THE DAY! THE DAY! THE CARROLL RECORD

VOL. 41 No. 31

TANEYTOWN, MARYLAND, FRIDAY FEBRUARY 1, 1935.

\$1.00 PER YEAR

Items of news from town, or vicinity are always wanted for this column. Especially accidents, sales of real estate, fires, important happenings, visits to or from the community social events, and all matters of general interest to those at home, and away from home.

This column is not for use in advertising any money-making program, fair, supper, party or sale; except for non-denominational charities or Fire Company or Public Library support.

Churches, Lodges, Societies, Schools, etc., are requested to use our Special Notice Department for money-making events.

Miss Virginia Duttera, moved on Thurhday to Littlestown, where she has recently purchased a home.

Mr. and Mrs. O. J. Weybright near Gettysburg, Pa., spent Wednesday with Mr. and Mrs. J. E. Flohr.

Mrs. Edward P. Welker, of Pleasant Unity, Pa., is spending some time with her parents, Mr. and Mrs. Geo.

Mr. and Mrs. John Baumgardner, are spending this week with their daughter, Mrs. Charles O. Hesson, Baltimore.

Merle S. Baumgardner attended a Baker's convention and banquet at the Lord Baltimore Hotel, Baltimore, on Tuesday night.

The joint social of the Mite Society and Brotherhood of the Lutheran church will be held on Wednesday night, Feb. 6th.

Mrs. N. B. Hagan is still being cared for by her niece, Miss Norberta Martin, of Philadelphia. She is able to be up and around.

Charles F. Cashman will make his farming equipments, March 19, and will return to his town property thereafter, with his family.

George F. Duttera, Littlestown, visited his daughter, Mrs. Claude LeFevre, over the week-end, and was a guest at the Chamber of Commerce banquet, on Monday night.

Lloyd Lambert, who has been staying with Mr. and Mrs. John Stouffer for the past six weeks on account of scarlet fever in his home, has returned to his home on Wednesday.

Mrs. Thomas F. Vestal, of Winston, Mrs. Thomas F. Vestal, of Winston, Salem, N. C., spending several weeks with her parents, Mr. and Mrs. B. B. Chenoweth. Dr. Vestal is spending this week-end at the same place.

As will be noted in an advertisement, in this issue, The Birnie Trust Company announces a second payment of Five Percent on Certificates of Beneficial Interest, on and after Feb.

Kermit Reid, an employee of B. & B. Bakery, met with a painful accident on Wednesday morning, when he cut his hand severly on a barrel which required the service of a doctor and seven stitches.

Monday's thermometer readings varied from 6° to 14° below zero, locally. A report from Union Bridge gave a 20 degree below reading. This Friday morning, from 4 to 6 degrees below was the record.

The Christian Endeavor Union rally that was to be held this Friday night, February 1st., at 7:30 P. M., at Keysville, has been postponed due to road and weather condition. The date will be set later, depending upon weather conditions.

Mrs. M. F. Saylor, Littlestown, in renewing her subscription, says; "I don't want to miss one paper as that is one of the things I get the most pleasure out of. I am a shut-in and it brings me a lot of cheer. Was glad to read another letter from John

Frozen water pipes, furnace troubles and general freeze-up experiences have kept our plumbers on the go, for some time. The garages have also had their own line of trouble calls, and the doctors have been busy too, with theirs. About the only trouble The Record office has had, seems to be due to frozen ink, that prevents customers from writing checks for bills due.

Mr. and Mrs. Percy V. Putman, spent Wednesday of this week in Washington, D. C., attending the midwinter commencement at the Abbott Vocational School of which their son, Thurston Elroy graduated in the electrical department carrying off some of the honors of the class of ten graduates. Miss companied them. Miss Nettie Putman ac-

tlestown, well known by some in Taneytown, will be found in this issue. Mr. Kump and the late Charles H. Basehoar, were once owners of the original Eckenrode building, now occupied by the A. & P. Store. Early in this winter he several times visited The Record office, his acquaintance with the Editor being of long stand-

regulations concerning the removal of snow from our sidewalks. Requiring the snow to be removed within a certain the snow that the snow th tain time after the snow ceases falling, does not in all cases result in well cleared walks. For instance, last week some of the cleaning was delayed for hours until after many persons were compelled to use the sidewalks, and there was a heavy ridge of solid snow left in the centre of the walks, that was not cleared away at all, but only the loose unpacked snow on each side of the ridge. The regulations should require the snow to be cleared off more frequently, except possibly when the fall is at night, when it should be taken off early in the morning, whether snow is still falling or not.

(Continued on Eighth Page.)

THE MEMORIAL HIGHWAY

From Washington to Gettysburg is Again to the Front.

The introduction of a bill in the Senate, on Monday, by Senator Robinson, of Arkansas—for Senator Millard F. Tydings, who is now returning to this country from the Philippine islands— for a memorial highway from Washington to Gettysburg, revives the interest in the Washington--Lincoln memorial highway that has been agitated for years, the last time about five years ago, when Senator Tydings favored a highway via Silver Springs, that would pass east of Frederick and be a direct route between the two

Such a bill has also been introduced in the House by Representative Haines, Pa, and for the present is limited to an appropriation of \$10,000 to be expended by a Commission for the employment of a secretary, and clerical work necessary to the preparation of places.

It will be remembered by the sections most interested, that Frederick city influences antagonized the former proposition, and naturally backed a highway that would pass through that city, and will do so again, providing the former Silver Springs route is con-

At the time this highway was agitated previously, both Carroll and Frederick counties sent delegations that appeared before the Senate Committee in charge in the Senate Office building, Washington. The Carroll County delegation favored the direct route that would have bisected Carroll county south to north. Should the present bill come up for action, and the merits of routes be in order, no doubt a like interest will be shown.

Since the Federal government is undertaking projects for the relief of unemployment, perhaps the memorial highway proposition may have a betchance to be considered than it

HIGHWAYS, AND DIRT ROADS.

The strenuous and expensive efforts to keep the main highways open, last week, and nothing done for the dirt roads, but served to make the sorry plight of the latter the more apparent and to enlist honest sympathy on the side of the thousands who have for so long been compelled to suffer neglect.

The building of more "highways," or the widening of those already built, would be little less than a crime against both patient and impatient taxpayers who own property and must live along the back roads, yet who are easily enough found by the tax-

We do not know what the public road program for the year will be, nor whether the State Roads Com-mission, or the counties, will build and repair roads; but what we do know is, that there are thousands of interested dirt-roaders watching to see what happens, and are likely to remember

GEO. WASHINGTON'S RULES OF and sanitation. CIVILITY

The Record publishes the first of three installment of George Washington's "Rules of Civility and Decent Behavior in Company and conversa-tion," as published by the George Washington Bi-centennial Commission

We have no evidence of a copyright and therefore feel at liberty to publish the 110 rules. They should be read, and clipped, as they are as excellent now as when originally written by the illustrious Father of our country. They appear on our editor-

FARMER'S UNION BANQUET TO BE HELD.

The Farmer's Union banquet will be held at Sauble's Inn, Feb. 14, at 6:30 P. M. Bim Hagerman and his broadcasting orchestra will furnish

music for the occasion.

The toastmaster will be U. S. Senator Smith, of South Carolina. Other speakers will be E. H. Everson, president of National Farmer's Educational and Co-operative Union of America; Congressman Wm. H. Lemke, of N. D., and E. E. Kennedy, Secretary of National Farmers' Union.

Tickets can be secured from the fol-Tickets can be secured from the following persons: H. L. Hoke, Walter Fritz, Sterling Bixler, Lawrence Haines, Clarence Bachman, Wm. Naill, Murray Myers, Walter Hilterbrick, Charles Sell, Harry Welk, Wesley Shoemaker, Wilbert Hess, mpanied them.

Wesley Shoemaker, Wilbert Hess,
John Harner, Carroll Hartsock and
Raymond Stuller.

All farmers and their wives are welcome to attend this banquet.

A BIRTHDAY SURPRISE TO O. E. DODRER.

O. E. Dodrer, Mayberry, cashier of the Taneytown Savings Bank, was given a birthday party, one night last Evidently, there should be better week, that was arranged as a complete surprise. An evening of games

> Hose present were: Dr. M. M. Fleagle and Dr. Roberta Fleagle, of Hanover; Rev. and Mrs. Miles S. Reifsnider, Mr. and Mrs. Ira Rodkey, Mr. and Mrs. Howard Maus, Miss Evelyn Maus, Miss Mary Katherine Maus, Noah Babylon and Miss Isabel Babylon, near Baust Church: Mr. and Mrs. Martin Koons, Mrs. L. Grace Fleagle and Miss Mary Yingling, of Taneytown; Mr. and Mrs. Edgar K. Fleagle, Stoner Fleagle, Miss Kathryn Fleagle, Miss Frances Stone-sifer, Mrs. Maude Myers and daughters, Kathryn, Marie, Betty, Truth and Eileen; Mr. and Mrs. O. E. Dodrer and Mr. and Mrs. George E. Dod-

CHAMBER OF COMMERCE BANQUET NO. 5.

It was good to be there, and everybody was filled and happy.

The fifth annual banquet of The Taneytown Chamber of Commerce, on Monday night, at Sauble's Inn, was its customary big success. There were 192 present. President M. C. Fuss in his always efficient style, presided and acted as toastmaster. Due to the in-disposition of W. Rein Motter, who usually directs the vocal features, Miss Estella Essig, very efficiently substituted for him, and opened the program with group singing of a number

of ever popular airs.

The usual introduction of the officials of the C. of C., and the new members admitted during the year, then followed, and the statement was made that the organization now numbered 87. Rev. Guy P. Bready, the Secretary, who has so efficiently performed the duties of his office, was compelled to be absent, due to indisposition.

The new members are George A. Shoemaker, Delmar Riffle, Clarence B. Reaver, Russell S. Feeser, Oscar D. Sell, Edward J. Nusbaum, Robert E. Baumgardner, Jacob Bornstein, Ernest Hyser and Murray Baumgardner.

Brief addresses were made by the following: Father Lane, as one of the members, expressed his praise for the energetic manner in which the various officials of the body conducted affairs, and in like terms for the citizenry of Taneytown in general. Walter Spurrier, president of the Mt. Airy Chamber of Commerce, told of the activities of the southern county body, and invited close co-operation between the two. Robert Smith, representing the Potomac Edison Co., spoke of his annual pleasure in visiting the Taneytown banquet and said our C. of C. was unusual in keeping up continued interest.

Jacob Bernstein, representing the Baltimore Clothing Manufacturing Company that operates the model Taneytown factory said that his various contacts with the C. of C. that substantially invited the location of their factory in Taneytown, had always been most satisfactory, and ar-ways been most satisfactory, and re-ported that the factory now had 110 at work, and that by July 1 another unit would be added that would require 50 more operators, with a prospect of 200 in all. President Fuss added that the firm had met all of its various obliga-tions and that the co-operative spirit between the two hodies was fine. between the two bodies was fine.

Harry B. Fogle, Uniontown, very neatly responded to the call on him and quoted James Whitcomb Riley's Brotherhood of Man very appropriately. Howard Roop representing the New Windsor C. of C. followed briefly; and Mayor Shoemaker, speaking for the City Council, among other things stated that a survey made by the State Board of Health gave Taney-town an excellent standing for health

and sanitation.

Rev. L. B. Hafer, Gettysburg, expressed his pleasure at being present as an invited guest; told a good story land, I wish to protest any increase in about a man and wife at a baseball game, and another concerning a wedding ceremony at which the lights went out; but many in the andience somehow became imaginative and in a rather hilarious manner tried to add more to the address than the

speaker supplied.

Norman R. Hess, County Commissioner, who was later dubbed by the speaker of the evening as "the politician," told the audience that the Commissioners wanted to be represen tative of the majority, and invited criticism—and also commendation,

when due. Rev. I. N. Fridinger, said no speech from him had been asked, and consequently had none to make, but added to the general commendation of the

Rev. A. T. Sutcliffe, who had just returned from Florida, was called on for a "fish story" and complied, but insisted that while no whales were caught, the actual fish taken were real

Then came more vocalization by way of pleasing variety, and appropriately preceding the main feature, an address by Thomas R. McKeldin, Baltimore.

The representative of The Record attended the event mainly to exercise his long-short-hand abbreviation method and do justice to at least the substance of the address, but early in the attempt, had to give it up. Mr. McKeldin can't be "reported"—he must be heard. He very rapidly went from grave to gay, from wit to pathos, from the sublime to the ridiculous, from sense to nonsence, and in a fashion all his own, played on all of the keys of

He sketched an imaginary tour that included a visit to Monticello the home of Jefferson; Wall Street and the old Trinity Church graveyard; a trip on the Berengaria past the Statue of Liberty to Paris and back again, each of numerous points being hitching posts from which were released a different flock of thoughts, quotations and varied gems of truth or imagina-

His efforts covered a wide range, and his efforts covered a wide range, and he more than made good as an "after dinner" speaker; which raised the question of what he might have done had he spoken "before dinner" when his brain might have worked with even greater ease. Mr. McKeldin, by the way, is reported to be a prospective Republican candidate for Mayor of Baltimore. He was secretary to of Baltimore. He was secretary to former Mayor Broening, and is well acquainted with City Hall matters in

And so closed another big success -not forgetting the banquet and its servers—to the credit of the Taney-town Chamber of Commerce.

Senate Preparing to Consider Public

The House, on Friday of last week, again voted down all restrictive amendments, and in four hours authorized an issue of Bonds to near Twelve Billions of Dollars. And in additional control of the contr dition authorized an issue of "baby bonds"—Savings certificates of \$25.00 and upwards to small investors to bear not to exceed 3 percent interest. This action was a follow-up intended to finance the \$4,880,000,000 public works

and other expenditure programs.
Entrance into the World Court by
the United States was defeated in the Senate, on Tuesday, 52 to 36. This was President Roosevelt's first defeat by the new Senate, and was the fourth time the effort to take this country into the world court has failed. The vote failed because the proposal did not receive a two-thirds vote in the Senate. In other words, the vote of 36 "against" the proposal, defeated the vote of 52 "for" it.

The Senate Finance Committee,

Senator Glass, chairman, is considering the big appropriation bill, and making an effort to have it at least partially itemized, but so far without much success. It is thought that the bill will be amended before it can be

DR. SANDERS HOME DAMAGED.

The home of Dr. and Mrs. C. F. Sanders, of Gettysburg, was extensively damaged by fire on Sunday night, the loss being estimated at \$3500. to \$4000. reported to be cover-

ed by insurance. Dr. and Mrs. Sanders were at home sitting in front of the open fire in the living room, when they discovered the fire, which broke out in the partition between the living and dining room, and the flames followed the partition to the second floor where two large

clothes closets were burned.

The Fire Company found the fire difficult to handle. The flames on the first floor were soon under control but the second and third floors were not so easy. The contents of the whole house were damaged by smoke, and the furniture, clothes and books in the bedrooms were destroyed. The greater portion of the furniture in the living room was removed by the fire-men, assisted by students.

Among the priceless articles destroyed were a number of souvenirs collected by Dr. and Mrs. Sanders on several European trips.

FREIGHT RATE INCREASE ON COAL OPPOSED.

Annapolis, Md., Jan. 23-"To ask our citizens to carry any additional burdens, making more difficult their ability to live, is not to be considered," said Governor Harry W. Nice, Md., in a letter sent today to the Interstate Commerce Commission, posal of the railroads to increase freight rates on coal throughout the reports on bills.

freight rates on coal which would or could possibly add to the cost of the coal to the consumer.

"At this moment the State of Maryland is making a desperate effort to solve many of the problems evolved by the depression, and to ask our citizens to carry any additional burdens, making more difficult their ability to live, is not to be considered."

Fourteen other state governors also have advised the Interstate Commerce Commission that they oppose the carriers' proposal for increased freight rates on coal. The other gov-ernors were from West Virginia, Tennessee, Virginia, Kentucky, North Dakota, South Carolina, Minnesota, Wisconsin, Michigan, Ohio, Georgia, Pennsylvania, Indiana and Illinois.

(But, suppose the Railroads now carry coal at a loss since coal by track delivery hos out the reverse of

truck delivery has cut the revenue of Railroads from this source? Is the whole country ready for the Railroads to go out of the coal hauling bust-

READY TO AID RELIEF.

The Record will be glad to help any who may be in need, within its circulation, by giving public notice of the fact in order that the public, or some organization, may come to their relief. There may be some who, for one reas on or another, are deserving of aid, but have not made it known.

Pride in prosperity turns to misery in adversity.—Proverb.

LEGISLATORS MOVING RATHER SLOWLY.

Greater Speed is Indicated within Another Week.

The legislature re-convened, on Tuesday night. Governor Nice again submitted his plan for an investigation of all state departments. The bill would provide for the appointment but the Covernor of three men to make by the Governor of three men to make the investigation, and the results would be reported to the session of 1937. The proposal is in line with the pledge made by the Governor to the people, during his campaign for elec-

A message was sent to the Governor and the floor leaders of both houses by State Treasurer Gordy, that funds must at once be provided the running expenses of the State government, and urged the sale of the Northern Central urged the sale of the Northern Central Railway annuity of \$90,000, as a quick way of producing the necessary funds. The annuity is capitalized at \$1,500,000, but should meet with ready sale at approximately \$2,500,000, according to Mr. Gordy.

Opposition to the investigation bill was immediate, "It would cost too much," "What is the use in throwing good money after bad?" "The Senate and House can investigate any

and House can investigate any changes." These were some of the individual opinions, which likely indicate that no investigation will be

A tax on beer seems likely, and it is said this will produce \$1,250,000 a year revenue. It would be paid by the manufacturer, and likely be pass-

ed on to the consumer.

It is noticable that the Baltimore Sun, for the first time in years, is not publishing a daily schedule of bills in-troduced, and action taken thereon, but confines its reports to major mat ters only—a policy that does not give readers throughout the state information as to local bills that is of considerable interest.

A number of conferences and plans for solving the financial situation were gone over this week, with indications that by another week definite plans will be in shape for action.

A bill has been introduced in the

Senate that would make it impossible for any Governor to succeed himself, and the bill would also include "repeaters" for other offices.

In the House, the four women dele-

gates have introduced a bill, qualifying women for jury service, a bill was also introduced in the House designed

to prevent lynching cases.
Governor Nice signed his first bill, the first to be passed by the House and Senate. It was a local measure to allow Commissioners of Harford county to render financial aid to volunteer fire departments, and libraries. terstate Commerce Commission, Washington, D. C., regarding the proyet, but few committees have made

WAYS TO SLEEP BETTER.

The only sleep laboratory in the world, at Colgate University, is conducted by Dr. Donald A. Laird. The practical problem of how to get good sleep faces every healthy person.
This problem has been studied for more than ten years by Dr. Laird, and some of the fruits of this study are revealed by him in the February Review of Reviews.

In the laboratory twelve persons a night can be studied, and their every slight movement recorded. The average sleeper moves ten to twelve times an hour, the soundest sleeper only four, and the most restless twenty

There are several theories, yet to be proved, regarding why we sleep. But Dr. Laird is more interested in practical results. For instance, because our blood circulates more slowly while we sleep, we get cold. To be evenly warm in winter, because a mattress is cotton, we should put a blanket under us as well as over us to get the best results.

Certainly relaxation is essential to sound and refreshing sleep. A proper mattress and springs is essential. And the question of a pillow. The normal sleeper turns from side to back to other side. When on the side, a pillow is needed for comfort but when on the back a pillow strains neck muscles and spine. Dr. Laird has solved this problem for himself. Two pillows eight inches apart, do the trick no matter which way he turns.—Review

FARM PROPERTY IMPROVE-MENTS.

The Record has received two copies of an illustrated pamphlet on "Farm Property Improvement" issued by the Federal Housing Administration. Washington, telling how every farmer can improve farm property and farm values. It contains many questions and answers on the benefits of repairs of existing buildings, and how these can be financed under the provisions of the National Housing Act.

The pamphlet can be examined at our office, or we believe a copy can be secured by addressing the Federal 10. Be courteous to other drivers and traffic officers. Courtesy prevents accidents.—National Safety Council.

RUDY MAY BE NAMED.

Walter R. Rudy, Mt. Airy, well known Republican leader in the south-ern portion of Carroll, is prominently mentioned as a possible successor to E. Austin Baughman, as State Motor Vehicle Commissioner. There are a number of applicants for the place which is considered a desirable job.

Take care of the pennies and the Democrats will take care of the dol-lars.—The New York Sun. EXAMINATIONS FOR THREE CARROLL CO. POSTMASTERS.

Examination for Postmaster at Taneytown, New Windsor and Sykesville, to fill the vacancy in the position of postmaster in the above named placed, the United States Civil Service Commission has announced, at the respect of the Postmetre Court the request of the Postmaster General and in accordance with an order of the President, an open competitive ex-

To be eligible for the examination, an applicant must be a citizen of the United States, must reside within the delivery of the postoffice for which the examination is held, must have so resided for at least one year next pre-ceding the date set for close of receipt of applications, must be in good physical condition, and within the pre-

scribed age limits. The competition is open to both men and women.

Under the terms of the Executive order, the Civil Service Commission will certify to the Postmaster General the names of the highest three cralified cligibles if a more age three. qualified eligibles, if as many as three are qualified, from which the Post-master General may select one for nomination by the President. Con-firmation by the Senate is the final

Applicants will be required to assemble in an examination room for scholastic tests, and will also be rated on their education and business experience and fitness. The Civil Service Commission will make inquiry among representative business and professional men and women of the community concerning the experience, ability, and character of each applicant, and the evidence thus secured will be considered in determining the ratings to be assigned to the appli-

The Commission states that presidential postmasters are not in the classified civil service and that its duties in connection with appoint-ments to such positions are to hold examinations and to certify the results to the Postmaster General. The Commission is not interested in the political, religious, or fraternal affiliations of any applicant.

Full information and application

blanks may be obtained at the three postoffices for which the examination is held, or from the United States Civil Service Commission, Washington, D. C. The examinations for all will likely be held in Westminster.

WESTMINSTER CHORUS.

The Westminster Chorus, internationally known musical organization, will give a concert in Alumni Hall, Western Maryland College, Monday, Feb. 11, at 8:15 P. M. The chorus is composed of forty-one voices, both male and female, and sings entirely unaccompanied and from memory. It is under the direction of Dr. John Finlay Williamson Director of the Westley Williamson, Director of the West-minster Choir School, of Princeton, N. J., to whom goes the greater part of the credit for the present enviable position the organization holds in the world of music.

Tickets for the concert are on sale at Bonsack's, in Westminster, and at the office of the Dean of Women, Mc-Daniel Hall, Western Maryland College. Mail orders accompanied by checks or money orders may be ad-dressed to Western Maryland College. The price of the tickets is \$1.10 each and all seats will be reserved.

TO ESTABLISH HISTORICAL GROUP.

Steps have been taken in Westminster to establish a Carroll County Historical Society and already much val-uable material has been assembled. A room in the Times Building, formerly occupied by a physician, is being considered and with slight alterations, will be ideal for the new quarters. A meeting in the office of County Agent L. C. Burns, in the Times Building, has been held to consider the proposition. George K. Mather is president of the Library Association.

MARRIAGE LICENSES.

Henry W. Townshend and Artie L.
Smith, New Windsor, Md.
Thomas M. Gist and Agnes P. Rodenkiser, Baltimore. Md.

The automobile is a great help to the farmer. For one thing, it enables him to get around to these meetings at which the farmers tell one another how hard up they are .- Roanoke (N

Random Thoughts

GOOD IMPULSES.

When we have good impulseswhen we have good impulses—and most us have them—why not act on them? We say this, or that, should be done, but go no farther, and the good influence that we might exert, is wasted. Even when somebody with more moral courage, dares to go ahead, we still fail to fall in line, but we still fail to fall in line, but timidly wait for somebody else to 'put over" our own convictions.

When the exact opposite of our wishes prevails, we complain and adopt the rule of critic without blaming our own cowardly inaction. Majority votes do not al-ways represent majority senti-ment, but do represent the sentiment of those willing to go to the

extent of expressing it.

Speaking bluntly, we should ashamed of ourselves for not being more courageous, morally; and not so dependent on others to do things, that we think should be done, and could help to do.

THE "INSIDE OFFICE" MAN AND HIS PROBLEMS.

No one not on the "inside" of a newspaper office has any idea of the immense amount of "copy" that reach- a car." es the average office every week,asking for space. The most of these arpreparation and in their purpose. We do not accuse them in all cases, with being mere requests for "free" publicity, for frequently their "news" value is equal to the cost of the space required.

But, the average editor must either consign many of the articles to the handy waste basket, or indulge in copy rewriting and boiling down as a pose the combining of the two, Mr. matter of self-protection, and in order to give to his own ideas a reasonable amount of self-selection, as knowing is to enact a statute making driving best what suits his average subscribers needs.

The Record very often regretfully omits giving space to these articles, as a natural consequence. The NRA short week has played an important part in such cases. The extra ten hours a week that we formerly had use of, are no more. Expenses and pay-rolls, go on as before. The paid for space, naturally gets preference, as does what we consider practical news value articles.

Sometimes, articles of the class mentioned, have a better show of being used, if received very early in the week. Short articles always receive preference. Extensive details have their value, but to-the-point articles have a greater value, even if the talent of space-writers must be discount-

The Record, we do the best we can, sign of it, and is probably very sure for our own needs and interests. tive party platform. And just at this extent, therefore, Mr. Nice already is and speak not in your yawning, but on strong ground. And if his obvious put your handkerchief or hand before Republican insurgents.

But, a year and a half is a pretty long time in the National political game, and public sentiment can be carried about like leaves before a wind; and no sure-thing result can be nailed up, just yet, as to what the outcome of November 1936 may be.

DRIVING AND DRINKING.

"Instead of providing laws which punish offenders for car operation while under the influence of liquor, the legal prohibitions ought to extend against drinking and then operating

This recommendation is made by Robbins B. Staeckel Research Assoticles are most excellent in their ciate in Highway Transportation, Yale University, and former State Motor Vehicle Commissioner of Massachusetts. It constitutes a new approach to the solution of a problem that may without exaggeration be described as

Pointing out that he is not advancing an argument against drinking nor a criticism of driving, but does op-Stoeckel contends that a drastic remedy is needed. That remedy, he says, after drinking a crime. In the light of his experience, the former commissioner maintains that mere discipline has been tried and found ineffectual.

It should not be necessary, he asserts, in order to secure convictions of intoxicants, that the operator of the car should show obvious signs of it. In view of the "terrific toll of lives lost and of accidents produced by reckless driving consequent upon or contributed to by the drinking of liquor and subsequent driving of an automobile," the operator of a motorcar who takes even one drink and then should know that he is committing a definite crime for which he can be punished.

The most dangerous person on the highway, continues Mr. Stoeckel, is not the openly intoxicated one, but the man who has taken one or two

Of course, Mr. Stoeckel foresees the usual outcry about interference with personal liberty, but, as he says, the present grim facts stare the public in the face. Is the liberty to take a drink before or while driving so sacrorights of others users of highways or the safety of companions which should be the first care of the driver?

With twenty million high powered machines careering along the roads of America, the question of divorcing driving from drink is no longer merely academic.—Christian Science Moni-

PARTISAN OBSTRUCTION.

The strategy of the Derocrats in But, the average employer is neith- the Ceneral Assembly be ame periectly clear during the past week. It is either to oppose outright everything that Governor Nice seeks or refuse to grant his requests along lines which

DEFEAT PUBLIC SPENDERS.

There are two ways by which a coalition government could be achieved in this country in 1936. And it may prove our salvation, because neither present party is strong enough to stand up alone against the demands of the spenders of public money, writes Roger W. Babson in the February Review of Reviews. A coalition government saved England in a similar crisis.

The first method would be for both parties to agree to identical platforms and candidates. Mr. Babson hopes that Franklin D. Roosevelt would be glad to run for President on both tickets, with a conservative Republican such as Wadsworth, for Vice-President. This seems a fanciful dream now, but a lot can happen in eighteen

If such an arrangement could not be made, Mr. Babson suggests, then the Republican party could nominate for President a conservative Democrat like Carter Glass or Lewis W. Douglas. Then one might see an in- cern for them. dependent Democratic party formed which would nominate the same can-

Thus a conservative Democrat back ed by four-fifths of the Republicans and perhaps one-third of the Democrats would go to the polls, and probably could defeat Franklin D. Roosevelt in 1936, with his backing of progressive Republicans and radical Democrats.

As we stand now both parties are competing with each other in promising to get votes. What this will lead to years hence makes Mr. Babson shudder to think.

FOR MARYLAND INCOME TAX LAW.

Should the tax measure now being In getting out each week's issue of drinks. He may show no outward advocated by the Maryland Farm Bureau and the State Grange be enacted into law at the present session of the lender. state in the Union to adopt such legislation. Wisconsin led all other states in modern income tax legislation, passing such a law in 1911.

From the summarized report covering a recent study made of the Maryland tax field at the instance of the two farm organizations, the prospecsanct that it takes precedence over the tive annual yield from a state income tax in Maryland is estimated at from \$1,287,727 to \$4,351,822, depending on the rates imposed and whether dividends from corporations are included.

> In arriving at reasonable bases of comparison, the prevailing income tax rates in the three neighboring states of Delaware, Virginia and North Carolina were used. Delaware's tax rate being one percent on the first \$3,000 of income; two percent on the next \$7,000, and three percent on income in excess of \$10,000. The yield from such a tax as Governor Nice has proposed, applying half the federal rate, would yield approximately \$9,000,000. This proposal would affect both individuals and corporations.

> In commenting on its practicability the tax experts who had prepared the Grange and Farn Bureau report, acknowledged that "while the revenue from a net income tax is irregular and falls on a rather selective and small group of individuals, these arguments do not constitute sufficient weight to outlaw an income tax from the Maryland tax system. Despite the fact that such a tax would not provide an adequate source of revenue to take care of an emergency situation, such as unemployment relief, there is need for such a tax as a permanent feature in a comprehensive tax system for Maryland."—Maryland Farm Bureau Federation.

Experiment With Camels

Did Not Last Long Here In 1855, when Jefferson Davis was secretary of war at Washington-later to become president of the Southern Confederacy in the war between the states—congress appropriated \$30,000 for the purchase of camels to be used in military operations in the dry regions of the Southwest territory. Lieut. David D. Porter, afterward to become famous as admiral of the navy, was designated to command a vessel to go to Egypt and buy the camels. The ship returned with thirty-three camels and several native drivers. The animals cost \$250 each. Next year another shipload, forty-one camels, arrived. Both lots were concentrated at Camp Verde, Texas, and a permanent camp was established to breed the animals

and experiment in their use. During 1857, according to the Kansas City Times, camels were used occasionally in short scouting expeditions and in building a wagon road from Ft. Defiance, N. M., to the eastern frontier of California. Lieutenant Beale, in charge, was so enthusiastic about their usefulness that Secretary of War John B. Floyd, who had succeeded Jefferson Davis, recommended the purchase of 1,000 camels, but congress took no action on this proposal.

The outbreak of the Civil war put an end to the exploring expeditions with the camels. In March, 1866, all of them had been sold, mostly to cir-

Resistance of Glass to Crushing Is Very Great

Although glass has been known a long time and is even found in nature as obsidian, a black opaque glass, it has remained for the scientist to show what man can do. "As brittle as glass" is an old saying which cannot be said to be truthful any more. In fact, glass will maintain its shape under pressure which will make metals bend like putty," says Popular Mechanics Maguzine.

This is hard to believe but tests at a glass factory, where every kind of glass from bottle glass to that used in the largest telescope made, show that this is true. The resistance of glass to crushing is extremely great. It would take about eight loaded freight cars weighing about 350 tons, or 700,-000 pounds, to crush a two-inch cube of hard glass. Even cast iron will yield before this hard glass.

There are three main kinds of glass. There is the soda lime variety which goes to make up bottles and window panes. Sand, lime and carbonate of soda, the ordinary washing soda, go into such uses. Lead glass contains lead salts instead of lime. The cut glass, so popular years ago, was lead glass which has great brilliance and can be given a high polish. Glass can be made with so much lead in it that its weight will be equal to that of gray cast iron. Such glass can be used to protect X-ray technicians against the dangerous effect of these rays.

Otter, a Destroyer That the otter is a destroyer of fish

life has been proved many times, says the Detroit News. Even as far back as the days of Izaak Walton the otter was considered a menace to fish life. In Walton's "Angler" we find this bit of delightful discourse: "Piscator: 'I pray honest huntsman, let me ask you pleasant question?' Huntsman: 'Sir, it is not in my power to resolve you, but I have heard the question hath been debated among a great many clerks, and they seem to differ about it; yet most agree that her tail is fish; and if her body be fish too then I may say that a fish will walk upon land for an otter does so sometimes five or six or ten miles in a night, to catch for her young or glut herself with fish, but sir I am sure the otter devours much more fish and kills and spoils much 'ore than she eats.'"

Use Your Bean

DEANS are a cold weather food D containing a high percentage of both protein and carbohydrates and a goodly supply of phosphorus, calcium and iron, and should be served frequently during the winter, though not as a substitute for milk or meat or other protein providers for any considerable period.

You can serve beans often if you'll use your own to devise different ways of serving them. salads, for instance. Nothing could be more delicious than the following bean salads.

Potato and Bean Salad: Boil potatoes in their jackets and peel and cut in small pieces while hot, enough of them to make four cups. Sprinkle with salt and pepper, and pour over them about three tablespoons of vinegar. Drain the contents of one No. 1 can cut stringless beans, slit the pieces lengthwise and add the remaining vinegar from one-fourth cup. Chill potatoes and beans for at least an hour. Then toss them together, add one-fourth cup chopped pimiento and about half a cup of mayonnaise—enough to moisten. Serves eight.

With Other Vegetables

Vegetable Salad: Drain the contents of a No. 2 can all-green asparagus, a No. 1 can lima beans and a No. 1 can stringless beans (preferably whole uncut beans). Peel two firm ripe tomatoes and slice one bunch radishes. nate all vegetables separately in French dressing. Line large salad bowl with lettuce and stand asparagus tips up around outside. Toss rest of vegetables lightly together, and pile in middle. If individual salads are desired, put a pile of mixed vegetables in lettuce beds and against this pile. stand two or three asparagus tips, tips pointing toward center. Pass mayonnaise. Serves eight.*

Recognition marks of the male are: Head and upper part of neck, red, followed with wide band of bluish black around breast; back and under parts, white; wings, dusty white with strip of blueof creature with no pretense to beauty gray at lower edge of coverts; tail nor the least claim of uniformity, and rump blue-black; a V-shape strip of black extends about halfway up the back from the base of tail. Female: Top of head, blackish brown; side of head, neck and breast, brown; other markings, same as in male. These birds have rather long bills of a blue black hue.

Early Prisoners of War Tell Thrilling Stories

Some of the most interesting characters, in history as well as in fiction. are those who have been prisoners of mos" we are using a nickname which war. During the struggle between the French and the English for supremacy in America, notes a writer in the Montoccasionally traded. It means, "those real Herald, both sides retained capwho eat raw fish," and is as much an tives whose stories, when hostilities is in ours. Among themselves they are came to an end, shed light on an event-

the Innuits, and King George in a ful period. In Quebec, Peter Schuyler was probin Northern British possessions greet- ably the most famous prisoner. He was in command of a New Jersey regiment when the French captured Oswego, and, while nominally in captivity, he had practically as much freedom as any French-Canadian. He kept his own establishment, and it was "open house" for the relief of his own countrymen. He gave large sums of money to the Indians for the redemption of captives, and he not only kept them until they were freed, but provided tures of the land and sea upon which them with transportation back to their homes.

Body Does Own Conditioning

A human body does its own conditioning internally. Evaporation and perspiration take care of the moisture, says a writer in the Los Angeles Times, the blood circulates the proper degree of heat and the lungs strain out impurities. But the body has to take in whatever air it happens to be surrounded by. The purpose of air conditioning is to surround the body with ere wherein all the cells and an atmosp organs of the body can work normally without having to strain themselves. It does to air outside the body exactly what the body does to inhaled air. Aside from comfort, it contributes to health, because conditioned air keeps parts of the body from breaking down as a result of overexertion.

Once England's Nazareth

The Shrine of Our Lady at Walsingham, England, is where Henry VIII walked barefoot as a pilgrim. In a few years the ruler destroyed the Priory, confiscated the lands and treasuries, burnt the shrine and executed five of the Priory canons for treason. Another shrine was built in the Slipper chapel, so named because in ancient days pilgrims removed their shoes when visiting it. Walsingham once was England's Nazareth, which brought it immense fame. It was founded about 1061. Like Lourdes, it. had its holy wells, and became famous for the many miracles which were believed to have been wrought there.

The Baby's Faculties

The ages when certain faculties first appear in average infants and children vary considerably. Memory and simple consciousness come soon after birth, curiosity at about ten weeks, the senses of shame, remorse and the ludicrous at fifteen months, self-consciousness at three years, the color sense at four years and the sense of fragrance at five years. - Collier's Weekly.

Honoring Traveling Salesmen

At Vouray, France, French commercial travelers have erected a statue to the "Illustrious Gaudissart," who was depicted by his creator, Balzac, as having all the qualities of the commercial traveler and described by the author as the hero of commerce. The statue of Gaudissart is based on the illustrations by Gavarni and Henri Monnier for Balzac's Comedie Humaine.

Petroleum By-Products

The products in the distillation of petroleum are gasoline, the lightest fraction, distilled off first, then kerosene, followed by distillate and gas oil. Finally there is left that fraction of the crude oil. commonly known as fuel oil, which cannot be further distilled.

Origin of English Toy

Spaniel Much Disputed Retrousse nose, abundant coat and highly intelligent expression---those are the chief characteristics of the English Toy Spaniel, observes an authority in the Philadelphia Public Ledger.

There are four classes of English Toy Spaniels-King Charles, Blenheim, Ruby and Prince Charles. King Charles have a black and tan coat, Blenheim have a red and white coat, Ruby a solid red and Prince Charles a tricolor coat.

Under an American Kennel club ruling in 1902. English Toy Spaniels were classed together in a general group. Another standard for the breed was adopted by the Toy Spaniel Club of America in 1909.

The origin of the Toy Spaniel is so much disputed that Pug, Maltesot. Pekingese, Jap and even the Bulldcg have been credited with a share in its ancestry. A cross probably was used to obtain the present short-faced specimen.

Toy Spaniels date back to the Sixteenth century. They were in high favor before the restoration of the House of Stuart in England.

Since the days of King Charles. whose name they bear, they have been closely associated with royalty. They reached the zenith of their popularity during the reign of James II, who bree them extensively.

Mice Destroy Thousands

of Acres of Farm Crops Mouse plagues, disastrous as they are, are of minor importance in comparison with the steady yearly drain on crops by the mice over the country at large in normal years, says the Montreal Herald. Evez as fon at tos meadow mice to the acre on 100 acres of meadow would take about 11 tons of grass or 5½ tons of hay a year This number, on the 65,000,000 acres of hay raised in the United States would cause a loss of over 3,000,000 tons of hay a year, or a money loss of some \$30,000,000 annually in hay alone. The number of young in a litter ranges from two to nine, and one pair averages five to the litter. At this rate of increase, allowing equal num bers of males and females, and the young beginning to breed at 46 days old, the total increase from one pair, if all lived and bred, would be over 1,000,000 individuals at the end of a year. If all were confined to one acre of ground, this would mean over 20

Noted Explorers

mice to every square foot,

Some noted explorers of the world during the last fifty years, their nationality, date and country explored, include A. W. Greely, American, Greenland coast, 1882; Admiral Robert E. Peary, American, Greenland coast, 1892; Fridtjof Nansen, Norway, north Franz Josef land; Frederick G. Jackson, English, 1894-7, Franz Josef Land; Captain Cagni, duke of Abruzzi, Italy, north of Franz Josef Land, 1904; Robert E. Peary, America, Grinnell Land, 1902-09; Capt. Roald Amundsen, Norway, north of Green land, 1925; Richard E. Byrd, American, Spitzbergen to Alaska, 1926; Amundsen-Ellsworth Nobile expedition, Spitzbergen to Alaska, 1926; Capt. Sir George H. Wilkins, American, Point Barrow to Spitzbergen, 1928; Gen. Umberto Nobile, Italy, Spitzbergen to North pole, 1928. Antarctic expeditions are: Roald Amundsen, Norway, 1911; Capt. Robert E. Scott, England, 1912; Richard E. Byrd, 1929, 1933.

Haiti Has Colorful History

Port au Prince is the capital of Haiti, a land where the early slaves revolted and massacred the whites; where voodoo drums once echoed throughout the mountains to proclaim human sacrifice; where ebony monarchs presided over gorgeous royal courts; where negro generals fought their way to pomp and power through more than a century of bloodshed and intrigue. Haiti, high and picturesque, stands out as a colorful spot in the Caribbean.

Collecting Brazil Nuts

One of the most dangerous jobs is the collecting of Brazil nuts in the jungles of the Amazon valley. The peons who gather this world crop, which is neither planted nor picked, are not only beset on all sides by deadly animals, insects, fishes and plants, but they are in constant danger of having their backs broken or skulls cracked by the four-pound pods which are frequently falling around them from a height of 100 feet.—Collier's Weekly.

Temples of Paestum, Italy The temples of Paestum, in Italy, are

world-famous, and the ancient city there, founded about 600 B. C., has been thoroughly excavated and explored. Three of the temples known as the Basilica, and the other two respectively dedicated to Ceres and Neptune, date from 570 to 420 B. C., and all belong to the Greek period. The fourth, known as the Temple of Peace. is a building of the Roman period.

Fake Castle Ruin Famous

Although a fake. Rothley "Castle" at Rothley, England, is so famous that it is to remain as part of the scenery and any attempt to destroy it will meet with the opposition of Rothley citizens. It stands on a commanding position on a lofty and rugged crag. It has a square tower and curvated wall, embattled and loop-holed, and each wing ends with a bastion.

AN EYE TO THE FUTURE

A touring actor entered a tailor's shop and gave an order for a suit. He took home a small pattern of the material and showed it to his son.

"What do you think of it, Tommy?"

"Not bad," Tommy replied.

"Why, you're looking at the wrong

side," added the actor. "I know I am," the boy replied, "but that's the side I shall have to wear when the suit is handed down to me."

It Hurts!

First Woman-Well, I must be off. I've an appointment with mother. Second Woman (giving an astonished laugh)-My dear, is it possible that you have a mother living?

First Woman (laughing in her turn) -Yes, oh, yes. And do you know, I don't believe she looks a day older than you.

Dentist Rivalry

Dentist-My method of extraction is so painless that patients have gone to sleep in the chair.

Colleague-Mine is so painless and pleasant that patients ask to be photographed during extraction because they look their nicest.

Hunger Is a Fine Sauce "What are you going to have for breakfast, dear?"

"Pawncakes." "Why the English pronunciation? You mean 'pancakes,' don't you?" "No, I had to pawn a bracelet to

CORRESPONDENCE

Latest Items of Local News Furnished By Our Regular Staff of Writers

All communications for this department must be singned by the author; not for publication, but as an evidence that the items contributed are legitimate and correct. Items based on mere rumor, or such as are likely to give offense, are not wanted.

ed.
We desire correspondence to reach our office on Thursday, if at all possible. It will be necessary, therefore, for most letters to be mailed on Wednesday, or by Fast Mail, west, on W. M. R. R., Thursday morning. Letters mailed on Thursday evening may not reach us in time.

WESTMINSTER.

Our city suffered a great loss in the passing of Dr. Henry M. Fitzhugh last Friday morning at the University of Maryland Hospital where he had been a patient for ten weeks. He has been a very active member of the State Board of Education, and took great interest in the education of the youth of our county and state.
Dr. M. Hadwin Fisher, of the Get-

tysburg Lutheran Seminary, will be the guest speaker at a dinner in the M. P. Church, Feb. 4, sponsored by the Council of Religious Education of Carroll County for those interested in Church and Bible School work. Tickets are fifty cents and can be secured Superintendents or from from your Superint Mr. M. A. Sullivan. The snow has made traveling quite

a problem in and around our city.
The Rev. and Mrs. F. B. Staes and son, Montreal, Canada, are spending some time at the home of Mrs. Staes mother, Mrs. Beulah Ebaugh, East Main St. Mrs. Staes was guest solo-ist at Grace Lutheran Church, Sun-day morning, she sang "O Rest in the

Mrs. Paul Weimert was the soloist at the five o'clock Vesper Service. The pastors Rev. Paul W. Quay, Sr. and Rev. J. Hess Belt, Jr., were in charge

of the services.
Miss Margaret Gillelan, East Main St., was operated upon for appendicitis at the Union Memorial Hospital, last Friday. Dr. Clifford Taylor, was her physician. She is doing as well as can be expected.

Mrs. Andrew Himler (nee Flohr); who was operated upon for gall stones and appendicitis at the University Md Hospital, is doing nicely.

Mr. and Mrs. J. P. Wantz, Sr., and
Dr. and Mrs. Ward are finding the
cold weather extended to Florida.

They will return next week.

Mr. and Mrs. M. A. Sullivan have had two letters from their daughter, Mrs. Stuart Widener, Shunguak, Alaska. She described their first Christmas in Alaska in a most interesting

HOBSON GROVE.

manner.

Mrs. Raymond Rippeon is spending some time with her sister.

Miss Margaret Hahn is on the sick list. She is slowly recovering, which we are glad to hear.

A number of young folks from Mt. Union went in two 1-horse open sleighs to the home of Miss Mary Wilhide's, on Tuesday evening for practice of the C. E. rally which was held at the Bark Hill Church of God, on Thursday evening. The sleigh rides were very much enjoyed by all. O what fun it is to go in a one-horse open sleigh!

The milkmen are having their problems. Modern transportation cannot combat with snow and deep muddy ruts. Horses and wagons were resorted to. Next the old bob sled was gotten together and it has proven a "stand by." Let us appreciate the sleds, sleighs and horses. Last Fall we flattered ourselves

that we were on hard roads. How the cars whizzed by! This only lasted until freezing and thawing came then the roads went thru. They were only veneered. A few places were stoned. They stood the test. The argument for not stoning the entire road was that if a hard road was built the expense of stoning now would be a loss. I do not understand that logic any more than if you cannot have an expensive pair of shoes go barefooted until you can get a \$10.00 pair.

I am sure if the road authorities would visit these roads, and they should, any time between December and April they would see that we are much in need of better roads. We do not ask for a boulevard, but passable roads for the whole year.

Eye Torture for Suspects

Victims of eye strain suffer the same tortures, in a milder degree, to which suspected criminals are subjected in "third-degree" methods employed by the police, according to M. J. Julian president of the Better Vision institute. The torture is eye strain and it has been found to be one of the most reliable means of breaking down a victim's morale under cross-exami nation. The phrase "on the spot" orig inally meant being placed in the blinding glare of a battery of spotlights for interrogation by detectives. "Nothing could be better calculated to break a suspects's reserve," Julian says. "While eye strain usually results in one or more physical ailments, such as headaches, dizziness, nausea and the like, the immediate effect is more subtle but pronounced and results in a lowering of mental vitality and ability to concentrate."-Cleveland Plain Deal-

London Bridge Once Wooden "Until within comparatively recent times (about 100 years ago) London bridge was built of wood, and had wooden shops and dwelling houses on it. Several times all the structures on the bridge were destroyed by fire," says A. Edward Newton in Derby Day and Other Adventures, "but the bridge itself was saved. Sections of it were constantly falling down, hence the song which we used to sing as children, 'London bridge is falling down.'"

FEESERSBURG.

truck was crosswise in the road, blockday one hears of more serious wrecks.

There were S. S. and Preaching service at Mt. Union Church, on Sunday afternoon; 36 persons were present one horse and sleigh, and a number and the sermon inspiring, and a few of the young people gathered for C. E. in the evening.

GEORGE S. KUMP.

George S. Kump, well known and former prominent business man, of Littlestown, Pa., died Wednesday afternoon at Sinai Hospital, Baltimore, where he had been under treatment for the past six weeks. His age was

Mr. Kump had his first training in the mercantile business as clerk in the general store of David F. Albaugh at McKinstry's Mills. He then became clerk in a Littlestown store, then entered business there on his own account and continued it for 54

years, finally retiring.

He was one of the organizers of the Littlestown Savings Institution and for many years one of its direc-tors, and was otherwise prominent in business and financial affairs of Littlestown. He possessed keen business judgment, was usually successful in his ventuces, and was popular as a citizen.

Le was a member of the Chamber of Commerce, and a life-long member of Redeemer's Reformed Church, of which he was an elder at the time of his weath. He is survived by wife, who before marrage was Miss Mary C. Colehouse, and by two daughters, Mrs. Mary Hartman, Liberty, N. , and Mrs. Lesbia Crouse, at home; three grand-daughters, and by one s. ter. Mrs. Jacob Hilbert, Hanover. Funeral services will be held this Saturday afternoon, from his late home, in charge of Rev. A. O. Bartholomew, pastor of the church, and Rev. D. S. Kammerer, pastor of St. Paul's Lutheran Church, Burial will be in Mt. Carmel cemetery, Littles-

DR. H. M. FITZHUGH.

Dr. Henry M. Fitzhugh, prominent Carroll County physician died at Maryland University Hospital, last Friday morning. He had been a patient there since November 21, suffering from the rare disease osteomylitis, inflammation of the bone and marrow. He would have been 60 years September.

He was not only eminent as physician but prominent as a citizen and in public affairs. During the World War he was chairman of the arroll County Council of National Defense, and was chairman of the State Board of Education having been appointed by Gov. Ritchie in his first term, and was identified with numerous other organizations.

ous other organizations.

He is survived by his wife, who was Miss Mary Aldridge, of Virginia, and by two sons, Robert T. Fitzhugh, member of the faculty of Maryland University, College Park, and Henry M. Fitzhugh, Jr., student at the University of Virginia.

Funeral services were held on Mon

Funeral services were held on Mon-day afternoon at Christ Protestant Episcopal Church, Baltimore, the services being in charge of Rev. Thorne Sparkman, rector of the church. Interment was in Greenmount cemetery,

MRS. SUSAN C. SHEETS.

Mrs. Susan Catherine, wife of Jacob Sentman Sheets, died at the home of her son-in-law and daughter, Mr. and Mrs. A. J. Lambert, near Gettysburg, on Wednesday afternoon, aged 81 years. Failing health during the past two years, and infirmities

was given as the cause of death.

She is survived by her husband, a veteran of the Civil War, now in his 94th. year, and by one daughter, Mrs. Lambert, and by one brother, George E. Sterner, of Freedom township, Pa. Mr. and Mrs. Sheets are well known in Taneytown, where for a number Washington, who was murdered at of years Mr. Sheets was the very efficient sexton of the Lutheran church; following which they removed to Dayton, O., where Mr. Sheets served as sexton of the First Lutheran church, of which Rev. D. Frank Garland was pastor.
Mrs. Sheets was a member of St.

James Lutheran Church, Gettysburg. Funeral services will be held on Saturday afternoon, at the home of Mrs. Lambert, in charge of Rev. Spencer W. Aungst, pastor of St. James church. Interment will be in the National cemetery.

CHARLES A. ZILE.

Charles A. Zile, well known citizen of Uniontown and other sections of Carroll County, died on Wednesday last while sitting in a chair at the home of his son, Russell, near Westwinster. He had been in noor health minster. He had been in poor health for some time.

He is survived by three daughters and two sons: Mrs. Emory Flick-inger, Taneytown; Mrs. Edgar Sny-der, Westminster; Mrs. Harvey Selby Hanover; Percy Zile, New Windsor, and Russell Zile with whom he lived; also by a number of grand-children. The body was removed to the funeral parlor of C. O. Fuss & Son, Taney-

town, from which place the funeral was held Sunday afternoon, with further services in Uniontown M. P. Church, in charge of the pastor, Rev. Walter Stone. Burial was in Union-

HARRY L. NUSBAUM.

Harry L. Nusbaum, died Monday night at his home in Taneytown, following an illness of some time. He was a son of the late Mr. and Mrs. Rufus Nusbaum, and was aged 57 years. He is survived by his wife, Emma Nusbaum, and five children by a previous marriage; George N baum, Baltimore; Dallas, Sterl Ray and Ruth Nusbaum, of York. Sterling,

Funeral services were held Thursday afternoon from the Bankard funeral parlors, Westminster; interment was in Mount Pleasant cemetery, Mechanicsville.

MISS CLARA E. MOSER.

Miss Clara E. Moser died last Saturday morning at the home of Mrs. Wallace Moser, Keysville, aged 88 years. She had been ill for about two She is survived by one brother, William Moser, Woodsboro, and a number of nieces and nephews.

Funeral services were held on Tuesday morning, at Toms Creek M. E. Church, in charge of Rev. N. E. Nelson. Burial in Mountain View cemetery, Emmitsburg.

NEW WINDSOR.

The heavy snowfall and the con-tinued cold weather has been hard for the mail carriers and the farmers.

Rev. J. T. Chase has been confined to his room and not been able to fill his pulpit, for the past two weeks Rev. Earl Hoxster, assisted by Rev. Frank Barnes, of Clarksburg, a gospel singers, will hold a two weeks series of evangelistic meetings in St. Paul's

M. E. Church commencing, Feb. 3.

TRIBUTE OF RESPECT.

Resolutions of Respect adopted by Tan-y Lodge No. 28, I. O. O. F., of Taney-

ey Lodge No. 28, I. O. O. F., of Taneytown.

Whereas, An All-Wise Providence has removed from the circle of our membership, Brother HARVEY T. OTT, and we deem it fitting to make a permanent record of our loss and of our high regard for our deceased Brother, therefore be it

Resolved, That we record our appreciation of the character and spirit of fraternity manifested by our Brother Harvey T. Ott. deceased, that we give expression to our sorrow and sense of loss in his passing away, and that we extend to the bereaved family our sincere sympathy with them in their great loss.)

Resolved, That our charter be draped in his memory, shall remind us of our own frailty, and admonish us to make the most and the best of the days allotted to us.

Resolved, That these resolutions be published in the Carroll Record, a copy be incorporated in the minutes of this meeting and a copy sent to the family of our deceased Brother.

HARRY L. BAUMGARDNER, ULYSSES H. BOWERS, ELMER CREBS, Committee.

22 CARD OF THANKS.

Family of MERVIN M. ASHENFELTER.

We hereby extend our sincere thanks to all who assisted us in any way following our bereavement, and to all who helped clear away the snow in order that the funeral might be conducted, both at the home and the church.

Bank of Venice, Formed

in 1157, Was First Bank Recognition was given even in ancient civilization to the benefits ob-

tained from the organization of a system designed to facilitate pecuniary transactions. Promissory notes, bills of exchange and transfer checks not unlike the modern bank check were used in Assyria, Phoenicia and Egypt long before they gained fuller development in Greece and Rome. It was not until after the ascendancy of Athens and Rome that banking came under official regulation. In its earliest form, banking consisted primarily of money changing, which was important due to the lack of uniform coinage and to the need for receipts and money transfers

The progress of banking was checked during the Middle ages: but with the revival of trade in the Eleventh and Twelfth centuries its practice was resumed.

used to evade the danger of robbers.

The Bank of Venice, formed in 1157, is generally given as the first bank; it was only a transfer office of a national debt at first, and not a bank in the real sense until after the Sixteenth century. It was destroyed by the French invasion of 1797. Keeping depositors' money safe but accessible was perhaps first undertaken on a large scale by the Bank of Amsterdam,

founded in 1609.—Indianapolis News.

The young folks of the vicinity Sparrow Hawk, Smallest,

Family's Most Beautiful During late fall and winter field and house mice form the main diet of the beautiful of our hawk family, according to a writer in the Missouri Farmer. Exceedingly brave and aggressive, it Frederick a Shank, a farmer, died will sit in a nearby tree while the farmer shucks corn out of the shock or when he is hauling fodder out of the field, watching for mice which run

out of the shock. catches a mouse on the run that is scurrying away from a corn shock, having seen his prey emerge from the shock from his vantage point many yards distant. His skill and his value to the farmer can best be noted when snow is on the ground; his food sup-Funeral services were held on ply is then low and he is braver than mice very near the farmer who is working at the corn shock.

Occasionally the sparrow hawk attacks small birds and chickens. These depredations usually occur during the nesting period or when other food is scarce, but these irregularities are so stroying mice and insects.

Kruger National Park

Kruger National park, known as the world's finest sanctuary for wild life. lies in the northeastern part of the Transvaal, bordering on Portuguese East Africa. It presents a great variety of scenery, from the wild gorges where the rivers thread their way through the Limpopo hills to the open, palm dotted flats of the Shingwedsi and the dense thorn bush country of the Sabi river. To the west, and visi-It is with heartfelt sorrow that Washington Camp No. 2, of Md., P. O. S. of A., is called upon to record the death of HARVEY T. OTT, huge billiard table.

Cannibalism in Hawaii

So far as has ever been discovered cannibalism has never been practiced by native inhabitants of the Islands of Hawaii, asserts Pathfinder Magazine. On important occasions, however, human sacrifices were offered to the gods, of which there were four principal ones and numerous lesser deities. These sacrificial practices were abandoned in 1807. Prior to the arrival of the first missionaries in the spring of 1820 infanticide was also prevalent

among the natives.

X-Ray Tests Steel Castings Hidden cracks in the interior of heavy steel castings are detected by a powerful X-ray machine mounted on wheels. The equipment takes pictures through four inches of steel. Gun carriages, armor plate and other forms of steel construction of the United States navy are subjected to the penetrating rays of the machine, which operates at 220,000 volts.—Popular Mechanics Magazine.

Guatemala's Jungles

In Gautemala's jungles are grotesquely marked monoliths, ruins of magnificent cities and colossal templetopped pyramids which bear witness to the existence of an Indian civilization centuries before the Christian era. In little mountain villages and in the city market places are throngs of Indians to remind one of the fact that Guatemala is still 60 per cent pure Indian.

41 Leisure Hours

The New York committee on the Use of Leisure Time discovered that the average individual spends the 168 hours in the week thus: 77 hours for sleep, meals and personal care: 40 hours for work; 10 hours traveling to and from work, and 41 hours at leisure.

Wise and Smart

Wise is defined as discerning and judging soundly concerning which is true or false, proper or improper; discreet; opposed to foolish. The word smart is more or less colloquially used

BLUE RIDGE COLLEGE LYCEUM COURSE.

The third number of the Blue Ridge College lyceum course will be given in the college auditorium, on Wednesday, February 6, when the Lombard entertainers will appear. This is considered the "Biggest Little Company on the Road" and is famous for its waits by enderth every WCN, WPPM radio broadcasts over WGN, WBBM, WMAQ and most practicularly as stars of WLS showboat.

Harry Lombard, baritone soloist and comedian of high rank, has few equals in musical comedy among plat-form artists. He has had wide ex-perience on the operatic stage and was for eight years with the English Opera Company.
Lela Lomoard, the other charming

and versatile member of this company delights her audience with readings, whistling solos and pianologues of rare excellence.

Their programme is a happy combination of the Classics and Musical sketches—presenting beautifully costumed numbers from popular operas such as "Pagliacci," "Robin Hood," 'The Mikado," and other artistic

features.

Elaborate stage settings provide a colorful background for these clever productions. A remarkably fine en-tertainment. Remember the date,

AND A BAR OF CHOCOLATE

During recent military operations in the Far East, one side captured the other's general. An envoy was sent to negotiate his exchange.

"We will give you four colonels for him," said the officer.

The offer was declined.

"Eight majors?" "No."

"What then?" "We have given the matter most careful consideration, and the least we can accept are two dozen tins of condensed milk."-Boston Evening Tran-

Looking Ahead "How's that patient of yours who's always worrying about his food?"

asked the doctor's wife. "I've ordered him to eat only the plainest of foods and very little of it," replied the medical man.

"Do you think that will help him to get well again?" she asked.

The doctor smiled artfully. "Probably," he replied; "but it will also help him to save money so that he can pay my bill."-Stray Stories

Hay-Pauncefote Treaty, Involving Panama Canal

The Hay-Pauncefote treaty of 1901 was signed long before there was a Panama canal in existence and did not give England free use of the Panama canal, notes a writer in the Detroit News. It replaced the Clayton-Bulwer treaty of 1850 as an Anglo-American agreement of policy concerning an isthmian canal, then supposed to be fived as across Nicaragua. Public feeling for some years had been growing sore over the Clayton-Bulwer treaty's restriction on the independent action grave fear lest congress might abrogate that treaty by open violence, a

great blow to future amicable action. President McKinley in his annual message for 1898 declared that the canal had become a national necessity. Negotiations were opened with Great Britain and a draft treaty was sent by the President to the senate in February, 1900, providing for the construction of a canal, to be permanently neutralized. Disputes in the senate over the terms led to the formulation of a new treaty, ratified as the Hay-

Pauncefote treaty in December, 1901. Before the opening of the Panama canal in 1914 there was a controversy with Great Britain regarding the provision of the Panama Canal act of some labor groups it polled over a mil-1912, exempting American vessels engaged in coastwide trade from canal tolls. This was regarded by the British as a violation of the original treaty. Eventually, after President Wilson had sent congress a message urging this action, this exemption of American ships from the canal tolls was repealed.

Hay-Wire Does Not Mean

Same Among Lumbermen Individual in all things, New England has its own meaning for a word used in various parts of the country as slang. Elsewhere "hay-wire" may he synonymous with "erratic" or a "little mad." In Dr. Frank Vizetelly's records of the vernacular the slang use of the phrase "gone hay-wire" is defined as signifying something or somebody "gone wrong." In Maine's North Woods the serious implications of that usage are fully understood.

No greater slur can be cast upon a lumberman's equipment than to say "It's a hay-wire outfit." Hay-wire is used in temporary repairs. The man who thus employs it is foresighted and ingenious, but the man who habitually uses hay-wire instead of making premanent repairs is shiftless.

The hay for the lumbermen's horses comes bound in bales. When these bale's are broken the wise teamster saves for emergencies the hay-wire which held them together. A good "toter" would not start his team on a trip without taking hay-wire any more than he would set forth without an ax or a pail.—Philadelphia Inquirer.

People and Trees

Ever notice that people are like trees? Some are like the poplar, straight and beautiful, writes Anna Carlson in McPherson (Mo.) Republican. They are good to look at and they are so busy keeping up appearances that they neglect to spread out and give a bit of shade to weary wayfarers. Perhaps they are unwilling to touch branches with the more common trees. They sap the ground for their own sustenance and comfort and give nothing in return. Then there are other folk, who, like the cottonwood, reach out unselfishly and share with the hundreds who come within the range of their influence. They are not affected by drouths or the winds of adversity because their roots reach down to the fountainhead of the ever-flowing wa-

Crocodiles of State

The government of Jaipur pays out good money every day to keep crocodiles alive. It has often been said that Jaipur is the most "different" city of India. Certainly it is the only one in that country to be built on a straightline principle and the only one to have each and every one of its buildings colored mauve or pink. The Crocodile tank is one of the sights of Rajputana. and though it is difficult to ascertain from what far distant religious or mythological rite these beasts obtained their privilege, it is a fact that they of the United States, and there was are provided with three square meals a day and are tended by a keeper. Whenever this wizardlike old man appears at the water-edge with their foods the big beasts, no matter how soundly they appear to sleep in the mud, immediately swim towards him.

The Greenback Party

This was a nickname given the American Independent National party because it advocated increased use of greenbacks, restriction of bank issues. and payment in greenbacks of all government bonds except those otherwise specified. Its first national convention was held in 1874 and by fusing with lion votes as the Greenback Labor party and elected 14 congressmen. Soon afterwards its support dwindled and most of its adherents went to the Populist party organized in 1891.

To Close-Haul Sailing Ship

To close-haul a sailing ship means trimming the ship's sails when sailing close to the wind—the nearest direction possible to the point of the compass from which the wind blows. When a ship is close-hauled her tacks are hauled close aft. In this manner of sailing square-rigged ships will make an angle of six points with the line of the wind, but fore-and-aft rigged ships will sail much closer. In each case there is always a certain amount of leeway.

Early Motherhood

Child marriage and motherhood still exist to a certain extent in nearly all countries. Even in the United States today, a baby is born to a little girl mother between ten and fourteen years of age on an average of every three hours .- A. P. Claverie, New Orleans, in Collier's Weekly.

Diet of Amazon Indians

Cannibalism, according to an authority, is never practiced merely to gratify an appetite. The Indians of the upper Amazon dine on caterpillars and grind up the bones of their ancestors for an ingredient of their popular homebrew.

Enemies of Grasshoppers

Among the most active of the insect enemies of grasshoppers are several small two-winged flies and some little wasps. Maggots of the flies, either deposited directly on the grasshopper or hatching from eggs laid on it, pierce the hopper's body and feed on its contents. The wasps sting their victim into a state of coma and then drag it off to their underground nests to feed

Collects Wishbones Everything from doorknobs to toothpicks finds its way into some collector's net One man saves wishbonesnot ordinary ones, but bones from the platters of great men. Every Christmus he sends out hundreds of requests,

and receives many hones in response.

TANEYTOWN ORGANIZATIONS

Camp No. 2, P. O. S. of A., meets in Mehring Hall, every second and last Thursday, at 7 P. M. Charles E. Ridinger, Pres.; N. R. Devilbiss, R. S.; C. L. Stonesifer, Treas., and WM. D. Ohler, F. S.

Knights of Pythias, meets in Mehring Hall, every 1st. and 3rd. Tuesday, at 7:30 George Deberry, C. C.; C. E. Ridinger, K. of R. S.; Wm. J. Baker, M. of F.; Vernon Crouse, M. of E.

TANEY LODGE NO. 28, I. O. O. F... Meets in I. O. O. F. Hall every Friday, at 8:00 P. M. Chas. L. Hesson, N. G.; Chas. E. Ridinger, Sec.; U. H. Bowers, F. S., and H. L. Baumgardner, Treas.

Taney Rebekah Lodge, meets in I. O. O. F. Hall, 1 and 3rd Monday each month, at 8:00 P. M. Vergle Ohler, N. G.; Bes-sie Six, R. S.; Clara Clabaugh, F. S., Esther Hahn, Treas.

Taneytown Fire Company, meets on the 2nd. Monday each month, at 7:30, in the Firemen's Building. James C. Myers, Pres.; C. G. Bowers, Sec'y; W. F. Bricker, Treas.; Raymond Davidson, Chief.

All other Fraternities and organizations are invited to use this directory, for the public information it carries. Cost fer one year, only \$1.50.

The Echometer

The echometer is an electrically operated device for sounding at sea, by means of which the nature of an ocean bed and the depth of water beneath a vessel can be determined. It was announced by the British Marconi system. The echometer is operated by pushbutton principle. Among the claims for it are that it will prove of great value in saving vessels from grounding and that it can be used by fishermen in trawling to determine the type of fish to be found from the depth of water.

Divers in Tropics Fear

Manta Will Devour Them Divers in the tropics avoid the manta, holding to the traditional story that the giant ray will engulf a man and slowly devour him. Such. however. seems to be mythology. The manta is dangerous when wounded, and can be taken only by harpoon after a hard battle of several hours, says Popular Mechanics Magazine.

The cow fish has a coat of armor consisting of hardened scales which form a bony box from which the jaws, fins and tail can be moved freely. The name is applied because of small horns in front of its eyes. The porcupine fish is one of the most grotesque members of the finny tribe, being of olive color and spotted with black dots. Armed with sharp-pointed spines, it is difficult to handle without being injured. Like blow fish, which also are found in the gulf, porcupine fish are capable of inhaling air or water to form a balloon-like appearance to frighten enemies.

Although a small fish, generally running about six or seven inches in size, the bat fish looks the least of any like a fish. It appears to be a toad, but has spine-like scales and a spinous dorsal

. While the drum fish is not exactly a queer specimen, its powerful jaws hold a set of mill-like teeth with remarkable crushing force. Schools of drums, from three to four feet in length and weighing from 40 to 60 pounds each, can make short work of a small oyster reef. When young they are striped like a zebra. Later they become a dusty color. A large female will lay 6,000,000

Roman Emperor Let Month

of November Retain Name If the Roman senate had had its way November would be Tiberius. The senate, in the time he ruled the Roman world, proposed, as his birthday fell in that month, to honor him by giving it his name. Julius and Augustus had had months named for them. and the senate thought Tiberius, who succeeded Augustus, equally deserving. But he declined. Perhaps he had a sense of humor. "No, Conscript. Fathers," he said, "what would you do if we had thirteen Caesars?"

Tiberius evidently was looking ahead, and wisely, too, for the line of Roman emperors lengthened out to more than thirteen. Thus it was that the month retained its old name, "No-

Our own Anglo-Saxon ancestors called it the wind month. They knew what they were about, for it is a month of raw, cold winds, although in this latitude, we often have in November stretches of mild, pleasant weather.

Still, it is the month when people batten down the hatches; stop all the chinks and crannies by which the cold might enter; to see that the fuel pile is high; to get out heavy clothes, and to prepare for the winter which November's blasts and its flurries of snow announce.-Cincinnati Enquirer.

Primitive Fishermen

The Turkana are a nomadic native race roaming the eastern shore of Lake Rudolf on the Kenya-Sudan border, and ever ready to take advantage of a veaker tribe. The King's African Rifles have their work cut out to keep them in order.

The Turkana are indifferent to clothing, but they are a well-formed, intelligent; and agile race, many of them gaining a livelihood by primitive but effective methods of fishing. A band will advance into the water, each carrying a circular net-like basket. These they hold under water in contact, and the whole line advances towards the shore driving the fish before them. Another method is spearing, at which they are very dexterous. The moment the harpoon enters a fish, the long wooden shaft parts from the barbed head, which is then hauled in by means of an attached cord.-Tit-Bits Magazine.

Tularemia in Rabbits

The descriptions of diseases and parasites which afflict rabbits would fill a large book, but none of them endangered the health of man until Tularemia was discovered among rabbits near Tulares, Calif. As yet Tularemia has not been found in animals other than wild rabbits and a few small rodents, but experiments have developed that tame rabbits and live stock, as well as man, are susceptible. The disease is carried from infected rabbits to healthy stock by the wood tick, the rabbit tick, the deer fly, and the rabbit louse. It is transmitted to man by the wood tick, the deer fly, and by handling and dressing of infected rabbit carcasses. An animal dead of the disease will show numerous spots on the liver and spleen.-Missouri Farmer.

Rent Chairs in London Parks For nearly a century an English family has held the right to rent chairs in the public parks of London. Although there are a certain number of free seats, this family owns 150,000 chairs, placed in the better locations. The tickets, which are good for one day, sell for four cents and entitle the owner to move from chair to chair and from park to park as he pleases .- Collier's Weekly.

First Airplane Mail Service

The world's first official airplane mail service was operated in England between London and Windsor in September, 1911, but the first official mail flight by airplane was made in India during the All-India exposition in February, 1911.

Announces a Free Lecture on

Christian Science By Richard J. Davis, C. S., of Chicago, Illinois member of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, Massachusetts, at the Lyric Theatre, on

Sunday afternoon, February 3, at 3 P. M. The public is cordially invited to attend. The lecture will be radio cast over Station WCAO,

MENDAGRICAGA GARANTA CARANTA C

Importance of Sunspots Is Not Highly Esteemed

Thermocouples show that the surface heat of the sun varies slightly, being hotter when the spots are numerous. Moreover, the earth's magnetic field usually (but not always) fluctuates in step with the spots. In the opinion of Dr. Seth B. Nicholson, who has studied sunspots intensely with the most precise instruments on Mount Wilson, weather may appear to vary with sunspots, but a scientific study of the facts usually shows that the relationship was accidental and does not hold for any considerable length of

We are apt to magnify the importance of sunspots. In the first place, they are 93,000,000 miles away. In the next place, even when most numerous, they cover less than one-half of 1 per cent of the sun's surface. So it all comes down to this: no very reliable knowledge exists regarding the influence of sunspots on weather, business conditions or human behavior.

Toy Pistols Banned

In 1905 the Indiana legislature thus banned toy pistols: "It shall be unlawful for any person, firm, company or corporation to manufacture, sell or expose for sale, or give away as a prize or reward, any toy pistol or other device for the purpose of exploding caps or wafers containing fulminates or other explosive compounds; any person, firm, company or corporation so manufacturing, selling or offering to sell or give away any such toy pistol or other device, shall be deemed guilty of a misdemeanor, and, on conviction. shall be fined not less than \$10 nor more than \$50 or be imprisoned in the county jail not less than ten days nor more than twenty days." The statute has been ignored in most communities.

Electricity Locates Ore

One of the achievements of science has been the perfection of an efficacious method of locating ore deposits by electricity, says the Washington Post. It is based on the recording of a difference of potential set up by electric statics or dynamic waves which are either induced or pre-existent in the metallic ores. The mining expert plots an electric field by recording these variations in potential at different points in a certain locality. Usually if ore deposits are present, they are found at the center of this field, being located either by diamond or churn drilling or underground prospecting

In Immigration Service

The various positions in the field service of the Immigration department are those of clerks and stenographers; immigrant inspectors, including examination of arriving aliens at ports of entry, such as New York and Niagara Falls; investigation of cases of aliens after their entry into the United States; deportation of those entering illegally, and border patrol inspectors stationed along the Canadian and Mexican borders to check illegal entry of aliens.

Smoke Writing The material used by aviators to do smoke writing in the air is stated to be a smoke pot made of tar, a certain amount of rosin and solidified alcohol, and the machines used are equipped with smoke generator and ejector in the fuselage. The smoke is produced at the rate of about 250,000 cubic feet a second, and according to one estimate, it takes about 8,000,000 cubic feet of smoke for each letter, about a mile long.

Largest Meteorite

The largest meteorite in the world is the Grootfontein, found in Southwestern Africa. It is an enormous block of metal almost rectangular in shape, 9 by 10 feet and of a thickness varying from 21/2 to almost 4 feet. It weighs at least 50 tons. Another large meteorite is the Greenland meteorite that Admiral Peary brought back and placed in the American Museum of Natural History in New York. It weighs 361/2 tons.

Beginning of a Century

The Twentieth century began with January 1, 1901. A century begins with the beginning of the first day of its first year, and does not end until the close of the last day of its one hundredth year. The First century consisted of the year one to one hundred, inclusive; the Second century began with the year 101 and ended with the last day of the year 200.

Penguins Most Comical;

Stand Erect Like a Man There is a bird so helpless and defenseless against human attack that it has stirred the pity of civilized na-

tions and become the subject of an international protective treaty, says a writer in the Cleveland Plain Dealer. Penguins were in danger of being wholly exterminated by man before the treaty was made. Many years ago the birds were very common, but they were slaughtered by the hundreds of thou-

able oil in their bodies. The birds collect in droves on Antarctic islands during the mating season. They stand straight up and waddle awkwardly on their two short legs, like old frock-coated gentlemen. Their stiff wings, jointed only where they are attached to the body, are quite useless for flying. To kill them a man has only to swing a club, and until the international agreement was made, the birds were in danger of being wiped

sands because men coveted the valu-

Ordinarily penguins do not come ashore. It is only during the mating season, when they must build simple nests of grass under some protecting ledge of rock or in a hollow in the ground, that they risk trips away from the sea for brief island visits.

At sea they have no need of wings, for they are superb divers and swimmers and they live solely on a diet of fish, sea creatures and sea plants. Icy water has no terror for them because their scaly feathers are an armor-like protection against it.

The penguin has won a wider reputation for being comical in appearance than for any other quality. Its legs, located far back on its body, permitting it to stand erect in quite human fashion, its white breast resembling a shirt front, its black back feathers looking like a dark coat, its doddering walk and its upturned bird face, combine to give it a half-human look.

U. S. Millionaires

No list of millionaires ever has been compiled. A historical view reveals outstanding rich men but no accurate detail. Millionaires in 1790 included George Washington, the Livingstons of New York, Robert Morris and probably the Carrolls of Carrollton. It should be understood that the wealth was mainly in land. Robert Morris, for example, was the greatest private landholder in the history of the country. holding several million acres. Later rich men were Stephen Girard, Nicholas Biddle, the Vanderbilts, the Astors. In the Civil war period Jay Cook was among the richest and James Fisk, Jay Gould, Collis P. Huntington and so on down. The numbers simply cannot be stated. The graph would show a long time, sloping gradually up to the Civil war, then turning sharply upward for a short distance, then another flattening and another long, slow rise, then an incline to the World war, then a sharp upturn to 1930 and then an abrupt decline.

Husbands Outlive Bachelors Figures show the death rate of husbands is much lower than that of bachelors, thus supporting the old contention that married life, especially for men, is conducive to health and longevity. Vital statistics compiled by the census bureau show that the death rate of husbands between the ages of thirty-five and forty-five is about one-half that of bachelors of the same age group. And the death rate for husbands of all ages between twenty-five and sixty-five is only two-thirds that of bachelors between those ages. -Pathfinder Magazine.

Palatine Germans

The Palatine Germans were Germans from the Palatinate, the area furnishing the largest number of immigrants. in the southwestern part of Germany. The emigration from the Palatinate for a time surpassed in extent that from all other parts of the country, so much so that in England and America emigrants from Germany were often called Palatines. They settled largely in New York, Pennsylvania, New Jersey, Maryland and North Carolina. Many came over in the early Eighteenth century.

Lonely Tangier Island

Tangier Island, Va., is a hilly little island with a population of about 1,500 in the Chesapeake bay 12 miles (2 hours) by boat from Crisfield, Md. The islanders have always made their living entirely from the water-from fish oysters, crabs and plants. One peculiarity about the island is that there are absolutely no means of artificial transportation, neither automobiles, buggies, nor street cars, and in addition neither telephone nor wireless stations.

THE CABIN 88

By R. H. WILKINSON

©, Bell Syndicate.—WNU Service.

HE cabin was located in a grove of evergreens. High flung mountain peaks surrounded it, hemmed it in.

A tiny river ran through the grove. and from its banks a path wound up to the cabin's front door, 50 yards

It was mid-afternon when Constable Thorpe Leonard of the mounted police force at Lamonte beached his canoe and came up the path.

There were two men with him, Gene Lameraux, the half-breed trapper, who had brought news of Mitchell's death, and Dr. Nathan Irving, connected with

the police in a medical capacity. The cabin was a single room affair. There was a cook stove, a bunk built into the wall, a home-made table, a chair, three empty soap boxes, shelves lined with provisions, a lamp and a litter of Mitchell's personal effects.

Mitchell lay on the floor, face upward, near the cook stove. The chair was close by, and it ap-

peared as if the man had been sitting down when the thing happened. Doctor Irving knelt beside the still

figure and bent over it. Leonard and the half-breed stood by,

watching, awaiting the verdict. Presently the medical man looked up, shook his head.

"Been dead five, maybe six, hours. I'd say poison. Possibly strychnine. Whatever it was, the effect was instantaneous.'

Constable Leonard bestirred himself. "Poor devil. Always liked the old man. He must have been pretty well depressed, yet you can't blame him. He's been prospecting around the north country for better than 20 years, and never made a strike. He always had faith that some time his efforts would be rewarded. Can't blame him for giving up. Discouraging business."

The officer turned and began browsing about the cabin.

On the opposite side of the room he picked up a glass, smelled of it, screwed up his nose at the unfamiliar odor, and returned to the doctor.

"Better analyze what's left in this, glass, doc. It looks like Mitchell drank Lameraux, the half-breed, had sat down on a soap box, and when the

policeman strolled outside the cabin, he followed. They walked down the path and

turned into a well-beaten trail that paralleled the river. A hundred yards of walking brought

them to the scene of Mitchell's recent There was a crude cradle and a pan; a roughly built sluiceway, with a small

heap of sand nearby. Leonard examined the things closely, at last stooping to scrutinize the imprint of a man's boot in the soft earth. The imprint was one of many, but a peculiar marking on the head of it, made perhaps by a design of protrud-

rest. Leonard looked for and found more of the imprints, compared them with the others that were about.

ing nails, distinguished it from the

Presently Lameraux, who had been watching the operations, laughed.

"There ess nothing strange about zee imprint, M'sieu, I made it myself, early this morning."

"You?" Leonard looked up in faint surprise. The half-breed nodded.

"I came along thees way when approaching the cabin. Mitchell was not here, and I examined zee sluice."

"I see." Leonard nodded abstractedly, and turned back along the trail. Lameraux followed. At the point where the two paths joined, the policeman halted and swung about, as if a sudden thought had occurred to him.

"Was Mitchell dead when you entered the cabin?" he asked.

Lameraux spread his hands. "I have already told you. He was lying on the floor. I spoke to him, but he did not answer. After a moment I realized something was wrong. I went on to the post for to get zee doctor an notify zee police."

Leonard nodded, abruptly changing the subject. "Have any luck with your traps last

winter, Gene?" The half-breed beamed. "Zee wonderful luck. Zee bon Dieu was kind. Three black foxes were

among the catch." "Where did you sell the furs?" "At the Hudson Bay post near Little Water. Zee price was poor, but Gene ees plenty satisfied."

Leonard turned and started up the trail. Doctor Irving was just emerging into the sunlight.

"Could you make out what kind of poison it was, Nat?" Leonard sat down on the washbench near the door, his back to the wall, his

hand resting carelessly near the service pistol at his waist. The doctor was lighting a cigarette. "May not be strychnine, but something

equally as powerful." "And something that would effect an

"Yes." "You're positive on that point?"

instantaneous death?"

"Absolutely." Leonard seemed to consider, and Doctor Irving said:

"It never seemed to me that Mitchell was the sort of guy who'd kill himself, despite his rotten luck." He shrugged.

"We'd better be moving along, in order to get to town before dark. Shall I carry the body down to the canoe?"

"No. Let Lameraux do it." The half-breed's eyes opened wide in an expression of amazement.

"But m'sieu, I have no taste for such a task. Besides, I am late now. I must go on to reach Little Water in two days' journey."

"Oh, so you're going back right away, eh? Not staying with us long. You must like to walk, mister. Come down for the exercise, did you?" Lameraux's eyes were smoldering.

He fought to keep control of his nerves. Irving leaned against the door jamb, watched covertly, sucked on his He seemed to sense what was about

to happen, and was prepared to lend a hand. Leonard flipped out his service pistol with a quick, almost imperceptible

movement, At the same instant Lameraux flung

himself forward. A knife glinted in the sunlight.

Irving sprang from his position near the door and sent the half-breed crashing to the ground, himself sprawling across the prostrate man's legs.

Leonard stood up, glancing at the torn place in his jacket where the knife had ripped the cloth of a sleeve. He balanced the pistol in his hand.

"Thanks, Doc." He spoke harshly to Lameraux. "Get up and turn around, with your hands behind you."

He issued the customary challenge and reached under his jacket for the handcuffs that dangled there.

"You should have kept up your bluff, mister; if it hadn't been for the glass you might have got away with it." Doc Irving looked up sharply. "Glass?"

he asked curiously. Leonard nodded. "To begin with Old Mitchell made his strike and was working the claim. Any fool could have seen that. Lameraux must have come along, talked with the old boy and then gone up to the cabin with him for breakfast. Somehow or other the breed poisoned Mitchell's food, then cleaned up the breakfast dishes, dumped the corpse where we found it, and poured a little of the same poison on the table, in

order to make it look like suicide. "But Lameraux apparently didn't know or figure on the instant effect the poison would have. For if Mitchell had died the moment the poison got into his system, he couldn't have walked from the table, where he supposedly fell out of the chair dead."

Universe Is Not So Big,

the Astronomers Declare The go-getting spirit of America, "big, bigger, biggest," received a setback at the hands of science when it was determined that the galaxy of stars, of which the earth was just a minor member, wasn't nearly as large as had heretofore been thought-not by 75 per cent, says a United Press writer.

In viewing the universe around us through powerful telescopes, astronomers for years have puzzled at the extraordinary size of our own galaxy. It just didn't fit into their reasoned ideas about space and its occupants.

Now it has been determined that somewhere in space is a layer, or belt of known properties, which has the power to absorb light rays. Perhaps it is the Milky Way which absorbs this light, as Dr. Joel Stebbins, of the Uni-

versity of Wisconsin suggests. At any rate, science has determined that light rays from distant stars are absorbed before reaching the earth-75 per cent, in fact.

This, according to Dr. W. Baade, of Mt. Wilson observatory, means that stars in our own galaxy, which appeared to be thousands of light years away, really are only one-quarter as distant as they appear.

Too, stars of far-distant island universes are closer to the earth than we previously believed.

Within the next few months an improved type of "thermionic tube" will be installed at the 100-inch telescope on Mt. Wilson. This apparatus will help immeasurably in measuring the brightness and color of stars and the giant nebulae lying billions of miles

away from the earth. This instrument will increase the useful measures of the light of nebulae from the thirteenth magnitude to the fiftenth magnitude. In other words, it will be possible to measure the size and distance of island universes which are nearly 50,000,000 light years from the earth. The present limit is about 25,-000,000 light years.

Tree Transplantation

The best method for transplanting elms and oaks depends a good deal on the size of the plants moved. Oaks have very deep roots which makes large oaks hard to move. If an elm is over a foot or two tall, writes E. G. Cheyney, of the Minnesota division of forestry, it is impossible to get all the roots, but as many of the roots should be kept as possible. It is advisable to trim back the tops proportionately. Elms over 3 inches in diameter should be moved in the winter with a ball of

Wealth of a Nation

The wealth of a nation is and must always consist in the power of individual human beings to obtain satisfaction for their wants. And that nation is rich when its inhabitants are happy.

U. S. Leads in Peppermint Oil

The United States is the world's chief source of peppermint oil, more than 25,000 acres of mint being grown in Michigan, Indiana, and Washington

IMPROVED UNIFORM INTERNATIONAL CUNDAY CHOOL Lesson

Lesson for February 3

PETER'S RESTORATION

LESSON TEXT-Mark 16:17; Luke LESSON TEXT—Mark 16:17; Luke 24:34; John 20:1-10; John 21:11-19.

GOLDEN TEXT—He saith unto him the third time, Simon, son of Jonas, lovest thou me? Peter was grieved because he said unto him the third time, Lovest thou me? And he said unto him, Lord, thou knowest all things; thou knowest that I love thee. Jesus saith unto him, Feed my sheep. John saith unto him, Feed my sheep. John saith unto him, Feed my sheep. John

PRIMARY TOPIC—When Jesus Helped

Peter Try Again.
JUNIOR TOPIC—What Peter Learned
When He Failed.
INTERMEDIATE AND SENIOR TOP-—How to Prove Our Love for Christ. YOUNG PEOPLE AND ADULT TOP-IC-The Test of Loyalty.

As there were seven definite steps in Peter's downfall, so there are seven definite steps in his restoration. These steps in both his downfall and his restoration were most strikingly presented by G. Campbell Morgan at the Bible conference in Northfield in 1898.

1. Christ's Prayer for Peter (Luke 22:31, 32).

Little did Peter realize the testings through which he would be forced to pass. Christ revealed to him that Satan desired to have him to sift as already prayed for his abiding faith. We see thus that before Peter fell the Lord began the preparation for his reclamation. The Lord knew that soon he would have to announce to him that before the cock crew he would deny him thrice.

II. The Look of Jesus (Luke 22:61,

This look was not one of contempt, but one, doubtless, filled with pity and pain. It revealed the heart of God. It brought to Peter the full consciousness of his cowardice and disloyalty and his blasphemous words of denial, while at the same time displaying Christ's love and pity.

III. Christ's Message Through the Women (Mark 16:7).

The Lord's message was "Go tell my disciples and Peter." Had the message merely been, "Go tell my disciples." Peter would have believed himself not included. The message indicated that Christ had particular consideration for him and loved him still. What new hope filled Peter's heart as he heard this message from the risen Lord is seen in his words: "Blessed be the God and Father of our Lord Jesus Christ, which, according to his abundant mercy, hath begotten us again unto a lively hope by the resurrection of Jesus Christ from the dead" (1 Pet. 1-3).

IV. A Personal Interview With the Risen Lord (Luke 24:34).

The declaration is here made that the risen Lord had appeared to Simon. The nature of the conversation is hidden in mystery. It may be that the Lord reminded him of his boasting ing up his grievous sins (Luke 24:34; cf. John 20:1-10).

Peter's Open Confession of Love (John 21:11-17).

The disciples had gone back to their fishing. As they returned weary and hungry Christ invited them to breakfast. In connection with this minis-Jesus, by skillful questions, induced Peter to confess him three times. A vital step in Peter's restoration was his professing anew his love for his Lord. What marvelous grace, that the one who had across the fire of the enemy denied his Lord should now across the fire prepared by the Lord VI. His Word Given Back (John

Instead of putting poor Peter on probation before giving him anything to do, he immediately brought him back into fellowship with his Lord in service. It was because Peter passed satisfactorily the examination and the Lord saw his real love for him that be permitted Peter to begin his work.

VII. Willingness to Suffer for Christ (John 21:18, 19).

While Peter had now openly con-Lord's hands his work, he needed to be made willing to drink the bitter cup of suffering for his Lord. Jesus made it clear to him that he was to follow his Lord in crucifixion. He was now willing to suffer the shame of the cross for the glory of God. Peter, with the other disciples, later counted it joy that they were counted worthy to suffer (Acts 5:41). It was the Cross of Christ over which l'eter blundered. After his restoration his greatest happiness was to suffer for Christ's sake.

Meekness

Meekness is more than the absence of self-assertion; it is the manifestation of the mighty power of God.

One of the chief values of a noble friendship is that it keeps one living at his best.

Greatest Moment The soul's discovery of God is the greatest moment in the life of any man!

Science of Health By Dr. Thos. S. Englar

OF INTEREST TO DAIRY-FARM-ERS-Continued.

"What interest can I have," asks the dairymen or farmer, "in the human disease called undulant fever? Isn't that the physician's or the health officer's concern, and not mine?"

The farmer who is interested in showing a favorable balance on his dairying and cattle-raising operations at the end of the year is bound to have a keen interest in undulant fever fever. of mankind, and its predecessor and cause, contagious abortion of cattle. If he—the farmer—hasn't so far taken the trouble to learn anything about these twin scourges, he will shortly have the matter brought to his attention when State inspectors come to give his cattle the "blood test," as noted here last week.

There is another way in which this disease can tap the farmer's till, and that is in doctor's bills-perhaps for treatment of obscure, chronic disease in his family. This also was touched upon last week.

Perhaps, in view of these facts, the progressive farmer will concede that it is his duty to learn a few simple facts about undulant fever; how it gets about, and how it manifests in the human being. In the first place, wheat and informed him that he had let us go along with leading investigators of the disease, and drop the name undulant fever. We shall call it, henceforth, bru-cel-lo-sis, because it is caused—in both animals and man —by a microbe named Brucella (after a Dr. Bruce, who first identified it). Two important faces about brucel-

> losis are First, the widespread distribution of the infection among animals and mankind.

> Second, Its protean character; the widely varying symptoms it causes, and the different parts and organs of the body which may be attacked by it.

The world-wide scope of brucellosis is a matter of comparatively recent observation, brought out by an infinity of work and study of this disease during the last decade. Dr. Bruce discovered the bacterium, and described the disease, fifty years ago. He happened to be an army surgeon on the island of Malta, in the Mediterranean, so he called the disease Malta fever! In the course of a half-century, we have learned, for a certainty, that the infection runs rampant through the cattle, swine and goat herds of the civilized world. Because it is readily transmitted by any of these animals (especially hogs) to man, it is also widely distributed, as human brucellosis, throughout the world.

This, naturally, brings it under the sharp scrutiny of public health experts and officials. The only way humans can be protected from it is by self-confidence, his warming himself at stamping it out among animals, and the enemies' fire and his blasphemy, the nation-wide movement, enforced but only to assure him of his unchang- by law, to have all milk-herds "blooding love and that the Cross which he tested" is a long and important step shunned was the very means of cover- in that direction. It is, of course, only a beginning, but it protects a most important class: the innocent consumers of fresh dairy products-including the farmer himself.

There are left, still endangered, the thousands of workers in slaughterhouses, and handlers of fresh pork try of providing food and warmth, and beef products. In this class, the incidence of brucellosis is very high. Alice C. Evans, prominent in the U. S. Public Health Service, writes: "The handling of infected material leads to infection (and Brucella disease) more readily than does the ingestion of contaminated food." The protection of thrice confess his love for his Lord. this class of workers is a prime responsibility of the specialists in Industrial Medicine, backed up by conscientious lawmakers in Congress and the several States.

It is reliably estimated that "from 6 to 10 percent of the cattle of this country are excreting Brucellae in their milk, and a much larger percentage of cattle are infected, for not all infected cattle excrete the organism

in their milk." (Evans.) As for the many and varied effects fessed Christ and had received at the | of Brucellae upon the human organism, it is possible to touch upon the matter only briefly here. The important is that only a fraction of brucellosis cases are correctly diagnosed. There are, recently, exact methods for identifying the disease, but these tests are not yet in such form as to be used successfully by the general physician. It is, accordingly, no reflection upon the latter that he frequently fails to diagnose brucellosis—and calls it something else, as described in this column last week.

> So, when it is set down that there were reported, for the first eleven months of last year, only 45 cases of brucellosis in Maryland, it must not be assumed that this represents all the damage and disability caused, in this State, by the disease. Far from it! As I remember, one-fourth of the total number of cases were reported from Washington county. Is it that Washington county is a center for Brucella infection? Not at all. It is that Washington county has a particularly energetic, and doubtless unusu-

ally capable, County Health administration, including someone who is interested in brucellosis. (Apropos, I believe the State's blood-testing (for Brucella infection) work was begun in Washington sounty.) All but one or two of the Washington county cases were, at first, diagnosed as some other disease, before the correct diagnosis was made by laboratory meth-

When other health officers, and other practising physicians, and more industrial economists and a great number of progressive and practical dairyfarmers become interested in brucellosis and the problems it creates, then we shall hear as much about the disease as we now hear about typhoid

Then, too, we shall make more rapid progress in controlling it!

Marine Corps Supported

by Every Navy of World

The famous Marine corps, best known for service in France and later the occupation of Haiti and Nicaragua, was founded as the result of an act of the Continental congress, passed November 10, 1775. Two battalions of marines were authorized by these early legislators who met in Philadelphia. But even before this there were ma-

rines. Since ancient times the nations of the world have had their corps of these fighters. Today every major navy of the world

has a corps of marines. The French call them "devil dogs" because of their disregard of danger. Often they are called "soldiers of the sea," and we call them "leathernecks," because of the stiff leather collars they formerly

In the Spanish-American war in 1898 the marine corps consisted of 2,000 enlisted men. It was steadily increased until 1917, when 13,124 men were ready to fight for Uncle Sam when this country entered the World war. But when the battles of Belleau Wood, Soissons, Champagne, Mont Blanc, Meuse Argonne and of the Rhine were brought to an end there were 31,824 marines serving with the A. E. F.

In its organization, duties and training the marine force was modeled after the British corps of the Eighteenth century. Today it remains virtually as organized-a military and administrative organization, complete in itself, forming an integral part of the naval

Animals Have Own Games

and Have Lots of Sport Animals play games of their own invention, as children do. Most young animals are exceedingly fond of "tugo'-war." Young foxes are particularly addicted to this form of sport, pulling against one another with might and main, and every dog lover has seen terriers doing the same thing.

Otters are fond of "shooting the chute" down a slope already well worn by generations of "shooters." Naturalists say that badgers play "King of the Castle" by moonlight. One of them mounts to the summit of a hillock and holds it against all comers, the badger who drives him off taking his place until he, too, is dispossessed. They play in perfect good temper for hours at a stretch. Lambs are often

observed to play a similar game. Both cats and dogs play hide and seek. A dog and a cat in the same house will thus play together, but the cat always hides and the dog finds. Elephants are known to have special spots in the dense jungle where they resort for dancing !- Tit-Bits Maga-

Numerous Varieties of

Bothersome Ccckroaches While there are many varieties of cockroaches belonging to the same family, among which are the German and Australian, the American is the most common and widely distributed species in the corn belt, according to an authority in the Missouri Farmer. About eleven months' time is required for a cockroach to hatch and grow to maturity. The female lays a number of eggs which she deposits in a brown capsule. This capsule she retains in her body until the young are about ready to hatch, whereupon she deposits it along the run-ways of the insect. When the young hatch they live for a time with the old pair. At night they sneak into kitchen and pan try and track around over the food. They excrete a material over food and in their run-ways that has a foreign and very offensive, odor. That they are exceedingly filthy and dangerous to human health is obvious when it is known that they eat and track over anything from a dead mouse, a bed bug, an empty egg capsule, to all kinds of human foods.

Knew Their Winds

The ancient Greek navigators knew enough about the seasons and directions of certain winds, such as the etesians and the Indian monsoons, to utilize them in making voyages that would have been difficult or impossible without such knowledge, states a writer in the New York Tribune. After the Fifteenth century the trade winds of the Atlantic and the Pacific were similarly turned to account. At the close of the Seventeenth century the earliest attempt to chart ocean winds was made by Halley, the English astronomer, whose crude map of the trade winds and monsoons implies that he had a certain amount of statistical information at his disposal.

USE COLOR SCHEME TO SELECT LAYERS

Red-White-and-Blue Method Is Recommended.

Prepared by the United States Department of Agriculture.—WNU Service.

A simple plan of selecting the best layers in a farm flock is described by H. L. Shrader, of the United States Department of Agriculture, as the redwhite-and-blue method. It calls for the

use of three colors of leg bands for

marking three desirable characteristics

of hens in the breeding flock.

The first culling date provides a check on all pullets that have begun to lay. These are the early-maturing pullets and are marked with red leg bands. It is easy to determine an early layer, as she has a deep-red comb and wattles and a moist vent. If the bird belongs to one of the yellowskinned varieties she will show distinct bleaching around the vent and on the

The next culling period affords an opportunity to check the rate at which the pullets have laid during the winter. Those that have laid steadily will have lost, through the egg yolks, most of the yellow coloring matter assimilated from yellow and green feed. But birds that have taken a vacation during the winter have some of this pigmest, readily observable, in the beaks and shanks. All pullets with bleached beaks and shanks are marked with a white leg band.

The last period for culling comes after the hot weather has arrived. This is the time to detect the birds that take their vacation before they have finished their laying year. The molt is a good indication of the time these pullets have been out of laying. The bird with ragged, worn feathers may not look like a blue-ribbon winner compared with her sister that has clean, bright feathers. But the bird with the worn feathers deserves the blue leg band because she is a persistent layer and has kept up her production into the hot weather instead of molting a new crop of feathers. Leg bands are removed from birds that go broody.

The red-white-and-blue layers should be mated the next spring to males from flocks with trap-nest records that show heavy winter production of goodsized eggs of the proper color for the

Heat for Poultry Houses

Where Winter Is Severe Heating poultry houses seems to be necessary, in very cold parts, if hens are to lay well in winter, says the Montreal Herald. The danger of fire makes great care essential. Attention to a few elementary principles will assure a maximum of safety and prevent very heavy losses.

First, the floor of the house and the stove should be level. This not only makes for less danger of oil leakage and better stove functioning, but also makes for keeping the litter level instead of piled up in the low spot which may be under the stove. Be sure the thermostat or wafer is in good shape and actually regulating the stove.

Place asbestos or sand, or both, under the stove. Be sure the sand is as deep or deeper than the litter, and scrape out any litter that works under the hover. Making sure that the sand is deep enough, and that the peat. crushed cobs or straw are not under the stove, should be a daily checking

The brooder house should always be placed far enough from the other buildings so that if the worst comes, it won't involve other farm buildings.

Lack of Mineral in Feed Lameness in chickens may be the result of a lack of calcium in their food, which can be offset by feeding oyster shell, placing it before the birds in self-feeding hoppers; or, add about 5 per cent bone meal to their mash ration. Lameness may also be caused by intestinal parasites. The only way to relieve intestinal parasites in hens is to give them worm capsules and follow this up in about six to eight hours with a dose of Epsom salts. It may be necessary to repeat the dose in about ten to twelve weeks' time.-Montreal

Fattening Cockerels

The size of pen necessary to fatten 20 cockerels would be about 10 by 12 feet, providing the cockerels are from four to five pounds each. It is hard to tell how much it will cost to fatten the birds. Very much depends on one's ability as a feeder and the constitution and vigor of the cockerels. The pen should be light; there is no object in having it dark. The birds will do better where they can have considerable sunlight, providing they are in confinement and the pen ventilated.

Sanitary Poultry Houses

Sanitation means a lot to some poultrymen and not so much to others. We should use our common sense, declares a poultry expert at the North Carolina State college. Manure should not be allowed to accumulate on the dropping boards; litter should not become soggy and sour; drinking fountains should be cleaned once a day and sterilized once a week; clean nests should be the rule and the mash hoppers should be scraped out occasionally, especially in damp weather.

Revolutionary Calendar

of the French Republic The revolutionary calendar was the calendar of the first French republic,

says a writer in the Indianapolis News. It was substituted for the ordinary calendar by a decree of the national convention in 1793. The 22nd of September, 1792, the day from which the existence of the republic was reckoned, was the date of the new calendar. The year began at midnight of the day of the autumnal equinox, and was divided into twelve months of 30 days, with five additional days (sans-culottides) for festivals, and six in every fourth year. Each month was divided into three decades of ten days each, the week being abolished. The names of the months, with their English significance, and the approximate dates of their commencement, are as follows: Vendemiaire (vintage), September 22; Brumaire (fog), October 22; Frimaire (sleet), November 21; Nivose (snow), December 21; Pluviose (rain), January 20; Ventose (wind), February 19; Germinal (seed), March 21; Floreal (blossom), April 20; Prairial (pasture), May 20; Messidor (harvest), June 19; Thermidor or Fervidor (heat), July 19, and Fructidor (fruit), August 18. The five regular sans-culottides were dedicated respectively to the Virtues, Genius. Labor, Opinion and Rewards. This calendar was abolished by Napoleon at the end of 1805.

Serbia Always Markets

Brides Through Broker Many of the younger Serbians wish elders would abolish the custom of buying and selling brides, but the older

generation can't see it that way. And the authorities are helpless to stop the practice, too, because negotiations between the parents involved are carried on in secret by a marriage broker, called the storjnik, and no one is wiser until it is settled. The supporters of the old order

claim they are put to great expense in rearing their daughters, and it is only right and fair that the bridegroom should pay for the added help he thus obtains for his household in taking a

Prices vary greatly in this Serbian bride market, some fetching as high as 30,000 dinars (about \$600), others as low as 2,000 dinars. A bride's worth is measured by her health, strength and knowledge of farm and household affairs. Beauty is a secondary consideration, but should the prospective wife possess it her value is enhanced.

In many instances when a suitor has been too poor to pay the price asked by the girl's parents, he has abducted his bride with the aid of friends. And as only the spilling of blood can wipe out the deep humiliation and disgrace of having a daughter "snatched," feuds lasting through generations have in this way begun.-Pathfinder Magazine.

Week-Long Halloween

There is a week-long Halloween among the descendants of America's most civilized pre-historic inhabitants, the present-day Mayas of Yucatan. A curious mixture of European folk lore introduced by the Spaniards and the age-old legendary of their remote ancestors is revealed by Dr. Robert Redfield, ethnologist of the Carnegie Institute of Washington. On October 1 and November 1 all the souls of the dead, according to the Mayan belief still strongly held, return to earth for an annual visit and depart one week later. On these days food is set out for them and they are bidden to eat. The festival is known as "dinner of the souls." It is a domestic ritual in which each family recalls and propitiates its own departed members.

Training Racing Pigeons

Training British racing pigeons, however thorough, does not entirely account for the homing instinct. One theory is that when a bird is taken from the loft, a kind of invisible elastic or magnetic influence is set up, which draws the racer irresistibly back from wherever it is released. Pigeons of the second generation, bred in the same loft, appear to have this power more highly developed than others. The most expert fanciers are at a loss to explain a well-authenticated case, where a brood of pigeons, hatched out in an English loft, flew straight to that loft, having never previously set eyes on Britain.-Montreal Herald.

Use of Helium Gas

Air with helium gas content is not poisonous to the body, says Pathfinder Magazine. One of its important uses is to reduce the nitrogen content (about four-fifths of all air) in artificial atmospheres for use in deep sea diving and other work conducted under heavy atmospheric pressure. Experiments conducted by the bureau of mines show that such an atmosphere enables workers to labor for longer periods under higher pressures in safety and comfort than in an ordinary atmosphere.

Bullfrogs Good Jumpers

The size of the bullfrog's legs in comparison to the rest of its body make possible the long, powerful leaps they take when pursued. But possesssion of enormous legs has its disadvantages too, from a frog's point of view, for because of them their owner has more enemies to contend with. As frogs' legs go, none are considered more delicious by connoisseurs of this choice food than those of the bullfrog which is much sought after on this account.

Lights of New York by L. L. STEVENSON

A new racket has recently been developed which is closely akin to the graft of prohibition days when a man, presumably a steward off a boat that had just docked, called up and offered liquor "just off the boat." A suavevoiced man called Mrs. Grantland Rice and said he was a steward on a liner that had brought to this country some surf boards and other attractive products of the Hawaiian islands which had been shipped to Mr. Rice by Duke Kahanamoku as a token of his esteem. Unfortunately, there had been an error in landing directions and the gifts had been left at Norfolk where there was duty of some \$26 due. If Mrs. Rice would give him the \$20, the accommodating steward would see that the native products of Hawaii reached her husband.

As Hawaii is United States terriritory, it didn't occur to Mrs. Rice that there could be no duty on products of these islands. But she did think \$26 was a bit high. Still she finally agreed to pay \$4.65 which was supposed to start the ball and surf boards rolling in the right direction. A young man called for the money. That seemingly has ended the transaction, as he hasn't been seen and nothing has been heard from him since. It is reported that this racket is being worked rather generally among prominent sporting people, some of whom may be susceptible to a bit of flattery. * * *

In many apartment houses, especially the older ones, the dumb waiter is an important part of the life of the apartment dweller. Ice and food come up in it and garbage and refuse go down. At the holiday season, the caps of delivery boys come up with goods and go down with coins. Sometimes there are variations. For instance, when an uptown apartment dweller opened the dumb waiter the other, morning, a big tom cat leaped out and raced around the place, upsetting stands and other furniture until finally shooed out the front door. Investigation by the building superintendent and others as yet has failed to disclose how the cat got into the dumb waiter. Mischievous small boys of the neighborhood are under suspicion. * * *

That happening, however, was nothing compared to one over in Brooklyn. Moans coming from an apartment house dumb waiter caused the summoning of the police. The police heard the moans and tried to go into action. But the dumb waiter was off the track and wouldn't go up or down despite all the jerking-and with each jerk, the moans grew louder. Finally the dumb waiter got back into its place and was yanked up. Then it was found the moans came from a six-foot-three youth. But how he got into the dumb waiter is still a mystery. He had imbibed so much beer the night before. he couldn't remember.

* * * Sometimes a husky physique isn't exactly an advantage for an actor. Brian Donlevy is an example. Ever since his start on the stage, producers have picked him as a "guy who could take it." His first tough role was as one of the leathernecks with the late Louis Wohheim in "What Price Glory." Next came the role of boxer in "Three in One." In the first act, he tripped and sprawled on the floor. In the second, he had to fall out of bed with his arms full of books. In "Perfumed Lady" he was hit on the chin and a large Chinese vase dropped on his head every night and matinee. Last season in "The Milky Way." he again portrayed a boxer. In Act I, he was socked on the chin. In Act II, he was hit with a cane until the cane broke and in Act III, was knocked out by anything but a stage punch.

Having proved that the Irish can take it, he changed over to musical comedy in the hope of a bit less battering. Now, in "Life Begins at 8:40," he is abused nightly by Bert Lahr, who, as the Princeton tomboy, takes several fancy pokes at the Donlevy

C. Bell Syndicate.-WNII Service.

Dog-Sled Mail Routes Carried On in Maine

Rangeley, Maine.—Contracts enabling New England's only dog-sled postal service to carry the mail through deserted snow-bound regions in this vicinity were awarded recently. Fred Fowler, of Oquossoc will drive a dog team over the eleven-mile route from Oquossoc to Kennebago, while William Meyers, of Grant, has the seven-mile route from Bemis to Upper Dam.

Ducks Swell U. S. Fund Washington.—The federal government has realized half a million dollars from sale of duck hunting stamps,

the Agriculture department said.

Largest of Marine Reptiles Is Found

Cambridge, Mass.-Discovery of "the world's largest marine reptile" -a plesiosaur or ancient "set serpent" estimated to have been at least 50 feet long-was announced by Harvard university.

The find was made by the staff of the Harvard Museum of Comparative Zo-ology when they chipped away the rock encasing a 120,000,-000-year-old fossil skeleton.

TANEYTOWN LOCALS.

(Continued from First Page.) The Taneytown Farmers' Union Local No. 9, will meet Feb. 12, at 7:30 P. M., in the P. O. S. of A. Hall, Taneytown. After a short business session a social hour will follow. All members are requested to be present.

The card party held for the benefit of Taneytown Baseball club, was largely attended, on Wednesday night. The net proceeds amounted to about

The Taneytown Home-Makers' Club will hold its monthly meeting, on Thursday, Feb. 7, at 2 P. M., in the Firemen's building. There will be a chair-covering demonstration. Miss Slindee will be in charge of the meeting, which will be open to the public.

The following is the baseball organization for this year: Raymond Sauble, president; Roy F. Phillips, vice-president; David Smith, secretary; Doty Robb, treas. The directors are John Leister, Thos. H. Hracy, Dr. Thos. A. Martin, Wm. F. Bricker, D. J. Hesson and Merwyn C. Fuss.

Keeshonden Thought Great Granddaddy of All Poms

Except for his silver-gray coat of black-tipped hair and his greater size, the Keeshonden too closely resembles the more popular Pomeranian to question their relationship. It is not at all unlikely that he is the great granddaddy of all Poms, which the Germans prefer to call "toy spitz." Previous to their reduction to present-day diminutive proportions, the Pom appeared in size more nearly approaching the 18-inch shoulder height of the Keeshonden, writes an authority in the Los

Both descended from the Siberian strains of northern dogs . . . prick-eared and carrying bushy tails over the back . . . originated in Germany. The Keeshonden is established as one of that country's oldest breeds, dating back to the year 1552.

Angeles Times.

Identical are the characteristics of faithfulness, intelligence, watchfulness their wariness of strangers and friendliness to those they love. Their wedge-shaped fox-like head is framed in a lion-like bushy mane. The nose of the Keeshonden is black, shining from a dark-masked (but not black) muzzle, and the dark eyes, rimmed with light-colored hair. The tail, carried in a curl to right or left over the back, is white tipped. In profile he is a square dog.

Hardy and able to withstand all kinds of weather, he readily adapts himself to any environment.

Beirut Has Seen Earth's

Mighty Men Come and Go On the face of the rock which overlooks the scenery from Beirut to Tripoli are written the names of every conqueror that has invaded Syria from Sennacherib the Assyrian down to Field Marshal Allenby, who conquered Palestine in the World war.

That mighty testament to Syria's glorious past is one of the few colorful touches to be noted around this seaport at the foot of the Lebanon. The climate is damp and stifling in hot weather. To make life durable, townspeople take to the mountains where cedars such as those Solomon imported for his temple still grow in numbers,

In almost every direction, trips by motor out of Beirut bring one in touch with the immemorial past. Not far down the Mediterranean coast lies Sidon. Oxen now plow the fields where once stood the great temple of As-

Tyre, which the Syrians call Sour, is farther south. Once the mightiest city of the East, it is now a fishermen's village.

Between Beirut and Sidon lies Swaifet, to where Cleopatra is supposed to have journeyed for her final tryst with Anthony before he set out for the battle of Actium.

Vessels That Disappeared

The following is a list of missing vessels of which the navy has a record, together with the dates of their disappearance: Reprisal, 1777; General Gates, 1777; Saratoga, 1781; Insurgent, 1800; Pickering, 1800; Hamilton, 1813; Wasp III, 1814; Epervier, 1815; Lynx, 1821; Wildeat, 1829; Hornet, 1829; Sylph II, 1839; Sea Gull, 1839; Grampus, 1843; Jefferson. 1850; Albany I, 1854; Levant II, 1860; Tug Nina, 1910; Cyclops, 1918; Conestoga, 1921; Kobenhavn, 1928. In addition there are the Flying Dutchman and the Marie Celeste, 1872.—Washington

Earth's Rotation, Gunfire

Although the effect of the earth's rotation on accuracy of long-range guns was not considered in the firing tables of the United States army until the World war, it is an important factor, writes H. E. Erskine, Malden, Mass., in Collier's Weekly. When not corrected for this rotation, a 2,100pound projectile, fired due west at the equator, will travel-in land distancenearly a quarter of a mile farther than one fired due east.

Color and Meaning

Black is symbolical of death. White is symbolical of innocence and purity; violet of mourning; red of martyrdom, and emblematic of the Passion of our Lord; blue of hope and constancy, and emblematic of Heaven; green of love, and signifies hope and prosperity. Gold is symbolical of wisdom and glory and signifies faith and fruitful-

U. S. Dollar Sign First

Printed in Arithmetic There are four current explanations of the dollar sign, asserts a writer in the Cleveland Plain Dealer. One is that it was a modified figure 8, referring to eight reals. Manuscripts of the colonial and earlier national period show this figure 8 commonly written in accounts and dates as open both at top and bottom and appearing as a stroke downward from right to left through an S (\$).

Another explanation is that the dollar sign is a monogram of U. S., one letter superimposed on the other. Neither of these explanations has been widely accepted, and the latter is the more improbable since at first the dollar sign had only one stroke through the S.

The more usually accepted explanation is that the sign represents the two pillars and scroll on the reverse of the Spanish dollar, the pillars being approximated to each other and the royal coat of arms omitted and the sign adopted when the dollar was based on the Spanish coin. There is no record of any action by congress regarding the dollar sign.

There are two circumstances that are difficult to interpret if this explanation be accepted. In the first place, the dollar sign is not known in any American manuscripts before 1792. It first appeared in print in an arithmetic published in 1797. Before then and long afterward dollars were indicated by an abbreviation after the figures. Several abbreviations were used, such as dol., doll., dols., dolls. and ds.

Wine Soil Held Definite

Aid to Modern Superstition It is odd but true that superstition thrives nowhere else as well as in the wine-growing soil, writes a Budapest (Hungary) correspondent in the De-

Just as the people of the Vesuvius region are the most superstitious of all Italians, and the banks of the Rhine are shrouded by hundreds of legends, Mount Badacsony-home of Hungary's famed "blue-stem" grape—has a folklore of its own.

There is the bell stone. When struck by a hard object, it rings like a bell, and may be heard at a long distance. The peasant's belief is that even the blackest sinner must confess his crime upon hearing this mysterious warning. Less gloomy is the "pink stone." If a girl sits on this stone, facing the mountain, and heaves a deep sigh, she is certain to get married within the

Shoots of vine carried in procession at vintage festivals are supposed to the end of the month, 5,871 more than bring good luck to anyone who is beaten with them.

Pemmican

Pemmican as made by the early buffalo hunters usually consisted of dried and jerked buffalo meat into which was pounded the dried berries of the shadbush. When properly made and cured it would last for an indefinite period.

U. S. Flax Acres Huge

Sixty-two million acres are required to produce the flax nece annual consumption of linseed oil. This is equivalent to the area of the upper four New England states.

Water as Food

Commonly speaking, foods are those substances eaten or drunk for the building up and maintenance of the human body and to supply energy for its activities. In the more exact scien tific sense, only those constituents of the foods consumed which are actually assimilated are considered foods, the remainder being waste. Water may be regarded as the most important of foods, constituting nearly 70 per cent of the human body. It is an absolute necessity for the maintenance of life. The average weight of water consumed per day, only part of which is assimilated, exceeds the dry weight of all the other foods combined.

The Federal Deposit Insurance Corporation WASHINGTON, D. C.

MAXIMUM INSURANCE \$5000

THE TANEYTOWN SAVINGS BANK

has received from the Federal Deposit Insurance Corporation at Washington the official signs which will hang at all receiving windows as visible evidence that the depositors of this institution are insured.

THE TANEYTOWN SAVINGS BANK

is one of more than 14,000 licensed banks in the country which are receiving these signs. Insured banks are able to offer protection to their depositors up to \$5,000. Statistical studies have shown that this maximum fully protects more than 97 percent of all the depositors in insured banks

A statement by the Federal Deposit Insurance Corporation follows:

"The purpose of the signs is to let depositors know which banks are insured. Heretofore, although 90% of the licensed banks are insured, depositors have had no easy means of identifying them.

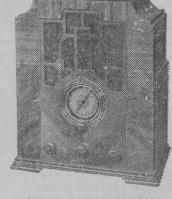

"If, by any unforseen circumstance, an insured bank should suspend, the Insurance Corporation would begin paying off the depositors just as soon as a receiver was appointed for the closed institution. The depositors would receive their money in a few days instead of waiting months or years as was the case in the former method of liquidation. This is not only a benefit to the depositors, but it saves the community from a terrific economic and social blow. When the depositors receive from a terrific economic and social blow. When the depositors receive their insured accounts they assign their claims to the Insurance Corporation. Thereafter liquidation proceeds on a business-like basis with the maximum chance of the Corporation and other creditors being produced in family. ing paid in full."
