DRIFTING ONWARD.

Drifting onward—ever drifting,
Tow'rd you shining, shoreless sea,
Farther still from earth's green landscapes Onward—yet we know not whither We are borne by time's swift tide, Hoeding not the dang'rous river Down whose darkling stream we glide.

Drifting onward-we are going To a country all unknown;
Guard, O Lord, and keep thou, ever—
Leave us not to drift alone.
Shield us from the water's perils,
Save from dark and angry storm;
Let thine arm of might defend us Evermore from every harm.

Drifting onward-we will anchor At the heav'nly port at last, Every care and trial ended, All our toils and dangers past,

Happy on that shore Elysian,

Nevermore shall storm clouds frown;

Oh, the bright, unfading vision,

Where no paling sun goes down!

HOMESICK HIPPOPOTAMUS. It Longed For the Language of Its Babyhood Home.

During Bayard Taylor's visit to the zoological gardens in London he noticed a hippopotamus which lay in its tank apparently oblivious of its surroundings. Entering into conversation with the keeper one morning, he was told that the creature refused to eat and was gradually starving itself to death. "I fancy it's homesick," added the keeper. "He's a fine specimen, and it seems a pity we should lose him, but he's moped ever since the keeper who had charge of

A Brakeman Crushed to Death.

H. W. Duvall, aged about thirty-five years, a Baltimore and Ohio freight brakeman, was killed at Brunswick Wednesday morning. His train had pulled into the railroad-yard and while engaged in coupling cars he was caught between the bumpers and squeezed to death. When the train parted he fell to the ground and expired in a few minutes. Not a scar was found on his body. His remains were prepared for burial and taken to the home of his mother, whose only support he was, on Barre street, Baltimore.

There is comfort in the knowledge, that so many forms of sickness are not due to any actual disease, but simply to a constipated condition of the system, which the pleasant family laxative, Syrup of Figs. promptly removes. That is why it is the only remedy with millions of families, and is everywhere esteemed so highly by all who value good health. Its beneficial effects are due to the fact, that it is the sickness are not due to any actual dis-

effects are due to the fact, that it is the

one remedy which promotes internal cleanliness without debilitating the organs on which it acts. It is therefore all important, in order to get its bene-ficial effects, to note when you purchase, that you have the genuine arti-cle, which is manufactured by the California Fig Syrup Co. only and sold by all reputable druggists.

If in the enjoyment of good health, and the system is regular, laxatives or other remedies are then not needed. If

THE GOLDEN STATE.

California Is Widely Celebrated, but Little Known.

In the first place, California is known not by what millions of people have curgus were made about 844 B. C. The seen, but by what millions have read. Roman laws were first compiled by Europe is better known by contact to Servius Tullius and amended by the Americans than California. A prominent American author recently "discovered" California and filled the newspapers with the interesting and suggestive impressions it had made upon his mind. He had been to Europe 20 times and to the Pacific coast once, which is once oftener than many other distinguished travelers of the eastern seaboard. Still further, the Anglo-Saxon race is dealing with new conditions in California, Coming from dense forests, from a land of heavy rainfall and from a temperate climate, where winters are long and stern, it settled in treeless deserts, in a land of slight and peculiar rainfall and under a sky that never knows the winter. Finally California is in its infancy. Born in a paroxysm of speculation-

ne of the wildest the world has seen-

it has outlived a trying experience of lesser economic epilepsy and come to the threshold of its true career strengthened and purified by the extraordinary process. In less than half a century several farreaching changes have swept through the industrial and social life of the state, swiftly altering the conditions of labor and of business. Even for those living in the midst of these events it has been difficult to read their significance and estimate their influence on the ultimate character of the place and people. What wonder, then, that to the outside world California has meantime appeared like a jumble of gold, palms and oranges, of gilded millionaires and hopeless paupers, of enviable farmers living luxuriously on small sections of paradise and of servile alien laborers herded in stifling tenements? Such are the conflicting aspects of the Golden State to those who view it from afar. - William E. Smythe in Century.

SELECTING PICTURES.

In Choosing Paintings Get at the Intention of the Artist.

"The value of a picture depends upon what there is in it for its possessor,' writes William Martin Johnson in The Ladies' Home Journal, on the "Selection and Framing of Pictures." "A painting by an amateur may be more precious in your eyes than one of Raphael's cartoons. Therefore sell your cartoon to the highest bidder, and when you outgrow the little painting buy back the cartoon if you have learned to see

"No one can tell you how to underwhaup, the shrill piping of the peesweep standart without your seeing it, studying it, living with it, any more than any one can tell you how to tell good cloth from bad. You must first have had experience with cloth. Learn a language before you try to converse. But do not go so far as to imagine that you must learn drawing and painting before you can appreciate pictures. The less you know about technique the more capable you will be of looking at a painting with an unprejudiced eye. Get at the artist's intention. Does he express an idea to you? Is he interesting in the way he tells his story? Does he convince you of a truth? If the picture is that of a head. does it impress you as having the characteristics of an individual? Does it look like a human being? Suppose a landscape is under discussion do the trees sway, the clouds float? Is there any guage. But more than this is required
