

SNOW CAUSED DAMAGE AND BENEFIT.

Value to Farmers Estimated at more than \$500,000.

The snowfall of Monday and Tuesday varied throughout the state from a few inches to over a foot, the heaviest fall being on the Eastern Shore where it was accompanied by storm.

Reports are also to the effect that snow continued following in sections of Western Maryland up until Wednesday, the chief effect of which was favorable, as no damage was reported.

Weather bureau experts estimate that throughout the state the total precipitation was 2.2 inches, having an approximate value of at least \$500,000 to the drouth areas.

The melting snow is held to have done more good to the soil than rains would have done, and has gone a long way toward assuring farmers of favorable soil conditions at planting time.

TANEYTOWN HOME-MAKERS.

The Taneytown Home-makers Club held their regular monthly meeting in the Firemen's building, on Friday afternoon, Mrs. Clyde Hesson in charge of meeting.

The program opened by singing "My Old Kentucky Home" followed by the roll-call and response on previous recopies, given. Twenty-eight members and five visitors present.

In the absence of our County Demonstrator, Miss Agnes Slindee, the demonstration was given by Mrs. S. C. Ott and Mrs. J. Keller Smith, who very efficiently demonstrated and served with whipped cream, baked apple dumplings, baked peaches and raspberry tapioca.

The serving of different fruits with custard, and four different salads, were attractively demonstrated.

The recreation consisted of mental activity in the form of "Penny Wise" Miss Belva Koons in charge.

GOOD WORDS RARELY USED

Genealogy.

WEBSTER—Family pedigree; lineage; the science that treats of tracing pedigree, or descent of persons or families.

We think there is a more or less justifiable feeling on the part of families to trace their genealogy—their family history—back as far as possible, not all hoping to connect up with those who came over in the "Mayflower" nor to eligibility as Sons or Daughters of the Revolution, nor as being kin to some noted Baron or Duke.

Rather, the pursuit is like the playing of a game—"Family tree" growing—the end sought being to grow as large a tree as possible, from its deepest roots to the present smallest branches. It is only human to want to know about our "folks" past as well as present, and it is but the natural outgrowth of our "family reunions," now so generally held as annual affairs, to want to know all we can about our family, past as well as present.

That Webster gives "pedigree" as one of the definitions of "genealogy" is regrettable, because we connect the former name most commonly with a breed of horses or cattle. Who ever heard of the "genealogy" of a horse or the "lineage" of a cow? We "register" on "pedigree," but hardly our "genealogy"—we make "trees" out of that.

We should not be so much concerned about descent from "blooded stock" in the past ages, as we are about what kind of stock we are making in these modern days of ourselves and families, for all of us are descendants of the original Adam and Eve, and all of us—if we know all of the facts—have some connection with Cain and Ananias, Nero and some others, that we need not worry over—the "Mayflower" descent not excepted.

So, we will just keep on growing our "trees," and digging up dates, tracing out roots, and connecting up the branches and stems, but for fruits and flowers and for justification for living in our own little time, we will just keep on trying to make the best possible records for ourselves—and—that is some big job!

COUNTY PUPILS BROADCAST.

Mary Agnes Shipley, fifth grade pupil at the Skyesville school, and Leslie Maynard, attending the Strawberry home for boys, sang a duet, "When it's Spring time in the Rockies," over Station WCAO Baltimore, as part of the children's hour program Saturday morning from 10:00 to 11:00 A. M.

The youngsters were part of a group of 60 pupils who made a tour of inspection of the Baltimore Sun plant, on Saturday. They were accompanied on the piano by Miss Agatha Weant, music instructor at the Mount Airy and Skyesville schools.

CHILDREN'S AID SOCIETY

New Windsor District the First to Meet its Quota.

New Windsor district has "gone over the top" in its contributions for the Children's Aid Society. The quota for the district was \$128.00 while contributions so far amount to \$180.68. This was largely made possible by a check for \$81.63 given by Mr. and Mrs. Granville Roop, North Carolina, brother and sister-in-law of Mrs. Edgar Nusbaum, chairman of the district.

The quota of Westminster is \$480.40, and contributions so far amounts to \$445.86.

The chairman of the other districts are busy soliciting their communities, and will make their reports next week.

"TALKING CHICKEN."

Some one has wisely said that the business men of today will in the next five years belong to the "I wish I had Club." The same statement will also apply to our poultry raisers this coming Fall and winter according to L. C. Burns, County Agent. To substantiate this fact, Mr. Burns points out the following: First, hatcheries all over the country are only operating at less than 60% capacity and yet some report a surplus of chickens unsold. Farmers every where are throwing their laying stock on the market and quitting the game, which means that the amount of fowls in storage and on live markets, compared with that of a year ago, show several millions pounds increase. The above facts are a good barometer as to what the poultryman may expect this fall and in 1932, and in view of this fact it would seem advisable to start brooding chicks now while there is yet time to prepare for the good markets which are obviously ahead.

The old law of supply and demand is ever constant and the far-sighted poultryman is looking ahead and will tell you that a good pen of pullets this fall and winter will be worth real money. The surplus poultry on the market today has forced the price of poultry products down, but these low levels are only temporary. Producers all over the country have purposed in their hearts, (because of the low prices existing today) to go into the winter with less birds than in former years. By 1932 the surplus on the markets today will have vanished and this is the reason why a pen of pullets this fall will make the producer money. There is more than 35,000,000 pounds less dressed poultry in cold storage now than on this same date a year ago, which is over 20,000,000 pounds less than the five years average. Therefore, there is bound to be a market demand one of these days to take care of this shortage.

There will be lighter marketing of poultry and eggs this fall resulting from the smaller number of chickens to be raised this year. Poultrymen "Talk Chicken" to your local hatcheryman and buy well bred chickens from selected flocks and raise strong pullets free from disease that will go into the house this fall and produce real money.

L. C. BURNS, Co. Agent.

MUSICAL AND LECTURE AT WESLEY CHAPEL.

The following program will be presented at Wesley Chapel 4 miles S. W., of Hampstead, Md., Friday, Mar. 20, at 7:45 P. M., by a trio consisting of Mrs. Edward G. Franklin, pianist, Mr. Charles F. Bien, violinist, and Dr. John S. Hollenbach, trombonist and lecturer.

- 1. Scripture and Prayer Local pastor
2. Gloria from Farmer's Mass in Bb. Trio
3. a. Serenade Mr. Bien
3. b. At Dawn Mr. Bien
4. The Palms Trio
5. a. Memories Mr. Bien
5. b. Serenade Mr. Bien
6. Sermon—"The Thief in the Church" Dr. Hollenbach
7. Offering and Offertory.
8. a. On Wings of Song Mr. Bien
8. b. The Old Refrain Mr. Bien
9. Light of the World, We Hail Thee Hamilton Gray Trio.

CLOTHING WORK MEETINGS.

So many women have asked for work in clothing, that arrangements have been made to hold a series of meetings in four districts in the county. A series of three or four meetings will be held at Middleburg, Winfield, Westminster and Charles Carroll during March and April.

These will be all-day meetings from 10 A. M. to 4 P. M. It is impossible to give clothing construction in an afternoon meeting. Plan to attend the meeting for the entire day, if possible.

The first meeting will be on "Foundation Garments." Bring scraps of material, needle, thread, scissors, and scraps of bias tape to be used in making garment finishes. The following schedule of meetings have been arranged:

Winfield—Winfield Hall, Tuesday, March 17; Wednesday, April 22 and 29, and May 6th.
Middleburg—Church Hall, Wednesday, March 25; Thursday, April 16, 23 and 30th.

Westminster—Extension Office, Tuesday, March 31; Friday, April 17, Tuesday, April 28 and May 6th.
Charles Carroll School (2nd meeting) Monday, March 23 and 30.

Any one interested in clothing construction is invited to attend these meetings.

AGNES SLINDEE, Home Demonstration Agent.

Owner of small car (who has crashed with a truck)—But couldn't you see me coming?

Truck Driver—I thought it was a fly on the windshield.—Optimist.

THE SCHOOL BUILDING OUTLOOK CHANGES.

Appears Not so Favorable for more Buildings this Year.

As the Carroll County delegation in the legislature showed a disinclination to assume responsibility for sponsoring a bill authorizing Westminster to borrow \$200,000 for a new school building, which proposition the County Commissioners had approved, a meeting was held in Westminster, on Monday, that proposed a new and more extensive plan, as a substitute.

This plan included New Windsor, Manchester and Mt. Airy, for new buildings, and increased the proposed sum to be borrowed to \$350,000. The plan was accompanied with the proviso that it would be effective if approved through the means of a petition representing a majority of the tax dollars of the county.

When the County Commissioners were approached, on Tuesday, for their support, they declined to give it. The proposal had the support of the School Board. As yet, the sentiments of the county delegation concerning the enlarged proposition, appear not to have been disclosed.

The proposal to act on the decision of "the tax dollars of the county" ascertained privately by the circulation of petitions, is something new. That it is proposed by those favoring the borrowing plan, seems strange in view of the fact that it must have been the votes of "tax dollars" that has heretofore defeated bond issues. As the time for presenting bills will expire on Saturday, some quick work must be done if any bill is to be presented and passed. According to the best information we have at the time of going to press, the situation seems not to have developed any new movement; but there is a rumor afloat that a Westminster delegation was scheduled to visit Annapolis, on Thursday night presumably in the interest of deciding on some final course of action.

THE ORPHANS' COURT.

Monday, March 16, 1931—Alice Bond Taylor, executrix of James A. C. Bond, deceased, received order to transfer judgments.

The last will and testament of Lucretia Yingling, deceased, was admitted to probate and letters testamentary thereon were granted unto M. Etta Yingling and Ina Paynter, who received order to notify creditors under Chapter 146 Acts 1912.

Letters of administration on the estate of Albert W. Will, deceased, were granted unto Edward W. Will, who received warrant to appraise personal property and order to notify creditors.

Letters of administration on the estate of John Tucker, deceased, were granted unto George D. Tucker, who received order to notify creditors and warrant to appraise personal property.

Letters of administration on the estate of Susan M. Maus, deceased, were granted unto George V. Maus, Edna V. Harman and Lillie M. Weaner, who received warrant to appraise personal estate, and who returned inventory of personal estate, settled their first and final account and received order to transfer stocks.

George V. Maus, Edna V. Harman and Lillie M. Weaner, administrators of John F. Maus, deceased, settled their first and final account and received order to transfer stock.

Catharine A. Brothers, executrix of Susan Rutzahn, deceased, returned report of sale of personal property.

Corra M. Yingling, executrix of Virginia R. Yingling, deceased, settled her first and final account.

The last will and testament of George W. Hull, deceased, was admitted to probate.

Harry A. Case, administrator of Mary M. Case, returned inventory personal property.

Safe Deposit and Trust Company, executor of Richard Bennet Creecy, deceased, returned inventories personal property and money.

Safe Deposit and Trust Company executor of Maria Louise Reifsnider Creecy, deceased, returned inventories personal property and money.

Mercantile Trust Company of Baltimore, executor of Howard B. Gallomay, deceased, settled his first account and received order to transfer stocks.

Ruth A. Easton, executrix of J. Albert Easton, deceased, reported sale of real estate on which the Court issued an order ni. si.

DECLAMATION CONTEST AT BLUE RIDGE.

The annual Ensor-Graybill declamation contest will take place in the Chapel at Blue Ridge College, New Windsor, March 27, at 8:00 P. M. This year there will be seven contestants, two of whom are young men. Those competing for the prize offered for serious selections are Joel Naff, Julia Reop, Anna Myers, and Myra Faulkner. Those competing for the prize offered for humorous pieces are Chas. Hurley, Miriam Luckenbaugh, and Maude Whaley. Western Maryland College is furnishing the judges for the occasion.

LARGE FARM GARDENS.

An article on the above topic appears on our editorial page, that is quite worth reading. We believe that Carroll County farmers, as a rule, practically comply with the suggestions made, but a reading of the article may be benefit to many—farmers, or not.

UTERMAHLEN NOT GUILTY

Tried in Frederick on Charge of Manslaughter.

A charge of not guilty was returned on Tuesday, in the case of the State vs. John Utermahlen indicted for manslaughter connected with the death of Woodrow Cramer, in an automobile accident near Union Bridge, on February 12, he having been a passenger in an auto, driven by Utermahlen, that upset, causing such injuries to Cramer that he died from their effects.

Eight witnesses appeared for the state, and fifteen for the defense. The testimony centered around events following a dance in Union Bridge, when a number of young men left in several automobiles to witness an expected fight. Whether the fight occurred, and if so, who the principals were, does not seem to have been part of the testimony.

The evidence centered around the return trip from Johnsville toward Union Bridge, when Utermahlen picked up Cramer and Paul Selby to take them back to Union Bridge. The evidence was that at Dogtown, a point about three miles from Union Bridge, when rounding a curve the Utermahlen car left the road, crashed into a fence, and turned over in a field, pinning Cramer beneath it, from the effects of which he died at Frederick Hospital.

There was no evidence that any of the party had been drinking, and the speed of the car seems to have been about 35 miles per hour. There was evidence that Utermahlen was a good driver, and that he had a good reputation. In the upset Utermahlen received a disabled right arm, while field, pinning Cramer beneath it.

THE "NIGHT LAMP."

There is no question that perfect darkness is surely conducive to the attainment of sound and refreshing sleep. Persons who use a "night light" either from fear, or for some other equally unwise reasons, would do better to omit its use. Other causes of sleeplessness may be the shining into the window of nearby street light, the light from passing cars or from nearby houses. In cases where the light cannot be removed screens which are opaque and do not permit the light to pass through, should be so placed as to keep the outside lights from reaching the eyes of the sleeper.

The lids of the eyes are closed in sleep but they do not form a perfect shutter for some light is allowed to pass through them. Any light entering the eye will set up a nerve impulse along the visual nerves and send it to the brain, thus tending to excite consciousness. By this means an unexpected and unlooked for cause of sleeplessness is established.

It should not be necessary to state that the attempt to screen out the light must not interfere with adequate ventilation. People who sleep in rooms facing the east are awakened early by the rising sun in summer, and without doubt the sunlight formed some little annoyance before the sleeper was awakened. The man of the house who came home inebriated in the small hours of the morning, and retired leaving the shades pulled down that he might sleep until the following noon, used to be a standard "rag" for the cartoonist, yet he was using good judgment at least when he kept out the light as an aid to sleep.

Bedrooms decorated in light colors, with light painted furniture may look pretty by daylight, but they are not so restful at night as those finished in darker shades of green and brown with dark furniture and trimmings. And then too, better leave out the "Night Lamp."—Dr. J. Fred Andree, Sec'y Md. State Board of Optometry.

"INSIDE" INFORMATION FOR WOMEN.

In washing sheer window curtains in a machine, inclose them in a net or muslin bag.

To make hard sauce that is a little different, use brown sugar, and grate into it a little orange rind for flavor. Leather furniture coverings look better and last longer if they are rubbed occasionally with castor oil. This restores to the leather the oil that gradually dries out. Rub the oil in well and wipe off any excess.

Remember that the table is a place for good comradeship with one's children and not for discipline or nagging. Take it for granted that the child will eat happily everything served to him, and be sure that he becomes acquainted with a variety of foods. Prepare and serve everything appetizingly and he is more likely to enjoy his food.

Coverings of rather heavy cloth laid directly over garden truck or other low-growing plants are effective protection against moderate frosts. Place the coverings over the plants early in the evening and remove them as soon after sunrise as possible. Tin cans or other metal coverings are not effective in protecting plants from frost damage, because such objects are good conductors of heat and moreover are too small to conserve the original warmth of the plants.

PLANT CROPS EARLY.

Farmers are advised by Dr. T. B. Symons, director of the Extension Service of Maryland University, to plant all crops early this year so as to take advantage of all the moisture in the soil, due to the continued shortage of rainfall and snow during the winter, and to the present outlook for another dry summer. As farmers are well ahead with their plowing early planting will easily be possible.

PROCEEDINGS OF THE LEGISLATURE.

Some of the Most Important Events of the Past Week.

Delegate Routson, of Carroll, presented a bill in the House that would speed up the counting of ballots of state elections. The bill calls for four additional clerks to each precinct, starting to count at noon on election day. The counters would use a separate room, convenient to the polls, and continue to keep the counting even with the casting of ballots. This would result in a much earlier return of the total count. The bill seems to be needed as a desirable addition to our election laws.

Bills has been presented by Senator McIntosh, Baltimore county, regulating size and weight of freight trucks; revise license fees for autos and trucks, and regulate the size of loads that may be carried.

Delegate Gordon, Baltimore, who last week introduced a bill calling for a new oath for witnesses, calling for them to affirm their belief in God followed with another which would make constables follow the same plan.

Penalties for turning in false fire alarms were provided in a measure sponsored by Delegate Farrington, of Prince George's.

Gov. Ritchie, on Monday night, submitted to the budget of \$544,878, of which \$150,000 is for the penitentiary with the statement that the additional sum would make no change in the estimated 25 percent tax rate. Other items cover salary increases, expenses of various commissions, attorney's fees, etc.

A delegation of opponents of the Michel bill, that would grant home rule on the Sunday law question to towns of over 6000 population, and to twelve counties, headed by Dr. W. W. Davis appeared before the Committee on Judicial Proceedings of the Senate, on Tuesday. Dr. Davis opened the hearing by citing statements from many prominent men who opposed the changing of the present laws; he demanded to know who was backing the bill, stating that some who opposed the Michel bill did so, for fear of "reprisal and retaliation."

Addresses were made by Mrs. Harry M. Benzinger, Mrs. Rufus M. Gibbs, Philip C. Tries, W. N. McCormick, Rev. DeWitt M. Benham, Chas. H. Gundersdorf, all opposing the proposed new law; while Rev. James A. Clark represented a group favoring the bill. As the bill has already passed the House, the Senate is now the battle ground, both sides claiming a majority for the bill.

The House, on Tuesday, adopted the favorable report of a Committee that would give to Clerks of Courts of record, and to Mayors of incorporated towns, the right to share with ministers the performance of marriage ceremonies. In other words, the bill would repeal the longstanding requirement of a religious ceremony to validate a marriage.

A measure was introduced in the House that would require operators of school buses to display a sign of 12 inch letters reading "School Bus" on rear of vehicle.

A bill was also introduced that would revoke the licenses of "drunken drivers" convicted for the second time.

A large number of local bills were introduced in the Senate. Another bill introduced in the Senate was to make Lincoln's birthday a legal holiday.

In the House bills were introduced requiring the delay of a marriage for three days after license is issued; to prohibit the dumping of trash on public roads; numerous county and municipal bond issues were passed for payment of debts, water supply systems and various kinds of construction work.

LOWER SCHOOL BUILDING COSTS.

In recent years school officials have been compelled to undertake school plant expansion in spite of the fact that construction costs were high and the bond market not always favorable. A rapidly increasing school population gave them no alternative. Other school officials succeeded by various devices in postponing their building programs. These school officials who were fortunate enough to be able to delay construction now find themselves in a very advantageous position.

A survey of 140 school districts which have let contracts for school construction during 1930 reveals a marked lowering of construction costs—much greater than generally believed. In a few cases the savings ran forty percent or higher, and a few very low, the section of the country influencing the costs materially.

The medium cost for the one hundred and forty cities showed fifteen percent savings, as against the higher costs during the period from 1925 to 1929. Fifty percent of all the cities letting contracts for school buildings during the past year came within a saving ranging from ten percent to twenty percent.

Practically all of these one hundred and forty school districts stated the savings were effected in part by lower costs of construction material. One hundred twenty-four reported closer estimates by contractors. Seventy-seven reported lower wages as a fact—

(Continued on Fourth Page.)

THE RED CROSS FUND

Oversubscribed, and in Addition 621 Cars of Food Received.

Chairman Payne of the Red Cross organization, reported on Wednesday that the campaign for \$10,000,000 for drought relief has been oversubscribed by \$5,828. The drive lasted three months and five days, that but for the discussions in the Senate would have been concluded in less than half of the time.

Judge Payne expressed his sincere thanks to all who contributed to the fund, and regards the act of raising this large sum, under discouragements, to mean that the American people want the Red Cross to continue to act for them in emergencies.

He says "on March 1 our Chapters in 850 counties in twenty states, were giving food, clothing, or other types of relief to 2,000,000 persons." He also says that in addition to the \$10,005,828 contributed, the people also gave 621 carloads of food stuffs.

VARIOUS KINDS OF SYRUP.

Among the many kinds of syrups that the family has to choose from today, there is a common kind known as sorghum which is very popular. It is so named from the plant from which it is made. Sorghum belongs to a genus of grasses to which also belongs Johnson grass, broom corn, kafir corn, and some other well-known grasses. Syrup from sorghum is made in the same manner that sugar is made until it reaches the boiling stage. The stalks are stripped of the leaves, and heads removed, and the juice is squeezed out by a set of rollers. The juice is boiled in open pans during which time the impurities are skimmed off before it is emptied into barrels or tin cans.

The syrup that is offered the consumer under the name of molasses is made from sugar cane, and is simply the uncrystallized part of sugar. Molasses is usually of a dark color, while sorghum may have a number of shades, which are largely determined by the variety of sorghum grown, and the color of the soil on which it grows. The color of the land often imparts a certain tint to the color of the finished syrup.

There is also another product known as glucose, which is the principal ingredient for many brands of syrup. In a crystallized state, it may often be seen on raisins, figs, etc.

Of the product known as corn syrup, starch syrup, and by many other names, the chief ingredient is glucose made of corn. There is an erroneous notion abroad in the land that corn syrup is made from the stalks of corn much in the same manner as sorghum and sugar are made. But corn syrup is made from the grains of corn. In making glucose, the grains of corn are first softened for a few days in water, and then given another treatment which causes the germs to float. The germs are then skimmed off and that part of the grains left is ground fine and purified. This starch is converted into glucose simply by mixing a large quantity of water with it, and then by the use of hydrochloric acid, requiring anywhere from ten to thirty minutes to convert it into a syrupy glucose of starch sugar. Glucose is not unwholesome, as people sometimes suppose, but it is not as sweet as syrup made from cane.—Flower Grower.

"HELPING OUT" THE EDITOR.

The Marshville, Mo., Mail contributes the following on the newspaper situation:

"Business men don't run advertising any more" "just to help support the newspaper." That is a thing of the past except in a few backwoods villages. Merchants have to watch their overhead now, and buy advertising space just like they buy any other commodity—for the returns it will bring.

This is as it should be. People don't buy groceries or clothing just to help support the merchant. They buy because they need the merchandise.

The newspaper business is a business proposition just the same as any other concern. If it has the subscribers that a merchant desires to reach with his advertising, then he should buy space.

And yet, the newspaper does "help out" communities and individuals in many ways, without direct pay; which means that said newspaper is entitled to a lot of co-operation for services rendered, and those helped should give their home paper all of the financial help possible, without counting too closely the "direct returns."

PRICE ON CORN AND PEAS.

It is reported that the canners of Western Maryland have set the following prices on corn and peas. Evergreen corn \$12.00 per ton; Country Gentleman \$16.00 per ton; Peas from \$50.00 to \$60.00 per ton, according to quality. Contracts are now being made with farmers at these prices.

MARRIAGE LICENSES.

Lawrence Rheubottom and Agnes Dodson, Sykesville, Md.
Charles E. Bussard and Hazel Stultz, Mt. Airy, Md.
Charles S. Billet and Jessie Nickley, York, Pa.

More than half a million farms in the United States are said to be supplied with electricity for light and power by service companies. Is that a slam at "service companies," or an evidence that farmers are enjoying the benefits of this modern convenience?

THE CARROLL RECORD

(NON-PARTISAN)

Published every Friday, at Taneytown, Md., by The Carroll Record Company.

P. B. ENGLAR, Editor and Manager.

BOARD OF DIRECTORS.
G. A. ARNOLD, Pres. D. J. HESSON, V. P.
G. W. WILLY, Sec'y. P. B. ENGLAR,

SUBSCRIPTION price \$1.50 a year; 8 months, \$1.00; 6 months, 75c; 4 months, 50c.

The label on paper contains date to which the subscription has been paid. ADVERTISING rates will be given on application, after the character of the business has been definitely stated together with information as to space, position, and length of contract. The publisher reserves the privilege of declining all offers for space.

All advertisements for 2nd, 3rd, 4th, and 7th. Pages must be in our Office by Tuesday morning each week; otherwise, insertion cannot be guaranteed until the following week.

All articles on this page are either original or properly credited. This has always been a fixed rule with this Office, and we suggest the adoption of it by our exchanges.

Entered at Taneytown Postoffice as Second Class Matter.

FRIDAY, MARCH 20, 1931.

FOR A HIGH SCHOOL IN EVERY DISTRICT.

There is a very natural demand for new High School buildings from many of the election districts in our county, as each one has a right to emphasize its needs in that direction; and as we see it, absolute fairness requires that every district in the county should eventually be given a proportionate High School equipment, notwithstanding the present strong trend toward consolidation of schools.

Consolidation of schools however should not be at the expense of some of the district units, causing them to lose their identity; because each of these units contributes according to its adjudged ability in maintaining the county school system, as well as in maintaining all other county institutions for the public good.

We do not forget that as a matter of fact we do not have a separate "County" system of schools, but that the county itself is governed by plans made by the State Board of Education—a Board, and a system, by the way, that the voters have nothing to do with in the way of choosing, and to that extent is not necessarily representative of either county, or district public sentiment.

Perhaps that plan is a good one; but it is in direct contrast to our general procedure in governmental matters involving the interests of a large number of people—more especially, taxpayers.

But this is a little aside from the question we raise. Referring again to the idea of a High School for each district, let us say that as a rule it seems to us to be but fair that in order to have something like harmonious conditions in a large unit, the smaller units should participate, according to their wishes and needs, in all of the benefits attaching to what we may call representative government.

The founders of our general government went so far as to give to each state, without regard to area or population, two seats in the Senate; and in the House of Representatives the states are given representatives in accordance with their population. The separate states, also, in their legislative bodies, give county and district units, something like the same representation.

In a smaller way the same principle of government is recognized in giving to voters, not only election districts, but precincts within districts, in order to meet the convenience of those charged with the responsibility of selecting public officials—actually giving to "the people," the source of government, easy opportunity for exercising their great privilege.

Arguments along these lines, we think, should apply to our public school system. The opportunities to all, for an education at public expense, should be made as easy as possible, because all sections contribute—as said before—in accordance with their adjudged ability, for the maintenance of our schools. A large community without a modern school, is handicapped, if not actually injured financially.

But the greatest loss to a community in the wide extent of school consolidation rests in the fact that the community loses its school building for certain public meetings and local programs; the contact between parents and schools is widened; and in other ways perhaps largely sentimental, a community without its school seems handicapped—as we say, a "back number."

Perhaps in the course of time—and when the ability of tax-payers permits—a High School for every district may become an actuality. In fact, judging from some past experiences, this is likely a consummation that depends on the desires and activity of the majority of the people in the separate districts—on how effectively they can press their claims to recognition. At any rate, as we see the subject, each district has a right, equal to that of any other district; for a fair distribution of "public" school advantages, if we are to consider our schools as institutions fairly maintained at "public" expense.

TROUBLE AHEAD FOR BOTH PARTIES.

Both Republican and Democratic National conventions, next year, will have to face the prohibition question, and it looks very much as though "straddling" will be a very difficult feat. Both parties have their wet and dry contents in formidable quantity. The Republican party is more dry than wet, while the Democratic party is more wet than dry, with the big exception that nearly all of the Southern Democratic states are very dry.

Various plans for trying to harmonize the discordant elements in both parties, so as to produce something like harmony, have been mentioned; but the southern Democrats in a convention held last week in St. Petersburg, Florida, served notice that they would "bolt" if the 18th Amendment and its enforcement were not indorsed, and something on the same order is likely to be forthcoming from dry Republicans.

The question is harder to get out of politics than is the long disputed tariff question. These twins, as breeders of party disruption seem to have strong staying qualities, with the 18th Amendment safely in the lead, as Andy Brown says, "its a mess," and "there's a pal for you."

This is the situation now. Within the next fifteen months many things may happen; but it would require a very extreme stretch of the imagination to picture a new issue big enough to overshadow the 18th Amendment and the Volstead Act because it contains problems, sentiment and conscientious scruples, not found in any question of politics or business.

THE AVERAGE DAILY.

"Funeral sermons for the New York World are still being delivered. We will attempt to preach none but we do say that the average daily newspaper of today is too big. What with advice to the lovelorn, the movies, the radio, the cooking recipes, the fashion notes and the this and that, the daily newspaper has all but driven worth while magazines from the news stands. The week day editions of the dailies are bad enough but the Sunday editions are worse. They must give pictures, colored supplements, magazine sections and a lot more that very few actually look at. Finally all this will react on the publishers. What the average man (and woman) wants is a compact newspaper. Quantity isn't everything."

The above clipped from that snappy little Baltimore weekly, The Observer, is largely right in its estimate of what it calls "the average daily newspaper," from the standpoint of many readers, but from the standpoint of the "business manager" it is all wrong.

A lot of the special features that are named are but the "other side" of pages carrying profitable advertising. Even some of the colored supplements earn their way, while the others supply a demand. Actually, some of the magazine sections are near the best feature of the Sunday editions, and the sports, society and radio pages have their devotees.

In our judgment, the most worthless pages are those devoted to a lot of crude or worn out comic strips, answers to the "love lorn" and to the hard to kill cross word puzzles, not to seriously mention the "leggy" pictures that are too common in real life to be worth publishing on mere paper.

A "compact" paper, yes. But above that, a fair-minded, conscientious one, not catering too much to the under-world, scandal-mongers, and the riff-raff in general. On the whole, we sympathize with the criticism—but we realize that it costs a lot of money to publish a big daily paper, and this may appear to force the conclusion that "the end justifies the means."

URGES LARGER FARM GARDENS.

Recently W. R. Beattie, Senior Horticulturist of the Bureau of Plant Industry, United States Department of Agriculture, in a nationally broadcast radio talk on the farm garden, stated that in every economic crisis through which the agriculture of any section of the country has passed, the home garden and other sources of home food supply have saved the day.

When the boll weevil struck the cotton growing sections, Mr. Beattie pointed out, one of the first steps taken was to start a campaign for vegetable gardens, poultry, pigs and cows on every farm so that the land would at least provide a means of livelihood. Things haven't changed much and the same principles apply today. The farmer, however hard times may be for him, who plants and cultivates his own garden has a form of insurance against privation that is denied the city worker. In this respect he is far better off than the thousands of unemployed in the cities, many of whom left the farm at the time of industrial prosperity and are now looking wistfully back at the land.

"If everybody engaged in farming," Mr. Beattie said in his address, "will produce plenty of fruits, vegetables, milk and butter, poultry and eggs, home grown and cured pork, also fresh meats to some extent, they can at least have a good living at home and that is more than a lot of people who are out of employment have today. 'But,' says the pessimist, 'that will only increase the difficulty and reduce the market for foods that are grown in a large way for sale.' Per-

haps, provided the farmer has the money with which to buy the food, but suppose he does not have the money, what then? As a matter of fact, it is good business and economy to produce most of the living for the farm family and the hired help right on the farm."

In all parts of the country there are farsighted agricultural leaders who are in agreement with Mr. Beattie in preaching the advantages of making the farm as much as possible a self-sufficing unit; not only in these times of agricultural and general economic depression, but as a permanent agricultural policy. In South Carolina, Virginia, Arkansas and other states, statewide campaigns to bring about the planting of farm gardens are being actively pushed. In these campaigns the agricultural colleges and the states' home demonstration agents are taking a leading part.

A well planted and cared for half-acre garden will produce more vegetables than the average family can eat, during the period when the crops are maturing. Carrots, late cabbage, beets, onions, parsnips, potatoes and turnips can be grown and stored for use during the winter, thus cutting the winter food bills. One acre of garden was worth as much as 65 acres of cotton on a farm in Texas last year whose owner figured that the acre yielded a profit of \$400.

It is not only from the point of view of cutting the family food bills however, that the vegetable garden deserves a place on every farm. So much has been said and written about vitamins during the last few years, that practically everyone knows they are essential to good health. Fresh green vegetables are among the best sources of these invaluable vitamins, but entirely too frequently the farmer, busy with his money crops, feels that he has no time to bother with a garden, even though his wife and the older children may easily be able to take care of it once it is ploughed.

The result is that in many instances the farm diet is too much restricted to meat, potatoes and bread. Green vegetables, one of nature's best preventive medicines, have little place on the menu. The various deficiency diseases have a chance to creep in, breaking down health and stamina. Investigators have found that a large proportion of ill health in rural districts is traceable to the absence of a well balanced diet. No diet can be called well balanced that lacks an abundance of fresh, green vegetables.

A vegetable garden planted this spring will return ample dividends in health, and in helping to make the farm family self-sufficing, able to weather any economic storm.

ARE LEADERS LIKABLE?

A specialist in psychology, Dr. Donald A. Laird, of Colgate University, has gone to considerable pains to determine with some scientific certainty the essential characteristics of real leadership. In part his discoveries are what everybody knows that a leader has self-confidence, executive skill, good judgment, energy and the ability to shoulder big burdens and delegate little ones.

It is more interesting and unexpected to note his opinion as to what a leader is not. He is, for instance, not necessarily popular nor likable. He may even be a braggart and a little vulgar; he is quite likely to be occasionally bad-tempered and in many ways indifferent to the opinions of others. He does not usually invite confidences, though he inspires confidence. He is likely to have more understanding of men than sympathy for them.

A useful distinction is to be made between popularity and leadership, though the two are commonly confused. Casual opinion is likely to name the more popular personalities of our time as the molders of public opinion and conduct. But the brief admiration and imitation that are awarded them are soon forgotten, while stern men with firmer hands direct the destinies of their fellows. Such leaders are those that have pledged themselves to power, whether for good or ill, and not to the pleasing of lesser men. And history confirms the fact that men are more faithful to those they trust than to those they like. They ask strength of their leaders, not the charm of a pleasing and popular personality.—Phila. Ledger.

Hints for Homemakers

By Jane Rogers

To bring out the natural brilliance of table glassware, give a quick polish to each piece while setting the table. Use a soft substance that won't scratch or leave a fuzz. There is a new type of hemstitched square tissue, about the size of a handkerchief, which is ideal for polishing glassware because of its soft but strong texture.

Use needles to pin down the pleats when pressing a pleated skirt. The needles will leave no marks when you remove them.

THE CHESAPEAKE AND POTOMAC TELEPHONE COMPANY
OF BALTIMORE CITY

LIGHTS of NEW YORK

By WALTER TRUMBULL

When the Grand Duchess Marie of Russia, now in business, arrived in the United States, her baggage consisted mainly of a guitar and a Russian typewriter. Some friends, who were away from the city, had arranged to give her the temporary use of their eleven room Park avenue apartment, which was furnished, but destitute of servants. The first morning, other friends sent a maid around to cook her breakfast, but the second morning she had to do it herself. This was well enough, except for the fact that she had never before seen a gas stove or coffee percolator. She got the elevator boy to light the gas stove, but the coffee was a failure. After that, they got her a maid recently landed from Finland. The grand duchess could speak seven languages, but Finnish was not one of them. The maid could speak one language, and that was Finnish. The maid had a husband who spoke English, so when the grand duchess wished to communicate with her, she wrote a note to the husband and the maid took it home to have it translated.

The titled Russian, a very good looking woman, always will remember her first meeting with a New York policeman. She doesn't know exactly what he expected, but she evidently impressed him favorably. Looking her over, he exclaimed: "So you're a grand duchess! Well, you're not so bad."

John Mulholland, the magician, tells me that when you use thousands of packs of new cards, you occasionally find a pack which has been incorrectly assembled. Giving a performance recently, he allowed a member of the gathering to select a card from a freshly opened deck and then asked him if he was sure he knew what card he held.

"I certainly do," said the spectator, "and you should know, too. There is another just like it on the bottom of that deck." And it was true. The deck contained two jacks of spades.

It seems to me interesting that records compiled by the New Yorker hotel show that, in proportion to population, more visitors come to New York from Connecticut than from any other state. When it comes to actual numbers New York state leads, with Pennsylvania second, and New Jersey fifth. Residents of Nevada apparently stay at home. That state is said to send fewest visitors to New York. This scarcely seems equitable, as New York sends a lot of visitors to Reno.

A woman took her young daughter to a beauty parlor. The child heard some conversation concerning the plucking of eyebrows, but got them confused with eyelashes, so, after going home, she got hold of some tweezers and pulled most of hers out. The results were not favorable.

Max Rosen, the violinist, was a poor Rumanian boy, living on the East Side of New York. His father was a musician and taught him to play so well that his talent was recognized by patrons of music and he was sent abroad to study with Leopold Auer. At the age of fifteen, Rosen made his debut with the Philharmonic orchestra in Dresden.

The old vaudeville team of Van and Schenck was broken up by the death of the latter, but his daughter, Peggy Schenck, has begun a career as a singer and is being drilled and encouraged by Gus Van.

Amon Carter, who entertained Will Rogers on his recent trip to Fort Worth, is about as well known in New York as in Texas. Carter and Tex Rickard were boys together and Rickard never held a big fight that you couldn't find Carter in a front seat. The Texas newspaper man is famous for the parties he gives all over the United States and Europe.

French Government to Tax All Radio Sets

Paris.—The French government has decided, according to M. Mallarme, French minister of post offices and telephones, to tax wireless sets in 1931 to provide a fund for developing the broadcasting stations. The tax will probably amount to 30 francs a year on crystal sets and 70 francs (\$2.90) on valve sets.

Escapes Car; Dies

Logansport, Ind.—A heart attack, believed to have been caused by fright, when he was almost struck by an automobile, caused the death of Marion Taylor, seventy-six, the coroner decided.

Villa Where Dickens Wrote Books Razed

Boulogne-Sur-Mer, France.—The last vestige of the Villa des Moulinaux, where Charles Dickens lived for three years and wrote several books, is to be destroyed. The Boulogne municipal council has approved the razing of the building which long has been in a state of ruin. It was here that Dickens wrote "Little Dorrit," "Bleak House" and "Hard Times."

ESKIMOS ARE GIVEN NEW LEASE OF LIFE

Canadian Doctors Battle Disease in Far North.

Sydney, N. S.—The Eskimos of the Canadian Arctic are today reasonably immune from the threat of racial extinction, which has confronted them in recent years. Originally a hardy race, the Eskimos' health deteriorated rapidly after their first contacts with white civilization, due to their adoption of the softer foods used by the whites, and to other habits to which they were unaccustomed.

Medical experts of the Canadian government spent most of last year in the Far North, however, and now on their return announce that the health of the natives has been reasonably safeguarded once more.

An outbreak of influenza took a heavy toll of life in several Eskimo settlements last summer, but blood tests, taken by the medical men, resulted finally in checking the ravages of the plague.

Dr. L. D. Livingstone, chief medical health officer for the Canadian department of the interior, on the return of the government patrol ship Beothic, after a 9,000-mile voyage through Arctic wastes, tells a stirring story of life in the land of the midnight sun, and of the task of safeguarding the health of both the natives and of the Royal Canadian mounted police detachment.

Doctor Hugh A. Stewart, another member of the expedition, tells of making a 950-mile journey by dog team to Pond's inlet, a trip which took 52 days, and which has only twice been accomplished by an unaccompanied white man. A week after starting on his trek he was forced to return to his starting point when his tent was torn to ribbons in a blizzard, and for two nights his only shelter was the rags of the tent.

At the present time points as far north as Pond's inlet are in perpetual darkness, Doctor Stewart states. The sun just shows as a red rim above the horizon, creating a twilight effect similar to that of the dawn hour; and then sinks again.

Students Find Trachoma Has Some Advantages

Kansas City, Kan.—Trachoma has its advantages, as 13 youngsters in school here will tell you.

In fact, if one may take the word of Mrs. Reba Barr literally, followers of the three Rs even welcome the excessively rosy eyed child which cause them to be hustled off to her combination clinic school.

The school for treatment of the eye trouble is one of the forty classrooms provided for the instruction of underprivileged, or physically handicapped children in Kansas City.

Dr. Morris Clark, specialist in charge of trachoma work, makes his rounds in the elementary schools periodically. When a pupil has inflamed eyelids, first symptom of trachoma, it's business for Mrs. Barr. The pupil must either attend her school, maintained jointly by the city and school board, or retire to a private institution.

Special privileges, individual attention, treatment of the ailment—all appeal to the pupil, and when the time comes to go back to regular classrooms, tears are often in evidence, Mrs. Barr said.

Besides serving in full capacity as nurse, Mrs. Barr teaches all necessary grades from one through seven.

When the school was established eight years ago, 150 children were enrolled. So successful has the treatment been that the number has dwindled to 13.

Court Rules Embrace Is Not Really Worth \$10,000

Buffalo, N. Y.—Is the mental distress caused by a friendly hug worth \$10,000? A Supreme court jury here decided that it was not, in returning a no cause of action verdict in favor of John Hogan, locomotive engineer.

Miss Agnes Ager told the jury the hug and kiss were stolen last July 3. Hogan agreed to the date, but countered that it was a friendly embrace and returned in a friendly way.

M. I. T. Chinese Students Issue Directory of Own

Cambridge, Mass.—Believed the first of its kind a Chinese students' directory has been published by oriental scholars at Massachusetts Institute of Technology.

The directory includes the names, present addresses, and activities of all Chinese who have registered at the institute since its establishment in 1861. Nearly 400 Chinese have studied at the institute during that period. Of these 350 have returned to China.

Given Up for Dead, He Writes to Wife

Berlin.—A woman living in Schwerin has just received a letter from her husband after fifteen years silence. The man, a blacksmith named Liszkowski, was mobilized during the war and taken prisoner by the Russians. He was sent as a war prisoner to Siberia. His wife had long since given up hope of seeing him again, believing him dead.

PUBLIC SALE

The undersigned intending to quit farming will offer at public sale on his premises midway between Mayberry and Silver Sun, at Arter's Mill, 1 1/2 miles from Marker's Mill, on MONDAY, MARCH 23rd., 1931, at 10 o'clock, the following personal property, to-wit:-

2 MEALS DAY, PLENTY WATER, HELPS STOMACH

"Since I drink plenty water, eat 2 good meals a day and take Adlerika now and then, I've had no trouble with my stomach."—C. DeForest.

Unlike other medicine, Adlerika acts on BOTH upper and lower bowel, removing poisonous waste which caused gas and other stomach trouble.

Just ONE spoonful relieves gas, sour stomach and sick headache. Let Adlerika give your stomach and bowels a REAL cleaning and see how good you feel!

Robt. S. McKinney, Druggist, Taneytown, Md.

FEESERSBURG.

Two days of gentle rain and snow, the earth just drinking it in, and ponds of water in low places...

A letter from the Angel's, of Cantonville, informs us the school children are suffering with chicken-pox, and the evangelistic services conducted by Dr. Cook...

S. S. and Preaching at Mt. Union, on Sunday morning, were well attended, and Rev. Kroh gave his 2nd. five minute sermon to the children on "March Winds," and how to grow strong spiritually.

Rev. Archer gave another illustrated talk in Middleburg Church Hall, last Thursday evening...

Glad to know that Mrs. Elizabeth Keefe, of this place, who has been bedfast for some time from a fall, is able to be up in her room.

Ralph Keefe, son of Mrs. Annie Keefe, is a patient at the Hanover Hospital from tramping into a rusty meat hook.

Little William Formwalt, son of Mr. and Mrs. Harry Formwalt, has been absent from school for a few days from a bad cold or grip.

Mr. and Mrs. Ernest Myers, of Detour, with Mrs. Myers' mother, Mrs. Rufus Myers, and Misses Neda and Horace Myers...

Miss Romaine Valentine and Miss Mary Hahn, Gettysburg, spent the week-end with their parents here.

Cuban Musician Goes to Jail After Concert

Buffalo, N. Y.—Cuba's impresario, Andrew Bonard, thirty-five, is in trouble because his dollar-a-seat concert was an "artistic success" and a financial failure.

Only 145 persons attended his music revue presented by a 60-piece orchestra with Bonard as leader...

Lacking money to pay a bill, Bonard pawned for \$5 a \$30 clarinet he had borrowed from a music shop...

He was arrested on a charge of petty larceny.

Woman Facing Jail in Saxophone Sale

Rochester, N. Y.—With the understanding that he could retrieve his \$75 saxophone within a month by paying \$5, Clarence Kirkpatrick, twenty, pawned the instrument to Mrs. Tillie Goldstein.

When he returned for the saxophone, Kirkpatrick told police, he was told it had been sold. Mrs. Goldstein was arrested. She was fined \$100 and received a suspended sentence of thirty days in jail on condition she makes restitution.

DIED.

Obituaries, poetry and resolutions charged for at the rate of five cents per line. The regular death notices published free.

MR. GEORGE WILLIAM FEESER.

Mr. George William Feeser, living near Mt. Union, died at the home of a cousin, John T. Reaver, north of Taneytown, on Thursday morning, aged 89 years.

He leaves no children. Funeral services were held at the home, and in Mt. Union Church, on Monday afternoon, in charge of his pastor, Rev. M. L. Kroh.

BETTIE LU CLUTZ.

Bettie Lu, daughter of Albert H. and Carrie L. Clutz, Taneytown, died on Tuesday evening, from pneumonia, aged 1 year and 15 days.

She is survived by her parents and two brothers, Amos Eugene and Harry Albertus; also by her maternal grand-parents, Mr. and Mrs. Amos Hilbert, Taneytown, and by her paternal grand-father, Harry W. Clutz, Baltimore.

Funeral services were held on Wednesday afternoon in Grace Reformed Church, in charge of Rev. Guy P. Bready.

MRS. ANNIE MARSHALL.

Mrs. Annie Marshall, died at the home of a sister in Baltimore, March 19, at 4:30 A. M. She was born March 10, 1865 and was aged 66 years and 8 days.

Funeral services will be held Saturday, March 21st, in the Keysville Reformed Church, Keysville, Md., and interment in the Keysville cemetery.

Surviving children are: William Marshall and Mrs. W. J. Stambaugh, York, Pa.; Harry Marshall, Los Angeles, Calif.; Mrs. Myrl Ridinger, Baltimore, Md. Services will be conducted by Rev. Earl E. Redding, who is a friend of the family.

MRS. ELLA W. BLOCHER.

Mrs. Ella, widow of J. Oliver Blocher, died at her home in Gettysburg, Tuesday evening from complications from which she had been suffering for about two years.

Her husband died March 28, 1903. She is survived by five daughters: Mrs. W. D. Clancy and Mrs. Joseph Arnold, Pittsburgh; Miss Madge Blocher, Harrisburg; Mrs. Alfred T. Sutcliffe, Taneytown; and Mrs. G. M. Appler, Altoona; also by two sons, Paul W., Elwood City, and Ralph D., at home.

She also leaves one brother, William H. Wierman, of York, and one sister, Miss Alice Wierman, Gettysburg.

Funeral services were held this Friday afternoon at the home. Interment in Evergreen cemetery.

MRS. JOSEPH ENGLE.

Mrs. Mary C. Engle, wife of Joseph H. Engle, Walkersville, died at the Frederick City Hospital, on Monday morning at 10:30.

She was aged 66 years, 6 months and 4 days. Mrs. Engle was the daughter of Andrew and Miranda Albaugh, and spent her entire life in the glade valley.

She was a member of St. Paul's Lutheran Church, Walkersville, and took an active part in its affairs.

Besides her husband, she is survived by the following sisters and brothers: Mrs. J. L. Zimmerman, Taneytown; Mrs. Lewis Wichter, Woodsboro; George W. Albaugh, New Midway; Harry E. Albaugh, Utica; and Clarence M. Albaugh, Baltimore.

Funeral services were held at Walkersville Thursday afternoon, at 2:00 o'clock, conducted by her pastor, Rev. F. R. Seibel, interment in Mt. Hope cemetery, Woodsboro.

MRS. LAURA B. BAIR.

Mrs. Laura B. Bair died very suddenly on Monday morning at her home on West Baltimore St., from acute indigestion, aged 57 years.

She had been complaining for some time from indigestion. She lived alone in half of the dwelling owned by the Lutheran Church, and was found lying on the floor by Miss Sadie Anders who with her brother Luther, live in the other half of the house.

Dr. F. T. Elliot was called, who pronounced her dead.

She was the daughter of the late William and Sophia Clingan, and is survived by Samuel E. Clingan, a half brother. Her husband, Emanuel Bair, died some years ago.

Funeral services were held on Thursday morning in the Lutheran Church, by her pastor, Rev. A. T. Sutcliffe. Burial in the Lutheran cemetery.

In Loving Remembrance of LAURA B. BAIR.

Sleep on dear friend and take your rest. God took you home he thought it best. It was indeed a shock severe. We never thought your death was so near.

By her friends, SADIE AND LUTHER ANDERS.

CARD OF THANKS.

We wish to express our sincere thanks and appreciation to our friends and neighbors for their kindness after the death of our mother, Mrs. John J. Sanders; and also for the use of automobiles.

THE FAMILY.

HIGH SCHOOL NEWS TANEYTOWN.

The Junior class will present their play on Friday and Saturday nights, April 10 and 11. The name of the play is "Smile, Rodney, Smile," a comedy in three acts.

On Friday, March 13 a conference of the high school teachers of Carroll County was held in the local school.

State High School Supervisor, Saml M. North conducted the meeting.

Supt. M. S. H. Unger, Prof. A. M. Isanogle and Miss Ebaugh of Western Maryland College were present.

New song books for assembly purposes were purchased by the Parent-Teachers' Association, the books are here and greatly appreciated.

The report cards for the third quarter will be given out on March 31. These cards will include work for January, February and March.

Amelia Annan and Robert Benner took the National Competitive Examination for the "League of Nations Contest" on Friday.

The Alumni Association defeated the high school on Monday night. Score 19 to 20.

Supt. M. S. H. Unger will address the Parent-Teacher Association at its next meeting on Tuesday, March 31, at 7:30 P. M.

A demonstration in typewriting will also be given by the Commercial Department.

The following were elected to the staff of the "Flame" for next school year: Editor, Edwin Zimmerman; Asst. Editor, Virginia Clutz; Business Manager, Katherine Kephart; Asst. Business Manager, Nelson Tracey; Alumni Reporter, Amelia Annan; General Activities Reporter, Helen Sarbaugh; Senior Reporter, Ethel Hilberick; Athletic Reporter, George Henze; Jr. Reporter, Emma Graham; Sophomore Reporter, Betty Ott.

LOWER SCHOOL BUILDING COSTS.

(Continued from First Page.) or in saving. Forty-five reported savings because of a more favorable bond market.

Thirty-one reported a saving resulting from a higher daily production by the workers.

In addition to those reporting building activity during 1930, three hundred twenty-six cities indicated that building projects would be initiated in the near future.

In these cases new buildings are now needed or soon will be. These building projects will serve the double purpose of helping to relieve the unemployment situation in the various districts, and meeting school seating demands at a time when school construction results in a material saving to the taxpayers.

At a time when the Federal Government is putting forth every effort to stabilize business and industry, it is gratifying to note that school districts have been or are doing their part. It is a commendable co-operative movement on the one hand, and it demonstrates splendid business foresight on the other hand.

It is saving the taxpayer's dollar by getting greater value for the expenditure; it is putting money into circulation; it is affording work for thousands of men eager for the opportunity to make their own living; it is a constructive movement toward normalcy, and it is providing necessary school facilities for thousands of school children.

The summary gleaned from our survey gives new hope, new courage and a renewed confidence. It is added proof of the efficiency and alertness of our public servant—the school official.—Better School League, Chicago.

TERMS—CASH.
MRS. ADA MILLER,
MRS. PORTIA CROUSE,
ROY SMITH, Auct.

BETH SAYS...

Orange juice is a suave substitute for vinegar in making dressings for grapefruit or green salads... Use the heavy, juicy oranges.

KITCHEN LORE

by JANE ROGERS

THE woman who knows how to transform left-overs never has any left-overs. That sounds like a paradox, but it is absolutely true. Without a single exception that I can think of, left-overs can be combined and transformed into delicious dishes that will possess an appetite appeal quite equal to the originals.

It isn't always possible to give exact recipes for left-overs; so a certain amount of imagination is usually a necessary. Another necessity is a proper use of seasoning ingredients. A dash of sugar will touch up and blend the various flavors. A little tomato or onion will often add interest to what would otherwise be a flat dish. Peppers and pimentos, too, have an important place. Season with care and imagination, and just see how enthusiastically your family responds.

Steak Savory
Arrange sliced, left-over steak in baking dish. On top of the steak put a thick layer of sliced onions, one cup stewed tomatoes, one chopped green pepper. Sprinkle with parsley and add one-half teaspoon salt, an equal amount of sugar, and pepper to taste. Bake until onions are tender.

Senate Basement Houses

Famous Electric Autos
Washington.—Stored away in a musty room in the basement of the United States senate office building are two electric automobiles—perhaps the most historic electric automobiles in Washington.

These antiquated vehicles, purchased in 1908, served as transportation for weary lawmakers going from the Capitol to the senate office building. Such dominating figures in the chamber as Chauncey Depew, Philander Knox, Robert La Follette, Henry Cabot Lodge, Reed Smoot and Elihu Root made frequent use of them.

They ran in the tunnel between the two buildings and seated 12 passengers. While they ran perfectly from the Capitol to the office building, there was some difficulty encountered on the uphill return trip.

After three years' service the cars were discarded. In their place was installed a fast mono-rail car, which is still in use.

Live Lamb in Butcher Shop Pleases Patrons

London.—Did you ever see a live lamb in a butcher's shop? Possibly you did, but the live variety is very scarce. The local butcher of Clapham Park-road has one, however, and it's called Billy. The lamb has the run of the town, and the policeman on duty holds traffic up for it to safely cross the street. Once a week a barber combs its coat.

Jury Duty Aids Jobless

Memphis, Tenn.—Of the 800 persons called to jury duty in Judge Ben Capell's court here recently, 200 who were not employed were given work.

Attractive Highways

The rapid building of highways in America for several years was allowed to remain what seemed to be a virtual invitation to a kind of cheap commercialism to make these thoroughfares lanes of ugliness. Indifference and neglect of property owners along the highways contributed to the unsightliness. But the tide, here and there if not generally, is turning in the other direction. Through organized and individual effort, through official and citizen enterprise, a movement for attractiveness is being pushed forward.

Lure of Modernizing

One of the most attractive features of home modernization is that owners can do as little or as much as they desire, never losing sight of the fact that modernizing on either a large or a small scale adds much to the comfort, convenience and value of the house.

Fox Rustling in Idaho

Replacing Cattle Stealing
Idaho Falls, Idaho.—The cattle rustler may be passing, but another form of rustling has developed which may grow into a major racket—fox rustling. Idaho fox growers have been troubled by thieves who cut their way into pens and steal foxes worth hundreds of dollars. The latest and largest theft was that of 15 silver foxes and seven blue foxes, worth \$3,000.

NO TIME TO PLAY

The season was waning and they were much in love, so the summer boarder approached the farmer to ask for his daughter's hand.
"I—that is, I lo-lo-love your daughter, and we're going to be married, and—"
"Keep your troubles to yourself!" the father thundered. "Don't bother me with 'em now. I've got two sick hosses on my hands."

MOHAIR-GOAT RAISING NATION'S YOUNGEST AND FASTEST GROWING ANIMAL INDUSTRY

U. S. LEADER IN MOHAIR INDUSTRY

First Coats Brought Here in '49; 17 Million Pounds Clipped Yearly.

IF YOU are accustomed to think of the angora goat as one of those queer "furrin animules" that you would have to go abroad to see in his native habitat, it may come with surprise to learn that there are more angora goats right here in the United States than in any other country in the world, and that consequently this country leads the world in its output of mohair, the fleece of the angora.

The year '49 which saw the great gold rush to California also was the occasion for the entry of nine inconspicuous immigrants, the first angora goats to be brought into this country. Evidently they found their surroundings congenial, for they flourished and multiplied and sent for a lot of their relatives to join them, until now there are fully three and a half million of these useful creatures here, clearing

off the brush land, increasing grain yield, and at the same time producing a total clip of 17,000,000 pounds of mohair yearly. Every state in the Union has at least a few members of the family, but the great bulk is centered in Texas, Arizona, Oregon, New Mexico, California and Missouri.

Mohair or angora fleece must not be confused with wool. Mohair is even stronger than wool, very lustrous and, due to its structural difference, much easier than wool to keep clean. Mohair has many uses for clothing, draperies, rugs and other domestic applications but by far its most significant uses are for furniture and automobile upholstery, for which it is made up into a pile fabric called mohair velvet or sometimes velmo for short. Twelve million yards of this fabric are in use in passenger trains today, due to its extreme durability combined with pleasing appearance and fadeless dyes, while over a hundred million yards, it has been estimated, are on the highways in the form of automobile upholstery.

The skin of the angora is used for making gloves, while the meat, called chevón, is much like lamb or mutton. But, of course, by far the most important use of the angora goat is its mohair fleece which you probably rest on every time you take out your car.

RESTORING SERVICE . . . IN THE WAKE OF A CYCLONE

TRANSMISSION lines, built to meet the onslaught of any reasonably anticipated storms, did not withstand the twisting fury of the cyclone. The force that shattered and demolished houses played havoc with both of the transmission lines that supplied power to the city of Frederick and to other nearby towns.

Without a minute's delay Potomac Edison people set out through the storm-swept area to determine the extent of the damage. Within an hour's time, repair work was under way and went forward with increasing speed, as trucks from outlying points brought help.

Working in the darkness, under the most adverse conditions, service was restored to Frederick in a few minutes more than three hours. And before the end of the next day, normal service had been resumed all along the 20-mile path of the cyclone.

Effort like this, on the part of men who work day and night when an emergency arises, transcends ordinary loyalty to an employer. It can be explained only through an understanding of the pride which Potomac Edison people take in the service their organization brings to the community — and by their zeal to maintain this service at the highest possible level.

In your town . . . perhaps on your street . . . there are Potomac Edison people . . . friends and neighbors of yours. They are proud of their part in providing dependable and uninterrupted Potomac Edison service to the community. You will find that they are always willing to do their utmost to make this service mean more to you.

Community Building

Realtors See Benefit in Longer City Blocks

Radical lengthening of present typical city blocks is strongly advised as a measure for cutting down the costs of home ownership in a resolution which was adopted by the board of directors of the National Association of Real Estate Boards at their quarterly meeting held in Chicago.

The resolution puts the realtors of the country on record as favoring residential blocks 1,000 feet or more in length. The general use of the motor car now permits a radical lengthening of blocks in residential areas in keeping with present-day convenience and economy, the resolution points out, and goes on to give the following reasons which make advisable this increased length in laying out blocks in residential districts:

Substantial economies in the use of the land can be obtained. Longer blocks mean reduced street area in relation to total area.

Frequent crossings invite personal accidents, delay traffic and increase the problem of traffic and pedestrian supervision.

Longer blocks not only aid in speeding up traffic movement but also contribute a semisuburban effect of beauty.

Comfort and Safety in Properly Built House

Twenty years ago fire-safe construction was considered an expensive luxury. Today inflammable construction is as out of date as whip sockets—yet the average builder of houses goes blithely on, designing and building houses that will burn. John Smith, 1930, knows that fire safety is inexpensive, but he gets little encouragement.

The really modern 1930 house contains no waste space, but it is not cramped. It welcomes sunlight and insists on ventilation at all seasons and cleanliness under all circumstances. It incorporates room for a garage and does it without fire hazard. It is architecturally simple (neither "quaint" nor bizarre in extreme "moderne" style). And in spite of speculators, it is meant to last.

Such a home can be built today. Prospective builders are reasonable! Insist on it. And as it is proved that 1930 folks need not put up with 1910 homes, home building will be on the road to revival.—Exchange.

Beautiful Cities and Towns

Our cities should be kept in the best condition possible. Streets make or mar a city or town. Holes should be filled in when they appear in the streets. Good drainage is very important. Weeds should be kept cut and grass should be planted along the sidewalks.

Roads leading into the cities should have advertisements about various business houses. Bridges should be kept up to prevent detours. A petty, clean road leading into the city attracts tourists. A beautiful park with flowers, trees, and recreation opportunities attracts a crowd.

A city should have a good water system. Cans for trash and paper should be conveniently placed, and should be used. Telephone lines and poles should be kept in good condition, and old posters should be torn off and destroyed as soon as useless. Glaring advertisements do not add to a city's attractiveness.—Grit.

Charm in Colored Mortar

Many world-famous brick buildings owe the charm of their exteriors to the color harmony between brick and mortar. This same harmony can be had in the smallest residential buildings.

With the older buildings this was sometimes due to the sand used, and in other cases to the mellowing influence of age. However, either effect may be produced today through the coloring matter in the mortar. Mortar colors cost but little, yet they often contribute as much to the fine appearance of a brick home as any other single item. They are available in a wide range of colors.

MINIATURE GOLF IS FIZZLE IN ENGLAND

Considered Craze and He-Men Turn Up Noses.

London.—Midget golf in England has failed. It is estimated that \$750,000 has been lost by promoters vainly trying to make it a craze.

The outdoor game which swept the United States like a plague last summer never became more than a "nine-day wonder" here.

The reason is hard to define. Some say the "ballyhoo" which preceded its migration from America led the public to look askance at anything so "crazy." Even before the first course was laid in England reports of failures of midget golf concerns in America were being published here.

Those who have lost money say now that the real reason why the expected craze failed was that too many people tried to exploit it. Another reason is that the toy links satisfied the demand for a few weeks, but that after that interest in them departed because they had become somewhat childish.

"He-Men" Spurn It.

Real "he-man" golfers would not patronize them, while newcomers to the game complained that the things missing were variety and the sort of hazard that would be encountered on a permanent outdoor course.

Only a few months ago toy courses could be found in all parts of London and the provinces, and for a time it looked as if a number of fortunes would be made.

Then everybody with a knack of carpentering or with what seemed to be a new idea jumped into the business, and the result is that today indoor courses are almost as difficult to discover as water in a desert. Even some of the biggest have closed down, while others on sites that had been taken in London and in the country have been allowed to lapse.

Want It at No Price.

It was one of the peculiarities of miniature golf that there were certain towns in Britain, particularly at the seaside, that would not have it at any price, and many instances could be given of courses that did not even pay their way from the moment they were installed.

One of the first to promote midget golf in this country was H. Lester, still head of Lester's Midget Golf company. He had premises just off Piccadilly circus in the heart of the theater district.

"Fortunately," he said, "we have done better than most. But the market was killed by the number who leaped into it, and the truth is that we gave up our big premises because they were not paying."

"Nothing will ever again induce us to invest a penny in indoor sport, for it has been definitely proved to us now that the average Briton will have nothing to do with a game that is not played in the open."

Ancient Wooden Locks

Burden for Strong Man

The most common lock now in use on exterior doors of buildings is the cylinder lock developed by Linus Yale, Jr., and this leads us back into history. Primitive prototypes of Yale's invention were in use in Mesopotamia and Egypt as early as 2000 B. C.

These were huge wooden affairs requiring cumbersome keys, as we may gather from the Biblical passage (Isaiah 22:22) "And the key to the house of David will I lay upon his shoulder." This key, or muftha as it was and still is called in the East, is a stick of wood from 15 to 30 inches long, 2 to 4 inches broad and 1 to 2 inches thick. Into the face of one end are set a number of wooden or iron pegs about an inch long. These pegs correspond with as many holes in the wooden bar or bolt which locks the door and can only be lifted when these pegs enter the holes and lift a corresponding series of pins which drop home by force of gravity and keep the bar locked until pressed up by the key with its pegs. Such huge keys opened the way into the mighty palaces of Ninevah and Persepolis and admitted to "hundred-gated Thebes."

Today in miniature and more refined fashion, the small key that enters the cylinder lock pushes up the little brass pins inside and permits the opening of the door.—Detroit Free Press.

France to Have First Union Station for Boats

Lille, France.—The first waterway union station in the world is being constructed here at the crossing of the waterways of Europe and soon all the canal boats will tie up at quays in a great central station, with quays for express barges and other wharves for slower freight carriers.

The new union station is on the site of demolished fortifications which once walled in the city. The station will be nearly a mile long, with a basin 110 feet wide and deep enough to accommodate 600-ton barges.

The port will be fitted with all modern hydraulic machinery for fast loading. There will be grain elevators and fireproof merchandise warehouses. Railroad tracks will be run in so that there will be but a single operation in changing from the freight carrier of the railways and waterways.

In northeastern France, where rivers are navigable and canals have been used for freight carrying for centuries, the barges carry a greater tonnage than the railways. To further this traffic another great canal is to be built between Saint Omer and the sea at Dunkirk.

Swimming Power of Fishes

For the medium-sized fresh-water fishes the maximum swimming speed appears to be about seven miles an hour, with the possibility of a bound at nearly three times this rate. More detailed observations will be needed to show variations with species, sex, water temperature, physiological conditions, and so on. Among salt water fishes the sword fish is known to attain a speed of approximately 60 miles per hour. The bureau of fisheries says that the dolphin and carp are said to outswim the fastest vessels.

Interview Didn't Count

While Lynde M. Walter, first editor of the Boston Transcript, was ill, in the last two years of his life, the editorial burden fell on Joseph Palmer, B. A. Smalley writes in that paper. Palmer's one claim to fame was that he alone of newspaper men was accorded an interview by Charles Dickens on the latter's first visit to Boston. The interview lasted an hour, Palmer told all about his efforts in obtaining the interview in the paper but printed not one word of what was said.

He Was Right, But Wrong

A prominent Episcopalian tells this one: "Little James had only been coming to Sunday school a few months and heard the teacher ask many times, 'What Sunday is this?' (The first Sunday in Lent; the first Sunday after Epiphany, etc.) Finally, he was absent for a few weeks, and on his return the teacher asked, as usual, 'What Sunday is this?'"

"He replied before anyone else, 'The first Sunday after the Fourth of July.'"

Gas Pressure Used to Stimulate Flow of Oil

In the operation of oil wells a period usually develops when the well is not good enough, and yet is too good. When it has reached a point where the natural flow is too weak through lack of pressure below the ground to produce oil at an efficient rate, a period of real worry is encountered.

Ordinarily, while the flow is too light, it still is too strong to permit the employment of pumps of the plunger type. It is at this time that a new method is being attempted, the gas-lift method, of bringing the oil up. Some success has been attained in forcing gas under pressure down into the ground either through a concentric or parallel pipe. The pressure of the gas, simulating the natural gas pressure, throws the oil up with something like the original vigor. The method in question, however, is still far from perfected, as almost every well presents a problem of its own and no standard can be set for the operation of a gas-lift device.

Beautiful Roadside

Prizes worth more than \$1,000 have been offered for the best five examples of roadside beautification in a contest conducted by the Missouri highway department.

Victory Made History

On Plain of Marathon The ancient Marathon was a small town on the eastern coast of Attica, about 20 miles northeast of Athens. There is a modern village of the name, but the site of the ancient Marathon is occupied now by a town called Vrana. Along with neighboring towns, the old Marathon belonged to an ancient Hellenic league called the Tetrapolis. This league claimed a very early origin, legend carrying it back to the time of Theseus, and it survived until after the fourth century B. C.

The plain of Marathon is famous as the scene of the decisive battle in which Miltiades led the Athenians and Plataeans to victory over the army of Darius under command of Datis and Artaphernes in B. C. 490. The Greeks numbered about 10,000, while the Persians had a much larger force. But the invaders were put utterly to rout, with heavy loss, while the Greeks lost only 192 men. The great mound in which the remains of these dead were placed is still conspicuous on the plain. The battle turned back the eastern invasion of Europe and saved Athens; and, according to tradition, a Greek runner sped without stopping from Marathon to Athens bearing the tidings of victory.

India Leads the World

in Racial Distinctions There was, and is, immeasurably greater diversity of race in India than in Europe, even if we emphasize the Lapps and Finns, the Turks and Magyars, the Maltese and Basques.

The fundamental distinction of the "four colors" exists today as in the days of the great adjustment formalized in Manu's code. The Mahabharata describes the Brahmins as white, the Kshatriyas as red-limbed, the Vaishyas as yellow, the Shudras as black.

And to this day the men of pure race in Rajputana are red, like the red granite statues of old Egypt; the Brahmins of pure race are white beneath their light coat of sunburn; the Santals and Savaras are yellow; the Dravidians of the south are black. There are also a great many intermediate shades, but these four primary elements remain.—Charles Johnston in the Atlantic Monthly.

Drive to Middle Ages

The only way to vividly describe a trip to the little republic of San Marino in Italy, say, from such a place as Rimini, is to say it is a carriage drive to the Middle Ages. Here it is, just as it has been for centuries—the smallest republic in the world, and high up in the clouds, or as they say themselves, the nearest country to heaven. Its walls are precipitous and it has about 13,000 citizens. Entering the ancient gate after the climb to this impregnable mount of city towers, it really seems as though the world below was of another age and time, for its people are still ruled by the old Roman laws.

Darwin's Life and Work

Charles Robert Darwin was born at Shrewsbury, England, February 12, 1809. He was the grandson of Erasmus Darwin. He studied at Edinburgh and Cambridge, was naturalist to H. M. S. Beagle on a voyage of exploration around the world—1831-36. On his return he took up residence in a secluded village in Kent where he devoted himself to scientific research. He published in 1859 his chief work, "On the Origin of Species by Means of Natural Selection," in which he propounded his theory of biological evolution. This was followed by a number of other scientific publications. He died at Down, Kent, April 19, 1882.

British Monarch's Position

The king, to the people of Great Britain, is the embodiment and symbol of the unity and permanence of the British empire. Although the power of the king is less than that of the President of many countries, his activities are not confined to the sphere of politics. He is the social head of the country, the patron of religion, charities, science, agriculture and other enterprises, also the encourager of sports. The king remains aloof from party politics, therefore he is not held responsible for acts of his ministers.

Banned Book in Thatch

In one of the old houses in course of reconstruction at Cumbernauld, Dumbartonshire, Scotland, an old copy of Thomas Paine's "Rights of Man" was found hidden in the thatch. The date on the volume is 1792, and it is probable that it was in the possession of one of the "rebel" weavers of that day. It gives a glimpse of the time when anyone found in possession of Paine's book was liable to transportation to the plantations. Hardie, the Chartist weaver, may have been a tenant of the house at one time.

Oh, to Be Young!

Herbert had just come in before school time with a rip in his overcoat, but mamma kept him home long enough to mend it. At noon he went back to school, but returned quickly with a note from his teacher which read: "I've sent Herbert home because of his throat."

"Why, Herbie, nothing was wrong with your throat, I hope," his mother exclaimed. "Tell mamma what you said to your teacher." To which Herbert replied: "I told her my tote was sore."—Brooklyn Eagle.

Community Building

Upkeep Cost Lessened by Good Construction

Living rent free by owning one's home is a fine thing, but living upkeep free in that same home is an entirely different matter. Of course, nothing of a material nature is permanent, but the natural life of any material used in the construction of a home can be prolonged through proper care and treatment.

If in our homes we desire to keep down upkeep, it is necessary first to use good materials and to have them assembled according to good construction methods. Few home builders are familiar enough with materials and methods to write their own specifications and to see that the terms of the specifications are carried out. For these reasons alone, although there are others, the services of an architect should be engaged.

Never was there such an opportunity to build into a home permanence and quality as exists now. Research, carried on continuously, has brought the standard of building materials to a level probably beyond the comprehension of our forefathers. It is now possible for a manufacturer to guarantee his product whether it be tile, brick, cement, heating system, plumbing fixtures and fittings, or paint. All of which has brought to us better homes at lower prices, if we go about getting them in the right way.—Detroit Free Press.

Not Enough Attention

Given to Roof's Effect Oftentimes the greatest need of an old house is a modern, up-to-date roof.

Many old dwellings have patchwork roofs. An addition or the porch of one of the houses may have a roof that differs in every respect, coloring, material and design, from the roof which covers the main building.

This patchwork effect spoils the appearance of the residence. In this day when there is such a wide choice of roofing material the property owner will experience small difficulty in planning a new roof which will harmonize with the style of architecture of the old house and add to the appearance of the building at the same time.

Building Art Improving

For 75 years or more builders of moderately priced homes have built just houses, sadly lacking in architectural style and beauty. The older portions of nearly every city and town prove this, for in these sections rows of houses stand, as out of date as the leg of mutton sleeve.

With these thoughts in mind a short walk through such a section makes us glad that there is a renaissance in interest in architecture so far as the small dwelling is concerned. We have but to walk on to the outskirts of the town to see this in the trim, well-designed houses recently built. The debt we all owe to the architect and the value of the stock plan services which make good designs available at low cost is evident.

Wide Entrances Needed

The growth of large cities, which includes a considerable area about them, has revealed no need more urgent than that of wider thoroughfares leading into the population centers. In many places the widening of these highways already has progressed to a marked degree. Notable examples are found about such centers as Los Angeles, Detroit and Chicago. In the metropolitan area of Chicago plans now are being agitated for the widening of nearly 900 miles of road. It is one of the chief projects of the regional association which is concerned with an area having a radius of 50 miles or more about the city.

Lawn "Entrance Hall"

An open stretch of well-kept grass is necessary to properly balance the mass of architecture which the front of the house presents. This lawn area should be broken up as little as possible. Keeping the entrance, walk and drive to one side or the other will aid immeasurably, though if the walk must cross the lawn it should appear as inconspicuous as possible by using soft-toned materials.

Plantings of evergreen, shrubs and shade trees should be kept to the boundary lines or about the foundation of the house. Then will the out-of-doors entrance hall extend a real welcome to those who enter it.

Highways and Towns

People are fast learning that while a main highway within easy access is an advantage it is likely to be a liability when it passes through the town. Through-town main highways are getting into the same class with railroad grade crossings, to be avoided when possible, endured where they must be and cured where they can be.

Home Ownership Gaining

Home owners are gaining on home renters by more than 3 per cent annually. Of the 24,000,000 homes in the United States, 11,000,000 are occupied by their owners, and the total will be increased greatly within the next few years.

Needs Help

Good roads do not necessarily make a town. The town has got to make itself.—Country Home.

Found There Was Limit to Customers' Patience

At the time of the rush into the Palmer gold field, in northern Queensland, Australia, justice was rough but fair, observes the Dunedin (N. Z.) Star, in quoting an incident of the day.

The one storekeeper there, when stocking, took up a barrel of horse-shoe nails, thinking that they would readily sell to diggers who, in loading their pack horses, eliminated to the last ounce everything of weight that was not eatable. As it chanced, however, there was no demand for the nails. Every man who had a horse carried a few in his pocket. After the nails had been on his hands for a while he struck the brilliant idea that he would force sales by refusing to sell any flour or sugar or rice unless the buyer also purchased an equal weight of nails.

For a time the men grumbled, but bought and, not needing the nails, put them back in the barrel, so that they became to the storekeeper what the cruise was to the widow. Eventually the swindle got wind and a big rumpus ensued. About a hundred diggers assembled and took charge of the store. They weighed the nails, paid full price, checked them into the creek, and on a signboard made of casement wood they notified all and sundry: "No more nails."

Rich Level Tracts in the Scottish Highlands

The region known to the world as the Highlands of Scotland has no political or civil boundary. Separated by only a vague line of demarcation from the division called the Lowlands, the Scottish Highlands may be briefly described as that portion of the north and northwest of Scotland in which the Celtic language and manners have less or more lingered until modern times. The "Highlands," as it is usually called, extends diagonally across Scotland from Nairn on the Moray firth to Dumbaron on the Clyde; but the mountainous part of the counties of Banff, Moray, Aberdeen, Kincardine and Perth are also understood to be included in the designation "Highlands." Calthness might be excluded as being a generally level country; but throughout the Highlands there are rich level tracts, none being more so than the eastern division of Ross-shire. The Hebrides or Western isles are included in the Highlands, but the isles of Orkney and Shetland, though to the north, are distinctly excluded, by reason of the Norse origin of their inhabitants.

Forty Centuries Ago

One-way traffic was in use nearly 4,000 years ago in the Neolithic, or Stone Age, camp on the famous Trundle hill overlooking Goodwood race course, in Sussex, England. Dr. Cecil Curwen, the archeologist, who has been conducting excavations on the site, states, "It is certain that one way into the camp was used only as an entrance and the other as an exit. These camps are extremely rare; there are only a dozen in the whole of England; the date of this camp is approximately 2000 B. C. The most interesting Neolithic find was that of a large semi-circular block of stone with a hole being worked up into a ridge with sharp flint marks radiating from it; possibly an early method of making fire."

Charleston "Sugar House"

The old Sugar house at Charleston, S. C., was the name given to the workhouse, a place of detention for fugitive slaves and the punishment of slaves and free negroes. It was here that the lashes were applied, and hence the name Sugar house. The workhouse was under the care of a commission of five citizens, with a master or keeper. It was a city institution and was conducted under the ordinances, with prescribed rates for the care of the inmates—dieting, lodging, number of lashes, etc. The building stood on the corner of what is now known as Logan and Magazine streets and was destroyed by fire in the conflagration of 1861.

Antlers Grow Quickly

Deer's antlers are shed completely every year, between January and March. It takes about four months, or until about August, for the new ones to reach full growth. When the antlers are dropped, the roots or pedicles exposed are rough disks of bone belonging to the frontal bone of the skull. In a week or so this is covered by the dark brown skin of the head and then the new antlers begin to develop. The material of which they are composed is similar to that which forms hair. The antlers of a healthy vigorous elk or caribou will grow at the rate of one-third of an inch per day, or more, once they are fairly started.

His Noise Brings the Coin

Begging for the funds with which to rebuild a temple, an old Chinaman has for 23 years been traversing the streets of Peiping. As an evidence of his holy character he wears a skewer passing through his cheeks and protruding on either side. His method of extracting the coin is unique. He carries a huge wooden gong which is known as "Buddha's Ear," and taking up a position in front of a native home he makes a deafening noise until some member of the family comes out and gives him an adequate coin. If the amount meets with his approval he will move on, otherwise he remains until the sum is increased.

It makes droopy, dejected garden things perty crisp and sprightly!

The Frigidaire Hydrator to keep and restore garden-fresh crispness to fruits and vegetables is one of the many outstanding advantages of Frigidaire Advanced Refrigeration. There are many others. We invite you to come in and learn all about them.

FRIGIDAIRE

(©, 1931, Western Newspaper Union.)

Lesson for March 22

THE USE AND ABUSE OF GOD'S GIFTS. (Temperance Lesson)

GOLDEN TEXT—And be not drunk with wine, wherein is excess; but be filled with the Spirit.
LESSON TEXT—Luke 12:13-18.
PRIMARY TOPIC—Jesus Tells Us How to Use God's Good Gifts.
JUNIOR TOPIC—Jesus Tells Us How to Use God's Good Gifts.
INTERMEDIATE AND SENIOR TOPIC—The Sin of Drunkenness and Gluttony.
YOUNG PEOPLE AND ADULT TOPIC—The Enslaving Power of Strong Drink.

I. Warning Against Covetousness (vv. 13-15).
1. The occasion (v. 13). The occasion of this warning was the request of one of the company that Jesus be the umpire regarding a disputed estate. Two brothers were in trouble over an inheritance.
2. Jesus' reply (v. 14). He said, "Man, who made me a judge or a divider over you?" He refused to enter the sphere of the civil law. Christ's mission was pre-eminently spiritual.

3. The warning (v. 15). The clear implication is that if due attention is given to inculcating right principles in the hearts of the people, civic and economic problems will largely adjust themselves.
II. The Parable of a Rich Fool (vv. 16-21).
The parable of this rich planter shows clearly that to be concerned with earthly riches while neglecting God is the height of folly. Observe:

1. The increase of his goods (v. 16). This clearly implies that his riches were rightfully obtained, for the ground brought forth plentifully.
2. His perplexity (v. 17). His land was producing more than his barns would hold. He was at a loss to know what to do. No thrifty man wants to see the legitimate fruits of his toil perish. If he had possessed right views of life and a sense of stewardship before God, he would have seen that his barns had enough for his personal needs and then have distributed the surplus to the needy.

3. His fatal choice (vv. 18, 19). He chose to enlarge his barns and give up his life to ease and luxury. He made plans without consulting God.
4. His awful indictment (vv. 20, 21). God called him a fool. His plans were cut short by an immediate death sentence.

III. The Certain Cure for Anxiety (vv. 22-34).
Having shown the folly of rich men who gained gold and lost God, Jesus now urged the disciples to trust God and dismiss all anxious care.

1. The argument (vv. 22, 23). It is summed up in one brief sentence. "The life is more than meat and body is more than raiment."
2. The illustrations (vv. 24-28). (a) God's care for the fowls (vv. 24-26). The ravens do not sow nor reap. They have not storehouse nor barn yet they live, for God feeds them. If God does not forget the fowls, certainly he will do more for his children. (b) God's care for the flowers of the field (vv. 27, 28). If God is so careful of the flowers which appear but for a day, how much more will he clothe his children?

3. The exhortations (vv. 29-34). (a) The getting of food and clothes should not be man's chief concern. (b) Seek the kingdom of God (v. 31). Those who make God's kingdom first shall have all their needs supplied (Phil. 4:19). (c) Be not afraid (v. 32). God's good pleasure is upon his own, and all good things he will give. (d) Practice self-denial in order to be able to give to those in need (vv. 33, 34).

IV. Be Ready for the Coming of the Lord (vv. 35-48).
Having warned the disciples against the acquisition of worldly goods while forgetting God, and shown them the needlessness of anxiety for food and clothing, he showed them the blessedness of being in a state of readiness when the Lord shall come. This attitude of heart he made clear by two parables:

1. That of the returning lord (vv. 35-37). The Lord will be so pleased with those who are waiting for him that he will take delight in sitting at the banquet with them and even serving them.
2. The thief in the night (vv. 38-40). This parable shows that the time of the Lord's coming is not known. The proper thing is to be ready.
3. Reward will be given to the faithful (vv. 41-48). The faithful servant will be promoted at the coming of the Lord. Awful judgment will be meted out upon the unfaithful servant.

Search the Scriptures
The Bible is the book of all others to be read at all ages and in all conditions of human life. . . . I speak as a man of the world to men of the world, and I say to you, "Search the Scriptures."—John Quincy Adams.

Keeping the Commandments
Keeping Christ's commandments keeps the eye clear and the temper sweet and the will submissive and the affections pure; in these lie rich rewards.—Cuyler.

"Bear Flag" Symbol of Republic of California

In the early days California was isolated from the other Spanish possessions in America by mountains, deserts and poor communications, and after Mexico won independence this region became even less answerable to central authority. It enjoyed practical autonomy while the rest of Mexico was engaged in internal strife. Americans and other non-Mexicans settled in California and assumed importance in its affairs. After 1840 it became apparent that California would not remain much longer under even the nominal authority of Mexico, but the new landholders were divided in opinion as to what the future status of the country should be. Some favored annexation to the United States; others advocated a British protectorate. During this period of hesitation, war broke out between the United States and Mexico over Texas, the former Mexican state which had become an independent republic and then annexed itself to the United States. Col. John C. Fremont took advantage of the situation, seized Sonoma, and on July 4, 1846, proclaimed California a republic. The banner of the new republic bore a bear, and this was the Bear flag that Fremont hoisted.

Among those besides Fremont whose efforts speedily effected the conquest of this region were Stockton and Kearney, and on August 15, 1846, the republic of California was annexed to the United States.

Little Damage Done by Missile, as It Happened

Mark Twain, at a publishers' dinner in New York, talked of his reporting days in Virginia City.
"We were trying a horse thief one day," he said, "and all of a sudden the big, burly scoundrel pulled off his boot and threw it at the judge. It was a heavy boot, too. It was studded with hobnails. . . . I am still rather proud of the way I wrote up that little incident, doing it neatly, and at the same time getting back on a rival reporter whom I disliked. I got it all in one paragraph—something like this:
"Suddenly the blackguardly thief, pulling off his boot, hurled it with all his might straight at the judge's head. This desperate act might have been attended with most disastrous consequences, but, fortunately, the missile only struck a reporter, so that no harm was done."—Pathfinder Magazine.

Heart All-Important

That the Egyptians had any inkling of the circulation of the blood or of the real duties of the heart seems improbable, but they did conceive this organ to be the seat of life and consciousness and the blood to be intimately related thereto. Thence came into men's minds all the complicated lore of purity of blood, of "bad blood" between rivals, of "heartfelt" sincerity, and so on, which have dominated the thoughts and the literature of races of whom Egyptians never dreamed. The brain, curiously enough, Egyptian dissectors seemed never to have considered of the slightest importance, and heroes of literature when vowing devotion still press their hands on chests instead of heads.

Origin of "Chauffeur"

The word chauffeur originated from the activities of brigands who, during the war between the Vandeanes and the Republicans of France in 1793, pillaged and fired the countryside. They were so called specifically because they burned the feet of their victims to make them reveal the hiding places of their valuables. Their chief leader was one named Schinderhannes or "Jean l'Ecorcheur." The word chauffeur, from which chauffeur is derived, was drawn from the Latin calefacere, which means "to make hot"—Latin facio, make, and calor, heat.—Literary Digest.

Why It's Popular

"The great popular success of psycho-analysis," the late Bishop John Gardner Murray said one day in Baltimore, "is due to this fact. Psycho-analysis, as it is interpreted to us, tells us that the things we want to do are the things we ought to do. A very attractive creed.
"Psycho-analysis reminds me of the schoolboy who had to define liberty of conscience. His definition was: "Liberty of conscience means doing wrong and not worrying about it afterwards."

Rather Die Than Get Dirty

One of the best war stories has to do with an English training camp. A live shell fell into the mud in the middle of a class of young gunners. "Lie down, gentlemen!" roared the instructor. But no one moved. In due course the shell was rendered harmless, luckily without anyone being injured. Then the instructor inquired why they had not obeyed his order. "You might have been blown to pieces." "Well, sir," faltered one of the gunners, "it was so muddy."

Trained

Roberta was telling her teacher about her mother's birthday.
"How old was your mother?" inquired the teacher.
"Oh, she is always twenty-five on her birthday," said the well-trained child.

Maronites Largest of Lebanon's Many Cults

Biblical Lebanon, Asia's only Christian state and the smallest one in the world, has seven different confessions among its 826,618 inhabitants, according to the last census. Despite mass emigration among people of their faith, Christians again maintain their majority. The largest group is the Maronites with 214,313 adherents. In addition there are 20,443 emigrants of this faith in the United States who still pay taxes to the homeland. They form one of the oldest Christian churches. Its history goes back as far as the Fourth century, retaining Aramaic as the church language. Since the Middle ages, the Maronites have recognized the pope, although they have a patriarch of their own. There are only 5,421 Protestants in the Lebanese republic. The ancient churches such as the Syrian Jacobite and the Assyro-Chaldean claim the majority of 11,000 church-goers classed among the minorities. Next to the Maronites in strength are the Sunnite Moslems with 136,040 and the Shiites with 113,536.

Much Sunken Treasure May Soon Be Salvaged

Many of the difficulties of deep-water salvage have been successfully overcome, and the prospects are that much wealth will be recovered from the sunken hulks of the sea bed. One of the chief factors which have contributed to this success is a new diving apparatus, invented by a Kiel firm and used with great success. It looks like the conning tower of a submarine and has a trunk made of steel, the upper portion of which consists of windows of hard glass.

Everything Provided For "You say this vacuum cleaner takes the place of a broom?"

"Absolutely. You notice this handle? It is detachable."
"Well?"
"That's in case you want to whack your husband."

ing apparatus, invented by a Kiel firm and used with great success. It looks like the conning tower of a submarine and has a trunk made of steel, the upper portion of which consists of windows of hard glass.
This trunk not only contains measuring and respiratory apparatus, but also a telephone and buoyant tanks. These tanks enable the diver to obtain complete control of his equilibrium. If he wishes to descend he lets water in through a tube. If, on the other hand, he wants to ascend, he blows it out with compressed air. With this it is possible to make descents of 500 feet, and there are many wealth-laden wrecks on the floor of the ocean within that distance of the surface.

Positive Proof

The Cynical One—Women age faster than men. They also lose their powers of memory first.
The Other One—Can you prove it?
The Cynical One—Yes. Just notice how many women at the age of thirty have difficulty in remembering how old they are.

New Type Amplifier Horn Developed For Roxy Theatre

Rear curtain view of new shallow loud speaker horns developed for sound picture theatres. Inset, Roxy, in whose theatre these horns are used.

Talking picture theatres, which a year or two ago were an innovation, have now increased to the point that cities, towns and hamlets are equipped for this newest form of entertainment. This infant industry has grown by leaps and bounds and innumerable changes and improvements have been made in the apparatus disseminating the news and views of the day.

There are now 6,000 theatres equipped with sound picture systems developed by the Bell Telephone Laboratories. A shallow loud speaker horn for sound picture use, developed by the telephone laboratories has been installed in the Roxy Theatre, New York City. The amplifier horn, designed for this installation and to be used in other theatres with similar conditions, has, according to the engineers, a wide angle of sound distribution, so that it can be used flat against a screen. The horns manufactured and installed in this theatre are of the ob-

First Colonial Surgeon

The first surgeon to come to Philadelphia is believed to have been John Goodson, of London, who came over as surgeon to the Society of Free Traders before William Penn arrived. On the ship Welcome, with Penn, was Griffith Owen, the Welshman, who performed the first amputation in Philadelphia. To Dr. Thomas Bond, one of the co-founders with Franklin of the Pennsylvania hospital, when that institution was started in the middle of the Eighteenth century as the first hospital in the Colonies, belongs the credit of having performed the first lithotomy in America and also of having established the first clinic.

This was only a few years before the medical school of the College of Philadelphia, now the University of Pennsylvania, was founded in 1765.—Detroit Free Press.

Modern Kitchen "Slavery"

The aproned figure at the sink gazed sadly at the accumulation of plates and dishes, pots and pans. Was this all that marriage meant?

A heavy sigh, a rolling up of sleeves, and the kitchen was soon filled with the clatter of washing and scouring. The toiler paused from time to time to listen to the steady thrash of a typewriter in the next room.

Suddenly the noise ceased, and a large, spectacled woman, lofty of brow, appeared in the doorway.
"Hercules, darling," she said, addressing the little man, "I never can remember—do you spell 'cave man' with or without a hyphen?"—London Tit-Bits.

Told of Lincoln's Safety

The phrase, "plumes delivered, nuts safely" was a secret code which was sent to Harrisburg, Pa., when Abraham Lincoln had arrived in Washington soon after his election to the Presidency. His original route of travel, which had been through Baltimore, had to be abandoned because of the bitter feeling against the Union in Maryland. Mr. Lincoln went from Harrisburg to New York secretly and took a through train from there to Washington. Several books of Lincolniana state that the code had no special significance other than that those words had been chosen to mean Lincoln's safe arrival.

Reminders of Past Ages

Dinosaur canyon, situated in the almost inaccessible region of the Hopi Indian reservation in Arizona, was unknown to United States Indian agents or the white pioneers of the territory until Hubert Richardson, keeper of the Cameron trading post, was told of it by an Indian whose confidence he had gained. The result was that the National Geographic society sent a research party into the section which uncovered dozens of dinosaur tracks, cut deep into the rocks and said to have been imprinted there by prehistoric monsters about 30,000 years ago.—Detroit Free Press.

The Greater HUDSON EIGHT

THE FINEST CAR HUDSON EVER BUILT
\$875
FOR THE BUSINESS COUPE F. O. B. DETROIT
OTHER BODY STYLES AS ATTRACTIVELY PRICED

Smoothest of the Eights...

87 Horsepower • More Speed • Rare Riding Comfort

Hudson has been famous for performance for 22 years. Now the Greater Hudson Eight surpasses any previous model in speed, hill-climbing, acceleration and reliability. Its big, 87-horsepower motor is smoother at all speeds. Motor vibrations, the principal cause of riding and driving fatigue, are practically eliminated. Improvements in the fuel system set a new mark in eight-cylinder economy. And it is priced as low as \$875!

Easy to Buy—Easy to Pay for
Economical to Own—Drive it Today!

**MARTIN KOONS GARAGE,
Taneytown, Md.**

HORSES AND MULES

**HALBERT POOLE
Westminster, Md.**

I have on hand at all times, a large run of Horses and Mules, most of them right off the farms of Virginia. A lot of single line leaders, well broke in all harness. Call and see them. Luther Sentz, Salesman, Taneytown, Md.

Also, have a lot of Pure-bred White Collie Puppies for sale.

The Cent Comes Back

PENNIES are getting popular again for other purposes besides buying newspapers. They associate regularly now with dimes, nickels and quarters and it's more than a bowing acquaintance. For, as prices come down, more and more purchases call for odd cents. You would need a lot of them, for instance, to buy the ingredients of the following bargain dinner for four. Though it costs only fifty-five cents, you would have to make change with pennies four times if each purchase were made separately. Here are the specifications for a dinner for four people which you can purchase for that small price.

- Cream of Celery Soup 10¢
- Macaroni and Tomato 13¢
- Liverwurst 13¢
- Bread and Butter 6¢
- Crushed Pineapple Sauce 13¢

Simple and Satisfying

Cream of Celery Soup: Combine the contents of one can of celery soup with one can of water, season to taste with salt and pepper, and heat to boiling.

Macaroni and Tomato: Boil one-third of a package of macaroni till tender, then drain. Simmer the contents of a No. 2 can of tomatoes with one-half bay leaf, two slices onion, one teaspoon sugar and salt and pepper to taste for ten minutes. Remove bay leaf and add to the macaroni.*

TANEYTOWN LOCALS

Items of news from town, or vicinity are always wanted for this column. Especially accidents, sales of real estate, fires, important happenings, visits to or from the community social events, and all matters of general interest to those at home, and away from home.

This column is not for use in advertising any money-making program, fair, supper, party or sale; except for non-denominational charities or special benefits. Fire Company or Public Library support. Churches, Lodges, Societies, Schools, etc., are requested to use our Special Notice Department.

Mrs. Henry Becker, near town, who has been very ill, is slowly improving.

Miss Amelia Annan is spending two weeks with friends in Washington, D. C.

Mr. G. Fred LeFevre, of Philadelphia, Pa., son of Prof. C. M. LeFevre, visited his parents over the weekend.

Mrs. Thurlow Null and daughter, Amelia, of near Harney, spent Tuesday at the home of Mrs. Sarah Albaugh.

Mrs. Norval Rinehart returned home from the Hanover General Hospital, on Sunday, and is slowly improving.

Old newspapers, 5c a bundle. Useful at house-cleaning and moving time. Come and get them at The Record Office. 3-13-31

Mrs. Percy Putman received word that her father, Charles Humerick, of Lewistown, suffered a stroke of paralysis, on Tuesday and is very ill.

Miss Amelia Null, near Harney, had her tonsils removed at the Episcopal Eye Ear Nose and Throat Hospital, at Washington, on Wednesday of this week.

Mrs. Helen Engelbrecht, who has been living in the home of Mr. and Mrs. Curtis H. Reid, suffered a stroke of paralysis, Thursday morning, and has been removed to the home of her brother, John W. Stouffer.

Dr. and Mrs. Curtis S. Basehoar, of Carlisle, and Mrs. and Mrs. Calvin Basehoar, of Gettysburg, were entertained at supper, on Sunday evening at the home of Dr. and Mrs. C. M. Benner.

Mr. and Mrs. Claude Biddinger and daughter, Evelyn and Mabel, near town, visited Mr. and Mrs. Lewis Boyd, on Sunday. Mrs. Joseph Smith of near Bridgeport, spent Monday afternoon at the same place.

Mrs. Geo. R. Stottleyer, of Wolfsville, Md., who has been visiting relatives and friends in N. J., Philadelphia, Baltimore, Washington and Virginia, is now visiting her son-in-law and daughter, Mr. and Mrs. William W. Troxell.

In reply to a question asked the other day, of a person who had a public sale of personal property, as to whether the sale was a good one, the reply was—"I don't know what to do with the money?" What was meant by that?

In spite of bad weather, a large delegation from the Keysville Lutheran C. E., attended the combined meeting in the Reformed Church, on Sunday night. A splendid program was rendered by both Keysville and Reformed Societies.

Last Sunday, as J. Abram Dodrer, near Baust Church, was helping up a colt that had got fast in its stall, he was forced against a stone wall by the struggles of the animal, and his right leg was fractured below the knee. He is able to be around with the use of crutches.

In the Frederick county Court, on Monday, Robert A. Vaughn, Taneytown, was found guilty of non-support, on complaint of his wife who lives in Emmitsburg, and was assessed \$7.00 per week as support for his wife and child. Vaughn, who conducts a milk route, testified that his wife refused to live with him in Taneytown.

The light rains and considerable snow that fell from early Sunday morning until Tuesday morning, did more toward helping the waters than any other fall, for months. The extent of the snow was not fully appreciated, for the reason that much of it melted and disappeared as it fell. Another like visitation came on Wednesday night and Thursday.

Paul Hyser, Delta, Pa., is in the York County jail for 11 months, having plead guilty to a charge of receiving stolen goods from two boys, on which charge he was arrested in Hanover about a week ago. Mr. Hyser claims to be an "independent evangelist." It appears that he induced the boys to steal certain articles, among them being a set of auto plates, a battery and dash lights, for which he paid them small sums. He claimed the act was for the "elevation of humanity," as he had no money and needed the license plates so he could go about. The two boys were sent to the State Reformatory at Huntingdon, Pa.

Notice of the death of Mrs. A. T. Sutcliffe's mother, appears under the heading of deaths, in this issue.

Spring commences this Saturday. The Sun will rise at 6:04 and set at 6:12; rising one minute earlier, and setting one minute later each day until June 22, the longest day.

CARD OF THANKS.

I wish to thank the members of the Taneytown Fire Co., for their assistance rendered at the fire on my premises, on Tuesday night, March 10th.

MRS. LYDIA BROWN.

Helped a Lot

"I supported my uncle while he was ill."
"You supported your uncle?"
"Yes, I didn't borrow off him for a whole year."—Nagels Lustige Welt.

NOT EXPENSIVE

He—Won't you go out to dinner with me some evening?
She—Sure—but I warn you, I eat like a horse.
He—Oh, well—hay ain't so expensive.

PLAYS. PLAYS.

The four Plays, given by Baust Reformed Church, will be repeated again, THURSDAY EVENING, MARCH 24, at 7:30 p.m., in the Parish house, at Baust Church. ADMISSION 10c and 20c

Dinosaur Tracks Found

in Canadian Rockies
Ottawa.—Far up the Peace river in British Columbia, among the foothills of the Rockies, C. M. Sternberg, Canadian government palaeontologist, has discovered the footprints of dinosaurs. It is the most northerly point in the world where signs of dinosaurs have been found.
