VOL. 34

TANEYTOWN, MARYLAND, FRIDAY, FEBRUARY 3, 1928.

ELEVEN SCHOOL HOUSES SOLD AT AUCTION.

Prices Obtained were Extremly Low in Most Cases.

The Board of Education, on Wednesday, sold eleven public school nesday, sold eleven public school properties at public auction, due to their abandonment because of the new High School system and consolidated schools. The schools sold were as follows;

Oregon, near Westminster, Taney-

town state road, brick building, slate roof, ¼ acre of land, bought by Edw. Case for \$360; Old Fort, near Manchester, brick building, metal roof, 40 sq. perches of land, by Charles F. Keck for \$150; Chestnut Grove, 2 miles from Mt. Airy, brick building, shingle roof, one acre of land by Guy T. Warfield for \$272; Highland View, near Winfield, brick building, shingle roof, 90 sq. perches of land, by Arthur B. Shipley for \$210; Humbert's, near the Pennsylvania state line, brick building, shingle roof, 18 sq. perches of land, by Augustus G. Humbert for \$105; Emory, near Finksburg brick building, shingle roof, 1 rod, 2 sq. perches of land, bought by trustees of Emory church for \$210; Clear View, near road leading from Taney-town to Keysville, brick building out buildings, and lot of land, by Allen F. Feeser for \$195; Green Valley, near Silver Run, brick building and outbuildings by Allen F. Feeser for \$100; Louisville, east of Gamber, wooden building, shingle roof, 47 sq. perches of land, Harvey L. Kneller for \$175; Bird Hill, on state road between Westminster and Gamber, wooden building, ¼ acre of land, by John A. Baker for \$515; Wentz, on state road from Manchester to Hanover, brick building, metal roof, 1 acre, by George R. Wantz, Sr., for

Information Wanted.

Captain Wm. Pepple, who served during the Revolutionary War, enlisted under Gen. John, from Frederick Co., Md. The 1790 Census of Maryland gives him as the head of a family. I would like to know his wife's name

Wm. Pepple, Jr., born 1778, and died 1858, married Magdalena Lind (Linn), in 1804, at Taneytown, Md. I would also like to know, the name of Magadalena Lind's father. Can any readers of this paper give me information regarding the Pepple family, sometimes spelled Pebbles? I would greatly appreciate it, if they will

communicate with me.

MRS. LIDA PEPPLE DYER,
327 N. Alabama St., Butte, Montana. If any information can be given in this matter, please hand it in at The Record Office, or mail direct to the

Christian Endeavor Week.

writer of the letter .- Ed. Record.

On the closing day of Christian Endeavor week, Sunday, Feb. 5th., numerous churches will hold a special evening service, in which the Christian Endeavor Societies affiliated with the church will present a program on the present "Crusade with Christ." a newly inaugurated youth movement. The crusade is designed to aid the causes of youth evangelism, world peace, and Christian citizenship. Young people will deliver declamations on these topics in the services of February 5, and winners of such declamation contests will be eligible for state and national oratorical contests. The general purpose of the observance will be to focus attention on the world-wide service program of the Christian Endeavor Societies, which also have important objectives for loyalty and assistance in the pro-

grams of their individual churches.
Throughout Carroll County practically every Christian Endeavor Society observing Christian week in some manner, either by special Sunday evening programs, or socials during the week, and on Sunday, Feb. 5th., it is expected many young people will connect themselves with the societies throughout the county.

Deer Park Charge, comprising Deer Park and Providence Churches, Rev. George W. Ports, pastor, is observing the entire week with nightly services in the two churches, and on Wednesday night Mr. Willard E. Rice, Executive Secretary of the Maryland Union, accompanied by state and county officers, visited Providence Methodist Protestant Church, where an inspiring and helpful rally was

A REAL BLIZZARD

First Real Demonstration of Winter for the Year.

The blizzard that started about midnight, Friday night and continued throughout Saturday, was the only real bit of winter to visit this part of the state. The snowfall was not only heavy, but the wind carried its light flakes into drifts and blockades that called for snow plows to keep the main roads open, but some of the lateral

roads were blocked.

The cost of the snow to Baltimore and the state is estimated at about \$250,000. The visitation extended pretty generally throughout the east, and followed a stormy week that did a lot of general damage. The depth of the snow was reported as anywhere from eight to fifteen inches, de-

pending on the locality.

Sunday opend up bright, and in a few hours most of the roads were cleared up, and by Monday travel was general and without serious interruption. tion. As it was the first real snow of the winter, more fuss was made over it than if it had been a 'teenth one; and instead of having been a nuisance it was really welcomed by many farmers as a protecting blanket to

the growing wheat.
In Chicago and St. Louis several deaths due to the cold, were reported, while the South had its second cold snap of the winter.

Auto Club Meeting.

The Taneytown-Middleburg Auto Club met in the Shriner Theatre, on Tuesday night, Jan. 31st., and was called to order by the President.

The minutes of the previous meeting were read and approved. The By-Laws Committee suggested that women be admitted to the Club as members, free of membership dues, which was approved by the Club. The Club received a letter from the

Maryland Automobile Club, requesting it to become affiliated with that organization. The Secretary was instructed to invite them, by letter, to have a representative of the Maryland Club to attend our banquet, on Feb. 21st.

The President of the Club spoke of the value of being a member of an Auto Club, especially in case of touring, where established Clubs assist tourists, as to routes of travel, sightseeing expeditions, etc., as they have bureaus of information, who assist

The Club desires to inform all members to purchase their tickets for the banquet, to be held on Feb. 21st., in the Firemen's building, not later than Saturday, Feb. 18, in order that proper arrangements can be made for

ne supper. Mehrle Baumgardner is making an effort to arrange to have some form of musical entertainment, during the

The official body of the Club has been appointed as a committee to inour banquet, such as representatives from Chambers of Commerce. and the County Commissioners Carroll County, and have accepted the invitation, by giving us the assurance that they will be present.

The Club has a total enrollment of

110 members, which speaks well for the short period of time which has elapsed since organized.

A hearty invitation is extended to others, who are not members of our Club, to enroll with us, and we have given the ladies an opportunity to be-come members without paying membership dues. We especially invite the ladies to enroll with us, as they may be able to give us some valuable

The meeting adjourned to meet again on Tuesday night, Feb. 7th., at 7:30 P. M., in the Shriner theatre. HARRY ECKER, Sec.

Old Bank Officials.

A special to the Baltimore Sun from Rockville, says; "Montgomery county boasts of two banks claiming the honor of having

the oldest officials of such institutions in the United States. Gaithersburg has a First National Bank and so has Sandy Spring, and the same directors serve also as offi-

cials of the Sandy Spring Saving Institution. The chairman of the board at Gaithersburg is 96 years old, while his rival at Sandy Spring is bordering on his ninety-first birthday.

The average age of the five oldest men in the Gaithersburg bank is 82 years. At Sandy Spring the average age is 87 years. I. T. Fulks is chairman of the board at Gaithersburg and has served in that capacity since the organization of the bank in 1891. At 96 he is probably the dean of bankers in the Union. Asa M. Stabler has served the Sandy Spring Saving Institution as director, president and chairman of the board since its doors were opened in April, 1868. In point of service Mr. Stabler thinks he is the senior bank official of America. Both men are interested in their work and regularly attend the board meetings. Mr. Stabler's hobby is driving his automobile and Mr. Fulks is walking. Both read without glasses. Neither uses alcohol, but both enjoy tobacco. They are regular attendants at the

Another thing that reminds us that the Presidential campaign is close before have already been mentioned favorably for the Vice-Presidency.

Sandy Spring Friends' Meeting House

THREE SPECIAL DAYS FOR FARMERS

Specialists will Lecture on Numerous Interesting Topics.

An interesting and instructive program has been planned by the Carroll County Farm Bureau in co-operation with the County Agent and the Extension Service of the University of Maryland. This program will be given for the benefit of the farmers of Carroll County. Meetings will be held in the mornings and afternoons of February 8, 9 and 10th., beginning at 10 o'clock and ending at 3:30 o'clock, in the State Armory, Westminster.

Wednesday, February 8th., will be Dairy day. Dr. DeVoe Meade, a dairy specialist form the University of Maryland will give a lecture in the morning and one in the afternoon on some important phase of dairying. Anyone who knows Dr. Meade knows that they will be well rewarded for their presence at his meetings. Mr. M. M. Stewart, Sec-Treas., of the State Farm Bureau Federation and other speakers will be present on this day. Mr. Stewart has an interesting movie which he will show on this day.

Thursday will be Spraying day. Mr. F. Vierheller will be present and will have charge of the meetings both morning and afternoon. Mr. Vier-heller is a specialist on his subject and is in a position to give the latest information on sprays and spraying. Mr. Albert Doctor, of Ohio, will also be present to present to the farmers of Carroll County a co-operative proposition regarding automobile insurance. This proposition is endorsed by the Farm Bureau organization and has proved a great saving to the

Friday morning will be given to poultry subjects. Dr. Waite of the University of Md. will have charge of the meetings. Thursday afternoon will be given over to Dr. Metzger of the University of Md. who will discuss various phases of clover and alfalfa raising. Dr. Metzger knows his subject and his discussions should

prove very profitable to his hearers. Every farmer and his family is cordially invited to attend these lectures, discussions, movies and music. Come early and stay late. Bring your problems and make use of the specialists while we have them with us.

Cow Testing Association Meets.

On January 25th., the Dairy Herd Improvement Association held a profitable and interesting meeting, to discuss the work now under way in this county. According to County Agent L. C. Burns, this was one of the most outstanding of any meeting the Association has held.

vite notable guests to be present at the meeting and spoke on the Economic problems affecting our dairy ed by a lack of proper masticating to-The industry. It is necessary that we as following have been invited: Freder- dairymen work out a dairy program ick, Littlestown and Hanover Cham- that will be economical and educationbers of Commerce; Blue Ridge Trans- | al. Competition in the dairy indusportation Co.; Western Md. Dairy Co. try, as well as all other business orfor ganizations, is becoming keener and the keener. The public is constantly demanding a better product and the man who can produce the best milk, at lowest cost, is the man who will final-

ly win out. Our Carroll County Dairy Herd Improvement Association is fortunate in having Mr. Randag for a tester. His wide experience in this state, as well as his schooling in Holland, fits him unusually well for the work he is doing. County Agent Burns urges the dairymen of Carroll County to avail themselves of this opportunity and consult with Mr. Randag when-

ever an opportunity presents.

There is a possibility of organizing another association, as there are number of farmers on the waiting list, and are unable to get their test-ing done. This is most certainly the right step, for it is now necessary that a large number of dairy calves be raised to complete the replacement program for Carroll County. It is a well recognized fact that we can only select our young individuals wisely as we keep records of the individuals in in our herds. We must select young dairy stock from the high producing cows, if we are in turn to produce high test individuals. Not only are these things true, but we find that the men now in the Association are cutting their feed cost, so that their final cost of production is greatly reduced, and this is a necessary essential to success.

A Kitchen Fire.

On Thursday of last week while Mrs. Paul Myers was attending the Sewing Circle meeting at the home of Mrs. Harry Feeser, fire broke out in the kitchen on the Edward Strevig farm where Mr. and Mrs. Myers live, and when she returned home late in the afternoon found the house full of smoke, and a big fire almost miraculously averted.

The chimney boards and the floor under the stove were burned away, and the stove that had tilted back into the chimney was completely ruined; also a radio, large wood box, kitchen cabinet, buffet, and other contents were ruined. There is reported to have been no fire in the stove when Mrs. Myers left. The loss is only partly covered by insurance.

There is a movement in Chicago to outlaw prize-fighting. Probably Mayor Thompson has just discovered that the Marquis of Queensoury was a British subject.

WET AND DRY CANDIDATES

Relative Dryness of Candidates Briefly Analyzed.

Delivering the keynote address in Chicago before W. C. T. U. leaders who assembled to draft the 1928 campaign plans, Mrs. Ella A. Boole, national president, reiterated the organization's demand for a dry plank in the platforms of the major political parties. Then she turned to an estimation of the relative dryness of the

leading candidates.
On the Republican side, Mrs. Boole said, President Coolidge has "declared for strict law enforcement" and former Governor Lowden, of Illinois, has proclaimed his support of Coolidge policies and, in Illinois, has a dry record. Senator Borah, of Idaho, was said to be "definitely on the side of prohibition" and against nullification; Secretary Hoover and Senator Willis, of Ohio, were described as "dry personally," while Senator Charles Curtis, of Kansas, was definitely dry.

On the other hand, Mrs. Boole de-clared, former Senator Wadsworth, of New York, is "clearly wet"; Nicholas Longworth, of Ohio, Speaker of the House, has "voted with the drys, but is personally a wet," and "Vice President Dawes has never declared himself a wet or dry. Where does he stand?"

Turning to the Democratic ranks, the W. C. T. U. president said the nomination and election of Governor Smith would be a wet victory.

Mrs. Boole placed Governor Ritchie,

of Maryland, and Senator Reed, of Missouri, in the category of wets, as proponents of repeal and modification of the Eighteenth Amendment.

Cordell Hull, of Tennessee, former Democratic national chairman, she looked upon as a friend of prohibition, former Secretary Meredith, of Iowa, as a dry and William G. McAdoo as a dry who "chooses not to run."

Mrs. Boole closed with the plea that Government officers from President to State legislators clearly bespeak their loyalty to the Constitution, their support of enforcement and their personobservation of the letter and spirit

Paragraphs for Farmers.

Cattle should not be fed within 24 hours of the time they are to be slaughtered, but should have access to fresh water. An animal should never be killed while in an excited or overheated condition, as it will not bleed well. Beef from animals not properly bled does not keep well. Bruising the body just before slaughter will cause bloody spots, which have to be trimmed out, resulting in considerable waste.

At least once during the year competent veterinarian should examine the teeth of all horses on the farm. Generally all that will be required is the "floating" or filing off of the long, adopt similar regulations. Mr. Granville Hibberd and Ex-County Agent, E. K. Walrath, were at gether with digestive troubles. Older Among all pending measures, which horses particularly are often much look to this result, this may be rebenefitted by proper attention to the garded as one of the most salutary teeth.

Grazing livestock in the farm woodland and maximum production of timber do not go well together, says the United States Forest Service. Continued heavy pasturing of hardwood woodland eliminates all young timber growth on the ground and prevents more from becoming established. This brings about a parklike appearing woods which grows but a small percentage of the amount of wood that the land is capable of producing.

Handling the hide from slaughtered cattle requires attention to details for best results. Remove dirt, blood, and any pieces of flesh on the hide scraping with the back of a butcher knife and by careful cutting. Allow the hide to lose its animal heat before applying salt. When the hide has cooled sufficiently, spread it, hair side down, being sure to straighten all folds and laps. Sprinkle fresh, clean salt over the flesh side, using about 1 pound for every pound of hide. See that all parts of the flesh side receive a sprinkling of salt, rub it in well along the cut edges and heavy portions.

Maryland Should Grow More Lambs.

College Park, Md.-Maryland's location with respect to good nearby markets, its mild climate, which obviates the necessity of expensive shelter and permits grazing through much of the year, together with the wide variety of suitable feeds which may be grown, are all dominant factors encouraging the production in the State of high-class lambs for early market, says B. E. Carmichael, professor of live stock husbandry at the University of Maryland.

On account of the good demand at nearby markets for early winter or "hothouse" lambs, many Maryland sheepmen plan to have lambs born during December, January and February. Lambs born during these months may be fitted for market in advance of the rush of early spring lambs from other States and many of them may be marketed at fancy prices at about Easter time or even earlier, it

is pointed out.
"At whatever time the lambs are born it is generally desirable to have them grow rapidly and be ready for market by the time they are from three to five or six months of age," says Dr. Carmichael. "Very early, well-fed lambs often may be market-ed at from six to ten weeks of age, when weighing from forty to fifty pounds or more. As the season ad-vances lightweight lambs are less ac-

ANTI-WAR BILL REPORT-ED IN HOUSE

Resolution Favors Embargo on Arms to Fighting Nations.

What seems to us to be one of the most practical efforts toward peace ever suggested by this country, is the resolution presented in the House by Representative Theodore Burton, of Ohio, who is one of America's foremost peace advocates, the substance of the resolution being a policy on the part of the United States to prohibit the exportation of arms, munitions or implements of war to any nation en-

gaged in war with another nation.

The policy is left to Congress to carry out, for if Congress and the President approve the resolution, no warring nation would be able to get the necessities of war from the Unit-ed States without special action of

the national legislature. "It is hoped that the other five or six nations which manufacture arms and munitions will follow in the footsteps of the United States," Representative Porter, of Pennsylvania, chairman of the committee, said. "We have taken, I believe, a great step toward at least minimizing the chances of war. If the other nations follow, war will be outlawed." No single instrument of war is left

undefined. In reporting out the resolution, the committee said in part;

"This resolution marks a notably advanced step for the prevention of war and the promotion of universal

"It is certainly a well-known fact that no nation can wage for any considerable time, or on any large scale, unless implements of warfare can be obtained from neutral nations. In every great contest the demand has been made upon the neutral nations for necessary supplies. It has not been thought best to prohibit the exportation of food or articles used alike by the civilian population as well as in the prosecution of war."

"As the United States has taken a leading part in the establishment of beneficial principles of neutrality and has adopted regulations tending to promote peace, it is regarded as of the greatest importance that this resolution should pass.

"It will be a declaration on the part of the United States that we do not desire that our citizens should participate in the profits derived from the furnishing of implements of destruction. It is thought also that this will be a restraining influence when nations are about to embark in war, and it is hoped that other coun-tries may, should this become a law,

sharp corners which are due to uneven wearing. This roughness first causes sore tongues or cheeks, followed by a lack of promote and by the lack of the

The Sunday Movie Question.

The owners of movie theatres, Baltimore, are ready to open their theatres on Sundays, if assured that the refusal of the grand-jury to indict John G. Callan, member of the legislature from the Second district, who leased a theatre and sold programs, rather than tickets, to the picture show he announced for last Sunday

The movie houses, and at least one vaudeville and two legitimate theatres are considering opening on Sunday, if the film houses are unmolested, which means that they will open if

left to their own choice. Dr. W. W. Davis, Secretary of the Lord's Day Alliance, says the action of the grand-jury has nothing to do with the law, and can give no legal rights not carried by the laws of the ADAMS COUNTY TAXES

No. 32

Total Assessments \$623,185. Debt of County is \$265,000.

The following Adams County, Pa., tax figures are from last week's Get-tysburg Compiler, and will be of in-terest to Carroll countians, but will be difficult to compare because of the borough system for schools that is separate from the county administration, and the inclusion of borough and township items along with county

"Taxes levied for the support of all local government in Adams county, including boroughs, townships and school districts in addition to the county administration, amounted to \$623,-185, for the year of 1926-27, according to figures made public this week Secretary of Internal Affairs Jas. Woodward. A study of the figures shows that the per capita tax paid in the county amounted to \$17.91. In the 1925-26 tax year the total amount of taxes paid in Adams county reached

The 1926-27 taxes collected in the county were based on assessed valua-tion of taxable property to be \$23,-566,395. The assessment figures throughout the county averaged about

60 per-cent of full valuation.

The tax dollar in Adams county in the tax year of 1926-27 was spent as follows: 42.1 cents by 34 school districts of the county; 18.1 cents for road purposes in the 21 townships; 11.4 cents went towards the expenses of 11 boroughs including Gettysburg; 28.4 cents were spent for all county purposes. Of the total amount of taxes during the year \$262,207 was received for the school districts; \$112,-802 was for road purposes in the townships; \$70,918 was collected for borough purposes and \$177,258 for

county purposes. Borough and school taxes in Gettysburg were \$88,407; in Abbottstown \$3,970; in Arendtsville, \$5,501; in Bendersville, \$4,731; in Biglerville, \$9.380; in East Berlin, \$8,168; in Fair-field, \$5,136; in Littlestown, \$23,049; in McSherrystown, \$8,691; in New Oxford, \$11,754; in York Springs, \$3,094.

Bonded indebtedness of Adams county and its local taxing districts increased from \$456,000 in 1925 to \$564,068 in 1926. Of the debt then outstanding \$97,-

818 represents borrowing for borough improvements by Gettysburg, while for the remaining boroughs the total is \$64,700. The combined debt of all school districts throughout the county makes up \$79,600 township obligation account for \$56,950; whereas \$265,000, or nearly half of the total, represents loans incurred by the county govern-

McAdoo Challenges Gov. Smith.

Wm. Gibbs McAdoo, who, while he may have no chance for the Democratic nomination for the presidency, is yet in a position to have a large audience on the subject, in an address in Richmond, Va., on Wednesday night directly challenged the attitude Gov. Smith, of N. Y., on the liquor question, and sounded a rallying cry against the election of any wet to the presidency.

"The supreme need is to put law enforcement in the White House," said Mr. McAdoo. Attempt is being made to convince the country that no matter if a wet is elected President the Constitution and laws will be enforc-

"This is both unsound and untrue, * * * The White House in the hands of the liquer interests would be a veritable Gibraltar of offensive operations and the doom of the Eighteenth Amendment would be written boldly upon the face of the Constitu-

The speaker suggested, among other things, that the Federal Government give financial aid to the States in prohibition enforcement somewhat after the manner of the Federal aid system by which States now are assisted in road building and other enterprises of national concern. He denied the charge that in enforcing the Eighteenth Amendment the Federal Government was infringing State rights, pointing out that forty-six of the States had themselves ratified the amendment, binding all the States by overwhelming consent.

He made direct reference to Gov. ernor Smith in recounting that neither New York nor Maryland had a State prohibition enforcement act and declared that in both States the burden of enforcement had been left upon an insufficiently large staff of Federal agents.

A Youthful Figure.

The best way to regain a youthful figure is to take sufficient exercise, and follow a safe reducing diet. A reducing diet is low in calories, or fuel value. The watery and bulky fruits and vegetables, which are low in calories, or fuel value, should predominate in the diet of a person who has a tendency to store up fat. Food to be used sparingly, are the more concentrated foods, especially those rich in starch, in fat content, and in protein. It is fairly easy to limit the amount of fat, since most of the fat is added to the diet. This means cutting down or limiting butter, cream, and dishes prepared from cream; sal-ad oils of all kinds, fat meat, and fried foods. If you want a salad dressing, make a simple French dressing, with lots of vinegar or lemon juice, and very little oil. A good salad dressing can be made by using mineral oil, as a substitute for the ordinary salad oil. Mineral oil is not digested, but simply acts as a filler, and helps to carry flavor.

More Clean and Representative Newspapers Needed.

There are some newspapers in this country, whose editorials, at least, can not be read by law abiding and respecting persons without disgust. Practically everything that is held sacred, as taught by the Bible, is flouted and belittled, if not actually ridiculed. There is hardly a law that results in the arrest, conviction and punishment of an offender, that is not in sentiment at least, antagonized.

There is hardly a policeman who makes an arrest, and uses violence when required to do so because of resistance, that these rabid writers are not found lambasting, and glorifying the offender.

There is hardly anything that is sacred to them that does not in some way run counter to the best moral code. The boot-legger is justified in all of his law violations, because these self-appointed interpreters of righteousness are bootleggers in sentiment.

High-toned editorialism is unknown to these fellows. They neither have the mind nor desire to be clean and fair, and the disgusting thing about the whole business is that decent folks often have no recourse but to buy the papers containing the vile rot carried on editorial pages—and sometimes on other pages.

It would seem, therefore, that there ought to be capital enoughand certainly brains enough—for the better classes of citizens to get together and give the immense patronage for decency, morality and law, a chance to buy the class of papers they want, and believe in.

Fortunately, the country as a whole is not given over to rank "yel- poverty in the old country. Voters low" journalism. Decency and intelligence does central most of the managerial and editorial offices; but the few that disport themselves in the vellow field are a stench in the famyellow field are a stench in the family of American journalism, and the good people of the country should go after them effectively and chase them off the map.

Immigrants and Jobs.

The following clip, from a member of The Immigration League of Boston, as published in the Philadelphia Ledger, places the question of further foreign immigration in very practical language. Many employers are encouraged to turn to more foreigners because of the American Labor Unions that fix prices of labor, and very often at such a high level that work and business are discouraged, and make selling prices of many leading commodities high, as well as rents and general living costs.

It is a well known fact that organized labor is a greater force against foreign immigration at this time than American Patriotic Societies. This being the case, it seems distinctly up to the labor organizations to have proper regard for the country, as well as themselves, in the matter of labor prices; for in all probability if the present prices were lower, more people would be employed, and this factory work that, in the buying markets, comes into competition with foreign made goods.

The clipping, however, is generally good argument on its face, though several of the expressions are somewhat doubtful, both as to meaning

and fact "Many members of Congress were visited early in 1927 by those express-ing opposition to the restriction of immigration. Some of these protesters had a special racial interest in this subject. Now, the average American, whether his ancestors came from one place or another, is chiefly interested in keeping his job and looking after his family.

Jobs, here and all over the country, at the present time are too few—not coo many. Labor-saving methods and other changes affecting business have thrown thousands out of the mills and factories. Thousands of new places are needed each year for boys and girls coming out of the schools to

find their places in our industries.

It is well understood that every one of the thousands of workers still being brought in from abroad must either be in idleness or displace one of our own workers. Only an occasional new immigrant can claim to be needed for some special use, and nearly every one cuts down the chance of the American worker to get and keep a job at good wages.

On the other side of the water there are a number of countries that are both able and willing to furnish are both able and wining supply of us with an inexhaustible supply of unamployment. This poverty and unemployment. migration does them no good in the long run. It merely hurts us. Results show that, while mass immigration can bring more poverty to new lands, it usually encourages still more are beginning to understand this question. As a body, they do not want more of one race than of another. They want less of the whole lot. American point of view. They want what jobs there are for themselves and their children."

Although the Commission has said that it believed it impractictal if not impossible for them to draw up a workable plan for mergers to follow, railway executives who have spent millions of dollars in planning mergers voluntarily and in presenting them to the Commission for approval, only to be refused by it, feel that a model plan would be most helpful.

As for the future, suppose that Congress does nothing, and that the Interstate Commerce Commission continues half-heartedly on its way, and mergers continue to be scarce or not at all; the public need not worry that their stocks will suffer, or that railroad rates will increase, Mr. Fulton assures them. The railroads can continue profitably as they now are, and who knows but what the public would be better off? Certainly, concludes Mr. Fulton: "Many railroad executives would breathe a deep sigh of relief if they would be showed that general railroad consolidation was absois especially true in the case of much | lutely and indefinitely dead."-Review of Reviews.

A Little Talk on Thrift.

The nation is this month celebrating the anniversary of one who in many respects ranked as the greatest of all Americans-Benjamin Frank-

Although excelling in statesmanship, literature, business, finance and science, Franklin no doubt holds his highest place in the public mind as the commanding advocate of thrift. It may be stated, too, that it is the reflection of sound public opinion when a nation is willing and glad to pay such homage to one who has taught us so much about the values and needs of thrift in our daily lives.

The life of this great, simple man abounded in amazing developments. Many of his accomplishments were dramatic-intensely absorbing-spectacular. Yet we all think of him most dearly and revere his name most reverently as the one who for more than 150 years has kept the thoughts of the nation on thrift.

It is to be noted that the Franklin philosophy which, through all these long years has been growing ever more popular and impressive, is the epitome of simplicity. It is this charm that has had much to do with its virile ascendancy from year to

Do You Know-

That the fire loss in 1926 in the United States amounted to \$560,548,-

That you are contributing your share for the payment of all this unnecessary fire waste?

That the things you eat, drink and wear are insured from the raw material through to the various stages of manufacture and to the finished

That along their way to the finished product this fire tax is added to the cost, and when you buy a garment, a loaf of bread, or other article you pay this cumulative fire tax?

That it is your money that is thus wasted, not, as some people imagine, the insurance companies' money?

That the insurance companies are simply intermediaries, collecting from the masses comparatively small amounts known as "premiums," which they pay, in more or less large sums, to those who have fires?

That as long as the fire losses are exorbitantly heavy the insurance premiums must be correspondingly

That every minute of the day and night somebody's home or place of business is being burned?—Courtesy of Department of the Attorney-General of Ontario.

Curtis to Borah.

Senator Curtis, of Kansas, avowed candidate for President, went on record Wednesday as favoring a strict prohibition-enforcement plank in the Republican platform. He also declared his opposition to repeal of the Eighteenth Amendment and to granting the States power to determine the alcoholic content of legal beverages.

This is his reply to Senator Borah leader of the Republican insurgents, who is questioning all Republican candidates on the prohibition issue. It is the first and, so far, the only response to this self-appointed interrogator. As the representative of a State which became dry by legislative enactment forty years before national prohibition, Senator Curtis' reply occasions no surprise, even though, as a thoroughgoing conservative, he might have hesitated to recognize the right of the insurgent leader to demand a declaration of his position. How far his example may influence other candidates remains to be seen. -Phila. Ledger.

Papal Court Bows to

New Order of Things

The oldest court in the world has een touched by democracy. The Vatican, which held aloof for so long, has become more or less responsive to the new order of things that seems to be reaching around the entire

For a long time this huge palace was illuminated only by candles after they had become obsolete elsewhere. Steel pens were not used here-perhaps the Vatican was the last place in the world to demand that documents be written and signed with a quill-but now even the typewriter has penetrated the forbidden doors The huge place was cold in winter, but tradition allowed no artificial heat until a certain date, quite irrespective of the temperature: Now here are radiators everywhere.

The Vatican court is the oldest in the world, yet an audience at this court is more easily obtained than elsewhere. Here one realizes the ef fect of the democratic idea. In the older days when his holiness "commanded" anyone to appear before him: spectacularly dressed guards planted the poles of their spears beside the entrance to one's hotel and delivered the message that named the day and merely makes application for the au lience at the American college in Rome or at the American embassy

Country's Wild Game

Close to Extinction The remnant of wild game birds

and animals in this country today, acralist and wild life conservator, represems about 2 per cent of the stock that existed here 60 years ago. All our wild game, ranging in size from the tiny turkey and moose, is rapidly liminishing in numbers. They have an unequal chance with the vast army of hunters equipped with the latest in dogs. Every year the wild life grows grows larger and their guns and ammanition more deadly and effective. At the present rate, it is claimed, before the year 2027 the United States will be swept as clean of wild life and even song birds as is Italy. The few small game refuges and preserves are considered insufficient to save the species, some of which are already extinct or nearly so. Some of the American game species that face early exthection are the woodcock, jacksnipe golden plover, antelope, California grazzly bear, wild sheep and mountain goats. The early passing of the wild turkey, grouse and beaver is also

To their right praise and true perfection."

SOMETHING GOOD

ROOD nicely served and daintily garnished will be much more palatable and appetizing than that which is served carelessly. Next to palatability we like our food to appeal to

Roquefort Salad Dressing.

Cream two ounces of Roquefort cheese, using a wooden spoon; add gradually four tablespoonfuls of olive oil or cream and two tablespoonfuls of vinegar, a scant half teaspoonful of salt and a few dashes of cayenne. Cream may be used to replace all or part of the oil as one's taste desires.

Banana Soup.

Rub six ripe bananas through a sieve, add a pinch of salt and the grated rind of a lemon, put over the heat and when the boiling point is reached add two tablespoonfuls of cornstarch to a little cold milk and cook, stirring all the time; cool, add two tablespoonfuls of lemon juice, chill and serve in chilled bouillon cups.

Shrewsbury Cakes.

Take two cupfuls of butter, the same of sugar, three pints of flour, four eggs and a teaspoonful of mace. Cream the butter, add the sugar, and the beaten eggs. Roll out very thin, cut into small cakes and bake in a hot oven. These cakes will keep a long time.

Tartar Sauce.

Mix together one tablespoonful each of vinegar and worcestershire sauce, one teaspoonful of lemon juice and one-fourth teaspoonful of salt. Heat over water. Brown one-third of a cupful of butter and carefully strain into the first mixture.

Apples a la Mode.

Here is an easy dessert for a busy day: Core some good baking apples and fill the centers with mincemeat. Bake, basting occasionally; serve hot.

HOW=

RADIO WAVES INFLUENCE VEGETATION IN GROWTH .-Entirely opposite stories are told concerning the action of radio waves upon trees and plants. One man writes in an English publication that he had in his garden a walnut tree which for years had never yielded more than a few pounds of nuts. He installed a wireless set, one end of the aerial being fastened to the tree. That year an enormous crop was gathered, but the next season, the aerial having been removed in the meantime, the yield dwindled to its old proportion.

Another man, who has grown cucumbers for many years, reports that they were never more than average size until an aerial happened to be strung over the garden in which they are grown. Since then, he declares, the vegetables have increased remarkably in size and quality.

On the other hand, an old pear tree that had produced a large supply of fruit for many years was called into service as a support for an aerial. That year it bore almost no fruit at all, and the following year the crop was also a complete failure.

Most experts are of the opinion that an ordinary aerial could have no effect, beneficial or otherwise, upon vegetation. They admit, however, that a transmitting station might have some influence upon things growing in its neighborhood.

How Ice Is Employed

in Salvaging Wrecks

After a ship has struck rocks and sunk, diver often find the job of salvaging the wreck a very difficult one. A method of salving submerged vessels with ice was tried in a naval yard recently. Instead of the diver going down to rivet a steel plate over the hole with an acetylene burner, he made ice under water and used a block of ice instead of a plate of steel to repair a leak.

By freezing the water around it, the hole in the sunken vessel was tightly closed. Large quantities of ice may be made in sea water in a very short time, and while the proper degree of coldness is maintained the ice adheres to the metal.

Inclosed in an airtight tank, an icemaking plant was lowered 40 feet into the water and worked by electricity from above. The freezing of the water was effected by means of flexible hosepipes in which the ammonia for refrigerating was in vapor form. Within two hours a solid block of ice had sealed the gaping bottom, of the

In another instance a large sail was spread over a leak and the same process followed. In this case the sail was pressed firmly over the hole by a six-inch wall of ice.

How Sand Stops Runaways

An electric line in New Jersey has adopted an unusual kind of stopping device for the steep places on the Palisades along the Hudson. The cars ascend the cliffs in a zigzag course at an average grade of 7 per cent. In the event of a car's running away, a siding track, with the switch point always in direct connection with the main track, serves to draw off the car. The rails of this siding are always buried in sand. The friction between the sand and the wheels, of course, brings the runaway at once to a stop. On each side of the switch rail is built a trough, which holds the sand. The rail is covered to a depth of 21/2 inches. Numerous tests have proved the efficiency of the apparatus.

How to Treat Burns

Burns are painful things and the sooner treatment is applied the quicker the victim will get relief. In case of severe or extensive burns it is best to call in a doctor at once, but the ordinary minor burns that usually occur around home may be soothed by applying carron oil, boracic acid ointment, butter, lard, bismuth, alum, vaseline, flour or any other soothing substance. After applying the treatment bandage the injury so as to keep it free of all dirt. Then redress it every day.

How to Tell Age

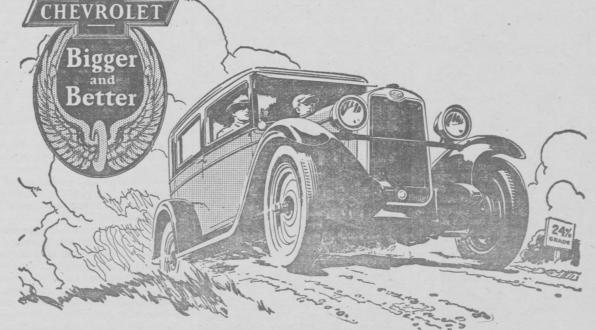

The best way to tell the age of a tree is to count the annual rings on the cross section of the stem near the ground, and add to this count the number of years it took the tree to grow to the height at which the cor't was made. In case of a felled tree, says the American Tree association, the stump section is a good place to make the count.

How Lemonade Sweetens

Lemonade becomes sweeter if it is allowed to stand for an hour or two after being made. The can sugar in the lemonade is converted into the much sweeter mixture of the two simpler sugars, glucose and levulose. The process is somewhat similar to that which takes place in the stomach, which we call "digestion."

How Youngsters Grow

Most girls grow no taller after sixteen. Boys often increase in height until they are twenty. Tennis and swimming, owing to the stretching of the muscles, are the best height-increasing exercises.

Result of Conquest

for Economical Transportation

Although William the Conqueror Although William the Conqueror never in his life went more than 250 miles from home, and although the scene of his decisive victory at Hastings lies only 150 miles from his birthplace, Falaise, he diverted the whole course of English life. His 700 the people let a cold get a start when a few minutes attention would ward it off.

Doctors and Druggists are a unit in urging people to stop these colds right in the start. By rubbing the throat and chest with healing oils and by inhaling the vapor from such oils one can often throw of the attack. whole course of English life. His 700 open boats that sailed from Dives-sur-Mer with 6,000 knights and archers carried as invisible cargo many of the words now contained in the English language. Three-fourth, of the words in the present English tongue crossed the channel in William's train. If William had never crossed the channel our speech might have been a mixture of Scandinavian and German. After William had been crowned he rewarded his lieutenants with grants of land. Norman French lords ruled the shires and the Anglo-Saxon and Danish peasant farmers. For 300 years the language of the court and the nobles remained French, though he common people continued to speak Anglo-Saxon. But a remarkable thing appened. The two languages merged. Anglo-Saxon supplied terms for simple, every-day acts and things; Norman French coming from Latin and Greek roots, supplied terms for complicated thoughts and for science. When a scientist writes he uses many werds from South Europe. But for common speech and "plain English" we fall back on Anglo-Saxon words from North Europe.-National Geographic Society Bulletin.

Was Pretty Certain Some One Had Said It

"When President Harrison was visiting at our home at Weodstock, Conn., over the Fourth of July, 1889" (writes Herbert W. Bowen in "Recollections Diplomatic and Undiplomatic"), "he was smoking an after-dinner cigar in the family circle, when some one happened to refer to his own poor mem-

Preaching at St. David's (Sherman's) Sunday morning, at 10:00, by Rev. A. M. Hollinger; Sunday School, 8:45; C. E., 7:00.

A quilting bee was held at the home

of Mrs. Harvey Yingling, on Thursday of last week. Those present were:
Mrs. Jacob Horich Mrs. Chester Masemore, Mrs. Charles Markey, Mrs.
Howard Bowman, Mrs. Mark Garrett,
Mrs. Harvey Compett Mr. and Mrs. Mrs. Harry Garrett, Mr. and Mrs. Claude Leppo, Miss Beatrice and Geraldene Yingling, Miss Pauline Yingling and Mrs. William Yingling, Robt. and Earl Yingling and George Bowman. Refreshments were served consisting of ice cream, cakes, candy and

The first snow storm of this winter drifted all roads shut in this neigh-

William T. Bankert, near this place, sold to George V. Miller, an old land mark, in the form of a large white oak tree, which was considered the largest in this community. The giant tree made 66 railroad ties, 350 feet of lumber, and 5 cords of wood, and measured 5 feet in diameter, and was felled to the ground in 35 minutes.

Guests entertained, on Sunday evening, at the home of Mr. and Mrs. C J. Nace, were: Mr. and Mrs. Harold Sterner, Mr. and Mrs. Reverdy Nace, Miss Pauline and Miriam Nace and Eugene Resh, Floyd and Alvin Stern-

KEYMAR.

Mrs. Fannie Sappington and daughter, Miss Cora, accompanied the former's daughter and grand-son, Mrs. Sterling Grumbine and son, of Unionville, to Baltimore, last week, and spent several days at the home of Dr. and Mrs. Artie B. Angell. David Leakins is suffering with a

bad cold, and other trouble. Mrs. Ethel Sneeringer, Bruceville, has moved from the Weant home, to her home, formerly the George Galt

The wind storm last Saturday a week ago done some damage here and near here. Blew part of the roof off of J. Raymond Zentz's barn, near Bruceville; broke window light out of the house of R. W. Galt, and a light out of Mrs. Bessie Mehring's house, and on last Sunday a Starling bird flew against a big front window at the home of Mrs. Fannie Sappington, and shattered it to pieces.

MANCHESTER.

The Sewing Factory, in the new building back of Mr. Griefenstein's recently started operation. Men's suits and overcoats are made.

A quilting party was held, last Thursday, at the home of Mrs. William Lloyd. A number of friends and neighbors were present. A delicious chicken dinner was served.

The Operetta, "Let's Go Travelling" and the "Family Album," given under the auspices of the Junior Choir of Trinity Reformed Church, were well presented. The poses in the latter were fine. Miss Dorothy Stidman, of Baltimore, and a frequent visitor in Manchester, presented her lengthy monologue, describing the various characters in a commendable way.

The roads have been pretty well opened at this writing.
The Parent-Teachers' Association will have monthly meeting, Feb. 10.

Rev. John S. Hollenbach spoke at the banquet of the Men's Bible Class at the M. E. Church, Gettysburg, on Thursday night.

NEW WINDSOR.

Miss Donia Mullineaux, who has been in N. Carolina, for some time, has returned to her home, here. Mrs. Lillie Lindsay and son, have

returned from the hospital, in Balti-E. I. Stouffer and wife, entertained, on Thursday evening, in honor of Miss Loretta Ensor, of Kansas.

The Bible Conference closed at B. R. C., on Wednesday evening. Mrs. L. J. Stouffer entertained the Missionary Society, at her home, on

Wednesday evening.

Mrs. Knight, of Philadelphia, Pa.,
was a guest of J. W. Getty and wife,

Wesley Haines, who suffered an attack of vertigo, the first of the week,

Mrs. Josie Russell, of Baltimore, is sick, here, at the home of her mother.

Milton T. Haines and wife are now in St. Petersburg, Florida.

Miss Ivy Fowler, who has been off duty, for some weeks, resumed her teaching on Thursday. The snow drifts have caused the

milkmen a lot of extra work and inconvience. John Cross has returned from his Florida trip, where he purchased property, and with his family will move there in the near future.

Clarence Rodgers and family, will move to Ayden, N. Carolina, where he has secured employment with the Ayden Ice Co.

UNIONTOWN.

Mr. and Mrs. Rowen Erb, Rockville, visited relatives in town, on Sunday. Quite a number of cases of tonsilitis have developed the past week, in some cases whole families were af-

Rev. J. E. Lowe, whose illness was noted last week, improves slowly. Snader Devilbiss and daughter, Miss Blanche, and Mrs. E. Zollickoffer, attended the funeral of their cousin, Harry F. Devilbiss, near Westminster, on Tuesday.

The home property of the late Mrs. Annie Heltibridle was sold to her daughter, Miss Ella May Heltibridle, last week. Her friends are glad that she will remain in town.

Membership meeting of the M. P. Church will be held Thursday evening. Particulars given later.

EMMITSBURG.

Upton Austin, wife and daughters, Carmen and Charlotte, and son, Carl, called at the home of C. R. Cluts, on

Sunday evening.
T. C. Fox and wife, were Sunday evening visitors at the home of Jas. Kiser and wife.

C. R. Cluts and Carl Haines made a business trip to Frederick, on Wednesday.

Joseph Clabaugh, spent Tuesday at the home of his grand-parents, Joseph Clabaugh and wife, near Thurmont. Christian Endeavor, this Sunday evening, at 7:00 o'clock. A special program will be rendered. Mr. Merwyn Fuss will be one of the speakers. Everybody welcome.

HOBSON GROVE.

Miss Helen Stover visited Mrs. Luther Sentz and children, and Miss Gladys Bounds, last Saturday.

Jacob Sentz, visited Mr. and Mrs. Luther Sentz and family, last Sunday. Miss Gladys Bounds, spent the week end with Miss Lucille Pilchard.

Roland Koons and Miss Carrie Hahn, and Mr. and Mrs. Alfred Zol-lickoffer, spent last Sunday with Mr. and Mrs. J. A. Koons.

Mr. and Mrs. Luther Sentz and family, visited Mr. and Mrs. Bailey and family, Sunday evening.

Mrs. Eliza Koons, spent Monday afternoon with Mrs. J. A. Koons.

He Laughed.

It cost him a hundred to settle the bill When the doctor and nurses were done.

He laughed when his foreman urged greater care As he carelessly cleaned the machine.

The doctor remarked as he bound up the wound, "It's the very worst mangling I've seen."

He laughed when the doctor ordered him home, For a couple of days with a cold.

In a ward for consumptives he thinks of the past, It's too late now to help him, he's

He laughed when told that infection might come

From leaving a cut undressed. Tis said he looked natural as if asleep His headstone says he's "At Rest."

He laughed when told to go light on He said he would eat what he chose.

The funeral was large, the music was

On his grave was planted a rose. He laughed when a shopmate dug from his eye

A speck with a match, whittled They took off the bandages after six

weeks, He could see with one eye, it was found.

He laughed when they warned him to drive with due care,

And he struck a sixty mile clip. The judge fined him fifty, and gave him three months, He had broken only one hip.

He laughed when advised to insure his life, And said he would live forty years. His widow does washing to earn her

support And he might have saved her the tears.

Relic or Washington's

Found in Old Box Adderbury West, England-In an

old box of parchments purchased for a shilling T. J. Bennett has discovered the oldest connecting link between the ancestral family of George Washington and Sulgrave Manor, the Washington family home.

This is a deed bearing the signatures in plain handwriting of Laurence Washington and Robert Washington. Beneath each signature is attached a seal of the Washington family.

The deed is dated 1597 and relates to a transfer of land at Sulgrave. A deed at Sulgrave Manor house, hitherto thought to be the oldest, is dated 1599. Laurence Washington was the original Washington owner of Sulgrave Manor.

The collection of old parchments belonged to Bennett's late uncle. The old deed box was put up with other odds and ends for sale after the uncle died, and Bennett secured it for a shilling. Lord Lee of Fareham has given Mr. Bennett an opinion that it is of great value.

Bids Dime for Buggy; Drives Away With It

Cedar Rapids, Iowa-There will be at least one buggy on the newly paved highways of Iowa next spring, drawn by a horse that is known as "some stepper." Floyd Foss, who lives near Maynard, had a closing-out sale recently. Among the objects offered by the auctioneer was a four-wheeled buggy.

"What am I offered?" he cried. "One dime," roured some one in the crowd.

"To I hear any more bids?"
"You do not," replied the rowd in chorus

"Sold," shouted the auctioneer, pointing an accusing finger at a man in the crowd. The buyer paid his dime, hitched a goodlooking mare to the buggy and drove away.

MARRIED

FOX-COE.

Mr. George Fox, of Taneytown, Md, and Miss Grace Coe, of Union-town, Md., were married on Saturday, Jan. 28, 1928, at Emmanuel (Baust) Reformed Manse by Rev. S.

PITTINGER COOKSON.

Mary Elizabeth Cookson, daughter of Mr. and Mrs. Guy Cookson, Sr., and Norris H. Pittinger, son of Dr. and Mrs M. A. Pittinger, were married at the home of the bride, near Union-town, Wednesday evening, Feb. 1st., at 7 o'clock, by the bride's pastor, Rev. Karl Warehime.

Preceding the ceremony, Mrs. Karl Warehime sang "Oh Promise Me," accompanied by Miss Grace Cookson, who played the bridal chorus, from Lohengrin, as the bridal couple entered the room, attended by the bride's brother, Mr. Guy Cookson, Jr., and the groom's sister, Miss Miriam Pit-

tinger.
The bride was beautifully attired in Lake blue georgette, wore a silver wreath on her head and carried a shower bouquet of bride's roses and sweet peas. The bridesmaid wore old rose crepe and carried pink roses. The ring ceremony was used. The room was very tastefully decorated with ferns and potted plants. Immediately after the ceremony refresh-

ments were served to about 40 guests. The bride and groom left for a trip to Northern cities. Upon their return they will live in Union Bridge, where the groom is employed as agent for the P. R. R.

DIED.

Obituaries, poetry and resolutions, charge ed for at the rate of five cents per line. The regular death notices published free.

MRS. WM. F. FOWBLE.

Mrs. Annie F., wife of Mr. Wm. F. Fowble, near Woodbine, died Sunday afternoon, from paralysis, aged 71 years, 9 months, 2 day. She was the laughter of the late Mr. and Mrs. William Shoemaker, of Taneytown district, and died at the home of her daughter, Mrs. Howard Leatherwood, near Woodbine.

She leaves her husband, three daughters, Mrs. Robert Gosnell and Mrs. Howard Leatherwood, of Woodbine; Mrs. Sheeler Flohr, of Hood's Mill; one son Ernest Fowble; and one brother Oliver T. Shoemaker, Taneytown. The funeral was held from the home of her daughter, Mrs. Leatherwood, on Thursday, followed by interment in the Lutheran cemetery Tanevtown.

MRS. EVAN B. McKINSTRY. Elizabeth Englar McKinstry, wife of Evan B. McKinstry, died suddenly at her home at McKinstry, Monday, January 30, of heart failure, aged 73

years and 9 months. She had been a sufferer from heart attacks for the past six years and was as well as before the fatal attack came. She and her husband celebrated their golden wedding anniversary on December 11, last.

The deceased, with the exception of a few years spent in Westminster, was a life-long resident of the vicin-ity in which she died and a member of the M. E. Church.

Besides her husband, she is survived by one son, William, and two grand-daughters, Elizabeth and Joanna, all of McKinstry. A son, Joseph, and two grandsons, Evan and Edward, preceded her in death.

The funeral was held at the late home at 10:30 o'clock Thursday morning with interment in Mountain View tears. | cemetery, Union Bridge, her pastor, -The Tattler, Ansonia Clock Co. | Rev. C. H. Richmond, officiating.

GASES ONCE WASTED TURNED INTO MONEY

Industry and Public Benefited by Chemistry.

East Pittsburgh, Pa.-Modern chemistry is demonstrating that even odors can be turned into dollars and cents. Gases that have polluted the atmosphere are now being captured and converted into the liquids from which they originated, to the profit of both

industry and the public. Experts of the materials and process engineering department of the Westinghouse Electric and Manufacturing company decided that too many smells were going up the chimney in the process of treating insulation with resinous materials. So they trapped the gases as fast as they were generated, mixed them with water and then distilled this liquid, recovering from 80 to 90 per cent of the solvents

used in the formula. How far chemical engineers can go in eliminating and using fumes by liquefying them before they are discharged into the air has not yet been determined, but experiments now under way suggest that far-reaching results are possible. The saving already effected by the capture of used solvents is said to be considerable.

Chemists point out, however, that

recovery methods might be too well

perfected, for it is possible that some

of the agents recovered from gases would themselves be difficult to de-Seeks to Make Blend

of Light and Music Philadelphia.-A basic patent for an invention to blend light with music has been granted to Mrs. Mary Hallock Greenwalt. Mrs. Greenwalt has been conducting experiments in the been conducting experiments in the blending of light and sound for 27 Fromeroy. The letter described years. She believes that her patent is this crime as much worse than years. She believes that her patent is the first granted for a new means of

expressing human emotions in rhythmic form. While music is being rendered by singer, violinist, pianist or orchestra, Mrs. Greenwalt's apparatus floods the performer with lights of varying intensity. The fluctuations in light are intended to enhance the emotional and intellectual appeal of the music. The apparatus may be operated with a keyboard.

Mystery Blasts Being

study of music.

Studied by Scientists White Plains, N. Y .- Residents of northern Westchester county are searching to find a solution to the mysterious blast which rocked buildings and spread terror over several miles of the countryside. The heavy,

duli roar and the quiver of the earth kept the county police busy answering

telephone calls for hours. Similar blasts have occurred at intervals of exactly six months within the last two years. They always come at night. The ground was shaken and the noise of the explosion was heard, but on each occasion it was unaccompanied by any flare or light such as would have been the case had the explosion been due to powder or gasoline or other known explosions

that are set off by friction or heat. Scientists have been asked to study the terrain in the vicinity and ascertain if the blasts are being caused by some disturbance deep under the

dress snobbery.

Charged Cruel to Cat Boston.—Jesse Pomeroy, "lifer," who entered the state prison at Charleston a seventeen-year-old boy, nearly fifty-one years ago, is the plaintiff in a \$5,000 action in which he denies charges

that he has been cruel to animals while in prison. Pomeroy remains in his cell while two attorneys represent him before the Suffolk Supreme civil court.

The defendant is Alice Stone Blackwell of Dorchester, publisher of a magazine for women, who told the court that "she felt it a public duty to write a letter to a Loston newspaper in 1925 in opposition to a pardon for that of Leopold and Loeb and repeated a rumor that Pomeroy. when permitted the companionthip of a kitten, "had skinned it alive."

Counsel for Pemeroy told the court that the suit was brought to "spike a lie" and said that animals had been Pomeroy's only friends in prison.

American Pie Supreme

Pie is forever embowered among the cherished sentimental institutions of this republic. It had its origin here, as it has had its rise. She is forgotten long since, the matron who first designed a pie, but this newspaper has no least hesitancy in saying that she is as deserving of tribute as is Betsy Ross. It is true that there were pies in England, at the time the Colonists set sail, but never such pies as ours. They were heavy pastries of venison, pheasant and beef. and hence-although they loaned the name to ours-are not to be considered by us as constituting true pies. The pie, the valid and beloved pie, is as American as Mark Twain .- Portland Oregenian.

Fleas for Tolerance

in Small Community

"The hope of the small community lies in its escape from the ancient, respectable lies about life, and in facing intelligently its own moral and intellectual problems, even as it has faced its own practical problems. When buman beings think as clearly about their social organization as they do about their farm machinery, the day of drift to the thoughless cities will be over."

So said Joseph K. Hart, University of Wisconsin, addressing the rural department of the Wisconsin Teachers' association. He discussed the future of America's small communities.

"If our small communities could become centers of actual interest, people would not care to live elsewhere." he said.

"Community interest comes of actual conditions. There must be interesting people in the community and they must be doing interesting things. They must admit that other people, especially young people, have the right to interesting social life and recreation, for interesting civic activities and responsibilities, for interesting mental activities, for interesting physical pleasures and for interesting moral and spiritual adventures.

"There are those who say that economic injustice is destroying our small communities and there is some truth in the statement. But economic injustice will never be eliminated from a community whose inhabitants are lacking in human interest and interests."

Matters to Consider

in Establishing Home

The mental state of a family struggling to pay for a nome amid a constant flood of repair bills, replacement costs, not to mention decorating bills, fuel bills, and general upkeep bills, is not a happy one.

In building or buying a house be sure that it is a good substantial house.

Better a five-room home with some built-in furniture to double the service of each room and have it a wellbuilt home than an eight-room house which is continually calling for repairs.

Better a home that is well within your income, even if it doesn't put up such a pretentious appearance, than one which keeps all the family members scrimping and going without.

It is fun economizing to own your home. To a certain point you are imbued with a sense of thrift and proud of it. But don't pass the "comfort" point too far. You may get immured in the bog of disgust over the whole proposition and chuck it over before you have really given it a fair trial.

Making City Beautiful

If a town makes up its mind to produce, so far as it can, the City Beautiful-of course no town really is so extreme as that—there is no reason why it should not insist on its citizens making their gardens attractive with flowers rather than leaving

hem in a state of desolate neglect. It may possibly be that Blackpool has not forgotten the importance of making the town pleasant for visitors. But people who grow flowers at all. are likely soon to grow them for their own sake; indeed, a modern lawgiver might do more than insist upon universal flower-growing as a means not only of spreading beauty, but of hamanizing the growers. Thereafter the influence of the flower-growers might be brought to bear on many municipal problems. A city of flower-lovers and flower-growers would be a city of rebels against ugliness in all its many forms.-Manchester (Eng.) Guardian.

Structure's Probable Life

Determination of the average useful life practically to be expected for buildings of every principal type is the purpose of an investigation being made by the National Association of

Real Estate Boards. The work is being carried on at the request of the United States bureau of internal revenue. The bureau is seeking thus to obtain data which may be used in determining the rules to be followed in computing the depreciation and obsolescence of real estate improvements as allowed under the income-tax law.

Where Home Owner Counts

Generally there is little inclination to question the statement that the home owner is the best citizen. There are many reasons why he should be. Chief among them perhaps is the greater interest he naturally takes

in the affairs of his community. And just as he displays an interest in his city so may he be expected in an even larger proportion to evince the same interest in his home, in seeing that it is kept in repair, the grounds in order, the shrubbery trimmed, the whole ensemble a source of pride.

Fire-Resistant Garages

The built-in garage can be made fire esistant, and on every such job the ouilder should make sure that he is loing the work the right way.

CARRIES DEAD WIFE ON 30-MILE DRIVE

Frightened Mate Brings Body of Bride to Mother.

Ottawa, Ill.-With the body of his girl-bride on the automobile seat beside him a few evenings ago, Louis Groves of South Ottawa, stunned with fear and grief, sped to the home of his parents at Granville, 30 miles away. Time and again as the car would swing around curves on the road that led through Peru and Spring Valley the body would roll off to the fleor of the car. Without slackening the pace he would lift it back on the seat with his left hand, continuing to steer with his right.

Through the towns and villages through which he passed he narrowly missed running into pedestrians and vehicles, but he didn't even slow up. Only one thing was on his mind-to get to his mother as quickly as he could with his wife whom he was convinced had suffered some attack or stroke and was merely unconscious.

Townsfolk Suspicious. He didn't know his wife was dead and that for the next 24 hours the townspeople would hold suspicions that he might have been responsible for her death and that it would take

an autopsy and a coroner's jury to

free him of that suspicion. Late in summer Groves, who formerly lived with his mother at Granville, and Miss Julia Bell Hill of Seneca, Ill., were married and took up their residence at South Ottawa. where the groom was employed by a furniture firm. The bride, a beautiful young woman, had just passed her eighteenth birthday a week before the wedding. She was a June graduate of the high school in her home town The few months the couple lived in their cozy apartments was a real honeymoon, according to the neighbors.

A. few evenings ago Louis came home from the stere, ate supper with his wife, and then helped her with the dishes. He then went out to the ga rage to clean his car and was gone about twenty-five minutes.

When he returned to the house he found Mrs. Groves lying on the bed. He spoke to her and received no reply. Then he shook her gently and still there was no response. Her eyes were open but did not look at him. He became panic stricken. There was another family in the next apartmess but his first thought and impulse was to go to his mother's home. He grabbed his overcoat and threw it about his wife and carried her to the

car and was off for Granville. It was nearly eight c'clock when he left South Ottawa and nine when he reached Granville. He was bewildered when he staggered into his mother's home, bearing his wife in his arms. He thought she was only unconscious as her body was still warm. His fa ther immediately called a physician who pronounced her dead for more

than an hour and a half. The news of the woman's death quickly spread through Granville and many began to talk of suicide or mur der. There was no sign of violence on her body, although her dress be came soiled when she slipped down to the floor of the car. No evidence of acids or poison, but the story of such a sudden and mysterious death caused the state's attorney and coroner to take action.

Decide on Autopsy.

An autopsy was decided upon and this was held next day. Groves was questioned closely by the state's attorney, but stuck to his story. The autopsy, however, cleared the young man of suspicion, as the surgeon who performed it decided the young wom an died from natural causes. All vital organs of the body were found normal except the thymus gland, which was enlarged to the size of an ordinary hand, and its action, called stat us lymphaticus, had pressed down on the heart until that organ ceased to

function. The coroner's jury brought in a ver dict according to the finding of the surgeon who performed the autopsy The only doubt that was in their minds was why the husband did not call a South Ottawa physician instead of making the mad 30-mile drive to Granville. His own actions, when questioned, convinced the members that the finding of his wife, as he thought, unconscious, was such a shock to him that he was unable to art normally.

Baboons May Be Bred

for Domestic Servants London.-In case anyone should want a baboon to aid in certain household duties, such as dusting. sweeping and other simple tasks, it

would take only 20 years of scientific

breeding to render the animal sufficiently intelligent for this purpose. This is the theory of Prof. Frederick Alexander Lindemann, professor of experimental philosophy at Oxford, as quoted by the marquis of

Donegal, writing in the Sunday News. Regarding world progress in the next 50 years, Professor Lindemann believes that science will make the greatest strides on the physical and biological, rather than on the mechanical, side.

Car Peeved Him

East St. Louis, Ill.-Shades of departed horses had their inning when J. D. Emerson, becoming infuriated at his automobile, which stalled beat In the hood and radiator and was ar rested for disorderly conduct.

> SOMETHING TO THINK ABOUT By F. A. WALKER

CO-OPERATION

TT IS a common thing to regard the I forty years passed by the Children of Israel in their wanderings as so much punishment inflicted on them for their sins.

To take this view is to overlook the necessary past that that experience had, in turning them from a mob into an organized, co-operative nation

O. H. Mickel, in the Inland Printer, suggests as "the truth about Moses" that the great lawgiver did not lead the Children of Israel "out of the wilderness.' On the contrary, he kept them "in

the wildnerness," for the wilderness was what they needed. The Israelites had been softened by a long period of Egyptian servitude.

ing to make bricks without straw and all sorts of indignities. If they had been led straight to the Land of Canaan, they would have had to face the Ammonites, the Hittites and a dozen other well-disciplined and warlike tribes, prepared to defend their land flowing with milk and

Their spirits had been broken by hav-

honey, with all the resources of their civilization. By the time that Joshua took over the direction of affairs from Moses, a great change had taken place. The people had been made strong by a strenuous environment of mountains and deserts by proofs of Divine favor

and direction. The generation that had known the brickvards, the fleshpots and the idols of Egypt had passed away. In its place was a hardy army of men who had learned how to fight, who were a match for the Canaanites and were ready for the fulfillment of their

destiny. But not only were they fit to conquer the promised land, they were also fit to establish a strong centralized government with definite tribal rights, when they had taken posses-

forty years in the wilderness that they received the Mosaic code, which put them in a position of superiority to all the other people in that part of the world. It is no wonder that throughout the following centuries the recollection of

For it was in the course of the

minds of the rulers, the prophets and the poets of the nation. In all this there is a lesson for the rest of the world. There is no short cut to any promised land for indi-

those forty years was never out of the

viduals or for the nation. Every man and every nation destined to amount to anything must go through the wilderness. That is the only way that they can be made fit for what is before them. Above all that is the way co-operation is

learned. (@ by McClure Newspaper Syndicate.)

"It isn't the broad highways that lead to destruction," says Flivvering Felice, "it's the detours."

And It Really Seemed Such a Nice Scandal

A conversation between two women, one of whom was hard of hearing, interested the passengers of a Glen-

wood avenue car. "I saw her on a street downtown with a man."

"Is that so?" "Yes, and it was after ten o'clock, too."

"The very idea." "I never suspected her of flirting

"No, nor me, either."

"But you never can tell." "Ain't it the truth?"

"It is that." "Do you know her husband?" "No, I ain't never seen him close."

"Well, he is a big, fat man." "Does he wear a brown suit?"

"Yes." "Glasses?"

"Yes." "Smoke a pipe?"

"Uh, huh!"

There was deepest disappointment in the woman's voice as she exclaimed:

"Fiddlesticks! Then it was only her husband after all."-Youngstown Telegram.

Why British Clothiers Seldom Amass Money

Father may think he wears his clothes a long time, but they wear 'em longer in Britain. A Stamford septuagenarian each morning dons a coat that was worn by his father after his grandfather had used it for a couple of decades. It still has the original buttons and, according to Tit-Bits, looks good for another 20 years on top of its 100.

Of four other veterans in a rural parish, one is wearing a fifty-year-old suit, another continues to brush an overcoat he has worn for 30 winters. The third says his twenty-five-yearold top coat is not very shabby, and the fourth says he didn't really begin to like his waistcoat until he had worn it for 40 social seasons.

Oh, yes. There is one woman, the wife of a farmhand, who admits she bought her best costume 15 years ago and still wears it to meeting.

Physicians for the Well

Physicians were originally trained to treat the sick. Until recently, they have not had a primary interest in the well. It is now increasingly easy to find a physician who is interested in his patient, who is desirous of keeping him well, who is competent to carry out a thorough examination, and who is able and willing to give constructive hygienic advice. More and more the medical profession is realizing that there is a tremendous field for medical service in this private practice of preventive medicine. Most individuals can with advantage be advised ho to work wisely, how to play safely, how to live happier lives in a hygienically constructive manner, with the logical sequence of a fuller life with greater duration—a longer life and a merrier one.-Dr. Donald B. Armstrong in the North American

Rather Spoiled Effect

Johnnie is the son of a well-known business man who lives in Logan. Sunday afternoon Johnnie's parents had company for dinner. Jack, as Johnnie is sometimes called is almost six years old. Now Johnnie's parents, true to nature, are proud of their son and his ability. At the dinner table the little boy was asked to say grace. In a quiet manner Johnnie complied with the request. With bowed head he said the prayer perfectly. When he had finished his aunt - very religiously inclined praised him. "John, that was fine," she said. "You didn't make even one little mistake." With a wild gesture of his arm, Johnnie remarked: "And I said the whole darn thing, too."-Philadelphia Record.

Natural Washtub

There is a hot spring known as "Handkerchief Pool" located in the Black Sand basin at Old Faithful Geyser formation. The spring is a round pool with a deep hole in the center, from which bubbles are constantly arising. A handkerchief placed in this pool will be drawn under by the action of the water and several minutes later will be forced upward by the bubbles. It comes out clean. The pool has a circular current, which works around in circles, causing this peculiar phenomenon. The pool has many amusing legends connected with it and is one of the most widely visited places in Yellowstone park.

Truth Too Startling

Were writers of fiction to put incidents from real life into their works, most of the stories would be so fantastic that they would not be believed. declares Rita Weiman, well-known author, in an article in Liberty. "Truth is too strange for fiction!" the writer asserts. "The adventures of human experience are almost invariably too amazing, too shocking, too horrible, too apparently exaggerated to be transcribed exactly as they meet us. In sharp black type on any printed page but that of a newspaper, they would appear absurd, the wildest stretch of the imagination."

It Can't Be Spoiled

Palm Beach, in spite of the funny people who go there, is the loveliest resort in the western world.-Woman's Home Companion.

Control of Dirigible

Simple but Effective When I say Lincoln Beachey was running the dirigibles I mean it literally. The dirigibles of those days (1911) were about 40 feet long and their envelopes contained 20,000 cubic feet of hydrogen gas. They looked

like cigars—and lasted about as long. There was a lift of only 80 pounds to every 1,000 feet of hydrogen and this compelled us to construct the un-

der carriage of bamboo. This bamboo work was in the form of a steamer gangplank with a railing on either side. The motive power was furnished by an ordinary motorcycle engine situated in the center of the gangplank.

Beachey was the sole occupant of the dirigible, being engineer, crew, navigator and captain. He could not help being at least a captain, because that title was conferred on any man the minute he put a foot in a balloon basket.

Beachey controlled the antics of his dirigible by his activities on the 30foot gangplank. When he wanted to fly on the level he stayed in the center, hugging the engine. When he wanted to go up he ran backward on the gangplank, and when he desired to come down to earth he scooted forward until his weight caused the nose of the dirigible to droop. He weighed only 135 pounds, but couldn't shake toe without causing his oiled-silk hippo to respond with a wiggle and a shiver.—William Hickman Pickens in the Saturday Evening Post.

Restaurant Seen as

Divorce-Court Ally In an address before the National Restaurant association Mrs. Christine Frederick said that if the way to a man's heart is through his stomach it follows that whoever caters most closely to his appetite will have a chief hold on his affections-and consequently, as most women hate to cook, the restaurant is an ally of the

divorce court. Wives will hold the affection of their husbands by good cooking, but they have ceased to be cooks and be-

come tinsmiths. Yes, indeed, it discourages a man to come home and find that he is expected to eat a lot of cold stuff from the delicatessen shop instead of good hot roast beef with the fixings, and thus is discontent started in a nice happy home-and court actions follow. -Brooklyn Standard Union.

African Romance

There is a strange romance connected with the discovery of diamond deposits at the mouth of the Orange river. The field was discovered by the late F. C. Cornell, traveler, explorer and big game shot.

Although his discovery was not apparently known in South Africa, it now transpires that as far back as 1921 Mr. Cornell, when on a visit to London, confided to a friend that he had come upon the most extraordinary wealth of diamonds, and pointed out in the strictest confidence to the position on the map.

One of the objects of his journey to Europe was to arrange for the marketing of the stones. He had wealth almost beyond the imagination of avarice within his reach when he was killed by a motor accident at the Marble arch in London in March, 1921,

All He Wanted

With high hopes the commercial traveler called on a tradesman. They had never done business before, but a friend had supplied the introduc-

"May I show you my samples?" asked the traveler.

"Certainly," answered the merchant, and watched his visitor produce a surprisingly large selection of various articles from an insignificant bag. The traveler pointed out their merits and

"Well, there's only one thing I want," said the dealer.

"Yes, sir," he cried, "and what is

"I want to see how you're going to get all those samples back into that bag," was the astounding answer.

"Pearl Shower" Only Eggs

A reported "shower of pearls" near Secunderabad, India, recently, caused a rush to the spot where they fell. Following a heavy rainstorm a native discovered the ground covered with white globules, ranging in size from that of a nut to a mustard seed. Thou sands flocked to the field in autos, on bicycles and on foot, and gathered the "pearls" by the handful. Police authorities investigated and found that the "pearls" were eggs resembling the genuine article. Many who had collected the eggs are still keeping them, refusing to believe that they are not pearls. The man who discovered them sent a bagful to the authorities at Hyderbad, and demanded payment for the "pearls."

"Sea Desert"

In the south Pacific ocean has just been discovered the most desolate spot in the world. According to Dr. Austin H. Clark, who helped chart it for the Smithsonian institution, the place is devoid of any kind of life either in the surface waves or at the bottom, says Popular Science Monthly. No region on land is comparable

with its lifelessness. Ear bones of whales and teeth of sharks on the red clay bottom are the only remains of sea monsters that strayed into the "sea desert" and per

JUSTICE AT LAST

It was the usual domestic storm. Oh, dear! oh, dear!" moaned wifey in tears. "I wish I'd taken poor mother's advice, and never married you!"

Hubby, the strong, silent man, swung round on her quickly, and at last found voice.

"Did your mother try to stop your marrying me?" he demanded. Wifey nodded violently.

A look of deep remorse crossed hubby's face.

"Great Scott," he cried in broken tones, "how I wronged that woman?"

Set

Sam sat on the sunny side of the tree with the perspiration running down his face, says the Christian Register. "Boy, why don't you-all seat yo'self on de shade side?" his friend asked him.

"Dat's all you know 'bout nature," replied Sam scornfully. "By'm-by de sun's going to be on dat side and den Ah won't hab to move."-Boston Transcript.

Indiana Town Proud

of Art Development

Richmond, a small city in southeastern Indiana, is an example for other cities because of its development of art.

Richmond is the only city in the United States to boast of a real community art gallery, free to the people, which receives annual support from the department of education and which is an actual part of its educational plans and equipment. The Richmond Art association, which made this possible, had its thirtyfirst anniversary a short time ago. Through its efforts the public schools have a broad art course with a supervisor and nine special teachers. Student art leagues have been formed for special study in the junior and senior high schools. Saturday morning classes are held for talented children and both drawing and painting classes for adults.

These influences, added to the fine exhibits held annually in the gallery, have produced a group of 30 painters whose work is hung in the annual exhibits by Richmond painters

and in important exhibits elsewhere. The art movement in Richmond began in 1897 when Mrs. Melville F. Johnston secured the use of the school building for free educational art exhibits. Fourteen years later she established the present gallery in the high school, rooms being specially built for this purpose. A circuit of exhibits was at first secured and excellent works were loaned by collectors in all the large cities. From this start official support was soon secured and the city occupies an enviable place among its sister cities.-Anna Steese Richardson in the Woman's Home Companion.

Seeking All Methods

of Civic Improvement

Eighteen Wisconsin cities are no longer satisfied to boast of having the "finest town in the state"; they are now conducting investigations to ascertain just how they measure up with other cities and with minimum stand ards established by authorities in all the phases of civic life, including education, industry, municipal government, recreation, city planning, social work, library, town and country relations and religion.

This information is from Aubrey Williams, Madison, general secretary of the Wisconsin conference of social work, under whose guidance and leadership the investigations are conducted.

The survey is not, Mr. Williams explains, made by "imported experts" but by citizens of the community who wish to find out for themselves in just what ways their city excels, and just what it needs to make it a better "home town."

Transplanting Trees

The owner of a new home not blessed with shade trees need not wait the passing of slow years if he is willing to expend the not inconsiderable sum necessary to transplant ready grown shade trees. However, the difference between a treeless lot with a house on it and an embowered home

is really worth considerable outlay. To prepare a large tree for removal a deep trench should be dug around it from 5 to 7 feet from the base and worked under so as to enable all the smaller roots to be cut off without injury to the bole. The ends of the roots should be cut smooth and the tree carefully undermined with a pick care being taken to remove the soil with as little injury as possible to the young fibers. The tree should then be drawn over until the tap root can be cut. Bagging should be used to wrap the ball of earth and roots, which can then be loaded on a stone wagon.

Check on Contractors

One large producer of suburban homes in Long Island, adjacent to New York, uses a novel method of guaranteeing good construction in his houses.

After plans are approved construction progress pictures are taken of every step in the erection of the houses. These become an integral part of the deed when the ultimate purchaser takes possession. They form a chronological sequence of the types of materials used; the time needed to complete various operations; the state of the weather which prevailed day by day during the construction period.

By this "foolproof" method, the builder claims, the owner is enabled to directly trace any imperfection of building which may crop up and to assign the job of making it good to the particular sub-contractor who performed the faulty work.

Town's Patience Ended

North Wales (Pa.) residents enthusiastically indorsed the action of their town council in framing an ordinance to penalize owners of "vacant lots" which become eyesores be cause of weeds.

It was declared that virtually all such properties were owned by persons who lived out of town, and repeated efforts to bring about 'mprovement through appealing to pride resulted in failure.

SHE WAS NO LABOR SAVER | Da Vinci's Genius Not

On a hot day a vacationist was eating in a stuffy little wayside restaurant. There were no screens in the window or the door. The proprietress herself waited on customers and shooed flies from the table at the same time.

"Worldn't it be better to have the window and the door screened?" ventured the vacationist.

"Well, yes, I s'pose it would help some," returned the woman, "but 'twould look mighty lazy like."-Boston Transcript.

HOW MUCH IS LEFT?

Would you marry a man who sim ply throws his money away?" "Oh, I don't know! Has he got any money left?"

Seemed a Shame

An artist was making a water-color

sketch in the park. Two urchins stood behind him, and watched quietly for a while. Then, quite suddenly, one said to the other, in tones of wistful regret:

"George, just fancy, a little time ago that was a lovely piece of white paper."

A Seasonable Variant

In a certain public institution the air was not exactly suggestive of attar of roses.

"Pretty stuffy in here, isn't it?" said a visitor to the attendant in charge.

"You find it warm?" "It isn't the heat, it's the humanity," was the quiet reply.

Inheritance

Said the flapper, after she had introduced her new boy friend to her parents: "What side of the family

do you think I take after?" "Well, you have your father's eyes, nose and mouth," the B. F. replied, "but you get your legs from your mether."-Country Gentleman.

ing you say so at the time. Sophisticated

She-You can't make me believe you've never kissed another woman. He-I know it-you've had too much experience.

Always at Command While Michelangelo, at times even in ler the same roof, was covering enormous walls with the colossi of his imagination, giving them their ultimate form and leaving them thus to glitter or pale through the centuries, Leonardo da Vinci was the essayist, the relativist, a tester and a player. He declined to paint alfresco or in tempera, since he could not interrupt such work for "the subtlest reflec-

tions," as he called them. For when he painted he must be able to abandon the oil picture suddenly whenever he felt a change of mood and desire to study some aspect of nature elsewhere. From a cloister near Florence, which had ordered a Madonna of him and had been waiting several months for its completion, an ecclesiastic writes: "He is applying himself passionately to geometry, but he can't say a good word for the brush.

Once—by the report of a Milanese who saw him busy on the "Last Supper"-he painted the whole day, beginning at sunrise and standing on his scaffold without food or drink. Then again he would not appear for days, or he would sit before the canvas for a couple of hours, silent and meditative, and then would leave again. Or he came into the church at midday after a ride on horseback. heated and excited, touched one of the figures with two strokes of his brush, and vanished.—From "Genius and Character," by Emil Ludwig.

Eye Exercise Should

Be Regular Routine

"People would have less trouble with their eyes if they would only realize that their eyes need exercise as much as the rest of the body," declared a beauty specialist recently. Daily eye drill should be as much a

habit as daily toothbrush drill. "It is a good thing to prepare for the exercise by trying to express happiness in the eyes. This is a good mental suggestion, as it puts the mina

in a pleasant mood. "Here are suitable exercises. Keep the head still and roll the eyes as far upward as possible, then as far downward. It is essential that this and the two other movements should becarried out slowly and without the

slightest suspicion of jerkiness. "Next, keeping the head still, look to the right and then to the left. Finally roll the eyes slowly in a righthand direction, then to the left. Each exercise should be carried out five times

at first, and the number gradually increased to ten. "The exercise should be completed by an eye-bath, which in itself is a refreshment and tonic to tired eyes. The best bath for the eyes is a solution of boric acid and water, but some people prefer weak cold tea. A plain

water bath is better than none at all."

Keeping Order in China Prof. E. T. Williams says: "While heoretically the police powers of the whole country are exercised by the minister of the interior at Peking, in realilty, except in some of the principal cities the peace is maintained through the village elders and the system of mutual responsibility.

On the whole the method of holding the neighbors responsible for one another's conduct and the elders responsible for the village tends to check serious offenses. On the other hand, if the general sentiment is opposed to any regulation, such as that forbidding opium smoking, the probabilities are that the neighbors will shield one another. The responsibility for the ti-pao, as the principal elder, for the good order of the whole village makes his office anything but a sinecure.

Ancient "Rip Van Winkles"

A general parallel to Rip Van Winkle is found in Epimenides, who, according to legend. lived in the isle of Crete six centuries before the Christian era. Going, by his father's orders, in search of a sheep, the story is that he laid down in a cave and slept for fifty years. Awakening, bereturned to his people, with long hair and flowing beard, the difference between Rip and Epimenides being that the latter, during his protracted slumbers, had absorbed a marvelous measure of knowledge. The German legend on which Washington Irving'sstory is founded has as its central character one Peter Klaus, a goatherd of Sittendorf, with the scene laid in the Kyffhauser.

Odd Garden Adornments

Down on the New Jersey coast in a little village close to the sea there isa garden that-instead of the conventional sundial, bird-bath and statueboasts figure-heads from ships of long ago. These picturesque relics are set with careful consideration and pride where they may be seen to the best advantage.

Among them are a Norse goddess in gold, blue and red, a majestic figure of Neptune with trident intact, and a swarthy king or prince. The man who owns this unusual garden was at one time the captain of a sailing ship that visited many a far-off port.

Word to Game Hogs

We are the supreme egoists and monopolists of creation. We go out and murder millions of our kind with. scientific inventions yet we call a tiger bad because it occasionally kills thewo-legged barbarian who hunts it .-American Magazine.

Lesson for February 5

JESUS MISUNDERSTOOD AND OP-POSED.

LESSON TEXT-Mark 3:19-35; 6:1-6. GOLDEN TEXT—mark 3.13-33, 6.1-6.
GOLDEN TEXT—He came unto his
own and his own received him not, but
as many as received him to them gave
he power to become the sons of God,
even to them that believe on his name.
PRIMARY TOPIC—Friends Misun-

JUNIOR TOPIC-Friends Misunder-

stand Jesus.
INTERMEDIATE AND SENIOR TOP-IC—Facing Unavoidable Opposition.
YOUNG PEOPLE AND ADULT TOP-IC—The Misunderstood Jesus.

I. Jesus Misunderstood by His Friends (3:19-21).

1. The occasion (vv. 19, 20). A series of important events in the ministry of Jesus had followed each other in rapid succession. The twelve had been chosen, and He with His disciples had just returned from a trip of preaching and healing in Galilee. Such great interest was aroused that though Jesus was weary and hungry He did not have time to eat.

2. What His friends purposed to do (v. 21). They went out to lay hold on Him. They saw Him giving Himself with absolute abandon to His work so they attempted to rescue Him forcibly by taking Him from His

3. What they said (v. 21). "He is beside himself." His passionate devotion to saving the lost seemed to them a kind of insanity.

II. Jesus Opposed by the Scribes (vv. 22-30).

1. Their charge (v. 22). They charged Him with casting out demons by Beelzebub, According to Matthew 12:22-24, the Pharisees joined the scribes in this charge. The occasion which provoked the charge was the healing of a man possessed with a demon. Unable to explain His un wearying service for needy men by attributing His zeal to religious frenzy they accused Him of being in lengue with the devil.

2. Christ's reply (vv. 23-27). He exposed their folly by a question and by parables.

(1) "How can Satan cast out Satan?" If after Satan gets control of a man he should voluntarily relinquish that hold he would thus become his own enemy. In view of the nature of the devil, this is unthink

(2) "If a kingdom be divided against itself that kingdom cannot stand (v. 24). Civil war is national suicide. A living example of this folly is seen in China today.

(3) If a house be divided against itself, that house cannot stand (v. 25). House here means family. The family that wars against itself will

surely perish. (4) No man can enter into a strong cept he first bind the strong man (v. 27). Satan here is the strong man, the house is the world, the goods of the house are the human beings whose welfare and happiness Satan is seeking to destroy.

3. Christ's charge (vv. 28-30). Since He was doing the works of God (for before their very eyes He had driven the demon from the man) He was undoing the works of the devil. He went about doing good. Wherever He went men were blessed. The eyes of the blind were opened deaf ears were unstepped, the lame were made to walk and the dead were raised. Having with unanswerable logic met their accusations He charged home upon them most awful guilt, that of blasphemy against the Holy Ghost. Blasphemy against the Holy Ghost is attributing the works of the Spirit to the devil. For this great sin there is no pardon.

Family (vv. 31-35) His brothers and mother came with the object of getting Him home because they thought He had lost His reason. Of course His brothers did not believe on Him as the Messiah but their filial interest moved them to try to get Him home. No doubt this was most painful to Jesus. Their motive may have been right, but they were used of the devil to hinder Him IV. Jesus Misunderstood by His Fel-

III. Jesus Misunderstood by His

low Townsmen (6:1-6). The citizens of Nazareth were unable to question the reality of Christ's work and the power of His words. but because He was one of them they were offended at Him. This is a marvelous example of the blighting effects of prejudice. Because of this attitude of soul on the part of the

Vanity

people His wonder working was very

limited among them. And He marveled

because of their unbelief.

Vanity of vanities saith the preacher; all is vanity. And moreover, because the preacher was wise, he still taught the people knowledge; yea, he gave good heed, and sought out, and set in order many proverbs.-Ecclesiastes 12:8-9.

Life

Life is not a man's personal property, it is a loan from the Almighty for which he is responsible.-F. B.

Improved Uniform International | Greed for Autographs

Has Inspired Forgers Autograph collecting, that desire to possess something of greatness even though it be no more than its signature, has enthralled many since ancient times. An Egyptian Pharaoh paid high prices to the Greeks for autographs of the Sophocles, Euripides and others of their roted countrymen. These autographs, however, were mostly of marks and seals.

The collection of written signatures seems to have originated in Germany and the Low Countries in 1554, when students began carrying pocket volumes for signed sentimental expressions of their friends. Some of these are in the British nuseum along with others almost priceless, such as the signature of Shakespeare. Rivalries of collectors and the high prices paid have encouraged forgeries.

That perpetrated in the middle of the Nineteenth century by W. H. Ireland is among the most famous. He got up a whole series of letters purporting to be by Shelley and Byron. complete even to postmarks and seals. Some years ago a certain Vrain Lucas succeeded in selling a collection of 27,000 pieces, among them letters of Mahomet to the king of the Franks. Alexander the Great to Aristotle. Judas Iscariot to Mary Magdalene. and others, written in French on French paper and bearing a fleur-delys watermark. Needless to add, it was not long before the fraud was discovered.—The Kansas City Times.

Lesson in Neatness

Calculated to Last

"Hey! Pick up that cloth you used in wiping your shoes!" commanded sister of brother early the other eve-

"O, don't bother me. I'll be back later," he said as he hurried out of the house.

Time passed. Quite a bit of time passed ere he came home, and in the early hours of the morning he stumbled up the steps to the front door. A key was slipped into a keyhole; a door swung open silently; and just as silently he entered. He almost tost his balance when a rug managed to ness not known before. And the ho place itself in his way. He decided that he just would have to see where he was going, and thereupon did he turn on the lights in the reception

There before him was a sign with the words: "A Big Surprise" and an arrow pointing the way up a flight of stairs. When he got to the top of the staircase another arrow pointed down

Upstairs and down, through rooms and halls, and finally an arrow pointed to the kitchen. He entered the kitchen and an arrow pointed to a closet. He opened the door to find the last sign of all: "Now, will you please pick up the cloth you used?" He did.-Springfield Union.

Jet Universal Ornament

There was a time when every woman in England wore Whitby jet. Not to have worn Whitby jet would have seemed like an insult to Queen Victoria, says the London Express.

The jet was carved into ingenious brooches, it was made into bracelets, into beads, and impressive ornaments like necklaces of black diamonds rose. and fell on Victorian bosoms. Gowns were heavily embroidered with jet "bugles."

Such garments (seen occasionally nowadays on the bodies of theatrical landladies) were like a standard work on British respectability. How our fathers dated to make love to women who bristled and tinkled forbiddingly in jet, is a subject for some future

Ants as Nurses While engaged in studying ant hills near Baltimore, Prof. Andrews of Johns Hopkins university discovered that ants sometimes move their babies from the colder to the warmer sides of the ant hills. Thrusting thermometers into the sides of the ant houses, he found that the inside was warmer than the outside air; and, since the sun was the only heatng plant, the southern sides of the nills were warmer than the northern. Twice he watched processions of ants carrying unhatched infants from a northern to a southern side. Apparently insect parents know the value of warmth and sunshine for children.-Popular Science Monthly.

Use for the Mind

There is a certain use to which we might put the mind more often. We might use our minds to convince ourselves of our well-being instead of using our minds so much of the time to convince ourselves that we are in an unfortunate state. We get the idea that we are very tired-not because we are really worn out, but because we convince ourselves that we are. We rather like the martyrdom of weariness. In the mind we decide we are tired. Another attitude might convince us that we are still pretty fresh.-Grove Patterson in the Mobile

More Study Given by Architects to Color

Increasingly beautiful American cities are foreseen by Harry Boehm, a well-known New York architect, as a result of the greater attention given by architects to the effects of local atmospheric conditions on sunlight and color.

A material which may look well enough in one city may be a drab failure in another, Boehm points out, solely because of the almost imperceptible difference in the quality of the sunlight. This, he explains, is not necessarily caused by such obvious factors as smoke, or dust. It may result from the far more subtle conditions of atmospheric moisture, or density, changing the spectral composition of the light.

"These conditions, however, need no longer hamper the property owner or architect," Mr. Boehm asserts. "Building materials today offer a color range amply wide, and with sufficiently delicate distinctions of shade, to satisfy any needs. It is simply up to the designer to choose wisely, and as a general rule, he is doing so, today.

"He must know that color, as we see it, is reflected light. Certain pig ments absorb certain portions of the light which falls upon them, and reflect other portions. No material car appear to have a color which is no a part of the light in which it i viewed. As the light changes in qual ity, the color of the material seen

Small Town Hotels

Meet New Conditions

Improved highways and motor-car tourists have brought a new day to the hotels in smaller cities and towns and developed opportunities for busitels have moved promptly to meet the new condition. Changes and improvements have been made quickly. One may stop with entire confidence in most places today when touring, find a tidy room, a good bed, a bath and appetizing food, in any small town hotel near any of the principal high-

One finds these improvements well developed along the older tourist highways and finds progress completed or in evidence along the newer highways. These small hotel people have been wise. They have not built too largely, but they have built-well. They understand how certainly the tourist longs for a bath after a day of travel, how a neat exterior makes the hotel inviting, how a clean and comfortable room is welcomed, and they have made abundant preparations to satisfy the appetite sharpened by the day's ride in the open air.-Ohio State Journal.

Municipal Progress

Examples of civic enterprise have been and are being furnished abundance. There was an example in the city of Dallas, to vote on a bond issue of \$24,000,000, the equivalent, in view of the city's size, of a \$50,000,000 issue in Kansas City There were the examples of Detroit, St. Louis and numerous other centers which either have definitely launched or are far advanced on big improvement pro-

The lesson of this kind of situation cannot be ignored. It affords a test for every city in the country It is coming to be the standard by which municipal progress is measured. The city that hesitates, delays and allows itself to become known as a laggard now soon will be hopelessly out of the competition for more poputo be invested in new enterprises of a varied kind. No other large center needs more to learn the lesson just now than Kansas City.-Kansas City

Home Pays Dividends

Aside from the sentimental satisfac tion which a family feels, there are many other reasons' why a home should be owned. Aside from being best legacy a man can leave, it will provide shelter when earnings are missing, promote systematic saving and present an ever present incentive to abolish waste. It will pay dividend for a lifetime. These dividends will be increased when the home is clear and rent money can be saved, with

Keep the Tramps Out

A plan that will keep the tramps out of town is worth more than any scheme for taking care of them after they get there. An arrangement for putting them to work seems desirable from two viewpoints. It would prob ably keep many out and it would also provide a means of handling any that drifted in despite the reputation of the town for putting vagabonds to work -Anniston (Ala.) Star.

When Surface Needs Paint

Generally by observation of the paint the condition can be determined If this is not manifest, rub your finger over the surface and if it shows any sign of chalking or if cracking or scaling have begun, reprinting should be done at once.

Nothing Really New

in Form of Disease That the ills of the ancients were was made clear recently by Sir Humphrey Davy Rolleson in an address to the British Medical association. The difference, he said, was that they diagnosed them less accurately, and gave them different names.

Tuberculosis had been identified in the Egyptian mummies, and was very prevalent in ancient Greece. Mumps appeared to be one of the few acute infectious diseases accurately isolated in ancient Greece. Bubonic plague was undoubtedly a disease of established antiquity. The pestilence which attacked the Philistines after their capture of the ark was thought to have been plague. Those who did not die were advised to make offerings of five golden representations of their tumors and of five golden mice. The appearance of plague had been recognized in the Third century B. C. In Egypt, Libya and Syria malaria was proved to have been very prevalent, in Greece from the Fourth century B. C., and in Italy from about 200 B. C.

One investigator had come to the conclusion that six of the twenty-four sultans from 1299 to 1695 were victims of arthritis. Much able argument had been brought to prove that the sweat ing sickness was really influenza, add ed Sir Humphrey Rolleson. Appendicitis existed long before it was "baptized" in 1886, and Sir Humphrey re ferred to descriptions of cases as far back as 1684 for its widespread and frequent incidence.

Set Little Brother

in the Straight Path

A young Washingtonian gave an exemplification of a different sort of Christianity recently-one that was reminiscent of religion as it used to be applied. Perhaps the youth of nations was no different from the youth of a man. I believe there is a theory to that effect.

Anyway, this small boy was left in charge of his smaller brother while his parents went to the theater. When they came home they discovered a tear-stained Jimmie in bed and a sorrowful Bobby watching over him. "Why, Beb," asked the mother.

'what is the matter?" "I hit Jimmie," replied Robert.
"You hit Jimmie!" cried the horri-

fied mother. "Yes, and, I kicked him, too," truth-

fully replied Bobbie. "W.y. what or earth did brother do?" the mother asked.

Bobbie looked very righteeus. "He wouldn't say his prayers. But I made him."-Washington Star.

Prize for Smithsonian

What is claimed to be the largest topaz stone in the world is part of the Canfield collection recently given to the Smithsonian institution. It weighs 95 pounds. Although the word "topaz" appears many times in English translations of the Bible, says Pathfinder Magazine, it is now believed that this gem stone was unknown to the ancients. The stone referred to in the Scriptures as the topaz was probable the mineral known as chrysolite or peridot. It is alluded to as occurring on an island in the Red sea, which confirms the modern theory.

When pure the topaz may be colorless and is often mistake., for diamond. It also is about the same specific gravity as diamond, namely about 3.5. But it is greatly inferior to the diamond in hardness. The brown topaz stones from Siberia frequently become somewhat bleached by exposure to the sunlight.

Correctness First!

There came a peremptory knock at the door, and into the editor's private sanctum walked a very angry man. "You are the editor of Welch Warbler?" he snapped. "Yes."

"My name is Morgan T. David. Yesterday your paper printed an article about me. You called me a thief, a robber, a blackleg and a lot of other things.' "We did," said the editor.

"Well, sir, I'm here to tell you, by not H. If you can't spell my name correctly have the goodness to leave

As She Saw the Damage They say that once the antiqu

craze gets hold of one, he can't think lucidly of anything else. The follow ing incident is said to have occurred in Newburyport:

"Oh, Henry, I've dropped the water pitcher out of the window on a man's

Henry (turning pale) -Great Scott. Jane! You don't know what damage you may have caused!

Jane (in tears)-Indeed 1 do! It was that china antique I paid \$32 for and I just know I can never replace it! What, oh, what shall I do?-Bos-

Talked "Upside Down" Bridget had been in the United States only a short time when Mrs. Brown employed her.

A few days after her arrival in the Brown hor e little Mary said: "Mother, why don't we have a cook who can

"What do you mean, deir?" asked

her mother. "Why, mother," replied Mary, "Bridget talks upside down and I cannot understand anything she says,"

TANEYTOWN LOCALS

Items of news from town, or vicinity are always wanted for this column. Especialty accidents, sales of real estate, fires, important happenings, visits to or from the community social events, and all matters of general interest to those at home, and away from home.

Mrs. A. H. Bankard, of near town, is very ill, at this writing.

Mrs. T. M. Buffington, visited relatives in Hanover, on Wednesday.

The Eugene Foreman family removed to Frederick, on Thursday.

Mrs. Guy P. Bready is spending this week with friends at Walkers-

Bobby, son of Mr. and Mrs. John Sarbaugh, is confined to bed with a bad case of lagrippe.

William E. Martin, of Hagerstown, and family, on Tuesday.

son, Ross, visited Mr. Brown's mother in Hanover, on Tuesday.

night, did not arrive until about midnight, due to snow drifts.

The Mite Society of Trinity Lutheran Church, held their semi-annual social, on Thursday evening.

General Knight, 2:121/4, owned by Crawford Stables, has been sold to T. L. Kaltrider, at Red Lion, Pa.

folks at Thurmont, on Saturday.

Mr. and Mrs. Harry Devilbiss, of Hanover, visited Mrs. Jesse Myers Ralph Parker. and family, on Sunday afternoon.

Mr. and Mrs. M. C. Fuss and daughters, spent Tuesday evening with Mr. and Mrs. John Marker, at Littlestown.

Miss Isabel S. Shaw, a nurse of the University Hospital, Baltimore, has returned, after spending some time at her home.

Rev. and Mrs. Walter Weybright, of Oakland, Md., are visiting the latter's parents, Mr. and Mrs. Wm. Hockensmith.

There will be a movie in Shriner's Theatre for the benefit of the Library on Feb. 14. The picture will be announced later.

Dr. John Brubaker, of Altoona, Pa., spent Wednesday with his sister, Mrs. Ida B. Koontz, who has been sick for some time at Central Hotel.

Mr. and Mrs. John H. Harner entertained a few of their friends, at a card party, on Monday evening. Nineteen invited guests were present.

Mr. and Mrs. Carroll Baumgardner, George Koontz and daughters, Clara and Hilda and son, Elwood, of near Emmitsburg, spent Sunday afternoon, C. E., 7:00. with Mr. and Mrs. Mahlon T. Brown,

Harry Dern, of Thurmont, and his son-in-law, Mr. Christensen, were in town, on Wednesday. Mr. Christensen called at the Record office and renewed his subscription, to be forwarded later to Philadelphia, at which place they will be permanently locat-

Storm losses reported to Noah P. Selby's dwelling, near town, and to the farm house of J. Rowe Ohler, near Emmitsburg. The first loss was mainly to spouting, and the second to the double front porch. Harry A. Allison's also had a window broken. All were insured.

The monthly meeting of the Dorcus sewing society of the U. B. Church was held at the home of Mrs. Charles Kemper. The election of officers resulted as follows; Mrs. George A. Brown, president; Mrs. Chas. A. Kemper, vice-president; Mrs. Emory Hahn, secretary and Mrs. Earl Bowers, treasurer.

Mr. O. T. Shoemaker received word of the death of his sister. Mrs. Annie Fowble, wife of William Fowble, who died at the home of her daughter, Mrs. Howard Leatherwood, near Woodbine, on Sunday morning from paralysis, aged 71 years, 9 months, and 2 days. Funeral services were held at the home of her daughter, Mrs. Leatherwood, on Thursday, at 10 o'clock. Interment in Trinity Lutheran cemetery, Taneytown.

The card party, on Monday night in the Firemen's building, for the benefit of the Home-makers' Club and the Firemen, was quite a success. About 140 were present, 21 of whom were from Emmitsburg. The prizes were won, as follows; door prize by D. J. Hesson; "500" first Mrs. O. D. Sell; second, George Newcomer; third Mrs. Geo. W. Shriner; fourth and fifth prizes to Westminster ladies; and consolidation prize to Mrs. R. F. Wells; domino prize, Miss Ina Feeser; flinch prize, Mrs. W. Rein Motter. Refreshments were served.

There will be a Basket Ball game, at Taneytown, next Friday evening, with boys and girls teams from Thur-

The Editor of The Record has been confined to his home—the most of the time in bed-for over a week, due to irregular heart action and general in-

George A. Arnold will leave this Saturday for Grand Fork, North Dakota, as a witness in a United States case, which is to come before the court on February 7th.

Holman L. Sell, of Littlestown, Pa., has invented a canned corn shaking apparatus for use in canneries, and the United States patent office has just granted him a patent covering the invention. The apparatus comprise a frame supporting rollers over which an endless belt passes. Cans are fed into the apparatus by gravity visited Mr. and Mrs. Frank Wantz and are held to the shaking frame by means of the belt. An electric motor drives the belt which keeps the cans Rev. and Mrs. George A. Brown and in motion during the shaking process.

The following were entertained at The mail train, South, Saturday cards, at the home of Mr. and Mrs. Norman Selby, on Thursday evening, Jan. 25, in honor of Mr. Selby's birthday. Refreshments were served at a late hour: Mr. and Mrs. Norman Selby, Mr. and Mrs. Jacob Hess, Mr. and Mrs. Ernest Parker. Mrs. Wilbur Sullivan, Misses Catherine, Helen, Lillian and Caylor Weddle, of Motters, Grace McLaughlin, Stella Ort, of York, Pa.; Oneida and Arlene Selby, Mr. and Mrs. Wilbur Z. Fair and Catherine Crabbs, Edward Myers, children, visited Mrs. Fair's home William Crebs, Ervin Crabbs, Birnie Crabbs, David Stultz, Howard Knight, and George Baker, of York, Pa.; Geo. and Kenneth Selby, Charles Hess,

CAURCH NOTICES.

Harney—Sunday School, 9:30;
Morning Worship, 10:30.

New Gas Cell Lining Cuts Dirigible Cost

Washington .- A new fabric for lining the gas cells of dirigibles, as light and effective but only one-third as costly as that made with the precious goldbeater's skin, has been developed for the Navy department after years of research in the bureau of standards.

"A substitute for goldbeater's skin has been sought by the air powers of the world since it became apparent in 1910 that the lighter-than-air ship was destined to be an important instrument of war and commerce. Development of a satisfactory substiture, employing cellulose, at this time is particularly valuable to the United States in view of the plan to construct for the navy two \$6,000,000 airships larger than either the Shenandoah or the Los Angeles.

The Cost per Pupil in Frederick County Schools

Leslie N. Coblentz, president of the Frederick County Board of Education, an address before the Frederick Rotary Club, last week, on various branches of public school activity, said that already \$1,000,000 had spent in the county for school buildings, and an additional \$250,000 is to be spent. He also declared that there was not sufficient money for the upkeep of buildings already in use.

Regarding the cost of education in Frederick county, the amount for each pupil's education in pupil's education in elementary school is \$40.86, said Mr. Coblentz. Of that sum, \$31.73 is expended for salaries and \$2.18 for books. In high schools, the rate per pupil was given as \$86, with between \$15,000 and \$16,-000 annually expended for books alone. The sum of \$375,000 is appropriated from the county and \$125,000 from the state, making a total of \$400,000 yearly expended in Frederick for education, Mr. Coblentz stated. Methods of education in Frederick

were dealt with in an interesting manner, special reference being made to ner, special reference being made to the old subjects, "reading, writing and arithmetic," and to physiology. Quoting the definition of education as given by Sir Wilfred T. Grenfell, namely, "education is the lighting of a candle," Mr. Coblentz also defined the experiment as a process by which a child may be prepared to fit himself by an educational development into

society and future leadership. The participation of the general public in the school system was expressed in the statement that through interested effort to secure sufficient appropriations for school activities worthy results might be realized. The county Parent-Teachers' organization was listed as one factor in the attainment of better education and personal attention on the part of those directly connected with the training of the child, a factor in bringing out the best that is in his personality.

The Japanese Friendship Dolls.

International gestures of friendship have recently proven strong factors in promoting good-will between coun-Lindbergh has done much towards making Mexico friendly toward us and we are planning to increase this feeling of friendship by sending to Mexico this summer a gift of Friendship School Bags for the children of that country. We sent last year to Japan a gift of dolls. This reaching out of the heard of friendship reaching out of the hand of friendship was greatly appreciated. The Japan ese have sent back a return gift of dolls also. The Japanese dolls reached San Francisco late in November. They have been exhibited in New York and in Boston. They will be exhibited in Baltimore from the 31st. of January to February the 4th.

The exact details of the exhibitions of the dolls have not yet been worked out, but they will be announced in the daily papers. The first exhibition, however, was held at the Alcazar, on Tuesday, January 31st., at 8:00 o'clock, when Mayor Broening and a ommittee of citizens received the

Friendship Dolls. It is hoped that many people from the counties will come in to see these Ambassador dolls. Each doll is dress ed in Japanese attire of silks especially designed, woven and dyed for them. Each doll is thirty inches tall, has with her a chest of drawers, trunk, desk, chair, stationery, mirror stand, all of black lacquer touched with gold and each outfit marked with the doll's special crest. There are sixty of these dolls, though only a part of the doll party is presented at any one exhibition, and each doll cost over \$200. The dolls were paid for by the yens or

pennies of the Japanese children. After the dolls have toured the country one will be left as permanent visitor in each state. There is a rumor afloat, which may be totally unfounded, that Gov. Ritchie plans to have prepared at the Executive Man-sion in Annapolis a cabinet for the abode of that doll which may be left in Maryland.

WOMAN EATS ONLY BABY FOOD 3 YEARS

"For 3 years I ate only baby food, everything else formed gas. Now, thanks to Adlerika, I eat everything and enjoy life."—Mrs. M. Gunn.

Even the FIRST spoonful of Adlerika relieves gas on the stomach and

removes astonishing amounts of old waste matter from the system Makes you enjoy your meals and sleep better. No matter what you have tried for your stomach and bowels, Adlerika will surprise you. Robert S. McKinney, Druggist, Taneytown, Md. -Advertisement

LAST PAGE EDITORIAL.

Dignity vs. Ability.

It is unquestionably true that dignity, manliness and general dependability, is actually worth more than mere skill and efficiency in doing the work of a position. The most successful heads of banks and big mercantile concerns are men who radiate confidence and level-headedness: men whose very manner and appearance indicate reliability, rather than mere

"smartness" in handling detail work. Certainly, we admire mere skill and mastery of technical knowledge, but when we want to engage in a very important undertaking, or make an investment, we want decidedly more than that from our business men; which means that no greater mistake can be made by a bright, talented fellow, than to be careless of his habits or practices, just so he does his work well.

When we ask for a recommendation we want, first of all, information as to character and habits, especially if our business relations with the one being investigated have to do with our important private affairs. If we merely want to build a house, it is enough to know that mechanical ability is undoubted; but if we want to make a connection involving complete trustworthiness, we want undoubted soundness in character.

Many young men make the mistake of depending too much on what they can do, rather than on what they are. The men most wanted, and always wanted, are the men who are four-square in their job and out of it; for no one knows how soon character will meet with a great strain, nor how soon we need in our employers, fidelity and honesty, rather than merely

so much work in a given time.

Any man in a position of trust plays carelessly with his job whenever he does things on the outside of his job that are not open to the most searching inspection. He may be good salesman, or business man, but if he is not also morally clean, and his habits above suspicion, he is apt to get the surprise of his life most unexpectedly when he finds that his job has suddenly been taken away.

Announcement

I beg to announce that, at the request of the Dug Hill Fire Insurance Company, I have taken on the Agency for their Company, for Taneytown District: I shall endeavor to take care of your needs with this Company, to the best of my ability, and trust I will merit your patronage.

CLYDE L. HESSON, General Insurance Agent.

SEARCHED 18 YEARS RELIEF FINALLY COMES

"Have had stomach trouble for over 18 years and I was disgusted with everything any one told me to try as I only got temporary relief until I tryed Roseletts and they suited my case. Roseletts are everything you recommend them to be. You may print this letter so others may read about Roseletts and be benefited the same as myself." Writes Mrs. Flor-ence Booth, Brooklyn, Ky.
