No. 33

HOOVER FORGING AHEAD IN NAT'L CONTEST

But Not Everywhere is the Sailing Smooth.

Recent editorials from a large number of Republican papers indicate that the Hoover candidacy for the presidency is gaining momentum. O. D. teeman for Alabama made the state-ment Tuesday, Alabama Republicans would be for Secretary Hoover for the presidential nomination at the

Kansas City convention.

Mr. Street called attention to the fact that the State Republican Committees in Mississippi and Louisiana had just gone on record favoring Hoover delegations as a mark of gratitude for what the secretary did in the flood-stricken regions. He added that Arkansas Republicans were con-templating similar action. He said that Alabama, while not affected by the disaster itself, felt the same appreciation. Since then the leaders of Georgia and other Southern sections

have declared for Hoover.

At the same time the Ohio Republican organization was warned by its State chairman, Fred W. Warner, of Marion, that the impending fight between Senator Willis and Herbert Hoover for presidential support in that State would deliver Ohio into the hands of the Democrats next Novem-

If the Willis and Hoover factions insist upon contesting in the April presidential primary for the Buckeye State's fifty-one delegates to the Republican National Convention, discord in all the county organizations will be created, Warner declared.

The State chairman issued a statement urging party leaders to refrain from any tactics that would endanger Republican standing.

Not only are the State offices in peril, but also a number of seats in Congress at present held by Republicans, Warner asserted. He predicted that a Willis-Hoover contest would bring about a split in the party ranks comparable to that of 1912, when the Bull Moose movement disrupted the Republican organization.

Warner charged that Hoover's supporters, headed by Thad H. Brown, former Secretary of State, are not interested in electing the Commerce Secretary as President.

'They are more interested in the selection of delegates,' he said. It looks as though they were not trying to elect Hoover—just to nominate

Meanwhile the friends of the senior Ohio Senator, who received the in-dorsement of the Republican State Central Committee last week, adopted a policy of watchful waiting today. "We are awaiting developments.

Everything is satisfactory along our lines," said Charles A. Jones, secretary to Willis.

Gettysburg Beats Western Md.

The Gettysburg basket-ball team won a victory over Western Maryland at Westminster, on Tuesday night by the score of 37 to 32. The contest was a nip-and-tuck affair for the first 30 minutes and it was only by dint of a tremendous spurt about the middle of the second half that the visitors were able to put the game on ice.

Having taken the lead at 19 to 18 after the first five minutes of the second half, the Green Terror cagers threatened to hold on to their margin until the close.

But with Western Maryland leading at 24 to 23, McMillen and Haller got busy and virtually bewildered the lo-cal defense with the speed of their passing and shooting. McMillen in particular was outstanding.

In the last three minutes Western Maryland crept up a point or two, but the damage had been done and the end came with Gettysburg refusing to resort to "freezing" or excessive stalling but still playing hard basketball.

Hickman is Sane.

At Los Angeles yesterday eight men and four women, some elderly, some middle-aged, the jury holding the fate of William Edward Hickman, con-fessed slayer of Marian Parker, stripped his cloak of asserted insanity for him and branded him a murderer.

Two verdicts were rendered in forty-five minutes in the sanity trial, one that Hickman was sane on the murder charge and the other that he was sane on the kidnapping charge.

Under the law either the death penalty by hanging, or life imprisonment, may be imposed. He will be sentenced on Saturday.

BOARD OF EDUCATION MEETS Request Renewed for Meeting with the County Commissioners.

The regular monthly meeting of the Board of Education was called to order at 10:30 A. M., in the office of Vare-Wilson Contest and Investigathe Board, on Wednesday, February 1st., 1928. Commissioner Slingluff was absent.

The minutes of the previous meeting were approved as read.

The list of bills as presented to the Board was approved and ordered paid. The deferred bill of Rudy and Burdette for a more complete itemization was approved and ordered to be

The bill of J. H. Allender Sons Company for repairs to the Sykesville furnace was approved and as it is an emergency bill it was ordered to be listed with the emergency accounts for this year.

Requests for contributions to local funds raised for purposes indicated were presented to the Board which contributed \$10.00 to the amount al-

ready raised in each case.

Springville, raised \$24.00, books and globe; Tracey, raised \$12, books and dodgeball; Haight, raised \$15.00, books; Deer Park, raised \$18.00,books and records; Priestland, (colored,) raised \$10.00 books; Bearmount, raised \$17.00, books; Royer, raised \$25.00 books; Salem, raised \$17.00, books; Hooper, raised \$11.00, books; Oak Grove, raised \$14.54, books; Hood's Grove, raised \$14.54, books; Hood's Mills, raised \$10.00, books; Ebbvale, raised \$10.00, books, etc; Finksburg, raised \$11.00, books; Deep Run, raised \$15.00, books; Morgan Run, raised \$10.00, books; Westminster elementary, \$34.00, books.

The Superintendent was directed to request the County Commissioners once more to meet with the Board of Education at its next meeting in March for the purpose of discussing the school situation in Carroll County. and taking such action as seems ad-

visable to the joint Boards. A communication was received from Mr. George Osborne, director of the moving picture house in Westminster, to the effect that he had leased to the high school in Westminster, the Opera House and that damage had been reported done by the students to some of the secenery, and that he re-quested that the Board take the responsibility of settling the damage. The subject was referred to the principal, Mr. E. C. Seitz, for action.

The Superintendent reported upon

an investigation of the conditions of the two basement rooms in the Mt. Airy building that they are unfit for use on account of lack of radiation and that the school was compelled to use them and that the children were compelled to sit in these damp rooms without heat. The Board, thereupon, authorized the installation of square feet of radiation for which a bid had been received amounting to \$290.00. This is to be placed with the

emergency bills for the year.

The Board authorized that the deeds for the school properties if sold, February 1st., should be executed by the Board per J. Pearre Wantz, its resident, and attested by M. S. H. Unger, its Secretary, and the deed to be acknowledged by Charles Reed, Clerk of this Board, who is named At-torney in fact for this purpose.

The meeting adjourned at 12:30.

Hanover to Frederick. The trail that George Washington traveled from Frederick, Md., to Han-

over, on his visit here in July 1791, will bring more business to Hanover business men if plans now under way y a delegation of members of the Hanover Chamber of Commerce and Taneytown business men are formulated and acted upon by the Highway Commissioner of Maryland and by the county commissioners of Adams coun-

The stretch of dirt road that marks the oldest National trail in the United States and which leads from the Maryland state line to Taneytown will be improved if the delegations from the local office and the representatives of the Maryland city prove to the state commission and to the county commis-sioners that the road is the shortest and the best between the towns.

Meeting is to be held on Feb. 21, in the Taneytown theatre to foster the improvement of the road that is the shortest trail to the National Capital from Hanover and the shortest route to Taneytown and Frederick. The Hanover delegation will be present at the meeting.—Hanover Record-Herald.

More Fighting in Nicaragua.

Fighting is imminent between the Nicaraguan rebels under Gen. Augustino Sandino and the United States Marines stationed in the sectors of Matagalpa and Jinotega.

Sandino, who has been mysteriously missing for a fortnight, is reported in the region of Jinotega reorganizing his forces and making ready ambuscade attacks against the United States forces. Many civilians have fled, fearing

attacks would imperil their lives. It was reported that President Diaz's Government has received confidential reports from agents in Mexico City that a new movement is being organized in Mexico City to support increased rebel activity against Diaz Governments and the United

States occupational forces. There is no official confirmation of the reports, for the Government officials refuse to discuss them. It is assumed, however, that the United States Department will ask Dwight W. Morrow, the United States Ambassador to Mexico, to investigate Robert Frazier and Flora M. Luns- the reports to determine if they have

NEWS FROM UNITED STATES SENATE

tions in Motion.

One of the most unusual and dramatic legal battles in the nation's history opened before Judge Bailey in District Supreme Court, Tuesday, when Colonel Stewart, millionaire head of the Standard Oil Company of Indiana, appeared to ask the court virtually to permanently enjoin the United States Senate from arresting him for failure to answer questions

in the oil investigation.

The Government seeking to dissolve the writ of habeas corpus under which Stewart won his freedom Saturday, lost no time in combating Stewart's

With the opening of court a petition was filed in the name of the United States Senate asking the court to dissolve the writ and return "the body of Robert W. Stewart" to the custody of

George W. Wickersham, former Attorney-General, has accepted the invitation of the Senate Teapot Dome Committee to represent it in the habeas corpus proceedings by which Col. Stewart hopes to relieve himself

of Senate contempt charges. Grand jury action against Stewart for his refusal to answer questions asked him by the oil committee is ex-pected by District Attorney Gordon by the end of the present week.

Gordon has received the transcript of the record and intends to appear personally before the grand jury as soon as he can complete his case, probably by Friday, and ask that Stewart be indicted. The criminal code provides that such a refusal is a misdemeanor and it was on this section that Harry F. Sinclair was convicter of contempt of the Senate. While the oil committee is wrestling

with Stewart, the Pennsylvania contest gets under way. The counting of the Alleheny county ballots, which already were in the possession of the Senate, came first.

At the very outset of the proceedings, Harry Kuenzel, Philadelphia County Commissioner, representing Senator-elect Vare, walked out in a huff because, he charged, the Water-man committee was permitting an un-due proportion of anti-Vare watchers

Mr. Knenzel declared that the Jim Reed committee had suddenly thrust six representatives into the room where the Waterman committee was preparing to start the recount. He said these representatives were all hostile to the interests of Mr. Vare. William B Wilson, Democratic contestant, had his own watcher present in the person of Robert Carson, of Philadelphia. This gave the anti-Vare forces in the committee room an unfair preponderance, Mr. Kuenzel

Negotiations to smooth out the trouble were promptly begun. The suggestion has been made that the Vare forces be permitted to increase their representation at the recount in order that they might have no further cause for complaint on that score

8th. Birthday Amer. Prohibition.

"The eighth birthday of American prohibition under the Eighteenth Amendment was celebrated in the Senate by Senator Sheppard, of Texas, with a fine birthday speech. Senator Bruce (wet) of Maryland, took issue with Senator Sheppard. The dry Senator from Texas cited banking and production of figures, showing that prohibition America is not only the greatest nation in the world but has become greater since the enactment of the prohibition laws and that better production and more prosperi-ty have come with the absence of the noon-time beer bucket. Senator Bruce contended there was no prosbucket. Senator perity, etc. Senator Sheppards speech in full is published in the Congressional Record of January 16th. The temperance forces of the Nation owe a debt of gratitude to Senator Sheppard for bringing the matter before the members of the Senate and, through the Congressional Record, before the people."—W. C. T. U.

Blight Spreads in South.

The chestnut blight is continuing its rapid spread in the Southern States, the United States Department of Agriculture warns, advising owners of chestnut timber to consider carefully their salvage operations, particularly in regard to the smaller trees suitable for poles and for manufacture of tannic acid. The Bureau of Plant Industry and its co-operating reporters made observations in 1927 to determine the extension of the blight, and find no reason to anticipate any abatement of the spread and increase of this fungous pest. It is expected that within the next ten years the blight will kill most of the chestnut timber

in the Southern Appalachian region. All of the important chestnut-producing counties of Virginia except 14 in the southwest corner of the State have 80 percent or more of the chestnut trees infected or killed by the olight. Twenty-one counties of West Virginia, 7 of North Carolina, 2 of South Carolina, and 2 of Georgia, are in the same condition. Of the remaining counties with extensive chestnut growth in the above States and Tennessee and Kentucky,69 have from 30 to 79 percent of the chestnut trees infected; 62 have 10 to 29 percent infected; and 23 have less than 10 per-

AUTO CLUB MEETING

Organization is Forging Ahead and Will Hold Banquet.

The Taneytown-Middleburg Auto Club met in the Shriner Theatre, on Tuesday, Feb. 7, at 8:30 P. M., and was called to order by the President.

The minutes of the previous meeting were read and approved. A letter received by "Auto Emblem Committee" was read by the President, which quoted prices of emblems, either singly or in quantities, but no action was taken by the Club with regards to purchasing emblems, at this

meeting.

The President of the Club stated that he received a warm reception at the headquarters of the Md. Auto Club, in Baltimore, where he received valuable information as to the benefits to be derived from being affiliated with the Md. Auto Club; the membership dues in said Club is \$12 a year per member, and the secretary of the Club assured Mr. Shriner that each member of the Md. Auto Club receives more for his money than he has invested. The advantages as outlined by Mr. Shriner are too lengthy to enumerate at this writing. The Sec-retary of said Club further assured Mr. Shriner that they heartily approv ed of our Auto Club organization, and would willingly assist us in every possible way to make our organization a

Mr. Shriner extended an invitation to the Club to attend our banquet on Feb. 21, whereupon the secretary assured Mr. Shriner that they would have a representative from the Club present at our banquet, who will address us on the values to be derived from being a member of said Club.

Other valuable addresses at our banquet are expected from the County Commissioners for Carroll County, and from members of the Chambers of Commerce of Frederick, Littlestown and Hanover, who will talk along the lines of public improvements.

A reception committee was appointed to receive the guests in the most cordial manner, to make their visit most pleasant in every possible way, and to make them feel at home, while in our midst, and to feel that Taneytown is the place to visit, where courtesy is above par.

The committee appointed is composed of the following members of our Club; Dr. R. F. Wells, Edw. S. Harner, Reuben Alexander, David H. Mehring, Chas. Baumardner and John

Our Club at present has an enrollment of 112 members. Watch us grow! and help us to grow by enrolling as a member of our Club.

The meeting adjourned to meet

again on Wednesday, Feb. 15, at 7:30 P. M., in the Shriner Theatre, to which the public is cordially invited.

Modern School Athletics.

The amount of time and money devoted to athletics in schools, colleges and universities, has reached enormous proportions. A recent news item

from New Haven, Conn., says;
"Athletics at Yale has become million-dollar proposition. For the first time in the history of the university, the receipts from the various athletic activities last year passed the million dollar mark, a total of \$1,104,-359.06 being taken in at the ticket

Football was the only money-maker with a cool \$1,015,705.37 being paid to watch the Bulldogs perform on the gridiron. The profits from the grid season were \$545,595.35, which helped out the losing sports. Crew lost \$65,-811 and baseball went in the hole \$14.013. Other minor sports brought the the grand total of the profits down to \$331,770.50.

An indication of the profit to professional players is in the fact that an estate of \$87,000 was left by Hughey Jennings, former manager of the Detroit Americans and widely known baseball leader, according to his will field for probate at Scranton, Pa., recently. His personal estate was valued at \$75,000 and his real estate holding

Railroad Construction.

The mileage of new lines and of new second track built in the United States in 1927 was smaller than in the preceding year, although the year was characterized by heavy expenditures for additions and betterments to roadway and structures. This is in accordance with the railroads' stated policy of securing increased service through the more intensified use of existing facilities.

Railroads in the United States last year built 779 miles of new line and 446 miles of new second track. These figures compare with 1,005 miles of new track and 473 miles of new second track constructed in 1926. Approximately 900 miles of new lines under construction at the end of 1927, assuring a continuance of construction activities this year.

Income Tax Returns.

Arrangements have been made to assign Deputy Collectors of Internal Revenue to various sections and communities throughout the District of Maryland, for the purpose of assisting taxpayers in filing income tax returns for the calendar year 1927.

Below is a list of the places to be visited in this section, together with the dates of such visits: Mt. Airy, Feb. 28th.

Westminster, Feb. 29, Mar. 3. Sykesville, March 5th.
Union Bridge, March 6 and 7.
New Windsor, March 8th.
Manchester, March 9-10. Frederick, March 1-15.

PENSION FUND LIKELY TO BE A SUCCESS.

Early Reports indicate a wide interest and Liberal Giving,

The campaign throughout the United Lutheran Church in America for the raising of \$4,000,000 for the ministerial pension and relief fund gives promise of success. It is too early to give anything like definite reports but indications are that while many country charges will fall short of their quotas, most of the towns and cities will raise their full amounts

The campaign began with a subscription of \$50,000 from the Publication Society. Other early subscriptions included one of \$15,000, four of \$10,000 each and one of \$5,000.

Churches n this vicinity are giving encouraging reports. Of a quota of \$3,180, Trinity, Taneytown, had \$2,654 at the middle of this week, with indications that the full amount would be raised. College Church, Gettysburg, raised about \$3,500, which was double its quota, last Sunday morning.

Proceedings of the Orphans' Court.

Information for Women.

Give a child a variety of food flavors early in life. In many cases foods people think they do not like are foods they have never tasted.

Equal parts of mayonnaise and chili sauce mixed give an agreeable change of flavor to a salad, especially good with plain crisp head lettuce or shredded cabbage. To make hard sauce a little differ-

ent, use brown sugar instead of white

and grate in the rind of an orange for flavoring. Hard sauce is good with almost any hot steamed pudding.
Smooth, soft cotton materials that launder easily are best for children's rompers. Cotton charmeuse, ging-hams, prints, cotton crepe, sateen and

fine broadcloth are good fabrics for the purpose. When you wash handkerchiefs and other small articles in a washing machine, inclose them in a net or muslin bag to keep them together and make them easier to handle in the wringer

and rinse waters. Press wool garments while still damp with a medium hot iron until they are dry. Use a pressing cloth if ironing on the right side. Slightly dampened cheesecloth is useful in pressing flannels, as it draws up the fluff of the material.

When a child is old enough to do the necessary arithmetic he can begin to clude from his home the snakes and When a child is old enough to do the keep a little personal account showing scorpions which menace his life in how much he has received and what he has spent it for. This is the be- outwriting these pests. Outside their ginning of the child's training in the houses the farmers build round urns

management of money.

When you choose a kitchen cabinet see that it is well made, and mouse-proof; that the material of which it is made is easy to clean; and that the drawers and compartments are suitable in size and shape for the articles you will want to store in them.

A Chicago man has invented a camera which magnifies 15,500 times. It should come in handy for taking campaign photographs.

have room for all his decorations.

VICTIM OF BRAWL DIES.

Adams County Has New Murder Case on Hand.

John L. Lawrence, Sr., 48 years of age died in the Annie M. Warner Hospital, Gettysburg, on Tuesday morning, as the result of a drunken brawl at the one-story shack of "Christy" Lawrence, a well known baseball player at Irishtown, between New Oxford and McSherrystown, on Setunday of townson or execution. Saturday afternoon or evening.

"Christy" Lawrence, 52 years of age, not related to the dead man so far as we know, is in the Adams County jail at Gettysburg, held responsible for the death.

The dead man was found shortly before 9 o'clock, Sunday morning, in an unconscious condition, slumped in a chair in the frame shack in Irishtown, while his assailant, was found in the same shack, his feet propped on a table and smoking a cigarette. He was then under the influence of

liquor.
That "Christy" Lawrence, the former pitcher for the Hanover team of the Cumberland Valley League would be charged with murder was intimated, by Dist. Attorney John P. Butt, when questioned over the 'phone. He further stated that County Coroner Dr. Edgar A. Miller would conduct an inquest this afternoon and fix the blame.

Paragraphs for Farmers.

The management of farm work horses varies with the seasons. It requires judgment on the part of the owner to feed economically, and yet keep the horses in good physical condition, so that only a minimum number need be carried for the peak per-

received order to sell same.

Estella A. Weller and John S.
Haines, executors of Sally Stuller, deceased, returned inventories personal maney and received or
money and rece caused by hog cholera. Copies of the film are available for use in agricultural meetings where it is desired to spread educational information on

cholera and its prevention. Ivan L. Hoff, executor of Frederick Richter, deceased, received order to sell real estate.

Maintaining the faint work in healthful condition during the winter is the first in fitting it for spring work. The horse should not be so fed Maintaining the farm work horse ick Richter, deceased, to sell real estate.

Mary E. Dutterer, administratrix of John T. Dutterer, deceased, returned inventory debts due, report of sale of inventory debts due, report of sale of care during the winter, resulting in loss of weight and vitality, so weak one the horse that it is not in conditional afternits retion for spring work, and often its resistance is so lowered as to invite disease. The liberal use of roughage, supplemented with the right amount

Devilbiss, decased. returned inventors. stances permit, killing should be done on a day when the beef can be cooled Sarah Susan Snader, executrix of Winfield Snader, deceased, received 40°F. The carcass should be allowed order to sell warrants.

Letters of administration on the Letters of William H. Buckingham hang from two to four weeks before being cut up if well covered with fat;

> when allowed to ripen or age. Three new oat varieties, Albion, Richland and Iowar, have achieved economic importance in the winter wheat belt. All three varieties were developed by selection from the wellknown widely grown Kherson or Sixty-Day oat, introduced into this country from Russia by the U. S. Department of Agriculture and the Nebraska experiment station 30 years ago. Iowa has a little taller straw and is from two to three days later than Albion in maturity, and is also a little superior in yielding ability. Richland is primarily a special purpose oat for growing on low, rich soils, where, because of its short stiff straw, it does not suffer by lodging. It is also resistant to stem rust.

Baltimore Fire 24 Years Ago.

The great fire in Baltimore commenced 24 years ago, on Tuesday, when it is supposed that a lighted cigarette fell through the grating ac the Hearst building and caused a loss of more than \$100,000,000. The fire began on Sunday morning, and although it smouldered for weeks it was under control after two days.

Smith Tries Again.

Apologies for Advertising.

Frequently one reads in the newspapers—usually the weeklies—an apology for an unusual amount of advertisements carried, and for the small amount of good reading. The Record has been among the guilty ones, but hereafter will discontinue the bad habit; for, while there is a lot of poor advertising, the most of it is interesting news-profitable to the one who reads, or to a large number of them.

Certainly, a lot of "professional" adv. writers, who indulge in startling lay-outs and so-called artistic illustrations, miss their mark, and fully half of the space they take up often represents wasted money on the part of the advertiser. These "professionals" hit the mark about as often as would a bright errand boy if given the chance, and not as often as would the best salesmen of the house.

Readers of advertising news are not concerned so much about a lot of typographic whirligigs, as they are about plain type stating attractive facts in an assertive way-first catching the attention, then giving the news as it should be given-honestly, and timely.

Writing a good advertisement may be an art, but not more so than ability to say the right things to a customer from behind a counter. Any good salesman ought to be able to tell the news about what he has to sell. Quality merchandise, with a quality reputation of the merchant back of it, and attractive price offerings, represents a combination hard to beat.

Telling plain unvarnished business stories, and "making good" all details, represents good advertising, and good news, and we do not intend to apologize hereafter because for a week or so reading matter may be short. Advertising is the only thing that makes a weekly paper possible, and making an apology for advertising must there fore represent making an apology for the life of the paper itself.

How it is to be Done.

We clip the following from an editorial in the Baltimore Sun, of last Friday, commenting on prohibition laws in general, and Mr. McAddo's Richmond address in particular.

But Mr. McAdoo says: "Present conditions cannot be allowed to continue. If the law is a good law, it must not be epealed; and if it is not repealed, it must be enforced." This is the right stand for one who believes in the law. But something more is necessary-namely, honest presentation of a method of enforcement which promises success. It is here, it seems to The Sun, that many advocates of the law back away from the logic of

the situation.

The high point in the Sun's opposition to Mr. McAdoo's opinion is, that his opinion is right "for one who believes in the law" but that disbelief in the law justifies its violation. Its argument that some other "more honest presentation of a method of enforcement" must be presented, not only evades the situation, but is in fact a taunt directed toward the government for its partial failure, so far, and encouragement to those who, like The Sun, disbelieve in enforcement of the prohibition laws.

The law is, as it is. Those who dislike it, and would annul or modify it, should proceed in regular American form to do so. Even amendments to the Constitution of the United States pursue the easiest course—that of Congress.—Phila. Ledger. encouraging illegal nullification. The Sun further on in the same editorial

"It is dodging the issue to talk about making prohibition prohibit unless we are told how it is to be done." The Sun knows very well how prohibition can be made to prohibit. The the function of penny-saving. question is but another taunt, hardly the class of argument that should be

good Americanism.

for our obedience to the laws of the land. If these laws are wrong, or need amending, we make the changes desired if the majority says so, and we do not put it up to those who passed certain laws, to change them because we dislike them. Perhaps if The Sun waits a few years longer, it may be "told how it is to be done." Even now, it looks as though the wets are doing greatly the most of the worrying over the "failures" of the

Sport for Hunters.

The protection of game, and the game laws, are nothing more nor less than the continuance of hunting as a sport. It is a business in which the state engages, partly as a make-believe, but largely out in the open as fun for sportsmen, with the farms of the state as the free fields for sport of "hunting" the game after it has been sufficiently "protected" and fed over the winter. The following portion of an article to the press, sent out by the State Game Warden, is interesting, and shows how the state keeps up its privately owned, but publicly used, game preserves.

"It might be of interest for the public in general to know that the Game Department contemplates distributing approximately 14,000 rab-bits in the covers of the State as well approximately 6,000 bob-white quail during the next two months. Contracts have been given to the brok ers and shipments will begin within the next week or so, and it is for this reason that I am again soliciting the co-operation of all the sportsmen throughout the State in assisting our wardens and the Department as whole in protecting the game during closed season. Much game can be propagated if protected from the worthless dogs and house cat. pot-hunter is becoming a thing of the past since he does not have many friends among the sporting element.

Good Roads Increase Demand.

Far from reaching the point of completion, our good-roads system is apparently in its early stages. Every State in the Union is now extending its network of permanent highways; and many States are entering upon a greater building program for the present year than for any preceding one. Obviously, good roads greatly stimulate popular demand for good cars at low prices.

The tendency everywhere is to finance the construction of roads by making those who use the highways pay the costs in the form of a tax on gasoline, together with an annual registration tax. This is a reasonable plan on its face; and it has the advantage of securing rapid results in the way of increased mileage of wellconstructed highways. It would be hard to point to any other single thing that is doing so much to improve rural conditions as the building of good roads by the State itself, out of the special funds procured from automobile and gasoline taxes.

Whatever else may or may not be done for the relief of the farmer, he ought to b provided with good roads and good schools. More backward countries are now building modern highways, and this fact is reflected in the growth of the export side of our automobile selling programs. Later, the great Chinese demand will surely

What is an Inhabitant?

James M. Beck, in his argument before the House committee in defense of his right to sit in Congress as an "inhabitant" of the First Pennsylvania District, makes the assertion that a denial of his right "would disqualify nearly half of the Senate and a considerable number" of members of the House. If this is true, it only shows how important it is that there should be a final and authoritative ruling on the question at issue.

Not all the Senators and Representatives who have homes in Washington stand precisely in the same position as that held by Mr. Beck. Their long service at the capital has made a residence there a necessity, and it need not follow that in every such case they maintain "a voting residence" only in the State which they represent. A liberal interpretation of the provision of the Constitution, bringing the American practice into closer accord with the English parliamentary rule, might or might not be an advantage in widening the choice may be repealed, and so may be the of the congressional districts and Volstead act. But, the wets prefer to bringing a higher type of men into

A Little Talk on Thrift.

It is somewhat unfortunate that in much of the current discussions of thrift undue emphasis is placed on

Certainly no criticism can be levelled at the doctrine of economy in little indulged in by so great a newspaper | things. Most business failures as well as The Sun. It is not associated with as those which come to individuals good company-or, may we call it, are the results of small items of waste. However, true thrift only be-Patriotic citizenship, we think, calls gins with small savings. If this were

not true one would be forced to commend the practices of the miser.

As the result of constant exhortations to save pennies, save nickels and save dimes, many persons receive such an erroneous impression of thrift that they decide to have none of it.

Thrift should be emphasized as a practice which means real progress and rightful upbuilding. Of course, this includes saving little things. It is thrifty to save the pennies. It is just as thrifty to save the moments; to be careful of one's health; to store the mind with useful knowledge; to keep one's self sound mentally and physically as well as financially.

It is for this reason that in schools where saving banks are in operation, there should also be instructions given to the young on the true purposes and objectives of thrift. Continually harping upon the point of saving pennies is quite apt to have one of two major reactions: (1) There is danger that the student will develop a narrow, tight-fisted, mercenary, avaricious attitude. (2) There is danger that the whole subject of thrift will seem so trite and colorless that he will pay no attention to it.

Thrift does mean penny-saving but only as part of the greater plan of eliminating all waste in order to promote the highest possible degree of personal efficiency and usefulness .-By S. W. Straus.

Carabao Ideal Beast of Burden in Tropics

One of the greatest obstacles to any industrial progress in the tropical countries is the lack of transportation facilities. In Central Africa the tsetse ily is so fatal to horses and cattle that they are practically excluded from millions of miles of territory. Ticks are almost as bad in other places. Ticks, flies, mosquitoes and the like, even if less menacing than the tsetse, often irritate horses to a frenzy that diminishes their strength, increases their susceptibility to disease and shortens their lives. Among work animals the water buffalo, or carabao, as it is called in the Philippines, is indeed an exception. Its optimum climate is warm and moist. Its digestive system is adapted to coarse, watery vegetation, and its thick hide, plus the coat of mud with which it loves to encase itself, makes it fairly immune to insects. But unluckily the water buffalo is useful mainly for wet crops, like rice. For other kinds of agriculture, the native humped cattle of India and the allied banteng of Java are the best available, but they are relatively small, inefficient and unintelligent compared with the horse, and they suffer from attacks by insects.

Mothers Find Peace Along Sunshine Wall

There is hardly a mother in the Paris Latin quarter who does not know the sunshine wall. In the northwestern corner of the Luxemburg garden you will find it, a long wall facing south, and the sunshine, if a vestige of sun there be, plays upon it all day long.

It is a wall of dignity, as befitting the Luxemburg museum of which it forms a part. Emblazoned in its center is Fournier's great mosaic, a vigorous angel, bearing a palm, in flight over a city. And ranged along the top of the wall over the mosaic are busts of famous artists, Ingres, David, Delacroix and many more beside.

Hither come the mothers every day, and while the children sleep soundly in their perambulators or play with flash of dimpled legs and peals of shrill, gay laughter, they sit in one unbroken line against the sun-bathed wall and talk and sew and sometimes dream a little. And above them the big mosaic blazes in the sunshine, and the great winged angel hovers over them with its palm.-From the Continental Edition of the London Daily

London's Snake Hospital

A "snake hospital" with comfortable beds in it and a resident physician to care for the reptiles' ills is an amazing feature of the new reptile house of London's zoological gardens. It boasts a diet kitchen, a battery of artificial sunlight lamps and other

equipment of a hospital. Snakes brought to this zoo from all over the world thrive under the care lavished upon them, reports Popular Science Monthly. Electric thermometers flash red or green lights whenever the temperature is too hot or too cold for the delicate constitutions of the reptile guests. In an adjoining "insectarium" rare and foreign bugs are raised to luscious fatness, for the snakes that can thrive on them alone with all the care a hotel chef might expend on meals for guests.

Selling Line of Talk

The profiteer went to a fashionable artist to have his portrait painted. The fee was pretty stiff, and the likeness too true to be flattering. Not very pleased, the sitter demurred at

"Well, you need not pay for it unless you want it," said the artist. "Then you'll have it on your hands. How can you sell it if I refuse to

"As easily as I can paint a tail on it," said the artist in a tone which brought out the check book like a flash of lightning.

Growth of Beard Not

Stimulated by Razor Whether or not shaving makes the beard grow faster is a question that never has been definitely answered to the satisfaction of all scientists. It is the general belief among medical men and physiologists that shaving itself does not make the beard grow faster and that cutting does not increase the

growth of hair. There is a definite rate of growth in the hair of normal and healthy persons and this growth is not affected by mere cutting. It is possible, however, that shaving makes the beard grow faster for a different reason, says Pathfinder Magazine. Shaving tends to irritate the skin somewhat and causes an increased flow of blood to the shaved section. Consequently there is an increase in the nourishment of the hair follicles, and this may cause the beard to grow stiffer and heavier, and perhaps faster.

It is widely believed that if a man never shaved he would not have as heavy a beard as he would have if he shaved a few years and then stopped.

Happiness in the Library

Comfort and consolation, refreshment and happiness, mar indeed be found in his library by anyone who shall bring the golden key that unlocks its silent door. We may make a library, if we do but rightly use it, a true paradise on earth, a garden of Eden without its one drawback; for all is open to us, including, and especially, the fruit of the Tree of Knowledge, for which we are told that our first mother sacrificed all the pleasures of paradise.—Sir John Lub-

Highest Form of Politics

The political program which best meets the needs and aspirations of our toiling population is that which proclaims the advent of democracy and a recognition, and lastly that which, while working in good faith for the welfare of all, does not place the aim of civilization only in the increase of general wealth, but, above all, in the intellectual culture and moral elevation of the citizens.-Premier Poin-

Integrity Above All

In my long experience in business life and association with men there are some fundamental things that must not be overlooked. If I were asked to say the most important things that lead to a successful life, I should say that the first of all is integrity. No man can do anything of any great value in life if he does not have the reputation of honor and integrity.-Charles A. Schwab.

Insects "Hibernate"

Bees and hornets become torpid during cold weather and consume comparatively little food. The withering of the last blossoms in the fall compels them to desist and to go into winter quarters. There the social species have stored a supply of Loney in a series of small waxen chambers or "cells," combined into "combs." upon which they subsist until spring, while which they subsist until spring, while the solitary species which do not lay up such stores usually die; but their larvae, snugly placed in burrows, or other concealed or parasitic situations, remain quiescent until the return of warm weather, when they emerge.

Late of Carroll County, deceased. All persons having claims against the deceased, are hereby warned to exhibit the same, with the vouchers propertly authenticated, day of September, 1928; they may otherwise by law be excluded from all benefit of said estate.

THE FOX FAMILY

66 N OW, children," said Mother Gray Fox to her little babies, "you must learn many lessons.

'For the past few weeks I have held you close to me so you could feel my comforting warm furry body, and so you need not be afraid in the great dark world.

"But now the world is no longer dark, for you have opened your eyes at last, and you see the light.

"Your daddy is proud of you, too! He stayed away while you were so very tiny.

"It is best that way. Mother Fox wants to be all, all alone with her babies when they are so very tiny.

"And all alone in her three-room ground apartment she stayed with

"Daddy Fox will teach you lessons, too. He will also show you how you

"No Little Fox Should Learn Too Much at a Time."

must hunt and do the marketing. You will learn just a little at a time. "That will be enough to do. No little fox should learn too much at a time, for we do not want you to adventure far.

"A very little hunting at a time will do.

"You must beware of Great Horned Owl. He's a wild fellow and he doesn't care in the least for a darling little baby fox.

"Perhaps I should say he cares for a little baby fox too much. Much too

"He doesn't really care for a baby fox or he couldn't catch the little darling and put an end to its sweet fox life.

"You must stay most of the time safely in your seft grassy bed in the Home Den.

"You must beware of the strong Weasel who loves little foxes in the same cruel way that Great Horned Owl does.

"The Weasel knows how to hunt, too. He knows how to take short cuts, and he is tireless.

"Once a darling little fox was saved from a Weasel because old Rattlesnake saw him in time. Old Rattle didn't want to protect the baby fox, oh, no, you must watch out for Old Rattle and his family.

"But Old Rattle wanted that Weasel and fight they did so that the baby fox get home to safety.

"You must be careful of men-and guns and rattlesnakes. Copperheads you must beware of and field mice you must smile at. For you are an enemy to field mice. You can catch

"Beware, too, of the Goshawk. He is an enemy."

"All that your mother tells you is true," said Daddy Fox. And then Daddy Fox began to give lessons in what they must beware of and what they must learn.

"In a year's time you will be old enough and wise enough to choose your own mates and start out housekeeping and homemaking for your-

"Mother and Daddy Fox will not be lonely, for that is the way you should do, and Mother and Daddy Fox have each other and they love each other and are always happy with each other.

"Aren't we, Mother Gray Fox?" Mother Gray Fox looked at Daddy Gray Fox and smiled and her eyes were tender and loving.

"I've always been thankful you were my mate, and proud that you were my mate and glad that you

were my mate. "You're the most handsome fox that ever lived!" said Daddy Fox. And the little foxes looked at each

other and grinned and said: "We will not feel that Mother and Daddy will be lenely when we leave them, for they love each other so

much, so much.' Then Daddy Fox suggested a good

game, and they all had a most wonderful Fox frolic for all of them loved And Mother and Daddy Fox said

that play was a most important part

YOUR BANK

FOR the remotest origin of banking we must go back to the days of antiquity. But vast changes in its nature and scope have taken place from the day of the ancient banker who was a mere custodian of money and a buyer and seller of foreign exchange to the modern banker who is a financier and a dealer in credit.

The oldest survival of a banking transaction was unearthed recently by explorers in Assyria. This is a bill of exchange issued a thousand years before Christ. Then several hundred years before Christ we have the "Argentarii" or "dealers in money" of Greece and Rome. It was under Justinian in Rome that the banking business flourished and developed to a scope that was not reached again for centuries to come. A comparatively large use of credit was involved and a whole series of laws relating to it were created.

During the Middle ages, however, the insecurity of property reduced banking again to mere money changing until the establishment in Venice, in 1587, of the Banco di Rialto, which received deposits subject upon order, in which we have the real beginning

of modern banking. Gradually, through this and other banks, which were springing up throughout Europe, came the various features which constitute modern banking as we know it today. On July 27, 1694, came the incorporation of the Bank of England around which ever since have centered the finances of Great Britain and which furnished an example for the First Bank of the United States, which was chartered by one of the earliest acts under the federal Constitution on February 25,

THE WHY of SUPERSTITIONS

COUNTING STARS

GHEY fought from heaven: the stars in their courses fought against Sisera." So sang Deborah and Barak, the son of Abinoam, exulting over the destruction of the Canaanite commander. The quotation is an example of the intimate relations which the ancients believed to exist between the stars and human destiny. The persistence of this idea down into our own times is evidenced by the number of "astrologers" who make a comfortable living from the credulous by their "horoscopes" and the prevalence of star-superstitions all over the world. As to astrology, it was regarded as a real science down to within comparatively recent times.

There appears to have been strictly no star-worship among the ancients. In the sun and the moon primitive man saw deities-in the stars celestial bodies more nearly related to and connected with himself. The stars peopled the heavens as man peopled the earth and between them existed a community of fate, the celestial influencing the terrestial, as was natural. Therefore, we see in current star-superstitions not the invocation of a god but an attempt to find out how the celestial bodies with which we are in affinity are influencing our destiny. A common superstition of the "project" class in this country and Canada is that if you count nine stars for nine successive nights (if a cloudy or rainy night intervene the charm will be broken and the project must be begun again) the person you dream of that night will be your future hushand (or wife). In one section only three stars are counted. This superstition is based upon the ideas stated above with regard to the connection between the stars and their human kindred, the counting of the stars being merely an attempt to get en rapport, as it were, with the celestial

ruler of your destiny. (6) by McClure Newspaper Syndicate.)

Plenty Left

Despite the fact that in Great Britain the gannets or solan geese eat immense amounts of herring, there seems to be plenty of fish left for the human fishermen. The gannets occupy every available ledge on the giant cliffs. Although they eat 60,000,-000 herrings annually the good fishing does not seem to diminish. Herons are on the bounty list, however. because of their activity in fishing streams of inland waters.

THE FUNNY SIDE

By DOUGLAS MALLOCH

TODAY we sat and talked about The time the gasoline gave out, And father woke the farmer up, And all he did was sic his pup On dad, and how dad hiked to town, Where things close up when night

comes down, And how at last he found a man, Who charged a dollar for the can, Another for the gasoline-Today we all recalled the scene, And talked it over, fore and aft, And laughed and laughed and laughed

Today we talked it over, though That happened years and years ago When cars were scarce and roads

and laughed.

were bad, My goodness, what a time we had-Of how we waited by the road, And mother sat down on the toad, And how she screamed, and brother

To jump a ditch, and fell inside And got all muck—today we sat And talked it over, all of that, And laughed the way the people do After a month or year or two.

And so it is with lots of things: The very thing that sorrow brings Today, tomorrow makes us smile. We only need to wait awhile, And then we see the funny side Of many a night we nearly died. I do not mean to say a man Should smile right then, for no one

can; But, if we only tried a bit To see the funny side of it, We'd smile at little cares we knew A whole lot sooner than we do.

For Meditation 000000 By LEONARD A. BARRETT

~

GREATEST OPPORTUNITY

A L HAFED sold his farm in order to get sufficient money which would enable him to search the world over for diamonds. He traveled for many years and having failed to find diamonds returned home penniless. The man to whom he sold his farm had become very rich, for he discovered a diamond mine on the farm he purchased from Al Hafed.

The opportunities we seek are so near us that we fail to see them. It is not necessary to go away in order to find our opportunity. The best chance in the world is to be found just where we are.

A farmer mortgaged his land for money to invest in oil. He went to the Far West to see his wells shot. He waited long but discovered no oil. He returned home poor both in spirit and money. The loan company was about to sell the farm in order to pay the mortgage. A few friends raised sufficient funds so the mortgage was renewed.

A short time after this a big oil company leased the land and sunk wells. Every one was a success. The farmer paid back the borrowed money and now he is a rich man. Oil flowed in abundance in the very land he mortgaged, but he did not know it.

The greatest opportunity is not in some far away city. It is just where you are. It is so near you fail to discover it. You will find it, perhaps today, in the very work upon which you are engaged. Opportunities surround you on every side. It is not the opportunity you want so much as the ability to recognize it when it comes. Many an opportunity has been lost because of failure to utilize it. Opportunities are not to be found in things. Opportunity lies in yourself. (©, 1928, Western Newspaper Union.)

FEESERSBURG.

January 1928, had 22 clear days, and

February began to follow suit—but there's that scared ground-hog! Who says we stuck-in-the-mud on Sunday? Well the neighbors helped us through to Mt. Union, and we had a good Sunday School, and interesting C. E. service afterward. The Endeavorers are planning some benevolent work, and a social in the near future.

We are having glorious reports of the revival in the M. E. Church, in Union Bridge, conducted by Rev. C. H. Richmond, assisted in Music by Rev. A. A. Pierce, of Johnsville. Forty-nine conversions, a majority of whom united with the church on Sabath evening, when these special bath evening—when these special services closed.

Some of the members of Mt. Union Church visited their pastor, on Wednesday last, and found him improving, cheery, and content in bed. His first aid nurse says "he's a good pa-

On Sunday last, the family of Carlton Flemming, and Mr. and Mrs. John Starr, attended a dinner at the home Flemming's father. John Burall, in Uniontown, in honor of his

Mrs. Jacob Snare was calling on friends, in our village, last Friday. Your correspondent spent Thursday of last week visiting relatives in Key-

The relatives of Harry Hiteshew, who was reared in this community, have received invitations to the marriage of his only child, Mehrl Zimmerman Hiteshew, to Ethel Louise Hamilton, on Feb. 18, at the bride's home, in Hampton, Va.

Mrs. Clayton Koons received the recount of her sout Olivia Crouse's

account of her aunt Olivia Crouse's 94th. birthday anniversary, in Littlestown, on Jan. 28th. She has been confined to her wheel chair for a number of years, because of a fall; but her mind is alert, and her general health good. She received many cards, and callers, and some nice gifts. Mrs Crouse has been a life-long member of the Methodist Church, and still at-tends services, in her chair, when the

Mrs. Koons was also informed of the illness of her cousin, Carrie Reav-er, living off the Gettysburg road, near Littlestown, and well known to many of your readers. Miss Reaver went to the barn to do some work, and when absent over-long her sister Jane went after her, and found her in a paralyzed condition on the ground. No one was within call, so she made her position as comfortable as possible blankets and pillows until their brother Edward returned home, when they | ill for some time, remains in much the

carried her to the house.

A beautiful card of "Swastika", the Matheson Estate, Cocoanut Grove, from Mrs. A. W. Feeser, at Miami, Fla., announces wonderful sights and weather. "Touring the state from Jacksonville to Miami is tiresome—but very enjoyable."

All our sick folks are stirring around again, and nearly back to normal conditions.

EMMITSBURG.

H. B. Fogle's; Mrs. Andrew Gagle, of Baltmore, at Harry Haines'; Roswell Dubbs and family, at Mrs. Flora Shriner's; Mrs. John Blaxten, Walkersville, at Mrs. Fannie Haines'; Mrs. John Miller, at Laurence Smith's.

MANCHESTER.

A surprise party was held Thursday evening at the home of Mr. and Mrs. Harvey Rhodes, in commemoration of the 30th. anniversary of their marriage. Games and music furnished entertainment. A number of useful gifts were brought by Friends, relatives and neighbors from Manchester and vicinity were present. Hanoverians included their Harry and his wife.

The concert given in the Firemen's Hall, on Friday evening, by the combined C. E. orchestra, was greatly appreciated. The program consisted of ensemble and solo and group numbers. The performers acquitted themselves creditably. Including some folks who assisted for the occasion, the number taking part in the program was 29. The Gypsy Festival Overture was

played in costume. The snow has disappeared very fast

the last few days.

LINWOOD.

GAS TRAPS BIRDS IN PARK CAVERNS

Perish in Caves Poisoned From Below

Yellowstone Park, Wyo.-Natural poison gas, seeping up through fissures in the earth into caves, is frequently the cause of the death of birds and small mammals in Yellowstone National park, and Park Naturalist E. J. Sawyer is attempting to find out why the luckless little victims

venture into these deadly traps. He is disinclined to believe the theory most commonly advanced that the birds go into the caves for shelter as cold weather comes on in the

Impelled by Restlessness. "It is my present belief that, in general, the bird victims are not particularly attracted by anything at all, but that in the restlessness characteristic of their spring and autumn movements they venture into all manner of accessible places and are then overcome by the gas. The species affected are small perching birds of various kinds, such as sparrows, varblers, wrens and thrushes: nor has it been observed that any species or group of these pays a toll out of

proportion to its relative general abundance. "That a desire for warmth is not the main attraction seems further indicated by the fact that the Townsend solitaire is so frequently found dead in the caves. This bird, an allyear resident in the park and apparently unaffected by even the extreme cold of midwinter, would scarcely be impelled to seek extraordinary warmth

in spring and fall. Confined to Smaller Birds. "One of the most abundant species of small birds in this region is the Clark crow, or nutcracker, yet I have seldom if ever found a Clark crow in | the poison caves, and yet it would small town girl who was learning to seem a comparatively short step from his ordinary habits for the nutcracker "I don't know how to drive yet, and to enter one of these shallow caverns -not so pronounced a departure from routine as it is in the case of the tree-

most frequent victias. "It is my belief that the nuteracker I'l lie down in the street and let you does enter the caves, but, owing to run over me all you please."-Kansas his greater size and greater power of resistance, emerges with impunitythough doubtless, in each case, an older and a wiser bird. Indeed, so far as my frequent observations go, it is a rare thing to find any bird impresses on us the necessity of a wise larger than the small thrushes that has succumbed to the gas."

Ink Blot Spelt Ruin for Engineering Firm

A big British engineering firm put in a bid for building a great bridge for a foreign government. The head of the business spent six months in getting out plans. His bid was accepted, the material bought in great quantities, men engaged, and machin ery built.

A time limit was set for the commencement and finish of the bridge, and one day the chief was sitting at his desk perfecting his plans and guished from the strawberry plant is making sure of the smallest details. when he accidentally upset an inkpot and drowned his most important pa

pers in a black sea. In a fever of anxiety he tried to re construct his plans from stray notes. It was impossible, and he then cabled the foreign government begging for more time. This was refused and the contract repudiated. The loss drove the firm into bankruptcy.

World-War Children

Held Cold-Blooded New York.-The World war made

the children of its day a "bloodthirsty and cold-blooded" present generation, Fritz Kreisler, violinist, said on his return from an eight-month tour of Europe. He asked reporters what had taken

place in America during his absence. Among other things, he was told of the Hickman murder case and other recent crimes. "It is those young people who were

children in the war and who heard of the gigantic sacrifice of life and seem to have inherited all the bloodshed and cruelty of war," he said. "I know. I see it in their faces and in their actions. "Thank God it is not the soldiers,"

he added. "They came back tired and weary and settled down."

World's Timber Supply The world will face a serious shortage of timber within a few decades, says Christian Storjohann, a leading industrial and forestry expert of Sweden. Sweden's effort to safeguard and maintain a future supply of timber is in contrast, he says, to the indiscriminate felling of trees in many countries. Russia still has large forest reserves, but only a small part of them can be utilized because of lack of transportation facilities Among the northern countries only Sweden now keeps the cutting of trees on a level with reforestation. Steps to convert waste and swamp lands into

being taken.

forest areas by draining are now also

to pieces!' "I can't help it!" responded the drive and not succeeding very well. my car seems determined to run over something. I-

"Aw, that's all right!" said the comloving warblers, which are among the plainer, crawling forth. "I didn't see who you were. If you'll wait a minute City Times.

heading

The vast number of books we have selection of what we read. One book may determine what a man shall be to all eternity. Benjamin Franklin said that a single reading of Cotton Math er's "Essay to Do Good." shaped his entire life. One page of a good book may save a soul. One paragraph of a bad book may ruin a soul. John Angell James, one of the best men England has produced, stood in his pulpit in his old age and said that he had never overcome the evil effect of having for fifteen minutes once read a bad book.-Exchange.

The Strawberry Tree

The strawberry tree as distinnot a native of England, although it is to be seen occasionally in the parks and gardens of that country, but in Ireland it is frequently found growing wild especially in the neighborhood of Killarney It usually bears flowers about the end of September or beginning of October, and along with the flowers are found the fruits of the previous year.

The fruit is a targe orange-red berry, closely recembling the strawberry; hence the name of the tree;

SECOND WIND

THERE is nothing easier than convincing yourself that you have worked so long your brain has begun

Then you postpone the job till another day, and must spend perhaps an hour getting back to the mental state in which you left it off.

And the chances are then you will never get exactly back into the same swing you had when you quit.

Quitting a thing when it is half finished is, of course, due to the natural laziness in all of us, and which is the hardest thing we have to over-

We can all work twice as hard, mentally, as most of us do.

Only a terrific and overpowering interest in what we are doing will keep us at a task till our minds are so wide awake that they can bring all their powers to bear on it.

Men who do big things keep at them and at them-and they find that they can often get a second mental wind, which will make continuing as easy or easier than the work was be-

When James Russell Lowell wrote "The Vision of Sir Launfal" he shut himself up in a room and stayed there for two days till the job was done. And he was not exhausted when he got through.

The chances are that if he had tried to write the poem by fits and starts he could never have got it done.

If you were shut into a room, and knew that the only way you could ever reach sunlight and food again was to find a secret passage out, you would find the secret passage.

The passage to many sorts of success are secret, and have to be hunted out by the reason. The fact that men accomplish great

things proves that it can be done. There are differences in minds, of course, but the commonplace mind, by grim determination, will often ac-

complish more than the brilliant one which is always ready to take a rest. Just to "keep plugging" will not accomplish much. But to keep plugging with all the power of the mind will, and must, accomplish a great

"To watch the corn grow, or the blossoms set; to draw hard breath over the plowshare, or spade; to read, to think, to love, to pray—these are the things that make men happy."

SALADS, SALAD MAKING

S ALAD time is from January to December, any time is salad time. The important thing to remember is that in salads are almost always the foods we need most. Green vegetables, fruits and succulent vegetables such as celery, cucumber, cabbage and green pepper, with the crisp and tender lettuce.

A crisp and delicate dish of salad will often cause the meal of heartier food to be well digested; without it, these foods could cause distress.

If one does one's own marketing, it is a delightful way to get an early morning walk and choose your own Certain green vegetables, too small

or unattractive as to shape and size, though perfectly wholesome, may be used for salads, as they are to be cut into pieces.

Small-sized fruits which may have discolored skins, lowering the price, can be purchased for various salads and desserts. The quality is just as good and quite a saving on the food bills can be made in this way. This is true of celery, lettuce and many vegetables and fruits.

A handful of nuts, too few to serve as a whole, a bit of cheese too small to serve to guests, may be utilized in a salad and make a most gratifying dish. When there is too much acid in the blood, such fruits as produce an alkaline reaction should be served. Oranges and grapefruit are among

Cardinal Salad.

Dissolve a package of lemon jello in one and one-half cupfuls of boiling water, add one-half cupful of the canned juice of beets. When cool add one cupful celery shredded, one cupful of diced cooked beets, one-half cupful of Spanish onion chopped fine and one green pepper finely shredded. Add one teaspoonful of salt and pour into molds to harden. Serve on lettuce, unmolded, with a mayonnaise dressing.

TANEYTOWN, MD.

GENTLE wind crept down from the whispering pines on Mount Kildorne and dropped a crisp, dry leaf at the feet of an Indian maid.

Ti-Bi-Wansi smiled and listened. With a quick movement she tightened the fur jacket about her and glanced from the brown leaf at her feet to the great pines that seemed to taper into tiny bushes at the timber-line. From the mountainside came the sound of rustling pine cones.

"A message from him," she murmured. "It is a signal."

Ti-Bi-Wansi skipped briskly to the

fur-lined tepee at the foot of the valley, the last stand of the Cokii tribe before the advance of the white man. It was their only home, their reservation. She crept inside. Squaw Red-Sun Wansi sat upon the blanketed floor, and arose as the girl entered. Ti-Bi-Wansi's eyes were dancing-

"The pines are whispering tonight," she murmured eagerly, nestling in the older weman's arms. "They bring me a message from him. With the moon I shall go." The old squaw brushed a tear from her eye with a furred

"The food pouch is ready," the squaw replied. "But you must wait. Soon the west winds grow and the pines sing loud. Then you go to him and they not know."

Ti-Bi-Wansi was vibrating with life -eager for the chase. But she waited beside Squaw Red-Sun Wansi for the rise of the west wind.

At the lower end of the valley Chief Redfire Wansi sat with his men around the campfire. The talk had died and on'y the whispering of the pines above could be heard. The wind grew stronger and as an Indian stirred the fire sparks from the blazing wood soared high in the air to fall beyond the squatting men.

The chief broke the silence. "The white man hides in the rocks above the timber-line. There is no food above the trees, and there is no wood. But last night we see the white man's fire, and he should die without food." The chief paused a moment. He leaned toward his men. His voice was lowered.

"Some one goes through our guards and takes him food and fuel. Tonight the guard is double. Warrior Moonfire shall watch the pass."

Moonfire moved uneasily and drew his blanket closer about him.

"Tomorrow," continued the chief, "we go above the trees after the white man. But the one who takes him food must be brought here tonight!" The words were followed by a stony silence.

Presently Moonfire arose and started toward the mountain.

The Indians remained silent. Twenty days the white man had been trapped on the rocky cliffs about the line and each day the vigilant Indian guard had been changed. He had wooed the chief's daughter, and among the Cokii the penalty for a white man was death. In a scuffle the suitor had escaped to the cliffs with an ankle broken. Three warriors guarded the pass through the pines to the lower valley. The only other means of escape was down a steep pass, dropping from crag to crag, a feat impossible for a crippled man.

Squaw Red-Sun Wansi had heard the chief's orders to Moonfire from a secret hiding place. She hurried back to her tepee where Ti-Bi-Wansi waited. The girl arose as the old woman entered shaking her head doubtfully. She took the girl into her withered arms and said hoarsely, "Moonfire watches the pass tonight. You must go over the cliffs."

Ti-Bi-Wansi straightened and grew tense. Many a brave had perished in that attempt. The light in her eyes grew brighter as she seized the pouch of food from the floor. "Fear not for me, Squaw Red-Sun," she said. "But if with the sun I am not returned take this to him." She placed a tiny dagger into the older woman's hand. "Tell him not to be taken by my people."

Ti-Bi-Wansi slipped quickly out to the foot of the mountain and swung to the west toward the cliffs. The Indian guards would be listening, but tonight the pines were singing in the west wind and would deaden the

sound of her footfall.
Ti-Bi-Wansi reached the upper ledge in safety and exhaustedly pulled herself over the rock barrier. She lay weary for a moment on the fat rock above the pass. Several hundred yards below she saw Moonfire and the Indian guards pacing up and down the opening. Slowly she arose and started through the pines to the upper rocks. There the white man eagerly waited and saw Ti-Bi-Wansi through the moonlit trees. A moment later herbeautiful body swayed in his arms.

"Ti-Bi-Wansi," he murmured. "Ti-Bi-Wansi!" She cried softly as he kissed her lightly on the lips.

An hour passed and the moon crept overhead. The lovers did not feel the wind die down nor notice that the singing pines had crooned themselves to sleep. Even the slightest sound could be heard by the guards at the pass below. The eagle eyes of Moonfire were trained on the mountainside. and his ears were eager for any sound from the pine groves.

Ti-Bi-Wansi spoke to her lover. "Tomerrow they come for you. They

know you get food. Tonight you must go into the valley."

The white man looked down at his bundaged ankle. The Indian guarded the pass and with it the cliffs were norsible. "But Ti-Bi-Wansi," he replied, "it is death to try."

The Indian girl smiled. "You love me?" she asked.

"More than all." He kissed her tenderly. "The pines whisper all day of you, and each night when the west wind grows they seem to sing to all the world-'Ti-Bi-Wansi! Ti-Bi-Wansi." His voice trembled.

"And I love you," she whispered. Neither spoke for a moment. Then Ti-Bi-Wansi moved away. "Watch the guards," she said. "When you see them leave the pass, move quick17 down the mountains. When the pines whisper again, I will meet you in the next valley." Her voice wavered.

"Or," she added, turning her face away, "with your great white God we shall meet." She hurried toward the pines. The white man called softly to her as she moved, and once it seemed she would turn back.

The white man wondered. He could not understand-"Or with your great white God we shall meet."

He watched her silhouette. She moved away from him, slightly toward the cliffs and nearer to the pass. Presently he saw her reach to the ground and pick up a small branch, deliberately breaking it in her hands. It snapped with a loud crack. The guards below suddenly straightened and moved it a run toward the silhouette. The white man moved painfully forward. Moonfire had seen Ti-Bi-Wansi. She was running toward the cliffs in order that he might escape through the pass.

The white man stopped, speechless. The pass was left unguarded, but still he did not move. He saw the form of Ti-Bi-Wansi start slowly over the edge. A moment of breathless silence and she had started the journey into the valley. A few seconds later the sound of slipping rocks was heard, followed by a dull thud in the valley below. The white man buried his face in his hands.

"Oh, God!" he cried. "Ti-Bi-Wansi! Ti-Bi-Wa si!" Slowly he dragged himself to the ledge as Moonfire and the guards returned to the pass.

"With the great white God we shall meet, Ti-Bi-Wansi. In His grove of whispering pines.'

The sound of slipping rock echoed through the valley below. The warriors around the campfire looked silently up and drew their blankets closer about them. A light wind sprang up from the west and breathed a song among the pine cones.

Waves of Electricity Revealed by Accident

Wireless telegraphy is another example of accidental discovery or invention. Probably most persons know that wireless messages are sent by means of waves of electricity that travel through space, although they may not know just how this is accomplished. These waves were discovered by a scientist through an unexpected happening in his laboratory. He possessed two pieces of electrical apparatus, known as leyden jars, h were charged with electricity. One was unintentionally discharged and immediately the other one across the room discharged itself with a sharp crack and brilliant spark.

This set the scientist thinking along unaccustomed lines, and he concluded that there must have been some kind of wave, similar to that of light or sound, yet invisible and inaudible, passing from the one jar to the other. Of course, it was a big step from this simple experiment to a present-day wireless installation on board a huge ocean liner, but it was the very first and necessary step in the discovery of wireless telegraphy.-Washington

The Touch of Jade

To the Oriental it is not the appearance of jade which possesses the greatest charm, but its 'eel to the hand. Here is opened a whole new realm of appreciation unknown to us in the West. This delight to the sense of touch is called "jun," which means "soft, like morning dew or gentle rain; it also means an elegant, glossy surface. It is a quality which corresponds to harmony in sound, to grace in movement. It is also defined as 'wen,' warm and smooth like the flesh of a child; again as 'chen mi,' fine and close, like the texture of a delicate silk fabric." It is this peculiar quality of jade for which it has been most prized in China. Many ancient pieces of jade, surviving in our day, are neither inscribed per decorated. Cut smoothly in beautiful shapes, they fulfill this major requirement of the Chinese.-Cleveland Plain-Dealer.

Roberta Knew

Roberta, age four, had been told by her grandmother she would wear her tongue out if she did not stop talking so much. Coming in one day from playing, the child excitedly told her grandmother that she had just seen a woman who had worn her tongue out. Grandmother asked her how she

could tell and she said: "The woman was talking on her fingers." Grandmother figured out that the

little girl had seen some deaf and dumb person.

A Large Business

Old Lady (meeting sailor on country road)-Sir. do you know my son.

Tack, in the navy? Sailor-Which ship is he serving in? Old Lady-What! Are there two? -Montreal Star.

Smaller Places Not

Losing Their Ground

In view of the general impression that all the young folks are leaving the rural districts to go to the city, it is interesting to notice that the village still maintains its existence and shows no signs of disintegration. Through the country are scattered countless thousands of small towns, frequently located well in the interior and at a great distance from any sizable city at all. These were settled, or at least founded, a long time ago. It might be thought that since cities are constantly growing and devouring more and more territory these towns would be drained of population.

But instead of disappearing the average small town has calmly maintained its existence, not always growing rapidly, perhaps, but not losing ground, either. Now and then a new house goes up, or a new business opens its doors to local employees, or a new store brightens the main street with its attractive display. Some of the residents take up lives in the faraway city, but others move into the town. These may be either city people who are satisfying a lifelong wish to live in the country, or they may be farmers who have sold their acres and retired to spend their late years in the sociable atmosphere of the village.

So the life of the place is renewed, refreshed and invigorated.-Exchange.

Trees Require Care for Good Condition

There are so many decrepid, unkempt, battered and broken trees in all localities that people often wonder if it is really possible to keep trees in a thriving, vigorous condition.

The old unsightly wrecks of trees are frequently a menace and an eyesore to the community. A tree that is not a thing of magnificent beauty is not worth having. And ordinarily there is little reason why trees should not be kept in good-condition.

The principle of taking care of trees is the same as the principle involved in taking care of any other living thing. If attention is not given to defects, and diseases in youth, then it is certain that disintegration and early death will follow. Pretty much the same thing holds true with people.

The expense of removing decayed areas from trees and installing necessary sectional concrete fillings in the cavities, and the cost of other measures that may be required to restore a tree to health and beauty, is necessarily greater if trees are left to decline almost to the point of death before help is given to them.-Chicago

Look to Highways Now

In an article on highway construction the Mobile Register says:

"Particularly should attention be given to wider highways in the original planning and construction of these highways, for it costs less to build a broad, convenient, safe roadway, in the first instance, than it costs to widen these highways after they have been built. That is especially true in the case of city streets where it often is necessary to rearrange buildings used for business purposes. It has cost some of the larger cities vast sums of money to widen streets answering the purpose of arterial thoroughfares, and where it is possible for communities to guard against these burdens it obviously is wise for them to do it."

Proper School Buildings

A project for teaching health through a study of school buildings, past and present, is suggested by Harriet Wedgwood in an article in Hygeia Magazine.

Much can be learned about what constitutes a healthful environment by collecting information about school buildings and grounds and comparing the findings with accepted standards with respect to sanitation, heating, lighting, seating, cleanliness, water supply, drinking fountains, toilets and other features.

Land Value Governs

The less expensive the lot the more money is left for the house itself, and a well-constructed home on a cheap lot is far more desirable than an unsatisfactory house on an expensive lot. Although a house that is very much more expensive than its neighbors might be hard to sell at a good price, a very cheap house may add nothing at all to the sale value of an expensive lot.

Fosters Desire to Create

The desire to create, to fashion something with one's own hands, is unquestionably the foundation for much of the real accomplishment so characteristic of home-loving people, who more than ever are taking constructive interest in their surround-

Beauty Real Consideration

We are living nowadays in a world where beauty is a real consideration and the ideal to be striven for, and where color and design are recognized as contributing a most important eie ment to the homes in which we live.

OFFERS RICH PRIZE FOR SAFETY IN AIR

Guggenheim Acts to Take Peril From Flying.

New York .- Man's mastery of the air has reached a point, the Daniel Guggenheim Foundation for Promotion of Aeronautics believes, at which the factor of safety must be given greater attention if the possibilities of aircraft are to be adapted to transportation.

To hasten the day when a reliable plane in the hands of any good pilot will be as safe as a railroad train or a motor car, directors of the Guggenheim fund have set aside \$150,000 in prizes, to be awarded to planes which meet most satisfactorily nine requirements for airplane safety.

The competition is to be concluded by October 31, 1929. Five British and two American manufacturers of aircraft already have entered the race.

Nine Tests Submitted. These are the nine tests with which

aircraft must comply: The plane must maintain level and controlled flight at a speed not greater than 35 miles an hour and must be able to glide for three minutes with all power switched off, during which the speed must not exceed 38 miles an

hour. The plane must come to a complete stop within 100 feet of the spot where it first touches the ground in landing.

A steady glide must be made over an obstruction 35 feet high and the plane must come to a complete stop within 300 feet of the base of the obstruction. This is to test the ship's ability to make a forced landing in a small space surrounded by wires, houses or trees.

The plane must clear a 35-foot-high obstruction from a starting point 500 feet away.

With all power switched off, the plane must glide at an angle of not more than eight and not less than sixteen degrees and at a speed not greater than 45 miles an hour, to test its ability to approach an uncertain land-

ing place in event of engine failure. In normal flight, at a speed of 45 to 100 miles an hour, the pilot must take both hands off the controls for at least five minutes, to demonstrate the ability of his craft to right itself after disturbances from wind gusts or from the application of controls.

The plane must show that if its engine fails it will assume a gently gliding position and make an easy landing. The pilot must pull his elevator control to a maximum extent at the moment the power is switched off and the ship must descend on a steep glide at a speed of not more than 40 miles an hour.

Three independent controls must be placed on the ship, any of which will keep it in perfect control if the others are switched off.

The plane must show its ability to take off and to land on a plot 500 feet square surrounded by a 25-foot obstruction, and it must taxi under its own power along the ground against a strong wind.

Schedule of Awards.

Of the prize money, \$100,000 will go to the competitor whose entry wins the highest number of points in four of the nine safety tests. Ten thousand dollars will go to each of the first five entries to satisfy all the requirements.

Judges are Orville Wright, R. Trubee Davison, assistant secretary of war for aeronautics: Edward P. Warner, assistant navy secretary for aeronautics; William P. MacCracken, Jr., assistant secretary of commerce for aeronautics; Commander Richard E. Byrd and Dr. George W. Lewis. Three technical advisers-Prof. Alexander Klemin of New York university, Maj. R. F. Mayo and Lieut. E. E. Aldrin of Massachusetts Institute of Technology will assist the judges.

"Any effort to make air traffic an integral part of our national commerce life," says Harry Guggenheim, president of the fund, "must first reduoe and as nearly as possible overcome the popular skepticism of air transportation.

"The average man likes to send his mail by air but he lets somebody else do the flying. If present air hazards are reduced, air traffic will come into its own as a common method of trans-

War on Corn-Borer Is Possible With Wormwood

Paris.-The corn-borer, which threatens disaster to the corn belt of the Middle West, can be fought successfully, think French scientists, by introducing wormwood into the United States.

This was given definitely as a fairly certain solution by Dr. E. Roubaud of the Pasteur institute, in a paper read before the Academy of Sciences by Doctor Bouvier. Doctor Roubaud is chief of the Pasteur institute's entomological laboratory.

The devastating corn-borer, called here "pyrale," is prevalent in France and is said to have been taken to America by way of Canada, Here, however, it prefers life in the weed-like plant wormwood, says Doctor Roubaud, and therefore is not a menace to agriculture or horticulture.

Wormwood, fairly rare in the United States, is prolific here, where it was used in the manufacture of absinthe, the liquor now prohibited.

Unbelievable

Aberdeen, Scotland.-A Scotchman made a journey costing 30 shillings in order to collect a government pension of 10 shillings.

Ostrich Classed as

an Error of Latar

The full-grown ostrich som time weighs more than 300 pounds and is as much as nine feet high, writes Martin Johnson in the Saturday Evening Post. His most marked characteris tic is the fact that he has only tw toes-the third and fourth-on each foot.

In South America there is another large bird-the rhea-which is also called an ostrich. This bird can be distinguished from the true ostrich by its having three toes instead of two. According to the biologists the original ostrich had five toes. However. the modern bird can probably run faster with the two it has now than could his ancestors with five. Arabian legend has it that the os-

trich is the result of a union between the camel and a dodo bird. Certainly it inherited some of the worst characteristics of both. Its awkward shape, the uselessness of its wings, its seeming lack of pleasure in life, all indicate that it is one of nature's er-

The only weapon at the command of the ostrich is its foot. The terrific downward stroke of its huge toe driven by a muscular thigh the thickness of a leg of mutton is easily the equal of the kick of a full-grown horse. A blow from it will break a rib or the backbone of any ordinary animal. In addition to the force of the blow, the sharp claw can tear skin and flesh like a military saber.

Powers of Endurance

in Wild Creatures

Dogs and wild animals of the same family are remarkable for their quickness and staying power in running. Wolves will travel 60 miles in a night. Nansen saw arctic foxes on the ice nearly 500 miles from land, and found their tracks in the snow on the parallel of 85 degrees north.

Eskimo dogs can travel 45 miles in five hours, according to Hayes, who relates that he drove his dog team seven miles in half an hour. A Siberian dog on good ice will draw about 80 pounds; our ordinary dogs at fuil speed run at the rate of from 33 to 49 feet per second; setters and pointers can travel about 181/2 to 21 7-10 miles per hour, and can maintain this speed for two or even three hours.

Foxhounds are very fast, and in a recent trail one of them beat a thoroughbred horse, covering four miles in six minutes and a half. Greyhounds can run at the rate of 59 to 75 feet per second.

Many Uses for Flaxseed

Flaxseed is grown primarily for the production of linseed oil, each short ton of seed producing from 70 to 80 gallons of oil, which is used in the manufacture of paints and varnish, linoleum, oilcloth, printers' ink, patent leather, imitation leather and sundry other products. The cake that is left after the oil is pressed out is valued as a feed for dairy and beef cattle and finds a ready market. A large part of the cake produced in this country is exported, principally to the Netherlands, Belgium and the United Kingdom. The United States is the second largest producer of flaxseed in the world, but, in spite of this fact. this country is also the world's largest importer of this product. Our production ordinarily takes care of about 55 per cent of our domestic requirements. This year the United States produced approximately 24,270,000

Less Rain in Future?

During the last half century the world's average rainfall has, according to weather records, decreased about one per cent. This has been considered due to outside influences such as variation in sunlight, but an Indian weather expert has put forward a suggestion for the decrease that is quite plausible.

He suggests that the lack of rain may be due to an oil film, less than a millionth of an inch thick, spread on the surface of the ocean by ships that burn oil for fuel. Evaporation of ocean water is the chief source of rain, and this film of oil may be sufficient to retard evaporation.

The Shorter Word

The day before Christmas, Edith, ten, had a number of packages tied up for distribution. The doctor felt of one intended for Uncle John, "That's some tobacco," said the doctor, as he fingered the package.

"How can you tell?" asked Edith. "Because I am a good diagnostician," he replied.

Then, as Edith seemed somewhat dazed at the big word, the doctor inquired: "Do you know what a diagnostician

is?" "Yes," she answered promptly, "it's a good guesser."

His Philosophy "Man is never satisfied," declared

old Roswell Rickadoo. "The best fishing is always farther down the creek. Every sore-eyed farmer wants to move to town and run a restaurant. The incompetent town man believes he could make a fortune raising chickens. The lazy bachelor thinks he could manage the Belgian hare business. The girl who has a good home wants to become a movie actress. The man with the respect of all the citizens wants to go to the legislature. As the feller said, man never is but always to be blessed."-Kansas City

Unhappy Those Whose Hearts Are Wrinkled

A wrinkled face is often beautiful. In the old a smoth face looks unnatural. Wrinkles can tell life stories. They have a charm of their own.

"Never mind about wrinkles on the face," said an old French writer, "but take care that you have not a wrinkled heart."

That was a striking image, says the London Chronicle. The meaning is plain. We all know people whose hearts are wrinkled. They are not people we like or admire.

There is old Mr. Greedy, for example, whose heart has a deep furrow of selfishness across it. He has always thought of himself first; has sought his own advantage and cared nothing for the welfare of others. This is the result.

The heart of the cruel man is notched by a series of horrid marks, almost gashes; that of the lazy man has little flabby dents on it.

"Calais," Queen Mary said, would be found on her heart. On the hearts of everyone of us our thoughts, our passions, our ideals, our endeavors, leave marks faint or strong. Let us beware they do not make ugly marks. A sorry burden is a wrinkled heart.

Dominant Traits Not

Transmitted by Male It is women, and not men, in the long run, who transmit family traits, points out Rheta Childe Dorr in an

article in Liberty. "Highly-bred male lines run out long before female lines of equal rank," continues the author. "Constant warsaccount, in some measure, for this. In every great war large numbers of superior males are killed off, leaving inferior types to perpetuate the race. The superior women, however, are not killed off, and they not only transmit their heritage to future generations, but they educate and train the children born to the inferior male

"Even leaving wars out af the question, it is a strange fact that lineal male lines disappear earlier than thefemale lines. Thus women are not only the physical carriers of the race, but carriers also of its cultural heri-

What Is the Ego?

When I lift my hand eight inches and turn a leaf of the novel I am reading, I put into operation more forces than science will ever explain. Indeed, they are so numerous and ineffable that science will never complete the mere listing of them. The human intellect cannot know much about the mysteries that are in the action of a muscle. All our philosophers, after 25 centuries of ardent analysis, cannot determine whether 1 resolve to turn the leaf or whether "I" is just a name for the joint action of some neuronic forces. Our psychologists have no conception of what an "I" is. So nothing can be said of the origin of this motion of my arm. It simply appeared from a region as unexplored as heaven.-(From "Exploring the Universe," by Henshaw Ward.)

Middle-Age Scriveners

In the Middle ages it was not given for every one to be able to write and so letter writers, or scriveners, grew into a profession, and whenever one wished to write to a friend, one called upon the scrivener to help him, writes Frank H. Vizetelly, editor of the New Standard dictionary. At that time materials for writing were carried in metal or leather cases worn hanging from the girdle. Sometimes as many as six reed pens, and several kinds of ink, were packed away in the case. There are still places; even in England, where the quill-driver follows his calling.—Detroit News.

First Study of Comet

The comet of 1680 was the first one whose orbit was computed on the basis of the law of gravitation. Newton made the calculations and found that its period of revolution was about 600 years. At its perihelion it passed through the sun's corona at a distance of only 140,000 miles from its surface. It flew along this part of its orbit at the rate of 370 miles per second, and its tail, 100,000,000 miles.long, changed its direction to correspond with the motion of the comet in its

There Was a Difference

Betty, age five, wanted a puppy and was frequently asking her father to get her one. One day daddy decided to fulfill her wish and spent one afternoon making the rounds of the pet shops, but none of the dogs seemed to suit Betty. Finally they drove out to the dog pond, where there were quite a number of dogs, all shapes and sizes. Petty was interested, but not in any one dog. The keeper of the pound said to her: "What kind of a dog did you want, little girl?" to which Betty replied, "I want a colic dog."

Favored Settlement After little Jimmy had listened to

his older brothers saying the Lord's prayer, he felt that he, too, had attained the age at which he might discard his childish prayer for the Lord's prayer. With his mother's consent, he bravely started in. All went well until he came to the words "Forgive us our debts," then his memory failed. He considered for several moments and again bowing his head, he finished with, "Forgive us our debts, and help us to pay them."

(©. 1928. Western Newspaper Union.)

Lesson for February 12

JESUS PICTURES THE KINGDOM OF GOD

LESSON TEXT-Mark 1:14,15; 4:1-GOLDEN TEXT-Thy kingdom come,

thy will be done on earth as it is in PRIMARY TOPIC-How God's King-

JUNIOR TOPIC-How God's King-

INTERMEDIATE AND SENIOR TOP-IC—How the Kingdom Grows. YOUNG PEOPLE AND ADULT TOP-IC—The Growing Kingdom of God.

I. Jesus Preaching the Gospel of the Kingdom of God (Mark 1:14, 15). 1. The time.

After the voice of John the Baptist was stilled because of his imprisonment, Jesus took up the nessage 2. What He preached.

It was the gospel of the kingdom of God. Since "gospel" means "good news," the good news which He preached was that Christ had come to establish His kingdom. 3. How He preached.

He said, 'Repent, for the kingdom is at hand.' The King was then ready to set up His kingdom if the Jews would receive Him.

II. Jesus Pictures Four Classes of Hearers (Mark 4:1-20).

1. The place—the seaside—(v. 1). He was obliged to enter a boat to escape the pressure of the crowd. 2. Why He taught in parables

(vv. 9-12). It was not until the rulers had set their hearts against Him that He em-

ployed the parabolic method. 3. The parable of the four kinds of ground (vv. 3-8;13-20).

Observe that the seed and the sower are the same in all these instances. but the results are entirely different. determined by the condition of the

(1) The Wayside (vv. 14, 15). The wayside means the track beat en by the hoofs of animals and the

feet of men. Because the soil was un broken and uncultivated the seed could not get beneath the surface therefore was devoured by fowls. which represent the agents of Satan

(2) The stony ground (vv. 5, 6, 16.

Stony ground means stones with a thin layer of soil upon them. Under such conditions the seed springs up quickly and is soon scorched because it has not much depth.

(3) The thorny ground (vv. 7, 18,

In this case the ground is good, but has thorns in it. It is mellow and has depth, but has not been cleaned of the thorns. The thorny ground hearers of this age are: (a) Those who are so immersed in worldliness. business and anxious care that the good seed cannot mature: (b) those who are rich. The effect of riches is often to blind the spiritual perceptions; (c) those who are running after the pleasures of life. All these things choke the Word.

4. The good ground (vv. 8, 20). This ground differs from all the rest. It is soft and mellow, deep and moist, therefore is capable of bringing forth fruit in varying degrees of

abundance. III. Jesus Pictures the Growth of the Kingdom (Mark 4:21-34). 1. The parable of the candle (vv.

21-25). The bushel stands for the cares and

material things of life, and the bed for ease and comfort. 2. The parable of the growing

grain (vv. 26-29). (1) The attitude of mind of the

gospel preacher (vv. 26, 27). He should with the utmost fidelity cast seed into the ground, preach the Word, and leave results to God.

(2) The processes of the spiritual tife are gradual (v. 28). It is "first the blade, then the ear, after that the full corn in the ear."

(3) The consummation of the spiritual process (v. 29).

Despite the difficulty under which sowing is done, we can be assured of a harvest time.

3.—The parable of the mustard seed (vv. 30-34).

(1) The unimportant beginning (v. 31). 2) Its vigorous growth (v. 32).

The greatest power on earth today is that which had its inception in the preaching of the gospel.

(3) Its lodging capacity (v. 32) The birds which lodge in the branches represent the children of the evil one who find protection and food in that which was inaugurated by Jesus Christ.

Worship God

First worship God. He that forgets to pray bids not himself good-morrow or good-day.-T. Randolph.

Serving God

God is better served in resisting a temptation to evil than in many formal prayers.-William Penn.

The Soul

Oh how much greater is the soul of one man than the vicissitudes of the whole globe!-Bulwer-Lytton.

Lilac Always Blossom

of Love and Lovers The lilac is an oriental blossom.

coming to us originally by way of Turkey and Spain. It is supposed to be the flower of love and lovers, marking the heyday of spring. The lovelore of the "laylock," to give it an Old-world name is varied and pleasant. A spray of white lilac, buried on the eve of a May moon, is a midland charm which maidens practiced, believing that by the time the lilac died they would have the heart of the man they desired. If as many lilac petals as composed the name of a lover were strung on triple threads of white silk, and worn in a little bag next to the heart, before next lilac time came the lover would be won by this secret charm. If you have lilac in your garden no ghost can enter your house; if white lilac grows beside your door you will never be without love and luck; if you pluck a spray of lilac without your lover's knowledge when walking with him. put one of its petals in his drink; if he swallows it, he is yours forever and a day. A "luck lilac," usually found on white lilac, has five divisions of the petal instead of four. If you are in love, look for a luck lilac, swallow it, and your loved one will be faithful for all time! Thus love and lilac are irrevocably related.

Beds of Clay Reveal

the Passage of Time Geologists can follow the tracks of the sun and tell the time, year by year, in geological ages-so ancient that even by millions of years they

are hard to count. Not far from Stockholm there are some remarkable beds of clay, regularly arranged in alternating bands of sand and clay. These turn out to be the layers deposited by the melting glaciers of the Ice age, each one laid down in the spring and summer when the sun was hottest. And as there was a freeze-up each winter and melting each summer, the layers become almost as accurate an index to the antiquity of the Ice age as the annual rings of a tree are to the age

of the tree. Moreover, the same system of meas uring geological time has now been extended over all Scandinavia, and parts of India and South America. Everywhere the layers appear to correspond so closely in the variations of their thickness, year by year, that there seems no doubt they were laid down in corresponding years.—Baron Gerard de Geer.

Gas From Oil Wells

Vapor that rise from oil wells and which has hitherto gone to waste is now being bottled and sold as fuel. This vapor is obtained from wells that are in production or from wells that have been pumped out, and burns with an odorless gas flame after it has gone through various processes.

It is first refined and compressed until it becomes a low-pressure liquid that reassumes its gaseous form on being released from the steel bottles in which it is stored. These bottles are attached to heating appliances by pipes and tubes. When the valve of he jet is turned on the nr the gas forces it through an air mixer similar to that of any gas range.

Confucius Great Sage

The man whose memory has for 2,000 years aroused signal respect and honor in China was a sage, not a saint nor a founder of a religious faith. Confucious took the best of the various Chinese philosophers of his day and formed a cult of his own, using as a basis five cardinal virtuesrighteousness, knowledge, sincerity, politeness and discrimination of good. The wisdom of the Chinese Solomon so delighted the people that temples were built in his honor, his wise sayings were widely quoted and came to be taught in the Chinese schools.

The Hobo Instinct

One of the primal instincts of man which refuses to be eradicated is the wandering urge. It originated, undoubtedly, from necessity. The need for changing hunting grounds and camp sites was always present in prehistoric and early historic times. Later when people settled down, founded towns, and agricultural districts became established, the necessity for this urge ceased to some extent. The instinct of wishing to see new lands, however, has continued and undoubtedly that is one of the reasons for the present popularity of motor camping. -Field and Stream Magazine.

His Preference

'A Scotch member of a golf course near London took a business friend for a day's golfing. After the morning round they lunched very sparingly on biscuits and cheese. "Man," cried the enthusiastic Scot as he gazed through an open window, "this is my favorite course. Isn't it yours?"

"Er-not exactly," replied the starving guest. "I should have preferred a good steak and onions."-London Answers.

Finale The lecturer was emphasizing the

demoralizing effect of divorce. "Love," he said, "is a quest; a proposal, a request; the giving of a daughter's hand in marriage, a bequest, and marriage itself the conquest. But what is divorce?"

Voice from the audience-"The in-

quest."

ommunity

Several Reasons for Vitality of Village

Near large cities, of course, real estate subdivisions inflate the little settlements, and they grow out of all recognition of their former selves, going well along the way to becoming cities themselves. But farther away the contributing factors to continued existence are some extremely modern developments which one would hardly suspect. The country depends upon the automobile; the country people learn that it can take them away from their isolation and provide that temporary escape so necessary to a tranquil existence. Very well, then, what need to move away permanently from a familiar and pleasant location, where the family is comfortably settled? If they wish to go anywhere for a change there is the car.

Then, of course, radio is another influence, for it brings to the outlying districts a full measure of entertainment, information which sometimes has its monetary value, and also a bit of that sophistication that is most prized of all. Electric machinery both in the home and in the farm buildings makes existence more pleasant and less arduous, and the telephone connects friends and relatives.

Taking these things into account, the vitality of the village is not puzzling. It has survived the era of change and mastered a difficult situation by adopting the changes itself in stead of resisting progress. The United States is still full of small towns, and it is safe to predict that this fortunate circumstance will continue in force for many generations to come.—Philadelphia Record.

Driveways and Walks

Add to Home Beauty

Perhaps there is nothing that lends more to the appearance of the surroundings of a home than neat, artistically placed walks and driveways.

Careful thought given to their placing and arrangement at the time they are built will more than repay the owner in the attractiveness they will add to the exterior of the home. Every lawn offers a variety of possibilities in location and arrangement.

Like streets and highways, walks and driveways must be designed to meet the needs of those who use them. While it is generally desirable to have them take the most direct route, pleasing effects can often be obtained by the use of graceful curves. It is folly to destroy a fine tree because it happens to be in line with the route of the walk or driveway: a graceful curve around the tree does not inconvenience anyone and it will add to the

beauty of the home surroundings. Often such curves can be arranged so that the garage is partially hidden behind a clump of trees or bushes. In building such curves, provision must be made for the growth of the tree to prevent it from raising or cracking the concrete.

Build Permanent Home

The permanence of the modern home is just as important as the permanence of all other buildings, yet you seldom find anyone as much concerned about the durability of the materials that go into homes as about those that go into schools, hospitals, office structures and the like. The mere fact of difference in size of the buildings seems to have made a difference in the public mind. Yet homes are everywhere acknowledged to be the bulwarks of the country, and the ope and number of homes are usually taken as a good criterion of the stability and prosperity of a population.

Zoning Gaining Favor

Among outstanding achievements of the last year or recent years, says the Kansas City Times, are the passing of enabling acts in more than a score of states which legalize zoning in cities and towns; the decision of the United States Supreme court which established, in a definite and comprehensive way, the constitutionality of zoning; the growth of the regional planning idea, and notable progress in several large cities in the actual carrying out of zoning and planning pro-

Keep Woodwork Painted

The home owner who remembers that unprotected wood weathers and decays, protects it by keeping it well painted at every point. The tough flexible waterproof film which good paint forms over wood is a needed protection, rewarding the home owner by value and appearance maintained over a long period of years.

Saving Trees and Shrubs

When building a home it is advisable to make the contractor responsible for trees and shrubs you wish saved. This may be done by including a statement concerning them in the general conditions of your contract.

Fence Frames House

To the artistic eye a home is a picture with the house as the center of interest, around which group, in pleasing composition, those other elements that create an atmosphere of restful charm and quiet privacy.

Platinum's Value at

First Not Recognized At one time platinum was regarded as a nuisance. Today it is more val uable than gold.

Scientists have proved that it is the most permanent of all metals and that it resists the action of moisture or the elements for centuries. Platinum is of exceptional value in dental work, because it is not affected by the acids and secretions of the mouth.

It was the Spaniards who brought this metal to the notice of the civilized world. When they were in Mexico and Panama in search of gold they regarded platinum as a nuisance and a dangerous metal because, being as heavy as gold, it was easily mistaken for gold when covered with a coating of yellow metal.

It was not long, however, before they realized its value for making jewelry, and used it for snuff-boxes. sword and dagger hilts, and other ornaments.

It now commands a higher price than gold. When it is in crude ore

form it is like a coarse gravel that appears dull and unpromising. After the first refinishing process the metal is spongy and porous. It is then pressed into round disks. In ancient times the metal was ham-

mered into very thin sheets and then worked up into endless varieties of ornaments, the best specimens of which have been found in Ecuador.

Old Paintings Throw

Light on Indian Life

Six paintings of American Indians made in the 1730's and forgotten for 200 years have been given to the world in reproduction for the first time in a publication, released from the Smithsonian institution. They are drawings of the life and culture of the Indians of Lower Louisiana made between the years 1732-35, by A. DeBatz, a Frenchman, presumably an architect or an engineer.

The drawings are the earliest known to have been made in Lower Louisiana, and they are likewise believed to be the oldest pictures existing of members of the Acolapissa, Atakapa, Choctow, Fox, Illinois and Tunica tribes. The paper has turned yellow with age, but the colors remain clear and bright, and many details are shown with great exactness.

The sketches yield an astonishing quantity of information on the clothing, habitations, temples, fighting activities, games and domestic animals of the Indians around the Mississippi. Though crude, they are very graphic and prove DeBatz to have been a careful observer interested in the customs of the Indians.

Men Like Coffee Beans?

Life standardizes us. We are like so many coffee beans-the same size. the same color, the same smell. Creatures of convention! The very but tons that hold our clothes together are sewed where they are by the dictates of convention. Every article of dress is prescribed by fashion and custom; we eat what we do for the same reason, we get up in the morning, comb our hair, go to our offices, or cook breakfast, wash dishes, and perform the thousand and one things that make up our daily lives, because convention so decides. Some fortunate ones succeed in pursuing more or less independent existences, but the whole tendency of our American life is to make us do the same thing, say the same thing, and think the same thing. -Charles G. Norris in Plain Talk Magazine.

Just Another Container

In "Up the Years From Bloomsbury," the actor, George Arliss, tells of meeting in Boston a delighted old lady, Mrs. Bell, who was then eighty-

"I met her at many gatherings. No dinner party in which she was included was ever dull. She generally kept everyone in peals of laughter and I never heard her repeat herself. She lived in a small house with a small back garden. For a time she kept a pig in the yard and when asked why on earth she kept it, she said: "'Well, we must have something to put things in."

Going Too Far

A city magnate the other day summoned his manager.

"Look here, Robinson," said he. "You'll have to talk to that new fellow, Jones, you took on as shorthand

"Why, what's the matter with him?" said Robinson. "I know he stutters rather badly, but you said-" "I said I didn't mind that, but look at this." The magnate held out a

letter which read: "In reference to yours of the eighth ult." Then he continued: "Stuttering on the typewriter I simply won't stand." -London Daily Chronicle.

Great Educators

The ten greatest educators of the last two centuries, according to Doctor Eliot's list, put forth in 1925, were Horace Mann, Adam Smith, William Ellery Channing, Michael Faraday, Ralph Waldo Emerson, John Stuart Mill, Charles Darwin, Herbert Spencer, Louis Pasteur and Joseph Ernest Renan.

Doctor Eliot also suggested, as the ten greatest educators of all time, Aristotle. John Locke, Francis Bacon, Immanuel Kant, Ralph Waldo Emerson, Claudius Galen, Isaac Newton, John Milton, William Shakespeare and Leonardo da Vinci.

SUPPORT

This amusing wedding incident is related: Among the attendant flower girls was the small niece of the bride. She loved her Aunt Frances and thought everything she did was just right. The minister had put the question, "Do you take this man to be your wedded husband?"

"I do," said the bride. "I do, too, Aunt Francey," piped up the small flower girl, loyally.

Just to Oblige

A botanist had just discovered a new plant and asked his wife what he should call it. The lady was deep in a cross-word puzzle. "Call it Sprzophanx," said she.

"Why on earth should I do that?" he asked in amazement.

"Because that is the word I want to finish this puzzle," she replied .-

Averaging Up

The club bore was holding forth as usual.

"When I was a young man," he said, "I used to talk in my sleep." "And now," said the bright young member, "you sleep in your talk."

COLD RESISTANCE

"Of all the creatures the polar bear

can stand the most cold." "Oh, no; the flapper can let him keep his fur coat and beat him at that!"

His Opportunity

Visitor-I suppose your wife listened in when you were broadcasting,

Professor Tweety? The Professor-She did, madam. And for the first time in nearly thirty years I had the pleasure of addressing her without interruption.

Her Logic

Mrs. A. (at resort)—Doesn't it worry you to write to your husband for

more money? Mrs. B.-Not at all. If he's having a good time he owes it to me, and if he isn't having a good time, he has saved it.

Should Be There "I have come to the country for my health," said the dyspeptic-looking

newcomer.

"Do you expect to find it?" asked his next neighbor.

"I ought to," was the reply. "I left it here last year."—Boston Transcript.

Flight of Time

Meeting with a young woman, he addressed her successively as Jolly. Sally, Roberta and Jeanette. Then he excused himself by saying that he had not seen her in a long time. "Not for four girls, evidently," suggested the young woman.

WHAT SHE MISSED

He-I never dreamed love was like this, did you? She-No, I thought there were more

theaters and candy in it.

Light Lunch "Bring me another sandwich, please.'

"Will there be anything else?" "Yes, a paper weight. That last sandwich blew away."

Could Anyone Say More? Cecil-Can you really think that you love the girl? Charles-Love her! Why, I actually

enjoy the company of her mother!

only to those rehabilitated by the bureau under the vocational rehabilitation act, but to those rehabilitated in bureau hospitals.

Former contacts with civilian agencies are to be renewed, and attention is called to the fact that in filling positions within the bureau that preference be given to persons with service record.

HELPS DISABLED

VETS FIND WORK

gion.

Treetop Home and Diet of Apples Pall on Girl

San Francisco.—Her clothes tattered and hair bedraggled, Anna Michaels, seventeen-year-old telephone operator, stumbled into the Burlingame police station here prepared to prove that back to nature existence is unsatisfactory.

Anna, who ran away from home recently, told Police Chief John J. Harper that she lived at Coyote Point, near San Mateo, for two weeks, sleeping in eucalyptus trees at night and hiding in the woods in the day-her sole sustenance being a bag of apples. All was fine, she told the guardian

of the law, until the last apple was In the meantime, however, Anna's mother, Mrs. Julia Michaels, notified of her daughter's discovery, announced different plans for the young runaway. She was sent to the juvenile detention home in Redwood City and the mother declared she intends to place her in

til the "runaway streak was broken." According to the mother, Anna has run away from home several times because she has been denied parties and dates with boys that Mrs. Michaels did not know.

the juvenile detention home here un-

Many American Eagles Butchered in Alaska

Philadelphia.—The American eagle in Alaska is disappearing under the bounty system of 1917, of that territory, says Dr. T. Gilbert Pearson, president of the National Association of Audubon Societies.

"There are many of these eagles left," said Doctor Pearson, "but from what I saw of them and learned on all hands, it is plain that the bird is far less numerous than a few years ago. Official records of the bounties paid up to August 4, 1927, as supplied me by Karl Thiele, secretary of Alaska, showed that the feet of 40,753 eagles had been turned in for the \$1

bounty (formerly 50 cents).' Doctor Pearson also stated that on all sides the eagles are regarded as destructive to fish, ptarmigans, young mountain sheep, fawns and young blue foxes. "I found it very difficult, however, to find people who had actually seen eagles performing any of these depredations, aside from eating

Beats Out Men

London.-An hitherto unknown girl architect sprang to fame when it was announced - Elizabeth Scott, twentynine years old, of London, won the contest for the plans for a Shakespeare memorial theater at Stratfordon-Avon. More than 70 men architects were entered in the competition.

σοσοσοσοσοσοσοσοσοσοσο New Bulb With Glow After Current Is Off

East Pittsburgh, Pa.—Ordinary electric bulbs glow only when wired to electric power and go out instantly when the power is turned off. In the laboratories of the Westinghouse Electric and Manufacturing company, however, Dr. Phillips Thomas, research engineer, has developed a bulb without wires which

glows when held in a magnetic

field and continues to glow for ten minutes after the power is shut off. Were such bulbs used for lighting, a brisk person could turn out the light in his bed-

room and undress before the room was dark. Doctor Thomas produced the bulb in the course of experiments on power by radio. He

says it is not practical at present for general illumination.

TANEYTOWN LOCALS

items of news from town, or vicinity are always wanted for this column. Especially accidents, sales of real estate, fires, important happenings, visits to or from the community social events, and all matters of general interest to those at home, and

LAST PAGE EDITORIAL.

The Other Side.

There are always two sides to any question. Perhaps, only one "right" side, but another side, nevertheless; and it is but the part of good sense for us to see and understand both sides in order that we may always pass just verdicts. The very fact that others disagree with us is evidence of this "other" side, and notwithstanding the strength of our own convictions, this is not proof that they are always right. We may be merely are always right. We may be merely bumptuous, and over strong in our elf-conceit.

The nearest right man is the one some time at the home of Mr. and Mrs. Asbury Fuss, near Emmitsburg. who takes full account of the rights and honest opinions of others; who gives and takes in controversy, but may not surrender his own conscientious convictions, even when outnum-bered. He is the liberal-minded man who does not consider that only his ideas and plans are right, and all others wrong, and does not "blow up" in ter sleigh, set of single harness, good

the face of opposition. Trying to get the other fellows' view-point is nearly always right, especially when there is a probability bridle, good as new, 5-gal. oil can, 15-that he may have one that seems to him good. It may not convert us, but, few knowing it may permit us to convert him. Seeing the "other" side may be real enlinghtening to us. We do not always know the problems of our nearest neighbor; they may be real and serious, but our ignorance of them stand, 2 cane-seated chairs, ingrain carpet, dishes and tinware, and many other articles not mentioned. gives us a wrong view point

Not being familiar with this ever-present "other" side, represents the main difference between a wise and an unwise leader and adviser. In fact, it is this width of knowledge as to "other sides," that determines one's rightful place among advice givers, and fixes the value of counsel's fees Mr. P. B. Englar, Editor of The and of physician's services. There is a lot of real knowledge in this world, but there is a surprising lot of self-conceit that passes—as far as it

> Teacher—"Tommy, what is one half of one-tenth?" Small Boy—"I don't know exactly, teacher, but cant' be very much."

> Aunt Jane-"Well, Ethel, I see you've landed a man at last."
> Angler's Daughter—"Yes, auntie,

Summer Boarder—"But why are those trees bending over so far?"
Farmer—"You would bend over, too, miss, if you wuz as full o' green apples as those trees are."

REVIVED

An Arkansas father whose son was doing badly in college tried calling him over the long-distance about his

better grades?" he asked. "Can't hear you, father." "I say, can't you make better

"Hello, John. Why don't you make

"Can't hear you, father." "I say, John, do you need any

"Yes, Dad, send me \$50."

Question Revised

A plain spoken clubman said to a fellow member, "How many fools do you suppose are in this club, besides

"Besides myself," replied the other, half inclined to be angry. "I must say I like that."

"Well, then, how many do you reckon including yourself?"

"Wives to Burn" Startling! Shocking, we call it!
