known as the mountain, according to geologists. A geological survey of the mountain showed pre-cambrian granite on the mountain top, while the survey of the rock strata under Casper placed this rock formation 8,000 feet below the city.

The other large fault is in the western part of the state, running north from Kemmerer, halfway across Wyoming. It is believed that the displacements of this fault are small and have been made over a long period of years.

Prediction that another landslide may occur in the Teton mountains in the Gros Ventre region, where a mountain peak toppled over into the Gros Ventre river last spring, was made by Mr. Bartlett. The landslide last year poured 50,000,000 cubic yards of rock and dirt into the river. It was caused, Mr. Bartlett said, by a slight earth tremor, the alluvium on the limestone formation having been saturated by spring thaws so that all it needed was a "gentle shake" to be sent tumbling into the river valley.

## NEW DAVIS BABY

The first photograph made of little Jewel Davis, the youngest baby of Secretary of Labor James J. Davis and Mrs. Davis. All of the Davis children have names beginning with the letter "J."

## Russian Student Fund Aids 150 in Colleges

New York.—Organized by a penniless young Russian student in 1919, the Russian student fund is now advancing aid to 150 Russian men and women in fifty American colleges to fit themselves for future participation in Russian reconstruction.

The organization operates on a plan whereby money loaned to students is repaid after graduation. Already \$16,000 in repayments has been received, officers of the fund have announced. The students are studying business, architecture, civil, electrical, chemical and mechanical engineering, medicine and applied agriculture.

The fund was started in 1919 when a graduate of Boston Tech interested prominent persons in aiding his young compatriots. He felt that the obstacles in the way of foreign students earning their way through college here were almost insurmountable, but that if they were given assistance they could easily pay back the expenses later.

## Brick Used in America

## When Spaniards Came

America is not without its brick antiquities, for the Spanish conquistadores found crude but excellent adobe brickwork in Peru and Mexico, and further developed it in their settlements.

In the North American colonies, which very naturally followed European, especially English, practice, the first brick houses were built of material brought from Holland or England; but in Virginia, as early as 1611, and in Massachusetts as early as 1629, the domestic industry was established. The colonial days produced fine types of brick architecture from New England to Virginia. In the Nineteenth century, however, up to about 1880, American brick building was largely confined to the use of common brick for ordinary construction or for backing stone-faced walls.

## You can finish woodwork

with

**Lacq**  
HOUSEHOLD  
LACQUEROID

and hang curtains  
immediately—

for Lacq dries in less than one-half hour. Before the surface being finished is completed, the part that was Lacq-ed first, is dry.

With Lacq, you can finish a chair and sit on it, finish a floor and dance on it in less than one-half hour.

Lacq is the easiest finish to apply that you've ever seen. Ask us for a demonstration.

## Future Railroad Speed

Railway trains will travel as fast as airplanes and more safely, the president of the Pere Marquette predicts for a not far-distant future. Concrete ways reinforced with steel beams will criss-cross over the country, and trains will run on roller bearings at incredible speeds. And it will be safe. Interesting and not improbable. This nation has a way of overcoming almost any kind of obstacle to obtain speed.—Capper's Weekly.

## Chicken Feed Mine

With the rapidly rising cost of crushed oyster shells for chicken feed the discovery of a mine of argonite or calcium carbonate has been found so important that the mine is at once going to be developed. The mine is in Clarkstone, Cache county, Utah, and the installation of \$2,000 worth of machinery is thought worth while, because of the potentiality of the mine for chicken feed alone.—Detroit Free Press

## SPECIAL NOTICES

SMALL ADVERTISEMENTS will be inserted under this heading at One Cent a word, each week, counting name and address of advertiser—two initials, or a date, counted as one word. Minimum charge, 15 cents.

REAL ESTATE for sale, Two Cents each word. Minimum charge, 25 cents. APPLY AT RECORD OFFICE ads not accepted—but will receive sealed replies. No personal information given.

THIS COLUMN is specially for Wants, Lost, Found, Short Announcements, Personal Property for sale, etc.

ALL NOTICES in this column must be uniform in style.

HIGHEST CASH Prices paid every day for delivery of Poultry, Butter and Eggs. Specialty, 50c for delivery of Calves all day Tuesday or Wednesday morning.—Angell & Carbaugh Successors to G. W. Motter & Son.

HAIL INSURANCE, see Adv. in this issue, with prices.—P. B. Englar, Agt., Taneytown. 5-21-4t

## Was Last Member of Idealistic Community

In the death in Santa Barbara, Cal., a short time ago, of John Van Der Zee Sears, there passed away a man who undoubtedly was the last survivor of that famous experiment in idealism, Brook Farm, says the Philadelphia Bulletin.

To most of the present generation, the colony established at West Roxbury, Mass., is hardly likely to be more than a memory, but in its day it was famous, not only for its essay in pure socialism, but for the men who identified themselves with it.

Among these were Nathaniel Hawthorne, George William Curtis, Charles A. Dana, Ralph Waldo Emerson, Horace Greeley, Amos Bronson Alcott and its founder, George Ripley. Hawthorne's novel, "The Blithedale Romance," was inspired by the writer's experience at Brook Farm.

The colony was founded in 1841, and after flourishing for several years, finally was abandoned in 1847. In connection with the colony a school was maintained, and Mr. Sears, who was born in Albany in 1835, became one of its pupils. At Brook Farm he met Horace Greeley and through the editor of the New York Tribune was first introduced into journalism, Greeley taking him into his office in a secretarial capacity.

Prior to the Civil war, Mr. Sears came to Philadelphia and for many years that city was his home. He was in the office of Jay Cooke, was with parties surveying the route of the projected Northern Pacific railroad and represented the Philadelphia Inquirer as a correspondent at the front in the Civil war. Subsequently he became financial editor of the Inquirer, but in 1888 went to the Evening Telegraph as its art editor and an editorial writer. There he remained until about twenty years ago, when he retired from active journalism and went to New York, where he employed his leisure in writing his recollections of Brook Farm under the title of "My Friends at Brook Farm."

A gentleman of large culture, distinguished in appearance and with the courtly manners of his generation, Mr. Sears had an extensive acquaintance in literary and art circles, although a native modesty limited his more intimate social contacts.

Besides his book on Brook Farm, he was an active contributor to most of the magazines of his younger days.

### His Supposition

"I was driving along the road in Booger Holler," in the cross-roads store, related Lefe Lagg, "when just as I passed a house the door opened, a lady stepped out onto the porch with a dishpan in her hands, and flung out of it the water that had been in it and also a baby that—er—h'm!—wasn't dressed up for company. The baby yelled, and the lady yelled and then jumped off from the porch, grabbed up the baby, put it in the dishpan, took it into the house, and I driv' on."

"What in the name of torment did the lady do a trick like that for?" asked old man Soggy.

"I hadn't the least idy at first, but after I'd studied it over for a spell I figured that she must a-been giving the baby a bath in the dishpan and had a streak of absent-mindedness while she was a-doing of it."—Kansas City Star.

### Bananas for Athletes

Bananas have become popular as a training food for athletes in England. Professional trainers favor bananas because of the readiness with which they are digested and because they contain a higher percentage of calories than most fruits. The trainers maintain that before a game, between halves, etc., when the players are pressed for time, when they are more or less exhausted, the banana is the most suitable food. The banana also carries the guarantee that until its natural germproof wrapper is peeled away it is free from contamination.—Exchange.

### Another Question!

At a Lancastrian dinner the other evening Sir Edwin Stockton, who can always be relied on for a good story, told this:

During one of his electioneering campaigns in Manchester, a small voice from the back of the hall asked if the candidate was in favor of "free milk for poor expectant mothers."

Sir Edwin replied that he was, whereupon an exceedingly gruff voice followed with the question: "And are you in favor of free beer for expectant fathers?"

### Japanese Hero Honored

Admiral Count Togo, commander of the Japanese fleet which destroyed the Russian squadrons in the battle of the Sea of Japan in May, 1905, now enfeebled by his eighty years, has special permission to carry a cane when visiting the imperial court. The carrying of sticks of any sort in the presence of the nation's rulers is forbidden by court etiquette, but exception in the case of the aged sea hero was made by formal ruling of the minister of the imperial household.

### Correcting a Lady Killer

Princess Bimisco at a Los Angeles tea was praising her mother, the countess of Oxford and Asquith.

"My mother," she began, "is very brilliant. A great lady killer was once describing his tactics to her."

"I play women," he said, "exactly as I play fish."

"Only," said my mother, "in the one case you angle to make them rise and in the other to make them fall."

## WILD DUCKS HIDE OUT ON HUNTERS

### Can't Be Found When They Are Sought in Arkansas.

Little Rock, Ark.—Southeastern Arkansas, for many years a paradise of duck hunters, this season produced poor hunting despite the fact that there are millions of the green-headed water fowl.

Whether the weather is responsible for conditions, or the ducks have gained through experience of aged birds passed on to the younger generations, sportsmen are unable to tell. Officials, however, blame the weather.

For ducks there are, literally by the million, but not where the hunters are prone to hunt. They are in the less frequented lakes and the open rivers of the rice country.

Early in the season ducks were so plentiful hunters found no trouble filling their legal bags, and rice farmers appealed to the state game and fish commission and the migratory bird authorities that the bag limit be lifted.

The hunters had hardly arrived when the water fowl disappeared. The weather had turned warm again. Then came word that duck hunting in Illinois, Wisconsin and other northern states was better than in years. The hunters put away their guns and prepared to wait for colder weather.

Cold weather came. The ducks returned. Hunters again put out for the rice fields. But when they arrived the ducks had disappeared except in small numbers.

Guy H. Amsler, secretary of the Arkansas game and fish commission, made a trip to the district to look over the situation. In several of the remote lakes he found four millions of the birds. Mr. Amsler said.

The official attributed the movements of the birds to the fact that when the weather turned cold enough to drive the water fowl out of the more northern states, it struck southern Arkansas hard enough to freeze the shallower waters in and about the rice fields. This, he said, had driven them into the open waters of the rivers and lakes.

## Give 150-Year-Old Turk

### Job to Save His Life

Constantinople.—The famous old Turk, Zaro Agha, who claims that his one hundred and fifty years make him the oldest man in the world, is to be honored, and incidentally, saved from starvation by the city of Constantinople.

The aged man has been unable for the last year or two to carry on his life-long trade as hamal. The hamals are the human delivery wagons of Turkey, and it is a common thing to see one of these porters, bent nearly double, plodding steadily along the street with a piano or bedstead or dining-room table on his back. As Zaro Agha has grown somewhat too old for this herculean occupation, he has found it difficult to supply himself with the bread and cheese of existence, for the pension which he receives from the Association of Hamals is anything but large.

Now the prefect of Constantinople, Eminbey, has appointed Zaro as door-keeper for the municipal council. Therefore he will now have not only bread and cheese aplenty, a uniform and a warm place to sit in, but a feeling of importance befitting the dignity of his years.

## Heat Mines Prepared

### to Destroy Icebergs

Montreal, Can.—Prof. Howard T. Barnes of the physics department of McGill university, whose assertion that it is possible to free the North Atlantic of icebergs and keep the St. Lawrence river open for navigation the entire year is being widely discussed, will leave for Greenland in June to study the effects of "heat mines" upon icebergs, attempting to break them up at their source. He will take several tons of chemicals to Greenland for this work.

## End of Home Life

### in Fifty Years Seen

Liverpool.—That 50 years hence home life will have disappeared and people will virtually live in restaurants and hotels, is the prediction of Prof. A. M. Low, well known as a scientist. The professor prophesies that in 1976 present-day types of ships will be replaced by giant hydroplanes which will skim along the surface of the water at tremendous speed. Passengers wishing to cross the Atlantic will use airplanes and keep in touch with their homes by wireless.

Regarding clothes, the professor is of the belief that 50 years from now cotton, silk and wool textiles will be replaced by more cheaper and more durable forms of vegetable fiber. The wardrobes of women will not be so large as now "because woman being by that time the most civilized will not be swayed by every passing wave of fashion."

Professor Low also envisages an era of ugly factories built underground. There will be no more chimneys belching forth smoke, and factory hands will be more polished and better educated as all the rough work of them will be done by machinery.

TANEYTOWN HIGH SCHOOL FACULTY.

Rear row: Guy P. Bready, vice-principal; J. L. Hunsberger, principal; George Schmidt, seventh grade. Front row: Harry Ecker, fifth and sixth grades; A. Carry Knapp, Latin, French, History; Helen G. Dieffenbach, English, History; Dorothy Robb, Music; Ruth Baker, first and second grades; Mrs. Stewart King, third and fourth grades; Lena Derr, home economics; Philip Royer, instrumental music.

(Continued from First Page.)

that all who make use of the property take the best of care of it.

The day's events were in general well carried out, without hitch or confusion, showing excellent management on the part of those in charge, and the plan of the building is apparently admirable, not only for school uses but for the accommodation of all events likely to be held in it.

The new building is 131-ft. long by 80-ft. wide, two stories high, built of hard red brick, on a concrete foundation, with a flat composition and slate roof. The building itself is located in the L of the school grounds, facing George St. 80-ft. from the curb line. The location is such that more than three-fourths of the grounds are left unobstructed for athletic and recreational purposes.

The inside arrangement is convenient and economical of room. In the basement, are a boiler room, coal room and locker room, and workshop. There are both outside and inside entrances to the basement.

The first floor has two main entrances, from George St., opening on transverse hallways, leading into the main corridor, 12-ft. wide, running through the central part of the building. On the east side of the main corridor is the large assembly hall, with a seating capacity of 300. The assembly hall is two stories in height,

and connected with the first floor and second floor corridors, both of which can be used as extensions of the assembly room, and doubling its seating capacity. The stage is raised 3-ft. above the main floor and is 21-ft. 8 in. long by 17-ft. 8 in. deep. There is a dressing room on each side of the stage one of which connects with the principal's office in the rear. The stage is lighted with ceiling lights and with a row of concealed foot lights. The stage is fitted with a side-pull blue velvet curtain, the gift of the Parent-Teachers' Association. A convenient feature is a stairway direct from the main floor to the stage independent of the dressing room entrances. To the rear of the assembly hall are the principal's office and book supply room.

On the other side of the main corridor is a classroom and rooms for the Home Economics Department, consisting of work room and kitchen. The rooms are so arranged that lunch can be served cafeteria style. Beside the kitchen, is a small tool supply and finishing room for the Manual Training Department.

On the north side, are two class rooms and boys toilet. On the south side is the commercial room, with typewriter room adjoining and a full sized class room.

The second floor is reached by two broad stairways, one at each end of

the building. At the north end are two class rooms, girls' toilet, and teachers' rest room. The middle front, second floor, contains a class room, and a large double-sized study hall, which on occasion can be converted into two class rooms. In the south wing, second floor, are the library, class room, and rooms for the Science Department, consisting of class and demonstration room, laboratory, supply room and apparatus room.

Including the Assembly Hall, there are 13 rooms which can be used for regular class room work and four rooms for classes in special subjects. Each class room is fitted with built-in black-board and cloak room. The entire building is heated by steam and lighted by electricity. The ventilation system is complete, air entering the rooms being warmed by passing over steam radiators. Each room is well lighted the windows being arranged that no pupil will be compelled to sit in a glaring light. The wall finish is hard white smooth plaster. The building embodies the latest features in school structures, making for the comfort and convenience of the pupils and teachers, and for efficiency in instruction, and is a credit to the town and the community.

The cost including the four acre lot, is about \$53,500. The furnishings and equipment will cost about \$3000. more.

### Campanies in America

An official of the National Carillon association says that "while the following may not be a complete list of the cities in which worth-while campanies with carillons may be found, I think there are no others of any considerable importance. The largest is, of course, the carillon of 53 bells presented by Mr. Rockefeller to his church on Fifth avenue, New York. There are no others anywhere near this number of bells as yet. At Gloucester, Mass., is a good set of bells, I think 35 in number. Another, though perhaps of lesser number, is located at Cohasset, Mass. There is a fine carillon at Morristown, N. J., which, I believe, is presently to be increased to 35 bells, and a smaller one of like quality at Birmingham, Ala.

## Crankshaft Discarded in New Type Airplane Engine

New York.—A new cam engine, the first aircraft motor in the world without crankshaft, connecting rods or timing gears, was successfully flown in a half-hour public demonstration at Farmingdale, L. I. The flights were made from the airframe of the Fairchild-Camline Engine corporation, which has developed the new power plant for production on a commercial basis.

The four-cylinder, air-cooled engine is of X type, weighs 360 pounds and develops 150 horse power at 1,200 revolutions a minute.

### Kaffir Bread Plant

#### in English Garden

At the time when Athelstan was on the English throne a little shoot appeared above the ground in a South African forest. Athelstan died and was followed in turn by a long line of English kings, but the little South African shoot persisted, growing in size and strength until today, having been transplanted from its native soil, it flourishes in the Royal Botanic gardens, Regent's park.

It is a specimen of the Kaffir bread plant, and gets its name from the fact that the pith of its young shoots contains starch, which is eaten by the natives in the form of bread or sago, says the London Times.

The usual height of such trees is 20 feet. This one, however, is only 10 feet and measures 15 inches round its cylindrical trunk. Long leaves with curling ends sprout from the top of the fairly smooth trunk.

Each year fresh fronds are produced, the old ones falling and leaving scars. Thus, by noting the yearly crop of leaves and counting the scars on the trunk's surface, the age of the tree has been estimated at a thousand years.

### Arrow Kills Lion

Denver.—A mountain lion has been killed with a bow and arrow by W. A. Mullins of the New Mexico biological survey. The arrow struck where the lion was leaping from a tree.

### New Life for Leather

A young Scottish chemist has invented a process for regenerating leather and other substances. The product is hardly distinguishable from real leather, and is about half the price of hides.

The leather is first ground into a fine powder and any impurities removed. A small quantity of binding substance is then added, which turns it into a dough. This, together with a coloring mixture, is milled until the whole becomes a uniform mixture. It is then pressed on to a strong backing cloth.

### Mary's Suggestion

The maid was leaving and her mistress said to her: "Now, Mary, I should like to give you a good reference, but my conscience compels me to state that you never get the meals ready at the proper time. Now, I wonder how I can put it in a nice way?"

"Well, mum," retorted the girl, "you can say that I got the meals the same as I got me pay."—Boston Transcript

### Where Is the Race Going?

A Beloit college expedition is being fitted out for the purpose of tracing the origin of man. It is believed the expedition will find the beginnings of the race in northern Africa. When it is known where the race came from, will someone please fit out an expedition that will find out where the race is going?—Kansas City Star.

# The TALE of KIDDIE KATYDID

by Arthur Scott Bailey

## THE TWO GRASSHOPPERS

KIDDIE KATYDID had a neighbor who was a good deal like him. Indeed, a careless person had to look sharply to discover much difference between them. But there was a difference. There was, especially, a certain way in which one could always tell them apart. One had only to take the trouble to look at their horns—or feelers. For Kiddie Katydid had horns as long—or longer—than he was. But his neighbor, who was known as Leap-

"I'm Tempted to Move Away," Leaper Began to Tell Every One.

er the Locust, wore his horns quite short.

Although they saw each other often, Kiddie and this neighbor of his were not on the best of terms. The trouble was simply this: they couldn't agree on the question of horns. Whenever they met they were sure to have a most unpleasant dispute before they parted.

Really, their quarrels were as bad as those that Jimmy Rabbit and Frisky Squirrel once had over the matter of tails. And many of the field folk said it was a shame that the Grasshoppers' trouble couldn't be settled somehow.

Strange as it may seem, that re-

mark always made Leaper the Locust terribly angry. And it enraged Kiddie Katydid as did nothing else.

The difficulty was that the field people—as well as Farmer Green's whole family—had fallen into the lazy habit of calling those two by the same name. They spoke of Kiddie Katydid as "the Long-Horned Grasshopper," while they termed his neighbor "the Short-Horned Grasshopper."

"It's bad enough to look somewhat like Leaper the Locust, without being tagged with the name of Grasshopper, along with him," Kiddie Katydid spluttered.

"Honestly, I'm tempted to move away from this neighborhood," Leaper the Locust began to tell every one he met. "If that chap would only trim his horns to the proper length I wouldn't mind it so much. But he's actually proud of them. He's always waving them over his head, so people will notice them."

They both declared—Kiddie Katydid and Leaper the Locust—that they couldn't abide the name "Grasshopper." And they took pains to warn people in the neighborhood that they wouldn't answer to that name, no matter how loudly any one might shout it at them.

After that a few of their neighbors took great delight in crying "Grasshopper! Grasshopper!" whenever one of the two happened to be within hearing. But no matter which of them it might be—whether Leaper the Locust or Kiddie Katydid—he pretended not to hear, and went right on eating.

But at last something happened that made both those jumpy gentlemen change their minds. From not wanting to be called Grasshoppers, they decided suddenly that they liked the name. And each claimed that the other had no right to it.

This odd state of affairs arose when they learned that a stranger had come into the valley bearing a message marked "For Mr. Grasshopper."

"That's for me!" Kiddie Katydid cried, as soon as he heard the news. "You're mistaken!" Leaper the Locust snapped. "The message is clearly intended for me. And I shan't let anybody else open it."

## PIGEON TRAINING IS NOW COMING TO FRONT

### Army Fosters Development of High-Class Birds.

San Francisco.—Training of carrier pigeons, which until recently in the West was almost exclusively an army peace-time pursuit to quicken the combat forces' most dependable means of communication on shell-rocked battlefields, has claimed a position of popularity as a civilian sport along the Pacific coast.

Fostered and encouraged by army and reserve circles, pigeon flying has grown in favor until the number of clubs existing and the membership engaged in this pastime presage rivalry with Atlantic seaboard enthusiasts for supremacy.

An affection for the delicately bred birds, gained in war time by their effectiveness as a means of liaison, has been turned into an appreciation of their sporting possibilities. The flying courses that have been mapped and used in pigeon racing along the fringed borders of the Pacific offer, because of varying climatic conditions, as difficult tests for bird stamina and training efficacy as can be found.

#### Pass All Barriers

In competitions from Salem, Ore., to Oakland, Cal., the tiny racers pass through the chilled air stratas above snow-capped mountains; through fogs and mists; through both rare and heavy atmosphere and, at the finish, through the hot, usually dry air above the San Joaquin valley of California.

Under these severe conditions the birds cannot make the time registered in eastern contests nor fly continuously throughout the day, as do the eastern pigeons. But the contests develop a hardness and a fortitude that will prove of inestimable value, army men believe, if their use should ever again be required in warfare.

Late next June most of the clubs of the West will unite for flights from Pocatello, Idaho, to Oakland, and from Salem to Oakland. From 700 to 1,000 birds likely will be entered.

Signal corps pigeoniering at present, besides encouraging civilian interest, is directing efforts toward the better training of night-flying birds; breeding of those able to fly effectively through fog and at high, mountain altitudes, and to interisland flights where a practical peace-time use for the birds prevails.

Col. Arthur S. Cowan of the Ninth corps area headquarters believes that experimental work started in Panama and carried on extensively at Ross field, Cal., and at Honolulu will give the United States a vastly superior bird equipment.

Though the pigeon was recognized as a military adjunct as early as the fifth Egyptian dynasty about 3,000 B. C., America's entrance into the war found this country, he said, the only one of the great powers virtually without trained pigeons. Germany had an efficient and well-established service which was used by all arms and was effective in getting messages from intelligence operatives in England to the war department at Berlin.

#### Bird Is Last Resort.

American army officers learned that the artillery barrages played havoc with telephone and radio systems and that when advanced or detached units found themselves far from friendly lines and the need was urgent to notify headquarters, that the pigeon was the most trustworthy messenger. It could mount rapidly, quickly getting above artillery fire and gas clouds, and, flying at express train speed, seldom failed to deliver.

When every other method of communication had failed, the bird, nine times out of ten, got through safely, sometimes exhibiting a heroism that won War department commendation.

### Million Monuments Set Canada Land Tracts

Ottawa, Ont.—Over 1,000,000 monuments have been erected in marking the corners of the 200,000,000-acre tract constituting the surveyed portion of the western provinces of Canada, T. S. Nash told the annual meeting of the dominion land surveyors here, reporting on the monumental survey in the prairie provinces.

"Of the monuments only 60,000 are the modern standard survey posts adopted in 1916," Mr. Nash said.

"Canadians are too preoccupied to take an interest in the boundary marks that determine the limits of their lands. In Manitoba, where the original survey was marked by wooden posts 45 to 50 years ago, a large percentage of the corners are already lost. Restoration surveys must be carried out extensively in the next few years, for if the number of lost corners increases, the task of restoration will ultimately become economically impracticable."

### Smyrna to Rise From Ashes as Modern City

Smyrna, Turkey.—Smyrna is at last to rise from its ashes.

After endless delays the Angora government has approved plans for the reconstruction of the great Anatolian port which was laid waste in September, 1922. Out of the present Pompeian-like ruins will rise modern parks, public squares, amusement centers, business buildings, dwelling houses, theaters, stores and warehouses.

Since the great fire which followed Mustafa Kemal's swift entry into the city, not a brick has been laid by the Turks in the devastated metropolis.

## Milk Gives Most Food Value At Least Cost

Milk gives more food value for less cost than any other food known to man, according to Herbert C. Hooks, secretary of the Evaporated Milk Association.

H. C. Hooks.

for the growth and maintenance of the body; they furnish energy for work, play and warmth.

"Milk helps repair the wear and tear of the body. It is as good as meat for building muscle. Moreover, it is cheaper. A quart of milk will supply as much protein as seven ounces of sirloin steak or four large eggs. Milk, particularly evaporated milk, which has twice the mineral content of market milk, is one of the best and cheapest sources of lime, which is a form of calcium. Infants and growing children need lime to build bones and teeth. It is just as necessary for adults to keep their bones in good condition. One quart of milk, or one pint of evaporated milk, furnishes as much calcium as ten large oranges, thirty-two eggs or twenty pounds of beef. Milk also is a valuable source of phosphorus and supplies a certain amount of iron."

"By some authorities milk is said to be an aid in longevity. Dr. Herman Bundesen, health commissioner for Chicago, gives his prescription for long life as follows: Drink one quart of milk a day and mix with one hour of sunshine. Repeat ad infinitum."

"Due to the efforts of health officials to get across to the public the message of milk, its general use in the United States has advanced tremendously in the last decade. This is especially true of evaporated milk for reasons of its convenience and economy. Housewives know there is no fear of obtaining contaminated evaporated milk, because it is not only the best grade of market milk rendered double-cream by dehydrating, but it is sterilized as well."

## Happy Wedlock Sure Thing If Bride Is Cook

By KATHRYN ST. JOHN

Haphazard meals yearly ruin thousands of marriages. Most marital ships would maintain an even keel if brides knew cooking.

Many of the first year's troubles between newlyweds would be avoided if the wife were capable of preparing foods with an experienced hand. Wives are to blame for the failure of many business men in the final analysis. The business man's health depends a great deal on what he eats. And it's up to his wife to see that he gets the right kind of food. A healthfully balanced diet goes a long way toward making the tired business man less fatigued.

The expert home manager sees to it that her husband never comes home to a delicatessen lunch. There is a carefully planned meal waiting for him. The real housewife knows that an unbalanced diet means trouble and avoids it. Likewise, she appreciates the fact that variation in her menus is important. In this connection the following recipes have been selected as an aid to the home manager:

#### Frozen Salad.

1/2 cup mayonnaise 1/2 cup candied dressing cherries  
1/2 cup diced pine-apple 1/2 cup diced apple  
4 tbsp. pineapple juice 2 tbsp. lemon juice  
1/2 cup evaporated milk  
Mix the fruit and juices. Combine milk and cream, chill and whip; then fold in the fruit and mayonnaise. Pour into a mold and pack in equal parts of salt and ice. Serve on lettuce leaves. This serves eight.

#### Orange Bavarian.

1 tbsp. gelatin 2-3 cup evaporated milk  
1/2 cup cold water 1-3 cup whipping cream  
3 tbsp. lemon juice 1/2 cup sugar  
1/2 tsp. salt  
Soak gelatin in cold water, add fruit juices, sugar and salt. Heat in the top of a double boiler until gelatin dissolves. Strain and set in pan of cold water. When mixture begins to set, fold in the evaporated milk and cream which have been beaten stiff.

#### Banana Ice Cream.

6 very ripe bananas 2 cups evaporated milk  
1/2 cup lemon juice 2 cups cream  
2 1/2 cups sugar 1/4 tsp. salt  
Scrape off adhering fibrous portion on surface of peeled bananas. Mash and rub through a sieve. Add the rest of the ingredients in the order given and stir until all are well blended. Let stand for 20 minutes so that all sugar may dissolve. Freeze in a 1 to 6 salt-ice mixture. This recipe makes 1/2 gallon cream.

## The Barrier to Accomplishment Extravagance.

Extravagance has ruined the chances of many capable men. It proved a barrier too difficult to overcome.

If you really desire to accomplish something worthwhile, stop your extravagance and get right down to regular savings. It's the best way.

Your savings account here will make you think of a brighter future with purpose in it, and the means to accomplish that purpose.

## THE WHY of SUPERSTITIONS

By H. IRVING KING

### THE HAIR AND THE MOON

CUT your hair "in the new moon," if you wish it to grow well. This superstition is general all over the United States and Canada, and is but another example of the survival of the most ancient cult of luna worship.

It is the same survival of a primitive idea which makes some farmers of today, who would scout the idea that they were superstitious, plant everything except tubers, on the increase of the moon. All folklore and all mythology testify to the vital relation which a person's hair bore in the estimation of our ancestors to the person himself, as well as to the spiritual relation which subsisted through it between the human being and the gods.

Several of the distinguished scientists of ancient Rome wrote of the matter as of something not to be doubted. Now, if, when the hair is cut, the moon, symbol of the great moon-goddess Isis, prototype of all the moon-goddesses, is waxing as the operation takes place, by the doctrine of luna sympathy, the hair, also will wax and grow again, thick and luxuriant. Whereas, if you cut your hair on a waning moon, you stand a risk of becoming bald-headed, through this same luna sympathy—the hair being especially susceptible to the influence of the gods.

## GIRLIGAGS

(Copyright, 1929, by The Bell Syndicate, Inc.)

"I see where somebody says the income tax is not as popular as it used to be," says contemplative Constance. "It seems to be possible to take something from nothing, after all."

## How It Started

By JEAN NEWTON

### "LIKE PHAETON"

FREQUENTLY in literature or speech of a rhetorical nature we come across an expression like this: "He is another Phaeton and will certainly be stricken down," or "He is overconfident. He will overreach himself, it is a Phaetonlike ambition which he cannot fulfill." The reference is always to an undertaking that is far beyond the powers of a person who insists upon attempting it.

The expression comes to us from the pages of Greek mythology where Phaeton was a mortal whose mother told him that his father was Phoebus, the Sun god. Piqued by doubt, he asked proof of his heavenly birth and his mother sent him to the East to the palace of the Sun to make inquiries. There, on his throne, Phoebus acknowledged Phaeton was his son, and to prove his parentage offered to fulfill any wish that he might express.

On learning that Phaeton's desire was to drive the chariot of the Sun which gave light and heat to the world, Phoebus exhorted him to change his wish. None but he, the Sun god, he told him, could take the perilous drive without mishap. Phaeton, however, insisted, but hardly had the fiery steeds dashed with the chariot through his father's gates than they took him headlong over the course, scorching the heavens and the earth. The world, the legend tells us, would have been set on fire and entirely destroyed had not Jupiter struck the chariot with a thunderbolt which destroyed it and then hurled the gallant but overambitious Phaeton out of existence!

(©, 1928, Western Newspaper Union.)

## Lesson for June 20

### JUDAH'S PLEA

LESSON TEXT—Genesis 44:18; 45:15.  
GOLDEN TEXT—A broken and contrite spirit, O God, thou wilt not despise.—Ps. 51:17.

PRIMARY TOPIC—Judah's Love for His Brother and His Father.  
JUNIOR TOPIC—Judah's Unselfish Offer.

INTERMEDIATE AND SENIOR TOPIC—Standing True to Our Home Folk.  
YOUNG PEOPLE AND ADULT TOPIC—Loving Devotion to Our Kindred.

The lesson subject should not be, as suggested by the lesson committee, Judah's plea, but rather Joseph's forgiving love. The emphasis should not be primarily upon the sinning and penitent brothers, but upon the magnanimous and forgiving brother, Joseph.

#### 1. Joseph's Elevation to the Premiership of Egypt (41:14-44).

The circumstances which led to his elevation from prison to the position of prime minister were:

1. The dreams of Pharaoh's butler and baker (ch. 40).

These were two very important officers in Pharaoh's court. Their business was to provide the drink and food of the ruler and of his household. It was most important not only that proper food and drink be provided, but that the monarch should be protected against poisoning. These officers had disturbing dreams. He interpreted their dreams.

2. Pharaoh's dream (41:1-13).

For two full years Joseph remained in prison forgotten by the butler. Pharaoh's dream of the fat kine and the lean one and the full ear of corn and the blasted one brought to Joseph the great opportunity. The failure of the wise men of Egypt to interpret this dream caused the chief butler to remember what Joseph had done for him, whereupon Pharaoh brought Joseph out of the prison. He made known to Pharaoh that it meant seven years of plenty, followed by seven years of famine, and suggested that a part of the produce of the land be stored up during the years of plenty, that there might be food for the people in the famine period. The plan appealed to Pharaoh as feasible. Therefore he assigned the task to Joseph and invested him with authority to execute it.

#### II. Joseph's Harsh Treatment of His Brothers (42:1-4; 4:17).

Driven by sore need his brethren came to Egypt for food. To test them, Joseph

1. Accused them of being spies (42:9-17).

He cast them into prison and demanded that their youngest brother be brought as a proof of the truthfulness of their word.

2. He kept Simeon as a hostage. Because he feared God he sent the rest home with provisions for their families.

3. Benjamin's peril (44:2,12). By a clever device Joseph's cup was placed in Benjamin's sack and was used as an occasion for bringing them back on the charge of theft. Convicted of their sins Judah pleaded for the release of Benjamin.

#### III. Judah's Plea (44:18-34).

1. For turning away of Joseph's anger (v. 18). He recited the history of the family and their coming to Egypt and appealed on the basis of the effect upon Jacob, their father, if Benjamin was not permitted to accompany them home.

2. That he himself might be kept in slavery instead of Benjamin (v. 33).

#### IV. Joseph Reveals Himself to His Brethren (45:1-15).

1. He declares his identity (vv. 1-3). This act on the part of Joseph troubled them. It ought to have made them glad. This not only affords a beautiful example of forgiving love, but most beautifully illustrates Christ's dealing with His brethren, the Jews.

2. He bids his brethren come near (vv. 4-8).

When he revealed himself to his brethren, the remembrance of their sins pierced them through. Joseph's first question was about his father, showing that his desire was to put their thoughts far away from their crime. He invited them to come near to him and assured them that God had overruled their crime for their salvation.

3. Joseph sends his brethren away with good news (vv. 9-15).

As soon as Joseph's brethren knew him and were reconciled to him, they were sent with the glad tidings to their father. As soon as the Jews came to know Jesus Christ as their Messiah, He will send them away to the ends of the earth with the good news of His saving grace.

#### The Accounting

God will not call you to account for the four or five talents you have not received, but He will ask a strict account for that one which He has entrusted to you.—The Maritime Baptist.

#### Selfishness

Selfishness expects love and sacrifice from all, and gives love and sacrifice to none. That is why selfish souls complain so of life.—Young People.

## THE CHRISTIAN ENDEAVOR TOPIC

Moody Bible Institute Monthly  
Chicago, Ill.

June 20

Mow Much of a Goal Should Money Be?

Matthew 6:19-24, 33

The right use of money is a worthy goal, but money for its own sake is no goal at all. When hearts are attached to riches they are detached from God. Realizing the danger of this to His own people, our Lord gave the directions contained in our Scripture lesson.

The Sermon on the Mount was addressed by Christ to His disciples. In Matthew 5:1, 2 we read that "his disciples came unto him, and he opened his mouth and taught them." The character of the kingdom citizens and their position in the world as the salt and the light, occupies the first sixteen verses, then the great Teacher proceeds to show that the kingdom of righteousness which He came to establish does not destroy the law of righteousness but fulfills it. In Romans 5:5 we read that the love of God is shed abroad in our hearts by the Holy Spirit who is given to indwell Christian believers. See also Romans 7:6; 8:3, 4.

In Matthew 6 the Master deals with the great principles of the new life such as giving praying, fasting and trusting. The Scripture verses assigned for our topic deal with the last mentioned of these four principles, namely, that of trusting. To a trustful heart the accumulation of money can never be a goal. The gratifications that money purchase are decidedly inferior to that deep satisfaction which the trustful and obedient soul experiences and enjoys. The man who can enter into the experience of the Twenty-third Psalm and say, "My cup runneth over," will never make money a goal. He may, and should, use his money that there may be treasure in heaven for him through all eternity. Money invested in missions, in Bible schools, in gospel preaching, in the saving of people from sin unto God, creates lasting joy and deep satisfaction. Compared with this other pleasures are insignificant. But when the eyes are not properly focused and the heart is divided, when love and loyalty to Christ is lacking, then there is danger, real danger, of money becoming a goal in itself. "A double-minded man is unstable in all his way" (James 1:8). Our only safety and blessing is to abide in Christ (John 15:1-8).

#### Noted Surgeon Sings

#### While Wielding Scalpel

Stockholm.—Stockholm's famous singing surgeon, Dr. Samuel Hyblinette, head of the Sabatberg hospital, is receiving thousands of congratulatory messages on the occasion of his fiftieth birthday.

Doctor Hyblinette possesses a beautiful tenor voice, and he sings operatic arias while visiting patients in the hospital, while they are being prepared for operations and even while he is wielding the scalpel.

He believes his songs help to banish fear of the ordeal under the knife, and that they also help in the patient's recovery. That this belief is shared by many of his patients is evidenced by the flood of congratulatory messages he has received.

#### NOTICE TO CREDITORS.

This is to give notice that the subscriber has obtained from the Orphans' Court of Carroll County, in Md., letters testamentary upon the estate of

WILLIAM H. FLEAGLE,

late of Carroll County, deceased. All persons having claims against the deceased, are hereby warned to exhibit the same, with the vouchers properly authenticated, to the subscriber, on or before the 11th day of December, 1926; they may otherwise by law be excluded from all benefit of said estate.

Given under my hands this 14th day of May, 1926.

G. WALTER WILT,

5-14-5t Execut.

**PERFECTION**  
Oil Cook Stoves and Ovens

WE have the PERFECTION STOVE that the Six Famous Cooks recommend so enthusiastically. Let us show you why a PERFECTION in your kitchen means better cooking and greater convenience in doing it. Many styles and sizes.

**ROY. B. GARNER**

Taneytown, Md.

LEFT to right: Mrs. Sarah Tyson Rorer, Miss Rosa Michaelis, Mrs. Belle DeGraf, Mrs. Kate B. Vaughn, Miss Lucy G. Allen, and Miss Margaret Allen Hall.

## "If men did the cooking they would insist on a good stove"

Where is the woman who does not agree with Mrs. Rorer's statement? Yet why will so many women put up with an inefficient stove day after day?

MRS. RORER, famous Philadelphia cooking expert, and five other famous cooks who recently conducted a practical test of the Perfection Stove, agree that good cooking results depend to a great extent on a good stove. They agree, too, after critical, exhaustive cooking tests that the Perfection is a mighty good stove. Their comments on the Perfection's performance will give you some idea of what men would demand, and what experts do demand of a stove.

**Easy operation.** "I like equipment which is easy to work with," said Mrs. Belle DeGraf, San Francisco, home economics counsellor. "And the Perfection certainly is. It lights at the touch of a match. And the heat is regulated by a simple turn of the wick."

**Adaptable, too.** "The Perfection proved its adaptability to me," commented Mrs. Kate B. Vaughn, Los Angeles, home economics director, "by performing many cooking operations at the same time—frying, baking, boiling, and broiling."

**Ample heat supply.** "And," said Miss Rosa Michaelis, famous New Orleans specialist, "there is no lessening

of heat, regardless of how many burners are lighted. Each is an independent unit."

**Dependable flames.** "That's true," remarked Miss Lucy G. Allen, of the Boston School of Cookery. "And the flames stay just as you set them. They do not creep."

**And clean.** "There's no soot or odor, either, when you cook on the Perfection," added Mrs. Rorer. "The efficient long chimneys burn the oil completely before the heat reaches the utensils."

**Safe and economical.** "All these points recommend the Perfection," said Miss Margaret A. Hall, Battle Creek College of Home Economics. "And, in addition, it is safe and economical in operation. What more could anyone ask of a stove?"

In other words, the Perfection meets the high standards of the six critical cooks. It will meet yours, too. See the 1926 Perfections at any dealer's. All sizes from a one-burner model at \$6.75 to a five-burner range at \$120.00. Every woman who cooks deserves a good stove.

#### Ship 202 Years Old

In the Baltic sea there is a ship known as the Constance which is two hundred and two years old and still in sailing service. She was built in 1723. Sweden has a vessel, "the Emanuel" built in 1749 and still engaged in carrying lumber. "The Good Intent," a vessel built in 1790, was sold at Cardiff in 1919, at the time doing regular service, and brought the respectable sum of \$1,000. Shipping men point to these old wooden ships to show that they remain seaworthy many years.

#### Nearly Half Prewar Jews in Russia Gone

Washington.—According to a report prepared by the council of nationalities of the Soviet union received by the Russian information bureau here, the Jewish population of the Soviet union has decreased to 2,800,000, as compared with 5,000,000 in the territory of the former czarist empire.

The decrease of 2,200,000, or more than two-fifths, is explained by the loss of heavily populated Jewish centers to Poland, Lithuania and other states at the close of the war and also by the numerous pogroms of the white guard and the Petlura and Polish armies in the Ukraine and in White Russia during the periods of civil war and invasion.

#### Patriotic Pride

The term "God's country" is often applied to a nation or country by its sons and daughters. A recently published bulletin on Australia calls attention to the fact that among the white inhabitants poverty is practically unknown, the aged, infirm and children are adequately provided for, the labor situation is satisfactory and the territory itself offers unlimited possibility for development, exploitation and the exercise of man's ingenuity. All these things would make it seem a favored spot.

#### Originated Turkey Trot

Going back to the early Eighteenth century to show that every innovation in dancing has met with violent opposition, a writer in Liberty Magazine says that it was in 1912 that Mabel Hite, an actress, and Mike Donlin, a ball player turned vaudeville, who was Mabel's husband, brought to Broadway the first turkey trot New York had ever seen. Right there, recently ordered terpsichore expired.

#### Raven in Literature

Ravens hold a high place in folklore and in the real literature of many countries. From the beginning they have been thought uncanny, although, according to the English story it was the magpie and not the raven which was the only bird to refuse to accompany Noah into the ark. How it or rather they, for there must have been a pair of them, survived the flood tradition does not tell.

## PERFECTION

### Oil Cook Stoves and Ovens

Here is the Perfection Stove that the Six Famous Cooks recommend so enthusiastically.

But you don't have to accept even their word for what the Perfection Stove will do in your kitchen. Come in and see us demonstrate it. A down payment of \$5.00 will put one in your kitchen.

## TANEYTOWN LOCALS

Items of news from town, or vicinity are always wanted for this column. Especially accidents, sales of real estate, fires, important happenings, visits to or from the community social events, and all matters of general interest to those at home, and away from home.

Mrs. Margaret E. Seiss, in company with Mrs. Norville Shoemaker, left for Washington, on Monday.

Miss Margaret Waybright, near Harney, is visiting her sister, Mrs. John Hockensmith.

Mr. and Mrs. Homer Stover, of Columbia, Pa., spent the week-end with friends in and near town.

Mrs. Ida B. Koontz, left on Tuesday for Philadelphia, where she expects to spend part of the Summer.

Wm. T. Childs, the well known Baltimore building contractor, paid our office a friendly visit, on Tuesday, on his way home from Hanover, Pa.

Judge Davidson is trying the front porch, the nice warm dawns, and is beginning to "pick up" in strength.

Mrs. Francis Shaum was taken to Mercy Hospital, on Monday for an operation for appendicitis, and is doing fine.

W. Frank Kehn, of Baltimore, received a light stroke of paralysis, recently, but is reported to be improving.

Miss Nellie B. Hess and her friend, Miss Morris, of Baltimore, spent several days this week at the former's home.

York Street is now pretty well torn up, due to the grading being done on this end of the state road to Littlestown.

The Grain & Supply Co., put in, this week, a new 18½-ton Fairbanks scale, of the latest type, that will accommodate heavy trucks.

The man who is so busy as not to have time to read his home paper, is like the man who was so busy chopping wood that he did not have time to sharpen his axe.

It is an old, old experience, that those who are in possession of real news items that we would like to publish, talk them over everywhere else but at our office.

Guy W. Haines, of Bristol, Pa., paid our office a visit on his way home from Baltimore. He likes Bristol, and says it is a live business place, and growing.

Miss E. S. Morris, of Baltimore, who had been visiting in Taneytown for some time, went to Springfield Hospital, last Sunday night, for a period of rest and treatment.

Mrs. Robert Galt, of Baltimore, who was visiting Miss M. Louise Reindollar, was called home unexpectedly on account of the death of her brother, Augustus Hampson, of Baltimore.

Mr. and Mrs. Geo. Baumgardner and son, Delmar, and Mrs. Edward Harner, left on Wednesday, for Ohio, where they expect to spend several weeks with Mr. and Mrs. Elvin Dern and Mr. and Mrs. James Reindollar.

Through the solicitation of Dr. R. F. Wells, the Taneytown Fire Co., will hereafter have a banner when it takes part in parades. The cash was subscribed very freely by business men and citizens.

Taneytown Firemen won six prizes at the State Firemen's meet in Westminster, last week, totaling \$122.50, and barring an accident would have won first in hose reel race—\$125.00—the main event.

Mr. and Mrs. M. A. Koons entertained at their home, on Sunday: Mr. and Mrs. F. J. Shorb and daughter, Miss Vallie, of Detour, and Dr. and Mrs. E. W. Koons, Mr. and Mrs. Chas. C. Eyer and Miss Rhoda M. Weant, of Baltimore.

Mr. and Mrs. Clarence Shank and daughter, Mary, Mrs. George Newcomer, Mr. and Mrs. George Hiltbrick, Mrs. Archie Crouse, Mr. and Mrs. Henry Becker, attended commencement exercises at Maryland State Normal School, at Towson, on Tuesday.

Mrs. S. C. Ott, Mrs. Walter Bowler, Mrs. W. F. Bricker, Mrs. F. T. Elliot, Mrs. R. H. Alexander, Miss Mary Reindollar, Miss Mabel Leister and Miss Ruth Ohler, left on Monday to take the Rural Womens short course at College Park, which also includes a trip to Washington.

A survey has been made of George St., in order to be straightened out grades and curb lines and to improve both the street and the side-walks. The street will now be more important because of the new High School building at the head of it, and it will be a fine thing if this work can be done in a manner satisfactory to all concerned.

Miss Ruth Stambaugh, spent the week with friends near Bridgeport.

Miss Anna May Fair, is spending the week in Hanover, with Mr. and Mrs. Jacob D. Null and family.

Quite a number of Taneytown people visited Frizellburg, on Monday evening, to hear the Loysville Orphans' Home Band.

Burgess S. Miller has resigned as town bailiff, an office that he has held for about thirty years. Now who wants a nice easy job with lots of honors and big pay?

Announcements are out announcing the marriage of the daughter of Mr. and Mrs. Charles E. Clark, Edith Catherine to Mr. Charles Mason Johnson, on Wednesday, June 30th., at St. Luke's Reformed Church, Baltimore.

Mrs. Jacob D. Null, of Hanover, will be one of the graduates at College Park, this year having finished the four year course; Mrs. William Mehning and Miss Burkholder, of Keymar, are also spending this week at the same place.

A survey was made of the Taneytown-Keymar road, this week, which looks as though something will be done in the way of permanent rebuilding of this much used road. Some say the road is to be graded this summer, but we have no definite information on the subject.

A telegram was received here, on Thursday, of the death of William A. Golden, prominent Pittsburg attorney, and well known in Taneytown. The body arrived here this Friday morning, for services and interment at St. Joseph's Catholic Church. We will give further particulars next week.

There will be a popular meeting in the interest of Foreign Missions held at the Taneytown Presbyterian Church, this evening, Friday, June 18, at 7:30. Mrs. James Duguid, Jr., of New York City will address the meeting. Mrs. Duguid is Field Secretary of the Board of Foreign Missions of the Presbyterian Church.

Those who visited Wm. D. Ohler and family, on Sunday, were: Mr. and Mrs. Frank Beamer and family, of Biglerville; Mr. and Mrs. Geo. Beamer and family, of Tablerock; Mr. and Mrs. John Ohler and Mr. and Mrs. Geo. Stover and son, of Gettysburg; Mr. and Mrs. Guy Warren and family, and Miss Annie Eigenbrode, of Keysville.

From reports that have reached us at different times this Spring, Taneytown needs better police regulations, especially late on Saturday nights. If folks will not come to town and voluntarily behave themselves as gentlemen, they ought to be made do so by law, and be locked up or heavily fined. As long as they can do as they please, and get away free with it, disorder will continue.

Noah Fleagle, of Tampa, Florida, aged over 80 years, is visiting relatives in this section, and looking up a few remaining old acquaintances. He came to Philadelphia to attend the Shriners convention, and marched in the parade and played the clarinet in a band. He is quite vigorous mentally and physically, for his age. He has been living in Florida for many years. As a boy, he was a pupil in Andrew McKinney's school.

Taneytown has a newly organized Baseball team, and the first game will be played next Wednesday afternoon on the Taneytown High School ground at 2:30 P. M., with the Thurmont, Frederick Co. League team. The home team will have Bonsack, of Westminster, for pitcher, and will present a strong line-up. The management stands for clean games, and asks for liberal support from the home town. Admission will be 25 cents. Come next Wednesday and give our boys a good send-off! A real game is promised.

Jas. P. Staley and wife, entertained the following: Mrs. Margaret Lemmon, C. B. Lemmon and wife, Isaac Staley, Harry Kouck and wife, daughters, Mildred and Edna Kouck; Clarence Sauerwein and wife, daughters Helen and Margaret and son, William; Horace Staley and wife, and daughter, Emily; Jas. McClelland and wife, Earling Kuhl and wife, and son, John; daughter, Anita; John Trone and wife George Staley, Wm. Eckles, all of Baltimore; Clarence Baumgardner and wife, sons Lake and Norville, daughter, Pauline, of Taneytown; A. S. Staley, wife and son, Fred; Ralph Staley and wife, and Miss Julia Mehning, of Littlestown; Mrs. Floyd Hornberger and wife, of Steelton, Pa.; Edward Orndorff and wife, sons Robert and Earl, of Union Mills. Refreshments were served on the lawn and everyone enjoyed themselves.

Dishes estimated to be worth \$30,000,000, are broken in the United States each year.

## LAST PAGE EDITORIAL.

### Good Roads—Fair Weather.

All of us like this pair, and we sometimes like them so well that we dislike anything else. We smile, as long as everything goes just as we like it; but let annoyances come in the way—rough travelling and cloudy weather—and we are ready to growl and frown, and act like "quitters." Like little children, we do not care to play unless we can always have our own way about the game; so, we are merely children of larger growth, especially in matters that concern us personally.

The worst of it is, we lose temper and act as though the whole world and every little part of it should fit our little selfish grouches. Real men and women are not built that way; but, a lot of us have the age and figure of men and women, but are pigmys in mind and purpose. Actually we need bumps and clouds, if not actual smash-ups and storms, to take the conceit out of us.

It is a fine thing to have strength of character and firm convictions, as well as to exercise a reasonable amount of self-assertiveness, but it is still finer to sink our personal desires, at times, for the common good, and this virtue by its absence is apt to show up our real size.

Placing first objects first on our program may call for more patience than we naturally have, and we may wait in vain sometimes for our talents to be recognized; and yet, perhaps we are all the better men and women, in fact, if we do not always get that which we think we ought to have, especially if we must lose something from character in the getting. It is a pretty well demonstrated fact that growths of the hot-house variety do not last as well as the more sturdy "slow growers," and so it is that rough roads and stormy weather develop and strengthen the best human fibre.

## CHURCH NOTICES.

This column is for the free use of all churches, for a brief announcement of services. Please do not elaborate. It is always understood that the public is invited.

Harney—Sunday School, 9:30; Morning Worship 10:30. Third Quarterly Holy Communion on June 27, at afternoon service.

## Can You Do It?

During his first few days in camp the young recruit was the victim of so many practical jokes that he doubted all men and their motives. One night while he was on guard, the tall figure of one of the officers loomed up in the darkness before him.

"Who goes there?" he challenged. "Major Moses," replied the officer. The recruit scented a new joke. "Glad to meet you, Moses," he said cheerfully, "Advance and give the ten commandments."

## Marriage Licenses.

Maurice H. Gosnell and Nellie S. Snyder, Hampstead.

Romanus R. Myers and Grace Mitchell, York, Pa.

Carl J. Lang and Martha M. Nogle, Pennsylvania.

Louis J. Hobbs and Almeda Rudisill, York, Pa.

George Daniel Keck and Alice L. Lucas, Baltimore.

## National Editors in California.

The Editor of The Record, who is a member of the National Editorial Association, has been receiving during the past two weeks, some very handsome booklets from California, where the annual tour of the Association is being held this year. These events are always quite elaborate, as well as educational, and we regret exceedingly that we have never been able to participate in one of them. Each year a different section of the country is visited, and everywhere the members are met with elaborate hospitality.

There is only one chance in 110 of a person who commits deliberate murder in America, being executed, according to figures given by a Chicago Judge.

## Notice of Election.

## Farms For Sale.

God's green earth and life's reward. I have run it over I have run it through; I have trod the clover under skies of blue, and farms for sale that I never knew.

Buy a farm in a well regulated State, such as Maryland. The fellow who sold during the inflated period of the World War is in California, and the fellow who bought is in hot water. Buy now and move on Wall St., I can give you the choice of 50 such farms less than two hours drive to Lexington Market.

About the only time a man is satisfied with his lot, is when he is buried in it. What we want is more farmers and less educated criminals.

**D. W. GARNER,** Real Estate Broker, 6-11-2t TANEYTOWN, MD.
