Mr. and Mrs. Raymond Davidson, Mr. and Mrs. Wm. Demmitt and Mr. and Mrs. Kenneth Davidson attended a surprise birthday party at the home of Mr. and Mrs. Walter Dem-mitt, at York, on Wednesday evening in honor of their daughter, Miss

About the worst place in town for stalled cars and trucks, during the past two weeks, was on Middle Street at the "mill road" crossing—practically on top of a hill-where the snow had drifted some, and as right and left turns were made from four ways, no one beaten track could be

The Christian Endeavor Society of The Christian Endeavor Society of Grace Reformed Church is sponsoring a concert and play for Tuesday, February 25, at 8:00 P. M., in the Opera House. There will be an hour concert by the Boys' Glee Club of Western Maryland College. This Glee Club has sung at various Baltimore Clubs and broadcast over Stations WRAL and WERR tions WBAL and WFBR.

For the information of distant readers, and in mentioning the leading local and general topic, we give the information that what promised to be a thaw, was in evidence last Friday and Saturday, sufficient to cause a deep slush for the time. Then came two snows, and near zero weather Thursday morning, with no present indications of a let-up in the long drawn out siege of snow and extreme cold.

Richard Sutcliffe was again heard over WFMD, Frederick, last Tuesday, at 3 P. M., in a number of baritone solos, well rendered. We believe Mr. Sutcliffe is likely to be heard, again, at the same time. As The Record receives the complete program in advance each week, for Station WFMD, those interested may receive information by calling on the Editor. Mrs. C. C. Clark, soprano, was also heard during the same pe-

Mervin Eyler, of Taneytown district participated in the third annual all-University night, held at the University of Maryland, on February 15. This gala show featured nearly three hundred students and attracted an audience of five thousand. Mervin is a member of the University chorus which contributed several musical selections to the program. He is the son of Mervin L. Eyler, near Harney, and a graduate of Emmitsburg High School. He is a Freshman in the College of Arts and Sciences.

A number of invited guests were entertained at the home of Mr. and Mrs. Roy Kebil, on Wednesday, Feb. 19. in honor of their son, Bernard's 6th. birthday. Games were played and refreshments served. Those present were: Betty Shaum, Shirley and Audrey Welk, Helen, Mary Angela and Julia Arnold, Frances Wolf, Rose Marie Rohrbaugh, Maud Myers, James and Gerard Myers, George Hemler, Jr., Birnie Shaum, Eugene and Richard Myers, Guy Morrison, Harold Fair, Donald Garner and Joseph Kebil.

Maj. Gen. Upton Birnie, Jr., Chief of Field Artillery, presided over a court martial, this week, that found Col. Joseph I. McMullen guilty of dishonorable conduct as legal adviser to the Assistant Secretary of War for fifteen years, and sentenced him to demotion, partial forfeiture of pay, and official reprimand. He was found guilty because he accepted two roundtrip railroad Pulman tickets from Washington to San Francisco, as a gift, while negotiations were pending for the sale of large quantities of surplus army goods.

(Continued on Fourth Page

THE WEEKLY NEWSPAPER Some of its Problems Outlined by Mr.

Geo. C. Rhoderick, Jr., publisher of two excellent weeklies—The Valley Register, Middletown and The Community Reporter, Mt. Airy—delivered an address over Radio Station WFMD, Frederick, last Thursday, on 'The Problems of the Country Newspaper." In the limited time at his disposal, he in a very general way covered the subject, largely from the standpoint of the community interest and co-operation that should prevail between publisher and citizens, omitting more practical "shop talk" and putting aside a number of what he termed "imaginary problems" that do not concern a publisher in the bus-

victions. We can readily agree with the whole of his address, in so far as he covered the situation, but do not agree that he covered the whole field The Gettysburg College A Capella Choir will present a sacred concert in Trinity Lutheran Church, Sunday, March 15th., at 7:30 P. M this we are quite sure, was all that Mr. Rhoderick intended it to be. He

ness of practicing conscientious con-

said in conclusion. "What, then, are the problems that confront our country publishers to-day? The answer is simple. They are the age old problems which have confronted the pioneers among Amerconfronted the pioneers among America's thousands of rural newspapers since the early days of this republic. They are the problems brought to the forefront by a sincere and earnest desire of the publisher of a local community newspapers to be of the greatest possible service to his home rommunity. That is why I say that community. That is why I say that I have always considered my problems to be those of my readers, my neighbors, who live with me in my own community and are interested in its upbuilding and development, even as

I have never been able to envision my newspapers, thank God, purely as vehicles for financial aggrandizement. I have tried rather to be true to that fine journalistic heritage which has been mine through two succeeding generations to the end that I might give to my communities, through their home newspapers, all that is big and fine and inspiring and helpbig and fine and inspiring and help-ful. To these things I have dedicat-ed myself and my papers. They have become my big, my most press-ing problems. And the years have crowned my efforts with a modicum of success which has given vindica-tion to the agruracy of my vision.

"How can a newspaper become such a force within its community? How can anything worth while be accomplished? Only by hard, untiring effort. Only by unremitting zeal. Only by a never relaxing vigilance. A country newspaper is a community institution. It must be a faithful chronicle of the joys and sorrows of its constituency. It owes much to its subscribers. To give them less is to be remiss in a sacred, civic duty. Its news must be unbiased, uncolored, fearless and fair. Its editorials, the must be frank, constructive, uninfluenced and beyond any base motive.

It must not conceal nor protect the wrong; neither must it hesitate to commend and oftentimes sponsor the right. It must keep its advertising columns clean-even as its news columns-and dependable always. It must know, beyond peradventure of doubt, what its space and its services are worth and base its charges only upon the expectation of a fair return. Principle and policy it must never sacrifice for either fear or favor, recrimination or reward.

Circulation and advertising patronage will come only as they are deserved. The wise publisher will give them secondary consideration. The real problems of the successful country publisher are not materialistic ones—they consist in living up to

C. E. CONCERT AND PLAY.

The Christian Endeavor Society of the Grace Reformed Church is sponsoring a concert and play on Tuesday, Feb. 25, at 8 o'clock in the Opera House. There will be a hour of concert by the Boys' Glee Club of West-ern Maryland College. The Club is quite renowned having sung at various Baltimore clubs and broadcasted over Stations WBAL and WFBR. These boys have prepared a splendid evenings entertainment and are lookng forward to a big crowd.

At the same time a play, "Squaring it with the Boss" will be given, by the Christian Endeavor. This play is a real comedy and not to be miss-

Come out and have a real enjoyable evening. Tickets are only 15 and 25 cents and are for sale from any C. E. member.

AN EXPLANATION.

As we failed to receive the customary official notice that Saturday would be a holiday for Rural Carriers; and did not see such notice in any of our exchanges last week; and forgot it, ourselves, hundreds of our subscribers will not receive the present issue before Monday. So, once in awhile aggravating mistakes will happen in the best regulated of families.

A New York astromer points out that due to the earth's rotation the South end of a room goes around faster than the north. Doesn't anything depnd on where the drinker sits?—Frederick Post.

BOARD OF EDUCATION HOLDS TWO MEETINGS

Bids are Opened for New Windsor High School Building.

The regular monthly meeting of the Board of Education of Carroll County was called to order in the office of the Board on Friday, February 7, 1936, at 10:00 A. M. All the members were present, with the exception of Dr. Wetzel.

The Board opened the bids on the New Windsor building. There were six bidders on the general contract; E. E. Stuller, Eng. Contract C.; Cogswell Construction Co., C. W. Schmidt, Lacchi Construction Co., Lloyd Culler. Three for heating and plumbing: Allender Sons Co.; Mumford Eng. Co.; Westminster Hardware. Three for electrical; C. Edgar Myers, Allender Sons Co., Crunkleton Elec. Co., and Whiteley Electric.

(We are unable to give the required space for the tabulated style of the bids, but in each case approximately give what appears to be the totals of accepted contracts.—Ed.)

The Board of Education passed a resolution, subject to the approval of the County Commissioners, recommending to the PWA authorities that the following be awarded the con-tracts for the New Windsor buildings: General Engineering Contracting Co., \$80,250; Heating and Plumbing, Westminster Hardware Co., \$12,692; Electrical, Whiteley Electric Co., \$3,207, or a total of approximately \$96,149.

The lists of paid and unpaid bills presented to the Board were approved and ordered paid.

The Mt. Airy-Winfield transportation committee reported its action and made the following recommendations for the disposal of Roland Dorsey's That Edward A. Barnes have his contract increased by the addition of the Woodbine-Winfield-Mt. Airy Route, which would make his total annual contract \$4,000; that Charles Creager receive the Dennings-Cover's Corner—Mt. Airy Route at an annual contract of \$2128; and Wilson Straw receive the Mt. Olive Route in addi-tion to his present one and have his tion to his present one and have his contract price increased to \$2072.90 for the year. The Board approved the recommendations of the committee.

The Board approved the appointment of Oberlin Chaney on a substitute basis at Manchester for the re-mainder of this school year. Superintendent Hyson reported that

he was investigating the condition of the Elmer Wolfe building.

Because of the death of Charles Warner, James Cross was appointed as the new janitor of the Robert Mo-

ton School.

The Board accepted an invitation to attend a Patriotic Service at Trinity

Church, Manchester, Feb. 16, at 7:30 P. M., should the weather permit.

The Superintendent reported on the progress being made in the adult education program.

The Board adjourned at 1:20 P. M.

The Board of Education of Carroll County met in special session in the office of the Board on Tuesday, Feb. 11, 1936 at 10:30 A. M. All the members with the exception of Mr. Davis,

The Board of Education met with the Board of County Commissioners to work out plans for the construction of the Sandymount building. The Superintendent was instructed to have Mr. B. E. Starr, architect, revise the plans and specifications on this building and get these approved by the PWA the cost of construction not to be over \$25,000. A resolution was passed by the Board of Education accepting the conditions in the letter sent to the Superintendent by the County Commissioners dated Febru-

ary 10, 1936.
Mr. Zepp presented a complaint against awarding a contract to Mr. Creager. After a lengthy discussion and consideration of the matter the Board decided to hold Mr. Creager in abeyance and directed the committee on this to investigate this complaint and act in the matter as soon as pos-

The Board adjourned at 12:45 P. M.

LETTER FROM DETROIT Reminiscent, Newsy and Advisory, all

The Editor, in placing a heading to my last article, seems to have been

under the impression that the weather had gotten the better of me, and that at last I had thawed out enough to write a little. Well, it may be that this is true but it is surely cold enough yet to keep a fellow in cold storage—especially one who has reached my age. But in looking over The Record of the 14th., and reading a private letter from the Editor, I thought of a number of things, would like to say a few words about, and so, begging the pardon of all the Record readers for coming again so soon, I will try and get these reminders off my mind.
Whenever we receive The Record—

usually Monday morning— about the first thing we look for is—"Who is dead" or "Who is married." And during the past year so many of our former friends have passed on, that we cannot recall them all. But the last issue had more than a passing interest to me at least. For I knew all of those mentioned in the death notice. Reuben Wilhide was a friend of mine for many years; and Upton Myers, of Pleasant Valley, is remembered by me as one who aided our Band on many occasions, he being a musician of fine

But the one whose death takes me back the farthest, was William Miller, or "Billy," as I knew him, when we, in company of Rev. Stewart Hartman, Geo. W. Yeiser, Mrs. Charles Kohler, and a dozen others whose deaths have been recorded the past few years, attended a Summer school in Littlestown, Pa., in 1878. Seems that the older one gets, the nearer he gets to the scenes of his youth, and so this death brings to my mind a flood of recollections of events of these youthful days of so long ago. The deaths of these friends only brings more sharply to our minds, the fact of advancing years, and also that we have survived so many whose prospects of outliving us were at least equal to

ours of surviving them.

In my last letter I referred to the "Recounters," or those who attempted to steal the 1934 state election, and stated that 20 of them had been found guilty. On Friday of last week they received their sentences—nine to Southern Michigan Penitentiary for from 3 to 5 years, and all but two of the rest, who were placed on probation, to the Detroit House of Correction where the work they will be required to do is somewhat harder than the marking of ballots with the blue lead pencils was. Nearly all of these men are prominent citizens of Detroit, and hopes are expressed by every decent citizen that this result of dishonesty in politics will prove a warning that will be heeded by the crooks in either

And then there was that interesting letter from our old friend—Frank Keefer. I wonder if he still remembers me, and the time, the night or rather morning, after the Presidential election of 1884, when after staying rly all nig nt, in hopes of getting definite news of the result, and failing to do so, I left with him and others, Dan and Christ Crabbs, etc, on my way to my school at D. P. Creek, and stopped at his house until morning.

My brother, Dallas, recently deceased, was working for him at the time. I do not know how that tax bill will compare with the tax on the old Keefer farm now, but would like to trade the amount, whether \$3.00 or \$33.00 on the tax bills I have paid,\$170.00,on my house and lot out here.

There are several other things I would like to touch on, articles about which I noticed in last week's edition of The Record—the Townsend Plan, and Soldiers' Bonus. You would be surprised at the number of people out here who are in favor of the first, people who like myself, cannot see how it can be made to work, but want to see it tried, anyhow. Personally, I do not intend to do any electioneering for it, but am ready to receive my share of any of its benefits, on the same theory that I have on the Bonus questionthat if the Government has money to squander on every other thing under the Sun, they might as well give some of it to old people who have lost almost all they had saved in the past few years, and to the boys whose lives were at stake during those dreadful years of war. I do not pretend to be able to know how much good either would or will do, but I am sure that as far as the bonus is concerned, most of it will be spent for useful purposes.

Well, its snowing again—about 25 days out of the past 30-and the streets are in a very bad way, cars slipping and bumping into each other. We changed weather observers in Detroit, last year, and as I heard one man say—in jest, of course—I believe that we had better get the old one back, as usually his predictions suited us beter than those of this one, even if the latter proves a better prophet. I noticed that in the North of Michigan the snow is 8 or more feet deep, and all roads blocked, with the thermometer still lingering around zera. Oh, Well! Next Summer, around July, we'll be wishing for just a little of the edge of this cold weather.

And now I'll sign off, for some time at least. If I have helped the Editor, in his task of filling up the paper, I have my reward for this little effort. Why don't my old friend, Samuel Johnson, of our old-time Literary Society (the Editor and Bob McKinney were also members) write a good letter and enclose a little of that warm Florida climate to be distributed through the columns of the Record. If he feels the same desire to hear from long-absent friends that we do, he will

surely comply with our request JOHN J. REID.

NATIONAL POLITICS IN WASHINGTON.

Outstanding Events Entering into the Head-line News.

An announcement, made late last veek, was to the effect that Senator Dickinson, Iowa, sought the Republican nomination for president, but would not seek pledged delegates from any state.

The Senate, last Saturday, by a vote of 56 to 26 passed the new farm wote of 56 to 20 pages of the page of 56 to 20 pages of the page o were made to amend the bill, as well as doubts as to whether all branches of agriculture would be equally ben-

Five Republicans, including La Follete (Pro.) and Benson (F. L.) voted for the bill, eleven voted against, and six were paired against.

The fact that President Roosevelt had recently sent a letter to twenty presidents of South America republics, was made public. The letter suggested a parley to be held at Buenos Ayres, or some other capital, that would cause greater peace throughout South America, and perhaps advance the cause of peace throughout the world.

In an 8 to 1 decision the Supreme Court, on Monday, handed down a decision that the United States, having constructed a dam at Muscle Shoals as a National defense measure, had the right to dispose of surplus power not needed by the gov-ernment. The decision was read by Chief Justice Hughes, Justice Mc-Reynolds read the dissenting opinion in which he objected to the extent of the government's activities in this case as being beyond the sphere marked out by the constitution. The decision is held not to cover the main question of dam-building and other activities. The Tammany organization, New

York, has named Alfred E. Smith to head its delegation to the Philadel-phia National Convention. Other delegates will be Senator Robert F. Wagner and Royal S. Capelad, and former Mayor John P O'Brien, a close ally of Smith, and James J. Hoey.

The "Townsend plan" has reached the attention of Congress. A com-mittee of eight has been appointed to investigate the plan, and report its findings, either for consideration by the present Congress or the next.

-11-4-H CLUB MEETING.

The Taneytown 4-H Club held their monthly meeting Saturday, February 15, at the home of Betty Rose Shaum. The meeting was opened by the singing of "Four Leaf Clover." One new member, Rosalie Reaver, enroll-There are now 28 members. We continued our knitting projects under the leadership of Miss Belva Koons. Our new County Home Demonstration Agent, Miss Hoffman, talked with us about projects for our next meeting. It was decided that at our

next meeting we would make collars. Elizabeth Ohler and Mildred Carbaugh had charge of recreation; and Osie Krise and Betty Rose Shaum served refreshments. The meeting was then adjourned.

PUPILS OF SCHOOLS MAY BE WHIPPED BY PRINCIPAL.

Herbert R. O'Conor, Attorney-General of Maryland, has ruled that corporal punishment may be legally inflicted on pupils in Maryland schools, but only by the principal, as a last resort. The opinion was given in answer to a request for the States At-torney of Montgomery county. The law in the case is No. 36 of the State Board of Education, as follows;

"Under no circumstances shall an assistant teacher inflict corporal punishment on a pupil. Cases seeming to require corporal punishment shall be referred to the principal, who may administer corporal punishment as a

Pupils shall not be stricken on or about the head in any way, nor shall they in any manner be subjected to any brutal or unreasonable punish-

The alternative to corporal punishment in case of last resort, is temporary expulsion from school by the principal, with notice to this effect to the parent, asking an interview before the pupil may return.

In such case the trustees, whose approval is required to continue the suspension, or make it permanent, shall be notified at once of the suspension and the offense."

----THE LEGISLATURE, MAR. 5.

Governor Nice has called the legis-lature to meet March 5, in special session for the main purpose of con-sidering "relief" legislation for the State. By pretty common consent, the sales tax proposition is likely to be adopted. What other acts the ses-sion may take up is problematic but sion may take up, is problematic, but majority opinion seems to be that the session should deal mainly urgent needs for legislation.

THIS WAS "SERVICE!"

On Wednesday, a crack developed in the Mold Disc of our Linotype-a solid cogged disc weighing perhaps ten pounds. We telegraphed Brook-lyn, N. Y., in the afternoon, for a new one to be sent by "special handling mail, and on Thursday morning at 9 o'clock, it came. A pretty fine speci-men of what can be done, with everybody on the quick service job!

SALES TAX APPROVED

Special Revenue Committee Recommends It.

A one percent consumers sales tax, mandatory upon the purchaser, has been recommended by the Committee on State Policy for Aid to the Needy, with the recommendation that the present gross receipts tax be continued for two months from March 15, in order to give time for getting ready for the customer's sales tax, that would continue until May 31, 1937

The report is quite voluminous. It figures that approximately \$10,000,-000 will be required to finance the Relief needs of the state until May 31, 1937, including Federal contribu-tions, of which, about two-thirds would be required in Baltimore, and

one-third in the counties.

Privisions are made for the levying and collecting of the fund, and exemptions are recommended consist-ing mainly of the tax imposed by the State on sales of gasoline; purchase of motor vehicles, purchases by the State, purchases made for hospitals, religious, educational and charitable institutions not for resale. Purchases of water when delivered through pipes to consumers; purchases of electric current by transportation systems subject to the jurisdiction of the Interstate Commerce Commis-

The report was made up after a close study of sales tax laws in force in other states. And because of the opinion that a sales tax, properly constructed and operated, comes nearer than any other plan in fairly distrib-

uting a heavy burden.

The report will be turned over to the coming short session of the legislature for its consideration and ac-

MINISTERIAL ASSOCIATION HOLDS MEETING.

The Carroll County Ministerial Un-ion met at Westminster Theological Seminary, on Monday, at which the following officers were elected for the present year, Rev. Felix B Peck, Sil-ver Run Reformed-Evangelical, president; Rev. Ivan O. Naugle, United Brethren, Manchester, vice president; Rev. Walter Stone, M P. Church, Un-iontown, secretary; Rev. Howard Amoss M. E. Church, Taylorsville,

treasurer. Two new members were added, Rev E. Carl, pastor of Calvary Lutheran Church, and Rev. Hanna, pastor of a Baptist Church, near Reisterstown, the speakers were Rev. Miles S. Reifsnyder, Baust Reformed; Rev. Orris G. Robinson, pastor of Centenary Episcopal, Westminster, and Rev. Walter Stone, M. P., Uniontown. The next meeting will be held on Monday, March 30th March 30th.

MINISTERS ENTERTAINED AT MANCHESTER.

The ministers residing in Green-mount, Manchester and Rev. Felix B. Peck, Silver Run, and their families, were the guests of Rev. Dr. John S. Hollenbach, Saturday afternoon and evening at the Reformed parsonage, Manchester. Mrs. Joseph Raum, of Lancaster, Pa., mother of Mrs. Carl was present. A number of selections were played by the ministers quartet consisting of the Revs. Carl, Hanna, Hollenbach and Strasbaugh. In the vocal numbers Rev. Mr. Peck substi-tuted for Mr. Hanna. Games were played and refreshments served.

THE GROSS RECEIPTS TAX.

The gross receipts tax, for January with about half of the returns in as made by Maryland retail merchants, and business men; amounted to \$204,-954, and \$30,096 additional from auto-mobile titling. This sum goes to-ward unemployment relief. The law will expire March 15th. None of this tax is paid by the purchasers of goods

MARRIAGE LICENSES.

Wilbur C. Weller, Jr. and Helen Elizabeth Day, Westminster, Md. Harry L. Sandruck and Pauline E. Markel, Brodbecks, Pa. Arthur N. Ensor and Mary Ruppert, Manchester, Md.

Random Thoughts

HUMAN TREES.

There are many really highclass, intellectually brilliant men and women in this country who never become known outside of a comparativey small home area; many who are professionally highclass, and others who, but for lack of opportunity, would be among the "well-known" in practically all classes of human ac-

There is a great deal of pure chance in the games of life, if the whole truth be realized. Per-sons are like the thousands of trees some growing in out-of-theway places, wasting their symmetry and beauty for want of a more prominent location. Just a tree, as they are, but worth thousands of dollars if they could be taken up and transplanted in the "show

Even "small trees" in humanity may have a part in making the whole world a fit place in which to live; and who knows but that the end of time that is coming daily and hourly for some-body, will in due season bring am everlasting reward, equal to that of the highest. This is the ultimate in values, whether it comes to Kings and Princes-or to the

All articles on this page are either original or properly credited. This has always been a fixed rule with this Office, and we suggest the adoption of it by our exchanges.

The publication in The Record of clipped editorials does not necessarily mean that such editorials are indorsed by The Record. In many instances they are published in order to show varying opinions on public topics.

Entered as Second Class matter in the Postoffice at Taneytown, Md., under the Act of March 3, 1879.

FRIDAY, FEBRUARY 21, 1936.

CLIPPED EDITORIALS.

It is noticable that The Record clips a good many editorials from exchanges, and uses others taken from various sources available to weekly newspapers. We state, at the head of this page that the fact of publication of clipped articles, does not mean that they are indorsed by the Editor of The Record. And this is correct.

Our main object in these publications is, to give deeper and clearer views of difficult problems than we have the ability to give; and to pre- be the need for their services? sent a prevailing concensus of opinion, that, though representing the majority who express opinions, may not represent the majority of those who do not express them.

We believe that the articles we publish are not extreme, nor from unreliable authority. At any rate, our desire is not to be partisan-if anyone knows, just now, what "partisanship" means. Criticism of "new from one side of the political linefence, as from the other. In fact, the "line" is no longer determinable age of trouble-makers in gangs of division points.

Public sentiment is being remade new fences are largely those erected by individual or class interests, and a free for all battle is in progress, which naturally invites a liberty that can not well be denied to anybody, whether it be individuals or newspapers. And that, represents individual freedom, rather than a partisanship that has largely gone out of style.

Why publish any of the prevailing imate duty to do so. Rural public sentiment is as important as any other, these days. It is considered of more importance than ever before in the history of our country. Those who read the Record have a right to be up with the times, and be reasonably well posted on widespread thought, and then draw their own conclusions.

-11-THE ABC OF MONEY.

Money is not wealth in itself, aside from Gold coin. Mostly, our money representatives of wealth are oblong pieces of paper, easy to carry, containing a certain amount of printing and engraving that represents governmental responsibility in dollars, to the holder. We do not eat money,nor clothe ourselves with it, nor shelter ourselves under it; but we can exchange our money dollars for our needs. It is the stability, the ability to pay, carried on the paper tokens,

that makes it good. Bonds or Stocks, issued by Federal, state or municipal bodies, are in the same category as our "greenbacks"good only in exchange for real property, as long as they are representatives of ability to pay the holder. Individual promissory notes, mortgages and judgments, are in the same "promise to pay" class, based on the soundness of value of certain property, or fruits of productive use.

All of this is very elementary in the consideration of financial matters in which all are interested, for all are ooperators of an exchange business of some sort, based on confidence, and on the continuation of certain favorable probabilities, that have, in the past, always "made good" as we say. It is, therefore, confidence in investments that seems to make them worth

We do not, willingly and knowingly, make loans to spendthrifts, nor to the morally deficient. We want to take only good risks, and avoid unsafe hazards. We want to be sure that our money will come back to us when we need it, and according to contract. Insurance Companies do work will get under way in February. slow in spending. not willingly take risks on those The schedule calls for completion by

known to be morally or physically, May 15, three weeks before the Exunsound.

So, in the wider sense, we are primarily interested in National prosperity as an evidence of soundness of credit risks; for the foundation of credit depends not so much on individuals as on wider safety exchange systems. All of us are apt to have something to sell beyond the nearby locality of its production; so, the wider the field of National prosperity, the wider is the field of our market.

ORDERING STRIKES.

Ordering strikes, in these strenuous times, is a very serious business. Considering that extreme weather conditions have brought about many very difficult problems, especially among workers, should bring along with the situation extra care on the part of heads of labor organizations to act with the greatest possible measure of wisdom, and not accept the opportunity to take undue advantage of power that may be exercised in a "hold up" manner.

Executives, or labor employers, should on the other hand, also exercise the best of sense and good feeling, and not oppress workers because of opportunities to do so. The rightly human, on both sides, should be

absolutely in evidence. We believe that there is much unnecessary conflict between employer and employed, and that leaders on both sides are responsible, rather than the majority of either. These leaders are sometimes possessed of the idea that in order to keep their "job" they must be continually agrtating for more, or less, pay, as the case may be. For should things be going along smoothly, what would

We do not know the cure for the situation; but it might be, in fact, one of the few cases in which "the government" should decide. We do know that it is no place for extremism, on either side. In the great majority of instances, there is no real conflict between employer and employed. There is a recognized best interests of both that prevents trouble. It is the radical agitator who is deals," for instance, comes as freely responsible, in most cases, for the majority of our labor troubles.

And, there is very often a percentby party names, nor old-time party workmen who incite revolt, many of whom are not pure stock Americans, but have in their blood, rebellion so far as "party" is concerned. Party against authority-"against the govfences are down, as never before. The ernment" whether it be government by state, or by industrial heads.

-22-RELIGION RECOGNIZED IN TEXAS CENTENNIAL.

Religion, so much a part of Texas history, will play a major role during the \$25,000,000 Texas Centennial Exposition in Dallas, June 6 to Novem- | Secretary is one who fails in either ber 29, a hundred years of freedom of these two particulars. and achievement for the Lone Stat State.

The latest addition to plans for religious participation is the announcement that the Lone Star Gas Company, of Texas will build a \$50,000 Hall of Religion in the 200-acre Exposition Park. Previously, the Catholic Church had announced a \$25,000 exhibit building and replica of the first parish church ever erected in Texas. The Baptist Church, March 1, will hold nation-wide commemorative services honoring the memory of General Sam Houston, Texas' patriot and national statesman.

After several attempts to secure an appropriation for the Hall of Religion had been unsuccessful, the Texas Centennial religious committee asked the Lone Star Gas Company to construct and operate the building as its medium of participation in the Texas Centennial Exposition.

The Lone Star system had planned to spend \$50,000 on an exhibit, but as gas is invisible and gas appliances seemed wholly insufficient, they had not decided upon what form it should take. Through L. B. Denning, president, the Lone Star organization announced that they would erect a \$50,-000 religious building as their contribution to the Exposition.

"Considering that Southern Methodist University is located in Dallas," Denning said, "and that churches in the 300 towns served by our company are the clearing houses for all local activity, we believe no better way could be found for participation in the first World's Fair of the Southwest than the erection of a Hall of | to be a saturation point beyond which Religion."

The building will be the contribution of the stockholders of the company to the churches and to the Expositon. It will be a permanent structure for religious meetings and will include eleven separate rooms where different religious denominations may place exhibits. The new building will be air-conditioned throughout and will include kitchen, patio and reception room and an as-

sembly hall. Plans for the structure have been approved by the city of Dallas and

position opens.

Members of the Centennial Religious Committee are Dr. C. C. Selecman, the Rev. Augustine Danglmayr, Bishop Harry T. Moore, Dr. J. F. Kimball, Dr. J. Q. Dealey, Dr. George W. Truett, Dr. David Lefkowitz, Dr. Graham Frank, Dr. J. A. Weeks, Dr. F. J. McConnell, Dr. S. H. C. Burgin, Dr. T. F. Gallaher and the Rev. Reuben Stong.

The Catholic exhibit will portray the historical, cultural, educational, charitable, and religious work of the Catholic Church in Texas from its very beginning.

The exhibit will be housed in an exact replica of the first parish church established in Texas, the mission church San Miguel de Socorro del Sur, near El Paso. The church was built in 1681 at Socorro, Texas, when the early Spanish settlers decided to make that location the first outpost of their advancing civilization and colonization program, and is still in ues today.

THE JOB OF THE SECRETARY OF THE TREASURY.

No federal official has a tougher job than Secretary of the Treasury Morgenthau.

The Secretary of the Treasury is purely an executive official. He is entrely without legislative power. Yet, when Congress passes a bill requiring public expenditures for which no known funds are available, the Secretary must find the money. He may think the bill is dangerous or unwise-but, in spite of that, his duties force him to do everything in his power to pave the fiscal way.

A short time ago, the President delivered a budget message, which showed an estimated deficit of \$1,-500,000,000—less than in other recent years. However, the President was frank to admit that the budget was incomplete—such vital matters as relief expenditures were yet to be detailed, and were not included. Best guessers say that, while relief spending will be less this year than last, Congress will appropriate \$2,000,-000,000 for that purpose before it is finished. In addition, maturing government obligations call for an additional \$5,800,000,000. The bonus,not considered in the President's budget message, will cost at least \$2,000,-000,000.

As a result, the deficit will be in the neighborhood of \$11,000,000,000 every cent of which must be raised in the next year and a half. That is Mr. Morgenthau's job. The Secretary of the Treasury must determine what type of bonds to issue, and what interest rate to pay. He must accurately estimate conditions in the bond market. A successful Secretary is one who raises money most easily at the lowest cost—an unsuccessful

So far, the New Deal has had things all its own way in financing. Issues have been oversubscribed within a few hours of their appearance. The cost of carrying the debt is lower now that it was a few years ago, because it has been found possible to cut interest rates much below previous levels due to investors' fear of risking money in commercial enterprises.

Whether it will find conditions the same in the future is the question. A short time ago, Secretary Morgenthau was called before the Senate Finance Committee, which wished to ask him whether he thought the Treasury could stand the drain of bonus payments. He avoided answering this question directly, though he was obviously doubtful of the bonus' financial wisdom. And he was, according to all observers, somewhat worried about future financing. He pointed to the confused outlook and said, "So many things have happened that affect the Treasury that I certainly am not smart enough, and I haven't met anybody that is smart enough, to say what is the future of the government bond market."

When asked what would happen if the Treasury attempted to float \$11,-000,000,000 worth of bonds and failed, the Secretary replied: "The minute I cannot raise the money required to finance the government, that minute you will have complete chaos."

Mr. Morgenthau certainly did not intimate—nor has any other responsible authority-that the U.S. credit is in danger. However, there seems government bonds, no matter how securely backed, cannot be floated on favorable terms. As conditions improve, oddly enough, it becomes increasingly difficult for the government to obtain cheap money-better business tempts investors to purchase industrial securities which either pay higher interest rates, in the case of bonds, or offer the chance of great appreciation of principal and earnings, in the case of common stocks. Some observers think that the present Congress, listening to words such as Mr. Morgenthau spoke, will go

And there is also the possibility,

and perhaps necessity, that Congress will be forced to raise money, not through bonds but through new or still higher taxes. Action of the Congress on the bonus gives no indication of that body's future attitude toward spending-common belief is that if the solons realized that payment of the bonus would have actually shaken the Treasury, many of them would have voted for it anyway, motivated by the political considerations that arise inevitably in an election year.

Mr. Morgenthau's testimony, coming from the principal fiscal officer of the Administration, indicates that men at the top are thinking seriously about the public debt.—Industrial News Review.

"NOBODY CATCHES TYPHOID-HE SWALLOWS IT."

"High up on every health officer's list of 'Disease Prevention Duties' at this time of the year, "Dr. R. H. Riley, Director of the State Department of Health, said a day or two ago," is the reminder, 'Typhoid Fever Immunization.'

"For a number of years, there has been a steady decrease," Dr. Riley continued, "in both cases and deaths from typhoid reported in the State. Last year for the first time in five years, our record was marred by increases in both sickness and deaths from the disease. There were 840 cases and 45 deaths from typhoid reported in the State in 1935, an increase of more than 60 cases and of 7 deaths over the number in 1934.

"Through the protection of public supplies from contamination, the pasteurization of milk supplies, vaccination against the disease, improved sanitation of homes not served by protected water supplies, sanitary supervision of sources of food supplies and other protective measures, typhoid fever is no longer as great a source of anxiety as it was twenty or thirty years ago. We have less than half as much typhoid fever in Maryland as we had fifteen years ago. But this knowledge is likely to give us a false sense of security and make us disregard necessary precautions.

"Here are the facts: As somebody has aptly said 'Nobody catches typhoid—he swallows it.' Typhoid is a filth-borne disease. It causes a great suffering and many deaths. That is not all. It is like an endless chain. A certain number of the people who have the disease and recover from it, become 'carriers.' They continue to pass the typhoid-producing germs in the discharge from the bowels and kidneys. If the discharges are not disinfected before they are disposed of, the germs may spread into the soil and pollute it, or they may be carried into an unprotected water supply and contaminate it. A carrier who is careless in his or her personal habits and who handles or prepares food for the table, without careful and thoroughly washing the hands after visiting the toilet and before touching the food, may be responsible

for passing the disease on to others. "In vaccination against typhoid we have an effective means of protection which lasts for a certain period and then must be renewed. If you have not been protected against typhoid within the last two or three years,go to your doctor and have it done now. The disease is both preventable and unnecessary. The State Department of Health furnishes the vaccine free of charge to physicians. Your only expense will be your doctor's fee. As it takes several weeks for the protective treatment to establish itself, don't wait until the spring or summer comes, to have it done.

"Nearly three-fourths of the population of Maryland is served by public water supplies that are protected against contamination. If your supply is not protected against pollution, boil the water you use for drinking or for cooking."

World War Dead to Lie Near Where They Fell

Paris.-A half-million German World war dead who lie in French and Belgian soil will remain undisturbed for eternity; and 10,000 French, British and Belgian soldiers who fought and died in Germany will retain final resting places near where they fell.

The governments of France, Britain and Germany recently simultaneously published an agreement signed last month for establishing a joint committee to deal with any questions regarding French. British and German war graves on foreign soil.

The agreement, which brings former enemies closer together through mutual losses, is based on the principle of "uniting former allied and enemy countries in a common pemembrance of the dead and that principle in turn is based on common, practical interest."

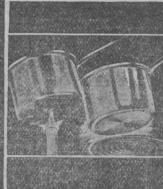

The agreement doesn't mention the American war dead, but it is understood they also will remain undisturbed as result of a separate Franco-American agreement, that was reached shortly before the armistice.

Perfect Rainbow Seen

Calgary, Alta.-A perfect rainbow appeared in the sky after a recent snowstorm here. It was visible for ten minutes.

ENGINEERS CHANGE FACE OF THE WORLD

Big Projects Advance Toward Completion in 1935.

Washington .- Dynamite and steamshovels, dredges, riveting "guns," conthese, plus the hands of hundreds of thousands of men, have changed the face of the world noticeably during 1935, according to the National Geographic society, listing some of the major engineering projects completed during the year.

"Premier engineering event of 1935 was the completion of Boulder dam across the Colorado river between Nevada and Arizona. Other projects of major importance finished during the year included: the bridging of the Mississippi river near New Orleans, and of the 'Little Belt' in Denmark between Jutland and the Island of Fyn; electrification of the Pennsylvania railroad between New York and Washington; changing to standard gauge of 150 miles of the Chinese Eastern railway between Harbin and Hsinking; the inauguration of a great ship canal in Russia connecting the Baltic and White seas; the completion of a highway between the Texas border and Mexico, D. F.; opening of the Moscow subway system; and the placing into service of the world's largest steamship, Normandie.

Boulder Dam.

"The huge solid block that constitutes Boulder dam, and bars the Colorado river, contains 4,500,000 cubic yards of reinforced concrete. It rises 726 feet and is thus the highest dam in the world. Water was first: permitted to gather above the dam February 1, but the last concrete was not poured until May 29. By the end of the year the water level had risen more than 260 feet up the face of the dam and had formed a lake reaching nearly 80 miles up stream. Work is still in progress on the power house immediately below the dam, and it is not expected to be in readiness for operation for at least a year.

"In the Tennessee valley, where a co-ordinated system of dams is under construction, two of the major new structures are nearing completion. Norris dam, in the Clinch river 30 miles northwest of Knoxville, built primarily to impound water for use downstream, and for the incidental generation of electricity, will be finished early in the new year. Wheeler dam, at the upper end of Muscle Shoals, 15 miles above. Wilson dam, will also be completed in a few months. Wheeler dam was built to control floods, facilitate navigation, and produce electricity.

"Construction of three great dams in the Northwest was in progress:

Bonneville dam, across the Columbia river near Portland, Ore.; Grand Coulee dam, also on the Columbia in north central Washington, and Fort Peck dam, on the Missouri river in northeastern Montana. Work was under way on 14 dams in Ohio which eventually will control the flood waters of streams that feed the Mississippi sys-

"In the United States, a ship canal in Texas connecting Brownsville, on the lower Rio Grande, with Port Isabel, on the Gulf of Mexico, is nearing completion; excavation for the All American Irrigation canal to carry Colorado river water to the Imperial valley of California is in progress; and preliminary work is under way on the 195-mile ship canal planned to extend across northern Florida from Jacksonville to Port Inglis.

New Bridges.

"The 814-mile bridge to connect San Francisco and Oakland, across San Francisco bay, has passed well beyond the half-way mark in construction. It is scheduled for completion in approximately one year. August marked the half-way mark also for the great suspension bridge across Golden Gate, San Francisco. It will reach completion about the same time as the bay bridge.

"The great Triborough bridge which will connect the Bronx, Manhattan and Queens, New York, was within six or seven months of completion as the year ended. Five new steel highway bridges across bays and river mouths along the coast of southern Oregon, are nearing completion.

"Among other bridges of more than local importance completed in the United States were: a highway bridge, carrying the Lincoln highway across the Juniata river, near Bedford, Pa.; two highway bridges over the Niagara river in the region between Buffalo and Niagara falls, connecting the new York mainland with Grand island; two highway bridges over the Cape Cod canal, at Bourne and Sagamore, Mass., and a vertical lift railway bridge over the canal near Buzzards Bay.

"Electrification of railways previously operated by steam proceeded in several countries. Electrification of the Pennsylvania railroad between New York and Washington was completed early in the year.

"Ambitious tunnel projects planned and under construction were many, but few important bores were completed during the year.

"Pacific slope water was brought through the Continental divide to the Atlantic side, in Colorado, as the result of the completion of a 12-foot tunnel, February 4. The tunnel extends under Independence pass near Leadville and brings into the Arkansas river basin water that formerly flowed into the Colorado basin.

"Highways great and small were completed in all sections of the United States, while work progressed on scores of others."

OLD MEXICAN PORT TAKES ON NEW LIFE

Largest Liners.

Washington.—Gateway for countless galleons from the Orient 300 years ago, but almost ignored in modern costume of green-bordered red skirt. times, Mexico's Rip van Winkle port, loose white embroidered blouse, and Acapulco, now is waking to renewed gay shawl. activity. The largest liners plying between New York and California plan to call there this year to drop tourists for Mexico City.

"Conveniently located below the elbow bend of Mexico's Pacific coast in the State of Guerrero, sleepy Acapulco has one of the finest natural harbors in the world," says the National Geographic society. "Yet it has drowsed away a couple of centuries as a quiet little tropical town simmering in the sun, in the bowl of great mountains

"The town is a crescent of pastelcolored, adobe cubicles, topped by tiny patches of red tile roofs, and occasional green coconut palms. A few buildings, taller or broader, stand out from the mass of one-storied dwellings-church, town hall and jail, covered market building, and a sprinkling of consulates and hotels. Little cotton mills, and soap and oil factories, operated intermittently, show that and this 'Abra de San Nicolas' admits Acapulco once had industrial ambitions. The narrow winding streets are rarely crowded. Heat makes the air sticky, 'like hot fly-paper,' but visitors endure the climate to enjoy the town's tropical beauty.

Choked Its Progress.

"Behind it rise the steep, cactuscovered Sierra Madres, which have throttled Acapulco's progress like fingers. There is no railroad to the interior, and less perfect harbors, such as Mazatlan and Manzanillo, have boomed because each has this advantage. So Acapulco has dreamed, 'When the railroad reaches here . . . and meanwhile lapsed into a long siesta.

"Cortes used its magnificent harbor in 1513, sending two brigantines on a voyage of exploration into the Gulf of California. But they reported no harbor equal to Acapulco's oval bay, nearly two miles wide. A hilly half-milewide peninsula between bay and ocean forms a natural breakwater, offering about four square miles of placid, almost land-locked shelter within earshot of Pacific breakers pounding against the rocky headlands outside.

"By 1550, trade at the port supported a little village, which the Spanish fortified with the grim gray fort of San Diego, still glowering above one tip of the town.

"The Aztec name for the settlement -Acapulco, 'place where the reeds abound'-was borne on trade winds around the world. Galleons from the

Far East brought fragrant cargoes of Old Buggy Offered as gums and spice, of dark cotton prints and rice from India, rich brocaded silks from Japan, exquisite porcelains from China. Occasional slavers dis-Acapulco on Schedule of charged cargoes of negroes to work nearby sugar plantations, and legend claims that one brought a kidnaped princess, whose popularity is commemorated in the national Mexican girls' flesta dress, the China Poblana

> "Export of silver bullion and specie from Acapulco originated the strange custom, still existing, of calling pesos, often made in China and stamped 'Republica de Mexico,' 'Mexican dollars.'

Sacked by Pirates.

"From Acapulco, goods from the Orient journeyed inland over the tortuous, rocky 'Camino Real,' a brigandinfested mountain trail to Mexico, D. F., and thence to Vera Cruz for reshipment to Spain. Transport was by that drop almost sheer into Acapulco strings of burros, or by slow ox carts with thick solid wooden discs for wheels. Buccaneers heard of Acapulco's wealth, and inevitably the town was sacked by pirates and its ships captured when leaving the harbor.

"There are only two seasons in Acapulco, both hot-steaming rainy summer and long parched winter. To 'air-condition' the town, an artificial cut was made through hills of the peninsula shielding it from the sea. cooling westerly sea breezes. Many homes are built facing west.

"A few years ago a modern highway was completed from Acapulco to Mexico, D. F., nearly 300 miles away and mile and a half above sea level. Vacationists can sail to Acapulco, motor via picturesque Tasco and Cuernavaca to Mexico, D. F., and return to the United States by rail. Automobiles and buses now spin along the new route, which crosses and recrosses the old 'Camino Real,' formerly so difficult as to be a 'good road for birds."

Wireless Checker Game May Take Year to Play

Disque, Wash.-Allen Worrell, nineteen years of age, and an amateur radio operator, has been engaged in a long-distance checker game with a fellow amateur in Guatemala. Each youth makes one move a night, provided they can get their messages through. So far Worrell is one man ahead, and hopes to win the game about next January.

Crosses Sea 146 Times

Manhattan, Kan.-Mrs. Francis Muir recently completed her sixty-sixth ocean voyage to England to see her son there, William Muir, a retired attorney. On the boat she met a woman who was making her one hundred and fortysixth voyage.

Joke Proves an Antique Massillon, Ohio.—Andrew Merrell, superintendent of Massillon's waste collection department, formally announced recently the joke was on the jokesters.

He became the father of a baby girl last year. His employees congratulated him conventionally, accepted his cigars, then decided on a little joke. They began a city-wide search, on

the dumps filled by his department's own trucks, in attics, basements, and sheds, for the oldest baby buggy in

A few days after a department truck arrived at the Merrell home. Two of his most trusted employees solemnly delivered a doll buggy of an ancient

Merrell, an inquiring soul who believes in looking gift horses in the teeth, inspected it closely.

Noting the hickory axles, he decided the buggy must have been the coveted toy of some little girl during Civil war times. A small brass plate bore the trade mark of a no longer existent Chicago firm, Vergho, Ruhling & Co. The Chicago municipal reference library said the firm, established in 1855, probably manufactured the buggy about 1871.

So Merrell, knowing a little about antiques, consulted some experts. "And they told me," he informed the jokesters, "it's worth \$500."

Discovers Muskrat With Queerly Curved Tusks

Ravenna, Ohio.-Frank Ulrich, young farmer of Muzzy Lake, near here, gave Portage county zoologists something to think about when he exhibited a muskrat with tusks that curved from its lower jaw into the top of its head.

The animal, captured by Ulrich's dog in a cornfield, also had two teeth in its upper jaw that had grown back into the roof of the mouth.

Apparently hardly able to open its mouth, the rat was thin from lack of food, the farmer said.

Latest Items of Local News Furnished By Our Regular Staff of Writers

All communications for this department must be singned by the author; not for publication, but as an evidence that the items contributed are legitimate and correct. Items based on mere rumor, or such as are likely to give offense, are not wanted.

We desire correspondence to reach our office on Thursday, if at all possible. It will be necessary, therefore, for most letters to be mailed on Wednesday, or by Fast Mail, west, on W. M. R. R., Thursday morning. Letters mailed on Thursday evening may not reach us in time.

TO CORRESPONDENTS.

Our correspondents are again urged to remember that while their letters are perhaps of first interest to many subscribers, a close second interest is that of hundreds of former Carroll-countians now living in Baltimore, Washington, Philadelphia, Detroit, York, and other places as far distant as California. These are the ones who most appreciate "letters from home." Think of them, when writing!

_11___ WESTMINSTER.

The Young Women's Missionary Society held a Valentine supper in the Social Hall of Grace Lutheran Church on Friday evening. It was given in the interest of Miss Mary Heltibridle the Y. W. Missionary in Japan, who was one of our Carroll County girls. Despite the snow and ice the supper was well patronized and a substantial sum realized.

The Layman's League of the Meth-

odist Protestant Church, have planned to observe Ladies' night, Thursday. The banquet will begin at 6:15 P. M. A very interesting program has been prepared Prof. Latimer H. Elderdice, Jr., in charge. The Mission Study Class of the

Torch Bearers division of Light Brigade No. 12, held their third session on Thursday, P. M., at the home of the Superintendent, Mrs. John D. Belt, who had a number of curios from Mexico, which makes very real their study of "Over the Mexican

A reception for their new pastor and wife is being arranged for Thursday night by the members of St. Paul's Reformed Church. The Rev. and Mrs. Nevin E. Smith have entered whole-heartedly into the work of St. Paul's Reformed Church.

The Women's Adult Bible Class of Grace Lutheran Church held their regular quarterly meeting on Wednesday night, and as this was the fourth quarter reports were given for the year which showed progress. Some important business was transacted and the officers elected for the coming year are the following: Pres-ident, Mrs. Bessie Hull; Vice- Presdent, Mrs. Bessie Hull; vice-Pres-dent, Mrs. Elsie Klee; Sec'y, Mrs. Clarence Stem; Asst. Sec'y, Mrs. Carroll Leister; Treasurer, Mrs. Mary Ruby; Teacher, Mrs. John D. Belt. The class was organized 24 years ago with 77 charter members. There are forty-six of these ladies still living, but not all are in our city or are able to attend the class.

Mrs. Effie Hoff has returned to her

home W. Main St., and is convalescing very satisfactory from her recent

Mrs. Alice Winemiller, nee Geiselman was buried from the home of her sister, Mrs. Joseph Stouch, Pennsylvania Ave, on Wednesday morning. The services were conducted by

Revs. Paul W. Quay, Henry P. Spangler and J. Hess Belt. Burial was in the family lot at Littlestown.

"Texas Jim" who plays a guitar and sings over the radio at Station WFMD Frederick, every Tuesday from 12 to 12:45 P. M. Another one of our redia stars is Learn I. Methics. rodia stars is Joseph L. Mathias, Jr., who sings from the same station on Sunday afternoon.

LITTLESTOWN.

Monday night some person or persons gained entrance to the High School and hammered open the safe and got five dollars. There was a play that evening and it was the opinion of the police who are investigating that the receipt from play was in the safe and that was what the robber was after, but that money had been taken home

LeRoy Bish, of town, had the mid-dle finger of his right hand amputated at the first joint at the Gettysburg Hospital, on Sunday. The finger had become infected following an injury some time ago.

The pastor and choir of St. Paul Lutheran Church used the new hymnals also the vestments on Sunday

morning. Quite an improvement over the old service.

William Miller who died in Philadelphia, Sunday, Feb 9, and his body was cremated, his ashes were sent to Littlestown Monday and hyvied in to Littlestown Monday and buried in

Mt. Carmel cemetery.
Frank Stavely was out walking last
Monday for the first time in eight
weeks. Not able to carrier the mail

Miss Rita O'Donnell an employee of the Campbell Shoe Company was admitted to the Hanover Hospital where

she is undergoing treatment

We are in for another fraternal order. This time it will be the Eagles. Many of the business men have sign-

Adams County Library plans was given a set back. The County Commissioners at a special meeting voted

unanimously against appropriating \$3400 for a county library. The State was giving \$2500.

John Sohl formerly of Uniontownship, near town, died at Paoli, at the age of 75 years. Body was sent to age of 75 years. Body was sent to John W. Little & Son, and buried on Sunday afternoon in Christ Church

Enjoyed the letter of my old friend John J. Reid. This winter is like the one we had about 1900 when no trains

run for three days.

FEESERSBURG.

We suppose all your correspondents We suppose all your correspondents could add a few lines to the chapter on the recent weather. Some of the old-times are saying "Never saw as bad as last week," we say never a thicker sleet than last Friday, but when aroused at 5 A. M. by the breaking of trees and falling limbs and ice we realized that beauty can be dangerous, and when day-light revealed the wreckage every where we couldn't enjoy the wonderful sight as much as usual for thinking of the hardships it was causing the telephone and electric line men-not to mention the expense to the state—and the perils of men on the water, beside the suffering of the needy.

Mrs. Wilbur Miller her daughter,

Josephine and son, Richard, visited the Charles Sheen family, at Tyrone, on Sunday afternoon.

Roy Crouse, spent a few days with the David Miller family to assist with the butchering of a half dozen hogs, and they need not bother with fans

The Birely family report their oldest brother, W. Lincoln Birely and wife, of Boston, are spending this month at Miami Beach, Fla. So many friends have gone Southward this season to escape the rigors of winter, but will that help them bear it better when they return to this "Land of the Freeze."

Mrs. John Cushon and little son, Robert, of Detour, spent Monday at the Wilbur Miller home.

The funeral of Alfred Hape, familarly known as "Bud" passed thro our town last Thursday on the way to Haugh's Church for interment. His early life was spent in this community, and he was a genial friend and kind neighbor. We know many more persons would have been in attendance had the weather been less inclement; but what times the undertakers, grave diggers and families have had this winter to bury their dead.

The announcement of Mrs. Grace Reindollar Sager's unexpected death on Saturday was rather startling to all who knew her. For a young wo-man to be called away so suddenly gives alarm. Her aunt, Mrs. C. S. Wolfe attended the service in Union Bridge at the Church of the Brethren on Wednesday morning. The body was taken to Pipe Creek cemetery for

Valentine's day was duly observed with missives either loving or ridiculous. Some of the school teachers and their pupils have become quite xpert in the creative art of making them, and now they are counting their receipts, or how many times they have fallen on the ice. One girl has 11 valentines, one of our boys has reached the total of 40 tumbles, and proud of them.

We will let the little boy who couldn't tell a lie and grew to be a grave General, fend for himself this week-as any child can explain him, and we give him silent honor on the 204 anniversary of his birth. Some of our men who have been

shoveling snow and ice all day longare now suffering with backache; and it was the time for all good farmers to come to the aid of their snowstalled countrymen.

Without electricity for 15 hours on

Without electricity for 15 hours on Friday—and that was bad for fuel and water supplies; without telephone service for five days—and that was bad for business and gossip, so every one was glad for a "ring" again Permit us to say we like your official Directory of Carroll Co. and of Taneytown. If anything goes wrong about wills, taxes, schools, health, election, etc. Tis easy to find the election, etc. 'Tis easy to find the name of the one in charge of each department who can adjust our troubles Great work!

Death or Injury

AMERICAN LEGION NEWS.

The American Legion has consistently urged for more than a decade as a part of its major legislative program the enactment of laws providing for universal service and for the purpose of taking the profit out

There is a continuous howl about the payment of veteran claims, pensions, etc., but do the same people who do this howling cry out in opposition to war? Certainly if we speak of the Economy League they don't; yet, we might also find others who take the same inconsistent position.

We of the Legion have learned that while we were in service fighting for what we were taught to believe was right, others were engaged at home making large salaries or high profits. Congressional Records show an ulterior motive to the World War and

that the veteran bore the burden at

a wage totally inconsistent with the We learn that manufacturers of almost everything unloaded their wares on the government at high prices, although many articles were not need-

ed and never used. Manufacturers also cried out against the good man of the house that the war stopped too soon and the house in return handed out bonuses bonuses and more bonuses. The rail-roads got more bonus than all the veterans only the railroads got it in cash while the veterans were deferred for a time.

And so, with certain backers of the Economy League who tried, and in part succeeded, to cut government ex-

ense of disabled veterans. If the veterans of the World War would hold out for a general pension like the veterans of other wars have, posterity could not pay the bills caused by war time manufacturers who make up the bulk of the profiteers of war. While posterity would have some right to complain, would this apply to the Economy Leagers, in-cluding those individuals who are in sympathy with but who do not belong

to the Economy League?

John Taxpayer is still paying the freight of other wars, in the form of pensions to widows, yea verily, even some of the children of veterans of past wars are pensioned.

In order to take advantage of this wrong, the American Legion is fighting to take profit out of war by draft-ing everybody and everything on an equal footing. We believe that by

The difficulty ahead is obvious because in getting such legislation en-acted, we must change the slippery hills frozen by powerful interests of profiteers. Men who make and break

Only by a one hundred percent coagulated mass of veterans can we hope to reach the summit. This change we owe to posterity. With the help of every eligible World War Veteran we will reach the summit.— Publicity Committee Hesson-Snider Post No. 120, American Legion.

A CONSTITUTION FOR TWO MERGED CHURCHES.

-22-

"It has been proven possible that two Churches can unite without a previously adopted credal statement or a Constitution for the government of the merged Churches" declared Rev. Dr. William E. Lampe, Secre-tary of the Committee to prepare a Constitution for the Evangelical and Reformed Church. "The two Churches, Evangelical Synod of N. A. and Reformed Church in the U. S., with combined communicant membership of 700,000, merged at Cleveland, Ohio in June, 1934 on the basis of

is making real progress. "The Constitution for the church is being presented to the Districts and Classes, to all ministers and church officials, for their study, critidepartment of the school. Mr. Hyson supervised the high school classes. A conference was held from 3:30 until 4:30. June at Fort Wayne, Indiana. If the General Synod approves by a two-thirds vote, it will be submitted to the Districts and Classes and if approved by two-thirds of them, it will be declared adopted.

"It has been the purpose of the committee in preparing the Constitution to conserve the essential features of the doctrinal standards, tradition. constituent Churches prior to the un ion. Some of the high lights in the

Constitution are: "Congregations are afforded large freedom in effecting their organiza-tion and managing their own affairs.

"There will be only two judicator ies in the general organization of the united Church: Synods and the General Synod. A Synod will be constituted of ministers and lay representatives of the congregation and take the place of the Classis and Synod in the former Reformed Church and of of yellow rosebuds also a gift from the spring for legislative purposes, the children. ence for the consideration of the gen-

"A new departure is the grouping of Synods into Areas. The areas have no legislative functions but are constituted simply for efficiency in promoting the work of the Church and in the placing of pastors. Provision is made for a full-time President of each of the proposed five

serve to the congregations the right to nominate and elect their own pastors but at the same time to protect them. It seeks to locate every min-ister in some pastoral charge or some other work of the Church and to pro-

vide a pastor for every charge.

"The General Synod, the highest judicatory of the Church, with a full-time President, is to be constituted of delegates elected upon the basis of the number of members in a Synod."

RULES FOR SAFE DRIVING ON ICY STREETS.

To drive with maximum safety on icy streets, partly deflate your tires and make all steering changes, starts,

and stops, gradually. These suggestions for safe driving, under conditions such as many motorists have faced lately,were broadcast recently by Chevrolet Motor Company to all its dealers and service stations in northern territories because of the numerous traffic mishaps that have

been caused by slippery streets.

The bulletin says:
"One of the greatest single precautionary measures to take in driving a car on icy streets is to reduce the pressure of the tires. If tires are hard, they form a positive menace, since they cause the wheels to bounce off the road surface and to lose traction and steering effect. Soft tires, with air pressure lower than is normal for regular use, safeguard cars on icy streets because they not only eliminate bouncing, but, even more important, present a much larger area of contact with the road surface. A soft tire, because it sinks into every depression, gains a foothold where a hard tire would not have much more grip than a ski that slides over the hollows and bumps.

"The three chief causes of trouble

on icy surfaces are:
"Loss of steering control, when the car refuses to follow the direction of the front wheels. "Loss of braking control, when the

wheels lock and slide upon application of the brakes.
"Loss of traction, when the rear wheels spin, upon application of pow-

"All three of these difficulties are greatly offset by reducing the tire pressure. For conditions such as have been common lately, the tires should be deflated until they show a perceptible bulging of the side walls. There is little chance of tire damage, because the enforced low speed of driving, and the low temperature, eliminate the possibility of overheat-

ing.
"Other precautions, aside from maintaining low speed, are in the

manner of driving.

"In starting from a standstill use second gear, keep the engine speed low, let in the clutch gently, and shift to high gear as soon as the car gets fairly under way. Do not attempt to

accelerate in low gear or in second.
"In stopping, leave the car in gear, or quickly shift to second ease off the thus taking profit out of war we will eliminate the greatest cause of war, or its continuation.

In stopping, teach the ease off the gas gradually, and apply the brakes softly. If the wheels lock and slide, softly. release and apply the brakes repeat-

"In steering, make all changes of direction gradually, with very slight movements in the steering wheel."

THE FENCE

A stranger addressed the farmer's boy across the fence.

"Young man, your corn looks kind o' yellow." "Yes, that's the kind we planted."

"Don't look as if you would get more than half a crop." "Don't expect to. The landlord gets

the other half." Then, after a pauses, the man said: "Boy, there isn't much difference between you and a fool."

"No," replied the boy, "only the fence."-Hoard's Dairyman.

Reward

"What's this poster about a reward for kidnapers of Rattlesnake Pete." said the traveling salesman. "Has Pete been kidnaped?"

"Not yet," answered Mesa Bill. "The reward is for anybody that'll undertake the job."

Hospitalities

"Will you invite that office-seeking friend to breakfast?" asked the secre-

"No," answered Senator Sorghum. "A breakfast won't satisfy him. What he wants is an entire meal ticket."

A Trifle Unkind

Mrs. Bindier-Is there any difference, Thomas, between a fort and a fortress?

Mr. Bindier-I should imagine, my dear, that a fortress would be more difficult to silence.

Deduction

"That young statesman says he assumes to control only one vote and that is his own."

"Controls his own vote," repeated Miss Cayenne thoughtfully. "Evidently unmarried."

THIRSTY FELLOW

Screwdriver-Say, what's the matter. with you, you're always drinking? Battery-Well, you know I'm a dry

TANEYTOWN LOCALS.

(Continued from First Page.) Mrs. Ralph Stouffer, of York, Pa., is the guest of her sister, Mrs. George Baumgardner and family, several days this week.

The Fire Company supper will be held in the Firemen's building this Saturday evening, beginning at 4:30. See advertisement on another page of this issue.

The fact that the roads are in such bad condition, is largely responsible for the shortage in news and social events. Even just "going to town," has been greatly less practiced, as some classes know.

Mr. and Mrs. Edward Morelock,son Kenneth attended the golden wedding anniversary on Sunday of Mrs. More-lock's parents, Mr. and Mrs. Charles E. Bowers, Westminster. They were married at the home of the bride's parents, Mr. and Mrs. P. H. Fowble, Manchester, on February 18, 1886, but the occasion was celebrated on Sunday Echapter 19, 1926 at the Sunday, February 16, 1936, at the home of a daughter, Mr. and Mrs. Clarence Manger, Westminster.

Acting Found to Reduce Mental Maladies of Idle

San Francisco.-The development of self-expression through acting and music, to combat the mental and nervous ills resulting from unemployment, is recommended by Ferdinand Kebely. Berkeley community director.

Kebely, an Austrian soldier wounded in the battle of Galicia, passed four

years in a Siberian prison camp. The same activities that kept tattered, hungry prisoners from going mad, Kebely said, can be applied today to overcome the despondency brought about by enforced leisure resulting from shorter working hours and unemployment.

"Among the prisoners were university professors," Kebely said. "From memory they made scripts of plays. The Swedish Red Cross furnished a few musical instruments but no music. A prisoner, who had been a concert master before the war, scored the music of great composers from memory."

Permission of the prison officials was obtained and a log stage erected. Make-up materials included flour, stolen from the commissary, to serve as powder; red ink served for rouge and lipstick; charred embers were employed to emphasize the beards and eyebrows and to change the face lines of the actors.

MARRIED

ENSOR-RUPPERT.

Arthur N. Ensor, youngest son of George R. Ensor, of Manchester, and Miss Mary Ruppert, of Manchester, and daughter of Mr. and Mrs. Joseph Ruppert, of Westminster, were married on Saturday evening at 8 o'clock at the Manchester United Brethren parsonage. The Rey Lyan G. Naugte. parsonage. The Rev. Ivan G. Naugte performed the ceremony using the ring ceremony of the U. B. Church. The young couple were attended by Mr. and Mrs. Raymond Myers, of Manchester.

SANDRUCK-MARKEL.

On Saturday, Feb. 15, at 3 P. M, at the Reformed Parsonage, Manchester, Mr. Harry LeRoy Sandruck, son of Harry Sandruck, Alesia, Md., and Miss Pauline E. Markel, daughter of Mr and Mrs. C. S. Markel, Brodbecks, Pa., R. D., were united in holy wedding with the use of the ring ceremony of the Reformed Church, performed by the groom's pastor, Rev. Dr. John S. Hollenbach. They are both employed at Hanover Cordage Co., and will reside at the home of the brides parents for the present. The ceremony was witnessed by Miss Helen Strevig, a cousin of the groom, and Rev. Roy K. Benham, associate pas-

DIED. Obituaries, poetry and resolutions, charged for at the rate of five cents per line. The regular death notices published free.

MRS. GRACE SAGER. Mrs. Grace P. Sager, wife of Elmer Sager, died suddenly at her home near Union Bridge, Saturday evening after a few hours illness, aged 31 years, 7 months, 10 days.

She was a daughter of Noah and Mollie Reindollar, and is survived by her husband and father. Funeral services were held on Wednesday forenoon at the home, and at the Union Bridge Church of the Brethren, in charge of Rev. Marshall Wolfe, Blue Ridge College. Inter-ment was in Pipe Creek cemetery.

MISS HARRIET H. MOTTER.

Miss Harriet Henkle Motter, one of Emmitsburg's oldest residents, died at her home there Saturday afternoon at 3 o'clock at the age of 91 years. She was the last surviving member of her immediate family. A number of nephews and nieces survive. She was a daughter of the late Joshua and Harriet Henkle Motter and had resided in Emmitsburg all

The funeral was held Tuesday afternoon at 2 o'clock at the home with Rev. E. L. Higbee, pastor of the Reformed Church, in charge. Interment in Mountain View cemetery.

MRS. ANDREW BITTLE.

Mrs. Cora R. Bittle, wife of Andrew Bittle, died at her home on Route No. 1, Taneytown, Tuesday afternoon. She was a daughter of the late Jacob and Rebecca Koons Study. She is survived by her husband, one daughter, Mrs. Margaret Rodkey, at home; by four sisters, Mrs. William Myers, Gettysburg; Mrs. Calvin Slonaker, Mayberry; Mrs. Laura Eckard and Mrs. Harry Humbert, West-minster. She was a member of Sil-ver Run Reformed church.

Funeral services this Friday morning, at 10 o'clock, at the home, and in Silver Run Reformed Church, in charge of her pastor, Rev. Felix B. Peck. Burial in the Silver Run union cemetery.

BUSINESS HAS STAKE IN FARM PROGRAM.

Business and industry should be as interested in securing a substitute for the recent agricultural adjustment program as agriculture, because of the importance of the buying power of the farm market, in the opinion of C. E. Wise, Jr., secretary of the Maryland Farm Bureau Federation. Even with the help of the AAA agriculture was not able to adjust its production, because of the nature of farming, as well as industry did during the depression, he said in a recent

"In 1932, industry dropped its production to 59 percent of 1929, and was able to hold prices at 86 percent of 1929," the Federation secretary pointed out. "But agriculture kept on producing. It reduced production only six percent, and as a result of over-production, prices dropped 63

percent. Farmers need some method of adjusting production so as to keep in balance with industry, Mr. Wise believes. Industry closed factories and permitted unemployment to bring on the problem of relief, while no such program was available to farmers during depression years, he said.

"The new soil adjustment program holds hope of being a better than the old, because it ties together immediate adjustment and a long time program of conservation of our national resources," said the Farm Bureau leader. "Organized farmers are fighting for the new measure and appreciate the sympathetic help which is coming from any business leaders."—Farm Bureau Federation.

Somebody claims to have discovered that 1700 new varieties of stamps were issued in the world in 1933. This is to correct the impression that Postmaster General Farley was the only one in the business.

Indian Elephant in Gay Trappings.

Prepared by the National Geographic Society. zoos. The African elephant is as easily Washington, D. C.—WNU Service. HE elephant, gollath of modern animals, is decidedly different in anatomy from all other mammals. He looks more or less alike at both ends; his trunk is shaped

much like his tail, both being practically hairless, wrinkled, and of about the same length. A sleeping elephant, with ears at rest and the very small eyes closed, looks like a case of "heads I lose, tails you win." Because of this uniformity at the terminal points of his anatomy, and the wrinkled condition of his epidermis, the

animal seems unfinished. The wrinkles cover his back and sides and sag down over his straight, column-like legs to his knees, which are always baggy. His trousers are never pressed and his clothes never fit him, because his tailor, Mother Nature, abhors elephant dudes. If you examine the epidermis minutely you will find it finely reticulated or stippled, giving it a distinctive character peculiar to the elephant.

The only really well-groomed or well-tailored elephants are some stuffed specimens in natural history museums, which possess skins as smooth as rubber balls. The original skin has been covered by a coat of black enamel paint which fills up and hides every wrinkle in the skin.

Such taxidermy was changed by Carl Akeley, who knew his elephants and mounted them as nature had made them. He invented a method of tanning the skins and reducing them to the thinness of a kid glove. After the tanned skin was placed over the papiermache manikin Akeley skillfully modeled the skin from the top or outside by injecting fluid papier-mache underneath the skin. In this way the fine reticulations were retained. Not a drop of paint touched the skin of his elephants.

Because of the hooflike nails on their huge feet, elephants are assumed to be related to the hoofed animals, such as horses and cattle; but this is a mere superficial resemblance. The secret of the elephant's ancestry was discovered the Fayum beds of Egypt in the Lib- phants. yan desert. In these beds of Tertiary age were found the remains of animals related to modern elephants, but less than half their size, which had short trunks, as indicated by their abbreviated nasal bones.

His Teeth Are Peculiar.

The elephant has a peculiar tooth arrangement. The teeth do not fit into permanent sockets or cavities in the jawbones, as teeth do in other animals. Instead, they pass through the African. jaws from behind forward.

The grinding teeth are often enormous in size, the crown being 12 inches long in the older teeth and often (bumps of wisdom) which part it quite as deep. These huge molar teeth are thrust upward and forward exactly in proportion to the wear on their crowns; so that when the tooth is worn down and useless it is pushed to the tip of the mouth and falls out as a mere fragment, one-thirtieth or less of the bulk of the original tooth. Six of these molars, or cheek teeth, pass thus through each jaw on each side of the mouth. Thus the elephant in his lfietime uses 24 teeth.

The only other group of mammals in which the teeth pass thus through the jaws are the manatees. And, oddly enough, in the Fayum beds of Egypt have been found remains of mammals intermediate between elephants and manatees. These fossil manatee-like animals imply a common ancestry for the two groups, which are today widely diverse in anatomy and habits.

Fables About Elephants.

Much of the elephant lore that is widely accepted is equally fabulous. There are stories told of how they never forget an injury and how they always get their man and trample him to death. The elephant has a wonderful memory, but the beast does not habitually resented every wrong and is still inhabited by elephants. revenged every beating, there would be a very high mortality among elephant trainers and attendants. They try to bully and test the "nerve" of each new trainer and attendant. If the trainer or keeper fears the

animal and does not at once subdue it with force, then that particular elephant will continue to intimidate him and he may eventually be killed. If, however, he subdues it at once by force, it will then usually submit to his authority ever afterward.

It is often said that African elephants cannot be trained, and theretrained as the Indian. The great Jumbo was taught to carry children on his back in the London zoo and was a docile and safe elephant. The Belgians at Api, one of their stations in the Congo, are using trained African elephants to plow fields and to pile and carry logs and lumber.

Perhaps the most frequent misconception about elephants is their age. Animals estimated by circuses to be far beyond fifty years old are usually without exact history in youth. A common error is to overestimate the age of an elephant purchased as a fully grown adult. Such an elephant is often said to be thirty or forty years old when actually it is fully grown when only ten or twelve years old. It then lives 30 or 35 years in captivity.

"Graveyards" Never Found.

The story of elephant graveyards circulates in the African wilderness, where ivory hunters still entertain hopes of a find of graveyard ivory some day. The tradition runs that when they feel death coming upon them, elephants leave the herd and trek to an elephant graveyard, a remote spot in the wilderness where all the elephants of the district go to die. There the ground is supposed to be thickly strewn with the huge bones of elephants, many having died 100 years ago or more. The tusks which form a part of the skeletal remains of the beasts in such a graveyard would be worth many thousands of dollars, as ivory does not decay or lose quality with age. Many hunters have sought for these graveyards, but none has been rewarded by the discovery of such

The Indian, or Asiatic, elephant differs physically in many particulars from the African elephant. In reality they belong to different genera, the African being an old-fashioned elephant, with fewer enamel plates in its molar teeth and with a rounded skull like that of the ancient mastodons. The Indian elephant is a much more modern type, with more complicated or complex teeth-the last word in ele-

The chief external difference between the African and Indian animals is in the ears. In the latter they are small and only one-third the size of the African's, and the upper margin does not fold inward behind the ear where it borders the neck. The dorsal profile differs in the Indian by having the crown of the head on the same level as the back, instead of the head being held higher and the neck sloping downward to the withers, as in the

In the Indian elephant the forehead is marked by a depression, or valley, separating two rounded knoblike bosses along the middle line.

Ranges of the Elephants.

The Asiatic elephant ranges through the forested parts of India and is today more numerous in Burma or eastern India and in the island of Cevlon than elsewhere. From Burma it ranges eastward through the Malay peninsula to Siam and also farther east to Cochin-China. Southward it extends to the island of Sumatra.

The African species originally, before white men slew it, ranged over every foot of tropical Africa from sea level to the tops of all forested mountains, or to the upper limits of forests on the snow-capped mountains, such as Kilimanjaro, Kenya, and Ruwenzori. On these equatorial peaks timber line occurs at an altitude of approximately 10,000 feet.

On the sands of the Sahara the animal is not found, but it occurs in the bush-covered deserts and grasslands on its southern border, and from that latitude southward to the Cape of Good Hope. On the east coast or border lands of the Indian ocean the elephant extends through Ethiopia and eastward through the deserts of Somaloften resent a wrong. If elephants iland. Half at least of this vast area

A third distinct species of elephant

occurs in extreme western Africa, in Liberia, the land of the pygmy hippo, and eastward to the Cameroons. This elephant'is also a pygmy of sorts and is usually known to the zoo public as a "pygmy elephant." The name "pygmy" will doubtless stick in the public mind and replace the older or first name be stowed on this species, of "roundeared," or cyclotis. The ear is different in shape from that of the large African species, being circular in out line, without the fold inward at the neck, and only half the size, proporfore are seldom seen in circuses or tionately, of the African elephant's.

BANKERS ARRANGING **REGIONAL MEETINGS**

Studying New Legal and Economic Conditions Affecting Bank Management

STRESS PUBLIC RELATIONS

American Bankers Association Sponsor of Meetings as Part of Nationwide Program of Banking Development

PHILADELPHIA .-- Fifteen hundred bankers from fifteen eastern states met here in January in a two day conference devoted to discussions on legislative, managerial, operating and public relations problems of the banking business. This was the first of a series of meetings planned by the American Bankers Association in its nationwide program of banking development under the leadership of Robert V. Fleming, president of the association. Similar conferences will be held in southern and western sections of the country.

"It is the purpose of these working conferences to bring to association members and other bankers a thorough knowledge of the changes in banking laws and rules, provide discussion of better public relations so that there shall be greater cooperation and understanding between the banker and his customers, and to give opportunity for a survey of the problems incident to the Government's competition with our chartered institutions," Mr. Fleming said in opening the meeting.

To Help Government Quit Banking

The discussions at the conference showed that the bankers are ready to make it easier for the Government to relinquish many of its emergency financial services as soon as possible by demonstrating how their institutions are able to render full banking facilities to the public on sound lines.

Bankers generally have recognized that in times of emergency the Government had to come to the assistance of the people where chartered institutions were unable to do so on account of such conditions, Mr. Fleming said. They also realize that possibly many functions which the Government is performing are of a nature which cannot be handled by chartered institutions under the principles of sound banking.

On the other hand, he said, "we should survey all emergency lending measures of the Government to judge which of these activities can be properly and soundly taken over by banks in their respective communities."

The attending bankers devoted time to considering the Banking Act of 1935 and the many related regulations and discretionary powers under the Federal law. These were explained by O. Howard Wolfe of Philadelphia, who said he had made a count of the various places in the act where provision is made for discretionary power to be exercised by government officials through regula-

tions. "Confining the count only to the sections which affect practically all of us, I found there are forty-eight places where discretionary power is given," he said. "It is a problem of no mean importance, therefore, to master banking law as it is today or may be tomorrow."

Bank Taxation and Solvency

Bank taxation was discussed by Charles H. Mylander of Columbus, Ohio, who declared that "the average American is vitally interested in taxation of banks because solvency may depend to a large degree upon the way in which the taxing power is exercised upon them."

To prove his point he cited earnings

figures which showed that, in the year ended June 30, 1934, "for the United States as a whole, national banks used \$14.89 out of each \$100 of net operating earnings, before taxes, in payment of taxes; but in seven of the twelve Federal Reserve Districts the percentage of earnings used for taxes was above the average. It was in practically these same seven districts that the greatest number of bank failures occurred in

those hectic years from 1920 to 1933." As an example of how far taxation can go, he quoted official figures showing that in 1934 a large number of small state banks paid on the average \$34.20 of every \$100 of operating profits for taxes. Mr. Mylander urged that there be "brought home to the average American the self-evident truth that banks, dealing as they do only in intangible property, are not proper subjects for property taxation; that the true measure of a bank's ability to pay taxes is the earnings it can make."

WHEN BANK CROOKS SHOW PREFERENCES

The American Bankers Association reports that non-member banks suffer twice the percentage of burglaries and hold-up robberies as compared with members. Member banks display a sign showing that they receive the protection of the association's detective agents, who cause the arrest of from 150 to 400 bank crooks every year, the organization, which is a non-profit body,

"Professional criminals often boast of having sense enough to dodge the far-reaching system of man hunting available to members, so long as there are other banks without this protection," it says. "They recognize that once on the record of the Association's Protective Department, they must pay for every crime with which they can be identified. Detainer warrants have followed them from place to place so that penal servitude for one crime would not expiate other offenses."

Rise of Brigham Young

Brigham Young was born at Wittingham, Vt., June, 1801, and died at Salt Lake City, August, 1877. His early life was spent in New York state where he became a carpenter and glazier. In 1829 he obtained from the brother of Joseph Smith a copy of the Book of Mormon. He was converted and baptized April, 1832, and at once became active in the work of the new sect, being made first an elder and then an apostle in 1835. Later he was made president of the council and still later the supreme head. He led the pilgrims from Missouri to Illinois and later led the trek which resulted in the founding of Salt Lake City. He believed in and practiced polygamy. Polygamy is no longer a practice of the Mormon church and its members are prohibited from it by church orders.

"Grouch" Aid to Health, Seattle Doctor Believes

Seattle.-A good laugh a day may keep the doctor away, but a "healthy" grouch is good for the health, too. At least, that's the opinion of Dr. Frank M. Carroll, city health commissioner, who argues nothing aids the nervous

system more than "a good mad." Doctor Carroll, however, partly agreed with Dr. James J. Walsh of Fordham School of Sociology, who told a Bridgeport (Conn.) audience recently that laughter was good for innumerable body ailments.

"There are times," Doctor Carroll said, "when a grouch does more to clear up worries than laughter. I am inclined to believe that laughter is a sign of good health rather than an aid to good health."

All other Fraternities and organizations are invited to use this directory, for the public information it carries. Cost fer one year, only \$1.50.

RUNNING WATER

An English tourist was on his first visit to Niagara falls, and a guide was trying to impress him with their magnitude

"Grand!" suggested the guide. The visitor did not seem impressed.

"Millions of gallons a minute!" explained the guide. "How many a day?" asked the tour-

"Oh, billions and billions!" an-

swered the guide. The visitor looked across and down and up, as if gauging the flow. Then he turned away, apparently unim-

"Runs all night, too, I suppose?" he remarked .- St. Louis Globe-Democrat.

SHOWS HOW TO BE OWN BLOOD DONOR

U. of Illinois Doctors Urge the "Storage" of Fluid.

bank and draw it out when you most need it.

Or if you come through your operation nicely and don't need it, donate it to a hospital, where it may save a life.

"Blood insurance," the doctors who are working on this latest scientific miracle call it. They are Drs. Maurice Vischer and Bernard Fantus, both of the University of Illinois Medical school.

Doctor Vischer has been experimenting successfully with "canned" or preserved blood, while his confrere, Doctor Fantus, is more interested in the practical application of the experiments.

Expectant mothers would be the principal beneficiaries of the blood insurance plan, Doctor Fantus pointed out recently.

But any person with a surgical operation in the offing, he added, could protect himself by arranging in advance to have some of his own life fluid drawn off and preserved for possible emergency.

Doctor Fantus is hoping that the County hospital will be the first to install the needed equipment. If such equipment were installed, he said, it would be the means of saving at least 200 lives a year.

The fluid, when drawn off, is preserved in flasks, with sodium citrate added to prevent clogging, and kept at an even temperature of 1 degree, centigrade, or just above the freezing point. It can be kent for three weeks before it begins to disintegrate.

The blood of expectant mothers, Doctor Fantus explained, was especially desirable in that it contained a natural hormone wihch prevents bleeding.

The blood drawn from an accidentally dead body within six hours after life has ceased to exist, can, and will eventually serve the same purpose, Doctor Fantus said, adding:

"One dead body can supply six times the amount of blood a living donor can furnish, and in the near future many of the dead will be the means

of saving human life. "Widespread education will be needmaking such use of the dead. "Still, it is a rather inspiring thought

that even in death we can make some contribution to humanity." Setting Him Right

A grubby urchin walked into the men's outfitting department of a large store. Addressing an assistant, he said, "A soft man's collar, please" The other assistants tittered, and the one serving said, stiffly, "You mean a man's soft collar, my boy." Pointing to his own collar, he asked, "Do you mean one like this?"

The boy eyed it momentarily. Then he replied: "No! a clean one."—Tit-Bits Magazine.

And Quite True

"Some people thirst after fame, said the romantic young man, with a sigh.

The object of his affections was not in the same mood, however.

"And there is something all people thirst after," she said.

"Yes?" asked the lover eagerly. "Salt fish!" was the crushing reply.

(Continued from last week.)

[] Mosen Masself March []

Yes. Marcia and Stanley Heath were talking. She could hear her aunt's gentle insistence and the man's protests. That was all she wished to know. The pillow-cases were in process of being taken off.

Up the stairs flew Sylvia, to return a second later, the jewel case swathed in its loose wrappings.

"If I can only scramble it in there before she comes," whispered she. "I | that chap Heath who's stayin' over at shall draw the first long breath I've taken since last night."

An anxious interval elapsed before the brick was pried out and the case slipped beneath it. Nevertheless the feat was accomplished, and triumphant, relieved, happy Sylvia set about

preparing dinner. What a long while Marcia was staying upstairs! Why, one could change a dozen pillow-slips in this time.

"I guess they are tighter than I remembered them. I needn't have rushed as I did," pouted Sylvia. "What can she be doing?"

hen at

M rela returned, some anded Syl

via. "Is Mr. Heath worse?" "Worse? No indeed. What made you think so?"

"You look fussed." "Do I? You'd be fussed had you wrestled with those pillow-slips as I have," was the reply. "Either the pillows have swelled or the cases have Urbana, Ill.—Put your blood in the shrunk frightfully. Well, they are on now, anyway."

"Come and get dinner then. I'm starved. My walk has made me hungry as a bear. You must go out this afternoon, Marcia. It is a glorious day and you need to be pepped up.'

To her surprise, Marcia demurred. "Thank you, dear, but I think I won't go out today. I'd rather sit here and read."

"Nonsense, Marcia! You're getting middle-aged and lazy. You'll lose your nice slim, hipless figure if you don't watch out."

"I'm too tired to go out."

"The air would rest you." "Not today, dear," Marcia said with finality. "I have some mending to do and lots of other little things that I have been saving up for a long time. Since I prefer to stay, why don't you tramp up the shore and see 'My Unknown Lady'? She is beautiful and you haven't seen her yet."

"I'd love to-if I cannot coax you to go out."

"You can't. I'm adamant on not stirring out of this room."

"Well, if your mind is made up to that extent, I suppose there is no use in my trying to change it. I would like to see the boat."

"I'm sure you would. Stay as long as you like. There will be nothing to do here. Mr. Heath will probably sleep and in the meantime I shall get my sewing done."

As Marcia spoke the words, her mind was busy.

So Sylvia had not stirred from the kitchen on the previous afternoon! The theft of the jewels must, then, have taken place during the night.

Nevertheless, she was puzzled, for she had no memory of finding anything awry when she came down at sunrise to lay the fire.

When had the gems been taken, and who had taken them? No wonder she craved solitude to ponder the conundrum! This, however, was not the paramount reason she desired to be

Despite the enigma of the jewels; despite the mystery surrounding Stanley Heath, deep in her heart someed to overcome the prejudice against thing that would not be stilled was singing-singing!

CHAPTER VI

In the meantime, the throng of neighbors Sylvia had precipitately left in the village post office had received their mail and reached that anticipated interval for gossip which never failed to be stimulating.

Clustered about the counter loitered the standbys.

Zenas Henry was speaking: "A mighty fine little girl-that Sylvia," commented he. "A high stepper! We'd oughter tie her down to Wilton so'st she won't go back west. She's too pretty to be spared from the Cape.'

"I figger you'd have trouble keepin' her here," rejoined Sam Nickerson, the postmaster. "She's got a beau in her home town. Had a letter an' a box of candy from him today. Same writin' an' same postmark on both of 'em, I noticed."

"Didn't by any chance see the name, did you, Silas?" Eleazer Crocker in-

quired. "Wal, come to think of it, it did eatch my eye. You know how such things will. Fuller, he's called. Horatio Fuller."

"Horatio Fuller, eh?" Eleazer repeated, "Kinder high soundin'. Wonder who he is? From Alton City, you say."

Silas nodded. "That was the address."

"Never heard of the place," Capt. Benjamin Todd put in.

Thoughtfully Zenas Henry stroked his chin. "If everybody knew where all the blasted places in the country were, what use would they have for maps? 'Twould put the map-makin' folks clean out of business. Say, Ephraim," inspired by a bright idea, "you're the mail carrier. You'd oughter be primed on the location of places. Where's Alton City?"

"Alton City? Hanged if I know. To hear you talk, anybody'd think 'twas my job to tote round the country deliverin' letters in person at the doors of every house in the United States."

"But you must have some notion 'bout geography. Ain't you got no pocket atlas nor nothin'?"

"I may have a small map somewheres; I carry most everything," Ephraim grinned. With deliberation, he began to disgorge upon the counter the contents of his many pockets.

"Ought to be in my breast pocket," thrusting his hand inside his pea-coat. "My eye! If I ain't forgot that telegram!" he abruptly exclaimed. "The station-master at Sawyer Falls gave it to me when he handed out the mail. It clean went out of my mind. It's for "The Widder's."

"Hadn't you been wool-gatherin' you might 'a' given it to Sylvia to take back with her. She was here only a little while ago," Silas Nickerson said. "I know it."

"S'pose I was to take it over," Elisha Winslow suggested eagerly, "I'm willin"

"Fur's that goes, I can carry it," Capt. Phineas Taylor piped. "Now, there's no use in all you fellers volunteerin'," Eleazer Crocker asserted. "I'm goin' straight over to Marcia's, as it happens, soon's I've et my dinner, an' I'll take the telegram."

out his hand.

Early afternoon found Marcia alone in the Homestead sitting room. Sylvia had gone up the beach. Stanley Heath was asleep; and at last the delicious interval of solitude which the woman coveted was here.

The crowd fell back.

The basket at her elbow overflowed with mending, but she had not yet taken up her needle.

She could not work. Try as she would, her mind wandered off into byways too fascinating to be resisted -byways which no matter how remote their windings, invariably led her

back to Stanley Heath. In retrospect she lived over again every incident, every word, every look that had passed between them, until she came to the barrier of the unknown which her fancy bridged with intricate rainbow-hued imaginings. She twisted possible explanations this way and that and would contentedly have continued the pastime had not Eleazer Crocker knocked at the door.

Eleazer could not have chosen a more inopportune moment to drag her back to earth.

With a frown and a deep sigh, Marcia went reluctantly to let him in. "Wal, now ain't it nice to find you by yourself!" was his greeting. "The kitchen looks cozy as can be. Where

was you settin'?" "I was in the front room, but perhaps we better drop down here so I can listen in case Mr. Heath should

call.' "Anywhere you say. Wherever you are suits me.'

"I'll just run in and put the screen round the fire and get my mending,' Marcia replied a trifle uneasily. "I'll be right back."

Left to himself, Eleazer smiled a smile of satisfaction. The kitchen was warm, Marcia was alone and apparently not busy. Could circumstances be more propitious? For-

tune certainly was with him. Today, this very afternoon, he would take his future in his hands and put to her the question he had so often determined to put.

When Marcia came back, he was

When Marcia Came Back He Was Primed and Ready to Begin His Declaration.

primed and ready to begin his declara-

"Weather's been fine, ain't it?" he started out.

Marcia took up her sewing. "Do you think so?" questioned she, raising her brows. "Seems to me we've had lots of rain and fog."

"Wal, yes, now you mention it I do recall a few thick days. Still, spring is comin'." "I'd like to shingle the south ell this

spring," announced Marcia, giving a disconcertingly practical twist to the conversation. "How many shingles do. you suppose it would take?" Elegzer frowned. The dialogue was

not proceeding along the lines he had

mapped out. "I'd have to reckon that out. It's a good notion, though, to make the ell tight. That's what the birds are doin'. They're gettin' their nests built an'

kinder pickin' out their mates." "I did not realize you were so much interested in birds, Eleazer," Marcia exclaimed. "I have a fine bird book I must lend you. It's in the other

room. I'll fetch it." Springing up, she disappeared. "Drat it!" murmured Eleazer. "Could anything be more exasperatin'? An' me neither knowin' nor carin' a hang whether a bird's a robin or a sparrow." He wandered to the window. "Oh, heavens, who's this comin'? If it ain't 'Lish Winslow! Now what in thunder does he want, buttin' in?"

Eleazer threw open the door, Before he could speak, however, Elisha puffing and out of breath

bawled: "Where in the name of goodness did you put the engine-house key, Eleazer? Whimple's hen house is afire an' we've hunted high an' low for it."

"My soul an' body," Eleazer gasped. "I clean forgot to leave it. Must be in my pocket."

Wildly he began to search. "You're a fine head of the fire department, you are!" roared Elisha. "If you'd put your mind on town business 'stead of on Marcia Howe, we'd all be better off. Traipsing over here to see her in the middle of the day, palmin' off that telegram as an excuse. You better go straight back to the village fast as you can leg it an' carry the key with you," went on the accuser. "Don't wait for nothin'. I'll explain With an air of authority, he held

matters to Marcia." "But I've got to see her. I've got

to speak to her private," protested the wretched official. "I want to give her somethin'.'

"Give it to me. I'll hand it to her." Elisha's extended palm was not to be ignored.

"This - this - telegram," quavered Eleazer. "I ain't had a chance to-" "Do you mean to say you ain't given

her that telegram yet?" "I was intendin' to. I was just

about to when-' "Wal, of all the-" words failed Elisha. "Here, give it to me," he commanded. "I can be depended on to deliver messages if you can't. I'll see she has it. In the meantime, the best thing you can do is to hoof it to town quick's ever you can.'

"Ain't you comin'?" "I? No. Fire's ain't in my line. Long's Marcia's here by herself an' ain't busy, I'm goin' to pay her a call," Elisha grinned. "I've got to deliver the telegram."

"You might be needed at the fire."
"I shan't be," was the calm reply. "Not unless there's somethin' criminal about it.

"It might be arson."

"I'll take a chance on it startin' from Dan Whipple's cigarette. In fact he owned as much. Now, hop along, Eleazer, else the whole conflagration will be out 'fore you get there.'

The unlucky fire chief had no choice. "Drat It!" raged he, as he strode

off across the sand. "Drat it! Ain't that just my luck!" Either the book for which Marcia searched was not to be found or she was in no haste to return to her

awaiting suitor. Whatever the explanation, her absence lengthened from a few moments

into a quarter of an hour. In the meantime Elisha, like his predecessor, was formulating his mode of attack. Might not this be his own golden opportunity?

Before another snatched the prize from him: before Heath with his yacht and his monogrammed silken garments recovered his strength, he would put his fate to the test.

He strolled up to the stove and, standing on the hearth with his back to the fire, rocked back and forth on his heels reflectively. As he did so, a brick beneath his

feet rocked with him. Elisha looked down. He saw it was quite loose. "That thing's goin' to trip up some-body some fine day," commented he.

"It oughter be cemented." Producing his knife, Elisha pried the brick from its place. As he lifted it out, a handkerchief came with it disgorging at his feet a

flat, blue leather case. If the sheriff's eyes bulged when he caught sight of it, they all but popped from his head when, egged on by curiosity, he pressed the catch on the

Quick as a flash the whole situa-

tion clarified in his mind. These were the widely heralded Long Island jewels; and the thief who had stolen them was here beneath this roof!

box.

It was as plain as a pikestaff. Hidden by fog he had escaped in his boat and inadvertently run aground at the mouth of Wilton harbor. Of course Marcia did not know.

Even though a friendship existed between herself and Heath, she was unquestionably ignorant of the nefarious means by which he earned his Far from cherishing anger or resentment toward the person who exposed his villainy and prevented her

principled adventurer, would she not regard her rescuer with deepest gratitude? Elisha's head whirled. Nevertheless, confused though he was, it was clear to him he must not

from sacrificing herself to such an un-

make a mis-step and neglect to perform his official duty with dignity. Heath was ill. There would be no danger of his leaving the Homestead at present, especially as he had no suspicion the jewels had been discov-

The best plan was for him to return to the mainland; get his badge and handcuffs; find out what formalities such a momentous event as an arrest demanded; and return later

and round up the criminal. He did not dally. Carefully putting the gems back where he had found them, he placed the telegram upon the table and went out, softly closing the

door behind him. It flashed into his mind that as the tide was coming in it might be well to borrow Marcia's boat and row back to shore.

This would serve two purposes. He

would reach home sooner; and Heath; cut off by the sweep of the channel, would in the meantime be unable to escape. Never had Elisha rowed as he rowed that day! The dory fairly leaped through the water. Reaching shore, he

ment, he set out for home. He was almost at his gate when to his consternation he saw Eleazer puffing after him.

sprang from it and dragged it up on

the sand. Then, trembling with excite-

"You didn't make much of a stop at The Widder's, I see," jeered he. "No. Had other business," came crisply from Elisha

"You 'pear to be kinder stirred up,

'Lish," Eleazer commented. "What's

the matter?" Elisha determined upon a sudden and bold move.

"Say, Eleazer," began he cautiously, Did you ever see a man arrested?" "Wal, I dunno as I ever did-not really. I've seen it done, though, in the movies."

"That oughter be up-to-date an' proper. Just how was the proceedin' put through?"

Thoughtfully Eleazer regarded the

toes of his boots. "Wal, near's I can recollect, the policeman went up to the criminal an' grabbin' him by the arm says: 'You villain! I've got you now. Scram!'"

"I s'pose the policeman wore a badge an' carried handcuffs." "Oh, law, yes. But what's the game? What do you want to know for?"

Furtively Elisha glanced up and down the empty road and after peering over his shoulder, he dropped his voice to a confidential whisper and hissed:

"'Cause I'm goin' to make an arrest -a big arrest! I've tracked down the thief that committed the Long Island burglary. Moreover, I know this very second where the jewels are. I'm goin' to phone the New York police I've got their man," he concluded. Eleazer's cunning mind worked

quickly. "I don't know, 'Lish, as I'd do that," he cautioned. "In the first place, you might be mistook in your calculations an' not only get yourself into hot water but make the town a laughin' stock. Furthermore, was you wrong, you might get sued for defamin' the

accused's character." "I ain't wrong. I'm right." "Wal, even so, I'd move careful," urged his companion, "Most likely there's a reward out for this criminal. Why split it with a host of others? Why don't you an' me divide it? I'll help you land your man, since you're a bit—" Eleazer, fearing to offend, hesi-

tated, "-a bit out of practice 'bout arrestin'." The advice was good. Elisha, shrewd in his dealings, instantly saw the ad-

vantages of the plan proposed. "Wal, mebbe 'twould be better if I didn't let too many ignorant city chaps in on a big thing like this," he conceded pompously. "You an' me know what we're about. I figger we could

handle it." "Sure we could. We can put it through in first-class shape. First you must change your clothes for your Sunday ones. A black frock coat's what you really oughter wear. Then you must pin your sheriff's badge on your chest where it'll show good an' plain. Be sure to bring along your handcuffs, 'cause you're certain to need 'em with an experienced criminal such as this. He'll have a gun an' put up

a fight." Elisha paled and a tremor twitched.

his lips. "That needn't concern you none, though. All you'll have to do will be to steal up behind him, put your pistol 'twixt his shoulder-blades an' shout:

'Stick 'em up!'" "I ain't got no pistol. I ain't fond of fire-arms. In fact, I don't know's I ever shot off a revolver in my life." "Wal, I have. I've shot dozens of skunks."

"You might lend me yours."

workin' very well right now. It's kinder rusty. Furthermore, I'm out of ammunition. "That wouldn't matter. I ain't cal-

"I s'pose I might. It ain't, though,

culatin' to fire it." "But you'll have to." Elisha's mounting disapproval changed

to consternation. Turning, he faced Eleazer. "Say, Eleazer," he faltered, "s'pose we was to make a deal on this thing. S'pose, for the time bein' I was to take over your job an' you was to take over mine. S'pose you did the arrestin'? You seem to know a sight more 'bout how to manage it than

"You put on the badge; you tell the thief to stick 'em up; you put the pistol 'twixt his shoulders, or wherever you think 'twill do the most good; an' you snap the handcuffs on him. I'll see you get full credit for it. Meanwhile, if there's a fire or an undertakin' job, I'll manage 'em somehow."

Eleazer shook his head. "That wouldn't do, 'Lish, no way in world," he objected. "We can't go swappin' offices voted us by the town. Folks wouldn't like it. Was I, a common citizen, to shoot the criminal, I'd likely be hauled up for murder. I'm willin' to stand by you to the extent of goin' along air keepin' you company; but you must be the one that bears the brunt of the job. You ain't told me yet none of the details of this business. If I'm goin' to help you, I'd oughter be told everything about it. Who is the criminal? An' where is he? An' how'd you come to get track

of him?" Alas, the questions were the very ones Elisha had hoped to escape answering. Nevertheless, he knew of no way to evade his confederate's curi-

Lesson for February 23

PEOPLE BEFORE PROPERTY

LESSON TEXT—Luke 8:26-37.

GOLDEN TEXT—No servant can serve two masters; for either he will hate the one, and love the other; or else he will hold to one, and despise the other. Ye cannot serve God and mammon.—Luke 16:13.

PRIMARY TOPIC—Jesus With His Friends in a Storm.

JUNIOR TOPIC—Jesus With His Friends in a Storm.

JUNIOR TOPIC — Jesus WITH AND
Friends in a Storm.
INTERMEDIATE AND SENIOR
TOPIC—Sympathy or Selfishness?
YOUNG PEOPLE AND ADULT
TOPIC—Human Welfare Before Financial Profit.

After his teaching by the parable of the soil and the lighted candle, Jesus exhibited his credentials, enforcing his teaching by demonstrations of his mighty power.

1. Jesus Calming the Storm (vv. 22-

5

In this miracle he demonstrated his power over nature. 1. Jesus asleep (v. 23). While the

disciples were sailing the ship the Master fell asleep. 2. The frightened disciples (vv. 23, 24). The storm seems to have been an unusual one. These sturdy men were

used to storms, but as their ship was being filled with water they awoke Jesus with their cry of fear. 3. Jesus rebuked the wind and water (v. 24). At his word there was a great calm. We can with confidence

put our trust in Jesus Christ. 4. Jesus rebuked the disciples (v. 25). After rebuking the raging elements, he turned to the disciples. He did not rebuke them for waking him, but for their lack of faith.

II. Jesus Casting Out Demons (vv. 26-39).

In this mighty act Jesus' power over demons was demonstrated. Demon possession was in that day, and it is today, an awful reality. The characteristics are often similar to cases of insanity, and many are called insane, who are really demon-possessed.

1. Jesus met by the demoniac (vv. 26-29). This poor man's suffering was dreadful. He abode in the tombs without clothing. At the sight of Jesus he made an outcry and fell down before him and besought him not to torment him. There is no doubt in the mind of demons as to the reality of

a place of torment. him, "What is thy name?" His purpose was to bring the real man to consciousness, to enable him to distinguish between himself and the demon who held him. The answer shows that the man thought his case was hopeless. He said, "Legion," which meant that many demons had entered

into him. 3. The demons' request (vv. 31, 32). They asked permission to enter into a herd of swine.

4. Their request granted (vv. 32, 33). ast why this was done we do not know. Since Jesus did it, we must believe that it was right and wise. 5. The effect upon the people (vv.

a. The keepers of the swine went and made it known in the city and country.

b. The people made investigation. They saw the man sitting at the feet of Jesus, clothed and in his right mind, and heard the testimony of those who had seen what was done.

c. The multitude besought Jesus to depart from them. How sad it is that in the face of the mighty works of Jesus men will not open their hearts

6. The request of the healed man (vv. 38, 39). He desired to be with Jesus. This was natural and right, but his responsibility was to go home and show to the people there what great things God had done for him. III. Jesus' Power Over Disease (vv.

43-48). Jesus heals a woman with an issue

of blood. Observe: 1. Her helpless condition (v. 43). She had been a great sufferer for twelve long years (Mark 5:26).

2. Her faith (v. 44). Her faith was demonstrated by pressing her way through the thronging multitude.

3. Her confession (v. 47). She thought furtively to get the blessing, but Jesus had her make a public con-

4. Christ's words of encouragement (v. 48). He told her that it was her faith, not her touch, that saved her, and bade her go in peace.

IV. Jesus Raises the Dead (vv. 40-42: 50-56).

1. Jairus' request (vv. 40-42). His only daughter lay dying. He besought Jesus to come to his house. 2. Jairus informed of his daughter's

death (v. 49).

world.

3. Jesus' assurance (v. 50). 4. The skeptical mourners (51-53).

5. The daughter raised (vv. 54-56).

A Harsh Word To be silent, to suffer, to pray whenever I cannot act, is acceptable to God. A disappointment, a contradiction, a harsh word received, and endured as in his presence, is worth more than a long prayer.

Our Relation to God

Vice and virtue chiefly imply the relation of our actions to men in this world: sin and holiness rather imply their relation to God and the other

Science of Health By Dr. Thos. S. Englar

CHILLESS CONTRACTOR OF THE CON

PNEUMONIA—Concluded.

Do you look upon pneumonia as merely something to avoid?

Considered as an illness, that is correct-but it does not necessarily apply to pneumonia as a subject for brief reading in a health column.

Doubtless your sole interest in the topic is how to avoid the disease, or keep your children from contracting it. On this point, we can only advise each one to learn and follow the rules of health, keep strength and vitality- which includes that vague quality known as "resistance" (to bacterial infection, of course)—at the highest possible mark. There is no 'specific" preventive, but the sturdy, healthy child is not so likely to "catch" pneumonia; if he does, he avoids complications and gets well in due course.

As noted last week, there are two main types of pneumonia. The distinction cited then, and repeated now because it rests upon a difference easily apparent, is that one type of the disease (lobar p.) leaves, upon its termination by crisis or lysis, no enduring damage or mark upon the lung tissue itself.

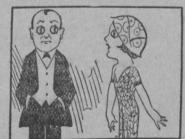

The other type of the malady (broncho-pneumonia) is often also called interstitial pneumonia, because it especially involves the supporting tissue framework of the lung, the cells between the air-cells. This form of pneumonia often "drags on" much longer than the other kind and leaves, upon its somewhat indeterminate conclusion, damage in the form of scars, large or small, single or multiple, in the substance of the lung. In these scars may develop later a condition called bronchi-ec-tasisholes in the lung-but that is a story for another day.

Broncho-pneumonia may be caused by any one, or several together, of the common bacterial enemies of man: the same organism that causes a "boil," for example, or the so-called influenza bacillus. It frequently follows, in childhood, such diseases as measles or whooping-cough. In this respect, as stated last week, it differs from lobar pneumonia which, typical-2. Jesus' question (v. 30). He asked ly, is caused by one, certain organism, the pneumo-coccus, and which runs a well-charted, fairly predictable

> The single point, however, which we hope may stick in your mind in connection with this matter is that there are First, pneumonias which cause no permanent damage to the lungs and leave their victims "as good as new" except for a somewhat thickened pleural membrane. Secvarieties of pneumonic infection which, in the very nature of the disease process, damage the lung structure, in some degree permanently, predispose to immediate complications and later chronic conditions, weakening the lung and increasing its liability to tuberculous and other infections.

Do not insist upon your doctor's telling you, when he first diagnoses pneumonia, just which type is at work in the chest affected. The differences are not always apparent by his second visit, or even during the first week. You know how difficult prophecy is for the scientific weatherman of today. It is just as difficult for the scientific physician, even though he calls it by another name, prognosis.

Civilization Is Based on Iron, Writer Asserts

We do not know the exact date of the Iron age, but it probably occurred when some Bronze age genius happened to build a big fire against an exposed bank of the red colored earth call iron ore. After the flames had died out, writes Dr. Thomas may suppose that this neolithic Edison poked around in the cold ashes

M. Beck in the Chicago Tribune, we and found a few pellets of iron and was shrewd enough to deduce the connection between these and the ore and During the 5,000 years more or less

that have fallowed this discovery iron has become the backbone of our material civilization. The reason is not difficult to find. It is good all-purpose metal. It is not the most resistant, nor the lightest, nor the hardest, nor the most readily worked, nor the easiest to refine, nor the most plentiful; its value lies in the fact that it possesses to a moderate degree all of these desirable attributes. Moreover, iron and its alloys are capable of being modified in such ways as to show an astonishing range of metallic properties. For example, it may be prepared in such an active form that it bursts into flame on contact with air, or it may be made resistant enough to withstand the action of boiling acids.

Iron is found in nature in the form of several different ores, the most common of which is hematite, a mixture of iron oxide with sandy impurities. The ore occurs in extensive deposits in various parts of the world, the most economically important ones being around Lake Superior, in Lorraine, and in northern England. The world's available supply of ore is so extensive that some of the richest deposits, which happen to be a little too far away from coal mines or steel buyers, are not exploited.

Smart Dogs

In Chicago two scientists made an intelligence test of a dog, using a device called psycho-galvanometer. It proved, they said, that the dog had as much sense as a twelve-year-old child. That will be no startling announcement to dog lovers. Most of them will declare the machine ought to have shown that the dog has more sense | sir?" than most human beings of any age. A better comparative demonstration would prove that (1) a dog will not eat when he is not hungry. (2) A dog will relax and rest when he has nothing to do. (3) A dog is true to his instincts and profits by his experiences; he doesn't do a thing that got him into trouble the first time. In most of these tests the average human being would make a poor showing.-Detroit News.

Stork Holland's Popular

Member of Bird Family The most popular bird in Holland is the stork. Storks spend only the summer with the Dutch people, and they fly to the warm south when the autumn comes, according to a writer in the Montreal Herald.

The same pair of birds will return to the same nest for years, and it is thought to be a very lucky thing to have storks nesting on or near the house. Often the chimneys in Holland are made with special flat tops on which the storks can make their nest. In country districts farmers will put

up an immense wooden structure with a platform on the top. Here the storks make their nest. They are tall and stately birds, their

beaks being moderately cleft and destitute of a nasal furrow. Grown-up storks are pure white with the exception of the black quill feath-

ers of the wings, the scapularies, and greater wing-coverts, and the red beak. legs and toes. They are about three feet, six inches in length, and when erect their heads are about four feet from the ground.

History of Taxation

Taxation has had a long history and the meaning of taxation has undergone shifts as taxation itself has changed. Tribute in Greece and Rome was an exaction laid by the conqueror upon the defeated and was one of the chief sources of supporting both Greece and Rome. Cicero in one of his writings spoke of taxation with horror as something that might take place in Rome if things kept on going from bad to worse. But tribute in one form or another lingered on until in the modern state it gradually made way for taxation of free people imposed upon themselves to carry on public activities. Careful study of taxation shows gradual evolution through the centuries from the idea of tribute into the idea of taxation.

No News to Him

It was late in the evening, and he was tired of being accosted by the many street hawkers. The last straw came when a flowerseller stopped him with "Snowdrops,

"I always knew it did," he snapped, and strode on .- Stray Stories Maga-

Locked Curbs Tested in London to Aid Traffic

London.-Three miles of one of the main streets in the east end of London is to have pedestrian guard rails along the length of it in one of the undertaken by the ministry of trans-

The experiment will, in addition to the guard rails on both sides of the road, have pedestrian crossings and traffic light signals all interlocked to guard every road crossing of importance.

"Jaywalking" and the thoughtless stepping into the road from the footpath thus will be prevented. In the three-mile stretch of road, one of the busiest and most dangerous in the east end, pedestrians will thus be kept off the roadway except at pedestrian crossings.

It will also have the effect of allowing vehicles to proceed nearer to the curb and is expected to facilitate the smooth flow of traffic.

OLD CUSTOMER

A film actor gave the name of a clergyman as reference in a business transaction. The merchant phoned the clergyman and asked for particulars concerning the financial standing and reliability of his proposed customer.

"Indeed," said the clergyman. "I can give you no guarantee; I have merely a casual acquaintance with the

"That's strange," said the merchant. "He told me that he attended your church pretty regularly."

"He does," returned the clergyman. "He always gets me to marry him!"-Stray Stories Magazine.

Quintuplets Draw Many U. S. Visitors Toronto, Ont .- Visitors to the

Dafoe hospital, home of the Dionne quintuplets at Callander, spent nearly \$1,000,000 in Ontario from June to September, it was estimated from figures released by the Ontario tourist bureau.

During the four month period 380,000 persons visited the famous girls, and 95,076 automobiles parked around the hospital. The Ontario department of highways received \$74,000 from motorists, and Ontario business benefited to the extent of almost \$1,000,000.

Of the nearly 400,000 visitors at the hospital during the summer almost 95 per cent were from the United States.

YOUNG DEMOCRATS TO MEET.

The mystery of what position Senator Millard E. Tydings will take on presidential candidates when he addresses the state-wide convention of the Young Democratic Clubs of Maryland on March 5, at the Lord Baltimore Hotel in Baltimore is causing considerable speculation in party cir-

The senior Senator from Maryland and Cordell Hull, Secretary of State, will be the only speakers at a dinner which will bring to a close the one-day convention of the Young Demo-

While it is reported Tydings will speak in favor of President Roosevelt, whom he has frequently criticized for his New Deal policies, the Senator himself refuses to divulge what his attitude will be, insisting he has not yet "thought out" just what he would say concerning Roosevelt."

"I expect to dwell on both the Re-

publican and Democratic past record and point out what I consider the good and bad in both," he stated, "Hitherto I have been somewhat critical of both the Republican and present Administration record, but I have not thought out exactly what I

will say at the convention." The address which Secretary Hull will make, also is causing much speculation in Democratic circles. Arrangements are being made to broadcast it over a national hook-up, which strengthens the belief of many that the Secretary of State will voice the Administration's attitude on import-

ant pre-election matters.

Several thousand young Democrats are expected to attend the convention in Baltimore, according to Lawrence B. Fenneman, President of the Young Democratic Clubs. Every county in the state as well as the six districts of Baltimore City will be represented.

Reservations may be made at \$3.00 per plate, at the Club's headquarters, 303 Maryland Life Building, Balti-

WALTER SAYS IF GEORGE DID IT, HE CAN DO IT.

A George Washington story of about the same calibre as the hatchet and cherry tree story, is, that Washington once threw a silver dollar across the Rappahannock river de-

veloped this week.
So, on a bet, Walter Johnson, the once famous baseball pitcher, who

once famous baseball pitcher, who says "if George Washington did it, I can," will undertake the throw on Saturday, the 204th. anniversary of Washington's birth.

The "if" used, may interfere with a decision, if Johnson fails, for there is only traditional evidence that Father George made the throw. It is said that there were no silver dollars in Washington's time.

4 HEAD OF HORSES, black horse, 8 years old, weighs about dun mare, 7 years old, works under the hand with checks, weighs 1100 lbs.; black mare,18 years old, weighs 1400 lbs, works anywhere; brewn mare, 11 years old, works under hand with checks.

6 HEAD OF CATTLE, 3 Holstein, 2 will be fresh

-22-PEACH CROP OUTLOOK NOT SO FAVORABLE.

The horticultural department of the University of Maryland, states that results of the cold and snow are not yet fully known, so far as the peach crop is concerned, and the future of late Spring freezes is still to be met. Orchards in the Hancock region are said to have suffered severely, in some cases a complete loss; but there is still hope for a fair crop, taking the mountain area as a whole. Likely the same outlook applies to the Pennsylvania orchards.

Man's professions seldom match with his practices.

PUBLIC SALE
