TANEYTOWN, MARYLAND, FRIDAY, JANUARY 30, 1931.

No. 31

THE RED CROSS FUND SITUATION.

Senators Condemn President and Red Cross Chairman.

The following notable persons have been heard over the radio in telling appeals for the Red Cross; President Hoover; former President Coolidge; John Parton Payne, chairman of the American Red Cross; former Governor Alfred E. Smith, New York; Mrs. August Belmont, New York; Mary Pickford widely known movie Star; Will Rogers, popular humorist, and even "Amos and Andy" for once to be taken seriously. taken seriously.

And now General Pershing, World War hero, will be heard this Friday 8:15 over the Columbia broadcasting system. On Saturday evening at 10 o'clock Will Rogers has arranged to have five sufferers of the drougth area in Arkansas to broad-cast their experiences. This will also be over the Columbia system.

With these striking evidences of support before us for the great need for the \$10,000,000 asked for, we should not wait to be solicited through a canvass for our mite to-ward the \$3000. fund suggested as Carroll County's share. There should be thousands of willing volunteers to boost it, and hold up the credit of the

Judge Payne, chairman of the Red Cross, is confident that his organiza-tion can adequately meet the situation with \$10,000,000 without a public appropriation, and that ordinarily that amount would have been raised in a drive of ten days had not the Senate started an agitation for a \$25,000,000 fund. He says that about \$4,000,000 has so far been paid in. The Senate, apparently, wants to have its way for a \$25,000,000 government appropriation, because the President favors the \$10.000,000 appropriation to the Red Cross, and this phase of the situation is extending phase of the situation is retarding voluntary contributions. The Senate bill is now pending in the House, where it seems not likely to pass.

A new feature of the situation is, that Chairman Payne has stated that "the central committee of the Red Cross cannot accept the administration of the fund for general relief purposes," as provided under the

Charges have been made in the Senate that the Red Cross has become "a political smoke screen behind which the President is undertaking to shirk his responsibility to see that the starving are relieved," and that if the Red Cross refuses to distribute the proposed \$25,000,000 distribute the proposed \$25,000,000 fund, some other agency—possibly the Salvation Army—will be given the distribution of the fund. Senators Robinson and Caraway, of Arkansas, appear to be leaders of the opposition to the President and Red Cross.

WM. L. SEABROOK DEAD.

William L. Seabrook, well known apply toward the building fund. Lutheran minister and Attorney, of Westminster, died suddenly last Friday afternoon, at the Westminster Hotel, from angina pectoris having been attacked on the street, and removed to the hotel in the county ambulance, death ensuing two hours after the attack. His age was 74 years,

2 months, 8 days. Mr. Seabrook had a varied experience as minister, lawyer, office holder and newspaper editor. At the time of his death he was pastor of Trinity Lutheran Church, Deer Park, near Westminster, having formerly served pastorates at Wichita and Abilene. Kansas; Winchester, Va., and Newberry, S. C.

He had served as State's Attorney, the motor-cycle on top of him. deputy Clerk of the Circuit Court, An inquest was held at which Miss was Referee in Bankruptcy for the Eleanor Ditman, an eye-witness, tes-U. S. District Court for Carroll County, and was counsel for the County motor-cycle coming, and from the Commissioners until after the November election. He had also served as speed straight down the road when he Editor of the American Sentinel, a former county paper.

He was also prominently connected with various Fraternal Orders, among them being the Masons, Knights of Pythias, Patriotic Order Sons of America, having been State President of the latter order.

His wife died last November. He is survived by one son, William B. Seabrook, of New York and by one daughter, Mrs. Frances Guyon Whitman, wife of Cammander Ralph D. Whitman, stationed at Mare Island,

Funeral services were held on Sunday afternoon at F. A. Sharrer & Son's funeral parlor, in charge of Rev. Paul D. Quay and Rev. W. Interment was in Gettysburg cemetery, in charge of Rev. Dr. Herbert G. Alleman and Rev. H. C. G Martin. Members of his congregation at Deer Park acted as bearers.

EGG PRICES FOR 20 YEARS.

The following list of prices paid by hucksters for eggs for the past twenty years in the last week in January, has been handed us by J. Edw. Flohr. It will be of interest to many in the

egg producing business. 1911—18c; 1912—32c; 1915—26c; 1916—22c; 1920—62c; 1917-34c; 1918—60c. 1923—35c; 1924—35c; 1926—35c; 1927—34c; 1929—34c; 1930—34c;

It will be noted that the price in 1931 is the same as in 1911, and that the average price for the past ten years up to 1930 was about 35c.

CHAMBER OF COMMERCE

Its Second Annual Banquet Held in Tanevtown.

The second annual banquet of the Chamber of Commerce was held at Sauble's Inn, on Monday evening, seventy-two members and guests par-ticipating. Merwyn C. Fuss, presi-dent, acted as toast-master. After an invocation by Rev. Earl Redding, and due attention being paid to the repast such as Sauble's Inn is famous for, an enjoyable program was ren-

The quartet of the C. of C., com-

posed of W. Rein Motter, Earl Bowers, S. C. Ott and C. G. Bowers, ren dered six selections in their usual happy style. The main addresses were by Paul Smith, vice-president of the Potomac-Edison Co., Hagerstown, and by Robert Smith representing the Frederick division of the Company. The address of Paul Smith was plentifully interspersed with humor and the lighter vein, but was mainly in support of community co-operation and of the value of organizations such as the Chamber of Commerce. Short addresses were made by D. J. Hesson, A. W. Feeser, Edward S. Harner, and Geo. A. Arnold, Taneytown, and C. E. Easterday, Union Bridge

Bridge.
President M. C. Fuss, spoke for the local C. of C. of what its aims were, present and future, and invited larger membership, and in a special way expressed his satisfaction with co-operation with which the organization had met, closing with his appreciation of all who had helped to make the banquet a success, including the management of Sauble's Inn.

Those in attendance were present-

ed with handsome favors—a metal jewel box for the ladies, and a com-bination enevlope opener and cigar lighter for the gentlemen.

CHURCH CHOIR RECITAL AT BLUE RIDGE COLLEGE.

The members of Calvary Methodist Episcopal Church Choir of Frederick, Md., will hold a recital on Friday evening, Feb. 6, 1931, at eight o'clock in Blue Ridge College Auditorium at New Windsor.

The choir consists of thirty-five well trained mixed voices, who are rendering fine music in the large new church of Frederick. A treat is in store for those who can hear this program which is as follows:

The choir: "O How Amiable are Thy Dwellings, by Rogers; My Shepherd, Sarte; The Radiant Morn Hath passed away, by Woodward; Duet, See the Pale Moon, F. Campana, by Mrs. M. J. Croghan and Mrs. Sherman Bow-J. Croghan and Mrs. Sherman Bowers; choir, "Send out Thy Light," Gounod; Group of Readings, Miss Grace Brane; Solo, "Until" by Wilford Sanderson, Mrs. Sherman P. Bowers; Choir, "We Saw Him Sleeping, Kennedy; "Bless the Lord O My Soul," Ippolilof-Iwanof; Gloria in Excelsis, Mozart.

The choir officers are: Mr. James H. Harris, Jr., leader; Miss Alvie V. Coblentz, accompanist, and Mrs. Michael J. Croghan, Treasurer. An admission charge of fifty cents will be made to

STATE POLICEMAN KILLED.

State policeman Clinton R. Rhodes was instantly killed on Wednesday morning, due to driving his motor-cycle head-on into a coupe driven by Miss Lillian Shipley, while on the Washington road near Westminster. The accident occurred when Miss Shipley had changed to second-gear

to go over the grade leading to the home of Prof. Samuel Schofield, and saw no one coming until she felt the crash into the right side of her car made by the motorcycle, and on looking out saw officer Rhodes lying about in the middle of the road with

tified that she saw and heard the sound he was driving at a very rapid into the car. The jury exonerated Miss Shipley from all blame.

UNION BRIDGE TO HAVE NEW SCHOOL BUILDING.

After waiting more or less patiently for several years, Union Bridge is at last to have a \$50,000 school building, to be erected along the Middleburg road at the outskirts of the town At present, the location is objected to by many citizens of the town, but we believe that eventually the wisdom of the School Board will be agreed to.

Taneytown had much the same ex perience, its building having been erected at the far end of a cross street; but the result has been the great improvement of the section by the building of a number of handsome homes all along the front of school property, and no objection to the location is now heard.

Union Bridge is likely to have much the same experience -- the town building out to, and adjacent to the build ing, and most present objections lost

W. B. & A. ROAD IN HANDS OF RECEIVERS.

The Washington, Baltimore and An napolis Electric railroad, that once did a good passenger business, has gone into the hands of receivers, due to its failure to meet operating expenses and pay interest on its indebtedness. The cause of the failure is charged to the competition of automobiles and years up to 1930 was about 35c.

In the month od November from 1918 to 1926, prices ranged from 60c Light & Power Co., since 1927. The future of the road is at present in going to the buyer, usually goes to the latter being the price in buses within recent years. The W. B. & A. has been under the control

The Red Cross Appeal.

The Record has received a number of voluntary contributions to the Red Cross in response to our offer last week to forward same. The appeals of the President and Red Cross organization, however, appear not to be taken as seriously as they should, and The Record will continue to receive and send in all subscriptions sent to it. The President has said, speaking of the great

"THE AMERICAN RED CROSS IS THE NATION'S SOLE AGENCY
FOR RELIEF IN SUCH A CRISIS. IT IS MEETING THE DEMAND AND
MUST CONTINUE TO DO SO DURING THE REMAINDER OF THE
WINTER * * * IT IS IMPERATIVE IN THE VIEW OF THE EXPERIENCED DIRECTORS OF THE RED CROSS, THAT A MINIMUM OF
AT LEAST \$10,000,000 BE CONTRIBUTED TO CARRY THE RELIEF PROGRAM TO COMPLETION."

The Carroll County Red Cross Chapter decided that if the interval of the carroll County Red Cross Chapter decided that if the interval of the carroll County Red Cross Chapter decided that if the interval of the carroll County Red Cross Chapter decided that if the interval of the carroll County Red Cross Chapter decided that if the interval of the carroll County Red Cross Chapter decided that if the interval of the carrollage of t

The Carroll County Red Cross Chapter decided that "it is impossible to put on an intensive general campaign in the counnty at this time" but urged a "generous and prompt response from individuals, churches, fraternal and

THE QUOTA FOR CARROLL COUNTY IS \$3000.00.

The Record thinks that a more earnest and widespread appeal should be made for VOLUNTARY CONTRIBUTIONS. The financial situation in Carroll County is NOT to be compared to the same situation existing in the suf-

fering areas. Our comparatively prosperous county should HELP, and in so doing signify its faith in the American Red Cross organization.

The Record therefore repeats, that contributions as liberal as possible should be sent to H. P. GORSUCH, Chairman of the Chapter, or J. ALBERT MITTEN, Treasurer, Westminster; or, if more convenient—to THE CAR-ROLL RECORD. And it is needless to say that all responses should be PROMPT, and that CARROLL COUNTY SHOULD MAKE AN EFFORT TO PAY HER QUOTA.

The subscriptions in Carroll County, so far, amount to only about \$350.00. A man and wife in Westminster gave \$100.00, and \$25.00 from the Bible Class of Mt. Airy M. E. Church, are among the contributors.

ADVICE ABOUT INFLUENZA

THE SENATE VOTES DRY The First Record Vote Taken in a Long While.

The U.S. Senate, on Monday, voted 45 to 28 against recommitting the Howell bill for a more strict enforcement of prohibition in Washington. The resolution of Senator Tydings requesting the Judiciary Committee to examine the findings of the Wicker-

sham committee, was not acted on.

The debate brought out a rather wide discussion, in which party lines were disregarded. Eleven Republicans voted (wet) to recommit the Howell bill, while a number of Democrats

voted (dry) against recommitment.
Senator Heflin (Dem.) of Alabama,
warned his party associates that
three-fourths of the people of the country are in favor of prohibition. The debate developed the fact that the capital is very far from being dry; that in fact it was a Mecca for bootleggers and needed the more stringent regulations carried by the new law to make it decently dry. The search and seizure portion of the act was especially denounced even by some of the pronounced drys, and it may yet be softened to meet some of the objections.

One of the methods used by purveyors of illicit liquors is to rent house, hire a family to live in it and then claim the ordinary protection given private homes from search; and under present laws of the District there is no way of getting at

trict there is no way of getting at such offenders.

The Howell bill has been temporarily displaced for final passage in order to take up the urgent Army appropriation bill. That it will finally pass there is little doubt, but it is likely to be amended in some of its most directive features. most drastic features.

SENATE VS. HOUSE.

The Senate recently yielded to the House with regard to the \$15,000,000 that, but it must be, when a classical additional appropriation for drought relief. The Senate has been pretty Washington ranges all the way from steadily yielding to the House for several years past. The reason is obvious enough. The House has a of the Assembly.

Usually the committees are ready larger proportion of conservative and anxious to get all important bills Eastern members than the Senate out on the files of the House or Sen-the Republicans in ate—and it is only on rare occasions, has. Therefore, the Republicans in the House have generally a working majority of conservatives, or at least regular Republicans. Then, too, the power of the Speaker holds this maiority in line, even on measures on which, if the House membership were free to vote its real convictions, it might incline to agree with the Sen-

Again, just as the Senate is jealous of the Executive, the House is jealous of the Senate. When it can do so the House likes to take the Senate down a peg by holding out against legislation in the form in which the Senate desires it and forcing the Senate to accept that legislation in the form in which it has passed the House. Even if the House were not made up of a majority of regular Republicans, while the Senate has not n recent years had a majority of regulars, the House would still find satisfaction in forcing the Senate to

This situation has thrown the House steadily in recent years into alliance with the President against the Senate. Recent Republican Presidents have been pretty conservative. The House machine is conservative. Indeed, the Republicans in the House are, except a mere handful, very conservative. The majority in the Senate consists usually of a combination of Democrats and Progressives. As a consequence, the President and the House work together to block what both regard as radical legislation originating in the Senate.

In general, a President is likely to be beaten on the Hill only on issues that are the exclusive province of the Senate, such as the ratification of treaties or the confirmation of appointments. The President can generally depend upon the House, especially in short sessions, to force the Senate to abandon its position on legislation or to see legislation deadlock. So it does not mean much when we say a President has generally had his way with Congress. The cards are all stacked in his favor .-Washington Cor. Phila. Ledger.

MARYLAND'S GEN. ASSEMBLY.

The following article from The Madelight in pointing out the occasional rylander, likely prepared by Paul mistakes which all newspapers make, Winchester a gentleman fully compemay now devote their energies to tent to discuss the subject, will be other pursuits. The perfect alibi has read with interest by those who have only more or less nebulous ideas Some newspaper man-it must as to the inside workings of our Gen-

> "Every Session the General Assembly is severely criticized, and often wrongly abused at the delay, which is evident in the consideration of measures of all sorts, which are before it. And in nine cases out of ten there is little cause for such criticism.

> It is unreasonable to expect prompt action on bills which are not before the General Assembly, any more than it is to censure courts for not trying cases which have never been placed on dockets. And the vast amount of Legislation, which comes before the General Assembly, is made up of bills which are not introduced until the Session is more than half over.

> At least three-fourths of the measures are bills affecting the Baltimore Government, the public works, and other matters in the counties, the several State Executive Commissions, the work of the Bar Associations, the business and utility corporations, and the scattered and usually unimportant bills advocated by uplift reform, and crank societies. And it has been a rare event in the past half century during which the writer has been in constant attendance at every session at Annapolis, that any appreciable number of bills, have been ready for consideration, during the first six weeks of the session. Indeed a large proportion of them have never been presented before the first of March.

when the session was two-thirds gone. In fact the General Assembly is really a court. In Massachusetts, and Northeastern States it is called the "General Court"—and its duty is to consider matters of public interest as a court, and like all courts it can only try cases (in the form of bills of public interest), when they are presented, and when there are no cases As Frank R. Kent says; "The chief the biggest return for each dollar on the docket, like the courts, the

members have nothing to do. Few of the bills are the work the members of either House. They are prepared by the agents and attorneys of the public bodies, whether State Commissions, Municipal, and other corporate or volunteer organizations, which are interested in their passage. The preliminary consideration of all these is before committees, and in a large proportion of the cases, especially where any real in-And a little farther on, F. R. K. We live in a motorized age, in cases, especially where any real interest is taken in the bill, the argusays, "It isn't a question of principles, which quick, low-priced transporta- ments pro and con are made by at-

tion is essential to commercial and torneys practically in the same man-

mality before the committee than in roads are surfaced and passable at all the law courts, the strict rules of evitimes of the year. Wise use of the dence, which obtain in court practice appropriations will pay high divid- are not enforced, and there is usually a free and easy manner in committee room hearings, which is absent in the Court House, and the committee is more like a jury, sitting in a case presided over by a foreman in the place of a judge on the bench. The outcome is the same however, and the delays so often complained of because bills are not reported promptly, are caused rather by those who favor, or those who oppose bills, than by any design on the part of the members to hold up the semi-judicial proceedings,

that measures of importance are in tentionally held back. And when that is done the delay is brought about by the influence of outsiders, who have "Axes to grind." Which will be helped by the delay?

The impression that prevails that there is a vast amount of corruption in connection with the Legislative Sessions, is greatly exaggerated, so far as it affects the members. The truth is few of the members ever receive any large sums of money for their votes, and while at times, considerable amounts are used by corporations and individuals who wish to pass or defeat certain bills, a very small proportion of the money ever goes into the pockets of the members. The agents and attorneys who attended to such matters, often promise members to pay them if they will vote in their interest, but, generally they do not keep their promises usually giving as an excuse for their failure to come up, that the people who were back of them have welched and left them in the lurch, and so they cannot pay. At times a shrewd member, whose vote is especially needed, will insist on his pay in ad-vance, and thus secure some of his reward. But generally the members who have been promised rewards for their votes, are not paid until the end of the session, and as a consequence they get little, and the Legis-lative agents are enabled to keep all that has been entrusted to them to secure the action they may want.

Plant Furnishes Water

in Payment for Food A plant which saps its food from another plant grows 20 times as large as the host plant, yet does not in any way harm but rather benefits the host, grows in the desert of southeastern California.

Adding further to its peculiarities is the fact that it makes an excellent food for man, yet grows in an area where only 2 to 6 inches of rain fall annually.

The plant is the Ammobroma, or sand root, and was first seen in 1928 by white men, so far as the record is concerned. It was found, however, that the Papago Indians were familiar with the plant, and for generations had been digging the roots, which extend 3 to 5 feet into the ground. In spite of the depth to which the roots extend, they are easily drawn up out of the soil.

It has little or nothing in the way of leaves, and the only flower is a sandcolored blossom, which lies close to the ground. The stalks of the plant are much like asparagus, and are both appetizing and nourishing.

Lacking green coloring matter, the plants are unable to manufacture their own food, and obtain it by attaching themselves to other plants. In return the root system of the Ammobroma supplies the host plant with the vital, life-giving water.

Backgammon Played in Practically All Lands

Caesar's legions, sweeping Europe, carried backgammon to every country they touched-and left it there, after barbarian hordes had swept Rome's empire into dust.

Down through the centuries it came, essentially a game of the aristocrats -it's known that Madame de Maintenon, just before the French revolution, entertained at backgammon, practically as wealthy Detroiters. New Yorkers, Bostonians are entertaining

"Aristos," waiting debonairely for the "honor roll" that carted them to the guillotine from the prisons of France, played backgammon.

It has a different name in nearly every country. France, for example, calls it Tric Trac.

The origin of the English name is in doubt. Some say it came from the Welsh words, "bach" meaning "little," and "cammum," meaning "battle." Others assert it came from the Saxon, 'baec," meaning "back," and "gamen," meaning "game"-or a game in which the men were set back .- Detroit News.

Sound Advice

"I say," said Penniless Percy to his rich uncle, "I want your advice." "Well, my lad?" said the old man, realizing what was in the wind.

"What is the best way to approach you for a loan?" burst out the youth. A thoughtful look came over the uncle's countenance.

"Well," he replied, "if you were sensitive I'd advise you to make your request by telephone and ring off before you received the answer."

Father to the Man

A good story is told about the early John D. A reporter had come across an old lady who knew Rockefeller as a boy. "I wonder if you remember anything particular about Rockefeller when he was a boy?" asked the reporter. "Was there anything in particular to suggest his career?" "Let me see," mused the old lady. "Well, he had very taking ways." And he certainly did take quite a few millions for himself .- Kansas City Star.

Real Judgment on Life

Time is a man-made division of days and months and years that means little or nothing in life. Deeds, and not years, is the measure of a man's accomplishments. The world judges us not by how long, but by how well we live.-Grit.

History of the Carpet Perhaps the oldest pieces of carpet

are certain fragments excavated by Sir Aurel Stein in Turkestan. These are attributed to about the beginning of the Christian era, but their exact date and significance are not established. A western wall hanging, resembling a carpet, made at Quedlinburg about the end of the Twelfth century, suggests strongly that oriental carpets were not unknown in Europe at that date, and that the technique of one had been copied by the Quedlinburg weavers. It is not quite out of the question that the art may have been independently invented, especially as a modified form of the oriental technique is adopted. Three carpets in the mosque of Alaed-Din, at Konia, are attributed with some certainty to the early Thirteenth

LAYING HENS ARE ANXIOUS TO QUIT

Good Plan to Keep Them in House Until Noon.

"Laying hens are looking for any excuse to quit laying at this season of the year," says R. E. Cray, extension poultry specialist at the Ohio State university. "But there are several ways to fool them."

Cray recommends that the layers be kept in the house until noon or the middle of the afternoon, to increase their consumption of mash ration. The morning grain feed should be reduced or eliminated, and wet mash should be fed at noon, to the amount of four or five pounds to each 100 birds. Regular dry mash, moistened with milk, is suitable for this meal. At the same time the amount of milk which is being fed to the lay-

ers should be increased if possible. Comfort for the laying hen in hot weather is an important factor in determining whether she will or will not quit laying. The laying house should be well ventilated and kept as cool as possible, for this reason.

Green feed in liberal amounts will help maintain the laving record of the hens and pullets, as well as contribute to their general good health.

Influence of Minerals on Growth of Chicks

Experiments at the Wisconsin station show that chicks which were fed the Wisconsin ration of eighty parts ground yellow corn, twenty parts middlings, five parts chick size bone meal, five parts chick size ground limestone and one part salt, with free access to skim milk, did much better in recent tests than chicks that were fed rations in which part of the minerals were left out. In ten weeks the chicks which were fed the regular ration given above weighed 509 grams. A similar lot in which the bone meal was left out grew to an average of 486 grams, while a lot that failed to have limestone included in their ration weighed 353 grams. At the age of nineteen weeks the chicks weighed 1,107, 903 and 460 grams, respectively, for the different lots.

The above tests show the need of including minerals in the chick ration. A ration containing milk or milk byproducts, combined with minerals in the approximate proportion used in the Wisconsin ration, forms the basis for most of the successful chick starting mashes. Yellow corn is a good ingredient for one of the grains as it contains a plentiful supply of vitamin A. The kind of other cereals used does not matter so much, so long as they are easily digested and attractive to the chicks.

Natural Mother Found

Best for Young Chicks "Give me a mother with feet and feathers instead of a brooder." an oldfashioned poultryman insists. He has his hens set in batteries of twelve, each hen and her brood to herself, the divisions being made with poultry netting. Corn and water are supplied to the hens to discourage their gobbling up the more expensive chick feed. The coops and yards are moved often to fresh ground, but the hens are not let out until the chicks are weaned. The edge of the strawberry bed, garden or corn field are the favorite parking places of this breeder for his hens and chicks.

Feeding Green Corn

A common method of feeding green corn is to chop it into short pieces and allow the hens to pick it off the cob. In such cases the poultryman should be careful to see that the birds' crops are full at night. Even though some of the green corn may be consumed it would be a good idea to feed some shelled corn at night to insure birds going to roost with full crops. The chief dangers from green corn feeding are intestinal disorders and partially filled crops, but if the poultryman realizes these dangers he will introduce new corn to advantage.

Vigorous Hybrids In a study of hybrid vigor in poultry at Kansas experiment station, White Leghorns and Rhode Island Reds were used. In the pure breeds the mortality of the birds up to three weeks of age was 5.6 and 6.3 per cent respectively, while that of the bybrids was 1.4 per cent. The hybrids of both sexes outgrew the pure bred offspring. The mating of the Leghorn males and Red females produced more rapidly growing offspring than those of the reciprocal cross.

Poults' Worst Enemy

Lice are the worst enemy poults have to fight. They are usually found between the quill feathers of the wing. Lice will kill a poult quicker than they will a chick. Poults are very sensitive to strong odors. In treating them for lice it is well to use as little lice powder as possible, but be sure it is fresh. Sodium fluoride is used by the pinch method on poults after they are three weeks old. The hen that is given eggs of any kind should be well dusted with sodium fluoride.

Trace Mass Production

to Wisest of Monarchs Do you sometimes wender how it ever happened that clothes became standardized? Why is it, for instance, that when you are looking for your wife or fiancee, or any other certain specified woman, amongst a crowd in a department store, or hotel lobby, or at the station, and you feel sure you can recognize her anywhere by a glimpse of her hat, you become hopelessly confused over the bevy of hats around you, every one of which you would swear was the very identical hat your fair lady was accustomed

Here's how it came about. Solomon, that intrepid husband of a thousand women, was out walking one fine spring day with a certain favored wife of his, one of the cuddly, teasing, coaxing variety, with such a vivid personality that he could even remember her

When they reached the business section, and were strolling past a millinery shop, the petite one went into raptures over a little beige felt hat on display in the window.

"Oh, I must have that darling hat, Solly dear. Isn't it adorable?" And she gave his arm an affectionate

"You'll buy it for me, won't you, dearie? All the neighbors will envy me. Just imagine how stunning it will look! I wa-a-nt it."

Of course they bought the hat and the little favored wife wore it home. The next morning a disheveled, downcast, pitiable wreck of a oncepowerful man, who looked as though he had had a thousand stormy interviews, hobbled into the millinery shop, holding in his trembling hands a tiny beige felt hat, and thundered, "I want to place an order for 999 hats exactly like this one."

And so it was that mass production had its beginning.—Kansas City Star.

Roman Historian Wrote

of "Noble" Caledonians Picts is the name by which, for five and a half centuries-296 to 844 A. D. -the people that inhabited eastern Scotland, from the Forth to the Pentland firth, were known. In certain chronicles they are styled Picti, Pictones, Pictores, or Piccardaig-all forms of the same root; but sometimes the native Gaelic name of Cruithnig is applied to them, and their country called Cruithen-tuath, the equivalent of the Latin Pictavia firth. In their wars in Britain the Romans came into collision with the

and Old Norse Pettland, which still survives in the name of the Pentland Picts. One Roman or Latin writer of that time speaks of "the Caledonians and other Picts," which implies the inclusion of the former in the latter people. The well-known Roman historian, Tacitus, calls Scotland north of the Firths of Forth and Clyde, Caledonia, and he describes the Caledonians as a noble race of barbarians, who fight in chariots as well as on foot, with long swords and short shields, and whose fair red hair and large limbs argued a Teutonic origin. The

Keeping Cool

Highlanders of today are of Celtic

origin. The prefix, mac, meaning son

of, is from the Gaelic.

When things are easy, the world seems to go along pretty well. We think we are fine fellows. But let a puff of cold wind come along, and up go the collars of our coats. In other word it takes a tight corner for our character to be tested and proved.

The boastful feliow gets into a terrible panic when danger threatens. He forgets all the things he has been bragging about.

The real man of courage takes care not to say what he will do when the pinch comes, because he knows how frail the human mind is. But the chances are, when the trial does come, he keeps a stiff upper lip, holds up his head, staightens his back, and does his level best not only to bear the strain, but to triumph in the trial. You can't be brave if you don't keep cool, -London Tit-Bits.

Along the Open Road

It is the prime secret of the Open Road that you are to pass nothing. despise nothing upon this earth. As you travel, many things, both great and small will come to your attention; you are to regard all with open eyes and a heart of simplicity. Believe that everything belongs somewhere; each thing has its fitting and luminous place within this mosaic of human life. The Road is not open to those who withdraw the skirts of intolerance or lift the chin of pride. Rejecting the least of those who are called common or unclean, it is (curiously) you yourself that you reject .- David Grayson, in "The Friendly Road."

Old-Time Phrases

The phrase "to put on airs" is oid, having been used as early as 1832. "Angel cake" came into use in the early 1890s, and "ante" was a common poker term in 1853.

"Anti-saloon" was introduced in temperance pamphlets in 1888, and "backwoods" appeared as early as 1746.

Going Into the Pot

The expression "Gone to pot" is probably of oriental origin. A tailor in Samarkand, who lived near a burial ground, kept count of the deaths by dropping a stone into a pet for every funeral that passed. When he died some one remarked that he had gone into the pot him elf.

******* Hysterics in Men

Bring Bald Heads Brighton, England. - Doctor Davis, a dermatologist, in the course of a speech before the conference of the incorporated guild of hairdressers and wigmakers, stated that the reason men were subject to "baldheadedness" and that women were not, was that men were more hysterical.

He also dispelled the cherished illusion of the baldheaded man that baldness was a sign of superior intelligence. He said he knew many donkeys who were baldheaded.

~

Tanks and Planes Cause

Army to Change Tactics Washington.-Taking cognizance of the changed nature of warfare resulting from the use of airplanes and tanks, the army infantry during the past year has devoted much time to studies of offensive measures to be

used against these instruments. At the same time, according to the annual report of Maj. Gen. Stephen O. Fuqua, chief of infantry, recently made public, the foot soldiers retain their former skill with their traditional weapon, the rifle. The infantry rifle team won over groups from other branches of the army and navy at the national rifle team match held at Camp Perry during the year, he pointed out.

Fuqua's report dealt at length with studies now under way to perfect new types of arms for the infantry. A .30caliber automatic shoulder rifle is one of the most important weapons being developed. Also, the infantry is investigating the utility of the aircooled caliber .50 machine guns, which the army hopes to use both as an anti-tank and anti-aircraft gun.

Aviation figures largely in the present tactical research of the infantry.

Soviet Wins First Tilt in Opera Singer's Suit

Paris.-The Soviet government won the first skirmish in the suit started by the opera singer, Feodor Chaliapin, against the official publishing house of the Soviets.

Chaliapin sued for \$80,000 damages, alleging the unauthorized publication of his memoirs, the manuscript of which, he charges, was stolen from a Moscow friend.

When the case came before the court, a Soviet trade delegation representative declared the court was not competent to judge because the Soviet commercial attaches in Paris were protected by diplomatic immu-

The court postponed the case until spring. Chaliapin charges that the trade delegation sponsored the publication in French of the memoirs. He said it was impossible to take action directly against the Soviets for the original publication of his memoirs in

Huge Aqueduct to Carry Water Over 82 Miles

Manchester, Enland.—An aqueduct 82 miles long between Haweswater lake and Manchester, costing \$50,000,-000, is to supply this city with its water for a century.

Driving 30 miles of tunnel 9 feet in diameter through the iron-hard slopes of a crater is one of the most difficult tasks in the Manchester corporation's scheme for providing the water supply. When completed, six years hence, the aqueduct will carry 90,000,000 gallons of water daily, running the 82 miles

A great dam is being built at Mardale to bring the lake up to the necessary level. Haweswater will then become the second largest lake in Eng-

The tunnel section of the aqueduct is to be lined with steel and stone and after the water pipes are laid there will still be sufficient room for workmen to carry out repairs. Before the pipes can be installed, however, it is estimated that about 150,000 tons of earth and rock will have to be blasted away, and some 250 tons of explosives will be used.

He Knows His Teeth but Not His Books

Paris .- A Paris court has fined M. Edouard Leib the equivalent of \$40 for illegally practicing dentistry.

Although more than six hundred of Leib's clients signed a manifesto to the excellence of the work he had performed on them, and notwithstanding the fact that during the war he had worked in several hospitals and was consulted by scores of dentists with diplomas, because he had not been able to pass the necessary medical examination, the Paris court disqualified him. He has returned to his books, determined to make another effort to pass the examination.

Vanishing Swim Suits Latest on Riviera

Nice, France. - The newest and naughtiest fad of the ultra-smart young set on the Riviera is a magic bathing suit which dissolves in water.

The bathing suit meets all legal requirements until they come in touch with water. Then they mysteriously

The costumes are only used for moonlight bathing. Made of a tissue which melts in water, they are selling at a premium.

Might Be Excused for

Using Strong Language A few nights ago a spectacular fire left a warehouse a smoking ruin. Five alarms were sounded. Eleven reporters-two working and nine out to enjoy the fire-rushed to the scene. A columnist, who had no business there but loves to run after the engines, got his feet wet and caught

The conflagration was the destructive sequel to a minor blaze that had scorched the establishment a few hours earlier. The first fire was discovered by the owner of the building, who sent in the alarm, watched the fire-fighters apparently extinguish the flames, and then went home.

Defore retiring he telephoned a contractor to call around the next morning to see about repairing a few windows, painting the doors, and otherwise touching up the place here and there.

At seven o'clock the next morning the contractor called upon the owner at his home and together they went downtown. Arrived where the building should have been, the contractor looked at the smoking pile of debris and then at the owner. "Just what was it you wanted me to do?" he asked, puzzled.

Because of the owner's fine Sundayschool record, we don't like to tell what he replied .- Pittsburgh Post Ga-

How Volcanic Islands

Act as Safety Valves Niuafou is one of the Tonga, or Friendly islands, situated halfway between Samoa and Fiji in one of the most restless geological areas in the world. Stretching across the South Pacific from Samoa to North island, New Zealand, there is a huge fissure in the earth's crust. Volcanic islands. such as Niuafou, strewn along this gigantic crack, act as vents for the molten mass within the earth. The jack-in-the-box island of Falcon has popped up from the ocean's bottom at least twice, only to be washed and blown away each time by sea and wind. Only recently it has made its reappearance again in larger size, acting as one of these famous safety valves for the earth's mighty internal furnace.

To passengers of steamers passing close, the island looks like any other tropic isle, green with vegetation and coconut palms. Clean white houses and thatched native churches set in grassy lawns dot the hillsides. When wind and sea are quiet, landings are made in small open boats which are guided skillfully into a nook partly sheltered by fingers of lava flow. Such landings are dangerous and exciting, because the boats bob up and down with the incoming rollers and scrape against the steep, jagged cliffs.-National Geographic Society Bulletin.

Obeying Instructions Farmer Smith had a supply of win-

ter cabbage to plant. Arriving at the farmyard, he called over one of his laborers.

"George," he said, "I want you to plant these cabbages, but remember to plant them well apart."

"Ay, sir," replied George, about his task,

The following day the farmer again

went in search of George. "Well," he said, when he found him, "did you plant those cabbages as I

told you?" "Yes, sir," was George's reply. "I planted some in your garden and some in mine. Is that far enough apart?"-London Answers.

Jewish Emblem

Just as the oak from which came the navy that made Britain mistress of the seas, became the national tree of England, so did the beautiful lofty palm, which gave oil, timber and dates to its people, become the national tree of what we like to call the Holy land. Judah Maccabaeus had it engraved on his coins as a symbol of Jewry victorious. Vespasian, the Roman emperor under whom the Jews were finally defeated, engraved it on his coinage as a token that he had vanquished Judea. The palm tree was well understood to represent the Jewish people in ancient days, as, indeed, it does in a sense today.-Montreal

Chivalry in 1867

"When you tread on a lady's train in the street, you are not required to apologize," observed the Providence (R. L.) Journal on July 18, 1867. "You have a right to be in the street. So has the lady; but she has no more right to carry her train with the expectation of having it respected than she has to bring her cradle to Market square and rock her baby in it. You have a right to stay on the sidewalk, and if any foolish woman chooses to lay five yards of satin between your feet and the flags, it is her risk, not yours."-Kansas City Times.

Chinese Immigration

Prior to the discovery of gold in California in 1848 there were no Chinese laborers in the United States. From 1840 to 1850, according to immigration records, only 35 entered the country, but during the next decade 41,397 came to the port of San Francisce. About 1870 Chinese coolie immigration began to be a political issue and the treaty signed November 17, 1800, gave the United States the right to regulate, limit or suspend the Immigration of new Chinese laborers, out not to prohibit it altegether.

Old Expression

The expression "great horn-spoon" is to be found in "Bigelow Papers," in which it is used as a humorous, but meaningless oath, that may owe its origin to the practice of using spoons made from horn. In Scotland, until late in the Nineteenth century, the making of spoons from the horns of cattle or sheep was common, and in that country porridge was always eaten with a horn-spoon. The larger the horn the greater the spoon, and so Scottish spoons were of different sizes. In Thom's "Jack O' the Knowe," relating to Dumfriesshire, and published jn 1877, the term "long horn-spoon" is the utensil used to serve reeking kail out of tureens.-Literary Digest.

Hobson's Choice

Desperately and breathlessly, Whyte dashed into the doctor's surgery and collapsed in a chair.

"Whatever have you been doing?" exclaimed the doctor, as Whyte showed signs of coming round. "Been having a heavy meal, doctor,"

moaned Whyte. "What!" gasped the doctor in astonishment. "And I've often told you

not to hurry after a heavy meal." "Yes, doctor, you have, but on this occasion I had to." "Why?"

"Because I couldn't pay for it!"

Island in Dispute

The isle of Trinidad, off the coast of Brazil was first discovered by the Portuguese, but never claimed or made use of until 1700 when the English astronomer Halley, in the course of a scientific cruise, raised the British flag there. In 1895 Great Britain annexed the island for a cable station. This, however, was opposed by Brazil, and by mutual consent the dispute was submitted to the king of Portugal, who decided in favor of Brazil. The island is 680 miles east of the coast of Espirito Santo, Brazil. It is four miles long and two miles

FORD **SMOOTHNESS**

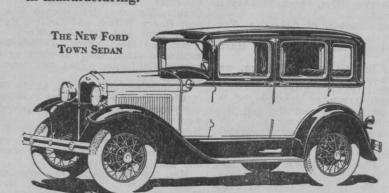

The new Ford has more than twenty ball and roller bearings

EVIDENCE of the high quality built into the new Ford is the extensive use of ball and roller bearings. There are more than twenty in all - an unusually large number. Each bearing is adequate in size and carefully selected for the work it has to do.

At some points in the Ford chassis you will find ball bearings. At others, roller bearings are used regardless of their higher cost. The deciding factor is the performance of the car.

The extensive use of ball and roller bearings in the new Ford insures smoother operation, saves gasoline, increases speed and power, gives quicker pick-up, decreases noise, and gives greater reliability and longer life

to vital moving parts. Other outstanding features that make the new Ford a value far above the price are the Triplex shatter-proof glass windshield, silent, fully enclosed four-wheel brakes, four Houdaille double-acting hydraulic shock absorbers, aluminum pistons, chrome silicon alloy valves, three-quarter floating rear axle, Rustless Steel, the extensive use of fine steel forgings, and unusual accuracy in manufacturing.

LOW PRICES OF FORD CARS \$435 to \$660

F. O. B. Detroit, plus freight and delivery. Bumpers and spare tire extra at small cost. You can purchase a Ford on economical terms through the Authorized Ford Finance Plans of the Universal Credit Company.

The Aid Society of Miller's church will meet on Friday evening, Jan. 30, at the home of Mr. Curtis Miller.

First Illustrated Book

Is Found in England

London.-One of the heads of a firm of English booksellers has recently discovered the first illustrated book ever printed in England. It is the Machlinia, "Book of Hours" and is stated to be worth \$100,000.

William De Machilina was London's first printer to use wood blocks for illustrations and this volume was issued from his second printing press near Fleet bridge in the middle of the Fifteenth century.

Although fragments of the "Book of Hours" have been found from time to time in the bindings of old books, no one ever suspected it was illustrated, The volume consists of 100 vellum pages and his eight illustrations portraying the meeting of the Virgin and Elisabeth, the holy family at Bethlehem, the presentation at the temple, the worship of the Magi, the massacre of the innocents, the shepherds, the last judgment and the crucifixion.

The find is particularly interesting because these first-line drawings may be said to be the foundation from which all picture reproductions have their origin. It is thought that the book may go to America.

Wheat Production

in Brazil Increases

Rio Janeiro.-Wheat production in Brazil is increasing rapidly, official statistics reveal. In 1929 Brazil exported 21,567,223

kilos, valued at 6,000 contos, as compared to only 1,575,011 kilos in 1928, valued at approximately 446 contos. The opening of a Corn Products Refining company plant in the state of Sao Paulo offers that state a new outlet for its wheat which now totals about 20,000,000 sacks of sixty kilos each. The corn products plant has a daily capacity of 1,000 sacks.

Judge Rules a Good

Hug Is Worth \$72

Minneapolis.-A good hug is worth exactly \$72, Judge Levi M. Hall of Municipal court has ruled. Anna Mitlow sued Edward Hensley for \$75. She charged he hugged her so hard while dancing that two of her ribs were cracked. Her doctor bill was \$3. but she asked for \$75 for the injury. "I'll only give you enough for the doctor bill. A good squeeze like that is worth \$72," Judge Hall said.

SCANDAL OF GRETNA **GREEN STIRS CLERGY**

Abuse of Scottish Marriage Law Grows Apace.

Glasgow, Scotland.—The generationold controversy that has centered about marriages at Gretna Green is again engaging the attention of the Scottish ministers and authorities. It seems that there is little they can do about a situation that is now widely referred to as "the scandal of Gretna Green."

Figures show that there are more marriages performed at Gretna Green at the present time than in the old days of high romance.

Scottish Law of Gretna Green.

According to Scottish law any couple may be married at Gretna with or without the consent of their parents and whether or not they are minors. One of the parties is required to have lived in Scotland for at least three weeks before the wedding, but inasmuch as a statement of residence signed by a witness is the only proof required, it is not difficult to circumvent that requirement. Then, unless the marriage is registered, it is no marriage at all. It may be repudiated at any time and in point of fact, after the expiration of the three months registration period, might just as well not have taken place so far as the authorities are concerned.

Few bother about registrations. Time was when a marriage at Gretna was looked upon by the parties to it as a tie as binding as an English ceremony. But today the knots tied there are slip knots. Out of 260 marriages performed in the early part of this year only 44 were registered.

Denounced by Clergy.

Out of 275 marriages performed in 1928 only 18 were registered. The Scotch clergy have stigmatized the practice as a "commercialized traffic designated to make life easy for the bigamist and the man who wishes to decoy a girl into a spurious marriage." But Gretna's customs and sanctions remain unchanged.

Gretna Green has been a flourishing center for hasty nuptials since 1754, when an act was passed by parliament preventing clandestine marriages in England. Being just over the border from England, in Dumfriesshire, Scotland, Gretna's bureaus for marrying eloping English girls and boys began to do a heavier business immediately. The poor and the rich, high and low, bent their steps toward the little village across the Sark. According to Scotch law, any one might officiate at the ceremony so long as he swore that he had witnessed the mutual pledges of fidelity between the prospective bride and groom.

Romance still clings to Gretna and because of it many couples are attracted there annually. But the commercialized aspects of its activities are serving to bring the vilage into bad repute, and the unhappiness that comes to hundreds of young English girls yearly because of the looseness of this state sponsored system is stirring up a controvery beside which the companionate marriage controversy seems parvenu and puny.

Cuban Army Officer

Perfects New Air Bomb Havana .- A new type of bomb for

airplanes, invented by Lieut. Florindo Fernandez Preito, explosive expert of the Cuban army, uses a novel explosive compound may up of chlorate of potash and sugar. The bomb is the result of more than two years of experimenting. It weighs 18 pounds, of which 3 are the explosive charge. Recent tests made by one of the army planes at an altitude of 1,500 feet resulted in ripping the center of the ground target 4 feet in diameter and 1 foot deep.

Cranes in Denmark Carry Own Songbirds

Copenhagen.—Cranes in Denmark are so musical that they carry their songbirds with them when they fly.

The Berlingske Tidene reports that one of its sharp-eyed ornithologists turned his field glasses skyward the other day and saw a flock of eight road cranes carrying several wagtails on their backs as they flew.

The wagtails soared off from time to time, just to keep their wings limbered up, but always returned to their "private passenger planes" before they could get out of range.

Has Quake a Day

Innsbruck, Austria.—For some time a mysterious earthquake near Reutte has been shaking the ground three or four times a day.

Famous Lion Dead London.-"Toto," famous lion at the

zoo, who could be petted by visitors,

Loom 300 Years Old Is Still in Service

Pomeroy, Ohio.-A loom, relic of poincer days, said to be almost three hundred years old, is still being used by Mrs. Henry Seidenable, sixty, of Pomeroy.

She has used it nearly all her life for weaving fine linens and still prefers it to the patented looms of modern make. The loom was originally from Rutland township, near here.

Silver By-Product of

Other Ores, Bureau Savs

Washington.-More than half the world's production of silver is derived from ores valued chiefly for other metals, according to a study just completed by the bureau of mines, Department of Commerce.

The work was undertaken after the recent decline in silver prices to a new low level had provoked inquiry as to the extent to which the white metal is a by-product of the other ores, tending to maintain its production in spite of low prices.

The bureau held that since only one-third the world's silver production is from ores that derive more than 70 per cent of their value from silver, price is of less weight in inducing production than in the case of other metals associated with it. Many mines depending upon ores worth less than \$10 a ton, of which silver at 50 cents an ounce makes up more than half the value, probably earn little if any profit at present prices, the bureau said, and production curtailment is likely.

Mexico, producing more than 90 per cent of the world's silver derived from such ore, will be the most seriously affected by a further decline.

Arab Stallion Once

King's Brought to U.S.

New York.-Mirage, a snow-white Arabian stallion, who has been ridden by the king of Egypt, an Arab chieftain and a titled English lady, set his hoofs for the first time on democratic soil. The steed was purchased by Roger A. Selby, shoe manufacturer of Portsmouth, Ohio, from Lady Wentworth of Sussex, England. He will spend his remaining days on Selby's stock farm.

Abner Monday Finds III Luck Falls on Mondays

Los Angeles.-Monday sure is blue Monday for Abner Monday. He has quite an extensive record at the Hollywood police station. The books there show that he has been arrested 17 times on Monday, all arrests having followed asserted drunkenness, which, in all probability, caused his Mondays to be bluer because of a headache. He is fifty-three.

Blossoms Three Feet Across

Blossoms of a plant found in the interior of Sumatra grow to enormous size, often reaching a diameter of three feet and more, says Popular Mechanics Magazine. The buds are only as large as walnuts and give no indication of their future proportions. Just before opening, they closely resemble a cabbage and the matured blossom is somewhat like the forget-me-not bloom. It has an unpleasant odor, and, oddly enough, is usually found only along wild elephant trails.

"NOAH" PREPARES FOR 1932 FLOOD

Pacific Coast Man Sure Sea Will Engulf Us.

Olympia, Wash .- A dry land Noah is continuing preparations for his personal escape in an ark when the Pacific coast feels the wrath of the Lord and sinks into the Pacific ocean.

There is no question in the mind of William Lound Greenwood, sixty, but that folks along the Pacific slope are going to get a surprise some fine day after the year 1932.

Mount Hope, in British Columbia, will sink into the Fraser river, according to the grizzled "Captain Billy" Greenwood, who never skippered a boat in his life. The coast line will disappear. Victoria, Seattle, and all cities as far south as San Francisco will be swallowed up by huge waves. There will be a second inundation, and then California will get what's coming. In the north the ocean will be halted by the Cascade mountains, but in the south the land will sink as far back as the Rockies.

Panic and death will be everywhere, but "Captain Billy" will calmly knock off work in the sawmill where he is employed, board the "Ark Second" and sail to safety in a craft that sailormen say couldn't float in a calm lake.

Greenwood told all about it, in the astonishing cabin of his astonishing

Eight years ago he started the ark. It will be completed by 1932, when he expects first forerunners of destruction of the Pacific coast to start.

Unlike Noah, "Captain Billy" will take no animals along, aside from his two dogs. His craft is the despair of seagoing.

gobs, but Captain Greenwood isn't worried. Noah was no seafaring man himself, Greenwood pointed out.

Woman Regains Eyesight When Teeth Are Pulled

Chicago.-For fourteen years Mrs. Lillian Wallace, thirty-eight years old, wife of a chef at the Great Lakes Naval Training station, had been blind in the left eye. Visits to expert oculists were futile and she was advised to have the sightless eye removed to save the good right eve. She refused. Recently Mrs. Wallace had five teeth extracted. She went home and set the

Her jaw ached and to ease the pain she rubbed it. In doing so she covered her right eye. As she rubbed she seemed to brush away a web from the left eye. Suddenly the blurred image of a fork appeared. Then furniture and walls appeared. Doctors said that sight had been almost completely restored after a lapse of fourteen years.

Peiping "Night Life" Enlivened by Cabarets

Peiping China.-While the government at Nanking has issued a mandate forbidding western-style dancing in the capital, Peiping's "night life" has been stimulated by the addition of a number of Chinese cabarets, in which Chinese girl partners are available at fixed fees for each dance.

At the same time Chinese politicians who flocked to Peiping hunting for jobs in the new government are finding recreation in the foreign-style

For a number of years Peiping (then Peking) was satisfied with two "night clubs," in which Russian girls acted as partners. These cabarets had their ups and downs, but managed to keep going. Today they are profiting by the renewed activity.

But the latest novelties are the purely Chinese night clubs, of which there are now several. They are owned and operated by Chinese, with Chinese dancing partners, and their patrons are mostly Chinese. Managers who learned the business in Shanghai are in charge.

Sing-song girls in Peiping, who have had two bad years before the city again became a sort of capital, are determined to learn western dancing and qualifying as dancing partners. Several of them already have abandoned the old-style methods for the western innovation.

Car Won't Do 50; Proves

It for Judge and Cop Omaha, Neb.-Leo Curtis was haled into court and fined when police from the speed detail testified he was driving 50 miles an hour when they waved

him to the curb. Curtis protested his old bus could not go 35, the Omaha limit, let alone

Judge Lester Palmer was impressed and sent a plain clothes man out to try out Curtis' machine. He was promptly pinched by the same men who caught Curtis. He swore he was going only 34.

Judge Palmer ordered all speedometers on police cars tested.

Pet Kitten Saves Woman From Shot

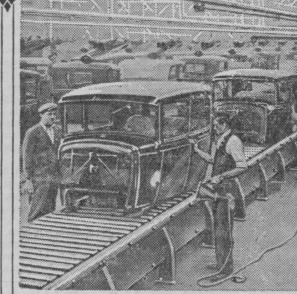

Waterloo, N. Y .- Mrs. Louis H. I ry always has been fond of her pet kitten, but she is fonder than ever of it now.

Mrs. Kearney passed the kitten in her ward and stooped over to pet the animal. As she did so, a bullet whizzed just above her head.

The shot was blamed on small

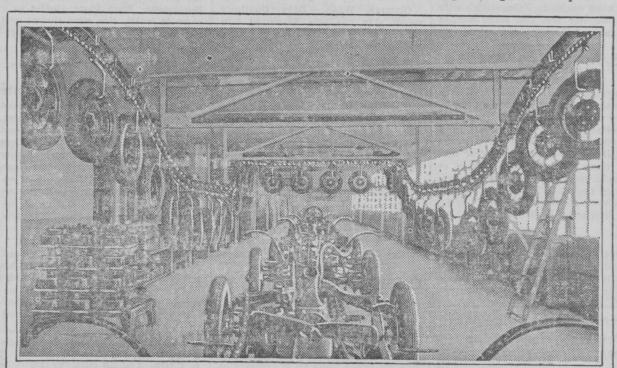

Conveyors Carry Ford Car Parts

Trains unload in the plant.

Bodies starting through the shop.

Conveyors carry wheels with mounted tires over a line on which cars pass to completion.

The highly important part played by conveyor systems in all Ford Motor Company manufacturing and assembly plants is graphically shown in the above three pictures taken in the recently opened Edgewater, N. J., plant. One of the pictures shows how parts may be unloaded from freight cars within the plant only a few feet from the various assembly lines. Another picture shows automobile bodies starting their trip on a conveyor while

the third view is of the conveyor system used to bring wheels to the chasses which are also moving on a conveyor. As indicated in the picture, a constant flow of wheels on which the tires have already been mounted moves around and over the chassis assembly line. As a chassis enters the section, workers, in groups of four, each take a wheel from the hooks and fasten it to the

CIVIL SERVICE ROLL AT PEAK

Classified Employees Total Is the Highest Since World War.

Washington.—More civil service employees are on the payrolls today than at any time since the World war, it was revealed in the civil service commission's report to congress.

"There were," the report stated, "608,915 employees in the executive civil service on June 30, 1930, as against 587,665 at the end of the last fiscal year, a net increase of 21,250 employees.

"There are now 462,083 positions subject to competitive examination under the civil service act, a gain of 16,126 during the year."

Veteran preference regulations, it is stated, have resulted in the appointment of 159,332 veterans to the classified service since 1919, this figure representing 24.64 per cent of all appointments; and from the issuance, March 3, 1923, of the executive order providing for a 10 point preference for disabled veterans, up to June 30 of this year, 9,258 disabled veterans were appointed, of whom 1,892 were appointed in the last year.

The greatest gain during the year of 10,211 employees, was made by the Department of Commerce, accounted for in large part by the temporary force of census workers; and the greatest reduction of personnel, a total of 2,879, was made by the Navy department. A few establishments show a slight decline.

Postal Workers Increased.

The War department increased its force by 3,022, the Panama canal by 2,202, the Interior department by 2,001 and the Department of Agriculture by 1,741.

The postal service, with 316,995 employees, had a net increase of 2,200, and the other services of 19,050 during the year.

Women, according to the report, "are making rapid and substantial advances in federal establishments."

The commission renewed its recommendations for restoration to the classified service of the positions of deputy collector of internal revenue and deputy marshal, and its extension to include field Presidential positions which are non-policy determining, such as collectors of internal revnue and customs, and postmasters, dispensing with confirmation by the sprate

Progress of Women Noted.

Emphasizing its policy in the matter of extensions under the retirement law, the commission reaffirms its belief that "in order to effectuate the primary purpose of the act, continuance for more than four years beyond retirement age must be confined to those employees who are engaged on important work which cannot be satisfactorily completed without them."

It is recognized, the report states, "that the separation of an experienced employee still able to serve acceptably after he is four years past retirement age is a loss to the government; but it must be borne to secure relief from the greater losses resulting from superannuation in the service."

Discussing the results of fingerprints in keeping undesirable applicants out of the federal service, the commission reports that "5,037 of these persons had police records, either minor or serious."

Jail Mutineers on Yacht

of Wealthy American

London.—Chinese ringleaders of a recent mutiny at Singapore aboard the American auxiliary yacht Shenandoah, owned by Gibson Fahnestock, were sentenced to a month's imprisonment. The Chinese were closing in on the captain when Fahnestock, a New York and Washington millionaire, took a hand and helped the officers herd the crew back to their quarters, where they were subdued. Fahnestock's wife and daughter and two other women were aboard.

U. S. Apprentices Wed; Lose Printing Jobs

Washington.—Five young men who married in haste were given an opportunity to repent at leisure. They were apprentices at the government printing office, where Public Printer George H. Carter has a hard and fast rule that there shall be no marrying or giving in marriage during the apprenticeship period. Their forced resignations were "without prejudice" to future civil service positions.

Dog Fires Fatal Shot

Ardmore, Okla.—A shot gun accidentally discharged by the paw of a playful dog killed Mrs. A. J. Hardy of this place.

Pee-Wee Money Soon T Wears Out, U. S. Finds

Washington. — The Treasury department is worried because the new small size paper money apparently is not lasting as long as the larger bills, a house committee was told. The treasury is getting back more \$5 bills and fewer \$20 than with the larger money.

BEGGAR BY DAY, HE WAS SULTAN IN CAVE HAREM

Modern Jekyll and Hyde in Mexico is

Bared Through Jealousy

of Woman.

Mexico City.—A crippled beggar on the streets by day and a sultan in his underground harem by night was the double role lived for years by an ingenius resident of Coyoacan until betrayed through a jealous woman.

Jose Ramirez, now called "Don Juan of the Wondrous Court," was a successful beggar. But the man was ambitious and not satisfied with the results of his own efforts. So, having charm for the fair sex, he capitalized his attractions and enlisted in his service of begging six of his feminine admirers. These he sent into the streets for alms and at night they returned to share his caresses and to deliver their collections.

The court of the "beggar-sultan," who found himself enriched by the contributions of his helpers, was maintained in a degree of elegance not compatible with his means of livelihood in a cave near the town. Here he dropped his pose of a cripple and lived in comfort.

Friction arose in the harem because Ramirez failed to divide his attention equally and the slighted woman betrayed him to the police.

Officials visited the cave and ended Ramirez' game. The "cripple" fled from the police. His companions were held.

Builds Telescope Out of Plumbing Supplies

Pittsburgh. — Tools and materials used in his work as a plumber, have aided Leo Scanlon, twenty-seven, to build a telescope recently dedicated.

Plumbing pipes, brass tubing, elbows and metal from discarded water tanks are combined in the scientific instrument.

An observatory to house the telescope also is completed and will be the headquarters of a group of amateur students of stars. Scanlon was the guiding genius behind the erection of the observatory telescope. He was an organizer of the astronomical section of the academy of science and art of Carnegie institute.

art of Carnegie institute.

The eyes of professional astronomers have turned with interest to the homemade telescope. Dr. Frank C. Jordan, director of the Allegheny observatory, and John W. Fecker, professional telescope maker, are to attend the dedication services and test the

The telescope has a 10-inch lens, which magnifies the stars nearly 400 times their size as seen by the naked eve.

Scotland Yard Keeps Murder Grips Packed

London.—A Scotland Yard detective sent hurriedly out of town to investigate a murder case just shouts to a messenger to bring him a "murder bag" and dashes off.

Although little is known of these "murder bags" outside of Scotland Yard, six of them are always kept packed and ready for a call.

Its contents are:

Two rubber aprons.
Two pairs of rubber gloves.
Fingerprint apparatus, including

powders and brushes.
One magnifying glass.

One electric torch.
One luminous compass.
One pair of handcuffs.

One pair of handcuffs.
Footprint apparatus, including zinc collapsible molds.

Two 24-inch steel flexible rules.

A steel case for stationery, includ-

ing fingerprint forms.

Towels, soap, and strong disinfect-

ants.

The rubber aprons, gloves, and disinfectants are designed to protect the detective from germs while conducting his investigations.

Rear Rabbits for Wool, New Oregon Industry

Olympia, Wash.—Baby Bunting's rabbit skin has now developed into rabbits' wool for aviators and airplane passengers' clothing. An Oregon mill has been turning out something new in yarn, the first of its kind produced in the United States, from the wool sheared from Angora rabbits.

The material is expensive but is eight times warmer than ordinary wool and equal to fur in extreme weather conditions.

Growers receive from \$3.50 to \$7 per pound for the rabbit wool, according to length of pelage. Sheared rabbits will again grow more wool.

Berets, blankets, shawls, sweaters, hoods, mitts and socks for airplane service are made of the new fuzzy cloth. A rabbit will produce about 12 ounces of wool in a year.

Cuban Army Officer Perfects New Bomb

Havana.—A new type of bomb for airplanes, invented by Lieut. Florindo Fernandez Preito, explosive expert of the Cuban army, uses a novel explosive compound made up of chlorate of potash and sugar.

The bomb is the result of more than two years of experimenting. It weighs eighteen pounds, of which three are the explosive charge. Recent tests made by one of the army planes at an altitude of 1,500 feet resulted in ripping the center of the ground target four feet in diameter and one foot wide.

STRANGE SPORTS OF OTHER LANDS

Jai Alai, Cuba's Popular Pastime, Is the Fastest Game in World.

Washington.—"Foreign visitors who are amazed at Tom Thumb golf and backgammon may come from lands which have pastimes equally strange and puzzling to the average American," says a bulletin from the Na-

tional Geographic society.

"Cubans, for instance, have their high-speed jai alai (pronounced highalie). If any sport has a right to the title 'fastest in the world' this whirlwind Spanish game is in the forefront.

"Jai alai is played on a long indoor court with one side wall and two end walls. The players occupy the court space in common, batting the ball against the wall until a player on one side fails to return it, when the opposing team scores a point. Instead of rackets the players use basketwoven bats, crescent-shaped, with one end laced to the hand.

"A team of two players must protect an area of 7,500 square feet. If the rebound is close to the wall of the court the cesta, or crescent-shaped bat, must be manipulated with the utmost agility and skill. Cuban crowds go into a frenzy watching its thrills.

Another Scotch Game.

"When Scotland's golf greens and fairways are covered with ice and snow a popular sport is curling, a game in which players glide large, rounded stones down a smooth stretch of ice toward a mark called a tee. Four players, each with two stones. form a side. If the curler cannot reach the tee he tries to leave his stone so as to block an opposing player. Like quoits, the players shot nearest to the tee scores a point.

"In the Philippine islands the Bontoc Igorots have a remarkable pastime which consists in slapping the thigh of an opponent with the flat of the hand. One man sits on a bench with the thigh exposed, and his opponent slaps him with all the strength he can muster.

"After the stroke, judges examine the thigh of the man who has been hit, and if the blow has been sufficiently hard to cause the blood to show beneath the skin, the striker has won the game, but if not, then the opponents change places. The first contestant who causes the blood to show beneath the other's skin is declared the winner.

"Every ocean traveler knows shuffleboard, also called shovelboard. Round wooden disks are propelled by long, notched sticks toward a numbered checkerboard about twenty-five feet away. The game is to land the disks in the squares with the highest numbers, and to keep them from stopping in other squares which subtract from the score.

Hunting on Foot.

"Hunting has long been associated with the English, but one form of their hunting is very little known outside of England. This is beagling, or following the hare on foot with beagles, a dwarf hunting dog. Unlike the fox or the stag, the hare is very shortwinded. It soon outdistances both hunters and hounds, but, as it quickly tires, they may catch it if they have not been side-tracked on false trails. The hare, however, really has a sporting chance, because its scent is the faintest of all game, and it grows steadily weaker as the hare nears the end of its strength.

"Miniature golf may not be new to these shores. Early chroniclers tell of New Amsterdam Dutch burghers playing 'kolf' on small courses near taverns. After a round or two the 'kolfers' retired to the tavern for a bowl of punch, lingering over it in typical 'nineteenth hole' fashion until the room was filled with the aroma of their long clay pipes.

Backgammon, in one form or another, has been traced to the Romans, the pre-Columbian Mexicans, and the Burmanese. Even Plato alludes to a game in which dice were thrown and men were placed after due deliberation."

Land Grant Colleges Enroll 164,000 Students

Washington.—The 52 so-called land grant colleges in the United States, those supported in part by the federal government, now enroll more than 164,000 students a year and operate educational plants worth more than half a billion dollars, the office of education of the Interior department reported recently. The land grant colleges include the University of Illinois.

Steal Cop's Uniform

Atlanta, Ga.—The new police uniform Lieutenant Weaver left in his automobile as a protection against car thefts when he parked the machine on a pedestrian-packed thoroughfare was gone when he returned.

Longmont, Colo.—A sollection of pins, tacks, wire, nails and other bits of iron larger than a baseball and weighing more than a pound were taken from the stomach of a cow here, after it had died.

STOCK EXCHANGE USED BY CROOKS IN NEW SWINDLE

Exploitation of Public Through Manipulation of Listed Securities Revealed.

New York.—In the last year the public has been exploited to the extent of millions of dollars by under-cover "rackets" using listed securities to lure investors into traps, says Louis Guenther, publisher of the Financial World in New York city. This looting was accomplished, he writes in the current issue of the Financial World, by manipulation, stock-boosting paid tipster sheets, "come-on" telegrams and false information. The evil has grown to such an extent that even bribery of customers' men is employed. Among these racketeers are individuals who in the past have been involved in notorious financial frauds. This evil practice has grown so pronounced that the necessity to check it has become an urgent one. Otherwise its continuance will succeed in undermining public confidence.

The stock "racketeers" have avoided detection, "not so much by their methods, which are simple enough, but by the smoke screens they have raised about them. Behind it they cover up their identity. This done they then proceed merrily with their work of looting. They select a stock issue on which they can secure an option of a large block of shares and then they start to manufacture a fictitious market for it by the use of predatory tipster sheets, bribery, inspired misinformation, and come-on telegrams. Under the cover of interest aroused among their following the unsuspecting investor is lured into their traps. It was by the foregoing methods that the public was drawn into the web spun by these racketeers around Dunhill International, Advance Rumely, Mallinson Silk, Manhattan Electric and, more recently, Brockway Motor. On a minor scale several other inactive securities were employed for simi-

lar purposes.

"Manhattan Electric was boosted from \$27 a share to \$55; Dunhill International from \$10 to \$43; Mallinson Silk from \$6 to \$12, and Advance Rumely from a low level to as high as \$119 for the preferred and \$104 for its common stock. After the racketeers had unloaded, these stocks fell like a plummit. The most recent quotations for these securities are: Advance Rumely, \$18 for the preferred and \$4 for the common; \$4 for Mallinson; \$10 for Dunhill International, and \$4 for Manhattan Electric.

It is pointed out, however, that the companies whose securities were used as the vehicles to carry on these financial rackets were not involved in these operations. They were defenseless because their securities, being listed, are more or less public property so far as dealings are concerned.

The resourcefulness of the financial plotters has now penetrated the sacred precincts of the New York Stock exchange. "These schemes could not be successfully conducted," says this investment weekly, "if some firm and rigid rule were devised whereby memtrading can be done in any security without this business being transacted through members of the exchange. In England there is a traditional rule that before opening an account for a customer a member of the London Stock exchange insists upon at least three references. Another desirable check which the exchange could employ to keep these racketeering parasites away from its securities would be for it to suspend all trading activity in any stock where the evidence is indisputable that it is being used to exploit the public."

71,000 Indian Children Being Educated by U. S.

Washington.—With the opening of school this year 71,000 Indian children throughout the United States enrolled for classes.

Of this number, 38,000 are in public schools, the remainder being educated at government schools located on the various reservations, and at missions and private institutions in

Approximately 5,600 children are living at their homes and attending government day schools on the reservations. These schools are largely for smaller children and constitute the first step in the education of the Indian child. Boarding school is the next step, where, at the expense of the federal government, a more advanced training is given.

vanced training is given.

The 71,000 Indian children now being educated in United States schools represent those who are physically and mentally able to receive learning. An effort is being made to enroll the remainder, about 9,000, who are either married, ill, or defective.

Military Training and Industry Merged

Moscow, U. S. S. R.—Under an amended law on military service, thousands of young men will serve their terms in Soviet industrial enterprises, combining industrial with military training.

Men assigned to this military-industrial division will be under regular army discipline and subject to the usual military rules. After the completion of their terms they will be urged to remain in the industries. It is hered in this way to develop a large class of skilled labor and administrative personnel for the growing Soviet economy.

CHILD SLAIN ON FIRST AUTO RIDE

Killer Kissed, Then Feared She Would Tell; Justice Swift.

Detroit.—Justice moved swiftly to avenge the brutal murder of fifteenyear-old Alice Collier here when, within 20 hours after his arrest, Ralph James, thirty-three, was sentenced to Marquette prison for life.

James, seized after two months patient investigation by the police, made a complete confession—a hideous story of luring the girl into his automobile for the first ride of the kind in her life and callously killing her by knocking her unconscious, wedging her head between two trees and twisting her body until she was strangled.

The crime aroused public indignation in Detroit to a pitch that it had not reached in an amazing series of victous crimes. The fact that little Alice sold newspapers to help her poor father and mother; that she cared for the smaller children and that she was a favorite in the neighborhood all combined to arouse the populace.

Dropped From Sight.

Two months ago, after having been sent to a grocery store on an errand, Alice disappeared as completely as if the earth had swallowed her. The police department assigned some of its shrewdest investigators on the case, yet no trace of the child was found until last week, when her body was discovered by a hunter wedged between two maple saplings.

Taking into consideration the character and habits of the little girl, the police, now that her body had been found, came to the conclusion that the only way she could have been lured away would have been by some one she knew and trusted.

The spot where the body was found is more than eight miles from the Collier home. Despite the time that had elapsed since her disappearance, the detectives were able to make some shrewd deductions.

Made Shrewd Guesses.

One of her shoes was found a full 150 feet away from the place where the body lay; the other shoe about half way between the two spots. It led to the conclusion that Alice had been brought to the place in a car, had been taken from it and probably rendered unconscious, then had been dragged to the saplings between which her head was wedged.

"The girl never would have come this far with a total stranger without making an outcry or struggle and no one in his senses would have brought her dead or unconscious body this far when there were many lonely spots along the road," said Inspector Navarre. "Look for some man she knew and trusted."

change. "These schemes could not be successfully conducted," says this investment weekly, "if some firm and rigid rule were devised whereby members are compelled to vouch for the character of their clients, since no trading can be done in any security without this business being transacted "Several suspects were seized, questioned and released. The habits of many men were scrutinized until finally an officer, learning that Ralph James, thirty-three, was in the habit of buying papers from the girl and that he often chatted with her, decided to take him into custody.

James, a construction worker, had been questioned only a few hours when he broke down and told a sordid story of how he had killed the girl, luring her away by the offer of an automobile ride.

It was the first time in her life that the little news girl had ever been on such a jaunt, and James says she enthusiastically accepted his invitation.

Offered Her a Ride. James says he was seated in the car in front of his home when Alice

passed with her bundle of papers under her arm.
"I asked her if she wanted a ride," he said. "She jumped in beside me."

James then told how he had driven

almost directly to the wooded district where the murder occurred.

"I tried to kiss her and she fought me," he told the police. "I choked her and she became limp in my arms. Then I was crazed by the fear that she would tell about me trying to kiss

her and decided to silence her forever.

"When she was unconscious I wedged her head between two trees and twisted her body to make sure that she was dead and would never

One of Seven Children.

The body of Alice, due to the family's poverty, was saved from potter's field through the efforts of men at the fire station with whom the girl was a great favorite. There are six other children in the Collier family.

Mrs. Bertha Collier, the mother, has been under a severe strain for two months since the girl disappeared.

Mrs. Collier, when visited by a reporter, stood at a table in the small, dark kitchen of her home, mixing bread for her family. The flour in the sack beside the table came from the department of public welfare, and Mrs. Collier was greatful for it.

Mrs. Collier was grateful for it.

Tears misted her glasses and slipped down her cheeks as she worked. Mrs. Collier knew that her daughter was dead after two months of waiting and hoping that "Toots" was still alive.

"Now it is over," the mother said.
"I'm glad that I know at last that she is safe. But it is hard to go on.
Everything I do reminds me of her.
You see she used to do this," and Mrs.
Collier motioned toward the loaves of bread placed neatly in their tins to

"She helped me bring up the other hildren. She was a mother to them."

TRAFFIC SIGNALS GUIDE BABY SALMON OUT TO SEA

Electric Nets Are Placed in Coast Streams by United States Government.

San Francisco.—Offspring of salmon that spawn in Pacific coast streams, in obedience to the biblical command to be fruitful and multiply, will head toward salt water next spring guided by under-the-water traffic signals.

Knowing little of the ways of life, the baby fish are being aided by the United States government which is now busy improving its stop and go signals for the unsophisticated salmon.

Late in October and early in Novem the mother salmon rushed upstream, leaving their salt water roaming places for the time being. In fresh water eggs were laid. Sometime in December the eggs will hatch but the newcomers will remain in the streams until next spring.

Aided by the current, resulting from the full stream, the little fish will put out to sea for the first time. Between their birthplace and open water there lies many a hazard.

Blind ditches and shallow creeks are the principal danger to baby fish. In these ditches and creeks they sometimes stray and wander about aimlessly, vainly seeking big water. It is such a hazard that Uncle Sam seeks to prevent. So electrically charged wire nets are placed over the mouths of these ditches and streams. When the young salmon strikes the net he turns back to the river channel.

salmon ultimately reaches the sea.

Thousands of dollars are expended annually by Uncle Sam, the task of getting the baby salmon safely out of the spawning grounds being his contribution to the fishing industry.

Dodging the electrical shocks, the

Army Surveys Site for Proposed Nicaragua Canal

Washington.—Under a tropical sun, the United States army corps of engineers is surveying a route across Nicaragua for a canal to supplement the famous Panama waterway, Maj. Gen. Lytle Brown, chief of engineers, said

in his annual report.

Maj. Dan I. Sultan, formerly connected with the office of the engineering chief here, is in direct charge, assisted by the Twenty-ninth engineers and parts of the First and Eleventh

engineers.

The survey, which supplements and modernizes one made thirty years ago, was authorized by congress in March, 1929. Whether or not a Nicaraguan canal will be built at any time in the near future is a moot subject among both engineers and statesmen, but the government is anxious to collate all data necessary to the work should it

be authorized.

"Preliminary plans and estimates,"
Brown said, "are being made for a canal of suitable dimensions for the larger commercial vessels and increased traffic of today and that which may reasonably be anticipated in the future."

Brown's report showed the commissioned strength of the engineering corps is 556 and the enlisted strength 4,674.

England Tests Steam

Cooling Airplane Motor
London.—Aircraft equipped with a
complete system of steam cooling for
the engine, has successfully passed
secret flying tests at an aerodrome
near London according to British avia-

tion experts.

These tests may bring about a sweeping change in both commercial

and military aviation.

The trials included, in addition to the usual speed and climb to great heights, elaborate aerobatic tests.

Water cooled aero engines have encountered criticism because of the weight of water carried and the possible vulnerability of a water system with pipes and a large radiator in air fighting.

In case the water cooling system is

damaged a rapid loss of water takes place, thus depriving the airplane of practically all its motive power.

Another advantage credited to steam cooling is that the usual large water radiator is eliminated and the

resistance to movement through the air is correspondingly reduced. Feminism Increases

Divorces in Turkey

Stambul, Turkey.—The progress of feminism is largely responsible for the vastly increased number of divorce suits in months.

A woman's work is no longer restricted to the home, even in Turkey. Family life is afflicted with a certain uneasiness and notable evidence of this is to be found in the street sales of 2-cent booklets of the marriage and

divorce law.

Repudiation is no longer the privilege of the husband, but many suits brought by wives have no motive beyond the desire for freedom. Some 25 cases are being brought before the Stambul courts daily, but of these only 15 per cent are successful.

Englishmen Playing Au'o Poker Fined in Court

Middlewich, Cheshire, England.—
Auto "poker" has come to England.
A policeman found five men exchanging money with the passing of each motor car. He learned they were ambling on the itense plate numbers and placed them under arrest. Each

an was aned \$1.29.

Lesson for February 1

JESUS THE GREAT PHYSICIAN

LESSON TEXT-Luke 4:33-44; 5:12-LESSON TEXT—Luke 4:33-44; 5:1215, 18-26.
GOLDEN TEXT—Surely he hath borne our griefs, and carried our sorrows: yet we did esteem him stricken,
smitten of God, and afflicted.
PRIMARY TOPIC—Jesus and Health.
JUNIOR TOPIC—Jesus and Health.
INTERMEDIATE AND SENIOR TOP-

IC—Our Friend and Helper.
YOUNG PEOPLE AND ADULT TOP-IC—Christian Ministry to Physical Ills.

I Jesus Healing a Demoniac (4:33-

While engaged in teaching in the synagogue, Jesus was interrupted by a man who had a "spirit of an unclean devil," who cried out with a loud voice asking that he be left alone, professing knowledge of him as the Holy One of God. Jesus rebuked the demon and compelled him to come out of the man. At the command of Jesus the demon came out of the man with a violent struggle. This healing shows Jesus not only gracious but powerful to set free men who are under the power of the Devil, and also his ability to free men from the whole brood of diabolical passions such as lust, envy, anger, and jealousy which rule them. This manifestation of divine power amazed the people, causing them to cry out, "What a word is this!"

II. Jesus Heals Peter's Mother-in-Law of a Great Fever (vv. 38-41).

This woman was prostrate with a great fever. They of Peter's household besought Jesus in her behalf. He rebuked the fever and it left her so that she immediately arose and ministered unto them. No earthly physician has ever been known to heal in that way. Divine healing is immediate and complete. It is most important that we distinguish between divine healing and faith healing. Faith healing is the result of the action of the mind upon the body, and is measured by the degree of the faith of the individual, while divine healing is the action of the power of God upon the diseased one and is always complete and immediate.

As a result of this manifestation of divine power, the fame of Jesus spread abroad and many sick of divers diseases were brought unto him and he healed them all.

III. Jesus Heals a Leper (5:12-15). Leprosy was a most loathsome and terrible disease. Because of its foulness, one afflicted therewith was an outcast. Leprosy was incurable by man, therefore, the leper was regarded as hopeless and dead. In response to the leper's earnest request Jesus touched him and bade the leprosy to depart, and immediately he was healed and cleansed. Leprosy is a type of sin. Though sin is loathsome, hideous and separating, Jesus has power to save those who come to him by faith. IV. Jesus Heals a Paralytic (5:18-26).

1. Watched by the Pharisees and doctors of the law (v. 17). The spreading abroad of Jesus' fame only incited jealousy on the part of these men. They did not want to get too close to him, but close enough to know what was going on.

2. The paralytic brought to Jesus (vv. 18, 19). This is a fine lesson of Christian service. They could not heal the man, but being moved by sympathy they co-operated in bringing him to Jesus who could heal and restore. Their efforts in bringing the man show their willingness to go to pains and trouble to bring the needy man to

3. The man's sins forgiven (v. 20). Jesus looked back of the palsy to its cause-sin. The effect of his sin was before Jesus, but he proceeded to deal with the cause of it. All disease and death are the result of sin. The Lord deals first with that which was at the root of the trouble. Jesus saw the faith not only of those who brought him but of the man himself.

4. The purpose of miracles (vv. 21, 22). The Pharisees accused Christ of blasphemy when he declared the man's sins forgiven. Jesus showed them that back of the beneficient deed to the man was the demonstration of his deity. The main purpose in the working of miracles is the authentication of the divine mission of the one performing them. While the divine power and authority are thus shown, the wisdom and love of God are shown in that in all cases the supernatural

work is for the good of the individual. 5. The relative value of physical ills and moral and spiritual maladies (vv. 23, 24). Physical ills are less serious than the sins which cause them.

Lift Up Your Eyes

Hath he a cup of affliction in one hand? Lift up your eyes and you will see a cup of consolation in the other. And if all stars withdraw their light while you are in the way of God, assure yourselves that the sun is ready to rise.-John Owen.

Great Peace

A compromise-half obedience, half rebellion-is never found to be the way of peace. "Great peace have they who love the law." - J. H. Jowett.

World's Great Debt to

Little Town of Athens Five hundred years before Christ, in a little town on the far western border of the settled and civilized world, a strange new power was at work. Something had awakened in the minds and spirits of the men there which was so to influence the world that the slow passage of long time, of century upon century and the shattering changes they brought, would be powerless to wear away that deep impress. Athens had entered upon her brief and magnificent flowering of genius which so molded the world of mind and of spirit that our mind and spirit today are different. We think and feel differently because of what a little Greek town did during a century or two, 2,400 years ago. What was then produced of art and of thought has never been surpassed and very rarely equaled, and the stamp of it is upon all art and all the thought of the western world. And yet this full stature of greatness came to pass at a time when the mighty civilizations of the ancient world had perished and the shadow of "effortless barbarism" was dark upon the earth. In that black and fierce world a little center of white-hot spiritual energy was at work. A new civilization had risen in Athens, unlike all that had gone before.-From "The Greek Way," by Edith Hamilton.

Forest Monarchs Yield

to Relentless Years Many of the oak trees in Windsor park are at least a thousand years old. Some were quite big when William the Conqueror came to these islands, and many date back to the days of Alfred the Great and Canute.

Recently some of these veterans have had to be felled, for though they still bore their array of leaves and acorns year by year they were becoming dangerous to the public.

The oak is the sturdiest of our trees. For centuries it continues to grow, and the wood of its trunk remains hard and healthy. But when old age sets in the middle of the wood begins to decay, and in time little more is left than the shell of the trunk supporting the mighty weight of the great branches. Even so, the tree may stand for a long time after its trunk has become no more than a hollow tube. But when great holes begin to develop near the base of the oak it becomes dangerous.

'The king is ranger of Windsor park and Windsor forest. Recently he had to give permission for the felling of eight of the oldest giants, which old age had reduced to mere skeletons .-London Tit-Bits.

Silver Fox Fur

The name silver fox, as commonly used by furriers, includes the dark phases of the ordinary red fox, variously called silver, silver-gray, silverblack or black. The color of the red fox of the northeastern states and of its allies of the colder parts of North America varies from red to black, and these extremes, with the gradation between them, form four more or less distinct phases, known, respectively, as red, cross or patch, silver and black. The silver fox, therefore, is a color phase of the red fox. It is dark all over, with silver hairs intermixed, but not red, and the tip of the tail is generally, but not always, white. The guard hairs which give the silver appearance to the pelage are not entirely white, but are black with a white hand, and some guard hairs are en-

New York's Famous "Bowery"

The Bowery used to be a farm or a plantation, and was so called by the early Dutch settlers in New York. The street in New York called the Bowery passed through the farm of Gov. Peter Stuyvesant; in later times it became noted for cheap shops and places of amusement, and for the loud and flashy character of its frequenters; hence the various depreciatory terms used in reference to it. The "Bowery boy," the queerest product of America in his day, was "full of an affectation." This reference of Julian Ralph in an article in the Century Magazine, in 1891, serves to strengthen this idea of cheapness.

Wrong Size

A new minister, short and stout, was appointed to a church in Perth-The beadle, a tall, raw-boned individual, who had worked at the church for 21 years, showed disapproval of the newcomer from the first. Knowing that the old beadle was a shrewd judge, one of the elders tackled him on the point.

"What's wrong with him, Mac?" he was asked.

"The man's no good," replied the beadle, shaking his head lugubriously. "His troosers won't fit me."-London Answers.

Avoid It!

The death angel or destroying angel looks innocent enough, but it is the one mushroom that must be avoided. Of the sixty odd mushrooms that are more or less poisonous this one excels. Others produce sickness in a half hour or less if eaten, but the death angel causes no ill effects for 10 to 14 hours. The poison dissolves the red blood corpuscles and soon weakens the victim. Blood transfusions help, but it is far better to avoid this representative of the amanita family with its bulbous vase and veil about its stem.

Garden Has High Place

in Character Molding Wherever there is a garden there will be found a home rich in contentment. The beauty and mystery of flowers never palls on our fancy from childhood to old age. Nursery rhymes, children's stories, nature, poetry and literature abound with praise of flowers. They inspire the expression of the nest emotions of which we are capable.

Children who grow up amid flowers are notably happy in spirit, discerning and imaginative. The precious instinct to surround themselves with beauty is fostered, and when they grow up and build their homes this instinct finds expression in many ways. The moral and spiritual effect of flowers on character in the molding is incalculable.

"Grown-ups" feel the spell of a garden in no less degree. We have heard people tell repeatedly of the fascination of their gardens-how their first thought upon waking in the morning is to look out of the window and thrill with pleasure at the loveliness of the garden. When this happiness may be had for six or eight months of the year, it surely is of great value.

Excellent Reasons for

Popularity of Fences As an artistic background for growing things, the fence adds beauty and coziness to a home whether of chain links or wood, whether very simple and inexpensive as some fences are, or so elaborate as to be more or less walled enclosures of brick, stone, or stucco, this hedging in of one's home does more than add merely to its love-

It gives added safety to property and pets and-most important of allto small children.

Danger grows yearly in our city and even in our suburban streets and this danger is a big reason for the increasing return to popularity of the fence. Another is the stress laid on the importance of outdoor play and lounging area for young and old during the summer months. A third reason still may be mentioned, the mounting variety of fences to choose from at equally varied prices—low, medium and high.—Chicago Post.

Railroad to Plant Trees

To beautify the landscape and enrich the soil of the western plains, the Burlington railroad this summer will plant 40,000 trees along its right of way west of the Missouri river, F. E. Williamson, president of the road, announced.

The Burlington inaugurated its planting program in 1928 and 7,000 saplings were set out that year. In 1929 the experimental plantings having flourished, the company planted 38,000 trees.

The trees used are American elm, box elder, Russian mulberry, pine and conifers, all hardy varieties and well adapted to western climatic conditions. Of the saplings planted, 80 per cent have survived, according to Mr. Wil-

Keep City Beautiful

It is surprising what can be accomplished with only slight expenditure of money and effort. A few hours spent in the front yard and in the garden, planting seeds or flowers, yields rich returns in beauty, both to the home owner and to the passer-by. Although the immediate aim of

clean-up week is practical, it need not be altogether prosaic if we combine with it a plea for more attractive front yards and for more flowers and well-placed shrubs in our gardens. Washington is a beautiful city; more attention to gardening will make it still more beautiful.-Washington

Wide Improvement Program

Six thousand American communities Mt. Olive have joined in a nation-wide program for the improvement of housing and living conditions, according to Dr. Ray Lyman Wilbur, secretary of the interior. Secretary Wilbur, who is president of Better Homes in America, the national organization which sponsors | Baile this program, declares that the chief concern of all loyal citizens is to perfect the conditions of living so that all persons, and particularly those of the oncoming generations, may have every opportunity and inducement for wholesome growth in body, mind and char-

Fires Laid to Chimneys

Structurally unsound chimneys are an important contributing factor to the large number of home fires that are characteristic of the annual heating season, according to the Holland institute. House fires could be materially reduced and millions of dollars saved home owners annually, says the institute, if heating systems were given a thorough cleaning and examination at least once a year.

Playground Advice

To aid in the construction of home playgrounds the Playground and Recreation association of America has recently issued a small pamphlet, entitled "Home-Made Play Apparatus." The pamphlet gives drawings with specifications and construction notes

SALE OF AUTOMOBILE for Storage and Expenses

Notice is hereby given that one NASH CONVERTIBLE COUPE, Motor No. 98065.

bearing registration No. T 55-12, District of Columbia, registered in the name of Huber L. Colfiell, 726 Sheridan Ave., Washington, D. C., abandoned near Taneytown, during the latter part of July and removed to the Taneytown Garage, by order of the State's Attorney and Sheriff of Carroll County on July 30, 1930, re-mains unclaimed and the bill for Stor-are and expenses unpoid age and expenses unpaid.

TANEYTOWN LOCALS

Items of news from town, or vicinity are always wanted for this column. Especially accidents, sales of real estate, zres, important happenings, visits to or from the community social events, and all matters of general interest to those at home, and away from home.

This column is not for use in advertising any money-making program, fair, supper, party or sale; except for non-denominational charities or special benefits, Fire Company or Public Library support. Churches, Lodges, Societies, Schools, etc., are requested to use our Special Notice Department. Department.

Gail P. Stottlemyer, of Baltimore, spent several days last week with his brother-in-law and sister, Mr. and Mrs. Wm. W. Troxell.

Mrs. Joseph Smith, near Bridgeport, returned home from Mercy Hospital, last Thursday, her condition remains about the same.

This Saturday evening, a cake and candy sale will be held in the Shriner store room, for the benefit of the Reformed C. E. Society.

Mr. and Mrs. John Forrest, of Keymar, were entertained at supper on Saturday evening at the home of Mr. and Mrs. Clarence E. Dern.

Mr. and Mrs. Roy Carbaugh and daughters, Catherine and Mildred, spent Sunday with Mr. and Mrs. Shreeve Shriner, Uniontown. Mr. and Mrs. Clarence Albaugh and

daughter, near town, spent Sunday with the former's parents, Mr. and Mrs. Geo. Albaugh, New Midway. Rev. L. B. Hafer and family, mov-

ed on Tuesday of this week from 418 Carlisle Street, Gettysburg, to 34 E. Lincoln Avenue, of the same place.

Rev. W. E. Saltzgiver, of Silver Run, and Milton Myers, of Pleasant Valley, were visitors at the home of Mrs. Jesse Myers, on Monday after-

Mrs. Earl Koons returned to her home in Baltimore, on Saturday, after spending some time with her parents, Mr. and Mrs. B. B. Cheno-

the approach of Spring-the coming on one of the biggest jobs in the of honey and bumble bees and the Spring birds. Rain or snow would have been a lot better.

Taneytown High School defeated Westminster in a Basket Ball game, Tuesday night, on Taneytown floor. The boys score 25-24 and the girls 24-18 both in favor of Taneytown.

Reformed C. E., attended the Golden Jubilee Banquet and Conference, held in the First Church of God at Westminster, on Wednesday of this week.

The Samuel H. Mehring propertydwelling and Hardware store-was sold at public sale on Wednesday afternoon to Mrs. Samuel H. Mehring, for \$4000., and the half-interest in lot on the creamery alley was sold to Mrs. Mehring for \$50.00.

Mr. and Mrs. Clarence E. Dern, spent Tuesday with friends in Frederick, and also called to see Mrs. Claudius Long and Mrs. Lloyd Wilhide and son, who are patients at the Frederick City Hospital, and found them getting along very nicely.

Shriner's Theatre has recently been giving some specially interesting pictures, among them being the life of Abraham Lincoln, and "Amos and Andy." Taneytown is fortunate in having such an up-to-date place of entertainment, the attractions at which are advertised each week in The Record.

J. Frank Royer, left last Saturday for Detroit, on his way home to Gull Lake, Western Canada, where he owns a large farm and has other business interests, Mr. Royer visits his sisters here, Mrs. John H. Kiser and Mrs. John Staley, every year or two, and renews his many old acquaintances. He is another former Taneytown boy who has made a success of life—but not many have gone so far! away.

The Record thinks that all Churches, Fraternities and other organizations in Taneytown and vicinity, as well as all individuals who can do so, should help as liberally as possible to respond to the appeal of the Red Cross and the President, to relieve the want that exists in many sections in this country. While losses here have been heavy, our section is immeasurably better off than in many other states. Let all help a little. Read the notice on first page.

A Special Notice in last week's Record asking for a man to work on a farm, brought ten replies, from which an applicant was selected on Monday. This is in very decided contrast to results from such notices only a few years ago, when farm help was hard to get. The fact is, young men are coming again to view the desirability of such occupation, as having many advantages over the uncertain jobs in manufacturing places, and this trend is likely to increase for some time to come.

Mrs. Norville Shoemaker entertained at a Bridge luncheon, Wednesday afternoon, from 1 to 5.

Mrs. G. Walter Wilt entertained at a Bridge luncheon, last Friday afternoon in honor of Mrs. Carroll Hess.

Miss Lelah Hape, near town, is spending some time with her brother and wife, and Mrs. Walter Hape, of

Mr. and Mrs. Jesse Ohler and daughter, Teresa, motored to York, Pa., Wednesday, and attended the uneral of Mrs. Ohler's mother.

Miss Grace Lighter, Home Economics teacher of Taneytown High School, is a patient at the Frederick City Hospital, suffering with pleurisy.

Mr. and Mrs. Joseph B. Smith and family, had as their guests on Sunday: Mr. and Mrs. Reginald Clabaugh and son, Horale, of Troy Grove, Ill.

Mrs. Clarence Weybright had a goiter removed from her neck at the Franklin Square Hospital, Baltimore, on Wednesday, and is getting along

Miss Mary Isabel Elliot student at Western Maryland College, has resumed her studies, after spending a few days with her parents, Dr. and Mrs. Elliot.

Anyone in the community who needs assistance, will please notify Miss Amelia Annan, Sec. of Home Relief of the Red Cross; Mrs. W. A. Bower, Chairman of Child Welfare; or Miss Bonnie Customborder, West-

The Parent-Teachers' Association will hold its regular monthly meeting on Monday, Feb. 2nd., at 7:30 P. M. Mrs. Frank T. Myers, President of the Children's Aid Society of Carroll Co., will give a talk on the work in progress, also an attractive program will be rendered by the schhool.

Two representatives of The Com-Two representatives of The Community Reporter, published at Mt. Airy, this county, paid our office a Half of this week resembled visit last week, and compared notes world—trying to run a country weekly successfully, and that is what the venture at Mt. Airy promises to be.

Mr. and Mrs. Albert Smith entertained to dinner, on Sunday the following: Mr. and Mrs. Walter Smith and children, Thelma, Scott and Geo., of Cranberry Valley; Mr. and Mrs. A bus load of 21 members from the Harry Lambert, Jr., and children, Mae and Grant, of Hanover; Mr. and Mrs. Roy Smith and children, Virginia, Thomas and Martin, Mrs. Mary Smith, Raymond Baker, all near town.

> Call the Cat "I would I were a bird!" she sang. Her top notes were all flat. His comment caused the girl a pang—"If so, I'd call the cat!"

Warden-You say that No. 10,009, the forger, has a strange request to

Guard-Yes, sir; he wants some ink and paper to write on, so he won't get out of practice in writing signatures while he's staying with us.

Life's Darkest Moment Smith-Have you ever been in a

railway accident? Jones-Yes, once when I was in a train and we were through a tunnel I kissed the father instead of the daughter.

Not Proper in Public Places She (hysterically)-I-I wish I had

never married you. He-Ssh! Don't let us quarrel here in the street. What have we our
