PREVIEWS OF PROGRESS AT T. H. S.

#### General Motors Will Present Science Show

Have you ever seen a car run solely by the power of the sun? Or syn-thetic rubber manufactured in a pop bottle in 60 seconds?

How would you like to understand how a jet engine works, explore the mystery of controlling tomorrow's space ships and listen to a radio which is powered by "liquid sunshine?"

These are some of the exciting moments in store for Taneytown High

School Students when Previews of Progress, the world-famous General Motors science show, is presented on Dec. 1 at 10:00 a.m. in the auditorium. Packed with exciting demonstra-

tions of science's dramatic role in industrial progress under America's free economy, the 40-minute stage show is non-commercial and admis-

Presented by a two-man team and narrated in understandable, non technical language, the show uses exciting showmanship to make science come alive for more than three mil-lion students and adults who view it each year. Many more see it on tele-

"We seek through Previews to inspire more young people to make science their career and provide the trained talent America must have to keep pace with the promise of the future", John F. Gordon, president of

General Motors, declares.
"Our demonstrations dramatize the inquiring mind of all scientists which assumes that everything and anything can be improved. Preview hints at the tremendous secrets of power and energy that wait in the world of tomorrow to be unlocked by the young people of today who become scien-

One of the highlights of the show is the amazing GM Sunmobile, the miniature car that actually runs on the power of the sun. It depends upon eight photo-electric cells located on its hood for its operation. These cells convert light energy into electrical energy which in turn powers a small

energy which in turn powers a small electric motor to move the car.

In the Previews show, the demonstrator uses a 300-watt lamp to duplicate the sun's rays. As the light strikes the cells, the 15-inch Sunmobile moves smoothly across the table.

The Previews audience will see yet

another example of sun power in the fascinating fuel cell. This device con-verts chemical energy of distilled

tremendous economic impact and greatly add to the life of coal and oil reserves.

In addition to sunpower, the Previews audience will see a visual history of the jet engine in "capsule" form. Beginning with a working mo-del of the first jet which dates back to 200 B. C., this sequence is climaxed by the running of a miniature gas turbine engine with a non-miniature roar. This type of engine may power automobiles of tomorrow.

Safety conscious spectators will be intrigued by a demonstration of a new foam plastic being used for crash pads in aircraft and automobiles. The lecturer actually makes the material in four minutes and shows its cushioning qualities by bouncing an egg off it from a height of four feet.

Missile enthusiasts will get an exciting introduction to a new glass harder than steel which can be used in the nose cones of intercontinental rockets to allow them to return from outer space.

Science proves quicker than a magician's sleight of hand in the Previews sequence in which synthetic rubber is produced in only 60 seconds. The demonstrator simply mixes two liquids in a pop bottle and a frothy glob of rubber 15 times the volume of the bottle leaps out above it.

Other Previews sequences include a vivid demonstration of the gyroscopes which will guide space ships of the future to their destination just as they control guided missiles, ships and planes today and a fascinating dramatization of the microwave relay which sends television programs and long distance telephone calls across the country.

Previews of Progress already has been presented to 18 million persons in the United States. Seven Previews units take the show to all sections of the country. Each team carries over 1,000 pounds of stage equipment in its station wagon.

In the true tradition of show business, Previews has been staged under a variety of conditions. It has been performed on the platforms of stake trucks in rural areas and also on the leck of the aircraft carrier U.S.S.

It has been staged in a boxing ring at Fort Dix, on the Boardwalk of Atlantic City and on the Starlight Roof of the Waldorf Astoria. Audiences have ranged from groups of 100 to crowds of six thousand.

Previews has won wide acclaim from educators and civic and fraternal organizations for its success in awakcurry duty.

Each bluejacket also receives individual counseling to help him select one of the Navy's 67 job specialties.

In the armery's Battery A, entered the Army last August and completed basic training at Fort Jackson, S. C.

He is a graduate of Taneytown burg; delivered the charge to the High School.

#### SAFETY STEPS TAKEN BY TANEYTOWN

The Mayor & City Council wish to report that 33 Stop Signs, 6 Twenty Five MPH Speed Limit Signs, 6 Three hour parking Signs and 3 No Parking Any Time Signs were placed throughout the town last Saturday morning November 25, 1961. The cost of these signs and channel posts

totaled approximately \$300. Signs will be placed in the West End of town in the near future completing this project. It is felt that these signs were needed very badly for the safety of the citizens of our

community. It was through the fine community spirit of the Jaycees that the labor cost for the erection of these signs and posts was completed at no expense to

Jaycees helping with this project were Paul Roop, John Skiles, John Reever and Earl Lookingbill. Jaycee George Fream was responsible for getting these men together. Special thanks must go to Wantz Brothers for the use of their Air Compressor and hammer, to Elwood Harner who operated the Air hammer and to Norman Sauble for the use of his farm tractor. All labor and equipment was donated to the town for this worthy project. Thanks is also in order for Mayor Perry for the use of his truck, and to Councilman George Naylor who assisted on this project.

Citizens are asked to notify the Street Committee of any intersection that might have been overlooked in the areas completed to this point.

What a surprise to awaken and see the pure white stuff upon the ground but exactly as "The Farmer's Almanac" stated! And it is to be BRRRRRRRR cold in Dec. with the worst storm you ever saw the end of the month! Be sure you have the oil lamps ready just in case and I think you know just what I mean. Word comes from St. Pete. Florida that the water shortage is becoming

critical and from California, my friend

stood out on their second story bal-cony and viewed that awful, awful fire!
Mother, if you are thinking of an ideal gift for the Kiddies and even grown-ups, the sleds are simply out of this world as they appear like those used in Alaska. Then, some are round and made of Aluminum but the latter just for one person whereas the former can be bought in large sizes, too. And if you desire to give the ideal gift for your Tootsies—the wonderful FLUFF-Muffs — crazy wonderful genuine lambskin slippers in a bright whirl of colors. They will be greatly and are beoutifully. be gay gifts and are beautifully made, inside and out, they surely are as warm as toast for they are wild and wooly and so very different from and wooly and so very different from other house slippers or to sit by the T.V. on cold, cold nights! Any woman would love this gift and the best buys are in Hochschild's. To keep them constantly beautiful is to fluff them by striking the sole of the slipper smartly on the palm of your hand or table top. They are by Lawrence from Mass. Remember they are made of Genuine Shearling Lamb!

There is a new product for your washing machine called, "VIM" which you have seen on T.V. Well, instead of just one of those discs dropped in the water, it will mean three or more depending upon the size of your wash-

ing machine capacity. Looking over the counters in all the stores, I saw beautiful huge roses in all colors with the length of the stems as "American Beauties" and as

stems as "American Beauties" and as I lifted one to examine it—there they were 'Back Scratches"! Cute? That wooden claw being on the reverse side and the price only \$1.00.

Now comes the "Twist Dress" for that ridiculous dance! Plenty of exercise in that one "THE TWIST". Believe it or not the dancing schools are teaching it! Ugh!

No doubt, you are getting many colorful books from the department stores as to Christmas gifts. They are so gay this year as the covers all are colorful and glamorous. Just think of the cost of those books?

slight oily taste.

The Plant Dr., Mr. Stevenson is calling to see the wonderful Gardenia Plant which is filled with buds again. He told me long ago that is one plant of which he never has been successful and he really desires to know exactly what I do to make it thrive. Thinking of so many Church Bazaars and Suppers—I invited four of my friends to attend The Mt. Vernon Place Church at the Monument in Baltimore on Friday evening when there was a Oyster Supper (the fol-lowing night was chicken) and it was truly a glamorous affair with the colors of Red predominating with white and green. (as to the Gift tables or boothes). The one friend had tra-veled all over the world and she told me with "Oh's" and "Ah's" that she never saw anything to compare with "CHRISTMAS AT MT. VERNON" and that all down through the years. It was breathe taking as one entered

out the paper. Have you noticed the habit of our President and I do think it is when he is deep in thought? He places his hands in his coat pockets and that is a characteristic all his own! Have a grand week end, Folks.

GRASS ROOTS OPINIONS

BOONE, IOWA, NEWS-REPUB-LICAN: "One of the less commendable acts of Congress was its last minute passage of legislation that will give senators and representatives almost unlimited free mailing privileges. As a result of this provision, members of Congress will be able to deluge voters with a greater flood of electioneering propaganda than ever

before—at the voters' expense." BEDFORD, IND., TIMES-MAIL: "Remember when the Social Security program first started? If you're in your 40's or above, you will probably recall that when the program began in the early 1930's, a cent was taken from each dollar of your pay for the program....

"Social Security is no longer a matter of pennies. It represents big money in every-one's life-money that the individual and employer earns, but spending of which is controlled or planned without the wage earner's permission."

METROPOLIS, ILL., NEWS: "How much are you paying for that loaf of bread at the supermarket? 21 cents? Or maybe you're very thrifty and buy two for 41 cents? Well, you're still getting the short end of

"....there are 151 SEPARATE TAXES ON THAT LOAF OF BREAD. So the next time you visit the supermarket and casually lift a neatly-wrapped loaf off the shelf, just remember-you're not only feeding your family, YOU'RE FEEDING UNCLE SAM."

RAYMONDVILLE, TEX., NEWS: "Even the most wishful thinker can no longer pretend that we live in a peaceful world .... Turning our attention to the ultimate deterrent of war-a powerful defense machinewe must realize sooner or later that neither armies nor weapons can function without transport. And today, as in the past, military transport means railroads. As a reminder, 97 percent of our troops and 90 percent of our military freight in World War II moved by rail. Thus, a railroad crisis is a defense crisis."

RANDOM LAKE, WISC., TIMES: "Talking about the transportation of the nation there are some unionists suggesting the socilization of the entire transportation industry: trains, trucks, aircraft, boats, buses or what have you. That would really be fun! fun! fun! No government yet has ever made a success of anything they stuck their nose in including the utilities, transportation, mail service or any other service. Maybe it's a retroactive spirit but we're still for less and less government and more and more private business."

LIBERAL, KANSAS, DAILY TIMES: "The plight of the unemployed American, although not a happy one by American standards, is Utopian compared with that of the Russian who is unemployed.. Wages paid Russian workers in 1959-60 averaged about four rubles per hour of labor, the equivalent of \$80 per month at the rate of exchange at that time, according to latest international labor data...Remembering that all necessities of life are by far chéaper in the United States, even the unemployed person in this country is about as well off as the full-time employed average Russian worker."

CENTER, COLO., POST-DIS-PATCH: "Small town newspapers actually are the basic advertising medium for 99 million folks. There are about 10 thousand small-town newspapers across the country, and they get into way over 27 million homes. There isn't much doubt about the fact that the strictly local newspaper, the Hometown newspaper, still is, and always will be, the best reading buy

If gum were to get into your carburetor, it could lead to unexpected repairs like this. One of the nine ingredients in today's Super Shell fights gum to give you top performance.

# ANCIENT HISTORY:

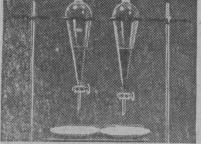

Gasoline gum used to cause unexpected repair bills. Today, one of Super Shell's 9 ingredients fights off gum -to save you money and give you top performance.

The gum preventive in today's Super Shell is so powerful that one thousandth of an ounce is enough to treat a gallon. Read how this "chemical policeman" works.

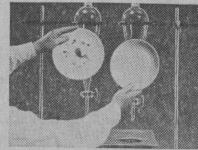

THE MECHANIC in our photograph is about to go to work on a gummed-up carburetor. A nice little repair job.

But to Shell scientists, gummedup carburetors are ancient history.

And so are other gum troubles. Such as sticky intake valves. And fouled automatic chokes. Here's why: 1. Shell uses refining processes that hold certain gum-forming gasoline components to a minimum.

Drip test shows how well Shell gum prevention works. Container on left has raw, unprocessed gasoline without gum preventive; on right, processed gasoline with Super Shell's gum preventive. Gasolines drip onto heated plates and evaporate, simulating long storage.

Result: unprocessed gasoline without gum preventive deposits sticky gum on plate (left). Gasoline with Super Shell's gum preventive leaves virtually no trace of gum (right). No gum, no gum problems. One reason why Super Shell can promise top performance.

2. Shell guards all tanks, pipes, and trucks against dirt and other gumforming contaminants.

3. Shell includes a powerful gum preventive in Super Shell's nineingredient formula.

#### "Chemical cop" at work

The gum preventive in Super Shell is so effective that a thousandth of an ounce is enough to treat a whole gallon of gasoline.

This remarkable ingredient has been described as a "chemical policeman." It helps to keep unstable elements in gasoline from sticking together-the way a skilled policeman prevents trouble by keeping a crowd from forming.

#### **Hot Weather Blend**

For a quick run-down on the other eight ingredients in today's Super Shell, see box at right.

And for top performance all summer, keep your tank filled with Super Shell's Hot Weather Blend. It's specially formulated to fight engine flooding and other hot weather troubles. At Shell stations now.

Here are the 9 ingredients in Super Shell-and what they do to give your car top performance

#1 is TCP\*-for power, mileage, and longer

plug life. #2 is Pentane mix - for fast warm-ups.

#3 is anti-knock mix-for knock resistance.

#4 is Alkylate to control "high-speed knock."

#5 is Butane - for quick starts. #6 is "cat-cracked" gasoline - for power. #7 is an "anti-icer." Added when cold

weather sets in. #8 is gum preventive—for clean carburetors. #9 is Platformate for extra mileage.

\*Trademark for Shell's unique gasoline additive. Gase containing TCP is covered by U.S. Patent 2889212.

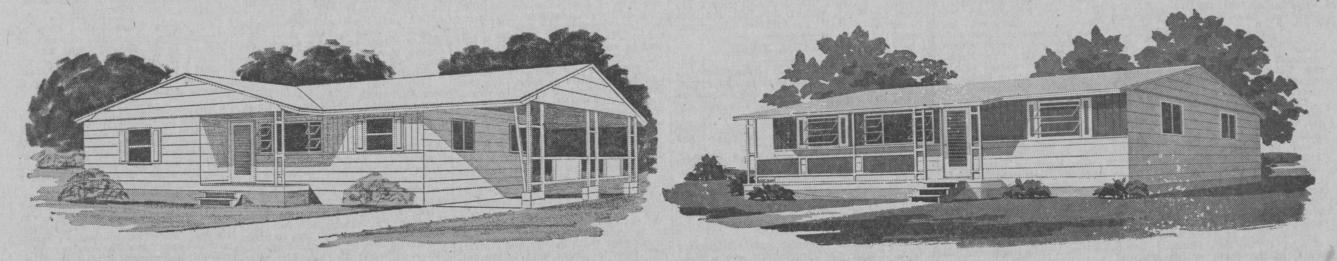

At Shell, 1997 scientists are working to make your car go better and better

Stores and business places generally were closed on Thanksgiving Day giving the town quite a Sunday air, and very few people from the country forgot the custom, by coming to transact business. Aside from union services in the U. B. church and Thanksgiving dinner and supper in the Opera House for the benefit of St. Joseph's church, the day was one of quiet and family gatherings.

Horses drop in price. The indications are that horses, next Spring, will not bring the prices they commanded only a year ago; at least prices at this time seem to be off from \$25.00 to \$50.00. Scarcity and the high cost of feed no doubt represents the chief causes for present lower prices.

#### A VOICE FROM CARROLL

Thanksgiving Day is strictly for human beings as wild animals on that day must be on the defensive to save their lives from gun-happy hunters. And the would-be Daniel Boones too often are overloaded with too much alcohol and ammunition that they don't know a wild animal from a domestic one. For instance a big-game unter in our neighboring State of Pennsylvania fired into a herd of deer, but when he reached the spot where the deer had been he found four dead and two wounded horses. Local farmers complain of finding wounded or dead calves, cows, and sheep in their fields after hunters have been on their land. It is no wonder more and more farmers are posting their land and denying hunting privileges. Hunters have brought this upon themselves as they have become careless in where they shoot and in other ways have made themselves dangerous to far-mers. A certain amount of hunting is necessary to keep the wild game population from getting out of hand. But open, to shoot his cattle, to hunt near buildings and to throw empty beer cans and whiskey bottles on the land. Thanksgiving dinner guests with

What concerns us most is the large group of Americans who desire to pay their own way and do not expect something for nothing. This group is being penalized for their thrift and personal pride by being forced to pay too much for medica attention. All of us know of friends and relatives who by one serious ill ness have lost all they saved during a life-time of work. There is certainly nothing fair about this. We ar neither for or against socialized med cine because we do not understand how it works. There has never been rational discussion of the subject in this country. The Medical Profession

mentioned and the public is left in confusion. But we would like to see some kind of plan that will make more bearable the cost of medicine to that group of Americans who still believe the old fashioned virtue of pay-

ing one's own way.

We were afraid that my mother who is visiting us, would be bored the other day when my husband and I went visiting friends. When we returned home in the system we turned home in the evening and op-ened the door we smelled the aroma of ened the door we smelled the aroma of homemade bread. Following our noses to the kitchen, we found Mother sitting in front of the glass doored electric stove. "I've been baking bread for 40 years" she said excitedly. "And this is the first time I've been able to watch what happens. It's much more fun than television!" fun than television!"

Western Europe is horrified at the reports that some Americans are plan-ning to build individual bomb shelters in which each man will defend his own family, by force of arms if necessary his less prepared neighbors Many Europeans who survived the agonies of warfare against civilians, shared space and air with all who needed shelter, think Americans have lost all their moral obligations to a democratic society and are sinking to a state of behavior one step lower than savages. Thank goodness all Americans are not thinking of building individual bomb shelters and saving their own skins. There is always a certain amount of hysteria at the beginning of a crisis, but soon reason and common sense prevail. The majority of Americans do not think only of themselves in a catastrophe but join together and work to overcome it, for the good of all. It is true that in recent years. that in recent years Americans seem more self-centered but when the chips are down, we pull ourselves together and do what is to be done. Give us a little more time and we will arrive at a solution to the bomb scare. We will either build bomb shelters for all or we will build none at all.
In this world of fear and anxiety

all of us need a sound and workable philosophy. These lines by Max Ehrmann may be the very ones to adopt as a pattern to make the most of our kind of world: "Go placidly, amid the raise and the heart and the property of the raise and the heart and the property of the raise and the heart and the property of the raise and the raise are raise and the raise are raise and the raise and the raise are raise are raise and the raise are raise and the raise are raise are raise and the raise are raise are raise the noise and the haste, and remember what peace there may be in silence. As far as possible, without surrender, be on good terms with all persons Speak your truth quietly and clearly and listen to others, even to the dul and the ignorant; they, too, have their story...Keep interested in your own career, however humble; it is a real possession in the changing fortunes of time. Be yourself. Especially do not feign affection. Neither be cynical about love for in face of all aridity and disenchantment it is as perennial as the grass. Take kindly the counsel of the years, gracefully surrendering the things of youth....
Nuture strength of spirit to shield you in sudden misfortune...Beyond a wholesome discipling be grantly with wholesome discipline, be gentle with yourself. You are a child of the universe no less than the trees and the

stars. You have a right to be here. .Therefore be at peace with God. and whatever your labors and aspirations in the noisy confusion of keep peace in your soul. With all its sham, drudgery and broken dreams, it is still a beautiful world.

Have you looked closely at the 1961 Christmas Seals sent out by the Carroll County Tuberculosis Associa-

tion? The whole family is pictured on the stamps this year. Mother is standing on a chair trying to put the star on the highest point of the Christmas tree and she will get it there if the chair doesn't collapse. Daddy is trying to hang a Christmas wreath while Junior is hanging on to y's leg. Big sister is trying to find the notes of a Christmas carol, while daddy or her boy friend and her younger sister accompany her on the flute. Or is it the other way around. Well, it doesn't matter for finally the melody of Silent Night echo through the house. Then Grandma and Grandpa take over. While the smallest member of the family is gently rocked by Grandmother, dear grandpa lends his rich baritone to the music drifting in from the living room. After looking at the stamps, if you don't feel the Christmas spirit stirring in your veins then you are a bit of a scrooge.

No Nation was ever great without greatness heing demanded of it by its greatness being demanded of it by its leaders. Americans for years have been asked only to pay their income

Here is something for all parents to think about, especially the young parents just starting out to train children. Teachers just starting out on their first assignment this year are quitting or are trying to get into other kind of work. Why? Lack of discipline in the classroom. Parents, remember that a teacher gets your child when he is six or seven. You have had him in his most important years. His pattern of behavior has been set. Have you done a good job? If you haven't don't expect the teacher to

succeed if you have failed. While we were shopping in Westminster in the household department of a store, two freshman from West-Maryland college were shopping too. Evidently they were buying supplies for their room as they were get ting soap, and washing powder. The broom rack was close by and one asked the other if they needed a broom. "No", answered the other, "Not yet."

As the 1961 football season draws to a close, all eyes are turned toward the traditional bowl games. Many bowl bids were won and lost on November 25th as the next-to-last Saturday of the college football season proved to be one of the most hectic afternoons of the fall. Many holes are still open, but right now the probable bowl lineups for New Year's Day look like this:

Rose Bowl at Pasadena, Cal.—U. C. L. A. (7-3) vs. Ohio State (8-0-1).

Sugar Bowl at New Orleans—Ala—

Snider, late of Carroll County, deceased, made by John H. Harner, Executor of the last Will and Testament of said deceased, and this day reported to this Court by the said Executor, be ratified and confirmed unless cause be shown to the contrary on or before the 18th

Sugar Bowl at New Orleans—Alabama (9-0) vs. Arkansas (8-2).
Cotton Bowl at Dallas—Texas (9-1) vs. Mississippi (8-1).
Orange Bowl at Miami—Colorado (8-1) vs. Louisiana State (9-1).

#### Colts Beat Jinx

The Baltimore Colts have finally The Baltimore Colts have finally won two consecutive games. By winning, the Colts stayed right in the thick of the second place fight in the Western Division and kept their faint chances for the division title alive. Now 6-5 in the standings, they must win the remaining 3 games, while the leading Green Bay Packers lose 3 of their games.

Army vs. Navy

It was in the year 1890 that the Cadets of Army first met the Midshipmen from Annapolis on the football field. Now, 61 meetings later, the game is still a toss-up. No matter how bad a season the teams may have, winning this traditional game is the difference between a good year and a bad one. This year, neither team can be classed as outstanding. So, Dec. 2nd, with identical 6-3 records, they will clash for the sixty-second time in Philadelphia stadium before a crowd of more than 100,000, including President and Mrs. John F. Kennedy.

Chamberlain High Scorer

The Philadelphia Warriors' Wilt Chamberlain has poured in 834 points in 18 games for a 46.3 average, and is threatening to make shambles out of his previous National Basketball Association scoring record. The sky-scraper scored a record 3,033 points last season for an average of 38.4, but can very easily pass the 3,500 mark in the 1961-62 campaign.

#### Witness

Lesson for December 3, 1961

THE Christian church is no secret society. To be sure, Christians know the secret of a truly happy life, they have more than they can understand, for theirs is the peace that passes understanding. But this is an open secret.

tian knows about Christ he is bound to share, that's part of being a Christian. The church's word for this sharing, this joyful passing-on of the Good News, is Witness. Let's

What the Chris-

Dr. Foreman get the court-room out of our head. Christian witness is sometimes like courtroom witness, giving evidence at a trial. The Christian should be ready to give as reason for the hope that is in him. But this is in emergencies, it's a bit unusual. Witness, as the church uses the word today (we get the word from Acts 1:8) means all that a Christian may do to show that he is a Christian.

Witness by Being

Not that a Christian is to be a show-off. Never. Jesus uses two meaningful figures of speech in this connection. He calls His followers light, and salt. Now both light and salt can be nuisances, even harmful, if you get too much salt into the food or if a glaring light gives you a headache. Both light and salt must be modest, so to speak, unobtrusive. But what do light and salt do to justify their existence? Strictly speaking, they do not do a thing. They just ARE. The light gives light and the salt tastes salt. This suggests à way for the Christian to witness for Christ. Just BE-ING what the preacher talks about, just BEING (as it were) like the pictures in the catalogue, that is witness, that is evangelism. We use the word "evan-gelism" in the church too exclusively for talk. Everybody knows one picture is worth a thou-

sand arguments. If you are a Christian, why is it? Isn't it because you somewhere have known a real Christian or two? Talk is important, Christian talk very important; but the salesman ought to be able to point to some good samples?

Witness by Doing

You can't really separate being and doing. Part of being a Christian—an indispensable part—is doing. What? Well, here we come on all sorts of strange ideas. Centuries ago there were men who thought, the thing to do, for a Christian, would be to suffer as much pain as possible. So if they didn't have my wounds they would cut themselves, and if they were not sick they would do things almost guaranteed to make them sick. They would stand in cold water all night long to keep from going to sleep. One man (Simeon Stylites, the Pillar-Man) stood on top of a post for 38 solid years just to show what a good Christian he was. Most of the church has got over those grotesque ideas. Some thinkers have rushed to the opposite extreme and denied that a Christian can do anything to show he's a Christian. The Bible truth is simple. St. John put it into words of one syllable: "He who says he abides in Him (Christ) ought to walk in the same way in which He walked."

Some people are better talkers than others, true enough. But it does seem strange that Christians very often find it harder, or they think it's harder, to say a good word for Jesus Christ than it is to "walk as He walked" or to have Christ-like attitudes. Nevertheless, witness by saying is very important. A professor in a classroom of chemistry makes a demonstration at the desk; and that's a very effective form of teaching. But if he never once says what he is doing, never explains at all, he's a poor teacher. A Christian, if he is anything like the Christians of the early days, will not only witness by doing and being, he will say a good word for the Savior. Man is a talking animal. The word Gospel means Good News. News can be pictures, but some time or other it calls out to be told s If witness-by-saying seems frightening because you realize it hardly fits your being and your doing, then isn't it best, aot to refuse to speak, but to work at your doing and being so the saying will fit? There is nothing you can try, of which you may be more sure of God's help.
