The Only Celery Food

The only food in which celery forms an important part—its nourishing qualities of a marked character. It acts admirably upon the nervous system—recommended for wakefulness, rheumatism and neuralgia.

Celery one of its principal ingredients, it helps to regulate the bowels; a restorative in debility of the digestive organs and has a direct effect upon the kidneys. It's a food—not a medicine.

A TANTALIZING FISH.

The Ways of the Salmon Are Beyond Finding Out.

Who knows the way of the eagle in the air or of the salmon in the sea? Of all fish the most tantalizing, he has been the life study of thousands of men. Yet how little any one really knows about him, and how conflicting is the testimony as to what is known! Leave Emmitsburg, daily, except Sun-days, at 7.15 and 9.55 a. m. and 2.55 and 4.50 p. m., arriving at Rocky Ridge at 7.45 and 10.25 a. m. and 3.25 and 5.20 p. Of all fish the most tantalizing, he has If you want to get the idea that there is no such thing as abstract truth, you can form that opinion quickly by sitting in front of the fireplace in a fishing club some evening when the most

experienced members are present and feel like talking. There is scarcely any proposition connected with the life history of this fish upon which any two men of forty or fifty years' experience in salmon fishing will agree. The biography of the fish is filled with puzzling blanks. You catch a glimpse of him in his infancy. He mysteriously disappears, returns during adolescence and then is gone again until, on his third appearance, the infant has grown to be fully mature. Who would think the childish smolt of a few ounces that slips quietly down river in the early spring could come back the same sum mer in the pride of youth as a three or four pound grilse? And the next fime he goes upon what meat doth he feed that he jumps to maturity and ten pounds weight? What ports does he visit while he is off on his deep sea cruise? Where does he keep the chart

by which, after his far away wanderings, he unerringly returns to his birthplace? And why do many grilse come to some rivers and comparatively few or none to others? In Miramichi waters there are in August ten grilse to every full grown salmon. In the Tobique there are scarcely any grilse at all .- From "The Trout of the Ne-

pisiguit," by Frederic Irland, in Scribner's.

GARTER SUPERSTITIONS.

Here are a few garter superstitions that still survive: Gold garter buckles are "lucky" and

silver ones the reverse. The girl who wears her garters below the knee will early lose her beauty. To put on the left garter before the right on dressing in the morning will bring bad luck all day.

The marriage of a bride who wears any but white garters on her wedding day will have an unhappy ending. The luckiest colors for garters are white, blue and black. The wearer of yellow garters will lose a friend within

a year. If a garter breaks in church the wearer's marriage will be happy, but if the accident happens at a dance.it

Spring & Summer Shoes is a sign that the wearer's sweetheart is faithless to her.
