

THE MAN WHO SAYS HE IS "TOO BUSY" TO READ, IN THE SUMMER TIME, IS NOT A GOOD BUSINESS MAN.

THE CARROLL RECORD

THERE IS NO BETTER MOTTO THAN—"PROTECTION TO HOME, ITS INTERESTS, AND INDUSTRIES."

VOL. 37

TANEYTOWN, MARYLAND, FRIDAY, JULY 18, 1930.

NO. 3

CHAMBER OF COMMERCE STRONG FOR ROAD.

Urges Completion of Road to Penna. State Line this year.

The Taneytown Chamber of Commerce is driving hard for the completion of the state road north from Taneytown to the Pennsylvania line, this year. As an evidence of this fact, the following committee, consisting of Merwyn C. Fuss, president, and J. Keller Smith, secretary of the Chamber of Commerce; D. J. Hesson, Geo. A. Arnold, O. E. Dodder, Norville P. Shoemaker, Dr. C. M. Benner and R. S. McKinney, went before the County Commissioners this week and received the promise of two of the Commissioners that they would recommend the road.

They also went before the State Road Commission the same day, and advanced arguments why the road should be completed this summer.

The Commission promised to give the matter careful consideration, and advise the president of the Chamber of Commerce as to their decision in a few days. The Chamber is awaiting the decision of the Commission, which we trust will be favorable.

MERWYN C. FUSS, President.
J. KELLER SMITH, Secretary.

ON CIGARETTE SMOKING

The following comments are from a Baltimore subscriber, who in sending them to the Editor personally, specifically states, "This is not a sermon, and is not for publication, but I just don't like those medical indorsements."

The Record does not want to open up any discussion, pro or con, on the cigarette, or "smoking" habit in general; but somehow feels like publishing the comments referred to, especially for the purpose of calling the attention of the author and others to the fact that the "medical indorsement" quoted, said "If a man feels that he must smoke, then the cigarette is the least harmful form."

In our judgment, this merely places responsibility on the smoker, and makes the cigarette the lesser evil—in this individual opinion. The Record would not like to convey the impression that "good medical authority" as a whole, would indorse the opinion. Our subscriber writes:

"I read, with interest and appreciation your "near Apology" and explanation" in last week's Record. I think you are wise in taking the cigarette advertisement. One can not well hold out against the impetus given the cigarette by the Y. M. C. A. in world war times.

My opinion as a moderate (?) user of tobacco—mainly by pipe and cigars—is that such use, in moderation, by one physically matured, does little harm, but I seriously question medical authority—no matter how high—that it ever under any circumstances, does any good; and if cigarette smoking ever does any good whatever, it is not due to the smoking (i. e. the nicotine inhaled) but is due to the extra amount of oxygen that gets into the lungs of the smoker that does not get there in the non-smoker. In short, the excess oxygen overbalances the smoke (nicotine) and some little benefit (rather questionable) may result.

For real benefit "medical authority" would better advise sucking a goose quill. But, after all, to the smoker, after he has acquired the habit and overcome the nausea, a puff occasionally does quiet the nerves—or imagination."

TWENTY-FIVE YEARS AGO IN TANEYTOWN.

Walter R. Rudy, of Mt. Airy, purchased the business, formulae and copyrights from Dr. C. W. Weaver, Taneytown, of the Weaver-Markell Co., manufacturers of X-Ray remedies.

The wheat crop was from good to fair, the local price being 75c. Corn was reported improving after early unfavorable conditions.

The Farmers' Picnic was advertised to be held July 27-29th.

Jonas F. Harner, son of Jonas Harner, engineer on the W. M. R. R., had a leg broken in a shifting accident in Union Bridge.

T. A. Martin, barn builder, had just finished building a barn on the Lowndes farm near Cumberland. The building was 60x145-ft. with slate roof, and contained room for 20 horses, 40 cattle, 800 tons of hay, and the farm implements. (This barn was since destroyed by fire.)

The Editor gave a review of the program of Mt. Lake Park, in August, and announced that himself and wife would again visit the resort, early in August.

D. J. Hesson was on a trip to Niagara Falls and Canada.

John S. Bower and daughter, Miss Bernice, were on a visit to Mr. Bower's eldest daughter, Mrs. Edna Burke, at Brandywine Summit, Pa.

A. Martin received 10,000 cases of cans preparatory to getting ready for the sweet corn pack.

Complaint was made of the pink tint of the town's water supply.

Mercantile Advertisers were: Went & Koons, Reindollar, Mehning & Basehoar; H. S. Hill, Edw. P. Zepp, M. R. Snider, Kirssins Underselling Store; D. J. Hesson, Robert S. McKinney, C. Edgar Yount, John T. Koontz and others.

The reason why the average man doesn't say much when he is out with his wife is that the average man doesn't like to be contradicted in public.

MIDDLEBURG CHILD KILLED

Struck by Automobile While Crossing the Street.

Eleanor Irene Clabaugh, four year old daughter of Mr. and Mrs. Clarence Clabaugh, near Middleburg, was instantly killed, Wednesday evening, by being struck by an automobile driven by Glenn Warehime, Mr. and Mrs. Clabaugh were visiting at the home of Frank Rentzel, in Middleburg, who lives opposite the home of Mrs. Mary Griffin, the child's grand-mother.

The child crossed the street to pay the grand-mother a visit, and after being there a short while, attempted to go back to her father's car, when she was struck and knocked down by Mr. Warehime's car. Both legs and one arm were broken and her skull fractured.

State's Attorney Brown and Sheriff Fowble summoned a coroner's jury, as follows; George Rentzel, Jacob Snare, Emory McKinney, William G. Rentzel, George Delphy, Frank Miller, Ornie Hyde, John Bowman, Ralph Shildt, James Coleman, J. H. Grimes and Elmer L. Eyer. After a hearing of the evidence, Warehime was cleared of all fault, the decision being that the accident was unavoidable.

The child is survived by her parents one sister, and her grandmother, Mrs. Mary Griffin. Funeral will be held this Friday at 2:00 P. M., at the home. Interment in Middleburg cemetery.

DUTTERA FAMILY REUNION.

An attractive program is being worked out for the next big reunion at Hyattsville, Md., Wednesday, Aug. 6 by the descendants of George Philip Duttera who spell their name, Duttera, Dutrow, Dudrow, Duttera, Dutterer, Dodder and Dotterer. Last year over 400 gathered near Littlestown, Pa.; and even a greater number is expected this year with a full lunch basket for an all-day affair.

\$10.00 in gold is offered by Mr. Newman Dudrow, of Hyattsville, for the largest descendant family present on that occasion. In addition prizes for the oldest and youngest will be given.

Greetings will be presented by representatives of each branch; and brief addresses by prominent leaders will take up the morning session. The afternoon will be given to miscellaneous business and sports.

All births, marriages and deaths of the past year; or any family history not reported should be sent in at once to the historian. This will be published in the supplement to be issued in time for the reunion. The full program will be published later.

The following are the officers: Pres. Rev. W. B. Duttera, Ph. D., S. T. D., Salisbury, North Carolina; 1st. V. P., G. L. Dutterer, Silver Run, Md.; 2nd. V. P., Peter T. Dutterer, New Windsor, Md.; Sec., Geo. F. Duttera, of Littlestown, Pa.; Treas., O. Edw. Dodder, Westminster, Md.; Historian, Miss Dorothy Dudrow, Hyattsville, Md.; Registrar, Vernon Dotterer, of Union Bridge, Md.

CLUTZ-EYLER-RECK REUNION.

The fourth annual reunion of the above families will be held on Saturday, August 2, 1930, in Shriver's grove, near Gettysburg and Taneytown highway. Look for reunion sign at two houses. Mark the day for the reunion and be sure to come with your family. Tell other relatives and talk it up. Come to have a good time.

Bring your basket filled with good things to eat. No table ware of any kind. Dinner will be served at 12:00 noon; supper at 4:00 P. M. Come early; come later; come at your convenience, be sure to come. Bring wind and stringed musical instruments. Inform Miss Anna Reck, Gettysburg, Pa., of births, marriages or death. Program 1.30 P. M. Plenty of shelter in case of rain.

THE COMMITTEE.

MORE RAILROAD CROSSINGS.

During the last three years \$180,000,000 has been spent in the United States for the elimination of railroad grade crossings, according to Harold G. Hoffman, State Commissioner of Motor Vehicles of New Jersey. Despite this outlay, however, Mr. Hoffman finds that the number of crossings is increasing because of the construction of new highways.

Writing in the Atlantic City Press, he emphasized the duty of all motorists to observe the signals and obey whatever regulations are in effect at grade crossings. His statement follows in part:

"The problem of protecting motorists at railroad grade crossings is one which demands constant attention and calls for close co-operation between automobile drivers and state traffic authorities. In so far as the state is concerned, it is a matter of insistence upon the elimination of grade crossings wherever possible or, where that cannot be done at once, their protection by means of crossing gates, watchmen or suitable signal devices."

"Beyond this point it is squarely up to the motorist to observe the signals and obey whatever regulations are in effect at grade crossings. He is required to exercise every precaution even to the point of stopping his vehicle and getting out to determine whether it is safe for him to cross. This obligation is set forth in a leading case in which the United States Supreme Court expressed itself as follows:

"When a man goes upon a railroad track, he knows that he goes to a place where he will be killed if a train comes upon him before he is clear of the track. He knows that he must stop for the train, not the train stop for him."

33RD ANNUAL CARROLL COUNTY FAIR

At the Taneytown Grounds Week of August 12 to 16th.

The Premium list and general catalogue of the 33rd Annual Carroll County Agricultural and Fair Association is ready for distribution. The dates of the Fair are August 12, 13, 14, 15 and 16th, day and night. General admission 50c; Season Ticket, \$1.25.

This is the 7th year of the Fair on the new grounds along the Westminster-Taneytown state road, one mile from Taneytown, and the statement is made that "everything points to the largest Fair ever held at Taneytown."

The officers of the Association are: R. Smith Snader, President; Geo. R. Sauble, Vice-President; Edw. S. Harner, Secretary; Samuel C. Ott, Treasurer; who with the following additional members constitute the Directors: John H. Shirk, W. H. Warfield, Geo. H. Winemiller, John N. Starr, Geo. H. Hunter, Martin E. Conover, Raymond Wilson, J. Ervin Myers, Wm. Jesse Halter, J. Herbert Snyder and Charles W. Klea.

The program for the week is briefly, as follows:

Monday, Aug. 11, receiving day for entries entered as premiums.

Tuesday, Aug. 12, Judging of cattle and other entries. 1:30 P. M., Horse races, and free performances in front of grand stand.

Wednesday, August 13, 1:30 P. M., Races. Performances before Grandstand. Horse shoe pitching, Evening, Fireworks, dancing, free attractions.

Thursday, Aug. 14, 1:30 P. M., Races. Free performances. Evening, fireworks, Dancing, special free attractions.

Friday, Aug. 15, 1:30 P. M., Races. Performances before Grandstand. School Day—all school children admitted free until 4 o'clock P. M. Auction of fat hogs. Horse shoe pitching, dancing in the evening.

Saturday, Aug. 16, 1:30 P. M., Automobile races. Free performance before grand-stand.

The gates will be open at 7 A. M., each day, and close at 11:30 P. M. An ample police force will be on hand each day, with authority to make arrests. Full information concerning any feature of the Fair, may be had on applying to Edw. S. Harner, Secretary, Taneytown.

The big free attractions at the Fair, this year, will be Hoaglan's Hippodrome, featuring horse drills and stunts, jumping horses, and a game of push-ball between American and Canadian horses. There will be comedy acts, too, by horses and mules; a demonstration of Auto Polo, and a mule Derby. The whole is said to be the most unique as well as entertaining feature going the round this year.

FIGURES PRICE OF BREAD.

Since wheat is nearing the 1 1/4-cent per pound mark, some varieties of flour 5 cents a pound and bread nearly 10 cents a pound, one is reminded of the high cost of manufacture and distribution. Assuming that 40 pounds of flour is produced from a bushel of wheat, this would equal the weight of nearly thirty-six 10-cent loaves of bread. We are promised relief, however, as one baker at least has promised to increase the weight of his 10-cent loaf 2 ounces.—Union Bridge Pilot.

MARYLAND AND VA. BRIDGES.

By two deeds filed this week in the office of the Clerk of the Court, the Potomac River bridges at Brunswick and Point of Rocks are conveyed, with all approaches, rights, ways, and privileges, in equal interests, to officials of Maryland and Virginia. The sales follow resolutions adopted January 3 of this year, by the stockholders of both companies.

The bridge at Brunswick is granted by the Berlin and Lovettsville Bridge Company, which has operated it for many years. The deed was executed by Holmes D. Baker, president, and J. Travers Thomas, assistant secretary of the Company. The Point of Rocks bridge is conveyed together with three-eighths of an acre in Frederick county, and one and three-eighths acres in Loudoun county, Va., and all rights to the ferry formerly operated by the late Margaret Grahame. Holmes D. Baker, president, and Samuel G. Duvall, assistant secretary are executors of the deed.

The bridges connect highways in Maryland and Virginia, and will be maintained by the two States, free of toll, in accordance with announced plans, after the completion of payment through tolls to be collected by the State until January 31, 1935. The price of each bridge was \$100,000, equally divided between the two states.—Frederick News.

THE UNITED STATES OF EUROPE

The biggest new proposition is the talk of formation of "The United States of Europe" that seems to have originated with Foreign Minister Briand, of France. The equality of all states, and equal security for each, are emphasized in the preliminary steps, which as yet have not gone beyond the "talk" stage.

France, Germany and Italy appear the most interested, and the proposition seems to have gone so far as to make it probable that the question will be discussed at the September meeting of the League of Nations. Germany is said to be especially favorable to the union.

MD. STATE DAIRYMEN

Will Hold Big All-day Pic-nic at Mt. Tabor Park.

The Maryland State Dairymen's Association will hold a pic-nic at Mt. Tabor Park, Rocky Ridge, Md., on Wednesday, July 30, 1930. The speakers will be Hon. Albert C. Ritchie, Governor of Md.; Hon. Wm. F. Broening, Mayor of Baltimore; R. Smith Snader, Pres. M. S. D. A.; I. W. Heaps, Sec'y-Treas. M. S. D. A.; Jacob S. Rohrbach, former State Senator, Frederick, and Holton S. Felton, Frederick.

Community singing under the direction of Thomas L. Gibson, State Supervisor music, under Department of Education. Music by Taneytown Band.

The program of the day follows; 10:00 A. M., Tournament, under direction Russell C. Long. Guaranteed prizes for amateur and professional riders; charge to the Knights delivered by Holton S. Felton, of Frederick; Coronation address, Jacob S. Rohrbach of Frederick; coronation crowning to take place immediately after tournament. David G. Zentz, local director, chairman.

Afternoon program, at 1 o'clock. Music by the Band; R. Smith Snader, President, M. S. D. A., presiding; address, Mayor Wm. F. Broening, Baltimore; community singing; address, I. W. Heaps, Sec'y-Treas. M. S. D. A.; 3:00 P. M., games and contests; under direction of Mr. Mills and Mr. Pierce. These contests will be open to the members of M. S. D. A., their families and employees. Boys, men's and fat men's races.

Cow calling contest (men or women); Husband calling contest; Rolling pin throwing contest, (women); Horse Shoe throwing contest, with prizes; paid in each of the above contests. The rolling pin throwing winners will receive a fine new rolling pin, made of bright apple wood, in addition to the money prize.

Evening program, 7 o'clock, community singing under direction of Thomas L. Gibson, State Supervisor of music; pianist, Miss Ruth E. Weybright, director of piano, Bridgewater College, Bridgewater, Va. Popular and patriotic songs will be sung. The choir will consist of representatives from churches within a radius of 25 miles. Address by Governor Albert C. Ritchie. Moving pictures under direction of W. Horace Harpes, Sec'y Baltimore Dairy Council.

Mount Tabor Park is located at Emmitsburg Junction, W. M. R. R., 5.5 miles from Baltimore, 5 miles east of Thurmont. State road lead into this park from Thurmont, Frederick and other nearby towns. There are all kinds of amusements for children. It consists of a tabernacle, large sliding board, electric lights and dining hall. Meals will be served.

"INSIDE" INFORMATION FOR WOMEN.

If a child wakes up too early or sleeps fitfully during the night, perhaps his supper has not provided quite enough nourishment to carry him through to the breakfast hour. Make sure that the last meal of the day provides some milk, bread and butter, a vegetable and possibly a fruit, such as scrambled baked apple.

Clam chowder is good any month of the year, but especially welcome in the months oysters "R" not in season. Clams are a good source of vitamins A, D and E and like all seafood contribute iodine. To make clam chowder use: 1 quart shucked clams, 2 small potatoes, 1 medium-sized onion, cut in small pieces, 2 slices bacon cut in small pieces or an equal quantity of salt pork, 1/2 teaspoon salt, few drops tabasco, 1 pint milk, 2 tablespoons flour. Remove the clams from the liquor and strain it through cheesecloth or a very fine wire strainer. Crisp the bacon and remove it from the fat and break into small pieces. If salt pork is used cut into dice before frying. Cook the onion in the meat fat until yellow, then add flour. Pour most of the clam liquor slowly into the pan and cook until thickened. Cook the clams below the boiling point in the remainder of the liquor for two or three minutes, then grind through the fine knife of the meat grinder, saving any juice. Add the milk to the thickened clam liquor, the salt, the bacon or salt pork, the ground clams, and the remainder of the juice. Bring to the boiling point. Sprinkle finely chopped parsley over the top and serve over soda crackers.

SAFEGUARDING PROPERTY AND PERSONS.

Fire and storm insurance and casualty insurance are the safeguards of billions of dollars worth of property and millions of lives in the United States. Without these three agencies to protect property and persons, our country could never have developed as it has.

The beginning of the twentieth century inaugurated a generation during which the world's manner of living has been revolutionized. Fire and storm insurance have had to cover many risks which were previously unheard of, while casualty insurance has grown from almost an unknown until it is indispensable to human endeavors where labor, or contact with fellow-beings is involved.

These classes of insurance furnish the basis of credit and protection for every home and business in the United States. They carry the risk for all business. If one wishes to demonstrate what an outstanding part they play in our modern financial and industrial structure, try to operate an employing business without them.

THE WHEAT MARKET IS BIG MISFORTUNE.

A Drive with an "Eat More Wheat" Country-wide Slogan.

The very unfavorable wheat market is enlisting the attention of everybody, but without any remedy in sight. The world is simply overloaded with wheat, and the low price is the natural result attaching to any commodity of which there is an over-supply. In connection with the over-supply, it develops that our consumption of wheat flour is away below that which existed before the World War—so much below that it is estimated to reach 130,000,000 bushels a year.

A reasonable explanation of this fact is difficult to find; but some of the shortage is unquestionably due to the "fashion" that makes it bad form to use much bread with meals; and in part may be due to the hold-over from the world-war campaign "to eat less bread," that has developed into a habit.

A "drive" has been launched in Chicago to encourage an increase in the domestic consumption of wheat by 100,000,000 a year at least. The object is to urge the "drive" as a patriotic effort to benefit the conditions of agriculture, as well being of general benefit to health, and as a valuable stimulant to business in general throughout the country.

The use of wheat cereals, instead of those made of oats, rice and corn, would in itself be of tremendous benefit to the wheat situation.

Senator Capper, of Kansas, appeared at the White House, this week, to indorse the proposition that the Farm Board buy another 100,000,000 bushels of this year's crop, but Mr. Legge, chairman of the Board has already stated that the Board will buy no more; and as the Board was provided by Congress, the President feels that it is Congress, rather than himself, that should give orders to Mr. Legge. This, however, is not given as an outcome of the conference.

Before conferring with Senator Capper, Mr. Hoover had heard from Secretary of Agriculture Hyde a firsthand account of the barnstorming tour the Secretary has just made through the Kansas wheat belt with Mr. Legge in support of the plan to have agriculture cure its own ills through a reduction of acreage.

Although this plan, which is believed to have Administration backing, has found little favor in the West Mr. Hyde's report was not discouraging enough to prevent the White House from announcing a little later that the President would assuredly cross the wheat country to the Rockies late in August or early in September.

Another Administration involvement in the troublesome farm question was disclosed when it was learned that the army and navy have been buying considerable quantities of foreign foodstuffs for use in mess halls and aboard ship.

This practice, which is said to have reached extensive proportions on stations outside continental United States, led to protests from agencies deeply grieved to find the American Government extending its patronage to alien producers while farmers at home were in the trough of depression.

The issue became so acute that it was carried before a Cabinet meeting, with the result that word has now gone out that the military and naval services must safeguard the interest of American agriculture by buying none but American food.

ST. SWITHIN'S DAY.

According to believers in the St. Swithin's Day tradition, as no rain fell on July 15, there will be none for forty days. The origin of the belief grew from the fact that when the body of St. Swithin was exhumed from its first resting place to be buried in the churchyard at Winchester, England, the ceremony was delayed 40 days because of violent rains without intermission.

The superstition was held to apply both ways—40 days dry, or 40 days wet, according to the weather on July 15, but the probability is that it is "hit" only once—when the Saint was buried. Our encyclopedia says St. Swithin had charge of the education of King Alfred. In 852 he was consecrated as Bishop of Winchester. He was distinguished for his humility and charity to the poor.

He died in 862, but the reinterment of his body seems not to have taken place until about 100 years after he was canonized.

HORTICULTURAL MEETING AT NEW WINDSOR.

Plans are practically all completed for the Horticultural meeting at New Windsor, next Wednesday, July 23rd. A good program has been arranged. Governor Albert C. Ritchie will speak at 2:15 P. M.

The local committee will appreciate very much if the folks generally from the surrounding communities will contribute to the success of our meeting by being present at the program on the Blue Ridge College campus at 1:30.

At the close of the meeting at New Windsor, a bus will be provided to take all who care to visit J. E. Stoner's Nursery at Westminster. This is one of the most up-to-date propagative plants in the east. Mr. Stoner will present souvenirs to all visitors.

"History has shown us that punishment in itself will not eliminate the criminal."

FIGHT OVER NAVAL TREATY

Foes Working Hard to Delay the Final Vote.

President Hoover declined to supply the Senate with all of the data—commonly called the "secrets"—of the Naval Treaty, and gave as the chief reason for refusal that supplying all of the data would be contrary to maintaining relations of friendship with other nations in future like negotiations. That, like all other national negotiations, certain statements and proposals were made in confidence, and he did not propose to be guilty of a breach of trust by a betrayal of these confidences. He said:

"I have no desire to withhold from the Senate any information having even the remotest bearing upon the negotiation of the treaty. No Senator has been refused an opportunity to see the confidential material referred to, provided only he will agree to receive and hold the same in the confidence in which it has been received and held by the executive."

A number of Senators have availed themselves of this opportunity. I believe that no Senator can read these documents without agreeing with me that no other course than to insist upon the maintenance of such confidence is possible, and I take this opportunity to repeat with the utmost emphasis that in these negotiations there were no secrets or interpretations, nor any commitments whatever except as appear in the treaty itself and in the interpretive exchange of notes recently suggested by your Committee on Foreign Affairs, all of which are now in the hands of the Senate."

Immediately after the message had been read Senator Norris, Independent Republican, of Nebraska, voiced the sentiment of a part of the Senate by offering a reservation to the treaty declaring that since the Senate was not permitted to have all information concerning the negotiations it ratified the instrument with the "distinct and explicit understanding" that there were "no secret understandings or agreements" which in any way changed or modified it.

The resolution was at once characterized by administration supporters as an insult to the President, and wholly unacceptable as an addition to the treaty.

The anti-treaty leaders are planning to delay ratification, which under the rules of the Senate, may be easily done for a long while to come. Each day's proceedings of the body are full of remade amendments, and efforts toward making amendments, or qualifications, that are designed to defeat the treaty itself, the last of which is one to guarantee the freedom of the seas, both in times of peace and in war.

The acceptance by the Senate of such a reservation would simply mean that it would require further negotiation by all of the contracting parties, and perhaps result in defeating the treaty proposition entirely, which is exactly what the obstructionists are after. Other reservations of a like character were offered, but not accepted.

Senator Watson, on Thursday, secured sufficient votes to resort to cloture, but withheld invoking the rule for the present. It is believed that a vote will be forced by next Wednesday, at the latest.

Senator Johnson, of California, continues to play the star part for the obstructionists.

PLANNED TO MAKE \$100. BILLS OUT OF \$1.00 BILLS.

Two Philadelphians, Frank Eisman and Lippman Cohen, were arrested and held without bail, in York, Pa., on Monday afternoon, charged with being suspicious persons. A York bond salesman recently met two men, one of whom gave his name as Cohen, who told the salesman that if he would get a wealthy man with a big lot of \$1.00 bills, he knew a wizard in chemistry who would convert them into \$100.00 bills.

The salesman arranged to meet the men, and then reported the fact to York city detective Wilbur H. Myers. On Monday the two Philadelphians were in York and met the bond salesman in a room in a York hotel.

The detective and city constable were stationed outside the door of the room and heard the men explain the proposition of raising the bills to the salesman; after which they were placed under arrest. Both had large rolls of money in their possession.

WOMAN CANDIDATE FOR THE HOUSE OF DELEGATES.

Miss Lavinia Engel, of Montgomery county, has filed as a Democrat for nomination as a candidate for the House of Delegates. Should she be nominated, her election would be practically assured, thereby making her the third woman to be elected to the Maryland House; the first having been Miss Mary E. Risteau, of Harford county, who will again be a candidate this year; and the second, Mrs. A. P. Barber, of Anne Arundel County.

HOME-MAKERS' MEET.

The monthly meeting of the Homemakers' Club was held in the Firemen's building Friday afternoon, July 11, at 2 o'clock. Roll-call was responded to by helpful hints in table etiquette. Miss Slindee gave an interesting talk on the preparation of salads, and deserts for summer.

A delicious boiled custard, prepared by Miss Slindee, was served to all present. Two pleasing solos was rendered by Miss Marian Hitchcock.

THE CARROLL RECORD

(NON-PARTISAN)

Published every Friday, at Taneytown, Md., by The Carroll Record Company.

P. B. ENGLAR, Editor and Manager.

BOARD OF DIRECTORS.

G. A. ARNOLD, Pres. D. J. HESSON, V. P. G. W. WILT, Sec'y. P. B. ENGLAR, W. M. F. BRICKER.

TERMS—Strictly cash in advance. One year, \$1.50; 3 months, \$1.00; 6 months, 75c; 4 months, 50c; single copies, 3c. The label on paper contains date to which the subscription has been paid.

ADVERTISING rates will be given on application, after the character of the business has been definitely stated together with information as to space, position, and length of contract. The publisher reserves the privilege of declining all offers for space.

All advertisements for 2nd, 3th, 6th, and 7th. Pages must be in our Office by Tuesday morning each week; otherwise, insertion cannot be guaranteed until the following week.

All articles on this page are either original or property credited. This has always been a fixed rule with this Office, and we suggest the adoption of it by our exchanges.

Entered at Taneytown Postoffice as Second Class Matter.

FRIDAY, JULY 18th., 1930.

WHAT IS BACK OF IT?

The Westminster Times, last week, gave Frank R. Kent, well known magazine and newspaper writer, a good "going over" because of the many articles he has written concerning Calvin Coolidge, both during his term as president, and since, the striking features of which have been apparent efforts to belittle Mr. Coolidge before the public; the last article having been one written in a very sarcastic vein concerning the articles Mr. Coolidge is now writing for a number of the big dailies of the country, which articles Mr. Kent says are being paid for at the rate of \$2.00 per word.

Such a display of nasty comment is unworthy of such a talented writer as Mr. Kent, who is no doubt very well paid for his own productions, which some readers have the bad taste of thinking to be of little value and that he covers space because it is "his job" to do so.

Mr. Kent should attribute to Mr. Coolidge the same right to sell his work as he, Mr. Kent, has to sell his; and he should concede that the newspapers that buy the Coolidge articles think they are worth the price, just as do the newspapers that buy Mr. Kent's article think they are worth the price.

Writers who are able to occupy first-page space, should also be "first" in the fairness and dignity with which they discuss topics; and especially so when they presume to refer to our highly honored public men. That Mr. Kent has not been fair in his criticisms of Mr. Coolidge, is the opinion of many readers, among them The Times whose article should have had the effect of making Mr. Kent's "ears burn," according to an old saying.

Mr. Kent has had wide experience in observing public men, and all of the familiar objects on the political horizon, and is able to dress up his views and observations in very good English; but this continued tirade against Mr. Coolidge, is unworthy of his ability as a writer—and invites the question—What is back of it?

THE ALL-RELIEVING AD.

A century from now a file of the advertising pages of the newspaper and magazine of today would provide a complete history of the customs and characteristics of the period. These advertisements record what the people are wearing, the problems of the day, current thought and the traits of the generation.

Pick up any issue of the family newspaper and there in word and picture is the story of the day. Preserve that issue and posterity a century from now can tell what the men and women of this generation wore, what their mode of transportation was, how they were amused and entertained. The advertisements have made the past an open book.

Picture a man in the year 2030 chancing upon a file of this newspaper for the year 1930. Turning to the advertising pages he would see arrayed before his eyes and styles in wearing apparel for men, women and children of one hundred years ago. He would see the types of automobiles in use and from the number of automobile advertisements he would deduce that the automobile was in great favor and universal use. By the same reasoning he would learn that the radio was in great demand, even exceeding in popularity the phonograph and player piano.

Training in the art of sleuthing would not be necessary for this reader of the advertisements of the past to inform himself, from the cancer cure ads, that cancer was a menace to the generation and, from other ads, that obesity and exceeding thinness concerned the public as greatly as the malignant cancer.

The advertisements are also a record of economic conditions, revealing market prices and estimating the supply and demand.

For the discerning contemporary reader the newspaper advertisements afford more interesting and valuable information than he can preserve for posterity.—The Floral Park, New York, Gateway.

WHEN DOCTORS DISAGREE?

Last week, the same mail carried Chairman Legge's advice to farmers to grow less wheat, and the Extension Service News urging farmers to use fertilizers and produce greater crop yields per acre. Both bits of advice, coming from our government agencies, to help the farmer, seem to run counter to each other.

The first advice said "reduction in wheat acreage" was the only relief from the record of low prices for grain; while the second advice said, "if there is to be any profit from crops, it must come from a higher yield per acre," and then this:

"It is conservatively estimated that for every dollar invested in fertilizer the average return is about three dollars. The reason that farmers are buying 250 million dollars worth of fertilizer a year is that the best farmers of the country know that it pays them to use fertilizers."

Perhaps our logic is crooked, but it seems to us that we have, in the two agencies quoted, a practical disagreement between doctors—which is usually bad for the patient.

WOMEN DRIVERS.

Women motorists, it seems, have been much maligned. A survey by one of the leading insurance companies shows that only five percent of the automobiles that figure in accidents are driven by women. And an analysis of the causes of accidents indicates that extremely few are the result of carelessness on the part of women motorists. In a majority of cases the mishaps are caused by a misunderstanding of signals at street intersections, attempts to park at crowded curbs and miscalculations in entering and backing out of garages. Only an insignificant proportion of the accidents are attributed to loss of control.

Of course, many more men drive cars than women, and this must be taken into account in estimating their relative skill. But it is decidedly significant that women drivers are responsible for so few accidents due to carelessness. In the case of the men drivers, carelessness causes a high percentage of mishaps. The survey by the insurance company seems to suggest that some of the men who scoff at women motorists would do well to take a few lessons from them in the art of driving.—Frederick News

PINCHOT WILL FIGHT.

Former Governor Pinchot, of Pennsylvania, who was again nominated by his party to be a candidate for Governor in November, but who may be edged out of the party nomination on a technicality, has decided not to be disposed of so easily, should the final action of the Court be in favor of his opponent, Francis Shunk Brown; and those who know the temper of Mr. Pinchot, as well as of his strong following in the state say he will be elected in November, no matter how the Court may decide.

His plan is very simple. He will run as an Independent, if necessary. On the face of the returns certified to the Secretary of the Commonwealth, Mr. Brown lost Luzerne County to Gifford Pinchot, the nominee, by approximately 26,000. Complete State returns show a plurality of about 20,000 for Pinchot. However, a decision voiding the 60,000 perforated ballots used in Luzerne would give the nomination to Brown by 6000.

The Philadelphia Ledger commenting editorially on the situation, says: "Ex-Governor Pinchot's announcement of his purpose to pre-empt a title for a State-wide party, to permit his independent candidacy at the November election in the event of the Luzerne County vote being declared invalid, was a foregone conclusion. Nobody imagined that he would for a moment accept as final a court decision that would deprive him of the Republican nomination won at the primary election, especially a decision based on a technicality. Should the Brown organization's attempt to have the Luzerne County ballots thrown out prove unsuccessful, it is not likely that the proposed independent ticket will be utilized; but it is a step taken by Mr. Pinchot and his friends to be on the safe side."

COLOR LINE EXTENDS TO WAR MOTHERS.

The "color line" will not down. A recent outstanding demonstration of the fact is found in the failure of the War Department to obtain transportation on any major shipping line, for the Negro Gold Star Mothers and widows who are being sent to Europe, this summer, at government expense. While various reasons are said to have been given by the Steamship companies for their inability to accommodate Negro mothers, there is but one real reason, and that's one of color.

We suppose the Negro boys who went to Europe, as a compulsory governmental act, were as welcome as were whites going on the same mission; but now, some ten years later, it is found necessary for their mothers and wives to go in a group of their own color.

The War Department has solved the problem by engaging transportation on a freight-passenger vessel, where the accommodations are said to be

equal to those given white women on the regular passenger vessels, the plans for which are apparently defended by the War Department, especially as it is the only solution to be found.

Secretary Hanley has issued the following statement, in part:

"After thorough study, the conclusion was reached that the formation of white and Negro groups of mothers and widows would best assure the contentment and comfort of the pilgrims themselves. No discrimination as between the various groups is contemplated. All groups will receive like accommodations at hotels and on steamships, and the representatives of the War Department will, at all times, be as solicitous of the welfare of the Negro mothers and widows as they will be of the welfare of those of the white race.

"The journey will be a severe tax on those making it, as it will take them into strange surroundings and away from families and friends for a period of about six weeks. The War Department has been motivated by the desire to relieve this strain in so far as possible by not disturbing the normal contacts of individual pilgrims. It would seem natural to assume that these mothers and widows would prefer to seek solace in their grief from companions of their own race.

"A request has been made that these Negro mothers and widows be placed in groups with white mothers and widows. The War Department, of course, has no objection to members of one group joining other groups provided they are welcome by the groups concerned. Without such welcome it can be understood that this action would not be conducive to the peace and comfort of the pilgrims of either race."

CONTRASTING CANDIDATES.

The political situation in Maryland presents a strange and remarkable revolution in the contrasting characteristics of the two candidates for Governor, a situation which has never before faced the people of the State.

Governor Ritchie is a representative in every respect of the highest type of the old Anglican, professional, hereditary aristocracy, from which practically every Governor from the Colonial settlement to the present time has been chosen. In fact, no more thorough representative of that class has ever occupied the chair of Chief Executive of the State.

Mr. Broening represents the exact opposite, so far as heredity is concerned. His people have never been, in any way, allied with the sort of people from whom the Governor has sprung, either in race, religion or association.

The Governor and his people have always been members of the Anglican or Episcopal Church.

Mr. Broening's have been disciples of Martin Luther, and members of the Lutheran Church.

Mr. Ritchie's people have always been Whigs or Democrats in generations past.

Mr. Broening's have been Republicans ever since they came to America. The environment, social and political, in their lives has been in direct opposition to each other. In education their careers have been utterly dissimilar. Mr. Ritchie has had all the advantages that position and association could give him. Mr. Broening has been largely self educated, and has had no extraneous aid. In his career so far as what is known as culture could give, what he is owes entirely to himself—to his own industry, and personal exertion.

In one very important particular they are alike. Both have been in public life practically all their days, since they became of age.

Both have been successful office seekers, and both have held high public positions, and the experience of both should fit them for dealing with public questions of all sorts.

Both have therefore had in their favor the best sort of training, and what is of the greatest value to them is that both are industrious, to a marked degree, and neither has ever been accused of laziness, or intentional neglect of either public or private responsibility.

Both have been before the people so long that their records are open books, and even the most critical, as well as the most indifferent, may read with ease.—The Marylander.

Maze of Galleries and Halls in Hill of Cuma

Three complete subterranean halls, ranging from 600 to 900 feet in diameter, have been discovered in the celebrated caves of Cuma, near Naples, in which the nine sibyls of Roman history are said to have written their books. Only three of these books have survived.

The halls were discovered only after the removal of thousands of tons of earth. The excavators, working under the direction of Professor Maturi, traced an underground gallery a mile long and found that the interior of the hill of Cuma, which is ten miles from Naples overlooking the sea, consists of a maze of galleries and ancient halls resembling basilicas and wonderful shrines.

A subterranean temple of Apollo was also discovered. A statue of the Greek god was erected there in the days of the Emperor Augustus. Although the statue has now disappeared the great niche remains.—New York Times Magazine.

Monarch's Neat Rebuke to Overzealous Priest

King Leopold of Belgium—merry old soul—had a caustic wit. On one occasion when he was at his chalet at Ostend, the parish priest approached him and asked for a private word with him. When the two were alone, the priest began to read Leopold II a long sermon:

"Sire, I am profoundly grieved," he said. "There is a rumor, I am sorry to say, that your majesty's private life is not marked by the austerity suited to the lofty and difficult task which God has laid upon the monarchs of this earth. Remember, sire, that it behooves kings to set an example to their subjects."

For 20 minutes the king listened patiently to the utterances of the good man, until the priest desisted from want of breath, relates Evelyn Graham (in his authorized biography of King Albert, nephew of Leopold).

"What a funny thing, Monsieur le Cure," said the king, fixing him with a cold look and smiling slightly. "Do you know, people have told me exactly the same thing about you! . . . only I refused to believe it."—Kansas City Times.

Little Profit Found in Search for Sensation

A time comes to most of us when life means just a little more than playing around. We must not think for a second that there should be no play. That would be unwise. But what is foolish is the attitude that brings us to the belief that, to gain happiness—for that is, after all, what we are trying to get—we must indulge in all sorts and all kinds of fun and frolic.

Sometimes it extends beyond that: we seek every kind of sensation we possibly can in our pursuit of gaiety. Whenever a new idea is mooted we go after it with renewed vigor, in the hope that the boredom of life—as some limited minds regard it—will be changed to a really good time.

We only manage to secure the maximum of contentment by accepting the debits and credits—taking the former at their real valuations, and making the utmost of the credits.—Exchange.

Nature Gives Warning in Odors That Offend

It may be regarded as a safe rule to regard offensive odors as associated with poisonous substances. Sewer gas, though not necessarily infectious, is nevertheless known to be harmful because of the poisonous and malarious substances of which it is composed. The deadly carbonous oxide, though itself odorless, is almost invariably associated with other gases which betray its presence. The sense of taste also serves as a protection against poisonous substances. Wholesome substances, with rare exceptions, have neutral, sweet, sweetish or acid flavors. Substances which have bitter, acrid, smarting, nauseating or astringent flavors are usually noxious. So great is our perversity, we actually contaminate and render harmful perfectly wholesome foodstuffs by the addition of pepper, mustard and other hot and irritating substances which Nature warns us against.—Dr. John Harvey Kellogg in Good Health.

Millions of Hours Lost by Disabling Illnesses

On an average, each person in the country has at least one disabling illness every year, the committee on the "cost of medical care" has reported after a survey of various sickness reports compiled by the United States public health service and other organizations.

Men have a disabling sickness about once a year, women about twice and children over twice during the school year. Colds, bronchitis, grippe, influenza and pneumonia are oftenest the cause of these disabling illnesses and cause the longest disability. On the same basis of the number of cases and total time lost, digestive disorders and diseases also take a high place.

About 130,000,000 cases of disabling illnesses occur in the United States each year. Adding nondisabling illnesses more than doubles the figure, the committee reported. The 36,000,000 wage earners in the country lose at least 250,000,000 work days a year, and the 24,000,000 school children lose 170,000,000 school days a year. These figures account for only one-half of the total population.—Kansas City Star's Science Service.

Early Postal Records Destroyed by Flames

The first 60 years of American postal history are almost a complete blank because of the great fire of 1836, which destroyed the Post Office building at Washington and with it almost every vestige of postal records. Years later a postmaster general was forced to admit to congress that he was unable to supply the names of assistant postmasters general who had served from the beginning of the system.

One volume alone was saved from the flames by a youthful messenger in the office of the auditor of the treasury for the Post Office department. This book, still in existence and now under control of the chief clerk of the Post Office department, is a ledger of postal revenues for the years 1776, 1777 and 1778. So far as is known, no other postal records of the early years are in existence.—Detroit News.

POULTRY

PASTURING GEESSE
ON CLEAN RANGE

As General Rule Fowls Are
Given Freedom of Field.

The raising of geese has not been specialized like duck raising, for the reason that geese secure most of their feed by grazing. For this reason, geese are raised on most farms in comparatively small flocks. These facts are the principal reasons why geese raising offers an opportunity for most farmers to add another source of income to their spring poultry raising.

Geese may be pastured at the rate of 60 head to an acre, but, as a general rule, they are given free range. This is satisfactory so long as they are not numerous. However, if a large flock of geese is pastured on the regular pasture the live stock will not relish the pasture on account of the goose manure on the grass. Ordinarily, the number of geese raised on any one farm are not numerous enough to cause any trouble from this source.

Geese do not require a great deal of attention. After the first two weeks they are able to look after themselves if given a good range. The principal food of geese is grass, supplemented by insects and other low forms of animal life. If suitable range is not accessible it is not advisable to go into geese raising.

Houses that will protect the geese from rains in summer and from snow, cold winds and dampness in winter are the only essentials from the housing standpoint. Low, open front sheds are often used for this purpose. Care should be taken to see that the interior of the house is dry at all times. Geese like to swim and they will exercise in the snow practically all day, but they should have dry places to roost or they will contract rheumatism. The floor of such houses should be of earth. This should be covered with straw and renewed often enough so that it will be dry. A thin coating of sand often proves helpful in keeping the house dry.

Geese mate more successfully after they are two years of age than when mated earlier. This is more true of the females than of the males. Occasionally yearling geese will produce fertile eggs, but they cannot be depended upon. Small, undersized geese should not be used for breeding purposes. On the other hand, extra large, coarse geese are not as satisfactory as those of full development, but not so coarse. With most breeds the gander will mate with from three to four geese.

Ohio Station Advocates All-Mash Chick Ration

The rearing of chicks to maturity on an all-mash ration is a rather new venture in poultry keeping, and we shall have to take the word of those who have tried it as to its value. This system has been developed and advocated by the Ohio agricultural experiment station, at Wooster, and is fully described in a bulletin issued by this station. They state that they have found the method successful on their experimental farm and equally so in the hands of other poultrymen of the state. Some other stations, where it has been tried, discount these claims somewhat. There is no question as to the attractiveness of the plan and the results at the Ohio station should be sufficient to give warrant for trying it out.

Those who have followed the teaching of poultry experts over a considerable period of years have learned that there is little that can be considered as absolutely fixed, even in the seemingly fundamental principles of feeding and care. Revolutionary findings are apt at any time to upset long accepted practices. The all-mash ration should not have scratch grains added to it, since it combines in itself both the scratch and the mash and the addition of more scratch grain would unbalance it. That is, it would change the proportion of protein foods to the other ingredients and presumably lessen its value. An all-mash should be more coarsely ground than other mashes, to make it more palatable.

Raising Turkeys

Turkeys can be raised by artificial methods with less loss and more profit than by the hen-hatched and hen-brooded method. Each year the matter of growing more than 20 or 30 per cent of the poults has become more difficult. That the association of turkeys and chickens is one of the leading causes for the heavy losses in baby poults and that turkeys can be raised in brooders and hatched in incubators are comparatively new developments in the turkey situation.

In Case of Roup

Should any of your flock begin to show symptoms of roup, no time should be lost in starting measures to prevent further spread. All houses, pens, coops and runs should be thoroughly cleaned and sprayed with a strong solution of a good coal tar dip and disinfectant. Droppings, litter and trash of every description should be removed and burned. All unnecessary equipment of every kind should be removed from houses and yards and stored elsewhere.

If you want a cigarette
that is milder and of
better taste..

Smoke

Chesterfield

MILDER, YES—BUT SOMETHING MORE.
Chesterfield offers richness, aroma, satisfying flavor.

BETTER TASTE—that's the answer; and that's what smokers get in Chesterfield in fullest measure—the flavor and aroma of mellow tobaccos, exactly blended and cross-blended. Better taste, and milder too!

They Satisfy

Varying Beauty Standards

The standards of beauty vary greatly in different parts of the world. While femininity of the Western world is engaged in starving herself for the purpose of defeating any possible accumulation of fat, the ladies of the eastern countries are adopting an entirely different regime for the purpose of making themselves as attractive as possible by piling on every ounce of flesh that it is possible to acquire. In China and Japan the women punish themselves to keep their shapes within bounds, for there is no place for adiposity. African women distort their lips to hideous proportions with the idea of making themselves beautiful.

My Lady Nicotine

My Lady Nicotine was named after a gentleman—Jean Nicot of Nimes. He served as French ambassador at Lisbon under Francis II, and while there fell in with a Flemish merchant who gave him some seeds of the tobacco plant.

Portuguese adventurers had brought the seeds from South America. Nicot carried them back to France in 1539, and his countrymen, after experiencing the pleasures of indulgence in the crushed leaves of the plants which grew from them, conferred upon the plant the name of the ambassador. Hence to this day, botanically, it is Nicotiana, and its active principle is known as Nicotine.

Combating Greedy Sea

In southeast Essex, England, where much of the land lies below the level of the sea at high tide, an interesting experiment in protection from sea erosion is being made. A plant, known as *Spartina Townsendii*, has been placed in various spots where the sea encroaches. This curious grass-like vegetation is able to take root even in mud where a man must sink and, after getting a grip, it raises the level of this mud several inches a year, until eventually, it becomes high and dry land. Pastures that have been lost for many centuries are now being regained by the help of this friendly plant.

The members of the Bethel Sunday School received their annual treat...

Mr. and Mrs. Jesse Smith, of Ohio, returned home Tuesday, after a week's visit with M. A. Zollikofer...

Carolyn Shriner is spending some time in Hanover, with her mother and family...

Miss Tillie Kroh had as guests, last week, several of her nurse friends...

Mrs. George Stultz remains critically ill.

Mrs. E. K. Fox is on a ten days' visit with friends in Maine.

John Bural, who remains an invalid, was presented with a radio by a friend, last week...

Mr. and Mrs. Theodore Eckard, of Blue Ridge Summit, moved to this place, Tuesday, taking an apartment at the home of Mr. and Mrs. Emory Stoner...

Mrs. Clarence Lockard came home, Sunday, after a week's stay in Philadelphia.

Will Simpson and Miss Louise Becker, of Wilmington, were week-end guests at T. L. Devilbiss'.

Mr. and Mrs. James Gibbons, Mr. and Mrs. Wm. Haslup, Baltimore, Miss Missouri Smelser, Westminster, were Sunday visitors at Edward Eckard's.

Quite a number from here spent last Sunday at a bathing resort down on the Shore.

A sale was held Wednesday afternoon at the old blacksmith shop. The tools and fixtures of the late Ephraim Bowersox were disposed of.

Mr. and Mrs. Horton, son Henry, and Miss Edna Cantner, Huntingdon, Pa., are spending the week at H. B. Fogle's. He is now having his vacation. He is one of the employees of the Westminster Savings Bank.

KEYMAR.

Mrs. Wm. F. Cover is seriously ill, at her home. Her daughter, Mrs. Charles Gardner, of Blue Ridge Summit, is here helping care for her.

Mrs. Marshall Bell spent last Saturday in Thurmton, at the home of her sister and family, Mrs. Nora Ambrose.

Callers at the home of Mr. and Mrs. R. W. Galt, Tuesday afternoon, were: Franklin Weaver, daughter, Nancy, and nephew, of Hunterstown; Robert Weaver, of York, Pa.; and Miss Jennie Galt, Taneytown.

Mrs. Dora Repp and daughter, Miss Elva, Ephrata, Pa., spent last week-end at the home of Mr. and Mrs. Scott Koons.

Miss Lizzie Birely, of Feezersburg, spent Tuesday in this town, visiting the sick and calling on friends.

Some of the Keymar folks have heard from the ladies who left for Europe, last Friday. They say they are having a wonderful time. They will reach Europe this Friday, being on the steamer eight days.

Mrs. J. C. Fields and son, Stewart White, of York, Pa., spent Tuesday at the home of the former's sister and brother-in-law, Mr. and Mrs. M. W. Bell.

Mrs. R. W. Galt spent Tuesday in Taneytown, at the home of Mr. and Mrs. C. H. Long, and on Wednesday, Mrs. Long, accompanied by Mrs. Galt, spent the day in Emmitsburg, at the home of Mr. and Mrs. Basil Gilson.

George Galt, of Taneytown, spent last Sunday in Keymar.

Mrs. Elsie Wilson, Mrs. Leslie Lovell and niece, Mrs. Elmer Nusbaum, and daughter, Mary, and Mr. J. Whitmore, all of Union Bridge, called on Mr. and Mrs. J. C. Whitmore, on Thursday.

Mr. and Mrs. Wm. Bohn, Pittsfield, Mass.; Mrs. F. J. Fowler, New Windsor, spent last Tuesday afternoon at the home of Mr. and Mrs. J. C. Whitmore, near this place.

Mrs. Fannie Sappington and daughter, Miss Cora, and grand-daughter, Miss Francis, spent Tuesday, in Frederick.

NEW WINDSOR.

Mrs. Ellen M. Hawk is visiting on the Washington road, near Westminster.

George Hull, college custodian, is on the sick list.

The new dean for B. R. College moved here, from Virginia, on Monday.

Duval Brown and family, of Baltimore, are visiting at Isaac Smelser's.

Marshall Wolfe and family are visiting in Western Maryland.

Miss Hanna Shunk is visiting Mrs. Grace Fisher, Baltimore.

The Thurmton B. B. nine, of Frederick Co. League, will meet the Unionville nine, on the college diamond, on this Saturday afternoon, at 3:00 P. M.

The M. E. Church will hold their annual lawn fete on July 25 and 26.

Stanley Schnauffer and family, of Towson, spent Sunday last with Mrs. Emma Snader.

FEESERSBURG.

Mr. and Mrs. Frank Davis moved some of their household goods to sub-urban Baltimore, on Monday, where they expect to reside in the near future.

Mrs. Belle Rinehart can walk across the yard now or sit on the porch all-day, and was out for a ride on Monday morning.

Ross Wilhite had the misfortune to fall from a load of wheat, last week, when the sheaf on which he stood skidded off. The Dr. examined him, and he has suffered in one shoulder and wrist.

Mrs. Jesse Cook (nee Martha Bowers) aged about 90 years, died on Saturday evening, at the home of her sister, Mrs. Benj. Grossnickle. She suffered a fall on the stairway, some months ago, and was confined to her room since then. Funeral service was in the Church of the Brethren, Union Bridge, on Tuesday morning, and burial in the town cemetery.

A Short Course of Teacher Training instruction is in progress at the church in Middleburg, several evenings this week. There will be communion service at the same place on Sunday evening. A Vacation Bible School under the leadership of Rev. C. Archer and Paul Hyde will open in the Church Hall, in Middleburg, next Monday, at 9:30 A. M. This is a fine opportunity for the young folks and usually those who attend seem much interested.

The 2nd. quarterly report of Mt. Union S. S. gave an average attendance of 57. Number that were present every Sunday, 24; and of those who missed but once, 7. Two men completed a year of perfect attendance.

Mrs. Frank Keefer and Mrs. Andrew Graham were sick folks over the week-end, but are getting back to normal again.

Mother Utermohlen-Gilbert is spending some time with her daughter, Mrs. Clarence Blacksten and family, near Uniontown.

Mrs. Annie Harbaugh, Biddinger, of Linwood, is staying with her sister, in Middleburg, during July.

The F. Littlefield family spent the week-end at Green Gates, all hale and hearty after their sight-seeing travel. They say "A wonderful country, and very enjoyable tour, but glad to be home again."

G. W. Crouse with the Starr Co., is painting at Clear Ridge Inn, this week.

Mr. and Mrs. Cleon Wolfe visited relatives in Pleasant Valley, on Sunday evening.

The George Delphy family gave their mother a surprise on Sunday, when they all arrived home with loads of good things to eat. About 35 persons, including the grand-children.

H. B. Fogle and family, of Uniontown, with their guests, Mr. and Mrs. Chas. Horton and son, Henry, and Miss Edna Cantner, of Huntingdon, Pa., and Miss Margaret Hoy, of Philadelphia, visited the Birely's, on Monday evening.

The thrasher and nine men have called and performed some hot heavy work in a few hours. The wheat in this section has yielded much better than was prophesied earlier in the season.

Poor gardens, pasture and corn fields! All vegetation requires rain, but here's St. Swithin's Day, he's only been gone 1068 years, and now we'll see!

DETOUR.

Mrs. Bertha Dorsey, of Frederick, is spending some time with Mr. and Mrs. Ernest L. Harner.

John Saylor is visiting friends in Philadelphia, Pa.

Mr. and Mrs. James Warren, Mr. and Mrs. Guy Warren and daughters, Louise and Rhea, spent the week-end with Mr. and Mrs. F. Warren, at Winchester, Va., Miss Louise remaining for a longer visit.

Mr. and Mrs. Ernest Harner and daughter, Linda-Lea, were week-end guests at the home of Mr. and Mrs. Samuel McClellan, at Delta, Pa.

Milton Wimmer had the misfortune to break his arm, while cranking his car.

Edward Mentzer fell off a load of wheat, while working at Wilbur Hummer's. Lucky no bones were broken.

Miss Louise Sharrer spent several days with Mr. and Mrs. Sydney W. Shry, Frederick Co.

Mrs. Forney Young and daughter, of Frederick, are spending some time with Mr. and Mrs. Wm. D. Schildt, Miss Nellie Price, of Frederick, also spent a few days at the same place.

Miss Eleanor Wilhite spent some time with her uncle and aunt, Mr. and Mrs. Ross Wilhite, near Middleburg.

Roger Hahn fell from the mower, on Monday, and was cut and bruised quite a bit. Lucky he was not hurt more seriously.

Mr. and Mrs. Herbert France and daughter, of Arlington, spent Thursday with Mr. and Mrs. Chas. E. DeBerry.

EMMITSBURG.

Mrs. Robert Galt, Keymar, and Mrs. Claudius Long, Taneytown, visited Mrs. Harry W. Baker, and other friends here, on Wednesday.

Miss Pauline Baker spent a few days, last week, with her cousin, Mrs. Marker E. Lovell, New Windsor.

Mr. and Mrs. Charles Harner, Mrs. Houser and sister, spent Wednesday in Baltimore.

Mrs. Sarah Schmure, of Hollywood, California, is visiting at the home of Mr. and Mrs. M. F. Shuff.

Mrs. Lucy Keiper, of Lancaster, visited her sisters, Mrs. Hostetter and Mrs. Martin, at Fountain Dale, and Mrs. Emma Nunemaker, several days this week.

Little Helen and Master David Frailey had their tonsils removed, on Monday, and are doing nicely.

Miss Lilly Hoke, of Baltimore, is spending a month with her sister, Miss Lottie Hoke.

A birthday social will be held at Tom's Creek Church, on Saturday, July 26th. Everybody welcome. Refreshments served and games played.

Dr. and Mrs. Clore, of Pontiac, Ill., Mr. and Mrs. Mace Moberly, of Hammond, Ill., spent Tuesday night with Mr. and Mrs. Harry Baker.

Communion Services will be held this Sunday, July 20, at Tom's Creek M. E. Church, at 9:30 A. M.

High Place of Flowers

in Art of Decoration

We are indebted to the flowers for what happiness their beauty affords us, to many for their fragrance, and for the joy and pleasure in growing them in our gardens, but the extent of our indebtedness does not end here, according to a flower enthusiast.

"Early in the history of art the flowers lent their aid to decoration," he says. "The acanthus, which gave its leaves to crest the capital of the Corinthian column, the roses conventionalized in the rich fabrics of ancient Persia, until they have been thought sheer inventions of the weaver, are among the first items of an indebtedness which has steadily grown in volume until today, when the designers who find their inspirations in the flowers are a vast and increasing host. In a modern mansion of the best type the outer walls are enriched with the leonine beauty of the sunflower; within, the mosaic floors, the silk and paper hangings, repeat themes suggested by the vine, the wild clematis and the mayflower. The stained glass windows, from New York, where their manufacture excels that of any other city in the world, are exquisite with boldly treated lilies, poppies and columbines."

Championship Boxing Belts

When the sport of boxing appeared to be in some danger of languishing in 1909, Lord Lonsdale drew up a new scale of weights and conditions to govern title bouts, and, with the idea of adding distinction to the bout, he donated a challenge belt for each weight. These trophies are valued at \$2,500 each, and consist of leather, gold and colored enamel. The conditions make it possible for a boxer actually to possess the belt by winning the title three times, not necessarily in succession. Eleven of these belts had been won outright in 1924 and eight were up for competition.

BIRTHDAY REUNION.

A reunion was held at the home of Mr. and Mrs. James Rodgers, near town, on Sunday, July 13th., in honor of Mrs. Rebecca Brown's 80th. birthday by her children, grand-children and great-grand-children. Dinner was served at noon and refreshments were served on the lawn in the afternoon. Mrs. Brown received two birthday cakes, one was cut and a piece given to each as a token of remembrance. Mrs. Brown received many useful gifts.

Those present were: Mrs. Rebecca Brown and Mr. and Mrs. James R. Rodgers, near town; Mrs. Chas. Kemper, Mr. and Mrs. Verley Brown, and daughters, Mildred and Dorothy; Mr. and Mrs. Milton Brown, daughter, Treva; Mr. and Mrs. Theodore Brown; Mr. and Mrs. Vernon Brown, son Homer; Mr. and Mrs. Samuel Straley, daughters, Naomi and Nadine; Mr. and Mrs. Russell Brown, son Noah; Mr. and Mrs. Fred Kuhn, daughter, Helena; Mr. and Mrs. Fern Brown, daughter, Rosella, Curvin Baker and Mrs. Lydia Miller, (who recently celebrated her 84th. birthday), all of Hanover; Mr. and Mrs. John Brown, of Union Bridge; Mr. and Mrs. Milton Baum, daughter, Gladys, Baltimore; Mrs. Milton Powell, daughters, Martha, Mildred, Maryland Helen and son, Russell; Mrs. John Kemper, son Preston; Mr. and Mrs. Wilmer Myers, daughters, Dolores, Shirley and son, Gordon, and William Myers, all of Pleasant Valley.

MARRIED

SPENKER—SPANGLER.

Mr. Elmer Spenker and Miss Nettie Spangler, both of the vicinity of York, Pa., were united in marriage on Monday afternoon, July 14, by Rev. Guy P. Bready, at the Parsonage of the Reformed Church.

DIED.

Obituaries, poetry and resolutions, charged for at the rate of five cents per line. The regular death notices published free.

MRS. ALICE S. FUSS.

Mrs. Alice S., wife of the late Charles O. Fuss, died at her home on Baltimore St., Taneytown, on Thursday morning, at 10 o'clock, aged 75 years, 3 months, 1 day. She had been ill since June 23, the day when her husband died, death being due to an infection contracted in dressing his wound.

The death of both husband and wife, within less than a month, both deaths being of a similar character, is not only very unusual, but extremely sad, and the more so, if possible, because of both being such estimable citizens.

She was the daughter of the late Andrew and Matilda Eckard, and is survived by two children: Mrs. Olive E. Wolf, of Baltimore, and Merwyn C. Fuss, of Taneytown; also by seven grand-children, and one brother, John W. Eckard, of Taneytown.

Funeral services will be held at her late home in Taneytown, on Sunday, at 2 P. M., with interment following, in the Church of God cemetery, in Uniontown. She was a member of the Uniontown Church of God for many years. Her pastor, Rev. J. H. Hoch, will have charge of the service, assisted by Rev. A. T. Sutcliffe, pastor of the Lutheran Church, Taneytown.

In Memory of MR. JAMES C. KING.

Who died July 23rd., 1929. One year has passed since that sad day When one we loved was called away. God took him home, it was his will. But in our hearts he liveth still.

Loving and kind in all his ways. Upright and just to the end of his days. Sincere and true in his heart and mind. Beautiful memories be left behind.

As the evening sun is setting Oft times we sit alone In our hearts there comes a feeling Wishing father could come home.

The stream of time rolls on, But still the vacant chair, Reminds the smile, the love, the voice, Of one who once sat there.

Sadly missed by HIS FAMILY.

For Meditation

By LEONARD A. BARRETT

THE AUTOMOBILE

THE time was when the automobile was regarded only as a luxury. It was one of those things which people could do without but would prefer to possess. The difference between the demand made upon one for necessities and for luxuries is very great. The demand of the latter is about three times the former. In other words, if one were willing to eliminate the luxuries or nonessentials, the budget of expenditures would be reduced about two-thirds. The automobile came in the pleasure class and people would go to almost any extreme measure in order to possess one, even to mortgaging their homes or other belongings.

Times have changed. The automobile today is regarded more of a necessity than a luxury. Its use has been so commercialized that nearly every business concern depends upon it for delivery purposes. The speed of the age makes such heavy demands upon one's time that an automobile has become necessary to take one to and from the place of daily toil.

A large share of the prosperity of our country depends upon the automobile activity. A recent report of the consumption of steel stated that about one-fifth, or eight million tons, is consumed by automobile industries. It is interesting to note the rise of many automobile accessories concerns which have developed since it has become an economic necessity. Prosperity depends to a large extent upon employment. The automobile industry, according to a recent annual report, gives employment to more than two hundred thousand persons, who must produce the steel. Add to this the very large number of employees who must deliver the other parts and actually build the machines, and we have a total, which has thus far not been authoritatively estimated.

The airplane is still in the experimental stage. How soon will it become an economic necessity?

(Copyright, 1930, Western Newspaper Union.)

GABBY GERTIE

"A lean two would naturally incline toward a larger structure."

Gilbert Roland

Gilbert Roland's real name is Luis Antonio Damaso de Alfonso. He was born in Chihuahua, Mexico. Following the footsteps of his father and grandfather he became a bull fighter. In 1924 he visited Los Angeles and was "taken on" in pictures. He was first in the "talkies" in "New York Nights" and besides has been seen in a number of highly successful pictures, playing prominent artists. He has black hair and dark brown eyes.

CHRISTIAN ENDEAVOR TOPIC.

Topic:—Some Good Summer Reading Eccl. 12:11, 12; I Tim. 4:12, 13.

Written by—John S. Hollenbach.

Dear Editor:

"Of making many books there is no end." The truth of this statement is becoming more apparent every day. Increased ease in production has resulted in a greater volume of production. So books and magazines are available in a great abundance.

Now it is said that "reading maketh a full man," and that "we are what we read plus what we read." We ought to be impressed with the need and value of reading.

In the midst of the multitude of material it is necessary to exercise careful discrimination in the selection of that which shall become a part of us. Not all that appears on the printed page is proper and fit for our perusal. The love of money is the root of the evil of producing and selling salacious and sensational books and magazines, the reading of which can not help but be harmful. We take every precaution not to take poison into our bodies. Let us be, at least, as much concerned about what goes into our minds and hearts to shape our characters.

Books that we read should be wholesome and profitable. They should not only be harmless but should contain a contribution of positive good. Old books, that are tried and true, can well be re-read. There is a sort of a modern style akin to jazz in music, that lacks the dignity and poise and depth of the masters of literature. So let us not discard books merely because they are old or read them simply because they are new.

A book that was recently brought to my attention but which I have not read is entitled "From Immigrant to Inventor." It portrays the rise of Michael Pupin, a foreign lad who came to America, in the face of great obstacles to world prominence as a scientist. There are many books of biography that can inspire us and make us realize that our own difficulties are as nothing compared with those of our greatest men faced and overcome. Biographies confirm the saying, "Truth is often stronger than fiction."

It is well for us to include in our reading the Bible and other devotional literature. Poetry that is worthy of the name should also be included. We need to realize that it is not how much we read but how intelligently and thoroughly we read that determines the effect upon us.

If in doubt about a book you contemplate reading, or if you want suggestions in this matter, it is well to consult your pastor or some other responsible person.

SALVAGING OF USED CARS PROVES A SUCCESS.

Following the systematic wrecking of more than eighteen thousand antiquated motor cars, the Ford Motor Company today announced that the salvaging of materials obtained in this manner is practical and that it is now increasing its facilities for continuing the work on a more extensive scale.

At the present time a force of 120 men at the Rouge Plant, Dearborn, dismantle these apparently worthless hulks at the rate of 375 cars every sixteen hours. Many parts, such as tires, are salvaged in their entirety, other materials are being converted into useful articles, while the steel is remelted in furnaces to do its bit in the manufacture of Ford cars and Ford trucks.

The derelicts are bought from Ford dealers at a fixed price of twenty dollars a car. There is no restriction as to make, age or condition, except that all cars must have at least some semblance of tires and a battery.

To date the Ford Motor Company has confined itself to the Detroit District. Many dealers bring their trailers loaded with junked wrecks to the Rouge plant and depart with new Ford cars aboard. To date more than sixty different makes have walked the plank.

The salvaging of cars that have outlived their usefulness serves three ends. It will rid highways of motor menaces that are dangerous both to life and traffic, it will to a large extent free the landscape from unsightly junk piles, and it will convert into usefulness material that would otherwise go to waste.

Experiments were begun by Ford engineers on February 5. Today, three moving conveyors are in operation in the Open Hearth building. Two are used for dismantling purposes, one for Fords and one for other cars. The third carries scrap iron and steel to one of the ten open hearth furnaces and salvaged material, such as batteries, tires and floor boards, to waiting trucks.

The present method is to first drain the cars of gasoline and oil, both of which are salvaged. Grease is also saved. The cars are then hauled into the building and placed on a progressive conveyor. The headlight lenses and lamp bulbs are recovered. The spark plugs and battery are taken out. All glass is removed. That which is whole or may be cut to useful sizes is utilized for glazing in Ford Plant buildings. The broken bits are sent to the Rouge glass factory for remelting. Floor boards travel to the box factory to be used for crate tops.

The cotton and hair obtained from upholstery and roof are separated, baled and sold. The muslin from car tops and the better grade of upholstery covers are made into buffer and polishing wheels. The imitation leather got from curtains and tops is immediately transferred to electric sewing machine operators near the conveyor line, to be transformed into aprons for use in the blacksmith and other shops. Smaller pieces and trimmings are fashioned into hand pads.

Gasoline tanks are pressed and baled for the recovery of tene steel. Overhead compressed air wrenches that have been set in reverse unscrew the wheel nuts. When the wheels are removed the tires are inspected. If the tread is good they are sold as used tires at the commissary. Otherwise the entire unit is placed in automatic shears which severs both tire and rim. The tire is quickly stripped and tossed into a waiting cart to be sold as old rubber. The rims join others for use as furnace scrap.

Horns are salvaged. Likewise hubcaps for aluminum, ignition wire for copper, oil cups for brass, bushings for bronze and other bearings for babbit. All metals are kept separated by depositing each kind in steel barrels.

As the conveyor-propelled and now all but dismantled cars reach a station near the end of the salvage line, men with oxygen torches burn the motors loose from the frames. Overhead compressed air hoists are attached to the motors and they are swung to a Niagara washer. This bath of boiling water and soda ash expels them from the opposite end free from grease and dirt. Meanwhile what is left of the cars continues on the conveyor into a twenty-two ton press which crushes them as one would demolish so many match boxes. The remains are then transferred to the third conveyor which carries them to the furnace doors.

All Model T engines are conveyed past the washing machine to a group of specially designed presses. These segregate the parts for remelting according to the metal each contains. As the salvage line serves as an anti-theft to an assembly line, the multiple screw presses here used operate in reverse. Two, similar to the many that once tightened Model T bolts, work in an opposite direction and so unseat bolts, six at a time, from the face of the transmission on flywheels. Other presses drive the shaft out of the transmission, strip the bushing from the shaft, and take the bronze bushings from the clutch. Another forces the bushings out of the drums and gears and another press removes the wrist pin and bronze bushings from the piston.

As the cars brought in by Ford dealers arrive at Dearborn, they are deposited in a field near the Open Hearth Building. Besides present well known makes the list of arrivals includes many that are reminiscent of other days. Among them are the Apperson, Velle, Bay State, Dart, Case, Maxwell, Scripps-Booth, Jewett, Elgin, Jeffery, Gray, Earl, Columbia, Mitchell, Briscoe, Saxon and many Model T Fords.

KOONS MOTOR COMPANY TANEYTOWN, MD.

SPECIAL NOTICES

SMALL ADVERTISEMENTS will be inserted under the heading of One Cent a word, each week, counting name and address of advertiser—two initials, or a date, counted as one word. Minimum charge, 15 cents.
REAL ESTATE for sale. Two Cents each word. Minimum charge, 25 cents.
APPLY AT RECORD OFFICE ads not accepted—but will receive sealed replies. No personal information given.
THIS COLUMN is specially for Wants, Lost, Found, Short Announcements, Personal Property for sale, etc.
ALL NOTICES in this column must be uniform in style.

WANTED—Butter, Eggs, Poultry, Lard, Squabs and Calves at highest prices. 50c a head for delivering Calves. Highest prices paid for Hides and Furs of all kinds.—Frances E. Shaum's Produce. Phone 3-J 8-28-1f

FOR SALE—Registered Holstein Stock Bull.—M. E. Wantz.

PURE CREAM for sale, sweet or sour, in any quantity.—Mrs. J. N. O. Smith.

TWO FRESH COWS for sale by Gordon Stonifer, near Keysville.

MAKE US AN OFFER—Will accept any reasonable offer for 10 shares of Dr. R. F. Wells Company Stock. Par value \$10.00 per share. Address "L" Carroll Record. 7-18-2t

THE EMMITSBURG COMMUNITY Association Pic-nic will be held Wednesday, Aug. 27th, in Shriver's Grove, 2 miles east of Emmitsburg.—W. F. Troxell, Sec. 7-18-1f

FOR SALE—Sow and eight pigs.—Herbert Smith, Greenville.

THE HARNEY (Lutheran) Sunday School Pic-nic, will be held in Null's Grove, on Saturday, July 26th. Supper will be served at 5 o'clock. Band of Music will be present.—Committee. 7-18-2t

KEYSVILLE PIC-NIC, Reformed Sunday School, will be held Saturday, Aug. 2nd. See ad in this issue.

THE BARLOW COMMUNITY Association will hold their Annual picnic in Chester Shriver's Grove, on Wednesday and Thursday, August 20-21st. 7-11-6t

COLLIE PUPS for sale. Apply to Halbert Poole, Westminster, R. D. No. 2, Phone 86M. 7-11-1f

FAT HOGS WANTED—Who has them? Stock Bulls loaned to reliable farmer.—Harold S. Mehring. 1-24-1f

FOR SALE—Fine Homes, improved by Brick and Frame Houses and all improvements, in and out of town.—D. W. Garner, Real Estate Broker. 10-5-1f

Name "Taffy" Traced to Javanese Word for Rum
 The American word taffy and the British word toffee, for candy made of molasses, originate from the Javanese word for rum: tape, or tafe, distilled from molasses. Very often the home-bound cargoes of the old-time sailing ships trading in the South seas were molasses from Java.
 The word came to the Philippines with the Indonesian colonies from Asia that had long inhabited the mountains of northern Luzon; these people, however, do not make rum, but ferment wine from rice and give it the Javanese name for rum. Some tribes call the wine tapuy, some tappel, both obvious variations from the original tape.
 Another variation is the name of the wine from sugar cane juice, bahl. When the British freebooter, Captain Anson, conveyed a prize he had taken, the silver-laden Spanish galleon Cabadonga, around Luzon toward Macao, he sent ashore for water and the islanders gave him men copious drinks of bahl that had lightning effect.
 Returning to ship, the men's tongues were thick, and in explaining their condition to Anson they said they had been enjoying a few cups of bahl; Captain Anson charted his channel and named it Bahl channel, and the islands, really the Babuyan group, he called Bahl's islands. So goes, 'round the world of commerce, a bit of taffy on the tongue.

Romantic French Castle
 A castle which suggests the romance and magic of the age when knighthood was in flower should stand boldly on the summit of a precipitous rock or hide mysteriously among the shadows of a mighty forest.
 Chambord, near Blois, for this reason is one of the most romantic of the French chateaux on the Loire. It is surrounded by mossy walls 24 miles around and its forest has nearly 3,000 acres.
 The dozens of pinnacles, lanterns, and towers are visible for miles—looking on the dim horizon like a misty Oriental city. The grand circular stairway which winds upward in two directions at once is the glory of its interior—but there are 64 stair-cases in all.

Origin of Mayas Unknown
 Where the Mayas came from is one of the world's ancient mysteries. Research is now going on in the Vatican library in the hope of tracing manuscripts of priests who visited America at the time of the Spanish conquest. It is hoped that these may prove a key to the Mayan hieroglyphics which have been found. At the time of the conquest the Mayas had a vast literature preserved on scrolls of papyrus. These were gathered and burned by the Spanish invaders. Despite the fact that the Mayas had evolved a complex civilization and had developed astronomy and mathematics to a stage not surpassed by the ancient Egyptians, the source of this civilization is unknown.

Crab's Emotions Shown
 That crabs have some emotions and not others was demonstrated by scientists in London recently. It was shown that a crab fettered by one claw and left with food just out of reach will starve to death, but the placing of a polyp, the crab's deadly enemy, near it, will cause the prisoner to become convulsed with fear. The shock causes the tied claw to come off so that the crustacean can scuttle away to safety.

Sleeping Sickness Checked
 Medical science has prevented the population of French Equatorial Africa from being wiped out by sleeping sickness, it was asserted in an interview by Raphael Antonetti, governor general of the colony. Although the birth rate was satisfactory, he explained, the population continued to diminish through disease which caused more deaths than there were births. This went on until 1921 when the French officials recognized the peril and took energetic action against sleeping sickness and all tropical infections.

CHURCH NOTICES.

This column is for the free use of all churches, for a brief announcement of services. Please do not elaborate. It is always understood that the public is invited.

Piney Creek, Presbyterian—Preaching Service, 9:30; Sabbath School, 10:30.
 Taneytown Presbyterian—Sabbath School, 10:00; Preaching Service, 11:00; Christian Endeavor, 7:15; Union Service, Reformed Church, 8:00.

Baust Reformed Church—Sunday School, 9:30; Communion Service, 10:30; Y. P. Society, 8:00.

Uniontown Circuit, Church of God.—Sunday School, 9:30; Preaching Service, 10:30. Theme: "Capital Punishment." Sunday School and Preaching Service at Frizellburg Sunday afternoon. Theme: "Signs of the Times." C. E. and Preaching Service at Wakefield on Sunday evening. Theme: "Is the World Getting Better?"

Uniontown Lutheran Charge, Winters—S. S., 9:30; Divine Worship, at 10:30; Catechetical instruction after services.
 Mt. Union—S. S., 9:00; C. E., 7:00; Divine Worship, 8:00; Catechetical instruction after services.
 St. Paul's—S. S., at 9:30.

Reformed Church, Taneytown.—S. School, 9:15; Service, 10:15; C. E., at 7:00; Union Service in the Reformed Church, at 8:00. The sermon will be delivered by Rev. Felix B. Peck, pastor of St. Mary's Reformed Church, Silver Run; Holy Communion, Sunday morning, July 27th; Preparatory Service, Saturday afternoon, July 26, at 2:30.

Keysville—Sunday School, at 1:00; Holy Communion, at 2:00.

Trinity Lutheran, Taneytown—Sunday School, 9:00; Preaching, 10:00; Luther League, 7:00; Union Service in the Reformed Church, at 8:00.

St. Mary's Ref. Church, Silver Run—Sunday School, 9:00; Morning Worship, 10:30; Christian Endeavor, 8:30; Evening Service, 7:30.

Silver Run Lutheran Charge—S. S., 9:30; Preaching, 10:30; Evening Service, 7:30.

Manchester U. B. Charge, Miller's Church—Sunday School, 9:30; Christian Endeavor service, 7:30.

Bixler's Church—Sunday School, at 9:30; Service of Worship, at 10:30.

Mt. Zion Church—Sunday School, 9:30; Christian Endeavor Service, at 7:15; Service of Worship, 8:00; Miller's Sunday School will hold their annual picnic in the grove, near the Church Hall, on Saturday.

Manchester Ref. Charge, Lineboro—Worship, 8:30; S. S., 9:30.
 Manchester—S. S., 9:30; Worship, 10:30; C. E., 6:45. Theme: The Baptism of the Holy Spirit.

Taneytown U. B. Charge, Taneytown Church—9:30, Sunday School; 10:30 Holy Communion Service. Sermon by Rev. Palmer M. Slenker, pastor Wolfsville U. B. Charge; 7:00 C. E. Society, Wednesday, July 23, 7:30 Mid-week Prayer and Praise Service.

Harney Church—9:30 Sunday School; 10:30 Prayer Service; 7:00 C. E. Society Meeting; 8:00 Preaching Service, Thursday, July 24, 8:00 P. M. Prayer Service.

First Washing Machine Got Inventor "In Bad"
 Therill E. Raistn of Glory, Maryland, who is credited by Country Home with being the first man to experiment with a washing machine, occupies no place in the ranks of men who emancipated women and lightened their burdens. Entirely to the contrary, such was the womanly scorn that Therill aroused in his sister Emily by his interference with the sacred Monday morning wash-rub rite, that at the age of sixty he had to leave his home forever under the suspicion of being not quite mentally sound.
 The would-be inventor, says the article, had such an aversion to work that he hated to see others toiling, and wash day brought him particularly keen pangs. Mr. Raistn took a discarded butter churn, filled it with water, soap and several pairs of overalls and induced a colored man named Benjamin to operate it.
 The idea was superb, the execution all wrong. The overalls and churn were wreckage in no time at all and there was such a furore about it that Therill moved out. "Go ahead and rub your hands off on your darned wash-board," he said, in parting. "I ain't saying you can't get clothes clean on a washboard, but one of these days you're going to have washing machines and then you'll think of me."

Man of Peace Honored for Wartime Invention
 A clergyman who evidently did not consider that there was anything incongruous in serving the prince of peace and at the same time inventing "gadgets" to help in the maiming and killing of his fellow-men has a tablet to his memory at the Tower of London—quite an appropriate place.
 He was Rev. Alexander John Forsyth, a Scotsman, who invented the percussion lock for small arms, and who also produced a detonating powder for which, it is said, he was offered \$100,000 by Napoleon. Forsyth left his quiet manse to work in the Tower, and when his duties were over he returned to his village with an honorary LL.D. degree. The reverend inventor died in 1843. His is the first memorial to a private individual that has been erected in the precincts of the Tower.

Naturalized
 "Tay Pay" O'Connor's last visit to Washington was during the Wilson administration. He called at the White House on a hot summer's day to pay his respects, dripping with perspiration.
 "You have a wonderful city here," he said to Secretary Tumulty, "but I hope it's nothing like this in the hereafter."
 The secretary took him to a clothing store and fitted him to a Palm Beach suit, sending his heavy London clothes to his hotel. Then the two walked down Pennsylvania avenue, Tay Pay delighted with his suit and still wearing the price and size tags which the clerk had forgotten to remove.

Kidnaped
 Jaek H. Smith of Los Angeles, a member of the celebrated Smith family of Jamestown, Va., and all points west, has had the temerity to step into the new thought arena, and state his views on marriage. He states it this way:
 "Many a man would still be a bachelor if his wife hadn't hated the idea of being an old maid."

PUBLIC SALE
 Owing to the failure of the purchaser in living up to the conditions of sale, I will again sell at public sale, at the residence of the late Murray K. Martin, situated about 3 miles from Emmitsburg, along the Keysville road, near Four Points, on
SATURDAY, JULY 26th, 1930,
 at 1:00 P. M., sharp, the following personal property and real estate:
3-PIECE LIVING ROOM SUITE,
 1 tea wagon, porch stand, quilt stand and lamp, china closet, lot of cut glass dishes and table mats, box couch, Mahogany chair, 7-ft. mahogany dining room table, desk, 2 Mahogany candlestick holders, 2 small mirrors, large mantle mirror, open fireplace fender, lot of cushions, Rayo lamp, 2 small lamps, lantern, 1 Standard sewing machine, in good running condition.
KITCHEN CABINET,
 practically new; 3 kitchen chairs, 1 kitchen table, kitchen cabinet,
ONE PENNANT RANGE,
 No. 8, in excellent condition; Perfection oil stove and baker; heavy aluminum tea kettle, coffee pot, 4 frying pans, dishpan, lot aluminum kettles, lot granite kettles, lot lids, 4 springs, 4 bed springs, 4 mattresses,
TWO GOOD BUREAUS,
 4 chiffoniers, 4 wash stands, dressing table, 3 bedroom chairs, 3 gilt chairs, 2 clothes racks, 2 chambers, 3 sloop jars, 2 wash bowls, 3 soap dishes, 2 racks, bedroom clock, clothes hamper, 18 pictures, 2 bolsters, 2 pillows, 2 good rocking chairs, 3 matting rugs, 3 stands, 2 small rugs, 18-yds. matting, 2 candlestick holders, 3 small rugs, 4 clothes hangers, 3 porch rocking chairs, 2 wicker porch chairs, 9x12 heavy matting living room rug, baking pans, pie board and rolling pin, ice box, mixing bowl, 3 water pitchers, wood box, plates, cup and saucers, tumblers, and other dishes, 3 butcher knives, 12 silver knives, and forks, 15 silver ice teaspoons, silver meat fork, salad fork and cream dipper, pair rose snips, meat saw, lot large spoons, 2 garbace cans, 2 basins, aluminum water bucket, dish drainer, lawn mower, 2 garden plows, hammock, bicycle, large trunk, 15 gallon oil can, 2-gals lined oil, forks, 2 hoes, 2 mowing scythes, 1 sledge hammer, 2 wedges, stepladder, 2 mops, shovel, axe, mailbox, lot of tools, several gallons of ready mixed paints, marble slab, 75-ft. of No. 1 yellow pine boards, 1-ft. wide; 4 sheets galvanized roofing, tennis court net, wood saw, several cords of wood, and many other articles not mentioned.
 The above furniture and furnishings are in A-1 condition and a great many articles are as good as new.
 The Real Estate is as follows:

Man of Peace Honored

for Wartime Invention
 A clergyman who evidently did not consider that there was anything incongruous in serving the prince of peace and at the same time inventing "gadgets" to help in the maiming and killing of his fellow-men has a tablet to his memory at the Tower of London—quite an appropriate place.
 He was Rev. Alexander John Forsyth, a Scotsman, who invented the percussion lock for small arms, and who also produced a detonating powder for which, it is said, he was offered \$100,000 by Napoleon. Forsyth left his quiet manse to work in the Tower, and when his duties were over he returned to his village with an honorary LL.D. degree. The reverend inventor died in 1843. His is the first memorial to a private individual that has been erected in the precincts of the Tower.

Naturalized
 "Tay Pay" O'Connor's last visit to Washington was during the Wilson administration. He called at the White House on a hot summer's day to pay his respects, dripping with perspiration.
 "You have a wonderful city here," he said to Secretary Tumulty, "but I hope it's nothing like this in the hereafter."
 The secretary took him to a clothing store and fitted him to a Palm Beach suit, sending his heavy London clothes to his hotel. Then the two walked down Pennsylvania avenue, Tay Pay delighted with his suit and still wearing the price and size tags which the clerk had forgotten to remove.

Kidnaped
 Jaek H. Smith of Los Angeles, a member of the celebrated Smith family of Jamestown, Va., and all points west, has had the temerity to step into the new thought arena, and state his views on marriage. He states it this way:
 "Many a man would still be a bachelor if his wife hadn't hated the idea of being an old maid."

PUBLIC SALE
 Owing to the failure of the purchaser in living up to the conditions of sale, I will again sell at public sale, at the residence of the late Murray K. Martin, situated about 3 miles from Emmitsburg, along the Keysville road, near Four Points, on
SATURDAY, JULY 26th, 1930,
 at 1:00 P. M., sharp, the following personal property and real estate:
3-PIECE LIVING ROOM SUITE,
 1 tea wagon, porch stand, quilt stand and lamp, china closet, lot of cut glass dishes and table mats, box couch, Mahogany chair, 7-ft. mahogany dining room table, desk, 2 Mahogany candlestick holders, 2 small mirrors, large mantle mirror, open fireplace fender, lot of cushions, Rayo lamp, 2 small lamps, lantern, 1 Standard sewing machine, in good running condition.
KITCHEN CABINET,
 practically new; 3 kitchen chairs, 1 kitchen table, kitchen cabinet,
ONE PENNANT RANGE,
 No. 8, in excellent condition; Perfection oil stove and baker; heavy aluminum tea kettle, coffee pot, 4 frying pans, dishpan, lot aluminum kettles, lot granite kettles, lot lids, 4 springs, 4 bed springs, 4 mattresses,
TWO GOOD BUREAUS,
 4 chiffoniers, 4 wash stands, dressing table, 3 bedroom chairs, 3 gilt chairs, 2 clothes racks, 2 chambers, 3 sloop jars, 2 wash bowls, 3 soap dishes, 2 racks, bedroom clock, clothes hamper, 18 pictures, 2 bolsters, 2 pillows, 2 good rocking chairs, 3 matting rugs, 3 stands, 2 small rugs, 18-yds. matting, 2 candlestick holders, 3 small rugs, 4 clothes hangers, 3 porch rocking chairs, 2 wicker porch chairs, 9x12 heavy matting living room rug, baking pans, pie board and rolling pin, ice box, mixing bowl, 3 water pitchers, wood box, plates, cup and saucers, tumblers, and other dishes, 3 butcher knives, 12 silver knives, and forks, 15 silver ice teaspoons, silver meat fork, salad fork and cream dipper, pair rose snips, meat saw, lot large spoons, 2 garbace cans, 2 basins, aluminum water bucket, dish drainer, lawn mower, 2 garden plows, hammock, bicycle, large trunk, 15 gallon oil can, 2-gals lined oil, forks, 2 hoes, 2 mowing scythes, 1 sledge hammer, 2 wedges, stepladder, 2 mops, shovel, axe, mailbox, lot of tools, several gallons of ready mixed paints, marble slab, 75-ft. of No. 1 yellow pine boards, 1-ft. wide; 4 sheets galvanized roofing, tennis court net, wood saw, several cords of wood, and many other articles not mentioned.

First Methodist Chapel

The first Methodist church erected, John Wesley's chapel at Broadmead, England, has been completely restored and was recently reopened with impressive evangelistic services. It stands on the first plot of ground that Wesley ever bought and in it is the pulpit from which the noted evangelist so often preached.

Actual Stock Exchange "Seats"
 In the early days a "seat" on the Boston Stock exchange was an actuality, each member having his own chair and desk and forbidden under penalty of a fine from trading out of it. Due to the fact that seats were arranged in parallel rows along the walls and facing it, some of the more unfortunate members were at some distance from the rostrum of the president of the exchange who had the conduct of business in charge, so that in times of brisk bidding they could with difficulty make their bids or offers heard. It was not until 1885 in Boston that seats were finally abolished and not until 1883 in New York and 1885 in Boston that continuous daily sessions were inaugurated.—Boston Transcript.

Painful Impression
 There is no real pain when you cut your finger, Professor Pieron, of the College of France, informed the international congress on psychology. What you have, then, is just the impression that there is a pain. A real pain, the professor explained, is a sense level reached when specific sense organs are stimulated. Whether toothache, lumbago or a punch on the jaw stimulate these organs, we do not know, says the San Francisco Chronicle, for the professor did not go into such particulars. But what we do know is that the impression of a pain hurts just the same.

Discovery of Radium
 In 1896 Henri Becquerel discovered that a crystal of salt of uranium could in the dark reduce the silver bromide on a photographic plate, even when a sheet of black paper was placed between. Evidently a radiation different from light was given out by the salt. Pierre and Mme. Curie found that the mineral pitchblende had the same properties. The mineral radium is white and turns black in the air. It belongs to the uranium family.

Through a Woman's Eyes

by Jean Newton

ALL UP TO THE WOMAN

A PROMINENT citizen of Montreal, Canada, having made his fortune and wishing to leave behind him a monument to his civic interest, has conceived the idea of a school to train girls and young women to make good wives.

The father of three married sons, and long a student of the subject of domestic felicity, which is said to have been beautifully achieved in his own home, this man is unswervingly convinced that IT IS ALL UP TO THE WOMAN! If she is clever, there is peace and happiness for both. If not, friction and troubled waters.

As I heard that it reminded me of what a woman said not long ago over the radio: "The success of a marriage is up to the woman. Men think they can get peace by fighting for it, but you can't get it that way."

So I went to see this man to get his viewpoint on why it is up to the woman. I expected to hear much of the masculine prerogative, of man's traditional right as lord and master, of him who toils to bring home the bacon. Instead I received from a man of affairs, a power in industry and his community the naive admission that the reason why the responsibility for happiness in the home must be assumed by the woman, is that men are simply not up to it.

Whether from countless generations of inattention to such matters, whether absorption in breadwinning excuses them or not, whether they won't or they can't they DON'T. "And you all want to be happy and make your men happy, don't you?" he added through me to all wives. "It's your job because you CAN." There's your answer as to why it's up to the woman.

More power to your Training School for Good Wives, to which you might add as a subtitle, "And to Make Happy Women." It is a departure in education that may bear fruit over wider areas than its founder dreams of. (© by the Bell Syndicate, Inc.)

Dear Editor:

SOME one just called me an optimist, and I'm all wrought up over it. My experience is that optimists are lazy thinkers.

The dentist who used to tell me "this won't hurt a bit"—and then jabbed me hard, lost a good patient. I quit him.

The friend who said, "Sure, there's enough gas to get us there"—and then made us walk a mile in the dark, is a good example of what I mean.

It's the pessimists who get things done. While the surface-livers are content, the warriors are safeguarding themselves.

An optimist, I find, is generally a guy who wants to take a chance with my money.—Fred Barton. (Copyright.)

Famous "Rockies"

The Rocky mountains are an assemblage of mountain ranges, which form the backbone of North America. They begin in Mexico and extend northward to the westernmost of the Aleutian islands. The length of the Rocky mountain chain from north to south is some 4,000 miles and its width between 400 and 500 miles. Within its borders are several mountain systems and a large number of individual ranges, together with several large plateaus, numerous valleys, parks and canyons, as well as multitudes of peaks and ridges, mesas and buttes.

Mother's Cook Book

There's a space for good to bloom in Every heart of man or woman, And however wild or human, Or however brimmed with gall, Never heart may beat without it: And the darkest heart to doubt it Has something good about it After all. —Riley.

ST. PATRICK'S DAY TEAS

A ST. PATRICK'S day tea will be most appropriate in celebration of the good old saint. As green is his favorite color and the shamrock appropriate to his nationality, that color and that design will help to make the occasion most fitting.

A delicious and invigorating cup of tea is a stimulant to both wit and merriment. No cup of tea will fill the specifications that is not well made and daintily served. Freshly boiled water, a hot pot, and a teaspoonful of tea for each person. Let the tea stand and draw or steep, where it will be kept hot with heat or covered with a cozy, for four to five minutes, according to the strength desired.

The best tea to be obtained may be spoiled in the making.

The tea table should be spread in the dining room in the best linen, embroidered or lace cloth one has. The table may be decorated with shamrocks cut out of green paper, or green paper may cover the table under the lace cloth. Nut boxes may be bought in the shops in the shape of the shamrock and green hats, pipes, candy potatoes, and even little figures for table decoration. Each year somebody thinks of something different. However, one need not despair if none of these are available, for they may be made at home. The candy potato, made of fondant, molded in the form of a potato and rolled in cocoa, looks very real. The colored papers of various kinds that one may buy everywhere, may be used in countless ways for favors and decoration.

Green candles set in low holders may be used to illumine the table.

The salad plates, sherbet cups, and candies may be of green, so that the color scheme may be well carried out. Ferns with some white flower will decorate the center of the table, or, if one likes, the green carnations, though very artificial in color, may be used.

The serving of the tea is a matter for the hostess to decide. The least formal is usually most enjoyed. The hostess or some one she asks, may pour; each will then help himself to any of the sandwiches, cakes or candies, and find a corner and companion to share his enjoyment.

Sandwich fillings, cakes, salads and candies may all be of the appropriate green. One may serve a buffet supper, where all help themselves to plate, napkin and food, following down to the dessert.

The difference between a sailfish and a flying fish is that the flying fish dies, after a fashion, and the sailfish does not. Flying fishes, of which there are a number of species, are small and light but have long wing-like pectoral fins. The fish works up speed in the water, throws itself into the air, and the "wings" are able to carry it for some distance.

The sailfish is a very large deep sea fish, related to the swordfish, but having teeth, and characterized by the large, high dorsal fin, which is suggestive of a sail.

What makes for happy living? Three things, above all else. A healthy body, first and foremost. Then an environment which offers fair opportunity for a man's normal activities and aspirations. And finally a community of people who do two things: they must respect each individual's personality and leave him to work out his own salvation according to his own nature, in so far as he harms nobody; and they must co-operate good-naturedly with him in his work and in his play.—Prof. Walter B. Pitkin in the Household Magazine.

RELIABILITY ECONOMY GOOD PERFORMANCE

THE NEW FORD TUDOR SEDAN

YOU are buying proved performance when you buy a Ford. You know it has been built for many thousands of miles of satisfactory, economical service.

Letters from users in every part of the world show the value of the sound design of the car, good materials and accuracy in manufacturing. You sense a feeling of sincere pride in the oft-repeated phrase—"Let me tell you what my new Ford did."

Further tribute to the sturdiness, reliability and general all-round performance of the new Ford is shown in the repeated and growing purchases by government bureaus, by police departments, and by large industrial companies which keep careful day-by-day cost records. In most cases, the new Ford has been chosen only after exhaustive tests covering speed and power, safety, comfort, ease of control, oil and gas

consumption, low yearly depreciation, and low cost of up-keep.

They have found, as you will find, that the Ford embodies every feature you want or need in a motor car at an unusually low price.

Lesson for July 20

MOSES, A COURAGEOUS LEADER

LESSON TEXT—Exodus 1:8-14; 2:1-22; 3:1-14.

GOLDEN TEXT—By faith he forsook Egypt, not fearing the wrath of the king; for he endured, as seeing him who is invisible.

PRIMARY TOPIC—Moses Doing Hard Things for God.
JUNIOR TOPIC—Moses' Call to Leadership.

INTERMEDIATE AND SENIOR TOPIC—Daring the Impossible.

YOUNG PEOPLE AND ADULT TOPIC—Leader, Liberator and Lawgiver.

I. The Enslaved People (1:8-22).

After Joseph's death Israel quickly grew into a nation. The amazing growth of the nation aroused the envy and fear of the new king.

1. Heavy measure of service (vv. 10-14).

Cruel taskmasters were placed over the men, forcing them to labor in building treasure cities as well as in field service. However, the more they afflicted them, the more did they multiply and grow.

2. The midwives were ordered to murder the male infants.

This measure also failed, as the midwives feared God and chose to obey Him.

3. Commanded that the male children should be cast into the river (v. 22). In God's providence this mandate failed.

II. Moses, the Deliverer, Prepared (2:1-22).

1. His birth (vv. 1, 2).

Both his father and mother were of Levitical stock. Being of the same tribe, they would have a common bond of interest and sympathy. There was something striking about the child which caused his parents to believe that he was sent of God.

2. His preservation (vv. 3, 4).

Because his mother had faith she did not ignore the proper use of means. She was doubtless familiar with the place where Pharaoh's daughter came to bathe and believed that somehow through her the child would be saved. She placed the ark of bulrushes at the particular place where it would attract attention. Though the hand of God was directing in the carrying out of His plan, the steps in the process were entirely natural.

3. His education (vv. 5-10).

Moses was educated, first at his mother's knee. Here his mind was filled with the word of God and acquainted with the Jewish hopes and prospects. Doubtless here the indomitable purpose was fixed "rather to suffer affliction with the people of God, than to enjoy the pleasures of sin for a season" (Heb. 11:24-26). Again, he was educated at the Egyptian court where he became acquainted with all the wisdom of the Egyptians (Acts 7:22).

4. His exile and marriage (vv. 11-22).

Moses was obliged to take his flight from Egypt at the age of forty, because he attempted to enter upon his work as the deliverer of his people (Acts 7:25). He was conscious of his mission, but was mistaken as to the time. His rejection by his brethren was a type of Christ's rejection by the Jews. During this time of rejection he secured a bride. Jesus Christ, his great antetype, while now in the place of rejection by His brethren, is getting a bride from among the Gentiles. Just as Moses after awhile returned and delivered his people, so will Christ return and deliver His people, the Jews, who rejected Him.

III. Moses Called to Deliver His People (3:1-14).

1. The Lord spoke from the burning bush (vv. 1-6).

It was while keeping the flock of his father-in-law in the desert that the Lord appeared to Moses in the vision of the burning bush. This bush, enveloped in flames, yet unconsumed, symbolized the people of God ensnared in the very fire of God.

2. Moses' commission (vv. 7-10).

In this commission God showed His active interest in His people. Because of His grace He obligated Himself to deliver them out of the hand of the Egyptians and bring them into the chosen land; therefore God commissioned Moses to bring forth the people out of Egypt.

3. Moses' objections removed (vv. 11-14).

Four objections were offered, each one of which God met and removed. (1) Personal unworthiness (v. 11). (2) The difficulty of the people to understand Moses' relationship to God (vv. 13, 14). (3) Unbelief on the part of the people (4:1). (4) Lack of eloquence (4:10).

Value of Religious Belief
I should prefer a firm religious belief to every other blessing; for it makes life a discipline of goodness, creates new hopes when all earthly hopes vanish, and throws over the decay, the destruction of existence, the most gorgeous of all lights; awakens life even in death.—Sir Humphry Davy.

Little Pitchers Hold Little Water
If we take little pitchers to the well, we shall carry little water away.—Selected.

SIX-CYLINDER SMOOTHNESS AT LOW COST

Chop Suey Makes Ideal Dish for Evening Meal

By JOSEPHINE B. GIBSON
Director, Home Economics Dept.,
H. J. Heinz Company.

WHY not delight the whole family some evening soon by serving an American Chop Suey dinner? When well made, Chop Suey is a dish that almost everyone enjoys; and it is so substantial that the remainder of the meal may be quite simple.

Chop Suey requires so little last-minute preparation that it is ideal for serving to company, too. The steamed rice may be cooked, drained and kept tightly covered for at least half an hour before the meal; and the main course is so rich and heavy that only the lightest of desserts is required.

The recipe for Chop Suey that is given below makes an especially savory dish, and you will be delighted with the ease with which the following menu can be prepared and served:

- Chop Suey with Border of Steamed Rice
- Crisp Chinese Noodles Bread
- Pure Apple Butter
- Celery Stuffed with Roquefort Cheese and Salad Cream Dressing
- Chilled Fruit Cup with Whipped Cream
- Rice Flake Cookies
- Tea or Coffee

Chop Suey with Border of Steamed Rice:—1 tablespoon Worcestershire Sauce, and 1 cup warm water. Cut bacon fine

and fry. Add Pure Olive Oil, then meat, and cook until brown. Add mushrooms, celery and onions cut in small pieces, and cook for several minutes. Blend cornstarch and sugar with 1 cup warm water, and add to the meat and vegetables. Season with salt and pepper, and cook until tender (about one-half hour), stirring occasionally and adding more water as needed. When almost finished add 1 tablespoon Worcestershire Sauce. Serve on a platter with a border of steamed rice.

Chinese Noodles:—These may be purchased in cans or packages, and should be opened and heated in the oven, to make them very crisp.

Celery Stuffed with Roquefort Cheese:—Mix 1 teaspoon Roquefort Cheese with Salad Cream, fill crisp stalks of celery and sprinkle with paprika. Serve thoroughly chilled. If you prefer a milder cheese, mix the Roquefort with Cream Cheese before moistening with Salad Cream dressing.

Rice Flake Cookies:—¼ cup butter, 1 cup sugar, 2 eggs, 4 tablespoons milk, 1½ cups Rice Flakes, 1 cup raisins, 1 cup nuts, 2 cups flour, 3 teaspoons baking powder, ¼ teaspoon salt, and 1 teaspoon vanilla. Cream together butter, sugar and well beaten eggs. Sift flour, baking powder and salt, and add to the creamed mixture alternately with milk. Add floured raisins, nuts and vanilla. Drop from teaspoon on a greased baking sheet, and bake for 10 minutes in a moderate oven.

A "CITY CONVENIENCE" FOR COUNTRY HOMES

KEEP FOOD COLD Freeze Ice Cubes With Oil Heat!

SUPERFEX generates its own frigid cold by burning a few cents worth of kerosene daily. This dependable new refrigerator keeps butter firm, milk sweet, meats fresh and tasty—right in the kitchen in the warmest weather. It makes sparkling ice cubes for cooling beverages and delicious frozen desserts. Better and cheaper than ice; far safer than refrigeration makeshifts.

Superfex has no moving parts; nothing to get out of order. Just light it and leave it. In about an hour and a half the burners generate 24 to 36 hours' food-preserving cold—then go out automatically. Sturdily made; white-porcelain lined; ample shelf-room. A great boon to country homes.

Telephone today for further information, or come in and see Superfex work.

TANEYTOWN LOCALS

Items of news from town, or vicinity are always wanted for this column. Especially accidents, sales of real estate, fires, important happenings, visits to or from the community social events, and all matters of general interest to those at home, and away from home.

NOTICE TO THE PUBLIC.

Hereafter our Local Columns will not be given to advertise sales, programs, party's etc., held for money-making purposes; except to the Fire Company, Public Library, or non-denominational charity or relief, or to out-door events of public general interest not held primarily for profit. All churches, lodges, schools and societies, please take notice, as we shall hereafter endeavor to treat all alike, and avoid the appearance of favoritism. Our Special Notice column should be used for all money-making ventures.

Mrs. Vallie Hoagland and son John, of New York, are visiting at D. W. Garner's.

Franklin Gilds is attending summer school at Johns Hopkins University, Baltimore.

Mrs. Jane Myers, of Baltimore, spent Tuesday with Mrs. Mary Stover and family.

William Gilds, of Marysville, Pa., spent Sunday with his parents, Mr. and Mrs. G. F. S. Gilds.

The regular ten cent loaf of bread was reduced to nine cents, this week, by the Taneytown bakers.

Nelson Wantz, near town, was taken to the Frederick City Hospital, on Tuesday for examination.

Mrs. Robert Galt, of Keymar, spent Tuesday and Wednesday with Mr. and Mrs. Claudius Long and Mr. and Mrs. R. S. McKinney.

Mr. and Mrs. Clarence Albaugh, daughter, Esther, near town, visited Mr. and Mrs. Guy Albaugh, near Frederick, on Sunday.

Mrs. Edgar Essig and daughter, and Miss Estella Essig are spending this week with relatives at Cameron, West Virginia.

Mr. and Mrs. Samuel C. Ott, Misses Betty Ott and Jean Frailey, were guests at the grocer's picnic, on Wednesday, at Braddock Heights.

Mr. and Mrs. G. Milton Baum and daughter, Gladys, of Baltimore, spent the week-end at the home of Mr. and Mrs. James Rodgers, near town.

Misses Elizabeth Wilt, Leah Rein-dollor, Virginia Ott, Dorothy Kephart, Ruth Stambaugh and Mary Alice Chenoweth are camping this week, at Detour.

The Raymond Ohler property, on York St., that was offered at public sale, last Saturday afternoon, was not sold, no reasonable bid having been offered.

Mr. and Mrs. Samuel Overholzer, daughter, Alice and Mrs. Laverne Lambert and son, of New Midway, spent Sunday with Mrs. Sarah Albaugh and other relatives in town.

Mr. and Mrs. Wm. W. Troxell, spent Sunday afternoon visiting Mrs. Elizabeth Holter, Mr. and Mrs. Harry T. Holter and Miss Edna K. Lighter, all of Middletown, Frederick, Co., Md.

Mr. and Mrs. Charles Horst, of Greencastle, and Mrs. Chas. Campbell and children, of Westminster, spent Sunday with Mrs. Mary Stover and Mr. and Mrs. Wm. Stover and family.

Mr. and Mrs. Wm. McKinney, of Highspire, Pa., spent Sunday with Mr. and Mrs. Russell Eckard, near town. Mr. and Mrs. Frank Palmer and David Staley of town, spent Sunday evening at the same place.

The new brick-veneer double dwelling, being erected for Charles Rohrbaugh, on George Street, is progressing. It will be a handsome addition to the already pleasing architecture of that portion of the town.

Five big bus loads of bean pickers, from Baltimore, passed through Taneytown, on Monday morning, for work in the vicinity of Thurmont, where it is said weather conditions have been favorable for the bean crop.

Word received from Mr. and Mrs. Marlin Reid and Mrs. Nellie Wolfe, of Detroit, who left here Thursday morning, 10th., for home, says; "We arrived at 5:45 Friday evening. Some mountains and lovely scenery; the way we came in was most enjoyable."

Mr. and Mrs. David Hahn and Mr. and Mrs. Martin Koons, returned home last Friday night after spending several weeks on a tour to California, visiting the former's son, Mr. and Mrs. Edwin Hahn, near Los Angeles, and other relatives and friends along the way.

Mr. and Mrs. Luther Fox and daughter, of Harney, spent Wednesday evening with Mrs. Mary M. Ott. On Sunday evening, Mr. and Mrs. Fred Troxell and Mr. and Mrs. Shorb and two daughters, all of Emmitsburg, were callers at the same place.

Allen F. Feeser spent two days this week on the Eastern Shore, on business.

Claude E. Crebs writes The Record that he has removed to Killback, Ohio, where he has bought out a restaurant and bakery.

Mr. and Mrs. Harry Veit, son Theron and grand-son, of Philadelphia, were week-end guests of Mr. and Mrs. David Mehring.

Clyde L. Koons, Ford representative, visited Ocean City, Md., on Monday and Tuesday, to attend the meeting of the Auto Trade Association.

Mr. and Mrs. Elmer Mehring, of Harrisburg, and Mr. and Mrs. James Reaver, of Gettysburg, spent Sunday with Mr. and Mrs. Frank Palmer.

Mr. and Mrs. Paul Fahs, of York, Pa., and Mrs. James King and daughter, Carrie, of Littlestown, spent Sunday with Mr. and Mrs. Stewart F. King.

Mr. and Mrs. Samuel Blouse and sons, Robert and Eugene, daughter, Minnie, of York, Pa., spent Friday and Saturday with Mrs. B.'s aunt, Anamary Whimert, near Kump's.

Mr. and Mrs. Edward Deal, Bernice Devilbiss and Ruthanna Eckard, near town visited Mr. and Mrs. Harry Harner and Miss Audrey Parr, at Baltimore, on Tuesday.

Mr. and Mrs. Conrad Hohing, and daughter, Betty, of Frostburg, Md., and Mr. and Mrs. John S. MacDonald, of Cumberland, Md., were recent visitors at the home of Stewart F. King, near town.

Mr. and Mrs. James Demmitt, near town, visited Mr. and Mrs. Guy Brown at York, on Sunday. Mr. Brown returned home on Saturday from the York Hospital where he recently underwent an operation for appendicitis.

How "Salvaging of Used Cars proves a Success" is explained in an interesting double column advertisement in this issue. Read the story and get an idea of how practically every part of a used car is used over again, with but little real waste.

The work of regrading the Keymar road, beginning at the square in town, has been under way for over a week. Like all regrading work, there will be cuts and fills not to the satisfaction of property owners; but so far as we have learned there are no strong protests, and when finished, all will be pleased.

The Record has always had it in mind—and we believe most others have had it too—that there was only one mile yet remaining on the Taneytown-Littlestown road, not provided for in the way of completing the road as a state highway. We are now informed that the distance is about one and three-fourth miles.

Mr. and Mrs. William J. Noel, of Phoenix, Arizona, spent last week with Mrs. Maggie Null and visited in Westminster and Littlestown, Pa. At Littlestown they attended an interesting game of ball on Saturday. Mr. William Noel and Clare Null, Hazel Null, June Noel. They expect to leave for Phoenix about Aug. 15th. They will visit David Little and Geary Little, before leaving, and will stop in Pennsylvania for a while.

Mr. and Mrs. Charles Horst, of Greencastle, and Mrs. Chas. Campbell and children, of Westminster, spent Sunday with Mrs. Mary Stover and Mr. and Mrs. Wm. Stover and family.

Mr. and Mrs. Wm. McKinney, of Highspire, Pa., spent Sunday with Mr. and Mrs. Russell Eckard, near town. Mr. and Mrs. Frank Palmer and David Staley of town, spent Sunday evening at the same place.

The new brick-veneer double dwelling, being erected for Charles Rohrbaugh, on George Street, is progressing. It will be a handsome addition to the already pleasing architecture of that portion of the town.

THE ORPHANS' COURT.

Monday, July 14, 1930.—The last will and testament of Maude Frazier Evans, deceased, was admitted to probate.

Letters of administration on the estate of Charles O. Fuss, deceased, were granted unto Merwyn C. Fuss, who received warrant to appraise personal property and order to notify creditors.

Naomi G. Strevig, executrix of William I. Babylon, deceased, returned inventories personal property and current money.

(On July 9th., 1930) The last will and testament of William I. Babylon, deceased, was duly admitted to probate, and letters testamentary thereon were granted unto Naomi G. Strevig, who received warrant to appraise personal property and order to notify creditors.

Lillie E. Beggs, executrix of Theo. H. Beggs, deceased, returned inventory personal property.

Letters testamentary on the estate of Sarah Ann Study, deceased, were granted unto William Study, who received warrant to appraise personal property and order to notify creditors. This executor returned inventories personal property and debts due.

Letters of administration on the estate of Martha J. Young, deceased, were granted unto Ida L. Cummings who received warrant to appraise personal property and order to notify creditors.

Tuesday, July 15, 1930.—George A. Early executor of Sarah L. Mitten, deceased, returned inventories of personal property and real estate and received orders to sell same.

Samuel C. Stoner and John T. Stoner, executors of David Stoner, deceased, settled their fourth and final account.

Edward Heim, administrator W. A. of Sarah J. Henry, deceased, reported sale of real estate on which the Court issued an order ni. si.

Beware!

There's nothing much to be done for collapsible bridge tables, ping pong tables, folding beds and music racks, once they are overtaken by weakening of the joints. You can patch them temporarily with rubber bands or tire tape, but some day just when you are making a grand slam or reaching for a low ball or turning over to shut off the alarm clock or taking a high note, there'll be a crash, and if you have any sense you won't laugh until you've counted your fingers. It's safer to live in the house with a snapping turtle or shake hands with a live lobster.—Kansas City Star.

FEED YOUR WHEAT TO YOUR DAIRY COWS.

Wheat has about the same value when ground as corn meal for Dairy Cows.

In Denmark ground wheat on actual test was fully equal to Barley or Oats for Dairy Cows. Wheat should be cracked or preferable rolled for feeding. (Don't grind it into a flour.)

Wheat as a feed compared with Corn, Wheat carries slightly more carbohydrates in form of starch, more crude protein, and much less fat.

Wheat is low in mineral matter, it contains somewhat more lime, phosphoric acid, and potash, than corn.

It has been suggested that wheat does contain some substance which is injurious when fed in too large amounts. (This is true).

It has also been proven when wheat is fed with a well balanced ration, there is no difficulty from this source.

Lime, corn, wheat should be supplement by feeds which are rich in protein and lime.

Wheat fed in properly balanced rations is equal to corn for milk production.

100-lb. Wheat is equal to 110-lb. Oats for the Cow.

100-lb. Wheat is equal to 105-lb. Barley for the Cow.

100-lb. Wheat is equal to 100-lb. Shelled Corn for the Cow.

Mix 15% Wheat in your Dairy Ration.

WHEN A GAS PIPE-LINE COMES TO TOWN

Every Home Hooks Up With Gas

Why not hook up with Philgas? Just the same in effect as a pipeline. No tanks to change. No gas to order. You never run out of gas.

See How America Cooks

13,700,000 families cook by gas;
7,700,000 by coal and wood;
6,500,000 by oil;
875,000 by electricity.

Decide on Philgas and decide rightly. You will get real convenience. Every user is a booster. Philgas deserves your support. Why not place your order now? Terms if desired.
