#### No. 51

## CARROLL COUNTY C. E. CONVENTION.

Held in Grace Reformed Church, Taneytown, Thursday.

The 38th. annual convention of the Carroll County C. E. Union was held in the Reformed Church, Taneytown, on Thursday all day. The prepared program was carried out in detail. The opening devotional service was The opening devotional service was conducted by Rev. Lockard. Rev. Guy P. Bready pastor of the church who was to have delivered the address of welcome, was unavoidably absent, and his duty was very acceptably per formed by Merwyn C. Fuss. The response was made by Rev. Geo. W. Ports, president of the Union.

The address of the session was by Rev. Paul Holdcraft, of Baltimore, on the topic, "Doing our best for the Master, where we are, and with what we have." The topic was numerously illustrated with thoughts about personal service always representing our best, not overlooking those things that lie closest at hand, his whole address reminding us of the later Dr. Con-reminding us of the late Dr. Con-promised of the later Dr. Con-Diamonds.

The afternoon devotional was led by Rev. William Schmeiser. Reports were made by various Superintend-ents and State officials. Ten Societies were reported as being represented. Providence M. P. Church invited the convention session for 1930 and the invitation was accepted.

invitation was accepted.

The following officers were elected for the coming year: President, Rev. Geo. W. Ports; Vice-presidents, Mrs. Raymond Wright, Miss Estella Essig, Mr. Carl Haines, Mrs. Paul Lawyer, Mr. Arthur Albaugh, Rev. — Lockard; Secretary-Treasurer, Miss Mae Hill; Jr. Intermediate Supt., Rev. C. O. Sullivan; Alumni Supt., Frank S. Stewart: Citizenship Supt., Rev. J. H. Stewart; Citizenship Supt., Rev. J. H. Hoch; Evangelistic Supt., Rev. C. M. Elderdice; Social Service Supt., Rev. J. S. Hollenbach; Publicity Supt., Guy L. Fowler; Finance Supt., Ros-well Hoffacker; Pastoral Counselor, Rev. F. P. Brose; Missionary Supt., Mrs. Chas. Cluts.

Geo. Smith, State Jr. Supt. in presenting his special work said it was going forward by leaps and bounds. He strongly advocated direct conference work as the feature that counts for most in a convention; that Christian Endeavor is not merely an organization but it is one that emphasizes activity in the church, of effi-cient Y. P. service and a division of the general responsibility for carry-

ing on church work as a whole. Mr. F. C. Dixon, State Field Secretary strongly advocated putting real work into our C. E. Societies; the more we put into a thing we more we get out. He called for questions, and a number were asked. How to plan for committee activities? He strongly urged the careful study of the various C. E. publications on this question, then think and think, and study carefully what may be done. The question concerning Socials is also covered by literature to be had. C. E. is especially for youth, but it everybody, and throughout all lines of work the first thing is co-operation. At this time Mr. Dixon was asked to give way to the main speaker of the afternoon and finish later.

Rev. Russell Bradley Jones, of Baltimore was introduced, who spoke at length on "Life's Possibilities," text taken from Matt. 16:25. God gives us the chance to choose good or evil; the difference between the best man and the worst man presents the greatest contrast in the world. He then gave a comparison between two of the twelve-Simon Peter and Judas. Peter espelially represents the same possibilities as we have for ourselves -what a man may become in later years. Judas was a man held high in the esteem of his associates, but was never a converted or saved man. Of all the tragedies of human history that of Judas Iscariot is the saddest, considering what he might have been and what took place at the end of his journey. The life of Peter represents the exact contrast.

The evening session was preceded by a parade headed by Rev. Hollenbach's C. E. band. For a hot evening the parade was a very creditable feature; and the concert that followed it, on the church lawn, was just the needed inspiration with which to open

the last session. The devotional service was charge of Rev. C. O. Sullivan. President Ports extended a bouquet of thanks to all of the agencies and individuals that helped to make the convention a success, and introduced the speaker of the evening, Rev. T. Roland Phillips, of Baltimore, who pre-sented a Bible message, embracing the coming, the life and purpose of Jesus, who can not be set apart but is present now, everywhere, notwithstanding his triumphant ascension. In him we follow a leader who is above all sin; who ascended and sat down at the right hand of God because he had finished his first mission, but is still our ever present Saviour. His theme was beautifully developed as well as force-

fully impressed on the audience. Throughout the day excellent musical numbers were presented and in every respect the convention was most efficiently managed, without loss

(The Editor of The Record regrets that his plans for reporting the convention were seriously interfered with by various unforseen happenings, and that only this very imperfect fragmentary account of it can be given.—

In handling their women folk all men appear equally talented and equally stupid.

## THE NEW "STOP" SIGNS Main Boulevards Designated as Having the Right of Way.

The new "boulevard" law went into effect last Saturday night. This means that certain designated highways have privileges over intersect-ing highways, in that drivers of ve-hicles must come to a full stop before entering or crossing the high-way so designated. All crossing points are marked with large yellow stop" signs placed at the right of

According to provision, it shall be unlawful, where signs are erected, for the operator of any vehicle to fail to stop, except when traffic at such marked intersections is controlled by

traffic signals or officers.

The operator of a vehicle entering a highway so designated shall yield the right of way to all vehicles approaching on such a highway, the law says, provided that at the intersection of two highways so designated all vehicles shall have the right of way over other vehicles approaching on the intersecting highway from the left and shall give the right of way to those approaching from the right.

#### Thomas H. Lewis, D. D.

Rev. Thomas H. Lewis, D. D., former president of Western Mary-land College died at his home in Washington at an early hour Friday morning, June 14 from angina pec-toris, in his 77th. year. Dr. Lewis was a distinguished

minister, educator and author. He was President of the W. M. Theological Seminary from 1882 to 1886, and from 1886 to 1920 was President of the College, serving with distinction and success. More recently, and up to the time of his death, he was Editor of the Methodist Protestant.

Funeral services were held on Sun day afternoon in Baker Chapel, with Dr. H. L. Elderdice in charge. Interment in Westminster cemetery.

#### Five Cows Killed by Lightning.

During the heavy thunder storm, Thursday evening, possibly about 9, o'clock, five cows were struck by lightning on the farm of Howard E. Hyser about 3 miles east of Taney. town. Mr. Hyser did not discover the loss until Thursday morning when he found the five animals in a pile under a tree in a field. His insurance of \$75.00 per head will not near cover the loss, as some of the animals were extra good ones and all were good

There were thirteen cows in the field at the time, but the other eight must have been some distance away The maple tree under which the five cows stood that were killed showed no signs of lightning, but the cows were marked under the belly and at the neck, as though scorched. A theory is that the current that killed the cows was carried by a wire fence about 30 feet distant from the tree.

## Gettysburg Battlefield Data.

The following facts are taken from the recent souvenir program of the 63rd. annual G. A. R. encampment at Gettysburg, and concerns the battle-

Covers approximately 25 square

Has 34.25 miles of improved avenues, and 24 miles of other roads many of them now improved.

Has 837 monuments and markers. Has 6 bronze equestrian status-Reynolds, Alocum, Hancock, Meade, Sedgewick and Lee.

Has 27 bronze status on monuments Has 27 granite status on monu-

Has 927 bronze reliefs and tablets.

Has 442 iron tablets. Has 321 granite tablets.

Has 417 guns mounted. Has five great steel observation owers so located as to cover the

whole field. National cemetery has 17 acres and

vast variety of trees and shrubbery. was a corn field at the time of bate. Dedicated Nov. 17, 1863. The bodies originally buried in the

National Cemetery numbered 3590. More have been added and are still being added from time to time. From 1870 to 1873 the bodies of 3330 Confederate soldiers were ex-humed and buried in Southern ceme-

teries-most of them at Richmond, The total number killed in the bat-

on both sides, was approximately The government owns, outright, 2,428.95 acres of land on the battle-field. The balance is under private

ownership, or included in public streets and roads.

## July Union Services.

The Protestant Churches of Taney town will unite, as usual, in a series of union services during the month of July. The program of services is as

Sunday evening, July 7, United Brethren Church. Sermon by Rev. Guy P. Bready. Sunday evening, July 14, Lutheran

Church. Sermon by Rev. Thomas T. Sunday evening, July 21, Reformed

Church. Sermon by Rev. A. T. Sut-Sunday evening, July 28, Presbyterian Church. Sermon by Rev. George

A. Brown. All the services will begin at 8:00

The average person is a creature of many angles, and it is rare that even a close friend knows all of them. Be not surprised, shocked and grieved, therefore, when you accidentally dis-cover that your best-loved friend is

## **GREAT STORM DAMAGE** IN CARROLL COUNTY.

## Losses Mostly Caused by Fire and Lightning.

The electrical storm of Wednesday night and on Thursday, caused an un-usual amount of loss in Carroll Counv. heing much heavier in some localities than in others; but the rainfall

was not heavy generally nor was there enough wind to cause damage.

Thursday evening at perhaps about nine o'clock, lightning killed five fine cows for Howard E. Hyser east of l'aneytown, a more complete account

of which appears in a separate item.

A large bank barn owned by the B.
F. Shriver Canning Company near
Stonesifer's school house known as the old Lawyer farm, was struck by lightning and totally destroyed. The loss is estimated at about \$5000, with partial insurance.

The pea viner of the Shriver Com-

pany on the road to Manchester was struck by lightning but not greatly damaged. The home of Amos Smelser along the Littlestown road near Westminster was also struck, but only slight damage was done.

Bad washouts on the W. M. R. R. near Carrollton prevented the early mail on the W. M. R. R. from making its run over the main line, and it was detoured by way of Hanover and Highfield, delaying the main line mail

until nearly noon. on Wednesday afternoon the barn on the farm of Harry E. Fleagle, near Mayberry, was struck by lightning but only partly damaged. The Westminster Fire Company arrived in time to render aid, but the Taneytown Company was held up by a flood be-

fore reaching Mayberry.

About the same time as the Fleagle fire, or later, lightning killed two cows for Oliver Heltebridle, near

Mayberry. Some sections of the county suffered no loss and had little rain, while others only a few miles distant, had of thunder and lightning.

#### Proceedings of the Orphans' Court.

Monday, June 17th., 1929.—Norman A. Smith received order to withdraw

Maggie S. Robertson, executrix of James J. Robertson, deceased, returned inventory of personal property.

May B. Reed, executrix of Christi-

ania Barnes, deceased, returned report sale personal property and set-tled her first and final account.

Westminster Deposit and Trust Company guardian of Lawrence My-ers Russell, ward, settled their first and final account.

Bertie L. Biehl and John S. Biehl, executors of Laura F. Biehl, deceased, received order to sell real estate. Sadie Martin, executrix of Charles T. Martin, deceased, returned inven-

es personal prope Blanche M. Harp, administratrix of Daniel J. Harp, deceased, received order to execute deed and settled her

George E. DeBerry and William E. DeBerry, executors of John W. De-Berry, deceased, returned inventory current money and settled their first

and final account. Letters of administration on the estate of Columbus Elseroad, deceased, were granted unto Samuel Elseroad, who received warrant to ap-

oraise personal property and order to notify creditors. Mary E. Koons, executrix of Clayton Koons, deceased, settled her first

and final account. Tuesday, June 18th., 1929.—sale of real estate of Charlotte

Jordan, deceased, was finally ratified by the Court. Charles B. and M. Francis Ying-ling, administrators of Mark Yingling, deceased, received order to make

William F. Jordan, executor Charlotte A. Jordan, deceased, settled his first and final account.

The last will and testament of Fannie Corter was admitted to probate and letters testamentary thereon were granted unto Robert Burdge, who received order to notify creditors.

## Adams County C. E. Union.

The Adams County, Pa., C. E. Union will hold its Annual Convention next Tuesday in Christ Reformed Church, near Littlestown, with morning, afternoon and evening sessions A pastor's conference to which all Adams County ministers will be invited, will feature the morning session of the convention.

The afternoon meeting, which will consist of conference, discussion and business periods, will be followed by a fellowship banquet in Christ Re-

The Rev. Wilfred P. Riggs, of Balimore, president of the Maryland state union, will give the address at the evening session.

## Lake Royer Dam Bursts.

A section of the dam at Camp Ritchie, near Highfield, gave way Tues-day night, leaving out most of the water and doing considerable damage on its way to Antietam Creek. Cellars of houses were flooded and damage was done to corn fields, as well as minor damage.

The dam had been built about two years ago, and had a capacity of 50,000,000 gallons and was used as boating and swimming ground for the camp. It is said that a leak had been noticed about a week before the break. Repairs have commenced and not as perfect as you had supposed. will be completed as soon as possible. Crouse, Taneytown.

## **OUR FAMILY REUNIONS** A Few Weeks More, and they will be in Season Again.

Very soon we will be "reunioning" by families-old folks, medium folks and little folks-doing part of our Summer's visiting by wholesale in one big co-operative effort, so far as "our family" is concerned. We are looking forward to it pleasurably, and will welcome the day when the order

"Come on-let's go. Long may the family reunion continue, and may we learn by practice to improve on it each year. There is the danger of making it top-heavy, or lop-sided, which-ever term you prefer—as Graham MacNamee says, "When Whet I more"? Of course "Know What I mean"? Of course the day should be variously spent and if possible, the older folks should not interfere with the younger ones, and contrariwise.

We want a lot of just old-time looking each other over, and swap-ping old experiences; the "eats" of course, are very important, but an extravagant feast is distinctly out of order; and by all means there should be a well-balanced, not too long, pro-

If the reunion this year is not an improvement over that of last year, there is something wrong with the management, or with the general spirit. The big danger to avoid is tiresomeness. And perhaps it is not a good plan to hold it at the same place each year; but, changing from a good place to another just for the sake of change, is a mistake. A few meetings ought to decide this ques-

Then, there are a lot of reasons why families should get together in large numbers. One reason is that of pride in knowing that there are so many of us—there is confidence in numbers, an inspiration, we are not so afraid of getting lost, as it were. A little pride and preaching on good family records may be indulged in—sparingly. Family history is all right, but pedigree, if followed far enough, is apt to cause us to wish we had stopped sooner.

And there is another question. Should reunions be held on Sunday? There is more to be said about this than one might think, and we suggest it as a subject for debate at the reunion this year.

Arrested After Hunt of 9 Years. Charged with the larceny of \$3,200 worth of hides from George Harshman, near Lewistown, in 1920 and at large since that time, Edward Benson, Philadelphia, Gettysburg and Emmitsburg, has been arrested and is in jail awaiting a hearing of his case in Circu awaiting a hearing of his case in Circuit Court. Benson was indicted by the grand jury in 1920, but fled the state and it was impossible to locate him until several weeks ago when it was learned that he was serving an eighteen month term in Eastern Peni-tentiary, Philadelphia. A detainer vas sent to the Pennsylvania city and Deputies Wlliam F. Steiner and Verner Redmond returned him to this

The robbery took place during William O. Wertenbaker's term of office as sheriff. Learning that he was indicted Benson fled to Iowa where he ived for five years. He then went to Philadelphia and later lived in Gettysburg. In the latter town he was arrested for the larceny of several cows and was sentenced to serve eighteen months in Eastern Penitentiary. The local authorities picked up Benson's trail in Gettysburg and he signed a confession admitting the larceny of Harshman's hides. The Pennsylvania authorities had a prior claim on Benson and the Frederick county officials were forced to wait until Benson served his term. He was returned to this city several weeks ago.

Benson has had a varied criminal career. It is said that he was a member of the Kelly-Mitchell-Adams gang, which was tried here several years ago for the robbery of the Sandy Springs bank and the murder of Francis M. Hollowell, its president, Benson is reported to have operated a garage in Philadelphia, which the gang used as a hangout. While residing in Emmitsburg, Benson is said to have committed the Harshman robbery .-- Frederick News.

#### Souvenir Program of the Gettysburg Encampment.

A handsome Souvenir Program covering this week's 63rd. annual encampment Pennsylvania Department G. A. R. and affiliated organizations has reached our desk. We regret that it did not come a week earlier, in or der that we might have published at least a portion of it. The editor of least a portion of it. The ethe work is Rev. L. B. Hafer.

In addition to the program covering the events from June 15 to 21st., thes features appear; "Battlefield data, "Lincoln's Gettysburg address;" ele ven illustrated pages on "How to see the Battlefield;" brief description of brief description of the battle, and why it was fought at Gettysburg, and "Gettysburg of to-day." The book is indeed a worthwhile souvenir.

## Marriage Licenses.

Leonard F. Zito and Winifred Stocksdale, Baltimore Preston Myers and Evelyn Zimmer man, Tanevtown.

Russell Sheffer and Emma Kann, York. Pa. Stewart E. Kramer and Clara L.

Crone, York, Pa. Odell Tuck and Helen Haines, of Westminster. Percy L. Laughman and Edith M.

Brown, Hanover, Pa.
Charles H. Gerken and Anastasia
M. Sinnott, Westminster. William K. Leppo and Hilda E Markle, Westminster.
Merle E. Conover and Margaret S.

## FARMERS WARNED NOT TO BE HASTY.

#### Should Wait Until "Farm Relief" Plans are Made Clear.

Stop! Look! and Listen! should be the attitude of all Maryland farmers at this time, especially in regards to the new "Farm Relief" legislation. An attempt is being made in parts of this state at this time to rush the farmers into co-operative marketing associations under five year contracts. James W. Davis, President and M. Melvin Stewart, Secretary-Treasurer of the Maryland Farm Bureau Federation feel that the farmers should "proceed with caution" and with due deliberation, especially at this wheat

harvesting season. As a matter of fact, President Hoover has not yet appointed the Farm Board. Said Board must set up shop and look the whole situation over, before it is ready to function.

It is our feeling that by the time this is done, the present wheat mark-eting season in this state, will have very generally passed. We wish to assure the farmers of Maryland, that we are studying the situation and proceeding toward a plan. We have requested each of our county and state co-operative organizations to designate a representative to assist n formulating this plan. Several of the organizations have already designated these representatives.

It has been impossible up to this time to formulate such a plan, be-cause the bill, as finally agreed upon by the Senate and House Conference Committee, has just been passed by Congress and signed by President Hoover.—Md. Farm Bureau Federa-

Mr. R. G. Speorlein had an opportunity to sell the cow for \$100 before freshening. The next year the same cow produced 425.8 pounds of butter fat and 7717 pounds of milk. This meant a profit of \$219.05 above feed cost. This cow would surely have been sold according to Mr. Spoerlein had he not been able to tell something about this cows butter fat record through his Cow Testing Association Work.

#### Use Pressure Cookers in Canning Non-Acid Foods.

Research and practical experience have demonstrated, says Dr. A. F. Woods, Director of scientific work, U S. Department of Agriculture, non-acid food products, like asparagus, beans, corn, peas, beets, spinach, fish and meats, except when adequately cured or adequately acidified, can not be safely canned by processing in boiling water, but must be sterilized under pressure with approved time and temperature.

Pressure cookers are now standard equipment and are readily available at small cost. The department does not recommend any particular make, although attention is called to the importance of having the pressure ket-tle equipped with thermometer and pressure gauge for proper control. "There is now no excuse," says Dr. Woods, "for continuing to take risks involved in canning non-acid foods without adequate pressure cooking or curing or acidification. All recommendations by the Department of Agriculture will hereafter make this clear and emphatic."

In adversely criticizing the act of another, a man often procliams what he would have done in the circumstances. Which is foolish. No man can say what he would or would not do if he were suddenly confronted with a set of unusual and disturbing circumstances.

The selfish man seldom becomes great. Great men are made by great thoughts, and the selfish man thinks of nothing but himself.

## THE FARM BILL PASSED

#### Congress Adjourned Without Any Further Action.

The Administration's farm relief bill passed the Senate, last Friday, after the "debenture" feature had been knocked out by the House, and the bill was signed on Saturday by President Hoover. The vote on the bill was 73 for and 8 against, as when the show-down came, those who had been opposing lacked the courage to go on record against the bill. The eight opposed to the end were 5 Democrats, 1 Republican, 2 insurgent Republicans. Of the 73 voting for the bill, 39 were Republicans, 26 Democrats and 7 insurgents.

A vast amount of partisan politics has been played over the bill, and a wide difference of partisan politics.

wide difference of opinion exists since its passage as to whether the bill will greatly benefit the farmers, or wheth-

er any other bill could do it. For the present, and perhaps for a long while, the country will have to wait and see. And this, especially because it is generally admitted that the tariff should be revised, if possible to increase the buying power of the farmer's dollar; and over this re-vision there will be another long hard fight, plentifully mixed with

partisan politics.
On Tuesday, the Senate adjourned until August 19, and the Holse until September 23rd.

#### The Crop Forecast.

Favorable weather conditions during the latter part of May have resulted in a 6 percent upward revision in the May 1 forecast of Maryland wheat production according to S. R. Newell, Federal Agricultural Statistician for Maryland. The 1929 Maryland wheat crop as forecast on the basis of May sunshine is estimated at 8.813.000 bushels as compared to a at 8,813,000 bushels as compared to a 1928 crop of 8,745,000 bushels and an average production of 10,193,000 bushels from 1923 to 1927. Reported condition of winter wheat declined from 91 on May 1 to 90 on June 1st. Mr. Newell points out, however, that during the past 15 years there has been little significant relationship between June 1 condition figures and final Maryland wheat yields due to infection of most fields in this State with Septoria Nordorum which is

commonly known as black scab.

This disease causes the most damage during damp, "Muggy" weather in the latter part of May and the first ten days of June, attacking the grain most severely while it is in the milk stage. A large proportion of the kernels are light withered, and shriveled if protracted periods of rainy, cloudy weather or generally humidity without sunshine favor Septoria propagation while the kernel is in the milk stage. The present forecast, therefore, is based largely on the relation of the percentage of possible May sunshine to final yields. May sunshine was about average in 1929 preventing above average damage from Septoria and pointing to

about average wheat yields.

Infection of wheat plants with brown rust is exceptionally heavy in southern, eastern and western Maryland although damage from this source is expected to be slight. Stands are generally good throughout the State but heads appear to be short in Washington County. Damage from Hessian fly has also been reported in Washington County, although the attacks by this insect have been confined to limited areas.

The condition of oats in Maryland was reported at 83 percent of normal on June 1 as compared with 81 percent on June 1, 1928 and a 10-year average June condition of 87. This year's lower than average reported condition of the oat crop may be attributed to lateness in planting because of unfavorable weather.

June 1 reported condition of the Maryland apple crop at 61 percent of normal, is 2 points lower than last year. A rather poor set of fruit has been secured due to the lack of adequate pollination during the extremely rainy blossoming period.

A Maryland peach crop of 562,000 bushels is forecast from a June 1 reported condition of 75 percent. The 1929 crop is expected to be about 20 percent larger than the 1928 harvest and approximately 11 percent heavier than the average production from 1923 to 1927. Peach prospects are generally good throughout the State this year, exceptionally light frost damage and generally favorable weather conditions to date having resulted in an exceptionally good se S. R. NEWELL,

## Agr. Statistician for Maryland.

Bees are wild animals and should be handled only in accordance with their natural activities. The man who understands the behavior of bees can do almost anything with them if he makes them do only the things it is natural for them to do. very much irritated by superfluous, quick movements, for example, and they should be disturbed during handling as little as possible. With their peculiar eye structure they seem to notice motion more readily than they

Seasonable Bee-ology.

do objects. Stings are to be avoided not only because the operator doesn't enjoy them, but because the odor of poison that gets into the air irritates the other bees and makes them more difficult to handle. The color of black excites bees, and black clothing, es-pecially a black hat, should not be worn. The best time to handle bees is during the middle of warm days, preferably during a honey flow. Never handle them at night or on cold, wet unless absolutely necessary .-U. S. Dept. Agriculture.

A good cure for doubt is to do what seems to be your duty.

The "Color" Line Once More.

The "color" line is up again, and it is being played for all it is worth as a political issue, and especially in Louisiana where a campaign for the election of Congressman to fill a vacancy is on. Ordinarily the Republican chances for electing a Congressman in Louisiana—or any other far southern state-would not be bright, but this time it happens that the election is to be held in the sugar belt, and ick News. sometimes goes Republican, on the tariff issue.

This time the Republicans have a strong candidate in M. E. Norman, and it is conceded that his chances of election were more than fair, when along came the newest "color" sensation in politics. At the last election, Chicago elected Oscar De Priest, a negro politician to the House of Representatives. That in itself could hardly be used as an issue in Louisiana, because there are now plenty of Negro Democrats; but this one being a Republican, and his wife having recently been entertained at tea by Mrs. Hoover-likely in company with other members wives-made the incident valuable campaign material in this Louisiana district where all kinds of material is needed by the Democrats.

And so, we have again before asked the question whether the voters of a district or state, have the right to choose their own representatives, or whether the Senate, or House, or public sentiment somewhere else, should do it-the election of Senator Vare in Pennsylvania, for instance, may be a

Naturally, Mrs. De Priest's entry into Washington society created problems, and Mrs. Hoover as naturally came in for her share. Apparently, she did not open the question of Chicago's good taste in its election of a Negro Congressman; but Mrs. De Priest was a fact—the wife of a Congressman not the choice of the hostess, but one of a number to be entertained, not at a social function in the truest sense, but at a customary formal event. And there you are! Truly we do not shape our own course, but often have it shaped for us.

## Wages and Industry.

The outstanding result of our modern industrial age has been the increased wage level in recent years with consequent improvement in liv-

W. Jett Lauck, former Professor of Economics and Politics at Washington and Lee University, traces this movement in his book, "The New Industrial Revolution and Wages."

Labor has been gradually reaching a higher social status. As Mr. Lauck says: "The new industrial era in America has been built primarily upon the rock of service and preformance, and not the least amazing of the many marvelous developments of | United States and Canada, over the the industrial revolution has been the enforcement of our prohibition laws, discovery of modern industry that equity and service actually pay and of our Federal officials in attempting are essentials of permanent industrial achievement—that industrial expansion and operation should primarily be a social function and service."

Industrial prosperity, under the modern scheme of things, is the result of individual prosperity. The old theory of getting labor as cheaply as possible has disappeared. A new industrial philosophy sees the advantages of paying high wages for good ially as a portion of our Canadian work and increased output per man.

As Mr. Lauck's very valuable volume shows, a new age has arrived in all know what that will mean, should the United States-an age of higher wages, greater production and more general prosperity and progress than the world has ever known.—The Man- fullest rightful extent. It is, in fact,

Short Sighted Youth.

A good many boys and girls, who as yet have not gone, far in their school work, are likely not to return to school next Fall. They do not feel interested in study, do not get along very well. But the motive that appeals to them, is that they want to earn money of their own. They long for their own independence, when they will not have to depend on odd jobs and what their fathers can give them, for their spending money.

Commonly they do not want this money because they are forming plans for systematic saving, and acquiring of capital for some business enterprice. They want to be able to buy their own clothes, and particularly to have money to spend on good times and excitement and thrills.

The boys want to be able to buy or hire automobiles to take their best girls to ride, and to take them around to shows and dances and suppers. The girls want unlimited money to spend on clothes and self beautification. It seems intolerable to think of going on with the studies that come hard to them, and on subjects that they regard as dull like arithmetic and grammar and penmanship, when with more money in their pockets they would be war. making a general whoopee around the country.

Some of these young people may be more suited to practical hand work in which American enforcement offithan to book study. But the majority of them are not ready to quit school, ners? Congress as a power, would and their desire to do so simply shows | not, but some of the individual memtheir lack of foresight.

They give up the chance to fit themselves adequately for life, just for the sake of the immediate fun. They are condemning themselves to a life of international disturbance. mediocre achievement, in which they can expect only small results, just by their lack of steady purpose. Some person whom they respect should try to show them their mistake.—Freder-

#### "Progressivism" Again.

Senator Brookhart, of Iowa, in one of his many speeches in the interest of the "debenture" feature in the farmer bill, strongly urged the election of a Republican Progressive to succeed President Hoover, providing the "debenture" plan was defeated. As an election means that first a "Progressive" candidate must be nominated, and as the Republican party will never nominate a "Progressive" who will please the Brookhart and Norris bloc, it is evident that the Senator must favor the reformation of a "Progressive" party, which we are reasonably assured would be very satisfactory to the Re-

Sooner or later the Republican party must get rid of a bunch of Senators who are not Republicans at all, but who travel under the Republican name in order to the best insure their own election and that is about all they accomplish—their own job.

Independence within party ranksprogressivism, if you please—is thoroughly justifiable, but Senator Brookhart, Norris and others are so extreme in the exercise of these traits that it is difficult to understand on what justifiable grounds they can claim to be members of the Republi-

can-or any other-party. By all means, we think there is room in this big country for a third party. And especially in the Senate we have members who have served there so long that they now feel as though there can be no other views than their own, and can not concede to newcomers in party or legislative affairs, a right to differing views, but must fight them regardless of any such consideration as party loyalty.

And there is a party loyalty that rightfully claims our support, at times, if we believe at all in the strength of unions and organizations. We always have perfect right to fight to a show-down for our own convictions; but, when we lose we should respect our party majority rule and still stay within ranks. But if we consistently and habitually can not do that, then, the right thing to do is to get out of the party.

#### Canadian Rum Running and its Danger.

The next big International trouble may rather easily occur between the through a vigorous effort on the part to stop the Canadian rum ring in its activities along the border line between the U.S. and Canada, that practically nullify our liquor laws in that section.

This government is going to largely increase its force of men along the border, perhaps to the extent of calling on the Marines, and this is almost sure to call for armed clashes-especborder states happen to be quite wet. This means that lives will be lost, and

some of the victims be Canadians. The Canadian authorities are apparently co-operating, perhaps to their not their business to enforce American | Telegraph.

prohibition laws, and this country stands on this basis, that it is our duty alone to do that; expecting, of course that Canada will not take an antagonistic course.

The situation may easily become serious, especially with the active cooperation of the sympathetic wet press in this county, that has also given the boot-legging business vast encouragement and correspondingly interfered with law enforcement, as it has every intention of doing. Whether this same sort of civil warfare will continue to the extent of bringing about possible conflict at arms between the two countries, while hardly probable, is still possible, considering the vast liquor business influence that is opposing the 18th. Amendment and the Volstead Act by every means in its power.

National prohibition leading to war with Canada—which means Great Britain—can hardly be imagined; but it is often the unexpected that happens, these days, and Europe might secretly wish a war on us, if the truth be told, especially as our prohibition laws are not palatable in the wet over-there. Where there is strong inclination, no great amount of justification is required to start, even a

And what of our Congress and the wet press? Would they champion Canadian rum-running in a test case cials might shoot some of the runbers likely would, and likewise a portion of the American press-perhaps enough to very seriously embarrass this country, and help to bring about

So, it might be very wise just now, for some high in authority, and some leaders of our daily press, to take a long and searching look ahead for danger, and perhaps see the warning -support and obey the Constitution and laws of the United States as the highest patriotic duty of true Ameri-

#### Pray With Child, Is Advice Given Mothers

Of course, the real way is not to teach children to pray at all, but, whether privately or in the family group, to pray with them. Here is a mother who still is trying to get an adolescent boy to bow at her knee each evening and say his prayers. She suspects that something is the matter. She can see that his dutiful desire to please her is under increasing

Strangely enough, it never has occurred to her that both physically and mentally her method is wrong and that if she wants her boy to pray, from the beginning she should have been on her knees beside him praying with him.

She should see also that very soon she must take her hands off that intimate matter altogether and let him pray as he will, trusting not so much to anything she has told him as to the fact that he knows by observation the value of prayer to persons whom he himself has loved and ad-

Religion is something that only secondarily can be taught. It must primarily be absorbed, and then the teaching can persuasively set forth the meaning of the life that the child finds himself both observing and catching in the home.-Harry Emerson in the World's Work.

#### Varying Ideas as to "Better Halves" Value

Females of the "flapper" type are not in favor among the tribesmen in some parts of Africa. The fattest girl is considered the greatest beauty and in order to attain this condition of pulchritude the girls gorge themselves with milk and dispense with all physical exertion. Many of them undergo this treatment while preparing themselves for matrimony and the more rolls of fat they can put on the better they like it. In some other parts of the Dark continent, there are different ideas prevalent and the value of the woman is gauged by the amount of work she is capable of doing, and the character of the labor she is called upon to perform is not conducive to the fat accumulation. The acquisition of wives by purchase is quite general throughout the country and the medium of exchange is cows, one wife being worth eight or ten cows, according to her capacity for work. As a rule the women do everything except the actual hunt-

## Easily Remembered

"Please, sir," began the boy who had taken her message into the manager, "Mrs. Tempestly has called and wants to know why you haven't written to her since the audition she

"Tell her," interrupted the busy manager, "that she simply didn't come up to scratch."

A few minutes later the boy re-

turned to the office once again. "She says she has now!" was his ominous message.-Pittsburgh Sun-

## 5c IS ENOUGH FOR A GOOD SMOKE

It Buys a Dandy Cigar — If You're a Good Picker

No doubt you've done your share of hunting for "a good five-cent smoke." And finally decided "there ain't no such thing." Wait—here's the livest tip ever handed you: Bayuk's Havana Ribbon. Try that cigar, sir, and you'll be playing five-cent limit till the cows come home. Bayuk's Havana Ribbon is as

different from ordinary five-centers as a home run is different from a pop fly. That's because we've landed squarely on the secret of what makes a cigar good: Ripe tobacco! Unlike the average nickel cigar, Bayuk's Havana Ribbon contains no bitter under-ripe nor flat-tasting over-ripe leaves. No "scraps" or cuttings discarded in the making of higher priced cigars. But only longfiller, fully-ripe leaves from the mid-section of choice tobacco plants. "Sounds reasonable," you say. Why, man, it's amazing! Sold everywhere. Also Practical Pocket Packages of five cigars.

BAYUK It's Ripe Tobaccol

#### Stern Colonial Laws Barred All "Frippery"

Many laws that seem queer to us now were passed in Colonial times, among them the following, issued by the general court of Massachusetts in 1639.

"Whereas, there is much complaint of the excessive wearing of lace and other superfluities tending to little use or benefit, but to the nourishing of pride and the exhausting of men's estates, and also of evil examples to others; 'tis therefore ordered by the court, and decreed, that henceforth no person whatsoever shall presume to buy or sell within this jurisdiction any manner of lace to be worn or used within our limits. And that no tailor, or any other person whatsoever, shall hereafter set any lace or points upon any garment, either linen, woolen, or any other wearing clothes whatsoever, and that no person hereafter shall be employed in making any manner of lace, but such as they shall sell to such persons as shall and will transport the same out of this jurisdiction, who in such case shall have the liberty to buy the same.

"And that hereafter no garment shall be made with short sleeves, whereby the nakedness of their arms may be discovered in the wearing thereof, and such as already have garments made with short sleeves shall not, hereafter, wear the same, unless they cover the arms to the wrist with linen or otherwise. And that hereafter no person shall make any garment for women with sleeves more than half an ell wide in the widest place thereof, and so proportionable for larger or smaller persons."-Kansas City

#### Vegetable and Animal Life in Death Valley

Death valley, in California, long reputed to be one of the most lifeless areas on the face of the earth, is not so barren as popularly believed. A group of scientists recently returned from having made the first comprehensive survey of the plant and animal life inhabiting the floor of Death valley. And their report upsets much tradition long firmly rooted in the pub-

A summary of Death valley's plant and animal resources now scientifically and officially recorded includes 135 different species of plants, trees and shrubs; 124 different kinds of birds, 12 reptiles, 1 fish, 235 varieties of insects, and numerous mammals.

The sole representative of the fish group recorded upon the floor of North America's greatest sub-sea level depression is a small minnow scientifically designated as Cyprinodon Macularius. This creature inhabits the salt marshes and salt water springs of Death valley. The mammals represented range in size from the bighorn mountain sheep (Ovis Nelsoni), which come down upon the floor of the valley from their natural habitat in the neighboring Panamint and Funeral mountains; on down to coyotes, rabbits, moles, mice and shrews.

#### Black Cats and Evil Linked in All Ages That verdict rendered against a

Lynn (Mass.) woman charged, among other things, with having undertaken by her formulas "to still crying babies and fighting cats with equal ease," calls up a chapter in the lore of popular beliefs to which every age contributes new material. And for sheer interest it is the pugilistic felines, not the lachrymose infants, which take the cake. That black cats portend evil is a delusion that goes back to the most ancient times; so, white or black, they have everywhere been the material for all sorts of superstitions. In the Orient cats have knowledge of the future ascribed to them, along with a sensitiveness which can penetrate into things dark for the eye of man. When the cat tears at cushions or carpets it is believed to be raising the wind. There is sure to be changing weather if it sneezes, and a frost may be looked for when the animal sits with its back to the fire.

DEATH FLOATS IN AIR OF HATCHERY

#### Floor of Room Is Common Source of Dust and Dirt.

Death floats in the air for the newly hatched baby chick, but the hatchery manager can take precautions which will reduce the probability of disease germs, carried on minute, floating dust particles, from infecting baby chicks which emerge from their shells, free of the disease germs.

"The floor of the hatchery room is the most common source of dust and dirt. The floor should be kept clean," says a bulletin on "Sanitation in the Hatchery" just published by the agricultural extension service of the Ohio State university. "Less dust will be stirred up if the floor is flushed or scrubbed with water instead of being swept with a broom. When the use of water is impossible, sweeping compounds should be used. If possible the floor should be kept wet down. This prevents dust and by increasing the humidity of the air is an aid in hatching larger and better chicks.

'The practice of dropping or throwing egg shells, unhatched eggs, or dead chicks on the floor is bad. This refuse should be carefully handled and removed from the incubator at once.

"The hatchery room is not greatly unlike a hospital. Clean walls, clean floors, clean equipment and clean attendants are essential."

The new bulletin is written by Prof. E. L. Dakan, head of the poultry husbandry department of the university, and Dr. Fred Speer of the bacteriology department, who has been doing research work on the disinfection of incubators, under a poultry industrial research fellowship established at the university by commercial interests.

#### · Poultry Houses Badly Infested With Vermin

When a poultry house becomes badly infested with mites, it is hard to control them with one application of any material. Mites may gather in the walls and around the ceiling and under the dropping boards or behind insulating material in the walls. They depend on the blood of the roosting bird as a means to live and if the perches are treated about once each week for a few weeks, all the mites in the house will eventually gather there and be killed. The nests often need considerable spraying, especially if they consist of boxes nailed on the side walls of the house.

By adding a little carbolineum to the kerosene oil or engine oil, the mixture will have greater powers for destroying mites. It may be best to paint the roosts, dropping boards, and nests with clear carbolineum. If the side walls are rough and infested with mites, it may be best to whitewash them to seal up a lot of crevices and make the surface as smooth as possible. When the roosts are protected with spray dope often enough to keep down mites, they are not so apt to become intrenched in other parts of

## Poultry Facts

\*\*\*\* Dirty poultry houses harbor disease.

Moldy feed or moldy litter may give the baby chicks pneumónia.

In order to secure top prices for eggs on the market, they must be of high quality.

One of the newer developments in chick raising is the use of electrically heated incubators and brooders.

Move the brooder houses to fresh ground two or three times during the season in order to keep the young birds healthy.

Feed hopper space, not too much and not too little, is a big factor in determining feed consumption and growth of chicks.

To hatch a desirable chick, hatching eggs should weigh between 24 and 26 ounces per dozen, and should be uniform in shape, size, and color.

Root vegetables, such as mangels, beets, carrots, etc., are good, but not as good for green feed as the plant that grows above the ground.

Keep things as sanitary as possible around the growing chicks. The worst enemy and best preventive of coccidiosis is clean ground, clean water, clean feed, and clean houses.

The practice of reproducing the flock with eggs laid by hens produces a better quality chick than breeding from pullets. The old hens have stopped laying and are storing reserve vigor to be converted into strong, vigorous chicks.

The incubator should be cleaned and carefully inspected for defective parts. Wafer thermostats should be removed and tested. Testing may be done by immersing alternately in hot and cold water. -If the wafer reacts sluggishly, it should be discarded.

## 

PHRASE IN COMMON USE MAY HAVE ORIGINATED .-It has been suggested, says the Mentor Magazine, and not without good cause, that the homely expression, "bringing home the bacon," may have originated in the ancient English ceremony called "The Dunmow Flitch," at which a gammon, or flitch (a side or leg), of bacon was awarded to the couple that swore that for a year and a day they had neither had differences nor wished themselves unwed. The ceremony takes its name from the historic village

where the custom originated, at

Little Dunmow in Essex. forty

miles from London.

The antiquity and origin of the Dunmow Flitch ceremony is obscure. Some think that it had an ecclesiastical beginning; that a gammon of bacon was first given by the prior as a reward to a "pilgrim" or novice, who after a year and a day had not repented of his "marriage to Holy Church," as it was called. Other historians suggest that the flitch was given when the church blessed, made permanent (and rewarded!) "handfastings;" i. e., irregular marriages that were tried out for a year and a day. The ceremony is supposed to have become more or less a jocular tenure even before the Fourteenth century, and the frequent revivals that have been made partly solemn and partly an excuse for merry-making.

For a long while the custom fell into abeyance, although there have been frequent attempts at revivals. Even to this day ceremonies are held in various parts of England, although : it is many years since one was held in Dunmow itself.

## How Windmills Used in

Europe Are Operated The typical Dutch windmill is com-

posed of four long sails at right angles to each other, fixed on an axis inclining about 10 degrees to the horizontal and mounted on an inclosed tower of masonry or wood. Modifications of this type include six or more sails. The web of the sails is generally of canvas, but wood may be substituted. In the best forms of European windmills each sail is composed of arms or whips, 30 feet or more in length, attached at right angles to the sail axle. Transverse bars or rods are secured to the whip at intervals throughout its length and on these the sails are stretched. By setting the bars at varying angles with the plane of revolution of the whips a warped surface is produced. This is essential, because if the bars were all parallel to one another the pitch of those at the extremity of the arms would be much greater than that of those near the axle. The result of this would be that the wind would tend to turn the outer end of the arms much more rapidly than the inner end, which would simply drag. The sails are generally wider at the tips than at the hub.

## How Thin Gold Can Be

The thinnest sheets known to have been made of gold mechanically are 0.00001 millimeters thick. This would indicate that if a cubic centimeter of gold could be hammered out to the same thickness it would cover 100,-000,000 centimeters, or 100 square meters, equivalent to about 120 square yards. At this rate a troy pound of gold would cover about 235 square yards of surface. It is to be remembered, however, that this is figured on the basis of the thinnest possible sheet of gold to be made mechanically. Ordinarily, gold foil is 10 to 20 times as thick and would cover a correspondingly smaller area.

## How Woodchuck Was Named

"When the first settlers came to New England," says W. Dustin White, in Forest and Stream, "they saw this little animal, fat and waddling, and were reminded of the pigs of their farmyards back in England and, since they had called their pigs 'chucks' or 'chuckies' it was quite natural that they would name this somewhat similar creature of the forests 'woodchuck.' So the name woodchuck means wood-pig or wood-hog, and this has been changed to ground-hog since the animal left his native woods and took up his abode in the open fields."

## How Many Are a Few?

How many are a few? Nicer questions, such as how many angels can dance on the point of a needle, have been answered by authorities long ago. But it has remained for a London jurist, a justice on the king's bench, to rule precisely as to the number which may be called a few. A barrister sent word that he would be absent a few minutes. "How many is that?" asked the judge. The answer was twenty. "Twenty is more than a few," replied the judge. "I think seven minutes is the end of a few."-St. Paul Dispatch.

## How to Clean Lens

To clean a lens, flick off the dust with a camel-hair brush, breathe on the lens surface in order to moisten it slightly, and then rub it gently with a clean, soft linen rag. Once the lens is clean, maintain it in this condition by keeping it covered up.

#### WHY=

#### Dining Places Use Name "Pig and Whistle"

Every little "Greenwich Village" has its "Pig and Whistle"—in fact, the number of "Bohemian" restaurants, both in America and England, which call themselves "Pig and Whistle" is

Just why this should be so is a curious illustration of how two such apparently unrelated and meaningless terms should be applied to a place of eating.

The fact is that the expression "Pig and Whistle" is a corruption of the original language, which read "Bowl and Wassail" and "Wassail Cup and Wassail.'

In old English "Wassail" was a sort of salutation used in drinking with the raising of the cup. It was the near equivalent of our "To your health.

Also, in old English, the "pig" was a small cup or mug.

So "Pig and Wassail," in reality meaning "Drink hearty," achieved a wider and perfectly logical use as a name of identification for a place in which to dine and toast one another's health.—Kansas City Star.

#### Why Teardrops Are of Value as Antiseptics

Although we cry when we are sorry, teardrops chemically are a blessing. Tears are composed of a chemical called lysozyme, probably the most powerful germ-killer in the world.

During experiments with human tears it has been found that one teaspoonful of the pure chemical contained in them has antiseptic powers equal to more than 100 gallons of salty water against certain eye bac-

The same substance can be found in the white corpuscles of the blood, which continually wage war on destructive bacteria invading the body. It may be possible to extract the powerful chemical in sufficient quantities from animal bodies for general use as a non-poisonous antiseptic .-

#### Why Union Jack Is Flown

Much discussion has been given to the Union Jack that is flown from the men-of-war of our nation, while at anchor. It is composed of the blue field of our national ensign, stars without stripes. Ordinarily flown from a staff in the bow, it has another use. When hoisted to the starboard yardarm of a vessel it denotes a courtmartial in session. It derived its name from the Union Jack of England, composed of the flags of England, Ireland and Scotland, probably because of the fact that the king of England signed his name "Jacques." Various handbooks refer to the starry field as the jack, and while the stars in our flag represent the Union, it is denied that our flag, or jack, should be known as the Union Jack.

## Why Glass Turns Purple

The Bureau of Standards says that glass frequently changes color on exposure to sunlight and the surface may weather or decompose slightly on exposure to certain types of atmospheric conditions. The color change is generally from the initial color of the glass to a purplish tint. This is thought to be the result of the action of sunlight on the manganese which was used to decolorize the glass. The weathering produces a scum on the surface of the glass and renders it less transparent, but does not, in general, change its color.

## Why Tower Does Not Fall

The fact that the Leaning Tower of Pisa stands depends on the law of statics which insures the stability of the leaning building whose parts are firmly bound together and whose center of gravity does not project beyond the limits of the supporting foundation. The leaning tower has a spiral stairway within, which is built with increased height on the sides of the lean and decreased height on the sides opposite the lean, thus throwing a greater weight of masonry on the side opposed to the lean.

## How Icebergs Are Located

There is an international ice patrol maintained by the United States coast guard which patrols the Newfoundland coast and locates the icebergs on ocean routes. The location of such icebergs is communicated to the hydrographic office of the Navy department, which in turn passes on the information to the different steamship companies. All nations subscribe to this safety measure and remunerate the United States for performing this service.

## Why Scraped Ice Whitens

Ice becomes white when scraped because the scraping leaves a multitude of small irregular surfaces which reflect the light in all directions, giving the white appearance

#### Why Word "Won't" Is Good The word "won't," universally con-

sidered a contraction of "will not," is a contraction of an old form, "woll

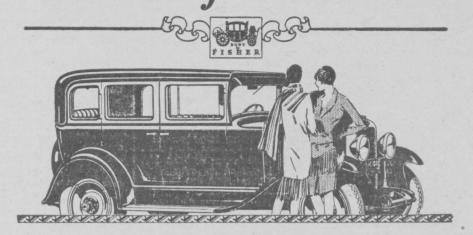

## Why Dead Birds Disappear

The Department of Agricuture says that birds' bodies disintegrate rapidly. Dead birds are eaten by predatory animals and insects.

Why Abbreviation "Cwt." The "C" is the Roman symbol for 100 and "wt." is a shortened form of "weight."

# The Chevrolet Six offers all the Distinct Advantages of BODY by FISHER

Never in all the history of the automotive industry has a lowpriced car provided coachwork of such outstanding style and quality as the new Chevrolet Six.

The smart new bodies are built by Fisher, with all the mastery in design and craftsmanship for which the Fisher name is famous. Lines are long, low and graceful seats are deeply cushioned and luxuriously upholstered—interior hardware is fashioned by Ternstedt - and finishes are modishly smart and lustrous.

In construction, too, the new Fisher bodies represent a marked advance. Built of selected hardwood and steel-they provide a measure of strength, endurance, comfort and safety unapproached in any other low-priced

automobile.

Visit your Chevrolet dealer today. See and inspect this sensational new Chevrolet Six.

# COSMOPOLITAN CORN

HE word "corn," specifically applied in this country, refers "Indian corn," or maize. It is native to tropical America and was used as food by the Indians centuries before the era of Columbus, and probably even by the civilization which ante-dated the Red

In the early days of the English colonies, corn was not confined to yellow and white ears, with an occasional red variation, as it is today. Though yellow and white were even then the most common, they were interspersed with red, blue, olive, greenish, black, vari-colored, speckled and striped ears. Today its consumption has become so universal in this country that this grain can fairly be called cosmop and practically all of it is packed in sanitary enamel lined cans.

Corn is lower in protein than wheat and oats, but it is fully equal in that respect to other grains and it surpasses many in the proportion of fat and oil. The starch of corn, its main food component, is of excellent quality, and it lends itself to foods that it has been called by many first-aid to the housewife.

## With Meats and Fish

There are many combinations, for instance, of corn with meat and fish. Here are some recipes which will undoubtedly suggest more:

Corn Chowder: Dice and fry onefourth pound bacon; add one small onion and one green pepper, diced, and continue sautéing until brown. Add four cups of diced boiled potacan of corn, five cups milk, two and one-half teaspoons salt and onefourth teaspoon pepper, bring to scalding, and serve. This recipe will make sufficient chowder for ten

Hamburg and Corn Scramble: Sauté one medium chopped onion in two tablespoons butter a few min-utes, add three-quarters of a pound of Hamburg steak, and stir until well browned. Add one No. 2 can of corn, two teaspoons salt and onefourth teaspoon pepper, and heat. This will serve eight

Corn and Salmon Pudding: Mix one No. 2 can of corn, one table-spoon melted butter, one-half teaspoon salt, one-eighth teaspoon pepper, one small can of salmon and one tablespoon heavy cream or evaporated milk in the foregoing order, being careful not to break up the salmon too finely. Bake in a buttered baking dish in a moderate oven (350° F.) thirty minutes. This, too, will serve eight.

## With Fresh Vegetables

Canned corn combines excellently with fresh vegetables that are in season. Here are some sample re-

Escalloped Corn and Eggplant: Sauté one coarsely chopped green pepper, two coarsely chopped pimientos and one-half a medium eggplant, diced (about three cups) in three tablespoons butter until slightly brown. Add one No. 2 can corn, one cup of thin cream or rich milk, two teaspoons salt, onefourth teaspoon pepper and one-fourth teaspoon celery salt, and pour into buttered casserole. Cover with toes, and allow them to fry until buttered crumbs, and bake, covered. bouillon cups with a spoonful of slightly browned. Add one No. 2 Remove cover at last to brown the whipped cream on top. Serves eight.

crumbs. This recipe will serve from six to eight. Summer Squash with Corn:

Sauté one sliced onion in three tablespoons drippings, add one pound of white "button" squash, peeled and thinly sliced, and sauté a few minutes longer. Add one cup water, cover and cook gently until tender Add one cup of corn, one teaspoon salt and one-eighth teaspoon pepper, and bring to boiling. This serves

## All By Itself

Baked Stuffed Eggs: Cut eight hard-cooked eggs in half length-wise and mash yolks. Sauté one-half cup chopped mushrooms in two tablespoons butter till tender and add yolks. Add one teaspoon salt, one-eighth teaspoon pepper, one-eighth teaspoon prepared mustard and two tablespoons cream, and refill whites with this mixture. Place in a shallow buttered baking dish. Add one-fourth cup cream and seasonings to one No. 2 can of corn, and pour around the eggs. Cover with buttered crumbs, and brown in a hot oven. This serves eight. But canned corn all by itself makes a delicious dish, and here is

one of the most delectable ways to prepare it. Cream of Corn Supreme: Simmer one No. 2 can of corn, one-half

cup celery, a slice of onion and two cups of water together for twenty minutes. Rub through a sieve. Add to two cups of thin white sauce, and season highly. Just before serving add one slightly beaten egg mixed with one cup of cream, and heat in a double boiler. Serve in

## CORRESPONDENCE

#### Latest Items of Local News Furnished By Our Regular Staff of Writers

All communications for this department must be signed by the author; nor for publication, but as an evidence that the items contributer are legitimate and correct. Items based on mere rumor, or such as are likely to give offense, are not wanted.

We desire correspondence to reach our office on Thursday, if at all possible. It will be necessary, therefore, for most letters to be mailed on Wednesday, or by Fast Mail, west, on W. M. R. R., Thursday morning. Letters mailed on Thursday evening may not reach us in time.

FRIDAY, JUNE 21st., 1929.

#### FEESERSBURG.

Just now we are hearing of so many accidents and unexpected deaths that our hearts are heavy,

these bright June days.

A number of the members of Mt.
Union Church attended the funeral of Edward Dayhoff's father, on Sunday afternoon, at the Pipe Creek Meeting House. Mr. Jesse Garner, of Linwood, spoke well and earnestly on "I know in whom I have believed." Rev. M. L. Kroh conducted the opening and closing service.

and closing service.

Word was received on Monday, of
the death of Mrs. James Koons, nee
Annie Clabaugh; who was reared and
spent most of her life in and near
Middleburg. For some time past she
had been a resident of the Home for the Aged (Mennonite) near Berkely, Va., where recently she suffered periodic shocks of paralysis, and a final one last week. Her remains were brought to Mt. Zion (Haugh's) Church, on Tuesday morning, where the funeral service was conducted by Rev. J. F. Fife, and laid to rest beside her husband, in the adjoining cemetery. Mrs. Koons was past 81 years of age, and leaves two sons and two

Mr. and Mrs. Roy Keefer, of Waynesboro, with their oldest and youngest child, and two neighbors, visited at his parent's home, on Sunday, leaving Jr. to help grandpa with his

## "Inside" Information for Women.

Prune salad is made by simmering prunes until soft, removing the stones carefully and stuffing the cavity with well-seasoned cottage or cream cheese It is served on lettuce with French or mayonnaise dressing.

To make cinnamon buns or rolls, simply roll out your ordinary raised bread dough, cut with a large cooky cutter, brush the tops with egg, and sprinkle with cinnamon and sugar. Do not use too much cinnamon. parts of sugar to one of cinnamon is good proportion.

Commercial or home-canned peaches may be spiced for those who like them. Drain 8 or 9 halves of large-firm canned peaches. Press 5 cloves into each piece. Make a sirup of the juice drained from the peaches, which should be about ¾ cup, an equal amount of vinegar, ¾ cup of sugar, and spice with 3 blades of mace, 2 or 3 small pieces of stick cinnamon. Add 1/8 teaspoonful salt. Cook the peaches in this sirup for 15 or 20 minutes, or until the peaches have absorbed some of the sirup. Allow the fruit to stand 3 or 4 hours before serving so that the flavors will blend.

Send for Farmers' Bulletin 1471-F, canning fruits and vegetables at home, before attempting to do any canning. The most recently recommended practice is to use the hot pack ,and to process only fruits and tomatoes by the water-bath method; all other vegetables are processed under steam pres-

sure for safety. Pickled cherries, flavored with spices and preserved in vinegar, make a good addition to your supply of tasty relishes. Wash and pit sour cherries, and add three-fourths of their weight or measure of sugar, sprinkling it ov-er the fruit in layers, and letting them stand overnight. In the morning stir until the sugar is dissolved and then press the juice well from the cherries. Tie a small quantity of whole spices in a loose cheesecloth bag, and boil in the juice until the sirup is three-fourths of its original quantity. Pour while hot over the drained cherries

before using.

#### For the Fourth of July.

Going to celebrate the Fourth of July? If you are, the advice of Dr. R. H. Riley, Director of the State Department of Health is to concentrate on pageants, picnics or parades; flag raisings; community singing and band concerts; fried chicken and ice cream, of course; and if you close the day with fireworks, buy the safe and sane kind; above all things cut out the toy pistol and other explosives fitted with blank cartridges.

"The Fourth of July has become associated in the mind of every health officer," Dr. Riley said, "with accidents resulting from the use of blank cartridges, and with the possibility of lockjaw—tetanus, to give the disease its scientific name—following injury from explosives of that sort. Acci-dents from explosives of this kind usually result in deep seated wounds in which dirt and other solid particles along the paper wadding containing the gunpowder are forced far into the flesh. The germs of tetanus are practically always present in such dirt, and unless very prompt action is taken—sometimes even when it is

taken, lockjaw develops.
"The heavy toll of deaths from Fourth of July accidents that used to occur every year throughout the country, was considerably reduced by the campaign for safety and sanity in the Independence Day celebrations that was carried on for a number of years by the American Medical Asso-ciation and the leading newspapers. But we are likely to forget such cautions unless some tragedy—that might have been prevented—happens.

"Last year, several deaths from tetanus occurred in the State, on or near the Fourth of July. At least five of these deaths in Baltimore City were due to injuries of the hand in which paper wadding and dirt had been forced into the hand.

"Within the last few days, the Baltimore City Department of Health has sent a letter to every physician in the city and to all of the hospitals advising the beautiful the city and to all of the hospitals advising the beautiful the city and to all of the hospitals advising them as to the treatment to be given in every accident of this sort. This gives some idea of the seriousness with which such injuries are regarded by health officials.

"The treatment includes the opening and thorough surgical cleansing of the wound and the administration of tetanus anti-toxin. For both of these measures, the prompt and con-tinued services of a doctor are needed. The tetanus anti-toxin used for the preventive treatment of injuries likely to produce lockjaw—whether from Fourth of July accidents or from any other cause—is supplied, in the counties, free of charge, by the State Department of Health. The larger quantities that are necessary for the treatment of advanced cases are furnished

One difference between a farmer and a golfer is that a farmer usually plants seeds in the places where he digs up the earth.

#### MARRIED

MYERS—ZIMMERMAN.

Mr. Preston Myers and Evelyn Zimmerman were united in marriage on Saturday evening, June 15, at 6 o'clock, at the Lutheran Parsonage, by Rev. A. T. Sutcliffe. They were unattended. The bride is the daughter of Mr. and Mrs. Luther A. Zimmerman, and the groom the son of Mr. and Mrs. William A. Mycorg. Mr. and Mrs. William A. Myers.

## HECK-SITTIG.

Mr. and Mrs. Howard Harr announce the wedding of their sister, Miss Diene A. Sittig, daughter of the late Charles and Louise Sittig, and Mr. John E. Heck, of Uniontown, at their home in Baltimore, Tue June 18th. Rev. M. L. Kroh, Tuesday. happy couple's pastor, performed the ceremony in his usual pleasing manner. After June 22 they will be at home to their friends at the bride's residence.

## CONOVER-CROUSE.

Mr. Merle Conover, son of Mr. and Mrs. Claude Conover, of Harney, and Miss Margaret Crouse, daughter of Mr. and Mrs. Frank Crouse, Taneytown, were united in marriage at noon, on Thursday, June 20th., at the home of the bride. Rev. Guy P. Bready performed the ceremony. The wedding march was played by Miss Estella Essig. Those who witnessed the ceremony were: Mr. and Mrs. Frank E. Crouse, Mr. and Mrs. Claude Conover, Mrs. Elsie Valentine and daughter, Mrs. Sarah Albaugh, Mrs. Harry Mohney and Mr. George Albaugh.

## DIED.

Obituaries, poetry and resolutions, charged for at the rate of five cents per line. The regular death notices published free.

MR. HARVEY EDWIN ERB. Mr. Harvey E. Erb was accidently killed at his home in Uniontown, on Monday evening, June 17, 1929, by falling from a porch roof where he had gone to clean out some spouting. His wife hearing the fall rushed to his side, and called neighbors, who carried him in the house but he never hear the state of the s carried him in the house, but he never spoke, dying shortly after.

Mr. Erb was a son of the late Josiah and Rebecca Erb and was aged 67 years, 3 months, 17 days. He is survived by his wife, a daughter of the late Wm. Smelser; two sisters, Misses Alverta and Beryl Erb, Un-iontown, and a brother, E. Lee Erb, Detour. He was a member of the M. P. Church and his pastor, Rev. F. M. Volk, assisted by Rev. M. L. Kroh, of the Lutheran Church, held the services which were at the home, Thursday afternoon. Burial in M. P. cem-

He was affiliated with the two orders, I. O. M. and P. O. S. of A., of Uniontown. He was a prominent salesman for the celebrated "Pain King remedies". Pall-bearers B. L. and Guy Cookson, C. Edgar Myers, Will Eckenrode, M. D. Smith, Charles Fritz, Harry B. Fogle, Thomas Devil-

## CARD OF THANKS.

vinegar to each pint. Seal and allow to stand about two weeks to blend when the death and funeral of Mr. John Dayhoff. Also, for flowers. MR. AND MRS. UPTON DAYHOFF.

## RADIO IS SPREADING RAPIDLY OVER WORLD

#### Half of World's 20,000,000 Sets Are in U. S.

Washington - Radio communication, once a plaything of scientists in their laboratories, is becoming the universal medium of entertainment and transfusion of thought, according to a world survey recently concluded by the Commerce department.

Broadcasting stations, the report shows, are operating near the Arctic circle, on the equator, and far down in the Southern hemisphere. From Greenland to Ceylon and from Yugo-Slavia to China radio sets are being tuned in to catch practically the same type of programs given in the United

In the short decade since the conquest of the ether for popular use began, more than 20,000,000 radio sets have been placed in homes all over the world, the report states.

#### European Fans Pay.

Though the United States uses nearly half these sets, Great Britain and Germany have 2,500,000 each; France has 11,250,000; Japan, 550,000, and Argentina, 530,000. Sweden, Austria, Czechoslovakia and Italy each have more than 250,000.

While American radio fans are entertained by programs provided by advertisers, in most European countries the government owns the broadcasting stations and pays entertainers by taxing the man at the loud speaker.

These taxes, the report says, range from 5 cents per radio set in France to \$18 in Salvador. The British tax is \$2,45; the German, \$5.70; and Australian, \$5.85, and the Japanese, \$9.

European stations generally outrank those of this country in power, it was said. Russia and Finland each maintain stations with 40,000 watts power; Sweden has two stations of 30,000 and 20,000 watts each; France has one of 20,000; while the largest British station is rated at 16,000 watts. There are more than 200 broadcasting stations in Europe. South America has 62; Australia, 25, and Japan, 7.

#### U. S. Exports Radio.

American industry, the department said, manufactures a large share of the world's radio equipment. Approximately 90 per cent of the world's output is made in America, Germany and Great Britain.

United States exports of radio apparatus have been increasing steadily in the last decade. In 1928, they reached a value of \$12,000,000, a record figure.

During the last seven years, it was said, more than \$50,000,000 worth of radio equipment and supplies have been sold by America to foreign markets.

Canada is our most important customer for radio material, taking 44 per cent of this country total shipment in 1928. Argentina ranked second, taking 13 per cent, and Australia, third, buying 9 per cent.

## Find Liver Grows Back

After Being Removed Rochester, Minn.-Modern scientists are wondering if the ancients knew something of the so-called regenera tive powers of the liver. There is the ancient myth of Prometheus, whose liver, torn out by a vulture, grew in time to be torn out again on each

succeeding day. Investigators at the Mayo clinic and elsewhere have found that the liver has great powers of regeneration. It will not grow again every night. However, from 65 to 70 per cent of the liver can be removed and the remaining portions will begin to grow larger. In six to eight weeks these overgrown portions will almost re-

place the lost parts. The practical application of these findings is in disease of the liver in man. Certain diseases destroy liver tissue, but with this power of regeneration the patient with an injured liver can continue to live and in many cases to work along quite happily. It is hoped that by further work along these lines investigators will be able to protect the injured liver from further injury and thus to save life. Some of these life-saving measures already are in use.

## Collection of Ancient

Coins Goes to Museum Udine, Italy.-One of the finest private collections of ancient coins, comprising numerous examples of gold and silver moneys of the Roman emperors, as well as Greek coins from the Hellenistic settlements in southern Italy, has been bequeathed to the municipal museum here by Count Augusto de Brandis, a native of this town.

The count's collection also included a well chosen selection of Etruscan vases, with examples of the principal periods from archaic to Hellenistic. These vases have been placed together with the coins in the Udine museum in a special room dedicated to the founder's memory.

#### Swimming Pool Being Built for N. Y. Governor

Albany, N. Y .- The state department of public works has begun build ing a modern edition of the "ole swimmin' hole" for Gov. Franklin D. Roosevelt, the new executive of New York state. When the weather gets balmy enough for out-of-door swimming the governor will be able to take copious plunges. He is an inveterate bather,

being afflicted with paralysis,

CHRISTIAN ENDEAVOR TOPIC.

June 23—Jesus Teaching us Self-control. Mic. 6:8; 1 Peter 2:11-20

Necessity: A person, who desires to be a living example of Christ, must show self control. This is more than true of the leaders. It is impossible to control any suggestive circumstances if the leader cannot control self. A man who cannot control self, is unfit to control God's work. One of the first requisites for Christian liv-

the first requisites for Christian living and leading is self-mastery.

Spheres: There are three spheres within ones self to be controlled. These are the body, soul and mind. Each of these must be cultured and kept under control. Either of them neglected will over balance the human motor, and prohibit self mastery. The motor, and prohibit self-mastery. The ministering forces to these three fac-ulties, are the Church, School and the Playground. None of these can be ignored with the hope of reaching the highest ideal of self-control.

Relations: It has been suggested that man has three relationships. A relationship upward toward God, inward toward himself and outward to his neighbor. The second and third depend upon the first. The closer one walks with God, the nearer he feels to himself and his neighbor. To follow the example of Jesus, a christian will so control self that all three relationships will be retained to neglect any one will defeat the soldier, who seeks self-control.

Be Still: Jesus mantained self-control by seeking a quiet place where He might commune with His Father. Into the mountain He went to pray. And then into the temple He went to teach and preach. The teaching of the heavenly Father suggests that one be still and know that He is God. The plan of the universe is that of quite but certain progress. He who desires to possess self-control, must spend

much time in quiet meditation.

Music: There seems to be rhythm in God's creation. All nature had its right and left swing. It is important that every member watch the boat of time as God leads the music of the universe. How beautiful is the church and the lives of its members when all are living in perfect harmony. Selfcontrol means playing our part as the great master bids us. All arguments are the result of some one loosing self

Tramp, Tramp: Self-control as Jesus taught it, means self-disciplin. Much of the art of living is found in learning to keep step. We must never forget that in this world there is the other fellow and myself. Many promising leaders become failures because they are out of step and don't know

Simplicity: There is no virtue in getting things mixed up. Life and its social features are full of tangles. 'o manifest self-control is to live a life of simplicity. God has spoken in a most simple language. His follows have many times confused His message and dulled and blurred the understanding as well as weakened the grasp on God. Living with God clears the understanding. It opens

the eyes. Demons: The person desiring selfontrol should make a thorough study of sin and its effects on the inter life. There are foes to face. They and their tactics must be understood. There are four foes to face. There are, lack of use, deficiency; over use, prodigality; misuse, the inappropriate, improper; and abuse, the injurious. These foes must be faced, to win the battle of self-control.

## Good Short Ones.

An old southern planter was discussing the hereafter with one of his

-Selected.

colored servants.
"Sam," he said, "if you die first I want you to come back and tell me what it's like over there. If I die first I'll come back and tell you what

"Dat suits me, Massa," replied the old Negro, "but if you dies first Ah wants you to promise me dat you'll come back in de daytime."—Christian

A Chinaman was asked if there were any good doctors in China. "Good doctors!" he exclaimed. "China have best doctors in world. Hang

Chang one good doctor; he great save life to me.

"You don't say so! How was that"?

"Me velly bad. Me call Dr. Han Kon. Give some medicine. Get velly velly ill. Me call Dr. San Sing. Give more medicine. Me blow worse— go die. Blimeby call Dr. Hang Chang. He got no time; no come. Save life." The Magpetco.

"Our Chinese laundryman has nam ed his son after Lindbergh."
"What's that, Charlie Fly?"
"No. One Long Hop."—Notre

Dame Juggler. Grandma: "Doesn't the little boy swear terribly?"
Grandson: "Yes'm, he sure does. He

don't put no expression in it at all." Farmer (to druggist): "Now, do be sure an' write plain on them bottles which is for the Jersey cow and which is for my wife. I don't want nothin' to happen to that Jersey cow."—Ex-

Daughter: "Mother, do you want me to put the parrot on the back porch?"

Mother: "Positively no! Your father is repairing the car in the back yard."—Exchange.

#### Gentility Left Off

Mrs. Golman had recently engaged a new maid She was a thoroughly good girl, truthful, honest, very willing and obliging, but she lacked tact. One evening, when her mistress was going out to dinner and the theater afterwards, the maid noticed that a rope of pearls was missing.

"Oh, madam," she cried, "where are your lovely pearls tonight?" "I'm not wearing them, Winnie," re-

plied Mrs. Goldman. "I don't fancy them tonight." "Oh, what a pity, ma'am!" exclaimed

the new maid wistfully. "An' they make you look so like a real lady!"

#### Knockout Ended Duel

## Between Rival Hares

An English naturalist describes a duel which he witnessed in the moonlight between two hares, the cause of their dissension being a third, which was a female that went on nibgood paying position, call or write. bling grass during the encounter with out paying the least attention to the contest. The battlers were facing each contest. The battlers were facing each other in a real fighting attitude, their forepaws held in front looking like human fists. Standing on their haunches these two fighters went all out. They boxed in fine style, their little "fists" darting in and out like flashes. Some blows were cleverly parried. others went well home, and as they fought footwork was not absent, for they circled round, but always faced each other. One lost his balance and sprang lightly aside, to be instantly followed up, and the punching was renewed. Apart from the soft noise of the blows going home there was no sound. The end came quickly. It was almost a knockout, but I am afraid our rules would have put it down as a foul. One hare slipped down, landed on all four feet, and quick as lightning his opponent turned and gave him a kick that landed him many yards away.

## Intelligent Locusts

The locusts are the only living beings that "have made the world safe for democracy." They are the only one who have actually learned the secret of co-operation. They have absolutely no overhead charges. They do not have to support a king, nor pay a horde of professional politicians and government officials to manage them, while they themselves do the work. By some masterly system of "get-together" they perfect an excellent organization without leadership, and without internal dissension. That is more than any collection of human beings has ever been able to accomplish.

## Can't Lose

"Has putting in that lunch counter helped your business?" asked Brown of the druggist.

"Well, it has about tripled the sale of indigestion tablets."

Salesman (at shirt counter)-Looking for something in a shirt, madam? Woman-Yes indeed; About 165 pounds, and he's kept me waiting here nearly an hour .- Country Gentleman.

## "Bankrupt" Ancient Term

The origin of the word "bankrupt" is traced back to ancient times. A Hebraic custom required the deposit in the temple of certain sums of money in Hebraic currency. As Roman coins were frequently used, money changers set up their table or bench (bank) on which they kept Hebraic coins to be bought in Roman money. Money was also lent, and sometimes the changer found himself owing more than he owned. To prevent further calamity his creditors drove him from his business and broke his bench to pieces. He was then "hench-broken" or hankrupt.

## French Cooks Know Secret of Bringing Out Delicate Flavors

By: CHARLES SCOTTO, Chef, Ambassador Hotel, Park Avenue, New York City.

AMERICAN cooking is getting better all the time, but there still remains room for improvement. The chief fault lies in a certain tastelessness, or monotony of taste, which sometimes results in taking the edge off the appetite. Particularly in the case of vegetables, the women of this country are just beginning to learn how to make the most of some of the delicious products of the gar-

In France, on the other hand, methods of seasoning that give added zest to vegetable dishes have long been familiar to all experienced cooks and one of the seasoning agents most frequently used for this purpose is sugar. A small amount helps to restore the natural sweetness which the vegetable may have lost after being picked, and when two or more vegetables are cooked together, it serves to blend their contrasting

A considerable number of American housewives have always used

sugar. Clean the spinach well and cook for ten minutes in as little water as possible; usually enough will cling to the leaves after they have been washed. Then chop fine and drain well. Fry three or four very thin slices of bacon, cut in small pieces and add to the spinach. To the fat in the pan add one tablespoon flour, one tablespoon sugar, one-quarter teaspoon mustard, one cup vinegar, and one and a quarter cups water. Cook until thick and pour over a quart of cooked spinach. Serve with boiling hot butter, mixed with the remainder of the browned cracker crumbs.

Carrots and Cheese—Mince twelve medium-size carrots. Add a teaspoon of sugar and steam until tender. Put into a baking dish. Sprinkle liberally with cheese and a little salt and pepper. Beat three eggs and stir into a pint of milk that has been put on the stove to heat. Let the mixture thicken; then pour over the carrots and cheese. Add more cheese for a top dressing. Put the baking dish in a pan of

Chef Scotto In His Kitchen

can housewives have always used sugar in cooking a few vegetables, but the secret of its general use is comparatively little known in this country, although recently a number of domestic science experts have conducted experiments in this method of vegetable cookery, and have found, as have the French cooks, that it immensely improves the tastiness of the dish.

Asparagus With Butter Sauce—Cook a bunch of asparagus for a half hour in boiling, salted water to which a teaspoon of sugar has been added. While the asparagus is cooking, brown a tablespoon of cracker dust in a half teaspoon of butter, with a few drops of onion juice, a pinch of powdered sugar, and a pinch of salt and black pepper. Drain the asparagus and place on a piatter. Asparagus With Butter Sauce-Spinach Hainault is one of the dishes to which the expert French cook always adds a small amount of

pour over a quart of cooked spin-ach. Stir lightly and serve.

Put the baking dish in a pen of ach, stir lightly and serve.

# On the Funny Side

## SAVED!

The conjurer made a frantic search through his clothes, turning his pockets inside out and bringing forth, among other things, a rabbit, a potted geranium, a drum, seven eggs, the ace of spades, a bird in a cage, two guinea pigs and a bowl of goldfish. "There!" he exclaimed triumphant-

ly to his wife, who had been watching him with grim suspicion. "I told you I was positive I had posted your letters this morning!"

COMES AFTER MAN

Professor-In the natural order. what animal comes after man? Sour Senior-Woman.

Misleading Humor The comic pictures still I scan For jovial friskers; And yet I know no congressman Who wears chin whiskers!

#### Sees Mankind Without Either Teeth or Chin

That mankind will not need to worry much longer about getting toothache or spilling remnants of breakfast on its chin is the conclusion of a British student of dental architecture, Dr. G. B. Palmer.

Soon men will have, he believes, neither teeth nor chin for any purpose at all. Toothless and chinless our descendants will roam the world. unless something forces a radical change in human food. Ages ago men and other animals needed really to work their jaws in order to eat.

Cooking had not reduced the majority of foods to a soft pulp, knives and forks had not been invented to relieve the teeth of their primeval duty to tear off whatever was to be

That is why nearly all the animals of man's class developed outward pointing front teeth that can bite or gnaw bits of meat or bark or succulent root. That is the reason, too, for the sharp-pointed "canine" teeth on either side of the front ones-spearlike implements to transfix the selected morsel while it is being gnawed loose.

Nowadays none of these duties are necessary. Cooking and table manners have displaced them. Nature is always economical, Doctor Palmer believes, and accordingly she is gradually reducing the length of the human chin, the protrusion of the front teeth and the strength and number of the teeth themselves. In a few hundred years table manners are apt to leave everybody chinless and almost jawless.—E. E. Free, Ph. D., in the Washington Star.

## We Can't Have Everything

A few days ago Ruth, age four, was having her hair curled, as she was preparing to "go visiting." Ruth enjoys the process, but, of course, it was rather monotonous for her mother, who had to do all the work.

"Ruth, I wish your hair had a few natural curls in it," said the mother beginning to lose patience. "Well, mother, I guess I can't have

everything," sighed Ruth, "You see, I have a pretty face."

## Dame Fashion Smiles

By Grace Jewett Austin

Sitting in front of the grate fire the

other day, Dame Fashion was wondering idly enough what new fashions the spring would bring. Judging by

past months, there may be still variations from what some one has called "the leadpencil silhouette." But if Dame Fashion had to

make one clothes wish for every Grace J. Austin. woman and girl, it

would be that they might choose happy clothes. When we start out to buy new clothes it is perfectly possible to put "long-wearing qualities" as the first ideal. But in these days of honest merchandise anything we buy will probably wear until we are perfectly ready to bid it adieu. It is always best to seek becoming clothes-and they, too, are certainly findable. But what Dame Fashion has in mind is a certain something that is becomingness-plus. Just watch for it, in shopping days to come; the hat, the dress, the necklace, the coat that makes you feel sure that happy happenings will come to you when you wear it, and that you involuntarily smile at yourself in the looking glass when you try

Many a time you will get this thrill, perhaps, when you have gone to the shopping district to buy no more than a spool of thread or some purchase for the home in general—and all of a sudden, you decide to try on a gown. You will sternly say "no" to yourself and go home, but if the call of the article stays with you and you can manage to have it without highway robbery, it would be the part of wisdom to get it. One simply made dress of red and black figured transparent velvet called like that to Dame Fashion lately, and it is quite a joy to think it is hanging in her closet.

But suppose in the few days while Dame Fashion was pondering, some one else had had a "happy thrill" and taken the gown, there would have come another pleasant part of clothes philosophy. If a wished-for and tooslowly-chosen article is gone, agree at once in your mind that for some reason it was not intended for you, and go your way in peace.

Not long ago a well-meaning friend said, "Dame Fashion, I always read what you write, but ought you not to be devoting your time to higher things?" It was not a time nor place for argument, in front of a large de-partment store shop window, but Dame Fashion earnestly declares her belief that clothes and all their problems form one of the most vital and influential parts of the world's civilization. The fundamentalists would have to admit that the Bible uses precious space for description of the costume of nearly every leading character in the book. When Thomas Carlyle's ponderous histories lie unread, his book of clothes philosophy, "Sartor Resartus," will be alive and quoted.

And here comes a message from the very center of fashion authority: "Afternoon frocks will be fuller but no less short than last year." Well, so be it. Who could from the heart wish to see women again helping the street cleaning departments with their long gowns? And as to the pretty, light-colored hosiery, Dame Fashion always thinks of the "wash lady" who surveyed with disfavor a pile of mod-ern silk hose, saying, "Wish they'd wear black like their mothers did; them has to be really washed."

#### Wears Ermine Necklace and Matching Bracelet

Fur jewelry is one of the new fads that has been introduced at Hollywood. The picture shows a prominent actress wearing with her black velvet dress an ermine necklace with matching bracelet. The black ermine tails trim the looped bows.

## Parisian Contrast

Three new Paris hats embody the unmatched color idea. A black felt cloche is lined with beige fur; a red shaved felt has its wide side brims and narrow front lined with black long-haired plush and bright blue hatters' plush lines a rabbit felt in deep

## **NEVADA DESERT**

Scientist Says Lake Covered Area Now Barren.

Lovelock, Nev.-The barren stretches of Nevada once furnished rich pasture land for thousands of animals: its valleys were covered with deep waters of the ancient Lake Lahotan and its mountains were covered with verdure, is the theory advanced by John T. Reid, Lovelock naturalist, in explanation of the finding of the metacarpal bone of an elephant by road builders in a gravel pit at the depth of 20 feet.

"The head of a buffalo, which had been found in a gravel pit four miles southwest of Lovelock, was donated to the University of Nevada recently," Reid said. "This discovery was considered of special importance in the study of old Lake Lahotan, which not so long ago covered the entire area in which the city of Lovelock is now located. 'At that time, probably not longer than 1,000 years ago, when the lake was at its greatest height, Lovelock was under 320 feet of water.

"The head of a species of extinct horse," continued Reid, "was found in the graven banks northwestward of Pyramid lake. More recently, only two years ago, the bones of an extinct species of horse was found near Woolsey. It is probable the bones of the two horses came from the same species. However, there have been found in various parts of the Western mountain area, bones of three different types of horses. All these signify that these animals were numerous and ranged over considerable of the Western continent. The buffalo did not confine himself to the prairie regions of the Middle West, but he, too, was an animal that ranged all over the

"The discovery that has just been made, establishes that the buffalo must have been very numerous hereabouts, to have his remains found in two widely separated places, and it tells a story as well, that not over a thousand years ago, perhaps much less, these deserts were fertile to such an extent as to have provided food for countless numbers of wild animals."

## Cost of World War Still

Surpasses Billion a Year Washington.-Twelve yea. after the entry of the United Stares into the World war, treasury experis estimated the money cost of the cinflict to this nation at \$37,000,000,000. It is still costing \$1,200,000,000 a year.

This total cost, more than twice whe total national debt of the United States, includes not only the net cold for the war period but the continuing

costs of the war to the present date. From the declaration of war, April 6, 1917, until the official end of the state of war between this country and Germany July 2, 1921, the estimated net cost to the United States is placed

at \$27,183,989,752.96. But the costs did not cease with the declaration of peace and in the ten years since the guns were stilled the continuing costs of the war to the United States have been about \$1,-200,000 annually.

Interest on the public debt, care of the veterans and settlement of war claims are the principal continuing costs of the war. These costs are slowly decreasing, but it may be years before the war has been completely paid for.

#### Larks, Mocking Birds, Most Popular in U. S.

Washington.-Meadow larks and mocking birds are favorites the country over, Mrs. Katherine B. Tippetts of the General Federation of Women's Clubs finds as a result of a nationwide campaign to have each state adopt an official bird.

Most of the Southern states chose the mocking bird, while most of the Middle West selected the meadow lark. California named the condor and the District of Columbia chose the wood thrush.

## Mountain Streams

Bad Salzungen.—An interesting natural phenomenon never before observed here has attended the almost unprecedentedly severe winter weather. On the western side of the Mihlberg a cloud of steam issues day and night from crevices in the mountain.

## Dies of Joy

Morley, Mo.—Overjoyed at meeting her sister, whom she had not seen for 15 years, Mrs. Mollie Atherton, sixty, of this place, died suddenly. Physicians said a heart attack was responsible

#### \*\*\*\*\*\*\*\*\* License Clerk Knows Who's Boss; Not Dad

Oakland, Calif.-Miss Anita Clements, marriage license clerk of Alameda county, knows who the legal boss of a family isand it's not father.

Benjamin Timeous of Pistol River, Ore., wrote to Miss Clements objecting to the issuance of a marriage license to his daughter, Esther. Timeous objected as "legal head of the family."

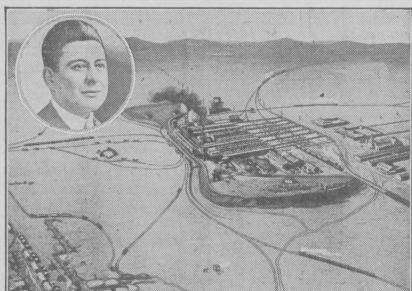

Miss Clements answered and said she would issue the license if the mother approved. And to the end of her reply was added: "The mother is the boss."

# ONCE WAS RICH New Air-Mail Service Between **United States and Chile Boosts** Friendship of Two Countries

South's Cotton and Other Goods Find Market There While Chilean Nitrate, Copper and Iron Increasingly In Demand Here

be inaugurated by the United States Post Office Department, through a recent contract with the Pan-American Grace Airways, Inc., between the United States and Chile, will, in the opinion of the Chilean Minister of Finance, Don Pablo Ramirez, bring about a more friendly feeling between the two nations and further extend trade relations.

HE air-mail service soon to be | goods, valued at approximately \$50,-000,000 annually. I predict there will be an increasing amount of raw material furnished the United States manufacturers from Chile, while Chile will continue to take increasing amounts of finished products, chiefly in the form of cotton goods, mining equipment, electrical equipment, agricultural implements, railway equipment, and other machinery for the installa-

General view Chilean Nitrate of Soda mining and extracting plant, located in nitrate plains of Northern Chile, said to be the driest spot on earth. In the left foreground, caliche (the nitrate of soda ore) is being sorted from other rock and

Workers' quarters are shown at the extreme right.

(Insert) Don Pablo Ramirez, Chilean Minister of Finance, a recent visitor to

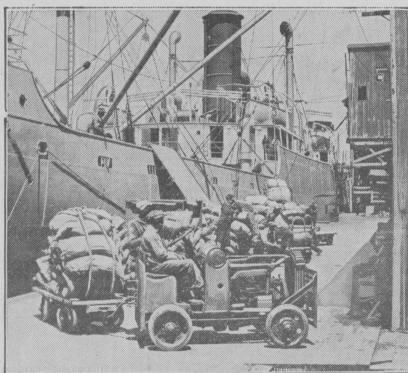

Senor Ramirez is the first cabinet | tion of domestic industrial plants. Alofficial of the Chilean Government to visit a foreign country during term

of office. He came to pay Chile's respects to President Hoover and to confer with American importers relative to extending the sales of nitrate of soda, one of the most valuable natural resources of his country.

"Cutting the time from twenty to seven days in mail and perhaps pas- that the mining of nitrate of soda has

ready Chilean industries have employed more than \$650,000,000 of United States capital, mainly in her nitrate, copper and iron mines, and at the present rate of development we must look to the United States or Europe for additional assistance,' Senor Ramirez said.

He advised the American importers

Boatload of Chilean nitrate at Wilmington, N. C., on its way from the mines of Chile to cotton and corn fields of North and South Carolina. Each spring boats find their way into the ports along the Atlantic Coast, laden with Chilean nitrate to supply the farmers of the United States with their nitrogen plant food.

senger service between New York and | recently surpassed all previous rec-Santiago, Chile, will be a great step ords. "Your farmers," he said, "are forward in bringing us closer to the United States, as well as in establishing a friendlier feeling and in adding to the rapidly-growing developments,"

"At present more than one-fourth of all the foreign or imported goods used in Chile come from the United States, largely in the form of manufactured | and at the lowest possible price."

#### Fishes' Odd Eyes Many blind creatures of the deep

sea are provided with hairlike appendages of a highly sensitive nature, by means of which they apparently feel their way about.

The light that does exist in depths below 500 fathoms is not the light of day but a phosphorescence or luminosity such as one sees at the surface occasionally.

Some of these creatures have luminous globules on various parts of their bodies, which enable them to go through the deep waters much like a motor car on land, shedding a light before them on their path.

## A Little Delayed

Nancy, who was only five, was much impressed when a large bunch of roses arrived for her mother.

"Why did you get them, mother?" she asked. "You see, Nancy, seven years ago today daddy and mother were mar-

ried," explained the mother. "Goodness! He was a long time sending them, wasn't he? You'd think he'd have sent them seven years ago."

now the greatest consumers of nitrate of soda, using approximately a million tons annually. With unlimited beds from which to supply United States farmers with their nitrate fertilizers, my Government proposes to do all within its power to mine and deliver it in the best mechanical condition

#### A Fruity Jest First Girl-I have prunes every

morning. Second Girl-What of it! I have dates every night.

MUST HAVE MARRIED HER

Grace-"Has he loved and lost?" Maud-"Well, not exactly-he's loved and is being bossed."

## Undecided Mission

## Lesson for June 23

A PSALM OF PRAISE

LESSON TEXT-Psalm 103:1-22. GOLDEN TEXT-Bless the Lord. O

PRIMARY TOPIC-A Song of Praise. JUNIOR TOPIC—A Song of Praise. INTERMEDIATE AND SENIOR TOP-IC—The Privilege of Worshiping God.
YOUNG PEOPLE AND ADULT TOP-IC—The Habit of Thankfulness.

This beautiful psalm of praise follows one of the importunate pleadings for help in time of great need. Andrew Bonar calls it "A Song of a Redeemed One by the Redeemer's Side." It is entirely given up to praise; not a single supplication being found in it.

I. Adoration for Personal Benefits

The Psalmist calls upon his soul to bless God's holy name. Man's whole nature, intellectually and spiritually, is called upon to adore God. Note the benefits recognized by the Psalmist:

1. "Forgiveth all thine iniquities" (v. 3) Pardon of our sins is the most important of all God's benefits.

2. "Healeth all thy diseases" (v. 3). Healing here refers to that of the body and the soul. Renovation of the entire nature, especially the moral, follows forgiveness of sins.

3. "Redeemeth thy life from destruction" (v. 4). The sinner is in the position of a debtor. All the demands made against him because of his sins. were paid by Jesus Christ.

4. "Crowneth thee with loving kindness" (v. 4). The redeemed one not only has forgiveness of sins, but is invested with the full rights of heavenly citizenship.

5. "Satisfieth thy mouth" (v. 5). When one enters into saving relationship with Christ he does not incur loss, but great gain. He is not deprived of any rights.

II. Praise for God's Excellencies

The Psalmist now looks away from the benefits bestowed to the very quality of the being who bestowed them.

1. His justice (v. 6).

"He executeth righteousness." God is always against the oppressor and on the side of the oppressed. This points to the time when Messiah's reign shall extend over the whole world.

2. He reveals Himself (v. 7). This He did in a peculiar way to Moses and the children of Israel. The very name Jehovah means Self-revealing One (Ex. 3:14). God created man in His likeness and image in order that He might not only reveal Himself, but that He might share His goodness with the creature.

3. Merciful and gracious (v. 8). As a sinner man needs pardon and favor. God in His mercy pardons the sinner who calls upon Him and through His grace He bestows favors upon him.

4. Not always contending (v. 9) God's love for His children moves Him to contend with them. When they turn from their sin. He ceases to chasten them. God holds no grudges. He forgets our stubborn follies as soon as we turn from them.

5. God's forgiveness (vv. 10-13). This forgiveness is manifested in His not dealing with us according to our sins, in showing supreme mercy in putting away sin as far as the East is from the West, and in fatherly pity. We usually think to praise God for what He has done. How much we ought to praise Him for what He has

III. Man's Frailty and God's Eternity (vv. 14-19).

His frailty (vv. 14-16).

refrained from doing.

(1) He is but dust (v. 14). God con stituted man's body out of the dust of the ground, therefore He knows his frailty (2) His days are as grass (v. 15). He flourishes as the flower of the field. As the grass disappears under a blighting wind (v. 16), so a small blast from God will destroy man's life.

2. God's eternity (vv. 17-19). God's goodness and mercy are from everlasting to everlasting. This goodness and mercy He shows from generation to generation

IV. Call to Universal Thanksgiving (vv 20-22)

Since His dominion is over all, it calls for recognition by all.

1. Angels (v. 20). Intelligent spirits that bear His messages and go on His errands are called upon to praise and adore Him.

2. His hosts (v. 21). By hosts here is likely meant the sun, moon and stars. They are called upon to give Him due praise (Ps. 19:1).

His works (v. 22).

Whatever He has done, whether in creation, providence or redemption, His works made known his goodness.

## Belief and Faith

And Jesus answering saith unto them. Have faith in God. For verily 1 say unto you. That whosoever shall say unto this mountain. Be thou removed, and be thou cast into the sea: and shall not doubt in his heart, but shall believe that those things which he saith shall come to pass; he shall have whatsoever he saith. Therefore I say anto you. What things soever ye desire, when ve pray believe that ye receive them, and ye shall have them. - Mark 11 22 to 24

# ommunity Building

Ways to Hide Ugliness

of High Foundations

High bare foundations are distinctly out of style nowadays, especially when they are conspicuous and of a lighter color than the house, but the way to cover them up or make them disappear in some way; is not so easy to Very often the lawn can be graded up to the top of the foundation, or almost the top. A load or two of dirt is not expensive, and can be graded up to conceal almost all the foundation around the front part of the house. It might be well to terrace it instead of merely sloping it down to the front walk. A terrace often adds a pleasant variety to the contour of a lawn; this would be pracfically necessary if the lawn is deep. Planting shrubs all around the house will also serve fairly effectively to conceal this broad strip. Cement foundations are perhaps the worst offenders in foundations, because the white of cement is so conspicuous. One interesting example of beautifying was recently cited: The house was of a light chocolate color, and the trimming, cream. Against the walls of the house, the white foundation was extremely ugly. The painter cleaned the surface of the concrete well, applied a coat of cement and concrete paint in a color to match the siding; when it was dry he applied a coat of lead-in-oil paint, harmonized well with the siding and the foundation disappeared from sight.

#### Proper Selection of

Vines Most Important

There is much beauty in vines properly chosen and well placed. A little thought regarding the purpose for which each vine is planted will enable you to choose the proper one.

The vines which cling to brick and masonry have little growths along their stems which become fastened to the wall. Such vines as Boston ivy. English ivy and climbing eyonomous belong in this group. Other types of vines grown against walls must have artificial support.

Many vines have a particular value in their flowers, such as climbing roses, wisteria and clematis. These are all adaptable to lattice and trellis. Vines with a climbing habit and heavy foliage have their place in screening and completely covering large spaces. The Virginia creeper, Dutchman's pipe, clematis, bittersweet and honeysuckle are examples. They make excellent coverings for pergolas.

Sometimes it is fruiting qualities that are desired. The bittersweets, matrimony vines, climbing roses and others have attractive fruits for picking or for winter color and interest.

As important as the choice of vines, is their proper placing. Vines on houses should enhance the architecture and not obliterate it from view. The outside chimney usually seems eold and unattractive without the companionship of a vine.

## Salt Will Kill Weeds

Weeds which grow close to a foundation where it is difficult to cut them may be destroyed in the following manner providing it is not planned to grow something in the immediate proximity.

Dissolve approximately one pound of rock salt in a pail of clean water; mix thoroughly until dissolved and pour as close to the wall as possible. The solution will kill the roots of the

A salt solution is also excellent for killing weeds in a cinder drive where they persist in coming up.

## Plants Provide Wall

The walls or barriers separating the garden from the rest of the grounds may often be of plant materials. Plants used in this manner can be very effective in serving as a screen and providing a truly beautiful element in the general landscape scheme. The barrier may itself become a picture. Where strict formality is desired, it can also be obtained in plant materials, if the varieties which can be clipped are used.

## Trees and Billboards

If tree-lined highways will eliminate billboards, they are to be desired on all counts. Providing them is a task for state, community and individual. As for their attractiveness, there are enough delightfully shaded roads in New England to prove it beyond all necessity of bringing up for example the famous poplar-lined highways of France.-Worcester Telegram.

## Beautify Vacant Lot

Boy scouts of Pueblo, Colo., working with the Pueblo Floral club will transform vacant lots in that city from unsightly weed patches into attractive flower gardens this spring. The beautification program was started at the Colorado State fair grounds. Acres of flowers were planted on the grounds and seed from the plants will be used to plant the city's vacant lots.

## Appeal of Sincerity

In houses, as in people, it is the charm of sincerity and unaffected genuineness that has a lasting appeal. The house that welcomes us quietly but with an assurance of beauty and comfort is the one to which we turn with the greatest pleasure.

#### Talent and Prestige

Needed for "Authority"

Throughout the ages man has striven vainly with his fellow compatriots to attain that pinnacle of absolution, authority over his fellows, but it has been left to Aldous Huxley, writing in Vanity Fair, to tell why a man wants

to be an authority. "What are a man's motives for wanting to be an Authority? The two necessary attribues of an Authority are in the first place talent and in the second a prestige which is a product partly of that talent and partly of causes external to the talented individual. Nobody without some sort of outstanding talent can hope to become an Authority for the world at large. At the same time, talent without prestige is unavailing. Many men of talent have lacked authority during their lifetime; authority has only come to them posthumously with a posthumous accession of prestige. In this age of newspapers the greatest source of prestige is publicity, the mere fact of being somebody who figures in the news. It is possible for any public person, whatever the nature of his success-bringing specialty, to become an Authority."

#### American Indians Not

Wanderers by Nature The bureau of American ethnology

says: "One of the common fallacies of early historians, by no means yet entirely dissipated, was the idea that the Indians were generally nomadic, having no fixed place of abode, but wandering hither and you as fancy or the necessities of existence demanded.

"The term nomadic is not, in fact, properly applicable to any Indian tribe. Every tribe and every congeries of tribes, with few exceptions, laid claim to and dwelt within the limits of a certain tract or region, the boundaries of which were well understood, and were handed down by tradition and not ordinarily relinquished save to an superior force. Between many of the tribes, indeed, were debatable areas, owned by none by claimed by all, which from time immemorial formed the cause of disputes and intertribal wars."-Pathfinder Magazine.

#### Truth Will Out

"How do you know Jenkins' wife is

"He carries a can opener on his key ring."—Staffordshire Sentinel.

#### No Working Model

"They tell me you have a model husband, Mrs. Hicks." "Yus. sir. but 'e ain't a workin

E-B OSBORNE OGRAND DETOUR

# Save Time by Taking it Easy

JOU'LL SAVE yourself a lot of heavy work with the Case Drop Deck Cylinder Hay Loader and do a faster, better job of making hay. The Case loader working behind a Case Side Delivery Rake makes an ideal outfit.

The Case is a one-man loader and loads fast because it is built to handle large windrows. Its special feature is the lowering of the upper part of the elevator so that the hay is delivered close to the rack. This makes it easy to build a firm foundation. As the load grows, you can raise the elevator or deck-without even stopping the

A large cylinder with 128 spring steel teeth, picks the hay up cleanly and without shattering. The wheels are large and strong and easy-running—the machine is exceptionally light to pull. Main frame is of angle steel-exceptionally well-braced.

Come in-you'll want to see the time and money-saving Case Loader. We're always ready to serve you.

#### SOCIAL LIFE RUN BY RIGID RULES

Washington Hostesses Must Watch Their Step.

Washington.-Hostesses who come into this capital city with the new administration are certain to find that their social knowledge, however extensive it may be, is not adequate to take care of every situation likely

to arise during their stay.

Occasions of ceremony in the national capital follow certain rules and regulations, ignorance of which often brings humiliation; and indifference to those rules calls down stern criticism upon the offender.

Indeed, it is the wise newcomer who acquaints herself with the rules. By so doing she will not only simplify life for everyone, but will also save herself much embarrassment.

Washington is different from European capitals in this respect. On the continent when statesmen are dined and feted, there is a "protocol" which assigns to every one his or her relative rank, and does so with the official sanction of the government.

No such court of appeals exists in the capital of this country. There are available in the State department certain rules and regulations. The department, however, refuses to be quoted as an authority and supplies no written lists.

It is up to the individual to do the proper thing.

And the proper thing to the uninitiated at times presents a real problem. Foreign ambassadors and ministers are not, as Lincoln is said to have been: "Willing to follow anyone who wants to precede them." They represent their country or their rulers, whose dignity they are responsible for upholding in their own persons. To use the words of a clever and distinguished ambassador: "Since the Good God made us so that we cannot get through the door at once, there must be precedence."

Each year Washington sees men come here in official positions of great importance. They represent sovereign states, each one proud of its dignity. An affront to them is an affront to those states.

Thus the wives of Washington officials are faced by conditions not duplicated anywhere. And they soon come to know that knowledge of the rank of officials at dinners is necessary, not merely in giving entertainments, but even in attending those given by

Soldier Lives With

Big Hole in Skull San Juan, P. R.-With a hole in his

skull as big as a half dollar where a .45 calibre revolver bullet, fired through the roof of his mouth a month ago, emerged, William Barrio, twenty-four, a soldier, still lives and is expected to recover control of nearly all of his faculties.

Barrio, who is serving his second enlistment in the regular army, was tired or life. While walking post he inserted the muzzle of his revolver into his mouth and pulled the trigger. Rushed to the military hospital, the doctors removed two cupfuls of brain substance, and in three days the patient had regained consciousness. He is unable to speak, but understands what is said to him.

The man's chances of living for a great many years are good. The doctors insist that if death comes it will not be as the result of the bullet that plowed through the brain. A disease of the brain on the order of meningitis may follow, but as yet there are no symptoms.

#### Cambridge Invents "Universal English"

London, England.-Cambridge scientists and scholars have evolved an international language of 500 words.

English is the basic tongue chosen and it is claimed that people of all nations may pick up "panoptic English," as the reduced vocabulary is called, within a few weeks or months. instead of years.

The entire vocabulary of "panoptic English" can be printed on the back of a single sheet of notepaper and seen at a glance, hence its name "panoptic."

In the new language the majority of verbs vanish and in their place are twelve "operators" or fundamental verbs which cover the essential movements of persons and things. They are come, get, give, go, keep, let, make, put, take, be, do and have.

Ancient Bones Found

Wallertheim, Germany.—Traces have been discovered here of human beings who lived 110,000 years ago. Scientists recently found skeletons of men with big skulls and mouths like spouts.

<u>\*</u>\*\*\*\*\*\*\*\*\*\*\* Gander Nurses Young After Goose's Death

Beaver Creek, N. C .- Sauce for the goose gave a Beaver Creek gander a full winter's work and he has just succeeded in "weaning" four goslings he adopted last fall when their mother died soon after hatching them. The gander, Arthur Merrill, his owner, declared, worked himself thin nursing his brood through the winter and has taken on new life since his breed has ceased to waddle quackingly at his web-footed

## TANEYTOWN LOCALS

Items of news from town, or vicinity are always wanted for this column. Especially accidents, sales of real estate, fires, important happenings, visits to or from the community social events, and all matters of general interest to those at home, and away from home.

Mr. and Mrs. C. T. Fringer spent several days last week with friends at Carlisle, Pa.

Mr. and Mrs. John Marker, of Littlestown, spent last Friday evening with Mr. and Mrs. M. C. Fuss.

Mr. and Mrs. Lester Cutsail and son of near Walnut Grove, spent Sunday afternoon with Mr. and Mrs. William Feeser.

Miss Nellie Selby and Mrs. Howard Shaffer, of Hanover, spent Wednesday with his home folks, and called on old friends and neighbors.

Mr. and Mrs. G. Oliver Warner, Miss Hanover, visited Mrs. Jesse Myers and family on Sunday afternoon.

Mrs. P. E. Warner, of New Oxford, spent from Thursday till Sunday with Mrs. G. H. Birnie and daughter, Miss Eleanor. Mr. Warner, spent Sunday at the same place.

Rev. J. Gould Wickey, well known to many in Taneytown was awarded the degree of Doctor of Divinity, at the Commencment exercises at Gettysburg College, last week.

Charles Ritter, son of Mr. and Mrs. Ernest Ritter, of Keysville, was taken to the Harrisburg Hospital, on Monday, and operated on for appendicitis, and is getting along very nicely.

Mr. and Mrs. D. M. Mehring entertained over the week-end Mr. and Mrs. Harry Veit and son, of Philadelphia. Mrs. Samuel Mehring, of town, spent Sunday at the same place.

Last Sunday was "Father's Day." Had it not been for the radio, Taneytown would hardly have known about it—and then, it was too late. Even the Record failed to say anything

Prof. S. LeRoy Byham who pitched for the Wilkes-Barre, Pa., team last year, is playing with the Charleroi, Pa., team this year, and won the game against Clarksburg, W. Va., on Monday, 8 to 5.

The new "stop" signs at the square are pretty sure to do some good, in the way of preventing accidents; but we believe it will be demonstrated that a stop and go electric sign should be placed there too.

The State Road Commission advertises in this issue for proposals for building a new bridge over Pipe Creek, on the Taneytown-Westminster road. It is to be a double-span, two way bridge and will be a big improvement to the road

Mr. and Mrs. John Sauble, of town; Mr. and Mrs. Claude Biddinger, and daughters, Evelyn and Mabel; Mrs. James Welty, daughter, Bessie, near town, spent Sunday with Mr. and Mrs. Nelson Gleim, at Harrisburg, and Mr. and Mrs. John Eisley, at Mechanicsburg, Pa.

Monocacy Lodge No. 203, A. F. & A. M., called off on Monday evening, for the Summer. The usual banquet was held at Sauble's Inn, where 50 were served. At a regular meeting of the Lodge, Deputy Grand-Master Gorsuch, and Grand Lecturer, Wright, of Baltimore were present and made ad-

Was it the hot day, lack of proper publicity, "wash day," or just don'tcare, that was responsible for the small attendance at the District Religious Convention held in the Lutheran Church, on Monday? Taneytown has a good reputation for attending such events, and it is one that should be held on to.

The Boy Scouts will gatner up old papers and magazines on Friday morning, June 28, and will be glad to have all who are interested in the Scout movement to aid in this way toward raising a fund for the use of the organization. If possible, have the papers tied up in bundles. Will be glad for any lots, large or small.

All who are interested in organizing a Taneytown Baseball team for the Summer, are requested to meet in the Firemen's building this Friday night, at 7:30. The idea is to form a team made up almost entirely of home players, which should arouse more local interest than when the team was made up largely of strangers. Come out and help the movement along.

J. Edw. Flohr, who takes considerable interest in the chicken business, handed us this week, the following table of prices paid for eggs for the past ten years, as nearly as possible on June 20, each year; 1920-20c: 1921—24c; 1922—22c; 1923—21c; 1924—25c; 1925—27c; 1926—27c; 1927-21c; 1928-27c; 1929-30c. As will be seen, the price per dozen now is 10c higher than ten years ago.

A concert will be given by the I. O. O. F. Band, Saturday night.

Misses Treva Becker and Clara Devilbiss are attending Summer schools at Charlottesville, Va.

Rev. and Mrs. C. E. Fultz, Washingtoo, D. C., were recent visitors at the United Brethren Parsonage.

Mr. and Mrs. Merle Ohler attended the Zentz reunion, on Sunday, at the home of Mr. and Mrs. Shreeve Zentz, "Pleasant Hill", Owings Mills.

Miss Elizabeth M. Annan left, on Tuesday morning, for a trip to the West Coast, including the Yellowstone Park, Grand Canyon and points in Canada.

Mr. and Mrs. Wm. T. Kiser of town, Mr. and Mrs. Emory Flickinger, near town, spent Saturday and Sunday with Mr. and Mrs. T. H. Bair and Miss Elizabeth Kiser, at Harrisburg, Pa.

The Fire Company was called to Grace Warner and Miss Sheaffer of Emmitsburg at 2 o'clock Sunday morning, where a number of stables or small garages were destroyed, in the rear of street leading toward Gettysburg. The Company aided preventing the spread of the flames to other more important buildings.

> Mr. Thomas D. Meldrum and Miss Helen E. Roop were married in York, Pa., on Thursday, June 20th. They will be at home at 122 S. Penn St., York, after July 1st. Miss Roop's many relatives and friends in Taney town extend their best wishes for the complete happiness of the newly-weds

The following ladies from Taneytown attended the Womens' Short Course, at College Park, this week: Mrs. Robert Elliot, Mrs. Abbie Angell, Mrs. Norville Shoemaker, Mrs. Clyde L. Hesson, Mrs. Allan Sanders, Mrs. Norman Baumgardner, Mrs. Harold Mehring, Mrs. George W. Shriner, Mrs. Harry Essig, Mrs. G. Walter Wilt, Miss Mary Fringer and Miss Estella Essig, Mrs. Wm. B. Naill, Mrs. Walter Shoemaker.
