# COMMUNITY LOCALS

This column is not for use in advertising any money-making program, fair, supper, party or sale. It is intended for news, personals, and such matters as may be of community interest.

Churches, Lodges, Societies, Schools, etc. are requested to use our Special Notice Department for money-making events.

Churches are especially given free use of our Church Notice Column, for brief notices concerning regular or special services. Larger events will be cared for elsewhere in our columns.

Mrs. Harold Mehring, entered the Woman's Hospital, Baltimore, Tuesday, for observation.

Mr. and Mrs. William Malone and daughter, of Baltimore, spent Sunday with Mr. and Mrs. David Little.

Mr. and Mrs. Archie Crouse are visiting their daughter, Mrs. E. E. Stock, of Staten Island, New York.

Clyde L. Hesson was elected President of The Taneytown Garage Company, at its annual election in Janu-

Luther Anders, who was a patient at the Marine Hospital, Baltimore, for four weeks, returned home last Fri-

Mr. and Mrs. A. C. Winget, Tyrone, Pa., were the guests of Mr. and Mrs. Clyde L. Hesson several days this

Merwyn C. Fuss, Taneytown, has been nominated for director of the I. O. O. F. Home, at Frederick, for next year.

Miss Marie Little, R. N., of Washington, D. C., spent the week-end with her parents, Mr. and Mrs. David

Mr. and Mrs. Homer Shipley and son, Bill, of Reisterstown, were guests of Mr. and Mrs. Samuel C. Ott on Sunday.

The extreme heat of the past month, turned suddenly into cold

winter in Baltimore.

Mr. and Mrs. Albert Harner and Mr. and Mrs. Lloyd Herr, of near Mount Joy, Pa., visited Mrs. Lizzie Zepp and sons, on Sunday.

Mr. and Mrs. Peter Graham entertained on Sunday: Mr. and Mrs. Geo. Bender, Mr. and Mrs. Norman Lawrence and daughter, Joan, Hanover.

Mr. and Mrs. Tracey Hoff and Dr. Curtis Basehoar, of Hyattsville, Md., visited Dr. C. M. Benner and Mr. and Mrs. A. C. Basehoar, over the week-

Mrs. Roger Fritz is spending several days with her aunt, Mrs. Ida Harner, relieving Mrs. Carrie Aldridge, who has gone home several

Mr. and Mrs. Albert Bangs, Baltimore; Mr. and Mrs. John Thoman and daughter, Jacquline, Hanover, were Sunday guests of Mr. and Mrs. The Last Tuesday, Gov. O'Conor discussed the recently adoption Fire Works law as follows:

"I derived much satisfaction from giving executive approval to House Sunday guests of Mr. and Mrs. The Sunday guests of Mr. and Mrs. John

Mrs. Mary Wilt, Miss Shirley Wilt, Miss Mabel Leister, town, and Mr. terest of the public, particularly that and Mrs. James Baumgardner and of little children, demanded this re-Washington.

Mrs. Vincent Arnold, son, George Vincent, have gone to Sutton, W. Va., where they joined Mr. Arnold, who is employed by the Dougherty Construction Company.

C. W. J. Ohler, proprietor of the Square Deal Garage, Taneytown, has accepted a position with the W. H. Davis Company, Westminster. Mr. Ohler will assume his new duties May

Carolyn Shriner, daughter of Mr. and Mrs. George Shriner, was struck by an automobile, on the square, in town. Fortunately, the little girl was not seriously hurt, escaping with bruises and brush burns.

Miss Elizabeth Horner, O. A. Horner, Robert Horner, New York: Henry Fisher, Easton, Pa.; Mr. and John B. Mobrey-Clarke and Miss Elizabeth Annan, Washington, D. C., were week-end guests of Miss Amelia H. Annan.

Jas. Myers, met with what may have been quite a serious accident early Monday morning when he ran front of a car driven by John Hilbert, and was knocked down. Fortunately he did not have any bones broken, was just bruised and fright-

At the public meeting held Monday night in the Municipal Building, the following were nominated, to be voted on May 5, the three receiving the most votes to serve as City Councilmen for Taneytown, viz: Merle Baumgardner, Dr C. M. Benner, Edward Morelock, Edgar Phillips, J. Thomas Wantz and Percy Putman.

from John J. Reid, Detroit, tells of the continued critical condition of his health. We can fully appreciate his ills, as they are somewhat similar to thoce of our own; which appear to be of the class that when they can not be cured, must be endured. Even our favorite baseball teams are at

the bottom of the list. (Continued on Fourth Page.)

### FARM LABOR SHORTAGE Reported to be Acute in Maryland Even at Higher Wages.

State and county and farm organizations are greatly worried over the shortage of farm help throughout the state. The situation is unquestionably due in part to the draft for an army of defense, while another large portion no doubt due to the increase in factories, some of which are also directly or indirectly called on for war needs.

Dr. Devalt at College Park says that on January 1 the shortage was 4000 in labor, that has increased to 11,000 this month, and would likely reach between 15,000 and 16,000 by

Dr. Devalt said wages of farm lab-or have increased \$2.50 a month and that a further upward trend could be expected. Dairy farms are paying \$50 and \$60 a month in Harford and Carroll counties, he pointed out. Yet, dairy farms always paid higher wages than other farms, it was said. David L. B. Fringer, director of the State Employment Bureau, reported questionnaires have been sent to all farmers in the State asking when they would need farm help and what kind. Replies will be filed in Mr. Fringer's office, and it is hoped needed farm labor can be filled from application for iche an effect of the state of the sta

They plan to arrive a home in California about May 2nd.

# FIREWORKS PROHIBITED.

Last Tuesday, Gov. O'Conor dis-

the measure prohibiting the indiscriminate use and sale of fireworks.

"It was because I felt that the inson, George, York, spent Sunday in striction that I placed the administration squarely behind the Fireworks Bill, and actively supported it in the Legislature. As a result of its passage, I feel certain that serious accidents marring the sight, and even jeopardizing the lives of children will be reduced.

'The unfavorable report by the American Medical Association, emphasizing the great increase in Bal-timore City of accidents causing blindness, was such as to challenge the attention of us all. The human-itarian aspect of this entire situation was most appalling, and it is a source of gratification that the twenty year fight to bring about this needed legislation has now been successful.

The law, however, permits the use f strictly supervised fireworks for exhibition purposes, as we under-

#### SENATE PROBES COST OF FORT CAMP MEADE.

It seems as though no activity of the U.S. government can be carried John Myers, son of Mr. and Mrs. on without being attended by 'graft'. A Senate Committee is now engaged in probing the cost of Fort Camp

The original cost of this city of soldiers was estimated to cost about \$10,500,000, but the final cost is now placed at approximately \$20,000,000.

# TUBERCULOSIS CLINIC FOR CARROLL COUNTY.

The tuberculesis clinic for Carroll County will be held on May 21, at 9 A. M. This month the clinic will take place at Albion Building, 3 East Main St., in Westminster.

This is one of the clinics that are held every month in all the counties of Maryland by the Maryland Tuberculbsis Association. All of these clinics are free. Dr. Victor Cullen, the clinician, will be in charge of the examinations.

# U. S. BONDS ON SALE THROUGH POSTOFFICE.

# Proceeds for the Benefit of National Defence.

(The Record is publishing below, a portion of a letter received by Postmaster John O. Crapster, Taneytown from the P. O. Department, that we consider sufficiently in detail for our readers to understand.—Ed.)

April 21, 1941.

Mr. John O. Crapster, P. M.

Taneytown, Md.

"As Postmaster, you have already received, through the Postal Bulletin comprehensive instructions relative to the part which you and your office are to take in the sale of National

Defense Savings Bonds and Stamps. The Postoffice Department, as you know, has been designated the sales agency in the field for the handling of these Defense Bonds and Stamps, which are to be placed on sale starting May 1, 1941. For the purpose of For the purpose of disseminating information locally, with respect to the sales of the Defense Bonds and Stamps through the Post Office, there is enclosed a news release which, if promptly placed in the newspapers in your community, will do much toward informing accurately every family whose members are likely to buy bonds or stamps from you with the advantages that are to be had through the purchase of National Defense Bonds.

More than two million Americans have bought United States Savings Bonds at postoffices since March 1st, This sale to date of \$5,000,-000,000 worth of Bonds seems very large. But it will undoubtedly soon be exceeded by the sales of the new Defense Savings Bonds and Stamps, which the Treasury Department expects to promote by local and national

publicity. The Secretary of the Treasury has The Secretary of the Treasury has asked me to convey his thanks to you for the help you have already given in the sale of the existing United States Savings Bonds, and also to thank you in advance for the co-operation which he knows you will give to this new effort. Your help now will be a real service to the country." will be a real service to the country.'

Very truly yours, FRANK C. WALKER, Postmaster General.

# GIRLS' 4-H PROGRAM.

A poll of opinion among the nation's 1,500,000 leaders and members would clearly favor, authorities as-sert, the projects and activities for girls which best prepare them for home and community life. It is reflected in the acceptance by this state and 39 others of the national girls' record contest. In the 19 years it has been con-

ducted by the extension service its influence has been felt by some 4,000.-000 girls enrolled in that time. has also honored great numbers with awards of merit and thousands of dollars in scholarships.

What girls may achieve in an all-What girls may achieve in an all-around program is shown by the records of 1940 state winners in Massachusetts, Minnesota, Mississippi Montana, Oklahoma and Oregon. During the years of their enrollment they collectively canned 16,346 pints and 5,954 pounds of food, sewed 494 garments, prepared 1,226 meals, and garments, prepared 1,226 meals and 5,448 dishes, and made 5,711 bakings. They also made 197 home articles, planted 483 trees and plants and handled 832 fowls. Other activties were 51 dress revues, 841 exhibits, 227 demonstrations and 127 judging contests. A value of \$10,049 inclusive of over \$1000 in cash awards was assigned the work.

This year's awards comprise spe-cial medals for county winners again ment of a new kind of shirt that given by Montgomery Ward, also trips to the National 4-H Club Control of April. The meeting was adjusted by the Spones—Huh? That's nothing new. I've been wearing that kind for years.

# SHORTAGE OF FERTILIZERS May be Faced by Farmers of the United States.

# Phosphate rock mined in Florida is one of the prinicpal ingredients used in the manufacture of superphosphate

and also complete mixed fertilizer.

Of the total of 2,845,012 long tons
of Florida Phosphate Rock minded in Florida in 1940-

About 2,000,000 long tons were used in the manufacture of Super-phosphate in the year 1940.

About 900,000 long tons of Phosphate Rock from Florida were transported by steamer to Baltimore and to points north of Baltimore during

the year 1940. Additional tonnage of approximately 600,000 long tons was moved by steamer from Florida ports to ports

south of Baltimore. Or an estimated total of 1,300,000 long tons of Florida Phosphate Rock were transported by steamers during

the year 1940. The tonnage of 900,000 long tons of Florida Phosphate Rock that has been coming to Baltimore and ports north of Baltimore each year by vessel, for the manufacture of Super-phosphate, which Superphosphate is also used in the manufacture of complete mixed fertilizers, the annual consumption of such fertilizer on the farms of the New England States and the States of New York, New Jersey, Pennsylvania, Delaware, Ma-ryland, Virginia and West Virginia, of straight Superphosphate and complete mixed fertilizers, is approximately 2,500,000 tons. The Florida Phosphate Rock, from which the complete fertilizers and Superphosphate are manufactured, is transported from Florida ports to northern factory ports entirely by vessel.

If the vessels used in this transportation of Phosphate Rock are taken off for overseas service, and if rail movements are substituted, it will be impossible for this volume of Phosphate Rock to be transported by rail to the northern ports. The rail movements will be inadequate and will result in a considerable shortage of the fertilizer required by the farm-ers of the New England States and of the other States mentioned above. Such a shortage of fertilizer in this section would not only be serious, but probably a calamity.

The section of the country mentioned above grows large quantities of varied crops and food stuffs. Crops and food stuffs will be more than necessary to feed not only this nation but our allies during the war, and farmers will be called on to grow more of certain crops in this section Court that begins on the second Monday in May. By districts, they are as follows:

of the country in order to meet the war conditions. Crops and food stuffs of quality cannot be produced without the proper application of fer-

vestment and under the above stated conditions he will have to depend on fertilizer more than ever before.

The Secretary of Agriculture, in a recent broadcast, stated that it would rankforter.

Westminster—Edward Kehoe, Ar- crease the production of some foods in order to supply its own people abundantly as well as the allied pow-

# ROOSEVELT SAYS BRITAIN WILL WIN.

# Indications that U.S. will yet enter the War.

President Roosevelt has expressed his strong opinion that eventually the Democracy of Great Brtain will win; and that it was folly to express strong hopes one day, and as strong despair

the next day.

He declared that the defense of England "will be kept going" and that there would be no reduction in war supplies now being sent to Great Britain.

He made no reference to the possibility of the U. S. sending war vessels and armed forces to England; nor did he make it clear that our belief in British success was not based

Earlier in the conference the latter question had been put to the President in another form. That time it was: Would the British reverses in the Balkans have any effect upon our shipments of supplies. And that time the answer was that the President didn't live in Delphi (legendary home

of a celebrated oracle).

A query as to whether events of the last few days had brought the Administration any closer to the question of convoying supply-laden ships all or part way across the Atlantic brought a Presidential answer that he never had lived at Delphi.

The war in Europe has changed but little during the week. If there is a decisive change, it appears favorable to Hitler, through his Allied forces in Greece.

The need for war supplies from the U. S. is growing steadly; and sentiment in the direction leads here to his many roll County.

In his abs

In fact, it is now urged by Washington that helping England will also help the U.S. which may be another way of sending our armed forces to Europe, as we did in the World War. -22-

FRIDAY, APRIL 25, 1941.

# THE HARD JOB OF THE COUN-TRY WEEKLY.

The costs of publishing weekly newspapers has greatly increased within the past 40 or more years ago, beginning with the cost of hand composition that developed into machines for the purpose.

Back in those days, too, the average weekly had a subscription price of \$1.50 a year, instead of \$1.00. Then, we had hand-folders, and now the machine folder and trimmer. The use of cuts and modern display type in many sizes was almost unknown.

All of this has been in the line of improvement, except subscription price. Job printing has become more difficult, because of "form work" and the duplicating processes in use by large city establishments that have entered the country field.

Competition has increased between country offices, too, and getting a job is a matter of often unfair price cutcountry office to stay in the field than fight for it—and take a chance.

And yet, local needs seem to think that, somehow or other, the weekly can still keep on, and the most of them are trying it, with natural varying success.

# U. S. FOR ENGLAND.

There is not the slightest doubt in an immense majority of the best citizens of the United States being for England to win the war.

Whether it be the guarding of war supplies to England, or by contributing war vessels and war planes, or submarines now makes but little difference.

It is true that the strike situation has been playing a big part in hindering the concentration of this pro-England sentiment. Politics has entered here, as it appears that a precontracted, that is mostly well understood, and we do not care to enter into that.

What we want to see is a still greater growth of pro-English sentiment. We need not discuss what democracy means, here or elsewhere, but we want the English to win at any cost, and let the political side be fought out at a later date.

#### \_\_\_\_\_\_\_\_ CAN WE DO IT?

We have the natural resources, we have the climate, we have the people (a mixture of the best at least the most adventurous) of all races, and we have the wealth. Can we do it.

Can we, knowing we have at hand and command the means and the ability to rule the world, so discipline ourselves that we will consent to let all other people have their chance to work out their own destiny in their own way?

Maybe we have in democracy the best kind of government for our people, I think we have but it would not and will not do for goose stepping Germany. They need a totalitarian states-a Hitler-to rule them. If they like it and him let them have their desire for the good Lord knows we do not want him.

Can we attend to our own business, and let others attend theirs as they see fit, or must we let Downing Street tell us what to do. Our choice will determine how badly we are to W. J. H.

# IF WAGES RISE-

If wages rise, can prices be far be-Federal Price Administrator, has issued an order freezing steel prices at notwithstanding the general wage in- helpful to the small borrower. The

trol powers. Steel men probably would agree in other ways. But to assimilate at one gulp a rise or 11 to 12 percent minimum required to cover over- financing.-Industrial News Service. head. But there also is a point at which any increase of production or capacity is purchased only at a rising cost per ton; and steel production at present is approximately 100 per cent of rated capacity.

A pronounced rise in costs of living would certainly tend to force wages up. Any sudden or marked increase in wage rates tends similarly to start the spiral by which wages and prices or vice versa chase each other up the economists' graphs. The Price Administration was formed to prevent so far as possible any such inflation. On his appointment to the new office last week Mr. Henderson said with reference to steel prices, "We are watching wages as a prime cost. If there are unwarranted prospective wage rises we will have decided interest in them." That interest, as applied to a number of industries, should be a watchful and outspoken one.-Christian Science Moni-

# KEEPING THE WOLF AT A SAFE DISTANCE.

We walk among billions of dollars these days like Little Red Riding Hood in the forest, lost, bewildered, and frequently a little frightened. But surely the best solution when you are astray in the deep woods and have lost your bearings is to pause ting, and there seems no way for the for a moment like the experienced woodsman and study the details of the situation. That's the first step in the direction of finding your way out into the open again.

The Federal spending situation can be described with greater clarity than the actual program itself possesses. Here's the story in its main elements:

On the basis of the best estimates, during the coming fiscal year the national government will be spending about 22 billion dollars. Spending for military and naval purposes will be at the rate of more than a billion dollars a month, or 15 billions in all. Non-military spending will probably continue to rise, and will consume the other seven billion dollars.

Offsetting revenue, it is said, will be only about nine billion dollars. On this basis, non-military spending will absorb almost 80 percent of federal revenues.

Thus the problem is posed. We have plumped for adequate defense, and the public is willing to pay for it. But coupled with this, the American people have the right to expect an almost hairshirt economy in the regular operations of government. Improved business conditions, a rising national income, should relieve some of the pressure of "emergency" spending, so roundly advocated in previous "bad times". More of federal revenues will be needed to help pay the big defense bill.

Little Red Riding Hood, the American public, can reasonably demand of her elected guardians, the Congress and officials of our government, that the elementary safeguard of placing a rein on civil expenditures should be observed. If something of the sort is not done, the Big Bad Wolf of inflation and fiscal uncertainty is likely to put in his unwelcome appearance.-Industrial Press Service.

# DOORS WIDE OPEN.

An example of just how well the banks are serving their communities is found in a survey recently made in California. It covers the first six months of 1940. In that period, 53 per cent of the state's commercial banks made 858,000 loans totaling \$997,000,000. More than 600,000 were new loans, the balance consisting of mortgage loans and renewals. Over 167,000 more new loans were made than in the comparable period the

year before. Another highly significant fact produced is that the banks are offering more credit than the demand can abhind? The American steel industry sorb. Business firms of the state thinks not, and it thinks so the more are using but 40 per cent of the open explosively since Leon Henderson, lines of credit maintained for their

use on the books of their banks. Finally, the survey indicates that levels of the first quarter of 1941 the banks are now being especially crease just granted of 10 cents an average new loan was \$602, as compared with \$1,302 in the first half of The Henderson order may prove to 1939. # British Tar Tells Of 70 Days Spent In Open Lifeboat

Two Survivors Drift 3,000 Miles After Germans Sank Their Ship.

NEW YORK .- A young British seaman, who complained about the cold weather here, told of drifting 70 days in a 16-foot lifeboat in a 3,000-mile voyage between the Azores and the Bahama islands.
Wilbert Roy Widdicombe, 24, is

one of the two survivors of the 5,596ton British freighter Anglo-Saxon, which was sunk on August 21, 500 miles southwest of the Azores by a German raider, the S. S. Weser. On October 30 Widdicombe, who is on his way to England, where he hopes to be commissioned in the Royal Air Force, and Robert Tapscott, 19 years old, drifted up on a beach on the north side of Eleuthera island, in the Bahamas. They crawled up the beach to the shade of a tree and fainted. Both were burned black from exposure.

They had been 28 days without food, except for a flying fish and a gar fish that had washed into their boat. They drank rain water, but for long periods during the 10 weeks at sea no rain fell. Widdicombe lost 80 pounds and Tapscott 60. They were the last of seven men who had climbed into the boat when the freighter sank; four committed suicide by jumping into the sea and one died of bullet wounds from a machine gun on the raider.

# Sailor Wants Revenge

For three months the sailors have been recuperating in Nassau. Taply well, is still on the island. Widdicombe, whose rugged features and browned skin belie his ordeal on the sea, talked calmly of his adventures. He seemed bored at times, but when he had completed his tale and remembered the days he had suffered on the small boat, he admitted that he was not ashamed to speak of revenge. He wants to even the score with the Nazis.

Widdicombe was at the wheel of the freighter at 8:20 p. m. when the raider struck. He saw it loom in the dark and at the same moment four shells hit the ship. One destroyed the only gun. The raider was only a hundred yards away when it spattered the deck with machine-gun bullets. According to Widdicombe, it waited until the men were in the lifeboats in the water and then mechanically peppered

each boat as the oars were lifted. "The sinking freighter was between our boat and the raider,' Widdicome explained. "Their lights didn't reach us, and we escaped. We wanted to head toward the Azores, but a northeast trade wind and the Gulf Stream made it impossible.

# Always They Prayed.

Chief Officer C. B. Denny took charge of the boat and divided the rations. The men found the usual stores, biscuit, four gallons of water and some boiled mutton. But the men's throats became parched without water and the meat stuck to their tongues. They told jokes and talked of early school days and their love affairs—and always they prayed.

Three of the men had been wounded, and after 10 days the first man died. "We lifted him over into the sea and some one said a prayer, Widdicombe said as he rapidly told how the rest had lost their minds and jumped into the sea. Two of them hugged each other and plunged from the stern of the boat. On the fifteenth day the water ran out and that evening the fifth man dived into

As the days went on, the existence of the two youths took on the unrealities of a horrible nightmare. "Sometimes we looked at each other and would stare with a sort of hate.' At times they would go day after day without talking, without thinking. This was the best way to keep sane, Widdicombe pointed out, "But I always thought of being rescued.

# Fight on Bindweed in Missouri Major Project

Bindweed is such a serious problem in Missouri that the Missouri College of Agriculture has adopted eradication of the crop as a major project, and with the groundwork of control laid in campaigns over a three-year period, specialists are hopeful of success of their program.

Surveys have indicated that bindweed can be found on farms all over the state, and only seven counties have reported that their fields are not afflicted.

It is roughly estimated that 20, 000 farms have bindweed, while the college has 1,900 farms practicing

The Missouri control program was begun three years ago with an educational campaign to enable people to identify bindweed and to realize its seriousness.

The next step was to demonstrate control practices, including the use of sodium chlorate for small patches and a two-year fallowing, "clean cultivation" program for large

The third step was to encourage farmers to use the methods of control. This step last year resulted in farmers pooling orders for chemi-

Control of the bindweed, which spreads underground with a vast root system, is less of a problem in Missouri than in some of the Far Western states where moisture is not plentiful. The sodium chlorate treatment is effective in proportion to the amount of rainfall and brings better results with copious rains. The clean cultivation program, too, is most effective when fields can be fallowed several times a year to the point where bindweed is starved

# Colombia Abounds With

Natural Endowments

The Republic of Colombia is the only country on the southern continent whose shores are washed by both the Atlantic and Pacific oceans, a study issued by the Columbia University Press, says. Colombia ranks fifth in size among Latin-American

Dr. Dwight C. Niner, the author, says that there are few areas on the earth's surface which can boast a more beautiful endowment-than Colombia. The gold and silver mines of Antioquis and Cauca rival those of Peru in the centuries of Spanish dominion and are by no means exhausted today. Platinum, copper, lead and coal are known to be plentiful, and from the quarries of Muzo and Coscuez come the finest emeralds in the world.

Soil and climate are well adapted for the growing of coffee, bananas, maize, cacao, cotton and sugar cane, while the forest yields dyewoods, mahogany, medicinal plants, orchids and vegetable ivory.

A recent estimate places the potential energy of the republic's streams in the neighborhood of 4,000,000 horse-power.

King George Regained Throne The Greeks kicked him out, then called him back to rule them. Thus George II, king of the Hellenes, is one of few monarchs who has lost and regained a crown.

George fled Greece in 1923, during an uprising against him, a year after his accession. A republic was established by plebiscite in 1924, continued for 10 years. Then the Greeks, following democratic principles which governed ancient Athens, voted again, this time to restore the monarchy. George returned, but the late Premier John Metaxas was made virtual dictator.

George II is no Greek, but a Dane. When Greek independence was achieved in 1821-29, Prince Otto of Bavaria was given the crown. He ruled for 29 years, was expelled in 1862. Prince William, son of King Christian IX of Denmark, was elected king, became George I. He was assassinated in 1913, succeeded by Constantine, who was deposed by Allied Powers in 1917.

# Tailless Sheep

Sheep without tails have been developed by the South Dakota experiment station, it was recently announced, after experimenting for 25 years in cross-breeding head of sheep imported from Siberia with American sheep.

Advantages of the tailless breed of sheep are many, according to the animal husbandmen-they are very hardy and good hustlers of their own food; they have no tails to be docked and there is an absence of blow flies common with long or imperfectly cut tails.

The first sheep, both male and female produced without tails was in 1924 after about 10 years of experimenting. It is believed that this flock of sheep is the only one of its kind in the world.

#### Few Heavyweight Babies Out of 8,890 babies delivered at the St. Louis City hospital in the past five years there were only 102 babies who weighed more than nine pounds. This is 1.1 per cent.

According to the hospital staff, its studies of the large babies gives little ground for the proud fathers to boast of the abnormal size of their offspring. The large baby, the staff reported, is not a sign of an extra healthy condition.

"In fact, it is liable to be a liability, not only at the time of birth, but also for some years afterward, said one staff member.

THE FARMER NEEDS NEW INDUSTRIES

Well, here we are in the old rocking chair again!

Things are happening fast, these days, and it seems like so many of them go by opposites.

Maybe some of our so-called heavy thinkers never heard of

A friend of ours had been having a siege of these burrowers in the lawn he takes much pride in. Naturally, he went after them,

CO ATT

with all the ingenuity he could muster. But you know how moles are. Every time he thought he had their runs all figured out, and the devices arranged, the moles themselves turned out to have burrowed off in another direction entirely

Take the excess profits tax we hear so much about. One of the aims in mind was to discourage bigness in business, although it has never been entirely clear to most thinking people why bigness, of itself, is undesirable. After all, there is not a man living whose daily requirements are not more richly realized because the resources of some big business provided clothing or equipment cheaper and better.

But the mole has gone off in another direction. As the thing works out, what actually happens is that the excess profits tax works definitely against the establishment and growth of new industries. And what does that do to the initiative that has kept America growing? (.

As a matter of sober fact, what does it do to rural America? We have talked here before about industrial uses for farm products being the real hope of an expanding market for the farmer. Yet this taxation principle actually discourages new industries from starting.

So, as we sit in our rocking chairs, mulling this and that about the future of farming, we discover that something that seemed to belong in another world entirely-to be the concern only of some legendary captain of industry-kicks right back into our own world of crops and markets and livelihood.

What the farmer needs is more industries, not fewer; new industries that will be built upon somebody's cleverness in using products that can be grown on the farm; new industries that will make things which are now luxuries for the few into everyday commodities for everybody; new industries that will give employment and provide wages which will make a healthy market for all farm products. If this reasoning is sound, and it is, then the farmer ought to be, for his own selfish sake, the greatest booster in the country for some kind of a set-up which will encourage these new industries to come into

And, of course, many of these new industries would be started in the small towns of the country, to get away from the congested situation of the great in-dustrial centers. That, in itself, would be a great boon to many a rural community, from many angles.

As we talk to people in cities, they seem to have the idea that farmers think differently about what makes the wheels go 'round than other people do. pression is that they do think differently, meaning more clearly, if they have all the facts to weigh. We wish there was less effort in this country to put a fence between agriculture and industry. If the farmer is not a business man, yes, even an industrialist, then words have lost their mean-

One measure of a business man is that he tries to do something constructive about things that affect his business. -22-

Lime Is 1.? "What time do we get to New York, George?"

Porter-We is due there at 1:15, unless you has set your watch by Eastern time, which would make it 2:15, then, of co'se, if you is going by daylight savings time, it would be 3:15, unless we is an hour an fifty minutes late-which we is.

Don't Eat Much Teacher-What animals eat less than any others?

Young Student-The moths, because they eat holes.

Bathes in Whisky Raiding an alleged bootlegger's Columbus, S. C., police could find no whisky, although the rattle of bottles was audible and the smell of liquor strong. Finally an officer smelled a tub in which one of the members of the household was still taking a bath. The man had been splashing away in whisky. Occupants and the tub were carted

away to headquarters.

# A Million Drunks!

Americans like facts and here are two which should be of importance to every one who ever took a drink. There are at least 200,000 chronic alcoholics in the United States to-

day, plus one million or more persons who . . . are in danger of becoming chronic alcoholics, according to Dr. Lawrence Kolb, assistant surgeon general of the United States Public Health Service.

Of 10 persons who drink, even "socially", three will become drunkards

and the seven will show the "effects" in their bodies some time, according to the late, famed Dr. Charles Mayo. Surest, fool-

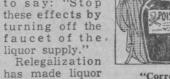

"A Million Alcoholics"

proof test to determine whether you are an alcoholic, according to the Keeley Institute, is to

ask yourself: "Can I take it or leave it alone?" The catch is that you not only have to be honest in your answer but then you have to prove it by "leaving it alone." The drinker who says he never gets drunk, who says "I could quit tomorrow if I wanted to" but whose nerves go to pieces when not anesthetized by alcohol, is an alcoholic and a medical

Alcoholism, growing by leaps and bounds since repeal according to the nation's mental hospitals, is just one of the effects of beer, wine and spirits which causes the W.C.T.U.

and other religious and temperance groups to say: "Stop these effects by turning off the faucet of the liquor supply. Relegalization

"Correct Labeling"

easily accessible to all Americans with every form of high-pressure merchandising being used to increase consumption—in other words to make more non-drinkers into

The reverse could also be true, social workers say, and all the human and economic costs of liquor be reduced by making it more difficult to secure.

YOUTH'S OPINION

Drinking doesn't help your personality, that's what students of a Tulsa, Okla., high school discovered in a recent survey, according to the

'Gestapo' Coined

The Nazis' Gestapo is merely a word coined from the first syllable of its three-word official title-the Geheime Staats Politzel.

Death Toll Drops The death rate from tuberculosis in the United States per 100,000 persons had decreased since 1910

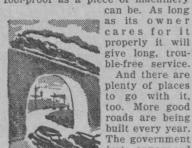

from 250 to 50. Shasta Daisies Shasta daisies will bloom themselves to death the first year they are planted unless some of the buds

are removed.

# Mileage Hints

By J. F. Winchester-Supervisor of Motor Vehicle Equip-ment, Esso Marketers

THE modern motor car is built to go places, as most any motorist will attest. It is powerful and fast. It rides smoothly and it is about as fool-proof as a piece of machinery can be. As long

properly it will give long, trouble-free service. And there are plenty of places to go with it, too. More good roads are being built every year. The government just announced

that in the last fiscal year 11,397 miles of modern highway were completed in the cooperative road building program of the Federal Government and the individual states. This program resulted also in the elimination of 414 railroad highway grade crossings at which cars previously had to slow down, stop, or wait.

Every year the motorist finds his way smoothed through the construction of new and improved highways, the elimination of grade crossings and bottle-necks, the building of parkways, and the introduction of new methods of traf-fic control designed to speed vehicu-

The road for the motorist is more open than ever before. Cars are faster, more powerful, easier to operate. Everything is in the motorist's favor. But, upon him devolves a responsibility. He should make it a practice to drive safely, to be considerate of others, and to keep his car in good mechanical condition. The greater the opportunities for the use of a car the more in-cumbent it becomes upon the driver to have his car serviced periodi-cally. It should be greased; the oil should be changed; the tires kept inflated; the wheels checked for alignment; the headlights should be adjusted; and every possible step should be taken to be sure it is in A-1 operating condition at all times.

# Executor's Sale of REAL ESTATE

By virtue of the power contained in the last will and testament of Isamiah E. Hawk, deceased, as well as by virtue of an order of the Orphans' Court of Carroll County, Maryland, the undersigned Executor of the said last will and testament will offer at public sale on the premises, on Middle Street, in Taneytown, in Carroll Co., April, 1941. Maryland, on

SATURDAY, MAY 3, 1941, at 1:00 o'clock, P. M, the real estate of the said decedent, consisting of HOUSE AND LOT,

situated on the northwest side of Middle Street, in Taneytown, in Carroll County, in the State of Maryland, having a frontage on the said street of 56 feet, and a depth of 217 feet to of 56 feet, and a depth of 217 feet to a public alley; being the same lot of ground which was conveyed to the said Isamiah E. Hawk by William M. Reindollar, Executor of Samuel Reindollar, deceased, by deed dated the tenth day of February, 1900, and recorded among the Land Records of said estate.

Given under our hands this 1st. day of corded among the Land Records of Carroll County in Liber J. H. B. No. 90, Folio 575 &c. The improvements VIRGIE ELIZABETH FITZ, WILLIAM B. YINGLING. 90, Folio 575 &c. The improvements consist of a well-built frame house, with slate roof, with bath room, nicely painted in good condition, arranged for two families; a good barn and other outhylidings. other outbuildings.

TERMS—One-third of the purchase money to be paid to the said Executor on the day of sale, or on ratification thereof by the said Court, and the residue in two equal payments, the one payable in three months and the other payable in six months from the day of sale, the credit payments to be secured by the notes or single bills of the purchaser or purchasers, with sufficient security, bearing interest from the day of sale; or all cash at the option of the purchaser or purchasers. A birthday party was hed at the home of Mr. and Mrs. David Little, on Saturday, April 12, in honor of their grand-daughter, Elizabeth Ann Fowler's first birthday. Eizabeth Ann Ward Beecher. was the recipient of many beautiful

The room and table were tastefully decorated, the color scheme being of purple and yellow. The centerpiece was a beautiful decorated birthday

cake with one candle. Refreshments were served to the following: Elizabeth Ann Fowler, Patricia Larue Burke, Lou Anna Zentz, Hazel Jean Luckenbaugh, Mrs. James Burke, Mrs. Leo Zentz, Mrs. Francis Shaum, Mrs. Luther Lucken-baugh, Mr. and Mrs. David Little and Mr. and Mrs. Sterling Fowler.

#### SHORTAGE OF FERTILIZER.

(Continued from First Page.)

Here is our occasional boarder, a Florida Phosphate Rock, all of the

The farmer, without question, needs must grow stronger. He always asks to be protected right at this time for for the local papers, and is intelliall the reasons mentioned above, not gent and well read. We've known to say anything of the possible incomplete fertilizers due to insufficient transportation of Florida Phosphate rail movement of phosphate rock.

Therefore, it is necessary that everyone interested in the above matter bring all pressure on the proper parties and see that proper vessels are maintained for the transportation of phosphate rock from Florida ports to not only northern fertilizer actories but also southern fertilizer factories.

These vessels will be needed and eded badly to transport the Florida Phosphate Rock necessary, in addition to whatever rail movement can be used. In other words, it will reuire both the services of vessels and rail to continue the movement of sufficient phosphate rock to insure ample fertilizer for the production of ample food crops and food stuffs for this country and our allies.

Productive plants in the aircraft industry nearly doubled during 1940, rising from about 12,000,000 sq. ft. at the beginning of the year to 22,-600,000 sq. ft.

#### MARYLAND'S TUBERCULOSIS CAMPAIGN.

Baltimore City and Baltimore coun-

ty are sprinkled with tuberculosis posters and pamphlets.

This is part of the educational campaign conducted by the Maryland Tuberculosis Association to further acquaint everyone with the facts about disease. This year the Association was aided by the Girl Scout Council of Baltimore City and Baltimore County, as each of its 200 troops distributed this material.

"Our educational work goes on all year," said William B. Matthews, Managing Director of the Maryland Tuberculosis Association. However, during the month of April, we call attention to the importance of the early discovery of this disease. Early discovery means early recovery, Mr. Matthews continued. The tragedy lies in the fact that 8 out of 10 patients entering the sanatorium are in the far advanced stages of tuberculosis, thereby making a cure a long and tedious task.

"This month, throughout the state, we wish to impress upon everyone that the 'White Plague' can be cured and prevented," Mr. Matthews con-

The Association also announced that the observance of National Ne-gro Health Week, celebrated in the counties during the first week of April, had been a success and that plans were now under way to cooperate with the negro health week committee of Baltimore City, which will hold its observance during the week of April 19th.

#### CARROLL CO. COUNCIL PARENT TEACHERS' ASS'N MEET.

The regular spring meeting of the Carroll County Council of Parent-Teacher Associations will be held in the auditorium of the Westminster High School on Friday evening, May 2, at 8:00 o'clock.

The program will be as follows: Invocation, Dr. Lawrence Little; group singing directed by Phillip S. Rover, Supervisor of music in the Carroll County schools; reading of the essays on 'The Preamble to the Constitution" by the two winners of the contest sponsored by the American Legion and the Board of Education. The winning essays will be selected from those submitted high school seniors and a medal will be awarded to the successful boy and

Special music will be presented, followed by reports from county chairman of the several committees. These reports will be given by Miss Katherine Fiscel, chairman of the library committee; Mrs. Lee Hoke, chairman of the health and safety comof the eight weekly contests there was a tie and two persons awarded electric roasters.

# FARM LOPICS

# STRIP CROPPING CHECKS EROSION

New Practice Preserves the Soil and Water.

By W. D. LEE (Extension Soil Conservationist, North Caro-lina State College.)

Increasing public interest in checking wasteful soil erosion is altering the traditional rectangular fields with straight rows so familiar in the American landscape.

A new practice known as stripcropping, resembling a marble cake because of its swirls, has been gaining increasing favor since the creation of the soil conservation service about seven years ago.

Three types of strip-cropping have come into general use in the United States to meet various conditions. Contour strip-cropping is the production of the ordinary farm crops in long, relatively narrow strips of variable width on which dense erosioncontrol crops alternate with cleantilled or erosion-permitting crops. The strips are placed crosswise of the line of slope approximately on the contour.

Field strip-cropping is the produc-tion of the regular farm crops in more or less uniform parallel strips laid out crosswise of the general slope but not parallel to the true contour. This is a modified form of contour strip-cropping and is applicable to uniform gradual slopes on soil which are resistant to erosion.

Wind strip - cropping, the third form, is the production of the regular farm crops in long, relatively narrow, straight, parallel strips placed crosswise of the direction of the prevailing wind without regard to the contour of the land. Wind strip-cropping is an effective agent in preventing wind erosion but may be of little value in conserving wa-

Strip-cropping, combined with contour tillage and terracing where necessary, has been proved by experiment stations of the soil conservation service and by co-operators in the various demonstration areas to be economical and effective and the most practical means of controlling erosion and conserving soil and water on cultivated land.

# Vegetarianism

The term vegetarianism came into use about the year 1847, but the doctrine is centuries old, having been advocated by Pythagoras, Plato and Plutarch and in later times by Rousseau, Shelley and Swedenborg.

# Airport Bases Increase

The number of airport, landing fields and seaplane bases in the United States increased by 204 from January to July, 1940, the Civil Aeronautics authority reports. They totaled 2,655 on July 1, 1940.

# Measuring Tree

To measure the length of a tree, measure the length of the tree's shadow and of your shadow. Multiply the length of the tree's shadow by your height, and divide by the length of your shadow.

# Bees in Control Box

A lineman in Newington, Conn., responding to complaints of interrupted service by telephone subscribers found a swarm of bees had started a honeycomb in a control

# Rat Population

It is estimated that the rat population is approximately equal to the human population (130,215,000) and that each rat does about \$2 worth of damage every year.

# Woman Heads Fire Fighters

# Village Milliner Organizes And Bosses Department With Efficiency.

SPANAWAY, WASH.—This rural community of 500 has a fire department replete with a creaking chemical truck and a fire chief.

The boss of the smoke-eaters is a woman-gracious and comely Mrs. Joseph Brewer, who sells hats in a Tacoma department store and otherwise thinks of holocausts where everything may go up in smoke unless she and her loyal crew arrive just in time.

Mrs. Brewer, in fact, organized Spanaway's volunteer fire department last summer when she began to remodel her house.

# Finds Bad Mess.

Things, she discovered, were in a terrible mess. Nobody bothered to fight fires. Crowds just stood around and enjoyed 'em. Being somewhat worried over her own future, she collected \$5 each from merchants and lesser amounts from families. With \$125 in her pocketbook, she shopped around for a fire truck. The woman fire chief came back with the chemical truck.

"It isn't much, but it'll do," she remarked. With some haggling, she persuaded the dealer to include 50

feet of hose. She called together the volunteers, who industriously polished and scrubbed the venerable truck into a semblance of what a smoke-wagon should look like. Then they practiced on trial runs.

They practiced some more. Spanaway had changed. There weren't

any more fires. The first real test "under fire" occurred with a blaze in an automobile located near the fire station. But the truck wasn't needed. A portable extinguisher turned the

# Holds Rehearsals.

Then the fire department heard one day about a fire at near-by Spanaway Lake. The volunteers steamed off in their truck. The blaze was out by the time they arrived.

Nowadays madame fire chief and her loyal crew have desultory fun with self-made fires. Whenever Mrs. Brewer worries over the mental trim of her volunteers, she builds a fire—in a properly safe place, of course.

The fire consists of inner tubes and crankcase oil. The action starts when Mrs. Brewer lights a match. The truck roars to the scene of the blaze, and by that time the flames are shooting 15 feet into the air. The fire is out and the fun is over in seven or eight minutes.

Mrs. Brewer is not flattered, she says, when someone inquires if she acts as siren as well as fire chief for the department.

# 'Kings of Crags'

Ten mountain goats are to be turned loose in the Crazy mountains of Montana. The plan is to start a new herd in that lofty wilderness. If the plan succeeds, it will restore "the kings of the crags" to a region where they roamed in large numbers half a century ago. It is proposed to catch the animals in the Flathead National Forest, in northwestern Montana, and to take them by airplane to their new home. Barney Brannin, a dude rancher in the Crazy mountains, has been elected to do the capturing.

# Economic Motives, Fascism

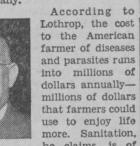

Economic motives drive people into fascism and communism only to a limited extent, says one noted authority. As a whole the originators of such doctrines are harmless philosophers really interested in human welfare. It is the practical leaders who are always ambitious and ruthless men who climb to power by appealing to the egotism and conceit of the masses.

# STOPPED!

# PROPER SANITATION SAVES MILLIONS ON FARMS EVERY YEAR

#### Just as the usefulness of millions of lives have been extended by giving greater attention to cleanliness, so can millions of dollars worth of poultry and livestock on American farms be saved by following comparable programs of sanitation, believes Grafton Lothrop, sanitation expert with the Ralston Purina Company.

that farmers could use to enjoy life more. Sanitation. he claims, is of

Grafton Lothrop

tremendous importance to the American farmer. At the Purina Experimental Farm, Gray Summit, Mo., the importance of hog sanitation has been carefully studied, and the results show that pigs and thereby insure greater profits, he reports.

Sows are scrubbed with plenty of soap and warm water, and the day before they are to farrow, they are sprayed with a one percent solution of Cre-So-Fec. to kill any germs or worm eggs that may remain. This simple sanitation program at

the Purina Experimental Farm, Lothrop believes, shares the credit for the fact that during the last two years, of a total of 256 litters farrowed, an average of 9.3 pigs per litter have been weaned at nine weeks. This is just one example of the extra money made at the Purina Farm through Sanitation. This Farm does equally well at its dairy, poultry, fox, mink, rabbit, and dog pal court probation officer. units with sanitation programs.

# Pretty Stowaway Is Found Hiding in Engine Room.

SAN DIEGO, CALIF.—If Shirley Dale, who is pretty and used to sell watches for a Flint, Mich., jewelry store, had been caught with a batch of secret blue prints tucked in her bosom, she could hardly have embarrassed the naval intelligence

Miss Dale, in regulation navy dungarees and a blue sweater, her long, black hair under a seaman's white cap, was discovered hiding behind the motors of the U.S.S. Long. The destroyer's motors were turning; it was ready to sail for Hawaii.

Her face smudged with grease, she was hauled before intelligence officers, who are taking wartime precautions to keep saboteurs and spies off warships.

She said she was 23 years old, and getting aboard was "easy."

"I just took a shoreboat with a bunch of sailors, ambled up the proper cleanliness can do much to save | companionway past the guards and slipped into the engine room," she explained. Her plans for eating en route to Hawaii were nebulous.

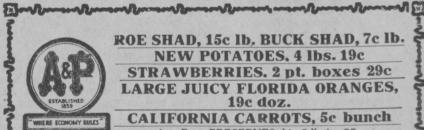

As to her reasons for wanting to go to Hawaii, she said that Flint was "downright cold." She hitchhiked to California, but when she arrived, decided she might as well go on to Hawaii, where she understood it was warmer.

"I couldn't afford to pay for a ticket to Hawaii," she said, "so I decided to stow away. I thought it I got on a warship and it got far enough out to sea, it wouldn't turn back when I was found."

The officers turned her over to Gertrude Wood, San Diego munici-

# THE RIGHT MAN

By MEREDITH SCHOLL

(Associated Newspapers.)
WNU Service. OW there's a girl," said Allen Cotter, pointing over the heads of the

dancers, "who's worth writing home about." Tim Bingham, who stood at Allen's elbow at one end of the stag line, nodded. "One in a million," he agreed. "It's a pity she couldn't have done better when she picked a husband for herself."

"Married Ames Forbes, didn't she? What's wrong with him? As I remember Ames, he wasn't a bad

egg."
"It isn't that. It's simply that he doesn't appreciate Dora. Take tonight, for example. He hasn't danced with her once. He acts like he'd never met the girl."

Allen eased away from the stag line and found a seat in a remote corner of the room. Strangely, the things that Tim had just said were an accurate interpretation of his own thoughts. Long ago he and Dora had been sweethearts. And now as Allen reflected upon the variety of experiences and adventures which he had undergone since leaving Cooksville, he told himself for the hundredth time that nothing in his life had been much finer or beautiful than those sweetheart days with Dora Mead.

And now Dora was married! Well, he had expected that. He had expected it even though down deep in his heart he had half hoped all during the train ride from Boston to Cooksville that she wouldn't be.

Allen smiled wistfully as he recalled his disappointment. Of course it was silly and entirely unreasonable. After all, you couldn't expect

She seemed happy and contented and decidedly pleased with the

a girl as sweet and lovely and as fine as Dora Mead to remain single all her life.

After the first shock of it Allen hadn't been wholly displeased. To begin with, Ames Forbes was about as fine a youth as Cooksville had to offer. He had been in their class in high school, and since graduation had become a credit to his town and his family.

Allen remembered what Tim Bingham had just told him. Well, you couldn't tell about men these days. The thing was puzzling. Allen sank back in the chair which he had located in an alcove behind a palm tree and began to brood. Could it be that Dora and Ames were unhappy? Could it be that Ames had actually tired of his charming young wife? It seemed incredible. Time had, if anything, added to Dora's loveliness and charm. It didn't seem quite possible that any man could

tire of her. And yet it was obvious that Ames had other interests when at a party, besides devoting his attention to his wife. During the week that Allen had been in Cooksville he had seen a good deal of the pair, and not once had he witnessed any demonstration of affection between them.

Unconsciously Allen clenched his fists. If Ames were making her unhappy .

A young couple were dancing on the other side of the palm tree. It was a dreamy waltz and the lights had been dimmed. Allen couldn't distinguish the figures very clearly, but he knew, without making half an effort, that the girl was Dora. Her head was resting on her partner's shoulder. She seemed happy and contented and decidedly pleased

with the dance. As Allen watched, the music stopped and during the brief interval before the orchestra swung into the encore, Allen saw Dora's partner take hold of the girl's arm and lead her quickly into the alcove where sat Allen.

Allen was not naturally a curious person. Other people's business was their own. And ordinarily he would have stood up and moved away, leaving the young couple to their own devices. But this situation was a little different. A lot different, Allen thought. He was sure that Dora and her partner had not seen him. The alcove was only dimly lighted and the palm tree separated them. Without moving he could witness quite clearly the scene that was being enacted within a few feet of him.

Instantly upon sitting down, Dora had reached up and drawn the man's face down to her own. He crushed her to him and held her close for, it seemed, an eternity.

And in that moment something happened inside of Allen that shattered every beautiful illusion and optimistic outlook he had ever en-

tertained toward life and women. No one, of all the people Allen had ever known, could have so completely changed his whole viewpoint as did Dora in that moment when he saw her in the arms of another man, disloyal to her husband, acting as would any cheap, common

Allen cursed under his breath and wished he were anywhere but there in the alcove.

Of one thing he was sure. He had misjudged Ames Forbes. It was Dora's fault. Dora had been the deceiver, the cause of their trouble. And Ames, good, noble Ames, had gone on without saying a word, covering up that misery he must have felt, merely being polite to his wife in public without once indicating he hated her for her treachery.

Suddenly a fierce anger welled up in Allen's soul. It wasn't fair. It wasn't fair to Ames or to him. Dora had been his guiding light as much as she'd been Ames'. She had served now to shatter his every illusion as she had served to shatter those of

Allen found himself on his feet. He wasn't thinking clearly, but he knew he was going to do something

The music had stopped again. The lights were brighter. Dora and her partner were standing up.

At that moment, Allen blindly enraged, swept aside the palm leaves and stepped in front of them. With one hand he reached up, grabbed hold of the collar of Dora's partner's coat, and jerked him about so that he could look into his face.

Dora screamed. The man whose collar was suddenly tightened by Allen's grip swore in sudden surprise. Dancers who were walking off the floor stopped and stared. And Allen Cotter's mouth sagged open and a slow flush spread over his face and up about his temples.

For the man with whom Dora had kept her rendezvous away from the prying eyes of the public was Ames Forbes, her husband!

# Earliest Known Windows

Were Merely 'Openings' Windows were originally nothing more than openings in a wall for light and ventilation. Our word window is supposed to

be derived from two Scandinavian words meaning "wind eye." Some authorities, however, suppose the word to have been originally "wind-door," referring to the

doors or shutters to prevent the wind from blowing through the open-The ancient Egyptians and Greeks

used thin slabs of marble for window-panes while the Chinese used rice paper for the same purpose. In Genesis we read that the Lord told Noah, "A window shalt thou

make to the ark," and that after forty days Noah "opened the window that he had made.' Referring to the temple built by Solomon, I Kings 6:4 says: "And

for the house he made windows of The early Romans appear to have made window-panes, perhaps of

transparent shells, to illuminate their baths.

Window-glass as we know it now was probably first made in the Twelfth century by the Anglo-Saxon monk Theophilus.

Although some window glass was made at the early glassworks at Jamestown, in Virginia, glass window-panes were not common in America until about the time of the Revolution.

# Alaska Air Bases

When William Seward bought Alaska from the Russians, 73 years ago, paying them \$7,200,000, the purchase was denounced as "Seward's Folly." The frozen northern waste, it was held, was hardly worth a dollar, let alone the price paid. But today, to protect Alaska, the United States is preparing to lay out \$25,000,000 on five air bases, and the governor of the territory says five more bases will be needed.

Alaska from its fisheries alone adds more to the national income of the United States each year than the capital sum it is proposed to spend on air bases. The frozen waste of 80 years ago has become an asset of high value with fisheries, mineral, timber and agricultural resources. Besides, it is the republic's defense outpost to the west, and in a world full of peril, like the one in which we live, outposts are of first impor-

The Alaska air bases are intended primarily, of course, for the protection of the United States. They also serve to protect Canada, and British Columbia can hardly be indifferent to the proposal to place one of them on Metlakatla island, in the Panhandle, just south of Ketchikan.

# Ribs of Beef Roast

For a really superior roast, standing ribs of beef should weigh at least six pounds. For the small family, this may seem prohibitive at first thought, but in reality a large beef roast may make several return appearances with equal success. A two rib roast or, preferably, a three rib roast is large enough to be roasted fat side up, using the rib bones as a rack so that while cooking the melted fat will drip down in a selfbasting process. At the first appearance for a company dinner, the thick center or "eye" muscles of the roast will make a "sure-toplease" meat service. Green pepper cups filled with escalloped corn, pan browned potatoes and a gardenfresh salad would be good compan-

# Corn Cobs Valueless

Ground corn cobs have practically no feeding value for poultry. Consequently it is much better to feed ground shelled corn than corn and cob meal. The cob bulk simply means so much useless filler in the

# Farm Notes

Whatever the outcome of the European war, the prospect is for small exports in the years ahead, according to the U.S. bureau of agricultural economics.

Higher agricultural income is the principal reason why an increasing number of tenant farmers have bought farms this year, says the Farm Credit administration.

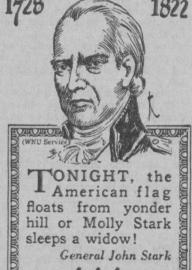

The use of nitrogen fertilizers in the United States practically doubled in each of the 10 years between 1880 and 1910, when it reached a total of 130,000 tons. The 1937 figure was 433,000 tons.

Farm labor is likely to be scarcer and farm wages higher in 1941 than during the past year, farm economists say.

Argentina wheat production varies from year to year, but over a period of years it about equals that of farms in Kansas and North Dakota.

Argentina, Brazil and Uruguay customarily produce about 25 per cent of the world's beef and veal. The United States produces about 30 per cent.

THE EARLY CHURCH MEETING **HUMAN NEEDS** 

LESSON TEXT—Acts 4:32-35; 6:1-7.
GOLDEN TEXT—And the multitude of them that believed were of one heart and of one soul.—Acts 4:32.

Machinery without power is use less—that is why in the lesson of last Sunday the power of the Holy Spirit was recognized as being indispensable in the church. One sometimes wonders whether we do not now have more machinery than power, and thus fail in our high calling.

Power, on the other hand, reaches its greatest usefulness through the organization of well-planned machinery. The church soon found that its activities, simple at the beginning, had become more complex, calling for suitable organization, if it was to best serve the needs of its own people and of those round about it. In so organizing they did not forget this fundamental purpose of the church, nor did they forsake the true source of power.

I. Sharing With the Brethren (4:

Love for one another prompted the Christian brethren to meet each other's need by sharing, by holding all they owned for the common good. This was not (as some would have us believe) a type of communism. It was purely voluntary (see Acts 5:4), temporary, and local. It was practiced only in Jerusalem and only for a short time. It was an expression of Christian brotherhood and liberality which is worthy of our consideration.

The duty and privilege of sharing material as well as spiritual blessings is a part of Christian fellowship. Those in the church who have should willingly share with those who have not. Some churches have so effectively carried out this plan today that none of their members is on relief. Not every church can do that, but much more could be done if we had the considerate spirit of the early Christian church, which was indeed the spirit of Christ.

II. Caring for the Unfortunate (6:1, 3, 5, 6).

The church had come through its first real persecution (Acts 5:12-42) with real victory and assurance (5: 42), only to face an internal difficul-Wherever the Lord blesses, the enemy comes to destroy. Whenever a door of service opens, there are many adversaries (I Cor. 16:9).

There were two groups in the church-the Hebrew Christians, and those with a Greek background. Among the poor to whom daily distribution of help must be made were many widows. Suddenly the Grecian group began to note (or think they noted, which was just as disturbing) that their widows were being neglected.

Notice that men of good character and spirituality were chosen to serve, and that all of them bore Greek names. The Greeks, who were doubtless in the minority in the Jerusalem church, had a complaint, so those who were appointed to serve were their own people. We might have been tempted to appoint a committee made up of half from each side (and thus to continue the dissension), but not so here where grace and wisdom from above controlled.

Do not fail to observe that there was here a well-ordered plan to care for the weak and unfortunate. No Christian church should fail in that

important ministry. III. Preaching the Word (vv. 2,

Social service is necessary—the church should make intelligent provision for its poor and its widowsbut it makes a fatal mistake when such service becomes more important than the preaching and teaching of God's Word. Let those appointed to that blessed ministry find joy in sanctified social service, but never let it pre-empt the place of evangelism.

Certainly such service must not become the all-absorbing task of the one who has been set by God as the messenger to the church—the spiritual shepherd of the flock. Many a preacher has lost himself in such work, and failed to study and pray so that he might be prepared to preach the Word in power and with conviction. Too many preachers are attempting to shake a sermon out of their coat sleeves on Saturday night (as Joseph Parker put it) only to find that their ministry grows leaner and leaner until, reaching the years when there should be a matured richness and sweetness in their ministry of the Word, they find their message dead, dull and

Such folly ill befits the Christian church of its ministers. Perhaps some minister who reads these lines should change his ways, and perchance many a church officer who reads them should realize that he has been driving his preacher into work which, while important, should be (for him, at least) secondary. First things first, in God's own order-that is the road of power and blessing.

# IMPROVED IT COSTS 18c TO FEED EACH HEN PER MONTH. **GEORGIA FIGURES SHOW**

Only Laying Hens are Able to Pay Their Share of the Feed Bill.

Poultry raisers who have never figured their costs will be amazed at the Progress Report for July of the 14th Georgia National Egg Laying Test"

which shows that it costs approximately 18c to feed a hen during a single month. Because of this comparatively high cost of keeping a hen, it is extremely

important to get as many eggs as possible during the months of September, October, November and December when egg prices are at their peak, reminds C. S. Johnson, head of the poultry department, Purina Mills.

Unless special attention is given the flock during the fall and early winter months, not enough eggs will be produced to pay expenses, let alone a profit, he says. Left to herself, a hen won't start to lay until she gets the "spring urge." Often that isn't until February and March, when eggs are plentiful and prices drop.

"It's pretty expensive putting 18c worth of feed into a hen each month during the fall and winter just to have her around for a few eggs in the spring and summer," Johnson maintains. "It's the hens that lay in the fall and winter that make the largest profits. When a hen isn't laying eggs, she isn't paying

for her keep, let alone making a profit." Editor's note: How to get winter eggs is explained in Purina Mills' latest poultry bulletin, obtainable without charge from our local Checkerboard

# Girl Pulls Off Patriotic

# Pants as Mexico Cheers

MEXICO CITY. — "Never," said Verduguillo, the famous bull fight authority, "has anything like it happened at a bull fight.'

He was referring to the compliment paid Matador Carlos Arruza by a beautiful American girl at the

Arruza had just finished killing a The young woman raced down to the edge of the ring from the seventh row, shrieking her admiration, removed her panties and flung them at the matador. They were a flaming red.

Arruza had no time to recover from his amazement, for she had removed another pair, which were white, and they were sailing through the air in his general direction.

Even before they hit the ground she was taking off a third pair, in blue, and they came sailing out after the other two.

By this time the crowd, which had been applauding Arruza, began applauding the girl. Her identity was a mystery, but all the Mexicans were convinced she was an American and a patriotic American—they thought so because of the colors of her panties.

# Michigan Boy, 6, Drowns

As Mother Saves Brother BATTLE CREEK, MICH.-Mrs. Edmund Jennings, wife of a city fireman, dashed onto the ice of Goguac lake to rescue her son, Stephen, six years old, who had fallen through the ice 40 feet offshore.

The mother herself broke through the ice and, as she struggled out of the water, turned to see that her second son, Edmund, four, had fallen

The mother called to Stephen to cling to an ice cake while she carried Edmund to safety. But when she turned back to aid Stephen, she saw him lose his grasp, slip under the surface and drown. Firemen recovered the body.

# Minnie, the Tame Mink,

Even Plays With Dogs CLEVELAND. The Roy Millers of Butternut Ridge, Ohio, believe they have the only tame mink in this section of the country. Her name is Minnie.

Mink are ferocious members of the weasel family, and it's unusual for one to be tamed. Minnie, however, plays contentedly with the Millers' eight-month-old son, Herbert. She is also friendly with their two

# Grinding Roughage Not Very Advisable

Farmers are fooling themselves and not their cattle when they grind up corn fodder and stemmy hay so fine the animals are unable to separate the good material from the bad, according to R. R. Snapp, professor of beef cattle husbandry at the University of Illinois college of agriculture.

"It is true that a given amount of ground fodder will go somewhat further than it would if it were fed whole. However, the unpalatable roughage tend to dilute good feed, making for less patability and digestibility for the ration as a whole," Snapp ex-

# Controlling Lice

Lice can be controlled on calves and heifers without recourse to dips and other "wet" preparations. Excellent results can be obtained with a mixture of one part sodium fluorice and two parts of ordinary flour.

This is dusted lightly over the backs of the animals from a perforated can and worked into the base of the hair with the fingers. One application is usually adequate. Sodium flourice is poisonous and should be handled carefully.

# VITAMIN NEEDS OF CHICKS ARE HIGH. RESEARCH SHOWS

Ingredients Discovered for Adding Vitamins.

"Because of the rapidity with which the size of a baby chick's body increases, chick rations must have a high vitamin content," reports Dr. H. J. Smith, director of research for Purina

Dr. Smith states that research at the Purina Laboratories has shown that the vitamins

en ingredients have been discovered for adding these vitamins to a ration to meet the needs of baby

most apt to be

lacking in baby

chick rations are

A, D, and G. Prov-

chicks. "Pur-a-tene," Dr. Smith explains, "is a concentrated source of pro-vitamin A. Fish oils supply vitamin D. Puri-Flave supplies not only vitamin G, the filtrate factor (pantothenic acid), but also Vitamin B, which is necessary for the normal development of chicks, and B, which has a great deal to do with metabolism.

"At the Purina Research Laboratories we're constantly studying the vitamin requirements of baby chicks and searching out new methods for meeting these requirements," Dr. Smith reports. "Last year more than 40,000 chicks were used to carry out these tests. After our Laboratories have discovered something that produces better chicks, we take it out to our Experimental Farm for extensive trials to see if it is practical. Then it's not hard for us to decide if this new discovery should be included in our chick starting ration."

In commenting on chick starting rations, Dr. Smith emphasized strongly the importance of giving baby chicks a ration into which the vitamin carriers are so carefully mixed that every thimble-full carries its full share, as that is the amount a baby chick eats daily the first few days of its life.

# Winner Of The Grand Prize Electric RANGE

# WINNER OF THE FINAL WEEK'S CONTEST

To Mrs. Wilson go our heartiest congratulations and the Grend Prize of a Westinghouse Electric Range (Model AC64 complete with clock) as well as the final weekly prize of a Westinghouse Automatic Electric Roaster (Model RRA-84) or her choice of other electric appliances.

To you weekly prize winners again congratulations, and to those of you who competed less successfully, our sincere thanks for your interest and your many excellent entries.

It was no easy task to judge the hundreds of fine letters which came in but you may rest assured that every single one received careful consideration.

From these letters we learned much about the safety features that appeal to you most, such as absence of flame, fumes, smoke and odors; the complete control of electric heat which eliminates worries about over heating or draughts causing flare-ups or blow-outs; the absence of inflammable fuels, reducing the danger of fires and explosions; the fact that no flues, pipes, or tanks are necessary and that fuel worries and hazards can be forgotten; the complete insulation that ends any worries about burns from hot stoves; the fact that no harm can come to children—and these are only a part of the story that proves beyond doubt that THE ELECTRIC WAY IS THE SAFEST WAY TO COOK.

The POTOMAC EDISON CO.

# War of Nerves Is Waged; Imperial Valley vs. Ducks

# Cows Cannot Sleep Nights And Rapidly Are Losing Weight.

BRAWLEY. CALIF.-The cows around here are bothered. can't sleep nights and they're losing weight rapidly. Things they can't quite understand are happening in their meadows.

But if the bossies could pull themselves out of their bovine blankness they would blame it all on Robert Hart, employee of the California fish and game department.

Hart likes cows. In fact, he likes all members of the animal kingdom. It's just that he's got a job to do no matter how unusual it is. He scares ducks.

The farmers in California's Imperial Valley have enlisted the aid of the government in fighting a new menace-wild ducks. Whole clans of the waterfowl have descended on Imperial Valley crops and threaten to destroy them unless the government can find some way to frighten them over to less green pastures.

That's where Hart comes in. He's the fellow the fish and game department has selected to frighten away the usually welcome fowl.

# Farmers to Carry On.

When Hart finally finds the easiest, quickest and most effective way to scare the ducks, his job will be done. Then he'll turn over his findings to the farmers and let them carry on.

But the catch comes in finding the method and Hart will admit readily it isn't as easy as it might sound. You don't just yell "Boo!"

Hart has discovered several effective means of frightening the canvasbacks and their relatives. Trouble is, he says, they're too effective. Not only do the ducks take off, but so do the cows, chickens, and other farm animals.

"Light scares them more than anything else," Hart explained. "The beam from a powerful flash-light shot over on alfalfa fields will scatter them easily . . . but that's not too permanent.

The crash-bang system is very good, too, according to Hart, but that, naturally, has its disadvan-tages. For one thing it upsets the

# Shotgun Also Effective.

Hart sometimes uses a shotgun, aiming high over the fields, and the discharge will scatter the birds for several hours, if not for good. Tracer bullets may also be used in rifles to frighten them but they return as soon as the streaks have disappeared from the sky.

Hart says he also uses a four-inch pipe sealed at one end and injects a powder bomb into the pipe. He lights it, runs . . . bang! The ducks go away for awhile. (This is the method that disturbs the cows the

on firecracke place in Hart's experimental frightproducers, but the "cracker" is even more nerve-wracking than the homemade bombs.

Hart sticks to his theory that light is the best duck frightener and he believes he might have the solution in a simple device made from an automobile battery, an alarm clock, an electric motor and a searchlight. This device is set to light up for approximately 1 minute out of every When it lights it makes three turns before going off, and keeps the ducks on the move all night.

# U. S. Army Plans Huge Supply Depot in Utah

OGDEN, UTAH.—One of the largest supply depots ever planned by the army is beginning to take form northwest of Ogden as workmen hasten preliminary construction on 8 of the 104 warehouses that eventually will constitute the Ogden depot.

The first eight warehouses are being built by a Minnesota firm under a \$1,705,000 contract. Total cost of the entire project is estimated by the army quartermaster corps at \$14,000,000. No definite date has been set for completion of the entire

The huge buildings of the depot will make ordinary warehouses look small. Each of the storage structures will be 182 feet wide and 602 feet long. Railroad tracks will run down one side of each building; a truck loading dock down the other.

More than 125 miles of railroad track will be laid at the depotmore trackage than used by the Ogden union station, one of the largest railroad terminals in the West.

The 104 warehouses are designed to hold equipment for more than 600,000 troops. The depot will serve all army posts west of Chicago from its strategic location, which is almost equidistant from all important Pacific coast defense centers.

# Elderly Widower Cops

Apple Pie-Baking Prize SPRINGFIELD, MASS.-A 75year-old widower, who learned the hard way over the kitchen stove, won the Pioneer valley apple pie-

making championship recently. In outclassing some of the best woman cooks in New England at the valley's apple festival, F. J. Mc-Carthy of Springfield said that for 34 years since his wife died he has "kept house-and done the baking for the family."

WON'T CRACK OR PEEL

STAYS ELASTIC! Believe it or not-your house swells in summer and contracts in winter. Even daytime heat and night time cold expands and contracts the wood surfaces of your home. It takes an elastic paint to stay on

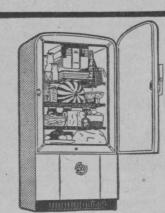

without cracking or peeling. Lucas Tinted Gloss is made to flex with changing temperatures. Stays smooth and beautiful years longer! You can't equal Lucas Tinted Gloss by paying less. And it's foolish COME IN AND SEE THE NEW Lucas PAINT PATTERNS
