DRY WORK FOR MONTH.

Prohibition Report Shows Great Ac-tivity in State.

Dry agents arrested 220 defendants on whisky charges in making 218 raids during the month of October in the Baltimore enforcement district, according to the monthly report Prohibition Administrator John F. J. Herbert.

One hundred and three saloons were raided during the month, the report shows, while 115 raids were made on still sites in open country and residences

Combined with the record made by the local enforcement squad for the previous ten months the report shows that 2,174,251 gallons of whisky mash was seized during the eleven months of the Herbert regime. This would make when distilled something over 400,000 gallons of whisky, Mr. Herbert said.

The report also shows that during the eleven months the agents have arrested 2,210 persons on Volsteadlaw charges. One thousand and twenty-six stills have been seized and 43,-416 gallons of illicit distilled whisky and 2,335 gallons of alcohol.

Nine hundred gallons of alcohol seized recently has been turned over to the Postoffice Department. Mr. Herbert said, for use this winter in the radiators of automobiles employed in the mail service. During the last month approximate-

ly 100 cords of fuel wood has been distributed among the poor of Baltimore by a local charity agency, which is carrying on the work at the in-stance of Mr. Herbert.

This wood has been seized in raids on stills where mash barrels are tak-en and on saloons and home-brew beer manufacturing establishments where the beer cases are seized and reduced to fuel wood by dry agents at their Fort McHenry storage plant. From this point it is distributed among the needy by the agency.

During the administration of Mr. Herbert 164 automobiles, used in the transportation of contraband liquors have been seized, the report reveals.

BIBLE CLASS RALLY **RED CROSS ROLL-CALL** THE Over 1000 in Parade and the County Well Represented.

The annual rally of the adult Bible. classes of Carroll County was held in Westminster last Sunday afternoon, and attracted a very large crowd of spectators and paraders. Mayor Geo. E. Matthews headed the procession made up of about 1000 men represent Campaign Being Waged = Against Accidental Deaths. Just as we were about to call attening forty schools, in the county, while tion, again, to the coming annual rollmany more than that looked on from call of the Red Cross, along comes an article for publication concerning the

autos and the sidewalks. There were four bands, and some of the delegations made a colorful apthe delegations made a colorful ap-pearance. Delegations were present from Westminster, New Windsor, Carrollton, Uniontown, Mt. Airy, Hampstead, Sandyville, Wakefield, Silver Run, Woodbine, Manchester, Keysville and other places. Rev. John S. Hollenbach presided of the Maria magning at Alumni Hell

at the Men's meeting at Alumni Hall, Rev. J. Walter Englar, New Windsor, and Rev. J. B. Rupley, Westminster, participated in the opening service. The speaker of the day was Dr. Hugh L. Elderdise, president of the Westminster Theological Seminary. He appealed for a united christendom at home—as represented in such gatherings as that of the day-for the sake of a more united christendom in foreign lands. He closed by saying that the great christian unity for peace, when it comes, will not be through the clergy and theological professors, but by the laymen of the church.

Special efforts were made during The women's meeting at the Arthe year to reach as many persons as possible with first aid instruction, the mory was largely attended. It was presided over by Mrs. J. W. Reinecke, and the address was by Mrs. Joseph report states, and during that period nearly a quarter of a million persons in the United States have received in-Apple, of Frederick.

Pageant of Carroll County.

The citizens of Carroll County are in first aid and received certificates of The citizens of Carroll County are hereby invited to co-operate with Western Maryland College in the pre-sentation of a pageant depicting the history of Carroll County, to be held on Hoffa field, Westminster, Md., on June 4, and 5, 1928. Miss Dorothy Elderdice, who has a national reputation as a pageant di-rector will write the pageant and diproficiency. A severed artery can cause quick death unless

rector, will write the pageant and di-rect it. The pageant will be given in connection with the Commencement of Western Maryland College. The public schools, the churches, the lodges, the civic and literacy clubs, the business firms, and all county organiza-tions will be asked to participate in making this historical pageant the greatest spectacular event that the county has ever known. A. N. WARD, Pres. W. M. College.

Warning Against Inspectors.

Realizing that people can be imposed on by admitting unauthorized persons into their homes, or places of business, with the understanding that they have come to "inspect" certain equipment, such as telephones, electric lights, or radio apparatus, the Telephone Company has supplied its class of ner orm t work with distinctive metal badges. Each badge has a serial number which the employee will be glad to show upon request as a means of identification If there is any question on the part of the business man or the lady in the home, it is only necessary to secure the workman's name and badge number, telephone the manager's office, and the repairman's identity will be checked in a few minutes. In this way there will be no doubt in anyone's mind as to "who's who and why," officials of the Chesapeake and Potomac Telephone Company state.

CORN SHOW

Many Opportunities to Enter Ex-hibits in the Show.

COUNTY

County Agent L. C. Burns, announces classes for entering exhibits in county wide show today. From all indications, this year's corn crop will be superior to any in the past several years and arrangements are now be-ing made for one of the largest corn shows ever held in the county. There will be open class for exhibiting. 1. Reids and Reid type

a. Including Reids, Leaming and Finks.

2.

3.

Golden Queen. Lancaster Sure Crop. Other yellow Dents:- Including Griffords

White Cap, Yellow Dent. Pop corn, including White Rice 5. and Pearl.

7. Other pop corns.

In addition to ribbons for all the above classes there will be some worthwhile premiums. Arrangements have been made to have some very competent judges from the State Agricultural College and it will be an excellent opportunity to learn a great deal about how to grow better and more corn in this county. There will be at this show some educational ex-hibits and it is hoped that all corn producers will come and enter exhib-

its in one or all the above classes. One of the outstanding features this year will be the Junior exhibits by the boys and girls. Any boy or girl under eighteen years of age will have an opportunity to exhibit corn

in a Junior class. The Agricultural instructors in the county are planning to have the boys enrolled in their classes enter corn in the Junior exhibits. This will give the young corn growers a chance to compete in the show just as their "Dads" will do. Come on, boys, and see who can select the best exhibits! It will be worth while.

GRADE CROSSING WORK **C. E. CONVENTION HELD** Huge Amount of Work Ahead for Future Years.

According to the Baltimore Evening Sun, John N. Mackall, chief engineer of the State Road Commission, is of the opinion that the elimination of railroad grade crossings will be commenced next year; in fact, one at Borden Shaft in Allegany county has already been started, and several others have been chosen on which work

is to be started next year. Mr. Mackall states that there are 198 crossings in the state and that it will require 20 years to remove all of them under the conditions fixed by the

though the whole proposition is being gradually surveyed. The crossing at Hyattsville, for instance, is estimated to cost about \$200,000; and in all of

proposition contains many difficult questions, as well as calls for vast amounts of expense; and even should all the railroad grade crossings be removed, the state road grade crossings will still contribute their big quota of

deaths and accidents. One of the big problems is the crossings in Cumberland, where a main state highway approaches the tracks of the B. & O. on a sharp de-scent; but every city and town in the state will have its grade crossing problems, all of which are made the more serious because of improved highways, high speed motor vehicles, the lack of police control at crossings and the use of proper care on the part of drivers.

Paragraph for Farmers.

From 2,000,000 to 3,000,000 acres of fall-sown oats are grown annually in the South, 50 percent of the oat acre-age in the Carolinas, Georgia, Ala-bama, Mississippi and Louisiana be-ing devoted to the fall-sown crop. Crop rotation does not cost any

money, but it rivals the use of manure and fertilizers in maintaining and increasing yields of crops. A good rotation is a most effective means for increasing yields and lowering crop-

production costs. In order to acquire farm land most of the present landlords have had to buy it. Of land owned by a representative group of 24,000 farm landlords latest figures show that more than four-fifths had been purchased and only about a sixth obtained by gift or inheritance.

In the far West where wood is stored in the forests, fire insurance is often carried on the wood. The rate is high in the dry season, but the wood is not in danger in the rainy season. When weather reports show late-continued rain a slightly delay in taking out insurance may be risked, and considerable savings in premiums are

possible. In recent grain farm

IN CUMBERLAND. Guy L. Fowler, Westminster, one of the Vice-Presidents.

The annual convention of the Maryland Christian Endeavor Union closed its sessions in Cumberland, on Sunday night, in the First Presbyterian Church. The convention throughout Church. was full of fine addresses and special features, and much interest was manifested. The closing feature was the passage of a resolution against Sunday movies, and pledging support only to candidates for political office who are in harmony with the Eigh-teenth Amendment. The convention next year meets at Cambridge.

The following officers were elected for coming year: Pres., Wilfred Paul Riggs, Pastor of the First Presbyterhiggs, Pastor of the First Presbyter-ian Church, Havre de Grace; vice-presidents, Karl F. W. Stuiber, Cum-berland, J. Brittain Winter, Baltimore Guy L. Fowler, Westminster; W. Edgar Porter, Salisbury.

The executive secretary is Williard Edward Rice, Baltimore; recording secretary, Miss Margaret E. Tinley, Baltimore; treasurer, G Foster Fells, Baltimore; assistant treasurer, Geo. E. McCubbin, Baltimore; alumni superintendent, Miss Lena Ruttercutter, Baltimore; intermediate superintend-ent, Miss Ethel R. Poyner, Baltimore; associate intermediate superintendent, Miss Lillian F. ers, recognizing the feeding value of dockage, are taking a greater interest in cleaning their grain on the farm or in having it cleaned at the country elevators and utilizing the screenings as feed for livestock. Country elevator operators, recognizing this demand for screenings, are making a greater effort to clean the grain be-fore shipping it to market.

Increase in Gasoline Tax.

In the fiscal year of 1927, which ended September 30, owners and operators of motor vehicles paid to the State gasoline taxes totaling \$3,520,-711, it was learned Wednesday when the figures for the last half of the year were made public by William S. Gordy, State Comptroller.

The figures indicate that the consumption of gasoline is increasing

steadily. A gasoline tax of 1 cent a gallon in the fiscal year just ended produced \$1,269,000, whereas in the previous fiscal year, 1926, a tax of 1 cent pro-duced \$1,057,000 and in 1925, \$941,-

If the consumption of gasoline continues in the fiscal year of 1928 as last year, there will be available for the maintenance of roads, the construction of new lateral roads and the elimination of grade crossings approximately twenty-five per cent more funds than was estimated when gasoline tax bills were presented to the

Legislature last winter.

Apple Crop Small.

Prospects that the apple crop this year will be the smallest since 1921. and, excepting that year, the smallest in twenty years, are reported by the Bureau of Agricultural Economics, United States Department of Agricul-

hands, for the dolls to take to the school children of the United States. On Thursday, November 3, the Emperor's birthday, the official farewell was given the dolls by the Japanese Government. Then they start their long journey, expecting to arrive in Washington by Christmas. Sekiya San, of the Japanese Department of

Education, has been delegated to ac-company them, and to see that they reach the United States safely.

The children of Japan are sending this Christmas present to the children of the United States to show that they understood the purpose of the American children in sending nearly 13,000 dolls to the children of Japan last winter. The American children sent dolls to nearly every school in Japan, to show that the people of this country want the friendship of the people of Japan.

Japan grasped the meaning of the present at once. Interest was so intense that people were actually in danger of being crushed by the crowds that gathered to see the dolls from America when they were exhibited. So great was the enthusiasm that plans were immediately made to return the present and show to the United States that the Japanese people want to be friends with us.

Plans for the welcome for these messengers from Japan are being made by the Committee on World Friendship among Children. After the official reception in Washington, it is expected that groups of the dolls will visit the States and most of the important cities of this country, so that everyone will have a chance to see, in minature, how a Japanese lives and dresses, and to realize that in spite of the distance between them, Japanese and Americans can be friends.

Pound Party for Gov. of Texas.

The salary of Gov. Dan. Moody, of Texas, is said to be only \$75.00 a week, but Mrs. Moody says they are not downhearted over it, and consider it rather a "lark." it rather a "lark." A "pound party" was recently held for their benefit, when their friends brought groceries by the pound.

"Inside" Information for Women.

Liver and bacon makes a good dinner meat, especially prepared, with the merit of being very valuable to the diet. Any kind of liver supplies vitamins, iron, and furnishes the body with protein and calories.

Peach dumplings, baked in muffin pans, are seasonable now. Serve hot with hard sauce, liquid sauce, or whip-ped cream. Peel the peaches but do not remove the stones, as they give the dumpling an extra good flavor.

Unwrap meat as soon as it is brought from the market, and place it in a clean, dry, covered dish in the refrigerator or other cold place until wanted. Don't wash meat until just before cooking. Washing draws the juices out and hastens spoilage.

Always take the pieces of bacon out of the skillet as soon as they are delicately brown and crisp. Drain them on clean, unglazed paper. If you leave them in the fat they will be greasy. Cook bacon in a heavy, broad iron skillet over a slow fire, and watch it constantly to prevent scorching.

Two French architects, Georges Lecuyer and Henry Jubault, have de-signed a house which is mounted on a turntable, so that by means of an electric motor it can be swung around to face the sun or the breeze according to the desire of the occupants. This house, consisting of seven rooms, is octagonal in shaps and is built of steel and concrete.

Jumping with small balloons, using them for racing, high jumping, or similar contests, has interesting possibilities as a new competitive sport. Balloons for this purpose have a capacity of about 3500 cubic feet and are fitted with a rigging and body harness like that used on a parachute. A single jump may send the jumper 40 feet into the air, perhaps covering a distance of 100 yards or more.

Never hesitate to imitate what is ood. The progress of the world has me from such imitation. If you were opportunity, what scorned and refused you? Would you not cease to visit them? The Canadian Government provides

A Little Talk on Thrift.

"I can't understand why I am always running behind in my personal financial affairs," a man who earns a handsome salary said to the writer some time ago. When asked if he kept a record of his expenditures, he reest means-to show how for the smallplied that he was too busy to be bothered with such details. "Try the exhealthful conditions, beauty and periment for a month," suggested the writer, "and you will have the answer to your question."

The plan was tried. Every penny of expense was jotted down and at the end of the month the man found that he had spent about \$100 more than he had thought was his custom.

That explained the reason why he was always in a quandary about his personal affairs.

When he was brought face to face with conditions he began to change his habits, and his situation improved in like proportion.

There are no doubt many such persons as the one referred to who constantly are running behind and cannot understand why.

Figures do not lie. You can't spend your money and have it. If you want to spend constructively and save wisely you must eliminate the little wastes

Above everything else you must know what you are doing. You cannot build yourself up on the shifting sands of ignorance or indifference.

It may seem like a waste of time and effort to keep a strict record of every penny you spend, but it is the best method of getting on the right | track in the management of your per- roll County man was killed by being sonal affairs.

Rev. Kammerer made it clear in the opening of his address that he was not "lampooning" the hospitals at Gettysburg and Hanover, but spoke of them as "two splendid and efficient merciful institutions," nor did he 'harshly criticise the Trustees, or management, for having accepted the gate receipts of last Sunday's baseball game" because of public opinion on both sides. The following are paragraphs from his sermon, clipped from the Littlestown Independent;

"If any man would have an answer as to why that preacher has become bold to the extent of choosing this subject, I will give it now. First: Because of the commission given every preacher of the Living Word by the head of the church, Jesus Christ, when he said, "Go ye, therefore, into all the world and teach all nations, baptizing them in the name of the Father and the Son and the Holy Ghost: Teaching them to observe all things whatsover I have told you and lo, I am with you always even to the end of the world." And second-ly, for the purpose of calling upon my fellowmen to refrain from any practice which is contrary to the laws of God and the laws of the land in

demonstrated—but their cost was not Our public institutions, no matter what may be the nature of them, should not in any way condone or sanction any proposition of so-called "charity benefit" which is in any way detrimental to the welfare of the state, or which in any way is a violation of the laws of the state.

There are at all times two great regimes which must be considered: The government of the state and the government of God.

Both hospitals receive appropriations from the state. The one received \$15,000 and the other \$6,000. Either one can therefore, ill afford to accept gate receipts of a ball game played on the Christian Sabbath which is an absolute transgression of the laws of the state of Pennsylvania. ties join in the local campaigns, which will culminate in a national Better Homes Week, April 22 to 28, 1928.— Rec'd for Publication. The hospitals should not have been in sympathy with the Sunday game because of the illegality of the entire affair. And for the purpose of discouraging others in this particular violation of the law should absolutely refuse to accept the sum allotted to them.

It is as much a violation of the laws of Pennsylvania to play Sunday baseball as it is to make and sell bootleg whiskey, or to steal or to * *

more than once too! Just the same—a good 5c cigar is possible and *Havana Ribbon* is its name! Here's the difference: Havana Ribbon sold at a higher price for years. Sold big! And just because it did pile up such volume sales it is now possible to make the price a nickel. A downright good cigar - regardless of With all the mellowness and price. body that comes from ripe tobacco. Try it. Step into a nearby cigar store-today-and ask for "Havana

Ribbon." It will cost you just a nickel, but you'll forget the price the minute that mellow mildness and friendly fragrance start talking to your taste!

Princess the Mother

of Wonderful Artist Flanders fittingly celebrated the three hundred and fiftieth anniversary of the birth of Pierre Paul Rubens, the most glorious of her sons. Few men are so universally known

as Rubens. This chiefly through the great number of his paintings, scattered all through the world, and also his voluminous correspondence existing in Spanish, Belgian, French, English and Dutch libraries. Recent researches have brought out very curious revelations on the origin of Rubens.

It appears that his father, Jan Rubens, had a liason with Anna of Saxony, wife of the great William the Silent, prince of Orange. Pierre Paul was the son bern of this illicit union. The child was not recognized by Orange, who subsequently divorced his wife.

The legitimate wife of Jan Rubens adopted the boy. But the puissant family of the Oranges never forgave the young painter for being allied with them by blood. They persecuted him all his life, according to new revelations .- Chicago Journal.

of Strict Obedience

"The theory of teaching a child to do exactly what he is told and nothing more is not a sound basis of education unless the element of reason is injected," said Professor Jordan. "A case in point is little Robert.

"When his mother told him to go and see if the water was running in the bathroom he returned and said, "Yes, it was running, and I turned it off.'

"'But I didn't tell you to turn it off !' exclaimed his mother. 'I merely told you to see if it was running.'

"After a dozen or so experiences of this sort Robert finally grasped mother's idea, so one day, when she asked him to run about the house and see if anything was burning, Robert did and then calmly returned to his

And love of God in their hearts, and minds, and spirits to the extent that God would have them. Every step forward in the endeavor for an open Sunday is a step downward. It is a demoralizing step which will disgruntle the standards of man temporarily and religiously. It will undermine the stability of the Nation and the

> Go where an open Sunday is prac-iced. What do you find? Theatres, ticed. all places of amusements, gambling wheels, ball parks, all full and crowded by pleasure-loving and misguided prophet of old, "These be thy Gods O Israel."

There may be those who may reason that because the intentions of the promoters of the game were good and the gate receipts were given to a most worthy cause, no great sin of transgression was committed. But I wish to say here and now the end never are licensed for travel, that are also justified the means when the means are a violation of both the laws of God and man.

We propound these thoughts with one motive in mind namely; to constructively enlighten the minds of our fellow men, that they may assist in enforcing the laws of the state and the laws of God.

We cry out against the improper use of the Sabbath because we are convinced that when once the Laws of God are ignored, and the com-mandments of God are scrapped and the Christian Sabbath is junked there remains nothing but a scaffold on which to hang civilization."

Sharing Troubles

Some one has said that "when you tell & friend your troubles and he tells you his, you both have twice as many troubles as you had before." But it is not true. One of the quickest ways to get rid of troubles, or at any rate to ameliorate them, is to pour them into a sympathetic ear, and to listen, in turn, to what the other man has suffered. This is one case in which twice one is not two. The two sets of cares and worries are diminished, rather than increased, when they are combined .- Toronto Star.

play. "'Robert,' finally called his mother,

'I thought I smelled something burning. Was I correct?' "'Yes, mother,' replied Robert, 'it's our house.'"

Unjustly Accused

Something in the street car was burning.

The passengers sniffed, glanced at one another, looked into their pockets, investigated their seats.

Finally the thin cloud of smoke was traced to a gentleman's umbrella. It appeared that in the folds of the rainstick some inconsiderate person had deposited a burning cigarette.

The passengers snickered. With some difficulty the poor man extinguished the blaze.

he glanced This accomplished, around him and eyed, with particular suspicion, the lady sitting next to him. "I didn't do it," she assured him. "I don't smoke."-Pittsburgh Post-Gazette.

Roman Utensils

While the housewife of today may reasonably pride herself on the conveniences her kitchen affords, she need not smile too superciliously at the thought of the rude makeshifts of days gone by. She would certainly not do so were she to spend a little time inspecting the kitchen and other household utensils that were in use 2,000 years ago, as exhibited in the National museum at Naples. Saucepans lined with silver, pails richly inlaid with arabesques in silver and shovels handsomely carved figure among the household goods of those times.

If!

The small boy, aged six, was making a tiny wreath.

"What is it for?" inquired his mother. "You know you said you heard a

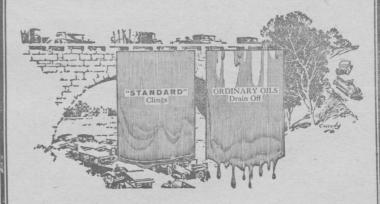

mouse in the pantry?" "Yes."

"And you know you said you thought of buying a trap?"

"Yes." "Well, if you buy a trap, and if you catch the mouse, and if they drown the mouse after it is caught,

and if the mouse is buried, and if we give it a nice funeral, we shall need a wreath. shan't we?"

Ability to flow freely, to cling to metal surfaces, to resist heat, to hold its bodythese are qualities refined into "Standard" Motor Oil through patience, long experience and elaborate equipment.

"STANDARD" MOTOR OIL The Measure of Oil Value

MODERN SCIENTIST CAN TELL OF BYGONE LIFE .--Before the advent of man upon the earth, Nature wrote down the simple records of life in sand and mud. Usually the first rain or gust of wind erased these records, but sometimes they remained and were preserved by the hardening of the mud and sand. Then more mud and sand were deposited on the records until a protective covering thousands of feet thick often hid the writings from the light of day.

HOW =

Nature, with eternity before her, would then set to work to uncover the records once more. With the aid of a stream of water she slowly, through thousands of years, cut through the thick blanket of hardened silt and made accessible the records of animals which roamed over the earth millions of years ago.

Thirteen hundred feet below the present top of the Grand canyon such a piece of old stone parchment was found by Dr. Charles Gilmore, of the Smithsonian institution. This slab of old red mud hardened into sandstone is a particularly fine specimen. Running across it are the tracks of at least three distinct kinds of animals! One was a heavy-footed creature with pads like a bear; a second stepped lightly and left marks of a catlike claw; while a third dragged a heavy tail which left a sharp groove in the mud between the tracks. It is the busipess of the scientist, with the aid of prehistoric fossil remains, to reconstruct these animals which lived so many thousand years ago .- Pathfinder Magazine.

How Business of Life Insurance Has Grown

Of all the remarkable records of business growth in the United States during the past five years (1921 to 1926) none approaches that of the fifty-two legal reserve life insurance companies. The burden of financial responsibility which now rests upon the shoulders of these fifty-two business organizations presents a figure of cold dollars which is beyond the grasp of any human being.

The total amount of the outstanding insurance issued by these fifty-two companies exceeds \$80,000,000,000.

The public debt of the United States is about \$19,000,000,000, approximately one-fifth of the outstanding life insurance.

Outstanding insurance is equal to about one-fifth of our total national wealth, estimated at close to \$400,-000,000,000.

The total annual income of all the people in the United States is estimated at approximately \$90,000,000,-000, or \$10,000,000,000 more than the total of insurance. Since 1880 life ine accumulations have

WHY=_____

Collectors of Manuscripts Are Downcast

Today it is unfortunate that almost all manuscripts are typed. There are, however, rare exceptions. The late Joseph Conrad was one of the very few authors who worked almost entirely in longhand.

When I bought the manuscript of his book, "Victory," at the Quinn sale in New York in 1924, I paid the highest price-\$8,100-ever given at auction for the manuscript of a living author. It was closely written on sheets that fill two bulky cases.

The average writer nowadays, after he has corrected the final draft of his work, has it copied by a competent stenographer and then makes any further correction on it he wishes. Many writers find it easier to create their stories directly upon the typewriter, while others dictate.

The typewriter-what a curse it has become to the collector! A century from now it will be almost impossible to find writers who stand the test of time.

Who knows but that the styles will have changed, and the machine upon which a masterpiece was brought to life will be considered even more precious !- Dr. A. S. W. Rosenbach, in the Saturday Evening Post.

Why Altitude Affects

Water's Boiling Point The so-called normal boiling point of water is 212 degrees Fahrenheit. That is the boiling point at sea level. But the boiling point of water is lowered about 1 degree Fahrenheit for every 550 feet of ascent above the sea level. Thus, in elevated positions, where the atmosphere is rare and the barometric pressure comparatively low, the boiling point may be much lower than at sea level. At the City of Mexico, 7,000 feet above the sea, water boils at 200 degrees Fahrenheit, and in certain places in the Himalayas at 180. Since the cooking of certain foods, as eggs, by boiling, requires a higher temperature, they cannot be boiled under such conditions. The summit of Pike's peak, more than 14,-000 feet above the sea, is one such place where eggs can be fried or scrambled, but not boiled.

Why Wool Preserves Heat

It is the insulating quality of wool which makes it desirable as a protective covering, rather than any inherent power to generate heat. Wool fibers in themselves offer little resistance to heat transmission. The "kinks" or "waves" which are so distinctive a characteristic of wool give it its protective qualities. These waves or kinks, of which the fibers have from two to thirty to the inch, give something of the characteristics of a coiled spring, and when the fibers are woven together tend to create a resilient fabric with innumerable tiny air pockets. It is this finely divided and trapped air to which wool fibers owe their qualities of warmth.

Why Girls Are Disfigured Each nation and each tribe has its

Youth Revolt Not New and Old Foundations Have Not Disappeared

By ROBERT E. SPEER, Presbyterian, New York.

A great many people who are watching the swing away from the old landmarks are asking, "What in the world are we going to do?" but if they will look in the Book of Psalms they will find the identical question was asked 3,000 years ago. This is not the first, the last or the worst time in history that the foundations have been destroyed.

The wailing of the elders because of the changing times in Bible days grew out of the youth movement started by the smooth, handsome, perfumery-loving son of David. And it is the youth movement that we blame today. Suppose we admit the worst and recognize the old foundations are gone, what then? There are three things that righteous people can do. One is to take a long look at the history that lies behind us, get the right perspective, keep calm and wait. Another is to go on being righteous, stand firm and wait for the storm to blow over, and the third is to go about your business, doing your daily duty, mind your own fires, and keep friendships warm and true.

The old foundations are not gone, the eternal realities are unalterable still. God is not dead and the Christian church is stronger than it ever was in history.

KEEPING WELL

WHITE HAIR FROM

FRIGHT

DR. FREDERICK R. GREEN Editor of "HEALTH"

FOR centuries poets, novelists and play writers to say pothing of

magazine writers and newspaper re-

porters, have told with many varia-

Failed to Appreciate "Alice in Wonderland"

All those who have been famous in imaginative work for children were children-spoilt children-themselves, asserts Harry Furniss in his book, "Some Victorian Women." Mr. Furniss, a famous Punch artist, says that "Hans Andersen cried at the table if he was not helped first, and was not given more jam on his bread than any one else."

Lewis Carroll's childishness was of a different kind; his was pure literary egotism.

"It was his habit to watch the children of well-to-do people on the sands at Eastbourne and then, without disclosing his identity, present those he admired most with a copy of 'Alice in Wonderland.' Subsequently he formally called on the parents. Then came the moment at which the Rev. C. L. Dodgson informed the grateful parent that he was 'Lewis Carroll,' the effect being magical and Carroll's delight immense.

"However, one day, the dignified lady whose little daughter had been the recipient of a beautifully bound copy of 'Alice,' by the strange, uncanny clergyman, remarked:

"'Oh, you are the writer of those rubbishy books, are you? Well, perhaps you may like to know that I threw the book you gave my daughter away-I certainly could never dream of her poisoning her mind with such

Mother Sheep Must

as that !"

Have Jumped Fence There is a common expression, 'stupid as a sheep," but this is not entirely just, for the sheep displays surprising intelligence when its maternal instincts are aroused.

Recently a shepherd was startled by the sudden and frantic bleating of a sheep outside his door. Going outside, he found one of his own flock, which immediately led him to the grazing pasture.

Here he had to open the gate to let

How Bug Gets Its Light

The lightning-bug (fire-fly) is a small beetle which in its adult state is winged; is nocturnal in habit, and during the day usually concealed in dark places. The luminous organs are beneath and at the rear of the abdomen, and consist of a specialized part of the fat-body covered by transparent spots. The light is intermittent and appears to be under control of the insect's nervous system; and thought due to a digestive process involving a special substance in the blood and a special enzyme secreted by the cells of the organ. Inhabitants of tropical America sometimes obtain light by keeping fire-flies in small cages .- Exchange.

How Duck Sheds Water

Ducks and other waterfowls are able to shed water because their feathers are kept in an oiled condition. Oil and water will not mix. If you will observe ducks in a rain storm or as they paddle about in a pond you will notice that they frequently bend their heads back and rub cil from the oil gland at the base of the tail onto their heads. Then from their heads they oil their entire body. In addition to being supplied with this oil, the feathers on a duck are exceedingly close together, a condition which aids considerably in keeping out the water.

How Caterpillar Spins

Silk glands from which the silk fluid is produced resemble a pair of long tubes on each side of the interior of the caterpillar's body, says Nature Magazine. These tubes unite at the lip to form the spinning organ or spinneret. The silk fluid, when drawn out, hardens rapidly when expessed to the air.

How Trees Store Food

During the periods of the year when the leaves are not manufacturing food, says the American Tree association, trees live upon a food supply stored up during the long and light days of summer time.

own notion of what makes for the ideal of feminine beauty. Among the Bagesu, a central African tribe, for instance, girls begin to prepare for marriage at the age of ten. This preparation consists of a lengthy and painful process of cutting marks in the chest and forehead. The wounds are made with large needles, ashes are then rubbed in, causing thick hard lumps to be raised. These markings the girls consider essential, while

the men consider them as a sign of beauty in a wife. No man would think of marrying a girl who did not show these markings, and the girl is not admitted into the society of her elders until they are completed.

Why Leaves Stay Green

Evergreen leaves stay on all the winfer because their sap becomes too thick to freeze, according to a new theory recently advanced by a botanist at the University of Idaho. In the summer the sap is thin and flows freely. A sudden severe frost in midsummer could freeze the sap easily. But as autumn approaches, the starch in the leaves is converted into sugars and oil, changing the sap from a thin and watery fluid into a sort of sirupy emulsion, very difficult to freeze. The greatest density of the sap is reached during the last few days of January.

Why Fumes Hurt Bindings

The gaseous products set afloat by the family furnace are likely to have a corrosive action on the book bindings in the family library. According to experiments conducted at the bureau of chemistry, the products of combustion which pollute the air in large cities have a very deteriorating effect on the leather of bindings. This may be counteracted by applying various dressings, either while the leather is being made or when the book is bound.

Why Called "Turnpikes"

The term "turnpike" as applied to a road does not refer to the kind of surface. A turnpike road may be paved or unpaved. "Turnpike" in this connection is only another name for tollgate or tollbar. A turnpike road was originally a toll road, a road which had turnpikes or tollgates to collect tolls from persons passing over the road. The term is now applied to roads which formerly collected tolls. -Exchange.

the bandage was removed three days later his hair was completely white not only on the head but also the evebrows, mustache and the hair on the chest on the same side as the injury. These stories are not entirely con-

in which the strange occurrences can be explained. But what can we say to this? When the Titanic sank the Carpathia was the first rescuing ship to reach the scene of the disaster. The captain tried to identify the bodies picked up. All wore life belts and therefore floated They had died in the darkness and the icy water of terror and exhaustion. Most of the bodies, even the children, had white hair.

(C. 1926, Western Newspaper Union.)

Knew What She Wanted

Librarians have some queer experiences. At one library a self-assertive woman said she wanted a book entitled "Kip."

"I know of no such book," returned the attendant. "Perhaps you mean Kim, by Rudyard Kipling."

"I mean 'Kip,' by the author of 'The Three Musketeers,'" said the woman firmly.

"Kipling didn't write "The Three Musketeers,'" explained the official patiently, "but he wrote 'Soldiers Three,' and-"

"I guess that's near enough," the woman interrupted. "'Kip' by Kipling sounds likely. I suppose it's autobiographic and he took half his own name as a kind of hint to the reader. Give me 'Kip.'"

The attendant believed that "Kim" was near enough and gave it to her without further discussion .- Minneanolis Tribune.

The Thinker

Beware when the great God lets loose a thinker on this planet. Then all things are at risk. It is as when a conflagration has broken out in a great city, and no man knows what is safe or where it will end. There is not a piece of science but its flank may be turned tomorrow; there is not any literary reputation, not the so-called eternal names of fame, that may not be revised and condemned. the very hopes of man, the thoughts of his heart, the religion of nations, the manner and morals of mankind, are all at the mercy of a new generalization .- Ralph Wold

the sheep into the field. She led him to a spot where he

found her lamb with its head firmly wedged in a hedge. It was apparent that she had made frantic attempts to free her baby, and failing had gone to the shepherd's home for help.

He freed the lamb, none the worse for its adventure, but has never dis-

Iceland in History

Iceland was an independent republic from 930 to 1263, when it joined with Norway. The two came under Danish rule in 1381. When Norway separated from Denmark in 1814, Iceland remained under Denmark. In 1918 Denmark acknowledged Iceland as a sovereign state, united with Denmark only in that the Danish king, Christian X, was also to be king of Iceland. Its permanent neutrality was guaranteed. Provisionally until 1940 Denmark has charge of its foreign affairs, and a joint committee of six reviews bills of importance to both states.

Natural Reason Why

Most Gamblers Lose

Dr. George A. Dorsey, author of "Why We Behave Like Human Beings," has told in the Cosmopolitan why gamblers "go broke" and do not behave as human beings.

"A man of self-control," he writes, "no matter what he has lost, is able to keep his wits about him, is always prepared for any move, and when he has had enough he knows it and quits. That same man, winner or loser, quits when he is tired or when he has had enough.

"The man who does not behave like a human being in a gamble is the man who as a boy has not learned to take chances, who has not learned to profit by experience, and who has not learned to use his brain to get him out of difficulties, but has hung on to his mother's apron-strings or sought

who died 9 years ago, November 4, 1918.

Some may think that we forget you. Though on earth you are no more, But in memory you are with us As you always were before.

The hands that did so much for us, How helplessly they lay; God knew they worked continuously, But they are gone today.

'Tis sweet to be remembered, And always bear in mind That you are not forgotten By the ones you left behind.

There are ones that still will linger At the spot where you are laid, Who will come and scatter flowers On the grave that Christ has made.

By her Loving CHILDREN AND HUSBAND.

RESOLUTIONS OF RESPECT on the death of

Adopted by the Brotherhood of Piney Creek Presbyterian Church.

Whereas, It has pleased Almighty God in his All-wise Providence, to remove from our midst, our brother, Mr. Samuel Galt, therefore, be it

therefore, be it Recolved, That we bow in humble sub-mission to the Father's will, and that we commend as worthy of emulation his noble Christian life, and his devotion to his church and her interests. Re olved, That these resolutions be pub-lished in the Carroll Record, and that a copy be spread upon our minutes. By order of the Brotherhood of Piney Creek Preshvterian Church.

ing, games and piping, the Scottish Mr. Frank J. Sneeringer, formerly communities in the Canadian west are looking forward with keen interest to Wales has given his patronage. Although there have been highly successful Scottish games held in various parts of Canada, these have been mostly of local interest and lasting a single day, but the Banff gathering is have a national character. Each of He had been engaged in cigar mak- the 17 Highland regiments in Canada compete for the trophy for regimental piping offered by E. W. Beatty, president of the Canadian Pacific railway. Many of the finest exponents of Highland dances in western Canada have intimated their intention of taking part and the tourist capital of the Canadian Pacific Rockies will be ablaze with tartans. Tossing the caber, putting the shot, throwing the hammer, and all the games in which brawny Highlanders are expert will of course be conducted.

Supplementing these features will be a series of concerts in the great ballroom of the Banff Springs hotel for which several of the best known Scottish singers have been engaged. In addition to these Scottish elements of games and music another Highland feature will be introduced, namely, folksongs and dances of the Highland tribes of Indians whose hunting grounds were from time immemorial in the neighboring Canadian Pacific Rockies. These Indians will be gathered in a picturesque encampment, and with their tepees and variegated costumes will add a note of color to the gathering which will make he affair unique of its kind.

Overcoming Fear of Dark

Children who suddenly form an aversion to the dark can often be helped in overcoming this fear, by becoming more familiar with the dark. We might play games in dark rooms, and occasionally send the children to unlighted rooms for sweets or new toys. Sometimes giving a flashlight, which he himself can urn on at a moment's notice has been most helpful.

WINTER BLOOMING Flowers-Primula Obconica, 10c each .-- Mrs. F 11-4-tf P. Palmer.

CIDER-MAKING and Butter Boiling, Wednesday each week .- Frank H. Ohler.

20 PIGS for sale, 10 weeks old.-Morris A. Zentz, near Tom's Creek Church.

FOR SALE-DeLaval Cream Separator; 3 Sows and Pigs .- Chas. A. Baker.

DRESSED OR LIVE Hogs wanted

Lovers' Quarrel Sent

Burbank to the West A lovers' tiff was the proximate, if not the underlying cause of Luther Burbank heeding Horace Greeley's advice to young men to "Go West." He tells the story in his life story, "The Harvest of the Years."

"I was very deeply fond of a beautiful young lady"-it was in 1875, and the great naturalist was twenty-six at the time-"who seemed to me, I remember, less ardent than I was. A trifling disagreement, two positive natures, probably hasty words-and I determined that my heart was broken.

"Mary and I can look back on those tragic days-for I am sure they were tragic to both of us-with smiles. Shortly after my arrival in California I wrote her or she wrote me, and we resumed our friendship by letter. The friendship has been kept up all these years and has been very significant to both of us. Probably my Mary of those old times has had many an occasion to be thankful that I took her at her word when she told me-as I think she must have-that I was not the only eligible man in Massachusetts."-Kansas City Star.

Disuse of the Long "S"

The modern form of the letter "s" took the place of the old "f"-form of the letter very gradually. For many years the round "s" was used in all parts of words except the end, where the long "s" was retained. John Bell, a London publisher, was the first important publisher to discard the long 's" and substitute the round "s" in all words containing the letter. This he did in his edition of "The British Theater," which was published about 1775. The transition from one form of the letter to the other was almost simultaneous with the American Revolution. In 1786 Benjamin Franklin wrote: "The round 's' begins to be the mode, and in nice printing the long 's' is rejected entirely." After 1800 the old form of "s" seldom appeared.

Encouraging Trade

A bright-eyed little English lad saluted the occupants of a passing motor car so politely that they stopped and gave him sixpence.

"Do you salute all the strangers that pass?" the woman with the party inquired.

"No, ma'am, only motorists," the boy stammered, fingering his sixpence nervously. "Father says I must be polite to them because motor cars bring him trade."

The lady seemed disappointed. "What is your fathers' trade, my little man? Does he repair motor cars?"

"No, ma'am," was the reply. "Father's an undertaker."-Exchange.

Singing Kettles

The Japanese manufacture in a great variety of forms iron tea-kettles which break into song when the water boils. The song may not be a perfect melody, but it is perhaps as agreeable as the notes produced by some of the insects that the Japanese also treasure for their music.

The harmonious sounds of the teakettle are produced by steam bubbles escaping from beneath thin sheets of iron fastened closely together nearly at the bottom. To get the best effects some skill is required in regulating the fire. The character of the sounds varies from the form of the kettle. These singing kettles have been used for many generations.

INHERITS MILLIONS, STAYS A HOME BODY

Wealth Doesn't Alter Life of Ina McEachran.

Detroit, Mich .- In the midst of the old-fashioned "back yard" behind the big, gray frame house at 1996 Ferdinand avenue is a cherry tree. The cherries were hanging thick among its leaves, red and sweet, but just a little overripe, their skins just a wee bit lined, cherries that some one should have picked some time before.

You see, millions of dollars have come tumbling down into that oldfashioned garden, into the lap of Ina Cecil McEachran, niece of Arthur T. Walker. No more incongruous figure to handle millions than the twenty-sixyear-old heiress can well be imagined. As the only child of her mother, Mrs. Susan McEachran, she falls heir to a sixth of the thirty to fifty million dollar estate left by the late secretary to Edward F. Searles.

"Isn't Bad Looking."

For nearly ten years the McEachran family lived in the house on Ferdinand. They were and are "quiet" people. Ina was a home body. She seldom went anywhere except to church, to the little neighborhood motion-picture house, and for rides in the little, inexpensive car that was the pride of father and daughter.

There were no beaus, no dances; Ina does not approve of dancing very much.

"She isn't bad looking."

So the neighbors describe the heiress. At times she wears glasses. She is plump and does not move too briskly. Every evening has found her at home alone. She never made friends with the neighbors. In fact, as a result of a fence dispute between the mother and one set of neighbors there existed the "we do not speak" situation.

Same Old Routine.

There was a brother, but he died a couple of years ago after a long illness. Ina was his nurse for much of that period. For a period she was employed in the offices of the Michigan Central railway.

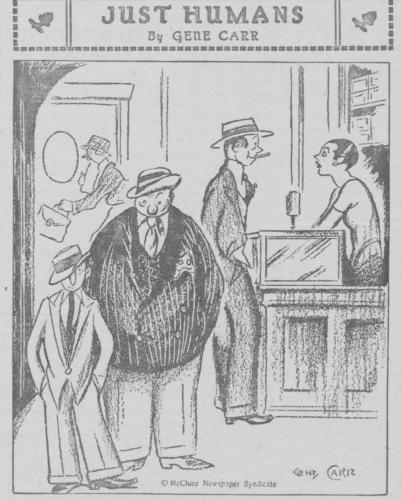

The family came to Detroit from Jackson. The father, R. B. McEachran, is an employee of the D. U. R. and is as quiet in his habits as the girl. And now into their placid existence comes tumbling the millions, the magic wand to materialize yachts and palaces.

But life hasn't changed a bit as yet. Ina, the heiress, wound the clock, pulled down the shades, swept the floor and prepared the dinner as usual. In the morning she got up, cooked a breakfast and drove her little old car away. Same neat, simple dress, same little hat, same old routine.

Flying Kitten Has

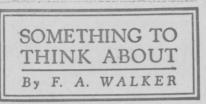

Its Own Parachute Pittsburgh .- Birdie, the flying kitten mascot of Kenneth Curley Lovejoy, air mail pilot, never goes up for a flight without her own little parachute.

Birdie is a general favorite with all the flyers at Bettis field, Pittsburgh's airport. Lovejoy explained that he selected her as a mascot because she had a jet black nose, "and you know that's sure good luck."

JUST HUMANS

"TH' POOR SAP, HE'S GOIN' TO LOSE A GOOD FRIEND IF HE MARRIES HER!"

COURTESY, GRATITUDE

THE two cheapest things in this life are Courtesy and Gratitude. Perhaps it is because we are prone to despise things that cost nothing that we use so little of both these essen-

family? Why not?

no other reason I count among my rarest acquaintances, who has spent thousands of dollars in time and money just saying "Please." He never writes a letter or directions to his employees, he never sends a telegram of instructions that he does not make the first word "please."

work for him do not appreciate it. I

There is another man who always says "Thank you." He makes a particular point of saying it to people who are paid to give him service. He can call over the telephone to operators who have not heard his voice for months and the operator will answer him by name because his unfailing courtesy establishes his identity.

TREASURE IS FOUND BY INDIAN'S DREAM

Ancient Pagan Temple In Mexican Wilds Revealed.

Mexico City. - A dream-guided search for treasure by the descendants of an ancient chieftain who fought against Cortez has ended most amazingly in the discovery of one of the most splendid temples yet known of the pagan gods of pre-Hispanic Mexico, dedicated to Camaxtli, the chief god of the Tlaxcala nation before the conquest.

Dr. Eduardo Noguera, inspector of the department of archelogy of the ministry of education, investigated the discovery at Tizatlan for the Mexican government and conducted systematic excavations there. He states that the Indians of the town claim that one of their number, Panfilo Sanchez, is a descendant of Xicotencatl, former lord of Tizatlan and one of the rulers of the Tlaxcala nation and a bitter adversary of Cortez. This Sanchez declared that Xicotencath himself appeared to him in a dream and revealed the whereabouts of his hidden treasure.

Other Indians, believing in the vision, went with Panfilo to the designated spot to dig. They came upon prehistoric ruins and in their thirst for treasure cleared away a large amount of earth in two weeks. Walls of a temple and beautiful polychrome frescoes appeared, and the fame of the discovery spread throughout the state of Tlaxcala and into Mexico City. Government authorities were sent to investigate and the amateur excavation was stopped.

Temple on Crest of Hill.

The temple remains are on the crest of a hill overlooking the Indian village of Tizatlan and are under the ruins of an old Christian church believed to have been built by Cortez after the destruction of the heathen temple more than 400 years ago.

The ruins belong to the Aztec culture. Dr. Reygadas Vertiz, director of the department of archeology under the ministry of education, says that the find is one of the most important of recent times because the building contains polychrome fresco paintings considered to be real codices, or historical records in symbolic picture form. The picture writings may form an important link in piecing together the story of Mexico before the discovery of America.

True codices are found on very few Aztec ruins, Doctor Reygadas sayr. Most of the codices now in existence sre on maguey paper, made from the fiber of a common Mexican plant, and are in European museums. Even of these but few are left, because the conquerors and the missionaries who followed them destroyed all the temples, idols and written records of the native races in their zeal to convert them to Christianity. Here and there a strip of picture writing was secretly saved as a souvenir or sent to Europe as a curiosity. After several centuries had passed their historical value was recognized and those few remnants found their way into collections and

tials to politeness. How often in your daily relationships do you say "Please"? Do you say it to your wife or to your children? Do you use it in talking to your parents or the other members of your

Faultless

"It is extraordinary that Mrs. Jenks can never see any faults in her children," observed Mrs. Smith. "Mothers never can," remarked her

husband. "What an absurd idea, James! So

like a man. I'm sure I should see faults in our children at once-if they had any."-London Tit-Bits.

Generosity Inexpensive

The reputation of generosity is to be purchased pretty cheap; it does not depend so much upon a man's general expense as it does upon his giving handsomely when it is proper to give at all. A man, for instance, who should give a servant four shillings would pass for covetous, while he who gave him a crown would be reckoned generous; so that the difference of those two opposite characters turns upon one shilling.

NO TRESPASSING

The name of any propery owner, of tenant, will be inserted under this heading weekly, until December 10th., for 25 cents cash in advance.

All persons are hereby forewarned not to trespass on my premises with dog, gun, or trap, for the purpose of shooting or taking game of any kind, nor for fishing, or in any way injuring or destroying property.

The kitten seemed to enjoy her first flight so, Lovejoy decided to take her along regularly. The code of the air, however, calls for all occupants of a ship to have parachutes, and when it's impossible for all to have the safety devices, then no one on the plane wears one.

Lovejoy had his regular parachute, so he decided that Birdie must have one, and he manufactured a smallsized parachute for the kitten. She is taken with the pilot on virtually all of his air voyages, whether with mail or passengers, and on each trip she wears her emergency landing gear strapped to her back.

"We haven't had to jump yet," and the airmen, "but when we do, we are going to be all set, and Birdie is going down with me ..."

Gambler's Card 6,000 Years Old Is Found

London .- Scraped of the mud of many centuries, a tablet dug up at Ur of the Chaldees reveals a gambler's score card at least 6,000 years old.

The tablet with other trophies taken from Ur, 140 miles southeast of Babylon, the birthplace in Mesopotamia of Abraham, is now on exhibit at the British museum where it was brought by C. Leonard Woolley, head of the expedition.

Recognized gamblers of about 4,000 B. C. were honored by a notice on their tombstones immortalizing their achievements. Tablets have been discovered which were used as card tables, and also a number of playing pieces.

Card sharks trying now to reconstruct the game as R was played by the ancients have concluded that some of the plays approximated the "red and black" of the modern roulette table.

Alternate and interfitting triangles were used for the "chances," the colors to be backed being mother of pearl and pure red made from a paste.

Sees Noiseless World

Chicago.-A noiseless world is forecast by Prof. D. A. Laird of Colgate university. He says London pays \$5,-000,000 annually for "unnecessary noises."

A good many men, and women, too, think that although they must be polite elsewhere, it doesn't make any difference when they are at home. Courtesy and Gratitude are with them not a habit, but expressions which require preparation and thought. It isn't difficult to tell whether a man or woman is accustomed to saying "Thank you" and "Please."

You can always tell an amateur "swearer." In the same way you can pick out the man who is a novice at politeness.

Montaigne, in his "Essays," which you will find very good reading and a storehouse of much wisdom, says:

"Courtesy is like grace and beauty in the body, which charm at first sight and lead on to further intimacy and friendship, opening a door that we may derive instruction from the example of others, and at the same time enabling us to benefit them by our example, if there be anything in our character worthy of imitation." In other words, Courtesy and Gratitude are not one-sided acts. They bring their recompense and establish their own returns.

No man ever lost anything by being polite even to his inferiors.

Thomas Jefferson, who was both a statesman and a gentleman, reproved severely his grandson, who failed to return a negro's bow. "Do you permit a negro," he said, "to be more of a gentleman than yourself?" And Jefferson was a Virginian.

The first words that should be taught a child are "Please" and "Thank you." They should become a habit and a pleasant custom. "Please" has won many a favor and "Thank you" has established not a few friends. It costs so little to be polite that

we can all afford it. (© by McClure Newspaper Syndicate.)

His Reason

"Why don't you buy a tractor. Mr. Johnson?" asked the salesman.

"Well, I'll just tell you," replied Gap Johnson of Rumpus Ridge. "I've spent a good many years studying the ways of mules and I don't aim to let my learning go to waste. I can kick a fool mule in the ribs and not hurt me unless he hits me when he kicks back. but as shore as I kick a tractor in the ribs I'd lame myself up."-Kansas City

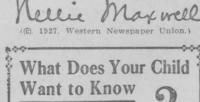

ene-fourth teaspoonful of salt, and one cupful of sweet canned cherries. Serve with

Cherry Sauce.

Take one cupful of the cherry juice, thicken with one teaspoonful of cornstarch, add one-third of a cupful of sugar, a pinch of salt and a tablespoonful of butter just before serving. Flavor with a few drops of almond after the sauce has been well cooked.

Peach Betty.

Take the soft crumbs from the center of the loaf of bread. Mix with one-half cupful of butter to three cupfuls of crumbs. Put a layer of the buttered crumbs into a baking disb and lay over them a layer of sliced peaches; sprinkle with sugar, a grating of orange peel and bake one hour. Cover the dish during the first halfhour, then remove and brown. Serve hot with cream and sugar.

WHAT MAKES LITTLE WHITE MARKS ON OUR NAILS?

TRAF

The white marks come from illness Or injury to the nail, Which keeps the blood from reaching it

And causes white spots pale. (Copyright.)

Colored Symbols Unearthed.

A floor about eighteen feet wide and thirty-seven feet long has now been excavated, and the rectangular space was found to be perfectly orientated with the cardinal points. On this space stand two raised stone platforms, both beautifully ornamented with brilliantly colored symbols. Among t') figures are some that are easily recognized, such as the water sign and the death sign.

On the short vertical ends of the platforms are canals that divide the walls into two equal parts. Because of the constant repetition of the death sign and the water sign, which in this case could also be interpreted as the blood sign, it is believed that these slabs, were sacrificial altars and that the canals served to lead away the blood. The most beautiful figure on the frescoes is that of the god Camaxtli, and for that reason it is believed that the temple was built in his honor.

Petting Place Was Poison Ivy Garden

St. Paul, Minn .- This is the sorrowful tale that is whispered wherever summer session students gather on the Minnesota university campus.

Two romantic young things, the boy about twenty and the girl not more than eighteen, came down from the northern part of Minnesota where vines are vines and not poison ivy.

Before the advent of the decorative spotlights there had been plenty of places for a little quiet necking. But all that was changed.

Then one morning he got a bright idea. Every day going to his classes he passed a perfectly luscious looking garden. Cool and green, all vines and ferns, it was inclosed by a high picket fence. Of course, it had a warning sign on the gate, but then he neither read nor believed in signs.

That very night he mysteriously conducted the girl to the garden. She was charmed with the spot. She told him that she would never forget the night and the garden and, of course, him.

And she never will. The following morning both their faces were broken out with a rash that closely resembled that produced by poison ivy. The garden was filled with poisonous plants for the use of the medical students in their research wor

FANNY'S **OLD-TIME** FLAME

(@ by D. J. Walsh.)

ANNY MARSH had overslept. She had been out late the night before at a party, one of those cozy affairs where eight women gather for an interchange of ideas, a bit of

Work and light refreshment. Fanny had come home cheered and stimulated. She had uttered no word to malign, she had made a noticeable advance in the sweater she was knitting for poor little Alice Potter, and the tea and cake had agreed with her. But even so, she had, sleeping, somehow wandered into a dream of Myron Page.

The dream lingered about her as she bathed, brushed her graying hair and dressed for the day. At last she rummaged in a drawer and found a faded picture, at which she looked thoughtfully. It was thirty years since that picture was taken. She had worn a long skirt, big sleeves and a small hat perched on top of her head. Her slim girlish waist had measured only seventeen inches. Then she could not have spaded a flower bed to have saved her life. And Myron was in his way quite as absurd. She smiled at their innocent absurdity as they stood side by side, holding hands. It was June and they were young. Now it was fall, and while she was not exactly old she was getting along. As for Myron-she had no idea what had become of him.

Could she have married him? She wondered. Her friends thought she could, had even urged her, but something had prevented her, some inherent independence or stubbornness, they believed. There had never again come a lover into her life, and, denied husband and children, she had sought to fill her life with other interests. She had succeeded admirably. At forty-seven she had come back to her old home town to live in her own house, toast her own bread for breakfast and do as she pleased. All very pleasant-except there was that memory of her old lover buzzing around her like a discontented bee.

It was raining that morning, but she loved the rain. Oh, she had endless plans for a rainy day! Eager to enter them, she stopped at one cup of coffee and one slice of toast. Slipping on her thick coat and close hat, she ran to the garage, where stood in readiness her honest old coupe. A touch of the starter button, a roar and the Dragon was on his way.

Fanny, splashing along wet streets, stopped at various houses. She had a gay novel for little Mrs. Bryant, who was too sick to leave her room; a lively toy for the Horton youngsters, which would amuse them, thus permitting their mother to get out her daily quota of washings, a box of homemade fudge for old Mrs. Hale, who loved sweets, and a bag of rosy apples for Grandpa Hitt.

The morning was nearly gone before she splashed homeward, humming

me, Myron, I'll get lunch," she murmured.

In the kitchen she leaned against the cupboard for a moment, then she attacked the problem of assembling her meal. Fried chicken, a vegetable salad, coffee settled with egg, apricot pie, a bit of Roquefort-she worked hastily. Well, for a single woman who had to earn her own money her table looked inviting. She was proud of it.

She went to summon her guest. As Myron's spectacles concentrated upon the contents of the dainty table a change came over his face. Fanny handed him a brimming cup of coffee and he motioned it away with a gesture sad yet decisive.

"My stomach will not permit me to eat any but the simplest foods. Your luncheon looks tempting, but I shall have to adhere rigidly to my rule." He ate bread and butter, a crumb of the vegetable salad. Fanny talked feverishly, but the delicious chicken, the luscious pie were dust and ashes in her mouth.

Afterward they returned to the living room together. As Fanny, rather exhausted, sank upon the davenport Myron took his place beside her.

"I would we had not wasted our youth in separation," he sighed. "Think of the happiness that might have been ours! My wife was a good woman, but—" He shook his head. "No, we were never incompatible, but we were not born mates. There was one point we entirely agreed uponto save money. She helped me to become a rich man." He shifted his position, drew nearer, laid his hand upon Fanny's shoulder. "My dear Fanny," he said shakily.

Fanny sprang to her feet. She looked girlish enough with her high flush, her sparkling eyes, to lead one to forget her hair was graying.

"Please, you are making yourself and me ridiculous," she said.

He stared up at her. "Do I understand-" he gasped.

"If you don't you must. I would have married you thirty years ago, but you ran away. I let everybody, my mother, my friends, believe that I had refused you. I was unhappy a long time. But I've lived to be wise-and glad-and thankful. It's a blessed thing for me, your coming back this way. Now I have seen you_I-" She paused, struggling between a desire to laugh and cry.

He arose glaring at her.

"I told my friends that I was coming back to get my old flame and make her my wife. The house is being cleaned for you. I bought new carpets." He choked.

Then suddenly he walked over, took up his overcoat and began to shrug it on. He fairly shook with rage and disappointment

Fanny said nothing. She looked at him, experiencing some queer emotions.

"Good-by," he said with cold formality, and went out and-slammed the door behind him.

Fanny stood for an instant immovable. Then she began to laugh sanely, merrily. It was the laugh of a woman who is freed from the last obstacle to her perfect contentment.

Swindlers Never at a Loss to Find Suckers

By DOUGLAS MALLOCH

VOU find them in the city squares, You find them in the village

streets: They are the workers unawares, They are the sort that thinks it

cheats An age-old rule-but with the sweat Of honest toil mankind must earn His bed and board, his living get By giving something in return.

There are so many things to do, Good things to make, good ways to serve,

So many things to fashion true, To run the line, to draw the curve; But they would seek some other way To make their bread, without the

toil Of those who give an honest day To desk or counter, bench or soil.

How hard they work, these workless ones,

The frauds, the fakes, the parasites; They are so wise, the simpletons, That they forget the sleepless nights,

The bumping maybe over rails, The weariness of idleness-For so the loafer always fails

His toil to measure or confess.

He works his ten or twenty hours And pities him who labors eight; But we come home to garden flow'rs, And children laughing at the gate. Yet still the foolish fondly cling To that illusion, that they shirk-For some will work at anything, However hard, that isn't work.

TWENTY-ONE

BY JOSEPH KAYE

A T THE age of twenty-one I had already graduated from the ball let school of the Milan opera; I had been seen by Gatti-Casazza, the director general of the Metropolitan Opera house, and engaged by him. At twenty-one I was already dancing at the Metropolitan as the premiere danseuse. So you see at twenty-one there was no turning point in my life. That came when I was seven. Then was sitting in a box with my parents during a children's dancing competition that took place in a theater in Milan and during an intermission 1 escaped the vigilance of my mother, got onto the stage, and gave a solo dance for the audience. My impromptu effort won me the mayor's prize and began my career .-- Rosina Galli.

TODAY-Miss Galli is one of the greatest interpretative dancers in the world. She has been premiere danseuse of the Metropalitan Opera house for a number of years.

(C) by McClure Newspaper Syndicate.) By Viola Brothers Shore

Ancient Weapons and Armor on Exhibition Recent accessions of the Metropolitan Museum of Art range from a huge

suit of armor to whimsically decorated and finely spun Swedish glassware. In the armor department the last

few months have seen added to the collection swords, lances, pistols and mail. Among the swords is an example of a calendar blade, etched with the names of the saints of each day of the year and the months, separated by their zodiacal signs. It is said to have proved very useful to an officer of 1590, who, in moments of danger, wished to be able to select quickly the proper saint upon whom he might call.

There is also an Italian knightly sword of 1450-1475, with a tongueshaped blade, blackened hilt and large disk-shaped pommel, one side of which shows Saint George and the other the letters "I. H. S."

The firearms include a very long barreled pistol of about 1600, a "Wheelock Dag" of the same date, an Eighteenth century pistol from Naples and a large wall gun of the Seventeenth century.

What is thought to be the second largest suit of armor in the world is also on exhibition. So big was the doughty warrior for whom it was made that no one around the museum could be found strong or big enough to wear it.

Tradition Bars Jews' Union With Gentiles

The American Hebrew says that the tradition against intermarriage among Jews is traced back to Abraham, who ordered his estate manager, Eliezer, to obtain a wife for Isaac from among his, Abraham's, own people, in Aramea. It should be added that this is only a tradition. It became a practice among Jews at the time they returned from the Babylonian exile in the Fifth century before the common era. Intermarriage, however, has taken place among Jews at all times. The reason why Jews have clung to the tradition of Abraham and the enactment of Ezra lies in the psychology of group consciousness, especially as this is welded by the religious ideal. The belief of the Jews that they are a people chosen by God to disseminate knowledge of Him and His moral and ethical will among the peoples of the world is also a great factor motivated by the desire to hold to its mission in the world and, probably, also by the fear lest intermarriage should weaken the force for carrying out its mission.

History in Song

In early times many stories of war and love were worked into songs by groups of people. Instead of being ascribed to a certain poet these tales in rhyme of true events were the work of many unknown authors. These poems were set to music, in which was reflected the feeling of the people. Each race had its singers and these songs were the primitive means of expressing passions, beliefs and ideas.

As time passed many of these songs were lost and only a few are now preHow to invest your money and be assured of

WHEN BETTER AUTOMOBILES ARE BUILT, BUICK WILL BUILD THEM

Power *

20

For the 24th. year Buick has again fulfilled this promise WHEN BETTER AUTOMOBILES ARE BUILT. BUICK WILL BUILD THEM.

a song that vied with the easy purr of the motor. As she raced into her own driveway she caught a glimpse of somebody ringing her own frontdoor bell.

Leaving the car standing, Fanny ran to interrogate her visitor. He was tall and thin, his coat collar was turned up and his hat brim turned down. He wore glasses. She thought, "I don't know him," and spoke cheerily: "Good morning."

Her approach had been so rapid and he had been so thoroughly absorbed in punching the bell that he had not seen her. Now he turned with something like a start.

"Fanny !" he said in deep tones. "Oh! Why, it's you, Myron!" She gave him the handshake he sought.

"You surely haven't forgotten me!" He focused his glasses upon her reproachfully.

"Oh, no!" She laughed nervously. "Won't you come in? Let me open the-we don't lock doors here. And it's such a joy. Locked doors seem so suspicious and-and forbidding. Right this way, Myron. This is the living room. Take a chair. I'll be back in one moment."

As she ran her car into the garage she thought strangely: "It is just as if I had wished for him and he came! I suppose I must ask him to lunch. There is pie enough besides other things. I am glad I cooked that chicken yesterday.

She found Myron had made himself comfortably at home during her brief absence. He was sitting in one of the easiest chairs, his legs crossed, contemplating the contents of the room. He accepted her invitation readily.

"Now don't go to any trouble for me," he said. "I didn't expect to stay to eat. I came first to your door," he glanced at his watch, "more than an hour ago. I've been spending the time with Mrs. Otis. She says you are living here alone, Fanny."

"Why not?" Fanny tried to keep her voice bright.

He shook his head. "It is a sad life, living alone. I know." He sighed. "On the contrary"-Fanny began in

some embarrassment. He interrupted her. "One of anything is an absurdity.

Human beings were meant to live in pairs. My own dear companion passed away a year ago." He drew out his handkerchief, removed his glasses and wiped them vigocously. Fanny arose. "If you will excuse

The common assumption that women are more "easy" than men has no basis in fact, so far as my observation goes, Keyes Winter writes, in Harper's Magazine. I know a trained nurse who, by years of exhausting labor, amassed small savings, only to throw them away by the purchase of shares in a worthless gold mine. On the other hand, I know a college professor-a professor of economics, at that-who purchased mortgage stock at \$100 a share, which was worth at the time perhaps \$2 and which is now worth nothing. There seems to be no sex in suckers.

One of the strangest traits of their psychology is their habit of coming back for more. No matter how much of their money the first crooked stock salesman gets, the second who approaches them will be met with open arms and whatever cash is left. "Once bitten, twice shy," does not hold true of the average sucker; of him or her the adage should read, "Once bitten, twice as eager."

Confidence men themselves understand how deep seated is this disease of being "easy." There are probably fifty places in New York city where so-called "sucker lists" are compiled and sold. Lists of persons who are believed to be gullible prospects, but who have not, as yet, fallen for a bogus money-making scheme, retail for 1 cent a name. Selected names of those who have once invested in such a scheme bring higher rates. The exclusive privilege to canvass a chronic biter is marketed for 5 cents and more.

Young Men's Bible Class

Baraca is the name of a worldwide organization of young men's Bible classes. The first Baraca class was organized in 1890 at Syracuse, N. Y. Such classes now exist in thirty or forty different denominations and number several thousand local groups. Baraca is from the Hebrew "berakah," meaning blessing. It is the same word in a different form that appears as a proper name in I Chronicles 12:3. The name also occurs in II Chronicles 20:26, which reads: "And on the fourth day they assembled themselves in the valley of Berachah; for there they blessed the Lord; therefore the name of the same place was called, the valley of Berachah, unto this day." Berachah is pronounced "ber-a-ka," the first syllable being accented .---Pathfinder Maganine.

FOR THE GOOSE-

THE women that seems to get the I most outa their husbands is the ones that complain and whine and gotta have this and that. But the good sports is the on'y ones that holds the respeck of their children.

Rumors is like coins-the ones havin' the least value has the biggest circulation.

If your husband wants to leave you, he'll find some excuse.

FOR THE GANDER-

Always bend back a woman's head when you kiss her.

And if she parts her lips, don't believe you're the first that ever bent it back

You don't have to teach a woman nothin'. Even if she never rode in a taxicab before, a girl has an instinck about them things.

(Copyright.)

"I don't know about the sins of the fathers being visited upon countless generations," says Pondering Ponzelle, "but it is easy to see that the shins of the mothers are."

served, for not many of them were written, but were passed down from generation to generation orally. These narratory songs were numerous in the time of Charlemagne, who held this lingual history of the people in high esteem and had the songs collected in all the countries under his dominion. Unfortunately this collection has been lost.-Kansas City Star.

Sea Bird Gets Seasick

The albatross lives on the sea but being caught and confined to the deck of a ship it invariably becomes seasick. Sailors are superstitious about killing or catching "the bird which makes the wind blow" and it is rather rare that they are encountered at close range, but on a recent scientific. expedition the fears of the members of the crew were brushed aside and several of the birds were caught on a hook baited with a piece of pork and thrown overboard. Some of the distinguished scientists aboard even went to the extent of eating some of the flesh which had been cooked in the shape of a stew and they agreed that the meat was delicious.

She'll Learn

A young woman, one of the newlyweds, who set up housekeeping, wanted to show her hubby how smart she was one day before the warm wave struck the city, so she called up a coal dealer and ordered "a ton of coal." The coal dealer asked her as to what kind of coal, the young woman failing to specify whether it be pea, nut, stove or furnace coal. When the dealer got through informing her of the different sizes of coal she asked for the "nicest shade of black coal." Apparently the young bride thought she was purchasing a hat or a dress .- Salem News.

Truth About Petrification

There is an old superstition that if a piece of hickory wood is put in water it will turn to stone in seven years. Of course it is not true. No wood ever turns to stone. Even wood which petrifies does not actually turn to stone. The wood merely acts as a mold while minerals from water or the atmosphere are deposited as the wood decays. The length of time required for an object to petrify depends upon circumstances. It may be a few years or a thousand. Usually it requires a long period.-Exchange.

POTATOES AND PINEAPPLE

HE housewife who likes to boiled sweet potatoes cut in quartserve a meatless meal now er inch slices. Cover with a can and then, particularly in the of sliced Hawaiian pineapple cut

summer, casts around in her mind in small pieces, and pour over the for new combinations with which following ingredients: one-half cup brown sugar, four teaspoons to tempt her family.

A recipe that satisfactorily fulbutter, one teaspoon salt, tablespoons red cinnamon drops. fills the requirements of a meatless meal must be hearty and at the same time "tasty." It must have Hazvaiian Pineabble plenty of calories in it, and yet not be too heavy. An ideal combination that meets all these exigencies is sweet potatoes and Ha-waiian pineapple. These two foods used together supply the necessary calories, starch, protein and vitamines. Here are two good recipes.

Lesson for November 6

AMOS PLEADS FOR JUSTICE

LESSON TEXT-Amos 5:1-27.

GOLDEN TEXT-Let judgment run down as waters and righteousness as a mighty stream. PRIMARY TOPIC-Treating Every-

body Right. JUNIOR TOPIC-The Kind of Man

God Hears. INTERMEDIATE AND SENIOR TOP-IC—A Squaring for God Against the

YOUNG PEOPLE AND ADULT TOP-IC-The Conditions of Divine Approval.

1. Israel's Desolation Predicted (vv. 1-3).

Amos lamented over the doom which was to overtake the nation. Israel is called a virgin because she had never been subdued by any foreign nation (see Isa. 23:12). Her falling to rise no more sets forth the utter desolation and helplessness to which the Assyrians subjected the nation. From this captivity Israel never returned. Those who came back from the Babylonian captivity were largely from Egypt.

II. The Call to Return to God. God through the prophet says, "seek ye me and ye shall live." The implication is that while the divine judgments are not executed, an opportunity is offered for them to turn to God. In their turning to God they were to renounce:

1. Idolatry (vv. 5, 6).

de

Sec.

~ 1

They were to turn away from the places of idolatry-Bethel, Gilgal and Beersheba. God's judgment was to strike these places.

If they would not come to Him for life He would be their destroyer. "Our God is a consuming fire." The only one who can give life to those who seek Him is the one who shall destroy. 2. Cease to pervert judgment (v. 7).

"Turn judgment to wormwood" implies the bitterness of the perversion of justice to the injured.

3. Cease to dethrone righteousness. "Leaving off righteousness" is thought to mean that unrighteousness was allowed to take its place. In this third exhortation the Lord's name is given with the following statement of some of His works:

1. "Maketh the seven stars and Orion;" 2. "Turneth the shadow of death into morning;" 3. "Maketh the day dark with night;" 4. "Calleth for the waters of the sea and poureth them out upon the earth," both in rain and deluge; 5. "Strengthened the spoil against the strong."

III. The Sins Committed by the Wicked Nation (vv. 10-13).

1. They hated the judge who condemned their wicked practices (v. 10). 2. They abhorred him that spoke uprightly (v. 10).

This most likely referred to the prophets themselves who told them of their sins and urged uprightness of

Ignorance of Public Affairs One of the Greatest Menaces to Liberty

By DANIEL C. ROPER, Economics Expert.

HE greatest menaces to our liberties are ignorance of what is taking place in public affairs and indifference to public responsibilities. No person is worthy of the benefits of American citizenship who persistently refuses and avoids the attending obligations of his citizenship.

These obligations involve the observance of the law, keeping before the people the sanctity of law and order, taling proper personal interest in public affairs, and casting his ballot in the interest of what he intelligently believes to be the interests of the country.

Unintelligent political vision and planning, the magnitude and complexity of problems now demanding solution and the multiplicity of voting are among the reasons for waning political control and indifference on the part of the voter. To correct this situation old party methods are ineffective. The ratio of the eligible vote to the actual has declined 50 per cent in the last 50 years notwithstanding that women vote.

An effective method of combating this evil would be the creating of a counsel for political education which would have its headquarters in Washington and be composed of men from both parties. It should aim to keep the people thinking, talking and reading about political questions. It would tend to encourage the open forum method of debate and would inspire rather than hire citizens to take part in public affairs.

Denver, Colo. - Five years have After giving his testimony, Reamey

geance.

for him 1,000 miles away, and the pair took up their life anew in a small town far from Denver. Reamey changed his name, altered his appear-

ing member of a luncheon club, a Suntown's leading citizens.

ver. He refuses to disclose the name of the town in which Reamey and his wife are living for fear that some members of the gang sentenced as a result of Reamey's testimony might wreak vengeance on him as was

"If I should divulge where Reamey is living I would in that breath most likely utter his death sentence," he said. against him among the "con" men. All the men he helped send to the Canyon City penitentiary are out now with

life.

They trampled upon the poor 3. (v. 11).

The rich built magnificent houses out of the proceeds extorted from the poor.

4. They afflicted the just (v. 12). This they did by taking a bribe. 5. They turned aside the poor in

the gate (v. 12). Because they had no money the

poor were turned aside. It was most difficult for the poor to get justice. The times were so evil that the prudent would best keep si-

IV. The Conduct of the Righteous (vv. 14, 15).

No condition in the world, religious, social or political can become so difficult that the righteous are shut off from help. The righteous can:

1. Seek God (v. 14).

Those who seek good shall have with them the Lord God of Hosts. 2. Hate the evil (v. 15).

Evil must be hated. The sin question must be settled before God can bestow His blessings.

3. Establish judgment in the gate. It was the custom in that day for the courts of justice to sit in the gate of the city. The prophet urges upon them the responsibility to place honorable men in charge of public affairs.

V. The Judgment to Fall (vv. 16-20). There is coming a day of retribution. Justice and right shall be vindicated. This will be realized in the day of the Lord (II Thess. 1:7-10; James 5:7). All wrong shall be righted at that time. May we earnestly pray, "thy kingdom come."

VI. Worship Without Holiness of Life an Abomination to God (vv. 21-27).

Sacrifices, observance of feast days and singing, when the heart is out of fellowship with God, is most displeasing to Him.

Two Different Things

The love of God and the world are two different things. If the love of this world dwell in thee, the love of God forsakes thee; rendunce that, and receive this; it is fit that the nobler love should have the best place and acceptance.

House Not Made With Hands The tent life is the true life until the building of God. the "house not made with hands." is reached .- Phillips Prooks.

the buttonhole in literature occurs in the year 1561. While men's outer garments are still made with buttons and buttonholes, the trend of the present is away from such fastenings. Almost all women's clothes and many men's undergarments are now made without buttons.

Swedish Wedding Custom

In Sweden weddings formerly took place under cover of night. Behind the high altar of the ancient church at Husaby, in Gothland, a collection of long lances with sockets, for torches, may yet be seen. These were served out to the groomsmen on such occasions, both for defense and illumination. Those men were the best who could be found to volunteer their services. One wedding superstition is that a bride, on leaving home for the wedding trip, must step into the carriage with the right foot first. She should do the same when she first enters the home prepared for her after the bridal trir

Butterfat Human Need

Food scientists, whose efforts to find the greatest food values have increased year by year, find that generally the people are the healthiest in those countries where butterfat makes up a large per cent of the diet. The Chinese people are a diminutive race and not particularly healthy. Butter is not used by the Chinese except by a small but growing number of the wealthier classes. Normal consumption of butter there is estimated at only 2,000,000 pounds per annum, while China has a population of 446,-653,000. The average American eats ten times more butter in a day than the Chinese eats in a year.

Who Invented Ice Cream?

Ice cream provides the historian with ample opportunity for research, for of the origin of this delicacy little is surely known. According to the encyclopedias, ice cream was introduced into France from Italy in 1550. Germany and England also were enjoying it at about the same time, but whence it originally came is a matter of conjecture. In 1786, it is said, the first advertisement for ice cream appeared in the United States. And Mrs. Alexander Hamilton is reported to have been our first hostess to serve her guests this frozen dessert.

time many of the old ideas about the causes and treatment have been discarded. Naturally our ideas of treatment have been equally upset.

DR. FREDERICK R. GREEN Editor of "HEALTH"

H IGH blood pressure, of which so much has been said and written

in the last ten years, is gradually be-

ing looked on in quite a different way

than formerly. The tendency now

among the best authorities is to re-

gard it in many cases at least as a

separate condition rather than merely

Originally considered as one of the

many symptoms of Bright's disease it

is now known that there are many

cases of high blood pressure where

there are no signs of any disease of

the kidneys or where the degree of

portion to the small amount of kidney

number of careful students are hold-

ing today that such changes as occur

in the kidneys are caused by the in-

creased blood pressure rather than the

Increased blood pressure being caused

by the kidney changes. In the same

way, many highly competent heart

specialists are now claiming that in-

stead of the high blood pressure be-

ing caused by the enlarged heart, the

enlarged heart is really due to the

increased blood pressure which so in-

creases the load which the heart must

carry that the heart muscle has to in-

But what then causes the increased

pressure if it isn't due to the kidneys

or heart? Evidently it must come

from contracted blood vessels which

by narrowing make it necessary for

the heart to use more force to pump

the blood and also to pump it under

heavier pressure. But why do the

That is what our best authorities

are trying to find out. In the mean-

crease to do the extra work.

blood vessels contract?

disease present. So an increasing

a symptom of many conditions.

One idea of long standing is that large quantities of meat caused Bright's disease and high blood pressure. There is little to support such a theory. Any food in quantities greater than the body needs is harmful. But abstaining from meat entirely is probably of no value in either Bright's disease and high blood pressure. Another theory is that going without salt is beneficial. This also is without foundation. Mnother is that drinking large quantities of water is harmful. Unless the patient has dropsy, the amount of water taken has no influence. Drugs are of little value, since their effect is only temporary. The best treatment so far known for high blood pressure is to lead a life free from tension and excitement.

(G, 1926, Western Newspaper Union.)

Famous Astronomer

Hipparchus, the Greek astronomer, who lived more than 2,000 years ago, long before any of the modern astronomical instruments had been invented, deserves much credit for his accomplishments, says the Kansas City Star.

He catalogued 1,080 of the stars; fixed lattitude and longitude; determined the length of the year, the obliquity of the ecliptic, that is, the inclination of the earth's equator to the plane of revolution about the sun; the eccentricity of the earth's orbit, how far it is from being circular; measured the distance of the moon, roughly, and discovered the precision of the equinoxes, that the sun's place among the stars at times of equal day and night constantly tends eastward. This last discovery of Hipparchus waited 2,000 years for its explanation.

Better Than Chimes

Seattle, Wash .- An offer to buy chimes for a large church being finished here was turned down by its pastor, who replied that bells are out of date. A well-planned newspaper advertisement announcing the Sunday features, he contends, will draw more folks to church than noisy chimes and at the same time not disturb those who habitualy sleep late on the Sabbath.

exception of those who died there. Many would travel to hell and back to put a bullet through Reamey."

When Reamey sought defense money from the leaders of the confidence gang he was refused aid, Sampson says. Then Reamey's wife was offered immunity for him if he would turn state's evidence. She persuaded him to do so.

Irish Would Keep

the Ogham Stones

Valentia, Irish Free State .- Kerrymen are up in arms because the most ancient of their monuments, the Ogham Stones, are being removed one by one to British museums. They likewise protest because the few remaining historic stones are being used in Ireland as gate posts and hearth stones.

Ogham was a manner of writing on stone and wood used by the ancient Irish. It is somewhat like some of the modern shorthand characters, consisting of straight or slanting lines to represent the consonants, and short straight lines to represent the vowels. One hundred and fifty kinds of Ogham writing have been used.

The Ogham stones are usually tombstones giving the name of the chieftain or clergyman buried beneath. Because of frequent clan conflicts the names of clans often are defaced. Some Ogham stones are not inscribed, and were merely landmarks to show the boundaries of clan lands, or to record battles, such as the Gates of Glory Pillars, near Ventry.

Training a King

Sinaia, Rumania.-Michael, the boy king of Rumania, is to be reared like any ordinary American boy. A threat by his mother of "a good smack" failed to make him desist from pulling his dog's tail, but an added threat of being sent to bed without supper

Women Getting Feminine

"This design for a dinner dress is infinitely more feminine," says the Woman's Home Companion of a new Paris model. "It certainly is," said the crabbed editor. "It leaves corduroy trousers and high rubber boots mies behind."

gelist S. A. Crabill is preaching very THURSDAY, NOVEMBER 17, 1927, inspiring sermons at these services. at 11 o'clock, A. M., the following

LAST PAGE EDITORIAL. Strong Convictions.

Most persons do not have them, and perhaps they have an easier time through life because of the deficiency; and equally perhaps, they do not amount to much as upstanding,worthwhile, citizens. Persons who dally and trim throughout their lives trying to pick middle courses and not making a stand anywhere, fail absolutely in being what they think they -good citizens.

Certainly, we do not mean that everybody should take an aggressive stand on every question, and be of the "My way or no way" variety of nuisances; but there is a big difference between being a noisy extremist, and a conservative thinker with conscientious opinions and courage back of them. In all matters of importance that concern us, we should reach con-clusions and open-mindedly stand by

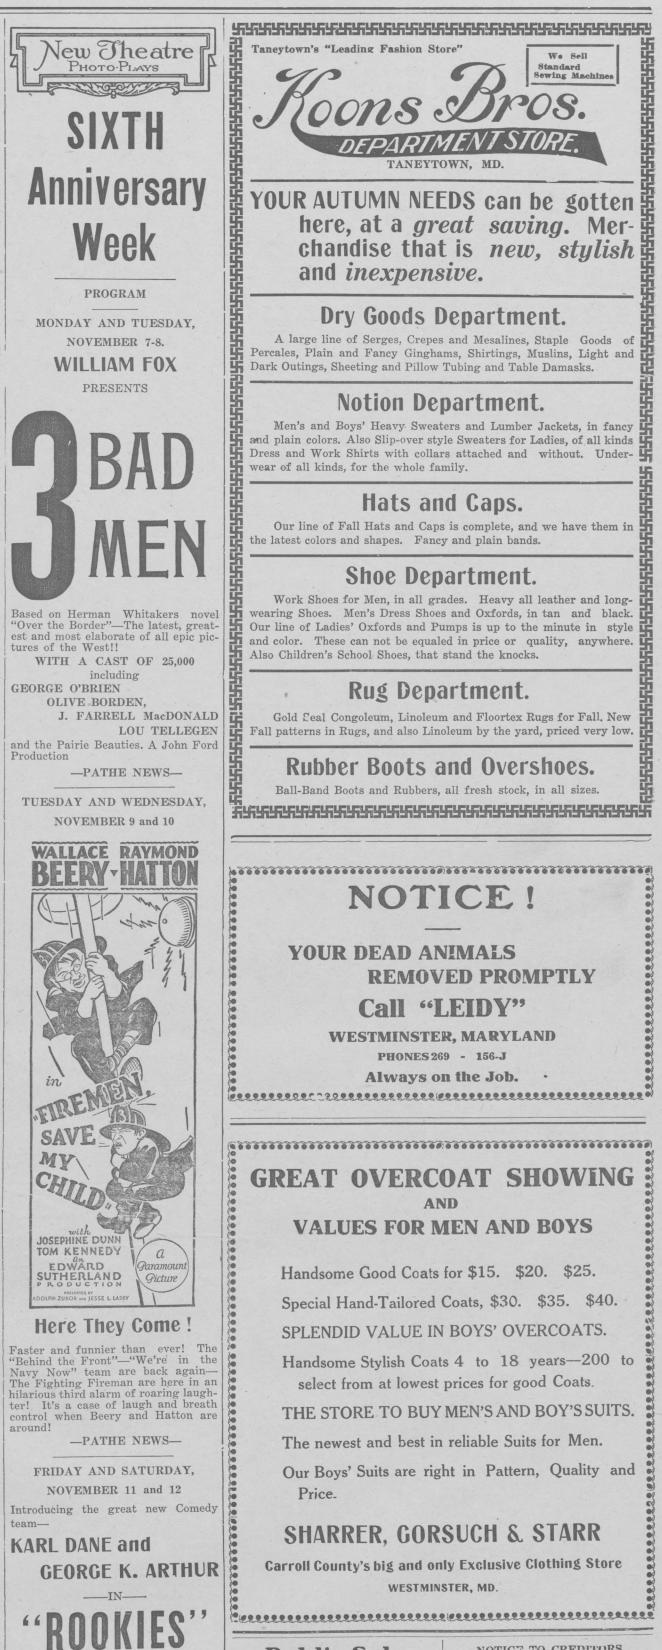

them without faltering. Trying to be wise, or popular, by straddling, or "keeping out" of con-troversy—avoiding the taking of a stand-merely plays into the plans of the more positive, and perhaps some-times of those who have axes to grind not to the best interest of a community, or of an object.

One can have strong convictions, and still not be objectionable with them. In this country of ours majorities must rule, for want of a better plan. Therefore, as good citizens, we ought to try to have our opinions, and our "say," then if the decision goes say, then if the decision goes against us, peacefully submit. Take our stand, individually, beforehand, then fall in line with the majority af-terwards—unless indeed some very strong conscientious conviction may compel us to do otherwise, for majorities are not always right.

Individual bathtubs have been installed in schools by the Board of Education in Stockholm, Sweden. These tubs are assigned like desks and are used at specified periods while the children's clothes are being fumigated

TROXELL'S SPEGIALS SATURDAY ONLY, November 5th., 1927. 5³/₄c 7c Sugar, per lb. Masaroni, per box Baked Beans, per can 8c Fancy Rice, per lb. 7c Heinz Mince Meat, per can 23c Pancake or Buckwheat Flour, 15c Troco (Butter Substitute), per lb. 19c Full line of Fresh and Smoked Meats, always on hand.
