

A Monster Gathering.

Within the next three weeks Cleveland, Ohio, will be the scene of one of the most enormous conventions ever held on this continent, from July 11 to 15, when the Young People's Society of the Christian Endeavor will hold its Thirtieth International Convention.

Conservative estimates place the attendance of delegates and their friends at 20,000 souls, and arrangements have been made to find entertainment for this number in private families, hotels and homes of that city. The programme as prepared promises to surpass all of the previous gigantic gatherings of this society in point of interest, embracing as it does the names of men and women of renown in church and state, who will deliver addresses of the greatest brilliancy on Christian Endeavor work.

Allegedly transportation companies are being besieged by delegations from city, state and provincial unions for special trains to accommodate their respective delegations who intend to make the trip in a body.

The present Convention about to convene in Cleveland is of more than passing interest to citizens of our state, in view of the vigorous and concerted action that has been put forth on the part of Christian Endeavor workers in Maryland during the past year, to have the Fifteenth International Christian Endeavor Convention meet in Baltimore in the Summer of '96. The meeting place of each convention is decided upon two years in advance, and Maryland will send between 300 and 500 delegates to this convention to press upon the Trustees of the United Society the claims of Baltimore as the convention city of the year after next. Twenty-four states have so far endorsed Baltimore as the convention city for that year, through the efforts of the Preliminary Committee of '96, of the Baltimore Christian Endeavor Union, and this committee's efforts in this direction have received the favorable endorsement of Gov. Brown and the last Legislature, the Mayor and City Council of Baltimore, Baltimore Corn and Flour Exchange, Merchants' and Manufacturers' Association, Builders' Exchange, Lumber Exchange, etc., and all of the denominational conferences, synods, and ministerial unions throughout the state.

The Maryland delegates will go to Cleveland by special train via the Western Maryland, Reading & Lehigh Valley Railroads to Buffalo, thence by the Nickel Plate Railroad to Cleveland. The return trip will be made over the same route and will include a stop over at Niagara Falls, and Gettysburg Battle Field. The fare for the round trip has been fixed at \$11.00.

Deafness Cannot be Cured

by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars; free. F. J. CHENEY & CO., Toledo, O. Sold by Druggists, 75c.

Attempted Suicide.

Mrs. Ella Crum, while at the house of her father, Mr. Edward Crum, near Mount Pleasant, this county, attempted on Saturday evening to commit suicide. Mrs. Crum has made several previous attempts to kill herself, and it is thought her mind has been seriously affected for some time. Saturday she went to one of the upper rooms in her father's house and finding a revolver, which belonged to her brother, fired two shots at her head with it, only succeeding in grazing the scalp. She was apprehended before she could fire again, and is now suffering from a severe attack of nervous prostration. She is closely guarded by her friends.—Sun.

Blackberries the Only Hope.

Col. Thomas Whitehead, Virginia's commissioner of agriculture, has issued the following address, which he has sent out to the country papers throughout the State:

"Will you do me the favor and give the poorer people in the country the advantages of a practical suggestion, based on reliable reports from the different sections of the State, and suggest that the country papers copy?"

"The fruit crop is a failure—rarely an instance of a report of any peaches or pears. The small per cent. of apples reported is being rapidly reduced; they are falling from the trees, and practically there will be none for market."

"A good crop of grapes is expected in many counties. A large crop of blackberries is reported in most counties—in some a good crop of huckleberries also."

"Now, if those who are out of employment or are unable to do heavy work, the women and children, who have to do what they can, and frequently pick these berries and sell them fresh in the towns and villages for what they can get, will pick and dry all they can—work diligently at it—they will be amply rewarded this winter; they will, if the fruit is held till January, make much money. Those who have not a supply of dryers near towns can get for nothing old tin from discarded roofing, often from burnt houses; this straightened out for dryers is preferable to wood—drys quicker and is more easily handled and costs nothing to put in working order. Every cabin roof should be utilized. The blackberry is the main chance. Gather and dry every berry possible, and hold till Christmas for a high price. The grape, blackberry and huckleberry will be the sole reliance for preservers."

C. and O. Canal.

A long standing difficulty in the financial affairs of the Chesapeake and Ohio canal has now been adjusted by the settlement of the Georgetown millers' claim, which has been several times before the courts in various forms. The Georgetown millers depend upon the canal water for their motive power. In 1889 the flood in the Potomac broke the canal embankments, and on the retirement of the waters the canal was dry and the mills idle. The Georgetown millers by agreement with the then authorities of the canal raised about \$20,000 and repaired the Washington level and secured a head of water to start the mills again. It was then agreed that the millers should reimburse themselves for this outlay from the water rents which would become due the canal company. On a change of the ownership of the canal under the joint orders of Judge Alvey of the Maryland Court of Appeals, and Judge Cox, of the court of Washington District, the new authorities refused to recognize the arrangement with the millers, and demanded cash for the water rents. The matter has since been in dispute and litigation, but it is now settled. Under the new adjustment the millers are allowed \$19,000 of the \$20,000 claimed by them. Henceforth there will be peace between the millers and the canal people.

"Let Us Cross Over the River and Rest in the shade of the trees." Thus spoke the dying hero, Stonewall Jackson, a man whose conception of war was so heroic, so chivalric that friends and foes praise him alike. How many dispirited women feel that they would indeed like "to cross over the river, and rest." Every day brings its measure of annoyance and pain. If only they could be made to realize the inestimable comfort and physical strength to be found in Dr. Pierce's Favorite Prescription, they would soon feel that "their ways were ways of pleasantness, their paths were paths of peace."

Mrs. S. E. Bongey, of Red Oak, Stephenson Co., Ill., writes: "One of my neighbors was very sick during her 'change of life.' After advising her to take Dr. Pierce's Favorite Prescription, I visited her a few days ago, and she told me she was so strong she could work all day long without getting tired, and says she was greatly benefited. I know many afflicted women who have been cured by your medicine."

SIXTY men employed as finishers in the hat factories of John R. Miller and Henry B. Hendel, struck Friday against a reduction of ten cents per dozen hats.

The Railroad Strike.

The strike of the American Railway Union in support of the demand of the workmen in the Pullman shops has crippled the railroad business of Chicago. Three hundred Rock Island passengers are stranded at Rock Island, near Chicago, and five hundred at Decatur, Ill. In California trains with Pullman cars were started out but were stopped by greased tracks and missing couplings. A trestle was burned, but the strikers sent men to help put out the fire as soon as it was discovered. United States troops were ordered to Trinidad, Col., where the strikers disarmed a thousand deputy marshals.

The United States government took vigorous action Monday to stop the interference with railroad trains by the strikers who are seeking to force the Pullman Company to arbitrate. By the direction of the Attorney-General of the United States a bill was filed in the United States Court at Chicago under the interstate commerce act, and an injunction was issued restraining all persons from interfering with the movement of trains of every kind. Arrangements were made with the Secretary of War to support this action by use of the army if necessary.

The railroad business in Chicago and West continues to be seriously interrupted. The Baltimore and Ohio passenger trains reached Chicago almost on time Monday, but the crews were driven from the freight trains. The blockade on the Rock Island Railroad at Blue Island remains unbroken, the strikers laughing at the injunction and threatening to meet force with force.

The Puzzle Solved.

Perhaps no local disease has puzzled and baffled the medical profession more than nasal catarrh. While not immediately fatal it is among the most nauseous and disgusting ills the flesh is heir to, and the records show very few or no cases of radical cure of chronic catarrh by any of the many modes of treatment until the introduction of Ely's Cream Balm a few years ago. The success of this preparation has been most gratifying and surprising. No druggist is without it.

Atlantic City

Can best be reached by Royal Blue express trains leaving Camden Station 5.25 A. M., arriving Atlantic City 10.35 A. M. daily; 10.48 A. M., arriving Atlantic City 3.15 P. M. (Saturday 2.50), and 12.55 P. M., reaching the shore 5.10 P. M. t. a. l.

Reduced Rates to Cleveland.

The Baltimore and Ohio R. R. Co. will sell excursion tickets from all ticket stations on its lines, east of Ohio River, to Cleveland, Ohio, for all trains July 9th, 10th and 11th, valid for return trip until July 31st, inclusive, at reduced rates. The rate from New York will be \$13.00; Philadelphia, \$11.50; Baltimore, \$11.00; Washington, \$11.00; Cumberland, \$8.50; and correspondingly low rates from all other stations.

In Philadelphia the effect of the torrid wave last week on the health of the people was seen in the mortality statement just issued by the board of health. The deaths last week were 617, an increase of 100 over the preceding week. There were 13 deaths from sunstroke, while 319 children under five years of age died, most of them from heat. The same week last year the deaths only numbered 389.

An Important Discovery.

Prof. Cyrus Thomas of the Smithsonian Institute thinks he has at last discovered the origin of the native Central American civilization which has been so long a puzzle.

He finds, in his search for some peculiarities of this civilization, that the Maya, the chief native language of that section, is a direct offshoot from the Malay. Although not claiming to be a linguist, he finds the evidence so convincing that he is surprised the fact has not been discovered before.

Scribner's Magazine for July opens with a descriptive article on the social aspects of that region along the Massachusetts Coast known as "The North Shore," by Robert Grant. Doctor Carl Lomboltz, the distinguished explorer and author of "Among Cannibals," has written several papers on his discoveries for Scribner's Magazine, the first of which appears in this number under the title "Among the Tarahumaris." The anniversary of the battle of Gettysburg makes particularly appropriate the publication at this time of the late Doctor Philip Schaff's reminiscences of "The Gettysburg Week." Doctor Schaff was at the time of the Gettysburg campaign a professor in the Theological Seminary at Mercersburg, Pa. Professor N. S. Shaler, of Harvard, continues his popular studies of domestic animals with a paper on "Beasts of Burden," showing the great part which they have played in the civilization of man. Ernest Flagg, the architect of St. Luke's Hospital, the new Corcoran Art Gallery, proposes a definite solution for "The New York Tenement House Evil." The number also includes a short story of a Summer trip to Europe, entitled "An Alley of Mr. Cross," a dramatic treatment of "John March, Southerner," which contains a fatal fight; and a short essay on the woman question by Agnes Sepplier.

Coal Strike Ended.

The strike in the Maryland coal region is over. The leaders have acknowledged themselves defeated, and advised the men to return to work. Last Thursday there was a general rush at Frostburg and Lonaconing by strikers to secure employment, and nearly all the mines in the region resumed work Friday. Organizer Wilson, who has had the strike in charge, has given up the contest, and returned to his home in Pennsylvania.

Thursday morning, when Gov. Brown returned to Baltimore from his second visit to the coal region of Allegany county, he issued an order directing two companies of the Fourth Regiment to assemble at once, prepared to go to Lonaconing, and to take with them the galling gun. The companies were G. and H. of the Second Battalion, and Major George T. Robinson was chosen to command them. The two companies assembled promptly at the Broadway Armory, were soon under arms, when orders were received from the Governor suspending the order to move, and holding the men under arms under waiting orders. Advice from Colonel Wilmer received during the day, however, indicated that additional troops were not needed, and about five o'clock the Governor ordered the two companies to be dismissed.

WILLIAM G. GREEN, a lifelong associate of Lincoln and Yates and an old citizen of Illinois, died at his home in Tallula, Ill. He was a classmate of Richard Yates, of Jacksonville, and, with Yates, he helped to organize and complete the Jacksonville branch of the Chicago and Alton Railroad.

Not Insane.

Patrick Eugene Prendergast, the assassin Mayor Carter H. Harrison, of Chicago, was declared "not insane" by a jury in Judge Payne's Court, at Chicago, Tuesday afternoon. Under sentence of the court Prendergast must be hanged on Friday, July 13.

A WASHINGTON printer named Thomas Fox, yawned so hard on last Friday night that he dislocated his jaw twice. The second time he could not close his mouth. He went to a hospital, where his jaw was put in place.

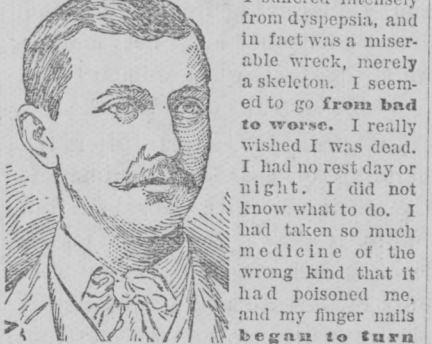

A yellow dog that stole on board the steam ship Elbe at Southampton, England, was sold at public auction by the custom authorities in New York to pay the tariff duty on him.

The people quickly recognize merit and this is the reason the sales of Hood's Sarsaparilla are continually increasing. Hood's is "on top."

FRED SNIDER, an aged miser living at Le Lourdesville, Ohio, was tortured by robbers until he gave up \$50. Snider will die.

Hood's Saved My Life

"For years I was in a very serious condition with catarrh of the stomach, bowels and bladder. I suffered intensely from dyspepsia, and in fact was a miserable wreck, merely a skeleton. I seemed to go from bad to worse. I really wished I was dead. I had no rest day or night. I did not know what to do. I had taken so much medicine of the wrong kind that I had poisoned me, and my finger nails began to turn black and come off. I began to take Hood's Sarsaparilla. I had faith in the medicine, and it did more for me than all prescriptions. I have gradually regained perfect health, am entirely free from catarrh of the bowels, and pain in my back. My recovery is simply marvelous." W. R. YOUNG, Potter's Mills, Pa.

Mr. W. R. Young, Potter's Mills, Pa.

KNOWLEDGE

Brings comfort and improvement and tends to personal enjoyment when rightly used. The many, who live better than others and enjoy life more, with less expenditure, by more promptly adopting the world's best products to the needs of physical being, will attest the value to health of the pure liquid laxative principles embraced in the remedy, Syrup of Figs.

Its excellence is due to its presenting in the form most acceptable and pleasant to the taste, the refreshing and truly beneficial properties of a perfect laxative; effectually cleansing the system, dispelling colds, headaches and fevers and permanently curing constipation. It has given satisfaction to millions and met with the approval of the medical profession, because it acts on the Kidneys, Liver and Bowels without weakening them and it is perfectly free from every objectionable substance.

Syrup of Figs is for sale by all druggists in 50c and \$1 bottles, but it is manufactured by the California Fig Syrup Co. only, whose name is printed on every package, also the name, Syrup of Figs, and being well informed, you will not accept any substitute if offered.

Emmitsburg Rail Road.

TIME TABLE.

On and after Oct. 1, 1893, trains on this road will run as follows:

TRAINS SOUTH.

Leave Emmitsburg, daily, except Sundays, at 7.50 and 10.00 a. m., and 2.55 and 4.50 p. m., arriving at Rocky Ridge at 8.20 and 10.30 a. m., and 3.25 and 5.20 p. m.

TRAINS NORTH.

Leave Rocky Ridge, daily, except Sundays, at 8.20 and 10.37 a. m., and 3.30 and 6.29 p. m., arriving at Emmitsburg at 8.56 and 11.07 a. m., and 4.00 and 6.59 p. m.

WM. H. BIGGS, Pres't.

Established 1837.

Wells's all-rye whiskey. It has no rival for superiority, is absolutely pure, and has a reputation of the highest standard for excellence and purity, that will always be sustained.

F. A. DIFFENDAL.

A new spray has been put on the fountain.

The seventeen-year locust has appeared in Cecil county.

Exports from the port of Baltimore for June amounted to \$3,438,226.

WILSON ALTON, of Calvert county, was killed on Tuesday by a colt falling on him.

The new schedule on the Western Maryland Railroad went into effect on Sunday.

The wood work on the residence of Dr. James A. Elder, in this place, has been repainted.

This year's wheat harvest has been pronounced the heaviest in Washington county for twenty years.

CHAS. YENTZ, of Baltimore, was overcome by the heat last Saturday and taken to his home where he died.

The creditors of Mr. I. M. Fisher, elected Messrs. Vincent Sebald and John C. Motter as permanent trustees.

REV. HENRY MANN, pastor of the Methodist Churches at Thurmont and Emmitsburg, will spend the summer in England.

On Wednesday Mr. E. H. Rowe, of this place, received four fine shoats of the improved Chester white breed, from Salem, Ohio.

The tariff bill passed the Senate on Tuesday. It now goes to the House of Representatives for concurrence in the Senate modifications.

JOHN H. VAN DER HOUT, the well known Baltimore brewer, died Tuesday afternoon, of cancer of the stomach. Aged sixty-nine years.

A new clothing store has been opened in Mrs. Hyder's store room, at the square in this place. The proprietors are Friedeman and Bair.

SCHOLARSHIPS in the State Normal School from Carroll county have been awarded to Miss Rebecca McGarr and Mr. James L. T. Waltz.

TEETH EXTRACTED FREE OF CHARGE at the Hot Springs Medicine Co. They remain in Emmitsburg for two weeks, commencing Tuesday, July 10.

On Monday, Samuel Holaday, a farmer living near Funkstown, Washington, dropped dead in the harvest field whilst reaping wheat. He was about forty years of age.

DENTAL NOTICE.—Dr. Geo. D. Foulke will visit Emmitsburg, professionally July 11th, 12th and 13th inst. Office at the residence of Mr. Philip D. Lawrence.

SEVENTY-FIVE physicians of Frederick county registered at the clerk's office in Frederick, in compliance with the act of the recent Legislature, compelling them to do so prior to July 1st.

MIDDLETON'S experimental fever delivery, which was instituted two years ago by postmaster Wanmaker, ceased last Saturday, because congress failed to make an appropriation to continue it.

The comptroller of the treasury has made the annual distribution of the free school fund, the amounts being payable on and after the 15th inst. Frederick county will receive \$3,350.22.

YESTERDAY afternoon, Constable H. E. Hann, arrested an unknown man on Main street for swearing and disturbing the peace. Constable Hann put the stranger in the Iron Coop, which is a good place for such characters.

On Monday Gov. Brown appointed Mr. John J. Jackson State fire marshal under the law passed by the last Legislature. The pay of the office is \$2,500 a year and the marshal has the appointment of a clerk at \$1,200.

The Frederick-Town Savings Institution on the 30th ultimo, declared a semi-annual dividend of three per cent., and an extra dividend of one per cent., (free from taxes); payable on and after Monday, July 2nd, 1894.

Fire of an unknown origin was discovered on Tuesday morning in the dry goods and millinery store of Herring Brothers, Brunswick. The entire stock was destroyed, entailing a loss of about \$3,000. The building was saved.

The annual encampment of the Pennsylvania State G. A. R. began at Gettysburg last Saturday. The tents are pitched on East Cemetery Hill and the camp has been named in honor of the late General W. H. McCartney.

AN unsuccessful attempt was made on Monday night to enter the saloon of Peter F. Burket, at the square, in this place, by unknown parties.

A POSTOFFICE has been established at Jintown, this county, two miles south of Thurmont, from which it will be supplied by special service. James M. Crouse is postmaster.

THE trustees of Mr. I. M. Fisher have opened the coach shops at Motter's and are selling vehicles at rock bottom prices. See advertisement which appears in another column.

MRS. FRANK LAWRENCE desires a few pupils in painting. Terms very moderate. Pencil, Crayon, Oil and Water Color Painting taught. Music also taught. For terms, etc., apply to

MRS. FRANK LAWRENCE, July 6-13. Emmitsburg, Md.

Prolific Lemon Tree.

J. D. Horine, of Myersville has a lemon tree from which he has taken over 50 lemons, and there are 616 yet remaining on the tree. He also found a tortoise upon which he had carved his initials and the date 1863, being 31 years ago.

MR. JAMES A. SWABERICK, employed as flagman at the Church street crossing, Hagerstown, by the Western Maryland Railroad Company for five years, dropped dead last Thursday afternoon while at his post reading a newspaper. He was sixty-eight years old and was a native of England.

MESSRS. A. F. FAIRALL and J. D. H. McCormick have instituted suit against the town authorities of Gaithersburg, Md., for \$5,000 damages. They were recently arrested for playing ball in the town, found guilty and fined. Refusing to pay the fine they were remanded to jail, and afterwards secured release on a writ of Habeas Corpus.

The initial number of the Blue Ridge Zephyr, a new daily paper issued by Mr. N. Bruce Martin, of the Waynesboro Gazette, has made its appearance. The Zephyr is devoted entirely to the interests of Pen-Mar, Waynesboro and the surrounding community. The first number is bright and interesting and we wish it success.

HARRY BRADSHAW, a well-known young man of Frederick, who was arrested on Tuesday charged with forgery and released in \$300 bail, was rearrested Wednesday, charged with forgery, burglary and larceny, and in default of an aggregate bail of \$1,000 was sent to jail to await the action of the grand jury.

Fatal Blasting Accident.

Joseph Channels, a middle aged colored man, employed at Schley's lime kilns, near Frederick, was drilling rock Wednesday evening when he struck an old charge which exploded, tearing off his left leg, breaking his arm in several places and blowing out both eyes. He lived several hours after the accident.

DR. C. BIRNIE, of Taneytown, recently presented in person to the Maryland Historical Society a ledger of John Ross of 1731, containing accounts with the sheriffs of the different counties. Dr. J. G. Morris, who was presiding, on examining the book, said: "I wish we had as good ink as they had 140 years ago. This is as black as it was when printed."—Carroll News.

Symptoms of Rabies.

The twelve year old daughter of Mr. Xavarius Shank, residing at the Old Forge, near Chewsville, Washington county, was nine months ago bitten in the leg by a dog. Lately she has developed symptoms of rabies. She suffers violent convulsions, froths at the mouth and imitates the barkings of a dog and gnashes her teeth.

When Travelling.

Whether on pleasure bent, or business, take on every trip a bottle of Syrup of Figs, as it acts most pleasantly and effectually on the kidneys, liver and bowels, preventing fevers, headaches and other forms of sickness. For sale in 50c. and \$1 bottles by all leading druggists. Manufactured by the California Fig Syrup Co. only.

RHEUMATISM CURED.—By Hot Springs Medicine.

Mr. Charles Hurd, of Westminster, writes that he had rheumatism in his ankles for 5 months that he could not walk. His ankles were so much swollen that he could not lace his shoes. After a few days use of the Hot Springs Pain cure and the Blood Purifier, the swelling was relieved and he could put on his shoes and get around without the aid of his cane.

Mrs. E. O. GRIMES, of Westminster met with a painful accident on Sunday afternoon in the dining room of her home on West Main street, by tripping and falling heavily to the floor. Her left arm struck with such force that the wrist was dislocated and one of the bones of the forearm fractured. It was also severely bruised and became much swollen and very painful. Dr. J. H. Billingslea rendered the necessary surgical attention and the injured arm is improving.—Sentinel.

Suspicious Looking Dog.

The Harney correspondent to the Westminster Sentinel says: "A suspicious looking dog, supposed to have been mad, from the manner in which he acted, passed through the neighborhood near here last Tuesday afternoon. He was first noticed by Mr. Benjamin J. Hyser, who saw him bite his two little dogs. The animal was so run down that he could scarcely travel. He was a large black and white dog. Mr. B. F. Bowers shot him and then prevented any further depredation. We are not able to say what disposition Mr. Hyser will make of his dogs which were killed. If he does not have them killed he will shut them up for some time and await results."

DURING a thunder-storm in the southern section of Frederick county a locust tree on the Col. Charles E. Trail farm, tenanted by Saylor Boone, was struck by lightning, and Mrs. Boone and her six children, who were about eight feet from the tree, were all knocked down and rendered unconscious. Nearly every pane of glass in the house was broken and a hog killed. Mrs. Boone's shoes were torn off, but neither she nor the children were seriously hurt.

Drowned in the Canal.

John P. Ardinger, seven-year-old son of James Ardinger, of Williamsport, was drowned in the Chesapeake and Ohio Canal last Thursday evening. It is thought the lad fell into the water-way from a railroad car on which he had been playing. His neck was broken. The body was not found until Friday morning, after the neighborhood had been searched for him by parties being out all night.

Hurt by a Fall.

George W. Ellis, a bricklayer at work on the new planing mill of the Jackson Bros. Company in South Salisbury, was badly injured Tuesday afternoon by the falling in of about twenty feet of the roof of the mill next to the engine room. Several bricklayers were at work on the top of the roof when it fell, but Ellis was the only one who went through to the ground. He fell about thirty feet, breaking his left arm in two places and receiving severe cuts and bruises. The damage to the mill is considerable.

A Good Appetite

Always accompanies good health, and an absence of appetite is an indication of something wrong. The universal testimony given by those who have used Hood's Sarsaparilla, as to its merits in restoring the appetite, and as a purifier of the blood, constitutes the strongest recommendation that can be urged for any medicine.

Hood's Pills cure all liver ills, biliousness, jaundice, indigestion, sick headache. 25c.

A Fireman Falls Asleep on the Track and is Killed.

L. E. Washler, of Thurmont, Md., a fireman on the Western Maryland Railroad, was run over Wednesday morning at 3 o'clock in the vicinity of Smithsburg and killed. His train had pulled into the switch to await the passage of another train. He sat down on the main track and fell asleep. The train for which they were waiting came along and cut off both feet; mashed his head and breast and otherwise mutilated his body. He died shortly after in Train Dispatcher Shriver's office in Hagerstown, where he was taken.

Score 13 to 24.

A game of base ball was played on Tuesday afternoon, in a field near town between the "Uptown" and "Downtown" teams. The "Downtown" boys being the champions. The score was 13 to 24 in favor of the "Downtown" team. The teams were composed of the following players: "Uptown" Joe Rowe, Charles Jackson, Annan Horner, F. Tyson, Willie Rowe, Jos. Hann, Dick Zacharias and Robert Annan. "Downtown" R. Eyster, Jas. Whitmore, W. Uzzell, Jas. Lingg, R. Zacharias, J. Long, and R. Whitmore. Umpire Samuel L. Rowe. Scorer.—Romangr Grindler.

Planning for a Golden Jubilee.

The jubilee reunion of Ascension Episcopal parish, Westminster, commemorative of its fiftieth anniversary, will be held during the week commencing July 15th. The sermons will be by clergymen associated with the history of the parish. Tuesday, July 17th, will be reunion day. Hon. Wm. P. Maulsby, one of the founders of the parish, will deliver an oration at 5:30 P. M., and short addresses will be delivered by former rectors and other clergymen. At 7 P. M. the informal tea and reception will be given at the rectory to the parishioners and friends of the parish.

Kicked by a Horse at Blue Ridge Summit.

Mr. George M. McComas, formerly deputy collector of the Baltimore port, met with a severe accident at his summer home at Blue Ridge Summit, Tuesday night, and fear is entertained that he may not recover. Mr. McComas was leading his horses to pasture, when he was kicked by one of them. His wife was near him at the time, and as the horses were let loose one of them ran between her and her husband. Mrs. McComas called to her husband to look out, but immediately the horse was upon him, and the next instant his wife found him lying unconscious on the ground. Help was at once summoned, and he was placed on a couch and carried to his home. Dr. J. Carey Thomas, who occupies a cottage for the summer at the Summit, was called, as were Drs. Halstead, of the Johns Hopkins Hospital, and Dr. C. L. Wachter, of Sabillasville. Every means were employed to resuscitate the injured man. They have been unsuccessful.

Mr. McComas always spends the summer at the Summit, his wife being proprietor of the Mountain House.

Doctors and nurses

Make slender purses; The road to health Is the way to wealth. Many persons of slender means have seen the savings of years swallowed up in a few weeks by exorbitant doctor bills. Serious illness and its result, heavy bills, may almost be prevented if taken in time. When the system seems to be run down, the blood weak and impure, causing eruptions, headache, weakness and lassitude, backache, scrofula, biliousness, chills, aversion to work, etc., there is reason for belief that serious illness is threatened. A bottle of Dr. Pierce's Golden Medical Discovery will drive the impurities from the system, enrich the blood, bringing sound health, energy, strength and ambition. All dealers in medicines.

FAIRFIELD ITEMS.

Mr. S. F. Singley, of this place, has two interesting little boys. The other day the boys were cutting poles with a hatchet, when one of the boys missed his stroke, striking his brother on the hand cutting off three of his fingers. Boys should not be allowed to play with hatchets.

Mr. C. W. King, of Maryland, is visiting in this place.

Mr. Dan. Sanders is visiting at Hagerstown.

An old horse that has been in the White family since a colt died last week for Mrs. Reed. The horse was 30 years old and pulled the hay rake a day before he died. Certainly a good old age for a horse.

Mr. G. Rockwell, who works for Mr. Wm. Dubs, this place, was going to work one morning, when he was bitten by a dog that was on the road. The dog was not mad, but Mr. Rockwell was mad after the dog had gotten a taste of his flesh. George you must be careful and watch the dogs.

Miss Helen Ness, of York, is the guest of Miss Clara Musselman, of Fairfield.

Mr. Jacob Neesley and daughter, of York, are visitors to this place.

Mr. Wm. Isler, who works in York, is spending a few days at this place.

Miss Clara Musselman, of Fairfield has the finest cucumber pickles your correspondent has seen. They are from 6 to 7 inches in length.

There will be a phonographic entertainment held in the lecture room in the Lutheran Church on Saturday evening July 7th, by Messrs Eicholtz and Buehler, of Gettysburg. Admission 10 and 15 cents.

The Lutheran Mite Society will have a festival on Friday and Saturday nights, July 13th and 14th. All are cordially invited.

Mr. and Mrs. D. R. Musselman, of Fairfield, went on the excursion to Pen-Mar last week, where their son, Clarence met them. On their return and after getting into the buggy the horse frightened and started, throwing Clarence and his father out of the buggy. The horse was stopped. Mrs. Musselman remained in the buggy and was not hurt, whilst the men were somewhat bruised.

Hygienical.

The Worcester, Mass., Spy, of June 29th, ultimo, says:

One of the prettiest weddings that Worcester has seen this June took place in the Old South Church Thursday evening, when Miss Miriam Gray and Mr. Edward S. Eichelberger, of Frederick, Md., were united in marriage by Rev. A. Z. Conrad. Palms and hydrangeas were banded about the pulpit with charming effect, the decorations here and at the church being in charge of Herrick.

At 6:30 the bridesmaids issued from the vestry, and to the strains of the Lohengrin bridal march, walked down the central aisle to receive the bride. The bridal party then proceeded to the altar where it was met by the groom and the best man, Mr. Byrd Eichelberger, of Baltimore, Md., brother of the groom. First came the usher, Charles Albert Gray, brother of the bride; Henry J. Kettell, Charles E. Hildreth, of and Walter H. Hildreth, of New York; then came the bridesmaids, Miss Ella Osborne, of Lacrosse, Wis.; Miss Mary Davis, of Nashua, N. H.; Miss Jessie Morse, and Miss Sadie Hill of this city, all of whom wore white silk mull over white satin, and carried pink roses. The maid of honor, Miss Sarah E. Founce, of Plymouth, Mass., in a gown of heavy white silk and, like the bridesmaids, carrying pink roses, preceded the bride, who came last, leaning upon the arm of her father, Charles W. Gray, president of the Hill Envelope Company. The bride was handsomely gowned in peau de soie, set with a long train. A veil of tulle was gracefully arranged over her hair, and at the neck she wore a crescent of diamonds, the gift of the groom. Her bouquet was of lilies of the valley and bride roses.

The ceremony was brief and was performed with the ring. As the bridal party and the guests passed down the aisle, the nuptial march from Mendelssohn's "Midsummer Night's Dream" was played. Charles A. Gaylord, organist at Piedmont Church, presided at the organ.

The church service was followed by a reception from 7 to 9 o'clock at the residence of the bride's father, 10 Oread street. Zahonyi served the refreshments. In the course of the evening Mr. and Mrs. Eichelberger left the city for a wedding tour, but their destination is thus far unknown.

Where the Tigers Fought.

The last Pennsylvania regimental monument was dedicated at the Gettysburg Battlefield, Monday evening when the survivors of Rickett's Battery assembled on Cemetery Hill to hold their exercises. General John P. Taylor, Colonel Ricketts, Nicholson and Hartsborn, of the state commission, were present. General J. P. S. Gober was to have delivered the oration, but was detained at home by illness. Prayer was offered by Chaplain Sayers, of the Grand Army. Colonel Nicholson, on behalf of the battery, presented the monument to the care of the Battlefield Memorial Association, for which organization Colonel Thomas J. Stewart, secretary of internal affairs, received it. The monument is a single massive block weighing twenty tons. On it are cut a cannon and two cannons, all in relief. It is located at the spot where the batteries were protected by the Louisiana Tigers. On the evening of July 2 last thirty-one years ago the men who manned the guns fought with ramrods and stones. That they they preferred death to the loss of their guns is attested by the terrific casualties inflicted on the Tigers, who lost sixteen hundred out of seventeen hundred and fifty men.

Fourth of July.

Wednesday was the one hundred and eighteenth anniversary of the Declaration of Independence, and the day was celebrated throughout the country in patriotic style.

In this place, the Fourth of July was celebrated in a more or less quiet way. Some of our citizens went fishing, some to Pen-Mar, some to Gettysburg, some to picnics and other places of interest. The Emmitt Cornet Band paraded the streets and enlivened the town with music. In the evening, many fireworks brilliantly illuminated the sky and afforded much pleasure to the people. The display of fire-works was much larger than in previous years, and of a better kind.

The picnic under the auspices of the Emerald Beneficial Association, of this place, held at Crystal Fount, near town, on the Fourth, afforded much pleasure and recreation to both the young and old. The day proved quite favorable for the occasion, and the lovers of dancing fully enjoyed themselves. The picnic proved to be quite a successful affair, and the committee in charge is to be congratulated for the good manner in which the picnic was managed.

The Chautauquans.

MR. EDISON.—As it has been some time that the Chautauquans occupied any space in the CHRONICLER, will you please publish the following, which we hope will interest your readers:

The Circle met at the home of Mr. E. R. Zimmerman, on last Friday night, at which time we finished reading another year's course. To some of us, perhaps, they were months of hard study; to others simply serious reading, which was a substitute for occupations of less importance. It certainly has been a delightful and profitable year to the multitudes who have read the C. L. S. C. books and read the pages of the Chautauquan. The admirable course of study prepared for the year was the following:

"Rome and the making of modern Europe," which carried one through the "Middle Ages" and showed how the European States were organized. It explained fully the beginning of the great movements of the nineteenth century.

Then came "Roman and Medieval Art," with its one hundred and forty-nine illustrations. Art and architecture are beautifully illustrated and exquisitely pictured in the text for the enjoyment of the most esthetic taste, tracing the evolution of Greek Art through Roman history into the Middle Ages. The next to follow was the "Outlines of Economics," a new book by Dr. Ely which contains the latest and best things he has written; it is an interesting study of the common commodities of life in a most practical form. In the "Classic Latin Course in English," Dr. Wilkinson has condensed two volumes into one, giving the reader a general acquaintance with the character and material of the Latin classics.

"Song and Legend from the Middle Ages," is an interesting little book of poems and stories translated from the French, Spanish, Italian, German and Scandinavian originals. The last book, but by no means the least, is "Science and Prayer," by Dr. Kinsley, which discusses the alleged inconsistency between the scientific conception of natural law and the doctrine of divine interposition. Besides these interesting and instructive books we have read the Chautauquan Magazine. In it we had articles written by such men as President Schurman, of Cornell University; Prof. Chamberlain, of the University of Chicago; Prof. Shaler and Hart, of Harvard University; Prof. Moll, of Johns Hopkins; Prof. J. P. Mahaffy, of Dublin University, and a long list of eminent scholars and authors for whose names we have not space.

All these articles were written in the popular language of the people, so that everybody could comprehend what was written about modern Italy, the Italian government and literature, Italian towns and cities, philosophy, biology, chemistry, physics and all science together with many other subjects of vital interest to the reading public. Besides this part of the work we must not forget to mention the social part. During the year our circle held one banquet, a Martha Washington party, one supper and several ice cream socials each one being greatly enjoyed.

The Circle, at 10 o'clock, adjourned to meet at the home of Miss Martha Simonton, on Friday evening, Sept. 28. The following compose the present class and the number of meetings each one missed during the year: Mr. E. R. Zimmerman, Miss Bessie Hoke and Mrs. Kerschner, (1); Miss Martha Simonton, Mrs. Rowe and Mrs. Zimmerman, (2); Miss Belle Rowe, Miss Mary Kerschner and Miss Constance Kerschner, (3); Miss Ruth Hoke, (4); and E. B. Fockley, (5).

A SONG OF THREE P's.

Let me sing you a song of Three P's, That for work are as busy as bees; They ensure you what's worth more than wealth,

A most blessed abundance of health. The liver they invigorate, And yet they do not salivate, The bilious and dyspeptic, too, They quickly make to feel like new;

And piles and constipation go, Before this remedy you know.

But I will stop, for you have probably guessed what I am driving at. Who does not know that Dr. Pierce's Pleasant Pellets cure all the complaints mentioned and many more. Small, sure, safe, pleasant. Satisfaction guaranteed or money returned.

Grand Free Open Air Concerts.

The Hot Spring Medicine Co., of Arkansas will locate their advertising company at Emmitsburg for two weeks beginning Tuesday, July 10. The program rendered by this company is strictly moral and instructive consisting of vocal and instrumental music, songs and dances, funny and laughable farces by black faced comedians, feats in ventriloquism, slight of hand performances, Royal marionettes, banjo solos, musical acts, wire walking, contortion acts, etc.

Dr. Leon Smith, the manager, will deliver a short lecture explaining the medical virtues of the celebrated Hot Springs medicines.

Remember the entertainment is free to everybody. Come one, come all.

A Proposed Monument to Francis Scott Key.

The Key Monument Association, of Frederick, have arranged for a public meeting in Frederick, on the evening of July 10th, to carry into effect a number of important plans that have been devised for raising a fund for a monument to Francis Scott Key in Mount Olivet Cemetery, Frederick. The monument has been placed on a national basis, and the entire country will be appealed to for aid in the project. A committee has been appointed to carry an appeal for contributions to the Christian Endeavor Convention at Cleveland, O., on July 11th, and all the school children of the state will be asked to contribute five cents each.

When Baby was sick, we gave her Castoria. When she was a Child, she cried for Castoria. When she became Miss, she clung to Castoria. When she had Children, she gave them Castoria.

Strawberry Report for 1894.

"S. G." writes to the CHRONICLER as follows, concerning his experience in cultivating strawberries, and gives some reasonable advice regarding the time of year new plants should be "set" in order to obtain the best results:

"It is customary for amateur strawberry growers and those who grow plants for sale, to test new varieties to make a July report. I have been testing varieties to extend the season by planting early and late varieties, and have finally succeeded in making the season a month or more. First berries sold the 21st of May and the last the 23rd of June; first ripe berries the 15th of May and the last (Gandy, a late variety), one pint on July 1st, for supper. Strawberries were nearly two weeks earlier in 1894 than 1893. The crop throughout the east was, generally, a very fine one and sold as low as 2 and 3 cents per quart box in Baltimore, and as none can be picked for less than one cent the growers made but little profit. These were prices in the height of the season. I averaged more than ten cents, but, of course, had no competition, and as the quantity was much below the demand, prices were easily maintained. Only part of my patches made a good crop. In 1892 the crop was very short. The white grub and weeds were so bad that half an acre was plowed under, which left but a small bed, except my testing bed, which was only about 1-16 of an acre, and I did not get many set in the fall of 1892. But the crop of 1893 was the largest raised in ten years, except one. Having no help in the spring of 1893, but few were set and the few set the previous fall, made a fine crop. The old or main bed by reason of dry weather, in the summer of 1893 was less than half a crop. There was no rain until the 26th of August and could get no plants until the drought ended. Although about 5,000 plants were set last fall, only the first set early in September made enough to pay for picking. The first part of September, if not too dry, plants set then will make one-third a crop the next year, and some fine berries, but are soon gone. One year beds do the best, or fall set plants the second year. So with double the amount of ground in strawberries the crop was 275 quarts short of 1893 or at least that many less sold. With 5,000 plants set last fall, one fifth of an acre set this spring and two small beds that ought to make a good half crop another year, there will certainly be enough berries to bring down prices in the middle of the season. Very early berries or very late ones are not so productive, but I now have Timbrel, a late berry, which, unlike most late varieties matures, the whole crop, which is immense. The rain at the beginning of the season rotted at least 200 quarts of early, and the hot, dry weather sun scorched many of the late ones. No wonder the total amount was from twenty to thirty bushels short of what was anticipated, or at least hoped for, and the blossoms gave promise of that amount. More were used at home and more stolen than ever before. Besides there being no early cherries, the birds were much worse on them than usual. The hot dry weather is cutting the raspberry crop short. Black caps promised well, bushes were never fuller, but they are drying up, only on low, moist ground where partially shaded.

PERSONALS.

Mr. Maurice Withide, of Pikeville, spent a few days in town.

Prof. B. M. West, of Mt. St. Mary's College is spending some time at his home in Bloomville, Ohio.

Mr. Joseph Byers was in Frederick last Saturday.

John C. Motter, Esq., and three children, of Frederick, was in town last Saturday.

Rev. Oscar G. Klinger, of Gettysburg, formerly pastor of the Lutheran Church, in this place, was in town on Sunday.

Misses Mamie, Lizzie and Josephine White have returned to Brooklyn, N. Y., after spending several days with friends in this place. Miss Josephine attended school at St. Joseph's Academy during the term just ended.

Miss Edith Nimmemaker returned home from Lancaster, Pa., on Monday evening.

Dr. Gardner, of Sharpsburg, Md., was the guest of the family of Mr. M. Hoke. Messrs. Frank P. Topper and Francis M. Hoke, spent last Sunday at McSherrystown.

Mr. and Mrs. Frederic B. Keefe are spending the summer at Mr. S. S. Moritz's, Fairplay, Pa.

Mrs. Flegle, of Kalamazoo, Mich., visited at Mr. S. S. Moritz's, week.

Dr. C. S. Davis, of Manchester, Md. is summing at Mr. G. E. Sterner, near Fairplay.

Misses Nellie and Winnie Ryan, sisters of Prof. E. J. Ryan, of Mt. St. Mary's college, are visiting at Mrs. Corry's.

Miss Hettie Dorsey, of Graceland, is visiting Miss Annie Dorsey, near town.

A Child's Awful Mistake.

The mistake of a little boy Sunday morning caused the death of his father and of his father's guest. He handed them a bottle of carbolic acid, from which they drank, supposing the liquor to be whiskey.

Anton Kapitan, who lived with his family in Baltimore, had invited to breakfast with him Henry Richards, a

ONLY A HEALTHY BOY.

He Was Natural, Pithy and Keen-Tempered and Dandy.

He was just a plain, everyday boy, and became interested in a Thirteenth Avenue elevated car with his hands in his pockets and his hat thrust far back on a shock of curly black hair.

He threw himself into a seat, sitting sideways and drumming on the window pane, much to the annoyance of the prim old lady beside him.

Then he suddenly discovered that he was the proprietor of a small stock of peanuts. These he ate with a good deal of noise and an apparent relish; the shells were flipped under the vacant seat opposite him.

Then for fully five minutes the youngster busied himself with his boot heels—he dug them deep into the matting carpeting on the car's floor, raising a cloud of dust and an indignant protest from a stout German gentleman who sat within sneezing distance of the boy.

The guard thrust his head into the car and shouted, "Nihil stet." The whistle was cut short—like a string severed with a sharp knife.

"All the gripmen necessarily must be muscular," said a big cable train driver on the Lincoln avenue line.

"For the physical exertion is great, and a weak man could not stand the strain. It's a sort of one-sided track, though. If a fellow sticks to it long he gets bigger on the right side of his body than on the left, for the pulling and pushing, hauling and jerking are done mostly with that side. I don't know any man who's been at the work long enough to be come really deformed by it, but I've seen many gripmen who were plainly larger, heavier, more muscular on the right side, especially in the shoulder, than on the other side.

"No, I've never seen the phenomenal enlargement—the 'gripman's arm,' the boys call it—on the left side, for the simple reason that the builders of grip cars don't take left-handed men into their calculations. There are no left-handed grip cars, consequently there are no left-handed gripmen."—Chicago Tribune.

"I don't suppose," said E. G. Noble, a Cincinnati florist, "that many people who admire the variegated plants that adorn our greenhouses are aware that the variety of coloring is due to a disease, which is at once contagious and capable of being transmitted from one plant to another by a kind of inoculation. Variegation is a sign of organic disease, and if the discoloration were general it would produce death. The variegated portions of the leaf have lost their power of reducing the carbonic acid of the atmosphere; the plants are generally smaller, weaker and their power of resisting cold considerably diminished."

"My little niece here," said the young woman with the spectacles, "wishes me to inquire if there is a new version of 'Jack and the Beanstalk'?"

"I dare say there is," answered the facetious youth behind the book counter, affably. "In what language, now, would the little miss like to have the beans talk?"

THE UNLUCKY THIRTEEN.

And Why It Cut No Figure in This Case of Mutual Love.

It was a plain, everyday case of mutual admiration. He admired the girl, and she admired him. It was much more than admiration—they were in love with each other. Of course one was more so than the other, for it cannot be otherwise, seeing that Cupid is born with one leg shorter than the other. But that is not an insuperable obstacle to matrimony. If it were, the marriage license clerk would be compelled to retire from business. So it came to pass that he proposed to her. That seemed natural enough, but when she burst into tears he was greatly disturbed. "My darling," he exclaimed as she came to his arms, "what is the matter?"

"I am so superstitious," she sobbed. "What has that got to do with your loving me as I love you?" he asked wonderingly. "Nothing, dear," she wept. "And you do love me, don't you?" "More than all the world. But I cannot marry you—at least, not now."

"Why can't you?" he asked very tenderly. "Oh, I can't tell you," she burst into a fresh flood of tears.

For a long time she coaxed and urged her to tell her fatal secret, and for a long time she resisted all his importunities. At last she yielded. "You will not put me out of your heart entirely if I tell you, will you?" she pleaded.

"Certainly not, my darling," was his brave reply, for men under such circumstances are not always in a hurry to take risks, even if they do love. "It is this, darling," she said, hiding her face on his manly bosom. "You are the thirteenth man who has proposed to me, and I am afraid to accept you with that unlucky number's baleful influence hanging over us."

With a ringing laugh, in which there was only sunshine and joy and happiness, he kissed her 18 times and folded her in his strong arms. "That's all right, my own," he almost shouted. "You are the thirteenth girl I have proposed to, and that makes it a standoff."

And they lived happily ever after. —Detroit Free Press.

**Ventilation.** At a session of the woman's club not long ago, which lasted three hours, a dozen clever women took part in a brilliant discussion which followed the reading of the paper for the day. The room was filled, at least 50 women being present. The gas was lighted before the exercises were half over, and the air became intolerably close. The voices of the speakers grew weak in their laborious effort to be heard in the vitiated atmosphere, but nobody thought of ventilation till a woman on the verge of fainting rose and opened a window.

The ladies were settling an abstract question, and the near practical one was ignored. It is remarkable how little attention is paid to this supreme matter of ventilation by intelligent men and women. An assembly one night, convened for the purpose of discussing hygienic reforms, breathed its devitalized air over and over again for two hours before any one discovered the cause of the universal discomfort and opened a window.

If our throats are thirsty, we hasten to get a glass of water, but our choking lungs are left in their distress without relief. There are times when a good draft of fresh air is worth hours of literature or social economics. —New York Times.

**Damascus Swords.** To the lovers of strange goods the bazaars of Damascus are far more alluring than those of Cairo or of Constantinople; the capacious chests of the merchants contain much that we would buy were our purses longer. Old embroideries of wonderful colors, delicate china, silks of many hues, swords of cunning workmanship, all these lie piled beside us on the floor. It is but seldom that a really good specimen of the Damascus sword can be obtained, for the art of working and engraving steel is dead.

These swords were made of alternate layers of iron and steel, so finely tempered that the blade would bend to the hilt without breaking, with an edge so keen that no coat of mail could resist it, and a surface so highly polished that when a Midelem wished to rearrange his turban he used his sword for a looking glass!—Good Words.

**Gutta Serena Cogs.** Vulcanized fiber for mechanical purposes has for some time attracted attention, and as a material for cogs, where the moisture from ordinary gearing is inconvenient, it has according to all accounts given very satisfactory results. In one instance gutta serena cogs have been known to be serviceable for 20 years, and when the wheels become worn the material is utilized for casting fresh ones. The fact also that cogs made of this material are almost noiseless is quite a point in their favor. —New York Sun.

**A Pioneer in the Service.** The whale was the first ocean mail carrier, and in three days thereafter he adopted the free delivery system. —Richmond Dispatch.

**Quietly Settled.** The correspondent of the Boulder Sentinel, writing from Basin, tells of a row in that city in which one man lost his nose and another his ear. "But," naively states the correspondent, "the matter was quietly settled." "This was undoubtedly by consoling news to the gentlemen, who lost portions of their anatomy in the row and who otherwise might have been of the opinion that it had been settled with a blare of trumpets and an ax.—Butte Bystander.

Stuart Robson's Hat Ironer.

Many of the funniest incidents that I have observed during my career as a star have been the dodges resorted to by chronic deadheads to obtain free admission to theatrical entertainments, and one of the funniest of these came under my observation a few years ago while playing in Chicago.

At that time there was a well known minstrel company numbering 40 performers, all of them required to appear in a daily street parade, each wearing a daily black silk hat. As these hats were often exposed to inclement weather, it was necessary to have a practical hat-travel with the company to keep the headgear of its members in order.

During my Chicago engagement this company was playing at a rival theater. One night I was summoned from my dressing room just before the commencement of the performance to see a visitor. Going to the state door, I found there a man having all the appearance of a mechanic, who asked me for a pass on the ground that he was a member of the amusement profession, the box office people having referred him to me.

"With what company are you playing?" I asked. "The Megatherian minstrels," he answered.

"What is your line of business?" "I am a hat ironer."

"That professional" was not passed. —Stuart Robson in New York Herald.

**Cream of Tartar Trees.** Nature's laboratory is ceaselessly working, developing and storing up products for the use of mankind at large. In the vegetable kingdom this is especially noticeable, and if man sometimes only succeeds after much experiment and work in making the plant give up its useful properties at other times—and these are of frequent occurrence—he finds the product already manufactured and requiring but a small amount of preparation to render it fit for utilization.

To this latter category of plants yielding ready made products the cream of tartar trees may be said to belong. They are members of the genus "Adansonia," of the natural order "Bombaceae." Until within the past few years it was thought that only one species could rightly claim the title of the cream of tartar tree—the "Adansonia gregorii," the gouty stem tree of northern Australia. Recent researches have, however, proved that the baobab ("Adansonia digitata") of Senegal contains nearly 2 per cent of free tartaric acid and nearly 12 per cent of bitartrate of potassium. The acid is found in the farinaceous pulp surrounding the seed and has at all times been highly esteemed by travelers, who mix it with a little water in order to make a refreshing beverage. —Chambers' Journal.

**The Peach.** Peaches are a tonic, an aperient, a food and a drink combined, or, to put it briefly, they are meat and medicine. A good meal may be made on peaches, with sugar and cream, bread and butter. After a meal of this variety a person will feel more like attending to the duties of the afternoon than if he or she indulged in heavy foods. Peaches are good before breakfast and after dinner. They are good for the digestion, good for the blood and good for the complexion. Some people eat them without cream or sugar and with good results. The fruit is so rich in sugar and acid that it preserves its flavor a long while, but to get the full benefit it should be eaten as soon as it is cut. Redness of the nose, due to congestion, inflamed complexions, scrofulous and bilious tendencies are said to be materially influenced by a liberal consumption of this luscious fruit. —New York Press.

**Recognized a Fraternal Soul.** He was a commercial traveler of the flashy type and had just finished telling a startling story to his newly made acquaintance in the car. "That reminds me of one of Munichausen's yarns," remarked the victim for want of something to say. "Munchausen! Who is he?" "Why, don't you know him? He is the most colossal example of mendacity that civilization has produced."

A brief, painful silence ensued, which was broken by the traveler in a tone that was almost timid: "Excuse me, my friend," he said, "if I seem inquisitive. But would you mind telling me what house he travels for?" —Washington Star.

**Entrée, of Course.** A good story, which is of course untrue, is told on Judge Durham. The incident is said to have happened while he was controller of the currency. One Sunday, so the story goes, the judge, who is a devout man, went to church in Washington. The audience was an inspiring one and the sermon a good one. When the minister had quit speaking, he said: "Now let us return thanks to the great Controller of the universe."

No sooner had the words been uttered than the judge, who is a gentleman of the old school, arose and publicly thanked the preacher for the distinguished honor he had paid him. —Lexington Press.

**The French Barometer.** The French aneroid barometer is a beautiful thing to look upon, but the showiest of these instruments are not the best, and some of the nickel plated affairs that glisten in the windows of opticians are useless for the purposes for which they were designed. A great French geographer, who measured mountain heights in the Catskills, is said to have used instruments not of French manufacture. The best aneroids are so sensitive that they will change for each floor of an ordinary dwelling, though readings for such slight changes of elevation cannot be depended upon for accuracy. —New York Sun.

**An Irish Bull.** Peter Madigan to Patsy Toole, whom he has just discharged from his service: "Try ye wance more, is it? Sorra a bit. Look here, Patsy Toole, ye're such a thievish scamer I wouldn't trust ye ag'in wid an empty box containing straw." —London Truth.

**Wigs.** What I wonder at is the wigs are not universal. They do such good service in sparing the natural hair. One can dye a wig to taste without unpleasantness to the scalp. I am getting really to like the wispy wig of a hue that nature never could have invented. A beauty born with red hair looks so much better in a dark wig, or a flaxen or an amber colored one, than in what nature gave her. The red wig makes a dark complexioned person going into 50 almost seem young. —London Truth.

**Conclusive.** Little Dot—Folks say there is people on the planet Mars. Little Dick—There isn't. Little Dot—Why isn't there? Little Dick (triumphantly)—How could they get up there? —London Fit Bits.

THE GIRLS OF ARGENTINA.

Types of Voluptuous Beauty, but Fair Crossed Thirty.

The very best word picture of an Argentine girl that I have ever seen, true to life, though rather flowery, says a Buenos Ayres correspondent, is as follows: "Imagine a brunette of 15 or 16, developed to a precocious maturity. An erect figure of medium height, but splendidly proportioned, with a bust that would make Lord Lytton's flat chested heroines green with envy; proud and graceful carriage; a face of perfect oval; spotless complexion, with a slight tinge of Croole blood that imparts to the cheek the hue of the damask rose. The eyes are dark, large and lustrous, fringed by long, silken lashes, and overarched by eyebrows which, with the 'night of her hair,' makes the white forehead look like alabaster; small and delicately chiseled nostrils that dilate nervously at any inspiration; teeth so white and regular that to catch a glimpse of them through the arch of a smile is a wonder at nature's perfection—the only fault of the beautiful face the sensuous lips that surround the full red lines, symbols of a passionate nature."

"Imagine the face in its frame of soft black hair, surmounted by a white hat of the most coquetish fashion, on which red flowers repose and living fireflies gleam, and that litesome figure attired in a crush of some soft texture and delicate tint and of a fashion known only to the Worths of Paris and Madrid, and there or glimmer of dull gold. And imagine the whole being instinct with the grace and vivacity of early youth, and you have the complete portrait of an Argentine girl."

But with all these charms that dazzle the eye and captivate admiration there seems to be something lacking on closer acquaintance—perhaps because the voluptuous style does not appeal to the soul like the more spiritual beauty of the Saxon maiden, that where the senses only are fed they become satiated after a time, like one on a steady diet of sweets. Unfortunately, these charming creatures are universally addicted to the rouge pot and powder puff to such an extent that the real woman appears to be in total eclipse under drifts of white and dabs of red. And, as with the gentler sex in all southern countries, their beauty wanes at an early age. While women of colder climates and colder temperaments are at their prime at 35 or 40, the Portena's golden age is between the years of 15 and 17. At 25, or sooner if married, she is quite past and metaphorically laid on the shelf. A tendency to corpulence is encouraged by indolent habits and excessive indulgence in the flesh pots, and at middle age many of them develop hirsute appendages that are the envy of the hairless youths. —Philadelphia Record.

**Tests For Pure Butter.** It is said that it is an almost certain test of pure butter to melt it and note the color and odor. A German chemist gives the following directions: "Pure fresh butter, when melted, is perfectly clear, or only very slightly cloudy, usually dark yellow, and has the familiar odor of pure butter fat. Pure stale butter may be very cloudy and even opaque when melted, is usually of a dark yellow color and has the odor of rancid butter. Melted margarin, on the other hand, is very opaque, of a light yellow color, and has a characteristic, indescribable odor." In addition to this, one may try the test resorted to by experienced cooks: Drop a bit of it upon a very hot sauceron. Pure butter will rise in white bubbles; margarin melts and runs across the dish in oily looking streaks. —New York Ledger.

Editor Keene Was a Dandy.

There was one man at Shasta basin in those old days who could and would both work and play cards. That was James R. Keene. I think he has always been called "Jim Keene," though the long, kindly and brilliant letters I have had from this man have always been signed James R. Keene.

He was editing a paper at that time, poor, persecuted man, and at last forced him to tell me, as I am an honest man since, that I could not write poetry. But he had and still has a great big heart in him for any one who is willing to work and try to get on, whether in Wall street or elsewhere.

No, I never played cards with Jim Keene. I never saw him turn a card in my life, though the boys up there used to say that when the young editor sat down at a game he generally got up with all the dust in sight. But bear this distinctly in mind, he was an Englishman, with an Englishman's ideas of play. Besides that he had both hands full of other employment. And bear in mind furthermore that I don't say, except as I have heard, that he ever tossed a card at all in that stout hearted style while in California. But I am certain if he did play with the Oklurusts and loingers of dear old Shasta he "played them out of their boots." —Joaquin Miller in San Francisco Call.

**Amesities of Flat Life.** The lady in the flat overhead was making her first call on the lady who had moved in a few weeks before. They chatted about the weather and the merits of the apartment, and the conversation was gradually brought around to hardwood floors.

"They're lovely to look at," ventured the visitor, "but unless they're well covered with rugs they're a nuisance. The folk who live on the floor above me have a carpet sweeper and a piano. When they're both performing at once, it's rather hard on my nerves."

The newcomer saw her opportunity. She thought it might never come her way again, so she said sweetly, "By the way, I wish you'd tell the gentleman who has the front bedroom that when he throws his shoes on the floor just before retiring it sounds to us as if he were playing 'mepicins.'"

The visiting lady straightened up, and the newcomer noticed that her fingers twitched nervously. "The boys' rooms," she said coldly, "are all on the east side of the house. The front room is my dressing room."

The hostess suddenly decided that it was time to serve a little tea. —Chicago Record.

**The Eye After Death.** Many years ago the rumor gained circulation in some circles that certain doctors had found pictures in the eyes of deceased men, which proved to be the images of persons and things that they had last looked at before dying. And further that these doctors had utilized their knowledge so as to help to discover a murderer by a post-mortem examination of the eyes of the murdered person. Nothing seems to have come out of these rumors except a vague idea in the minds of reading people that the eye of a dead man retains the image of the last thing looked at. The idea has been settled as an erroneous one. The retina becomes of a pale white color soon after death, and the pellucid fluid in the cornea, which does not exude in the living state, but is constantly absorbed and renewed, oozes out gradually after a short time before death and forms that obscure film before the cornea which destroys its transparency. —Brooklyn Eagle.

**A Complicated Case.** "What can I do for you?" asked the lawyer. "It is dis way," said the tough young man, putting his cigar stub in his pocket and hanging his leg over the corner of the table. "I live on Mississippi street. See? An Klitty—that's me steady—she usy live on Tennessee street. See? An usy, since dy changed de name of it, she don't live on Tennessee street no more. She resides on Capitol avenue. Cateh on? An since she is begun residin on Capitol avenue she says a bloke from Mississippi street isn't good enough to trot in her class an gimme the shake. Kin I soo the city fer damages, or kin I?"

The lawyer has the case under consideration. —Indianapolis Journal.

**Or the Leopard His Spots?** Dr. Sanernann, one of the leading German ornithologists, publishes some interesting particulars concerning his remarkable experiments in artificially coloring the feathers of canaries. According to the doctor, canaries, when fed upon cayenne pepper, gradually change the color of their plumage, passing from the characteristic yellow to a beautiful red. Cayenne pepper contains a tinctorial substance, an irritative principle and an oil. When the last two substances are extracted by steeping in alcohol, the pepper loses its coloring powers and properties. From this fact the doctor draws the conclusion that the oily principle of the pepper is the necessary vehicle of color. —St. Louis Republic.

**A Pun on Frank Hatton.** When the late Frank Hatton was sworn in as postmaster general, one of his newspaper friends in Washington sent out the following dispatch, which was considered by the subject of it the cleverest pun that had ever been made in his name: "The administration decided today to keep its Hatton in cabinet meetings for the remainder of the presidential term. If asked if it means anything, simply say the weather is getting colder, and the president is only showing proper care for the head of the postoffice department." —San Francisco Argonaut.

Modern Gold Mining.

The quartz is taken from the mine, sorted and then hauled to the stamping machine. Here the ore is crushed and pounded as fine as flour. It is then run through a sluice box that contains quicksilver. As the water carries the ore over the "quick" it is taken up and held by the mercury and forms an amalgam. The quicksilver is then placed in a retort and brought to the boiling point. The "quick" passes out of a retort through a tube and is collected in a basin of water, and hardly a bit has been lost, while the gold remains in the retort in the shape of gold dust and is now ready for market. Only about 50 per centum of the gold is saved by this means, and those who can or have ore rich enough to justify it send it to the smelters, where 95 per centum is saved. —New York World.

**Economical.** "You seem to be fond of Tokrins?" "Yes. We always go to the races together."

"I've no doubt that he's a nice fellow. But he stutters so dreadfully." "That's why I like him. When he gives me a tip on a horse, he gets excited, and the race is over before he can get half way through." —Washington Star.

**A Time to Smile.** The man who can keep his temper, when he attempts to drive his neighbor's chickens out of his garden through the same hole by which they came in need have no fears of satan. —Boston Transcript.

**The Amendment Accepted.** Charley Sorreltop—Baw Jove, I b'lieve you married me for my money! Mrs. Sorreltop—My dear, look in the glass and ask yourself if I could ever have married you for anything else. —Chicago Tribune.

**Fried Ice-Cream a Fact.** A Philadelphia firm makes a specialty of fried ice-cream, which is pronounced delicious by a writer for the New York Times. A small solid cake of the cream is enveloped in a thin sheet of pie crust and then dipped in boiling lard or butter long enough to cook the outside to a crisp. Served immediately the ice-cream is found to be as solidly frozen as when it was first prepared. The process of frying is so quickly accomplished and the pastry is so good a protector that the heat has no chance to reach the frozen cream. Baked ice-cream which has a meringue top is another caprice of cooks that is toothsome, though this tampering with a delicacy that is perfection when it is in its perfected normal condition seems unnecessary. Good ice-cream is as good as can be.

Speaking of the dish, a woman recalled the other day the fact that it was first introduced at the national capital by Mrs. Alexander Hamilton. She used to tell with amusement of the delight with which President Jackson first tasted it, and how he promptly decided to have it at the Executive Mansion. Accordingly, guests at the next reception were treated to the frozen mystery, and afforded considerable fun to the initiated by the reluctance with which they tasted it. Those from the rural districts, especially, first eyed it suspiciously, then melted each spoonful with the breath before consuming it. Their distrust was soon removed, however, and plates were emptied with great rapidity.

**Excursion to Asbury Park, N. J.** The Baltimore and Ohio Railroad Co. will sell excursion tickets to Asbury Park, N. J., and return, from all points on its lines east of the Ohio River, July 8th 9th and 10th, good returning until July 16th, with privilege of extension until September 1st, provided the return portion of the ticket is deposited with the Joint Agent at Asbury Park on or before July 13.

The round trip rate from Baltimore will be \$7.05, Washington \$8.25 and Lexington \$13.75, and correspondingly low from all other points on the B. & O. system. j292

**Wanted.** A man who can keep his temper, when he attempts to drive his neighbor's chickens out of his garden through the same hole by which they came in need have no fears of satan. —Boston Transcript.
