VOL. 41 No. 14

TANEYTOWN, MARYLAND, FRIDAY OCTOBER 5, 1934.

\$1.00 PER YEAR

Items of news from town, or vicinity are always wanted for this column. Especially accidents, sales of real estate, fires, important happenings, visits to or from the community social events, and all matters of general interest to those at home, and away from home.

This column is not for use in advertising any money-making program, fair, supper, party or sale; except for non-denominational charities or Fire Company or Public Library support.

Churches, Lodges, Societies, Schools, etc., are requested to use our Special Notice Department for money-making events. 99

Dr. Thomas F. Vestal, of Winston Salem, N. C., spent the week-end with Mr. and Mrs. B. B. Chenoweth.

Frost, on Tuesday morning, gave notice that winter is just around the corner, and that it is time to prepare

The "World's Series" opened on Wednesday afternoon, and radios were generally in operation for the enjoyment of fans. Mrs. Margaret Stott and Miss Anna

Galt were the guests of Dr. and Mrs. Milton H. Valentine, at Gettysburg, on Wednesday.

Mr. and Mrs. Cage Myerly were entertained at dinner, on Sunday, at the home of Mrs. Lizzie Zepp and family, Mill Avenue.

Mr. and Mrs. William E. Shaw, who have been spending the Summer in Thurmont, returned to their home in Baltimore, on Monday.

Mr. and Mrs. Edgar Carter and son. Charles, of Brunswick and Mr. and Mrs. Vernon Long, of Frederick, spent Sunday with Mr. and Mrs. Lewis Boyd

Miss Rose Smith, of Gettysburg; Miss Janet Burke, Mrs. Percy McIl-wain and William E. Burke, Jr., left on Wednesday to spend a week at the World's Fair.

Mrs. Mary Stover, Mrs. Sarah Albaugh, Miss Mary Koontz and Mr. and Mrs. Vernon Crouse, spent Sunday with Mr. and Mrs. James Florence, at Waynesboro, Pa.

The twice postponed game of base-ball between Union Bridge and Fred-erick teams, is again scheduled to be played at Union Bridge, this Saturday afternoon, at 3 o'clock.

The Shriner Sewing Factory opened, on Monday, much to the gratifica-tion of many who find employment there. More employment, is always good news that we like to mention.

The annual school supper, sponsored by the Patron-Teachers' Association of the Taneytown High and Elementary Schools will be served on Thursday, November 1, from 5 o'clock

Rev. Guy P. Bready with Edgar H. Essig, as delegate, attended the Classis of Md. of the Evangelical and Re-

An error occurred last week, in giving the classes in which students entered Western Maryland College from Taneytown. Miss Mary Isabel Elliot should have been named as returning to the Junior class, instead of entering the Freshman class.

Callers at the home of Mrs. Margaret Stott and Miss Anna Galt, on Monday were: Dr. and Mrs. M. H. Valentine, Mrs. John Blocker and Miss Annie O'Neal, of Gettysburg; Mr. and Mrs. Harry Seigrist, Philadelphia; Dr. and Mrs. J. T. Huddle, of Washington, D. C.

Mrs. Clara Pittinger, of Johnsville, and George Benner, of McKaig, Md., spent Monday with Dr. and Mrs. C. M. Benner and family. Dr. C. S. Basehoar and grand-son, William Basehoar, of Carlisle, Pa., and Mr. Oyler, of Gettysburg, visited at the same place on Sunday. same place, on Sunday.

Mr. and Mrs. Paul Hartman, daughter, Evelyn, sons Paul, David and William, of Landsdale, Pa., spent the week-end with Mr. and Mrs. William G. Little, East End. Miss Evelyn, who recently underwent an operation for appendicitis, remained to spend some time with her grand-parents, Mr. and Mrs. Walter Snyder and son, of Gettysburg, spent Sunday at the same place.

Mr. and Mrs. Roger Smith, daughter, Mildred, and son Robert, York, spent Sunday with Mr. and Mrs. Roy Kebil and Franklin Bowersox. and Mrs. Harry Bowersox and Mr. and Mrs. Deuward Bowersox, Washington, and Mr. and Mrs. Reuben Zeigler, York, visited at the same place the past week. Mr. Bowersox, who had been confined to bed suffering with Lumbago the past week, is

George A. Arnold returned on Tuesday, from his week-end trip to the home of his son, Vincent, in Detroit. He had a lot of interesting experiences and wasted no time. On Sunday afternoon he visited Dearborn and the Henry Ford museum and collection of antiques, that in itself is worth the cost of the trip to see. He also found time to pay our good old friend, John Reid, a visit, and have a good talk with him over things in general, and and found the family getting along well considering all conditions. In he had a very worth-while trip, including air-conditioned train service from York to Detroit, the very per-

fection of modern travel. (Continued on Eighth Page.) DISTRICT S. S. RALLY.

To be Held in Lutheran Church this Sunday Night.

The annual adult Sunday School Rally of Taneytown District, will be held in Trinity Lutheran Church, this Sunday night, at 7:30. The speaker of the evening will be Mr. N. Hadwin Fischer, who is professor of Religious Education at Gettysburg Seminary.

The St. Matthew's Male Chorus, of

Hanover, will furnish special music. This Male Chorus is composed of Messrs Curtis Spangler, Stanley Gilbert, Paul Biddle, Harry Slagle, Oscar Dell, Paul Gobrecht, Irvin Hamm, Ray Markle, Isaac Miller, George Schildt, George Meckley, James Carr, Raymond Altland, Samuel Serff, Mau rice Swartzbaugh, Rush Little and Thomas Bankert. The pianist is Les-ter Hamm, and the Director is H. M.

Merwyn C. Fuss will preside during the program. The scripture lesson will be read by Robert S. McKinney; Prayer by Rev. Guy P. Bready; Rev. Olen Moser, will make the report of the nominating committee, to be followed by the election of officers. The installation services will be in charge of Rev. A. T. Sutcliffe.

The present officers of the District Union are: Merwyn C. Fuss, President; Elder Birnie L. R. Bowers, Vice-President; Miss Eleanor Birnie, Secretary, and Frank E. Crouse, Treasurer.

#### THE THOMAS W. REINDOLLAR ESTATE.

Attorney R. E. McDonald, of the law firm of McDonald & Saltsman, Carrollton, Carroll County, O., was in Taneytown the first of this week making up a list of possible heirs to the estate of Thomas W. Reindollar, who recently died, intestate, in Carrollton, leaving an estate estimated to be worth from \$25,000 to \$30,000. debe worth from \$25,000 to \$30,000, depending on present market values. He made it clear that Mr. Reindol-

lar was held in the highest esteem in Carrollton for his many fine qualities. That he was always very modest, industrious and faithful to all trusts, and in general, a dependable

The settlement of his estate will of course be under Ohio state laws, and the status of numerous possible heirs will be carefully examined, and determined after the fullest possible in-

vestigation.
Mr. McDonald was much pleased with our Carroll County, and remarked on its evident fertility as well as the pleasing scenery furnished by its hills and valleys. He visited Westminster, New Windsor and Union Bridge, while here.

### P. T. A. TO MEET.

The first program of the Patron-Teacher Association, of the Taney-town schools will be held in the school auditorium next Thursday, October 11, at 8 P. M.

sing one number Miss Estella Essig is in charge of the music. The public is cordially invited to attend.

#### WHY NOT VISIT MONTICELLO, FLA., AND "THE DIXIE?"

Mrs. Ethel Moline, nee Sweigart, formerly of Keymar, in the proprietor of The Dixie Hotel, Monticello, Flori-da; and Mrs Nellie Cover Phleger. of Brunswick, also formerly of Keymar, who is at present visiting the Dixie, writes The Record that she thinks it is about perfect in all of its appointments for all visitors, and that those who come to it, want to stay "on and on forever" like the poetic fancy over "The Brook."

It is described as "peaceful, restful and delightful" and that "the rates are too low"-a complaint not often heard concerning Hotels of any kind. Of course, we are advising Mrs. Mo-line to "advertise" in The Carroll Record, as many Carroll Countains visit Florida during the winter months— and why not Monticello, and a Hotel conducted by a former Carrol! Coun-

As a first grade recommendation, the Governor of Florida, has unqualifiedly indorsed The Dixie as deserving of the best that can be said about it.

### A SIGNS OF THE TIMES.

The inc eased sale of Justice's blanks by our office, indicares increased business by Justices throughout the state, and this in turn indicates that more persons are in trouble, financially, or with the laws, to a greater extent than usual.

The increase in sales applies largeby to Warrants of various kinds. Bonds, Attachments, Distraint for rent, Commitments, Liquor law violations, Motor Vehicle Law Violations, Recognizances, Summons, Notices to quit tenancy, Judgments, etc.

#### A FREE PICTURE SHOW AT NEW WINDSOR.

Senator J. David Baile, President of the Medford Grocery Company, gave a free picture show to the people of New Windsor, at the Brown Theatre, Saturday night, Sept. 22.

Through the kindness of Senator Raile a highly appropriation

Baile, a highly appreciative audience, filling the house to capacity, witnessed a showing of "A Century of Progress" in all its glory, and the "Making of American Fence Wire." Those who availed themselves of this opportunity are very grateful to Senator Baile for his hospitality.

# AUTOMOBILE CLUB FOR \$2.00 AUTO TAGS.

### Questionnaire sent to all Candidates for the Legislature.

The Automobile Club of Maryland, has sent the following communication to all candidates for legislature. We give it space for the information it carries to the public at large, and in next week's issue we may comment

editorially, on the subject.

"Dear Sir: You are candidate for the House of Delegates. We believe that the motoring public by the display of thousands of stickers, stating "We Want \$2.00 Tags" has demonstrated its interest in reduced motor vehicle taxation. The Automobile Club of Maryland for thirty-one years Club of Maryland for thirty-one years has been representing the welfare of the riotorists, as a non-profit and non-political organization, and has backed this campaign, because we feel the motorist is entitled to consideration. Today the motorist pays a tax four times greater than that of the real estate owner on the use and average value of their respective

The mere statement that the motor-The mere statement that the motorists are over-taxed and need your support, may not of itself appeal to you, and we enclose a brief statement of the history of a repudiated agreement which we feel should be of interest to any candidate for public office. We ask that you read this history hefers one warring our question tory before answering our question-naire. If you wish further informa-tion on this subject, we assure you our files and minutes are open to your

personal inspection.
In order that we might report to our own members and the motoring public at large how you stand on this question, we would appreciate your mailing the questionnaire back to us with your advice at the earliest possi-

# Very truly yours, BOARD OF GOVERNORS. HOME-COMING SERVICES AT

LINWOOD. The twelfth annual Home-coming service will be held at Linwood, Oct. 14th. There will be three services: one at 10:30, one at 2:30 and one at 8:00. These services are being more largely attended each year and this year promises to be no exception. Folks from many places and from different sections of the country meet here to meet old friends and make new ones. The programs in the past have been of a high order, but this year promises to make new high record. The speakers and singers are the best obtainable, and granted a fair day and it 8:00. These services are being more tainable, and granted a fair day and it is rather certain that capacity audiences will greet the singers and speakis of Md. of the Evangelical and Reformed Church, which was held in the Lazarus Reformed Church, at Lineboro, on Tuesday.

Mr. and Mrs. Milton Brown, Mr. and Mrs. Theodore Brown, of Hanover; Mr. and Mrs. Wilmer Myers and children, of Pleasant Valley, were Sunday visitors at the home of Mrs. Emma Rodgers.

Madutorium next Thursday, October 11, at 8 P. M.

The program will be as follows: a one-act play entitled, "What'll You Take." This play will be presented by the Junior English Class under the direction of Miss Helen Eckard.
Charlotte Hilterbrick and Homer Myers will give declamations. They have been coached by Miss Dorothy Kephart.

The Boys' and Glee Clubs will cash.

The Boys' and Glee Clubs will cash.

The Boys' and Glee Clubs will cash.

The program will be as follows: a opecial music, Linwood Choir; solo, Mrs. Truman Dayhoff; music, Congregation; sermon, Dr. Yoder; 2:30, solo, Ross Heltebridle; instrumental music, the Hartzlers; duet, Mrs. M. J. Crogan and Mrs. Sherman Bowers; address, Hon. Chas. E. Moylan; solo, Ross Heltebridle; five minute talks by various pastors. five minute talks by various pastors and others; duet, Mrs. M. J. Crogan and Mrs. Sherman Bowers; instru-mental selection, by the Hartzlers.

mental selection, by the Hartzlers.
8:00 P. M., selection, Linwood choir;
solo, Mrs. Yoder; Congregational selection; address, Theo. McKeldin, one
of the most popular and brilliant lawyers from Baltimore; duet, Mrs. Crogan and Mrs. Sherman Bowers.
The afternoon speaker is a practicing atterney from Baltimore, is judge

ing attorney from Baltimore, is judge of the Federal Tax Court in the city of Baltimore, a graduate of Western Maryland College, and is president of their Alumni Association. A cordial invitation is extended to all to come and bring well-filled baskets, and enjoy a full day of real pleasure. An effort is being made to have the choir of twenty-five years ago sing some of the same selections they sang then. Come and hear them.

# J. L. BOWMAN. CAMPAIGN IMPARTIALITY.

During the strenuous political cam-paign that will continue until Election Day, we must again remind candidates and others that The Record is not a political newspaper, and does not boost the candidacy of anybody in either party. All candidates may have use of our columns for advertis ing, but not for free publicity, except that having a very distinct news val-ue—and as little as possible of that. Our aim is to be impartial and fair to all.

### COMING COUNTY FAIR.

The Frederick Fair will open next Tuesday, for four days, and the Hag-erstown Fair will be held during the reek of October 16 to 20th, inclusive. Both of these Fairs are large and us ually attract many exhibitors and visitors. Interesting free performance will be given at both, as well as the customary racing events.

### THE ENGLAR REUNION.

The Englar family reunion will be held, this Sunday afternoon, at Pipe Creek Church of the Brethren. There will be a regular church service at 11 o'clock, followed by a luncheon, and the reunion program will commence at 1:30 prompt. Samuel L. Englar, Baltimore, is president of the reunion There will be solos by the well

known barytone, John A. Englar, Jr., Baltimore, several short addresses, some new family history data, and other interesting features, with ample time for informed social greetings. A general attendance of members of the family and friends, is re-

## SENSIBLE ABOUT PROHIBITION Will be the Topic at a Mass-meeting

Dr. Albert Edward Day, pastor of the Mt. Vernon Place M. E. Church, Baltimore, will address a mass-meet-ing at the M. E. Church, Westminster, on Monday evening, October 8. Dr. Day's subject will be "Can we be sensible about Prohibition," Dr. Day is one of the outstanding pulpit men in America, and he will have a message to the people of Carroll County that should be heard with delight and ben-

George W. Crabbe, Superintendent of the Maryland Anti-Saloon League of Maryland will also make a short talk. This meeting will be of special interest to Carroll County because of the vote to be taken at the November election, on whether or not Carroll County shall become local option ter-

We do not, as yet, have exact information as to whether this vote will be taken on a separate ballot, or on the regular ballot. At any rate, the vote will be taken, which makes this meeting one of county-wide interest.

## WATCH OUT FOR PEDESTRIANS!

Here is something that every automobile driver should keep constantly in mind: The pedestrian must always be given the right of way. He is, by comparison with the motorist, in a precarious position—when a crisis occurs, his only chance to escape unharmed often depends upon the driver of the car which is in danger of running him down.

danger of running him down.

The pedestrian accident toll constitutes one of the worst phases of our disgraceful automobile accident record. In 1933, 37.14 percent of all motor accidents involved pedestrians. These accounted for 30.83 percent of all injuries, and 44.95 percent of all deaths—showing that when a pedestrian is in an accident, the chance of his being billed is greater than in any

his being killed is greater than in any other type of automobile mishap.

This year the automobile fatality record is rising over the 1933 level, and if the present trend continues the death toll will reach a new high. And, death toll will reach a new high. And, as usual, the pedestian continues to get the worst of it. There is a legion of motorists who believe that as soon as the "go" light flares they are entitled to dash across an intersection, whether or not people on foot are still in it. It is an interesting commentary on this that the courts have held that once a pedestrian has stepped into a street under traffic light protection, he is entitled to a safe pasprotection, he is entitled to a safe passage across, whether or not the light

changes.

Every automobile driver should regard pedestrians as being his personal responsibility. You may save a fraction of a second by dashing across intersections thronged with pedestrians—but is it worth it in view of the fact that that "saving" may cost a life?

### THE "NEW STAMP" NUISANCE.

And so, as the newspapers say, we age stamps. Let us hope that they will be mere "stamps" and not posters. It is an imposition on the relationship. are to have another new issue of posthave so many changes in design of stamps, but it is a real nuisance to expect us to "lick" the recent monstrosities, and puzzle our brain to select a one-center from the twocenter or three-center, in our stamp

Of course, most well informed persons know that "it pays" the government to get out new designs frequently, because of the "stamp collecting" fad; but there is real danger in making the "fad" so costly that it may be driven out of the list of industries

But, that is the way of things now in many directions. There is a deep down—if not "low down"—hunt for ways of making us part with our little cash income, in order to bring prosperity from "around the corner" where it is still anchored, or stuck

And this plan of causing it to come, 1 cent, 2 cents, or 3 cents at a time, does seem to be about the limit of patient endurance. Let us get back to standard stamp sizes, at least, and thereby save the necessity for a more active secretion of saliva.

#### WOMEN'S MISSIONARY SOCIETY TO MEET NEXT WEEK.

The 52nd. annual convention of the The 52nd. annual convention of the Women's Missionary Society of the Maryland Synod, United Lutheran Church, will be held next Tuesday, Wednesday and Thursday, in St. Paul's Lutheran Church, Baker and Longwood Streets, Baltimore, Rev. Lohn B. Rugley, pagety. John B. Rupley, pastor.

Duly credentialed delegates are ex-

Duly credentialed delegates are expected to be present from the entire area of the Synod. Registration will begin at 3 P. M, on Tuesday. Supper will be served at 5 o'clock, and opening services at 7 o'clock.

### ORPHANS' COURT PROCEEDINGS

Monday, October 1st., 1934—Margaret E. Hull, administratrix of Maurice W. Hull, deceased, returned inventory of personal property and received order to sell same.

Theodore F. Brown, administrator d. b. n. c. t. a, of Reuben Cassell, deceased, reported sale of real estate on which the Court issued an order ni si. Mary Alberta Bitzel and Edward Francis Bitzel, executors of Frederick W. Bitzel, deceased, settled their first

and final account.

Tuesday, Oct. 2, 1934. Theodore F.
Brown, administrator d. b. n. c. t. a.,
of Reuben Cassell, deceased, reported sale of personal property.

Approximately 95 per cent of the world's population is located north of the equator.

## By Proclamation of the President and State Governors.

Next week is "Fire Prevenuon" week. Naturally, the question is asked by individuals—How can I help? A good general answer is—Use your head, and good commonsense. But, we will be more specific.

1. Suppose you live in town, under protection of a Fire Company. You can help by, not maintaining "chimney corners" filled with kindling or rubbish. If you have such a chimney not now in use for a fireplace heater, see that the upper part of the chim-ney has a metal cut-off placed in it, below pipe holes for stoves on first or

Do not keep ashes in wooden containers, nor permit them to accumulate anywhere indoors in large quan-

late anywhere indoors in large quantity.

If you must use gasoline for cleaning purposes, always do so out of doors. Even empty gasoline cans indoors are a danger because of the gas they produce. Keep all gasoline containers in safe places preferably in ventilated buildings away from dwellings and barns. Keeping it in a tight closet is the very worst place.

Do not be careless with matches but keep them in regular places, and away from children.

See that all chimneys are kept clear

away from children.

See that all chimneys are kept clear of accumulated soot. The older the chimney the more likely it is to be dirty. A small pine bush, with a rope at each end, is a fairly good swat if pulled up and down the chimney.

Be careful not to burn large quantities of light wood, or trash, in any chimney on a windy day. In case a chimney catches on fire, throwing salt in the stove in considerable quantity, may smother out a fire by the gas generated.

"Wash houses" are prolific causes of fire. If you use one, see that it is always in safe condition, not crowded with combustibles, and when there is a fire in such a chimney, watch it

Do not permit chimney tops to become cracked, with motar spaces op-en. Have all bad chimney tops re-built with bricks laid in cement. Often the attic, or garret, of a house, is the most dangerous portion of the house. See that no cracks are left unattended to. Always have on hand several large

buckets, and know where to find them, in case water is needed quickly. If you live on a farm, observe all of the above precautions, and the follow-Avoid out-door fire-places if at all

Avoid out-door fire-places in at an possible. Never be careless in their use and keep them as far from buildings as possible.

Do not maintain trash piles of any kind. Not only because of fire danger, but because they are unsightly. If a gasoline engine must be used, be especially careful as to where the supply is kept. Do not at any time supply is kept. Do not at any time keep it in a barn or other nearby buildings. Never take the slightest chance of gasoline not being dangerous—it always is, when not closely

Do not smoke, nor permit smoking, about, or inside of buildings. Cigarettes are the most dangerous. cigar butt is apt to "go out" thrown down, but a cigarette will burn until it is entirely consumed.

Avoid the use of lanterns if possible. If this can not be done, then be absolutely sure that they are clean and not likely to be overturned. Always have several dependable ladders at hand—kept at regular places, so that they need not be hunt-

ed for in an emergency. Visit unused buildings, as well as those in use, on a look-out for danger-ous conditions, Threshing, or butchering days are

especially dangerous. Be extra careful, when these operations are in progress. In general, the more orderly and

In general, the more orderly and tidy a place is, the less danger there is from fire. When there is a chance for a fire, don't let it exist.

"Good housekeeping" applies both indoors and out, every day in the week If you are in business and have a stock of merchandise to care for, do not depend on your insurance policy

saving you from loss. The very fact that you are a "bus-iness man" entitles you to be expected to be "a good risk" morally, and every other way. If you are a "good" bus-iness man you will shun fire by taking every possible precaution. "Fire vention" should be the object, only next week, but during all weeks, by all good citizens everywhere.

### DR. CONLEY SPENT \$9,145.92.

Dr. Chas. H. Conley spent \$9,145.92 in order to try to defeat Gov. Ritchie for renomination. There were three contributors—Dr. Conley, D. E. Wright his son-in-law, and W. G. Grove. The expenses were for broadcasting, air plane hire, advertising, hall rent, auto rent, etc. Approximately \$250, for newspaper advertising is unpaid, as bills have not been sent in.

# GLEE CLUB PROGRAM.

On next Sunday night, October 7, at 7:30, the Glee Club of Blue Ridge College will present a program of sacred music in the college chapel. Besides chorus singing, there will be a male quartette, a mixed quartette, a solo by Prof. Fisher, tenor, and a solo by Henry Ackley, baritone, of Westminster. This program will be the first of a series of monthly concerts to be given throughout the colcerts to be given throughout the coilege session.

#### DELINQUENT TAXES ON FARM PROPERTY.

The Maryland Farm Bureau has made public a preliminary report on the delinquent tax situation, with re-spect to farm property. This report is an incidental result of a study undertaken some time ago, in connection with efforts to secure a state intion with efforts to secure a state income tax as a means of reducing some of the tax pressure on real estate in Maryland. The data was compiled in the Spring of 1934 by the U.S. Bureau of Agricultural Economics and the University of Maryland cooperating through the means of funds released by the Federal Civil Works Administration. Administration.

Administration.

The preliminary report indicates that the total tax delinquencies against farm property is increasing at a faster rate than against other real estate. From a study covering eight Maryland counties, the figures show that whereas in 1928, taxes outstanding against farm real estate represented 17 percent of the total taxes outstanding, in 1932-33 they constituted 26 percent of the county total.

The report also discloses that out of a total of 8,458 individuals owing taxes on farm real estate in fifteen Maryland counties in 1933-33, 219 (or 2.6 percent) owed \$500.00 or more, and that the total number of delinquent 2.6 percent) owed \$500.00 or more, and that the total number of delinquent farm properties in Maryland increased from 11,200 in 1928-29, to 17,058 in 1932-33. The number of acres against which taxes were delinquent rose from 817,220 in 1928, to 1,468,737 in 1932. Total unpaid taxes against farm real estate at the end of 1932 amounted to \$1,304,204.00.

"It is obvious," Farm Bureau officials point out, "that this large and growing amount of delinquent farm taxes is one of the factors preventing the reduction of tax rates on real

the reduction of tax rates on real property in Maryland."

#### -22-INDEPENDENT, FOR GOVERNOR.

William A. Gillespie, who has served as State Auditor, for ten years, and who claims from first-hand experience to know the financial details of every department, and where there is waste and extravagance, revealed by the increase in cost of government, has an-nounced himself as independent candidate for Governor, and if chosen promises to reduce expense costs to a level that corresponds with present conditions.

#### HOW WISCONSIN VOTED.

Wisconsin, the political hodge-podge of this country, divided as follows, in what is supposed to be an official count of the September primaries for Governor.

Democratic La Follette, Prog. 163,212 149,176 Reg. Republican Socialist

Total

563,607

\_\_\_\_\_\_ HARRY W. NICE HURT. Harry W. Nice, Republican candidate for Governor, fractured a bone in his right shoulder, Monday night,

when he fell down a flight steps leading to the home of Henry Dewey, in Guilford. The steps were partly hidden by shrubbery, not eas-ily visible, and Mr. Nice did not know they were there. He was in company with Mrs. Nice on his way to a campaign committee meeting. was taken to Union Memorial Hospital, for treatment.

### DEMOCRATIC MASS MEETING.

Notice is given elsewhere in this issue, of a Democratic Mass Meeting to be held in the Armory, Westmin-ster, on next Wednesday evening, Oct 10, at 8 o'clock. The speakers will be Gov. Albert C. Ritchie; Senator Millard F. Tydings, Hon. Wm. P. Cole, Jr., Hon. Herbert R. O'Connor, Hon. William S. Gordy, Jr. and Hon. Lames A Young James A. Young.

#### Random Thoughts

### IMPOSITION.

How we dislike being imposed on, especially when our "easy" side is taken advantage of, and presumption takes the place of fairness. In a way, almost all forms of begging and solicitation for favors, represent imposition. We are apt to consider this form to be merely enthusiasm for an object, or purpose, like salesman-ship, or persistent canvassing; but there is an element of impo-sition in all instances, because there is a burden, or cost of some kind attached, that one would not

voluntarily assume. We "impose" when we "lay on." However, cases of genuine imposition are pretty bare of any justification whatever. We "impose" on neighbors by persistently borrowing from them, or depending on them for help. We take advantage of their liberal disposition. We even figure on having a favor granted us, rather than possibly cause our ill-will.

than possibly cause our ill-will.
We weigh chances, especially when we have nothing to lose.
Imposition is a habit that grows, because it is a game that can be played in so many ways.
We make a study of just how far we can safely go, to win selfish ends—how much we can get, free of cust—how much we can get without returning an equivalent without returning an equivalent and, we consider it smart. How many "imposers" do you know in your immediate circle of acquain. tances.

FRIDAY, OCTOBER 5, 1934.

#### THE CHURCHES AT WORK.

Read almost any country weekly and it will easily be seen how the churches, Young People's Societies, Brotherhoods, and the like, are using lots of space for promotion purposes. Of course, this space is largely "free" which makes it all the more in demand— to be had for the asking.

But, the real point is, that even if publicity of this sort could not be secured, the church and its adjuncts would still be working just the same. And it is a hopeful sign. Even if not directly revenue producing for the newspapers, they see indirect benefits in church work in the interests of the general public-better law observance, higher grade community morals, a combat against wrong, better homes a championship in favor of "old deals" that are as sound as when the Giver of all Good laid them down in Holy

The Church is unquestionably militant, where the church is growingand this is a necessary qualification, for it is not growing everywhere. It is setting an example that more good agencies should heed, and follow. This is not a time for laziness and disinterest in any good work.

The Church is setting the pace for legislators, for honest business, for worthy endeavor of all sorts-and especially for the individual citizen. Morality and honesty are still the best policies, and they should be exercised. Every man, woman and youthful person, should take hold of the realities of life, and the importance of their daily opportunities that were never, in all time, more serious than in these present days. -22-

## NEWSPAPER ETHICS NO. 2.

Last week, we gave the main code that we attempt to follow-unless there are important exceptions that warrant a departure. We now give a list of additional ethics, of lesser importance, partly in the nature of explanation.

"Heart failure" is not a disease, and "complications," as a cause of death, carries no news value.

We prefer not to publish births, except on the definite request of parents though some undoubtedly reliable

In the matter of events that are likely, or sure, to be the subject of court action, we prefer to express no opinions as to individual responsibility, or fault.

Lengthy programs of any public occurrence, have relative importance; but as a rule, the general character of the program is all that can be expect-

Preference to lengthy articles on early arrivals. We can not, in the subject. rush hours before going to press use long articles.

a week later, for obvious reasons.

is likely to have good reasons, known occasionally made.

#### THE GENERAL DESIRE.

Farmers are not alone in seeking legislation favorable to their occupation, a greater demand for their products, and more relief from the prevailing depression that as yet shows but few signs of disappearing, notwithstanding the trial of numerous 'new deal" efforts. The following are a few of the occupations that are in the same class as the farmers;

Railroads, Manufacturers generally, Coal Dealers, Coal miners, Lumber Dealers and Manufacturers, Implement manufacturers and Dealers, the Building Trades. Storekeepers large and small, Factory employers, Cattle raisers and dealers, the Automobile industry, Electric Power Companies, Telephone Companies, Restaurants, Hotels, Paper Manufacturers and Dealers.

The Metal trades, Ice Manufactures, the Refrigeration industry, the Oil industry, Home dealers, Fertilizer manufacturers and Dealers, the Dairy business, the meat business, the general Packing business, Furniture manufacturers and dealers, Clothing manufacturers and dealers-all kinds, Fur dealers, Fruit growers and dealers, the Rubber goods trade, Jewelry and Watch manufacturers and dealers.

Hosiery and Knitting Mills, Woolen and Cotton Mills, Carpet Mills, the Cigar business, Leather and Harness, Shoe manufacturing, optical goods, Toy manufactures, Electric and Gas stoves, the general Plumbing business, Paper products and Printing, Publishing and Book making, Contractors and architects.

The small shop trade and mechanical workers, the "white collar" men, miscellaneous day help male and female, most of the professions, nursing, property owners depending on rentals, those with cash "frozen" in banks and investments—and literally hundreds more.

It is true that if farming was prosperous the whole country would be benefitted; but it is likewise true that if the rest of the country was prosperous farmers would be prosperous. The whole country is but one big family, all dependent in some degree, on each other.

In nearly all lines of work forces have been reduced or time cut down. Advancing prices have resulted in decreased buying. Many employees of labor have gone the limit in trying to that they can do so no longer, and have been compelled to adopt the planof "no work, no pay." And this catalogue is not a new one, nor perhaps larger than it has been; but it still remains and its effects are becoming more apparent.

Those who have a fair business, or who have a fair measure of employment, are fortunate indeed, and all such should not complain, for many are far worse off.

# WOULD LIMIT ADVERTISING.

a professional advertising man, Albert D. Lasker, of Boston, is advocat- National Supervision service. These newspapers. Until we have more inour own case, advertising is already too "limited."

Limiting the freedom, or range, is one thing, while limiting advertising indiscriminately, is quite another thing. Anyway, why should Mr. Lasker pick on newspapers, especially, or don't he?

To our mind, some of the most indefensible advertising is carried over the radio, that has almost reached the point where the preaching of good morals is involved. "The set" is those from Canada, Newfoundland, certainly the purveyor of a lot of stuff | Mexico, Haiti, Dominica, Canal-Zone that goes for humor, and adventure, that is little less than vulgar and immoral-if we use the right balances.

As Mr. Lasker is in the advertising business, perhaps he means only that | members of a family connected with ed, free of charge, from a newspaper. | there is "too much" advertising that official commissions of government his firm does not handle. We will any subject, is necessarily given to patiently wait for more light on the work; conference delegates who come

But when he goes, it is do not appear in print, as sent in. He appointed to public office, have a free hoped that he and those with whom he hand in spending millions and billions has associated here are making new best to himself, why omissions are of taxpayers' money for every kind links of sympathetic understanding of scheme under the sun.

The official tax spenders are not liable for waste, inexperience or bad judgment. Their worst penalty is defeat for political office. The public

pays the bill. If private business were run by the same inexperienced management there would be no taxable assets to maintain government and finance political experiments.

The farther government gets away from the functions of governing and into competing business with its private citizens, the greater becomes the danger of undermining constitutional safeguards drawn to prevent entrenched officialism, and the more active must the people become in protecting their individual liberties through a careful weeding process in choosing their public servants.

No manager of an industry or house wife would knowingly keep a wasteful employe. No property owner or voter should knowingly keep a wasteful public servant.—Industrial News Re-

AMERICA.

# FOREIGN STUDENTS COME TO

School doors are opening throughout the country. Colleges and universities are able to calculate attendances, and some special figures as to students attending from other lands are also being made public. These are of special interest. It is recognized that nothing makes more for kindliness and friendliness between peoples than this cementing of early links between young citizens.

An illustrative story of the power of such friendships comes from Vienna: Soon after the World War English friends took into their homes some children from Austria who, but for such help and care, would have suffered for lack of food, perhaps clothes and shelter. Two boys who were neighbors in Vienna were neighbors also in England. They were impressed, young as they were, with the force of friendliness. Long after they had been sent back to Vienna a great rift, threatening riots, took place among the new generation of that city. The two boys, now young men, were in rival camps. The situation was tense. Said some one, "Let's get keep help employed, to the extent those two boys together to talk things over." A conference between the two was arranged. A long, long talk and setting forth of the differing view points-result, no rioting, a gradual getting together for common good.

> For increasing understanding and friendly links between peoples the interchange of students is hopefully watched. Some statistics as to 1934-35 attendance of foreign students are now available. Estimates are for 10,000 students in American colleges and universities for the coming winter.

Since the immigration law of 1924 Perhaps not a "professor," but only about half of that number come under supervision of the Immigration and ing a law limiting advertising in are designated at 4-3 students. A 4-3 student is one born in the quota counformation on the subject, we have tries, such as Europe, South Africa little to say about the proposition. In | and the Far East, or one born of a race ineligible to American citizenship-such a student is admitted outside of the quota limit, but he must be at least fifteen years old and come to this country solely for study at an approved college or university. There are more 4-3 students from Europe than from Asia, Africa and Australia combined.

The other 5,000 students come from non-quota countries and have status as students exempt from quota—as and Latin-America, or students from American insular possessions, such as Guam, Phillippines, Virgin Islands, Hawaii, Porto Rico, American Samoa; which come connected with research on diplomatic passports or non-immigrants who, entering on the status of visitors bent on pleasure business, decide to study here before returning. So much for this rough classification.

Now what does the student do in this strange land? He has already been investigated as to financial ability and entrance requirements. When he reaches the selected campus the first person on whom he calls is the "adviser to foreign students" or an equivalent officer. The adviser exhelps about board, room, and so on. Two weeks later a more formal meet-When one scans the qualifications ing is arranged at the adviser's office. There name, age, passport, course of study, financial data are gone into sight of until he sails for his native

well worth reading, and weighing.

"Every venturer on the road to better things is likely to meet this familiar no-thoroughfare sign: "You can't change human nature." Dr. Charles R. Brown, dean emeritus of the Yale Divinity School, would stop just long enough to evere the "energy inst." just long enough to erase the "apos-trophe T." To a New York congre-gation, Sunday, Dr. Brown said: "I insist that we can change human nature." He cited the extermination of cannibalism through Christian teachings as evidence, and further strengthened his argument with bits of human history that show "human nature" to be many things-bad or

founded. Jesus spoke of the need of being "born again." Here is some conception of the magnitude of the change which Christianity has no store for the unstable quality of thought which men label "human nature." It that led him to disavow responsibility for his brother. But men today are exhibiting such a recognition of mu-tual responsibility as is reflected in vast government projects for the re-lief of the unfortunate among us, and in efforts to order society in a way that will save our brothers from the results of greed, ambition and other human-nature elements.

Just what is "human nature?" Dr.

Brown offers a suggestion in his definition. It is a name we apply to a nition. It is a name we apply to a supposed cause. It is an effort to explain or to avoid explaining the confusion of effects which constitute mortal existence. What we often mean by it is human inability or negative and the light of the say to mean by it is numan massive, ligence to act—which is to say, to think—consistently. We mean the control of our actions for good or bad by whim and caprice instead of by enlightenment. And most of us have personal experience of some degree of change coming about—through the effects of education and religion on our own thinking."

Featured "Pit Fighter"

There is one dog in the large canine family of breeds, which possesses a coat of purest white, is called the "roving white pirate" of dogdom-the Bull terrier. It is sad to relate, however, notes a writer in the Philadelphia Inquirer, that the Bull terrier has a "dark past." Here is a calm, amiable type of dog, a wonderful pet and household guardian, but one spoiled by the de many years ago.

Despite the blemish cast upon the early Bull terrier, this breed has overcome every obstacle in its path, has gained thousands of admirers and has progressed far in the dog show realm in recent years in England and this

In reference to the Bull terrier's "dark past," which by the way, was no fault of the dog, it is interesting to learn the "white 'un" many decades ago, was the "pit fighter."

FEEDING OF GRAIN TO GET FALL EGGS

Pullets Should Be Guarded for Development.

By H. H. Alp, Poultry Extension Specialist, College of Agriculture, University of Illi-nois.—WNU Service.

Pushing pullets for extra early fall egg production may be a tempting way of trying to improve the farm's cash income this year, but such pullets may "fade" out as layers and as a steady source of income. Eggs have brought Illinois farmers an average annual income of \$20,000,000 during the past four years, and this source of cash probably will be relied on more than ever this year.

Egg prices are generally at their highest in the fall months, and to take advantage of this market, poultrymen force their pullets into early production by continuing them on a mash higher in protein than is needed for good growth.

The all-mash system of feeding has proved quite satisfactory in many instances. However, when used incorrectly, it is believed to be partially responsible for pullets "fading" out of production in the fall and winter, because of failure to secure good physical development during the growing period. Early maturity in pullets is desirable, but maturity at the expense of physical development is likely to prove unprofitable.

To help overcome erratic winter laying, it is suggested that growing pullets be fed for good physical development, such as may be obtained on many farms through the liberal feeding of grain. It is true that grain-fed birds may not come into production as quickly, but in the opinion of a number of practical poultrymen, they are likely to be more consistent in their winter laying.

A mixture of equal parts of cracked corn and wheat fed in a hopper, in conjunction with the regular mash, has given satisfactory economical results. As the birds become older, whole grain may be substituted for the cracked corn in the mixture.

Regardless of the method of feeding used, great care should be taken to accomplish good physical development and fleshing first. Undoubtedly there has been too much of a tendency to see how quickly a flock can be made to begin laying, rather than how consistently.

### Geese Are About Easiest,

Cheapest Fowls to Raise Geese are about the easiest and cheapest fowls to raise, says a writer in the Montreal Herald. They require a little soft feed, as moistened meal, bread crumbs, potatoes or other table scrap for a few days. Soon the goslings learn to eat grass and cracked peas or corn in small quantities night and morning. Let them have access to water for drink and also to swim in. Protect them from rats, weasels, skunks, etc., until well feathered, and also protect them from very hot sun during the middle of the day. They will be better shut up during thunder storms until three months old. After that they may soon be fed whole peas and corn and require little care. They do not bring high prices and are not more profitable than chickens, as a

### Poultry Facts

A dozen eggs contain about a pint of water.

1

Eggs were recently being sold at one-half cent each in the Irish Free

Grass range results in plenty of sunlight and vitamin D, and produces sturdy chickens.

The most rigid culling should be done at the close of the laying season which usually continues to November.

The Cochins were first introduced as Shanghai fowls; then they were called Cochin Chinas and finally Cochins. They appeared in both England and America in 1840.

Eggs should be placed in wire containers where it is cool, so they may not develop heat spots.

California ranks eighth in the nation in the number of chickens on farms, the total in the state being estimated at 18.721,000, or 111,000 more than last year.

Possibly one of the best remedies for lice is the Black Leaf 40 treatment, whereby one puts a little of the liquid along the perches a short time before the birds go to roost.

Since one dozen eggs contain about one pint of water, clean, fresh, pure water should be kept constantly before the hens.

Mites are blood suckers that are not found on the chickens. They hide under the roosts or in cracks and crevices of the house.

Don't wash eggs before putting them away in water glass. If soiled, sponge them as lightly as possible with a cloth dampened with vinegar to remove the soiled spots.

Come Early and Bring Your Friends

VITAMIN D IN EGG VARIES WITH DIET

Cod-Liver Oil Found to Give Good Results.

Prepared by the United States Department of Agriculture. -WNU Service. There are relatively few potent natural sources of vitamin D known. Egg yolk is one of the most valuable of these, but all egg yolks are not equally rich. The diet of the hen and the amount of sunlight she has received during the egg-laying period make considerable difference in the vitamin D content of the egg yolk. Vitamin D. often referred to as the antirachitic

vitamin, promotes the assimilation of

calcium and phosphorus, and thus aids

the development of bones and teeth. Practical poultrymen and nutritionists have been interested in attempts to enrich the egg yolk in vitamin D either by feeding the hen substances rich in this vitamin or by increasing the amount of ultraviolet light she receives. In a series of experiments covering nine months the bureau of home economics and the bureau of animal industry studied the relative efficiency in vitamin D storage of different quantities of cod-liver oil and

viosterol in the diet of the hen. These studies indicate that in the amounts usually fed, the vitamin D of cod-liver oil is more efficiently stored in the egg yolk than is the vitamin D of an equivalent amount of viosterol. When 2 per cent of cod-liver oil was included in the diet the vitamin D content of the yolk was significantly

greater than when 1 per cent was fed. Fifteen minutes' irradiation of the hen with a carbon arc lamp apparently had the same effect on vitamin D storage as 1 per cent of cod-liver oil

Place mash hoppers and drinking vessels in the shade, where conditions are most attractive, so there will be a greater mash and water consump-

Sanitation from the point of poultry house management, ventilation, overcrowding, are all important in keeping off the fall and winter colds, chickenpox and roup.

Birds Prefer Damp Earth All birds bathe. Some use water, others earth. Fowls are in the latter class. Poultrymen generally consider the dusting of hens, turkeys and guineas as primarily to rid themselves of parasites. On the contrary, that is just an incidental effect of cleansing the plumage. To say that the fowl takes a dust bath is a little misleading. Fowls do not really like dry

they will take dirt from the feathers. Savage Hens

earth or ashes to bathe in. They pre-

fer them just damp enough so that

About the only thing to do to stop fighting and killing in a flock that has gotten into that practice is to give it more liberty, preferably out of doors. Hens that lay well but are crowded into limited quarters seem more predisposed to such attacks upon each other, and once blood is drawn it is very difficult to stop the cannibalism. Giving the flock an opportunity to get out of doors and separate will usually stop the trouble, even though it may cut down egg production somewhat.

### Cost of Pullets

According to the Arizona Experimental station, in a cost account study recently released, the net cost of producing a pullet was 98.3 cents, and the actual cash cost to the poultryman, 61.5 cents, after deducting labor and other charges. The larger the number of chicks brooded, the less the cost of raising a pullet, it was pointed out. Mortality in twenty flocks under observation by this station averaged from 7 per cent to 65 per cent.-Los Angeles Times.

### Cites Simple Rules for

Marketing Quality Eggs Poultrymen and farmers who market quality eggs in the summer have found five simple rules to be effective, says O. C. Ufford, extension poultryman for the Colorado Agricultural college.

These rules are listed as follows: 1. Market eggs at least twice weekly.

2. Secure an egg-candling chart from the United States Department of Agriculture and learn to determine the quality of eggs by candling. 3. Protect eggs from the hot sun on the way to market.

4. Do not market an egg unless you are convinced that it is of good 5. Pack eggs for shipping or delivery with the small ends down.

Beaver Mentioned Often in History of Old World

The beaver is not peculiar to America alone. It is mentioned frequently in ancient history and is met with in fossils and old place names in Europe and Asia. The use of beaver for the ufacture of top hats to before the discovery of the New world. When the vast resources of the forests of the New world became known beaver wool became the indispensable material for the fashionable European hat. Nearly a century and a half after the discovery of America we at length find Charles I in 1638, by royal proclamation prohibiting the use of any materials except beaver wool in the manufacture of hats, unless made for exportation.

Less than a century thereafter, the beaver appeared to have been almost totally exterminated from the colonies to the south of the St. Lawrence and the great lakes. The French traders in 1743, imported into Rochelle, 127,-800 beaver skins, and the British Hudson's Bay company sold 26,750 skins the same year. Within less than half a century afterwards, when Canada had become a British possession, the trade in beaver peltries seems to have reached its maximum, and to have been maintained with only a slight decline till the commencement of the present century. In 1788, upwards of 170,000 beaver skins were exported from Canada, and the value of those forwarded to England from Quebec alone, in 1808, is estimated at nearly

Canned Chicken

Some poultry men are losing an opportunity of using their home markets. Oftentimes in the smaller towns the local butchers cannot buy one's surplus hens. Try an advertisement, giving the price and suggest that the housewife can a few chickens. Indications are that prices of pork will go up, says a writer in the Indiana Farmer. If they do, canned chicken will be a low-priced meat next winter. It may be a way to dispose of Leghorn hens quoted at low prices.

Renewing the Flock

The necessity of renewing more than one-third of the flock each year is one of the most important problems in poultry raising. It is one of the problems that cause failure on the part of many beginners. Methods of incubation and brooding determine to a considerable extent the profits to be made out of the laying pullets raised. A poor hatch represents an economic loss which cannot be compensated for, and the chicks that do batch are apt to be of inferior quality.

TWOULD SEEM SO

During a history lesson the teacher pointed out to her pupils that a surname often indicated the trade or profession of the ancestors of those who bore the name.

"For instance," she said, "supposing your name was Baker, that meant your ancestors were makers of bread. Or, as another example, supposing your name was Smith, that meant that your ancestors were workers in iron-blacksmith, and so on."

She pointed to one of the boys. "What were your ancestors, Webb?" she asked.

The boy looked thoughtful. "Spiders, teacher," he said, after a while.—Tit-Bits Magazine.

In the Spotlight "Why should you run for office in times of so much uncertainty?" "I'm not running," answered Senator Sorghum. "I'm being pushed."

"Are you, then, so popular?" "I have my doubts. I am afraid some of my constituents are making it certain that I am fairly prominent, so that I'll be sure to be investigated when my turn comes."

SAVE THE SAMPLES

"Shall we give samples of cloth to ladies who are thinking of ordering

swimming suits?" "I guess so, but cut them small. We don't want 'em to use the samples to make the suit."

Reward of Thrift A father said, "Now, son, start saving the pennies and put them in this yellow box, and when you get five pennies give them to me and I'll give you a nickel and you can put that in this blue box; then, when you get five nickels give them to me and I'll give you a quarter and you can put it in

Seventeen years later the boy discovered that the red box was the

A new Senator will be Bilbo, of Mississippi. He is said to be "funnier" but not so "loud" as Huey Long." More "fun" in the Senate may be a good adulterant.

#### AN AGREEABLE SURPRISE.

The nieces and nephews, of Mrs. P. Rebecca Hess, the eldest living member of the Hess-Bushey family, gave her an agreeable surprise on last Sunday afternoon. Mrs. Hess who has passed her eighty-fourth birthday attended the morning services at Woodbine Lutheran Church, and brought her pastor, Rev. Karl Mumford home to dinner. When she, her daughter and family were approaching the house she noticed a number of auto-mobiles standing on the spacious lawn and wondered how they would provide dinner for so many guests. This problem had been solved for her as soon as she came into the house, for the guests had taken possession, and everything that was needful for a first-class chicken dinner had provided by them even to the homemade ice cream and cake.

Mrs. Hess had regretted very much her inability to attend the last family reunion held in July, on account of illness, so this was to give her a reunion all her own.

An extemporaneous program was provided and consised of a brief devotional before partaking of the meal. And later in the afternoon, the Crum quartette sang a selection also the J. Morris Hess quartette sang, and Carroll, David, Edith and Hazel, children of Elmer S. Hess sang a selection. Then Mr. George W. Hess, who some years ago taught in the public schools of Carroll County gathered about him some of his former students and sang

a pink and white "Hug-Me-Tight" and slipper to match, as the gift of the nieces and nephews. We were sorry that it was impossible for some to be present. All sang "God Be with You Till We Meet Again" and Rev. Karl Mumford offered prayer and benedic-

Those present were: Mrs. P. Rebecca Hess, her daughter Mrs. Harry Crum, Mr. Harry Crum and their sons Roy, Elbert and Fred and daughter, Marie; Mr. and Mrs. J. Morris Hess, Mr. and Mrs. J. M. Clark and Barbara very acceptably. The pastor spoke on the same subject, at the Rally Service of the Lazarus, Lineboro Union S. S. Coming special events at Trinity Evangelical and Reformed Church, Manchester. Holy Communion will be observed on Sunday, Oct. 14, at 10:30. At 7:30 on the same day a musical program of local talent will be sponsored by the C. E. Society. The Rev. August W. Klingner, of Philadelphia, will preach on Sunday evening. and son, Eugene; Miss Carrie Naill, Mr. and Mrs. Norman Baumgardner, Mr. Peter Baumgardner, Mr. and Mrs. Clarence Naill, Mary Snyder, June Clarence Naill, Mary Snyder, June Gonker, Buddy Gonker, Mr. and Mrs. Mervin Conover, son Charles, Mr. Norman Hess and daughter, Miss Catherine, all of Taneytown; Rev. Karl Mumford, Ellicott City; Dr. and Mrs. Robert McKinney, Baltimore; Mr. and Mrs. Edward Englar and daughter, Ann, Louisburg, N. C.; Mrs. Abbie Flory, Mrs. Otis Carpenter and daughter. Betty. Harrisburg: Mr. and Mrs. riory, Mrs. Otis Carpenter and daugnter, Betty, Harrisburg; Mr. and Mrs. Chas. Devilbiss, sons Roger and Paul; Mr. and Mrs. Roy Baumgardner, Keysville; Mr. and Mrs. Jacob D. Null, of Hanover; Mrs. C. B. Shull, Mr. and Mrs. A. B. McKinney, Mrs. John D. Belt, Westminster; Mr. and Mrs. John C. McKinney, Mr. and Mrs. John C. McKinney, Mr. and Mrs. John C. McKinney, Mr. and Mrs. John Bushey, son Frank; Mr. and Mrs. John James Bushey, Miss Lillie Hatfield, all of Woodbine; Mrs. Herbert Wampler, daughter, Miss Ruth, son of Alexandria, Va

### ALLISON FAMILY REUNION.

Representatives from Maryland, Pennsylvania, Indiana and the Dis-trict of Columbia attended the fourth annual meeting of the Allison family at South Mauntain Grove, near Arendtsville, Pa., September 30, 1934. Twenty-three members were present, the largest attendance of any of the four meetings. At the business session which fol-

lowed the annual dinner, the minutes of the last meeting was read and approved. The grove adjoining Mount Joy Church, Pa., which was formerly a part of the Allison homestead, was selected as the place of the next meeting on the last Sunday of September, 1935. It was also decided that the group, in a body, should attend ser-Mrs. Elizabeth Hoover, Frederick, where many members of former generate several days with her parents, erations worshipped. Miss Reck and erations worshipped. Mr. and Mrs. Hess were again named the committee to make arrangements. Some further interesting items relating to geneological research were re-ported by the secretary.

The usual impromptu speeches fili-

ed the social hour. Mr. A. W. Yeatts extended greetings to the members attending for the first time and called upon others present. Those who responded included H. M. Witherow, Charles Reck, William Sipe, Martin D.' Hess, Mr. Renniger, Edward Sipe and Miss Annie Reck.

### NEW WINDSOR.

Mrs. Stoner and family, and Mrs. Cladwell, Emmitsburg, and Mr. and Mrs. Upton Stoner, of Mortz's.

Mr. and Mrs. Robert Reneker, York, spent the week-end with Mr. and Mrs. J. Wm. Reck.

#### YOUTH SLAYS GIRL IN REAL LIFE AS IN POPULAR NOVEL

Murder Case Parallels That Told in Dreiser's "An American Tragedy."

Wilkes-Barre, Pa. - An American tragedy-greater in scope than Theodore Dreiser's book of that name, because it is real, not written-is to read on to its last bitter chapter here when Robert Edwards, twenty-two, goes on trial for his life, accused of slaying his sweetheart, Freda McKechnie, an expectant mother.

All of the slow-moving drama that was Dreiser's will become swiftlymotivated action when the newspapers print the courtroom story of a real American tragedy, a case parallel to the original story in almost every detail.

### As Told in Novel

Fiction, in several lines, author Theodore Dreiser; Clyde Griffiths, son of an itinerant street preacher, falls in love with a pretty factory girl, Roberta Alden. Soon afterward, through well-to-do relatives, he meets another girl, Sondra Finchley, prosperous, of social status, with whom he becomes infatuated. Meanwhile Roberta becomes an expectant mother. The situation makes him desperate; he attempts a tragic solution-striking Roberta on the head while boating on a small lake, causing her death by drowning. Finis is the electric chair.

Fact, in a paragraph or two: Robert Edwards, twenty-three-year-old church worker of Wilkes-Barre, Pa., falls in love with young Freda Mc-Kechnie, promises to marry her. Into the picture then comes another girl, Margaret Crain, intellectual, music teacher, of East Aurora, N. Y. Meanwhile Freda becomes an expectant mother.

### In Real Life

The situation makes Edwards desperate; he attempts a tragic solutionstriking Freda on the head with a blackjack while they are swimming, causing her death by drowning. The finish has not yet been written.

So much for the skeleton details. The authorities are convinced that Miss Crain was an unwitting incident in the crime. They say that Freda confidently expected to become young Edwards' bride, so much so, according to a friend, "until the very end she was more happy than she had been in months." This friend said further that Freda knew of Edwards' infatuation for Miss Crain, but had been assured by him that he had gotten over that infatuation.

The last night she lived, when she left home to keep a tryst with Edwards, Freda told this girl friend: "I have a date with Bobby and we're going to talk over the plans for our wedding. Everything is going to be all right."

After the murder, police say, Edwards returned to his home, slept soundly, and the next day or so visited Freda's family. They were deeply alarmed over her absence, but at the time the youth denied knowing where she was or what had happened to her. Finally police got on the case and Edwards confessed. He killed Freda, he explained, when she threatened to expose their romance to Miss Crain.

#### SCHOOL ATTENDANCE.

The following pupils of Taneytown school were neither absent nor tardy during the month of September: First Grade—Richard Richard Ashenfelter, Bernard Bense, Jean Bankert, Donald Erb, Ray Fair, David Feeser, Karl Austin, David Hess, Ralph Hess, LaVerne Keilholtz, Nevin Long, Charles Null, Roland Reaver, Delmar Robertson, Charles Rinehart, Norman Welty, Miriam Duble, Charlotte Halter, Leah Hock-ensmith Marian Humbert, Mildred

Onler, Charlotte Halter, Lean Hockensmith, Marian Humbert, Mildred Ohler, Catherine Pense, Ruth Perry, Mary Roop, Shirley Rinehart, Lovella Sauble, Dorothy Shelton, Dorothy Stonesifer, Doris Wilhide.

Second Grade—Wilbur Alexander, Dorothy Carron, Charlos, Hoffman Donald Garner, Charles Hoffman, John Morehead, Charles Marzullo, George Null, Joseph Reaver, James Teeter, Carroll Vaughn, Phyllis Smith, Teeter, Carroll Vaughn, Phyllis Smith, Dottie Sauerwein, Mary Smith, Alma Morehead, Mary Linton, Carolyn Vaughn, Mary Leppo, Anna Mae Kiser, Adelia Haines, Marie Hilbert, Betty Hess, Roberta Feeser, Mary Lou Essig, Marion Eckard, Mirlam Copenhaver, Vivian Boone, Charlotte Baker, Charlotte Austin, Jane Angell. Third Grade—Glenn' Bollinger, Eugene Clutz, Russell Crocker, Orville Claybaugh, Wirt Crapster, Chas. Conover, Carroll Eckard, Fern Haines Elwood Harner, Francis Lookingbill, Ivan Reaver, Billy Sanders, Theodore Simpson, Eugene Sell, Harvey Shorb, Lee Stambaugh, Charles Stonesifer, Edward Weishaar, Mary Va. Utz,

Edward Weishaar, Mary Va. Utz, Mary Louise Sauerwein, Frances Sell, Kathleen Sauble, Catherine Robert-Kathleen Sauble, Catherine Robertson, Anna Mae Hartsock, Ruth Hess, Alice Hitchcock, Ruth Hilterbrick, Mary Catherine Denner, Cecelia Fair, Harriet Feeser, Betty Erb, Geraldine Crouse, Elizabeth Bankard.

Fourth Grade—Robert Bowers, Harry Clutz, Paul Donelson, Harry Frank, Raymond Haines, John Harner, Franklin Hartsock, Robert Marzullo, Norman Nusbaum, Richard Ohler.

o, Norman Nusbaum, Richard Ohler, Glenn Smith, Sterling Stambaugh, Charles Sweetman, Dorothy Wiles, Mary Alice Vaughn, Elva Valentine, Letitia Smith, Geraldine Smith, Hazel Sies, Elizabeth Shorb, Maxine Nusbaum, Truth Myers, Charlotte Martin, Jennabelle Humbert, Ollyne Eckard, Treva Brower, Dorothy Boone, Hope Ashenfelter.

Fifth Grade-Robert Airing, Wm. Fifth Grade—Robert Airing, Wm. Copenhaver, Paul Devilbiss, Roger Devilbiss, Kenneth Reaver, John Elliot, Luther Foglesong, William Formwalt, John Haifley, Fern Hitchcock, Kenneth Humbert, Paul Mayers, Kenneth Reaver, Richard Reifsnider, Jos. Skiles, Dewey Simpson, LeRoy Wantz, Alica Alexander, Ruth Robert Wantz, Alice Alexander, Ruth Anna Baker, Catherine Crabbs, Louise Hess, Marian Hymiller, Margaret Lambert, Edith Sterner, Erma Unger,

Cathern Welty, Esther Wilson.

# Tree on Grave Measures

Roger Williams' Height Providence .- Rhode Island will celebrate the tercentenary of its founding in 1936, and already a committee is active, attempting to decide what type of man to get to impersonate

Roger Williams, founder of the state. Williams was known to have been portly, but as for his height, the only thing left to guide the committee is that the famous apple tree remains.

An apple tree was planted over Williams' grave and the roots, seeking phosphate, followed the course of his spine and legs. The root, all that remains of Williams, is owned by the Rhode Island Historical society. It about 5 feet 10 inches tall.

### Fire in Range Disturbs

New York .- When fifteen-year-old Jack Hare built a fire for the first time in a year in a kitchen range in

his home in Patchogue, he heard frantic squeals of protest. As he lifted the stove lid he saw a mother squirrel scurry up the chimney, leaving behind three new-born

squirrels. One little fellow's paws were burned badly. Jack put the three in a box under a tree. They squealed so loudly that he put them to sleep with etherized gum used in his model aircraft

A few hours later two were missing. The mother had carried them away. One died.

### Patriotism Is All Wet

if Canoeist Stands Up

Dedham, Mass.-The echoes of "The Star-Spangled Banner" died away slowly and the crowd ashore still stood bare-headed in tribute as a nolice boat on the Charles river pulled into dock.

In the bow sat a silent, wet, shivering New Yorker, and in the stern sat

The bow rider stepped ashore and from the stern a voice still gargling a bit snarled:

"That's what can get by being so would indicate that Williams was d-d patrictic that you gotta stand in a canoc."

COSTLY EGG LOSS MAY BE LESSENED

Remove Males From Flock When Not Needed.

By C. F. Parrish, Extension Poultryman North Carolina State College,—WNU Service A toll of \$45,000,000 a year is lost by the American poultry industry as a result of improper methods of producing and handling eggs. This staggering loss can be greatly reduced by removing male birds from the flocks when not needed for breeding purposes, gathering the eggs more often, caring for them properly, and observing other methods of good flock management.

Fertile eggs will start hatching when exposed to sufficient heat for a short time, but infertile eggs may be left in a temperature of 103 degrees Fahrenheit for 72 hours and still be good for food.

Healthy, vigorous males removed from the flock should be penned separately and saved for breeding purposes the next season. The other males should be disposed of, since they will eat more food than they are worth if kept over the nonbreeding season.

In hot weather, eggs should be gathered at least twice a day in wire baskets and immediately removed to a cool cellar or room where the temperature is 68 degrees or less and where there is a relatively high humidity. The eggs should then be spread on a table or wire screen so as to cool thoroughly before being packaged.

The use of good nesting material and proper sanitation around the hen houses will decrease the number of dirty eggs produced. Many good eggs are sold at low prices simply because they do not look fresh and clean.

At least 20 nests, 12 by 12 by 14 inches, should be provided for each 100 laying hens. The nesting material should be changed frequently.

Damaged Poultry Feeds

Through no fault of anyone a lot of poultry feed sometimes becomes slightly damaged. Then it is a question whether to use it or not. It is certain that if it is not given to the poultry it will not hurt them. It is just as certain that if it is not used for feed it will be worth to anyone only what it is worth to him for fertilizer. The true test of the advisability of using such feeds is how well fed poultry will eat them. Usually, stuffs that are only slightly damaged will be eaten readily as a part of the ration containing the same stuffs in fresh and sweet condition. In this way they may be worked off gradually with no fear of ill effects on the birds.-Boston Herald.

### Feeding Oats

Oats are often recommended as a good feed for fowls which have a tendency to put on more fat than is consistent with good egg production. In using them the first thing to consider is the quality of the oats fed. Due to the fact that the oat for feeding retains the hull, it is of all grains the most deceptive in appearance. Unless one is careful in buying and makes sure that he is getting oats of standard weight-32 pounds to the bushel-or better, he is very apt to get some which are more hull than

#### Ocean Worth 371/2c Cubic Yard, Rules Ancient Law

Boston.—The Atlantic ocean is worth 371/2 cents a cubic yard, according to an appraisal contained in the Massachusetts general laws.

The statute reads: "The amount of tide water displaced by any structure below high-water mark . . . shall be ascertained by the Department of Public Works, which shall require the persons who cause such displacement to make compensation thereof by excavating, under its direction, between high and low water mark in some part of the same harbor a basin for a quantity of water equal to that displaced, or by paying to the Commonwealth, in lieu of such excavation, an amount assessed by the department, not exceeding 371/2 cents a cubic yard of water displaced."

# This law dates back to Civil war

Boon to Dove Hunters El Paso, Texas.-The federal government's cotton acreage reduction program is helping Texas dove hunters as well as farmers, according to

Texas Cotton Reduction

reports here. The reduction plan has increased the number of doves that will be available for hunters next season.

Acreage taken out of cotton has been placed in grain or other food This will cause doves, attracted by the grain, to remain in the valley regions instead of going elsewhere for food.

Old Flag Found Manchester, Ohio.-An old Colonial flag, believed at least one hundred and fifty years old, was found in the musty loft of an abandoned log cabin at Tranquillity, near here, by Edward Palmer. The flag contained 13 stars and 13 bars.

#### Church 300 Years Old

Scituate, Mass .- The First Congregational church celebrated its three hundredth anniversary recently.

#### Superintendent Boasts of Using Grafted Foot

Springfield, Mo.-W. L. Tracer of St. Louis, construction company superintendent here, claims he is one of four men in world medical history to be walking on a grafted artificial foot. The operation was performed, he said, during the World war after his own foot had been shot off at the ankle by a burst of shrapnel fire. Another man's foot was attached to his leg by a Major Wheeler, a medical corps officer assigned for Nice, France.

The new foot, he said, had to be broken and reset after he had returned to America because it had not grown straight. Tracer walks with only a slight limp

and says the foot pains him only after a hard day's work.

Common rats kill six times more

poultry and game than all the snakes, owls, weasels and hawks combined. A fresh laid egg is in best condition, and it should be kept as near that condition as possible. Eggs should not be

kept long in a temperature above 68

degrees. The practical purpose of alfalfa meal in a poultry mash is to furnish vitamin A. The meal is not essential when tender, succulent green feed is available.

During outbreaks of coccidiosis the poultry house should be cleaned once a day and clean dry litter used.

#### U. S. CAN IDENTIFY MOST CRIMINALS

Fingerprints of 4,500,000 in Government Files.

Washington.-On file at the Department of Justice are 4,500,000 fingerprint cards bearing the tell-tale whorls and loops by which almost any criminal in the land can be identified.

To examine all these cards at the rate of one every ten seconds would require five years, working six days a week, eight hours a day.

But—through an elaborate filing system, when prints are received for identification-it requires only 30 seconds to match them up with the department files.

And now J. Edgar Hoover, director of Uncle Sam's agents who wage a relentless war on gangsters, wants to cut that time to five seconds. Even 22 seconds saved might prove a decisive factor in an emergency, he pointed out. The five-second record can be made

by a "robot" searcher. It already has been applied to about 25,000 fingerprint cards and is being rapidly extended to others.

Roughly, this amazing machine works like this:

Each of the ten fingerprints received from a law enforcement agency is analyzed separately and made into a composite diagram, punched into a

When a sample fingerprint is received for identification, the machine is "set" according to the type of the sample and the cards fed in. Miraculously, it flips out only a dozen or so of the cards most likely to correspond

with the sample. To establish an identification, it is necessary only to examine the fingerprint record represented by the selected punch cards.

### Stork Brings Offspring

to All but Own Family St. Louis.—Everybody knows the stork brings babies, but who brings the baby storks?

Mr. and Mrs. Stork of the St. Louis (Zoological) Storks, would like to know the answer to that one, for they are a disappointed couple these days.

Ever since last spring, Mrs. Stork has been industriously preparing a nest in the big outdoor cage in Forest park. But now the nesting season is over and there are no offspring. Mr. Stork seems pretty sad. However, that may be just his natural expression.

#### Expert Tells Weight of Hog by Its Squeal

Bolckow, Mo.-George Hobson, who lives east of Bolckow, has become famous throughout this region for his ability to tell within a few ounces how much a hog weighs. "I can tell the hog's weight by hearing it squeal," Hobson explained.

### Nail in Dam Marks River's Water Level

Riverton, Ind .- Thirty-seven years ago, Dave Taylor, veteran ferryman, drove a large nail in the Wabash river dam here when the river reached its lowest level.

During the dry seasons in the past 25 years Taylor has compared the river's level with that of 1897. The best he was able to do was to feel the nail under water.

Recently Taylor went to the dam and saw the nail. He said the water would have to drop only one-half inch to reach the 1897 level.

### TANEYTOWN ORGANIZATIONS

Camp No. 2, P. O. S. of A., meets in Mehring Hall, every second and last Thursday, at 7 P. M. Charles E. Ridinger, Pres.; N. R. Devilbiss, R. S.; C. L. Stonesifer, Treas., and WM. D. Ohler, F. S.

Knights of Pythias, meets in Mehring Hall, every 1st. and 3rd. Tuesday, at 7:30 George Deberry, C. C.; C. E. Ridinger, K. of R. S.; Wm. J. Baker, M. of F.; Vernon Crouse, M. of E.

TANEY LODGE NO. 28, L. O. O. F.. Meets in I. O. O. F. Hall every Friday, at 8:00 P. M. Chas. L. Hesson, N. G.; Chas. E. Ridinger, Sec.; U. H. Bowers, F. S., and H. L. Baumgardner, Treas.

Taney Rebekah Lodge, meets in I. O. O. F. Hall, 1 and 3rd Monday each month, at 8:00 P. M. Vergle Ohler, N. G.; Bes-sie Six, R. S.; Clara Clabaugh, F. S., Esther Hahn, Treas. Taneytown Fire Company, meets on the 2nd. Monday each month, at 8;00, in the Firemen's Building. Merwyn C. Fuss, Pres.; C. G. Bowers, Sec'y; Jas. C. Myers, Treas., Raymond Davidson, Chief.

All other Fraternities and organizations are invited to use this directory, for the public information it carries. Cost fer one year, only \$1.50.

# Rhode Island Reds

The Standard description of Rhode Island Red fowls, as adopted by the Rhode Island Red Club of America. places the standard weight of cocks at 81/2 pounds, cockerels at 71/2 pounds, hens at 61/2 pounds, and pullets at 5 pounds. These fowls are described as of medium size, and closely resembling the Plymouth Rock in form. The comb most admired is that of the Wyandotte type; an unusual development in breast and body is encouraged; and they are described as having a square body formation.

COMMON MISTAKES CHECK EGG YIELD

Pullets Neglected When Care Is Most Needed.

By H. H. Alp, Poultry Extension Specialist, University of Illinois.—WNU Service. Eight common errors are largely responsible for the wormy, nonlaying pullets found among millions of farm chickens along in the fall of each year. During the summer months many farmers are not "egg conscious," and consequently neglect the care of the birds when they may need it most. As a result of this neglect, the pullets are so stunted that they fail to produce the number of eggs that might ordinarily be expected of them. Pills and worm capsules administered as cure-alls seldom give satisfactory results in these cases, and the poultryman finds that efforts to remedy the mistakes are expensive, difficult and generally disappointing.

Among the common mistakes listed are: Empty feeders, empty water troughs, dirty brooder houses without roosts, lice and mites in the brooder house, old contaminated range, outdoor feeders seldom moved, no clean shade provided and sick birds allowed to remain in the flock.

Probably the greatest error in poultry management, as far as feeding is concerned, is failure to use the type of feeder most satisfactory for range conditions and growing pullets. The outdoor feeder should be larger than that used in the brooder house and so constructed that it will not only prevent waste and contamination of the feed, but will also keep the contents dry. For each brooder house there should be at least two good-sized feeders. Many poultrymen use one for the grain and the other for the mash.

Failure to move the feed hoppers is also a common error. Unless the feeder is placed on a wire platform, the ground around it will soon become badly contaminated with poultry manure, and the chances of chickens picking up disease and parasites are

increased greatly. Like the feed, the water should be protected from contamination. Cleanliness around the drinking trough is extremely important. A good plan is to place the trough on a low, wire platform so that the birds can not scratch in the mud caused by spilled water. Furthermore, the troughs should be filled often and regularly so that there is always plenty of water at all times.

Supplement Forage Feed

to Pep Up Laying Hens When hens are forced to forage for their feed they get less to eat. Since eggs are dependent upon feed, and less feed is eaten, naturally fewer eggs are produced. Furthermore, the hens are not able to keep in such good condition of flesh and a molt is likely to result. As the sun is hot, the birds will stick pretty close to the shade and will not look very far for food-they will get only enough to

keep themselves going. It is just as essential to keep an egg-laying mash before them now as it was in the winter if eggs are to be

-22expected. A grain ration, of course, is fed in addition-about six to seven pounds per 100 birds per day. If hens are not in good condition of flesh, a pound or two more per 100 should be

# Poultry Squibs

Blackhead is an infectious disease which annually kills a great many young turkeys.

Under ordinary circumstances a young turkey hen should lay from 40 to 50 eggs during the normal breeding

Succulent green feeds are greatly relished by poultry. They stimulate appetite, keep the digestive systems in good order and add bulk to the ration.

It is a good plan to make a feeding crate into which larger or more developed birds cannot enter; this allows the weaker ones protection while feeding.

To fatten turkeys increase the amount of feed gradually, thus discouraging the tendency to roam. . . .

The old poultry stock on the farm constitute by far the most serious source of disease contaminations for the young stock.

Ralph Merritt's henhouses at Pembroke, Mass., are two and three stories high. He discovered that the hens living in the upper stories lay larger and better eggs than those on the ground floor.

Hawaii has a species of goose that never goes near the water except to drink, yet has webbed feet.

. . . Gapes is a disease which attacks domestic poultry and many species of wild birds. In fowls it is more frequently observed in young chicks.

Roosts for poultry houses are generally made of 2 by 2 inch material with the upper corners rounded. All roosts in the house should be on the same level so as to prevent the fowls from crowding.

#### Lice, Mites Need Close Attention, Expert Says

Feed used to support lice and mites cannot go into the making of hen's eggs, says Miss Cora Cooke, extension poultry specialist, University Farm, St. Paul, reminding flock owners to watch closely for poultry pests.

Sodium fluoride is probably the cheapest lice killer to use. The powder may be applied dry or dissolved in water and used as a dip. For dip, mix one ounce of the powder to a gallon of water. An easy method of controlling lice is to paint the roosts with 40 per cent nicotine sulphate solution a short time before the birds go to perch. The nicotine sulphate vapors spread through the feathers of the roosting fowls and kill many lice. This method is more expensive and less effective than using sodium fluoride, but it avoids catching the hens. As it does not kill all the lice, it must

be repeated frequently. To clear a henhouse of mites, give the house a thorough cleaning and then spray the roosts, supports, dropping boards, nests and all other likely places where mites may be hiding. An oil spray, such as anthracene oil or carbolineum, is the kind to use. After spraying, hens should be kept out of the house until the fumes have disappeared and the oil has soaked into the wood.

### Bertie on a Bust

By CHET GRANT ©, by McClure Newspaper Syndicate WNU Service.

GEORGIE BLAKE heard his moth-

er's voice coming closer; in the room, now. "Georgie, get up. I want you to go to the city.'

At the sound of the magic word Georgie became instantly awake. "Did you say you wanted me to go to the city, Ma? When? Now? Who's going? What for?" He plunged toward the bathroom.

"In half an hour. I want you to take Cousin Bertie to Casey's for some suits. They're having a sale." "What!"

Georgie's shocked face appeared between the folds of the rubber curtain. "Hey, Ma, are you crazy? Imagine me taking that little hellion to New York. Good night!"

"Bertie is not a hellion," Mrs. Blake said sharply. "How often must I tell you to speak respectfully of your cousins. Besides, Bertha isn't going, just Bertie. He won't be any trouble." "You're right," Georgie cried. "He'll

Casey's was crowded. Georgie kept a grip on Bertie's hand and took the elevator to the children's department. A salesgirl came tripping up the carpeted aisle. "Some new suits for the little boy? Right this way, please."

. . .

There were thousands of suits and Georgie and the salesgirl spent a lot of time over them. Suddenly Georgie was conscious that Bertie was missing! It was a horrible feeling. Not the fact that Bertie was lost, no, not that, but the fact that any moment now he might hear a muffled screaming somewhere or behold the sprinkler system operating as it should only do

in case of fire. Bertie found Georgie first. He had gotten into a drawer of masks and wigs in the toy department on the next floor. Adorned in a full flaming red beard he peeked around a counter corner and yelled: "Boo!" at Georgie, then ducked and ran.

Georgie gave chase, but it was futile. Bertie disappeared again. In the sporting goods department, two floors down, George spied Bertie again. Bertie heard his triumphant shout and leaped into the middle of a large pool of brook trout set low on the floor. Georgie in his mad haste, Water geysered everyfollowed. where. Fish flip-flopped on the floor.

Women screamed. It was the blond girl from the children's department who rescued them from the detective. She showed them into a small stock room. "You can hang your clothes on those steampipes," she said. "Nobody'll bother

you here." Georgie stripped Bertie to his shirt and himself to his singlet and shorts. "I ought to sock you," he snapped at a much chastened Bertie, who, sensing the righteousness of a belting from Georgie, expected the worst. He let out a yell of fear and dashed from the room. Georgie roared in exasperation and charged after him into a deserted bundle room just in time to see Bertie disappear down a bundle

chute in the floor. Bertie sho long smooth table. He tumbled hastily off and ran for an open door that led out on the street floor. There were thousands of people packed around the counters. Bertie looked for a good safe place to hide. There was an opening in the wall. He stepped into it quickly and all at once there was peace and quiet.

Meanwhile Georgie was upstairs donning his clothes hastily, saying much under his breath. He rushed to the street floor. He sought out a floorwalker at once. "I'm looking for a little boy running around in his shirts," Georgie said. "Have you seen him?"

"It's been a very warm day," the man said, sidling away. "Just a minute please." Georgie didn't wait. He decided to get a policeman. He went outside but there wasn't one in sight. He became conscious of a thick gathering before one of the windows. Perhaps he might be there. Georgie pushed his way through the crowd. He glanced in the window, and his stomach turned right over.

Bertie was in that window. It had once been a beautiful bedroom suite display, but it wasn't any more. It was upset like Bertie's mother's bedroom at home. The highboy drawers apparently had been used for a stepladder, and Bertie had evidently been climbing up on them, and had leaped down on the bed. Right now he was fast asleep in the middle of an expensive counterpane, his flushed cherubic features belying any recent

guilt. Georgie pushed his way out of the crowd. "That's him!" he heard a familiar voice crow. He wilted. A severe looking man came up with the detective and took him by the arm. Without a word they led Georgie to an elevator and up to an inner office. Georgie quaked. The damage. The uproar. Probably there would be a

good stiff fine for all that. Maybe "You have charge of that youngster in the window?" the severe-looking

man asked. "Y-Yes, sir." Georgie fought a strangling sensation. "Listen," the man said. "I'll give

you fifty dollars to let him stay there until he wakes up. . Georgie fainted dead away on the

#### A Steady Job Smith-Who are you working for

now? Jones-Same people-wife and five children.

#### Peas Oddities

HERE is nothing more deli-cious than little peas from a can. They have been picked, garden fresh, rushed to the can-nery, and sealed in cans with all their pristine flavor intact. But did you know that there are odd dishes of which peas are the basis that combine them with chicken, for instance, in a way to make your mouth water? Here is a recipe which you should remem-

Chicken and Pea Shortcake: Make a white sauce of three tablespoons butter, three table-spoons flour, two cups rich milk, the liquor from an 11-ounce can of peas and one teaspoon salt. Add the contents of a 12-ounce can of chicken, cut up, and the peas, and heat. Just before serving, add one slightly-beaten egg yolk and one teaspoon lemon Serve on tiny buttered split baking powder biscuits, and top with the other half of the biscuit, buttered. Serves eight.

#### If You Can't Wait

But if you can't wait for the second course of your dinner for these delicious peas, serve them in the following soup for which

you can use the larger peas.

Potage Longchamps: Add two
tablespoons chopped parsley and
the drained peas from a No. 2
can to two tablespoons butter in a
large skillet, cook gently for five minutes, and press through a sieve. Make a roux of two tablespoons butter and two tablespoons flour, and add slowly the pea-liquor with enough milk to make two cups. Add one chicken bouillon cube and the pea pulp, cooking all till smooth and creamy. Add one-half cup rich cream, and season well with salt and pepper. Serve with a spoonful of slightly salted whipped cream on top. Serves five.\*

# A Different

Problem TIME was when June brides were almost all faced with the fundamental problem of how to cook, but their problem is no longer cooking but the wise selection of foods already cooked. For there are enough different foods now available to her in cans to make cooking in the home almost

#### a superfluity. Soup to Nuts

To begin with she has her choice of nearly three dozen delicious soups, and to end with she can save herself labor by serving excellent vacuum packed nuts. And, in between, she has her choice of a couple of dozen fruits in various forms, a score of fish and shellfish, more than a dozen meats cooked in different ways and combinations, nearly three dozen vegetables, and about three score specialties, including such staples as Boston brown bread. milk and whipping cream, jams, jellies, Japanese crabmeat, mo-

#### lasses, pickles and puddings. Ready Prepared Dishes, Too

Some of these require merely heating, but some of them are better cooked in combination with other foods to bring out their fullest and most delicious flavor, but there are also ready-prepared dishes in cans which require no

combining with anything.

These include spaghetti with tomato sauce, whole squab, beef steak with onions, beef stew, whole chicken, whole ham, kidney stew, liver with bacon or onions, sausage with sauerkraut, and such ready-made entrees as ef a la mode, chicken a la King, Chop Suey, Hungarian Goulash Lobster Newburgh and Irish Stew.

### A New Study

So the new study of the modern June bride consists largely of finding out which of these canned foods appeal to her new husband, and what manufacturer puts up the best brands of them. For the purposes of this study she will find that a good, reliable grocer is the best source of information.\*

### Lesson for October 7

FELLOWSHIP WITH CHRIST

LESSON TEXT-John 15:1-16. GOLDEN TEXT—John 15:1-16.
GOLDEN TEXT—Abide in me, and
I in you. As the branch cannot bear
fruit of itself, except it abide in the
vine; no more can ye, except ye abide
in me. John 15:4.
PRIMARY TOPIC—Jesus and His

JUNIOR TOPIC-How to Be Jesus'

INTERMEDIATE AND SENIOR TOP-2—How May We Be Friends of Christ?
YOUNG PEOPLE AND ADULT TOPC—How to Live a Fruitful Christian

Under the beautiful allegory of the vine and the branches, Jesus set forth the spiritual oneness of himself and his disciples. He showed them that though he was going away, they would be in vital touch with their unseen Lord, and that through them his life was to be manifested to the world and his purposes accomplished.

I. The Relationship of the Disciple to Jesus and the Father (vv. 1-3).

1. Jesus is the source of the disciples' life (v. 1). He is the true vine. Through the incarnation Jesus identified himself with humanity, and by virture of his atoning death and resurrection it is possible for the believer to be a partaker of his life, so that between the disciple and his Lord there is a community of life. As the vine pours its life into the branch, so Christ pours his life into the believer.

2. The discipline of the disciple is in the hands of the Father (v. 1). The "Father is the husbandman." Just as the culture of the vine is in the hands of a husbandman, so the discipline of the believer's life is in the hands of the Father. He knows exactly how deep to cut with his pruning knife, and can be absolutely trusted to cut no deeper than necessary, for he is our affectionate Father. In this disciplinary process he

a. Removes the unfruitful branch (v. 2). He does not take the trouble to prune the fruitless branch—the nominal church member; the mere professor he removes.

desires in order that the virtues of the Lord, the fruit of the Spirit, may shine forth.

3. The instrument by which the discipline is accomplished is Jesus' words (v. 3). If the believer's life is to be fruitful in character and servmust be intelligently and regularly applied

II. The Conditions of Fruit-bearing

The supreme and grand object in pruning the vine is fruit. God's whole design in producing the vine and making men branches thereof was to obtain fruit, more fruit, much fruit.

1. Abiding in Christ (vv. 4-6). life from the vine, so believers must abide in Christ, from whom they derive their purity, strength, and wisdom. Indeed, it is a mutual abidingthe disciple in Christ, and Christ in the disciple. It is really Christ's life expressing itself through the believer.

2. Christ's words abiding in us (v. 7). So mighty is the power of the one who abides in Christ and in whom the words of Christ abide, that Heaven can withhold no gift from him. In fact, the one who is united to Christ by faith and prayerfully meditates upon his words will be so led by the Spirit to pray as to have success without limit (Col. 3:16).

III. The Blessed Issue of a Fruitful Life (vv. 8-16).

1. The glorification of the Father (v. 8). The Father will be glorified

through much fruit-bearing (Matt. 2. Credentials of discipleship (v. 8). The way to prove that one is a child of God is to manifest the characteris-

tics of God in his acts and service 3. Abiding in Christ's love and keeping his commandments (vv. 9, 10). The way to abide in Christ's love is health. to keep his commands.

4. Fullness of joy (v. 11). The way to have fullness of joy is to have Christ's joy in us.

5. Loving one another (vv. 12, 13). The one who abides in Christ and has the life of Christ flowing into him will love his fellow-man, especially his brother in Christ.

6. Friends of Christ (vv. 14, 15). Christ's friends do whatsoever he commands. Being thus obedient to him, we are taken into his confidence and have made known unto us the heavenly Father's will.

7. Perpetual fruit-bearing in love with power in prayer (v. 16). This enriched life becomes possible through the sovereign choice and ordination of

### The Attitude of Hope

It is good and right to hope. It is the natural attitude of an immortal soul. Let us hope that some great happiness awaits us. Let us hope that past pain and sorrow may be forgotten, and that new ambitions, new goods may rise up before us with all their golden opportunities.

### Dare to Venture

He who fears to venture as his heart urges and his reason permits is a coward; he who ventures further than he intended to go is a slave.—Heine.

#### \*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\* Science of Health

By Dr. Thos. S. Englar

ELLELLELLELLELLELLELLE

PERIODIC PHYSICAL EXAMINA-TIONS—Concluded. To have, or not to have, the yearly

physical examination by your doctor? Some of the arguments on each side of this question were presented here last week. On the whole, this column plumps in favor of the periodic "health inventory," believing that the sound arguments in favor of it far outweigh the rather piffling ones offered against it. The case for "our side" was presented last week, and will not be reviewed.

From a report by the U.S. Public Health Service based upon a very widespread and exact survey, we learn that only about 9% of white persons in the United States visit their doctors at more or less regular intervals, not because these persons are sick, but because they hope to avoid sickness. To this end, they have their physicians check the health and activity of their various organs and functions, and advise as to changes in diet and habits as needed, or give medication if required

Other facts, interesting to persons concerned with health problems, appear in this report. Up to the age of 55, more female than males present themselves for health examinations; after 55, the ratio is reversed. Among grownups, the numbers of persons examined rises with increasing age, up to 60-64 years, after which the rate declines again. Quoting the report directly: "No consistent differences were found in the frequency of examinations in rural and urban areas."

To the health enthusiast, convinced of the value of the yearly health survey, 9% seems a regretably small proportion of our population to be receiving its benefits. Even more disappointing is it to be reminded that this figure includes supervision of infants, and physicians' examinations of school children, and that these items represent the largest part of the total. Indeed, the number of men b. Purges the fruitful branch that and women subscribing to this health it may produce more fruit (v. 2). He | conservation service is only about restrains our natural tendencies and four out of each hundred of the general population.

However, in the number of school children, high-school and college students who have periodical physical examinations as a matter of course, may be seen a hope for the future. ice, the pruning knife, Christ's words, The more intelligent of these young people will see the preventive value of the examinations, and will continue to have them made as they enter upon their life's work and, later, as they found homes and families.

The Public Health Service report clearly shows one fact: that very significant differences exist between the high and low income classes, with As the branches draw sap and respect of the number of persons in each class having yearly physical examinations. Many more individuals in the higher income classes take this precaution for their health's sake, than do of those in the lower income brackets. Is there not something to be inferred from this? Yes; that the periodic health examination is a luxury-another one of the things which the rich have and of which the poor are deprived. This fact, if it gets about, should do a great deal to increase the percentage of annual axaminations—in all classes!

Seriously, though, if the prosperous ones, who are presumed to know something of values, find it worth while to give of their time and money to "see their doctor at least once a year"-whether they think they need it or not-it should be worth some thought, and perhaps a little sacrifice, to the man who hasn't so much of this world's goods, but who wishes to conserve, and receive good dividends from, his most precious asset—his

For details, ask your doctor.

N getting out a circular, circular letterorotherpieceof printed matter. The paper, the addressing, the mailing easily total more than the printing. Yet, in a large measure, the Results Depend Upon the Printing.

Let us show you some samples to illustrate our statement

# TELEPHONE REPEATERS WILL IMPROVE R. R. DISPATCHING

Improved telephone train dispatching equipment is in prospect. Engineers of the Bell Telephone Laboratories are working on the development of telephone repeaters which will insure the same high grade type of telephone service on railroad dispatching lines that is now experienced on commercial telephone lines throughout the

More than 60 per cent. of the 255,-States now utilize the telephone for train dispatching. At the present time, according to H. D. Kelso, equipment engineer, in an article appearing in the Bell Laboratories Record, the equipping of train dispatching circuits with telephone repeaters will not only improve transmission, but will also permit of lengthening the telephone circuits. Use of this equipment will make it possible for dispatchers to speak directly with operators or agents at any particular station in a dispatching section. Telephone dispatching sections at present are not very long and no amplifying equip- prove the operation of the present ment is necessary.

Use of the telephone in train dispatching was originated on the New York Central Railroad in October, 1907. Its successful operation, according to the Telephone and Telegraph Section of the American Railroad Association, caused other railroads to follow suit with the installation of telephone dispatching apparatus. The Chicago, Burlington and Quincy was 000 miles of railroad in the United | the second railroad to follow this method of operation. Other railroads quickly adopted the new system so that by 1914 about 85,000 miles of track on 140 different railroads were dispatched by telephone.

Efficient dispatching of trains, always necessary, assumes almost paramount importance on the more congested lines over which trains are often run with only a few minutes interval between them. The telephone has proved its worth in this type of operation innumerable times and undoubtedly the plans of the telephone laboratories' engineers will greatly im-

HOCK MALADY FROM TOO MUCH MINERAL

Leave Mixture Out of Ration, Expert Advises.

By Dr. I. E. Newsom, Veterinary Pathologist, Colorado Agricultural College.—WNU Service.

Young chickens and turkeys in many sections have been affected with a condition known as hock disease, which can be corrected by leaving mineral mixtures out of the ration.

Mineral mixtures should be fed separately and not placed in the mash, to prevent the trouble.

This malady made its appearance among brooder chicks and poults especially. It now appears quite definitely to be due to the addition of too much mineral in the ration. It has been reproduced by the addition of some of the so-called balanced commercial mineral mixtures.

After an affected chick gets to be a few weeks old its legs become bowed outward until they will no longer support the weight of its body. The chick then gets around by walking on its hocks. The hocks become enlarged and the tendon slips to one side.

In brief, the mineral mixtures have often been overdone. In several commercial mineral mixtures on the market there is a little of almost every kind of mineral, many of which are not needed in the production of healthy chickens and turkeys.

As a matter of fact, most poultry feeds contain sufficient minerals themselves. Wherever there is a lack of mineral in the feeds, it can be easily supplied. Oyster shell and bone meal will supply all that is likely to be

#### Lack of Water and Grit Causes Turkey Trouble

Turkey growers may encounter serious trouble in their flocks unless an adequate supply of water and grits is provided, warns O. C. Ufford, Colorado Agricultural College extension poultryman. Mr. Ufford found several such cases while on a recent visit to conduct turkey caponizing demonstra-

Droopiness in turkey flocks may be caused by mechanical trouble, says Mr. Ufford. One eastern Colorado turkey grower has been losing a number of poults. The birds would be droopy for a few days and then die. Investigation showed that the turkeys had been eating considerable coarse feeds such as dry alfalfa stems.

The birds were not getting enough water to moisten the dry stems, and they were not getting enough grits to grind the feed. The result was that the muscles of the gizzard, in trying to grind the dry stems, contracted violently and the walls of the gizzard were punctured by the sharp stems. Death followed.

"Plenty of water and grit available to the turkeys at all times should overcome any danger of this kind." he said. "The water will moisten the stems and the grit will aid in grinding them and eliminating the trouble.'

Mixing Retards Laying Mixing old hens in the same section

of a laying house with pullets seems to retard egg production by the pullets. The hens are apt to be more pugnacious and keep the pullets from the feed hoppers and the water fountains. Not all of the pullets are so easily influenced but if 10 or 20 per cent of the pullets are backward, it cuts down the profits to a large extent.

### Poultry Matters

Capons are also most profitable where they have the run of a grain

Limberneck is caused by the birds eating decomposing flesh or other protein substance.

The raising of poultry ranks fourth financially among the agricultural industries of Florida.

# Minute Analysis Tells

Secrets of Animal Diet Scientists of the bureau of biological survey frequently face a puzzle that would confound most of the legion of puzzle solvers. The question is: What do animals eat? To know whether a given animal or bird is a desirable neighbor or a pest, the bureau often must know just what it

The coyote, for example, is a pest in some areas, but it may be a helpful animal in other localities where it lives largely on rodents and other small animals that may do more damage to crops or forests than the coyotes do to live stock, poultry, and game. To find out what coyotes in any particular area are eating the biological survey workers examine the contents of the stomachs of coyotes that have been killed. By certain indications the examiners are usually able to distinguish fresh meat from carrion, and can as a rule determine whether the source of such material is cow, horse, or sheep.

In the case of prairie dogs, pocket gophers, mice, rats, rabbits, and other small animals the coyotes frequently do not eat the most readily identifiable parts. Teeth and claws would identify the prey, of course. But even without these the laboratory workers can solve the puzzle. They examine the hair and fur that the coyote gulps with the meat. Under the microscope the skilled worker can thus usually identify the genus and often the species of the coyote's prey and so can tell whether in a given area the coyote is doing more good than harm, or the reverse.

### Beavers Work in Pairs;

Are Good Dam Builders The average weight of a full grown male beaver is about 55 pounds. The meat is agreeable to most, although the fat is oily; the tail is a delicacy. They are always in pairs, and work together. Their first business is to insure a sufficient depth and extent of water for the winter, and if Nature has not done this for them they make dams to obtain it. If there are more families than one in a stretch of water they will work together, each appearing to labor on a particular part. The dam is made of earth, and pieces of wood laid oblique to its direction. The wood employed is always of aspen, poplar, or large willows and alders; if pine is used it is through necessity not by choice; the bottom is well laid, and if small stones are at hand they make use of them for the bottom of the dam; the earth is brought between their fore paws and throat, laid down, and by several strokes of the tail made compact; the pieces of wood are, with their teeth, which are formed like small chisels, cut into the lengths they want, towed to the dam and worked in, and thus the dam is raised to the height required. Dams erected by the art of man are frequently damaged or wholly carried away by violent freshets, but no power of water has ever carried away a beaver dam.

### Ruins of Zimbabwe

The historic ruins of Zimbabwe are situated in the Sabi river district in the beautiful valleys of Monomotapa, and is one of the most enthralling spots in South Africa. The valleys are clothed with luxurious vegetation, and are characterized by prominent curiously shaped granite kopjes. Although the country looks to be impassable, the maze of its undergrowth is intersected by innumerable kafir paths. Gazelles and antelopes abound in this country and naturally attract a horde of wild beasts, who find an unlimited amount of prey. This territory, now in southern Rhodesia, was formerly known as part of Gazaland, and is one of the richest areas in South Africa. On this account, it has attracted the attention of concession hunters in the past.

Girl, 13, Owns Railroad

The Augusta Tramway and Transfer company of Arkansas, the shortest railroad in the United States registered by the federal bureau of economics, is operated by Joyce Short, thirteen years old. She acts as engineer of a small locomotive, pulling one coach over a system a mile long.

Virgin Islands Include

Numerous Small Islands The Virgin group comprises a large number of small islands-only a few of them of any considerable importance-lying to the east of Porto Rico between the Caribbean and the Atlantic ocean. They include not only those which the United States bought from Denmark, and which were formerly known as the Danish West Indies but also a number which constitute a British colony called the Virgin islands.

Columbus discovered the group on his second voyage in 1494. It is said he was amazed at the number of them, and feared he would not have enough saints' names to go roundso he put them under the sacred patronage of the 11,000 martyred virgins of St. Ursula.

Danish traders early established themselves on St. Thomas, and by a sort of squatter sovereignty the island was taken under Danish administration in 1671. St. John and St. Croix and smaller islands were added in 1733. The British, meanwhile, appropriated the rest of the group.

In 1867-68 the American State department sought to buy the Danish islands. Denmark was willing to sell, and the islanders were eager for the transfer, but the United States senate refused to ratify. In 1902 a second treaty was signed, and the United States was to have the islands for \$5. 000,000; but the Danish upper house did not ratify. In 1917 the transfer was finally effected, this country paying \$25,000,000.

#### Sea Lion Is Wary of Man and Hard to Photograph

Living in the wild, reef-protected waters off the coast of British Columbia, the sea lion is extremely wary of man and is practically impossible to photograph at close range. The males are from 11 to 13 feet in length, girth 8 to 10 feet, weight from 800 to 2,200 pounds. Females are from 8 to 10 feet in length, average 500 to 800 pounds. The species hunted, says the Montreal Herald, is the Steller's or gray sea lion, first noted by a Russian of that name who accompanied Vitus Bering on his ill-fated voyage in 1740.

They dwell on the Virgin islands, rocky bare reefs rising just a little above the sea level, lying in a triangular-shaped territory of about 65 miles off the coast of British Columbia. Here they rest, breed and have their young, two pups being born to each female about the middle of June.

Enormous as are these beasts, they are inoffensive, and from them the attacking machine-gunners and riflemen have little to fear. Only the stormy mother sea strives her best to save her children from these men who give no mercy. The Virgin islands lie in most dangerous uncharted waters, swept by the north Pacific. Hunting only can be done in fairly quiet water.

Jealousy Held Vital to Love Chinese are among the world's worst lovers, declares M. Maurice Dekobra, the French love-story writer, and during his visit in China he has been telling the men how to show their devoted affection. Because the men do not make love properly, he says, the Chinese women are hard and untamed. He likens them to "attractive panthers." They are full of the fighting spirit, quick at repartee and very ready to challenge their menfolk. That, says M. Dekobra, shows the wrong spirit. As lovers the men lack imagination, romance and sentimentality. They make no attempt to understand women and neglect them after marriage. Moreover, they con-

sider it undignified to be jealous-and

jealousy is necessary to true love, de-

clares Dekobra.

Radios in Rickshas Shanghai, China, is the city where East meets West and a queer combination of ancient oriental customs and the latest modern fads are part of the everyday life of the city. One of the latest is the installation of radio sets in the jinrickshas which are the principal means of transportation of the city. The two-wheeled, man-drawn vehicles have been used for hundreds of years by the wealthier classes of Chinese. The narrow, wall-lined streets of the native quarter make any other form of transportation impossible. In China, with its more than 400,000,000 population, man power is the cheapest in the world. It is an incongruous sight to see a coolie hauling his passenger in his ricksha and listening to the strains of a modern dance band.

Sunshine Kills Rattlesnakes

One ordinarily thinks of a desert rattlesnake as basking in the sun all day long awaiting his prey. Surprisingly, however, direct sunshine quickly kills this cold-blooded reptile. This was proved by members of the Yosemite Field School in Yosemite National park. A specimen rattlesnake was desired for museum exhibit but in a natural unmutilated condition. Members of the school, therefore, placed a rattler in an exposed position where he died in convulsions under the direct rays of the sun in 171/2 minutes. -Scientific American.

Sirius, Brightest Star

Sirius, the brightest star in the sky, is one of the earth's nearest star neighbors. Its distance from our globe is a mere 8.8 light years, of 51,000,000,000,-000 miles. Its mass is 2.4 times that of the sun. The mass of the heavyweight companion of Sirius is only 85 per cent of that of the sun, and it emanates only 1-360th as much light.

WEEDS FOR POULTS SERVE AS GREENS

Young Turkeys Need Plenty of Succulent Feed.

Poults will consume large quantities of green feed if it is available. The digestive tract of turkeys requires lots of bulk and succulence and green feed is necessary for them if good performance is to be had. And, if large amounts are consumed, green feed will help cut down the consumption of other costly feeds, not only promoting a better growth but making for efficient production as well. When poults are small, says a correspondent in the Missouri Farmer, succulent greens such as lettuce, spinach or rape, should be free of stems and cut finely so as to avoid choking. Later, as the poults grow larger, the greens need not be cut although the flock should be watched for choking. As the season advances succulent greens become scarce, when other sources of greens must be sought.

The best sources of greens later in the season are alfalfa and clover, but where these are not available weeds can be fed with safety and at a profit. Generally speaking, weeds should be fed that are relished by such animals as cows, and weeds that cows do not eat readily such as Jimson, burdock, cocklebur and iron weeds should be avoided. Some of the best weeds to feed are wild lettuce, lambs quarter, worm weed, sour and narrow dock, morning glory, and pig weed. Turkeys are especially fond of narrow and sour dock.

Stems should not be given, the leaves being plucked off, but where stems are accidentally fed they should be removed from the turkey pens after the leaves are eaten off. Occasionally, when weeds are fed, a turkey will become choked on a large stem and when this occurs it should be caught, held by the feet with head downward and the stem worked out of the throat and mouth with the hands. The operation is simple and will not harm the

#### Shavings Are Superior

to Straw to Protect Eggs Shavings in the nests, straw on the floor, and wire netting over the dropping boards - such material and equipment lead to the production of clean eggs.

These are the results of tests as reported by P. B. Zumbro, extension specialist in poultry husbandry for the Ohio State university.

Under such conditions only 23 per cent of the eggs produced were dirty. When straw was used for nesting material in place of shavings, the proportion of dirty eggs rose to 49 per cent. When no nesting material was used, the percentage of dirty eggs was 77.

Consumers want eggs that are free from stain and dirt, but they do not want washed eggs. Washing not only takes time; it also removes the protecting "bloom," which detracts from the appearance of the egg.

It was found that one nest is required for each five birds in the house. Gathering two or three times each day was recommended by the investigators.

Sanitation Important

The poultryman should exercise care with reference to sanitation at all times, but in hot weather it is necessary to take extra precaution. The presence of a dead chicken on the range may result in limber neck which is a symptom of an acute intestinal disorder such as comes from ptomaine poisoning. Then, too, one should be careful to provide liberal quantities of clean water and this necessitates the daily cleaning of the drinking utensils. Anything which can be done in the way of sanitation to discourage the presence of files may also discourage tape worm infestation. Frequent cleaning of the poultry house and periodic inspection of the house for the presence of mites may do much to eliminate some of the losses in the poultry yard.—Missouri Farmer.

Greens and Water Needed Alfalfa or clover is a splendid source of greens and range pens should be located in such fields if possible. Poults drink a large amount of water, 100 poults using about 20 gallons per day when well grown. The source of water should be close at hand if possible. A good way to supply the flock with water is to haul it in a tank or water wagon, the wagon to stand near the pen where it can be syphoned out into the watering tanks or troughs as needed.

Discard Defectives

Pullets with crooked beaks, toes or backs, or other body defects, which may prevent the birds from getting an abundance of feed, should be discarded. If pullets are to be trapped as prospective breeders, they should be free from all standard disqualifications. If they are used only for commercial egg production, such defects as stubs, slight color defects, comb defects and so on may be disregarded as long as the birds are of good size and are vigorous.

TANEYTOWN LOCALS. (Continued from First Page.)

Miss Estella Essig, spent the week-end with friends at Cumberland, Md. John Stratton is spending some time with relatives at Youngstown, Ohio.

Mrs. J. D. Overholtzer, spent several days, this week, with friends in Westminster.

Miss Margaret Bowers, of George St., is confined to bed with a case of Scarlet Fever.

Mr. and Mrs. Frank Crouse, spent Sunday with Mr. and Mrs. John Eyler, near Ladiesburg.

Mrs. Mary Ott is visiting her brother, Mr. William Ott and family, at Mercersburg, Pa.

Mrs. T. C. Fair, of Dillsburg, Pa., is the guest of Mrs. Calvin T. Fringer and family, this week.

Mr. and Mrs. John Aulthouse and Miss Abbie Fogle, spent last Sunday with Miss Lulu Birely, at Keymar.

Miss Pauline Brining returned, on Monday to her position as nurse at Foxcroft School for Girls, in Virginia

Miss Molly Wheatley, Miss Ida Edwards, and Mr. Paul Griffith, are taking an extension course at West-ern Maryland College.

Mrs. Charles Bostion and son Alton, spent Sunday with her daughter and son-in-law, Dr. and Mrs. Wilbur Meh-ring and family, at Silver Springs, Md

Mrs. Amos Wantz, of Mt. Washington, and Mrs. Arthur Coombs, of Hagerstown, came Wednesday to spend a few days with Mrs. Mary Wilt.

Mr. and Mrs. Elmer Feldman and daughters, Misses Elizabeth and Virginia, William Fowler, Miss Sallie Fowler and Miss Catharine Will, of Baltimore, spent Sunday with Mrs. Mary Wilt.

A child health conference for the examination of babies and preschool children, will be held in the Firemen's Building, Wednesday afternoon, Oct. 10th., from 2 to 4 o'clock. Bring your child and have it examined free.

Chas. G. Baumgardner left at our office, this week, an old-time winesap apple that was kept in cold storage at Front Royal, Va. It is in perfect condition. The owner entirely forgot that he had several barrels left in

Dorry R. Zepp is again at his home in Copperville, having left the Hospital about two weeks ago. He is looking well, considering his very serious injuries, and gets around with the use of a cane. His case against the Electric Company has not yet heen tried been tried.

Taneytown Council No. 99, Jr. O. U. A. M., held its get-to-gether meeting, on Wednesday evening, Oct. 3rd. Toastmaster Grayson Shank opened the meeting by singing America with prayer by Bro. H. L. Minnerick, S. C. Sec., and addresses by the National and State Officers; also music by the Morehead family. Refreshments were served. were served.

Mr. and Mrs. Joseph B. Smith and family, entertained on Sunday: Mr. and Mrs. Percy Williams and daughters, Margaret and Betty Ann; Mr. and Mrs. E. R. Diane and daughter, Dorothy Ann; Mrs. Mary A. Smith; Miss Nellie Mae Smith and Miss Estelle Machalowski, all of Baltimore; Miss Helen Burkee, McSherrystown; Mr. J. W. Campbell and Mr. L. A. Smith, of Westminster, and Mr. Paul Emmit and friend, of Washington,

### GAS TAX REVENUE.

The total gross revenue produced y Maryland's four-cents-a-gallon gasoline tax for the fiscal year ended September 30, 1934, was more than \$8,000,000, according to figures re-leased by J. O. McCusker, Deputy State Comptroller.

The total of \$8,056,865.57 with the amount for September only estimated, was \$450,259 greater than that produced by the tax in the preceding year. Every month except February showed an increase in collections over the corresponding month of 1933.

Mr. McCusker pointed out that the totals given out were necessarily tentative, since oil companies have until the end of this month to make the September payments. In addition, he said, the present totals do not allow

Refunds usually amount to around \$500,000 yearly, Mr. McCusker said, and in recent years business conditions have caused taxpayers to give particularly attention to their tab bills and seek every possible allowance or deduction. When a tax is protested, the company pays the tax and if the protest is found to be justified the amount involved is refunded.

#### RAILROADS PLEAD FOR HIGHER FREIGHT RATES.

The railroads of the country are pleading for increased freight rates. Their plea is based on the fact that what they must buy is higher, and that they must be given authority to sell at higher prices. The logic of this can not be escaped, providing their operating expenses, such as salaries, have been cut to reasonable proportions.

The claim is made that operating expenses, over which they have no control, has been increased by nearly \$300,000,000 annually, and that without the asked for increases, operating expenses for the year will exceed income by \$73,000,000, as compared with

less than \$6,000,000 in 1933. Every community in this country still must depend on railroads, at least for freight service, notwithstanding the immense carrying of freight by trucks. The plight of the railroads is largely charged against the NRA, and the adoption of codes

The situation is a critical one. needs the wisest consideration. The people also need to consider whether they can get along without railroad service, and how?

POSTMASTERSHIP IN FAMILY | CARELESS IN CASHING BONDS. FOR 134 YEAR PERIOD.

With the recent reappointment of G. T. Brown as postmaster at Browns-G. T. Brown as postmaster at Brownsville, Washington county, that office has been in the Brown family for 134 consecutive years, with the exception of one term under President Grover Cleveland. John Brown, grandfather of the present postmaster, was appointed to the office in 1830 by President Andrew Jackson. He served until his death at the age of 98. He was the oldest postmaster in point of was the oldest postmaster in point of service in the United States. He was succeeded by his son, Cornelius Brown while the present postmaster, a son of Cornelius, was appointed in 1898 by Postmaster-General, James A. Gary and has served continuously since. John Brown, first member of the family to serve as postmaster, was found-

#### **NEW SUBSTANCE TO** KILL CANCER CELLS

#### Important Discovery Made by Vienna Doctors.

Vienna.-The antidote of cancer, a substance which dissolves and kills the cancer cells or microbes, has been found by Vienna scientists working under the guidance of Dr. Adolf Edelmann, director of the Vienna Cancer Research institute, founded by the late American millionaire, S. Canning Childs.

Dr. Edelmann and his associates have produced from human cancerous tissues an organic substance which dissolves cancer cells just like the "bacteriophage" dissolves the bacilli of its own kind. J. A. In wa

"Bacteriophage" or bacterium-eater, discovered by the French bacteriologist d'Herelle, is a special type of cell produced only by organisms attacked by a contagious disease. The bacterium eaters can be found in the blood of diseased persons and they are believed to constitute a sort of counter-attack of the organism on the disease germs.

The "bacteriophage," however, can also be produced artificially in a "culture" of bacteria. This fact became of tremendous importance, as it enabled bacteriologists to prepare serums

against various contagious diseases. Now Dr. Edelman and his colleagues, of whom the most prominent is the professor of Vienna university, Dr. Fritz Silberstein, claim to have found the "bacteriophage" of cancer. They named it "Autolysat" or "self-solvent" because it could not yet be proved whether or not a cancer-bacterium exists at all. But whether cancer cells are containing parasitic microbes, or are just diseased cells of the human organism, "Autolysat" dissolves them and prevents the growth of new can-

### Perfect X-Ray Is Hot

**Enough to Make Jewels** London.-An X-ray machine ten times more powerful than any other

in the world is nearing completion at the Davy-Faraday laboratory of the Royal institution, London. It will have a power of 50 kilowats, or nearly 70

This apparatus will be used for "high-speed X-ray analysis." It will show exactly how the innermost atoms of materials are arranged.

One of the mysteries which has been solved by "X-ray analysis" is that of the permanent wave. Beauty specialists found various methods to produce the waves, but even scientists did not know why they were "permanent."

Now X-rays have shown that when the waving specialists have finished with a girl's head the arrangement of the billions of atoms in each hair has been completely changed.

This new machine will be able to produce rays of heat so intense that if trained on a block of steel several feet thick they will instantly burn

Artificial diamonds could also be produced by training the heat rays on carbon; and rubies made from aluminum oxide.

### Easy Cure for Insomnia

Is Just Stop Thinking London.—A sure cure for insomnia is

to stop thinking. And to stop thinking, according to

Lilias MacKinnon, a well-known British educationist, it only needs a little McKinnon said:

"With practice one can learn to stop

thinking altogether. The way to do it is to relax the muscles of the face, including the muscles of the eyes, and gradually all thought will drift away. "You will have a feeling of delightful drowsiness and you will be able to fall asleep at will and at any time.

This is a certain cure for insomnia."

A news dispatch from Washington to the Frederick Post says; "Some Americans are so careless, it developed today, that they never have bothered to collect \$20,000,000 owed

them by Uncle Sam.

The government wouldn't mind paying up, but can't do anything about it until the legions of the forgetful dig into their mattresses and deposit boxes for the matured government securities they should have traded long

ago for cash.
Some of the bonds date back to the first United States Government se-curity issue before 1800, which ma-tured more than a hundred years ago without some holders ever presenting them at the Treasury for redemption Most of them, however, represent un-redeemed Liberty bonds and war sav-

ings certificates.

The securities which investors have forgotten, or lost, range from the 25-cent war savings stamp to \$10,000 gold-backed Liberty bonds.

Several thousand more careless in

vestors are likely to be added to the list in a few weeks when \$1,250,000,000 additional of fourth Liberty loan

Taneytown Grain and Hay Market.

# REPUBLICANS, REGISTER!

Tuesday next, October 9th., is the last day for registration. Every Republican who is entitled to register and who is not now registered should attend to this important duty on that date and thereby be prepared to have a hand in the Republican victory due in the State of Maryland, on November 6th.

If you have no way to get to the Registration Office, communicate that fact to your Precinct Committee and a way will be provided for you.

> (Published by authority of the Republican County Central Committee of Carrall County.)

The Federal Deposit Insurance Corporation WASHINGTON, D. C.

\$5000 MAXIMUM INSURANCE \$5000

# THE TANEYTOWN SAVINGS BANK

has received from the Federal Deposit Insurance Corporation at Washington the official signs which will hang at all receiving windows as visible evidence that the depositors of this institution are insured.

## THE TANEYTOWN SAVINGS BANK

is one of more than 14,000 licensed banks in the country which are receiving these signs. Insured banks are able to offer protection to their depositors up to \$5,000. Statistical studies have shown that this maximum fully protects more than 97 percent of all the depositors in

A statement by the Federal Deposit Insurance Corporation fol-

"The purpose of the signs is to let depositors know which banks are insured. Heretofore, although 90% of the licensed banks are insured, depositors have had no easy means of identifying them.

"If, by any unforseen circumstance, an insured bank should suspend, the Insurance Corporation would begin paying off the depositors just as soon as a receiver was appointed for the closed institution. The depositors would receive their money in a few days instead of waiting months or years as was the case in the former method of liquidation. This is not only a benefit to the depositors, but it saves the community from a terrific economic and social blow. When the depositors receive their insured accounts they assign their claims to the Insurance Corporation. Thereafter liquidation proceeds on a business-like basis with the maximum chance of the Corporation and other creditors being paid in full." ing paid in full."
