COMMUNITY PROJECTS

Jaycees Working for the Interest of Taneytown

Interest of Taneytown

This Saturday morning the Taneytown Junior Chamber of Commerce will sponsor its first food sale at the Firemen's Hall. The Jaycees are an organization whose goal is to dedicate themselves to the services of the community. This food sale and several other forthcoming activities will be sponsored in order to finance many worthwhile projects which will be of great benefit to our town. It is their desire not to go to the people to ask for donations to carry on these activities, but instead to earn the money by working together and offering to the public something they know will be very useful to them. This is of benefit to the public and it provides the necessary finances for the Jaycees in their community work. In addition to the food sale this week the chamber will sell brooms during March, the cleaning-up month. All profits realized in these activities will go back into community betterment in some form.

URGED TO VACCINATE

Advises This Protection

A survey of our Taneytown Elemen-A survey of our Taneytown Elementary Schools reveals that out of a school population of 395 pupils only 235 has received one or more polio shots. Classes having the highest percentages are in grades 3 and 4 whose pupils received two shots free at the school. Many of these have not received the third shot.

It seems too bad that more parents have not afforded their children protection against poliomyelitis when eradication of this dread disease is virtually within our grasp.

eradication of this dread disease is virtually within our grasp.

During 1956 Carroll County has a 100% increase in the number of cases of poliomyelitis over 1955 while during the same period Baltimore City witnessed a 21% decrease. In Carroll County only 44% of those persons between the ages of three months and twenty years have received one or more shots as compared to 70% for those in the same age group in Baltimore City.

Vaccination against polio requires a series of three shots spread over an eight months period, while the third shot could not be given until after the start of the polio season, two shots are better than none and parents are are better than none and parents are urged to begin the series at once. Parents are also reminded that giving polio shots should not be restricted to children. President Franklin D. (Your Chatty Column)

With all my heart, I wish you every morning a smile that shall last until the next day's dawning.

I wish you health—life's greatest wealth! I wish you always near so that I may help to cheer

Fach future day and in some way—help to bring you happiness!

Part of this Column will be for the Gentile— not the Christian! You may call yourself a Christian but if you are guilty of the following then you are only a Gentile! In the Webster dictionary the definition of Gentile is just this "Opposed to Jew!" and in Abbott dictionary, the defini-tion is a heathen, a pagan, non-Jewtion is a heathen, a pagan, non-Jew-

ish!

In a recent paper of last week the title "PREJUDICE MORE THAN A WORD! "CAUGHT MY EYE AND I IMMEDIATELY READ THE ACCOUNT AND IT WAS ABOUT A YOUNG GIRL WHO POSED AS A JEWISH GIRL and this is what happened. This young girl posed as a Jewish girl for six weeks in a test of local anti-Semitism, Her name, Karen Deslandes, daughter of Mr. and Mrs. Robert Deslandes of Berkley, Mich., who wanted to find out for herself if it was really true. She said, "I thought it far-fetched that a Jewish sounding name should make its owner unwanted. I thought things like that just don't happen anymore!" Her father had given her a charm Her father had given her a charm bracelet and when schoolmates asked what the charms represented, Karen simply told them that they were "Jewish symbols" "I said nothing else, I am Scotch and French ancestry and atish symbols" "I said nothing else, I am Scotch and French ancestry and attend the Berkley Community Church. But many of my friends immediately assumed I was Jewish. I let them think so. IT WAS A DIFFERENT WORLD! Girls who had long been friendly become cold and aloof. People just forgot to invite me to their affairs. There was no one to walk affairs. There was no one to walk home with from school and when there was a stray companion it was strained!"

there was a stray companion it was strained!"

The parents of this young girl (and she was only seventeen) were unaware of their daughter's experiment and noticed many of their friends also seemed too busy for social calls. Her small sister ran into rejection from her friends, too. After six weeks, Karen went to her speech teacher in the Berkley High school and told him the story. The teacher spoke to the school officials who arranged a full school assembly. None of the students knew what was in store for them when Karen was introduced! She then told all. "What caused this assortment of reactions?" she asked. "Now I understand that prejudice is more than a word in the dictionary. I understand how it twists; how it can result in the hideous burnings of Jews in Germany! The awful attitude of the managainst-man attitudes!" When this young girl finished her speech many of her friends and many strangers gathered around her in the auditorium. She said to a reporter after, "Between our hugging and crying at that meeting, they asked me many questions and most of all they were so ashamed saying 'But I didn't do those horrible things, did I? I couldn't answer those unhappy people with such ashamed saying 'But I didn't do those horrible things, did I? I couldn't answer those unhappy people with such shame upon them so full of sorrow. All I could do was suggest that they search their own souls!"

Now, dear Readers are you guilty—ever? Do you say anything unkind about the Hebrew Race or about any one individual of that Faith? Do you forget that Christ was a Jew? Do you

forget that Christ was a Jew? Do you know, that at one time there were all Jewish people with the exception of a few who pulled away and called themselves Ishmalites and the Egyptians of course. So after all in the very beginning, we were all in the very beginning, we were all of the Jewish Race of People.

Many times, I have heard this re-

mark and from people whom I never dreamed would express themselves in this manner, Oh we will Jew them down and get the article cheaper!" Do you know you have said that as my Minister preached one day that as my Minister preached one day "ALL THROUGH JEALOUSLY OF THE SMART BUSINESS SENSE OF THE HEBREW".

Do you know that behind every big business there is the Jewish indivi-dual who is the silent partner and it

always is a most successful one.

A fine Jewish lady was taken into a morning service of a Protestant church and two women near were talking and one said to the other pulling her face into a hideous sgrin, "SHE'S A JEW!" That Jewish lady never went back into that church or never went back into that church or in fact any other Protestant church!

I have never heard any Jewish person say anything against the Protestant nor do they talk in any way about or against the Gentile or Christian tian in their church or temple. Why do the Gentiles talk about them? You can answer for yourself and if you have known of the Hebrews amongst your acquaintances be sure you apologize before you enter church on Sun-

I have some of the most dear and precious Jewish friends whom I love

dearly!
So, Folks any time in the future remember always that when you speak against the Hebrew you are speak against the Hebrew you are speaking against your LOVING GOD! Have a grand week-end and as you drive along think of that 17 year old wise girl in New York. Until next week D.V. I am

Faithfully, YOUR OBSERVER.

GRASS ROOTS OPINION

TEMPLE, ARIZONA, DAILY NEWS: ". . . we're in sympathy with mail men who object to being used for a between meal snack by animals which should be tied up, if they can't control their desire for human flesh.

DALLAS, PA., POST: "A remembrance of this one of the Ten Commandments-'Thou Shalt Not Kill'may hestir you, if you should tend to become negligent, thoughtless or take chances when you drive.'

ONIDA, S. D., WATCHMAN: "We think the example of some members of the Hungarian Olympic team in refusing to go home, and willing to give up their homes, their country, their friendships and kinships, is the most dramatic proof possible of the emptiness of Communism."

AZTEC, N.M., REVIEW: "We can't see any reason for wanting to get acquainted with the moon. If there are people on it they'll undoubtedly want us to help them out of a hole.

BELLINGHAM, WASH., HER-ALD: "Americans can never be accused of lacking in charity. The American Association of Fund Raising Counsel estimates that their giving in 1956 totaled at least \$6,100,000,000 an increase of 10 per cent over 1955. That's the kind of people we have in this 'capitalistic', 'imperialistic', 'mon-

ey-grubbing' nation.' PETALUMA, CALIF. ARGUS-COURIER: "There are problems that cut through the lines of nation, state and local district: public vs. private power, highways, schools. They are all involved in the conflict between a superstate and local autonomy. They are a challenge, too; a challenge to our self-reliance, independence and personal integrity.'

TEXAS. VIEW: YORKTOWN, "One of the most important bills to come before the new Congress, will be that to abolish the federal control of the price of natural gas. This control never was fixed by law

but was imposed by a decision of the Supreme Court.'

AMBRIDGE, PA., DAILY CITI-ZEN: "The recent death of Sevellon Brown, one of the nation's most distinguished newspapermen, recalls to mind his elevated view of the press as the great informer of public opinion-he said: 'We must have better, and yet better, newspapers if the

force of public opinion—the greatest force in the civilized world today—is to be enlightened and given the vision to find the solution of problems that must be solved if civilization is to survive.' These words are a continuing challenge to newspapermen, and a measure of how highly this thoughtful man regarded the right of the people to know and to speak."

VACCINATION AGAINST INFAN-TILE PARALYSIS

Carroll County lags in vaccination against infantile paralysis, while its percentage rise in cases of that disease is one of the highest in the nation. Figures compiled by health authorities for the year ending December 31, 1956, and recently released, follow. Only 44.7% of the people in Carroll County, between the ages of three months and twenty years, have received one or more inoculations, 43.3% have received two or more, and a

have received two or more, and a scant 12% have received the full course of three inoculations. Acceptance in other areas, though not yet adequate, outstrips ours by far. We are at the bottom of the list. 70% of this same age group in Baltimore City have received one or more inoculations, 63%, two or more, and 26% have received all three. Figures for the State of Maryland, exclusive of those for the City of Baltimore, show that 52% have received one, or more, injections 47% have received two, or more, injections, and 17% have received all three shots. Reasonably accurate estimates of figures for the entire protections. tire nation places them on the level as those for the State of Maryland. During the year 1956, there were

four cases of paralytic polio and two diagnosed cases of non-paralytic polio in Carroll Co., for a dramatic 100% increase over the year before. This number may not seem large, but who can deny the tragedy to the victims and their families, especially when it didn't have to happen at all! For the same two years, the City of Baltimore showed about a 21% decrease in going from 33 paralytic cases in 1955 to 26 cases in 1956. The rest of the State of Maryland, exclusive of Baltimore City, showed about an 84% reduction in going from 136 paralytic cases in 1955 to 66 cases in 1956, while the United States, as a whole, showed a 37% retduction in going from 10,600 our cases of paralytic polio and two 37% retduction in going from 10,600 cases in 1955 to 6,700 case in 1956. Again, our unfavorable position is be-

yond any argument.

In reviewing the Carroll County picture, one is naturally led to wonder about the answers to several ques-tions, among many. Is the 1956 in-crease in polio over that for 1955 really significant, and does it mean that polio is on the rise here? Secondly, why have the people of Carroll County, substantially regarded among counties throughout the land, failed to take advantage of a repeatedly. counties throughout the land, failed to take advantage of a repeatedly proven protection against a disease with such dreadful possibilities, when safety is within their grasps with such a small expenditure of effort and money? And lastly, what are we going to do about it? Neither of the first two questions can be simply, nor perhaps at all, answered. As for the third time will tell.

A known characteristic of infantile paralysis, prior to the advent of Salk vaccine, was that there always were annual variations with no definite patterns; it would be up some years and down during others, and no explanations were conclusive. Since policy vaccine began being used extensively, several years ago, there has been a marked decrease in the disease each year, over the nation, and in most localities. Some areas, though, have held steady, while a few, as Carroll County, have shown rises. If we were to ask a statistician what all of these figures mean, especially our own, he would, no doubt, say that the few cases, numerically, that have occurred in this county do not necessarily imply that polio is on the increase here. He might continue that the increase has been, very likely, a matter of chance, as one might find a preponderance of heads or of tails in only a few flips of a coin. Also, he might add that there could have been a decrease just as easily. To sum it up, he would say that a trend cannot be reliably predicted from such a small series of cases. On the other hand, if we were to approach that same statistician with the national figures he would, undoubtedly, brighten up and reply that these data are of considerable significance; from these he could validly conclude that polio is very likely on the decline in the country, as a whole. If you are still in a gambling mood, this situation might be likened to that where in many, many tosses of a coin you would probably wind up with just as many heads as tails. Again, summing it up, he would say that a trend can be reliably predicted from such a great series of cases.

Although the mathematically inclined gentleman has said that our increase could be insignificant and only a matter of chance, his complicated formulae have not allowed him to say that for a fact. Figures and mechanical calculators give us only more figures. Reason and common sense must still decide. While we know that it's almost as illogical to war estimate an adversary as it is to over-estimate an adversary as it is to underestimate him, it isn't imprudent to play it safe. Being prepared for the worse while hoping for the best is axiomatic. So, we prepare for adverse

axiomatic. So, we prepare for adverse possibilities while we hope for happy probabilities. To put it mildly, playing it safe is comforting!

As for the answer to the second question, "why have Carroll Countians failed to take advantage of a known protection?" I must confess failure. We are conservative in the county, certainly, and in the accepted sense that means waiting to be certain bethat means waiting to be certain be-fore going ahead. Who, but a fool, can find fault with that? It seems, hough, that there is now enough evidence to assure us to proceed. Un-biased figures have shown that the biased figures have shown that the Salk vaccine is up to about 85% effective in preventing infantile paralysis, and it is 100% safe. Of the 88 cases of paralytic polio in Maryland during 1956, a total of 72 didn't have a single dose of vaccine among them. Of the other 16 cases most had only one inoculation, and only 3 had all three doses. Of the three cases that had all three doses, one has recovered fully. three doses, one has recovered fully, one remains moderately paralyzed, and the third has not, as yet, been diagnosed as polio for certain. There were four deaths from the disease in the state last year and not one of

them had a single protective dose of vaccine. That's pretty strong evidence.

The answer to the last question lies with the people of Carroll County and the future. Experts in communicable illnesses have estimated that where 89% of a population is immune to a disease, that disease virtually disappears from a community. One has only to look at smallpox; it has been practically wiped out in the United States by vaccination.

YOUR DESTINY DEPENDS ON YOU

Only one out of 20 at the age of 65 Can live without working and stay alive; 5 out of 6 persons on earth to-day Depend on charity, the records say.

95 per cent out of 100 do tasks, the records also say, That require no thought from day to day—'No faith in themselves, no iniative, bosses say! They all lack courage to try a new way.

Since you are one of the crowd, where will you be— Dependent or independent like some we see? Will you be struggling, or shall you concoct a plan To make of yourself a respectable, wealthy man?

Before you start out, write on a slate: "I am the sole master of my fate";
For, what you are going to be, all leaders say
Depends on how you think and do to-day.

Your future is in your own hands, leaders also say, So pick a good model; and, do things his way; To get rich quick swindlers never bow;

Do not put your trust in matter of any kind; The wizards know it; but, the greenhorn is blind; It is an aggregation of protons and electrons you shall find And, subject entirely to the control of mind. We speak of power; but, of all the powers to-day,

Love is the greatest, the scriptures say; We can not see it, for Love is God and God is Love; And He rules all creation-below and above. Because Universal Mind is invisible today

Is no reason to doubt, its existence, they say; Joy, too, is invisible, yet joy men say, Is among the great forces on earth to-day. How the radio works is invisible—(that we know);

But, you see how it works every place you go; That is another proof that the words we say Are sometimes heard by others who live far away.

The radio is a product of the law of sound;
But, the real secret, by man, has not yet been found;
For, in some Oriental countries, the people say; Without wires, people talk, 5000 miles away To run a Locomotive. we study the law of power-

(We learn some of its secrets hour after hour); And, without that law, many oldsters say; The horse and buggy would still transport us to-day. These things are not the result of invention to-day-The law has always been, great inventors all say; So, if the ancients had figured it out in their day, They, too, would have had autos to go their way.

Universal Wisdom has many other laws they say; Which man shall know in some future day; But, to learn them all at once is not God's plan—

That is not His way, to make a perfect man. God wants us all to know the reason why The things He gives us are not first seen by the eye; So, everything on this earth, you shall find, Has had its origin in Universal Mind.

God wants us to use our mind—Don't you see?
That is how He talks to you and me!
So, if there is some secret you do not know Turn to Him-there is no other place to go!

In olden times God always spake with a sign;
And, that method, the ancients, thought was fine;
So, it was because of that ancient belief Noah knew what God meant when the dove brought back a leaf.

In that way God told him to have no fear,
That the ground would dry and the sky would clear;
And just so He talks to us in our day;
But, we are too busy to hear what He may say.

One reason why we plod in mediocrity to-day Is that we lack confidence in ourselves, they say; So, it is because man refuses to use his mind That he still continues to sweat and grind.

That is how the whole thing looks to me For God, they tell us, shows no partiality; So, if the apples of gold, do not fall on you and me, It is because we stand too far from the trees.

A way always opens for a determined soul,
The man of faith and courage who sets a goal;
So, if you listen to God, and do things His way,
Eureka! Eureka! I have found it! you too can say.

PURINA SUPER STARTENA SWEEPSTAKES

Ten modern aluminum caged hen houses, each stocked with 1000 top-bred hens, will be given by the Ralston Purina Company to the 10 winners of the nation-wide sweepstakes which the company and Purina dealers launched early this year, it has been announced by the Taneytown Grain & Supply Co., local Purina dealer.

The sweepstakes is open to any adult who is planning to start chicks in 1957, except employees of feed manufacturers and dealers and their families. Entrants will fill out entry blanks and take or mail them to Taneytown Grain & Supply Co., local Purina dealer who in turn will send all entries to Purina headquarters. Entry blanks will be available at Taneytown Grain & Supply Co. eytown Grain & Supply Co.

After the contest closes March 16, a drawing will be held in St. Louis, at which time 10 entries will be selected out of the entire group by Don M. Turnbull, Executive Secretary of the American Poultry and Hatchery Federation. The persons whose names are selected will be the winners.

Purpose of the sweepstakes is to establish more top-flight caged-hen operations in different parts of the country, according to Taneytown Grain Supply Co. The caged hen method of producing eggs has been spreading rapidly in both warm weather and cold weather areas. In this system, hens are placed in individual cages which they never leave until after their productive days are over. 2-7-3t

FEESERSBURG

(A Voice from Carroll)

There is nothing that makes one so indignant at times than to witness the inequality of hardship imposed upon a portion of our population by the present economic and social system. Life is difficult and we must accept that fact, but that so many in-dividuals by mere accident of birth and opportunity should have a life of nothing else but hard work and a feel-ing of inferiority imposed upon them while others no more deserving never get a taste of what it is like to drudge and do without all of their lives, causes some of us to feel that something should be done to remedy this unequality. In time of war we draft our youth to serve in the army regardless of ancestry or economic position. In time of peace we should make each boy and girl serve a portion of their life in some industry working with their hands to get the childishness out of their system and to endow them with sympathy for those who must labor and to instill sober ideas toward the society in which they are a part. So far, war has been the only means of disciplining a nation, but to save ourselves from becoming callous toward each other we must find some means other than violence to make us morally conscious of the inequality of opportunity to a large segment of our population. Until this has been accomplished, we can not hold our democracy up as the highest example of opportunity for the masses.

After reading the following item wednesday evening, Lenten service at the church; Thursday evening, Aman-will book passage for France. "Homeda Bare and Friday evening, Gladys work has been abolished in the schools sanner. The treasurer Edith Master in France. Teachers are required to work has been abolished in the schools set aside one hour each day so that children can do their lessons in class." We have advocated this policy in our own school system for the past ten years, but so far nothing has hap-

At the annual banquet of the Union Bridge Chamber of Commerce Mon-day evening Mr. Benjamin Shuff, president of the Farmer's and Mechanics-Citizens National Bank of Frederick addressed the members and guests. He gave some interesting bits of information about banking in the days when items other than printed money was used to transact business. Flat stones, cows, horses, land and extra wives were used as banking but she received it in 8 days.

Charging interest is not an idea dreamed up lately but was conceived long ago in some person's fertile brain who decided that living from some other person's labor was far easier than toiling in the field himself. We complain about 6% being a high interest to charge 30% when banking was in its infancy. In fact money lenders as they were once called charged whatever they could get away with. the Merchant of Venice. Maybe for this reason so many persons vision bankers as money-grubbing, tightfisted individuals without an ounce of human kindness in their body. Today this idea is far from the truth. For Garber has been sick the past one can walk into any bank and if it with virus.
and Mrs. Max Loudenslagen, is humanly possible to solve one's financial problems the officials will is a great contrast today to what it was some years ago in the methods used in dealing with people by a bank. To be sure a bank has to make some money to stay in business, but making money is no longer the prime function of banking. A community must prosper if a bank is to prosper

The Aid Society of Baust E. & R. church will hold a bake sale Saturday morning March 2, at the Fireman's not just with collecting interest not just with collecting interest n loans. A sound bank must continually think up ways and means of giving trust-worthy service to its customers; helping them in their own business whether it be a small store or farm or a million dollar concern. Banking has taken on many services lately that has been a blessing to many. One is the small loan department where a person can obtain money for an emergency at a fair rate of interest. Not too long ago the only place to get this service was at a small loan office where the interest ate was exceedingly high, and one had to sign away everything but his life to obtain a few dollars. There are dozens of ways a bank can be of service to the individual including working out monthly budgets so that one can live within their income. No one likes to borrow money but there are times in everyone's life that emergencies do arise and it is necessary to have a loan. The best place to take your financial troubles is to vour bank. A bank today is ready to help solve your money problems in

friendly, sympathetic way. Mr. Shuff pointed out that the merger of the Union Bridge Bank with his bank in Frederick will bring about new

a sound and progressive step for everyone concerned.

At the last meeting of the School Board a resolution was passed banning any over night trips by students for any event sponsored by the school. We presume this includes class trips that have been customary by senior classes in the past years. This resolution is to go into effect next September. We are wondering how the majority of parents feel about this and we would appreciate hearing from you. We want to write about this in a future column and will appreciate hearing your views before giving our own ideas. Let us hear

from you, please.

ADVANCE PROGRAM OF REFORMED CHURCH

On Thursday evening of this week Elder Murray Baumgardner and Rev. Morgan Andreas will present the Advance Program of the Evangelical & Reformed Church to the Mt. Tabor congregation at Rocky Ridge. During the past two weeks Mr. Baumgard ner and Rev. Christopher Noss, Silver Run, visited the congregations of Trinity, Thurmont and Apple's, near Thurmont and St. Paul's, Westminster, while Rev. Andreas and Elder Harry Smith, Walkersville, participated in the Every Congregation Visitation at St. John's, Sabillasville; Jacob's, near Fairfield; St. Stephen's, Highfield; and Emmanuel, Tyrone,

This program which is basically Christian Evangelism challenges the churches and their members to a greater sincerity in their Christian faith and stewardship. The leaders of the congregation are to seek to reactivate the inactive, affiliate the unchurched, attain a better average attendance, enlist greater participation in the organizations of the church and assist more generously in the support of the benevolent program of the church.

Last Sunday and Monday the Ad vance Program was presented to the Keysville and Taneytown congrega-tions of the local charge of the Evangelical & Reformed Church.

Reading Signs

Lesson for February 24, 1957

ALL human beings, civilized or not, are used to reading signs. Indeed all human communication and life goes by sign-language. Words, printed or spoken, are signs. No word on a page looks like the thing it represents. It is no more than a set of marks, but the way the marks are ar-

ranged makes meaning for all who can read. Expression of people's faces, gestures, road signs, we learn to interpret before we can read! The farm-

weather signs, Dr. Foreman the fisherman and the hunter have their own signs to look for. There are few people so stupid that they see only what they see.

Wanted: A Sign!

When Jesus was teaching and healing in Galilee, he was doing so without any official authorization from what we would call the church. And yet he claimed to speak and work with the authority of God. The church officials did not take this easily. They kept pestering him: "Show us a Sign!" they said. How do we know you are right? How do we know what you say is from God? To this day there are people who are not satisfied with what God has shown us. They want to know: How do we know the Bible is true? How do we know Jesus was the Son of God? If the preacher would let himself be bitten by rattlesnakes, without getting hurt; if the stars arranged themselves in the sky so as to spell a personal message from heaven; if some modern Joshua would make the sun stand still, such people think they would find it easier to believe.

The Signs Ara Up Jesus stradily refused to produce any such "sign from heaven" as he was challenged to call down.

True, he worked miracles, but it is evident that the kind of miracles he did were not the kind of "sign" the Pharisees wanted. His mighty works were always simply and quietly done, out of sympathy with human suffering. They were never done in dramatic, showy fashion. Never in the childish way: See Me do this-don't I'm Wonderf 12 Jesus told the Pharisees that the signs of the times were there to be read. By "times" he did not mean years or dates. He meant what in the Old Testament usage, with which both Jesus and the Pharisees were familiar, the "times of Gcd's visitation," the special era of God's visiting the earth and man for special purposes. In all of Jesus' work and words was the claim, made outright or implied, that God was in and back of it all. The Pharisees wanted some sign that this was true, some sign outside Jesus. But Jesus was the only sign there was. If they could not see God in him they could not see God any other way. So it is today. Jesus is still the Sign of

Wanted: Eyes!

The Kingdom of God is at its core a kingdom of souls, of the spirit; and the signs of its coming are spiritual. An atheist was once asked what it would take to make him believe in God, and his answer was, "Trot him out and let me see him do something!" Well, God cannot be led around on a leash. But he is doing things all the time, for those who have eyes to see. The beauty and the order and grandeur of the universe speak of his power and glory. The goodness and the grace that we see in the lives of men and women speak of the creative Goodness that made such persons. Furthermore, God is at every day, transforming lives. The great miracle is not turning stones into bread but sinners into saints. The great miracle is men and women who live above the rules and standard of ordinary mankind, men and women who already in this noisy world have found the melodies of heaven. When you read in the Bible, especially in Jesus' teaching, an invitation and challenge to high, pure, brave living, and you think, "This is asking too much, this is beyond human nature," remember there are people who actually do live "beyond human nature" as you say, because they have been touched by the Divine. Such en and women are the living ns of God.

"Morning Prayer". O Lord help me to get along better today with all people than I did yesterday. But how many of us will say. I'll get even with so and so, for what they did to me yesterday.

The continued ill use of Labor, Land, Lust and mankind, will be the down fall of the World.

—Joseph Ashcroft.

Farmers today are producing 38 per cent more products on virtually the same amount of land they farmed just before World War II. Furthermore, this increased output has been produced by fewer farm workers. 1940, one farm worker could produce enough food for 11 persons. Now, working shorter hours, he can grow food for 18 people. This is a gain of 63 per cent in efficiency in 14 years.

Planning and Zoning. Frederick and Harford counties have each set up a planning and zoning board under the general law of Maryland. They have employed outside professional help in setting up the machinery after which it will be administered by local personnel. The County Commissioners initiated the program after being urged by county organizations interested in the future protection of established property values as well as tablished property values as well as prospective land owners who are entering these counties in large numbers. Both are proceeding with caution in an effort to obtain the co-operation of everyone as zoning can become a very controversial matter.

We are all jealous of our personal

and property rights and are, there-fore, slow in giving them away to even local government. We have aleven local government. We have already surrendered more than we know to a mutitude of agencies that were presumably organized for our future good. Here again, we are urged to plan our county for the betterment of all its citizens and it will entail a great deal of cooperation and tolerance before we adjust and settle down to enjoy the fruits of the new life. Emmuniaminimining 2

down to enjoy the fruits of the new life.

Without a doubt it is coming and perhaps the sooner we accept the inevitable and begin planning in Carroll County the better it will be. In most instances the city or county is inclined to wait until irreparable damage has been done and the installation has been made more difficult. I suggest that we closely watch our neighboring counties and in the near future be prepared to begin by covering those critical areas along our new highways and contiguous to incorporated towns where most of the abuses occur.

ated towns where most of the abuses occur.

House Bill 368 would propose an amendment to Section 6 and 7 of Articles 2 of the Constitution of the State of Maryland, title "Executive Department" providing for the election of a Lieutenant-Governor of the State. He would be elected at the same time, in the same manner, for the same term and subject to the same provision as the Governor. He same provision as the Governor. He would preside over the Senate, but have no vote except in case the Senate is equally divided. In case of death, resignation or removal of the Governor, the Lieutenant-Governor would become Governor. His salary would be \$3000. Delegate Carroll Smith has been appointed on a committee to

be \$3000. Delegate Carroll Smith has been appointed on a committee to study the proposal.

The Senate is losing another member. James Monroe, Republican from Charles County will become our new Commissioner of Motor Vehicles, rereplacing Frank Small who wants to return to his business enterprises in Southern Maryland. Senator Monroe will be a good administrator, but will be missed in the general assembly where he has served for many years.

where he has served for many years. Bills relating to education, road-side control, safety, retirement and other articles too numerous to mention continue to appear. Many of them seem to be reasonable enough, but they do cost money. And there is the rub, especially when the legislature is trying to balance the budget. ture is trying to balance the budget. We can either reduce costs or increase taxes. One practical lady wrote us, saving that when they run into this situation in her home they have no trouble meeting it. They simply stop buying the things they might want, but can do without. The State problem can be met the same way, but more people must be consulted or more people must be consulted or more correctly insulted. However, it is always well to remember this homely philosophy and apply it when expedient. Had government at all levels done this during the last ten years, we would have more to spend at home where it would better nourish our economy.
