### No. 2

# JAPANESE BEETLES HUNTED FOR.

Federal Agents investigating in Frederick County.

Federal Agents have been scouring portions of Frederick county, and the Taneytown section of Carroll County, for Japanese beetles. So far, the pests have been found in quantity only in the Brunswick section of Frederick county, one beetle having been found in a shipment of peanuts, likely originating in Virginia.

originating in Virginia.

The entire county is being searched by the agents, especially in gardens, truck patches and orchards, but it is said that quarantine regulations will not be enforced until after thorough search shows a condition of infesta-

The Taneytown section was visited several days this week by four of the agents, but they gave out no informa-tion as to finding either the Japanese or Mexican beetles in the section. A bulletin on the subject from the U.S.
Department of Agriculture, says—
"Bean plants in eastern fields
where the Mexican beetle has been

troublesome should be plowed under as soon as the crop is picked. Thousands of eggs, larvae, pupae, and newly emerged adults can be destroyed in this way. Covering the plant remains and insects with a few inches of soil will destroy them. The fall crop of beans should be planted as late as possible. The beetle does not ordinarily reproduce as rapidly in late August and September as in Spring and early summer.

### HORTICULTURAL MEETING AT NEW WINDSOR.

The Maryland Horticultural Society will hold their summer meeting at New Windsor, Wednesday, July 28

The folks will meet at the Blue Ridge College campus at 10:00 A. M., make a short tour of the orchards where a demonstration of orchard tillage tools will be given. Then come back to the Mt. Olivet Fruit Company Packing House, where will be exhibited, washers, brushers, polishers and cleaners of apples, return to College Campus about 12:30 for box lunch, followed by a program arranged by Dr. Auchter and others, in which Dr. Bamberger, representing the Federal Farm Board, will explain "The Federal Farm Board Set-up for marketing and fruit and vegetables"; Dr. Pailthorp, U. S. Bureau of Agriculture will discuss Federal Grades and standards of fruit.

standards of fruit,
Governor Albert C. Ritchie will address the afternoon meeting
Fruit growers and all Horticulturists and their friends from every part

of the state are urged to attend this The local committee will appreciate very much if the folks generally, both men and women, from the surround-

ing communities, cities and towns will
H. King, 59, a cigarmaker at Faber's
contribute to the success of our meeting by being present at the program
on the campus, at 1:00 P. M.

H. King, 59, a cigarmaker at Faber's
cigar store, Gettysburg, for more
than twenty years, went to the chicken house at the some at Round Top This will be a worthwhile program

and we are asking you to make every reasonbale sacrifice to attend.

### A NEAR APOLOGY-AND AN EX-PLANATION.

The Record feels like apologizing for carrying so many large advertise-ments, at the expense of reduced reading matter; but, the fact is that if it was not for the big advertisers the average weekly paper could not exist

--and The Record is one of "the average." Also, was it not for the large amount of job printing The Record receives from away from home, it could not maintain its present force of help. Local patronage alone, is not sufficient to adequately support any local paper.

And, an explanation as to cigarettes advertising. The time was-and not so long ago-that The Record refused cigarette advertising contracts, and lost a large amount of revenue. That we have now decided to accept such advertising is not mainly on account of the revenue received, but because we have good medical authority the statement that if a man feels that he must smoke tobacco in some form the cigarette is the least harmful of

The cigarette is also being given credit for the fact that but few young men now chew tobacco. Perhaps smoking cigarettes, instead of chewing, is merely an exchange of bad habits; However, we are not defending the use of cigarettes, or tobacco in any form. The tobacco habit, is a bad habit, as many others are.

The Record has simply changed its belief as to the special harm of cigarette smoking, moderately, by persons of mature age. If we believed otherwise, our space could not be bought for such advertising.

# REOPENING OF CHURCH.

The Church of God, at Bark Hill which has been under considerable repair for the past month, will hold a reopening service Sunday, July 13th., with an all-day service. The principal speaker will be Rev. J. H. Gonso. Beginning on the night of July the

13th., Rev. Gonso will hold a week of Evangelistic services, preaching a series of illustrated sermons. Special music. Everybody welcome.

Young Mr. Rockfeller is credited with having said, "Any one will do the best work, when he works along the line of his greatest interests."

"Half the evils of the world would stop if they had to be done in the light of day."—Lord Salisbury.

OLD SOFA BRINGS \$1006.00

After Nobody Wanted it as a Free

Two Lebanon antique dealers paid \$1,006 for an old sofa at public sale on Monday, a month after the First Lutheran Church at Carlisle had tried vainly to give it away. The successful bidders said the sofa was a Chippendale of the 1750 period

Chippendale of the 1750 period.

A Carlisle woman forty years ago donated the sofa to the church as part of the furnishings for a rest parlor. Several years ago, it wes decided that the sofa was so old that it was out of place in the parlor, and the piece of furniture was sent to the basement. The janitor used it as a couch until it became too dilapidated.

About a month ago some women. while cleaning, brought out the sofa from an obscure corner of the basement. It was offered gratis to any member of the congregation, but no one claimed it. A week later a non-member of the church heard about the sofa and offered Fifty cents. Before the church council could go shout the formulity of

While the puzzled council members were studying the new move, an offer of \$5 was received, and then the bidding was on in earnest. Within two weeks, dealers from many sections of the state and from Maryland had raised the bids to \$500. The church council also forwarded a description of the sofa to a representative of Henry Ford at his request. The once-abandoned sofa now was kept under lock and key.
In order that all the prespective

buyers might have an equal chance, the public auction was decided upon. The first bid was \$500, but the rivalry

among the score of dealers soon pushed the price upward.

Members of the congregation did not announce what they would do with the money, but they pointed out that the church was in need of a new

### TWO SUICIDES IN ADAMS COUNTY.

Two well-known residents of Adams county, William H. King, Round Top, and James A. Wetzel, of near McKnightstown Station, committed suicide within six hours of each other Thursday morning, King shot himself in the head, while Wetzel hung himself from an apple tree in

the orchard on his farm.

Worry over the outcome of tuberculin testing of a herd of cows is said by members of the Wetzel fam-ily to have prompted him to end his

His body was found about 9 o'clock by a hired man while the latter was looking for Mr. Wetzel to ask him about some farm work. Mr. Wetzel was born near Fairfield, a son of the late Jacob and Elizabeth (Stoops) Wetzel, and farmed practically his

entire life in Franklin township.

Arising and dressing at 3:30
o'clock Thursday morning, William William en house at his home at Round Top and committed suicide.

His body, with a 32 calibre revolver clutched in one hand, was found by Mrs. King who heard the shot and

# TRAMPING PRINTERS.

For a number of weeks past, our office has been visited by at least one tramping printer a week. All were young men, except one. All wanted a job, if only for a few days; all said they were out of work because of the "hard times;" all gave their last place of employment a long distance away; all wound up their tale of woe by saying they had walked a long distance and were hungry. Of course, we responded to their appeal, but we are becoming suspicious of being an

It is said that there is a class of floaters who change their trade several times in a town-and make begging pay. It also seems to us that a worth-while printer, out of work, might find a job of some other kind in the neghborhood in which he belongs, and not be compelled to tramp. But,

we may be wrong. Honest and capable men out work, with no savings on which to draw—and possibly with a wife and children dependent on them-are certainly in a deplorable condition; and anybody who fakes a case of this kind deserves a sentence to the peniten-

# **3 MEN COMMIT SUICIDE** BY HANGING

### Two in Carroll, One in Frederick County, Within Five Days.

WILLIAM I. BABYLON.

William I. Babylon, aged 51 years, well known farmer living near Friz-ellburg, committed suicide, last Friday forenoon, by hanging himself to day forenoon, by hanging himself to a beam in the barn on his farm, where he was discovered by his wife. The body was promptly cut down but death had occurred some time before.

Mr. Babylon, Roy Staub, Charles Staub and Joseph Strevig, Babylon's son-in-law were engaged in cutting wheat. Babylon left the field, apparently in his usual manner, about ently in his usual manner, about 10:30 and went to his home where his wife was engaged in baking. After talking to her pleasantly he told fore the church council could go about the formality of approving the sale, another resident offered Babylon went to the barn about 11:30

and found him dead, as stated.

He was the son of the late Charles
R. Babylon, of Mayberry, and Mrs.
Emma Babylon. He is survived by his wife, Mrs. Martha Babylon; his

mother, and one daughter, Mrs. Joseph Strevig, of Frizellburg.
Dr. J. J. Stewart, Police Justice Benson, and Deputy Sheriff Warners of Westminster, viewed the body and decided that no inquest was necessary. sary. No cause could be assigned for

Funeral services were held on Monday morning, from his late home, in charge of Rev. Millard F. Kroh, pas-tor of Baust Lutheran Church. Interment was in Baust cemetery.

### THEODORE G. LEISTER.

Theodore George Leister, aged 21 years, whose home was at Pleasant Valley, committed suicide, on Monday evening, by hanging himself from a beam in the barn on the F. E. Englar farm formerly owned by Englar farm, formerly owned by Uriah Bixler, situated near the New Windsor road about a mile and a half from Westminster. He was employ-ed by Mrs. Pearl Johnson, tenant on

the farm, as a laborer.

The cause of his act is a mystery as he exhibited no indications of trouble of any kind. He was last seen alive about 6 o'clock when he went to the dairy building and afterwards to the barn to throw down hay. Mrs. Johnson discovered the body about 6:45 when she went to call him to

He is said to have been greatly impressed with the like hanging on July 4 of Wm. I. Babylon, whom he knew, and commented on the way Babylon made the knot in the rope, which he said was wrong and demonstrated how it should have been done. After his body was taken down, it was discovered that he had used the

way he had described.

His age was 21 years, 5 months, 6 days. He was the son of Mr. and Mrs. A. Daniel Leister, who survive him with one sister and eight brothmim with one sister and eight b Baltimore; Harvey and Paul Leister, Pleasant Valley; William, of Alesia; Joseph, of Westminster; Edgar, Guy, Howard and Martin, at home.

The body was taken in charge of C. O. Fuss & Son, undertakers, and prepared for burial at their establishment in Taneytown. The funeral was held Wednesday afternoon, at the Leister home, and interment was made in Pleasant Valley cemetery. Services were in charge of Rev. W. E. Saltzgiver.

# WILLIAM L. MURPHY.

William Leslie Murphy, 29 years old, a farm hand living near Ijams ville, Frederick County, west of Mt. Airy, was found dead last Saturday dent of Frederick and president of the morning, hanging from the limb of a ground. On Friday he and his father going home to get a suspender fixed, but he did not go to his home.

As he did not return Friday night, search was made Saturday morning, when his body was found by a sister. The suicide is believed to have taken place at some time on Friday. He was unmarried. Mental despondency is thought to have been the cause that led him to take his life, as he had been unwell for some time.

# HOME-MAKERS' MEET.

The monthly meeting of the Home-makers' Club was held in the Fire-man's building, Friday evening, June 27, at 8:00 o'clock. The opening number was a song by the ladies who attended College Park. Roll call was answered with suggestions for sand-

Mrs. George Shriner and Mrs. Bernard Arnold gave a demonstration of the making of quick bread, clover leaf rolls, park or house rolls and buns were baked. We had reports from College Park which were very interesting.

Miss Belva Koons, Ada Englar and Mrs. Rohrbaugh rendered a piano Ice tea, cake and cookies were served for refreshments.

# FESTIVAL AT HARNEY.

A festival will be held in the church grove at the United Brethren church, Saturday night, beginning at 7 P. M. It will be held under the auspices of the Harney United Brethren Ladies' Aid Society. Music will be furnished by the Otterbein Intermediate Orches-tra of the Otterbein U. B. Church, Hanover, Pa., under the direction of

# DRIVING ON WRONG SIDE

Causes Many Accidents on Part of Careless Drivers.

In the opinion of E. Austin Baughman, Commissioner of Motor Vehicles, accidents due to careless drivers who operate their cars on the left side of the highway are increasing out of all proportion to other types of accidents. "This type of accident, resulting in head-on collisions and sidewiping of

cars, with resulting wrecks and injuries, is primarily caused by the operator operating to the left of the center of the highway in the face of approaching traffic," said the commissioner to a Baltimore Sun reporter.

"In some cases such type of opera-

tion is preparatory to making a lefthand turn, but usually it is a course followed to a stop on the left-hand side of the street, or just pure, unadulter-ated carelessness and lack of regard for the other users of the highway,"

"Any other traffic meeting with a driver of this kind is forced to make a quick decision in trying to avoid an accident. It is difficult at times to make the right decision. A stop may lead to a head-on collision, a turn to the left may lead to an accident when the fellow who is on the wrong side of the street finally wakes up and then suddenly turns to his right, where he belongs. Such cases are on record where the driver on the right has had to drive onto the sidewalk to avoid a

"When every driver realizes that 'keep to the right' is the only safe alies and that no every or alihis policy and that no excuses or alibis will be accepted for not doing so we can look forward to the elimination of accidents from this careless type of driving and, of course, a correspond-ing reduction in the appalling total of highway casualties.

"Truck drivers especially should heed this warning. What is gained by jeopardizing one's license for the sake of a few seconds' convenience? It is just as easy to drive right as to drive otherwise. A word of warning to the thinking operator should be suffi-cient."

### "INSIDE" INFORMATION FOR WOMEN.

Serve small portions of food to children so that they can clear their plates without the feeling of being stuffed, and without being nagged into eating. Then give second helpings

Liver and cucumber salad is a good combination. Mix 2 cups of cold chopped cooked liver ½ cup of diced cucumber, and ½ cup of diced celery with mayonnaise dressing serve on letters leaves. ettuce leaves.

Refreshing, juicy, fine-flavored wasource of two important vitamins, A and C, and contain detectable amounts of two others, B and G.

Orange and honey sauce for ice cream is made by placing in the top of a double boiler the following ingredients: 1 cup of honey, 1/4 finely grated fresh orange peel, ½ cup orange juice, a few grains salt. Set over hot water for about 30 minutes to blend the flavors. Serve on ice cream. This amount will serve 6 to 8 persons allowing about 2 tablespoons to a serving.

Fry small fish over a low oven heat

in a small amount of good-flavored fat, using a heavy skillet. Roll in flour and put into hot fat without crowding. Reduce the temperature and cook evenly and slowly until a brown crust is formed on one side, then turn carefully and cook on the other. Serve a section of lemon with each portion. Heat plates and platter and serve the fish very hot.

# WILL SPICES BE CHEAPER?

An evidently well posted contribu-tor to the Philadelphia Ledger, says, in part, of the new Tariff bill; "Months hence economists and poli-

ticians will be fiercely wrangling over the question whether the recently en-acted tariff bill helps or hurts business and imposes unjust burdens on consumers. The complexity of the subject enables partisans to advance plausible arguments supporting their respective contentions, and only experience will determine which side is

Regardless of who has been hurt and who benefited, it is certain that the spice industry at least gained a substantial concession from Congress when it consented to place a number of spice seeds on the free list. Spices imported in 1928 to a value of approximately \$14,000,000, on which average duties of fifteen percent were collected under the Fordney-McCumber act, will, under the Smoot-Hawley bill, come in free of taxes. This will effect a saving to the spice trade of more than a million dollars a year.

# COST OF THE "FOURTH."

At least 178 persons died in the U.S. from celebrating the Fourth of July, and thousands were injured. The deaths are summarized as follows; fireworks 12, automobiles 81, drowning 57, various causes 28. Six of the deaths were in Maryland, from drowning, 2 in auto accidents and 1 from burns resulting from fire-

The greater portion of the accidents were due to automobiling. Property damage was unusually high, and ran into many thousands of dol

# WHEAT PRODUCTION SHOULD BE CUT

### So Says Chairman Legge of the U. S. Farm Board.

Chairman Alexander Legge, of the Farm Board, is telling wheat growers that the low prices of wheat are partly due to general depression, but that a reduction in wheat acreage is necessary in order to reduce the supply.

He dicounted the proposed equalization and the debenture plan as solutions of the present troubles confronting agriculture.

"The fundamental trouble with all such plans," he said, "is that appar-

ently they will not work." "It is our conclusion that a reduction is essential if you are going to obtain a reasonable price for that which you produce, and the program which I wish to recommend is a gradual slowing down with the object of eventually balancing domestic production with domestic consumption. If and when this is done, the tariff of 42 cents a bushel will become fully effective."

Chairman Legge said that it was his notion that a part of the wheat land which he proposes should be re-leased from cultivation could be devoted to other crops without over-

of the country indicate that there are still a considerable number of persons who are laboring under the delusion that through some mysterious process, the surpluses of agricultural commodities, no matter how large, can be disposed of abroad without interfering with that portion of the commodity that is consumed in the domestic market. All information we have on the subject tends to discredit the possibility of any such solution along

On wheat, practically every import- 1930; ing country in the world, except one, has passed legislation restricting importations, and in some instances absolutely barring the importation of wheat at any price level lower than the price that commodity is bringing in the country from which it is exported. In other words, they have gone so far as to say formally that action of this kind is "dumping" and pretty nearly every country in the world has regulations prohibiting this

### STATE BLAMED FOR FALL OF BRIDGE.

Refreshing, juicy, fine-flavored watermelons have been found to have still another virtue. They are a good source of two important vitamins, A and C, and contain detectable amounts of two others, B and G. was declared by a Coroner's jury, on Monday, to have been due to proper precautions not having been taken by the State authorities to prevent the overloading of the bridge.

hearing the report of the engineers employed to examine into the matter Their report was to the effect that twelve men were working on the bridge when it went down, that about 7.9 tons of truck and equipment were Balance on hand July 1, 1930 .. on the bridge; that when a large truck with a gross weight of 12.2 tons of stone entered the bridge, it and went down; the truck and its load was 74 percent heavier than permitted by warning signs on the bridge.

# THE ORPHANS' COURT.

Monday, July 7th., 1930.—Anna S. Spoerline, administratrix of May L. Snader, deceased, returned inventory and settled her first and final account and received order to transfer stock. William Elmer Wisner, received or-

der to draw funds. Edward M. Krideler, executor of Mary M. Krideler, deceased, received order to sell real estate.

James M. Hann, acting executor of Edward H. Krideler, deceased, receiv-ed order to sell real estate. bert S. Sudborough, infants, settled

her first account. The last will and testament of Sarah Ann Study, deceased, was admitted to probate.

Letters of administration on the estate of Ary P. Wampler, deceased, were granted unto Atlee W. Wampler, who received warrant to appraise personal property and order to notify creditors.

# TO TEACH AT NEW WINDSOR.

W. Granville Eaton, of Centreville, Queen Annes County, has been appointed teacher of history at New Windsor High School. He will enter upon his duties in September. Mr. Eaton was graduated from Western Maryland College in June with high honors, having received several valuable awards.

### GREATER NEW YORK'S POPULA-TION 6,958,792.

The complete census of greater New York City shows a population of 6,958,792, an increase of 1,338,744, or nearly 24 percent since 1920. The city is made up of five boroughs, the largest being Brooklyn, Bronx and Queens; the largest of which is Brooklyn, lyn with a population of 2,596,154.

There is no medicine for the troubles of life, that equals work.

Is America proud that you are her

# SENATE WANTS PAPERS

A Modified Demand Sent to the President.

The Special Session of the Senate. called by President Hoover, assembled on Monday, mainly for the purpose of taking action on the London Treaty, A quorum was present, which represented a defeat for the opponents of the treaty, as they figured on further delay in taking action. They played as their first card, a demand for cer-tain "secret" documents that have been withheld from the Foreign Relations Committee, the same having been withheld on instructions from President Hoover and Secretary of

State Stimson. Debate on the demand, became somewhat general, but even some who favor the treaty, also favor compli-ance with the demand for the "se-crets," as the Senator's right, but that anything of the sort be kept a

secret by the Senate.

A peculiarity of the situation is that the strongest supporters of the treaty—that is regarded as representing an administration policy—are Senators Robinson and Swanson, Democrats, who have taken the lead in its defense. Both were against giving publicity to the documents demanded, unless their contents be kept within the Senate, and not given out

to the press. After debating the question two days, the demand for the "secrets" was qualified by the amendment "if not incompatible with the public interest." It is held that in case the President does not now comply oppositely President does not now comply, opposition to the treaty will be strengthened, and may be postponed for the present. It is thought that the President will comply, with the understanding that what is turned over be held confidential.

### MRS. ETHEL LOY, Treasurer. STUDENT DRINKING AT COL-LEGES.

The W. C. T. U. wrote to the leading College Presidents, asking them their opinion of the recent charges that drinking conditions are bad at colleges, and received overwhelming assurance that student so-deritey is the rule, and that college

conditions are thoroughly safe.

At the time this statement is made (June 1, 1930) 246 College Presidents have replied. Of these, 140 say there is less drinking than before prohibition; 44 say there is no drinking at their colleges; 46 say that there is not now, and never was, any but the most casual drinking among their students, and that it is out Winifred S. Sudborough, guardian line with their college custom and tra-of Francis W. Sudborough, and Her-dition; 6 say there is not much change as to drinking since prohibition; say conditions are bad, and only 3 say that there is more drinking than there was before prohibition.

Almost every State University President declares there is less drinking than ever; and the great mass of testimony from the colleges with strong moral and church background, is reassuring to the most exacting parents. From the few colleges which admit there is student drinking, the presidents who replied to the W. C. T. U. questionnaire indicate that there is less drinking than there was prior to

prohibition.

Blame for student drinking is placed squarely on the shoulders of par-ents and the older generation, by sev-eral of the best known College Presidents. Out of 246 letters from College Presidents, not more than three indicate that students drink because of prohibition."—Mrs. F. B. N., Carroll County W. C. T. U. Press Director.

# POPE RIDES IN COSTLY CAR.

The Automobile Club of Milan, Italy, recently presented the Pope with a new automobile valued at \$50,000. It has a throne, gilded, and usuable when the Pontiff motors alone, and it can be removed and re-placed by tow other highly decorative and comfortable seats when he has a companion. The car is decorated in gold, silver and ivory. Fittings include tapestry in the Venetian style.

Are you the man, or woman, that your mother thought you'd be?

### WHEAT GROWERS WARNED OF OUTLOOK.

Apparently, wheat farming is one of the industries not likely to be profitable in the future. This is the opinion of Arthur H. Hyde and Alexander H. Legge, chairman of the Fed eral Farm Board. The reason for this is, more wheat is being grown than the world consumes, and this means for growers in the United

States, no foreign demand. Government agencies are therefore urging that less wheat be grownonly enough to supply the demand in this country. Actually, this is the greatest real problem that this country has to face, as in one way or another it affects more people than any other. Not only the wheat farmer stands to lose, but many implement concerns, fertilizer manufacturers, and all who depend on wheat as a

profitable farm crop.

If the wheat production needs to be limited to home production, naturally those farmers who can produce wheat most economically will fare the best. The fact, as it seems to be for the future, has immense bearing on the whole country, as it means lower property values, and a lower basis on which to collect taxes. It must inevitably mean less taxes collected, and a reduction in public expenditures. Just what it may eventually mean, all along the line, is at present too dimly outlined to attempt estimating.

If the solution rests in growing less wheat, how is this to be brought about? If less land is used for wheat for what other purpose will it be too many candidates with big "barused? Will the west fare better than rels" who want public office, and both the east, and how can any farming money and methods used have unsection afford to produce a smaller questionably been of "the end justiincome? What will become of farm fies the means" character. There is investments, on the part of those who little wonder, therefore, that an edido not operate farms? But, all of torial, like the following, should apthis is the worst view of the outlook. pear in the Philadelphia Ledger; There may be compensations not now thought of. Little good will come from anticipating trouble.

# GIVE LITTLE-GET MUCH.

ing so noticeable, that it is almost the rule for those who give the least, to expect the most in return. Anybody who is in a position to know and observe the facts, knows this to be true: and we do not refer to those who have so little to give, that it means so much to them.

It may not be a matter of money, at all. In fact, it is giving and expecting, service, that emphasizes the truth. In a wider sense, it is perhaps true that most folks receive more of good than they give, and may never think of the fact. They are more or less influenced by the desire to reap where they did not sow-of getting something for as near nothing, as possible.

The desire for attention is widespread; though not by any means the rule. There are everywhere, the modest ones. Those filled with humility, or at least timidity, who avoid display, and who would always prefer to be givers than receivers. And, SOCIAL WELFARE INFORMATION there is the large percentage that look for, and expect, only fairnessthat which they by right are entitled to-and this means that they give done in the counties, by both public fairly, and are in return fair in their expectations.

But, every community has what may be turned its "free lunch" class; its "free show" attendants; its hunters for "free samples" and its "free advertising" solicitors; those who seem to have as a chief object in life to give as little as they can, but yet dents, and collect data concerning all danger the lives of others it is time as much as they can, of whatever of phases of State and County welfare to call a halt.—The Manufacturer. value is to be had. And, by their works, they are known.

### WANTED! A MODERN ENCYCLO-PEDIA OF QUOTATIONS.

Hardly any private library—especially of one who writes, or speaks in out a book or two of prose and poetry | children and adults, and the passage quotations. Pick up any of these with quotations from Shakespeare, similar measures. Longfellow, Edmund Burke, Bulwer

perhaps on down to Washington, Jefferson and Webster.

It is not our present day inspirations.

that even encyclopedias, and dictionwe know.

whether we answer these questions, or want to look back for authority and wisdom, and may not find it recorded and classified for our easy access.

While it may be true that there is may want to fill in the big gap bethought, and this is what we are wondering about. Is it being collected, edited and condensed?

The most of us do not have complete files of the Congressional Record, which is now the biggest compendium of about everything wise and otherwise under the Sun, past, pres ent and future, and even if we had this wealth of knowledge it would need expurgation and considerable judicious editing, before it could be accepted as standard authority. In the interest of future scholarly attainments, as well as showing the best thought of the period, we trust that some qualified authority is undertaking the big task of preserving the best wisdom, thought and poetry, of the past half-century.

### PRIMARY VS. CONVENTION.

Perhaps Pennsylvania is not a very popular guide as to best ways of making nominations, and conducting elections: but that state has certainly had wide experience in both. The main trouble with Pennsylvania is, it has

'Among the bills for amending the election law that are likely to appear at the next session of the Pennsylvania Legislature may be one looking to a return to the convention system for nominating candidates for State offices. This idea, which has been in It would not be considered as of the back of the politicians' mind for much consequence, except for its becontroversies over the recent primary, and especially by the enormous sums of money involved in primasy elec-

> It is said that little impsovement has been effected by the direct primary in the methods by which candidates are slated by the bosses and nominated. Of course, the primary affords an opportunity to smash an unpopular slate, and thus to overturn the selections made by party leaders. But the same may be said of the convention system when the chosen delegates can be defeated at the polls. Candidates are set up in the same old way by the party machine, whether the actual nominations are made directly by the voters or by delegates tion system; and while money was for cautious approach. used to buy delegates, it may also be used under the primary plan to buy nominations. If it is only a question of success to the aspirant with the longest purse, it might be as well to weigh the advantage of both methods and decide whether another change

In an effort to gather information concerning social welfare work being and private agencies, the Social Welfare Survey Commission of Maryland is sending into various counties of the State, Miss Anita Faatz, who is research assistant to Dr. Walter Wheeler Cook, of the Law Institute of Johns Hopkins University. She will interview various county officials and resiwork for the use of the Commission.

During the administration of Gov. Ritchie the State has become interested in the social problem and needs of its disadvantaged citizens, through the establishment of various institutions and the giving of appropriations to semi-public institutions for the care of laws establishing mother's pensions

### WEDDING GIFTS.

The Frederick News, in a recent issue, commented very genially on the above topic, not even hinting that there is a "grouch" side to it, which is no doubt true in most cases; but there are probably other cases in which the expense of sending out wedding invitations is regarded in the light of an investment. The News says;

"However grouchy people may be about their expenses, the money for wedding presents always seems to come. The news that this or that couple is about to marry, has a most marvelous effect to loosen up the purse strings. It is a general instinct that leads people to make these of-ferings, from which in most cases they expect no return. It signifies how much friendship and ties of

kindred mean to people.
Young people who receive so many tangible expressions of affection, can feel that the community trusts them to make a fine home. A matrimonial explosion a year or two after such an outpouring of good will, is an inglorious anti-climax. But usually the young folks who receive all these tokens can be depended upon to create a suitable setting for such expressions of friendship.

### SOLVING THE GRADE CROSSING PROBLEM.

In spite of the fact that we have been spending more than \$60,000,000 a year to eliminate railroad grade crossings, they are increasing in number due to new road construction, according to reports presented to the National Conference on Street and Highway Safety.

It is stated that the cost of grade separation is too great for the problem to be solved by this method and it is suggested that uniform warning signs, protective signal devices and education of users of the highway provide most practicable remedies.

At every grade crossing is some sort of sign or warning on the railroad right-of-way. It should be a simple matter for states and the railroads to agree on an outstanding type of sign or signal device which would be noticed by even the most negligent of at a convention. The primary has brought about evils quite as serious as those which attended the conventure of the crossing to give adequate time

The desire to beat the railroad train to the crossing is responsible for the loss of thousands of lives. Plain ordinary carelessness and incompetence are responsible for thousands more. The most telling commentary of all is found in the fact that a large part of grade crossing accidents result, not when trains strike motor cars, but when motor

cars strike trains! Recently, in a southern state, the engineer of a locomotive saw a car stalled on the track ahead of him with its occupants frantically trying to start it. He jammed on the brakes and the locomotive jumped the track. The engineer was killed. Careless motorists may have a right to risk their own lives, but when they en-

Such nonsense will have no effect upon public sentiment in regard to the treaty unless to make it umanimous that Hiram Johnson and his the testimony of the admirals indicated. To delay ratification because of this sort of thing would merely indicate that the Senate had allowed its curiosity as to human ingenuity and invention to overcome its serious

### "Crackers" First Baked

by Massachusetts Man

As far as any authentic record shows, the first cracker bakery in the United States was that of Theodore Pearson at Newburyport, Mass. He began business in 1792 and his specialty was a large cracker which was known both as a "pilot" and as ship's bread. Joshua Brent was Pearson's first great business rival. He erected an oven for cracker baking at Milton, Mass., in 1801. He was succeeded by many other cracker manufacturers. The crackers were first made by hand. During the years between 1840 and 1865 the mechanical process employed in making crackers underwent a remarkable development. Prior to 1840 the use of machinery in the crackermaking process was practically unknown. Even then the dough was still worked up and put into the oven one piece at a time. Machinery was finally invented which took the dough after it had been prepared by hand and rolled it into a thin sheet which, as it passed over a sort of endless belt, was cut by a stamping machine which works automatically.

# Dead Sea Remarkable

for Its Lack of Outlet The Dead sea is, in itself, an interesting phenomenon. It is about 1,300 feet below the level of the not far off Mediterranean, and it receives its water chiefly from one source, the River

There are no especially saline features in the basin itself and but few in the waters which enter into it, but there is no egress whatever. Water leaves the Dead sea by evaporation only, and through countless millenniums such salt as there was has remained in the "sea," until now it is indescribably salty and bitter. The dryness of the atmosphere alone prevents the sea from overflowing.

I reminded myself of Doctor Johnson's remark to his biographer, in reply to his question, "Do you not think the Giant's causeway worth seeing?" "I do, sir, but not worth going to That is exactly my opinion of the Dead sea.-A. Edward Newton in the Atlantic Monthly.

# Canal Would Be Costly

The cost of the proposed Nicaraguan canal would be several times the cost of the Panama canal. The Nicaraguan canal would be about 183 miles in length, 70 miles of which will be in Lake Nicaragua, 50 miles along the San Juan river, and the remainder through the mountain section. The region of Lake Gatun in the Panama canal is 85 feet above mean sea level. The level of Lake Nicaragua is 105 feet. The great elevation of Lake Nicaragua is one of the main features of the added cost of the Nicaraguan

# Psychology in Matrimony

David Seabury, famous consulting psychologist, says psychology can well be applied to the field of marriage. He names seven kinds of love: mate love, based on natural compatibility: romantic love, the kind that is in love with love; sex love; home love; intellectual love; propinquity love, in which two persons have the same background, and self-love. The first kind, says Seabury, is the only kind to build marriage on.-Capper's

# Through a Woman's Eyes

by Jean Newton

# SEE THE SPOTS

IT WAS at a Florida resort. The girl was looking, appraisingly into

"Just look at my complexion," she said to a thoughtful and charming woman; "see the freckles!"

"No," said her friend, "I never see spots!" And I thought as I overheard that -what a gift not to see the spots!

From the freckles that temporarily mar a lovely skin, through all the relatively more or less important blemishes—what a gift not to see the

Like the lovely skin which in strong sunlight reveals freckles, there are few things in life that are without spots. Sometimes these are on the surface, sometimes, as with freckles, it takes a strong, penetrating, revealing agent like the sun to bring them

Few complexions are so impervious to exposure that they will remain always unspotted. And so few natures are so transparent, so perfect that a rigorously trying and revealing light will not show up some flaw, some spots. Few natures, few people, few things in life.

And yet, the spots do not necessarily mar these natures and people and things. To those who exaggerate their importance, who concentrate on the spots, they do, of course. Then these people go through life seeing only the blemishes.

What a gift not to see the spots. (@ by the Bell Syndicate, Inc.)

Strand of Hemp

A South American woman living in Paris sued a furniture mover for \$4,000 alleging that while transferring her household goods he lost a bit of a hangman's noose which she esteems as a bringer of good luck. The superstition is ancient. When Haman was hanged on the gallows he built for WHAT A GIFT-NOT TO Mordecai it is likely that there was rivalry among Ahasuerus' people for a strand of the rope Queen Esther diverted from its original purpose. Gilderov was hanged on a gallows tree so high that his kite was immortalized in a saying which endures to this day. and the hemp must have been in demand .- New York Sun.

# Each in His Own Place

Let us be not soloists, dominating the whole place, but each one a member of an orchestra, content to bring all that we have and contribute it in music, while we ourselves for the moment keep our personality in shadow and subjection, that there may come to this world a greater harmony, a greater symmetry, a more perfect adjustment of conflicting loyalties, so that we may reach the highest ambition of all, which is, that we may have a name at which men and women, when they hear it, will smile gladly and be proud to claim it as the name of the Friend.-Rosslyn Mitchell.

# Always Merry and Bright

A certain club had replaced its familiar black-coated servitors with young, and sometimes pretty, waitresses. One of the old die-hard members who had strongly opposed the idea dropped in to lunch one day.

"How's the duck today?" he growled, glowering at the girl who came to serve him.

"Oh, I'm all right," said the waitress, perkily. "How are you, sir?"-Brooklyn Eagle.

FRESH AIR CURES CHICKEN'S COLDS

Ventilation and Dry Litter Will Prevent Troubles.

Chickens are unlucky in the structure of their heads, for it makes them susceptible to colds. Poultrymen should try to avoid conditions that will bring on colds, says Dr. E. L. Brunett, of the New York State College of Veterinary Medicine at Cornell university.

In the head, in front of the brain cavity, are thin cones of bones located in chambers. The use of these chambers is to provide a space in which the inhaled air is warmed before it is taken into the lungs. When a chicken develops a simple cold, an excessive amount of secretion forms in these cavities. As this increases. the poor drainage of the cavities allows it to accumulate. This accumulation is an ideal place for bacteria to multiply and the resulting bacterial growth makes the foul odor which is often present with roup.

A simple cold may be avoided or corrected by increasing the warmth with plenty of fresh air and providing plenty of dry litter. If the first stage is not checked the cold may end in roup with its characteristic head swelling and foul odors.

The opinion that roup is a contagious disease is not well founded, according to Doctor Brunett, for there is usually some underlying condition that is indirectly responsible. This may be tuberculosis, or worms, but whatever the cause it should be removed before a cure can be expected.

A third type of cold is more of a distinct disease, commonly known as bronchitis. This condition is acute and the birds die quickly. The cause of the disease is not known. The best treatment is to increase the temperature of the house, either by controlling the ventilation or by using brooder stoves. In the early part of the outbreak it is well to remove all sick birds and put them in heated brooder houses. Most of them will recover when placed in heated houses. Some disinfectants will give relief, but quack remedies should not be used.

### Investigate Cod Liver

hens, says:

Oil for Laying Fowls The summary of experiments in England with cod liver oil for laying

(1) Fowls not confined or in openfronted houses do not require cod liver oil to prevent adult rickets.

(2) Fowls confined behind ordinary glass require some adequate source of vitamine D.

(3) The cod liver oil mixed to the extent of 2 per cent of the grain feed supplied the vitamine D requirements of the fowls under experiment.

(4) One per cent of medical cod liver oil in the scratch feed may not be sufficient to meet the requirements of layers confined behind window glass. The source of oil used may be a factor.

(5) It is not possible to state if cod liver oil is beneficial to fowls not confined or in open-fronted pens getting a normal ration that includes green food.

# Healthy Chick Program

Brings Higher Returns Health sticks to clean chicks! By following four simple points in brooding poultrymen can save 90 per cent of their chicks. Not only more chicks will be saved but they will be more profitable birds to keep as layers and breeders. Grow them clean, and health and vigor will go with them through

The four points in the Kansas "healthy chick" program calls for clean houses, clean ground, and clean

feed. By following these four simple rules egg production has been increased 30 eggs per bird in farm flocks. This increase at 25 cents per dozen means an additional return of 60 cents per

# Move Brooder Houses

Brooder houses are commonly made movable in order to change their location and keep the chicks on clean

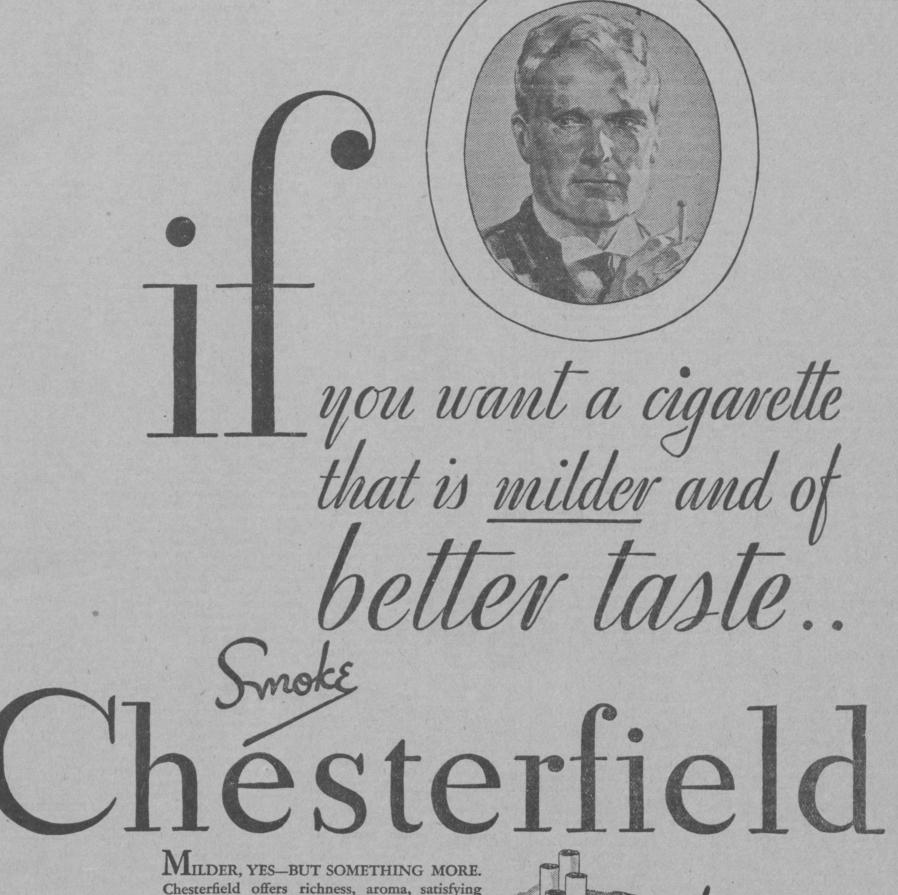

But much of the convenience of a brooder house is lost when it is moved to a point distant from other farm buildings.

The problem of finding clean ground and keeping it free from disease germs is a difficult one under average farm conditions, but it is a sure road to

# Prevent Cannibalism

success.

Cannibalism may develop in a large bunch of chicks, no matter how completely fed or how free from parasites. The liberal use of tar is about as effective as anything in checking it. Watch many times a day for those that have been picked enough to draw blood and daub the tar on the wounds. If you can find something that the chicks dis like the taste of more than tar, use it. If that fails try paring off the point of the upper mandible, using care not to get too deep.

Chesterfield offers richness, aroma, satisfying

BETTER TASTE—that's the answer; and that's what smokers get in Chesterfield in fullest measure—the flavor and aroma of mellow tobaccos, exactly blended and cross-blended. Better taste, and milder too!

# Reduce your building costs by building with SUPERIOR BUILDING BLOCKS.

1st.—Because of their Beauty.

2nd—Because they are Water-proof and Damp-proof.

3rd.—Because of the great saving in cost of building material.

4th.—Because it forever, eliminates painting. 5th.—Because they are Fire-proof.

Fire-proof buildings save the cost of fire-insurance, as well as the horror and dread of fires.

A home built with SUPERIOR BUILDING BLOCKS will be a permanent home without the usual up-keep expense. SUPERIOR CEMENT BLOCKS are made in ever-lasting colors. The natural gray limestone color does not cost any more than ordinary cement blocks, while the Browstone, Buff, Red, Yellow or Green SUPERIOR BUILDING BLOCKS costs but little more and the color is everlasting because it is mixed thoroughly into the material and will never need to be painted.

You can build a beautiful home with SUPERIOR BUILDING BLOCKS at less cost than other building material.

If you are going to build or even thinking of building, call, write or phone and we will help solve your building problems. Buy SUPERIOR BUILDING BLOCKS and save money, whether you want a large number or a small amount. All orders will be given personal attention.

her home, here.
Mrs. H. B. Getty is entertaining a guest from New York.

### MARRIED

BAILEY-LAMBERTON.

A wedding of unusual interest in judiciary circles took place on Saturday, at 4 o'cock, when Miss Isabei Stedman Lamberton, daughter of Mr. and Mrs. B. Paulding Lamberton, became the bride of Mr. Jennings Bailey, Jr., son of Justice Jennings Bailey of the District of Columbia Supreme Court. The wedding was performed at "Antrim," Taneytown, the summer home of the bride's grandmother, Mrs. Harry Morris Clabaugh and the late Chief Justice Clabaugh of

the Supreme Court of the D. C. The Rev. Arthur Pfafko, Rector of Mrs. Laura Matthews spent the the Episcopal church at Blue Ridge Mrs. Elizabeth Bollinger, of Gettysburg, is visiting her daughter, Mrs. Robert Troxell, and sister, Mrs. Philip Stansbury, near Stoney Branch ed for the wedding and the reception which followed.

The bride was given in marriage by her father, and she wore a gown of Egg shell satin, made simply on princess lines with a long train. tulle veil was edged with family rosepoint lace and she carried a small bouquet of lilies of the valley.

Miss Pansy Bloomer, first cousin of the bride, was maid of honor, wearing a gown of yellow organdie with a picture hat and slippers to match, and carrying an arm bouquet of summer flowers. The bridesmaids were Miss Clara Bolling, Miss Mary Henry, Miss Louise Hoehling, Miss Jane Love, Miss Margaret Olmstead, all of Washington, and Miss Ellen Hewson Douglas of Philadelphia. They were Douglas, of Philadelphia. They wore frocks of organdie in shades of pink, orchid and green, respectively, with hats and slippers to correspond with their gowns, and carried bouquets like that of the maid of honor.

Mr. George Bailey was bestman for his brother and the ushers were Mr. Harry C. Lamberton, brother of the bride, Mr. Lionel Summers, Mr. Dallas Pickens, Mr. Henry Mirick, Mr. Philip Peck and Mr. Mark Esch.

Mrs. Lamberton, mother of the bride, wore a gown of white and black chiffon, with large black hat, and had receiving with her, her mother—Mrs. Clabaugh—Miss Elizabeth Bailey and Mrs. Lionel Summers, sisters of the groom, the reception being held in

Later, Mr. Bailey and his bride left for a motor trip, the bride wearing an ensemble of biege and brown embroidered silk with accessories to match. They will be at home upon their return at 2229 Bancroft Place. Among the house guests were: Dr. and Mrs. Addinell Hewson, Dr. and Mrs. William Hewson, and Mrs. Walter Douglas, all of Philadelphia, and Mrs. Amos Musselman, Mrs. Alden Chase, Mrs. Harry Mirick, Mr. and Mrs. Charles March and Mrs. Mrs. Charles Marsh, and Mr. and Mrs. Millard Warner, all of Washington. Other guests were present from Washington, Baltimore, Taneytown

and Gettysburg.

The bride attended the Cathedral School and Holton Arms and made her debut last winter in Washington. Mr. Bailey graduated from Princeton, and in law from George Washington University.

### Little Mary Knew All About Social Workers

Karl de Schweinitz, general secretary of the Family society, tells of a social worker who recently took Sammy and Mary, aged ten and six, respectively, in her car to a hospital clinic for examination.

It was the first automobile ride for both the children-and Sammy could not restrain himself. He had to see everything that passed, including street cars, people and even vacant lots. Kiddie-like, he had to stand up and lean far out the car .window.

The social worker repeatedly told him to sit down-but he was too interested in the passing scenery. Finally, in desperation, she said: "Sammy, if you don't sit down I'll never take you for another ride in my car."

To which Sammy rather impishly replied: "Do all your children mind you perfectly, Miss X---?"

But little Mary knew better than her older brother and she scornfully corrected him. "Don't you know, Sammy, that Miss X- doesn't have any children-she only has an office!" -Philadelphia Record.

### Inventor of Piano

Bartolommeo Cristofori was an Italian harpsichord maker and the inventor of the hammer action used in

the modern pianoforte. No great amount is known of his career. He was born in Padua about 1651, and early served an apprenticeship as an instrument maker. After following that work for some years in Padua he began to be known elsewhere. About 1687 Prince Ferdinand, son of the Grand Duke Cosimo III, persuaded him to remove to Florence.

It was during the Florentine period that he made his first pianos. Descriptions and engravings of the time show that the invention is correctly ascribed to him. A grand pianoforte by Cristofori is said still to be preserved in Florence. He died in that city in 1731.

### Early Saxon Cemetery

The discovery of more than forty skeletons on the "Hog's Back," near Guildford, England, has revealed that there was once a large Saxon settlement there. It was thought, when first the skeletons were unearthed, that they were the remains of malefactors hanged on the gibbet which once stood there. But further excavating resulted in finds of great interest, including a perfectly preserved drinking vessel and a spearhead and ferrule. From these British museum authorities are able to place the date of burial somewhere between 600 and 650 A. D. Among the skeletons are some of very large men, several measuring over six feet.

# DIED.

Obituaries, poetry and resolutions, charged for at the rate of five cents per line. The regular death notices published free.

MRS. ANNA R. FOREMAN. Mrs. Anna Rebecca Foreman, widow of the late Joseph Foreman, died on Friday, July 4th., at 7:45 A her home in Taneytown. Death was due to complications after having been in declining health for some time. She was aged 62 years, 10 months. She was a daughter of the late Jacob and Catharine Bankard. Surviving are six children as follows: Mrs. Abbie Warren, Stevenson, Md.; Howard Foreman, near Taneytown; Mrs. Hilda Bush, Baltimore; Earl Foreman, Frederick; Ralph Foreman, York; Guy Foreman, Baltimore; also a brother, Charles Bankard, Wake-

field; twenty-one grand-chidren and two great-grand-chidren. The funeral was held on Sunday afternoon afternoon from C. O. Fuss & Son funeral parlor, with further services in Grace Reformed church, the Rev. Guy P. Bready, officiating. In-terment in Reformed cemetery.

MR. JACOB M. WEAVER. Following an illness of several months, Jacob M. Weaver died at his home in Hunterstown, Pa., Sunday, July 6th., 1930. He was a son of the late Phillip and Nancy Weaver, was a native and life long resident of Adams Co., Pa. He was a man of outstanding Christian character, honored and respected by all who knew

In 1881 he married Hannah Mary Galt, of near Taneytown, who pre-ceeded him in death February 1928. He is survived by four sons and one daughter; Robert B., York, Pa.; S. Galt, Hunterstown, Pa.; William B., Waynesboro, Pa.; Franklin S., at home, and Mrs. Donald Neely, Fairfield, Pa., and by 16 grand-children.

Funeral services were held at his late home by his pastor, Rev. J. M. Davies, at 2 P. M., Tuesday, interment in Cemetery of Great Conewago Presbyterian Church of which congressions. gation he was for many years a Rul-

### GLENDALE 10-T. H. S. 7.

The Taneytown High School "Professionals" and the Glendale "Giants" played a game of ball on the High School ground, last Saturday afternoon, that resulted in a victory for S. T. D., Manchester, Md. the "Giants." The game was rather one-sided until the 8th. and 9th. innings, when both sides livened up the game, but the "Professionals" start- It is engaged in voluntarily, not beed too late with their rally. Guy Myers pitched for the "Giants" and John Bricker for the T. H. S. boys. The score by innings, was as follows: Glendale 2-1-2-0-0-0-0-2-2=10 T. H. S. 0-1-0-0-0-1-1-4=7

Hits Glendale 6; T. H. S., 7; Struck out by Myers 14; by Bricker 9; base on balls—off Myers 3, off Bricker 6; left on base Glendale 9; T. H. S., 10

### Trees in United States

The number of tree species varies enormously throughout the world, says Forests and Mankind. Over that great stretch covered by north Russia, Sweden, and Norway, the forests contain only about half a dozen tree species. In the hardwood forests of the East, one can find ten times that many in an afternoon's walk. Tropical forests have thousands of known species and perhaps hundreds more not yet discovered. About eight hundred different tree species grow in the United States.

### Words Changed by Time

A "heathen" originally was a dweller on a heath. The early Christians were mostly persons living in cities or walled towns; and the wild, half-savage dwellers of the moorland heaths were among the last to abandon their old gods.

In England the letter "e" was formerly pronounced like "a," and because the village clergyman was usually the most socially prominent individual in the place he became "the person." We still preserve the old pronunciation and call him the parson.

### Grand Little Idea

"But, dear," said the wife, looking over the plans for their new home "what's the idea of these two bath rooms next to each other?"

"That," he said grimly, "is some thing to make married life easier. One will be fixed up any way you want it, the other is mine, and if ever you stick a guest towel in it, or object to my singing in it while I'm taking a shower-well, you may as well start packing up and go home to mother."-Cin einnati Enquirer.

### CHRISTIAN ENDEAVOR TOPIC.

Topic-"Worthwhile Hobbies." Psalm

Written by-John S. Hollenbach,

A hobby is something followed apart from one's work or occupation. cause of any economic or other neces-

Hobbies are essential to break the humdrum of life and to give an avenue to seek relaxation as well as to | call into action powers and desires not

mployed in regular routine. The kind of hobby to be followed depends upon one's occupation. Those who are engaged in hard physical labor can well spend their leisure time in reading wholesome books and mag-azines, or in the playing of the less strenuous games. Those who are indoors in offices or factories need to have outdoor games or avocations as hobbies in order to get sufficient fresh air and sunshine. Fishing is fine. Those who have hard brain work need hobbies that give the physical a

chance for expression.

I have some things to do which are physical but which are not entered into out of choice but rather out of necessity. So they are not hobbies. I have much grass to mow and have the acre lot which adjoins the parson age in tomatoes for a cannery. And the weeds are abundant. While this work is not a hobby I do get exercise in this way and hope to realize some economic returns for my labors.

Music is a fine hobby. If entered into spontaneously and joyously it brings much personal improvement and satisfaction and is a means of

service and enjoyment to others.

In the selection of a hobby we must display the ability to discern between the wholesome and the vicious. Not all hobbies are worthwhile. Some are harmful. While gain is not the chief objective to be reached in the pursuit of a hobby, yet we must also refrain from the hobbies that would bring bad results for us and for others.

We must, of course, practice moderation in the pursuit of a hobby. Since hobbies are side issues, they must not be allowed to occupy the center of the stage, or to usurp the supreme place in life which can be properly held only by our chosen callings. Be ye temperate in all things. If your hobby begins to claim too much time, attention, and energy, cast

It follows logically that hobbies must be subordinate and secondary to the supreme purpose of our lives.

It may happen, however, that in the pursuit of a hobby one may find his true self or chance upon a great discovery. This is the exception, not the

# New Dishes to Relieve The Monotony of Meals

Aid Society will meet at the home of Mrs. Ira Otto, Saturday afternoon, July 12th.

# Chateau of Knowledge

The speculative mind of man is like a colossal chateau set on a hill. It is surrounded by perpetual darkness. The chauteau has countless windows facing in all directions. There is, at first, but one light, a flickering glimmer, in one small window level with the ground.

Ages pass. Another window slowly lights up. Gradually, as time flows away, a thousand windows in the chateau flame with light. Tower windows begin to glimmer. Finally, the whole chateau is a blaze of light. For behind each window a mind labors in a small dark room shaped like a human skull to create a light of its own. From the tower windows the lights gash the dark for a great way. But the most powerful light from the largest window is merely an inch trying to eat the Infinite.—The Thinker.

# I BUT ON REASON

WHY we ask you to come here for your printing. We believe that we are equipped to give your work the proper attention and that we are able to turn out a satisfactory piece of work. FUT US TO THE TEST Lawyer Specialists

Lawyers nowadays are fast becoming specialists. They have been described as social scientists, but they are not as good as that. However, the average student does not have the intimate ken of Blackstone, Coke, Middleton, Chitty and other authorities that were the boon companions of the scholars of other days. The law of today in its form and interpretation is vastly different from that of two generations ago, despite that it is fundamentally a slave to precedent. But as the general practitioner in medicine has given place to the specialist, so is the transformation in the domain of law.-Los Angeles Times.

Famous Old Roman Road

The Appian way is the oldest and most celebrated of all Roman roads. was begun by Appius Claudius Caecus while he was censor in 313 B. C. It has an admirable substructure or foundation from which all loose soil has been carefully removed. Above this are various strata cemented with lime, and lastly comes the pavement, consisting of large hexagonal blocks of stone composed principally of basaltic lava and joined together with such precision as to appear one smooth mass. This road surpasses modern roads in durability and is still in use.

Velocity of Falling Body

Theoretically, a body that is falling increases its velocity 32 feet per second every second, if the action of gravity is wholly unresisted. Recent experiments made by the United States Army Air corps, however, have shown that an object the size and weight of a human body never attains a greater velocity than 118 miles an hour, in falling from any altitude. This velocity is attained after falling 1,200 feet in quiet air and about eleven seconds after commencing to fall,

### Not Slang Phrase

Does "galore" sound like slang? Does it radiate Wild West Americanese, cowboy lingo or rustic original-

Maybe so, but if it is so, it's all wrong.

For "galore," meaning "in abundance," has been borrowed practically bodily from the Irish "go loor," in which language it has a sense identical with that which it enjoys in Eng-

lish.—Kansas City Star.

Bones of Animals Long

Extinct Found in Hawaii Bones of an extinct ground sloth, the first ever found on the island of La Gonave, off the coast of Haiti, may cast further light on the animal life that flourished in the region before Columbus discovered America.

The remains were secured by Arthur J. Poole and W. M. Perrygo of the Smithsonian institution.

La Gonave, probably the most primitive part of Haiti, was combed for two weeks for homes of creatures which have disappeared from the earth. The sloth, no larger than a small pig, had been found on other islands of the region, but not before on this old portion.

Other findings, some in new fields and others in continuance of similar work in past seasons, included more than a dozen different types of animals ranging in size from a field mouse to a beaver.

The bones were found preserved in more than 15 dry caves. While there is no scientific proof, it is believed that the animals were brought to the rock-bound cells by giant owls and by Indians who were driven from existence with the coming of the white

Ground Squirrel Economy Rodent-control experts in the biological survey of the United States Department of Agriculture often save considerable money for farmers or ranchmen who have rodent pests on their lands. Not long ago a rancher in California had planned to use a fumigant on 4,500 acres in an effort to rid the land of ground squirrels, at an estimated cost of \$4,500. On the advice of a biological survey worker, who found that on this particular ranch fumigation would be expensive and unsatisfactory, the rodents were controlled by a specially prepared poison mixture of steam-rolled oats, at

Piercing Sound Waves

a cost of only \$200.

Sound waves of a frequency of 200,-000 to 500,000 vibrations a second passed along a tapering glass rod caused the tip to bore a hole in a piece of wood and a plate of glass, a French experimenter discovered recently. When the waves were communicated to a glass thread about one one-hundredth of an inch thick and more than a yard long, the frictional effect was so intense that the flesh could be burned .- Popular Mechanics Magaine.

# The Potomac Edison System TANEYTOWN, MARYLAND.

EGGY CONNOR tapped her even white teeth with the stubby pencil and scowled at the sheet of figures. If she saved rigorously she might be able to do it. But it would be penny deals, with sometimes a dime or a quarter. Tim's salary did not admit of any more expense. And he must be fed properly. The way he worked he was entitled to good food

Peggy was not yet the wonderful manager she meant to be some time, but she was learning-learning hardslow but sure. Leftovers and stale bread bothered her. And now came this business of the layette.

Thirty-five dollars would buy a beautiful layette. Of course, the more you paid the lovelier were the articles. She had set her heart on the \$35 one. To that end she pondered and saved and sighed.

Before the \$35 was gathered in the little tin bank Tim Jr. arrived. When he was three weeks old, a pink, puckered, squirming little bundle of hope and promise, Peggy said to her husband:

"Tim, darling, I've got the money for Junior's layette at last! Cousin Alice sent me \$10 and Aunt Maria sent me \$5. That just makes it. But I can't go downtown and buy the things myself. You will have to do it, Timmy dear."

Tim scratched his russet-colored head. He looked down at his son, clad immaculately, but rather shabbily, in some things Cousin Alice had hastily assembled and sent. Yes, he'd do anything for Junior. And more than anything for Junior's mother. He stooped and kissed Peggy's cheek and looked love into her wide, brown eyes. Before the day was over he would certainly find time to buy the articles she wanted. Peggy said he could trust Miss Gordon to advise him. Miss Gordon was the saleswoman in charge of the department store Reggy designated.

Left alone, Peggy was wonderfully happy. She did the housework. She planned dinner for Tim. Then Junior -he had to be bathed and talcumed and dressed and kissed and admired and wondered at. All the time she was thinking of what Tim was going to bring home that night. The layette! She could picture it-the darling tiny things. It was just as well that Junior had had to wait for his first outfit, because she hadn't learned yet to sew so awfully well.

Tim usually bounded up the stairs, although he must be tired after all the work he had done. Tonight he was late and he did not bound. He entered a bit reluctantly. Under his arm was a package.

"Where's the box?" demanded Peggy. "The-box?"

"Yes! The layette. It comes in a

box. Tim! What have you there?" Tim put the large parcel down upon the table. He looked miserable. His hands fumbled as he removed the wrapping. Out came a vase. An ugly vase, it seemed to Peggy. She stared

at it unbelievingly.

"You'll hate me," Tim said. "But I just felt I had to do it, Peg. I-well, it was put up to me, sort of. Rufus Page is selling out and quitting here. He is going back home. He did me a good turn once that time I had typhoid. You remember I told you about it. Well, he's in hard luck. His wife's got to have an operation. I went in their apartment and looked around." It was full of queer things. All I saw I'd bring home with me was this vase-"

"How much did you pay for it?" Peggy was tight lipped.

"Thirty-five dollars," he said. Peggy went into the kitchen. She leaned against a cupboard door, her hand to her throat. Junior's lavette! A wild impulse came to her to break the vase. After a few dreadful moments she calmed down.

"Dinner's ready," she called life-

lessly. She did not look at the vase or speak of it again. It stood there, a wretched reminder of Tim's thoughtless folly. Yes, it was that-thoughtless folly. Rufus Page-she knew all about him, working a little, painting a few pictures, marrying a girl with ex-

pensive tastes. Days passed. The vase sat there. Peggy dusted round it. She would not lay a finger to it. She hated it. But she was determined that Tim should have it to look at until never again would he make that kind of error. Meanwhile, Junior was fairly bursting

out of his charity clothes. She plunged. She got materials and tried to make him a little frock. But it was not as pretty as she could have bought. She wept over the result.

One morning Tim wrapped up the vase and sneaked off with it under his arm. Peggy pretended not to see That night he bounded up the stairs.

He burst in, radiant. Under his arm was a box. He thrust the box into Peggy's arms.

"There's that thing you wantedthat layette. It cost fifty dollars. Look at it! See if you like it!"

Peggy, white with surprise and joy, opened the box, examined the contents. A fifty-dollar layette! Everything handmade, pink ribbons, rose-buds, stitchery. Joy brought color to her face, even brought tears to her eyes.

"Oh, Tim! It is perfect. But how did you do it, Tim? Tell me!"

"Rufus said that vase was a wedding present to his wife. I thought thirty-five dollars was steep, but the boy was strapped; he had to have cash. Well, I took that vase downtown with me this morning. I made up my mind I would get rid of it for something, I was so darned sick of seeing it standing around. I went into Windsor's. It was a real somethingor-other. They gave me seventy-five dollars for it. I got the layette. And there's twenty-five dollars for you to

do what you please with." Peggy was laughing, yet at the same time wiping her eyes. With practicality she counted the precious bills Tim gave her. Twenty-five dollars.

"This is going to start Junior's education fund," she said proudly. "Hehe's going to have a great big chance in life. For I-I want him to be as great a man as his father!"

### Grasshopper Mice Prey on Injurious Insects

Grasshopper mice, unlike most of our native rodents, are "good little mice," as the bedtime story-teller would say. When first discovered in 1833 in North Dakota they were dubbed "grasshopper" mice because of their fondness for such insects.

Since then, however, much more has been learned of the characteristics and food habits of these little animals. The biological survey of the United States Department of Agriculture says that they not only feed on grasshoppers, but over their wide range in the West they are a check on numerous injurious insects and help to keep a wholesome balance among many groups of small-animal life, such as kangaroo rats, pocket mice, meadow mice, cotton rats, ground squirrels,

and pocket gophers. In general appearance grasshopper mice resemble the white-footed mice, but are shorter and of heavier build. They have short, tapering tails and an almost weasel-like expression. Their voices might be likened to the barking of a tiny terrier or to the howling of a miniature wolf, depending on their mood.

As pets for children or as playthings they have not proved a success, but they will rid kitchens, basements, cellars, or greenhouses of cockroaches and other insect pests. When so used they are easily handled and controlled merely by placing their open cages in the room and allowing the mice to run at large at night. They will almost invariably return to their cages by

Generally the grasshopper mice are regarded as rather scarce, partly because of the fact that they are hunters and wanderers, are not colonial, and do not follow definite runways. Then, too, they are nocturnal in their feeding habits. In favorable localities, however, considerable numbers have been found, indicating that they are more numerous than they sometimes appear to be.

# The Supreme Test

A member of the advertising force was homeward bound, after a hard day on the links. He lived in one of those row houses so identical with each other that once you lose count you must return to the corner and start over again. He had lost count. But it was late and he took a chance. He entered the front door. Now for the supreme test. Placing a heavy handkerchief in double fold across his eyes he stood in the center of the living room and coughed. A step was heard on the stairs. Then-ping! Lights danced before the advertising man's eyes. He smiled happily. He had guessed right. It was his own home !- Pathfinder Magazine.

# Discretionary

His van had been badly smashed. The insurance representative called and said: "We are sending you a good second-hand van tomorrow in exchange, as the old one is not worth repairing."

The owner replied that he was not wanting the other van just now; he had not recovered from the shock and would rather have the money.

"Oh, no," said the insurance man. "If you read the policy very carefully you will find that we can supply you with a van as good as you lost, or pay the money at our discretion."
"Well, then," said the owner, "if

that is the case, cancel the policy on my wife."-London Answers.

# Many Harmless Sharks

There are 250 recognized species of shark, says Van Campen Heilner in Field and Stream. The largest of these, the basking shark and the whale shark, which reach a length of from 30 to 50 feet, are sluggish creatures, harmless as kittens. The big sleeper sharks of the Arctic seas are so heavy and stupid they frequently are stranded on mud flats by the outgoing tides, and have not enough energy to get out of the way of a person who attempts to kill them in the water.

Tribute to the Fox The fox is a being one cannot help loving. For he is, like man's servant and friend the dog, highly intelligent, and is to the good honest dog like the picturesque and predatory gypsy to the respectable member of the community. He is a rascal, if you like, but a handsome red rascal, with a sharp, clever face and a bushy tail, and good to meet in any green place, -From "The Book of a Naturalist," by W. H. Hudson.

# Through a Woman's Eyes

by Jean Newton

### WHAT MEN THINK THEY LIKE

"WHY do men keep talking about the much lamented 'old-fashioned girl' and then pass up any girl who even remotely answers their description in favor of the most flapping of modern flappers?" one of our readers wants to know.

Can you tell why in discussing the theater we are all Shavians and enthusiastic fans for what is intellectually artistic and fine in drama-and yet dramatic works which have nothing but their high quality to recommend them must either be endowed or relegated to the high school auditorium while the "popular," by which we mean melodramatic or spectacular or sexy plays sell out at a premium? It is true that public taste is improving year by year, but the point holds.

Can you tell me why a man tells you that the plainer you are the better he likes you, whereas any new dress, a bit of finery, or feminine adornment are met with a pleased response from him that is absolutely evident?

Can you tell me why a man insists that he loathes flattery when you know he reacts like a child to words of praise, and purrs without suspicion to the most shameless flattery?

Can you tell me, too, why men forbid their wives to use makeup, insist, indeed, that they look far better without any aids to nature, while the same wives know that such an appearance at the breakfast table is met with a stare of pained surprise?

You see the things people say (and sometimes think) they like, are not always the same as those they evidently do like. And the same holds good of men in their relations with

People try to model their taste after what they understand to be good taste. They try to like, sometimes think they like, what they think they should like.

Now as for the old-fashioned girl, she has come to be regarded as the epitome of artlessness and guilelessness, the ideal of feminine sweetness and purity, the personification of all that is fine and upright and noble and good in woman.

Men feel that should be their taste in women. So they lament the oldfashioned girl and speak in terms of disparagement of the frivolousness and extravagance of the sophisticated modern girl. Yet put a demure. "Plain Jane" with no interest in modern dance and no power of repartee in a ballroom and see how much chance the men will give themselves to investigate her fine mind and no ble character. Indeed, it would take a scintillatingly beautiful "shrinking violet of the old school" to stand a chance against even the plainest modern girl with modern pep and maturity and not always unguileful appeal.

It's easy enough to understand why men are attracted by what attracts them! Perhaps if we could convince them that it need not be incompatible with fundamental goodness and nobility of character they might be willing to admit to what they really do

# (©, 1930, Bell Syndicate.)

The "Indefinite Article"

The professor of English was taking a class of young students, some of whom showed distinct signs of bore dom. He had been carefully explain ing the difference between the subject and the object, in various sentences.

"Now," said he, "take this sentence for an example: 'The lorry ran over John.' Now what would 'John' be?"

The young student in front snig gered quietly: "Er-the indefinite ar ticle!" said he.—Border Cities Star.

# Mother's Cook Book

Give me a spirit that on this life's rough sea Loves t' have his sails fill'd with a lusty wind Even till his sail-yards tremble, his

masts crack And his rapt ship run on her side so low That she drinks water, and her keel plows air. -Chapman.

# VARIOUS GOOD THINGS

CODFISH balls, chowder and croquettes as well as creamed codfish-or served with a drawn butter sauce—are all dishes enjoyed during the cold weather.

Codfish Croquettes.

### Potato Balls, Parsley Sauce.

Cut the balls with a french cutter and cook carefully until tender but not too soft. Pour over the following sauce: Six tablespoonfuls of melted butter, one tablespoonful of lemon juice, two tablespoonfuls of chopped parsley, one teaspoonful of salt and one-fourth teaspoonful of pepper. If onion is liked, shred the green tops and add instead of the parsley, or minced chives add to the appearance as well as the flavor. If a salad is well seasoned it needs a marinade; this will often serve without further dressing. However, a rose or spoonful of thick mayonnaise always adds to its appearance as well as palata-

For the various rich steamed puddings served during the season a hard sauce is usually well liked.

with one and one-half cupfuls of powdered sugar, then add one egg yolk, a teaspoonful of lemon extract, or a little grated rind of lemon, two tablespoonfuls of lemon juice, beat until smooth then add a little green vegetable coloring and fold in the wellbeaten white of the egg. When light and fluffy serve with a candied cherry in the center of each helping.

"All men are born free and equal," says Impecunious Imogene, "but sooner or later they become debtors and

Soak the best part of salt codfish overnight, drain and parboil for ten minutes, then flake. To two cupfuls of the flaked fish allow one cupful of cream, two tablespoonfuls of butter and five of flour. Rub the butter and flour together, add the cream and one cupful of flour. Rub the butter and flour together, add the cream and one cupful of milk. Season with cayenne, and salt if needed, then add the fish. Add a bit of onion juice and mix well. Set on ice to chill. Form into croquettes and roll in egg and crumbs, then fry in deep fat. Serve with an egg sauce or a shrimp sauce, adding a teaspoonful of worcestershire sauce to the shrimps.

# ABOUT THE COLD WAVE

A NOTHER cold wave was due to arrive, and this time it came. It came hurrying in from the west to the east, having a fine chilly trip along

The trees swayed and creaked, the shadows played with the snowdrifts,

Snowflakes Came Along and Waved Their Hands to Their Friends.

and rivers and lakes all smilingly let the ice cover them over.

Snowflakes came along and waved their hands to their friends. Others said:

"What is this!"

# \*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\* Why We Do What We Do

WHY WE WANT TO GO TO **HEAVEN** 

WE BELIEVE in heaven for the hope of getting what is denied us in this life. Hence, no two of us believe in exactly the same kind of a

The human sense of justice and fair play demand a time and a place where all wrongs and inequalities are set right. Heaven is that place.

The ancients, for example, believed that the brave soldiers who died in battle would go to Vahalla, a special kind of heaven with 540 gates out of which the warriors go to fight each morning and return at night to feast with the gods. The Mohammedan believes that if he dies in battle he will go at once to an elaborate harem with forty beautiful angels for wives.

It is supposed that the restriction and self-denials of the moral life need to be offset by some sort of rewards later on in some other form of existence. Belief in heaven serves to steady the purpose of living a good and unselfish life.

Heaven as a place of eternal rest was especially attractive to people years ago because life for them was not altogether a bed of roses. They had to struggle for the bare necessities of life and were always careworn and weary. Rest and plenty of it was what they demanded most.

The belief in heaven and the desire of going there is also prompted by the hope of immortality. The love of life is strong in human beings. We want to keep on living somewhere even after we die. Heaven is that "beautiful land of somewhere."

The desire for heaven is not as strong a motive as it used to be. As life becomes more attractive there is less demand for a place where unfulfilled desires are realized. (6) by McClure Newspaper Syndicate.)

Dear Editor:

VOUNG as I am-don't laugh-I I still can see that life is mostly what we make it.

For instance, recently a young fellow told me he's underpaid and he wants a new job. I told him, what is true, that he is getting excellent training where he is, that a dozen men envy him his chance, and that he's on his way to success right now.

He answered with a growl. And then I noticed that the lad needed a shave. No wonder, I thought, that he's sour on the world. No wonder he feels neglected! This internal chemistry of ours is so delicate that a man doesn't need much to upset his

vision entirely. Anything can look wrong to a man who doesn't shave every morning.-

(Copyright.)

Brief and to the Point

A boy was sent by his loving parents, who had coddled him a good deal at home, to a big public school. He had been strictly enjoined to write home regularly and tell them all about himself and his new life. At the end of a week his first letter arrived. It consisted only of a

"There are 370 boys nere," he wrote. "I wish there were 369."

single line:

And the snowflakes said to them-

selves: "Don't they recognize a snowstorm when they see one, or do they forget our faces as they do people's faces and remember that we look familiar

but don't know just who we are!" Anyone could tell it was really winter outside by the way everything and

every one looked and felt. But it was splendidly cold, and the cold wave, breezing along as it did, was enjoying itself hugely.

Sea gulls were seeking shelter in the coves.

They sat on pieces of ice and drifted along with the river tide, but then they, too, disappeared.

Then the snowstorm began flying over the pavements-then the pavements would be quite dry as the snow swirled above and landed or drifted somewhere else-and then more snow came swirling around.

The swirling snow had to hurryit had a number of engagements to keep and it was acting much excited about them, not being able to settle down in any place, thinking of the numbers of places still to be visited.

Oh. it was most interesting weather. And then at last the cold wave grew tired of all the land and it went outblew right out to sea where it joined the cold waters of the ocean and the cold air and wind that blew above it so that storms raged over the sea and the weather was very, very cold. # THE WHY of SUPERSTITIONS By H. IRVING KING

MOVING THE CAT

IN MOST parts of this country and Canada it is considered bad luck to take the cat along when a family moves to another house. But while this superstition appears to be nearly universal yet, according to the publications of the American Folk-Lore society, it is regarded in some parts as extremely bad luck not to move the cat. Superstitions many times suffer strange distortions in their travels from age to age and land to land, and that "not" in the variant of the general belief regarding the moving of the family cat may have got in by accident. Or it is possibly a survival based upon an entirely different idea from that of the general superstition.

The general superstitions with regard to moving pussy has evidently no kinship with the many cat superstitions deriving from the relationship of the cat to Isis and the moon. It prevails among Anglo-Saxons and its origin must be looked for the way the cat was regarded in Britain in anas a mystic animal intimately connected with witchcraft. The cat-especially the black cat because she was more weird looking than others-was thought to be a favorite form for a witch to take when she wished to transform herself into an animal and also to be frequently the abode of a witch's "familiar spirit."

Pussy is a weird creature anyway; especially when she pauses in her ablutions suddenly and looks at you with those eyes of hers that seem to be reading your past and future, searching your very soul. No wonder she was looked upon by our simple ancestors with suspicion. Now one of the cat's most uncanny and inexplicable powers is that of finding her way back from a long distance to her former home. She dislikes a change of abode -and shows it. And it is not well to offend a cat by moving her. For who knows what is at the bottom of that weird power by which she negotiates her return?

### Lesson for July 13 JACOB, A SELFISH MAN, TRANS-FORMED

LESSON TEXT—Genesis 25:29-34; 28:18-22; 29:18-20; 33:1-4, 18. GOLDEN TEXT—For what is a man profited if he shall gain the whole world and lose his own soul? PRIMARY TOPIC-Learning to Be

JUNIOR TOPIC-Learning to Be Un-

INTERMEDIATE AND SENIOR TOP-IC—What Does It Mean to Be Honest? YOUNG PEOPLE AND ADULT TOP-IC—Learning from Experience.

1. Jacob's Birth (25:21-26). In answer to Isaac's prayer, a seed was given unto him. Before Jacob's birth God revealed unto Rebekah the fact that he should have the place of pre-eminence. "The elder shall serve the younger." In this God reversed the ordinary law concerning the position of the elder son. The act of taking hold of Esau's heel as he was born, indicated Jacob's nature. The

name Jacob means "supplanter." II. Jacob's Schemes (25:27-34; 27:1-29). 1. He secured Esau's birthright

(25:27-34). It was right for Jacob to have the birthright since it was according to God's plan as revealed to Rebekah, but his scheme to get it was reprehensible. He took advantage of a brother's weakness to drive a sharp

bargain. Secured his father's blessing (27:1-29). (1) Was requested to get venison for his father. (2) Rebekah's scheme (vv. 5-33). It was God's plan that Jacob should be at the head, but He did not need the sin of Jacob and

his mother to bring it about. III. Jacob's Flight to Haran (ch. 28). Jacob's deceit and cunning got him into trouble. He was compelled to flee from his outraged brother. He now began to reap what he had sown. 1. Jacob's vision at Bethel (28:10

Jacob not only had to flee to save his life, but he had to leave home and mother. When night overtook him, he was obliged to sleep in a field with a stone for a pillow. It was under such circumstances that the Lord gave him the wonderful vision at Bethel. (1) He saw a ladder reaching from earth to heaven (v. 12). Jesus Christ is the ladder, connecting earth and heaven for us (John 1:51). (2) He saw angels of God upon the ladder (v. 12). These angels were divine helpers to render needed assistance along life's way. (3) The Lord standing above the ladder (vv. 13-17). To show Jacob that the ladder did not reach merely into space God appeared and talked with him. a He declared that He was the God of Abraham and of Isaac, thus assuring Jacob that the same favor that was over his fathers was over him (v. 13). b. He renewed the covenant as to the land. Though Jacob was now fleeing from the land, the covenant would not fail. (v. 13). c. He assured him of a numerous seed (v. 14). d. The divine presence with Jacob (v. 15). Though

2. Jacob's vow (vv. 18-22). His vow included three things. (1) Dedication of himself to God (v. 12). (2) Establishment of worship (vv. 18,

he had sinned, God was with him. e.

Jacob should be brought again into

the land (v. 15).

19). (3) Consecration of his substance (v. 22). IV. Jacob's Return to Canaan

(chaps. 31-33). 1. The Lord instructs him (31:11-21). Twenty years have elapsed since his experiences at Bethel. These years were spent in Padan-aram with his mother's people. Here he served Laban for twenty years. Though it was the purpose of God for him to return, he took clandestine leave of Laban. Laban pursued him in anger, but God appeared to Laban and forbade him to

lay hands upon Jacob. 2. Jacob on the way (Gen. 32). Though Jacob fled from Laban's pursuit, a more formidable enemy faced him in the person of Esau. (1) Jacob meeting the angels (v. 1). (2) Jacob praying (vv. 9-12). Not receiving a reply from Esau, Jacob cast himself upon God in prayer. (3) The angel wrestling with Jacob (vv. 24-32). He continued to wrestle until the approach of morning, not knowing that it was God in human form wrestling with him. God humbled him by dislocating his thigh. When thus humbled, he quit wrestling and clung to God. He got the blessing when he, conscious of his weakness, laid hold upon God. (4) A new name (v. 28). He was no longer Jacob, the "supplanter," but Israel, a "prince of God." His new

Finding God

new nature.

name was given him after he had a

If we cannot find God in your house or mine, upon the roadside or the margin of the sea, in the bursting seed or opening flower, in the day duty and the night musing, I do not think we should discern Him more in the grass of Eden or beneath the moonlight of Gethsemane. - James Martineau.

Gratitude to God

Gratitude to God makes even a temporal blessing a taste of heaven .-

Sacred Chinese Temple

Taken Over by Bandits Mount Lushan, one of the twelve sacred mountains of China, famed alike for the piety of its monks and for the beauty of its scenery, has been entirely pre-empted by bandits. The once sacred grottos, formerly given over to the contemplation of immense carved images of Buddha, or to the rites of Taoist priests, are now used as prisons. Ancient Chinese writings declare that Mount Dushan was "10 miles high and 240 miles in circumference." Today Lushan rises only a little more than 4,000 feet, but it affords an unsurpased view southward over the gulf of Pechili and eastward toward the Liaotung peninsula, on which the Russians built Port Arthur and on which the Japanese now occupy Dairen. Lushan is very rugged, and in olden times every cliff was ornamented with a temple. Yehlituyu. the famous Chitan who rose to power under Genghis Khan, was an especial devotee of Luskan and legends have it that he selected this mountain to be "the eternal trustee of wisdom." Accordingly he is supposed to have buried 10,000 sacred books in a cavern under the peak of the mountain, and then to have erected over his repository the temple which today is a bleak ruin.

### "Radical," Term Applied to Advanced Liberals

At the mention of the "radical" there is immediately conjured up in the mind thoughts of Communists. Bolshevists or some other revolutionary group whose ideas run counter to those of law-abiding citizens.

That radicalism, however, is not a modern excrescence is known to all who have studied the movement.

The original radicals, in the word's present political sense, constituted an English party, active early in the Nineteenth century.

These radicals were really included in the Liberal political group of the day, the radicals being those members with more advanced ideas.

Henry Hunt and others who were in favor of radical reforms enjoyed the distinction or obloquy of being the first to be termed "radicals," the name being applied to them in 1818.— Kansas City Star.

An Afterthought

Illustrating his contention that the modern actor is too apt altogether to suppose that he is in some way above the author, H. B. Irving, son of Henry Irving, and himself a fine Hamletused to tell, as a great joke against himself, how he had been in the box office of his own theater when a clergyman from the country came in to buy a couple of tickets for a performance of "Hamlet." Having secured his seats the clergyman started to go, but as an afterthought he came back.

"By the way," said he, greatly to the amazement of Irving, "Who is playing the part of Hamlet?"-Kansas City

Great Church Organization

held its first meeting at Philadelphia, 1908, when it was organized. Thirty denominations were united by this act for the purpose of enabling churches to do together what they could not hope to do alone; to express the fellowship and unity of the Christian church; to unite the Christian bodies of America into service for Christ in the world: to encourage devotional fellowship and mutual counsel, and to secure a larger combined interest for the churches of Christ in all matters affecting the moral and social condition of the people and the world Volcanic Alaskan Valley

The Valley of Ten Thousand Smokes is a volcanic region in Alaska, which came into being at the time of the eruption of Mount Katmai, June 6, 1912. It and its neighboring wonders were discovered by Robert F. Griggs, director of the National Geographic society expedition, from 1915 to 1919. This region proved to be such a stupendous volcanic laboratory, as well as being so rich in scenic value, that in September, 1918, President Wilson set aside the whole district, comprising more than 1,000,000 acres, as the Katmai National monument.

Too Much

Mutt, as the family dog is very appropriately named, thoroughly enjoys automobile riding, and he was expressing his joy the other day by leaping gayly from the back seat to the front and treading with heavy paws upon every one in transit. Sunny, his little master, became surfeited with this procedure, and exclaimed in exasperation, "Look here, Mutt, I don't like so much dogness!"

Grandfather Vindicated

Banjo clocks, just like our grandfathers used to wind, are among the latest favorites in furniture despite the hundreds of types of modern clocks on the market .- Country Home.

One Forest Fire Cause

In Forests and Mankind explanation as to why forest fires occur so frequently in areas that have already been burned over is given: "Fires in a sense brew fires. The effect of each fire, no matter how light, is to prepare the land for another, since each successive burning leaves dead trees and charred limbs behind it, that under the hot summer sun dry out like tinder and furnish more and more fuel for the flames that follow, until at last the land becomes a barren waste, unfit for tree growth—unfit for anything but to serve as a reminder and a warning."

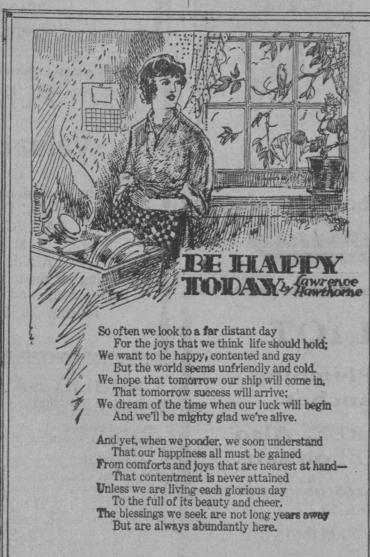

Chose Good Place to Fall

A meteorite crashed to earth in Yenesei province, in central Siberia some years ago. It exploded as it neared the earth and illuminated the country for nearly 500 miles. The heat from this body could be felt for a distance of 300 miles. It was the largest falling star in history. If it had struck New York city, every building and spoway would have been destroyed and every bit of life wiped out.

### MICKIE SAYS—

\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\* Why We Do What We Do

by M. K. THOMSON, Ph. D.

\* WHY WE LOOK FOR A CURE-ALL

IN THE good old days when chemistry was alchemy, astronomy was astrology, theology was mythology, and religion was mostly myth and magic, people looked for a cure-all and believed it could be found. In this day of science we put very little confidence in the ancient pseudo-sciences and yet not a few still believe in a cure-all.

The wishes and desires that induced a man to look for a cure-all exist today in added strength and variety. It is the great human urge to master the forces of nature by a simple formula, a hokus-pokus method of getting what you want, a short cut to health, happiness and success.

Life is too complicated. Health rules are too many and terribly complex. And what is even worse they often go contrary to our desires. They require exercise, strain, and struggle.

The cure-all would eliminate the necessity of careful living and vigorous dieting and other restraining methods. Mankind prefers to indulge all its wants and not pay the price to get what it wants without sacrifice and toil.

What a boon it would be to know that we might dissipate all we pleased, and then by taking a few pills could be restored to perfect health and vigor.

All patent medicines thrive on this human weakness for a cure-all.

We look for a cure-all because we are not willing to pay the price for our folly of reckless living, and think we can find some way of defeating the inexorable law of cause and effect, although we know from sad experience that it cannot be done.

We can believe in a cure-all in a scientific age, because this belief has very little to do with science or reasoning. It is essentially an emotional affair and the emotions know no reason. They are governed by imagination and desire alone.

When

The family was expecting Unele John for dinner Sunday. During the week father announced that Uncle John could not come because he had dislocated his shoulder.

With quite a worried expression on his face Billy asked: "When does he expect to locate it?"

Wide Belief in Virtues

of Peony as Medicine

The peony is credited with medicinal power by peoples as far apart as the Japanese and the inhabitants of countries of western Europe. According to ancient herbalists it was an herb of the sun, and consequently prescribed for maladies caused by the moon. It was good for nightmares and menalcholy and a preventive of insanity and convulsions. The flower probably came from Japan and traveled in ancient times by way of Persia. to Greece, where is gave the land of Paeonia its name, and was the origin of the word "paean," which originally meant a chant of delivery from illness or wounds-another indication of the belief that the flower had rare healing properties. The peony appears to have found its way to England by about 1600. It has frequently been made the subject for a poem, of which one by Bliss Carman is probably the best

Running Away

Many explorers, so highly praised for braving jungle heat and ice floes are really "escapists" who have found these physical pains easier to endure than the emotional stress of staying at home and getting along with their wives and brothers and neighbors .-Country Home.

Curling Requires Skill

The game of curling is played on a rink marked out on the ice, with large, smooth stones to which handles are fixed. The stones weigh from 30 to 45 pounds. There are usually four players on a side or team. Each player uses two stones, which he slides along the ice toward a mark 42 yards distant. The object is for a player to lay his stones closer to the mark than those of his opponents. After all players have "curled" or played, the side having stones nearest the mark scores a point for each stone so placed. In Canada and the United States iron curlers are sometimes used in place of stones.

"YOUR HUSBAND SOBER, MRS. SABER?" "SOBER AS A JUDGE!"

"WHICH JUDGE?"

seems incredible. Yet, even speed such as this becomes as nothing over the telephone wires. By means of the telephone this journey can now be made, not one way alone but both ways, within the space of MINUTES.

Whether you call 10 miles or 2,000 miles, you will find the same speedy long distance service always at your disposal. Most out-of-town connections can now be made while you wait on the line. And as to rates-ask Long Distance for the rate on any call you wish to make. You'll be surprised to find how low it is.
