Frock, Ex-plorer adviser, assisted by Patrol leaders Robert Bowers, Donald Law-war and Packet Santa As on the last yer, and Robert Sentz. As on the last occasion, collections will also be made in Greenville and Mayberry and along the Westminster road. A series of outdoor events planned by Patrol leader Robert Bowers has highlighted the past four Thursdays' scout meetings. One was devoted to a trial of eight different types of games, a vote being taken on their appeal, after which Mr. Frock outlined the essential work for firemanship merit badge. An outstanding program was carried out one evening at Wiley's Dam on the property of Mr. Kiser with a patrol competition involving night compass work in locating an injured companion, transporting him to the campfire, and ad-ministering first aid. A water boiling contest in Sauble's woods was copped by the Foxes, who also did the same on First Aid in Brown's woods, but there they were forced to yield honors in blink-er signaling by Morse code to the Raccoon team of Larry Eckard, John Perry, Larry Martin. During this time the Pine Trees under the leadership Robert Sentz and Kenneth Frock have been doing a nice little job of catching up by their performance in meeting attendance, uniform, and dues. Junior assistant scoutmaster Alexander, advancement recorder, re-ports the Pine Trees also active in tests for higher scout rank, accom-plished principally on the camping trip to Wiley's Dam taken with Scoutmaster Thomas. Suddenly I felt a little hand in mine very close beside me leaning against me heavily. I looked down quickly and there was a little five year old girl whom I had never seen looking up at me with the most pensive brown eyes I had ever looked into and as we stood alone in the silent room, she said "THAT'S MY MAMA".

Years ago, I recall another story not quite as sad—two young bashful boys were in the dime store trying to select a Mother's Day card and to select a Mother's Day card and, they were talking it over rather shyly in presenting such a card with a few loving words. MOTHER'S DAY

Mothers work is never done. From early morn till late at night she labors on.

The man may be the bread earner but what would he do if mother did not toil and sweat over the hot stove to bake the bread.

Man is by nature a duty animal while woman is busy every minute either at the wash tub or with scouring utensils. God bless ' her. What would we do without her. Few men are so constituted that they prepare and provide for the coming day. Man's thoughts are bounded by the day while a woman's reach thru the year.

When fruit is in season a man will eat it and give little thought for the morrow. A woman's mind runs to canning and preserving for the future use of the family. A man left to himself would be a walking Sam Patch while a woman with nimble fingers sees every tatter and tear.

To her Ben Franklin's "A stitch in time saves nine" is a reality. She leaves nothing to chance. No, a woman's work is never done. W. J. H.

Mother's Day grew out of a daughter's love for her mother. True ove is the basis of the noblest and best in all experiences of life. Moth-er's Day is observed in England, France, Denmark, Sweden, China, Japan, India Hawaii, the Sandwich Islands, Samoa, Palestine, and other countries from one end of the globe to the other. In Mexico the holiday lasts for two days. The 'mustard seed' of love has grown into a great tree until its branches cover the earth.

In honor of the day a special Unit-ed States postage stamp was issued in 1934 bearing the world famous picture of Whistler's Mother. Mother's Day as we know it was first suggested in 1907 by Miss Anna Jarvis, of Philadelphia. Miss Jarvis's mother, Mrs. Anna Reeves Jarvis was the wife of a minister, the moth-er of eleven children and the proud er of eleven children, and the proud owner of a flower garden at the home in West Virginia. Mrs. Jarvis found real pleasure in sharing her flowers with those who had none, and she was known all over town for her great kind heart. Because of the mother's passion for flowers, it was natural that her daughter, years later, should choose one as a symbol of "the Mother's Day." The flower selected was a carnation.

Ann Hark in speaking of the white carnation has this to say: "The whiteness of the blossom.... represents the purity of motherhood, the calyx symbolizes life, its frag-rance is like the incense of a mother's prayers, its wide field of growth exemplifies the boundless charity of a mother's love; its enduring charac-teristics, her fidelity. And, crowning touch of all, the carnation's habit of folding its faded petals to its heart instead of dropping them,...illus-trates as no other picture could the undying quality of a mother's love." Great men of history have paid paid tribute to their mothers. Lincoln

"All that I am or hope to be, I owe to my angel mother. Blessing on her memory.

Years later another famous Amer-

ican spoke these tender words: "My mother was the making of me," said Edison, "she was so true, so sure of me, and I felt I had someone to live for, someone I must not disappoint.' "A kiss from my mother made me

a painter", said Benjamin West. A century ago, Victor Hugo gave expression to these words:

"Mother's arms are made of tenderness, and sweet sleep blesses the

child who lies therein.' Sir Edwin Arnold:

"Don't poets know Better than others, God can't be always everywhere;

and, so, Invented Mothers.

180 HORSEPOWER

The new Chrysler Hemispherical Combustion Chamber, heart of the finest car engine built today. In this dome-topped area, you see the only ideal combustion chamber . . . the only way to develop full combustion, full compression, full work and value from every drop of fuel!

With so many engines claiming newness . . . how can we call FirePower the only new type engine today? The answer's very simple, and one you ought to know before you invest in a car. The fact is that engine "improvements" happen every year ... but a basically new motor car engine is a very rare thing. And FirePower is the most basic new development since Chrysler introduced high-compression in 1924!

To get to the heart of the matter, just go to the heart of the engine . . . the combustion chamber where the spark fires gas into power. Here Chrysler brings you something no car has had till now ... a Hemispherical combustion chamber . . . the only perfect and ideal combustion chamber in any passenger car. Here the same amount of gasoline delivers you

What this means to the man at FirePower's wheel is impossible to tell you till you take that wheel yourself. FirePower's 180 horsepower can outperform any other engine on the road, even on regular grade gas.

Remember, too, that Chrysler now offers the wondrous road-ease of new Oriflow shock absorbers with twice the shock-absorbing power of any others . . . and the exclusive safety and delight of Hydraguide power steering* which takes four-fifths of the work out of steering! a two-year siege, fell to the batter-

ing-rams of the Assyrian army, and over 27,000 leading citizens were deported, that was the end of Is-

But what were the details? What, in particular, did the nation of Israel do that was wicked?

Reading the prophet Amos will give many of the answers. At the time he preached, by all chamberof-commerce standards Israel was at the peak of production and prosperity. But he foresaw doom around the corner, and he gave reasons. He called a spade a spade. Reading him, or even reading the balder accounts in Kings, we can see the collapse was no mystery.

Other Gods

ONE thing fundamentally wrong with Israel was idolatry. This was not the simple matter of making carved images; it meant taking some other "god" to be the true God.

We know what the religions of Chemish and Molech and Baal were like; they were thoroughly bad. In the law of the true God, life and purity were regarded as sacred; life and purity under these other gods were held cheap. But one can see from reading Amos that what the people of Israel really worshipped was still another idol to whom no statue was erected: their own pleasures. Too many citizens didn't care what happened to the country, so long as they could get their liquor. Well, let us not read the Old Testament from mere curiosity. What about our own nation, our own people and times? The United Stewardship Council (now the Joint Department of Stewardship of the National Council of the Churches of Christ in the U.S.A.) reports that every year since 1934, excepting 1936, has shown an increase in giving through the churches.

But-the percent of the increase is not so large as the increase of annual income. The increase for contributions through the church of God is less, far less, than the increase in spending for alcoholic liquors, soft drinks, candy, football games, jewelry, and a multitude of other things. We, like Israel, are putting God last!

Your Congressmen:

"No more TAX MONEY

SPENDING"

for NON-DEFENSE

Let's all blow the whistle on this character! He's trying to grab YOUR tax money for unnecessary schemes like Socialized Medicine and Political Electricity . . . and he's doing it in the name of defense!

Real Americans don't want Socialism at any time, and any socialistic scheme now is doubly dangerous, because we just can't pay for both our war effort and wasteful political ideas!

Let's INSIST that YOUR TAX DOLLARS be spent only for REAL defense efforts.

The business-managed electric industry is the one industry that has doubled its capacity, and reduced the cost.

• So, your government need not spend your tax money for Public Power (Political Electricity).
