We have received several copies of the "Election Law for Maryland," prepared by the Baltimore Reform League, to be submitted to the present Legislature.

We are suffering from a house famine. Wanting a house ourselves, our readers can imagine the character of our answer to a letter of inquiry by a stranger. If it doesn't pay to build tenement houses and all are not amicable or willing to own their own domicile, a curious problem presents itself to those who now own the town.—Clarion.

PERSONS intending to make sale this spring should send in the date as soon as possible. In all cases where bills are printed at this office a free notice is given in the sale register from the time the date is handed in until day of sale. By attending to the same early you may prevent other sales from coming on the same day with yours.

The Carrolltonian, published at Westminster, of which Mr. Chas. J. Thawley is editor and business manager, entered upon its fourth volume with its issue of last week, and celebrated the event by appearing in an entirely new dress of type. The appearance of the paper is now really beautiful, and we wish it many years of increasing prosperity and usefulness.

The February Eclectic opens its excellent list of contents with a paper by Grant Allen on "Practical Religion," which, while somewhat heterodox, is highly suggestive. Pasture concludes his dissertation on "Rabies," and Mrs. Jenne contributes an article on the women question. Robert Browning is again discussed in short papers from the Saturday Review and Spectator. Sir William Dewey explains the question of the Deluge, controverting the Agnostic views with great ability. The beginnings of reform in Persia are described by E. F. G. Law. Edward Clodd has an able paper on "The Origin of Death." The retrospect of Stanley's expedition is by a well known geographical authority, J. Scott Keltie. Prof. Huxley does his great reputation justice in the paper, "The Natural Inequality of Man." Swinburne has a series of sonnets on Browning, and an excellent article by Dr. Charles Mackay, is entitled "The Ascertainment of English." Several able minor articles, stories, and poems complete a very readable and entertaining number.

Mr. J. A. HELMAN has nearly completed his new store room. The glass front is finished ready for the painters.

An order has been issued for the use of Mr. Chas. W. Miller's postoffice record book in 24,000 postoffices. Mr. Miller was postmaster at Frederick some years ago and compiled the book according to the needs presented in that office, and later had it approved by Postmaster-General Wanamaker.

Confirmed.

The favorable impression produced on the first appearance of the agreeable liquid fruit remedy Syrup of Figs a few years ago has been more than confirmed by the pleasant experience of all who have used it, and the success of the proprietors and manufacturers the California Fig Syrup Company.

Proposed Extension.

There seems to be some prospect of the Monocacy Valley Railroad being extended in the near future through Middletown Valley to connect with the Baltimore and Ohio.—News.

In an interview with a representative of the Frederick Times, a director of the Monocacy Valley Road denied the above statement.

Unique Piece of Work.

Mr. Charles Sinn, son of Mr. Charles W. Sinn, the well-known tobacconist, has recently completed a very handsome piece of scroll work in the shape of a clock representing a fire engine. When in working order the wheels of the engine run, giving to the whole a very realistic appearance.—Frederick News.

Make No Mistake.

If you have made up your mind to buy Hood's Sarsaparilla do not be induced to take any other. Hood's Sarsaparilla is a peculiar medicine, possessing, by virtue of its peculiar combination, proportion and preparation, curative power superior to any other article of the kind before the people. For all affections arising from impure blood or low state of the system it is unequalled. Be sure to get Hood's.

To the Point.

"An Officer" writes the following to the Frederick News:

Frederick should by all means have a lockup for its use. The town uses the prison and does not pay the county one cent for its use. The jail is used as a receptacle for "drunks" and all other offenses coming under the mayor. This should not be. If the town is going to use the county property it should pay for it, but the right move would be to erect a lock-up of its own, as many other towns in the county have done. They do not send their petty cases to prison, but provide a place for them in their boroughs and pay the maintenance of them themselves.

Sanitary Bureau, New York City.

Dr. Cyrus Edson of the New York Health Department prescribes Speer's Port Grape Wine in his practice as the purest and most reliable wine to be had and his opinion is endorsed by his associates as will be seen from the following letter:

New York, December 9, 1887. The Speer N. J. Wine Co., Gentlemen.—Having used your Port Wine to a large extent in my family in cases of sickness and found it to be all that was recommended of it by my family physician, I desire to purchase it by the dozen bottles. Respectfully yours, JAMES BRYAN, Sanitary Inspector Health Department, New York City. Druggists keep it.

Henry Bishop discusses very pleasantly of "A Day in Literary Madrid," W. H. Mallock takes us "Through Three Civilizations" very pleasantly and profitably, varying the study with a number of beautiful illustrations of prominent places and events; Harold Frederic's story "In the Valley" is continued, as is also Octave Thanet's story, "Expiation," Eugene Schuyler relates a singular Consular Experience in the history of a "Minnesota Heir of a Serbian King," and G. IN THEIR NEW QUARTERS.

A Fine Building Thrown Open to the Public—Viewed by a Large and Admiring Throng of Visitors.

Last Friday it was announced that the new School House for St. Euphemia's School, on Green Street was ready for occupancy, and an invitation was extended to all who wished to be shown the interior to call on Saturday afternoon. Hundreds of people turned out, as to a great show, and all were highly pleased with the structure.

THE BUILDING.

It is situated on Green street adjoining the residence of the Sisters who have charge of the school. It stands 8 feet back from the street line with a frontage of 71 feet 6 inches, running back on the lot 48 feet 6 inches. The first floor is 4 feet 6 inches above the street level, and 9 granite steps make the ascent easy to both entrances, one on the street and the other on the side next the Cemetery of St. Joseph's Church. The stone work of the foundation extends to the first floor, and the balance of the building is of brick with granite trimmings, window sills, etc. The height is 36 feet from the ground to the square, while the total height from the ground to the top of the roof is 51 feet.

The front and back are alike with the exception of the entrance, two windows in the latter taking the place of the front door. The walls are divided into three parts, the middle section, 21 feet 6 inches, projects 21 inches and is finished with a gable centre at the roof.

INTERIOR.

The basement has a nine foot ceiling, with cemented floor and walls, and is used for the girls play room. The first floor has fifteen foot ceilings, and is divided into four class rooms, 18x25 feet, by two eight foot corridors running the entire length of the building from East to West and from North to South. The class rooms are wainscoted to the height of the window sills, and above the wainscoting large slate tiles are placed in the wall for blackboards.

Each class room is entered by a small corridor containing hooks for hats and wraps. Two of the class rooms are for the boys and two for the girls, the boys entrance being on the street and the girls on the west side. There is a large vestibule at each entrance. The second floor is finished for a distribution hall, with a movable partition at one end, forming a class room for the colored children. When this partition is removed a hall the entire size of the building is formed, with 14 foot ceilings. The building is covered with a steel roof and terra cotta pipes emptying into a large sewer carry off all the water. Light and ventilation are furnished by 72 large windows, 23 in the front, 23 in the back, with 12 on the west end and 10 on the east end. Each window is furnished with a large transom hung on hinges at the bottom, opening inwards from the top, thereby furnishing ventilation without draught. The entire building is heated by steam, for which purpose a large double steam furnace is placed in the basement, and so arranged that in mild weather only one boiler need be used, while in colder weather both will be needed. The steam-heating apparatus was put in by Messrs. R. D. Arnor & Son of Gettysburg.

The plans and drawings were made under the direction of Rev. Alexis Mandine, by Mr. Bennett Tyson, of the firm of Tyson & Lansing, carpenters and builders, who built the structure. The mason work was done by Messrs. Ling & Sons, and Mr. John D. Seabold did the plastering, and M. E. Adelsberger & Son the roofing, spouting, etc. With the exception of the steam heating and plumbing, the entire work from that of the architect to the completion of the building was done by resident mechanics.

The school took possession of the building on Monday morning.

Belford's Magazine for February is brimful of substantial reading matter, furnishing entertainment or instruction suitable to all varieties of taste. The second instalment of Jefferson Davis' history of "Andersonville and other War-Prisons" cannot fail to be read with interest by every unprejudiced survivor of the late Civil War; there is a short story by George Jessop, entitled "Out of the Night and the Other World;" "Chimeras Dire" are discoursed of by James Steele; H. K. Thurber sets forth the advantages of a Protective policy, clearly and briefly; Sara Osborne furnishes a short story entitled "Little Buttons;" "The Auditorium at Chicago" is described by John McGovern; there are several poems and other very readable articles, whilst the Editorial Department and Reviews display considerable research and deep thinking and besides all these the peculiar feature of this Magazine, a complete Novel, by Irene Farrar, entitled "By Might of Right."

The Board organized by appointing Mr. J. Emory Bair Cashier, Mr. Charles M. McCurdy Assistant Cashier and Mr. J. Wm. Kendeheart Teller. Mr. McCurdy will enter upon duty next Monday. All have large experience and equip the Bank very thoroughly.—Comptroller.

The Grave Gets Tired Yawning. Seemingly, for certain wretched invalids who toddle feebly along, though always looking as if they were going to die, but omitting to do it. They dry up, wither, dwindle away finally, but in the meantime never having robust health, know nothing of the physical enjoyment, the zest of that existence to which they cling with such remarkable tenacity. They are always to be found trying to mend by tinkering at themselves with some trashy remedy, tonic or "pick me up" to give a fillip to digestion, or "help the liver." If such misguided folks would resort and adhere to Hostetter's Stomach Bitters it would be well with them. This superb invigorant supplies the stamina that the feeble require, by permanently reinforcing digestion and assimilation. It overcomes nervousness, insomnia, rheumatism, kidney complaints, biliousness, constipation, rheumatism and neuralgia.

The street lamp which formerly stood near Mr. J. A. Helman's new store room has been removed diagonally across the street, to the corner at Smith, Sons & Co's. coach factory.

OUR ice men made preparations last week to begin laying in the crop on Monday, but the warm weather of Saturday night and Sunday destroyed it all. The lateness of the season causes serious apprehensions of no crop.

The latest postal laws are such that newspaper publishers can arrest any one for fraud who takes a paper and refuses to pay for it. Under this law the man who allows his subscription to run along for some time unpaid and then orders it discontinued, or orders the postmaster to mark it "refused," and have a postal card sent notifying the publisher, leaves himself liable to arrest and fine, the same as for theft.—Printers' Ink.

The Fairfield correspondent of the Gettysburg Compiler says: "The grocery business is booming just now, as there have been several traveling salesmen, said to represent a Philadelphia firm, canvassing the neighborhood of late, and selling direct to the consumers, thus saving the profits of the middlemen, and to counteract their sales, our local dealers are selling on short profits, or no profits at all."

Gettysburg National Bank. On last Tuesday, the 21st inst., Hon. John A. Swope resigned the presidency of the Gettysburg National Bank, being succeeded by Hon. David Wills. Dr. Swope has been at the head of the institution for the past eleven years, and has had the above step in contemplation for some time past, but in deference to the wishes of his brother members in the board of directors and the stockholders generally he had never pressed the matter until now when the pressure of his business engagements at Washington and elsewhere had become so great that he felt it to be a duty he owed both to the bank and himself to positively decline a re-election. He still continues to be a member of the board of directors. Dr. Swope succeeded his father, Geo. Swope, Esq., who had held the office for thirty-one years; father and son have therefore given forty-two years service to the bank, a record that is a little out of the ordinary and that deserves to be succeeded by a period of relief from the cares and responsibilities of such a position.

The Board organized by appointing Mr. J. Emory Bair Cashier, Mr. Charles M. McCurdy Assistant Cashier and Mr. J. Wm. Kendeheart Teller. Mr. McCurdy will enter upon duty next Monday. All have large experience and equip the Bank very thoroughly.—Comptroller.

Mr. G. L. Fox sawed three logs on his mill last week, cut from one white oak tree, which measured respectively 9 ft., 14 ft. and 14 ft. in length, total 37 ft. The logs made 1610 feet of lumber.
