EMMITSBURG, MARYLAND, FRIDAY, JUNE 20, 1902.

NO. 5

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhoea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

GENUINE CASTORIA ALWAYS

The Kind You Have Always Bought

In Use For Over 30 Years.

THE CENTAUR COMPANY, 77 MURRAY STREET, NEW YORK CITY.

NEW STOCK OF SPRING AND SUMMER

SHOES -- AND -- SLIPPERS,

Low Prices. Many different kinds to select from.

NEW STYLES IN LADIES' & MEN'S SHOES.

No trouble to show my assortment of shoes. Call and examine my stock. Respectfully,

M. FRANK ROWE.

I. S. ANNAN.

I. S. ANNAN.

Just received a fine lot of Flynets, working and driving. Call and examine my stock before purchasing; as low as can be sold.

LADIES' WRAPPERS,

for 50 cents to \$1.20, all sizes and colors. Sheets, Pillow and Bolster Slips, all ready for the bed. New stock

LADIES AND GENTS SHOES.

Have just received a new lot of Gingham, Percales and Lawns, plain and striped, beauties, to be sold cheap.

Carpets, Mattings, Linoleum

2 yards wide. If in need of any give me a call. I have a good Machine Oil, sells for 25c., which is equal to oils selling for 40c. and 50c. A trial will convince you of that fact. Paints and oils of all kinds.

COACH -- MATERIAL.

And remember you get 5 per cent. off on all cash purchases. Delineator and Butterick Patterns. Headquarters for fresh Salted White Fish, marked away down.

I. S. ANNAN.

PATENTS

50 YEARS' EXPERIENCE
TRADE MARKS, DESIGNS, COPYRIGHTS & C.
Anyone sending a sketch and description may quickly ascertain our opinion free whether an invention is probably patentable. Communications strictly confidential. Handbook on Patents sent free. Oldest agency for securing patents. Patents taken through Munn & Co. receive special notice, without charge, in the Scientific American.
A handsomely illustrated weekly, largest circulation of any scientific journal. Terms, \$3 a year, four months, \$1. Sold by all newsdealers.
MUNN & Co. 361 Broadway, New York
Branch Office, 635 F St., Washington, D. C.

HEROIC TREATMENT.
Kitty—So you have managed to get Fred to propose at last. How did you bring it about?
Bertha—I borrowed Mamie's engagement ring and had it on the third finger of my left hand when Fred called last evening.
Kitty—And what did he say?
Bertha—He saw it the moment he got into the room. He looked as though he'd go through the floor. Finally he mustered up courage to ask if it was an engagement ring, and I said "Yes." That was no lie, you know. It was an engagement ring—Mamie's, you know.
Kitty—And then?
Bertha—Then he gasped, and I thought he would faint. But the upshot of it was he proposed.—*Boston Evening Transcript.*

HOW TO AVOID LIGHTNING.

Much Less Danger If One Is In The Open

Nine hundred and seventy-three people were killed by lightning in the United States in the year 1900. Of this number 291 persons were killed in the open, 158 in houses, 57 under trees and 56 in barns, while the circumstances attending the death of the remaining 151 are not known. Besides this large mortality list were 973 persons were more or less injured by lightning during the same time; 327 were injured while in houses, 242 in the open, 57 in barns, and 29 under trees, and the location of the remainder is not known. From these statistics, which are compiled by the United States Weather Bureau, it can easily be seen that of the entire population of the United States one in every 40,000 is killed by lightning during a year.

A safe and reliable guide to reduce to the minimum the danger of stroke by lightning is to be drawn from these figures.

When a severe storm is raging the safest place is in the open close to the earth. If the body is erect, it acts as an excellent conductor for the lightning to find its way to the earth. For this reason it is dangerous to take refuge under a tree. Doubtless most of the persons who perished while under trees would be alive today if they had remained in the open. It is also injudicious to huddle under threshing machines, sheds or in the grand stands of race tracks or county fairs, especially under or near the flag staffs which usually adorn such structures. Men, like animals, are killed not singly, but in bunches, when they huddle together. Avoid standing in doorways; near chimneys and fireplaces, close to cattle or near the ends of a wire clothes line during a thunder storm. On the other hand there is not much sense in going to bed or trying to insulate one's self in feather beds. Small articles of steel or iron, as a knife, kettle or key, do not attract lightning, as it is popularly believed.

It is established that lightning does not strike as often in cities as in rural districts. The reason for this is based on a scientific principle. During a thunderstorm the moisture in the air is surcharged with electricity. This electricity is attracted to the earth. When the force that is drawing it toward the earth becomes strong enough the electricity follows the easiest path; and because upright objects, as trees, houses and men, are better conductors than the surrounding air, and are therefore the easiest path, the electricity passes through them into the earth. In cities the electricity in the air is attracted to the earth by hundreds of conductors in the shape of skyscrapers and high chimneys. There are no such conductors in the country and the electricity in the clouds is allowed to accumulate, so that when it gives away it breaks with great force. The country is a theatre with but one exit, while the city is the same theatre with many exits.

When these facts are considered the wonder is not that so many people are struck, but rather that so many people escape. The flash will not inflict harm, as one who lives to see the fire needs to concern himself no more with that discharge.

If one has been struck by lightning the first thing to do is to go to work to restore consciousness, and lightning often brings about suspended animation than somatic death. The condition of a person struck by lightning is much the same as that of a person rescued from drowning. Try to stimulate respiration and circulation. Do not cease in the effort to restore animation in less than an hour, as you value the life of the sufferer.

The method used to restore respiration is immaterial; a good way is to imitate the motion of respiration by alternately compressing and expanding the lower ribs. Do this gently but persistently at the rate of twenty times per minute. Keep the body warm by the application of hot flannels, bottles of hot water, hot bricks, or in case of an emergency warm clothing from bystand-

ers. Rub the limbs upwards, so as to force the blood to the heart and brain. Two or three persons can do this, remembering all the time to make but one stroke, and that toward the body so as to force blood toward the heart. Rub firmly, but energetically. Three things are to be borne in mind: do not give up; keep up the effort to restore respiration, and keep the body warm by rubbing and hot applications. When swallowing is established, a teaspoonful of warm water, wine, diluted whiskey or brandy or warm coffee should be given. When consciousness is restored encourage sleep.

Do not give up, keep at work and send for a physician.

POSTAGE STAMPS FOR 1902.

Several Changes In Design—A 13-Cent Stamp Included.

The Bureau of Engraving and Printing is at work on a new set of designs for the series of 1902 of United States postage stamps.

There will be some notable changes, including the incorporation of a 13-cent stamp to facilitate the foreign registered letter business. New borders are being designed for the entire set of regular stamps. The design as accepted by the Third Assistant Postmaster-General contains a hyperbolic arch over the picture in the center. In the upper right and left hand corners are eagle heads gracefully arranged over an artistic scroll. The words "United States Postage." Under the picture will appear the word "Postage" and "Four cents or Six Cents" as the case may be.

The picture of Grant will be on the 4-cent stamp instead of the head of Lincoln, which will be on the 5-cent blue stamp in place of Grant. On the new 8-cent lilac-colored stamp, which now bears the head of Sherman, will be a likeness of Martha Washington, the first woman to be thus honored by the American Government. On the new 13-cent stamp, which probably will be one of the first issued, will be a picture of the late Benjamin Harrison from a portrait furnished by his widow. There will be one other change in the regular series. The head of Commodore Perry on the \$1 black stamp will be supplanted by the head of Farragut.

The rest of the series will have new borders of uniform character, but the persons represented will remain unchanged. These stamps will be as follows: One-cent, Franklin, green; 2-cent, Washington, carmine; 3-cent, Jackson, purple; 6-cent, Garfield, magenta; 10-cent, Webster, light brown; 15-cent, Clay, olive green; 50-cent, Jefferson, orange; 82, Madison, sapphire blue; 85, Marshall, gray-green.

The special delivery stamps will also be changed in design and color. Instead of the running messenger boy they will bear a picture of a messenger on a bicycle on the left-hand side and will be bright red. The McKinley postal cards have been accepted after much trouble with the design, and will be placed on sale between June 15 and July 1. The Bureau of Engraving and Printing made half a dozen designs of the head of McKinley before a satisfactory one was obtained.

Of what does a bad taste in your mouth remind you? It indicates that your stomach is in bad condition and will remind you that there is nothing so good for such a disorder as Chamberlain's Stomach & Liver Tablets after having once used them. They cleanse and invigorate the stomach and regulate the bowels. For sale at 25 cents a box by T. E. Zimmerman & Co., druggists.

"No, sir," said O'Johnson. "I haven't a word to say against the automobiles that race along the boulevards."

"Don't you have to jump out of the way of them sometimes?" asked O'Jones.

"Of course, I do, but if I were to make a loud holler about it everybody would know at once that I couldn't afford to keep an automobile myself."—*Chicago Tribune.*

HE DOESN'T LIKE DENVER.

Why Gus Pixley, Comedian, Has A Grudge Against It.

Gus Pixley, the comedian, has an antipathy to Colorado, and has entered a suit for \$10,000 damages against the city of Denver. It came about in this way, according to the St. Louis Republic:

Pixley sues the city of Denver for damages because it treated him badly when he had smallpox. In fact, it sent him to Ogden, where he was made to shovel snow and saw wood, two things an actor hates to do, especially when he is suffering from the smallpox.

It is a sad, sad story as Pixley tells it.

Pixley was playing with the "Shoot-the-Chutes" company in Denver when he became ill and was informed that he had the smallpox. Instead of arousing the sympathy of the Denverites this appeared to incite them to fiendish measures of reprisal against the actor who dared to have smallpox in their beautiful and healthful city.

Be that as it may, they hastened to throw Pixley into a railroad car all by himself. He was left alone for 12 hours.

At Ogden he was placed in the pesthouse, and, although he endeavored to impress upon the minds of the folk in charge of that institution the cruelty of setting to work a man with smallpox fever eating out his life, they made him attend to the removal of the snow from the pesthouse grounds as well as the preparation of the fuel for the stove.

"You're the only thing we've got in this here pesthouse," complained the man in charge, "and you ain't no Ogden man. You're just a plain, plumb Denver maverick, and you better hustle, see?"

Pixley saw. He also sawed. In three days he cut into proper length and chopped into kindling seven and a half cords of wood when he should have been in bed taking all sorts of fancy medicines.

Then they sent him back to Denver with an acrimonious note to the Denver authorities, and the men at Denver sent him to the pesthouse at Sand Creek, where he was kept three months and forced to wear a mask.

This latter infliction made Pixley angry and he left the place a soured-bittered actor.

A REAL FRIEND.

"I suffered from dyspepsia and indigestion for fifteen years," says W. T. Sturdevant of Merry Oaks, N. C. "After I had tried many doctors and medicines to no avail one of my friends persuaded me to try Kodol. It gave immediate relief. I can eat almost anything I want now and my digestion is good. I cheerfully recommend Kodol." Don't try to cure stomach trouble by dieting. That only further weakens the system. You need wholesome, strengthening food. Kodol enables you to assimilate what you eat by digesting it without the stomach's aid. T. E. Zimmerman & Co.

NEW IN STREET CAR TRAVEL.

One of the novelties of street railway travel in this country is a passenger station provided rent free by the merchants of a certain street in Toledo. It has a news stand in it and a parcel checkroom adjoining.

Through this particular street five car lines run and they bring to the city on an average 5,000 passengers a day. The merchants doing business in the street, realizing the advantages to themselves of having these passengers alight there, wanted the railway companies to establish the station.

The companies didn't see why they should. So the merchants have done it for themselves.

They have rented a large store for three years and provided it with benches and lockers. Any citizen may rent a locker for five cents a day and have packages sent there to be put in his box. Then when the time comes for him to go home he can start with his purchases without having had all the trouble of juggling them about with him all day.

The experiment, though a new one, has been so successful already that it is likely to be imitated elsewhere.

TAKING TIME TO LIVE.

An interesting solution of a familiar difficulty is now presented by a Chicago citizen, who proposes that the street car line be equipped with dining cars. Thus, he says, the rush to get to work could be made less inconvenient. Instead of swallowing a cup of coffee and snatching a few morsels of bread in mad haste the toiler could hasten from his bedroom to his street car, eating his breakfast in comparative comfort on the way down town. Breakfasts are not the only things which consume useful time, however. All the little details of life, from dining to dressing, demand so many precious minutes which might be put to some other use.

Carried to its logical conclusion, the plan of street car breakfasts should be followed by facilities for having dinner at one's office or shop, a roll in one hand and a pen in the other. Perhaps eventually it might be found feasible to have desks and work benches constructed on the folding-bed principle, so that the worker might continue at his task until slumber overcame him.

As soon as he awakened again he could reach for a roll and proceed with his breakfast and his work simultaneously. However, there are those who still insist that it is well that man should devote a little time just to living—that he should work to live, rather than live to work. The modern business rush seems to be rapidly leading to a point where existence is only a means to an end, the end being to keep busy all the time. Under this theory, of course, little things like eating or sleeping or amusement are seen to be a sheer waste of time. Fortunately, the majority of men are not yet ready to accept this view.—*Chicago News.*

TEN YEARS IN BED.

R. A. Gray, J. P. Oakville, Ind., writes, "For ten years I was confined to my bed with diseases of my kidneys. It was so severe that I could not move part of the time. I consulted the very best medical skill available, but could get no relief until Foley's Kidney Cure was recommended to me. It has been God send to me. Sold by T. E. Zimmerman & Co.

VOLCANOES ONCE COMMON.

Volcanoes and earthquakes have been part of the scheme of this world from the beginning. A great portion of Britain is strewn with evidence of huge volcanoes and terrible convulsions. It is worth a visit to the Hebrides to see what gigantic cones once stood there. The Island of Mull was a volcano 30 miles across at its base, and at least 10,000 feet high. Skye is the basal wreck of another which was in eruption in tertiary times, and was comparable to Etna or Tenerife in dimensions. What is left of it is a grand and picturesque island. Darwin remarks: "If beneath England the now inert subterranean forces should exert those powers which most assuredly in former geological ages they did exert, how completely would the entire condition of the land be changed! What would become of the lofty houses, thickly backed cities, great manufacturing, beautiful public and private edifices? If the new period of disturbance were first to commence by some great earthquake in the dead of night how terrific would be the carnage!" It is some satisfaction to know that this ancient land went through its convulsive period ages before man had appeared.

For biliousness use Chamberlain's Stomach & Liver Tablets. They cleanse the stomach and regulate the liver and bowels, effecting a quick and permanent cure. For sale by T. E. Zimmerman & Co., druggists.

The Net Result.

"Well," said the old man, "I've done my part by the boys an' gals—dedicated the last one of 'em in Greek, Latin and French."

"And what's to become of you now?"

"Well, they've consented to let me live with 'em and help support the crowd in dialect."—*Atlanta Constitution.*

VIOLIN 162 YEARS OLD.

A violin 162 years old, whose full rich and sweet tones stir the soul, is the precious heritage of Mr. William G. Soldan, of South Mount street, Baltimore.

Mr. Soldan says the instrument was presented to him by his father, the late Gustav Soldan, who had received it as a herbage, it having been in the family for 140 years. He means to transmit it to his son.

While Mr. Soldan does not play the violin, his father loved the old instrument, and up to within a few years of his death played it frequently. He was considered a good musician and took the keenest delight in performing on the old violin, to which his attachment became greater as the years passed. About 25 years ago he was offered \$250 for the instrument, but declined to part with it. Subsequently he had other offers, but refused them all.

The violin was made at Wien (Vienna), Austria, in 1740 by Johann Joseph Stadelmann, a famous violin maker of his time. The name of the maker, as well as the date, is inscribed on the inside of the case, so there can be no doubt as to its genuineness. It differs from the violin of today in being a half inch longer and half an inch wider, but in other respects it is similar. The present bow is only about 40 years old, the late Mr. Soldan becoming dissatisfied with the original and sold it for \$75. A case made recently for the instrument had to be cut owing to the difference in its length and width.

When Mr. Soldan was given the violin by his father he found that it had suffered in not being used, the back of the case having cracked. Mr. Amandus Nordhoff, a violin maker of Baltimore city, repaired the instrument and grew enthusiastic over it. Mr. Edward E. Nordhoff, a son of the violin maker and himself a good violinist tried the old violin. He said he had never played on a more event-toned instrument.

BALDNESS.

Among the common causes of baldness—those which stand apart from actual disease of the hair—Dr. Andrew Wilson places in the first rank the habit which many men acquire of wetting the hair every morning in their bath, or when washing the face. What happens in such cases, he says, is that the natural oily secretion of the skin of the head is removed by the water, and the hair is therefore deprived, to a large extent, as also is the skin of the natural pomade, as it were, which the skin supplies. There are thousands of little glands in the skin called sebaceous glands, which produce an oily substance, keeping the skin supple, and as these glands open into the sheaths of the hairs we may very naturally believe that they contribute to the hairs some substance intended for their nourishment and preservation. If, therefore, through any cause the natural oil of the scalp is removed, say, by frequent washing—the hairs being deprived of their nourishment tend to fall out.

ONCE there were two beautiful white eggs laid side by side in a nice new nest. A great big man gathered them up with his rough hands and sold them to a grocer. And one little egg was a good little egg and went into an angel cake, but the other little egg was a very, bad little egg, and got smashed on an actress!—*Town Topics.*

Chronic bronchial troubles and summer coughs can be quickly relieved and cured by Foley's Honey and Tar. Sold by T. E. Zimmerman & Co.

WASHINGTON hotels are said to be the only ones in the country that serve four regular meals every 24 hours—breakfast, luncheon, dinner and supper—the latter being served in some cases as late as midnight.

DeWitt's *Witch Salve* For Piles, Burns, Sores.

ARREST IN FREDERICK ON SUSPICION OF BEING A BURGLAR

After a desperate fight on West Patrick street, Frederick, with a supposed burglar at 7 o'clock last Friday evening, Deputy Sheriffs James Robinson, Robert Carter and Shaw and Officer George Brust succeeded in arresting the suspect. The prisoner was taken before Justice Wood, who sent him to jail in default of \$1,000 bail.

The man is about 35 years of age with a short-cropped sandy moustache and a close-shaved head, blind in the right eye and wears glasses. He weighs 140 pounds, and said his name was Charles Adams, but would give no more information.

Friday morning the repair hands on the Pennsylvania railroad a mile north of Frederick found under their tool chest two revolvers, a number of dynamite sticks, a dozen fuses, a rubber sack of nitroglycerin and caps, a burglar's electric lantern and a quantity of burglar's tools.

Sheriff Lease was notified, and all the paraphernalia except the nitroglycerin was taken to Frederick and officers stationed to watch the place.

A stranger was seen with Leroy Anderson about midnight spending money freely. Learning they left home early Friday morning, the officers kept the house under surveillance all day.

Friday evening as Anderson and his friend were about to walk into the house of Anderson's mother Deputy Carter stepped from a doorway and attempted to place the stranger under arrest. The man dealt the officer a blow. Deputy Robinson by this time closed in from across the street and Officers Shaw and Brust from the rear. The stranger, who subsequently said his name was Adams, fought desperately to escape and injured several of the officers. A blow across the forehead, however, felled him and he was finally handcuffed.

On searching him seven fuses, some dynamite sticks and a half gallon hot-water bag containing about a pint of nitroglycerin was taken from his inside vest. A man supposed to be connected with Adams slept in a box car on the Pennsylvania railroad Thursday night and the officers are on his track.

The officers think they are on the track of the burglars who operated on the night of June 10 in New Windsor, Carroll county. In New Windsor four stores and the Western Maryland Railroad ticket office were broken open and robbed.

SPRING FEVER.

Spring fever is another name for biliousness. It is more serious than most people think. A torpid liver and inactive bowels mean a poisoned system. If neglected serious illness may follow such symptoms. DeWitt's Little Early Risers remove all danger by stimulating the liver, opening the bowels and cleansing the system of impurities. Safe pills. Never-gripe. "I have taken DeWitt's Little Early Risers for torpid liver every spring for years," writes R. M. Evers, Mountville, W. Va., "They do me more good than anything I have ever tried."

T. E. Zimmerman & Co., Druggists.

YORK'S FUNNY FOWLS.

In York county, in the past two months, a headless duck, a horned chicken, a one-legged chicken and three four-legged chickens have come into the world. All of these freaks save one died. The survivor is a healthy six-week-old chick with four legs, all of equal length. The chick was hatched on the farm of John Fitzgerald, near Stronestown, 11 miles from York. The freak fowl is able to run as swiftly as any other fowl on the farm, occasionally bringing a third leg into requisition.

The Hagerstown Herald June 22 announced the death of John McCusker, near Hancock Washington county, of smallpox. He was 40 years of age and contracted the disease from helping to bury his brother, who died of the disease a month ago. It is said there are now 10 cases of smallpox in the same neighborhood.

HOW'S THIS?

We offer One Hundred Dollars for any case of Catarrh that cannot be cured by Hall's Catarrh Cure. F. J. CHENEY & Co., Toledo, O. We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by their firm. WALDING, KINMAN & MARVIN, Wholesale Druggists, Toledo, O. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price 75c per bottle. Sold by all Druggists.

Mull's Family Pills are the best.

GUNS BANG AT MINES

BLUEFIELD, W. VA., June 16.—Several parties of 100 to 150 strikers each paraded the Flat Top coal fields armed with rifles today, and a great many shots were exchanged between them and the guards at the mines.

At the Buckeye mine a party of 100 strikers, most of them armed, prevented men from going to work. Thirty-eight armed strikers were met by guards on Coaldale Mountain as they were crossing Elkhorn Tunnel. The rifles were taken away from them and stored at Coaldale. This was accomplished through the assistance of a strike leader who opposed violence.

At the Tug River mine an effort was made by 30 strikers to take possession of the shaft. A number of shots were exchanged by strikers and guards. The strikers were finally driven off.

The parties of strikers, numbering more than 700 in all, joined at Keynotes about 5 P. M., and marched to Norwood, 10 miles west, where they camped for the night. Early tomorrow they will march in a body east through the Elkhorn district.

In the lower Clinch Valley district mines are working at Norton with one-fourth their regular force. The mining companies are calling on the sheriffs of the counties for protection.—Sun.

INTERESTING TO ASTHMA SUFFERERS

Daniel Bonte of Otterville, Iowa, writes, "I have had asthma for three or four years and have tried about all the cough and asthma cures in the market and have received treatment from physicians in New York and other cities, but got very little benefit until I tried Foley's Honey and Tar which gave me immediate relief and I will never be without it in my house. I sincerely recommend it to all."—Sold by T. E. Zimmerman & Co.

EAST TRAINS

New York to Chicago in 19 hours and 57 minutes—that is the record breaking time made by the new fast trains put into service by the Pennsylvania and Lake Shore Railroads Sunday. The 20-hour schedule over both was more than equaled. The Pennsylvania train that left New York Sunday at 1:45 P. M., arrived in Chicago three minutes ahead of time at 8:52 A. M. The Lake Shore train made exactly the same time, arriving three minutes ahead of the schedule at 9:42 A. M.

HOW TO AVOID TROUBLE.

Now is the time to provide yourself and family with a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy. It is almost certain to be needed before the summer is over, and if procured now may save you a trip to town in the night or in your busiest season. It is everywhere admitted to be the most successful medicine in use for bowel complaints, both for children and adults. No family can afford to be without it. For sale by T. E. Zimmerman & Co., Druggists.

\$25,000 FIRE AT CLARKSBURG

A fire in the business portion of Clarksburg, W. Va., early Monday morning caused a loss of more than \$15,000. The buildings destroyed were the old Short Line Theatre and saloon, owned by Patrick F. McDonald; B. F. Siero's blacksmith's shop and wagon buildings. Clarence E. Stont fell from a ladder, breaking his collar bone and cutting his head. During the fire McDonald's saloon was raided by a gang, who stole almost all the bottled stock in the place and destroyed a great deal more.

WAS WASTING AWAY.

The following letter from Robert R. Watts, of Salem, Mo., is instructive. "I have been troubled with kidney disease for the last five years. I lost flesh and never felt well and doctored with leading physicians and tried all remedies suggested without relief. Finally I tried Foley's Kidney Cure and less than two bottles completely cured me and I am now sound and well."—Sold by T. E. Zimmerman & Co.

The President sent a special message to Congress, urging action on the Cuban Reciprocity bill.

FIVE trainmen were killed in a washout caused by a storm at Middlesex, Vt.

DON'T think that eruption for years can't be cured. Take Hood's Sarsaparilla—its virtue is its power to cure.

The anthracite coal operators announce that after the strike ends they will pay higher wages, but employ fewer men.

Shake Into Your Shoes

Allen's Foot-Paste, a powder. It cures painful, smarting, nervous feet and ingrowing nails, and instantly takes the sting out of corns and bunions. It's the greatest comfort discovery of the age. Allen's Foot-Paste makes tight or new shoes feel easy. It is a certain cure for sweating, callous and hot, tired aching feet. Try it today. Sold by all druggists and shoe stores. Don't accept any substitute. For mail for 5c. In stamps. Trial packages FREE. Address, Allen S. Olmstead, LeRoy, N. Y.

A son of Postmaster William H. Bloom, of Columbia, fell from a cherry tree last Friday on the farm of Thomas H. Hunt and broke an arm. Dr. J. M. B. Rogers was called.

John Brooks, an aged colored man, was found floating in the dog pound of Annapolis Sunday morning. Brooks had been dependant and is supposed to have committed suicide.

Mrs. Lydia Hoke has had her house repaired.

SEVERAL much needed rains fell here during the past week.

FARMERS are cutting their hay crop which is very short.

FOR SALE—The house and lot situated on East Main street, formerly occupied by Dennis McCarren, deceased. Apply to Chas. D. McCarren.

No good health unless the kidneys are sound. Foley's Kidney Cure makes of the kidney right. Sold by T. E. Zimmerman & Co.

The first wheat of the season was harvested in Washington county Monday. A number of shocks on the county almshouse farm were cut. The wheat was of fine quality.

Joseph S. Terrell, one of Elkton's oldest residents, on Saturday last celebrated his eighty-sixth birthday. Mr. Terrell is quite active and enjoys the best of health.

DR. H. L. GALL, Dentist, from Thurmont, will open a dental office in one of the rooms of the house occupied by Mr. Eugene L. Rowe, on West Main Street, on Wednesday June 25.

Mr. Bowie F. Waters, a member of the Rockville bar, has been announced in Montgomery county as a candidate for the democratic nomination for Congress in the Sixth district of Maryland.

DURING the summer kidney irregularities are often caused by excessive drinking or being overworked. Attend to the kidneys at once by using Foley's Kidney Cure. Sold by T. E. Zimmerman & Co.

The body of an unknown white man, apparently 45 years of age, was found between two cars at Perryville. He had evidently fallen from the cars while stealing a ride. A letter was found on him addressed to John J. Lewis, 1248 South Front street, Camden, N. J.

WILLIAM SPANGLERS, of Williamsport, disappeared from home Saturday and has not been seen since. He is subject to inflammatory rheumatism, which affects his brain. He started for Hagerstown to see a physician but did not arrive.

Chesapeake and Ohio canal boatmen have been granted an increase of 10 cents for hauling coal to Georgetown and 5 cents to Williamsport. This makes the rate 30 cents to Georgetown and 40 cents to Williamsport, and upon announcement of the terms of agreement traffic was resumed.

JUNE HAILSTORM

The heaviest hail that has been known in the Middletown Valley, Frederick county, for years fell during a thunderstorm at 4 o'clock last Friday afternoon. There was a terrific down-pour of hail for several hours. Fortunately there was no wind and the hail came down straight, doing little damage. Rain fell in torrents, half an inch of water descending in 20 minutes. At 6 o'clock there was another gust, when half an inch more of water fell.

PURCHASE OF COAL LADS.

Wilson D. Althouse, a coal operator of Philadelphia, who's consipions in the Maryland mines has been invited to the Neff Farm, near Mount Savage, in Allegany county, consisting of 233 acres, from Charles A. Neff, of Belmont county Ohio; Anna Elizabeth Dadds, of Irwin, Pa.; and William Henry Neff, for \$32,900. The property is under contract for coal, and a mining plant will be established. A number of veins have already been opened.

PERSONALS

Mr. William A. Frailey, of Washington, D. C., is visiting his brothers and sisters in this place. Mr. Joseph Rowe has returned home from Gettysburg College. Mr. Joseph Rider, of Tonalloytown, D. C., is visiting his family near town. Miss Lesia Marteny, of Frederick, is visiting her friend, Miss Elizabeth Gelwicks. Mr. Robert L. Horner, is attending the commencement exercises at Lafayette College, Easton, Pa., also visiting friends in Seneca county, New York. Misses Alice and Anna Annand, Dr. Stone and Mr. A. A. Horner, attended a party at the home of Miss Cramer, near Mt. Pleasant, Wednesday night.

STORM IN FREDERICK CITY

Frederick was visited by a series of severe wind, rain and hail storms last Friday afternoon. The first storm broke over the city at 4:30 P. M. The rain came, down in sheets, and in eight minutes the streets were covered with water from house to house. A heavy wind set in which carried the rain swishing in billowing sheets, and to add to this hailstones, from the size of peas to hazelnuts, came down until in some places the pavements were white with them. The hailstones pelting the horses causing many teams to run away.

A large party of the firm of B. Rosenort & Sons, who were occupying it temporarily, ran out into the storm. A tree three feet in diameter on Second street was torn up and hurled across the street. The large plate-glass window in Rosenort's store on Patrick street was smashed. Many hundred window panes were broken by the hail. Stout iron awnings poles were torn and twisted like twigs and many signs were blown down. The telephone lines were prostrated.

Near Frederick on the National pike, Cyrus Foutz's large barn was blown down. A number of stables on the fair grounds were razed, and the gable end of Mr. G. N. Hargett's dwelling was blown in.

BEST FOR THE BOWELS

If you haven't a regular, healthy movement of the bowels every day, you're ill or will be. Keep your bowels open, and you're in luck. Don't use any other laxative, it's dangerous. The smoothest, easiest, most perfect way of keeping the bowels clear and clean is to take CASCARET.

NEW ADVERTISEMENTS.

DAUCHY & CO. VIRGINIA COLLEGE. FOR YOUNG LADIES, Roanoke, Va. Opens Sept. 18, 1902. One of the leading Schools for Young Ladies in the South. New buildings, piano and equipment. Campus level acres. Grand mountain scenery in Valley of Va., famed for health. European and American teachers. Full course. Conservatory advantages in Art, Music and Elocution. Students from thirty States. Catalogue sent by mail. NATHAN P. HARRIS, President, Roanoke, Va.

PARKER'S HAIR BALM. Cleanses and beautifies the hair. Promotes a luxuriant growth. Relieves itching humors. Suitable for the youthful complexion. Cures scalp diseases. Price 25c, and \$1.00 per bottle.

The Eclectic Magazine for July opens with a strong paper by Sydney Brooks upon the relation of the United States to the Anglo-Japanese alliance. Claude Phillips, keeper of the Wallace Collection, sends a note of alarm regarding "The Increased Export of England's Art Treasures," which, while it may not be pleasant reading to the English, is reassuring to Americans, since it indicates that some of the most valuable of the art treasures described have come to America. Sidney Low's "Personal Recollections of Cecil Rhodes" give inside glimpses of the character and purposes of one of the strongest, if also one of the least scrupulous men of his generation. "Art and Free Will" is the title of a striking critical essay by C. B. Keary; there is an acutely critical review of Mr. Liddell on Civilization, reprinted from The Quarterly Review; and there are a dozen or more other contributions in prose and verse, covering a wide range of criticism, description, travel and fiction. The Living Age Co.

Tutt's Pills FOR TORPID LIVER.

A torpid liver deranges the whole system, and produces SICK HEADACHE, Dyspepsia, Costiveness, Rheumatism, Sallow Skin and Piles. There is no better remedy for these common diseases than TUTT'S LIVER PILLS, as a trial will prove. Take No Substitute.

LOCUSTS CAUSE RISE IN PRICE OF EGGS.

The coming of the locust has caused an advance in the price of eggs in York. The farmers of York county have been compelled to throw away thousands of eggs because the hens eat the young larvae. This makes the yolk nearly the color of the young locust and at the same time gives it a peculiar odor. The hens seem to like the locust as a food. In the suburbs of York great clouds of locusts can be seen flying or watted by the winds. So numerous are the insects at Highland Park that they may be swept from park benches and tree trunks by the bushes.

DR. FENNER'S KIDNEY and Backache CURE.

All diseases of Kidneys, Bladder, Urinary Organs, Gravel, Gout, Rheumatism, Backache, Heart Disease, Gravel, Dropsy, Female Troubles.

Don't become discouraged. There is a cure for you. If necessary write Dr. Fenner. He has spent a life time curing just such cases as yours. Write for Free Circulars, No. 21, Dr. Fenner, Fredonia, N.Y. Druggists, 50c. Ask for Cook Book—Free.

ST. VITUS DANCE SURE CURE.

Dr. Fenner, Fredonia, N.Y. CHAS. D. EICHELBERGER, Druggist.

LATEST STYLES IN NEW Summer Goods.

We have just received a large lot of new French Gingham, Lawns and Percales, all of which are in the latest up-to-date shades. These goods are of a fine quality. Come and see them, even if you do not wish to make a purchase just now.

DO YOU NEED WINDOW SHADES.

We have an excellent assortment of new Window Shades, ranging in price from 10 cents to 50 cents.

WORK SHIRTS

Large stock of working shirts, and also Outing Shirts. Good quality and many different shades to select from. If you want a stylish fine shirt, we have it.

OVERALLS FOR BOTH MEN AND BOYS HOKE & SEBOLD.

Headquarters for Butter and Eggs. In Trade or Cash.

HOKE & ANNAN'S Marble Yard,

EMMITSBURG MARYLAND. Monuments, Tombstones and cemetery work of all kinds. Work neatly and promptly executed. Satisfaction guaranteed. jan 29-lyr

Foley's Kidney Cure makes kidneys and bladder right.

New Advertisements. DAUCHY & CO.

AGENTS WANTED both sexes, to sell our Specific Remedies for Rheumatism, Kidney and all Blood Diseases, Diabetics, Gravel and Nervous Debility. Sent on receipt of price, \$1.00 per box, for one month's treatment. Universal Medicine Co., 267 Broadway New York.

STIEFF PIANOS.

ESTABLISHED 1842. STRICTLY HIGH GRADE. PRIZE MEDALS: Centennial, 1876, Atlanta, 1880, 1881, Paris, 1889, New Orleans, 1884, 85, World's Fair, Chicago, 1893. CONVENIENT TERMS. Catalogue and Book of Suggestions cheerfully given to all who make to suit the most economical.

WAR ROOMS, 9 N. LIBERTY ST. FACTORIES: Booth of East Lafayette Avenue, Alton and Laurel Sts., BALTIMORE, MARYLAND.

JACOB L. TOPPER DANIEL SWEENEY. Funeral Directors.

THE UNDERTAKING BUSINESS, formerly conducted by Topper & Hoke, will be continued by the undersigned at the old stand on West Main Street, in Emmitsburg. Fine caskets and funeral supplies always in stock. Prompt and careful attention given to the funeral service in every particular. When in need of funeral directors give us a call. Respectfully, TOPPER & SWEENEY.

MEETING OF SCHOOL COMMISSIONERS.

EXAMINATIONS FOR TEACHERS' CERTIFICATES AND FREE SCHOLARSHIPS.

A regular meeting of the Board of County School Commissioners will be held on Tuesday and Wednesday, June 24th and 25th, 1902. The annual examination of applicants for Teachers' Certificates, the Female Scholarship to Western Maryland College, Scholarships to give to the normal School, and one Scholarship to Washington College, will be held in the Frederick Female High School Building in Frederick, for white applicants, on MONDAY AND TUESDAY, JULY 7th and 8th, 1902. The examination of applicants for certificates to teach in the colored schools will be held in the Court House on Wednesday and Thursday, July 9th and 10th, 1902. The examination for Monday and Wednesday will begin promptly at 10 o'clock, A. M. For Tuesday and Thursday, at 9 o'clock, A. M. Slates will not be used in the examination. All applicants must furnish their own tablets and lead pencils. Orders for tickets and regulations must be to the Maryland State Teachers' Association at Ocean City, June 30-July 3, can be obtained by teachers on application to the Secretary of the Board. By order of the Board, EPHRAIM L. BOBLITZ, Secretary.

MORTGAGE SALE.

BY VIRTUE of powers of sale contained in two mortgages from Martha M. Weaver and William H. Weaver, her husband, one to Jesse H. Nusser, dated on the 30th day of April, 1891, and recorded in Liber W. I. P., No. 14, Folio 164, and one of the land records of Frederick county, stable and other outbuildings, dated on the 7th day of March 1894, and recorded in Liber J. L. J., No. 9, Folio 9, &c., another of the said Land Records, the undersigned Assignee of said mortgages will sell at public sale On Saturday, July 12, 1902, at the hour of 2 o'clock, P. M., on the premises, all that real estate situated in the Fifth Election District of Frederick County and State of Maryland, about 3 miles south of the town of Emmitsburg, Md., where the public road leading from Motter's Station to Mt. St. Mary's crosses the public road leading from said town to Loy's Station on the W. M. R., and containing 15 ACRES, 3 RODS AND 28 SQUARE PERCHES OF LAND, more or less. Improvements are a large two-story Dwelling House, Coach Shop, stable and other outbuildings. There is a well of good water near the house. Terms of sale as prescribed by the mortgage:—Cash. All expenses of conveyancing to be borne by the purchaser. A cash deposit of \$100 will be required on day of sale. JOHN T. CRETIN, Assignee of Mortgages. EUGENE L. ROWE, Sol. Edw. H. Rowe, Aucr.

PUBLIC SALE.

BY VIRTUE of an order of the Orphans' Court for Frederick county, Maryland, passed on the 21st day of May, 1902, the undersigned Administrator of William R. Sweeney, late of Frederick county, deceased, will sell at public sale on the premises of the said deceased, near Mt. St. Mary's College, on the Frederick and Emmitsburg turnpike, about 2 miles south of Emmitsburg, On Saturday, June 21, 1902, at 10 o'clock, a. m., the following personal property: TWO MILCH COWS, 2 lawn mowers, 1 wine press, corn sheller, wheelbarrow, about 100 bushel grain sacks, nearly new, 1 grindstone, hay knife, about 50 chickens, good layers, 4 good chicken coops, 1 incubator, sand sieve, 1 log chain, 3 cow chains, about 80 feet of good inch rope with block and pulleys, pair chest lines, 2 horse blankets, bushel basket, half bushel measure, peck measure, 2 wash tubs, 3 pitch forks, 2 dung forks, soap shovel, large 6-pronged fork, about 40 bound locust and chestnut fence posts, about 80 locust posts in the rough, 8 locust corner or gate posts, 4 bushels rye, 3 sets Elk horns, mounted, 3 sets Elk horns, not mounted, 2 pairs Rocky mountain Sheep horns, not mounted, 1 pair Rocky mountain Goat horns, not mounted, 1 pair of Antelope horns, not mounted, 16 pairs of Buffalo horns, not mounted, 5 Deer skins, 1 silver watch and chain, bedstead, springs and mattress, 1 box architect's drawing tools, lot of books, pair opera glasses, one 1 horse wagon and bed, cutting box, lot of rails, about 500 chestnut shingles, 2 new doors, lot of mixed lumber, consisting of 1 and 2 inch stuff, walnut, white pine and hemlock, some smooth and some rough, lot of old window frames and sash, a very valuable set of carpenter tools in good condition and of all kinds, and two good tools for the same garden rakes, hoes, mattocks, mail and wedges, bench screw, chisel, chains, satchet, tin box, trunk, about 7 acres growing grass, and other numerous articles. Terms of Sale:—Cash upon all sums of or under five dollars, and upon all sums over five dollars a credit of six months will be given, the purchaser or purchasers giving his, her or their notes bearing interest from day of sale, with good and sufficient security to be approved by the administrator.

PRIVATE SALE!

THE UNDERSIGNED, Executors of Sanford Harbaugh, late of Frederick county, deceased, offer at private sale that very desirable property until August 1, 1902, after which time, if not sold, will be offered at public sale. The said property lies 1 mile northeast of Sabillasville, adjoining the properties of David Wagerman, Alfred Brown, Ephraim Harbaugh and others, containing 107 ACRES of improved land, all cleared. The improvements consist of a large brick house, bank barn, spring house, hogpen and other outbuildings. There is a never-failing well of water at the house, and running spring water for stock. Any person wishing to view the premises can do so by calling on Robert Harbaugh, who resides on same. JAMES O. HARBAUGH, CHARLES HARBAUGH, Executors, aug 1.

Foley's Kidney Cure makes kidneys and bladder right.

Put the Material Into Me, I Will Do the Rest And Need No Adjustment. Only Machine Made To Feed Carbide Correctly From Reservoir. Cool Generation And No Waste of Gas. THE GAS PASSES THROUGH DOUBLE PURIFIERS AS CONSUMED. No Carbonizing at Burners Production and Consumption of Gas About Equal. Machine will Run Indefinitely LIGHT FOR ALL. IT HAS COME TO STAY. It is Safe, Economical, Brilliant and has No Equal. Machine can be placed inside or outside of building, and cannot be opened without removing guard or started without replacing guard when charging. For simplicity and efficient working it has no equal. No springs, catches or traps to get out of order or adjust. All points are guarded against neglect or oversight. Carbide cannot be discharged only by descent of gasometer bell. Cannot generate gas only when burners are lighted. Production and consumption of gas about equal. Average amount of gas in storage when machine is in service or out of service is about one-half cubic foot. Can be charged while lights are running. Slack removed without handling. Can be charged or discharged by the most inexperienced. No valves to open or close. Gas thoroughly washed and passed through purifier. No carbonizing at burners. It has less parts than any other machine measuring up to requirements of Acetylene gas engineers. The light produced from Calcium Carbide needs no further introduction. Its illuminating power it has no equal. After long experimenting with gas machines we have succeeded in producing a machine with the least number of parts. A point desired in any machine. Being simple can be understood by the most inexperienced. All fittings in the field. Material the best heavy galvanized steel, put up in the most substantial and mechanical manner, and guaranteed as represented. Manufactured and For Sale By J. T. Hays & Son, Inventors, ESTIMATES FURNISHED ON APPLICATION. EMMITSBURG, MARYLAND. Plumbers, Steam, Hot Water and Gas Fitters. G. W. WEAVER & SON BRANCH STORE IN THE MOTTER BUILDING. MID-SUMMER GOODS. W. Weaver & Son THE LEADERS. Dry Goods, Notions and Carpets. GETTYSBURG, PA.

A WINNING TRICK,

He Lost All His Bets and Made Money by Doing So.

The captain of one rather old and slow steamer of years ago, finding that he would have to be a long time in China before he received a full cargo of tea and would have probably to return in ballast, began, to every one's astonishment, to say that, owing to the repairs that had been done to his engines, he hoped to make a racing passage back to England. Then, still more to the astonishment of the captains of the fast steamers and the world at large, he commenced to back himself to make the fastest passage home.

In such very considerable sums of money did he venture that people began to think there was something in it, and the merchants sent their tea almost entirely to his ship, arguing that as the captain stood to lose \$500 the repairs to his steamer's engines had probably put him in a position to bet almost on a certainty.

Of course the steamer, whose greatest speed was eight knots an hour, arrived in England weeks after the others, and the captain lost £250, but instead of having to lie in China waiting his chance of cargo coming in from the interior, a probable delay of weeks, he had cleared in a few days after his bets became known to the public with a full ship, thus recouping to his owners, who of course paid his betting losses, a considerable number of thousands of pounds profit.—Blackwood's Magazine.

They Use Morphine.

"Snakes of many poisonous varieties can be handled without danger if the handling is done properly," says a dealer in animals. "Most people imagine that snake charmers handle only non-poisonous snakes, or snakes with the poison sacs removed, but such is not always the case. I have seen snake charmers fearlessly handle reptiles of the deadliest variety without apparent danger to themselves, the snakes in fact making no attempt to bite. A snake does not bite unless angered, and snake charmers are careful in their handling to soothe the animal instead of alarming it. They generally begin their manipulation by stroking and avoid all sudden movements in handling the snake. Most snake charmers I have come in contact with were morphine fiends, and by the absorption of this poison they were impervious to the poison of any but the most deadly variety of snakes."

GRASS GROWING.

Some Useful Things Learned at the Rhode Island Station.

The experiment for 1901 with grass at the Rhode Island station was conducted on three plots seeded, manured and treated alike in every respect to date excepting that one plot has received no nitrogenous manures for eleven years, while the second plot has received a small dressing and the third a large dressing of nitrate of soda annually since 1892.

The top dressings for grass have been applied annually either late in April or very early in May, depending upon the earliness of the season and the climatic conditions.

Small annual dressings of nitrate of soda gave a marked increase in net profit, but large dressings yielded a far greater profit per acre than the small ones. The value of the hay in 1901 in the case of the large application of nitrate of soda exceeded the cost of the manure by \$36.70 per acre.

All the evidence at hand is against the employment of a single manural ingredient only.

The use of a single manural ingredient could only be recommended if one were positive that the soil contained enough of all the other necessary constituents in assimilable form. Owing, however, to the impossibility of being certain regarding this point, in most instances the only safe course is to supply sufficient amounts of all of the manural ingredients to meet the requirements of the grass.

Most Rhode Island soils are either acid or readily become so; hence the grass land should usually receive about a ton of air slaked lime or its equivalent of wood ashes per acre at intervals of from five to seven years prior to seeding.

Without the use of lime or wood ashes continued success with clover, timothy and Kentucky blue grass is impossible upon very acid soils unless one makes repeated applications of stable manure.

At present the great drawback to profitable grass culture in New England is the neglect to systematically top dress mowing lands and a general lack of knowledge of the relative quantities and absolute amounts of chemical manures to apply.

GREEN FEED.

Barnyard Millet Desirable For Early August—Sow in May.

Barnyard millet (Panicum crus galli) makes a desirable green feed for the first three weeks of August. This variety of millet is becoming quite generally known, and the seed can be purchased of the more prominent seedsmen. It is not, in the judgment of Dr. Lindsey of the Massachusetts station, as satisfactory a feed as corn, but it has its place among the desirable forage crops.

The millet is a warm weather plant similar to corn. It will not stand dry weather as well as the former, is a heavy feeder and will do best upon a warm, moist soil. It makes a very rapid growth when the temperature is high. If sown by itself, fourteen quarts of seed are sufficient for one acre; when combined with peas, eight quarts of millet and one and one-half bushels of peas are the quantities required.

The first seeding may be made together with peas May 10 to 15. The peas should first be sown and harrowed in deeply and the millet covered more lightly with harrow. Should the weather prove cool during the latter part of May and early June the peas will grow more rapidly than the millet, but with the advent of a few warm days the latter will rapidly overcome the disadvantage.

A second and even a third seeding of millet may be made (without peas) at intervals of twenty and fifteen days respectively. The millet and peas will be ready to cut about Aug. 1, and the other two sowings will follow, so that green feed may be secured from this crop during all of August, if desired.

Cutting should begin even before the millet begins to head and can be continued for ten or twelve days. When the millet is well headed, it becomes tough, and animals are likely to refuse a considerable portion of the stems. Millet does not make a satisfactory hay because of the difficulty in drying.

Wyandotte Chickens.

There are five varieties of the Wyandottes—the Silver Laced, Golden, Buff, White and Black. The picture from the Ohio Farmer shows a hen of the

SILVER LACED WYANDOTTE.

Silver Laced variety. This variety has silver white plumage, with a black lacing across the breast and with black and white generously distributed over the body.

The journal mentioned points out that the "breast of the female is important in breeding true to name. The white centers of each feather should be free from black or brown pencil, and the lacing should be large and distinct."

Rest Before Meals.

The value of a slight rest before meals is, according to a physician, very great. Indigestion more often arises from eating when tired or excited than is understood. In his dietary for a consumptive patient a very well known specialist insists upon all meals except breakfast. Five minutes' complete rest, of mind as well as body, is none too much for the person of average health, and it should be taken regularly.—New York Post.

EXERCISE AND EATING.

Remember That a Tired Stomach Is a Weak Stomach.

A good dinner at night is necessary for those whose pleasure or work keeps them up very late. But for ordinary folk who dine at 6 or 7 and go to bed about 10:30 only a light wholesome repast should be taken at the end of the day, when muscles and nerves are more or less exhausted.

"A tired stomach is a weak stomach" is a golden rule to remember. Yet how often one hears people say, "I've been rushing about all day and am tired to death; I must have a big meal to make up for it!" You may put the big meal into the stomach, but you cannot make the stomach digest it.

A belief is strong in the hearts and minds of the majority of mankind, including persons of weak digestions, that a quick, brisk walk taken before a meal gets up an appetite and helps the stomach to digest the food. Now, this is exactly what it doesn't do. Exercise spreads the blood throughout the body. For the proper digestion of food the blood is needed in the stomach. Few realize this important fact.

After a long, exhausting walk, bicycle spin or any severe physical or mental strain take a good half hour's rest in a comfortable armchair or lying on a sofa before you eat a substantial meal.

A Telephone Whistle.

When the earpiece of a telephone receiver is held to the mouthpiece of the transmitter, a more or less shrill tone or whistle is heard in the receiver. This occurs when the apparatus is in good working condition and when the transmitter is in short circuit. This effect is seemingly due to a series of reactions analogous to but much more complex than those which occur in an electric bell when its circuit is closed. A movement of the diaphragm of the receiver toward its magnet tends to weaken the pressure on the carbon of the transmitter, which causes a weakening of the current, allowing the diaphragm to fall away, with the further result that the air column is compressed, increasing the pressure on the carbon again and also increasing current strength, whereupon the diaphragm is again attracted, and this action is repeated over and over again.—Cassier's Magazine.

The Human Mouth.

It has been discovered that the human mouth is slowly but surely and steadily moving toward the left of the face, which will in time bring it somewhat in the neighborhood of the left ear. All the five great races of man have an uncontrollable tendency to eat only with the teeth which grow from the left jaw. This wears out the teeth more rapidly on that side of the mouth, and this in turn gives the upper and lower jaws an inclination toward the left.

The Table Napkin.

Curiously enough, that article now considered almost indispensable, the table napkin, was first used only by children and was adopted by other members of the family about the middle of the fifteenth century. In etiquette books of an earlier date than this among other safe pieces of advice for children are instructions about wiping their fingers and lips with their napkins.

The Turkey's Sacred Spot.

The Chikru Scherif, or hall of the Holy Garment, is the most sacred battle of the prophet Mohammed, his staff, his saber, his standard and, among other relics, two hairs from his venerable beard, which are inclosed in a casket of gold.

Defiant.

Author's Little Boy—Papa, what is a magazine editor? Author (of some repute)—Why, he is the man in the magazine office who prints the articles he ought to send back and sends back the articles he ought to print.—Life.

Relay Remonstrance.

Johnny and Harry had been left at home with their big sister, mother having gone out. At bedtime they wanted to "stay up for mother," but their sister relentlessly put them to bed. Harry maintained a stolid indifference, but Johnny cried lustily.

Right Arm Most Hurt.

Experience indicates that accidents are far more likely to occur to the right arm and leg than to the left. Further evidence of this fact is supplied by the makers of artificial limbs. They dispose of many more appendages to the right side of the body than to the other.

Applying Epithets.

A Virginia statesman in Washington has two boys, about five and six years old respectively, who are not such "angel children" that they do not scrap occasionally. The family health is discussed a good deal by the parents in the presence of the youngsters, and the two evils held to be the very worst that can be feared are microbes and drafts. The other morning the boys got into a wrangle.

Capital and Labor.

The trouble between capital and labor is just in proportion to the ignorance of the employer and the ignorance of the employed. The more intelligent the employer the better, and the more intelligent the employed the better. It is never education, it is never knowledge, that produces collision. It is always ignorance on the part of one or the other of the two forces. Speak- ing from an experience not inconsiderable, I make this statement. Capital is ignorant of the necessities and the just dues of labor, and labor is ignorant of the necessities and dangers of capital. That is the true origin of friction between them.—Carnegie's "Empire of Business."

NILE RIVER MUD.

The Salvation of the Country in That Rainless District.

There is nothing to make one realize the importance of mud indeed like a journey up the Nile when the inundation is just over. You lounge on the deck of your dahabieh and drink in geography almost without knowing it. The voyage forms a perfect introduction to the study of mudology and suggests to the observant mind (meaning you and me) the real nature of mud as nothing else on earth that I know of can suggest it, for in Egypt you get your phenomenon isolated, as it were, from all disturbing elements.

You have no rainfall, neither you, no low stream, no complex denudation. The Nile does it all, and the Nile does everything. On either hand stretches away the bare desert, rising up in gray, rocky hills. Down the midst runs the one long line of alluvial soil—in other words, Nile mud—which alone allows cultivation and life in that rainless district. The country bases itself absolutely on mud. The crops are raised on it, the houses and villages are built of it, the land is manured with it, the very air is full of it. The crude brick buildings that disperse in dust are Nile mud solidified, the red pottery of Assiout is Nile mud baked hard, the village mosques and minarets are Nile mud whitewashed. I have even seen a ship's bulwarks neatly repaired with mud. It pervades the whole land, when wet, as mud undigested; when dry, as duststorm.—Cornhill Magazine.

The Arabian coffee maker, having prepared his fire of charcoal and placed near it a huge pot containing water, takes a few handfuls of green coffee berries, carefully cuts out all imperfect berries and foreign substances and then places the best of the berries in an iron ladle held over the fire. The berries are permitted to roast until they begin to smoke and are then, while still unheated, placed in a small mortar and carefully brayed with a pestle closely fitted the cup of the mortar.

The berries are not, however, reduced to a dust. While this process has been going on, a small pot has been half filled with tepid water from the large pot and placed over the fire. When the water in the small pot has begun to boil, the broken coffee berries are thrown in, and the boiling is permitted to go on for a short time, the decoction being stirred with a spoon when it shows signs of boiling over. The coffee is then served in small cups without cream or sugar.

The coffee is then served in small cups without cream or sugar.

While this process has been going on, a small pot has been half filled with tepid water from the large pot and placed over the fire. When the water in the small pot has begun to boil, the broken coffee berries are thrown in, and the boiling is permitted to go on for a short time, the decoction being stirred with a spoon when it shows signs of boiling over. The coffee is then served in small cups without cream or sugar.
