TANEYTOWN, MARYLAND, FRIDAY, AUGUST 28, 1931.

NO. 9

PATIENCE - AND KEEPING AT IT-US-UALLY WINS.

UNIONTOWN LAND CASE SCHOOL ATTENDANCE Jury Returned Verdict of \$700.00 as LAW REVISED, Fair Valuation.

Must attend school until fourteen years of age.

The following article for publica-tion has been furnished by the Board of Education for Carroll County: "221. Every child residing in any county of the State between seven and fourteen years of are shell at

and fourteen years of age shall at-tend some day school regularly as de-fined in Section 228 of this Article, during the entire period of each year the public day schools in the county in which said child resides are in sesin which said child resides are in ses-sion, unless it can be shown that the child is elsewhere receiving regularly thorough instruction during said per-iod in the studies usually taught in the said public schools to children of the same age; provided that the sup-erintendent of any county, or person or persons duly authorized by said superintendent, may excuse cases of necessary absence among its enrolled necessary absence among its enrolled pupils; and provided further, that the provisions of this section shall not apply to a child whose mental or physical condition is such as to render its instruction as above described inexpedient or impracticable. Every person having under his control a child between seven and fourteen years of age shall cause such child to attend school or receive instruction as required by this section. Children over fourteen years or age and under the age of sixteen years shall attend some day school regularly during the entire period of each year the public day schools are in session, unless regday schools are in session, unless reg-ularly and lawfully employed. Every person having under his control a child between fourteen and sixteen years of age shall be subject to the requirements of this section." Co. Attendance Law, Chapter 158 House Bill No. 373. Attention is called to several im-portant changes in the law. 1. All children of school age must

The Ash hopper was a natural ad-junct to the bake oven, as it was usually convenient to it, and received its ashes as well as the ashes from from the house stoves, or hearths. produced lye from the ashes, which was used in the making of soap, for "store" soap was prac-tically an unknown article of merrhandise in the old days. These hoppers are a little difficult to desrribe, and may have been of different patterns. Those we recall were made of rorgh boards arranged fun-nel shaped, except that instead of being round were foursided, wide at the top and tapeing smaller to the bottom where the lye, was carried by a metal bottom, or spout, to whatever kind ol receptacle was used to receive it. The inside of the hopper was lined with rye straw carefully set up around the sides, and the ashes were filled in by being lightly tamped with a wooden stamper. The top sur-face was left a little hollow in the centre in order to better hold the water that was from time to time poused in to find its way by seepage fact that to the bottom—a leaching process the Fire that formed the strong lye used in cleared. that formed the strong of the making of soap. The boiling of the lye and the most scraps and fats then followed, until the soap was formed, after which, hen properly dried it was cut inthe soap was formed, after which, when properly dried it was cut in-to convenient sized pieces and set away to dry for future use. The "soda soap" process came in The "soda soap" process came in The "soda soap" process came in later and was considered a great in-vention, as it produced a whiter soap with much less work. This repre-sented the beginning of the numerous Again, Mt. Airy has a fine we concentrated lyes in cans that are in use now. Toilet soaps were expensive luxuries; possibly the first to be in somewhat general use was the imported "Castile" soap. Home-made scented soaps were made by adding sassafras root bark, or cinnamon bark, to the common soap.

The owners of the land—about one and one-quarter acres—are Emory Stoner and wife, who used the land for farming purposes, and valued it at \$2000. The Board of Education had offered \$750.00.

The jury visited the property in a body, in order to better determine its value, and then returned to the Court House to arrive at a verdict. Quite a difference of opinion developed that ran into a night session; and as it appeared that agreement might not be reached, Judge Parke notified the jury that unless a verdict was reached by 12 o'clock, he would dismiss the jury,

leaving the case unsettled. The jurors then finally reached agreement a few minutes before 12 o'clock, by fixing \$700.00 as being a fair price for the land.

Mrs. Stoner testified in support of the claim for a \$2000.00 valuation, while numerous witnesses were heard on the part of the Board of Education. Attorney Charles O. Clemson repre-sented the Board of Education, and Eli Baer represented the owners of the property.

The testimony was mostly to the effect that the entire property, includ-ing buildings, was worth about \$2200., and that about \$400., represented the value of the land desired for school purposes. Mrs. Stoner testified that the land was used for pasture and was valuable to her, as it helped her make a living.

a living. The jurors were divided between a valuation of \$400.00 and \$1500.00, but finally compromised on \$700.00. The jurors were: Homer L. Twigg, Miles A. Bortner, Conrad D. Nagle, Robert Fluhart, Chester M. Geiman, M. Ross Fair, George I. Bemiller, William A. Basler, William T. Ingle, George W. DeVries, Joseph F. Utz and John C. McKinnev.

The selecting of only a few contractors does not appear fair. Dur-ing our long period of more than twenty-five years in the road conwe would like to have the oppor-tunity to submit a bid on any road work done in Carroll County. I am writing this letter for our own pro-tection as well as I believe for the best interest of Carroll County. under state road contract. We would like to have the opporbest interest of Carroll County.

HAIL STORM DAMAGES **CORN CROP**

Burned near Libertytown,

A disastrous wind and hail storm, accompanied by lightning visited por-tions of Carroll and Frederick counties late Tuesday afternoon. Very little damage is reported in Carroll, but the vicinities of New Midway and Very Libertytown were hard hit, great damage being done to sugar and yel-low corn, by hail.

The barn on the farm of Dr. C. A. Norwood, tenanted by Clinton E. Hol-sopple, about one and a half miles east of Libertytown, was struck by lightning and destroyed with most of its contents of crops and farm ma-chinery. Union Bridge and Westminster Fire Companies responded and were able to save the dwelling and outbuildings.

outbuildings. • A stretch of country about a mile and a half long by a half-mile wide was completely riddled with hail that fell for about twenty minutes. On some farms the corn crop is reported to have been a total loss. At Walk-ersville, Thurmont and other places, only a light rain fell and there was but little storm, and very little dam-age was done anywhere to telephone or electric lines. or electric lines.

In Taneytown and vicinity there was a light rain, accompanied by thunder and lightning, but no damage has been reported.

THE ORPHANS' COURT.

Highly Successful Event Held in Shriver's Grove.

COMMUNITY PIC-NIC

The community pic-nic and fair held by the Emmitsburg Community Association in Shriver's grove, on Wednesday was a big success. One of the features was a tournament. The address to the Knights was de-livered by County Agent, H. R. Shoe-maker, and Rev. Philip Bower made the coronation address. In the first-class the winners were Roy Ensor.

the coronation address. In the first-class the winners were Roy Ensor, Frank Long and R. C. Long, in the second class Lewis Boyd, Grafton Keyser and Edgar Brown. Swepson Earle, State Conservation Commissioner, delivered an address on the conservation of wild game. The list of exhibits was quite extensive and generally fine, and the whole event was excellently managed. The livestock was judged by Wil-liam R. Harvey, of Corbett, Md., and the awards were as follows: Hogs, aged first class, Harry Mc-

Hogs, aged first class, Harry Mc-Nair, all three prizes; young hogs, second class, Harry McNair, first prize. Walter Shoemaker won all three prizes in the third class, with William Naill winning the first prize

in the fourth class. In the cattle class, Harry Valen-tine, of Rocky Ridge, won all three prizes and they took the first two prizes for young cattle. Ribbons were awarded in the cattle contest to E. R.

Awarded in the cattle contest to E. K. Shriver for a herd of Black Pole Angus and also for Herfords Horses, blue ribbon, Walter Shoe-maker, mare and colt; Clarence Eyler, pony. In the poultry contest Barred Rocks first prize went to William Naill, secand prize to Walter Shoemaker and third prize to Eugene Naill. In the White Leghorn class, E. R. Shriver

won the first prize.

RELIEF COMMITTEE Monocacy Battlefield Association NOW ORGANIZING,

Action is promised in fighting all National Distress.

Walter S. Gifford, chairman of the Unemployment Relief Board appoint-ed by President Hoover, has estab-lished headquarters in the Department of Commerce building, Wash-ington, and has called conferences of the heads of various National organizations for the purpose of determin-ing the date upon which the national drive shall start.

Mr. Gifford in his first public an-nouncment has made it clear that the main purpose of the new organization is to concentrate efforts on the establishment of adequate local funds for relief in each community; thereby placing responsibility for the wel-fare of the deserving needy on each state, county and city, either by finding work or by providing them with forencial cid

with financial aid. He also made it clear that the Federal government would play no part in the undertaking, but that as far as possible it would co-operate. Mr. Gifford has made a good first impres-sion on all with whom he has come into contact so far, as being a conser-vative, clear-headed, business man, and that he already has a good grasp on the size and importance of his new mission. He is the executive head of the American Telegraph and Telephone Company, and had experience during the World War as Director of the U. S. Council of National Defense. The advisory Committee, which will eventually be made up of representa-tives of all sections of all states, will While you are getting June and Junior ready to start to school this Fall, give them as good a chance to make the grade as you would your an tomobile if non-

funds. Our effort to raise local to raise funds for relief and to find work for the idle wherever possible. If it is impossible in certain in the start of the st

liberal gift. The battle of Monocacy, while not a major one of the Civil War, was nevertheless of importance in delaying the Confederate forces in its march Northward, and in saving the National capital, it is claimed.

Prominent men interested in the larger appropriation are General Bush, Captain Gillman, Charles Mc-Mathias, president of the Association; Robert E. Delaplane, vice-president, and Holmes D. Baker, former Judge Worthington and Reno S. Harp, mem-bers of the Executive Committee.

FOR THE FARMER.

Late summer or early fall is the best time to seed new lawns or reno-vate old ones. Annual weeds and hot,

vate old ones. Annual weeds and hot, dry weather are likely to injure lawns seeded in the spring. Live poultry shipped to market brings better prices if it is graded according to age, sex and size. It pays to ship the different classes in separate coops.-

Smooth vetch is one of the best winter legumes for the South. In commercial plantings in the cotton belt it has made somewhat better win-ter growth than hairy vetch and is preferable to that variety. In the last few years a great deal of smooth-

last few years a great deal of smooth-vetch seed has been imported under the name hairy vetch, according to the U. S. Department of Agriculture. Late maturing birds in the poultry flock are usually poor producers. At the U. S. Animal Husbandy Experi-ment Farm at Beltsville, Md., two years ago, the Rhode Island Reds that began to lay in September and Octo-ber averaged 212 and 209 eggs re-spectively for their first year, but those starting to lay in January laid an average of only 161 eggs in the year. Similar records in other years showed similar results. Development of the livestock indus-try in the South depends in large part

try in the South depends in large part on improvement of pastures, says the U. S. Department of Agriculture. On unimproved, or natural pastures, cat-tle will not gain as much and it takes 10 acres for each animal. Improved pastures support cattle at the rate of 1 animal to 2 acres, and the gains are about double those on natural pastures The Department of Agriculture rec-ommends the use of carpet grass, Bermuda grass, Dallis Grass, Bahia

Soft soap, often used for laundry work, was also a lye process soap, and was kept on hand in large quan-tities. All of the lye soap was hard on hands, and the skin in general.

DROP IN FEED PRICES.

The Record has received from The Reindollar Co., Taneytown, the fol-lowing figures showing the drop in feed prices, a drop that is likely gen-eral with all dealers in feed and grain The figures given after each item represents the grop per ton, as compared with August 25 last year. Bran, \$16.00; White Feed \$16.00:

Cottoh Seed meal \$14.00; Linseed meal, \$18.00; Dairy ration \$14.00; Dairy Feed \$10.00; Horse Feed \$14.00; Egg Mash, \$14.00; Pig and Hog Meal. \$14.00; Scratch Feed, \$18.00; Beef Scrap, \$22.00.

Respectfully, WILLIAM J. GROVE. Lime Kiln, Md., Aug. 21, 1931.

THE MT. AIRY SPIRIT.

The Record recently mentioned the fact that plans are under way at Mt. Airy for a park-not only under way but are bound to be a reality. Again, we have had our attention called to the energetic spirit of Mt. Airy in the on the floor when the board is put fact that at their recent carnival for the Fire Company, around \$2,200 was

newspaper in "The Community Re- Or, for a more elaborate salad, mix newspaper in "The Community Re-porter," and it's subscription price is \$2.00° a year ! Perhaps some think the price is "too high," but it is a "community" enterprise, and is lib-erally supported—a lttle extra charge, but community and don't count comparison, don't count

town, nor for its size, nor for the desirability of its location; but it is noted for something a lot better—for the "push" of its leading citizens, and for the spirit of co-operation on the part of town and community; for any-thing that is desirable for Mt. Airythe "home town."

REV. M. L. KROH MARRIED.

Rev. Millard L. Kroh, pastor of the Uniontown Lutheran Charge, and Miss Susan Eyster, of York, Pa., were married on Monday morning at the home of the bride's parents, Mr. and Mrs. Daniel Eyster, the ceremony being performed by Rev. Fred Eyster, brother of the bride, and pastor of the Reformed church at Holidays-burg, Pa. A wedding breakfast was served

by comparison, don't count. What is the point of all this ? Mt. Airy is not noted for its beauty as a town for its circ and the second perhaps, than anyone else in the fam-ily. Because of his great activity he erquires almost as much energy food as a grown man doing very heary, and take part in the reunion. There tive work, and because he is growing verd rapidly, he needs almost one and will be an address by a prominent speaker, also a musical program. The times as much food that supas a fully grown man. Give him plenty of milk, eggs, fresh fruits and cegetables in addition to the energy foods that are usually present in his diet, such as bread and butter, cereals, potatoes, cake, and pastry.

UNION REDUCES WAGES.

The Baltimore Carpenters Union at a recent meeting voluntarily agreed to reduce the wages for members from \$1.10 per hour to \$1.00. It is believed that similar cuts will be made by oth-

tinuing throughout the summer spec-ial child health conferences have been held throughout the counties for the examination of children who will reach school age this year, in preparation for their admission to school. In the last three months, 351 conferences have been held, at which over 4,600 children have been examined— 3,617 white and 1,070 coloredc a large proportion of whom were getting ready to enter school. This repre-sents about one-fourth of the total who will reach school age this year, and would seem to indicate that a large number of this year's pros-pective first-graders have not had the benefit of a careful checking up. You would not think of taking your auto out on a long hazardous trip without

having it carefully gone over before you start. Your child is infinitely more precious than your machine. Have him inspected."

NAILL FAMILY REUNION.

At a meeting of the Executive Committee, held recently at the home of the chairman, C. Edgar Nusbaum, at New Windsor, arrangements were made for the 6th annual reunion of the Naill family. The event will be held on Sunday, Sept. 6th., in the grove of Bethel M. E. church, near Marston, Carroll county.

An invitation is extended to all persons who are connected with this old . Maryland family. Bring your lunch

The officers are: President, M. W. Naill, Hanover, Pa.; Vice-President, Wilbur Devilbiss, Johnsville; Secre-tary, Miss Elizabeth Naill, Mt. Airy; Treasurer, Alfred Nusbaum, New Windsor; Historian, Mrs. Howard Hoffman, Haddonfield, N. J.; Execu-New Windsor; William Naill and Mrs. Carroll Hess, Taneytown; Wilbur Naill, New Windsor, R. D.

Minding one's own business is not

preparing for the enrollment of about work, then relief will be administered

THE FLEAGLE REUNION.

The 7th. Annual Reunion of the descendants of the late John and Margaret Hahn Fleagle, will be held on Sept. 7th., 1931, on the grounds of the Meadow Branch Church, one mile west of Westminster, Carroll Co., Md. All relatives of the Fleagle family are most cordially invited to be pres-

CONTEST FOR POSTMASTER.

W. Dana Rudy, of Westminster, son of Walter R. Rudy, of Mt. Airy, received the highest rating in a re-cent livil service examination, for Postmaster at Westminster. One of the three highest eligibles will be selected by the Postmaster General, and recommended for appointhent by the President.

WILD DUCK SEASON IS SHORT-ENED.

The open season on migratory ducks and other like wild fowl has been shortened in Maryland, Dela-ware and Virginia, by order of the Secretary of Agriculture, making the open season from November 16 th. to December 15th. The decision will affect Maryland sportsmen, and many who act as guides and furnish boats and blinds during the hunting season.

The action taken by the Government rejects the recommendations of E. Lee LeCompte, State Game Warden for Maryland, who, in a statement a week ago, opposed curtailment of the entire season, but advocated a three-day-a-week shooting season from November 16 to January 15th., inclusive, and also recommended that the use of pump and automatic shot-guns be prohibited unless adjusted so they would hold no more than two shells at a single loading.

MAMMOTH PARADE.

Baltimore Forest No. 45 Tall Cedars, of Lebanon, will hold a spec-ial summer ceremonial in Westmin-

Eastern livestock farmers should produce much lighter weight beef cat-tle if they are to get best results from their feeding operations, Mr. C. B. Denman, member of the Federal Farm Board said on Thursday in addressing the annual Farmers Field Day, West

Virginia University, at Morgantown. The national co-operative program for marketing livestock being devel-oped under the Agricultural Market-ing Act, which is centralized in the National Livestock Marketing Asso-The speakers for the day will be: Rev. H. N. Bassler, D. D., pastor of the St. Paul's Reformed Church, of Westminster, and Rev. F. H. Snave-ly of the Church fo God, Hagerstown. was discussed by Mr. Denman. Ad-vantages to be gained by Eastern livestock producers through partici-pation in this program were enumerent. Basket luncheon will be served. ated by the speaker. Along with improved marketing, he stressed the importance of quality production in line with consumer demand. Mr. Denman said that livestock

producers in the Eastern States, as well as elsewhere in the country, should keep themselves informed on the kinds of meat cuts the housewife desires, and adjust their production accordingly. The market for heavy beef cattle, he said, is rapidly disappearing.

"Regardless of the experience of the past or what we like to do," Mr. Denman said, "we are going to forced to turn to producing and fin-ishing cattle of extreme light weights if we are to put up a package that the housewives will buy at a price that is profitable for the work and investment necessary.

PEACH BUTTER.

Peel and stone peaches; well-ripen-ed freestone varieties are best. Mash the pulp and cook in its own juice without adding water. If the pulp is coarse, put it through a coarse wire sieve to make the butter a fine texture and uniform throughout. To each pound of pulp, add ½ pound of sugar. Cook slowly and stir frequently until the product is the desired thickness. Add six cracked peach kernels to each gallon of butter before it is cooked. The addition of the juice of ½ lemon to each ½ gallon of pulp improves the flavor. While hot, pack in sterilized pint jars.

THINGS NOT ALWAYS AS THEY SEEM TO BE.

Appearances are deceitful. Sometimes those hurt the least make the most fuss, while the seriously hurt "grin and bear it." Business menworkers of all kinds-are temperamental, like other folks, and also like other folks are not always wise, or correct, in their conclusions.

For instance, many people think others are making lots of money, with no better grounds for their thoughts than imagination. Outward appearances are taken as sure evidences of wealth. Merchants are credited with making profits, that are purely visionary.

Even the evidence that one store sells an article at a very low price, does not mean that the higher price for the same article asked by another store, represents "profiteering" on the part by that store. The low price may be a "bait" or a bit of advertising, or a "special" on which no profit is made. "Price cutting" is often merely that, without reference to fair prices.

Some workers advertise their hard luck, their losses and discouragements; while others see no good use in doing so, but keep their troubles to themselves, and keep on quietly doing the best they can. Some even go on quietly until financial failure overcomes them.

If we would reach correct conclusions, we need to consider the whys and wherefores carefully before hand, for making mistakes of this kind may do injustice to others, and place us in the wrong-both to be avoided by all fair-minded persons.

deal is said to be 15,000,000 bushels. or more.

GASOLINE TAXATION.

Gasoline tax rates are being increased. These increases are not temporary measures. Although some of them represent emergencies and are effective for a comparatively short time, the revenue they produce is so enticing that the tax is continued at the higher rates. Increasing rates constitute a definite, and apparently determined, upward trend.

The gasoline tax is now collected in every state and the District of Col- alone. umbia. Only in Massachusetts, New York and the District of Columbia has the original rate remained unchanged. This may be explained partly by the fact that the tax became effective in Massachusetts in 1928 and in New York in 1929. But it is interesting to note that in both states and in the District of Columbia there now is agitation for an increase in the rates during 1931.

The gasoline tax started in Oregon in 1919, the rate being 1 cent per gallon. The 2 cent tax appeared in New Mexico in 1920. The 3 cent tax came in 1923 in Oregon, Arizona, Florida, Arkansas, Georgie, South Carolina, and Virginia. In 1924 Arkansas in-

tax of 5 cents a gallon. Legislatures apparently realized that the bottom of the motoring pocket book had not been reached, for in 1929, Florida, South Carolina and Georgia established the present peak tax rate of 6 cents per gallon. Advisedly it is called the "present peak tax rate," for legislation which is rather novel, and there have been rumblings over the past few months of the possibility of nity of this continent. lifting gasoline tax rates to 8, 10 and 12 cents per gallon.-The Manufacturer.

August 25th. marks the 142nd. anniversary of the death of Mary Ball Washington, mother of the man whose two hundredth birthday anni-versary the entire world will celebrate in 1932

In Fredericksburg, Va., where Mary Ball Washington lived the greater part of her life, and where she lies buried, the shaft erected over her resting place bears a single line that per-haps tells in its half dozen words the That simple line reads, "Mary, the Mother of George Washington." It would seem to be praise and glory enough for any woman. Not far from he burial place stands

the simple, white house, the gift of her devoted son who saw to it that her declining days were days of comfort and peace.

According to the little we know of Mary Ball Washington,she was a wo-man remarkable for sound sense and force of character, and was possessed of the same reserve as her illustrious son. Of his military achievements she is said never to have spoken. She was proud, rather, of his character. Yet even in this regard she contented

herself with such modest comment as, herself with such modest comment as, "George was always a good boy." The death of Washington's father left Mary Ball Washington a widow without large means and with five children besides her eldest boy George, then eleven years of age. The farm on which they lived, near Fred-conclusion willed to George ericksburg, had been willed to George but his mother was given the use of it during her life. The situation meant careful management on the part of the mother, and it obliged the young George Washington to act as head of the family, to prepare himself to earn his own living, and meanwhile to help his mother support the family.

As George grew up, prospered, and entered on his great career, he saw to it that his mother lived in comfort and security. Though he lived some distance away at Mount Vernon, he neid regular visite to her in Freder paid regular visits to her in Freder-icksburg, and she was first in his mind after every signal achievement. His diary and memoranda of accounts bear witness to his continued interest in her welfare.

The United States George Wash-ington Bicentennial Commission re-fers to one of these occasions. It was after the surrender of Cornwallis at Yorktown, the event that virtually ended the Revolution and guaranteed victory to the American cause. Washington proceeded to Fredericksburg to call on his mother. Leaving La-fayette and the other distinguished generals who accompanied the Amer-ican commander-in-chief went alone and on foot to his mother's house. What they said to each other has never been recorded, but the meeting may well be imagined. Afterward, Mary Ball Washington

was persuaded to appear at a ball in Fredericksburg, in celebration of vic-tory. All were so impressed by her great dignity and simple yet commanding manner that Lafayette is re-corded as exclaiming, "if such are the matrons of America, she may well boast of her illustrious sons. Washington saw his mother for the last time shortly after his election as First President of the United States, the honor that crowned all the others he received and merited from a grate-ful people. Before leaving Mount ful people. Before leaving Mount Vernon for his inaugural in New York then the national capitol, the newly elected President traveled to Fredericksburg to present himself to his mother. George Washington Parke Custis, adopted son of Washington, has left a touching description of this last time that Washington saw his mother alive. He spoke the usual words of looking forward to seeing her soon again, but, in the description of Custis, she answered, "You shall see me no more; qualifications before said license can be issued. The contents of the license are as Her prediction was only too true. Her great son was only too true. Her great son was inaugurated in March, 1789. Less than six months afterward, on August 25, that year, his mother died in her 85th. year, a

Will is a compass and determination is a helm -- setting you in the right direction and bringing you to the port of your ambition. A growing account with this Bank is the very thing needed.

4% Interest Paid on Savings

this country, is very grave. It adds to the depressed condition of business because it lessens the buying ability of the people. Even part-time employment, does the same thing. Business depends on employment, and the circulation of wages among the many avenues of trade. All of these statements are so simple and natural that there is not the slightest question as to their easily seen truth.

Loss of buying power, on account of the low price of any product on which industry depends-as on the price of wheat, for instance, has the same effect. The drought of last year, emphasized the same truth. The present situation of the oil industry-the vast overproduction of gas. oline, and the ruinous price at which it is sold—is another of these conditions that reduces the circulation of earnings; and, lesser instances could be multiplied, almost without number

It is a simple matter to find causes for depression and unemployment, but quite another matter to find the remedy for it. Naturally, labor resists the lay-offs and part-time expedients, on the part of employers, but what can employers do in the matter? How is it possible for employment and full pay to continue, without orders, contracts and sales that justify employment? Even the very largest business concerns must have very large income, in order to pay out' large sums for labor.

The city of Detroit, said to have several hundred thousands unemployed, or part-time employed, can not say to laborers-"Get out of the city, we have no use for you now;" nor can these laborers very well "get out" when they have no better place to go. Relief agencies, too, must have funds for relief, or they can not continue to give it in increasing quantity, for where the funds are to come from is a big problem too.

It is almost unthinkable that there may be à class of employers who take advantage unnecessarily of human suffering, and force wage reductions. If there are any such, they should be pointed out that they may receive universal condemnation for all time. On the other hand, it should be easy to demonstrate when employers are doing their best to maintain their own Hoover commission would be, for to Maryland, the clerks of the courts,

FEWER MARRIAGES.

Statistics for the year now drawing to a close show a general decrease in marriages. The birth rate naturally fell in proportion, and, of course, the divorces decline, because without marriage there can be no divorce. These figures reflect national conditions and give food for reflection.

Why do so many eligible young men shy at the suggestion of matrimony? Or is it the girl who now evades the issue?

A dozen reasons could be advanced one of them might have a modicum of truth. There is no doubt that many become frightened at the cost of marprototype.

also helps to explain the situation. no lies may be retracted, but may be That is, the girl no longer forces the added to, at will; an extra quarterleast, the so-called new freedom has lies. radically changed the ambition of adolescence is more apt to be ownership of an automobile or a fur coat. Is this what the reformers, who are es." alarmed about hasty marriages and speedy divorces, want?-Frederick Post.

PRESIDENT HOOVER'S RELIEF COMMISSION.

"A 'LIAR'S LICENSE' SUGGESTED FOR FISHERMEN."

The Oklahoma Game and Fish Department have caused to be enacted something new to the sporting frater-

As a means of increasing the department's funds, the new law provides a special license known as "A 'Liar's License' for Fishermen." The officer empowered by law to sell said license determines the applicant's

The contents of the license are as follows:

"The bearer, So-and-So, having, by reputation and long practice, coupled with a vivid imagination, exhibited all | victim of cancer. the proper requirements therefor, is hereby empowered to lie, prevaricate and show every other recklessness with the truth considered expedient by him in connection with all matters relative to fish and fishing, for the for the drop in weddings, and each current season, subject, however, to the regulations on the back hereof." And on the back:

"Lies may be told at any place or ried life. In the old days love in a time without notice (not advisable to cottage held inducements to many, but game wardens); cameras may be now the difficulty is to find the cot | used, scales doctored and elastic rultage. "Parlor, bedroom and bath" ers employed; borrowed or rented matrimony costs more than its early fish may be used at all times; guides or others may be bribed or otherwise The economic freedom of women induced to corroborate all good lies;

issue. And last, but by no means pound or half-inch will improve all

"This license is null and void if young people and the popular idea of used for any other purpose, including home. The ambition of modern weight of babies, tire and gasoline mileage, golf scores, prohibition matters, all private or business purpos-

> A further direction admonishes: "All cheerful liars should be licensed. Use your own judgment."

(Editor's Note-Maryland has so many fishermen, (and some folks, in listening to their discussion relative to their catches, claim that each time President Hoover's Relief Commis- the tale is told the fish seem to sion will not be universally accepted grow), that we have no doubt if such as an effort sure to succeed. No a license were offered for sale in

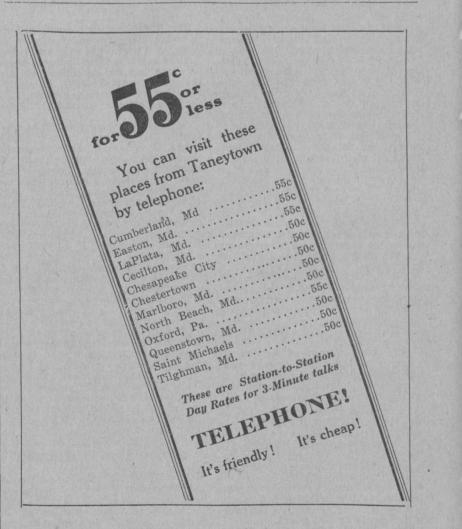

The safety factor in Farquhar Grain Drills is the fact that both Disc and Shovel Openers have the "bite" and the grain is sown in a wide bottom furrow in which the roots are encouraged to fullest growth, promoting maximum tillering or "stooling."

tillering or "stooling." This fact is re-inforced by the wide range in quantity desired to be sown— the Double Run Feed, Star Wheel Forced Fertilizer Feed and accurately regulated grass seeder. Being well balanced makes it easy on horses; roller bearing on main axle assures light draft. Low down hoppers with 48-inch wheels— all distinct advantages.

Then a change from Disc Drills to Drills with Shovel Openers can be made in twenty minutes - one type of drag bar makes this change so convenient. Every drill fully guaranteed. Write today for complete description in Bulletin 330.

KEEP THE GROWING CHICKS WELL FED

Several Rations Economical and Effective.

Growing chicks should be well fed to insure health, protection against disease, rapid, economical gains while they are young, and quality flavor to the meat of broilers and friers, says O. C. Ufford. extension poultryman at the Colorado Agricultural college.

A simple, economical and effective growing ration for the farm flock can be made, Ufford suggests, from the following ingredients:

The scratch mixture may be cracked corn of a size suitable for the chick, whole wheat or a mixture of equal parts of these two grains.

A mash mixture may be composed of the following feeds, he says: Fine yellow cornmeal. 35 pounds; bran, 25 pounds; shorts. 25 pounds; meat meal or meat scrap, 10 pounds; bone meal, 4 pounds; salt. 1 pound. Ground wheat may be substituted for the bran and shorts if desired.

When milk is available in any form, it can very profitably be fed to the flock, it is added.

"The mash should be kept in suitable, non-wasting feeders, allowing the chicks free access to it at all times," the extension poultryman says, "and feeding space should be provided so that at least one-fourth of the flock can feed at one time.

"The grain can be fed in hoppers, morning or evening, in amounts that the birds can clean up readily, or fed in a litter of straw that should be changed occasionally as a sanitary precaution.

"Green feed is a very important part of the chick's diet. When a green range, lawn clippings, alfalfa, lettuce or other greens are not available. 5 to 10 pounds of alfalfa-leaf meal should be added to each 100 pounds of the above mash mixture."

Rotation of Hen Yard

Has Many Advantages Divide the poultry range in two, suggests the poultry department at the Ohio State university, and rotate the flock with green crops.

If the flock is permitted to cover the entire range all the time they will soon kill all the vegetation around the poultry house. This will make it necessary to provide green feed from another source and at greater expense. The yard will also become unsanitary and often a sea of mud after a hard rain.

Early fall sown rye provides an ideal fall supply of green feed for poultry. Rape, sown in early summer, will provide succulence in the ration a large part of the summer. It can be pastured as soon as it is three or four inches high. Half the yard is given to range and pasture for the flock while the other half is

OIL WELL ACCIDENT MADE POST AVIATOR

Compensation for Lost Eye Paid for First Plane.

New York .--- A man who "didn't give a hang" about anything but aviation and another whose earliest life had been bent toward charting difficult courses, have flown into world renown because of an oil well accident.

Wiley Post and Harold Gatty-born on different sides of the world and to different modes of living-were friends mainly through the fact that both lived and suffered through the cause of aviation in the last few years

Wiley Post lost an eye in an oil field accident in Oklahoma. That gave him \$2,000 compensation, and his first airplane-the start of his flying career that brought this famous flight. Harold Gatty trained in the Australian naval academy as a navigator, charted courses on the South seas as a youth in his teens, became interested in aviation and after one unsuccess ful transoceanic attempt joined Post

in this around-the-world undertaking. Post was born at Grand Plain, Texas. In his youth he moved with his family to Maysville, Okla., a small town outside of Oklahoma City, where the elder Post built up a farm. But Wiley wasn't much good on the farm.

He disliked it. His father often remarked that Wiley "just didn't give a hang. In Days of Oil Boom.

But that was in the days of the oil boom in Oklahoma. Jobs beckoned from the rich oil fields. Wiley tried them. He worked on a number of such jobs, the while completing uis early education.

Then on one oil job there was an accident. A piece of metal struck Wiley in the eye. He lost the sight of that member. The oil company gave him \$2,000 compensation and with that Post bought a "crate" and started barnstorming with Burrel Tibbs and Dorsey Askew.

For three years he was a "barnstormer" and his adventures and experiences were many-just as they were with other barnstormers of that period, including such famous flyers as Col. Charles A. Lindbergh. Never has Post been hurt, although

he has taken all sorts of chances. F. C. Hall, backer of this sturdy Oklahoman, takes up Wiley's story from there.

"One day he came into my office with a leather cap in his hand and said he wanted to be my pilot," Hall remarked. "He said he'd be heartbroken if he didn't get the job. What was I to do but let him have it."

Wiley got the job. Subsequently through Hall he got the plane now the Winnie Mae. It was named the Winnie Mae after Hall's daughter and cost \$22,000. And in that plane he won the Los Angeles-Chicago air derby in 1930 with an average speed of 192 miles an hour.

World Flight His Goal.

But a world flight was his goal. His young wife-May Lane of Sweetwater, Texas, whom he married in 1927when he was twenty-eight-was in favor of it. Hall agreed to the flight and established refueling bases. And so the start was made in a search for a navigator with Post going down to Oklahoma one day with Harold Gatty, a navigator from Los Angeles. Hall didn't know who Gatty was, but said: "If Wiley wants him, all right." The navigator was born at Campbelltown, Tasmania, January 5, 1903. At thirteen he entered the Jervis bay naval school, the royal Australian school which corresponds to the United States Naval academy. For four years Gatty studied navigation. He learned the intricate charting of the South seas. He served four years as a merchant marine navigator, then went aboard a private yacht as a navigator.

THE CHESAPEAKE AND POTOMAC TELEPHONE COMPA: IV **OF BALTIMORE CITY**

THE KOOKOO KLUXER

THIS strange-appearing bird is found nesting near the foot of glaciers in the mountainous regions of eastern Georgia and South Carolina. It derives its name from the peculiar way it has of clucking at marauding picaninnies, and cooing at its young. It lives chiefly on tar and feathers, but

Quiet minds cannot be perplexed or frightened, but go on in fortune or misfortune at their own private pace, like a clock in a thunder storm.

SEASONABLE GOOD THINGS

THIS is the time of the year when a chilled soup is often more agreeable than a hot one.

Orange Soup. Heat a quart of orange juice in the top of a double boiler, over hot water: when hot add a tablespoonful of cornstarch which has been cooked until smooth in boiling water after moistening with cold water. Cook and stir until perfectly well blended, adding a clove or two for additional flavor, and removing them when serving.

Glorified Pudding. Wash one-half cupful of rice and put it, with two-thirds of a cupful of brown sugar, one-fourth of a package of sliced dates, and one quart of milk, in a deep baking dish. Sprinkle with a half teaspoonful of salt and bake in a moderate oven for two to three hours. Stir often during the first half hour of cooking to prevent a crust from forming. By adding a half cupful of suet lightly mixed with two tablespoonfuls of flour, this will make a very good suet pudding. Have the suet put through the food chopper. This forms a rich brown crust on top. Serve with a hard sauce or with cream if the suit is not used.

Orange Blossom Salad. Peel the oranges carefully and separate into sections, to resemble a flower. Place the orange on a curled leaf of lettuce, moisten the whole with french dressing, dredge with the coconut frostettes and top with a spoonful of mayonnaise and whipped cream.

Cherry Pudding. Beat the yolks of two eggs with one-fourth of a cupful of sugar. Blend two tablespoonfuls of cooking oil with one-fourth cupful of sugar and add to the egg yolks. Sift one and one-half cupfuls of flour, one and one-half teaspoonfuls of baking powder, with one-half teaspoonful of salt and add to the first mixture with three-eights of a cupful of cheery juice, beating and mixing well. Boil one-half cupful of sirup until it threads and pour over the stiffly beaten whites of the eggs. Fold this into the cake mixture. flavor with almond, pour into a well greased cake pan, cover the top with fresh cherries. Bake one hour.

Jam Cake. Cream one-half cupful of sweet fat, add one cupful of sugar, and two well beaten eggs. Sift one and one-half cupfuls of flour with one-half teaspoonful each of soda, cinnamon, cloves, nutmeg and allspice, and add the creamed sugar mixture alternately with one-half cupful of buttermilk. Fold in one-half cupful of jam, onehalf cupful each of citron cut thin and chopped nuts. Bake forty-five minutes in a moderate oven in a square pan. Cover with any desired icing.

A simple and most delightful cocktail for a company luncheon is grapefriut juice or canned grapefruit with a maraschino cherry and a bit of the cordial for flavor.

er covenants in said mortgage deed contained, the undersigned Assignee (c), 1931, Western Newspaper Union.)

in preparation for another crop. A woven wire fence five feet high will serve to keep the chickens off the growing crop on the range. The fence should be staked well at the bottom, for usually more chickens go under fences than over them.

Hen That Molts Early Not a Good Producer

Contrary to the opinion of some poultry men, the hen that molts early usually does not begin laying again early in the winter, says F. E. Andrews of the New York State College of Agriculture. In fact, the early molters usually require more time to renew their feathers than the late molters. The early molting also indicates a lack of high production ability.

If the egg production goes down slowly and a few hens start molting each week it is a safe practice to cull those individuals. However, if a large perce ige of the flock suddenly stops laying and begins to molt, it is best to check on the management of the flock, and would not necessarily mean that all of the hens were culls, Mr. Andrews advises.

Sudden changes of feed, a bad infestation of lice or mites, or insufficient amounts of feed and water may throw the flock into a molt.

Poultry Facts In 1845, New York state grew 16,000 acres of beans and 958,000 acres of wheat. In 1925 there were 154,000 acres of beans and 314,000 acres of wheat.

. . .

Constitutional vigor in pullets is indicated by a deep yellow color in the legs and beak, and by bright prominent eyes, and a well balanced head. The size of the bird is also important and only those pullets of good size should be kept.

In late summer, begin to feed the hens from four to six quarts of wet mash for each one hundred birds. Continue until early fall. . . .

Mrs. G. H. Winslow of Pasquotank county, North Carolina, raised 299 White Leghorn chicks out of 300 hatched. One was lost by smothering while teaching the chicks to roost.

. . .

Eggs should be put in crates with the large end up in order to prevent breaking the air cell when the eggs are being hauled to market.

Iowa Hen Comes Into Kitchen to Lay Her Eggs

Manchester, Iowa.-Emil Wendling, Jr., has trained a white Leghorn hen to come into the kitchen to lay her eggs. She knocks on the door by flapping her wings vigorously, struts to an old coat in a corner, placed there as a nest, lays an egg, and departs. In two months the hen has laid 50 eggs in the coat.

Brakes on Rails Stop Trains in Milan Station

Milan, Italy .- Brakes attached to the rails instead of to the undercarriage of the cars have been installed at the terminals of the twenty-four railroad lines entering the new Milan station, A train of fourteen coaches traveling at 18 miles an hour was stopped within ten yards during tests.

Boxer Knocks Out

a Fleeing Bandit Berlin .--- A would-be pay roll bandit, who took \$275 from a girl cashier of a suburban laundry as she came from a bank, made just one mistake. In his flight he tried to make his getaway across an athletic field where a group of amateur boxers were working out.

The boxers heard the girl's cries. One of them knocked the bandit out and turned him over to the police.

The union out-door vespers could not be held on Westminster St., as announced, on account of rain, on Sunday evening. Rev. Ivan G. Naugle, pastor of the Manchester U. B. Charge, brought the message, taking as a text, Eph. 2:10. The theme was "Working with God." A male quartette from the Mt. Zion U. B. Church was present and sang several numbers.

Services will be held out doors,next Sunday, if the weather permits, and if rain, they will be held in the Im-manuel Lutheran Church, as the past Sunday. The Black Rock Chorus of the Church of the Brethren will be present to sing and the message will be brought by the Rev. Bro. Zellers, minister of the Church of the Brethren. A good attendance is expected as this will probably be the last ser-vice of the series. They have been much enjoyed and it is hoped by many that they be continued next year through the summer months.

Miss Margaret Stoffle is spending a week with friends and relatives in Baltimore and Lansdowne. She will begin her duties as teacher of Hisory and English at the Oakland High School, on Sept. Srd., having been re-cently elected to that position.

We have been very sympathetic with the ones who recently suffered heavy losses by fires. Usually, the first query after the acceptance of the fact is, "Was it covered by insurance?" Of course, insurance helps to rebuild the structures; but what of the much work and worry, the disturbed nervous condition, the dependable animals destroyed, the crops cul-tivated and gathered by hard labor? Always, some things are lost in a fire that cannot be replaced.

MAN RESIDED HERE 20,000 YEARS AGO

Life in North America Is Traced to Ice Age.

Pasadena, Calif .- The time man has lived in America was pushed back to at least 20,000 years ago by reports to the American Association for the Advancement of Science here recently. Archeologists and geologists told how they have read the record written in earth deposits that give strong evidence that highly developed man hunted strange red haired and large clawed ground sloths, primitive horses, buffalos unlike those known to early white men or Indians, and other strange beasts. Man was contemporaneous with these creatures when the last great ice sheet of the glacial age still covered northern United States. That man existed at a time more remote than generally credited is the conclusion of leading authorities, including Dr. H. M. Harrington of the Southwest museum, Dr. Barnum Brown of the American Museum of Natural History, and Dr. Chester Stock ogy.

Scattered Over America.

Doctor Harrington and Doctor Stock told of explorations of a gypsum cave near the site of Boulder dam in Nevada, where the camp fires, weapons, and torches of early man were found imbedded. They concluded that this early gypsum cave man, still known only from his tools, since none of his bones have been found after two years of excavations. greatly strengthens scientific suspicion that man was widely scattered over America in the last stages of the Ice age. This is a greater age for man in America than most scientists have considered possible heretofore.

At Folsom, N. M., Dr. Barnum Brown found a kill of extinct buffalo made by men using stone weapons that are different from and superior to any hitherto discovered in America. He dated the deposit in which the bones were found as 20.000 years old.

Heat in the Stratosphere.

There is a possibility that instead of man being as ancient as these new discoveries indicate, the extinct animals associated with them existed until more recent times than scientists have proposed. This view was expressed by D. A. S. Bomer of the University of Chicago. A report from Dr. Philip S. Smith of the United States geological survey showed that Alaska in the Ice age was a pleasant place to be, and offered a good reason for primitive man to migrate across the narrow Bering strait from Asia to America.

Just a mere 50 miles above our heads the temperature is between 1,000 and 2,000 degrees Fahrenheit, according to a new theory of the earth's atmosphere presented by Prof. B. Guthenberg of the California Institute of Technology. This extremely hot weather a few miles up comes as the result of Professor Guthenberg's novel theory that the atmosphere is practically the same in composition throughout and not exclusively of helium in some high lavers, as other physicists have concluded. Although the temperatures are high in the heights of the stratosphere, the air is very diffuse and thin. Only a rocket could actually penetrate the atmospheric heights to bring back evidence of what actually exists there, Professor Guthenberg said. The shells of a longe range gun used by the Germans in bombarding Paris probably traveled in a highly heated region of thin atmosphere, but since they exploded it is not known how they were affected by the heat that they encountered.

PUBLIC SALE VALUABLE FARM PROPERTY.

The undersigned, intending to quit farming, will offer at public sale, the following real estate and personal property, on

THURSDAY, SEPTEMBER 10, 1931. at 1:30 sharp, the farm of

31 ACRES, 27 SQUARE PERCHES, more or less, located on the Francis Scott Key Highway, ¾ mile from Taneytown Square, improved with a well built

FRAME DWELLING,

MRS. CLARA PLAINE FERRER.

Mrs. Clara Plaine Ferrer, wife of Curtiss F. Ferrer, died at her home, near Panora, Iowa, August 8th., in the 76th year of age. Besides her hus-band, she is survived by daughters, Mrs. Will Cordis and Miss Gretta; also brothers, D. Howard, of Panora; Harry K., of Des Moines; Evan B. Plaine, of Spencer, Iowa; nephews and nieces: Irving Plaine, of Panora; Sterling Englar, of Des Moines; Mrs. William Burns, of Kansas City, and Mrs. Wesley Sauter, of Spencer, Iowa. Mrs. Ferrer was a daughter of the late Beniah Englar and Hannah Kimmel Plaine, of McKinstry, Car-roll county, Md. When at the age of nine years, her parents moved their family west their family west.

She was a devoted and consistent member of the Church of the Breth-ren, laboring in whatever capacity proffered. Her remains were laid to rest in the beautiful cemetery ad-joining the "House of Worship" she she loved-all made doubly sacred to her because of the site being a part of the estate of her parents, the church having been recently rebuilt, serving as a neat and appropriate monument to the memory of the Plaine family.

MARY ENGLAR HARRISON.

Mrs. Mary Englar Harrison, widow of the late Henry F. Harrison, died last Saturday at a Baltimore Hospital, from peritonitis following an opera-tion. Funeral services were held at the home of her son, John F. Buffing-ton, Baltimore, Monday afternoon, followed by interment in Woodlawn

cemetery. Mrs. Harrison was a daughter of the late Josiah and Caroline Englar, of Linwood, this county. She was twice married, her first husband having been Dr. John F. Buffington, Jr., of New Windsor, of which union she is survived by one son, John F. Her husband died several years ago.

She is also survived by one sister, Mrs. Jennie Myers, of Linwood; and by the three brothers, Jesse, John and Frederick Englar, all of Baltimore, Sept. 1st., and be ready to take up also by a number of nieces and i nephews.

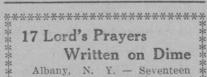

Appendicitis Puts End to Man's Blood Giving

Buffalo, N. Y .-- Joseph E. Lynch, thirty-two, who has donated 101 pints of blood in saving the lives of more than 90 persons, is recovering in a local hospital from an appendicitis operation.

Lynch, physicians say, has blood most adaptable for transfusion purposes. He meant to stop giving blood at the 100 mark, but an emergency arose, and as he had the only suitable blood, he consented.

Children's Books Sent

to New Police Library Lynn, Mass .- Soon after the new Lynn police headquarters was opened a mysterious truckload of books was delivered to fill the shelves of the library of the building. Rugged policemen were astonished to discover that the shipment included a complete set of Girl Scout Adventure books, Tom Swift tales, the Boy Trapper series, and the Elsie Dinsmore books.

Lord's Pravers written on space the size of a dime-it sounds impossible, but Joseph S. A. Bertasso lays claim to that distinction. This was accomplished, Bertasso said, only after long practice.

First he was able to write only five Lord's Prayers, which the ordinary person even cannot do. Recently, Bertasso said, he wrote a 16,033 word history of the United States on a postcard.

room doll house, large reed doll carriage, white enameled sink and a cistern pump, lot of lumber, and other miscellaneous aritcles.

TERMS annuonced on day of sale. GEORGE HENZE. J. N. O. SMITH, Auct. 8-21-3t

Assignee of Mortgagee's Sale ____ OF VALUABLE _____ Farm Property NEAR TANEYTOWN, MD.

Women's Field House, First To Be Finished, Will Be Ready September 10

Rapid Progress Is Being

Made On the Four Others

College Park, Md .- When the University of Maryland re-opens for its regular winter session one new building will be completed and four nearing completion.

The Women's Field House virtually is finished now, and will be entirely ready before September 10. It is planned to use this building temporarily as a girl's dormitory for about a month or six weeks during the completion of the new Girl's Dormitory.

The addition to the Engineering Building and the new Horticulture Building are rising rapidly and good progress is being made on the Men's Field House. The work on the Men's Field House has been delayed somewhat by the late delivery of the large steel trusses which will be the largest ever placed in a building in the State, with the exception of those in the Fifth Regiment Armory.

The addition to the Engineering Building will fill a much needed want in instruction of students, due to the apid growth of the college.

The Horticulture Building, besides being used for instruction will also furnish adequate laboratory space to carry on reseach in canning of fruits and vegetables and preservation of the same in which horticultural interests of the State are keenly centered. The Men's Field House will furnish all the intercollegiate athletic teams with ample dressing rooms, showers and training facilities, will contain a large forty-bed dressing room for visiting teams, offices and also will serve as an adequate place in which to play basketball and hold boxing matches.

When used as an auditorium the building will seat 6,000 persons, the argest seating capacity of any building in the State, except the Fifth Regiment Armory.

Birds and the Bible

There are at least 290 references to birds in the Bible, says the American Forestry association. Although 113 of these references are to birds in general, 31 species of birds are named.

The dove and eagle, the one associated with gentleness and peace and the other symbolic of strength and courage and noted for the heights to which it can soar, are mentioned more often than any of the others. Alexander Sprunt, Jr., writer for the American Forestry association, says that the dove is mentioned 35 times and the eagle 32.

Other species mentioned by Sprunt, listed according to the number of times their names appear, are: Raven, cock, hen, owl, pigeon, sparrow, stork, pellcan, quail, swallow, vulture, ostrich, bittern, peacock, cormorant, crane, partridge, offifrage, osprey, kite, cuckoo, pottery and reproduced designs based hawk, heron, nighthawk, lapwing, glebem, swan and gier eagle.

Old English "Sport" of

Fox Hunting Endangered Would England still be England. without its hunting rallies? Is this sport of centuries, the merry chase of elusive foxes, fated to die out?

It is unlikely that there is any feature of English country life so typical of the customs and traditions of the nation, as fox hunting. This being so, a recent statement of the earl of Rosebery, on accepting the mastership of the Whadden chase, that this sport is in a very critical condition, came rather as a surprise. He declared that five neighboring packs are having difficulty in finding masters, and that sportsmen must rally around now, or see fox hunting go the way of hawking. His lordship ascribed the decline to hard times and high taxation.

This might be considered bad news, even for the foxes, for from accounts of this sport that I have read, it would seem that the prey gets as much fun out of eluding the huntsmen, as the latter do in the galloping pursuit. After some of these old wily masters of the craft have learned the business, their chances of becoming a mere brush are comfortably few. Why, there are even some of these old fellows who pay visits to the kennels, if the hunt is not up regularly, to see what is keeping their little playmates! At least that's the story told.-Border

How English Merchant of 1480 Sought Custom

One of the earliest posters ever printed in England is to be seen in the Bodleian library, and concerns a Sarum service book, printed in 1480 by Caxton. It reads as follows: "If it pleases any man spirituel or temporel to bye our pyes of two or three commemoracious of Salisburi Use, emprynted after the form of this prese't letre, whiche ben wel and truly correct, late hym come to Westmonester into the almonestrye at the reed pole, and he shall have them good and chepe." The manner of presentation is somewhat unenterprising. The goods advertised belonged to the Middle ages, which were fast dying. But a new force had been let loose, which in the course of the next century was to revolutionize not only the art of advertising, but the whole of European

Famous English Potter

Josiah Wedgewood was born on July 12, 1730. He was the youngest on of a potter and came of a family of which members had been notable potters in Staffordshire, England. Soon after the death of his father in 1739 he became skilled in the art of shaping pottery on the wheel. In 1753 he became manager of a small pottery. In 1759 he began work on his own account in the Ivy house pottery at Burslem. Salt glaze and green and yellow glaze seem to have been his first staples. However, the fine white English earthenware was just reaching perfection and Wedgewood became one of its best known makers. He presented a service of his ware to Queen Charlotte in 1762 and was appointed potter to the queen and later to the king. He next turned his attention to artistic

MARYLAND NAVY FOOTBALL GAME EXCITES INTEREST Contest In Washington On October 10 Is One Of Season's Classics Other Big Tilts Listed, Three At College Park

College Park, Md. - University of Maryland's football squad, which has been asked to report at College Park on September 7, for the start of practice, will have to step on the gas early this fall.

Washington College will be met in the opener on September 26 and then it will be just one battle after another until the campaign ends.

Virginia will visit College Park on October 3 and that will be a big assignment, and all that the Old Liners will have to think about the following week will be the Navy, which will be battled in Griffith Stadium in Washington, is the Capital City's leading attraction of the season. This game already has begun to excite great interest.

It proved a classic last fall when played at Annapolis. It was witnessed then by an overflow crowd and not one-fourth of the fans who wanted to see the game could be accommodated. Applications for seats right now are coming into the athletic offices at the Naval Academy and Maryland.

Following the Navy tilt, the Old Liners will play Kentucky, V. M. I., Virginia Poly, Vanderbilt, Washington and Lee, Johns Hopkins and Western Maryland.

The Kentucky and the Washington and Lee games are to be played at College Park and the latter likely will be designated as Home-coming. Maryland alumni and students, coaches, and everybody interested in football at the University are making no bones about the fact that they are looking forward to the Navy game in Washington as their big encounter of the year. Navy will have one big ad-vantage in that it got ten weeks' practice last spring while Maryland did virtually nothing along this line. Arrangements have been made with the Claiborne-Annapolis Ferry Co. for a ferry to leave Annapolis at 7 P. M. so that the people on the Eastern

Shore who want to go to Washington to see the game will have plenty of time to get back home that night. Interest in the game over all the

State is keen and no game that has ever been played in Washington has attracted as much attention as this game is attracting. Washington newspapers generally are predicting that the greatest crowd that ever watched a football game in Washington will be present.

Maryland people who desire seats may get them by applying either to the Naval Academy or the University of Maryland.

Ancient "Trap Shooting"

Eastern Nations First

in Use of "Fireworks"

The origin of pyrotechny is unknown, but the art was early prac-ticed in the East. Although inflammable compositions (known as Greek fire) were used in European warfare before gunpowder had become known among the western nations, fireworks, in the modern sense of the word, became known to them about the middle of the Fourteenth century and record is found of their having been used as an accessory of public pageantry in the year 1588. The early development of fireworks in Europe was due to the Florentines. Fireworks have been associated with the Fourth of July from the beginning. At the time of the signing of the Declaration of Independence, John Adams, in a letter to his wife, said: "It (Independence day) ought to be solemnized with pomp and parades, with shows, games, sports, guns, bells, bonfires and illuminations, from one end of this continent to the other, from this time forward for evermore."

Town Clings to Old Method

In spite of the encroachment of the telephone and the telegraph, the inhabitants of Kungsberger, Sweden, have decided to retain the medieval "bid-stick" communication service.

The "bid-stick," a stick with a writ fastened around its center, is circulated among the inhabitants of the village, and every one who receives it has to carry it to his nearest neighbor after reading the message.

The Kunsberger villagers declare that its use is much more dependable than postcards or telephone calls. Since there is a fine of \$21.75 for anyone who keeps the "bid-stick" too long or who neglects to forward it, the "stick" triumphs over the modern means of communication.-Baltimore Sun.

Roofed With Turf

In the ancient Hardanger village of Vik, in Norway, the tourist will find an epitome of many of the attractions in this region. It is one of the oldest and most picturesque. Here will still be found some of the old turf roof cottages. The turf is laid on several layers of birch bark and is absolutely watertight. Spinning wheels and looms will also be found in some of the homes. The church is a typical peasant church of pre-Reformation days and one of the first of its kind. It has ancient frescoes and carved furniture, all the work of local talent. An ancient leather collection bag, fixed to the end of a long stick, has a small bell attached, to awake the sleeping worshiper.

Pearls Really Economical

The pearl is, of course, the bride's own jewel, and unlucky is the girl whose bridegroom does not bestow upon her a necklace to tone with the shimmering satin of the bridal gown. The custom of giving pearls is really based on reason of economy, odd as this may sound. Pearls are the only gem suited to every woman whatever her age and which she can wear at any time of the day with any kind

Trippers to Sorrento

Older than Rome, Sorrento, in Italy, goes back to the day of Greek mythology. It was a Phoenician colony older than Tyre. Its name came from, the famous sirens, and its power to. lure men, and women, too, is as great today. Here Tasso was born, and here lived Goethe, Gorki, Marion Crawford and many others. Ibsen stayed at a little inn on the Corso Umberto and finished his "Peer Gynt," and wrote "Ghosts" here. Wagner, Byron, Scott, Cooper, Dumas, Verdi, Renan, Longfellow, Bulwer-Lytton, Heyse, Wilde, and Nietzsche all have made this trip, so lovely is the little town of the sirens by the sea.

SUPERSTI

on the later phases of Greek art.

Tyrian Purple

Tyrian purple, which is really a deep crimson, was the most famous of all dyed colors known to ancients. According to a legend, this color was discovered near Tyre in Phoenica when a man named Hercules saw his dog bite into a shellfish and stain his mouth. At any rate, the ancients ascribed the discovery of purple to the Phoenicians, and it was probably the first dyed color to be fixed on wool and linen.

The origin of trap shooting may be traced to the ancient pastime of popinjay shooting, a game practiced by the ancient Greeks and the expert bowmen of medieval times, wrote W. W. Greener, in "The Gun and Its Development." The popinjay was a stuffed parrot or fowl placed at the top of a pole, and used as a target; in some instances a living bird was used a certain amount of liberty being given to it by the length of the cord used to secure it to the pole. Homer, in the "Iliad," mentions popinjay shooting, a dove being the target.

of frock. You men, take careful note of that! "Give me the gift that dims the moon," wrote Emerson, a sentiment that every woman will echo.-Exchange.

Golf and Geography

The scholars of a Pacific coast school have built an ingenious miniature golf course which is at the same time an instructor of geography. The various links represent different parts of the country and their products. which is impressed upon the minds of the players as they make the rounds.

SHE HAS HEARD THAT-

If you are lucky enough in these days when horses are few and far between to find a horseshoe-and then perchance to lose it-oh, woe for you, for that's a sign of double trouble. But cheer up, danger may be avoided by tying up a lock of your hair, if you have any.

(@, 1931, McClure Newspaper Syndicate.) (WNU Service.)

pounds.

PUBLIC SALE

(© by McClure Newspaper Syndicate.) (WNU Service.) T SOMETIMES seemed to Estelle Winters that she could reckon almost to the day, when the first realizations that she had reached

a specific milestone in her life had rushed over her.

It was not so much that her mirror told her that she was fading and that the jonquil-yellow of her hair was running to pallor or that her blue eyes were weakening, but there was a tolling note inside the heart of Estelle which said "youth is done," "youth is done," "youth is done."

A conspiracy of circumstances brought about this conscious termination of the golden glow that had always characterized Estelle Winters. Life had not been easy for her. Twenty years of singing in the cafes of the large cities of the Far West had exacted their tribute. Twenty years of the solitary struggle to rear in integrity and innocence, a girl-child with the beautiful name of Rosalinda, had told in strain on Estelle.

The latter she had accomplished and the latter she was willing to regard as her life work. Indeed, Rosalinda was a fair enough monument to anybody. At twenty she was like a flower, slim, lovely, fragile.

And so it was that when Rosalinda was in this early bloom, Estelle Winters, her mother, taking inventory, so to speak, of her own face, her spirit, her vitality, came so poignantly to realize that her youth was done.

The following year, Estelle, instead of flitting like a tired bird of plumage from one cafe to another, established herself quietly in a San Francisco cafe of first-rate standing as cashier.

It was a let-down, but it was a letting-down that somehow warmed and eased the tired, bruised spirit that was Estelle's. The struggle against the ever-widening crack in her voice was finished; the uneven race against the flesh of years, as it settled on her hips and shoulders, was over. Estelle could sit back quietly, now, noticing but unnoticed, and let the years roll in.

And more than all of these, Estelle could now keep fastened more firmly, her watchful eye on Rosalinda.

This girl, whom her mother yearned to protect from the disappointments that had been hers, was now also employed in the same cafe where Estelle held the throne of cashier.

Rosalinda's duties were light. At noon she arrived, attired herself in a peasant costume that enhanced her loveliness, and moved with a tray of hot rolls in among the patrons of the cafe, offering her dainties as she slid by the tables. At six o'clock Rosalinda came on duty again, and was free to leave the restaurant with her

wanted to cultivate a voice that was already showing a fluty resonant quality. That was why Estelle so passionately desired to save her from the wear and tear of performing in the cabarets. That was why, without the slightest sense of renunciation, Estelle was ready to fold away the days of her most garish kind of successes, for the more stable remuneration of her work behind a cashier's counter. Estelle and her daughter were

hoarding for the day when Rosalinda might go abroad to prepare her voice for opera.

One night in the restaurant, a man well beyond fifty, big, irresistible as a personality, known the country over as a millionaire sportsman and art connoisseur, fastened what were frankly delighted eyes on Rosalinda.

For the first time in her life, swept by something that was stronger than she was, she arranged a rendezvous that did not include Estelle.

For the first time in her life, Rosalinda was impelled to agree to see a man without the presence of a third party-her mother.

It was not unnatural in the face of things, in fact it would have been more unnatural if it had not happened so, that the youthful and beauteous Rosalinda should finally find herself confronted with one of the emotional climaxes sure to befall a creature of her caliber.

Curious, but across the room, within her lair. Estelle Winters knew everything that was happening, just as concisely as if she were present there beside the table of the well-known figure of the sportsman-art connoisseur, Hiram Bridges.

From her lair, Estelle with her hand to her throat, saw this happening; with her eyes dilated saw this happening. What is more, she saw happening across the sweet face of Rosalinda, the first faint flushes of awakening.

When Hiram Bridges left the restaurant that night, elated with his conquest of a type that was alluring to him, there confronted him in the corridor the pale, washed-out figure of a woman who caused him to stare. "Yes, Hiram, it's who you think it is," said Estelle, a little tiredly, none of the melodrama of the moment in

her manner or her voice. "Why, it's twenty years, since-" he said stupidly.

One of those melodramatic incidents that can seem to come out of a clear sky was happening in that restaurant.

"Twenty-one years," she corrected, her glance sliding way toward the remote figure of Rosalinda. "That makes her twenty."

"Who twenty?"

"The girl you are meeting lateryour daughter," said Estelle. Rosalinda radiant, more beautiful than ever in her innocence, is studying for grand opera in Italy.

An internationally known sportsman and art connoisseur, who has never seen her since that night in the restaurant, is educating her.

Famous Danish Castle

Notwithstanding its rather remote position on the Island of Jutland in Denmark, on the banks of the Limfjord, Castle Spottrup has lured many

MORE VISITORS TO PADDY'S POND

WHEN Honker the Goose dropped into the pond of Paddy the Beaver deep in the Green Forest on his way to the Sunny Southland other eyes than those of Peter Rabbit saw him. That clear "Honk, honk, k'honk, honk," with which he had shouted to the world below the message that Jack Frost and Rough Brother North Wind were coming had been heard by many ears. It had reached way in to the den of Old Man Coyote up in the Old

Reddy and Granny Fox had heard that message from the sky and they, too, had seen Honker lead the way down into the Green Forest and had guessed just where he had gone. Red-

dy was for going over there at once, but wise old Granny knew better than "You think you know it all," she said sharply, "but you've got a lot to learn yet, Reddy Fox. It isn't every day that we have a chance to get a goose for dinner, and if it were left to you we wouldn't have any chance

at all. Honker isn't like those foolish geese in Farmer Brown's yard. Oh, my no! You've got to have all your wits about you when you try to catch Honker. In fact, I don't expect that we are going to catch Honker at all, smart as we are. But I do think we may catch one of the youngsters of hom he is the leader, and that will be much better. Honker is old and tough. Perhaps we can catch two. But whatever you do, Reddy Fox, don't go near the pond of Paddy the Beaver until I tell you it is time. Honker mustn't even suspect that we know that he has come." Reddy promised to do just as old Granny Fox said, although he was so impatient that he just had to go down on the Green Meadows and hunt for Danny Meadow Mouse so as to keep from thinking of Honker the Goose and his followers. So it was that Honker and the other geese, of whom he was the leader, went to sleep without hearing or seeing a single thing to make thim anxious or suspicious. And so it was that in the still small hours of the night when those who sleep at night are usually deepest in dreamland stealthy feet trotted softly through the Green Forest toward the pond of Paddy the Beaver, the feet of Old Man Coyote coming from the Old Pasture, and the feet of Granny and Reddy Fox coming from the Green Meadows. (C by J. G. Lloyd.)-WNU Service.

Pioneer New England Textile Mills.

Sanford, Maine. - (Special) - Successful development of a "man-made fur" from mohair fleece by means of a new weaving process has just been announced by officials of Sanford Mills here, birthplace of the American mohair industry and the scene fifty years ago of the invention of the world's first power loom for weaving mohair by the late George Goodall. The new fabric is called "Koongora." While it closely resembles fur in appearance and in other characteristics, it is not an imitation, but has

a distinctive quality and character of its own. It is to be used for the manufacture of men's women's and children's coats and wide demand for the product is predicted as a result of the favorable reception of the few garments already introduced to the trade.

L. C. Chase & Co., of Boston, selling agents for Sanford Mills, have announced that they have appointed M.

A "Koongora." The New "Man-Made Fur" Coat Made From the Fleece of the Angora Goat.

Wile & Co., of Buffalo, N. Y., as exclusive manufacturers and distributors of the men's and boys' coats.

In the opinion of leading textile experts the development of "Koongora" opens up an important outlet for quantities of mohair fleece, it heralds the arrival of an entirely new fabric and suggests an interesting new field for the activities of Sanford Mills, for many years the leading manufacturers of mohair plushes and other mohair fabrics.

To make a fur-like material out of mohair, the well-known fleece of the Angora goat, a special loom had to be invented and special coloring processes had to be developed to give the material its distinctive appearance. Hundreds of experiments were made ore a satisfactory fabric was pro

Purple and High Estate Have Long Association

The word purple came into the language from the Latin purpura, purple. It was used in King Alfred's time, and designated the dress of an emperor or a king. The color was obtained from a mollusk from which the purple dye was derived. Purple is a deep crimson or scarlet color which some people. instead of allowing it to describe the color of blood that is the crimson venous blood, as distinguished from the arterial blood, which is scarlet, associate as a color purple with violet. Purple originally was crimson. By the Middle ages, the term was used to indicate many shades of red, and in our own time, it designates mixtures of red and blue in various proportions approaching to crimson on one side, and violet on the other. He who is "born in the purple" is one of an imperial or royal family, or by extension, of a noble or wealthy family. The phrase in purple, used from 1685, designates the scarlet color of the official dress of a prince of the church-a cardinal.

Violet, as a purplish blue color resembling that of the violet, dates from the time of Sir John de Mandeville, who is stated to have been born in the year 1300, and died in the year 1372. Literary references to the plant antedate this by about a century, for the violet is referred to in the "Tales of Arthur and Merlin."-Literary Digest.

"Wonders" Foreseen by Great Minds Long Ago

Roger Bacon, born in 1214, foresaw the coming of the balloon. He thought that it would be made of very thin metal and filled with liquid fire. It was actually more than 300 years before the first balloon ascent was made, but the first man to rise into the air did so in a fire balloon.

The airship provided with a means of moving against or across the wind was anticipated in the Eighteenth century by Lunardi, who invented a balloon propelled by oars. Even in his day there were those who foresaw that in the future the "oars" would be worked by some kind of engine. The airplane was foreseen with remarkable accuracy by Leonardo da Vinci, who, besides being a painter, was a renowned mathematician and engineer. Wireless was foreseen at least 300 years ago. The Italian writer, Strada, born in 1572, describes an imaginary machine which enabled two friends, no matter how far apart, to communicate with one another. Strada's imaginary process is almost exactly what happens in the most modern telewriter or automatic telegraph transmitter.

Sneezing-God Bless You

The custom of uttering a benediction after a sneeze is universal. Its origin is obscure and each country seems to have its own particular legend concerning it. Among the Romans the belief existed that a sneeze expelled evil spirits. The sneeze, therefore, was regarded somewhat in the light of a lucky effort on the part of the person to rid his system of evil spirits and those present at the time would say, "Good luck to you." There is also an old legend that before the time of Jacob men sneezed only once and then expired. But the patriarch interceded in the behalf of man and obtained a relaxation of this law on condition that a prayer or benediction follow every sneeze. Some writers offer this old legend as an explanation of the modern sneeze benediction "God bless you."

mother somewhere shortly after ten o'clock.

It meant that through all the workaday hours her mother's eyes were on her. It meant they arrived together and they departed together. It meant that whatever secret ambitions lay smoldering in the heart of Estelle for the daughter Rosalinda, for the present, at least, her plans for the future were held in abeyance. Rosalinda was literally under her mother's thumb, as well as her eye. And the girl, sweet and submissive enough at twenty, and at the same time regarding her occupation as only a stepping stone toward the thing her heart craved, submitted because of the peace she realized she was able to afford Estelle.

They were rather a pathetic pair. The husbandless Estelle, the fatherless Rosalinda. There had never been a husband. So far as Rosalinda could remember there had never been a father; just the two of them, playing their humble roles with a certain submission, and yet the younger of them with a quality of rebellion flaming in her blue eyes that had long since died down in the eyes of the older woman.

It was hard to realize, after beholding the loveliness that was Rosalinda's, that this child had kept her innocence to a degree that was perfection. At twenty she lived like a little girl. At twenty, she had never been out in the company of a man without the chaperonage of her mother.

And it had not all been clear sailing. The eyes of men veered quickly to the loveliness that was Rosalinda's. Her presence in a room made them conscious. Seated in her corner behind her cashier's desk, the eyes of Estelle were relentless in their watchfulness.

If ever a girl was protected by the bulwark of fierce loving, jealous, panther-like watchfulness, that girl was Rosalinda.

There was not a recess of the being of this girl that Estelle did not feel herself capable of understanding. As Rosalinda sometimes admitted to her mother, it was as if the older woman sensed, almost before the girl herself, the nature of her ambitions, secret desires, yearnings.

And the secret desires of Rosalinda's were not just those of the average girl becoming aware of her loveliness.

Rosalinda wanted to sing. She

visitors to its walls of recent years. Although its age and builders have been forgotten, it has been there for many centuries, and is one of the best double-moated castles of Europe. Its dividing bulwark of earth on the eastern side reaches almost to the eaves of the structure, and, with its grassclad ramparts, adds immensely to the impression one receives of its ancient formidable strength. It is only restored in part and the visitor can easily visualize its ancient extent and

Altar Overhangs Sea

form.

About 12 miles from Kjoge, in Denmark, is an ancient church in Hojerup, built on the famous Stevns cliff. which has been undermined by the sea. In the Fourteenth century an old sea. rover was threatened with disaster off Stevns cliff, and vowed should he reach land safely, he would build a church on the cliff. Fortune favored him and he fulfilled his vow and set his church on the very edge of the beetling crag, so close, indeed, that the erosion of the rock during the centuries has brought the altar actually hanging over the sea. A legend says that every New Year night the old church "moves a cockstride back from the sea."

Ancient Well Discovered

The discovery of an ancient well during excavations for the terminus of the London Tube railway extension from Finsbury park has revived stories of the notorious ghost of Sir Geoffrey de Mandeville, earl of Essex, who, according to local legend, was drowned in a well at Barnet, in 1144. Sir Geoffrey's ghost is said to haunt the district every Christmas. Frequent attempts have been made to discover this well, at the bottom of which, the legend says, is a heavy iron chest ocntaining precious stones. At this spot is laid the scene of the murder of Lord Dalgarno in Sir Walter Scott's "Fortunes of Nigel."

Reporters to the Rescue

When Isadore Eazle, of Brooklyn. N. Y., was fined \$10 for beating his horse he tried to pay with \$5 and the horse. Magistrate Casey said his court wasn't taking any horses today, thank you. Eazle, after counting a collection of quarters, dimes, nickels and pennies, reported he was 3 cents shy of the necessary amount. Reporters broke the deadlock by presenting the required 3 cents.

"You Think You Know It All," She Said Sharply.

Pasture and he had hastily thrust his head out to look up in the sky. He had seen Honker turn and lead his followers down, down, and finally disappear in the Green Forest.

Old Man Coyote had licked his chops hungrily and grinned as he watched. "They are tired and are going to spend the night in the pond of Paddy the Beaver," thought he. Then he yawned and went back to finish his nap and dream pleasant dreams of a fat goose for dinner. You see he knew that it would be of no use to go over to Paddy's pond until after Honk-

Dog's Warning of Death

While there is a very common superstition that dogs by their wailing can prognosticate death, this cannot be given as a fact, any more than other superstitions. A writer in Chambers' Book of Days, mentioning that the howling of a dog at night under the windows of a sick room is looked upon as a warning of death's being near, adds: "Perhaps there may be some truth in this notion. Everybody knows the peculiar odor which frequently precedes death and it is possible that the acute nose of the dog may perceive this and that it may render him uneasy."

Old Dishes Still Popular

Peacock tongues and humming bird wings may have lost their place on the festive English menu, but medieval dishes still play their part in the true English observance of Lent. In hamlets throughout the shires eating fried peas is a time-honored tradition on Carling Sunday, the fifth in Lent.

Semnel cakes are eaten in Shropshire and Herefordshire on Midlent or Mothering Sunday, the fourth Sunday in Lent, and in Westmoreland ayvers or havers are the rule of that day. Pancakes are in order on Shrove Tuesday and on every successive Tuesday during the Lenten season.

Coffee Production

The regions best adapted to the production of coffee are those between the parallels 15 degrees north and 15 degrees south latitude and from 1,000 to 4,000 feet above sea level. It is cultivated from latitude 25 degrees north to 30 degrees south in places where the temperature does not fall below 55 degrees Fahrenheit. Moist and somewhat shady slopes are found most desirable. Little streams of water are conducted to the roots of trees which are kept very wet until the fruit is nearly ripe, then the water is turned off to keep the fruit from becoming too succulent.

The treaty of Guadalupe Hidalgo, February 2, 1848, conveyed to the United States the territory which has since become the states of California, Nevada and Utah, part of Colorado, and the largest parts of New Mexico and Arizona. Previous to that time. this territory belonged to Mexico. Five years later, the United States purchased from Mexico about 45,000 square miles of southern Arizona for \$10,000.000. Since this treaty, Mexico has remained approximately the same size as it is at present.

duced.

One of the special features of "Koongora" that commends it to wide consumption is its low cost as compared to fur. Thousands of persons will enjoy a warm winter coat this coming season, with practically all the benefits of fur, but at much less expense, as the result of the years of research and the special looms patented by Sanford Mills. The success of the fabric is also of wide interest to the mohair industry in general as it will afford an important outlet for quantities of mohair fleece.

By DOUGLAS MALLOCH

S OMETIMES in summer you will find a lake

No storms disturbs. No rolling billows break

Upon its shore. It is a place of peace.

Yes, here it seems the things that trouble cease

And trouble man no more. No thunders roll Across the sky, across the human soul.

Be not deceived; no lake, however still

But has its winters, as all waters will.

- Sometimes in living someone you may find
- To whom Dame Fortune must be always kind.
- The voice so quiet, dignified the mein, That they remind you of that sylvan scene.
- Pain, grief and anger, they know none of these.
- The little lakes so far from wider seas.

Be not deceived. The calm may have their care.

A greater burden they more bravely bear.

- There is no shelter from the storms of life.
- We do but differ in the way its strife Is suffered, in the way its grief is borne.
- They feel the most who do least loudly mourn.
- The aspen quivers when unmoved the palm;
- In controversy greatness is most calm. And they perhaps may hold the dear most dear
- Who pay the tribute of the unshed tear

Name Traced to Blunder

The designation of a particular varlety of worsted fabrics as "tweeds" is commonly, but erroneously, associated with the Scottish river of that name. The origin of the word "tweed," however, has no reference to the River Tweed, but is said to be due to an error on the part of a London clerk, who, in the year 1826, when writing out an invoice for these goods, inadvertently wrote the word "tweeds" instead of "tweels," the Scottish for twills. Orders were placed for more "Scottish tweeds," a novel description which immediately won the popular favor and became firmly established in the clothing trade as a brand of quality.

What, No Whittlers?

What has become of the old-time whittler, and why his disappearance? A half-century ago almost every man carried a good pocket knife and when he stopped on any occasion he took his knife from his pocket and began whittling. At that time many men carried in their pocket a stick or block of wood known as a whittling stick. It was some soft wood, soft pine and white walnut being favorite timber for whittling. The early settlers greatly enjoyed whittling for pastime, and many of them were real artists with a pocket knife. It is near a lost art.-Milan Republican.

Beauties of Ceylon

For the visitor, Ceylon is an island amazing in its beauty and interest. The native streets are thronged with a gaily-clad multitude. Yellow-robed priests, plodding bullock carts, make a brilliant picture. The Low country is a patchwork of paddy fields and coconut plantations, splashed with vivid tropical flowers. Kandy, the capital, is on the shores of a glistening lake, and the gorgeous Peradeniya gardens (1,600 feet). High in the forest-clad hills is Nuwara Eliva (6.200 feet) amid tumbling waterfalls and mountain streams.

Lesson for August 30

THE MISSION TO CYPRUS

LESSON TEXT—Acts 12:25-13:12. GOLDEN TEXT—For I am not ashamed of the gospel of Christ: for it is the power of God unto salvation to every one that believeth; to the Jew first, and also to the Greek. PRIMARY TOPIC—Paul Starts on a

Great Trip. JUNIOR TOPIC-Paul Begins an Ad-

venturous Journey. INTERMEDIATE AND SENIOR TOP-IC-Missionary Adventures in Cyprus. YOUNG PEOPLE AND ADULT TOP-IC-Christianity at Court.

I. Barnabas and Saul Return from

The Christians at Jerusalem were

in need because of a famine which had

come upon the world. When news of

this reached the believers at Antioch,

they were moved with sympathy for

them, and relief was sent at the hand

of Barnabas and Saul. On their re-

turn from this ministry, they were ac-

II. Gifts of the Church at Antioch

Young as was this new religious

center, it had prophets and teachers.

In Ephesians 4: 8-12 is enumerated the

gifts which when Christ ascended on

high he gave to men for the perfect-

ing of the saints unto the work of

the ministry. Gifts in the Church are

not for the Church itself, but to enable

III. Barnabas and Saul Sent Forth

This marks the beginning of foreign

1. The occasion (v. 2). While the

missions as the deliberately planned

five prophets and teachers were fast-

ing and praying, the Holy Spirit com-

manded them to send forth Barnabas

and Saul. The work of evangelizing

the world was laid so heavily upon these men that they refrained from

eating in order to seek the will of

God in prayer. This is the kind of

fasting that has God's approval. The

missionary enterprise is the index to

the spirituality of a church. The emp-

tiness of missionary treasuries and

the falling off of missionary candidates reveal the unspirituality of the

2. The divine command (v. 2). The

Holy Ghost said, "Separate me Barna-

bas and Saul." The real call to Christ-

ian service comes from the Holy Spir-

it. The Spirit called, the Church re-

sponded by sending out those called

by him. Spirit-filled Christians know

the voice of the Holy Spirit. The Spir-

it called, and the best men which the

Church at Antioch had were sent out.

3. The obedience (v. 3). After fast-

ing and prayer, Barnabas and Saul

were sent out. The men were ready

4. Instant obedience was rendered.

it to perform service for others.

enterprise of the Church.

companied by John Mark.

(v. 1).

(vv. 2, 3).

home base.

to go

Jerusalem (12:25).

to Play on U. S. Liners Boston.-Collegians will be employed to play in the orchestras of ships of the United States lines during the summer months, according to plans being completed by the Intercollegiate Alumni extension service.

Orchestras from the following colleges have already been engaged for the summer: University of Pennsylvania, University of California, Massachusetts Institute of Technology Penn States, Ohio State, Columbia, Fordham, and University of Maryland.

School to Recess So the

Pupils Can Dig Potatoes Bethlehem, Pa .- The Moore township district in Northampton county planned a school schedule to include a two weeks recess during the potato digging season. According to the plan the schools will be opened on August 24, two weeks earlier than usual. When the potato season arrives the directors will close the schools for the two week period to permit children to assist at their homes in digging the potatoes.

Owl "Hypnotizes" Man;

Claws Out One of Eyes Edmonton, Alta .-- "Hypnotized" by a vicious mother owl, which clawed his face and body, Albert Hughes of Wainwright, Alta., was at a hospital here after an operation for removal of his right eye.

"I was walking underneath a tree," said Hughes, "when the owl suddenly fluttered from her nest. I didn't fight back or run. I couldn't. All I could see was those two big eyes. I was hypnotized "

Lipstick Once Classed

With Witchcraft Art London.-Use of lipstick was once a punishable offense in England, according to Dr. Margaret Fishenden, scientific investigator in the department of scientfic and industrial research.

Cosmetics were introduced into England by the knight crusaders, she declared in a radio broadcast on "Chemistry and the Housewife."

In 1780, she said, it was decreed that any woman who should "seduce, or betray into matrimony any of his majesty's subjects by scents, paints or cosmetic washes should incur the penalty of the law in force against witchcraft and that the marriage, upon conviction, should stand null and void."

NATIONAL PARK TO HAVE NOVEL WEAPON

Tourists May See the Ancient Blowgun of Cherokees.

Chicago .--- When Uncle Sam opens up his new national park in the Great Smoky mountains of North Carolina and Tennessee he is going to have within this magnificent playground area a hunting weapon, an "air gun," that cannot be equaled in any other national park in the country, says the Izaak Walton league in a recent conservation bulletin. This peculiar gun is none other than the blowgun, that primitive, nine foot, hollow, tube-like weapon through which the Cherokee Indians blow 18inch arrows "feathered" with thistle down. Some of these quaint old weapons which are nine feet long and which have counterparts among the savage tribes of South America and the South seas, still can be found in the possession of the Cherokee Indian nation living in western North Carolina. The reservation of this tribe is in the heart of the picturesque Smokeys where the Cherokees live in roughhewn cabins, till the valleys and mountain slopes and hunt. Campers, fishermen, automobile tourists and other outdoor fans who want to see one of these curious old-style guns which depend on lung power and a good "blow" instead of on gunpowder for its force, can do so by driving from Bryson City, N. C., to the Indian town of Cherokee in the heart of the reservation. Several of the old Indians, champion blowgunners of former days, usually can be induced to domonstrate the shooting power of the blowgun which originally was used to kill small game.

SPECIAL NOTICE

Three Thousand Persons Answer Call for Antique Upholstery.

Mohair-upholstered furniture, considerably more than a century old, still in good conditions and that has been in daily use since the time of its purchase, has been discovered by the Household Science Institute of Chicago, in response to a prize offer of \$250 for the oldest piece of furniture covered in mohair.

Since the day the contest opened, interesting reports and descriptions of old pieces of furniture have been pouring into the Institute offices and now a staff is engaged in sorting over the contestants. The contest closes October 1. One sofa entered in the competition is claimed to be at least 200 years old; a chair, one of a set purchased by a bride and groom before the War of 1812, is another interesting entry and there are several articles reported to be at least a century old.

Red was the predominating color in olden days, the samples submitted show, but occasional green ones are entered, suggesting that the modern love of color variety and the preference for "cooler" shades had its beginning many years ago. Along with the mohair entries, many of horse hair were received. Unfortunately for the contestants who submitted horse hair, they will not be eligible for the prize, as the winner must submit mohair, the hair of the Angora goat.

To date, more than 3,000 entries have been received. Practically every state in the Union has been represented. The most likely claimants for the prize so far are from the East where fine furniture used in the early days and imported from abroad is still the cherished possession of the household.

The Old Gardener -----Says:-

FORGET-me-nots may be old-fash-ioned but they have never lost their popularity, and are prized for growing under tulips and other early flowers as a ground cover. The seeds can be sown in the open ground but it is better to use a cold-frame. In either case, a light protection will be necessary when winter comes. When they have once been established, forget-me-nots often self sow but gradually deteriorate, for which reason it is well to start new plants frequently. Forget-me-nots like a little shade but will grow almost anywhere and are not out of place in a rock garden. The kind that commonly grows in swamps has only a short blooming

Busy Boston Streets

Built Over Gravevard

Boston. - Millions of pedestrians have traversed School street, in Boston's business district, during the last half century without realizing that beneath them was a tomb.

Workmen engaged in excavation work near King's chapel dug into the hidden burial chamber which was found to hold several skeletons. A coffin plate discovered in the vault hore the inscription "Francis Gray, 1861."

The records of the historic chapel, dating back to 1749, contained no reference to the tomb. It is thought the tomb originally was on the chapel lawn and is now under the sidewalk because of a long ago re-location of School street.

Larger Crop of Wool Is Forecast for 1931

Washington .- Production of wool in the United States this year is expected to surpass last year's because of the increased stock and more favorable weather conditions, the bureau of agricultural economics here announced, but the world's wool crop is expected to be smaller. This, it was pointed out, will increase the value of domestic wool clips.

Wool production in the southern hemisphere fell off from its abnormally large supple of last year and is now just below normal, the bureau said. The wool production of the British possessions continue slightly above normal.

Railroad Has Shower Baths for Locomotives

New Haven, Conn.-Shower baths for locomotives are now provided by the New York, New Haven and Hartford railroad. An automatic locomotive washer installed at the entrance track at Cedar Hill engine house sprays the locomotive with a hot cleaning solution at close range under 100 pounds' pressure, each bath

requiring only 40 seconds.

When a Burman Dies

When a Burman dies, his soul is supposed to be so disappointed at leaving this life that it becomes a demon, lives in a tree and must constantly be given presents of food and drink if it is to be prevented from wreaking its evil will upon the people of the neighborhood.

Life's Prime, the Years

Between Youth and Age At what age is the average man or woman in his or her prime of life? is often asked, and what is the average length of life?

The prime of life, says the Cleve-land Plain Dealer, is the period of full vigor and power, that which succeeds youth and precedes age.

The average length of life in the United States, according to estimates made by the United States public health service, is fifty-six years. Statistics indicating the expectation of life place Australia at the head of the list with an average length of sixtyone years. New Zealand comes ond, with an average expectation of sixty years. The average expectation of life at birth in various countries, according to the United States bureau of the census, is as follows: Denmark, Norway and Sweden, fifty-seven years; England, fifty-three years; Holland, fifty-two; Switzerland, fifty-one: France, fifty; Germany, forty-six; Japan, forty-four and India, twentythree. Statistics also show that females have a greater expectation of life at birth than males.

Those who have received the Spirit's call are not taken by surprise when they are commissioned by the Church. There should be no holding back on the part of the Church, nor of the workers when the Spirit calls. By the workers when the Spirit calls.

IV. Preaching the Word of God in Cyprus (vv. 4, 5).

We are not told as to why they first went to Cyprus, but we are left to infer that it was owing to the fact, that Cyprus was the home of Barnabas. He was acquainted with the country and the people and could be thus assured of a respectable hearing among them. Besides, it was most natural that those who had heard the good news go first with it to their kindred and friends. Andrew first went to his brother, and the man out of whom the demons were cast was denied the pleasure of following Jesus in order that he might go and tell his kindred. As they went forth they carefully carried out their commission, for they preached the Word of God. Those who are faithful to God will preach nothing but his Word. The great need today is Spirit-called and Spirit-filled men preaching God's Word

V. Withstood by Elymas, the Sorcerer (vv. 6-12).

Sergius Paulus, the deputy, invited Barnabas and Saul to tell him of God's Word. Elymas maliciously sought to turn his mind from the faith. . He sought to bar the gospel as it entered upon its mission of converting the heathen. Paul came to the front and denounced Elymas in the most scathing terms. He called him the child of the Devil, denouncing him as full of guile and villainy, pronouncing him the enemy of all righteousness, and accusing him of perverting the right ways of the Lord. Surely a man is never more a villain than when he tries to turn a soul from God.

God Does Not Forsake Thee Suppose that all men forsake or forget thee; God does not. His eye sees thee, his heart feels for thee, and his hand is able to deliver thee. Thou art not friendless, nor wilt thou be till the God of all consolation dies .--Charles H. Spurgeon.

The Resurrection-Life

It is the resurrection-life that is the truest as well as the highest form of life; the surest as well as the most glorious immortality; it admits of no reversal and no decay .--- H. Bonar.

Asked If He Wants to Go to Jail, Mute says "No"

Seattle .- William Leonard, twentythree, was taken to Police court, charged with begging. He professed to be deaf and dumb. Court attaches tried various ruses, attempting to make him talk, but all failed until Judge John B. Gordon suddenly caught his eye and asked, "Do you want to go to jail?" Leonard quickly replied "No." He was escorted to a cell.

Petrified Rattlesnake

Found on Mountain Westfield, Mass.-Evidence of what may have been a prehistoric rattlesnake has been found on Mount Teko.

The apparently petrified reptile appears on the face of a cliff a score of feet from the nearest footpath. Scientists who have viewed it estimate that it was about seven feet long and four inches in diameter.

SINGLE SCULLS CHAMP

William G. Miller of the Bachelors Barge club of Philadelphia who won the national championship in the single sculls in the fifty-ninth annual championship regatta on the Schuylkill river course.

GIGANTIC SWINDLE PLOT BROKEN UP

Millions Were Involved in Fake Sweepstakes Lottery.

Boston .- A huge lottery swindle in which residents of the United States, Canada and Mexico would have been robbed, it is said, of \$2,500,000, was believed to have been smashed recently by a police raid on a luxurious suite of offices.

Boston, because of its large Irish-American population, had been chosen as headquarters by the swindlers who purported to represent the Irish Free State government in a hospital charities sweepstakes on the Cambridgeshire to be run at Newmarket on October 28.

A cablegram received from Dublin informed the police that the Irish government is not planning a sweepstake on the Newmarket race and that the last authorized was on the derby at Epsom Downs in which Joseph Kennedy, a Boston negro, won \$145,000.

A squad of police inspectors is looking for Thomas O. Mahaney, self-styled diplomat and representative of the Irish government, who had ordered 180 plates from an engraving firm in the name of the free state.

The first batch of tickets, selling at ten shillings (\$2.50) each, has been distributed in Worcester, Springfield and other New England cities and in New York.

It is believed that thousands of dollars have been collected for the worthless slips.

The police are on the trail of a well-known Boston gangster, formerly prominent in the defunct "Leader" pool, who is believed to have assisted in arranging for distribution of the tickets.

TANEYTOWN LOCALS

Items of news from town, or vicinity are always wanted for this column. Especial-ly accidents, sales of real estate, ares, im-portant happenings, visits to or from the community social events, and all matters of general interest to those at home, and away from home. This column is not for use in advertis-mer, party er sale; except for non-denomi-national charities or special benefits. Fire Company or Public Library support, Churches, Lodges, Societies, Schools, etc., are requested to use our Special Notice partment for money-making events.

Miss Percy Adelaide Shriver is spending a few days with friends, in Wildwood, New Jersey.

There is at least one business that is not suffering from unemployment, or business depression, and that is, well drilling.

Clarence Emmitt Shank, son of Mr. and Mrs. Clarence I. Shank, is in Kernan Hospital, at Hillsdale, Md., after spending ten days with his unfor treatment.

Last Sunday was a day of abnormally cold rain and cold wind-a Fall day, ahead of schedule, and not an agreeable specimen, at that.

Mrs. Grace Roberts and children have returned to their home in St. Louis, after spending several months with her parents, Mr. and Mrs. B. H. Slick.

Mr. and Mrs. Tolbert Shorb, near town, and Mr. and Mrs. John Sauble, of town, spent the week-end with Mr. and Mrs. Henry Bertrem, at Catonsville.

Mr. and Mrs. Edgar Yount and daughter, Helen, of Tampa, Florida, left for their home on Monday, after spending two weeks with relatives and friends here.

Last week, our office had a brainstorm resulting in a lot of minor errors, typographical and otherwise, one of which was the name of Dr. Carroll Koons, instead of Dr. Earl Koons, in a local notice.

Visitors at the home of Mr. and Mrs. James Rodgers, near town,dur-Mr. and Mrs. John Brown, of Union Bridge; C. Kenneth Hawker, of Dayton, Ohio, and Harry Miller, of Hanover.

Mervin Wantz, near town, in his crop of cantaloupes, had a monster specimen that weighed 141/2 pounds and measured 32 inches in circumference. This is one of the "can you beat it" variety. A specimen presented to the Editor, was of excellent flavor.

lavor. Mrs. Clara S. Englar and daughter, Miss Lottie, of Westminster; Charles E. Englar and wife, of Harrisburg, nd Clayton H. Englar, wife and son, Nay, of Baltimore, were entertained Miss Lottie, of Westminster; Charles E. Englar and wife, of Harrisburg, and Clayton H. Englar, wife and son, Clay, of Baltimore, were entertained at dinner, at Sauble's Inn, last Sunday, by Mr. and Mrs. P. B. Englar and

Rev. H. A. Quinn, of Baltimore, was the guest of Joseph A. Hemler and sister, on Monday.

Miss Kathryn Stuller was the guest of Miss Mildred Baumgardner, several days last week.

Mr. and Mrs. John Marker, Littlestown, spent Sunday with Mr. and Mrs. Merwyn C. Fuss.

Archie A. Crouse has returned home from an extended business trip through the far South.

The I. O. O. F. Band will give a concert on Saturday evening, at 8:00 o'clock, near the square.

T. H. Tracey, Agent P. R. R., has been chosen as Secretary of the Chamber of Commerce to succeed Prof. J. Kellar Smith, removed to Mt. Airy.

Elwood Crabbs has returned home cle and aunt, Mr. and Mrs. Earl Crabbs, in a cottage along the Magothy River.

Mr. and Mrs. David Mehring, Mr. and Mrs. Norman Baumgardner and daughter, Mildred, were the guests of Dr. and Mrs. Wilbur B. Mehring, at Silver Springs.

Mrs. Belle F. Carson and Mr. and Mrs. G. E. Baker and son, Carson, of Connellsville, Pa., left this morning. after a visit at the home of Dr. and Mrs. Francis T. Elliot.

The Chamber of Commerce, on Monday night decided to hold an afternoon's outing, for its members and their families, on Labor Day, at Cleve Stambaugh's, near Harney.

Attention is callen to the announcement in this issue, of the new state law that has advanced the age of compulsory attendance at school of children, from thirteen to fourteen years. This will likely be of importance to many parents-especially to those who disliked the former law.

Fairfield will again play Taneytown on the High School ground, this Saturday afternoon. These teams ing the week were: Mr. and Mrs. have contested twice this season, both Wilmer Myers, of Pleasant Valley; times by a score of 8 to 7 in favor of Taneytown. The teams are pretty evenly matched, and this time Fairfield will try hard for the big end of the score. Come and see the game!

HANOVER 2-TANEYTOWN 1.

The score of the game last Saturday between the Fleetwings, of Hanover, tells the story of a good game in few words. It was largely a battle between two good pitchers accompanied by but few errors. The visitors are

times and five first base gifts were given. It was due to his efficiency that the score was held to its small proportions, and in addition he made two of

The only bake-oven reported to us as being in regular use now, is on Hanover the farm owned by Mrs. Ida B. Koons, tenanted by Mr. and Mrs. Samuel Clingan. They have used it very successfully for the past twenty-six years, and it was quite old when they commenced using it.

A letter to the Editor from Prof. J. Keller Smith, says, "We shall never forget the two very pleasant years we spent in Taneytown. You people 1 Box Puffed Rice were so kind, and we felt we knew | 1 Small Pleezing Oats you all our lives. We enjoy The Rec- Small Can Tomatoes ord very much, and like to look over 2 Cans Pleezing Pork and Beans 17c the Local column to see what our 1-lb. 7-day Coffee friends are doing. I am feeling very Cream Cheese good and do nothing but eat, sleep 3 Packs Pleezing Corn Flakes and rest."

The schools will open for the year, on Monday morning, Sept. 7. The at- Fresh Cured Shoulders tention of the parents who have chil- Chuck Prime Steer dren entering school for the first time, Steer Three-corner Roast is called to the state law which re- S-K Franks quires that no child can be enrolled in Sliced Bacon the public schools in Maryland, until Pure Lard it has been successfully vaccinated. School buses will make their run Monday morning, September 7, at about the same time as last year.

George W. Galt discovered, last Saturday two large insects, shaped something like a grasshopper, and of much the same coloring. They were likely what is called the Mantis-or sometimes the "praying mantis" because its position is usually with front legs folded as if praying. They sometimes attain a length of four or more inches, and are said to be perfectly harmless to trees, foliage, or persons.

Complaints have recently been heard of a "faker" who visited town and took away a lot of money from the "easy" onlookers, in a sort of flim-flam game. It would be a fine thing if the town authorities would high-license all patent medicine and other street orators, or prohibit them entirely. It is true that the public should stay away from such schemes; but "lead us not into temptation" is a better principle, and it is hardly fair, for the sake of a small license fee, to turn the tempers loose on the public.

NEVER DODGE DUTY

Some may shun difficulties and take the easiest way around obstacles. But doing one's duty well is the surest way to achieve results. Your account is invited.

DON'T STOP FEEDING GROWING MASH TO YOUR Pullets until they are fully matured and are beginning to lay. To do so will result in great loss of profits for you,

When Pullets are fed Laying Mash before being fully matured they start to lay early and when you should be get-ting plenty of high priced eggs, they break down under the laying strain and go into a neck molt.

Keep feeding Growing Mash until your Pullets are fully developed and they will keep on laying, once they start. Don't be penny wise and pound foolish. Keep feeding Growing Mash.
