Ten Main Causes Given Covering Losses in the year 1933.

THE ORIGIN OF FIRES

The figures given below are from a pamphlet "Facts about Fires" re-cently published by the National Board of Fire Underwriters, including the addition of 25% for uninsured property, and fires not reported. Only the ten causes having the largest actual loss, are given. Exposure from other fires \$20,280,999 18,048,750

Matches, smoking, etc 17.694.459 Defective flues Incendiarism Stoves, Furnaces, etc Misuse of electricity Spontaneous combustion Sparks on roofs Petroleum and Oils

127,337,870 Unknown causes One would think that loss from lightning fires, would be among the first ten. The following facts are stated. Fifty-six percent of home fires originate in the basement. Attics roofs and chimneys supply the cause for twenty-two percent of resi-dence loss. One-third of the National fire loss takes place in rural and agricultural districts.

Most of the forest fires (the amount of loss not stated in the table) "are caused by the careless smoker," who casts his match, burning cigar or cigarette stub, or hot pipe heels, into dry brush, grass or litter; and those who fail to extinguish camp fires.

Of the total amount of fires covered by the figures, less than one fourteenth was due to matches, smoking. etc."

-12--A GIRL'S ARM BROKEN.

Mary Louise, twelve-year-old daughter of Mr. and Mrs. Andrew D. Alex-ander, near Baust Church, while walking in the dark last Friday morning about 5 o'clock from her room to another, fell headlong down a stairway and badly broke her left arm. She was taken to a Westminster physician who decided that it was a hospital case and arrangements were at once made to take her to the Maryland General.

As her father was not able to drive an auto that distance, due to injuries received recently, she volunteered to go with the physician. The character of the break was such as to require more than the usual adjusting. The same arm had been broken when she

was four years old. She returned to her home, on Wednesday, with the arm in a plaster cast.

-TT-TANEYTOWN FIRE CO. MEETS.

The Taneytown Volunteer Fire Co., held their regular monthly meeting on Monday night with the president, James C. Myers, presiding. The Chief reported that four fire calls were an-

swered during the past month. Election of officers for the ensuing year resulted as follows: Pres., Jas. C. Myers; Vice-Pres., Vernon L. Crouse; Rec. Sec., C. G. Bowers; Fin. Sec., Wilbur Hahn; Treas., William Mrs. Theodore Wagner bought the late Eliza Miller (Burgess Miller) property, on Emmitsburg St., last Saturday, for \$1505.00. She will en-Katurday for State and one Trustee to serve for three years, Carroll Frock. The Company decided to again hold a supper on Washington's birthday, Feb. 22nd. This will be the first supper held by the Firemen for several years, and they earnestly hope to receive the co-operation of the town and community in helping to make it a success. They also decided to give a donation toward the Christmas treats for the children. The Firemen are also planning to sing Christmas Carols immediately after the services are over at the Catholic Church, which will be about 1:00 A. M., Christmas morning. Sev-eral members of the Band are planning to accompany the Carol singers and help send out the good tidings and Christmas cheer. The President appointed an auditing committee, T. H. Tracey, Norman Devilbiss and Charles L. Stonesifer to audit the books of the Company. One application for membership was presented. Installation of officers will be held at the regular January meeting. The executive committee met on Dec 12 and made Thursday evening, Dec. 12, and made the following appointments: 1st. Asst. SPRINGFIELD HOSP. CASE CONTINUED.

Charges of Brutality More and bad food Served.

A voluminous stack of new reports, charging first hand knowledge of the mistreatment of patients at Springfield State Hospital was placed before Governor Nice, on Wednesday, the third day of the hearing on demand 12,201,323 9,899,719 9,26,486 9,017,961 01 the State Survey Commission, J. Cookman Boyd, chairman of the State Survey Commission, told the Gov-ernor that the reports were the test 9,017,961 00 persons closely connected mony of persons closely connected with the institution. He said there were about eighty 9,203,409

separate reports, from which thirty had been selected, about equally divided between statements concerning cruelty and bad food.

Gov. Nice said at the outset of the proceedings that he was prepared to sit as long as necessary to complete the hearing, that began last week. One of the cases, certified to by an attendant, was that of the death of a patient who had all of his teeth extracted at one session; that he bled profusely for a long time, and that volunteers had been called to give him a blood transfusion but he died in three days.

Another patient is alleged to have had all of his teeth drawn at one sit-ting and that he died about a month later, the opinion of the witness being that his teeth caused his death. This same attendant alleged that while the service rendered on the man was good, some of the food served was bad. That he had personally served beans and prunes that had worms in them, and that the meats were positively not fresh.

A statement read by a physician in which he said that in investigations he made of a number of injuries to patients gave rise to suspicions of, abuse, but he did not produce definite proof. Another doctor said there was plenty of brutality at the hospital. That a patient in a strait jacket had been hit by an attendant, who had once before been dismissed for brutality.

Numerous other bits of evidence were along much the same line, both as to cruelty and bad food.

The hearing ended in the afternoon, after warm clashes between Chairman Boyd and Humphrey Wolfe a member of the Board, that promised to result in a fight, but ended in words. Boyd also charged Millard H. Weer (Dem.) with playing peanut politics, and Wilbur Miller, (Rep) with political inter-ference, both of whom are members of the Board.

Boyd, in suming up the testimony, was extremely emphatic and far-reaching in his opinions, and attempted to make it clear that his energy was solely devoted toward securing decent treatment of the unfortunates who were compelled to come to the institution for care and treatment. Governor Nice at the close said that What Influences are Backing the Large Expenditure. The Middletown-Boonsboro opposi-

tion to the proposed shorter road from Frederick to Hagerstown, are certainly letting their opposition be known. They have not only present-ed a strong protest petition to Gov. Nice, th rough Dr. J. Hubert Wade, Boonsboro, but have a petition signed by eleven persons whose farms would be crossed by the proposed new road,

alleging that so doing would damage their property; and a majority of those living along the new road, object to the construction of it. It is beginning to be an interesting

question, as to who wants the road built, and why, when it would be only a few miles shorter than the Middletown road?

Actually, the taxpayers of the state who would be required to put up part of the money, should at least be en-titled to have the actual benefits de-rived from it to be more clearly derived from it to be more clearly de-fined. There are sometimes some very secret influences back of direct-ing the building of roads. Common-ly, this sort of influence is called either "pull," or "politics." Might not the expenditure of the \$1,000,000-the state's alleged share

-be of greatly more benefit, to many more people and localities, if spent elsewhere? We are not familiar with the real needs of the proposed section that would be traversed; but we are familiar with many sections still forced to get along with dirt roads.

OLD AGE PENSION CHECKS ARE READY.

On Tuesday, Dec. 10, the Carroll County Welfare Board presented to the County Commissioners the first pay-roll for old age pensions. The County Commissioners are ready to issue the checks at once. 135 will be mailed on Thursday or Friday of this week. This comprises the first group of approved applications. Other applications are pending awaiting re-ceipt by the Board of further information concerning the individual cas-

Very satisfactory responses are being received in the local office from near relatives in answer to the Board's request for assistance and co-operation. According to Article 27 Section 91 of the Code of General Public Laws, children are not relieved

of their responsibility. The Board's decision of the amount of pension grants is based upon, first: the knd of family group, couple, sin-gle, or one of a family group, less any income that might be available from relatives, property, community re-sources, etc. The budget recently adopted by the Board for the year 1935-1936 is as follows:

\$22.00 Couple Single 16.00 Person in family group 9.90

Approximately 150 persons are now employed on WPA projects throughout Carroll County.

GRANGE PROPOSES PLAN FOR TAXATION.

Special Session of the Legislation must meet Problem.

T. Roy Brooks, head of the Maryland State Grange, on Wednesday forwarded to Governor Nice a tax program to be acted on by the special session of the legislature that will likely be called late in January, or in Febru-ary, for the purpose of providing funds for taking care of the unem-ployment and relief situation, follow-ing the expiration of the present gross receipts or sales tax, that will shortly expire by limitation. In brief, the program is as follows;

A two percent income tax, estimat-ed to yield \$2,051,604.

A ten percent amusement tax, estimated to yield \$742,000. A two percent tax on public utility

gross receipts to be effective only until an income tax could become opera-tive and estimated to yield \$600,000. A luxury tax of ten percent on cosmetics and toilet articles, estimated to yield \$350,000.

A gallon tax on the output of Mary-land distilleries, estimated to yield \$500,000.

A tax on beer of 3 cents a gallon, estimated to yield \$600,000.

Perhaps for the purpose of its wider study, the program was announced on the day before the meeting of the State Convention, that convened on

Thursday. The State Grange, on Wednesday, devoted its time to the election of officers, and to a general discussion of the tax question, mainly along the lines of no further taxation on farm property and opposition to any diverion of the gasoline tax from the

building of roads. At night Gov. Nice in an address before the Associated Republican Clubs, warned that increased taxes would be the result of the special ses-sion, and that the encroachments of Federal government taxes made the problems of the state more difficult; and in general blamed the "new deals" and their forms of indirect taxation, and direct control of business operations, largely responsible for unrest in this country. the

++ MRS. SPOERLEIN WINS HONOR.

Mrs. Randall G. Spoerlein of Carroll County, Maryland Farm Bureau's entry in the national public speaking contest for farm women, was awarded second place among the thirteen state representatives who competed in Chi-cago last Sunday. Mrs Spoerlein won the Maryland contest held at College Park, October 25, and spoke on the same subject, "The Farm Home and the World Today." at Chicago. Mrs. Carrie Smith Colby, of New Hamp-shire won first place. William H. Saylor, Smallwood vs. Frank P. Magin, of the same place, charged with trespassing on a right of way to a road. The road had not been in use for years, but was lately used by Magin. Verdict in favor of Say-

lor, and damages assessed at 1 cent. The charge of reckless driving was heard against M. L. Nicodemus, on an appeal from the decision of Justice Bowlus that found him guilty, in the school bus accident on Oct. 18 along the Taylorsville and Mt. Airy road. He was acquitted when tried before the Court. Many witnesses were heard from those in the accident, and the case was gone into in detail.

The jury was discharged subject to call of the Court, and for jury service in January.

-11-NEWS ITEM.

For the last two years the Federal Government under various agencies has been spensoring an Adult Education program. The program this year is being conducted through the WPA and Carroll County has been asked if she wants to carry on night classes in Adult Education.

Applicants must be 16 years or over and cannot be enrolled in a day school and take work under this program. These classes, if held, will meet in the high schools of the county. It is un-derstood that there will be no charge for entering a class except perhaps supplying some necessary materials of instruction.

George E. Cunningham, Washington, who is suffering from a stroke of partial paralysis, is reported to be better in some ways. His many friends here wish him every improvement possible.

John S. Phelps, our Star Route Carrier from Frederick, on his arrival in Taneytown, on Monday morning with the mail, received word of the sudden illness of his mother. She was stricken with paralysis and died on Wednesday night.

The item in last issue, noting visitors to Mr. and Mrs. Jabez Fox, Washington, should have read "James" in-stead of "Jabez." The mistake did not interfere with the good time enjoyed by the visitors.

Mr. and Mrs. Clyde L. Hesson entertained their cousins, at dinner on Sunday evening: Weybright White, Jet, Oklahoma; Mr. and Mrs. David White; Misses Edith and Irene White, of Kingsdown, Kansas.

Mr. and Mrs. Leonard Reifsnider, son David, near town; Mr. and Mrs. D. B. Reifsnider, Miss Janet Reifsnider, Detour, and Mr. and Mrs. James Bushey, Winfield, were dinner guests of Mr. and Mrs. John S. Bushey, of Winfield, on Sunday.

Dr. and Mrs. Percy Mehring and daughter, of Springfield, Pa., were the guests of Mr. and Mrs. Norman Baumgardner and family over the week-end. Mrs. David Mehring and Luther Mehring accompanied them home and will spend this week at the Mehring home.

Those who spent Sunday at the home of Mr. and Mrs. Wilmer Baker, at Bachman's Valley, were: Mrs. Geo. Baker, sons Marcus and Harry; Mr. and Mrs. Maurice Baker, daughter, Mildred, sons Ralph, Lloyd and Fern; Mr. and Mrs. Ralph Koontz; Mr. and Mrs. Albert Smith; Mr. and Mrs. Raymond Baker, son Thomas; Misses Carrie and Vallie Myers and Beatrice Reaver and Clifford Reaver.

Taney Lodge I. O. O. F. held a ban-quet in their hall last Friday evening that was attended by about 225 members, and their wives, who enjoyed an elaborate feast. At the conclusion of the banquet Rev. L. B. Hafer acted as toastmaster, and a number of addresses were delivered, among them being one by Congresman Wm. P. Cole. Grand Master, Charles W. Held gave an inspiring address mainly along the line of the principles of Odd Fellowship. A local male quartet helped materially to enliven the event. ship.

he would require some time to go into the case thoroughly and that his consideration would be limited solely to the question of whether the hospital board had performed its duties in supervision of the institution.

-11-OLD BIBLES EXHIBITED.

Two Bibles, which were snatched from the waters of the Johnstown flood were among those exhibited at the Frederick Lutheran Church, on Sunday last, as a special feature of the 400th. anniversary of the first complete translation of the Bible into the English language.

Forty-one Bibles were included in the exhibit, which was arranged in the front of the church and was viewed by scores of worshippers following the morning and evening services. Special reference to Universal Bible Sunday and the exhibit of Bibles was contained in remarks by the pastor, Rev. Dr. Amos J. Traver, who, with members of his family, contributed a number of the volumes which were displayed.

One of the oldest Bibles believed in existence in America was included in the exhibit, which was made possible by members of the congregation. This valuable old volume, a German Bible, was printed about 1650 on hand-made paper and is illustrated profusely with woodcuts. It is the property of Mrs. Martha Kemp Slemmer and was exhibited at the Sesqui-Centennial in Philadelphia in 1926. It has been appraised by an authority on rare books of the Library of Congress.

The Bible, according to history, was brought to America from Germany about 1725 by a member of the Dud-row family, who located at Monocacy Settlement, a town long since disappeared. The Bible became watersoaked when Hunting creek overflow-ed during the time of the Johnstown flood. It attracted much attention on Sunday and is in an excellent state of preservation.

Another old Bible on display was Although rol Bible on display was the property of Mrs. William E. Darn-er. Although no date can be deter-mined, the Bible was apparently printed after 1656. It is also in Ger-man and was brought to this county by Jacob Zittle and his wife when they came here and settled at Bolivar. Other Bibles were in the exhibit, dating down to 1791.—Frederick Post. (Some years ago The Record pub-lished a list of old Bibles owned in the

vicinity of Taneytown. If any of our readers preserved the list, we should be pleased to know when it appeared, in order that we may see how the dates compared with those mentioned above.-Ed.)

"Make haste slowly," is often an excellent motto.

BLUE RIDGE COLLEGE EVENTS.

The annual Christmas concert at Blue Ridge College will be held in the college auditorium, on Sunday night,

Dec. 15, at 7:30 o'clock. The college chorus, consisting of thirty-five voices, will be heard under the direction of Prof. Nevin Fisher. Miss Margaret Tribble will be the accompanist. The chorus will sing, among other numbers, "A Lovely Rose is Blooming" by Praetorius, and "O Holy Night" by A. Adam. A smaller ensemble of mixed voices will sing a number of unfamiliar Christmas carols. A mixed quartet, the personnel of which will be Mildred Coshun, soprano; Ruth Anne Nusbaum, alto; Nevin Fisher, tenor and LeRoy Yingling, bass will present se-lections from the cantata "Child Jesus" by Clokey and Kirk. The so-loists for the evening will be Mildred Soshun soprano; Violet Gibson, soprano, and Nevin Fisher, tenor. Miss Coshun will sing "A Christmas Cradle Song" by Alexine Prokoff; Miss Gib-son will sing "O Holy Night" by Adam, and Prof. Fisher will sing "It Came upon the Midnight Clear" by Oley Speaks.

The Triangle Players of Blue Ridge College will make their second appearance this season on Friday night, Dec. 20, when they will present the 3-act comedy, "The Tinker," in the col-lege auditorium.

The scene of the play is laid in the Whitney home in Southern New England and the story records the change which is brought about in the family by an eccentric old man, the Tinker. The time of the play is the Christmas season, and its setting, as well as its spirit, is in harmony with the Yuletide. The play will be presented by a capable cast with Eugene Lloyd playing the title role. The humor of the piece is furnished by the youthful members of the Whitney family.

COMING KIDNAPPED HUS-BANDS."

It is with interest that we announce that the Taneytown Vo.unteer Fire Co., will present on Friday and Sat-urday, Feb. 7 and 8th., 1936, in the Opera House, "Kidnapped Husbands," a three-act melody drama, the most unusual of the newest entertainments out this year, promising the commu-nity something entirely different from anything heretofore shown. Written for laughs, this play surely gets them with a fine musical romance. The proceeds from this play will be for the Taneytown Volunteer. Fire Co., a most worthy cause, and the Fire Co., is asking for the co-operation of every one who is called upon to assist in this production.

Random Thoughts

CHARACTER, AND WORKS.

There are workmen who use their heads, as well as hands, when they work; and there are those who use only their hands. Those who think their work is "good enough" whether much care is used, or not; and those who always do their best, no matter

the job may be. The difference in the attitude of workers, represents the difference between one who is inter-ested in, and careful, while working, and the one who works a certain number of hours for his pay, as his main interest. Moreover. one works to please his boss, and the other works to please himself

The character of one's work, represents the character of the one performing it. A man can hardly be careful, dependable and thorough at work, and the oppo-site when uct at work. Well done,

at one thing, is company with well done in all things. How one works, is also contin-ually recommending him, or discounting him, for promotion. Emergencies are continually presenting themselves, and frequent-ly cause unexpected vacancies that must be quickly filled. The slackers and careless, rarely succeed to better jobs-and may P. B. E. wonder why?

THINKING OF CHRISTMAS?

Why not. It should be to all Christians the most joyous day in the whole year. Not a day to be filled alone with frivolity or feasting-not a day for intemperance in any waybut surely we can be joyous in the truest sense of the Word, and better still, bring joy to others.

We may be unfortunate, feeble, a sufferer from physical pain, and find work? Why "bid" for the former, it difficult to be joyful; but having the and not for the latter? right spirit, and the peace of God In our hearts, we may still be able to one has been customary, and the othfind a bit of joy, where others can not. | er, not? No matter what the answer,

In our own self-seeking of joy let us not forget the "good will toward men" significance of the day. Can we not sons equally as competent and honest forgive and forget that old score that as the one who lands the job, who has been existing between us and a neighbor? Why not make the attempt in the right spirit, and the chances are a friendship will be renewed.

Let this Christmas time be to us a time of real opportunity to bring good | mon folks a chance, who lay no claims cheer to those close to us, first, but | to "professorship?" The case with to our neighbors as well. Let us share burdens as well as blessings.

And may we not make the mistake of thinking that Christmas does not concern us; but is for the more fortunate-those with means, fine homes and good prospects in life. Real riches and joy is a condition that lives within one's heart. We may be rich, and yet be poor; happy, yet a sufferer from pain.

We are not responsible beyond our opportunities and ability, but we are responsible to the full measure of he believes that interdenominationalthem. us-if we know where we can share ligion. ant-Recorder.

The holiday season is a peculiarly fitting time to emphasize the obligations of every motorist. It is of more than passive interest that the Yuletide closes that quarter of the year when automobile accidents, deaths and injuries are at an annual peak, according to the National Bureau of Casualty and Surety Underwriters. How horrible is the thought that as we approach the days when the sentiment, "Good Will to All," is glorified throughout the land, the carnage of wrecks and broken bodies is strewn more than ever over the face of our country.

A great deal has been said about the necessity of courtesy in driving as an accident preventive measure. Driving at speeds reasonable for conditions, sharing the road, passing properly, using correct hand signals, avoiding all those actions which make driving dangerous and uncomfortable for the other fellow, are the dictates of courtesy and manners. So, too, are they dictates of the principle of the good neighbor. Good driving, with a real desire to safeguard the lives of those exposed to the consequences of that driving, is practical Christianity. It is a kind of practical Christianity that followers of all creeds can subscribe to as they join in the common rejoicing at this Christmas season.

The first concern of the churches of America is the saving of souls. By entering with whole-hearted activity into the automobile safety movement, they can extend their activity to the saving of lives, without their first purpose. The blot upon a soul as a result of killing or maiming another IS INTERDENOMINATIONALISM through careless or heedless action, is one not easily erased. The churches have the advantage of being able to appeal to a great section of the drivers of the country on occasions when they are most receptive to the idea of good will as a driving maxim. The good neighbor on the road could well serve as a theme for a sermon in every church at this time of the year. So long as selfishness and stupid recklessness, so long as death and de-

REFERENDUM ON WAR.

The people should be asked to vote forts, is one of the outstanding evils variety and breadth far beyond any in favor of making war, before any war is begun, according to many advocates of international peace. They think we should have a popular referendum on war, before any war is made. If the people had a chance to vote on wars, it is held they would be practically sure to vote "No." When wars come, they come suddenly. If some nation should land an armed force on our shores, or bombard our cities, action would have to be taken ; at once. There would not be any time to appoint a day for voting. A delay of a few hours in resisting such an attack might mean that some great city would be destroyed.

Probably the advocates of a popular vote before war is made, would not go so far as to oppose acts of resistance in case of invasion. Their point would probably be that before any kind of attack should be made on any other country, the people should be asked to vote on such an aggressive war. It is not absolutely clear that people would always vote against war. Sometimes popular passion is aroused by some act of outrage. As for instance, when the warship Maine was blown up in Havana harbor in 1898. The cry "Remember the Maine" rang out over the land. Popular sentiment demanded war against Spam to avenge that act. But public sentiment has changed mightily since that time. The people learned bitter lessons from the World War. A hundred thousand of our fairest youth cut off in their early days, many more than that injured for life, a debt burden to be carried for generations, and six years of depression.these are sorrows felt by every family. The people would vote against any recurrence of such a tragedy. They ask some means

A close reader of The Record, living in Baltimore, writes;

"Your 'why complain of taxes' editorial is timely, though it does not go as far as I like. If all-rich and poor alike-were taxed in equal proportion, no one would be taxed as highly as he is. Believes Pepi II Reigned for the Longest Period

It is believed by historians that the reign of Pepi II of the sixth Egyptian dynasty was the longest on record. According to James Henry Breasted, Pepi II ascended the throne about 2566 B. C., when he was only six years old and reigned 91 years. The reign of Louis XIV of France is the second longest. on record. He ascended the throne in 1643 at the age of five and reigned until his death in 1715, a period of 72 years. Francis Joseph of Austria-Hungary reigned nearly 68 years, from 1848 to 1916.

The longest reign in the annals of. English history was that of Victoria, who ascended the throne in 1837 and reigned 64 years, until her death in 1901. George III reigned from 1760 to 1820, a period of 60 years. The reign of Pedro II of Brazil was 58 years, from 1831 to 1889. Alphonso XIII, born in 1886, was proclaimed king at his birth, he being a posthumous son of Alphonso XII. The Coach Horn

A coach horn is a tapering horn of brass or copper used to sound a few simple calls. It has no keys and its range is limited to six open notes. The horn varies from 42 to 56 inches in length. The calls have a recognized place in coaching, and were, of course, more generally known in the days of the stage coach. The horn, like coaching, is employed generally in connection with racing or by the few coaching clubs in the wealthier centers, as New York, London, Paris, Berlin, etc.

Army and Navy Deserters

Get Into Plenty Trouble The laws governing punishment for desertion are different for the army and for the navy. If a person deserts from the United States army when the country is at war or in a technical state of war, he is always liable to arrest, trial and punishment for the offense. Trials for desertions that occurred between April 6, 1917, and March 3, 1921, are not uncommon at the present time. A statute limiting the time within which an action can be taken against an offender protects peace-time deserters.

According to the articles of war, notes a writer in the Indianapolis News, if a person deserts from the army in time of peace the statute of limitations becomes effective three years from the date of desertion, provided the deserter has been within the reach of the military court. Any period of time that the deserter is absent from the jurisdiction of the military court is deducted from the three-year period. The United States Navy department says that if a person deserts from the naval service when the country is actually or technically at war the staute of limitations becomes effective two years after the date on which he was declared a deserter, that is, he is immune from trial and punishment two years after his desertion, provided he was where the military court could reach him by reasonable diligence. If he is classed as a peacetime deserter from the navy the statute becomes an effective bar to trial two years after the date of the expiration of the enlistment.

In time of war desertion from the army or navy may bring a sentence of death. A peace-time deserter is usually dishonorably discharged and sentenced to a term of penal servitude.

Music Is Read by Blind

by Raised Dots on Paper The blind read music by means of a series of dots embossed on stiff paper touched with the fingertips. The system was developed by Louis Braille, in 1829. He was a Frenchman, blind at three years of age, who became organist of a church in Paris. His system was not adopted until 1850, about the time of his death.

Notes and rests in the Braille system are indicated by different formations of a series of six dots. It somewhat resembles the earlier system of figured bass in harmony. A key of explanation is necessary to understand the reading of music by this system. It was standardized in European countries in 1888, at an international congress of the blind, in Cologne. The first English textbook of the system was published in 1900 and revised in 1902.

available for all is the high cost of embossing the music. The National Institute for the Blind has published more than 3,000 musical compositions in Braille. This music has been made available by a loan library which sends music all over Great Britain to responsible persons .- Indianapolis News.

Art Before Abraham

The pre-Abrahamite art of Ur of the Chaldees takes us back 45 cenuries Abraham was probably horn in Ur about 2.000 B. C., and the first example of archaic Sumerian art has been acquired by the British museum. This is an agate amulet in the form of a frog, which dates 500 years earlier. It is a new discovery so far as its period is concerned, showing astonishing ingenuity and delicacy of workmanship. It was produced in that remote age by rubbing grooves in the hard stone with crushed quartz or corundum, and the white grain of the stone has been skilfully used to shade the body and to form eyes and hands. It is, in short, a specimen of delicate sculpture which could not be excelled even if equaled today, and goes to show that civilization in western Asia had reached a high pitch long ages before the history of the Hebrews is reputed to have begun .- Tit-Bits Mag-

Folger Library

....

One of the show places of Washington, and considered by foremost authorities the "most artistic building in the world." is the Folger Shakespeare library. It is unsurpassed in its collection of material relating to Shakespeare and his writings, says the Washington Star, containing the discriminating results of a life time of study and collection by Honry Clay Folger, scholar and philanthropist. It contains also, an almost exact replica of the. Globe theater of London, wherein were shown the poet's masterpieces during his lifetime.

The Meadowlark

The upper parts of the Meadowlark are light brown, streaked with brownich black. The head has a dull, grayish, straw-colored patch with streaks of brownish-black. The sides of the head are grayish white. The throat, breast and belly are bright yellow, fading into gray-white beneath the tail. The black markings on the upper breast is very showy. The outer tail feathers are white, the center-most, brown with small, blackish spots. The upper, forward curve of the wing is tinted with a light ashy color.

"Key Rings" of Roman Times The "key rings" of the Roman times were interesting on account of their symbolism. Made of various materials, such as gold, silver, ivory, or even of iron, they were surmounted by a small key, in token that the husband handed over to his wife the keys of the home on their wedding day. "I give thee the keys of my house and my honor." Some Saxon rings bore the same device, and the Saxon father used much the same wording, saying to his son-in-law: "I give thee my daughter to be thy honor and thy wife, and to keep thy keys." This idea all fits in with the chatelaine, who always carried the keys of the household at her girdle .- Answers Magazine.

Nails as Omens

This is the "prophecy" concerning the cutting of finger-nails: "Cut them on Monday, cut them for news; cut them on Tuesday, a pair of new shoes: cut them on Wednesday, cut them for health; cut them on Thursday, cut them for wealth; cut them on Friday, cut them for woe; cut them on Saturday, a journey to go."-Answers Magazine.

Crucifix Tattooed on Face

This modern world still possesses Christian men who wear a crucifix tattooed on their face, such as the Chukchi of northeastern Siberia, and others who daily use the old Biblical salutation of kissing each other on both cheeks, such as the Bedouins of Syria and Arabia .-- Collier's Weekly.

Inhabitants of Sweden

Celebrate Longest Day

The longest day of the year is just another day in most countries, but in Sweden it is celebrated with festivities dating from pagan times. Hundreds of travelers gather in Dalecarlia and many of the other provinces, for the people turn out in fine costumes and spend the night in dancing their old folk dances, singing songs that have been handed down for generations, notes a writer in the Washington Star.

In the homes of these regions, in the red log cabins that dot the countryside, the people, proud of their past, are even more proud of the great national arts and crafts revival.

Stockholm has been described as a composite of Scottish lake scenery, of the Bay of Naples, and of the islands of the Aegean. It is built on peninsulas and islands, and there are small harbors and quays everywhere. Hundreds of boats and small steamers ply among the islands.

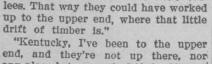

A point of interest of the Swedish people, and the region in which they take the greatest interest, is the Island of Gottland, with the ruins of Visby. During the Twelfth century, Visby was the chief trading city of the North; it built a splendid wall with 37 towers, and within constructed 15 great churches. Then the city burned: later it was looted, and a few years after pirates laid it waste. To cap its troubles, trade routes changed, and Visby had a swift decline.

Plant Propagators Find Apple Is Most Contrary

Cornell university scientific plant propagators in pursuit of the mystery of life have taken a step that involves, even greater mystery. They have discovered that the apple tree seems to be an exception to one of the most generally recognized principles in the production of its fruit.

Everyone knows that parents share their characteristics in their children, and that in animal husbandry and plant propagation great care is taken to retain desirable characteristics by careful selection of parent stocks. But the apple tree appears to be independent of this law.

For the New York experimenters have found that pollen from the blossom of a red apple tree does not make the blossoms of a yellow apple tree produce red fruit or even fruit streaked with red and yellow. Nor will pollen from the blossom of a crabapple tree introduced into the blossom of a tree that produces big pippins or red astrachans produce smaller fruit .- Detroit News.

fused. And likewise I'm disgusted, and likewise I'm sore. Let's get home." He kicked his horse ahead. "Wait a minute !" said Kentucky. He

held his voice low. "In G-d's name, Lee-stop your horse."

"What's the matter?" "Do what I say." said Kentucky without raising his voice, "and don't ask why. Turn your horse and come back to me." Kentucky Jones turned his own horse so that it was headed back the way Lee Bishop had come. "Now bring your horse alongside of mine, easy," he said. "Walk your horse slow alongside of me." "Where the devil we going?" Lee Bishop demanded.

"You see that coulee up ahead of us there, about fifty yards? Lee, how

deep is that coulee?" The drainage feature which Kentucky indicated was a shallow twisting cut that wound its way across the floor of the mile-wide canyon, a creek during the rains, a dry wash in time of drouth.

"Maybe five or six foot deep," said Bishop. "Why?" "Walk with me slow and easy until

we get to the edge of that coulee," Kentucky said. "Then slap hooks to your horse and jump him into it. Soon as he's in, duck out of the saddle and get down." Lee Bishop half drew up his horse as if he would stop. "What's got into

you, Kentucky?" "Come on, you fool!"

"See something?" "I'm not dead sure I did. But. Lee

Kentucky immediately set about the improvisation of bandages. Twice a minute he interrupted his work to sight across the valley floor for sign of

approach. Still keeping constant lookout, he prepared for the night. Bishop appeared to be too seriously hurt to be moved without aid.

Already the light was uncertain; the molten gold of the last sun still touched the upper peaks of the Maricopas, but the wide reaches of Trap canyon were pooled in blue dark. Dragging Bishop's rifle with him, Kentucky Jones went out to his dead horse and got his saddle blanket, and the saddle itself to prop Lee's head. He shucked off his sheepskin coat and used it with the blanket to make Bishop a bed in a snow-drifted angle. Working along the lip of the coulee he collected greasewood and broken drift, and with this built a tiny fire to

warm the wounded man's feet, and another fire at Bishop's side. Lee Bishop opened his eyes long enough to say faintly, "That'll only be

a mark for gunfire, Kentuck." "I'll take care of that, Lee. It's near dark enough to fire at the flash of the guns."

When these things were done there was nothing more to do but wait, keep watch, and maintain their store of fuel. He built a third fire-a signal fire on the edge of the coulee, a hundred yards from their forlorn bivouac. When Campo Ragland and Harry Wilson returned to the Bar Hook it was reasonable to suppose that they would make some effort to find Bishop, who had gone out looking for trouble with every probability of finding it. If they came to look, the signal fire would be visible a long way off. If they did not come to look, Kentucky Jones had a long wait ahead, a wait perhaps equal to the remainder of Lee Bishop's life.

Slowly the hours passed, cold with a bone-piercing cold, and marked only by the imperceptible turn of the stars. After an hour or two Lee Bishop began to mumble from the depths of a delirious stupor.

CHAPTER X

It must have been nearly midnight when the wounded man's mind cleared. "Kentucky," he said.

"Right here, Lee." "I don't know but what I've got my comeuppance, Kentuck. I got some-

thing I got to tell you." "You better wait until-" "Shut up! I ought to have told somebody this before; I don't know as it'll

do you much good, telling you now. But you ought to know it." Bishop's voice was very faint, but

he seemed to speak with little effort, as long as he did not try to raise his tone. "Lee," said Kentucky, "I don't

want to encourage you to talk, but if you can tell me why Bill McCord wants to kill you, it sure might help in what's going to come after this."

"Kentucky, I ain't got any more idea than you," Lee said. "I don't know as I care a whole darn. What I'm worrying about is the way you're getting dragged into this killing of Mason. What time did you leave the Bar Hook the day Mason was killed?" "I can prove I was in Waterman by

half past one."

tucky; and that isn't liable to do you | much good." "Who was that?"

"Jean Ragland. . . . She'll back up your word if you tell 'em what I said.

But I don't know as it will carry much weight. Anybody can see that she's dead gone on you, Kentuck. Most likely they'll discount what she says in your favor, on that account."

Kentucky Jones said gently, "You're wrong there, Lee."

"You're a fool if you think I am. I told her about seeing Mason, and she made me promise not to tell anybody else. I disremember what I thought was her reason for that; it seemed a reasonable thing to ask, at the time." Kentucky Jones sucked in his breath

through his teeth. "Lee," he said slowly, "you sure you got this straight?" "Sure, Kentucky. I wouldn't disrec-

ognize Old Iron-" "I don't mean that, Lee. I meanyou told Jean about seeing this, and she told you not to tell anyone?"

"You beat me, Kentucky. How the h-l would a man get a thing like that mixed up?"

"All right, Lee." "What's the matter with you, Kentuck?"

"There's a link or two missing yet, Lee," Kentucky said. "But I'm dead. sure in my own mind, now."

"What are you talking about?" "You've got me the killer of Ma-

son," Kentucky said. Lee Bishop started, winced, and settled back again, more limp and more still than before. "You mean," he said at last, "you know who killed Mason?" "Don't you?"

"I- Listen!" They were silent for a long moment while Lee Bishop lay with closed eyes, as if the life had gone out of him once and for all.

"There's a horse coming," Bishop said at last.

Kentucky listened, but could hear nothing; it seemed to him that the small purr and hiss of the fire over which he crouched was preventing him from distinguishing far off, fainter sounds. He got up and walked down the gully, past the signal fire, to a place from which he could sight across the flat snow to the canyon narrows. Here the firelight was no longer in his eyes, and the small whisper of the embers could not confuse his ears; and presently he was certain that he distinguished the slow trample of a walking horse. He listened for what seemed a long time, while the sound came sometimes distinct and unmistakable, and again died away until he was half convinced that the rider had turned and drawn off.

Then the sound of the walking hoofs suddenly became sharp and close at hand. Three hundred yards away Kentucky made out the movement of a shadow in shadows, and knew that the rider was sitting his horse in the mouth of the notch. Kentucky Jones freed his rifle's safety catch, carefully, without any click of metal

For nearly five minutes the rider in the notch sat motionless, and Jones the rim," Lee Bishop said, "if you told knew that their visitor was watching her to." He was talking in a queer the signal fire, trying to make out and somehow childish tone of voice figures near it, or other sign of what which Kentucky had never heard him the builders of the fire intended.

"Is he hit bad?"

He whispered, "He can hear us from here, I think. I don't know but what they've finished him, Jean. He's shot in the side of the back, and Lord knows where the bullet stopped. You shouldn't have come here-don't you know that?"

"Somebody had to come. Campomy father is back from Waterman; but Harry Wilson quit when Campowouldn't bring out more riders. You and Campo and I are all that's left. And now poor Lee-poor Lee-"

He led her down the cut to where-Bishop lay. The range boss opened his eyes and turned his face toward her. "Is that you, Jean?" She dropped on her knees beside him.

'Yes, Lee.' "Didn't know but what I might be

hearing things. Where's Campo?" "He's making a sweep of the upper

Bench trail. Lee, you must be plumb frozen?"

"Pretty near," Bishop admitted. Jean sllpped off her coat, and carefully wrapped Bishop's legs. Then she scrambled out of the cut, ran to her horse and, loosening the cinch, jerked her blanket from under the saddle. When this was placed to suit her, she made ready to go.

"It's sure a shot-to-pieces outfit you bought into, Kentucky.'

"That deal is off," he told her. "I own no share in the Bar Hook, nor any part of a share."

Jean looked at him but there was no expression in her foce, nor in her voice as she answered. "So you're quitting, too."

"No, not quite yet," Kentucky told her grimly. "I'm just going ahead in a little different way than we figured was going to; that's all."

Jean dropped beside Lee Bishop again, and for a long time studied the mask of his face, yellow in the firelight. He seemed asleep. Irrepressible tears appeared on Jean's cheeks, glinting in the light of the fire. She bent over Lee Bishop and kissed him. "Goodby, Lee," she said softly. "I'll be back pretty quick."

Lee Bishop smiled faintly. "Take your time, kid."

Jean caught Kentucky's wrist and led him a little way down the cut. "Do you think there's any chance of moving him?"

"I don't know as we better try, Jean. When you get back to the house, phone to Waterman for Doc Hopper. Then pack a horse and come back. Get hold of a tent if there's any on the place, and all the bed-rolls that come handy, and grub, and bandages, and stuff. You know what we'll need."

Jean Ragland scaled the side of the cut, re-cinched her saddle, and rode off at a sharp trot.

Lee Bishop said, "There goes a great girl, Kentucky. You're lucky, all right."

"Lucky? Me?" "She'd ride her horse square off

Belief in Witches

Belief-in witchcraft persists even in London. A sect in the East end regularly brews "dragon's blood" to keep on good terms with witches. Others seek to propitiate the "wise women" by hanging a string of rabbit's teeth above their doorways. One little known London treasure house, the Cumming museum in the Walworth road, con-'tains a display of witches' remedies, all collected from Londoners in the last few years. A spiral shell, one learns, because of its apparently unending nature, guarantees a long life if carried in the pocket; a donkey's shoe covered with cloth and hitched to the bedpost drives away nightmares, while a pig's tooth hanging in a little bag around your neck is a sure guardian against fits.

(Continued from last week.)

And at the Bar Hook the cold long twilight, which always made the simple realities of food and snug warmth seem so good, and so well worth living-at the Bar Hook these things should also have meant seeing Jean Ragland again, this girl who, even in adversity, was like no other girl. As Kentucky Jones sat his horse, letting it blow a little from a long climb before putting it upon the long roundabout trail home, he was thinking that this range could have been a great range for cattle, and a great range for men, and that maybe having ridden it he never would have wanted to ride another, had things broken as they should. It was a hidden malignance, working under-handedly in the dark, that spoiled this range.

He put the zebra dun into a canyon and out again, and to the rim of another; and there, long after he had let all hope slide, he sighted Bishop at last. He put his pony down into the canyon, then upward through the canyon's notch; and a furlong into the widening valley hailed Lee Bishop across the snow.

"Lee," he demanded as they came together, "what's all this? You gone crazy, man?"

"I dunno, Kentucky," said Lee Bishop wearily. "Sometimes I think I am. I'm plumb mystified, that's sure."

"You d-n fool, you think you can-" A queer look in the other's face stopped him. "What's the matter, Lee? What happened?"

"Well, nothing much; only it's doggone funny!"

"What's funny?"

Lee Bishop pulled up his horse and turned in the saddle to look back. "You see this canyon, Kentucky? It's called Trap canyon, because you can't get out the upper end. Over thereand there-and there-" he pointed-"you can get out all right. But the upper end you can't get out. I saw two riders come in here. I'm pretty sure one of 'em was Bill McCord, though I couldn't swear. I followed 'em in. And, by G-d, KentuckyI'm not going to bet your life I didn't see."

Lee Bishop brought his horse along reluctantly. "Then what the devil was it?" he demanded irritably.

"I'm not right sure, Lee, but what I saw | back to Waterman. I know he was a tied horse up there; and if it is a horse, he's got his head snaked low to the ground, such as will stop the average horse from whinnying when another one comes along."

Lee Bishop swung in his saddle to stare back at the canyon wall three under him; proving he was killed behundred yards away. Kentucky snarled | fore the snow began to fall." at him, "Don't turn, you-"

"The pinch will come quick, now," Kentucky said. "But she'll not be with me, Lee.'

Lee Bishop said in a curious hoarse whisper, "She'd jerk the heart out of her, if you needed it. She's got a faith in you that you don't have for her."

"Faith?" Kentucky repeated savagely. "If she'd trusted me only half way, only quarter way, you and I wouldn't be sitting here tonight."

Lee Bishop looked at Kentucky a long time, and his mind seemed to be turning vague. "You ain't licked, Kentucky," he said at last in a weak voice. 'You can beat this game yet."

"Sure I'll beat it," Kentucky assured him. "Lee, I'll beat it in spite of her !"

Lee Bishop said in a queer voice, "You-you couldn't go against that girl, Kentucky."

"I'd sooner cut off my right hand, Lee; but I've got to go square against her now."

For another long moment Lee Bishop fixed staring, vacant eyes upon Kentucky's face. "You love her, huh?"

Kentucky Jones shivered; he felt as if the grip of the night cold was getting the better of him, so that his body had a core of ice. He covered his face with his hands, "I think," he said, "I hate her as I've never hated any living thing in my life."

Lee Bishop's words jerked out of him incoherently, but unexpectedly sharp and strong. "God help you, Kentucky-don't say that!" "All right, Lee."

EZRA TEACHING THE LAW OF GOD

LESSON TEXT-Ezra 7:10; Nehemlah 8:1-12.

8:1-12. GOLDEN TEXT-Thy word have I hid in my heart, that I might not sin against thee. Psalm 119:11. PRIMARY TOPIC-Giving Thanks for God's Book.

JUNIOR TOPIC-Giving Thanks for God's Book. INTERMEDIATE AND SENIOR TOPIC—Studying the Bible Together. YOUNG PEOPLE AND ADULT TOPIC—The Bible in National Life.

This lesson is a fine illustration of the rightful place of God's Word in the life of a nation. The only cure for national ills is a return to God and obedience to his Word.

I The Teacher's Spiritual Condition (Ezra 7:10).

He prepared his heart to seek the law of the Lord, to do it, and to teach Israel the statutes and judgments. 11. The Word of God Read (Neh. 8:1-3).

1. The eager assembly (v. 1). The people gathered together and requested. Ezra to bring the book of the law. God had touched their hearts, creating within them a yearning for his Word. 2. A representative assembly (v. 2). God's Word should be taught to all classes-men, women, and children. The Spirit of God can speak through his Word to the whole family sitting in the same pew.

3. An appreciative assembly (v. 3). So eager were they to know God's Word that they did not get tired, although the lesson lasted for five or six hours. When people realize that God is speaking through his Word they will give attention.

III. The People's Attitude Toward God's Word (vv. 4-6).

1. Due reverence shown (vv. 4, 5). When Ezra opened the law all the people stood up out of respect for God's Word.

2. They joined heartily in prayer (v. 6). As Ezra led them in prayer they united in saying, "Amen, Amen," bowing their faces to the ground. IV. God's Word Being Interpreted

(vv. 7, 8).

18

The attitude of the people toward God's Word largely depends upon the minister. Proper dignity and solemnity should be manifested by the minister when reading the Holy Scriptures. 1. He stood up where the people could see him (v. 5).

2. He read distinctly (v. 8). The manner in which many read the Scriptures is greatly to their discredit.

3. He caused the people to understand (v. 8). The supreme business of the minister and teacher is to make the Word of God so plain that old and young can understand. The explanation should be clear and definite. V. The Effect of Applying God's

Word to the Life of the People (vv. 9-18). 1. Conviction of sin (v. 9). The

EPILEPSY.—(Continued)

Epilepsy, usually, shows a tendency to be progressive. Unfortunately, the "progress" is more likely to be in the wrong direction. That is to say: progress for the disease; a downward course, or retrogression, for the patient.

For example, a child may have petit mal, which is epilepsy in its mildest recognizable form (described last week.) These slight attacks may be ignored by parents until the "spells" increase in frequency or severity to the degree at which the child is taken to the doctor, and a tentative diagnosis of epilepsy is made. In these children, various strains

incident to growth, childhood diseases, school attendance, etc., may bring on more marked manifestations of the disease-tendency, with the loss of consciousness, falls and convulsions associated with frank epilepsy.

What is the typical course and progress of the disease from this stage onward? The evidence on this point is affected by the fact that epileptics always come under treatment as soon as physician sees them. Which brings us to the question, trembling on the lips of every newlydiagnosed epileptic, or his parent: "What are the chances of a cure? What will treatment do for me?"

The answer must be a guarded one. A cure cannot be promised. However, even before treatment is begun, the doctor can safely assure his patient that medical ministrations will bring a measure of relief and improvement, unless the case belongs in a small group of epileptics who do not respond to treatment. These persons, and their form of the disease, are rather exceptional.

Aside from the general hygiene which is so important to all epileptics, and aside from certain fads and unproved experiments in therapy, the effective treatment for true epilepsy comes under two heads.

1. Diet (including water intake). 2. Drugs.

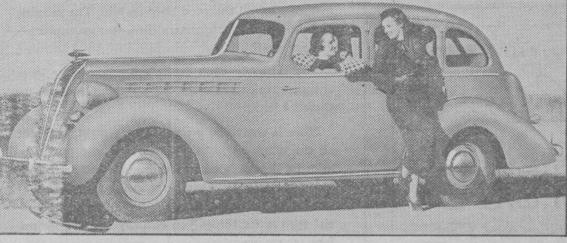

Among the comparatively recent dietary experiments aimed at the control of epilepsy, one of the most interesting is starvation-if starvation may be classed under diet. As practically carried out, the "starvation" is a series of strict fasts, near the minimum of subsistence.

Another way of attack on the disease is by dehydration of the body, which is a reduction of its water content by promoting elimination of liquid wastes while restricting the fluid intake. This is not nearly so easy-for the patient-as it sounds.

Still another method of dietary treatment is by prescribing a daily menu high in fat-foods. This plan divine method of convicting men of produces somewhat the same result, bio-chemically, as starvation, and is a little easier to carry out. All three of these dietary plans have produced good results, repeatedly, in causing a cessation or great reduction in the number of epileptic seizures. Patients using one or other of them conscientiously have been free of attacks for long periods. The bio-chemist knows that there is a similarity in the physiological effects of all three of these regimes. Perhaps, at some near day, a "common denominator" of starvation (or fasting), dehydration and fat-diet will be found to simplify and make available to all a real cure for epilep-Both starvation and high-fat diet produce a form of acidosis (ketosis.) This condition seems to' act as a "damper" on elipeptic seizures. The fat die, however, has to be very carefully measured to the patient's needs, and scrupulously supervised by a competent physician. This is obvious from the fact that the patient must be kept on a narrow line between two pitfalls; too-great acidosis on the one hand, and "fits" on the other. Drugs still play a large part in the treatment of true or essential epilepsy. Bromides, formerly the chief reliance, have largely given way to newer and, in many cases, more effective sedatives. Good results are obtained with these, when the proper dose has been determined by the doctor, and the patient takes his medicine with zealous regularity.

Color Psychology

Psychology is a wonderful thing. It has much to do with our success or failure. It has always been with us, but by another name. Now comes a professor who tells us that the color of the necktie has much to do with one's sparking success. Doubtless many a fellow has wondered why he got heart failure just as he was about to "pop the question." But it was due to the wrong necktie. This sparkologist says that an orange-yellow tie is necessary to put courage into the timid soul at that moment when a fellow needs every ounce of courage he can muster. He suggests that the girl wear the same colors, to help him along. Orange-yellow will inspire confidence. Green seems to be the usual color for bashful suitors, and that's the reason they are bashful. But it doesn't seem that color would have much to do with it, since love is blind .-- Ohio Farmer.

Wettins Now Windsors

Queen Victoria was the last of the Hanoverian line. She married Prince Albert of Saxe-Coburn and Gotha, whose family name was Wettin, and these became the house and name of. King Edward VII and George V. During the World war, because the name was German, it became objectionable to the English people and on July 17, 1917, King George issued this proc-lamation: "We, having taken into consideration the name and title of our royal house and family, have determined that henceforth our house and family shall be styled and known as the House and Family of Windsor."

The Jay Bird To fully describe the gaudy markings of the jay bird one must use the detailed plan of the scientist: Upper parts, including crest, light purplish blue; wings and tall, bright cobalt blue; some wing and tail feathers barred with black and tipped with white; side of head and throat white with purplish cast; breast and sides light gray, fading into white on the belly and beneath tail. Beak and feet, grayish black. Collar black with black figuring between eye and white at base of the beak.

Model Village, 200 Years Old

In these days of model towns, entirely planned by one architect and not left to grow haphazard over the years, it is a surprise in Dorset in England to come upon Milton Abbes, which before 1752 was a small market town built about an ancient Benedictine abbey. When it came into the possession of Baron Milton, earl of Dorchester in the middle of the Eighteenth. century, he demolished the entire village and rebuilt it on a new site with each cottage like its fellow, so that his own lordly mansion might be more secluded. It is one of the most curious villages of England.

Statue in Heart of Forest

In one of Michigan's many acres of almost untouched woodland the traveler happens in some surprise upon a monument erected by man in the heart of apparent wilderness. The \$50,000 bronze monument was erected a few. years ago in the Huron national forest to commemorate the days of the Michigan lumbermen. Three figures, a cruiser, a logger and sawyer were erected here as a tribute to Michigan's first industry. Huron national forest is otherwise a secluded wilderness of 660,000 acres.

their sin is to have God's Word applied by the Holy Spirit. The Word of God is quick and powerful (Heb. 4:12).

2. Weeping turned into joy (vv. 10-12). When sins have been perceived and confessed there is forgiveness. Continued mourning will not atone for past sins. Furthermore, it dishonors a pardoning God and even unfits the one for present tasks. Joy has a salutary effect upon one's entire being. "The joy of the Lord is your strength."

3. Blessings were shared with others (vv. 10-12). True joy manifests itself in giving to others. Pure religion goes out to minister to the poor (James 1:27). Godliness is not content with having a good time alone.

4. The people obeyed. From the reading of the Scriptures they found that the feast of the tabernacles had long been neglected. They kept this sacred feast in a way that had not been since the days of Joshua.

5. They separated themselves from the ungodly (13:1-3). As soon as they had heard the Word of God they separated themselves from the mixed multitude.

6. The house of worship was cleared and order restored (13:4-14). No nation or people can be strong which neglects the worship of the true God.

7. The Sabbath was restored (13: 15-22). Israel had long violated the Sabbath. To ignore the essential law of the Sabbath is national suicide. Unnumbered evils followed in the wake of the desecration of God's holy day. 8. God's law of marriage restored (13:23-31). Some of those who had intermarried with the heathen were brought face to face with their sin. They separated themselves from their ungodly companions. God's favor cannot be enjoyed by those who live in disobedience to his Word.
