THE WHOLE WORLD IS TOPSY-TURVY BUT KEEP COOL! THE CARROLL RECORD A SOUND HEAD ON A SOUND BODY-EVERYBODY'S JOB.

\$1.00 A YEAR

VOL. 46 NO 51.

TANEYTOWN, MD., FRIDAY, JUNE 21, 1940.

COMMUNITY LOCALS

This column is not for use in advertis-ing any money-making program, fair, sup-per, party or sale. It is intended for news, personals, and such matters as may be of community interest. Churches, LoJges, Societies, Schools, etc. are requested to use our Specal Notice Department for money-making events. Churches are especially given free use of our Church Notice Column, for brief no-tices concerning regular or special ser-vices. Larger events will be cared for elsewhere in our columns.

Mrs. Flora Yingling, Hagerstown, is spending several weeks with Misses Jane and Margaret Yingling.

Miss Marie Little, Washington, D. C, spent the week-end with her par-ents, Mr. and Mrs. David Little.

Basil Crapster is visiting friends at Princeton, East Orange, N. J. Bronxville and White Plains, N. Y.

Mrs. Edgar H. Essig was taken to the West Side Sanitarium, York, Pa., on Monday, for treatment and observation.

Mrs. Mary E. Crapster, Prof. and Mrs. Waltersdorf and son, John spent several days last week at their cottage along Monocacy.

Wirt Crapster is attending the Maryland Christian Endeavor Con-vention held at the First Presbyterian Church, in Baltimore.

Mr. and Mrs. George Hafer, of Chambersburg, Pa., were visitors at the home of his brother, Rev. L. B. Hafer and wife, last Sunday.

Mr. and Mrs. Luther Garber and Mr. and Mrs. Augustus Crabbs motor-ed to Reading, Pa., and attended the Moose Convention over the week-end.

The Taneytown H. S. Alumni Asso-ciation will hold their banquet June 22, at 6:30, at Sauble's Inn. A dance will follow at Big Pipe Creek Park.

Dr. and Mrs. James McAllister, of Puerto Rico, and Miss Mary McAl-lister, of Gettysburg, called on Mrs. Stott and Miss Anna Galt, on Sunday.

Mrs. Mary Mowbray-Clarke, New City, New York, spent the week-end with the Misses Amelia and Elizabeth Annan to attend the wedding of her

Mr. and Mrs. Omar G. Brown, of Kane, Pa., are visiting the former's mother, Mrs. Joseph W. Brown, and sister, Mrs. Mervin E. Wantz, East Baltimore Street.

Rev. Irvin Morris, pastor of the Taneytown Presbyterian Church, is attending a Rural Ministers Conference which is being held this week at State College, Pa.

Mr. and Mrs. Henry Burch and son, William, Morrison, Ill., spent from Monday until Wednesday, at the home of Mr. and Mrs. William Feeser., Mrs. Burch is a niece of Mrs. Feeser.

Westminster Truckman Dies from Injuries Received.

Kurgy Barbour, of Tyrone, who was removing his household goods by truck to Westminster, on Wednesday afternoon, fell from the rear of the truck while going up the long hill just before entering Frizellburg. He was taken to Frederick Hospital in C. O. Fuss & Son Ambulance where he died from his injuries.

ANOTHER FATAL ACCIDENT

The accident is supposed to have been caused by a shifting of the load. Barbour was a Westminster garage employee, and was 27 years of age. Death was due to concussion of the brain.

The Frederick County Medical Examiner says that the investigation of the cause of the accident could not be completed until officer N. W. Scarbor-

DON'T INVITE TROUBLE! Some Carroll Conntains are inclin-ed toward predicting "hard times for our country as a result of the European war and the success of the German forces. There is no use in inviting trouble by predicting it! The government will attend to pre-paredness for defense as all means of the measure; and the prepare for business as usual, by in-

viting it. War or no war, good sense in ex-penditures should be practiced at all times. We should not become panicky through encouraging imaginary fears.

SOME MARYLAND ROAD IMPROVEMENTS.

Annapolis, June 18-In line with de-

mands of Governor Herbert R. O'Conor to do everything possible to bring Maryland's roads into first-class condition as rapidly as possible, the State Roads Commission has an-nounced to the Governor awarding of a contract involving \$274,773.75 for construction of five and three-quarter miles of roadway along the Easton-Trappe relocation, from Peachblossom Creek to Trappe. The contract in-volves grading, drainage, concrete surfacing and bridge construction.

Governor O'Conor was informed, too, of the placing of contracts for more than three million gallons of bituminous material for use on roads in all the six districts of the State. Immediate application for the material will be started, so that the roads in question may be in fine shape for summer travel.

The Commission also authorized construction of a treated timber bridge on a timber pile sub-structure over upper thoroughfare at Deale's Island. The total length of this bridge will be 1,331 feet.

Somebody should report to Gov. Mr. James R. Ditzler and Miss Myrtle I. Collison, both of Taneytown ville bridge and the great need for were united in marriage on Monday connecting the Taneytown and Fred-afternoon. June 17, at the parsonage erick highway, at Keymar. parsonage | erick highway, at Keymar.

CONSCRIPTION PLANS STATED BY PRESIDENT.

Important Questions to come before Congress.

President Roosevelt is preparing a system that will be presented to Con-gress in the near future, under which boys of 18 to 20 years—the exact ages not yet being determined on-would be subject to conscription for what he terms a "universal service" which can be put into action at once, if war should come.

This does not mean, it is explained, that all who may be called would be called to become active soldiers, as many would be needed for service back of the fighting lines.

ALLIES.

The Maryland Branch of the committee to defend America by aiding the Allies has issued the following statement:

"The apparent defeat of France in no way changes our program. It in-tensifies it. As long as there is one outpost of freedom still keeping up the fight, that is the first line of American defense. The British Commonwealth of Nations is continuing the fight undaunted. Britain is now the fortress of western civilization. Our problem, therefore, is to keep the lifelines to Britain open and at the same time to make ready our own defense.

The above communication has just been received from National Headquarters

quarters. The following telegram was sent by William Allen White, June 18th: "We need more energy and wisdom than ever in this fight to defend America by aiding the Allies. De-featism of any kind is the first menace. It is a menace to democracy on this continent. We stand firm; we shall fight on for democratic liberties and to prevent war from coming to America. Please pass the word to your friends and be of good cheer. Democracy still is militant." We in Maryland shall continue the

campaign.

Every expression of opinion coming from you will carry its weight. Therefore continue wiring your Senators and Congressmen and the President that despite the apparent defeat of France, we wish all possible aid to the democracies continued and in-

> JESSIE L. SNOW, Executive Secretary.

MORE ABOUT THE BRIDGE A User and Farmer Also Says it is Unsafe. Editor The Record :-

Those letters about that Big * Pipe Creek bridge are what we have been wanting, because there is going to be a bad accident there, and it is coming

closer every day. Now those two farmers and that bridge user told the truth, only it eems to me they don't make clear just what is the worst danger, and it is a bad one. When piers are built of wood they ought to be built of strong So heavy timbers and be bolted together with iron bolts two or three inches in diameter and should have eighty or one hundred tons of stone inside to stand against flood pressure.

but another on edge on top of it and a third one also on edge on top of that. That is all there is to stand the rush of waters.

Balance a heavy square timber or Balance a heavy square timber or round log on end on top of those boards that are on edge, and then put a bridge on top of those balanced square timbers and logs. I ask, isn't that a criminal way to risk the lives of the people and children of Carroll County? All that is done to make this strength is to make a triangle this stronger is to make a triangle with more pieces of boards also on edge and put a few wheelbarrows full of stones in them to hold them down. And the boards are not bolted together; they are just nailed. If peo-ple using that bridge don't believe what I say, let them get out of their cars and see for themselves. Now all along Big Pipe Creek there

Now all along Big Pipe Creek there are trees leaning over the water be-cause most of the soil has been wash-ed away from under them, and they are ready to fall. That washing away is going on all the time, so each day is nearer the time when they will fall. There are so many of those lit-tle piers no bigger more stronger than tle piers, no bigger nor stronger than a snow plow, and so many of those upright square timbers and logs that a tree can't get through them and it will easily push all that fool con-

stream. Then suppose a car full of Carroll County people comes along and the bridge collapses, and they are all drowned or killed? What verdict will Carroll County jury find against the person or persons responsible for that sort of an accident—or a worse one? I say it will not be an acci-dent and should be given a worse

name. Now, nearly every one in Taneytown has to use that bridge so I say the Mayor and Council are partly re-sponsible if they do nothing. Why don't they do what "Bridge User" advises and take those pictures and make those written notes and that can be sworn to. Then, that meeting

REPUBLICAN CONVENTION MEETS NEXT WEEK. -11---

Wilkie and Hoover are among the Possibilities.

The European war has been mono-polizing the big headlines in our daily newspapers, to the extent that U. S. National politics has been given a set back, unusual in the history of party-

So, the fact that the Republican National Convention will meet in Philadelphia, next week, has almost been overlooked, except by candidates and others most interested, and this may be all the better-to have less parad-But here is how those playtoy piers are built. They are built of one thickness of little lengths of two inch boards. You take a short two inch board, say twelve inches wide, tion would not be as noisy as that of the Democrats, for the excellent reas-on that it does not have an army of Federal official leaders to "whoop things up."

Wendell L. Wilkie, president of the Commonwealth and Southern Utili-ties Corporation, has become an important figure in the Republican contest for nomination as candidate for President. Although Maryland was carried by Dewey in a light vote, Wilkie now appears to be in the lead, the opinion having grown that Dewey lacks mature experience.

Although Herbert Hoover has not announced his candidacy, and is not a contestant, Hoover sentiment is growing, as the man with widest experience in world affairs, and espec-ially with the situation in Europe where he was during the World War as an official of the United States. The Philadelphia Correspondent of the Baltimore Sun says in Thursday's issue, concerning the National Republican convention that will be held next week:

"Republicans now assembling in Philadelphia for their national con-vention next week are conceding the lead in the Presidential nomination race to Senator Robert A. Taft, Ohio, and Thomas E. Dewey, New York District Attorney—but they are tak-ing mostly about Wendell L. Wilkie, struction down stream. Now suppose this happens when it is dark, and a person can't see the dent Herbert Hoover.

In the case of Wilkie, president of the Commonwealth and Southern Corporation, who has been sweeping onward like a forest fire in recent weeks, the situation has developed into a full-blown "stop Wilkie" move-

ment. In Mr. Hoover's case it is still a George Klee, matter of quiet, unexcited talk; talk first account. Maurice E. matter of quiet, intextruct tark, tark to the effect that if the convention gets into a snarl over the other ad-mittedly leading candidates, the party could do no better than turn to the orly living Berublican with for the cased, received order to transfer only living Republican with four years' experience in the White House —Herbert Clark Hoover. The last Daniel L.

Dridge should be there. I think that as soon as these pic-tures and notes are made, the Mayor should send copies to Governor O'Con-or so that he may know how his send. or so that he may know how his road commissioners are risking the lives of the people. If those pictures could be the people. If those pictures could be of workers buttonholing delegates and the people is the provide the p

HEAVY UNEMPLOYMENT

BENEFITS PAID. Baltimore, June 18 .- Payments of

unemployment benefits by the Mary-land Unemployment Compensation Board continue heavy, the aggregate for the first half of June being \$460,-639, compared with a total of \$554,-901 for the ortigo month of April

901 for the entire month of April. New claims received are decreasing slowly, the number for the week end-ing June 15 being 2,153, which was 98 less than the figure for the preceding week, while the total of all claims last week-new and renewed-was 29,616. This was an average of about one hundred claims a week below the record for the ten consecutive weeks preceding.

The Board is revising its regula-tions, and it is expected that the work will be completed in time for the mailing of copies to employers before the next quarterly reports and con-tributions are due—July 20.

THE CHAMBER OF COMMERCE MEETS MONDAY NIGHT.

W. Frank Thomas, of Westminster, member of the State Roads Commission, will be guest speaker at the reg-ular monthly meeting of the Chamber of Commerce, Monday, June 24, at 7:30 Refreshments will be served. A full attendance of members is requested, as a number of important questions will be discussed.

THE 40th. ANNIVERSARY OF CORNER-STONE LAYING.

Sunday, June 23 will mark the 40th anniversary of the laying of the cornerstone of St. Paul Lutheran Church, Newville, Pa., Rev. Robert C. Benner, pastor. There will be a special service at 2 P., M., Eastern Standard Time on that date.

The speaker for this anniversary will be the Rev. Gould Wickey, Ph. D., D. D. of Washington, D. C., who is the Executive Secretary of the Board of Education of the United Lutheran Church in America Lutheran Church in America.

TANEYTOWN DISTRICT CON-TRIBUTES \$275.46 TO RED CROSS

In the recent drive conducted throughout the United States by the Red Cross for relief in Central Europe, Taneytown District contrib-uted \$275.46. The officers of the uted \$275.46. The officers of the Taneytown Branch of the A. R. C. desire to express their gratitude to the many solicitors who so willingly gave of their time to make this canvass a success.

Also to express their appreciation for the checks from Piney Creek Church of the Brethren, Chamber of Commerce, Kiwanis Club, Daughters of America, Rebekahs, Pythian Sisters, Legion of Honor and Blue Ridge Rubber Co.

GASOLINE FOR 2000 YEARS.

Within the United States there are resources of Petroleum, oil shales, coal and other bituminous materials ample to provide gasoline at the present rate of consumption for 2000 years a spon of time equal to that of the Christian era since the birth of Christ according to experts of the U. S. Geeological Survey.

If the petroleum industry contin-ues to develop the nation's natural resources at the present rate, yielding to government more than \$1,000,000,-000 in gasoline taxes annually, by the end of 2000 years the accumulated value of such gasoline taxes will exceed the present value of all lands and buildings on the entire surface of the world, points out the Maryland Petroleum Industries Committee.

"During the next two centuries the industry will generate, at the present rate of \$1,000,000,000 in gasoline taxes annually, a volume of tax revenue equivalent to the present value of all taxable lands and buildings in the entire United States," concludes the committee. -22-

TANEYTOWN, UNOFFICIAL, 1210.

An unofficial report from the census gives Taneytown a population of 1210. An increase of 272 over the last census. This enumeration is strictly within the corporate limits, and leaves while the corporate limits, and leaves perhaps 50 living practically in the town but outside of its limits. This is the resident population. The "working" population is likely about 200 more. Scarcity of homes for rent reduces the resident population.

and 10,000 pilots.

thrown on a screen, as in the movies, it would be a good idea, for then everyone would see the danger for here but it is manned only by local himself.

I also think that the life insurance companies and car insurance companies should be asked to send their offi-cers to the meeting, so that they may know about the losses they are threat- | rived." ened with.

ANOTHER BRIDGE USER AND FARMER.

Evidently, citizens of the Bruceville vicinity are very much in earnest regarding the bridge at that place over Big Pipe Creek.

Personally, we know but little about the danger there, but Taney-town has a big interest in this road being made safe. and the suggestion by the writer of the bridge letter in this issue, that the officials of Taneytown get busy on the subject, seems

very much to the point. This is the third letter published by The Record, on this subject. We have no information as to whether they have been brought to the attention of the State Roads Commission, which of course would be the proper thing to do; but we do not consider it the business of The Record to do so.

EUROPEAN WAR NOTES.

AVERAGE STATE SALARY \$1,198.

The average State employee re-The average State employee re-ceived \$1,198 in salary for the fiscal year 1939, a survey made by the State Comptroller's office showed today. The Maryland pay roll for that period lists an average of 9.565 employees who received a total of \$11,466 932 in compensation from Federal and State funds. The inclusion of part-time employees on the pay roll was responsible for the low average salary.

The big things you can see with one eye closed. But keep both eyes wide open for the little things. Little things mark the great dividing line between success and failure.—Forbes.

Random Thoughts

ASK OURSELVES WHY?

If we do not know why we always do a certain thing in a cer-tain way, it may often be a good idea to ask ourselves why? It is a good habit-this questioning ourselves. It's about the same as thinking it over, or working out a puzzle.

New inventions come out of a New inventions come out of a thinking mind. to be demonstrat-ed by skill and trial. Some "get along" as we say, or are "good managers" because they do a lot of questioning themselves and others, and thinking of future possibilities. We form wrong habits mostly

We form wrong habits mostly because we do not ask ourselves right questions, or do not know what "right is."

We see some of our neighbors prosper while we do not. Sometimes the answer is clear. There are differences in soils and in op-portunities. Health and strength

play their part. But, the rule is, we do continu-cusly enough seek helpful information by asking right questions, and we lask the "know how."

Mostly, its the careless "what's the use" fellow who gets left be-hind—or at least the trouble is somewhere in his own household. P. B. E.

of their country, and still fighting.

FRIDAY, JUNE 21, 1940.

"PUT NONE BUT AMERICANS ON GUARD."

We believe that if the whole truth could be known, majority public sentiment in the United States does not so much lament the plight of the Allies-Great Britain and Franceas it opposes dictatorships and the defeat of true democracy over there. That pure militarism and warfare should take the place of ballots and hidden mines, destroy self-government.

the Indians and tried to hinder the butter." The result of the ruthless colonists striving to establish civilzation, which we call in our history the French and Indian wars that lasted for about ten years, and brought forward George Washington into public favor. Later, we had our "Boston Tea Party" and "taxation until the surrender of Lord Cornwallis.

True, the French helped us in this revolutionary war, but France actually hated England more than it loved us. So, as our A. Conan Doyle, the great author of detective stories used to say to his friend "My Dear Watson we must be very careful in our real bottom of causes and effects: and most of all, to do first things first. And just now, we believe that the big first thing for this country to do, is to get good and ready, as soon as possible, to defend ourselves, and let Europe take care of themselves.

nent can be truly free and

everybody what they want, and when taxes seems inevitable-the moderate they want it-and "free of cost." To tax increases recently proposed in which we add "What do you know Congress are regarded as just the beabout that?" And what is a profes- ginning. The standard of living, as sion, and who is a .'professional?"

W. J. H. MILITARY ECONOMY.

Happenings that affect the dinner pails, dividend chesks and tax bills International are problems inseparable from Local Welfare.

What this country is beginning to do is to change from a peace economy by force of arms, bombs, tanks and to a military economy. That involves readjustments which apparently few as yet thoroughly understand. When Away back in the early history of the Nazis came to power in post-war America, the French were an ally of Germany the slogan was, "Guns, not

application of that slogan was a steadily declining standard of living, and according to unprejudiced authorities, a serious decline in the general standard of public health. More and more of the national income went for state purposes-less and less was without representation" and had to left in the hands of the people. To a fight the British for independence lesser extent, all the European nations, which have been on a war footing for many years, have undergone

the same experience. And now it looks as if we are to undergo it too. This doesn't mean that the United States will follow the same road as the Nazis. We are a far richer country, possessed of resources which no cent of our national income (which is many for military purposes. But it to salute it. does mean, unless the commentators are wrong, that all factors in our naserious sacrifices to the end that we

status as a free people-so far as we will have fewer luxuries, fewer not entertain, and which violates their dollars to spend as individuals, in orhonest-then we will fight. We do der that we may have more airplanes, not want more territory nor to mix up tanks, battleships, and the other Implements of defense. A number of important columnists, ah's Witnesses will be faced with led by influential Walter Lippman, have been criticizing the President for what they regard as a lack of frankness in informing the people just how (2) to send them to "sinful" public much they will have to sacrifice to create an adequate defense establishment. And the events of the last few weeks have certainly produced plenty of food for grim thought. The Presierful sentiment that is not majority, dent has greatly revised upward his original requests for defense appropriations, and Congress seems pracprofit for themselves through battling tically united in favor of putting his general plan into effect. It has become obvious that defense isn't just a

COMPULSORY SALUTE.

"I pledge allegiance to the flag of the United States of America, and to always been done by business men. the republic for which it stands; one nation indivisible, with liberty and justice for all."

In 1935, at Minersville, Pa., 12year-old Lillian Gobitis and her 10year-old brother William were expellhave them the best and cheapest we ed from school for refusing to salute the American flag and speak the Henry Ford's word is as good as a pledge which most of America's 26 million school children recite daily. As members of a sect called Jehovah's Witnesses, the Gobitis children

contended that the flag salute and pledge were contrary to their religion, which had taught them that the Second Commandment forbade of every individual. National and such things. Other young members of Jehovah's witnesses had run into similar difficulties in the public schools of 10 other states, but the Gibitis case was carried to the high-

> est courts in Pennsylvania. As a first step, the witnesses succeeded in winning a Federal District Court injunction against the expulsion action in the Minersville school board. They succeeded again when the board appealed to Pennsylvania's Third Circuit Court of Appeals and when that court upheld the injunction. And finally, when the Minersville board decided to carry the Gobitis case to the United States Supreme Court, the Witnesses welcomed the prospect, for they had long clung to the hope that the nation's highest tribunal would pass favorable judgment on their stand and thus clear matters for their sect in public schools throughout the country.

Last week the Supreme Court, in its last session before the summer recess, dashed the Witnesses' last hope. The flag is the "symbol of our nation-European power can equal. There is al unity," the Court held in an 8-to-1 deductions," if we would get to the no question now of devoting 60 per decision delivered by Justice Felix Frankfurter. It means that which, as they interpret it, they do deenest religious convictions."

Motion Picture of Heart

Shows Beginning of Life A motion picture of the origin of life-the formation and first-beat of the heart of an embryo chickenwas shown recently at an assembly of the International College of Surgeons.

The film, photographed through a microscope, provided the surgeons an exciting drama of the most mysterious of all the phases of their work. It covered a 10-hour interval, from the time the incipient chicken's heart, little more than a thin-walled tube, first began to twitch, until blood circulation started. It showed the spasmodic twitching become a pulsating; the blood cells and blood vessels begin to form, and the heart gain strength until it was able to pump life fluid through the embryonic blood vessels

Dr. Bradley Patten of the University of Michigan's anatomy department, gave the demonstration. In a paper he explained that he and his associates had cut a tiny window in the cell of a fertilized egg and exposed the embryo, the size of a pin head. This preparation was transferred to a glass chamber and supplied with nutrient fluid.

The first flutterings of the tube, later to become the heart, are not rhythmic or orderly. Different parts of it merely contract and there are periods as long as five minutes when there is no activity. Then comes a series of fibrillations and gradually, after two or three hours, the twitches seem to combine, although mostly on the right side of the tube After another hour, scattered areas of the left side begin to con-Then right and left sides tract. twitch in time with each other. Still there is no regular rhythm to the

movements as a whole. Three hours later there is a change, so gradual it is impossible to tell when it starts. The motions are starting at one end of the tube and rippling in waves to the other end

Then the blood starts to form. At first there is just fluid; then a few corpuscles appear within the heart tube . They shuttle back and forth at each beat. The beating increases, the blood cells become more numerous. At last the embryonic heart is pumping blood into embryonic arteries. The chick is 40 hours old. Circulation has started.

Wisconsin Liars Club

Has Tough Competition Burlington, Wis., world capital of tall-story tellers, faces competition. Liars of Osage, Okla., have challenged Burlington fibbers to a "lietelling session with no holds barred."

"To prove we rate in the cham-pionship class," wrote Glenn G. Cates of the Osage team, "here's one an Osage kindergarten pupil tells:

"'I was getting dinner one day when I accidentally dropped a very sharp knife. It cut our old cat's tail off up close, clean as a whistle. He looked so exposed and embarrassed that I decided to build him a new tail of wood. I threaded the matching stub threads on the wooden job and screwed it on. The cat looked proudly at it a moment and then scampered out into the yard.

New Data on Mars

Study of photographs of Mars taken when it was at its shortest distance from the earth-approximately 37,000,000 miles-has enabled scientists to arrive at definite conclusions. An expedition was sent out by the Pulkovo observatory and Leningrad university. It worked in the summer of 1939 at Tashkent, capital of the central Asian Uzbek republic, where atmospheric conditions are favorable, and took more than 500 photographs of the red planet. It has been determined that Mars has quite a dense atmosphere, in which something resembling clouds and mists are formed. Study of the "mainlands," the dark see tions, showed that they are regions covered with sands containing ferrous oxide, explaining the planet's orange coloring.

Singing in the Bathtub The habit of singing in the bathtub, despite the wear and tear on the neighbors' nerves, has been recommended to save the wear and tear on bathroom linens. Scientists at the American Institute of Laundering approved of bathroom yodeling after research showed that it takes the place of a too-vigorous "The silent bather is rubdown. most likely to seize a bath towel, stretch it as it never should have been stretched, and seek new vigor by a strenuous rubdown," the insti-tute reported. Proper Storing of Crop Is Important Item.

By C. H. NISSLEY

Seeds of many vegetable crops held over from one season to another may be used this year if they have been properly stored, but they should be tested for both vitality and germination before planting time, if growers follow the advice of vegetable gardening department at the New Jersey College of Agriculture. Germination tests of seed purchased from seedsmen are now compulsory in many states and must appear on the package in which purchased. There is no way of deter-mining when the seed was produced or how it was stored and handled by the dealer.

Cucumber, lettuce, muskmelon and tomato seed usually retain their vitality for a period of five years. Beets, cabbage, cauliflower, celery, pumpkins, squash, and watermelon are good for four years; eggplants, three years; onions and peppers, two years; and parsley, one year. These figures are approximate, for the seed loses its vitality more rapidly in some sections than in others, and it has been observed that humidity and temperature also have an influence on stored seed. High temperatures, 86 degrees Fahrenheit, or above, with an excessive humidity cause rapid deterioration of most seeds. Seeds of different vegetables vary in their structure and consequently in their keeping qualities. Some seeds have a hard impervious covering while others have a thin, easily penetrated one.

Mice, rats, weevils and other insects attack stored seeds. One of the most common methods of storing seed is to cover a fair-sized wooden box with one-fourth inch galvanized hardware cloth. This wired cloth is tacked on the outside of the box to keep rodents from entering.

Seed should be examined occasionally for the presence of weevils and other seed insects and fumigated with carbon bisulphide or other recommended chemicals if there are signs of insects present. A dust containing high percentages of either pyrethrum or rotenone may be used instead of the fumigation treatment although the gas is more effective.

Foods Raised on Farm

Contain Necessary Iron The role that many farm foods play in keeping everybody healthy is common talk but perhaps one of the clearest pictures of this relationship is found in the story of iron. The amount of iron required in the body in relation to its importance to life might well be characterized by the phrase "little, but oh For iron is one of the the-scene workers in the maintenance of healthful blood which as everyone knows is so important to good health. Briefly, it helps in the building of hemoglobin, the oxygen carrying portion of the red blood cells. If the diet is insufficient in iron, there is likely to be inadequate hem-oglobin formation and the condition known as nutritional anemia results. Usually persons who are anemic lack pep and energy. Where the farm foods step into the picture is in the fact that many green leafy vegetables furnish a large part of the daily iron needs. Spinach for one is high in iron and is easy to Dandelions are considered grow. another fine iron source. Other garden greens furnishing iron are endive, kale and broccoli It is well to remember that although liver and kidney are considered the richest sources of iron, if everyone demanded these foods all the time the price of liver would probably increase to the point that those persons suffering with pernicious anemia and needing to eat liver would be unable to afford it. For this reason, it is well to look to the greens, egg yolk and many of the dried fruits as iron sources. Eggs are comparatively inexpensive right now.

WASHINGTON .- Adolescent Mauna Loa on the island of Hawaii, the world's largest active volcano, has again split its armor-crust at the "seams" and is pouring forth a cascade of molten lava 200 feet wide and several hundred feet high. This new major activity, called "Overdue" by Dr. Thomas A. Jaggar, government volcanologist, is not likely to do serious damage, for this time the lava streams are flowing south toward the uninhabited Kau desert, on the side of the mountain opposite the city of Hilo, which was threat-ened by the last important eruption, in December, 1935.

"Mauna Loa, which means 'long mountain,' is a huge dome of hardened lava built up through the ages from the floor of the Pacific ocean, and rising so gradually from its enormous base as to belie its height of 13,675 feet," says the National Geographic society.

Erupts Every Four Years.

"It is the most extensive of the five major volcanic mountains on the island of Hawaii. Its slightly higher 'twin,' Mauna Kea, has been dormant throughout historic times. Two-thirds of the way down Mauna Loa's southeastern shoulder, is Kilauea, another famous active crater which is accessible by road.

"Mauna Loa frequently fumes and frets in a small way, but it puts on a big show only about once every four years. During the last century it poured out more lava than any other known volcano on earth. In action, it stages an unsurpassed spectacle of colorful violence. Steam vents shoot out feathery clouds.

"Lava boils up from the floor of its huge crater but it has never been known to spill over the top. Scarlet spots appear where gases blow off the 'lid' of hardened lava. White-hot rivers of molten rock gush forth in flaming fountains from rifts and fissures at elevations between 7,000 and 13,000 feet extending northeast and southwest from the summit, sometimes for several miles. Lava rivers have on rare occasions reached the sea, when warning hisses were followed by steam explosions that flung skyward jets of pebbles and clouds of sand. Glowing smoke columns from the eruption vents are sometimes visible from the hills behind Honolulu, across more than 150 miles of ocean.

Has Aided Islanders.

"Eruptions of Mauna Loa are seldom dangerous to human life or property, because the lava streams usually have cooled and 'frozen' into rock before they reach villages or cultivated areas. After lava has decomposed, it forms soil of great fertility; fields of sugar cane are found on islets of rich earth between new flows of hard rock. Mauna Loa is forested about threefourths of the way up, except where led lav reach far below the tree line. "Hawaiian natives used to propitiate Pele, the goddess of fire who was believed to control Mauna Loa's activity, with offerings of berries and suckling pigs. Today, as long as towns and farms are not threatened, eruptions are actually welcomed: they provide a sure-fire tourist attraction, and give scientists new chances for study. "Hawaii National park is a 'threering' volcanic circus with sideshows: Mauna Loa's summit crater, Mokuaweoweo, is the least visited because it is most inaccessible; beside the fire-pit of Kilauea stand a hotel, a camp ground, a museum, and a laboratory 'clinic' for observing the mountains' brows, whether cool or fevered; the third section of the park surrounds the world's vastest known dormant volcanic crater, Haleakala, on the island of Maui. "The round trip by foot or muleback to the summit of Mauna Loa from Volcano house on the rim of Kilauea crater can be made in three days. Rest houses are provided for the overnight stops."

By L. L. STEVENSON

Reward: The woman was old. In her arms were two large bundles. She looked worried as she stood waiting for a Broadway bus. Another woman, also gray-haired, approached and she smiled. She could get on the bus all right, she explained to the newcomer, if someone would help her merely by dropping her fare into the box. The other woman graciously replied that she would be glad to oblige. The woman with the bundles handed her five pennies. Just then the bus came along and they both got aboard, the woman with the bundles hurrying past the fare box to the nearest seat. The other woman dropped in her nickel and the five pennies. And with that, there was such an explosion on the part of the bus driver that her face turned scarlet. seems that it is against rules and regulations to drop pennies into a fare box, only nickels or dimes being acceptable.

Street Scene: The shopping hours on Fifth avenue . . . Crowds pour-ing in and out of the huge stores Women, their arms laden with bundles, stopping to do window shopping . . . Tenement urchins darting here and there, their griminess in contrast with the neatness of the shoppers . . . A traffic cop inquiring, "Wanna get killed?" as a jaywalker strolls into the street . . . A good-looking boy walking along and paying no attention to passers-by . . . A lovely lady crosses his path just in time to catch her heel in the cuff of his trousers . . . Both take a tumble . . . The boy actu-ally blushes . . . But the girl carries off the incident in the grand manner.

. . .

Display: The young woman who looks after the branch telegraph office in a midtown hotel is accustomed to all sorts of questions and requests but when a man, evidently a guest in the hotel, came up and asked for glue she was stopped, since such wasn't included in the supplies. The man insisted that he had to have the glue and incidentally mentioned that he was a big shot from Peoria and had just returned from a trip around the world. Her interest aroused, the young woman finally asked him why the need of glue was so urgent.

"Well, you see," explained the Peoriaite, "one of the labels on my grip has come loose and I want to paste it back on."

. . .

Floral: The other evening during the intermission of "Reunion in New York," Edith Meiser witnessed a scene between an ornamental memthe dear sex and a man's horse. It seems that the gal was enjoying a cigarette with her escort and the horse nosed over to sniff her corsage. Seeing that the horse was interested, she unpinned her lovely bunch of gardenias she was wearing and offered them to the animal, which proceeded to eat them seemingly with enjoyment. Miss Meiser wondered about the escort's feelings in regard to the matter but from where she stood they didn't seem to be very important. . . . Useful: On my desk is Larry Nixon's "American Vacations," published by Little, Brown & Co., which is a fitting companion for his "Vaga-bond Voyages." Packed in its pages is valuable information for anyone planning to go away for a few days or a few months, hiking, camping, motoring, seafaring, or by train. Not only does Larry list the attractions each state has to offer, but also gives costs. There is especial appeal for those of moderate means since many instances are cited of how a vacation dollar may be stretched.

Physical Clue to Insanity Revealed by Experiments

An experiment giving the first physical clue to the nature of insanity, indicating its seat is in the ends of nerves, has been announced recently by the American Philo-

sophical society. The novel experiment was reported by Dr. Carl Caskey Speidel, professor of anatomy at the University of Virginia, who discovered how these endings are affected by metrazol, which along with insulin, is used in the new shock treatment that has cured many hundreds of human | rubber, battery boxes, roofing macases.

Dr. Speidel gave the metrazol to tadpoles, whose tails are so transparent the nerves, built on the human plan, are visible.

The chemical caused prompt damage to the tadpole nerves, includ-ing destruction of the tendril-like nerve endings. If the tadpole metrazol was stopped in time, new endings grew from the nerves and formed new bridges. The result was a realignment of nerve channels.

This rerouting of nerve channels is a physical confirmation of the brain geography explanation of insanity given by the discoverer of the shock treatment, Dr. Manfred Sakel, who, from watching recoveries of nearly 1,000 shock-treated persons, concluded mental trouble is probably due to confusion in the geography of the countless nerve channels in the gray matter of the brain.

The shock, he said, seems temporarily to extinguish these channels. Afterward new connections are established, and often the new channels are in a less confused arrangement, with the result that sanity reappears.

New Ways Discovered To Aid Home Comfort

Few people realize how many different factors affect living comfort which any house offers its inhabitants. So say investigators of the problems of home comforts, first in the laboratory and then in a typical three-story frame house built for the purpose at the University of Illinois engineering experiment sta-

The station frankly admits it still hasn't found out all there is to know about ways of keeping warm in winter and cool in summer without spending too much money for fuel or refrigeration. It lists, however, in a bulletin some of the variations in details of home construction which, singly or in combination, may make the calculation of a proper heating system for year-round comfort wholly different in one house from what it is in another. The list includes not only generally recognized points such as wall thicknesses, pitch of roof, type of roof covering, proportion of total window area to wall area, but details such as character of soil and character of internal

wall coverings. A house built in a region of dense, clay soil will lose more heat, particularly in the case of a bungalow resting directly on the ground, with no cellar, than one standing on a sandy or loamy soil, according to the tests. The tests have further proved that there is no advantage in high-ceilinged home design, while there is a definite disadvantage of increased costs, longer stair flights, and greater heating expense in winter. Modern methods of construction and proper internal air circulation make it possible to keep just as cool in summer in a house with an eightfoot ceiling as in the old-time 15foot ceilinged room. Attic exhaust fans for drawing the warm air out at the top of the house and letting cool air rise up from below; awnings; the use of double windows all the year round; better roof insulation as well as wall insu lation; and the use of blower fan to circulate cool air throughout the house have been proved sufficient in small homes to maintain indoor comfort even in the hottest weather.

Utah Develops Gilsonite Ore. New Raw Material

PROVO, UTAH .- Gilsonite, one of he newest and most rapidly expanding mining products, is contributing to Utah's income as the raw material is found in this state in quantities large enough to be of commercial value, mining leaders here report. Five companies operate mines and refineries in the state to handle the hard, dried oil ore. It is a black, shiny, tarlike substance which is used in the manufacture of products such as paints, lacquers, varnishes, terials, phonograph records, printer's ink, tires, floor and linoleum compositions and road materials.

Most recently found use of the rare product is that of making cores, facings and molds in foundries. As new uses are found for gilsonite, produced in quantity only in Utah, the new industry will see greater expansion, company officials say.

Gilsonites are classified as selects, melting points from 268 degrees and up; and seconds, melting points from 300 degrees to 450 degrees or higher.

British Conduct Lectures

On Aircraft Recognition LONDON.-Identification offriendly and hostile aircraft, important enough now, would become even more important if large-scale raids on this country were to take place. officials pointed out.

Intelligence officers at fighter command stations are busily preparing those most concerned in identification-searchlight and anti-aircraft crews and members of the observer corps-by giving them lectures.

At one station the intelligence officer, who holds daily lectures, has made an intensive study of German and British aircraft peculiarities. He illustrates his talks with scale models of British and German fighters and bombe

For 61 Years as Hobby DUBLIN, OHIO .- Almost everyone nowadays holds a record of some kind, including Fay Eberly of Dublin.

Eberly started keeping a record of births, deaths and marriages in this little town when he was 12 years old in 1878. He has also branched out, recording items of near-by villages, in his old, cover-torn ledger. His record book is frequently consulted by children of former Dublin

residents. "It's just a hobby of mine," he says. "I get lots of fun looking the records over."

Thieves in Final Insult

Take Chief's Revolver WAHOO, NEB. - Police Chief Percy Blair thinks it was downright impudent.

While he was waiting at the city hall, where his wife was attending a lodge meeting, burglars drove up to his house in an automobile, took wearing apparel valued at \$150 and \$13 in cash

The chief was off duty, so he left his revolver at home.

The burglars got that, too.

Woman Taxi Driver

Calls Job Enjoyable SHELBY, OHIO.-Maintaining day-and-night taxi schedules is "enjoyable work" to Mrs. C. L. Miller, one of the country's few woman cab drivers.

Mrs. Miller's cab service began a year ago when she decided she wanted a new home. Her husband gave up his factory job to build it, and she opened a cab company.

Now Mrs. Miller, who has a five-year-old son, finds it easy to keep up a 500-mile weekly driving average.

MAJOR CARL B. MCDANIEL of the Army Air Corps could feel the canvas brush his shoulders as it shut him off from his passengers, from the light-from everything except the instrument panel in front of him. Just beyond him and the canvas, Major McDaniel could hear his co-pilot, Captain W. A. Math-eny, shift expectantly. They were on the last leg of a history-making flight.

Major McDaniel spoke "We'll be over the field at 11:52." No word came from the passengers in the plane, conscious of the terrific burden imposed on McDaniel. Pre-cisely on schedule the plane picked up the Langley Field beam, hugged it tight as the huge motors droned out a steady beat.

out a steady beat. McDaniel's eyes never wavered from the all-important instrument panel—from the air speed and rate of climb indicator, from the direc-tional gyro, and from the almost miraculous "artificial horizon," which shows the position of the plane in relation to the ground Out of the plane, grinning, clam-Out of the plane, grinning, clam-Out of the plane in the face of the artificial horizon — and waited. Time hung still for the five seconds that followed. Then came a thump. as that of a car jumping a curb.] The great plane rolled to a stop. Out of the plane, grinning, clam-

Bats at Bat

If birds can't handle your insect problem, you might try filling your lofts with bats. Government scientists recently estimated that the 3.000,000 bats roosting in New Mexico's Carslbad caverns consumed nearly 12 tons of insects nightly, including moths, beetles, flies and mosquitoes. With birds guarding against insects by day and bats on the night shift, your crops should escape without a nibble.

Dairy Employees

Prof. Earl Weaver of the University of Michigan states that on the average it takes 30 minutes a day to care for one dairy cow. This is approximately 180 hours a year, or 23 working days per cow per year. With 24,000,000 dairy cows in the country, this means that more than a million men are needed full-time to care for the nation's cows. It is also estimated that 80,000 men are employed full-time at processing, and 170,000 at distributing milk.

Chinese Seer Predicts World at Turning Point

SHANGHAI. — The world will reach the "crossroads of destiny" by June of this year, according to Mr. K. W. Chang, the famous Chinese seer, who has won a large following by a series of remarkable predictions which he has made in the past few years. These predictions included the

kidnaping of Gen. Chiang Kai-shek, the outbreak of the Sino-Japanese conflict, and the beginning of the present European war.

In 1940, Mr. Chang predicts, the peoples of the world will reach a turning point in history. One way lies salvation; the other a holocaust of "blood, earthquakes and pestilence."

The critical moment, he says, is likely to be reached as early as April. If Hitler is then prepared to give concessions sufficient to make peace with Britain and France, he may rule Germany for another 10 years.

If not, says Mr. Chang, "he and the leaders of other countries who have played with the lives of their subjects will fall into the pit which they have prepared for themselves.'

End Piece: Since New York fishermen are again throwing flies at trout, Milton Berle's story about two brothers who went fishing together seems to fit in. One brother had all the luck, hauling in fish after fish while the other got nary a nibble. The same thing happened the next day. The third day the luckless brother went out alone. For hours he sat in the boat and nothing happened. As he started to row home angrily, a big fish poked its head out of the water.

"Hey, buddy," inquired the fish, "where's your brother?" (Bell Syndicate-WNU Service.)

Must Be Something In His Rabbit Foot

BROOKFIELD, MO. - Leon Norvel, grocery man, is saving the rabbit's foot he had in his pocket recently while attending an entertainment. During the evening he won prizes for being the heaviest man in the audience; having the biggest feet and bringing the largest family. To top it off he was handed the prize that went to the patron in the "lucky seat."

plane in relation to the ground. Major McDaniel completed the conventional problem in orientation, determined what leg of the beam

hundred feet from the airport, a bulb would glow red. The bulb lighted. Swiftly he tuned to another frequency—that of a beacon at the edge of the airport. Again the bulb lighted.

With the swift, sure movements of a master aviator, Major Mc-Daniel scanned the instrument panel, translated its meaning into panel, translated its meaning into action. He kept the speed of the plane and the gliding speed con-hours of flying time.

Out of the plane, grinning, bered Major McDaniel and his crew Smiling broadly in congratuventional problem in orientation, determined what leg of the beam they were riding. The critical portion of the flight was approaching. "It may be a lit-tile bumpy." Major McDaniel an-nounced from behind his canvas curtain. Tenseness mounted in the plane. The Major leaned forward, tuned in a radio receiver Eight from Mitchel Field, N. Y., to Lang-ley Field, Va. For the first time since man took to the air, a pilot had taken a plane from the ground to a specific destination and landed it, without once seeing outside the corners of his own cockpit.

FRIDAY, JUNE 21, 1940. CORRESPONDENCE

Latest Items of Local News Furnished By Our Regular Staff of Writers

We desire correspondence to reach our office on Thursday, if at all possible. It will be necessary therefore, for most let-ters to be mailed oa Wednesd.y. or by Fast Mail, west on W. M. R. R., Thurs-day morning. Letters mailed on Thurs-day evening may not reach us in time. All communications for this department must be signed by the author; not for publication, but as an evidence that the items contributed are legitimate and cor-rect. Items based on mere rumor, or such as are likely to give offense, are not want-ed.

UNIONTOWN.

Mr. Harry B. Fogle attended an executive meeting of the Seminary Board at Gettysburg on Wednesday morning. Mrs. Grace Lansinger, Littlestown,

is visiting her sister, Mrs. Lawrence Smith this week.

Mrs. Joseph L. Haines entertained to a luncheon on Tuesday afternoon in honor of Mrs. B. L. Hume (nee Hettie Haines) Greensboro, N. C. A delicious duncheon was served to Mrs. B. L. Hume, Mrs. Earle Buckey, Mrs. Myers Englar, Mrs. Joseph L. Haines and Misses Charlotte Hume, Marion Francis Buckey, Betty Eng-

lar and Dorothy Haines. Mr. and Mrs. Earl Goodwin and three children, Muskegon, Mich, are visiting Mr. Goodwin's home folks, Mrs. Benton Flater and Mr. and Mrs Charles Goodwin and family.

Dinner guests of Corporal and Mrs H. H. Haines and Miss Doris Haines on Sunday were: Mr. and Mrs. Nich-olas Young, Philadelphia; Rev. and Mrs. E. E. Heltibridle, Grundy Cen-ter, Iowa; Mrs. Addison Alspach and son, Edward Perry, Iowa City, Iowa; Mrs. Grant Heltibridle and Miss Anna Heltibridle, Westminster.

Those who are attending the 18th. annual Rural Woman's Short Course at the University of Maryland, Col-lege Park this week from here are: Mrs. Harry Hager, Mrs. J. Walter Speicher and Mrs. Clarence Lockard. The Uniontown Planning Group No.

The Uniontown Planning Group No. 1 of the Farm Bureau met at the home of Mr. and Mrs. John Young, Friday, June 14, at 8 P. M., with nineteen members present. The meeting was opened with group singing followed by the secretary's report. The dis-cussion leader, Mrs. John Young used the topic, "The Effect the Present War has on the Agriculture Market" which was thoroughly discussed by everyone in the group. After games were played which were in charge of Paul Hull the hostess served ice cream, strawberries and cookies. The July meeting will be held at the home of Mr. and Mrs. Ira Albaugh.

Mrs. Manetta Fowler is spending several days this week with Mr. and Mrs. Mervin Powers, Baltimore.

Mr. and Mrs. Curvin Dubs and son, Merle Dubs, Hanover, called on the-Glennie Crouse family, Sunday. Mrs., H. H. Haines and Miss Doris

Haines, spent Tuesday in Baltimore. Mrs. Walter Hahn, Taneytown, vis-

ited her aunt, Mrs. Alfred Zollick-offer, on Tuesday. Misses Miriam Fogle, Jane Fleagle

MARRIED

MOWBRAY-CLARKE-ANNAN. At four o'clock on Saturday after-noon, June 15th., at the home of the late Dr. Clotworthy Birnie in Taney-Mary Amelia Annan, neice of the Misses Amelia and Elizabeth An-

the garden wedding. The procession passed between a lane formed by the gate, which was covered with pillar roses. The Rev. Mr. Irvin N. Morris of the Taneytown Presbyterian Church united the couple in a single ring ceremony. The wedding march was played by Miss Anna Galt, cousin of the bride, on an organ which had been in the family for many years. Little Eleanor Wollner, of Washington, D. C., the flower girl, wore an embroidered organdie dress and carried a basket hat filled with rose petals. Next the matron of honor, Mrs. Kenneth J. Bullock, sister of the bride, was lovely in a peach lace gown with matching hat and harmonizing bou-quet. The bride herself, a vivcacious gown of white velvet-figured organza. Her hat was white of fine milan straw

SURPRISE BIRTHDAY PARTY TO REV. AND MRS. WM. E. ROOP.

The Meadow Branch Aid Society of the Church of the Brethren and a number of friends surprised Rev. and Mrs. W. E. Roop at the Aid Society rooms at the Roop Club House, on Wednesday at an all-day meeting. Monday, June 17 marked the 50th. anniversary of their marriage. The

couple were probably expecting a passing notice of the event. However among the surprises were the much married folks represented by Mr. and Mrs. Thomas Channel (nee Hambleton), who were married over 54 years and also Mr. and Mrs. Preston Duval with 52 years of wedded

bliss behind them. The following were present: Mrs. Anna Fritz, Mrs. Carroll Roop Rine-Anna Fritz, Mrs. Carroll Koop Kine-hart, Mrs. Harry Babylon, Mrs. Wm. Steele, Mrs. Frank McKinney, the Misses Florence and Myrtle Malehorn, Mrs. Ira Young, Mrs. Ira Dorsey, Mrs Geo. Gonder, Mrs. Edw. Hesson, Mrs. Lester Deardorf, Mrs. Milo Peterson, Miss Lottie Lee Geiman, Mrs. Euge-nic Camera Mrs. Samuel Bare Mrs. nia Geiman, Mrs. Samuel Bare, Mrs. Ella Hively, Mrs. Arthur Naill, Mrs. Geo. Devilbiss, Miss Elsie Sies, Mrs. Ray Fogle, Miss Emma Bixler, all of New Windsor vicinity.

Also Mrs. Ezra Brown, Mr. and Mrs Preston Duval, Mr. and Mrs. Thomas Chennell, Mr. James Hambleton, Miss

Virginia Dickensheets from nearby. Mrs. Joseph Kessler, Mrs. Elizabeth Gill and Mrs. Thomas Wilhelm, of Butler, Md.: Mrs. Calvin Nuroh, of Washington; Mr. John Weaver, of Elizabethtown, Pa.; Miss Leola Eddy, Geneva, N. Y.; also Mrs. Laura Harr, Baltimore; Miss Alice Cecil, Washington; Mrs. Frances Cunningham, New Windsor; Mr. and Mrs. Howard Warehime in whose home the Aid meets during the winter months. Rev. W. N. Zobler, from Lancaster,

an honorary member of the Aid also was present and made a few remarks when Mrs. Roop was presented with a golden engraved thimble and Rev. Roop with a serviceable garment for

The Misses Geiman displayed ex-ceptionally tasteful art in the baking of a huge cake decorated with golden with white icing with suitable mono-grams and gold leaf decorations.

Miss Lottie Lee Geiman decorated the cakes in an exceptional artistic nanner.

The Aid has some sixty members and Mrs.. Samuel Bare succeeded the late Mrs. J. Walter Thomas as the president.

The Meadow Branch Aid has won a number of first prizes for beautiful and perfect quilting work and is quite an interesting group doing a fine soc-ial and helpful service to the community around and about Meadow Branch. -11-

SURPRISE BIRTHDAY PARTY

A Birthday surprise party was held on Sunday at the home of Mr. and Mrs. Wilbur Z. Fair in observance of Mrs Fair's birthday. Games were played and group singing was enjoyed. Refreshments were served on the lawn. Mrs. Fair's aunt, Mrs. Clarence E. Dern, baked the birthday càke.

Those present were: Herb Angell, Madge Angell, Mrs. Carroll Deberry and daughter, Doris; Mrs. Ray Wed-Madge Angen, Doris; Mrs. Ray Wed-and daughter, Doris; Mrs. Ray Wed-dle and children, Donald, Shirley, Peggy Ann, Mary Barbara; Carl Troxell and children Dolores, Fred, Carol Lee, Thurmont; Mr. and Mrs. John Troxell, Emmitsburg; Mrs. Les-lie Fox and daughters, Carman and Doris; Mr. and Mrs. Calvin Troxell and son, Bobby Lee; Mr. Bentzel, Mr. ter, Anna Lee, Rocky Ridge; Miss Naomi Harbaugh, Baltimore; Miss Lottie Troxell, Marine Fair, Mrs. Howard Simpkins, Cape May, N: J. Mrs. Birnie Fair and Thomas Fair, Mr. and Mrs. C. E. Dern, Mr. and Mrs. Wilbur Z. Fair and children, June, Celia, Harold, Doris, Janet, Lois, Margaret and Jean, of town. Visitors in the evening were: Mr. and Mrs. Lester Cutsail, Mr. and Mrs. Wilbur Stonesifer, son Elwood and Doris Mrs. Rice, of town.

COMMUNITY LOCALS. (Continued from First Page.)

Mrs. Joseph Douglass, with a party of friends, was in town, on Wednesday.

Miss Amelia and Elizabeth Annan are spending several days in Washington this week.

2 1

Miss Lillie R. Hoke, of Baltimore, spent the week-end with Mr. and Mrs. Wm. B. Naill.

Mrs. John D. Belt, of Westminster, Miss Ida Magers, of Baltimore, spent Saturday with Mr. and Mrs. M. Ross Fair.

Early Smelting Tool

-11-

Among the relics exhibited at the museum of the Fredericksburg and Spotsylvania National Military park, in Virginia, is a tool for opening old iron smelting furnaces. This was picked up on a farm near the pre-Civil war Catherine furnace. The tool was used to unstop the vent, filled with clay, to let out the melted ore after blasting. The ore then ran into a trough called "the old sow" and from that into smaller trough called "little pigs." Hence was de-rived the name "pig iron." Near the spot where the relic was picked up were fought the Battle of Chancellorsville in 1863 and the Battles of the Wilderness and Spotsylvania the next year.

Twins, Separated Hillbilly Ballads 20 Years, Similar

Odd Case Offers Scientists Doleful Mountain Music Is Interesting Study.

WASHINGTON .- Lois Bailey has spent her life in large cities. Louise ballads from the cabins of the south-Bailey has lived in a small town. ern Appalachians are getting a Yet these identical twins, co-eds at break in the Big Time. Baylor university in Waco, Texas, ment but a fiddle, broomstraws and are so much alike that they are offering science a rare opportunity a banjo have won popularity with to compare the relative importance big orchestras as program spicers. of heredity and environment.

And the verdict seems to be that it's about even-steven—i e., you can take your choice, but you can't tell

Lois and Louise apart. A study of the twins is reported in the Journal of Heredity by Dr. the words and tuns can be traced to Horatio Hackett Newman, University of Chicago's celebrated zoologist authority on twins, and Dr. Iva

C. Gardner of Baylor university. These are a few of the girls' striking similarities:

They look alike. Ask them a question and almost invariably they will answer in unison, in nearly the same words, and in the same tone of voice. Tell them a joke and they'll laugh in the same pitch.

Even the scales can't tell them apart. Fingerprint experts can, but the difference is so slight that it's difficult. They're the same height. Their hair is the same shade.

The twins, now 20 years old, were separated eight days after birth because of the death of their mother. Lois was taken from one city to another by her foster father, a traveling certified public accountant. Louise lived with an uncle, prin-cipally in McGregor, a small town in Texas. They were reunited about a year ago. Authorities felt that Lois, educat-

ed in metropolitan schools, should excel Louise in mental tests. But she didn't. Dr. Newman found, except in arithmetic calculations.

Cripple Finally Exhausts

Federal Agents' Patience ST. LOUIS .- More than 30 times

federal agents raided the home of Sylvester Gaston and in 16 of the raids illicit liquor was found. Gaston, 40-year-old crippled Negro, es-caped prosecution because federal authorities pitied him.

Gaston troubled internal revenue agents once too often, however, and Federal Judge John Collett sentenced him to two years in prison. While Gaston was in court hearing sentence pronounced, police raided his home again and found more liquor.

'Dead' Three Times, but He Is Very Much Alive

FORT WAYNE, IND. — Lindley Baldwin has "died" three times, but he's still very much alive at the age of 78 years. When 15 he was reported to be dead of typhoid fever but he returned to consciousness and health.

A year later he "drowned" but was jogged back to life as his was brought 'body

Eskimo Ruins Hint Continent Time Key A Hit on 'Big Time'

Village Is Believed to Be 2.000 Years Old.

SEATTLE, WASH .- The culture of a lost Eskimo tribe has attracted the attention of archeologists who see boro. in the arctic ice fields an opportunity to reconstruct the past of the

North American continent. Helge Larsen, curator of the National museum in Copenhagen, Denmark, returned from Alaska with news of an Eskimo village, believed to be at least 2,000 years old.

It was buried beneath sand and soil, near Iplutak at Point Hope, at the northwestern tip of Alaska.

Larsen, who has conducted explorations during the last nine years in Greenland, termed the discovery "significant" because:

1. Each house had a central fireplace, a household accommodation lacking in modern Eskimo architecture 2. Dwellings lacked the typical

long entrance passageway seen today in Eskimo structures.

and ornament, and for the first time among the bones of early Eskimos, slender needles—made from bones of birds—were found. They had tiny openings for insertion of thread. Missing entirely were stone lamps, found in most Eskimo dwellings to-

day. The archeological party, consist-ing of Larsen and F. P. Rainey and Louis Geddings of the University of Alaska faculty, found ornamented stone slabs, spearheads, arrowheads, harpoon heads, and oth-

Nearby was a burial ground, and skulls found there clearly indicated the lost people were Eskimos.

The party came across the buried village when they noted a series of unusual depressions on the otherwise flat terrain.

The discovery again raised the question: "When did the mastodons W. Hahn, 3b become extinct?" For several years archeologists have been hoping they will find a village in which there will be evidence of extinct species. When this hope is realized, scien-tists will have an important "missing link" in North America's archeological time table.

Turkish Girls Must Pass **Exam in Military Science**

ANKARA, TURKEY .- The education ministry has decreed that girls must pass an examination in military science before graduation from high school.

Army instructors have been detailed to teach them tactics, sharpshooting and first aid as the first step toward formation of a women's auxiliary corps which, in event of war, would take over the peacetime duties of men behind the lines.

song collectors have been interested in them for this reason for years. But it is only comparatively recently that the sometimes lilting, sometimes doleful music has caught the fancy of the public.

These Southern mountaineers, with their Anglo-Saxon ancestry, are a musical lot, and even the poorest cabin boasts a banjo and a fiddle hanging on the wall, while lots of the songs have been preserved through mountain community singings and dances. Many are in better preservation in the Appalachians than in England and Scotland.

Lore of Indian Alien To Youth of Full Blood

PITTSBURGH.-Kenneth Talchief, 19, full-blooded descendant of the Seneca and Cayuga tribes, never saw a peace pipe, wouldn't camp out because "it's too much trouble" and admits he saw his first Indian ceremonial a few weeks ago. Kenneth, with his sister, Garnette, 18, resides on the North Side here.

"Just because we're Indians,' Kenneth declared, "people expect us to live out of doors, in tents, speak the Indian language and do an Indian war dance every now and then.

"Camping is too much trouble. and although my parents speak Indian. I've never learned.'

Kenneth and his sister vacation anually with their relatives in houses and wear American clothes. But, he explains, "even on the reservation the Indians live in houses and wear American clothes."

Kenneth, who bears the tribal name given to his grandfather because of his height, is an outstanding local athlete.

Is Voter Since 1905, But He's No Citizen! LOUISVILLE, KY. - Morris Rost, 66, voted and argued poli-

tics and exercised other rights of citizenship from 1905 onwards, but when he inquired about an old-age pension he found he wasn't a citizen after all. His first naturalization papers had burned 35 years ago. He promptly sought and received new papers.

How Handelapping Originated

Applause in one form or another is probably nearly as old as civilization. Clapping the hands is among the most natural ways of applauding. In fact "applaud" itself comes from two Latin words meaning to strike together. Nobody can say when the custom began. An untutored child instinctively expresses delight by clapping its hands. The ancient Greeks and Romans applauded by handclapping as well as by snapping their fingers and waving their garments.

World War Ace Gains Second Niche as Hero

LONDON .- Wing Commander William Ernest Staton, boy flying ace of the World war and D. S. O. in this one, was the first air pilot to hold the double distinction.

As a 19-year-old lieutenant in the R. F. C., in 1918, he brought down 28 enemy planes-nine of them in five days.

As wing commander of the R. A. F., he has been awarded the D. S. O., for bravery in operations which included flights over Germany and raids on Borkum, Helgoland, Wilhelmshaven and the Schilling Roads.

Reading Habits Cost

Alien His Citizenship SAN JOSE, CALIF.-Grgo Bogunovic, 48, was denied American citizenship here because he is a steady subscriber to a Slavonic Communist newspaper. He told the court he subscribed to the newspaper because he was interested in a serial story and wanted to see how the yarn ended.

Naturalization Examiner A. S. Hunter remarked that judging from the number of years he had taken the Communist newspaper, the story must be like "Gone With the Wind."

back to town slung over a horse. Not long ago a trainwreck victim was identified as him, but it turned out to be his cousin.

This Couple Really Sails Into 'Sea of Matrimony'

KINGSTON, PA. - A Kingston couple can say they actually sailed into the "sea of matrimony."

Carried to St. Hedwig's church by boat, Vito Wikowski and Jessie Kasak were married while flood waters rose steadily outside. Then they left by boat for a wedding reception at the bride's home.

Grandmother at 29

SALT LAKE CITY .- Mrs. Paul M. Babbitt of Salt Lake City became a grandmother recently at 29. A girl was born to her 14-year-old daughter, Betty, wife of Weston K Keen, 19, a WPA worker.

Animals and Pets Take Readily to Gas Masks

LONDON .- Animals show a great deal less objection to wearing gas masks than men and women do, said the manager of a firm engaged in manufacturing supplies of masks for domestic pets.

Masks for dogs and cats and horses are being turned out in large quantities and are proving a success. Those for dogs and cats are made in eight sizes and can be adjusted in 30 seconds. They are so made that they cannot be shaken off and they are easier to breathe in than the human type. For a horse the inlet valve is as large as a big paint can and they weigh two pounds. Animals wear them placidly.

Large quantities of these masks have been sent to Spain, Poland, Sweden, Belgium and Holland.

MAKE THE MOST OF IT

Pasture is nature's milk-making gift to every cow owner. But grass needs to be balanced with a mixed grain ration to keep cows in good condition and at top production.

as it is to turn the cows out on pasture and give them no grain ration.

For sections where the farmer raises dried up, something extra must be fed his own grain, the Purina Experimental in addition to the mixed grain ration Farm has worked out a special mixed to hold up production. For this job grain ration for cows on pasture. It it is recommended that each cow be makes use of home grains and consists given one gallon of Purina Bulky Las, of 300 pounds of corn and cob meal, morning and night. This feed is very 200 pounds of coarse ground oats, and palatable, laxative, and supplies some 200 pounds of 34% Cow Chow. On of the nutrients that dried-up pastures flush pasture, this is fed at the rate lack. Hardly enough can be said about of one pound to every six pounds of the milk-producing qualities of Bulky milk given by Jerseys and Guernseys Las on dried-up pastures. Fed with the and one pound to every eight pounds regular mixed grain ration the cows of milk given by Holsteins and Ayr- are getting, it does a splendid job.

What farmer, feeding in the winter, shires. As the season advances and would feed his dairy cows hay alone? grass loses more and more of its stim-Few indeed! But it is just as logical ulation, the amount of mixed grain to feed hay alone during the winter ration fed should be increased enough to hold up production.

Heavier Feeding

When pastures become burned and

STRATFORD, CALIF.-Biddy the hen laid an egg weighing 10 ounces. Mrs. Grace M. Williams of Stratford thought it was quite an achievement. The next day Biddy, just to outdo herself, laid an egg weighing 11 ounces. On the third day, Biddy laid the mightiest egg-14 ounces.

Thirty-five ounces of eggs in three days. The average egg weighs two ounces.

War Turns Eyes To Greenland

Comment Is Aroused Over Island's Status Under Monroe Doctrine.

WASHINGTON.-Germany's occupation of Denmark has stirred comment in the Western hemisphere on the status of Greenland because of the Monroe doctrine, which was enacted to thwart "future colonization by European powers" in the New world. The island is separated from northeast Canada by narrow channels.

"Greenland is the only overseas land under Danish influence having the status of a colony," says the National Geographic society. "Iceland has been in effect an independent realm, but recognized the Danish king as sovereign. The Faeroe islands were classed as a 'county' by Denmark.

World's Largest Island.

"Greenland is the largest island in the world," continues the bulletin. "It would require almost three land areas the size of Texas to cover Greenland. If the island could be set down on the United States with its northernmost point on the Canadian border at North Dakota, its southern tip would extend to the mouth of the Rio Grande at Brownsville, Texas. At its greatest width it would spread across the United States a distance equal to that from New York to Chicago. Yet it has only 16,000 inhabitants—400 Danes and the remainder Eskimos.

"The island lies approximately in the same latitude as the Scandinavian peninsula. While Greenland is flanked only by icy Arctic currents, Scandinavia is bathed by the warm Gulf Stream. In midwinter Greenland temperatures range from 50 to 60 degrees below zero. Willows and birch trees grow only from 15 inches to three feet high.

"Mosses and lichens and a few hardy flowers and shrubs spring to sudden life in the summer along the ice-free fringes of coast, but few vegetables except radishes, turnips and lettuce can be grown. Eskimos live on polar bear, seal, walrus, caribou, white whale, narwhal and musk ox, varying this diet with fish and the eggs of the eider duck, the brant goose and gull.

Buried Under Ice.

"A vast ice sheet covers the island. The snows of millenniums have built up a crystal blanket that in places is six or seven thousand feet thick, burying deep valleys and mountains alike. Central Greenland is a huge plateau of snow and ice. sufficient to cover the entire United States with ice many hundreds of feet thick. This tremendous glacier has countless tentacles that extend down into the coast fjords, ever feeding icebergs to the ocean.

"Angmagsalik, a village of several hundred Eskimos and a handful of Danes-a trader, missionary, doctor and a few minor Danish officials-is the only permanent settlement on the European side of Green land. In the summer the flow from glacial rivers centering at Angmagsalik tends to break the ice flow from the north, thus affording the best approach to the coast.

ALWAYS MAKE leaned on the desk." SURE 88

By CARLTON JAMES Associated Newspapers—WNU Service.)

ORRISON smiled as he tapped out the brief message on Mr. Van Nuys' old typewriter: "I don't want

to live any longer and am taking this way out. When you are alone in the world, and old, there is not much use in continuing to live. Please see that I have a simple burial. and do not grieve my passing. (Signed.) Henry Van Nuys.

Morrison read over the lines without touching his fingers to the paper. Despite the simplicity of the message, he had worded it with care and much thought, for it was part of

his plan to make the note sound as much like Mr. Van Nuys as possible. And in this he felt that he had succeeded.

Presently Morrison stood up, leaving the note in the typewriter just as he had finished it.

His eyes traveled slowly around the room, rested for a long moment on the body of the white-haired old man on the floor near the desk. Something akin to a sneer twisted his lips.

"You old fool," he muttered. "And you always rubbed it in because I wasn't as smart as you. Said I was dumb. Well, now we'll see who's the smartest."

Morrison turned away, opened the study door and went out. Fifteen minutes later, he greeted the police inspector and uniformed officer who had responded to his frantic summons

"I'm Mr. Van Nuys' secretary," he explained in a fear-ridden voice.

"I-I found him-in there." He gestured toward the study, and the inspector, followed by his assist-ant, went that way. Morrison followed them, seeming wholly awed and terrified. He hovered about the door while the inspector made his investigation.

The inspector had picked up the gun with his handkerchief and was examining it. Presently he said:

"Get some finger-print equipment up here, Ryan. We might as well make sure."

Morrison smiled to himself. The fools!

They'd find nothing on the gun but the marks of old Van Nuys' fingers. He had arranged that.

Ryan was talking over the phone. Morrison heard him giving instructions, but his eyes were on the inspector.

The inspector had turned to the note in the typewriter and was examining it again.

Ryan replaced the phone and said: "Poor old duffer. His wife died a month ago. They say it affected him pretty badly. Suppose that's what he means by saying when you are alone in the world, and old, there is not much use in continuing to live?"

The inspector nodded absently. He

said "Get the prints of the secretary there and all the other servants. Just to make sure."

"It was I who found him," he said. "In my excitement I probably

"Yes," said the inspector mildly. "you probably did." He turned back to the prints.

"Also, you wrote that death note, Morrison.' Morrison felt a chill.

His mind was suddenly a whirlwind of thoughts. Yet in the chaos, no logical explanation for the policeman's accusation presented itself. His puzzlement frightened him, because it smacked of the unknown. He was about to speak, when Ryan

said: "You mean, Morrison here, Inspector? Guess you're kidding. How could you know that Morrison wrote

a typewritten note? Or who wrote it? The inspector was faintly sur-

prised. "Ryan, I always did say you were stupid. I guess I feel the same way about you that Mr. Van Nuys felt about his servants."

He smiled faintly and Morrison felt the sweat on his brow.

"It always pays to be sure, Ryan. You should learn that lesson first." Morrison only stared blankly. He wanted to speak, to cry out, but his mouth felt dry and parched

and words wouldn't come. A sort of gasp escaped his lips; a horrible terror clutched at his heart. For suddenly he knew; suddenly it was as plain as day. No one but one as careful and metciulous as the inspector-or possibly Mr. Van

Nuys-would have thought of it. The inspector was showing the

prints to Ryan. "You see," he was explaining, "I even tried the typewriter keys and all the keys used in the writing of the death note bore Morrison's fingerprints. I-'

He broke off and leaped forward intercepting Morrison's lunge for the door. Morrison felt a gun in his ribs and a voice that was not the mild, gentle tone of the inspector, though the sound came from the same pair of lips.

When Morrison relaxed the inspector straightened up and glanced at Ryan.

"I guess it's your job now, Ryan. You're at least capable of handling

a prisoner." And Ryan nodded dumbly. He looked at Morrison and both men somehow seemed to know in that moment why it was that their respective employers called them stu-

Strange Japanese Sect

pid.

Linked to Christianity TOKYO.-A comparatively small sect in Japan is attracting atten-tion because of its unusual theories and practices, some of which are linked to western religious origins. The sect has not received support from any recognized Japanese ec-clesiastical or historical authority, but some students have been interested in attempting to clear up several strange factors connected with the claims advanced by the leaders of the group.

One of these unusual factors is a theory advanced by the sect that Jesus Christ died and was buried in Japan.

Proponents of the theory contend that one of the Disciples took

Even Those Over 70 Show Higher Mentality.

SACRAMENTO, CALIF .- Do mental powers begin to wane after humans reach the age of 40 years?

On the contrary, intelligence increases, believe University of California experts, following intelligence tests conducted through the medium of radio by the university "explorer."

Taking the tests were 2,331 men and women with ages ranging from 10 to 90 years old. And the average score for those over 50 years old was found to be one point higher than the group average.

Even those over 70 years old showed a little higher average than for the combined group-one-half point higher. Two persons over 85 years of age who took the tests received grades only one or two points below the group average.

"The results are particularly encouraging to those who are nearing the twilight of their lives," held Dr. Frank N. Freeman of the university staff who conducted the tests.

In the younger groups individuals 10 to 19 years old made about eight points lower than the group average, while the 15-19 group by itself made just about the whole group average.

Dr. Freeman said the tests could not be held to invalidate earlier findings of a distinct drop-off of intelligence in oldsters of large groups, but the tests do indicate there are considerable numbers of older persons whose mental abilities are as keen as those of younger individuals.

Monarch of Aborigines

Dies as He Predicted SYDNEY .- King Jaringoorli, the aged monarch of the Australian Wol-

min Yowaroo tribesmen, predicted his own death to within a few moments. When a native woman brought

him a cup of tea in the native hospital at Broome, western Australia, he told her that it would be the last he would ever receive from her. He drank the tea, settled himself calmly in bed and died.

Jaringoorli was a fine type of native. Although he was about 90 years old, he stood tall and erect and he retained his faculties to the end.

His tribe were the original inhabitants of the northeastern part of Roebuck bay, on which the township of Broome now stands.

The old king was tremendously proud of two scars caused when he was seized by a shark when he was diving for shell in his youth. After the attack he was dragged to the surface and his wounds sewn with ordinary needle and thread.

Canadian Blind for 22

Years, Amazed by Sight VANCOUVER, B. C .- After 22 years of blindness the veil of darkness has been cut away from the eyes of William Hunter, 68-year-old news agent, by the magic of a surgeon's scalpel.

For the first time "since the mist came over my eyes in 1918," the one-time soldier can see again. "It was a miracle," he exclaimed

happily, telling of the operation that restored his sight.

"I walked to the hospital window, not daring to hope for too much. But I looked out and for the first time in 22 years saw green grass. It was wonderful. I think I cried again."

Now the days are a series of astounding discoveries: That the cars are shaped differently than he remembers; men wear strangely cut suits; the new buildings don't have curves and domes.

JNO. O. CRAPSTER, Postmaster. •No Window Service or Rural Carriers on Legal Holidays.

Helidays for Rural Carriers are, New Year's Day; Washington's birthday; Me-morial Day, May 30; July 4: Labor Day, 1st. Monday in Sept.; Armistice Day, November 11: Thanksgiving Day, and Christmas. When a holiday falls on Sunday, the following Monday is observed.

"When the famous Viking, Erik the Red, discovered Greenland in 983 A. D., he established a settlement west of Cape Farewell, on the coast facing Canada. On the narrow ice-free strip of coast some 5,000 Scandinavians maintained a colony at Ivigtut and another farther north for several centuries. They built substantial houses, a cathedral, 16 churches, a monastery and a convent. The settlement disappeared before Columbus' discovery of America.

"Northwest Greenland was explored and occupied as a base for American polar expeditions, notably by Peary and Greely. "The towns of Greenland are few

and unimportant. Godhaven, the chief settlement, on the west coast, has only a few hundred inhabitants. Julianehaab, near the southwest point of the island, is close to the site of the settlement of Eric the Red.

"Greenland's principal export has always been blubber, mostly of the seal, from which oil is made. Danish imports of blubber, together with skins, salted and canned fish, eiderdown and feathers, amount to \$1,500,000 a year. Denmark sells mostly food-stuffs, tobacco, arms and ammunition, lumber and hardware to her colony, for which Greenland pays about \$600,000 annually.'

Modern College Girl Seeks Early Marriage

M

M. M. M. M.

ST. LOUIS .- The fact that the modern college girl is more eager to marry than was her sister of a generation ago does not mean that she is more successful in getting a man, Dean Harriet M. Allyn told the National Association of Deans of Women here.

Dean Allyn said the modern college girl wants to marry within a year or so after graduation instead of waiting for eight or ten years, as they formerly did.

"This would make it appear that more college graduates are marrying," she said, "but according to statistics at Mount Holyoke only about 50 to 60 per cent of the alumnae have ever married. The percentage hasn't changed in recent years.'

Still Morrison felt no fear.

He had eradicated his own prints from the gun and from the other objects that might arouse suspicion. Of course, on the door knob and possibly on the desk surface they might find a few, but he could explain those. The gun was the chief thing, because unless they could prove he'd handled the gun-they couldn't prove anything. Ryan's voice sounded in his ear.

"O. K. We'll take your prints first, Morrison.'

Morrison smiled and nodded. He was very agreeable, and talked affably with the officer during the operation.

"Yes," he said, "Mr. Van Nuys had been feeling depressed. You couldn't blame an old man, though. Yes, he supposed there would be considerable property. No, the servants probably wouldn't benefit by the will. Mr. Van Nuys always thought of servants as being terribly stupid people."

Morrison smiled to himself as he made that remark.

He didn't care who benefitted by the will. It wouldn't make any difference to him, because he'd got his long ago. Oh, yes, enough to keep him comfortable for life.

Van Nuys didn't know about it. No one did.

Van Nuys suspected, but Morrison had known he would sooner or later, and was ready for him. That's why Van Nuys was dead now.

The inspector came into the room with some sheafs of paper.

Ryan said: "Looks like dead open and shut suicide, don't it, Inspector? Kinda wasting time.

You could tell by the tone of Ryan's voice that he was annoyed, that the inspector's meticulousness always annoyed him.

"Best to make sure," the inspector said.

He was busy with the prints. "Always best to make sure."

Ryan looked at Morrison and winked, and Morrison smiled. They understood each other, these two. Van Nuys had been meticulous, also, and Morrison knew how Ryan felt about it.

Presently the inspector looked up from his examination of the prints. He said: "No prints on the gun but Van Nuys'. Found a few on the door knob and a set on the desk that belong to Morrison.

Morrison smiled and felt very sure of himself.

Christ's place on the cross and died in His stead. Christ, the Japanese theorists continue, came to Japan, which He had visited many years before, accompanied by the Virgin Mary, settled in the tiny hamlet of Herai and preached there until His death at the age of 105.

The theory is based largely on the fact that in Herai, more than 300 miles north of Tokyo, there are customs which cannot be traced to Japanese sources and which are remarkably Hebraic in character.

For example, new-born infants in Herai are marked with a red cross on the forehead and coffins are similarly painted "to drive away evil spirits." The cross is a symbol unknown in Japan-except in Christian circles, and only in Herai and its immediate vicinity is this custom carried out.

Until recently a song sung for generations at the Herai autumn festival had been unintelligible even to the singers. However, not long ago one authority pronounced it markedly similar to Hebrew and declared it a song in praise of the Lord.

Two mounds in Herai are cared for tenderly by members of a single family, one of the cairns assertedly being the tomb of Christ and the other that of the Virgin Mary.

The caretakers are a family by the name of Sawaguchi, although until 40 years ago they had gone by the name of Miko-no-ato, or Descendants of God. The present head of the family, the Japanese theo-rists say, looks more like a Westerner than a Japanese.

Courageous Boxing Cat

Edmund H. Ruh, of Cleveland, Ohio, has a boxing cat-Mr. Buster -which he has trained to wear gloves on its forepaws and box round after round with him. "The cat is a mild animal," Ruh said, "until the gloves are put on. Then it becomes a courageous boxerand never retreats."

Dwelling-Houses in Scotland

Dwelling-houses in the United Kingdom are almost exclusively of brick, although in Scotland, on account of the shortage of brick-layers and bricks in recent years, concrete and timber have been favored by the public authorities, says a survey issued by the Columbia University Press.

MALACHI DEMANDS HONESTY

TOWARD GOD

Spiritually sick-and desperately

so-was Israel in the days of Mal-

achi. The nation had been released

from captivity in Babylon and had

been back in their own land for

almost a century. The outburst of

religious enthusiasm which charac-

terized their return had resulted in

the rebuilding of the temple (Ezra

1:1-4). In this they were encour-

aged by Haggai, as we recall from

our lesson of last Sunday. They had

later been led by Nehemiah in re-

newed interest in spiritual things

and in the rebuilding of the city

wall, but now again they had turned away from God. Malachi came

with what one might call God's last

word before judgment upon their

sins. The lesson centers around

'Ye have turned aside" (v. 7,

R. V.). This was God's complaint

against His people. In spite of His

blessings upon them, they had inter-

married with the heathen, they had

dealt treacherously with their breth-

ren, and had neglected to worship

God. What was even worse, they felt no conviction about their sin

and denied that they owed God any-thing, not even the debt of common

Read the insolent, self-confident

questions and assertions of the

people in verses 7, 8, 13 and 14.

Think how perfectly they fit the atti-

tude of thousands of unbelievers and

backslidden Christians in our day.

One might almost think that Mal-

achi were reading the secret

thoughts of our own people, and pos-

Illness commonly has its center of

infection, whether it be physical or spiritual sickness. Malachi struck

at a very vital point when he re-

vealed that the heart of Israel's dif-

ficulty was dishonesty toward God.

spiritual things, but, since Malachi

was talking to an arguing genera-

tion (just like ours), he gave them

a concrete illustration of their deceit

-they had withheld from God the

UNDAY

CHOOL L

Helped by Early Care A high percentage of cancer cases can be cured if properly treated in the early stages of the disease, according to Dr. Grantley W. Taylor of Harvard Medical school.

The problem at present, he says, is to educate the public into seeking advice for symptoms which may be suggestive of cancer and to instruct the profession in early recognition of the disease and in the proper surgical and radiation treatments necessary to effect a cure.

"Symptoms are the result of interference with normal organs and vary widely, depending on the site involved in the cancer," Dr. Taylor said. "Surface cancers may appear as lumps, sores or abnormal

LESSON TEXT-Malachi 3:7-18. GOLDEN TEXT-Bring ye all the tithes into the storehouse, that there may be meat in mine house, and prove me how herewith, saith the Lord of hosts, if I will not open you the windows of heaven, and pour you out a blessing, that there shall not be room enough to receive it.-Malachi 3:10. bleeding from any or the orifices of the body. "Cancers of the throat interfere

with swallowing, breathing or speaking and cancer of the intes-tines probably would interfere with digestion.

Dr. Taylor said the cause of can-cer is not known, but that it can be shown in laboratory animals "that the susceptibility to cancer development is probably inherited." He added that it is well known that cancer is not infectious or contagious and that there are no germs involved in its causation. "The typical cancer," he said,

"begins as a localized lawless growth of tissue, frequently at a site which has been chronically irritated. The growth is not taking place in response to a need of the body, it fulfills no useful function and is completely in disharmony with the surrounding tissues."

The cancer shows no symptoms until it interferes with normal organs, he said, and it is this interference with "functions of organs indispensable to life which finally determines the fatal outcome."

Novel Electrical Device Finds Buried Meteors

The invention of a mathematics professor has brought to Ohio State university what is said to be the finest collection of meteorites in any college in the country.

The meteorites were unearthed in Texas and Arizona last summer by Prof. Lincoln LaPaz with the aid of an electrical device which he had built. The instrument is believed to be the first ever used to record the presence of magnetic and meteoric material beneath the surface of the ground.

To the geologist the few meteorites which finally reach the earth after their flaming flight through space are valuable. One weighing a pound would be considered a prize. But with the aid of Professor LaPaz's instrument the university has increased its collection many times and it now contains a meteorite weighing 40 pounds.

The professor first became interested in meteorites while tracing their paths mathematically. From this he turned to their actual collection and the invention of a device which at last puts the search for meteorites on a scientific basis.

A Couple's Fate: If Native Poland Rises, They Lose

European War Gives Boracas Family Respite From

Deportation.

CHICAGO.-Stanislaw Boraca and his wife, Agnes, natives of the Polish corridor who entered this country illegally 12 years ago and have been deported, have won a temporary victory in their fight to remain in this country.

Their case, involving numerous legal tangles, has been closed for the present, but they have been left with a high stake in the outcome of the European war.

The deportation order states that the two must be returned to Poland. But the part of Poland they came from no longer exists except as part of the German reich. As long as this continues, the order cannot be fulfilled, according to Roy D. Keehn Jr., assistant United States attorney, and no attempt will be made to enforce it.

Must Return if It's Restored.

End of the war and possible resto-ration of a Polish state, it was explained, would clear the way for deporting the couple. Meanwhile the Boracas are powerless to improve their status. Having violated the immigration laws, they are ineligible for citizenship.

Boraca came here from Canada in 1928, two years after emigrating from Poland. He believed himself to be a citizen by virtue of his marriage in British Columbia to Agnes Szukula, who told him she was born in this country.

Actually Mrs. Boraca, as she admitted later, was also of Polish birth and not an American citizen. She entered the country using a passport belonging to her sister, who is a citizen.

Federal Judge Charles E. Woodward decreed several months ago that the couple would have to go back to Poland. This finding was reversed by the United States Circuit Court of Appeals which held that deportation to Poland at that time would be "inhuman and shocking to the senses."

"If deported at all, these people should be deported to Canada," the court's opinion stated.

Amend Original Ruling. William J. Campbell, United States district attorney, replied that this decision deprived the secretary of labor of certain discretionary powers allowed under immigration law. He applied for a rehearing, contending that the court had gone beyond the record in the case in taking cognizance of present conditions in Europe.

The circuit court denied a re-hearing but amended its former ruling by admitting that the Boracas could be ordered back to Poland if Canada refused to receive them.

The new ruling, according to Campbell, was sufficient to clear up the confusion arising from the first opinion. Canadian officials, meanwhile, refused to admit the Boracas, leaving as the only alternative deportation to Poland whenever that country exists once more.

New Ore Testing Method

Saves Cash for Miners The small miner and desert prospector who formerly had to pay as much as \$100 a ton for analysis of ore samples now can obtain the same service for as little as \$2.50 by use of spectroscopic equipment similar to that installed at the University of Arizona.

Although the newer method costs but a fraction of the former outlay, the results are just as accurate, never varying more than 5 per cent as to quantity content. University engineers say that some elements, hard to isolate by chemical processes, could be identified easily by the use of spectroscope.

The basic principle of the spectroscope is that each chemical element, when burned, has a characteristic color, dependent on the frequency of the light emanated. This light is concentrated on a prism of glass. As the light strikes the pyramidal-shaped glass, it is bent and separated into its various colors, each color representing a specific element. By comparing the colors with a prepared chart, the nature of the ore content can be learned.

This spectroscopic method requires only a few hours to complete, whereas the older chemical system necessitated as long as several

weeks to assay ore. Gold may be identified with a spectroscope only if the ore runs about three ounces to a ton. Platinum metals, such as iridium, osmium, palladium, platinum, rhodium and rethenium, must be run about two and a half ounces before they can be recognized.

Presence of numerous commoner and more economically important minerals can be determined easily by the spectroscopic method. These metals include:

Aluminum, antimony, beryllium, bismuth, cadmium, chromium, cobalt, columbium, copper, iron lead, magnesium, manganese, mercury, molybdenum, nickel, niobitum, tan-talum, tin, titanium, tungsten, radium, silver, vanadium and zinc.

There are other elements, however, which cannot be identified readily by the scpectroscope. Some of these are argon, bromine, carbon, chlorine, fluorine, helium, hydrogen, iodine, krypton, neon, nitrogen, oxygen, radon, selenium and xenon.

Religious rervor Brings

Hines' religious fervor has put him behind bars for another 17 years and 101 days.

Hines recently invaded a rural Negro Baptist church near Mont-gomery and took over the pulpit from its rightful occupant at point of a pistol-then launched into a heated sermon.

Meantime, the deposed preacher went to the sheriff. Hines was arrested and sentenced to 101 days for use of a deadly weapon.

He was fingerprinted and it was discovered Hines had escaped from Kilby prison here back in 1918 after serving three years of a 20-year term for assault to murder.

WHEN YOU'RE PLANNING A MENU ESPECIALLY FOR MEN (See Recipes Below)

Just between us women, we'll have to admit that, if left to his own devices, many a man would enjoy living on a straight diet of meat, potatoes and pie. It requires a little judicious scheming on Mother's part to supply Father with his favorite foods and provide for him a wholesome, well-balanced meal in the bargain.

Whether she's planning a menu to please the men folk in her family, or is chairman of the refreshment committee for the May meeting of the business men's club, it's a wise woman who remembers-and caters to-these masculine foilbles in food. Just how do a man's food prefer-

ences differ from those of women? Well, for one

cooked to a turn. And he likes to know just what he's eating — he wants none of the "masked identity dishes" that defy him to find what they're composed of. In a word, fancy cooking is wasted on the average man, but he appreciates good cooking to the limit.

Remember that for most men, meat makes the meal; that hot breads are a masculine weakness that they themselves acknowledge; and that for dessert men have a special fondness for pie, or chocolate cake.

Next week in this column Eleanor Howe will give you some clever suggestions for entertaining a June bride. There'll be a menu and tested recipes, too, for a "Kitchen Shower"—and hints on what to give the bride.

whites until stiff and fold into the cake mixture. Place in 2 well-greased, 8-inch layer cake pans. Bake in a moderate oven (350 degrees) for approximately 30 to 35 minutes.

Corn Bread.

(Serves 6-8)

1½ cups yellow (or white) corn meal (uncooked)

1/2 cup general purpose flour

- 4 teaspoons baking powder
- 1 teaspoon salt
- 1 cup milk 2 eggs (beaten)
- 2 tablespoons fat (melted)

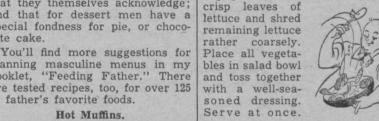

posed of only a few dishes, but he wants those Sift the corn meal with the flour, baking powder and salt. Combine the milk, eggs, and shortening and add to the dry ingredients. Bake in a well-greased 8-inch square baking pan, in a moderately hot oven (400 degrees) for 40 to 50 minutes.

Garden Salad Bowl.

- 1 head lettuce cucumber, peeled and sliced
- green pepper, cut in thin rings 3 fresh tomatoes, cut in wedge-

shaped pieces 1 bunch radishes, sliced Roquefort cheese dressing

Prepare and chill vegetables thoroughly. Line salad bowl with large

Long Prison Sentence MONTGOMERY, ALA. - Sam

tion plate. If that is all a man can and should give, God will bless it and multiply it for His glory. But certainly it does not befit one who lives in luxury to give God's work the smallest piece of change which he can decently slip into the plate. Tithing may be said to be an Old

Testament principle. Doubtless it is also true that the principle of New Testament Christianity is that all we have belongs to God, but often the one who hides behind that fact does not give as much as the people of Old Testament times. Is that honest?

III. Judgment.

God is love, but that does not mean that His patience is without limit nor that He will forever withhold judgment. He says, through Malachi (v. 9), "Ye are cursed with a curse." The blessing has been withheld (v. 10). The devourer is in the land (v. 11). He promised them release and blessing if they repented and returned to the right way, which obviously means that their failure to do so would bring judgment. We know that Israel despised God's warning and to this day is paying for its sin. Will America be wise enough to heed God's call?

IV. Blessing.

So often the loving God had to speak through His prophets of impending judgment on sin, but how gracious He is in that He always holds out the promise of blessing for repentance and obedience.

Look at the precious promise in verse 10. Thousands of Christians join the writer in saying, "That is true in A. D. 1940 just as it was in 400 B. C." Read verses 11 and 12. Note that our God is not only great God, but a good God. Consider the blessings of spiritual fellowship-the certainty of victory revealed in verses 16 and 17. One marvels that Israel could resist such a loving plea just as one wonders also why men of our own day of God's grace still resist His gracious invitation.

A Helpful Heart

It is a fine thing to do kindly, helpful deeds. It is one of the very finest in the world. But there is something finer than the helpful hand; it is the helpful heart.

End Is Death

There is a way that seemeth right unto a man, but the end thereof are the ways of death.

Spanish Wild Horses

The possibility that stray horses from Coronado's expedition stocked the western plains with Spanish horses is slight, says Prof. Arthur S. Alton of the University of Michigan, who recently translated into English the muster roll of the early explorer's companies. This record, which gives a complete count by men, with names, rank, number of horses or other animals, armor and weapons, was made on February 22, 1540, at Compostela in western Mexico as Coronado's men were reviewed by the viceroy and governor of New Spain, Antonio de Mendoza. Careful distinction was made in the document between horses (caballos) or stallions and mares (yeguas). Inasmuch as only two mares are listed, the possibility is rather remote, Professor Alton says, that the hordes of wild horses that once roamed the West were descendants from horses lost from the Coronado band. The muster roll bearing this evidence, with an explanatory in-troduction, has been published by the university's William L. Clements library.

India's Sandlewood Trees

India's rich forests of sandlewood have been rescued from a dread disease after a scourge lasting 40 years. Called "spike disease," owing to the spike-like appearance it produces on the foliage of the trees, the disease caused an annual loss of more than \$250,000 in Madras and \$800,000 in other parts of India. Athough the exact species of insect responsible for the disease has not been discovered, the forestry officials at Madras have found measures to control and eradicate the pest. This success is the result of years of research at heavy cost.

Bar Kilted Scot

Because he wore a kilt, a Scottish soldier was banned from the streets of Naples. He was sightseeing with a party of Cameron Highlanders on their way home from service in Egypt, and strolled into the center of the city. Having never before seen the abbreviated Scotch skirts, a crowd quickly gathered and held up traffic while debating loudly whether the foreigner was a man or a woman. Police appeared and decreed that he could not appear on the street and must return to his ship by taxi.

Boraca is an interior decorator and a bartender, 40 years old. His wife is 35. They are parents of an American-born[®] son, Arthur, nine years old.

Fastest Toboggan Run

The fastest toboggan slope in the world is the famous Cresta Run at St. Moritz, Switzerland. It is 1,320 yards long and a speed of over 50 miles an hour is often reached.

Intense Artificial Heat

The tiny, hair-thin tungsten filament of an incandescent lamp emits light at a temperature higher than any other artificial heat ordinarily encountered by man.

TIME TO GET GOING!

Modern Judas

Fear that fellow prisoners would take vengeance on him because he had betrayed his fellow partners in crime caused John Strong to hang himself in his cell in Pentridge jail, Melbourne, Australia. Strong was serving a five-year sentence for complicity in a daring holdup. At his trial he was branded as a Judas who had sold his fellow criminals for 20 pieces of silver by betraying the others to a detective. This so preyed on his mind after this conviction that he asked the jail officials to protect him from the other prisoners. This they did, but his nerves became more frayed each day until he could stand it no longer.

planning masculine menus in my booklet, "Feeding Father." There are tested recipes, too, for over 125 of father's favorite foods.

Hot Muffins.

2 cups general purpose flour 3 teaspoons baking powder teaspoon salt 2 tablespoons sugar l egg 1 cup milk or water

2 tablespoons shortening, melted

Mix and sift dry ingredients, add unbeaten egg, milk or water and melted shortening. Mix quickly. Pour into well-greased muffin tins, and bake in hot oven (450 degrees) 20 minutes.

Deep South Ham Sandwich With Hot Mushroom Sauce.

6 pieces corn bread, about 3

inches square 6 slices ham, boiled or baked Mushroom Sauce:

1 can condensed cream of mushroom soup

1/2 cup milk

Stir the 1/2 cup of milk into the condensed cream of mushroom soup. Heat, but

do not boil. While the sauce is heating, split the pieces of corn bread and toast them. Then place the ham between the toasted slices of corn bread and pour the hot mushroom sauce over the top.

Note: This is an excellent way to utilize left-over corn bread. If hot corn bread is used, we suggest the pieces be split and buttered, but not toasted.

> My Best Chocolate Cake. 2 ounces bitter chocolate 3/4 cup butter 1½ cups sugar 3 eggs 21/2 cups cake flour 1/4 teaspoon salt 2 teaspoons baking powder 1 cup milk 1 teaspoon vanilla extract

Melt chocolate carefully over warm water. Cream butter thoroughly and add sugar slowly. Separate eggs, beat egg yolks, and add to butter and sugar mixture. Add the melted chocolate. Mix and sift together the flour, salt, and baking powder and add alternately with the powder and add alternately with the milk and vanilla extract. Beat egg (Released by Western Newspaper Union.)

Welsh Rarebit. 1 pound sharp American cheese 2 tablespoons butter 1 cup cream 2 eggs 2 teaspoons worcestershire sauce 1/2 teaspoon paprika Salt and pepper to taste

1/2 teaspoon dry mustard

Cut cheese in small pieces and place it together with the butter in the top of a double boiler. Melt slowly. Then add cream, eggs (well beaten) and seasonings. Cook, stirring constantly, until mixture has thickened. Serve on hot buttered toast.

Noodle and Tuna Fish Casserole.

(Serves 8)

- 1 8-ounce package noodles 1 tablespoon salt
- 1½ quarts boiling water
- 1 7-ounce can tuna fish (drained and flaked)
- 1 1-pound can cream of mushroom soup (not condensed)
- 2 tablespoons catsup
- 1 tablespoon prepared mustard 1/2 cup American cheese (grated)

Cook noodles in boiling water to which salt has been added, until tender. Drain and rinse thoroughly. Place one-half of the noodles in buttered casserole, add tuna fish and top with remaining noodles. Combine mushroom soup, catsup and mustard and heat to boiling point. Then pour sauce over noodles in casserole and top with grated cheese. Bake in a moderate oven (350 degrees) for approximately 35 minutes. Garnish with wedges of hardcooked egg.

To Please the Men Folk in Your Family.

From the brand new bride, to grandmother, aren't most of us cooking largely to please Father?

Eleanor Howe's booklet, "Feeding Father," is one every homemaker needs in her file. It's full of tested recipes for the foods that Father likes best-and will give you masculine menu hints, as well.

Send 10 cents in coin to "Feeding Father," care Eleanor Howe, 919 N.

Wife Takes Over Pulpit IPSWICH, ENGLAND .- The congregation of Tacket Street Congregational church, Ipswich, were not deprived of their Sunday sermon because the pastor had "joined up." His wife substituted for him and

completely "stole the picture." Mrs. O. D. Wiles, the parson's wife, did not stop for lengthy words. She told simply and graphically to some 300 fascinated listeners—mostly women-the story of the Prodigal Son, and turned it to account by encouraging mothers to wait confidently for the return of their sons and husbands from the present crisis.

Society of Friends George Fox was 19 when he felt the call to preach which resulted in

the call to preach which resulted in his arrest for disturbing the peace and his establishment of the Soci-ety of Friends (Quakers). "Priests, lawyers and soldiers were all ob-noxious to him," says a biographer. Consequently, every type of perse-cution was practiced on the sect in Exclored and the American sciences. England and the American colonies; for a long time it was a worse crime to be a Quaker than a thief. William Penn was jailed because he was a Quaker; this induced him to come to America. Numbers of Quaker men were put to death in Massachusetts; in New Hampshire Quaker women were stripped and whipped from one town to another, for Quakers were the first to acknowledge the equality of men and women in religion and allow women to preach.

Marie Roland

Mme. Jean Marie Roland, nee Marine Jeanne Philipon, motioned one Lamarche to precede her to the French political guillotine in Paris, saying: "You would not have strength enough to see me die." Then, mounting the platform herself to suffer the fate of all rationalists in revolution, she looked over at a statue of liberty and uttered an immortal phrase that keeps the name of Mme. Roland alive: "Oh, Liberty, how many crimes are committed in thy name!" After her death her husband killed himself. "I would not remain any longer in a world so stained with crime.'

When Cow Wants Drink,

She Goes and Pumps It CONNEAUT, OHIO .- Ona, a practical minded Jersey, "uses her head" when she's thirsty, by pump-

ing her own drinking water. With expert nods of the head, Ona can supply water not only for her-self but enough for the herd and to flood the barn.

Stationed next to the pump, Ona, with the blunt end of her nose, can raise the pump handle and bring it down under her throat. Using these motions she has filled her bucket and repeated the process until she was full.

Then she remembers her mates, and begins to run the bucket over so the excess will run down their troughs. This not only waters the rest of the stock but floods the barn.

dollars and up.

Child Meningitis Deaths

Are Cut by New Drugs Deaths caused by meningitis resulting from common influenza have been reduced 20 per cent since the use of sulfanilamide and sulfapyridine for treatment.

"Sulfapyridine promises to reduce this figure to a still lower level," according to Dr. Javier W. Lindsay and Dr. Clarence Rice, of Children's hospital, Washington, D. C.

These doctors point out that meningitis resulting from common influenza was the most common disease-excepting tuberculosis-found in children under two.

Dr. Sara E. Branham, senior bacteriologist of the National Institute of Health, reports that the two drugs had been valuable also in treating meningococcus meningitis--common spinal meningitis-in mice.

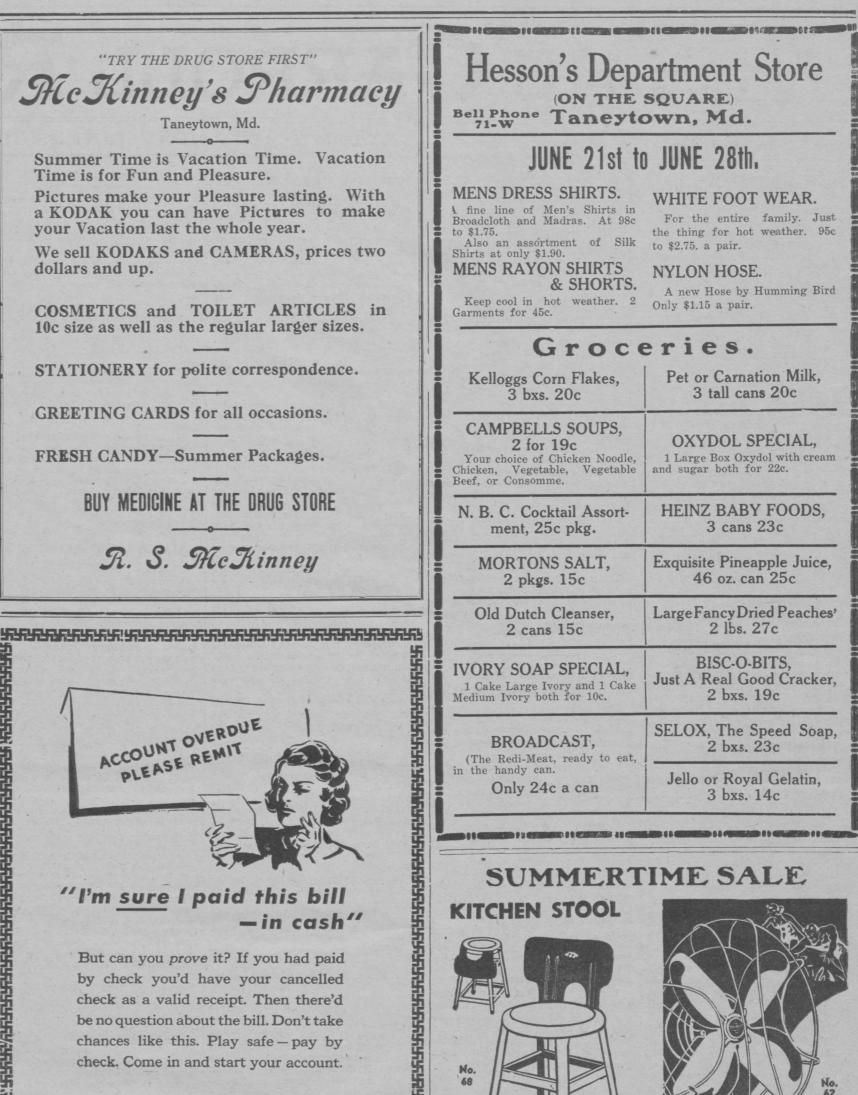

Eggs Between Sheets, And Family Row's On

SALEM, MASS.—When a hus-band slipped into bed and found his wife had spread eggs between the sheets, a riotous family ar-gument resulted.

STREETS ST

Patrolman Broderick reported that each party made charges of flat-iron hurling and that the wife showed him her bed with the legs sawed off so she was sleeping almost on the floor.

Much heavier and more substantial than the average set at this price. Consists of 52-oz. handled pitcher and six 9-oz.
