MEETING OF KI-WIVES

The Ki-Wives of Taneytown met Monday evening Oct. 23, at 6:30 o'-clock at Taney Inn with twenty eight present including guests. The meeting was opened by singing one verse of America, followed by the pledge to the flag. Tamsey Stonesifer gave

the invocation. After a delicious meal the group singing was lead by Daisy Pearl Reifsnider with Esther Harner at the piano. The songs used pertained to flowers since the theme of the meeting was the beauty of Autumn flowers and country side. It is also National Flowon Mrs. Grace Shreeve on Sunday. er Week, a season appreciated by all. Mrs. Shreeve will celebrate her 96th | Mrs. George Motter conducted several rounds of songs.

President Alice Frock warmly wel-comed every one and had the members introduce their guests. Margie Smith told about Ray's Country Store being open Oct. 27, 28, 29. This is a benefit for the Westminster Memorial Hospital by the Taneytown Auxiliary. A number of the Ki-Wives are assis-ting Mrs. Ray. Kitty Royer read a letter of appreciation from James Murfin concerning our last meeting and the celebration of his birthday. Kitty Royer then introduced Mrs.

George Motter and daughter Mary Ann who played a piano duet "Fes-tival March", Mrs. Motter sang "Morning" and Autumn Leaves". Mrs. Gilbert Stine read J. Whitcomb Riley's "The Frost Is On The Pumpkin" and "Grandma's Photograph Album". All numbers were well received. As it is National Flower Week it

was quite appropriate to have Mrs. Eileen Welsh of Dutterer's Florist Shop of Westminster as our speaker Miss Lamora Stoner of Frederick, and designer. She proved quite in Mrs. Harman Albaugh and sons, of Glen Burnie, Mr. and Mrs. James Waltz and family, and Mr. and Mrs. Arthur Waltz of Westminster, visited mums, carnations, grapes, greens and candles.

Ordinary oils can create their own metallic ash. Above you see what happens when a conventional multi-grade oil is dropped on this electrically heated piston device. These dark spots contain additive ash. When this ash builds up in your engine, it's bad news.

No ash with Shell X-100 Premium Motor Oil. When the same test is tried with new Shell X-100 Premium all the oil vaporizes. The piston device is clean. There is no ash. You can expect a cleaner engine, less chance for knock and rough running.

Hot piston test shows that new Shell motor oil eliminates a trouble other oils can create. Read how this revolutionary oil can prolong engine life 5 ways.

THE WASHINGTON BOOM

There's at least one place where a super-boom is underway. It's in the federal government. Unfortunately, it's a boom that the taxpayers - including taxpayers-to-be, not yet born - will have to pay.

Since January something like 100, 000 additional civilian employes have been put on the federal payroll. Federal spending for the year will pass \$90 billion-a new peacetime record. And authoritative estimates say that next year's budget deficit will exceed \$5 billion at the very least. Some think it may run close to twice that figure. it certainley will - if the next Congress approves any substan-

tial number of the spending bills that will go into the hopper-bills which have nothing whatever to do with our military strength.

We're supposed to be prepared to make sacrifices in the name of national defense-and of national survival. When will Washington provide even a minor example? Not until the people vote no to candidates and public officials who promote higher taxes by advocating give-away programs financed by taxpayer dollars. - Industrial News Review.

TANEYTOWN PHARMACY

Here is an astonishing fact you should know before you get your next oil change: Premium motor oils-with one exception-will produce a deposit called additive ash. This ash can contribute to rough running and knock.

Shell X-100 Premium is the one premium motor oil that *cannot* produce an additive ash deposit in your engine. Read how this remarkable oil formula helps your engine last longer.

TODAY, every Shell dealer has new Shell X-100 Premium Motor Oil ready for your next change-over.

New X-100[®] Premium is unlike any other motor oil. It eliminates a deposit that all other premium motor oils help create themselves. This deposit is additive ash. It is caused by the metallic additives used to prevent scuffing, sludge deposits, oxidation, and so forth.

With each stroke of the piston, these additives can deposit metallic salts in the combustion chamber. Here they burn and form additive ash.

This crusty ash can build up in your combustion chamber, can cause your engine to knock and run roughly. New X-100 Premium doesn't contain a single metallic additive. No metallic

additives-no additive ash. Additive ash is just one internal trouble that can cause engine problems. You

should know about four others, too.

Helps prevent sludge from anti-freeze leaks

Remember this when you fill up with anti-freeze this fall: Anti-freeze can

leak out of your cooling system into your crankcase.

Many oils can react chemically with permanent anti-freeze to form a horrible sludge-so sticky that it can bring an otherwise healthy engine to a standstill. Then you may be in for a repair bill. New Shell X-100 Premium resists re-

action with any sort of anti-freeze. It shrugs it off.

Disarms crankcase dirt

All engines accumulate crankcase dirt. The problem is to stop the many different kinds of dirt particles from ganging up and forming sticky sludge, which can clog your engine.

Most premium oils use a detergent additive to do the job. But the majority of these additives are metallic and cause that old devil-ash.

Shell's solution is to replace the detergent with a dispersant-a remarkable new ingredient called Alkadine.*

Alkadine works to disperse dirt particles-in effect, holds them apart-so that they don't form sticky sludge.

Alkadine additive is potent stuff. After 1,200,000 miles of city driving, *Trademark Shell Oil Company

This is Shell X-100 Premium Motor Oil -in the white can with the red letters.

engines lubricated with Shell X-100 Premium were torn down and inspected. The amount of sludge was astonishingly low. In some cases there was so little it could hardly be measured.

Ignores temperature changes

Many motor oils tend to become too thick when cold and too thin when hot. This is hard on your engine.

New Shell X-100 Premium is an allyear oil. Here's how it works. Alkadine has a molecular structure that resembles a basket of eels.

When the oil is cold, Alkadine's eellike molecules curl up as if for comfort. In effect, they take up less space in the oil-and the oil flows freely through the tightest bearing.

When the oil is hot, the molecules uncurl, take up more room-and the oil resists thinning. New X-100 Premium lubricates just as effectively in June as it does in January.

Fights engine acid a new way

Automobile engines manufacture acid. It can cause more wear than friction. Most motor oils combat this engine

acid with alkaline additives. But the neutralizing effect of the oil gets weaker as engine acid eats up the alkalinity until eventually such an additive stops working altogether.

Shell X-100 Premium doesn't depend on alkalinity. It actually plates all engine surfaces with a thin chemical film. The metal "adsorbs" some of the oil's protective qualities. Chemists call this phenomenon "chemisorption."

The process of "chemisorption" offers unique long-lasting protection against acid attack.

How much does it cost?

If you now use a premium motor oil, you'll get Shell X-100 Premium for about the same price.

If you're now making do with ordinary motor oil, you'll pay about \$3.60 a year more-less than a penny a day extra-assuming you drive at about the national average of 10,000 miles a year and get regular oil changes.

Quite a bargain for the one motor oil that fights additive ash and four other troubles to help prolong the life of your engine.

'62 CORVAIR MONZA

NEW FACE, SAME SPORTING HEART

We might as well tell you straight off: Corvair's the car for the driving enthusiast. Think that lets you out? Maybe. Maybe not.

Until you've driven one, you really can't say for sure, because Corvair's kind of driving is like no other in the land. The air-cooled rear engine sees to that. You swing around curves flat as you please. You whip through the sticky spots other cars should keep out of in the first place. (Especially this year, now that you can get Positraction as an extra-cost option.) You stop smoothly, levelly with Corvair's beautifully balanced, bigger brakes.

Corvair's found other new ways to please you this year. A forced-air heater and defroster are standard equipment on all coupes, sedans and both Monza and 700 Station

Wagons. So are dual sunshades and front-door armrests and some other goodies. You'll note some new styling, inside and out. Nice. And safety-belt installation is easier, too, and cheaper. So you can see we haven't really done much to Corvair this

year. Why on earth should we? If this car, just as she is, can't A New World of Worth

And here's America's only thoroughbred sports car, the '62 CORVETTE. We warn you: If you drive a Corvette after your first sampling of a Corvair, you may well end up a two-car man. And who could blame you?

Arthur Godfrey will be returning to "The Scout Show" in the future-that program which everyone enjoyed. Remember? And that reminds me to tell you-don't call any of your friends at the hour of "The Perry Mason Show". I had no idea that so many looked at that show and would not miss it for anything. Do you keep your T.V. set running most of the day? That is bad for it soon will be giving you trouble regardless of the make-just like anything else with working parts. Thinking of T.V. personalities-that nice Bing Crosby who will be 58 on his next birthday in May will be a father for the third time since this second marriage. Were you not glad of the evening show of "Susie" to see that she finally marries Mr. Sands? The day time shows are all repeaters and are taped so Channel No. 2 stated when I called to make inquiries on that one. (As to that particular show)

I picked up a lady the other day awaiting another bus as she had just missed the one in front of us and she said, "I think that Russia is just bluffing!" UGH! Don't forget to move the hands of your clock this week end so the child-

ren do not say to the teachers, "I am late because we did not know what time it was!"

No other sewing machine can compare with "SINGER" all down through the years! The very last model of ten years ago-a treadle which was the last one of that type, I pur-chased and it has a cast iron head, very modernistic and solid oak. The young man of 22 years of age called here-a Mr. Dennis J. Handlir and never have I seen a young man of his age so serious as he took the machine apart and oiled it thoroughly. One cannot hear it run. That young man surely knows his business—a natural born mechanic. The Singer company can be most proud of him!

A VOICE FROM CARROLL

Hallowe'en is only a few days away. The children already have hatched up some plans to scare the wits out of their parents and neighbors but what the children don't know is that an adult is going to make their pranks look very tame. It seems that Mr. Khrushchev is going to play spooks

and goblins too and he has concocted a nice yellow pumpkin of 50 megatons which he is going to light up on Hallowe'en to scare the daylights out of everyone, including the children. If we get frightened enough we can buy

Mr. K off just like we bribe the children with candy and cookies not to upset our porch furniture or smear our windows with soap. Of course cookies will not interest the communist leader but Berlin will make a nice substitute. Now paying blackmail is humiliating, and something inside us rebels at the very thought but we pay blackmail to our children on Hallowe'en to save our property rom disfigurment so why not go on

dress. If you are lucky you may see a gray squirrel watching you from a nearby tree hoping that you will take his picture too. On your way home stop at a wayside stand and buy some juicy red apples, a pumpkin or two and a gallon of sweet cider. In this way you will bring part of fall home with you. ith you. care of their streams and rivers properly? Last week when we read in the paper that thousands of fish were being killed along the Sesquehanna river because acid was being dumped into the river upstream, we thought of the fish hatcheries at Thurmont where bass and blue gills are raised so carefully to stock farm ponds and Maryland streams. There seems to be a constant struggle between the persons who want, to preserve our re-sources and the persons who don't give a rap about anything but their own selfishness. One person builds while another tears down. No wonder progress is so slow.

Remember when Elvis Presley was banned from some television shows because he wiggled too much? After watching the new dance "The Twist' on Ed Sullivans show Sunday night we have come to the conclusion that the Elvis contortions were pretty sedate compared to the dancers do ing the new dance. The Twist has already reached the college campus. but we predict it will last as long as the hoola hoop. For one thing the dance (if one can call it that) requires too much energy and another draw back is that it will send the performers to the hospital with appendicitis. What next?

We don't know how old the human race is, but one thing we are sure of.its old enough to know better. RUTH ROELKE

Social Security's New Law

The amount of work required to draw social security has been reduced according to Mr. L. J. Gillespie, Field Representative of the Baltimore North Social Security District Office. This change was effective August 1961

Under the new law, a man reach ing 65, or a woman reaching 62, this year will need social security credits for only 2¹/₂ years work under social security. This change in the law applies to retirement and survivors ben-efits. There has been no change in the amount of work required for disability benefits. In order to qualify for disability benefits, a person still has to have 5 years of work out of the 10 year period before he or she became disabled.

Any person who has been told in the past that he could not get retire-ment or survivor payments because he did not have enough work under social security should contact the social security office now to see if he is eligible under the change in the

For more information about this change in the social law and other changes made by the 1961 amendments to the law — contact your social security district office at 3107 Greenmount Avenue, Baltimore 18 Maryland.

Loyalty

If you work for a man, in heaven's name work for him; speak well of him and stand by the institution he represents.

Remember-An ounce of loyalty is worth a pound of cleverness. If you must growl, condemn and eternally find fault, why—resign your position and, when you are on the outside,, damn to your heart's content—but as long as you are a part of the institu-tion do not condemn it. If you do, the first high wind that comes along will blow you away and probably you will never know why. (By Elbert Hubbard — as reported

in Warren's Standard.)

Flattery is still the best way to get to first base with some.

Note to graduates: Life is too short for a complete education.

The old man dressed in red, white, and blue, is once again participating in sports. Uncle Sam, after plague-ing the world of Baseball has now doubt in anyones mind when it came to his picking a team. It was evident that he liked The Green Bay Packers. His decision now has the Packer coaching staff worried. Why are they worried? Well, Paul Hornung, every-body's favorite, and teammate Ray Nitchke have become two of Uncle Sam's favorites. They report for ac-tive duty on October 30 and Novem-ber 2 respectively. The old man dressed in red, white, ber 2 respectively.

Steve Myhra's 45-yard field goal gave the Baltimore Colts a hair-rais-ing win Sunday over The Detroit Lions. Although the boot produced Lions. Although the boot produced the win, the player largely respon-sible for tying the game was Lenny Moore. He scored both touchdowns with runs of 9 and 1 yards. The Penn State grad also gained 40 yards lug-ging the pigskin on 5 attempts and caught 7 Unitas aerials for 81 yards. Basically, he was the key man in keeping Baltimore's sputtering offen-sive motor from completely dving.

competition. Steve Myhra's talented toe brought "victory" each time. It appears that Colt fans now have another player to add to their list of heroes

Comeback Player-Of-Year

In the American League it was Al Kaline who was the recipient. Kaline, while rebounding from his poorest A. L. season, increased his batting average 46 points. The 26-year old outfielder finished second among the qualifiers for the batting title with a .324 average. He hit 19 home runs, had 82 R. B. I.'s, and had a 22-game hitting streak from July 6 through August 1st.

Joey Jay. He was essential in help-ing Cincinnati win the N. L. pennant and later starred in the World Series.

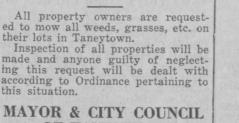

The State of Pennsylvania staged its biggest horse show October 14 through October 21. Once again, as in jumping teams were assembled for annual competition. The teams in-cluded: Argentina, Canada, Ireland, Mexico and the United States, the

Mexico and the United States, the latter capturing top honors. One part of the show which was enjoyed by all was the Ben Hur Char-iot Teams. These teams featured the horses from the movie, "Ben Hur", and with their drivers they provided the audience with some very fine entertainment.

For Horse lovers, the National was a show which highlighted others; giving those in attendance a chance to look at some of the "Best Horse Flesh Around".

THIS column this week is intended for church members, dotted-line members by baptism and personal profession of faith. It makes no difference what kind of church, what name it has, or organization or special variety of

ask you the question, Are you a Christian? and get a little double - talk - well, maybe oI am, maybe not. But if they ask you, Are you a mem-

Dr. Foreman ber of a church? that calls for a black-and-white answer. It isn't a question at this moment, How good a member are you? but, Are you a member at all? If your name is on any congregation's list even if there's a note after it that reads "Gone, left no address," even if there's * after your name that means "inactive"-we haven't seen him around in a blue moon-even so, you're some kind of member and maybe the one that most needs some friendly advice.

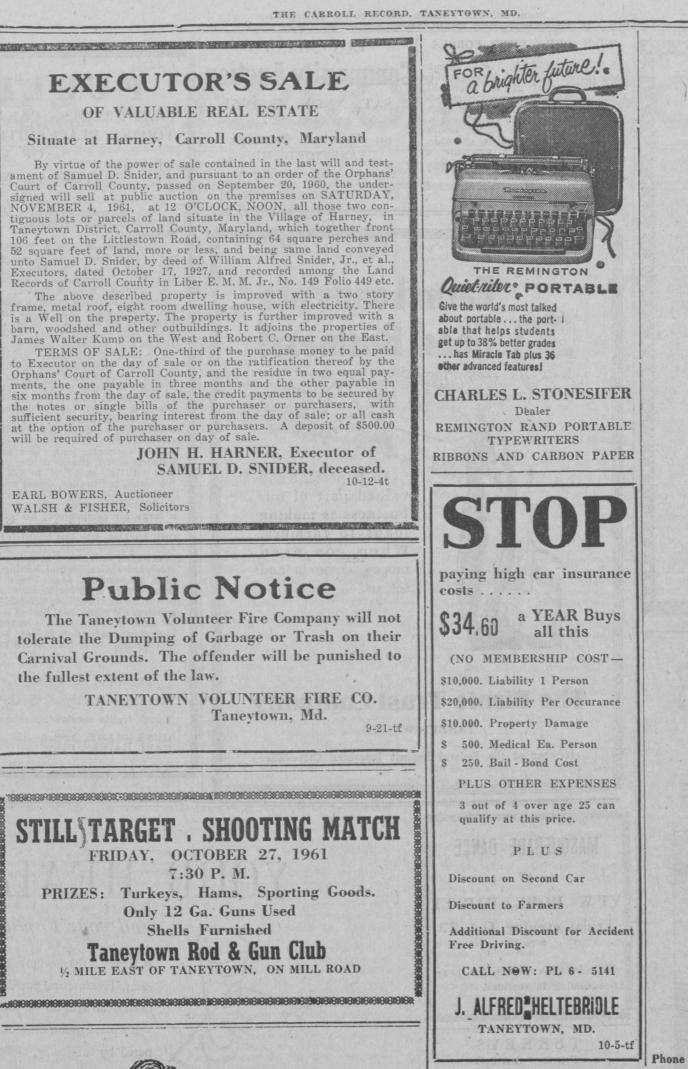

Ink-members

Anybody is counted a "full" or "regular" member in most Christian churches, who has deliberately and publicly confessed his faith in the Savior and promised allegiance to him and his church. But these members are not always full, not always regular. We can see three levels of "members" in the church; any church at all has these three levels. The point to be made is first that sometimes, at the lowest level, "belonging" does not mean much, but that (in the second place) we are expected to grow as church members all the while as we grow in our personal lives as Christians. The lowest level of belonging is merely to have your name on some churchroll, or cardindex-in their file somewhere. It's hard to see why anybody should call this "belonging" at all. If such a "member" disappeared from the church en-

tirely, swallowed up in a crack in the earth like Dathan and Abiram (Num. 16:31), no one in the church would miss them.

Present or Accounted For

On the level next above these do-nothing, be-nothing "members," are the bench-warmers. They keep a small section of the

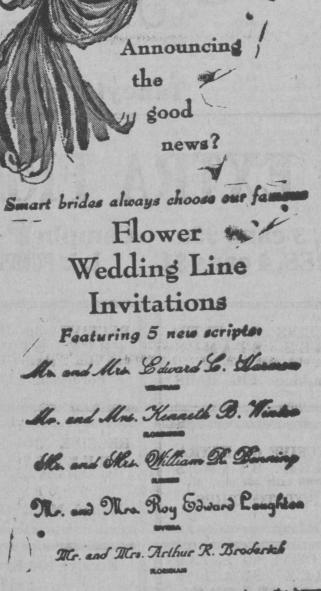

same new warm for an hour every Sunday . . . well, every Sunday when it doesn't rain or when Cousin Becky doesn't bring her children over to spend the day. These members now are the kind that would be missed if they weren't there. Maybe they even sing. But that's as far as they will go. They are strong believers in sitting for the Lord, but working for the Lord is something they never got up the nerve to try. If they leave for another town, they are dismissed as "in good and regular standing"; it might better read, "in good and regular sitting."

Usefully Active Members

The top level of church membership is made of usefully active members. We put in "usefully" because an active member may be busy as a housefly, buzzing hither and yon but doing nothing that needs to be done and getting in the way of real workers. A usefully active worker is one of those who really are "the church" when we say good words about it. Do we call a church friendly? These are the members who make it so. Does a church stand up for the underdog in the community? These are the members who stand up. Is a church's influence felt around the world? These are the members whose prayers, gifts,-yes and children -have been devoted to the serv. ice of God and man in what we call "mission work." Is the church evangelistic? It is not alone the pastor who wins new The other day a Christians. member of a church was talking about a man who was husband of one active member of that church and father of several children in the Bible school. "He'd be a good man for the new preacher to go after," he said. But why wouldn't he be a good man for the members of that congregation to go after? They know him a lot better than any new preacher would.

The reader can think of other levels of church membership. But one point needs to be remembered: It is possible to change your level In being a church member, as in being a Christian, if you are alive, you can grow!
