VOL. 36

TANEYTOWN, MARYLAND, FRIDAY, FERUARY 7, 1930.

WEST. MD. TRAIN HITS AN AUTO TRUCK.

Truck Demolished and Driver very Seriously Injured.

Sterling Rowe, 21, near Union Bridge, was seriously injured and the truck he was driving demolished when struck by a Western Maryland mail train at the Detour crossing about 4:15 o'clock Friday afternoon. Rowe was rushed to the Frederick City Hospital, where it was found he

Rowe was on his way to Motter's Station from Harbaugh's warehouse in Middleburg, Carroll County, with a load of dairy feed. He was alone and approaching the Detour crossing, and apparently failed to note the mail train, which was eastbound from Harbard and Parkey residents stated Hagerstown. Detour residents stated there is a steep down-grade at the spot and that high banks on either side obscure view of the tracks until the motorist is only a few yards

As Rowe drove the truck on to the tracks, the train hit it almost directly in the center, demolishing it entirely. Rowe was thrown on to the cow-catcher of the locomotive and carried up the tracks for some dis-tance before the train could be halted on a nearby bridge. Train officials carried him into the baggage car, and he was taken to Union Bridge and later to Frederick Hos-

It is said that Rowe saw the train but could not stop the truck in time. The safety bell was ringing at the crossing but the noise of the truck prevented its being heard at a distance. The truck was owned by Lloyd Devilbiss, near Uniontown, Carroll county, and carried three tons of feed valued at approximately \$125.

BOULEVARD AGITATION QUIETING DOWN.

The agitation of the Washington-Lincoln Memorial Boulevard to Gettysburg seems to have gone into se-Anyway, for a time it provided interesting coverage for newspaper space, and demonstrated how popular it would be for the Federal Government to finance the proposition-providing it went "our way,"

but not the other way.
Silver Spring at least got itself more clearly located on the map, and now everybody knows that the only right way for tourists to go from Washington to Gettysburg is via Bethesda, Rockville and Frederick; though we suspect that some of the bouighted every ill.

President would be popular; and that eventually the short route that would | foods benefit territory not now well supplied with a main highway, would appeal to the authorities.

ANNUAL MEETING OF THE CHILDREN'S AID.

We are calling your attention to the annual meeting of the Carroll County Children's Aid Society, which will be held on Tuesday, Feb. 11, at 2 o'clock, in the Firemen's Hall, second floor. The program will be as

Invocation, Rev. C. M. Elderdice Greeting Mayor Geo. E. Matthews Solos, "Morning" and "Four Leaf Clover" by Miss Naomi Stull, accompanied by Mrs. Noah

Schaeffer. Miss Katherine T. Kirwan, Exec. Sec'y and Miss Susan H. Dabney, Field Supervisors of Baltimore, will be with us. This is an open meeting, and we earnestly hope that it will be well attended. We are anxious for the people of Carroll county to hear the County Director, Miss Bonnie Custenborder, our worker, and the treasurer's annual report. Everyone welcome. SECRETARY.

UNITED BRETHREN REVIVAL.

Since the Rev. and Mrs. R. A. Boyer were at the Revival Services at the Taneytown United Brethren Church, requests for their return have been so numerous that they have consented to come again this coming Saturday night. They will sing and Rev. Mr. Boyer will preach another soulstirring Gospel sermon. Everybody is invited to attend.

This is the third week of the present evangelistic campaign with interest still very great and the attendance large. Last Sunday night the Church could not accommodate the crowd. So far there have been six conversions and many others expressing the benefit received from the services. Dont miss these ser-

ATTEMPTED THEFT OF AUTO Three Suspects Placed Under Arrest, Sunday Morning.

On last Saturday evening at about 6:30 Mr. and Mrs. Wm. Hockensmith observed three strange men pass their home on Middle St., on the alley side, going toward their barn that is used as a garage by Mr. Hockensmith and their tenant, Geo. L. Harner. Thinking that they would bear watching Mr. Hockensmith went quickly through the garden to the barn and heard the men on the inside, evidently trying to run Mr. Harner's auto out of the building.

building.
Mr. Hockensmith hurried back to had a broken right leg, injuries about the head, possibly a fracture at the base of the skull.

Mr. Hockensmith hurried back to the house and phoned to Mr. Harner who was at his place of business on Baltimore St. The latter responded who was at his place of business on Baltimore St. The latter responded quickly and he and Mr. Hockensmith arrived at the barn just after the auto had been pushed into the alley, but before the three strangers had

time to start it and get away.

The would-be thieves took to their heels with Hockensmith and Harner in pursuit, but owing to the snow and ice it wasn't a good time for a foot race, and the last seen of the three was when they reached the railroad crossing north of Fairview Ave. State policeman Bradley was com-

municated with and was soon on the job, but it was considered wise to wait for daylight for further investi-gation. On Sunday morning Bradley picked up three men on suspicion on the state road about 3 miles from town footing it toward Westminster. Without difficulty he persuaded them to take a ride with him to the county jail where they were held for a hear-

One of the men who entered the barn wore a red sweater, and one of the men arrested also wore the same kind of sweater, which about ended the identification. The men claimed to be from Mass., on their way to Florida, and stated that they spent the night in a barn owned by A. W. Feeser in a field on the opposite side of the railroad from where they were lost sight of Saturday night.

The three men gave their names as Edward Barker, Frank Sullivan and Stephen Arnold; their ages from 21 to 25 years, and their home as Pitts-

to 25 years, and their home as Pitts-field, Mass. They are also said to have been without money.

At a hearing on Thursday the trio admitted being in the garage but that they had not handled the car. They were fined \$5.00 each, but in default of payment are being held until the Massachusetts authorities can be the Massachusetts authorities can be heard from. In case they are not wanted there, they will likely be freed

"INSIDE" INFORMATION FOR WOMEN.

Starch clothes wrong side out. Leave them wrong side out until they

though we suspect that some of the benighted ones will still take other routes—even via Mt. Airy, Westminster and Taneytown, or maybe even by way of Baltimore.

Senator Tyding's resolution is still to be heard from, of course, but even the Silver Spring promoters seem to consider the chance of a direct route is closed for the present, and there is alweedy tells of present, and there is

already talk of promoting a "Roose- for good comradeship with one's chil- away the children could not come to principally to conversations with Mr. velt Boulevard" through new termstory to Gettysburg.

It is believed that from the side of sentiment, a memorial to the late

President would be penuler; and that

They may be hard-cooked in the double boiler, mashed and seasoned for sandwich filling. Raw or hard-cooks ed egg yolks make a good foundation for salad dressing. Several good egg sauces for fish or meat can egg sauces for fish or meat can be made with the yolks only, and soft custard for dessert is still another use. Pastry trimmings, cut out like cookies, brushed with egg yolk, sprinkled with sugar and cinnamon or sugar and grated orange rind, and baked, make delicious tea cakes.

HAZARDS OF AUTOMOBILE TRAFFIC.

The statistician of the Wisconsin Board of Health has published a statement under the above caption that largely concerns automobile accidents, their causes and suggested means of prevention. The Record tried to condense it and use it as a first-page article; but it is so concisely and practically written that it can not be condensed without cutting out something of value. We therefore publish is in its entirety; on our Editorial page, and trust that it may be widely read and carefully

REV. ADAM IMPROVING.

Rev. John S. Adam, pastor of Christ Reformed Church, Middletown, well known in Carroll county, who has been ill since the first of January and who recently spent several days at the Frederick City Hospital for observation, is now getting along nicely. The physicians ordered Rev. Adam to bed for one month, in order that he may have a complete rest While Rev. Adam is not allowed to have any visitors, his many friends have any visitors, his many friends and to be "old-timers" in the busthere and elsewhere will be glad to know that he is well on the way to recovery.

LEASES EAGLE HOTEL.

George Eberhart, proprietor of the Eagle Hotel, Gettysburg, has announced the leasing of the hostelry to C. J. Hartman, who, until recently, was connected with a Fort Stanwix hotel, Johnstown, as a steward. A long term lease on the property was se-cured by Mr. Hartman, who is an experienced hotel and club man.

CHRISTMAS IN CHINA DESCRIBED.

How Gifts from America made Day a Glad One.

The following letter from a Missionary to China explains itself.
January 16, 1930.

Christmas is over and such a Christmas as we did have! I do wish you could have been with us and seen the little Brownies enjoy your treat. They were talking about Christmas for weeks before the glad day and they came so early to the day and they came so early to the different Sunday School rooms on Christma's morning! They could hardly sleep or wait for the treat. How like American kiddies! At ten clock the big church, borrowed for the occasion, was packed full—gallery and all—with my Brownies, their little slant-eyes bright with anticipation. We had them sing Christmas carols. Some of the wee ones took part with speeches and songs and then we invited the state of th and then we invited a Chinese pastor to give them a Christmas talk. It was fine. When he asked them questions about Jesus they answered beautifully and when he asked about their love for Christ their wee hands went up in glad confession.

went up in glad confession.

Then I talked just a few moments, pointing out the Christmas story as painted in the great picture hung on the wall. Then I told them the presents that we had ready to give were not from me but were from you good friends at home, children and growning that you had given because you ups, that you had given because you loved them and wanted them to know Jesus whom you love, that you wished them to have a glad time on Jesus' birthday and that you had sent to them your best greetings and wishes for a Merry Christmas. Then I asked, "All who wish to thank American friends and to send greetings hold up your hands." Both hands went up— a forest of hands! It was a jolly

The church was so crowded seemed unwise to distribute the gifts inside, so we decided to give the presents at the door as Brownies went out. For a while this went fine; but it took time and the wee people got anxious and crowded the passage until they got stuck, could neither get out or in. A young business man and his wife gave me two cases of American apples and came to help. When he saw the "jam" he went inside and drove back the little "chen" until the "sheep" until the passage was cleared. But some of the wee ones looked as though they had been drawn through a knot-hole and tears were squeezed out. After this things went well. When almost all seemed to have gone I had lots of presents left, what was the matter? One came saying, "The children in the gallery are locked in!" "Let them out," I shouted, and out they came glad not to be forgotten. Every present was

In the afternoon we had another Remember that the table is a place | Sunday School in a district so far his contract of rental, who testified comes acquainted with a variety of ones, though crowded to out-doors, foods. Left over egg yolks have many uses. They are a valuable source of iron and so should always be utilized. would have done your heart good to hear their little screams of delight as they discovered the baby dolls, or pulled out caps of many colors or socks or some longed-for toy. I tried to supply all with useful things like stockings, caps, handkerchiefs and towels as well as dolls, balls, toys, candy, oranges and bright red American apples. A happier lot of kiddies you seldom see and gateful too, for so their sweet little "Zia-zia Noongs"

and bright faces proved. I am so grateful for your help and that of other friends, for you gave me the glad joy of passing on your gifts and your message to these little kiddies and I trust God will let you meet lots of my big family in the streets of the Glory City some sweet day. Christmas is a wonderful time to me for it means not only making perhaps a thousand "yaller" kiddies happy; but gives me the privilege of service, which means more to me than I can express. It has been a strenuous time. I am tired it's true; but it's a glad tired, and I'm anticipating another Christmas already. Thank you ever so much.

Enclosed is woodcut of Confucius. Yours gratefully in Christ's glad service, (Rev.) H. G. C. HALLOCK,

A BODY DISINTERRED

Cause of Death of William Keefer Being Investigated.

On orders from the proper authorities, the body of the late William T. Keefer, of Bark Hill, was disinterred on Wednesday morning from its rest-ing place in the Lutheran cemetery, Uniontown, by C. O. Fuss & Son, undertakers, and brought to their es-tablishment in Taneytown. Shortly after the arrival of the body, Sheriff George C. Fowble and Police Justice Benson appeared, together with twelve men to serve as a coroner's jury. After viewing the body, por-tions of it were removed by a sur-geon and taken away for chemical

It will be recalled that on the morning of December 9th., last, both Mr. Keefer and his wife were taken violently ill after eating breakfast. Mr. Keefer died but Mrs. Keefer recovered from the attack, and has since been living with her nephew, Paul W. Edwards and family, near

At the time of the death of Mr. Keefer the symptoms seemed to indicate that poisoned food had been part of the breakfast of the couple. What new developments along this line the officers of the law may have, has not been made public.

WESLEY J. HAHN FARM TO BE SOLD.

The Record has been informed in the following words that the efforts of Ralph W. Study to stop the sale of the Wesley J. Hahn farm have failed. The farm, which is located on the road from Silver Run to Taneytown in Myers' District, and consisting of about 240 acres, as well as the live stock and other personal property of the late Wesley J. Hahn, will be sold at public sale on Saturday, February 8th., at 12 o'clock noon, in accordance with the advertisement.

Mr. Hahn died last Thanksgiving Day, and shortly thereafter, his exe-cutors, Arthur L. Stonesifer and Arthur G. Wantz, secured an order of the Orphans' Court of Carroll County to sell his farm and personal proper-ty, as directed by his will. After the property was advertised to be sold on February 8th., Ralph W. Study, a farm hand employed by Mr. Hahn last August, filed a bill in the Circuit Court for Carroll County to have the Court grant an injunction to atom the Court grant an injunction to stop the Study claimed when he was hired to work on the farm, that he and Mr. Hahn had a further agree-ment or contract whereby Study was to become a tenant on shares, beginning the first of April, 1930, for the term of one year, and this alleged contract was the basis of his suit to stop the sale. Study also claimed that he was to have the use of all the live stock and farming implements on the farm as such tenant, and that Mr. Hahn was to provide him a man in addition to help with the farm work.

The case was heard by Judge William Henry Forsythe in open court on Wednesday, February 5th., and Study produced a large number of witnesses in an effort to establish

Upon the conclusion of the case the Court refused to issue the injunction, and dismissed the bill, holding the contract had not been established by the testimony, and therefore could not

Notwithstanding the Court's finding, Mr. Study has made it known that he will announce at the sale that he is entitled to farm the place after April 1, and also to have the use of the live stock and farm ma-The sale will go on, notwithstanding.

NOTICE TO DAIRYMEN.

Profitable milk production depends to a large extent on profitable feeding Are you feeding a balanced ration to your dairy cows? Do you know how to use your own home feeds to the best advantages. A machine will only perform accordingly as the fuel fed to that machine is adapted to its particular needs. Likewise a dairy cow will produce in accordance to the way she is fed.

Now is the time for you to talk ovhappy; but gives me the privilege of receiving your good letters and gifts and enjoying this real fellowship in Meade, Dairy Specialist from your State College will be at the County Agent's Office to discuss problems you may have with milk production. These talks on Monday, Tuesday and Wednesday are designed to assist the dairymen with their feed problems. Dr. Meade comes to us from the Extension Service and is well known throughout the State. He has a wide reputation among the dairymen of the State and will be glad to go over your dairy situation during the three days he will be in the county.

The meetings which are to be held will start promptly at eight o'clock and continue not longer than one hour. During the three days Dr. Meade will be in the office during the forenoon and will meet farmers who wish to have personal conferences with him.

The meetings on February 10, and 12th., are designed primarily for the purpose of helping the dairymen of the county and it is hoped that all dairymen will show an active interest and attend regularly. It will cost you nothing and may save you a great deal on your feeding opera-

refinement and culture who by reason of financial reverses are unable to continue the life to which they had been accustomed." The home will be made possible by the will of Anna L. Gardner, which has increased from \$365,000 to \$749,550. This was stated Saturday by the directors in charge of the fund, who filed their first annual statement in court.

United States shall aid the States in the construction of rural post roads, and for other purposes,," approved July 11, 1916, and provides for appropriation of \$125,000,000 for the fiscal year ending June 30, 1932, and \$125,000,000 for the fiscal year ending June 30, 1933.

The bill further authorizes the appropriation, in addition to the author-

first annual statement in court.
The home is named in honor of the purpose. The will provided that the fund be allowed to accumulate for fifteen years."

BABE RUTH MAY QUIT.

"Babe" Ruth the big baseball star, has issued an ultimatum to the managers of the New York Yankees, that unless he is given \$85,000 a year for the next two years, he will not play He says; ball.

"If the Yankees reject my request for an increase I will remain idle, which at my age, means retirement from organized baseball. A few years ago I could not take this atti-tude. I would be obliged to sign at any time for the same reason 95 per cent of all ball players have to sign -bread and butter. Well there's enough bread and butter in our home even if I never touch another baseball in my life. Without receiving 5 cents from the Yankees in 1930, I am assured an income of \$25,000 from established dividends and royalties."

FIGHT THE RATS. Although the rat, mankind's great-

est enemy in the animal world, is probably decreasing in numbers, farmers and others troubled with these pests should not let up on preventive measures. New buildings should be made rat-proof. Close all openings through which rats can enter. Remove all shelter for rats. Dispose promptly of all garbage, trash, and waste on which rats feed. The structure of the work necessary to successful poultry raising.

This greatly awakened interest in poultry as a major farm product has resulted in constant improvement of postroy, the rate with reigness heit. Destroy the rats with poison bait or traps. Fumigate rat burrows and hiding places with poisonous gases. A small dog trained to hunt rats will often keep down their numbers. Note Greater Profits," to pledge improved A small dog trained to hunt rate with often keep down their numbers. Note neighborhood sources of rats, enlist stock to farmers.

Hens must lay from 140 to 170 return a good profit moval, and work for practical rat-control ordinances in cities and towns to the owner.

HOW EDITOR GOT A PAPER

For 1 Mule and Other Valuable Considerations.

We got the following good story from the Publishers' Auxiliary. Those western chaps turn out stories like this without batting an eye. Whether our readers think it true, or not, we leave to them. As it is told, when the new owner of the Arapaho (Okla.) Bee took charge of that paper he gave to his readers an account of the intricate financial transaction by intricate financial transaction by which he came into possession of that newspaper. The account reads as

"Buff Burtis and Paul Porter, who are the ramrods of the Clinton Daily News and ertswhile owners of the Bee, come up from Clinton Tuesday with a bale of legal documents four inches thick and sold us this great

and moral weekly.

We have been dickering with them for some time, but couldn't come to a for some time, but couldn't come to a satisfactory agreement. They objected because the mule we wanted to swap in on the deal was blind. We countered that by saying that the paper cutter had been welded and there was a piece gone off the Campbell press. They then agreed to knock off a couple of hens if we'd give 'em a mule with at least one eye. It finally came to a compromse when they knocked off two more hens and we threw in a set of harness.

There was quite an argument about

There was quite an argument about the type, most of which went through the pioneer days in "G" county and has lost the bloom of youth. We didn't think it was worth anything at all. In face we thought we were doing 'em a favor by taking it off their hands. But they insisted it was worth real money. Nothing doing! Well, then the deal's off. After some reflection we suggested a

Make it four goats. Nawsir! Four goats for that junk? Never! Two goats. Well, all right. Two goats it

Then came the question of good will. We maintained that the Bee never had any good will, and never would have. It was famous for not having good will. They said it was undoubtedly the best paper in the country, the consoler of the aged, the hope of youth and that children cried hope of youth and that children cried for it. We said we wouldn't give a pair of suspenders for the Bee's pop-

ularity. "Let's see the suspenders," they said.

We went out and borrowed a pair of suspenders from Bill Muma. They

of suspenders from Bill Muma. They got mad because the suspenders didn't have any snap in 'em and started out the door. But they came back.

Finally we got it all fixed up. They gave us a bill of sale on the Bee and we gave them 1 mule (blind), 1 set leather harness, 7 hens, 1 pair suspenders, 1 nigger-shooter, 2 pole cat hides and fifteen dollars cash.

The Bee is ours." The Bee is ours."

A LICENSE FOR RADIOS.

Canada has an annual license fee of \$1.00 for all radio listeners-meaning \$1.00 a year license for each radio owner; and the law produces over \$200,000 a year, even though it is said that as yet the law is not very well enforced; that is, the collection end has not yet been very extensively organized.

A license for radios? Why not? Of course, radios might be expected to be taxed, along with other personal property-household goods-but the likelihood is that they have not been, as such property usually gets by the assessors on very liberal valuations.

There would be much to be said in favor of such a license. All property owners are supposed pay taxes to meet the expense of government; but it is altogether possible—indeed it is a fact—that there are thousands of people owning only a little furniture, who come within the furniture exemption laws, and pay no taxes at all. Under the Canadian license law they would at least pay \$1.00 a year.

Then, consider the vast number of good programs that the radio brings in, free to all. Who would be without them for a mere \$1.00 a year? The automobile owner must pay tax, and a license fee besides. The owner of a home, that may be heavily mortgaged, must pay the tax on the value of the property, even though he may have little actual cash invested in it.

Then, in Maryland there is no poll tax for the privilege of voting. Many are therefore enjoying all the benefits and power of citizenship without paying a cent a year in taxes. But, it may be said that a radio license would not reach such citizens anyway -or not many of them. Maybe not all, but it would catch some. Anylicense of \$1.00 a year a reasonable ore revenue for the state, or county. Perhaps such a law might prevent increases in tax rates?

THE SELFISHTARIFFINTERESTS

It begins to look as though neither of the big political parties will be able to salvage much partisan argument for use in the 1930 campaign, on account of the tariff issue When the Senate commenced to emasculate the liams says, "Improved medical skill, House bill as a specimen of "protec- better hospital facilities, better nurstion" extremes, it looked as though said protection would come through with a very much discredited reputa- ening the life line. But preventive ion to place before the voters-and especially the farmer vote.

ged over the various schedules in a cry of Republican iniquity; for be it known that the regular Democrats and their "independent" Allies had the votes with which to enact such a bill as they wanted; but now it would take a committee of experts to untangle the situation sufficiently to give either of the parties a clean record for legislating in the interests of "the people."

And so much mixed is the situation now-and as it will be when the Senate finishes its end of the job-that hardly anybody can tell what will happen when the two bills go into But isn't it just as true that they conference between the two parties, or how the findings of the conference will be finally acted on; the predictions along that line going as far as no new bill at all.

The truth is exactly as General Hancock said years ago, when he was taboos of the country. The last ten a candidate for President—"the tariff | years have seen them emerge from is a local issue." He was generally laughed at for such an expression, and the mancipated miss of today. And it was taken as an evidence of his they are celebrating their new freelack of knowledge of needed legisla- dom by emulating their brothers: By tion, such as a candidate for Presi- smoking, going out on "parties," drivdent should have; but his remark is ing their own cars, and imbibing spirno laughing matter now.

winter, and the immense number of Act. large percentage of moral degener- News. ates who appear to prefer to steal, rather than work; and who are not greatly concerned at the chance of their being locked up as a conse-

For the next few months it will be wise for all to take the best of care of their possessions. Strangers roaming around with little or no evidences of an occupation, should be regarded as suspicious characters, and watched. No invitations should be extended that encourage thieving, by carelessness in not keeping chicken houses and other outbuildings well locked. Garages are apt to be visited, either as offering the chance of getting away with an auto for its money value, or as offering a means of covering a long distance in a short time, Homes left unoccupied at night, also offer temptation. Hold-ups on the highways at late hours and in secluded spots, offen favorable chances

to highwaymen. And, not the least of the attractive means of getting money easily, is the boot-legging business that for its profit must depend on those not bootleggers themselves, but who are willing to pay for and consume the results of the business-in effect, those who are equally guilty, with the bootlegger himself.

In general, all law-abiding persons with property that may offer a temptation to those unlawfully inclined, should use all reasonable means to care for their property. This is such a self-evident proposition as to be hardly worth mentioning; but there is such a thing as being too careless as to one's security, that results in making easy get-aways with stolen a self-evident proposition as to be goods much too easy-and thereby encourages the business.

PEOPLE LIVE LONGER.

"The time is gone when pestilence and epidemics are accepted patiently as manifestations of divine displeasure," according to Dr. Ennion G. Williams, in the February 1, 1930, issue of The Southern Planter.

Dr. Williams, who is the Virginia way, we are inclined to think a radio State Commissioner of Health, has tremendous increase in the use of done outstanding work in reducing channel through which to produce the occurrence of diseases in his the occurrence of diseases in his A great deal is being done to pre-State. In 1908, when the health de-vent disease and to add many years weatherboarded house and another partment was organized, there were 17,000 cases of typhoid fever in Virginia; in 1928, there were only 1,326.

extended in the United States. "In culosis 1850 the span was thirty years. At the beginning of this century, life expectancy was estimated at forty-six years; and since that time twelve years have been added." Dr. Wiling services, higher standards of living-all these are factors in lengthmedicine, public health work, has had The Senate, however, has zig-zaged over the various schedules in the effort and deserves a large share of the credit."

other fellow may do the wrong thing, and be prepared for it.

Diseases must be prevented rather very curious way, depending on local than cured. "People now are ininterests, until not much is left of the clined to hold to strict account those who should have prevented such disasters," Dr. Williams declares.

OF AUTOMOBILE TRAFFIC. HAZARDS OF

Agencies engaged in the protection of human life must give more thought to methods of preventing automobile accidents, deaths from drowning, homicides and suicides. Disease is no longer the first cause of death for persons under 50 years

One person is accidentally killed every five minutes in the United States, 11 every hour, 273 every day and approximately 100,000 every

In the United States during 1928 there were 27,500 fatal auto accidents. This represents 30 percent of the total deaths from accidental in-

Careful records have been compiled in a number of representative States and it has been determined that there are at least 35 nonfatal juries due to automobile accidents for each death.

Many of those injured were permanently crippled, so that during the rest of their lives they will have to be supported by the members of their families or by the public. Many more were only partially incapacitat-ed, and of course, in a large number of cases the individual suffered no

permanent injury.
The months of July, August and September are the months when the largest number of motor vehicle accidents occur. During these months for the past several years there has been a marked increase in the num-ber of deaths resulting from auto

For the entire United States the records indicate that approximately 2,900 persons were killed in motor three persons were killed on the average each day in August, 1929, as compared with 76 persons killed each day in August, 1928.

The auto death rate per 100,000 cars registered has declined from 157.4 in 1918 to 99.7 in 1928. The death rate, however, has increased from 9.3 per 100,000 population in 1918 to 20.3 in 1928.

The large increase, therefore, in the death rate from autos is not due and possessed, containing to increased recklessness or more drunkenness on the part of drivers, 241 ACRES, 2 ROODS AND 36 SQ PERCHES OF LAND. but very probably results from the motor vehicles in business and for

pleasure. to the expectancy of life for our people. A death due to an automobile is just as much a preventable loss to the community and to the State as a The span of life has been greatly death from typhoid fever or tuber-

Safe highways and as good traffic regulations do not prevent careless-ness, criminal indifference, drunkenness or physical defects which are responsible for a large number of our serious accidents. The only thing that will prevent carelessness among

drivers—and pedestrians also—is the realization that it pays to be cautious With hundreds of thousands of automobiles constantly being driven on our streets and highways, there is but one way to drive and that is with the idea constantly in mind that the

The law outlining the powers and duties of county coroners should be amended to require that the coroner amended to require that the coroner make a full investigation of every fatal auto accident and, if possible, determine the probable cause of the accident and place the responsibility for the accident. Something along this line should be provided, and the fact collected used as a basis for additional regulations, if necessary.

The constantly increasing number

The constantly increasing number of deaths reported in the various daily and weekly papers has aroused in the minds of people the belief that deaths and injuries are to be expected as the price we must pay for the automobile. This, of course, is not

It is entirely possible to operate automobiles without seriously injur-ing anyone. The time has arrived when in every case, if it is proven that the individual responsible for the

that the individual responsible for the accident was guilty of reckless driving or driving while intoxicated, a jail sentence should be imposed.

In 11 States where the motor vehicle departments have made a careful study of the problem, it has been determined that approximately 10 percent of those who drive motor vehicles are unfit either physically or nicles are unfit either physically or morally to operate an automobile. In these States, with a total of over 7,-000,000 registrations, 77,700 licenses

to operate motor cars were revoked. Several motor vehicle commissioners estimate that from 12 to 15 per cent of the licensed motorists are unfit to drive a car, and one commissioner states that in his opinion 3 per cent of the motorists are of the dan-

gerous criminal type.
Driving while under the influence of liquor. excessive speed and failure to report an accident are given as the principel causes for revoking a license. Most of the automobile license. Most of the automobile mishaps are caused by drivers of several years' experience.

The necessity for re-examining per- J. N. O. SMITH, Auct.

parties—but more especially now, grandmother took her "corn likker" fore obvious. It is desirable to make provision for the re-examination of all licenses, and the suggestion has been made that every licensed driver who is involved in an accident should be re-examined at once by a high-grade examiner capable of studying human characteristics and detecting physical or moral impairments. Greater effort should be made to provide better traffic regulations from 4 to 6 o'clock in the afternoon and on Saturdays and Sundays. These are the hours and the days when the largest number of serious accidents

The failure of motorists to give the right-of-way leads to more accidents than any other cause. Driving on the wrong side of the road, exceeding the speed limit and cutting in and out of a line of traffic are shown to be other primary factors in this country's enormous automobile accident

Pedestrians, the reports show, still insist on taking their lives in their hands in crossing streets. Many are hurt each year while crossing against lights, although more are killed and hurt while crossing intersections with out signals or the presence of police,
—By L. H. Hutchcroft, Statistician,
Board of Health, State of Wisconsin.

Cooling for a Year

A huge mirror which took nearly a year to cool down has been made in England for a large reflecting telescope. Weighing more than a ton and a half, it is sixty-nine inches in diameter and ten inches thick. Disks of glass of this size are difficult to get free from defects, and after the molten glass has been poured into the mold it has to be kept hot by electric heaters and cooled down over a period of many months.

Valuable Information

Grandma had just arrived on a visit and to take part in celebrating young Bobbie's birthday on the mor-

After supper Bobbie started to fidget round grandma's chair. To the surprise of everyone present he said:

"Grandma, which is the right side of you? Mother said if I'm a good boy and keep on the right side of you 70u might buy me a bicycle."

Executors' Sale — OF VALUABLE — Real and Personal Property

HEAT AND LIGHT MEAN MORE EGGS

Maintain Feed Consumption in Sudden Cold Spells.

Heat and light in the hen house mean more eggs when eggs are high in price. And the purpose of both heating and lighting is to keep the laying hen eating as much feed as she can be persuaded to take.

No slump in egg production is likely to accompany a sudden cold snap if the normal feed consumption is maintained, according to the poultry husbandry department of the Ohio State university. One method of controlling the temperature is through insulation of the chicken house. This, however, may nearly double the cost of the structure. Some poultry men are finding that by placing brooder stoves in the laying houses and firing them during the extremely cold weather, they can sufficiently raise the temperature. In case neither insulation nor artificial heat is practicable, the poultry specialists recommend the feeding of small quantities of milk-moistened mash and small quantities of grain, at frequent intervals during the day.

When artificial lights are used to increase egg production, they should not be used to give more than a total of 14 hours of light a day. Failure to supply lights regularly, or to provide water and feed when the lights go on, also give bad results.

Poultry Tuberculosis

Widespread in Spots (Prepared by the United States Department of Agriculture.)

Tuberculosis in poultry flocks has been found much more prevalent than was suspected, and in many counties, especially in some of the North Central states, the disease is present to a greater or less extent in about 70 per cent of the flocks, according to the United States Department of Agri-

Tuberculosis birds show loss of vigor and flesh, lameness, swollen joints, drooping, and general unthriftiness. T. B. in poultry can be definitely diagnosed by a post-mortem or by the tuberculin test given by a veterinarian.

If the disease is discovered in the poultry flock, all diseased birds should be immediately killed and burned, and the remaining fowls over one year old should be marketed. The chicken house should be thoroughly cleaned and disinfected, and moved to clean ground. Lots and runways should be plowed up and seeded to some grain crop, and a new start made on clean ground with young, healthy, vigorous birds of good breeding. Avian tuberculosis is doubly harmful in that it affects swine as well as poultry.

Number of Elemental

Eggs Developed by Hen A pullet at maturity has a certain number of elemental eggs which may be developed. Counts at the Maine experiment station show from 1,000 to 3,500. More recent investigations show even greater numbers. There are always a great many more elemental eggs than any hen is capable of de-

veloping. The rapidity with which eggs are developed will depend upon the hen's inherited ability to produce eggs and upon the feed and management of the flock.

Profits from the flock will depend upon securing as many eggs as possible during the first couple of years of each hen's life.

Poultry Hints ************************ Crowding at the feed hopper stunts

Lameness is one of the first symp-

the growth of chicks.

toms of tuberculosis in poultry. Keep the nonlayers out of the flock

by culling out birds with yellow beaks and shanks.

If the hens are kept indoors throughout the winter, they should be given cod liver oil as a substitute for sun-

The majority of poultry buyers are now refusing to buy any poultry that is diseased or which is not in condition to be put in fattening pens.

Much of the recent experimental work shows a benefit in the health of the hens, and especially on the hatchability of the eggs, if the birds have free range all winter.

Crowded houses cause many good birds to become pale faced and later join the cull class.

Turkeys may die of black head at any time from three weeks old to three or more years. The only safe way is to keep young turkeys on clean ground away from chickens and old turkeys.

Pullets should be placed in the laying house when they show signs of being nearly ready to lay. The comb and wattles begin to enlarge and take on a bright red color.

World's Oldest Library

Discovered in Syria What is supposed to be the most ancient library in the world, consisting of documents written in the first alphabetic signs known to savants, was discovered in Syria by a French archeological expedition. Eighteen large and small tablets, engraved with letters that are neither hieroglyphics nor Assyrian cuneiform characters, but evidently parts of the first alphabet made of 26 and 27 signs, were found by a young Alsatian archeologist on the Syrian coast of the Mediterranean, at a place called Ras-Shamra, near Iatakieh (Ladikiya). The expedition had discovered there a necropolis, the 4,000-year-old ruins of a Phoenician palace and town, and numerous ancient vases, jars and statutes of great archeological and historical value. The opinion was put forward by the Academie that these ruins represented traces of an Aegian colony that existed on the Phoenician coast 2,000 years before the present era, and whose civilization was of the Mycenian period. Salomon Reinach, the famous French historian, who was present when the report was presented, declared that the discovery was a most extraordinary one, and that it would be of the greatest importance for the study of ancient his-

Ruins of Ancient City

Long Hidden in Jungle After being hidden for centuries in a tangled-up mass of jungle, the ancient city of Gedi, has come to light only 50 miles from modern Mombasa. Professor Fleure, of the University college of Wales, who has been visiting Kenya colony with the members of the British association, believes that Gedi, known in Kenya as the "buried city," is of Persian origin and at least six hundred years old. The ruins disclose a fine Arabic writing, especially in the mosques and tombs. Professor Fleure thinks that Gedi would well repay investigations by archeological and ethnological experts. He does not believe these would be difficult in view of the profusion of evidence provided by the ruins. The town was known to tribes on the coast for many years, but it was shunned by them because they regarded it as being haunted by the spirits of the dead, who wreak special vengeance on intruders. The lighting of a fire in the precincts of the ruins was considered particularly dangerous by the negroes, even if the fire was only a cigarette.

Christmas Fireworks

Both the Chinese and Hindus employed fireworks in their religious festivals long before Europeans knew of gunpowder. Other people copied them. Ancient races used firecrackers, roman candles, and fireworks in connection with the winter solstice celebration. Such pagan ideas have since been incorporated into modern religious and other observances. In Italy and other countries this pagan feature continues in some Christian religious festivals to this day. Christmas eve in some of the Southern states resembles the Fourth of July. There are elaborate fireworks displays, and the childrenget firecrackers in their Christmas

Quake Every Half Minute

Every half minute an earthquake occurs somewhere on earth. Great ones powerful enough to destroy towns happen about four times a year. Two especially sensitive zones exist: 1along the almost continuous stretch of the Alps, Caucasus and Himalaya mountains; 2-along the whole mountainous circle of the Pacific. Often shaken Italy is in the first zone, California and Japan in the second. Eastern North America along the Appalachian chain goes through a noticeable, but usually harmless quake at least once a year, and a damaging one at about five-year intervals .-Time, the Newsmagazine.

He Knew the Law

The late Haley Fiske of insurance fame told this story at an insurance men's banquet in New York.

"An American company," he said, "opened a branch in eastern Europe and was soon doing well.

"A rich peasant visited the main office one day, insured his farm, and

then said to the manager: "'Now, then, sir, I must have everything plain and clear before I go. Exactly what would I get if my house and barn were to burn down tonight?' "'Not more than ten years and not less than three," said the manager.

Twenty-Three Adjectives A California man, suing his wife for divorce after less than two years of marriage, says that she is "sullen, mean, irritable, morbid, disagreeable, nasty, gruesome, cool, bitter, jealous, heckling, picayunish, loathsome, insulting, brazen, miserly, gluttonish, temperamental, selfish, contemptuous, inattentive, uncivil and inconsiderate." It is obvious that one who chose

from Roget with such care did not mean to imply that she was uncon-

HOW= FLOWERS HAVE INSPIRED BOTH POET AND ARTIST-From earliest days flowers have proved a never-failing inspiration for writers, the books devoted to them being legion. The first books treated the subje t from a religious standpoint; succeeding writers wrote of the folklore of flowers, and a few years later there appeared the "language of flowers."

A bay leaf in a nosegay assured the fair lady that "I change but in dying"; "I cannot give thee up," the columbine told her, and a scarlet geranium accused her of fickleness, larkspur sending her the same challenge. "You puzzle me," said the spray of love-ina-mist.

Poets and painters turn to flowers for inspiration. Simultaneously with their poems and paintings there have appeared books on how to grow flowers, how to preserve them, how to make artificial flowers that "deceive the most observant," and "Flowers in Ice Boxes." "The Flower Shop" is the title of a play; a famous Japanese comedy is built around a floral theme; cook books relate how to make pancakes of elder blossoms, and medical treatises relate their virtues in relieving colds, with many books devoting space to the making of elder dandelion wines. - New York Times.

How "Natural" Diamond Has Been Reproduced

The conditions necessary for the crystallization of carbon in the form of diamond would seem to be intense heat and a great pressure, such as exist during the formation of igneous rocks. Successful attempts to reproduce these conditions artificially have been carried out by Professor Moissan of Paris, and also by the English chemist, Professor Crookes. The method 'employed consists of heating pure prepared carbon and iron in an electric furnace. By sudden cooling of the molten iron the surface contracts and exerts a powerful pressure upon the interior mass. When cold, the iron is dissolved in acid, and small black particles remain, which exhibit the properties of geninue diamonds. No stones that are large enough to be of commercial value have yet been prepared, and while the process is of great theoretical interest, it is far too expensive in comparison with the yield to be practicable even for the manufacture of diamond powder for polishing and grinding purposes. Moissan's 200 experiments, costing \$2,000, yielded one-half karat of diamond powder.

How to Get Rid of Rats

Ridding the world of rats is the determination of W. Rodier of Melbourne, Australia. "I have got humanity all over the world, including Mussolini, licked to a frazzle over the rat question," he modestly claims. He would simply kill off all the female rodents. "When the nales can be made to exceed the females they will kill what young ones would be born," he says, "and when they largely exceed the females in number they will worry the remaining ones to death. By this means all the females are exterminated, and the males would die of old age, bringing about extermination." As soon as Dodier has cleaned up the rat problem he will use the same methods in exterminating rabbits and sparrows.

How Pest Came Into Country

It is stated that the first warning of entry of the Mediterranean fruit fly into the United States came from Orlando, Fla. A group, which included a distinguished entomologist, had secured some grapefruit from an experimental station. It was found that the fruit was dried and riddled with canals. Specimens of the fruit were dispatched to Washington for examination. An official of the state plant board of Florida obtained specimens of the adult fly, sending them by air mail to the United States Department of Agriculture. Here they were identified as the destructive Mediterranean fly and the federal government took precautions at once to restrict and eradicate this insect plague

How Elephants Drink An elephant's trunk is a weapon of offense and defense. The elephant drinks by means of his trunk by sucking up a quantity of water sufficient to fill it and then discharging the con tents into the mouth. The stomach which is of a very lengthened and narrow form, has near the gullet a reservoir for water capable of containing several gallons, while a peculiar muscle connecting the windpipe and gullet enables the animal to regurgitate the fluid, which may then be sucked from the mouth into the trunk and squirted over the body or at some offending man or animal.

How Wind Is Measured

The velocity of wind is measured by an instrument called an anemometer. It consists of three or four hollow hemispheres on the ends of equal rods at right angles to each other and designed to rotate in a horizontal plane about the point of intersection of the rods. The instrument may be seen turning in the wind at any weather bureau station.

Never has a Chevrolet car won greater praise for its appearance than the new Chevrolet Six. Its new Fisher bodies reveal in every detail the artistry that has made the Fisher name famous throughout the motor car world. In beauty of line and color, in balance and harmony of design, they represent one of the greatest style triumphs in Fisher history. Upholsteries are richer and more durable. The instrument panel carries a new and more attractive grouping of the control instruments. Seats are wider and deeper. In fact, not a single feature has been overlooked that would

add to the comfort and convenience of both driver and passengers.

advance in every phase of performance. Its improved six-cylinder valvein-head engine has been increased to 50 horsepower-giving faster acceleration, and greater reserve power. Steering has been made safer and easier. Four Lovejoy hydraulic shock absorbers provide exceptional riding comfort. Fully enclosed, internal-expanding, weather-proof brakes give positive braking control. And numerous structural improvements add to the car's dependability, endurance and long

Latest Items of Local News Furnished By Our Regular Staff of Writers

All communications for this department aust be signed by the author; nor for publication, but as an evidence that the items contributer are legitimate and correct thems behalf on mere rumor, or such as are tixely to give offense, are not wanted.

We desire correspondence to reach our some on Thursday, if at all possible. It will be necessary, therefore, for most letters to be mailed on Wednesday, or by fast Mail, west, on W. M. R. R., Thursday morning. Letters mailed on Thursday evening may not reach us in time.

FRIDAY, FEBRUARY 7, 1930.

UNIONTOWN.

A cottage prayer meeting was held at the home of Mrs. Sophia Staub, last Thursday evening, by the members of the M. P. Church, for the benefit of Mr. and Mrs. Theodore Eckard, who are boarding there at this time, and who are confined to the house most of the time. This Thursday evening, a meeting will be held at Mr. John Burall's the latter con-fined to bed most of the time. Mrs. Carlton Fleming has been

staying at the home the past week.
Thomas Hoch, Washingtonboro, Thomas Hoch, Washingtonboro, filled the appointments, on Sunday, for his brother, Rev. J. H. Hoch, who is still suffering from rheumatic trouble. The Frizellburg S. S. presented to Mr. Hoch and daughter, Dorothy Hoch, a beautiful potted plant. Quite a number of neighbors and friends have been calling to se them.

Samuel G. Renn has been taking

Samuel G. Repp has been taking some auto rides and calling on friends. He manages on crutches

The repairs at the M. P. Church basement have been finished, and is

quite an improvement.
Guy Cookson has been making repairs at their home, laying new

floors, papering, etc.

Little Betty, daughter of Mr. and
Mrs. D. Myers Englar, was given a
birthday party, last week, on her 6th. birthday party, last week, on her oth.
birthday. Her parents, grand-parents, uncle, S. G. Repp, daughters,
Misses Audrey and Margaret Repp
and Miss Nelda Bailey helped her
enjoy the evening. Of course, there
was the cake with the candles, and

plenty of refreshments.

Miss Ella M. Heltibridle, Westminster, visited in town last Wednes-

day. Mr. and Mrs. G. C. Garver visited at T. L. Devilbiss' and Horace Simpson's, over Sunday.

Mr. and Mrs. Charles Zile entertained their children and families,

during last week. The usual amount of visitors called on Mr. Burall, lately. He always

enjoys the visits. Charles Simpson has commenced repairs on his lately purchased home,

but has not moved yet.

The body of William Keefer, of Bark Hill, who died, suddenly last December and was buried in the Lutheran cemetery, this place, was ex-humed on Wednesday morning by undertakers C. O. Fuss & Son, and removed to Taneytown for examination as to cause of death. Suspicions of poisoning have been aroused and exhuming the body is the result so far.

NORTH EAST CARROLL.

On Sunday, at St. David's: Sunday School in the afternoon, at 1:00; Ser-vices at 2:00, by Rev. E. M. Sando. At this time, the two new flags will also be dedicated.

Mr. and Mrs. Chas. Monath entertained at their home, on Sunday: Mr. and Mrs. Harry LeGore, and Mr. and Mrs. Howard Bowman.

Mr. and Mrs. Clarence Nace entertained at a dinner, at their home, on Sunday: Mr. and Mrs. Reverdy Nace,

Mr. and Mrs. Eugent Resh, Pauline Nace and Ralph Noble. Mrs. Edward Monath recently held a quilting at her home. Those who attended were: Mrs. John Thiret, Mrs. Jesse Miller, Mrs. Clinton Monath, Mrs. Howard Bowman and Miss Anna

KEYMAR.

Mrs. Grace Clark, of New York, who spent some time at the home of Miss Mary C. Kraig, Bruceville, re-

former's brother and sister-in-law, Mr. and Mrs. R. W. Galt.

Misses Helen and Mary Boone, of Union Bridge, spent Friday afternoon of last week at the home of Mrs. Annie Sharetts.

Mr. and Mrs. Clarence Clabaugh and family, of near Union Bridge, and Mr. and Mrs. Paul Gossnickle and little daughter, of Frederick, were visitors at the home of Mr. and Mrs.

FEESERSBURG.

January granted us 16 clear days; 12 cloudy and 3 of snow.

This community was deeply shocked, on Friday evening, over the dreadful accident at the Detour R. R. crossing, when the fast mail train struck the auto truck driven by Sterling Rowe, who was hauling a load of feed for Frank G. Harbaugh, of Middleburg warehouse, demolishing the car and seriously injuring the driver. Doubtless there will be a full account in your columns, but no one can tell of the agony and pain of the victim, the alarm and worry of those most interested, and the nervous strain and hurt to all his companions and neighbors. Many persons who were not even acquainted with the young man had a wakeful night or disturbed dreams; so closely do our lives touch one another.

Jacob Coleman, formerly of this locality, passed away at his home in Martinsburg, W. Va., on Thursday night of last week. His nephew, James Coleman and wife, attended the funeral on Sunday, with burial at

Thurmont.

Mrs. Jesse Reisler, with Mr. and
Mrs. Cleveland Repp, attended the
funeral and burial of their aunt, Mrs.

The Clifton at Rocky Ridge. Eliza Haley Clifton, at Rocky Ridge, on Tuesday. She was 90 years of age and died at the home of her daughter, Carrie, in Baltimore. For many years Mrs. Clifton lived in Middleburg and was well known for her cheerful disposition and helpful neighborliness, always ready to lend a hand to those in need.

Mrs. James Coleman is recovering from a very threatening cold. Edward Harman, living with his daughter, Mrs. Erma Davis, who has been confined to his bed for ma.v menths, has been ailing more than

usual, the past few weeks.

Mrs. Louisa Hammond, of Taneytown, and Frank M. Biehl, of near Littlestown, spent part of last week with Mrs. Grace Biehl Straw and daughters.

Mr. and Mrs. Oscar Wolfe, of Emmitsburg, spent last Wednesday evening with their cousins, Mr. and Mrs. Cleon Wolfe.

Mrs. Belle Rinehart spent the week end with friends in Baltimore. Mrs. Mary Biehl Dougan returned to Hagerstown the first of this week.

The Starr carpenters have been busy in and around Uniontown, this season, having recently completed a new floor in the basement of the M. P. Church. The annual statements of Mt. Union Church were distributed on Sunday, showing a membership of 85-5 ew members, and 3 infants baptized. All expenses fully met, with a small balance in treasury of each depart-

ment. At the close of service it was decided to hold the C. E. meeting in the evening at the home of L. K. Birely, 10 persons were present, and the topic "Crusading with Christ," was freely discussed. C. E. service will follow S. S. next Sunday.

The Woman's Bible Class of Mid-dleburg S. S. will have a valentine social, in the church hall, on Friday evening, 14th. We have not heard of nearly so

many sales and movings as usual for this Spring in our neighborhood. Skidding on the snow and ice and landing in the side ditch and being hauled out, is an up-to-date travel

experience now.

Despite much snow and wintry weather, the days grow longer, giv-ing more daylight for our various

Mrs. Paul Crouse, near Mt. Union; is suffering with an injured knee which she received, on Wednesday morning, when she slipped on the ice

NEW WINDSOR.

Dr. W. W. Davis, of the Lord's Day Alliance of Baltimore, gave a talk to the Presbyterian Sunday School, then he went to Blue Ridge College and gave an address there, on Sunday

morning last.
Mr. and Mrs. Thomas Bennett, of Philadelphia, and James Crawford and wife, of Virginia, were guests of Dr. Sterling Geatty, on Monday last. Charles Nusbaum spent the week-

end in Philadelphia, Pa. Mrs. Sue Snader entertained to dinner, on Saturday evening last, in honor of her sister, Mrs. Harman's

birthday.
Mrs. Roth Buffington entertained a number of little girls, on Saturday last in honor of her daughter's 12th. birthday.

Dr. and Mrs. Edward Bixler entertained. on Saturday last, in honor of Dr.'s birthday.

Miss Lina Dielman, of Baltimore, spent a few days in town.

Paul Fritz and family, of Westminster, spent Sunday last with D.
H. Ecker and family.
Miss Katherine Lambert, who teaches at Harney, is sick, with pneumonia.

John H. Brown, one of our R. F. D. carriers, and Mrs. Brown, left, on Saturday last, for Washington, and on Sunday he met some friends and left for a month's visit to Florida. Prof. Eaton has returned to Blue Ridge College, after taking treatment at a Baltimore Hospital.

Mrs. Jesse Haines spent the week-

Miss Mary C. Kraig, Bruceville, returned to her home last week.

Mr. and Mrs. J. R. Galt and son, Albert, of New Windsor, spent last Sunday afternoon at the home of the former's brother and sister in law.

evening, followed by a social hour.

The community was shocked, on Monday morning, to learn of the death of Ellis Bowers, who died at Md. University Hospital, from complications following an operation for appendicitis. He leaves a widow. Services at the home on Wednesday, at 1:00 P. M., with further services at Deer Park M. E. Church. Rev. Charles Dunnigan, his pastor, official. Charles Dunnigan, his pastor, officiating. K. of P. Lodge had their ser-

John Leakins, Sunday.

Mrs. E. Gregg Kiser was taken to the Frederick City Hospital, last a number of friends to dinner on Sunday last.

DETOUR.

Mr. and Mrs. Maurice Wilhide, sons Carroll and Clyde, and daughters, Margaret and Eleanor, of here, and Mr. and Mrs. Earl Hoff, of Mercersburg, spent Sunday with Mr. and Mrs. Merle Wilhide, in Frederick.
Guests at the home of Mr. and Mrs.
Carroll Cover, on Sunday, were: Mr.
and Mrs. Chas. Gardner, Sr., of Blue Ridge Summit, and Mr. and Mrs. Ashton Phillips, of Charles Town, W.

Miss Geraldine Clay, of Frederick, spent the week-end with Miss Winifred Koons.

Mrs. M. F. Wiley, sons Willard and Norman, spent the week-end in Baltimore, and Mr. Wiley and son, Rodger, spent Sunday at the same place, and were accompanied home by Mrs. Wiley.

Mrs. Wiley.

Mrs. F. J. Shorb is spending a few days with Miss Rhoda Weant and Mr. Charles Eyler, at Reisterstown.

The sudden death of Mrs. Eyler was quite a shock to this community, and the family have the sympathy of their many friends.

Mrs. Bertha Dorsey, of Frederick, and Mr. Walter Dorsey and two friends, of Baltimore, spent the week-end with Mr. and Mrs. Ernest Mr. and Mrs. Loren Austin enter-

tained, on Tuesday, at cards, Mr. and Mrs. Chas. Haugh and Mr. and Mrs. Wilbur Miller. Miss Madge Cover spent a few days with Miss Ruth Fogle, at Union

MAYBERRY.

Recent visitors at the home of Mr. and Mrs. Ellis Crushong were Mr. and Mrs. W. L. Crushong, sons Charles Harry, of Bonneauville, and Lloyd Champion, of Hanover. Sunday afternoon visitors were Neda Myers, May and Helen Hymiller and Lloyd Bollinger, Mr. and Mrs. Garland Bollinger, Miss Mary Coe and Helen Bollinger.

Mrs. Frank Wagner and daughter, Naomi, are spending some time with Mr. and Mrs. Charles Taylor, of Pa-

Little John Marsh has been housed up for several days with a cold.

Miss Mary Coe is visiting her parents, Mr. and Mrs. Joe Coe and fam-

Ellis Crushong has been taking treatment for his eyes.

HARNEY.

Those who visited Harry Angell and family, on Sunday, were: Luther Angell, of Harney; Mr. and Mrs. Robert Angell and daughter, Betty Jane, of Gettysburg; Mr. and Mrs. Sylvester Krumrine, of Westminster; Mr. and Mrs. G. B. Marshal and son, George, of Harney; Mrs. Margaret Marshal and daughter, and Maurice Haines, of Harney, and Roy Koontz, of Kingsdale of Kingsdale.

Train Was Late

The New Yorker tells of a gentleman who had been sleeping in the waiting room of the Great Neck railway station. He was awakened suddenly and stared about. "Got to get the 4:07—the 4:07." he muttered. This was apparently addressed to a mild man sitting next to him, who, thinking he detected belligerence in the tone, retreated into his newspaper. The other's gaze finally settled on the clock on the wall. "Six o'clock," he murmured. "H'm the 4:07's late." He settled down and went back to sleep.—Boston Globe.

MITCHELL—SHRINER.

MARRIED

Miss Mabel Shriner, daughter of Mrs. Mabel Shriner, daughter of Mr. and Mrs. John N. Shriner of Langhorne became the bride of Frank Mitchell, Jr., son of Mr. and Mrs. Frank Mitchell, Sr., on Saturday afternoon, January 18th., at 3 o'clock in the Manse of the First Presbyterian Church of Olney, Philadelphia. Only members of the immediate families witnessed the ceremony which was performed by the Rev. Wm. Henry Wells, D. D., pastor of the

The bride was attired in a biege canton crepe dress and brown slippers and hat and carried pink roses.

home in their newly furnished residence on National Avenue, after

The bride, who is a graduate of the Langhorne High School and Drexel Institute, is secretary in the office of William B. Parry & Son. Mr. Mit-chell is assistant cashier in the Peo-ple's National Bank and Trust Company of Langhorne. He is a graduate of the Hulmeville High School and Rider, Moore and Stewart Business College of Trenton.

DIED.

Obituaries, poetry and resolutions, charged for at the rate of five cents per line. The regular death notices published free.

MR. WILLIAM B. MORT. Mr. William B. Mort died at his mrs. Jesse Haines spent the weekend in Westminster.
Rudolph Eyler, wife and daughter, and Ruth Creeger, all of Thurmont, were callers at M. D. Reid's, on Sunday last.
The last number of the Lyceum Course of Blue Ridge College was given on Tuesday evening by the magician Mardoni, who delighted his audience with his tricks.

Mr. William B. Mort died at his home near Emmitsburg, Sunday night, aged 72 years, 10 months, 28 days, following a long period of ill health. He is survived by his wife and three children, Dilly Mort, of Harney; Mrs. Harvey Olinger, near Emmitsburg, and Miss Iva Mort, at home; also by the following brothers and sisters; James E. Mort and Mrs. Albert Valentine, near Emmitsburg. entine, near Emmitsburg; Mrs. Emma Redmond and Mrs. Anna Marshall, of Los Angeles, Cal.; Mrs. Minnie Hef-estay and Mrs. Rosa Reifsnider, Bal-

timore; George W. Mort, Thomson, Ill.; Harry Mort, Sexton, Cal.; and John Mort, Taneytown. Funeral services were held on Wednesday afternoon, at the home, followed by further services at Keysville Reformed Church, in charge of Rev. Guy P. Bready.

CARD OF THANKS.

We hereby extend our sincer thanks to all friends and neighbors, who assisted in any way during the illness and following the death of our husband and father, William B. Mort. BY THE FAMILY.

MINNESOTA PRISON CALLED BEST IN U. S.

Industrial Organization Is Commended in Handbook.

St. Paul, Minn.—The Stillwater prison plant is characterized as the best of its kind in the country by the third issue of the Handbook of American Prisons and Reformatories, now being published by the National Society of Penal Information.

The handbook also commends the prison industrial organizations, but points out the need of a more progressive policy in the matter of discipline and in the development of an educational program.

The article says in part: "This (the prison) is a notable institution in two important respects: Its plant is the best of its kind in the country and its industrial system one of the most effective. The plant, carefully built as one construction job, gives this institution a physical equipment that is probably unsurpassed in

Has Enviable Record.

the country.

"Industrially the institution has an enviable record. Its shops are modern in design and construction, well lighted and ventilated. The working conditions throughout are excellent.

"The progress made in humanizing the institution and developing individual instead of mass treatment has not been nearly as rapid as the progress in institutional and industrial development. In fact, the great plant and huge industry tend to dwarf the individual and unavoidably make him see that he is merely a cog in a machine and an unimportant unit in a great institution.

"This inescapable problem is common to every great institution, but it is intensified here by the retention of the silence system, by a monotony of routine and by a regimentation of life, both in the cells and out, which has been abandoned in many prisons of the country. The silence system, for instance, has been given up for several decades in many states.

Plant Called Admirable. "The state is fortunate in having a plant admirable in so many respects and an industrial system that has covered the cost of running the institution every year since 1902. But the accomplishments in these important fields make the case stronger for a more progressive policy in the realm of discipline, the development of education and other constructive features

tutional life, and a prison regime which makes every possible effort to treat the inmates as individual human beings rather than as a mass." Commenting on the board of con-

that have proved their value in insti-

trol, the handbook says: "There appears to be a tradition that members of the board who have served effectively shall be reappointed. The result is a continuity in membership and a corresponding lack of appointments for political reasons such as are made in neighboring states."

Couple With 24 Children Air Troubles in Court

Atlantic City, N. J.-Twenty-four children figured in the domestic debate of Fred Parsio, an \$18-a-week millhand, and his wife, Millie, in Judge Smathers' court here. Mrs. Parsio had her husband summoned on a nonsupport charge.

It developed from the testimony of the wife and some of the children, she was a widow when she married Parsio three years ago. She brought with her 13 children by her first husband. Parsio had 11 children by his first wife, who died several years before. The two groups of boys and girls ranged in age from four to twenty-two

years. Judge Smathers decided that Mrs. Parsio wasn't any worse off than before she married Parsio and that couple were unattended.

Mr. and Mrs. Mitchell will be at he would have to pay her only \$5 weekly. He agreed and was freed.

Squirrels' Stores of Fir

Seed Robbed for Market Ryderwood, Wash.—Lumbermen now save by-products of forests. Three thousand bushels of fir seed cones were purchased by a lumber company at Longview, where drying operations to extract the valuable seed are in

progress. From a ton to one and one-half tons of clean seed will be obtained from these cones. Harvesters received \$5 a bushel for them; the lumber company expects \$15 a pound for the tree seed. Australia, Europe, Japan and New Zealand as well as the

United States are in the market. Hundreds of bushels of cones were recovered from caches made by gray squirrels, and thousands of these animals will have to hustle other winter supplies. Cones stored by rodents contain the finest seed, declare for-

Town in North Alaska

Hears Continuous Radio

Point Barrow, Alaska.—This northernmost tip of Alaska is enjoying one continuous round of enjoyable music gathered in by radio from all parts of the world. Because of the strategic radio position near the top of the world and the almost continuous darkness, combined with remarkable clarity of the atmosphere and differences in time, Point Larrow radio fans receive perfect programs from Japan, England, Germany, the United States and all corners of the globe.

Indian Ruler Famous

for Astronomical Study There lived in India, in the Seventeenth century, a ruler known as Maharajah Jai Singh II, and being keenly interested in astronomy he evolved a series of structures which, though not now used for practical purposes, constitute the most unique astronomical instruments in existence. He appears to have collected all kinds of astronomical books, and sent some workers to foreign countries to gather information. Having determined the kind of instruments required on which to make the necessary recording of the movements of the heavenly bodies, he selected five places in India as the centers in which the observations should be taken. The first he built at Delhi, and then others in Jaipur, Ujain, Benares, and Mathura. The observatories in Delhi and Jaipur have been carefully restored. In addition to a number of metal instruments he erected large masonry instruments, some of them as high as 90 feet. Very careful records were made of the observations of his staff of workers, and modern astronomers have expressed surprise at the valuable information thus collected. The ruler responsible for these interesting instruments died in 1743 and his wives, concubines and science expired with him on his funeral pyre.

From Bad to Worse

A rich old Chinese mandarin had two wives. Said the first to him one day: "I wish you had not so many gray hairs. People jeer at me and call me an old man's darling." "In that case, my dear," he said, "I will pull them all out." And he did so. Shortly afterwards his second wife came to him complaining that now he had only black hairs on his head, she looked, by contrast, a horribly old woman. "Don't worry, my dear. I will pull them out," he said soothingly. But when he had pulled out all the gray and all the black hairs the mandarin was completely bald. And neither of his wives would have any more to do with him,

Chalk That Up

Pat O'Hara and Mike Murphy (who strangely enough, were Irishmen) had taken jobs at a colliery. Pat one morning broke his shovel when he was down in the mine. He was too lazy, however, to take it to the surface with him, so he left it for his friend, writing on it in chalk:

"Take my shovel out, Mike, I've forgotten it!"

But friend Michael knew Pat of old, and refused to be caught by such a trick. So he rubbed the message off and substituted one of his own: "Take it out yourself. I've never

Navajo Indian Lore

seen it."-London Answers.

The Smithsonian institution says: "The Yebechai are nature gods of the Navajo whose chief function is healin the sick. The so-called Yebechai 'dance' is a ceremony for this purpose. Up to some years ago representations of the gods were painted in colored sands at the ceremony and wiped out at the close. Later, the Navajo began to weave the Yebechai figures in rugs for sale. These rugs are usually made on a hand loom. This may easily be told if the designs are alike on both sides as to form and color. Such specimens were never common."

Good Grounds The young wife was seeking a separation from her husband on the

grounds of cruelty. "But isn't your husband the captain of Brownton Harlequins?" asked the judge, with awe, being himself a

keen follower of rugby football. "Yes, your honor," was the reply; "and that was where the trouble started. I could do with him showing me how well he had tackled by tackling the dog; but when he used baby to show me how he threw the ball into the scrum-well, that was the end."-London Mail.

Tin Cans Salvaged Salvaging millions of tin cans around Western mining camps has been found a profitable business. The process recovers both the tin and the steel, an average of three tons of tin being recovered weekly and molded into ingots to be used for making new cans.—Popular Mechanics Magazine.

Tree Trimmers' Platform

Property owners who happen to have some old shade about their homes guard the trees more zealously than was done of yore. These growths must be carefully watched and groomed at frequent intervals. The work of the old-time tree trimmer is not regarded as sufficient and the work is now done largely by trained men who are properly equipped for the work An automobile newly designed for this work carries a small party of workmen, all the necessary tools and is equipped with an extendible platform which enables the men to work about the tree more satisfactorily and more safely.

No Fear

Bessie had great fun in running up behind the pet pig and pulling its tail. Grandfather felt this wasn't a very safe thing for Bessie to be doing, so he asked her one day whether she wasn't afraid the pig would bite her.
"No. Grandpa," said Bessie, "it's

head is on the other end."

the Assembly, on Thursday, Jan. 29: Song by school; scripture reading by the president, Mary Isabel Elliot; salute to flag; reading of minutes by the secretary; piano solo, Alice Riffle; talk on Community Spirit, Anna Mae Motter; presentation of certificates for perfect attendance for first half year by Miss Mae Grimes, County Attendance Officer; debate, "Resolved, That the chain stores are more beneficial to a community than private stores." Affirmative: Maurice Becker, James LeFevre, Dorothy Thompson. Negative: Amelia Null and Dorothy Haugh, (judges decided in favor of the affirmative); announcements,

THE ECONOMIC APPEAL

Many suggestions have been made for the attainment of international peace. A warless world is an ideal condition devoutly wished for by every person. But just how to realize that ideal is a question now receiving astute consideration by men who hold responsible positions in the business and political world.

Organized efforts for the attainment of international peace might be di-

Of the two classes, the Moral appeal is doubtless the most important and effective. It seeks through volintary peace orzanizations to reate "a will to

L. A. Barrett. peace" through cultivating public opinion in favor of peace. That public opinion is a very vital factor, no one will deny. Such organizations, unattached to any political party, are free from governmental control. The legislative appeal endeavors through compacts, official documents, etc., to enter into peace agreements with other nations. Many of these take the form of agreements to reduce the size

of the navy and war materials. The third effort is comparatively new. It is the Economic appeal. The International Chamber of Commerce has now before it for serious consideration the permanent elimination of war through economic methods. It is claimed that it would be impossible to carry on war without the use of basic metals and minerals, such as steel. nickel, mercury, etc. The argument is that those in control of the markets for these things should agree together that any use of them for other than industrial purposes would constitute a violation of trust, and at no time should they be sold for war purposes. Mercury for instance is indispensable in warfare. If the sale of mercury could be so controlled as to make it unattainable for war purposes, the result would be self evident. The same may be said of iron ore, coal and other raw materials. May we not expect a very valuable contribution to be made through the Economic appeal for the abolishing of war? (©. 1930, Western Newspaper Union.)

Beginning Patent System

In very early times in England the reigning prince considered himself entitled to grant privileges of the nature of monopolies to any one who had gained his favor. These grants became so numerous, oppressive and unjust during the reign of James I (1603-25) a statute was wrung from the king declaring all previous and inconvenient monopolies to be void. There was a special exception from that enactment of all letters, patents, grants and privileges of the "sole working or making of any manner of new manufactures within the realm to the true and first inventor." Upon these words hangs the whole law of letters and patents for inventions.

FOR SALE—Fine Homes, improved by Brick and Frame Houses and all improvements, in and out of town.--D. W. Garner, Real Estate 10-5-tf

Plants That Emit Gas

Not at All Uncommon When one speaks of a "gas plant" one naturally thinks of coal ovens and gas meters. Nature, however, provides a real gas plant, specimens of which are to be found blooming in London's Kew gardens. It is otherwise known as the Dictamnies or "Burning Bush." When a lighted match is applied to a shoot of it there comes a brilliant scarlet flame. Like a flash of lightning it travels up the length of the flowering shoot, without injuring it. The best time to make the experiment is when the flowers are fading. The inflammableness of the plant is due to this: that on its stalks are minute reddish-brown glands, and these secrete an etheric oil. The glands develop fully soon after the blossom begins to fade, but they shrivel up when the fruit begins to form. Luminous plants not unlike this have been a source of strange legends in India and Afghanistan. There is a mountain called Sufed Koli in Afghanistan on which the natives believe that gold and silver exist. In springtime the slopes are covered with bushes which at night, from a distance, seem to be on fire, yet when you are close to them there is no sign of flame.

Falls of Niagara as

Pictured by Hennepin Father Louis Hennepin saw Niagara when he went West to the upper Mississippi with La Salle's expedition in 1679. He had a poor eye for distances, for in successive narratives he measures Niagara's height as 500 and 600 feet, instead of its maximum of 162, but he had a flair for vivid word

"Betwixt the Lake Ontario and Erie there is a vast and prodigious cadence of water which falls down after a surprising and astonishing manner, informuch that the universe does not afford its parallel. 'Tis true Italy and Switzerland boast of some such things. but we may well say they are but sorry patterns when compared to this of which we now speak. . . . It (the River Niagara) is so rapid above the descent that it violently hurries down the wild beasts while endeavoring to pass it to feed on the other side, they not being able to withstand the force of its current, which inevitably casts them down headlong above 600 foot. . . ."-New York Times.

CHURCH NOTICES.

This column is for the free use of all churches, for a brief announcement of services. Please do not elaborate. It is always understood that the public is invited.

Piney Creek, Presbyterian—Preaching Service, 9:30; Sabbath School, at 10:30; Brotherhood, Monday 10th.,

Snydersburg—S. S., 1:00; Worship at 2:30. The subject of the sermon for the day is "The Seventh Commandment."

Canyon Worthily Ranks as Marvel of Nature

To understand the immensity of the Grand canyon, it is necessary to know something of the Colorado river, which, incidentally, must be included among the great rivers of North America. It is formed in southern Utah by the confluence of the Green and the Grand rivers. It enters Arizona at the northwestern corner and flows southward to the Gulf of California. It drains an area of 300,000 square miles. Only at three points

is it crossed by a railroad. The Spaniards were the first white men to view the great wonder of nature. Spanish explorers first reported seeing it as early as 1540 and in 1776 a Spanish priest found a crossing that still bears his name. The first man to make anything like a complete survey of the river and the canyon through which it flows, was Maj. John Wesley Powell, a geologist and a school teacher, a one-armed veteran of the Civil war. With a crew of men and boats, he traversed the river from its source to its mouth in

The Grand canyon has long been a haven for geologists. It furnishes them with an ideal setting to study the earth's strata. And it is no less a haven for tourists.

Many "Black Fridays" in Financial Circles

"Black Friday" does not refer to a particular date, as often supposed, but is the name given to several Fridays on which financial panics have occurred. Apparently the term was first applied to the Friday in December, 1745, when the news was received in London that Charles Edward Stuart, the Young Pretender, had reached Derby, only ten days' march from the capital. A financial panic resulted immediately. "Black Friday" was probably suggested by analogy with Black Monday, an old name for the Monday following Easter. The term "Black Friday" was revived in England for May 11, 1866, when a panic followed the failure of the London firm of Overend, Gurney & Co. In the United States the term is applied to September 24, 1869, when a panic occurred as the result of Jay Gould's efforts to corner the gold market in New York, and to September 19, 1873, when a panic followed the failure of the banking firm of Jay Cook & Co .-

Pathfinder Magazine.

Ronald Colman ********

Before he became famous in motion pictures, Ronald Colman had much stage experience. He was born at Richmond, Surrey, England. His first experience was in amateur theatricals during his school days. His motion picture work has been much to his credit as a star. "Raffles" was Colman's third all-talking picture.

GABBY GERTIE

- 26—12 o'clock. John M. Buffington, near Union Bridge. Stock and Implements. J. N. O. Smith, Auct.
- 27—12:30 o'clock. Harry J. Crouse, on George Hilterbrick farm, near Taney-town. Stock and Implements. J. N. O. Smith, Auet.

Satisfied Yearning to

Punch Cash Register rtain resident of an ex New Jersey suburb startled his friends recently by opening a book and magazine store in the town. He was known to be wealthy and did not need more money, and as he was a bridge and golf addict and had other and varied interests, they could not catalogue his innovation as a hobby, even though he spent nearly every evening at the

Then it occurred to a close friend to ask him outright. The new book store owner looked a little sheepish

"I'll tell you if you promise not to mention it to anyone. But all my do when they grew up. Joe said he life cash registers have intrigued me. Every time I made a purchase I've little fellow was going to get on a yearned to punch the key. In fact, train and ride forever. The third, on a number of occasions I've bribed Donald, wanted to be more daring a clerk to allow me to ring up my own money. It's a queer sort of complex, I know, but as long as I enjoy punching cash registers I'm going to continue it."—New York Sun.

\$ FOR HER **HUSBAND'S** APPROVAL

R. AND MRS. WILLIS had but lately returned from their first trip abroad. They had wandered, often sadly bewildered, through approved picture galleries. They had dined at the Cheshire Cheese. They had been secretly disappointed that Shakespeare's house was so tacky looking, as Mrs. Willis expressed it.

But Mr. Willis had been bitten by the mosquito of European culture (as he understood it, that is). He presented his wife with a cigaretteholder and the good woman nearly fainted. She confided in the occupant of the next deck chair (from Ohio) and that worthy suggested a psychi-

"Not that awful psychoanalysis?" cried poor Mrs. Willis, who had been given a book on that subject by her enterprising husband and never rightly recovered.

"No, no, my dear," soothed the Toledo woman, "nothing like that." (It would never do to admit she'd never heard of Freud, but she hadn't). "I mean, well, just a doctor, who, well, takes care of-'

"Crazy folks?" cried poor Mrs. Willis. "Well, do you know I was half afraid that awful hot day in Paris, and Mr. Willis would sit and eat outdoors. And no real cooling ice cream sodas, either. I can't see myself why people go to Paris for food. Give me a good pile of hot cakes, or a nice fried pork chop."

"That's just what my Gerald says, but you have to come abroad just to be thankful you aren't a foreigner, I guess," rather lamely, for just then the sprightly Willis hove in sight. He bowed, in what his distressed wife thought a French manner.

A week later Mr. Willis poked the hash in front of him in disguest. "Why can't we have croquettes?" as

asked irritably. "Because, Wednesday, when your

poor uncle Timothy came to dinner he thought I said croquet, and you know you laughed, and, after all, even if he is deaf, he has what little money there is in your family."

"Well, but Uncle Timothy isn't here tonight. I insist on more modern ways. You have defied me about smoking. Well, I suppose every one can't like the taste of tobacco. But I insist, insist, mind" (Mrs. Willis was reminded of a peppery general in an English play, and was certain that trying character had precipitated this scene), "I say again I insist on modern cookery. We are no longer obliged to consider every cent. We've traveled-"

"Unhappily, yes;" sighed the poor wife, wondering if the psychiatrist was urgently needed. "You've never been the same sensible man since we started that trip, never."

"I will not put up with nagging," cried Willis, starting for the door.

That afternoon Mrs. Willis motored quietly to town. She had a long talk, not with the mental specialist, but with the up-to-date bookseller. And her topic was cookery books. The bookseller was very modern. He sprinkled vitamines all over his conversation as if they were paprika. Mrs. Willis was impressed. She took an exotic volume with pictures of carrots and tables of calories. She drove musingly home.

The next day was Wednesday, the day sacred to the deaf and wealthy Uncle Timothy; the day, also, when other members of the families were wont to drop in after dinner to listen to the really excellent Willis radio.

Mrs. Willis was not without humor. And she had quite a full share of common sense, albeit she refused point blank to wear Spanish heels, rouge her nice red cheeks or make herself "sick at the stomach" as she worded it, with a cigarette.

"I'm a Victorian," she asserted, "and a Victorian I'll die."

However, she cooked a varied and appetizing appearing meal, using a multitude of odd nut combinations of which she'd never heard and of whose power to delight her newly fastidious husband and the robust Uncle Timothy she had grave doubts.

Laboriously she wrote menu cards. They'd had them at the club once when a noted temperance lecturer had come to Grassville, and she knew they were "classy."

"Putting on dog," growled Uncle Timothy, adjusting his specs to read the card. "Pity for Americans to go abroad if they can't keep their senses. Percy (to Mr. Willis), why d'you let that good wife of yours lose her head? She'll be trying to smoke next, like some of those flighty flappers I see. Disgraceful, I call it, and a woman well past forty, too."

He picked over his salad. "What's this? Carrots don't look cooked to me," he roared; "we ain't donkeys. How's that, eh?"

Eva Willis grew red. But she valued Uncle Timothy's good opinion too much not to stand by her colors, now, and she noticed that her Percy's ears were crimson.

"The truth is, uncle, that Percy is ashamed of me since we came home. He's all for the new fashions. (A frantic kick under the table prevented-possibly-any allusion to the cigarette holder.) "Well," she resumed, without wincing perceptibly, "I find we're all out of date eating so much meat. No vitamines, and most people with high blood pressure and I told these laws had been passed.

so on, really dangerous. So tonight ! determined to serve a real modern vegetarian dinner, with raw carrot salad, just like that high-toned Dumbles Head Rest cure, that is so fash-

ionable, uncle. "Dumb-bells is right," again roared Uncle Timothy, "so it's Perty that is the fool, eh? Well, I always respected your good sense," he said more softly, "and now. ain't there a nice pork chop in the ice box? Or I could do with a nice platter of scrambled eggs or so, but never as long as I live will I eat grass. It isn't Christian."

Meekly, Mrs. Willis rose and glided into the kitchen. In a suspiciously short time, a dish of well-browned chops was on the table with French fried potatoes and tomatoes.

Uncle Timothy beamed. "Tell you what," he said, "I wouldn't have been so upset if you'd set me a dish of snails, seeing that I know Frenchies eat 'em. But when it comes to donkey food.

"You'd best throw that fool cookbook away," whispered Mr. Willis. "Don't be scared. I didn't pay for it. Just got it for my husband's approval," nodded the lady.

Writer Takes "Dig" at Boasted Mail Service

What do I want now? Well, on the face of our post office building there is a noble legend which I cannot exactly remember. Not sun, nor hail, nor rain, nor sleet-in fact, virtually nothing, it says, can interrupt the service of the mails.

That is all very well, but what an antiquated thing the very idea of our mail service is. We make some marks on a piece of paper, put it in an envelope and drop it in a box or chute. Then a man comes around, collects a bag full of these things and takes them to a station. There they are sorted and taken to the train. There they are sorted again, put off the train, put in another car and taken to another station. And there they are sorted again and another man takes them on his back and finally delivers them to their destination. All this in the age of science!

What I want to do is this-and it is really very simple: I can already send messages to all parts of the world instantaneously. I can even talk with my friends everywhere. But suppose that a letter is necessary as a matter of record.

Very well. Then my stenographer's typewriter and telephone should be so connected that when she writes a letter it will be instantly transmitted in facsimile to the person addressed anywhere in the world. The facsimile, of course, would include my signature. My correspondent could reply in the same fashion, and then I would have a facsimile reply to my letter, all within fifteen or twenty minutes, and we would not have to carry tons and tons of paper around in trains and in cars and on our backs in order to have communication .- Owen D. Young in the Saturday Evening Post.

History of Marionettes

Jointed figures moved by wires entertained early Egyptians, and ancient Greece loved the puppet show. England watched gravely while puppets enacted Bible stories. The courtiers of Charles the Second's day could be as much entertained by a puppet heroine as by a living Thomas Betterton or Nell Gwyn.

But gradually England grew tired of the doll actors. Almost the last English puppet shows dealt with the story of Napoleon, the death of Nelson, and Grace Darling's rescue of the crew of the Forfarshire. Then they, too, disappeared.

The continent has remained more faithful to the puppets. Maeterlinck has actually written for them, and in Italy, the marionettes have never lost public favor.

The Wanderers

It was a most astonishing thing, but the Smiths were always changing their residence.

Some people decided that perhaps Mr. Smith found moving about cheaper than paying rent, but the real reason was that Mrs. Smith loved a change.

One day a friend of the family, returning home rather later than was his usual practice, espied Smith following a van of furniture.

"Hello, Smith," he cried. "Moving" again! And where to this time?" "I dunno," was the weary answer. "I'm just followin' the van to find out."-London Tit-Bits.

He Met a Foot, Anyhow

Pat Murphy was a great favorite in the works. Even his employer would sometimes stop and crack a joke with

One day the boss met Pat. "Morning, Pat," he said. "I hear that lately you've taken quite a fancy for the girls.'

Pat blushed and snickered. "Have you not met your fate yet?"

asked the boss. "Sure and begorrah, sir," exclaimed Pat sadly. "I met one of her father's

No Excuse

fate in one of his big shoes last

An accident is an event that takes place without one's foresight or expectation, says a Pennsylvania official, and so, strictly speaking, there are no automobile accidents. The driver who "runs contrary to the law of centrifugal force or the law of momentum is absolutely certain, sooner or

later, to have a mishap." Now you know what to expect. And when the mishap occurs don't try to wriggle out by saying you were never

EMPTY BARRELS

By DOUGLAS MALLOCH

X-0-0-0-0-0-0-0-0-0-0-0-0-0-0-X FELLAH with a load of barrels will take up most the road, And yet you'll find, if you will look, he hasn't got a load-

Although the pile is mighty tall, It all is empties, after all.

It rattles down the village street and makes a lot of din;

To hear him you would think it was a circus comin' in. To make a racket in the street A load of barrels can't be beat.

The man who always looks so wise, the man who never jokes, Who takes himself so serious in front

of other folks, It very often will befall Is just an empty, after all.

The man who likes to argufy and talk both long and loud, The man opposin' ev-rything, may

draw a little crowd-But they will find, the more he quarrels, It's just a load of empty barrels.

Through a Woman's Eyes

(@ by McClure Newspaper Syndicate.)

by Jean Newton

ONE MAN-TWO WOMEN

B EWARE of that man," one wom-an said to another. "He's—oh well, you know the wild bachelor type of the unpleasant kind.

"You sort of feel with him that you're being looked over appraisingly, and if he approves, you've got to be on the defensive.

"You wouldn't like his conversation. He gets so personal-and he gives you the feeling that he's looking for an opening to get familiar. Anything you say is likely to be misconstrued, and before you know it you feel sort of cheap, if not insulted. I had a terrible experience with him

The two women were on the sands at one of the Florida beaches, where this conversation took place.

The woman who had spoken moved away, her friend remained in her beach chair. Before long she was surprised to find, seated beside her, the man against whom she had just been warned. He had been introduced to her by common friends, so that she felt constrained to be civil to him, though chilled by the consciousness of what the other woman had said of him and his conversation.

He talked—and this is what he talked about: Books, plays, his mother, his career, and the new trend in education. Far from being presumptuous or offensive, he was interesting, and except for his deferential manner. gave no sign of consciousness that it was a woman to whom he was talking.

One woman said he was insulting and made her feel cheap—the other he treated her like his sister, or like a queen. To one his conversation was personal, flirtatious, offensive; to the other it was deferential and full of sincerity of interest in the abstract matters which he discussed.

The first woman wasn't imagining it-with her his conversation had been

The same man-two women. What do you get out of that?

(© by the Bell Syndicate, Inc.) Worked to Save Fish

City firemen at Tampa, Fla., pumped water into a lake to save fish from drowning. A sanitary sewer burst and the refuse drained into the lake. Fish died from lack of oxygen. The fire department was called upon to hook up its pumpers with city water mains and furnish fresh water to the inhabitants of the pool.

Mayor Has Idea

J. Waddy Tate, mayor of Dallas, favors a calendar of thirteen months "if all holidays would fall on Monday, church services were held once a month and workers received an extra month's pay for that extra month."-Chicago Post.

What Does Your Child Want to Know Answered by BARBARA BOURJAILY

CAN FLOWERS SEE?

Yes. Flowers turn their faces to The sunlight bright and clear Or toward the light where e'er it is; But flowers cannot hear.

(Cop; right.)

Clover Held as Sacred

by the Ancient Greeks According to legend St. Patrick had great trouble in teaching the people of Ireland the doctrine of the Trinity. Then one day he saw a tiny three-leafed plant growing at his feet and plucking it he used it to illustrate his point. Shamrock is from the Irish "seamrog," and is applied to the various plants having three leaves. In Arabic, the word for three-leaf plants is "shamrakh." While the name shamrock has been applied to various three-leaf plants, it is generally used in connection with one of the clovers. The four-leaf clover has long been associated with various superstitions. Because it is in the form of a cross is likely the reason for attributing to such plants uncanny powers. It was, however, regarded as sacred by the Greeks long before the time of Christ. At various times it has been believed that the person carrying it would have the power of detecting the presence of evil spirits or would be successful in his undertakings. If he put it under his pillow, he would dream of his beloved and a maiden might, by slipping it, unseen, into the shoe of her lover, assure him a safe

Effect of Snake Venom

Probed by Scientists

It has been stated on apparently good authority that snake venom will not affect cold-blooded animals, such as snakes, frogs, toads, lizards and fish. Systematic observation shows that this is not the case. Toads, which are very tenacious of life, have been known to survive three days after having been bitten by puff-adders or by cobras, but in the end they succumb. Frogs often die almost instantly after having been bitten. Again, it has been said that the venoms of two deadly snakes of the same species do not affect each other. Though this holds good in some cases, however, it is not true of all. Puff-adders appear to be immune from one another's poison. On the other hand, puffadders that have been bitten by cobras, mambas, boom-slangs, and other venomous South African snakes occasionally die, but not always. In one case a puff-adder which was injected with enough cobra poison to kill six men survived.

Electron and Molecule

The electron is the smallest known unit in electricity. It may be either positive of negative. The atom is the smallest unit of any chemical element. The molecule is the smallest part into which any body can be divided without destroying its substance as such. It may be identical with the atom as in the case of mercury or argon. It usually consists of the union of two or more atoms. According to the atomic theory all material substances are composed of atoms of a comparatively small number of kinds, all the atoms of the same kind being uniform in size and weight and other properties. The atom is to be conceived as a complex system whose component parts are in rapid orbital motion.

The Winner

He was in the habit of lunching regularly at the same restaurant. One av he called the waiter to him and

said: "John, instead of tipping you every day I'm going to give you a lump sum at the end of every month. It will be more convenient for me."

"Thank you, sir," answered the waiter. "But I wonder if you'd mind paying me in advance for this month?" "Well, that's a strange request. However, here's \$5. I suppose you are rather hard up."

"Oh, no, sir!" smiled John, slipping the money into his pocket. "Only I'm leaving here today."

Long-Lived Poets

Poets, on the whole, are a long-lived race, writes "Looker-on" in the London Daily Chronicle, and some records are recalled of poets laureate. Of those in office since the time of Ben Jonson, most have reached a good old age, and held office for many years. Wordsworth, for instance, lived to be eighty, Sir William Davenant eightytwo, Tennyson eighty-three, and Colley Cibber eighty-six. The average tenure of the laureateship has been over twenty years. Southey held it for thirty years, and Tennyson for forty-

The Word "Anecdote" Today we know that the word "an-

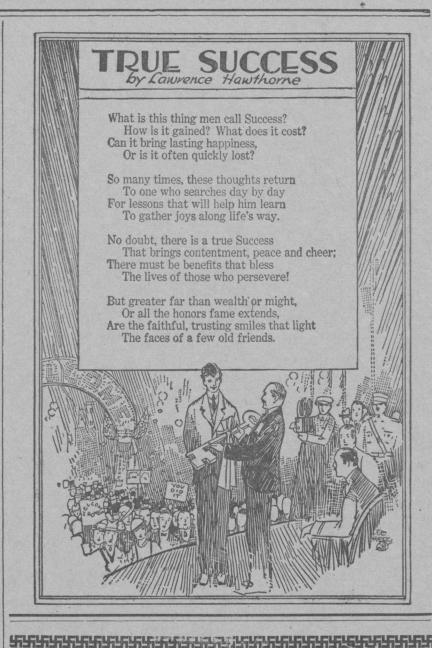

ecdote" simply refers to a pithy account of any incident, usually a short, entertaing narrative.

Originally, however, an anecdote was a secret history, a sort of a subrosa story of unpublished events, this significance being indicated by its root source.

It is in this sense that it is used, for instance, by Procopius in his portrayal of the private life of Justinian and Theodora.-Kansas City Star.

Get in First and Last Word

The female of the species actually gets in the first and the last word. According to the magazine Good Health girls learn to talk six weeks sooner than boys, while recent studies in Illinois show that women live longer than men. Of the 46 centenarians who died there last year, 36 were women. Above 80 the female deaths were more numerous than the male, below 80 less numerous, showing that more women pass eighty than men.

Lesson for February 9 WARNINGS AND PROMISES

(TEMPERANCE LESSON)

LESSON TEXT—Matthew 7:1-29
(Print vv. 1-12, 15-27).
GOLDEN TEXT—Every tree that bringeth not forth good fruit is hewn down and cast into the fire.
PRIMARY TOPIC—Obeying Jesus.
JUNIOR TOPIC—Keeping the Law of Christ.

INTERMEDIATE AND SENIOR TOP-IO—The Truth About Alcoholic Beverages.
YOUNG PEOPLE AND ADULT TOP-IC—Cutting Down the Corrupt Tree.

1. Concerning Censorious Judgments (vv. 1-12).

1. The sin and folly of (vv. 1-5). This prohibition should not be so construed as to forbid our making an estimate of the lives of those about us, for "by their fruits ye shall know them." Neither should it prevent us from administering rebuke to those who deserve it. It is not wrong to condemn the errors and faults of those who are in the way of sin. It does not mean that sin should go unrebuked until we ourselves are perfect. It rebukes readiness to blame others and to magnify their weakness and error. 2. The duty of discrimination in

dealing out holy things (v. 6). The Gospel should be preached to all. We should turn from those who reject and treat with contempt the Gospel message.

8. Qualification for discrimination (vv. 7-12).

(1) A life of prayer (vv. 7-11). Only those are able to rightly divide the word of truth who live a life of prayer. (2) A disposition to treat others as one would be treated (v. 12). It is not merely to refrain from doing injury, but positively to do for others that which we would desire to have done unto ourselves under similar circumstances. No man can live this rule unless he has been born from above and abides with Christ.

II. Entrance Into the Kingdom Urged (vv. 13, 14).

There are two ways only before each one-life and death, heaven and hell. The narrow gate is the way of life. While the gate is strait and the way narrow, it is an open gate and the only gate to life, and all are invited to enter. The gate which opens to every good thing in life is straitrestricted. The way of Jesus Christ is not the way of the crowd.

III. Warnings Against False Teachers. (vv. 15-20).

1. Their real existence (v. 15).

Ever since God has had a people, false prophets and teachers have appeared among them.

2. Their nature (v. 15). (1) They are hypocritical. The

devil does his most successful work by masquerading as an angel of light (II Cor. 11:14,15). His ministers appear in this way and turn people from the narrow to the broad way. (2) They are destructive. This is suggested by their being ravening wolves. It is when the wolf is in sheep's clothing that it does its most destructive work. False teachers are doing their most deadly work while pretending to be loyal to the Bible and Jesus Christ. 3. The unfailing test (vv. 16-18).

"By their fruits ye shall know them." Every tree bears its own kind of fruit. One may search the universe in vain for an exception to this rule. It is equally true in the spiritual world -there is a vital connection between faith of heart and fruit of the life.

4. Their ultimate end (v. 19). Although God has infinite patience and bears long. He will see to it that this evil work does not go on forever. IV. The Dangers of Empty Profession (vv. 21-23).

1. Merely calling Christ Lord will not answer for doing his will (v. 21). 2. One may do supernatural works and not be saved (vv. 22, 23).

Not all supernatural worlds are divine. There is a supernatural world of evil. It is the business of every believer to test the Spirit (I John 4: 1, 2). 3. Separation from God (v. 23).

One may have been a Sunday school teacher or a minister and have performed many mighty works and yet hear from Christ the awful words, "I never knew you; depart from Me." V. The One and Only Safe Way

(vv. 24-29). 1. Hear the sayings of Christ (v. 24). To do this one must give attention to

reading the Word of God. 2. Do what Christ commands (vv. 24-

Hearing and doing the teachings of Christ is building upon solid rock. Hearing and not doing Christ's sayings is to build upon the sand.

Properly Protected

If a man have Christ in his heart, heaven before his eyes, and only as much of temporal blessing as is just needful to carry him safely through life, then pain and sorrow have little to shoot at .- William Burns.

Faith

By faith we understand that the worlds have been framed by the word of God so that what is seen hath not been made out of things which do appear .- Epistle to the Hebrews.

Improved Uniform International Takes Much Water to

Supply World's Cities

Have you any idea how much water the average city dweller uses daily? Take London, with its gigantic population. Here the authorities have to supply an area of 558 square miles, and give the 7,000,000 people the water they need. Would you have imagined that each of these demands no less than 36 gallons every day? Yes, that is only the average supply per head per day. In the dry, hot weather the amount required for each person becomes 40 gallons, or more than a barrel of water per day for each man, woman, and child. London is not the thirstiest town. Scotland consumes more water than England. In Glasgow and Edinburgh, for instance, the average consumption per head is not 36, but 37 gallons; and to Helensburgh, in Dumbartonshire, belongs the distinction of being the most thirsty town in the whole of the British isles. Here they take 81.7 gallons per head. One reason given for Scotland's large consumption is that the water supply is much better than in England.

Old Treasure Chamber

in Westminster Abbey Few who explore Westminster abbey are aware that there are many of its most ancient and interesting parts of which they have never had a glimpse. For instance, in the eastern cloisters there is a door so guarded against unauthorized intrusion that it can only be opened by seven keys, which are in the jealous custody of as many government officials. Five of the keyholes of this wonderful door, which, by the way, is covered with human skins, are concealed from view by a stout iron bar which traverses it. This door gives access to a vaulted chamber, known as the "Chapel of the Pyx," the walls of which were standing as they stand today before even the Norman conqueror landed in Sussex. This chamber was once the treasury of England, to which were brought "the most cherished possessions of the

The Grammar Lesson

The barber had been telling a long and somewhat incredible story. Some one intimated that the tale seemed to be rather exaggerated.

"It is true," insisted the barber. "I saw it did."

"Why," asked the highly-polished manicurist, "don't you use better grammar? You shouldn't say 'I saw it did,' you should say, 'I saw it

"Well," said the barber, "what's the difference between did and done?"

"Don't you know?" asked the manicurist scornfully. "Did is the plural." And the barber had received his daily lesson in the English language.-New York Sun.

Real Estate Mortgage Old

Real estate mortgages are the oldest investment on earth. In ancient Babylon, 2,100 years before Christ, in the reign of King Khammuragas, money was loaned on mortgage, while the great Babylonian banking house B. C., invested large sums in mortgages on both city and farm property. The mortgages were recorded on bricks, which were preserved in the contemporary safe deposit valuesgreat earthenware jars buried in the earth-and dug up in modern times to show the archeologist when, where and how the mortgage originated .-Detroit News.

Perfect Answer

She was lying on the floor crying and kicking up her heels as only a four-year-old can when her temper is aroused. The youngster's mother picked her up and moved her out of the way none too gently. The little girl's crying ceased; she sat up and soberly demanded of her mother: "How would you like it if I picked you up and threw you down on the floor like that?" Not to be daunted, the mother replied, "If you ever find me lying on the floor, kicking my heels and crying like that, I'll let you."

Beer as a Cosmetic

Gallo-Romans were almost modern in their use of cosmetics. They recognized the value of cold water to refresh the skin. To preserve the complexion, however, they bathed the face in the froth of beer or with chalk dissolved in vinegar. The eyebrows they dyed with a juice taken from the sea pike. Auburn or yellow hair was greatly admired in women and those who were unfortunately and unavoidably brunette either limed the hair, dyed it, or wore wigs .- Detroit News.

First Fireplaces Were Wooden

Many of the first fireplaces were built of wood, and plastered over on the inside with a sort of mud mortar. These early crude fireplaces were huge things, and unquestionably it is from them we got our story of Santa Claus and the chimney. Certainly he would have had no difficulty coming down those early flues. In fact, they were provided with steps on the inside in order that the man of the house could patch the cracks in the plaster with new mud.—Successful Farming.

Getting Better and Better

The span of life lengthens. Our national diet becomes more rational, our public health work more effective .-Woman's Home Companion.

Shadow on the wall. A strange noise. A "something going to happen," feeling. You, alone, in the dead of the night, and without the comforting assurance—the protection afforded by a

Chess Without a Peer

peoples, creeds or countries.

in Line of Amusements Chess is the king of games. Its subtlety and scientific beauty is without a peer in the line of amusements. For centuries the sport has constituted one of the principal diversions of kings, statesmen, painters, poets and captains of industry and commerce. It has been universal in its scope and without restrictions among

This intellectual pastime frequently has been suggested as a cure for a few of the world ills. Students of the game are of the opinion that it develops thinkers, brings to light genius and encourages mathematical calculations. The dull brain is stimulated into flaming activity; young minds are schooled to think clearly and concisely, while the old brain is rejuvenated. It is a mental solvent that contains those ingredients that make the eye sharp, the spirit calm and the disposition unruffled. In brief, chess is a mysterious science dealing with profound problems.

Like golf, the game takes possession of the mental faculties and diverts them from their ordinary grooves. The absorption and abstraction afforded constitute a panacea for the cerebral organ wearied by business or frazzled by cares, the latter being neutralized by the foresight demanded.—Kansas City Times.

Nova Scotian Island

Dreaded by Mariners Every year, Sable island, on the coast of Nova Scotia, has had its tale ships were known to be dashed to them: pieces in the terrific breakers. In 1746 the Duc d'Anville lost a transport | ing?" and a fireship in a severe storm near the island, and in 1761, one of the vessels that had been with Wolfe at Quebec was wrecked. A curious tale is told about the latter.

There was an old landmark on the out devils!" island in the form of a pyramid of sand a hundred feet high. In 1842, during a fearful hurricane, this was completely blown away, and where it had stood were some small huts built from the timbers of wrecked ships. The huts contained articles of furniture, bales of blankets, some military shoes, and boxes of other goods. A brass dog collar that was unearthed bore the name of Major Elliott, Fortythird regiment. This was the regiment wrecked in 1761, and examination of the records showed that the soldiers who had been saved from Wolfe's transport had been taken off the island. The site of their old encampment is now under water.

Youngster Understood A small boy asked his father how

wars began. "Well," said his father, "suppose that England quarreled with France-" "But," interrupted the mother, "Eng-

land mustn't quarrel with France!" "I know," he answered, "but I am taking a hypothetical instance." "You are misleading the child," said

the mother. "No, I am not," he answered. "Yes, you are."

"No, I am not." "Yes."

66NO 22 "All right, Dad," said the small boy, "I think I know how wars begin."-Border Cities Star.

Missing Rembrandts

It is not generally known that there are no fewer than 70 lost Rembrandts, some of them possibly in the possession of very poor people. If they only knew, they might possess the wherewithal to maintain themselves not only in comfort but even in luxury for life. All 70 are described in ancient records as having been painted by the master. One London art dealer has already devoted many years to a quest for these lost masterpieces. Some of them have been missing for centuries. The principal reason why they are still missing is that their owners do not realize their identity.

Donkey's Wonderful Foot

The foot of an ass is one of the most ingenious and unexampled pieces of mechanism in animal structure. The hoof contains a series of vertical and thin laminae of horn, amounting to about five hundred, and forming a complete lining to it. In this are fitted as many laminae belonging to the coffin-bone, while both sets are elastic and adherent. The edge of a quire of paper inserted leaf by leaf into another will convey a sufficient idea of the arrangement. Thus the weight of the animal is supported by as many elastic springs as there are laminae in all the feet, amounting to about 4,000, distributed in the most secure manner, since every spring is acted upon in an oblique direction.

Arms and the Bishop One does not usually associate the parade service with humor, though this conjunction occasionally happens. Here is a case from India: In the battalion orders of a smart infantry regiment there appeared the following notice: "The bishop of Lucknow will preach at the parade service on Sunday morning next. All men will carry 20 rounds of ball ammunition." Ever since the mutiny the troops in northern India have attended church with arms and ammunition. But it was unfortunate that the order to do this should follow so closely on the bishop's appearance in church.-London Morning Post.

Whereupon

The young men had been behaving of disasters. During the war between | in a disorderly manner at a Revivalist the French and the English, troop meeting, and the missioner asked "Why did you come to this meet-

"To see miracles performed," answered one of them. Whereupon they were summarily

ejected. "We don't perform miracles," explained the missioner, "but-we cast

Historic Cathedral Bells

In the fourth story of the north tower of the famous cathedral of Chartres are two fine-toned bells, cast in 1840, from the tenor of which the Angelus rings out each evening. Four further bells-named Anne. Elizabeth. Fulbert and Piat-occupy the fifth story; these are dated five years later and one at least possesses an interesting history. When Anne of Brittany visited the cathedral she was so impressed by a boy's voice that she begged the authorities to release him to her, which they did, whereupon she said: "You have given me a small voice and now I will give you a big one." Years ago this bell was rung for an hour every evening during a certain period of the year, that there might be abundant harvest.

Paper-Clip Mouse Trap

There is no wiser or shrewder animal in the world than the rat and the mouse is almost as clever. These animals soon learn to recognize a trap by sight or odor and will walk around it. The traps are now made in camouflaged form. The trap for the mouse that runs through your desk and chews your papers has a spring that resembles a paper clip. An old tin can with a smashed top is another of these devices. When the mouse undertakes to explore the interior of this one he soon finds that the lid has closed behind him and escape is impossible.

Facts About Sponges

Sponges are very irregular in form, symmetrical ones being rare, and their color is as variable as their shape. Deep-sea sponges, like other animals that live in the dark, are generally light in color; but those that live in shallow water are very bright, and the color assumed by the sponge is generally for purposes of defense, or to frighten away other animals. Sponges are very abundant in the Australian seas; especially is this the case with the horny or highest form of sponges.

Johnson Used Proverb

to Drive Home Point "He who would bring home the wealth of the Indies must carry the wealth of the Indies with him" is taken from an observation made by Dr. Samuel Johnson, as recorded by James Boswell. Boswell says: "I said to him that it was certainly true, as my friend Dempster had observed in his letter to me upon the subject, that a great part of what was in his Journey to the Western Islands of Scotland had been in his mind before he left London. Johnson: 'Why yes, sir, the topics were; any book of travels will be good in proportion to what a man has previously in his mind; his knowing what to observe; his power of contrasting one mode of life with another. As the Spanish proverb says, "He who would bring home the wealth of the Indies must carry the wealth of the Indies with him." So it is in knowledge.' Boswell: "The proverb, I suppose, sir, means, he must carry a large stock with him to trade with.' Johnson: 'Yes, sir.'"-Pathfinder Magazine.

Literature for Blind

Before Braille System One of the earliest systems whereby the blind might read originated in Peru, where the alphabet was formed by knots on a length of string. In the Sixteenth century Francesco Lucas, a Spaniard, engraved characters on wood for the blind, and in 1640 an arrangement of movable metal type was used in France. This plan failed through lack of funds and the blind had to revert to the wooden letters and pins stuck in cushions. Other devices for the blind were Doctor Pinseaux's frame with a small handle into which metal letters could be inserted, and a German scheme with letters cut in cardboard. Then Valentin Hauy realized the possibilities of embossed paper. It was at this school that Louis Braille was a pupil and he saw the superiority of the point system over the many others, including Gall's Moon type, that were causing confusion. His method is now world-wide. The Koran has been transcribed into Braille, and the system adapted to Chinese and Arabic.

Buried With His Five Wives

In a country town not more than ten miles from Springfield, Ill., is a cemetery near the roadside whose ancient stones, moss-covered and weather-beaten, attract the passerby who may be interested in curious epitaphs. In the center of one lot is a large monument on which is inscribed:

"Here lies John Jones, aged ninetytwo. At rest." On the side of the monument are five small stones exactly alike, each bearing the name of a woman and date of death and each having this inscription: "Beloved wife of John Jones."-Springfield Repub-

Eyes Never Sleep

What could be more inactive than a person's eyes while he is sleeping soundly? But Prof. Walter R. Miles, a Stanford university psychologist, has the eyes during sleep which indicate that the eye muscles perform definite work while the lids are closed. The pupils contract, the eyes are rolled up in the head, then the muscles surrounding the eye pucker up. None of these are relaxation, as commonly supposed. In fact Professor Miles believes that our entire sensory system is more or less active during sleep .-Pathfinder Magazine.

Ben Damph Is Damp

Ben Damph, a rambling country mansion belonging to the Lovelace family, is perhaps about the most inaccessible house to be found even in Scotland. It is also one of the wettest. Rain falls almost continuously. The nearest village is about eleven miles away, and the household is consequently, of necessity, self-supporting. Fish from the loch, cattle from the pasture, and game from the moor provide the staple sustenance of those staying at Ben Damph.

Electrical Term

The bureau of standards says that a lazy-man switch, also called a threeway switch, is electrically a singlepole double-throw switch. Using two of them, a light can be controlled from two places, such as upstairs and downstairs in the case of hall lights. A related switch, called a four-way switch, is electrically a double-pole reversing switch. Any number of fourway switches may be used with two three-way switches to control a light from any number of points.

Fair Enough All 'Round "What did you promise the dele-

gates that just called on you?" "Everything they asked," answered Senator Sorghum. "And when votes were mentioned, they promised everything I asked. Then we all retired to think it over, leaving everything looking like a stand-off."-Washington Star.

Splinters

Mother was dressing a chicken, and Jane, age four, was close at hand with the usual number of questions. The feathers had been removed, but the pin feathers were numerous and much scraping was necessary.

"Oh, mother," exclaimed Jane, "how did the chicken get all those splinters in it?"

Good Roofing Material

Less Costly Than Poor It is only natural for you to want your home to look beautiful. You want it to be the best looking house that money will buy. Even if it be a small bungalow, your pride demands that it should look well. You don't want to feel ashamed of it and you don't want it to look shabby after a

The roof usually has the largest and most prominent surface in the building, and therefore its color should strike the dominating note, says a writer in the Chicago Post. A roof of dull black or uninteresting gray gives a shabby appearance and de-stroys a beautiful effect that might otherwise be produced in harmony with properly designed walls and architectural ornaments.

The roof is the point where so many otherwise good looking and well built houses fail. So often the home builder cuts the corners on his roof, thinking that he will save money. In the end

he usually finds his saving to be costly. He ruins the beauty of his home through the use of roofing material which is flat and uninteresting, which lacks distinction and which soon loses its original color and freshness. Incidentally, it might be mentioned that he soon finds that the cost of repairing and replacing this roof costs more than a roof of beauty and permanence would have cost him in the first place. He has not only sacrificed beauty but has spent more money in doing sc. This thing has happened time and

Good Business Reasons

for Beautiful Factory The successful factories of the future will not be a sprawling mass of unsightly brick and metal, but, for good business reasons, will tend toward the esthetic, according to Frank D. Tomson of Lincoln, Neb., who spoke before the twenty-first semiannual meeting of the American Railway Development association, at

Chicago "Nice looking factories, especially those with parks and beautiful grounds, will be the rule for the future," he said.

"In building an architecturally beautiful factory the builder helps develop the property near his location, brings other business sites to the place and establishes a small commercial city. In the end he will benefit by his thoughtfulness for the beauty of his

Lessening Fire Losses

One of the most important ways in which our tremendous annual fire loss (which now exceeds 500 million dollars) can be reduced is through better building construction, says S. H. Ingber, chief of the fire resistance section of the bureau of standards, Department of Commerce. While this method of reducing fire losses necessarily takes some time in yielding apparent results, it is nevertheless, one of the most effective ways of combating this destructive element in the long run.

It is to be hoped that as old buildings are replaced, and as the new construction reflects to an increasing extent the knowledge gained in the laboratory and through studies of actual fires, the destruction of property will decrease.

Would Extend Zoning Limits

All land lying within five miles of the corporate limits of a municipality would be included in that municipality's jurisdiction for the purpose of establishing proper control over subdivision platting, according to the preliminary edition of the proposed standard city planning enabling act, which has just been issued by the United States Department of Commerce. The preliminary edition has been issued in order that the act may receive the criticism of associations and individuals familiar with city planning problems before its final form has been determined upon.

Color Combinations

Besides the snow white and gray cement stuccos there is a wide range of colored stuccos requiring neither finishing nor recoating, and affording you an opportunity for the most artistic color backgrounds in stucco finish. You may have a solid color, relieved, perhaps, by a contrasting roof or trimmings. Also most charming combinations of colors may be worked out, permitting the widest individual expres-

A Nail in Time

The want of a nail on the exterior of a house may lead to serious consequences. A shingle gets out of place, or a clapboard or siding warps and springs up at one end. The result is that the next rain drives in its moisture and starts rot on the inside wood.

Reveals Cause of Leaks Most of the leaks which develop in

roofs are due to faulty construction

or the corrosion of the metal used in flashing. The roofing material itself is not very often to blame.

Good Home Worth Cost A good home is worth all you pay for it, in time and effort and money.

TANEYTOWN LOCALS

Items of news from town, or vicinity are always wanted for this column. Especially accidents, sales of real estate, fires, important happenings, visits to or from the community social events, and all matters of general interest to those at home, and away from home.

Our Sale Register list is growing slowly. Better watch it each week for additions.

I'm very partial to a good Office, on Wednesday, giving them cigar. their first experience with the insides | The Boss-Umph-then I'll lock of a printing shop. They were es- 'em up. pecially interested in the operation of the linotype, and each one was presented with a slug containing his or

Mr. Ernest O. Wheatley, of Salisbury and Miss Rita Hallowell, of he's done anything bad enough to de-Federalsburg, were married Saturday, February 1, 1930, in Philadelphia. After spending Sunday and Monday with Mr. and Mrs. Charles L. Stonesifer, they left Baltimore by boat for Florida where they will spend their honeymoon. Mr. Wheatley is a brother of Mrs. Stonesifer.

Dr. W. W. Davis, secretary of the Lord's Day Alliance, delivered a remarkably fine and interesting address on the Lord's Day and the work of the Alliance, in the Lutheran Church, last Sunday evening. Dr. Davis is whole-heartedly interested in his work, and was at his best in presenting the topic. The general verdict of those who heard him, was, that it was the best talk ever delivered by him in Taneytown.

Monday was an ice-breaker and opened up the gutter on the east side of Baltimore St., from standpipe ally to the railroad after a lot of vigorous assistance by man help. Everybody is of one opinion, that this particular stretch of street needs a sewer, as a vast amount of cellar drainage and surface water must have its outlet in a more satisfactory way than on the surface. Both sides of the street need better drainage, but the east side needs it most. A complete sewer system, for all purposes, from the square to the railroad, would be fine.

Mr. and Mrs. Jesse T. King, of Ridgeville, Md., were guests of Prof. and Mrs. J. Keller Smith, last Sun-

Frank Stambaugh, near town, has accepted the position as manager of the New Clothing Store, at Emmits-

Mrs. Lydia Frounfelter, of Littlestown, an aunt of Mrs. Harry A. Allison, visited the latter on Wednesday and Thursday, this week.

Curtis Eckard returned home the first of this week from a trip to Florida, coming by may of York for Mrs. Eckard. The party report having had a fine time, the trip being made by auto. Florida had some Burgess S. Miller, who has been on frost this winter but not enough to

Those who spent the week-end with Mr. and Mrs. David Little and family, were: Mr. and Mrs. R. B. Everhart, Baltimore; Misses Catherine McDermitt and Marie Little, St. Joseph's College, Emmitsburg; William Little, Neale Little and Nevin Englebreght, of Gettysburg. Mr. and Mrs. Charles Hughes, Ray School, of Westminster; Miss Ada Miller and and grand-daughter, Dean Hess, niece, spent Saturday evening at the same place.

In cleaning out a drawer in one of our office desks, this week, we came across a letter written to The Record from the late Dr. Samuel Swope, dated Gettysburg, Pa., June 10, 1896nearly 34 years ago-as follows: "Friend Pres. Will you be kind enough to send me The Record during this month, as I am anxious to get all the news of town and neighborhood, as I always read it when at home with a great deal of pleasure, and of-Mrs. Alice Hahn suffered a light ten find occurrences of which I only original stockholders of The Record Co., and always a very good friend of the Editor.

Served Now, but Laid Then I've never seen a musty hen, And never hope to see one; ut from the eggs served now and then I know that there must be one.

Liked Good Cigars

The Boss-Smoke cigars, Tompkins? Tompkins, the new bookkeeper-

Drastic Measures

Kathryn-Do you think if I should marry Mr. Gaysport it would reform

Kittye-It might, but I don't think serve that.

Some Escaped

Mr. Jabbs (in a graveyard)-All these people buried here had their troubles in life, Jane. Mrs. Jabbs-Oh, not all of them-

all of them weren't married, John.

SOON REACHED

He-Do you think woman will ever reach man's estate? She-Few have estates. When they have, women soon reach them.

Mystification

A poet is a person grand
Who leaves my soul in doubt,
Because I cannot understand
All he is talkin' 'bout!

THE KEY FEEDS

If a feeder would say to us that he could buy feed for a lower price than we ask for THE KEY FEEDS---it would mean nothing to us. That can always be done.

If a feeder would say to us that he could buy better feed than THE KEY FEEDS---we would be very much concerned. We can never allow that to be true.

THE KEY FEEDS are as good as we can make them.

Start and grow your chicks on THE KEY STARTING and GROWING MASH.

Only Fair

When we know that we have a contagious disease it is only fair to accept quarantine as graciously as possible, no matter how inconvenient; to stay away from public gatherings where we might carry a disease to others; and to warn chance callers when we think we have one of the non-quarantine diseases. - Successful

Farmhands on Stilts

The English hop vines grow 18 or 20 feet high, being trained on strings, and in order to get the best results the vines must be carefully watched and trained along these supports. This work is done by men who move about on stilts in order that they may readily reach the vine tops. The stilts are fastened to their feet and belted to them at the waist, which leaves their hands free. The men become very proficient in their movements about the fields.

There Comes A Time-

* * * unfailingly in the life of every family when consideration must be given to the question of choosing a memorial.

It is not an unpleasant duty. Rather it is an act of devotion, freely given. For much of the pride and sentiment in our lives finds expression in this way.

We will gladly give you information on the selection and placing of a suitable memorial.
