DEMAND FOR POTTED TREES. Some of the small trees which have disappeared from the sidewalk of New York are beginning to resurer and more scientific basis, and appear in a slightly modified form on the stoops and balconies of the houses, says the New York Commercial Advertiser. Any one who wanders around much in the region of Upper Fifth avenue must have noticed how many little cone shaped evergreen trees in tubs were popping out everywhere on doorsteps and balconies and inside yestibules. These small trees have a certain attractive resemblance to those smaller evergreen ones that, planted firmly on their round brown standards, gave welcome shade to the Dutch villages and wooden soldiers

A few years ago many of the houses in New York had window boxes gay with pansies and bright flowers, but that attractive fashionseems to have died out, and is being replaced to a certain extent by these little trees.

When window boxes were in fashion people kept their houses open until the middle of June. Now that so many people leave town in May there is no object in putting flowers in the windows to bloom after the house has been shut up, so that these trees, which are as regarded him with a half-amused green and pictureque in November expression as they came from the as in April, seem to be having things all their own way.
