#### FREDERICK COUNTY.

Frederick is next to the largest of the counties of Maryland. In population and wealth it ranks next to Baltimore county. In the fertility and productiveness of its lands it ranks among the first in the Union, and especially in the production of wheat. The area of this great county is 633 square miles. The great body of the people are of German, English and Scoth-Irish descent, the progeny mostly of the early settlers. The land is mostly of fine limestone quality, and the greater part of the county is a valley of rolling lands lying between the Linganore Hills and the Catoctin Mountain. This splendid valley is drained by the Monocacy river, and is one of the best farmed and most highly improved and productive areas of the Union. The great crops are wheat and corn.-Maryland Manual issued by Board of Public Works.

#### RESULTS WITHOUT OSTENTATION

Many of the biggest achievements the world has ever known have been accomplished by the most modest and retiring people. The vast business interests of to-day are controlled by the least pretentious. The heads of enormous corporations, the presidents of the largest financial institutions, the managers of the most extensive plants--most, if not all of them will be found to be quiet. unassuming, unostentatious men -men with simple habits and tastes, but with the highest developed faculty for producing big results with the least possible friction and with the expenditure of no unnecessary labor and money.

The best educational institutions, likewise, are not those which make the loudest and the proudest boasts of what they have to offer; nor do they gain success solely through the advertised reputation of the prominent ones who help to swell their faculty list. Rather do they rely upon the thoroughness of their courses, the conscientious labor of their instructors, the quality of work done by their students.

For one hundred and two years the object, aim and policy of St. Joseph's College and Academy. Emmitsburg, has been to produce

There in the "Valley," stands the old place; old in years and in holy traditions, but ever young in progress and energy and alive to the educational needs of the day. The fences and the bill-boards and the bridges and the barns native servant in a private family reare filled with circus posters full ceive 7 rupees, or about \$1.90, a of good old circus yarns. Big elephants are skating and blue ferent sections, and there is a somemonkeys riding pigs, and polar bears and ponies are hitched up that you paid about as much for labor in curious rigs. Fat clowns and in India as you do in America; that tall slim giants dance with mermaids and with fish, and Japs they juggle cannon balls upon a butter dish. A whale with pink silk whiskers walks the tight rope high in air, while three baldheaded ladies are seen combing out their hair. Big boa constrictors swallow men and rabbits bite bull dogs, and Madame Bum is looping loops in short and fancy togs. An aeroplane with 'lectric lights soars miles up in the sky, and cannons fire gold dollars and cigars to passers-by. Stopping an Artery.

The prompt application of the tourmiquet or even of the finger to stop the bleeding of an artery before the doctor comes will often save life. A always found ready to hand, is a linen handkerchief and a strong stick. The best place to apply the tourniquet for a wound of the arm is above the elbow, where the pulsations of an artery may be felt by any one. The handkerchief should be tied around the arm rather loosely. The stick is thrust in and turned to tighten it until the blood ceases to flow. Of course this is only a temporary relief till the coming of the doctor, who, in case of serious bleeding, must be summoned as soon as possible. When you have nothing at hand in a case of sudden accident even the pressure of the forefinger and the thumb over the wound may arrest the flow of blood for the

#### THE CRACK OF THE WHIP

By SADIE OLCOTT

Neil Walker had been courting me

"Amiability," he said, "is indispenmains much the same. The skirts are sable in a wife. How can I know benarrow, and the kimono sleeve is still fore marriage that you are amiable?" "You show a great deal of good sense," I replied. "There is a great deal in what you say. Come and take up your quarters with us for a month. There you will see me every day and often when I am off my guard. I shall be compelled to show my natural disposition.'

> "And as soon as the month is over we will enter upon that other month called the honeymoon," he cried enthusiastically, and, throwing his arms around my neck, he covered my face with kisses.

Now, we women have a way of doing things by strategy. I didn't feel any more fear of betraying a disagreeable nature with Neil in the house than when he came to call on me. I knew well enough that matrimony is different from courtship and that when two people settle down to work in double harness there is going to be a good deal of friction, for awhile, at any rate. I thought it a fine chance to let Neil see before marriage that these frictions are not all the wife's fault. I was especially equipped to do this, for my little brother Jack was at home, and I well knew that if Neil could stand Jack's antics without losing his temper he would be quite able to stagger under my most glaring

Neil came and settled himself for the trial-my trial. He hadn't said anything about being tried himself, and I didn't tell him that he was to be under observation. Neil went to business in the morning, returning about 5 in the afternoon. Jack took him in charge as soon as he arrived. Neil tried to get rid of him, but Jack stuck like a leech. Neil would be reading poetry to me in the garden. Jack would come up behind him and with a stick and a horse's hair and a tiny ball slightly raised in the gowns as well as of paper would make him think that a bumblebee was lighting on his nose Jack sneaked into Neil's room and filled his underclothing (on the inside) with burs. Neil got the clothing on. then had to take it off again and was half an hour picking out the burs. He was late to business that day and came home in a very bad humor.

By such innocent juvenile expressions of a child's nature did Jack ingratiate himself into Neil's disfavor. Neil remarked that the boy had been very badly brought up, whereupon I simply said that it was evident he didn't like children. To me these little pranks were delightful. Neil said that, the boy being my brother, I was doubtless used to him.

Jack during this preparation for a honeymoon found a boy he would rather play with than annoy Neil. So I was obliged to bribe my brother with candy every day and the promise of a football at the end of the season to keep him at home during this test of my disposition. Besides, I was obliged to conjure up methods for harassing my lover and suggesting them to the dear boy. When Neil was snoozing Jack poured sand in his ear. Then Jack would steal up behind Neil and slip a small piece of ice down his back under his clothing. And one day when Neil and I were walking over the lawn together Jack, who was watering the grass with the hose, turned it on my companion and drenched him.

This was the climax of a long term of annoyances, and Neil could not have kept his equanimity any longer unless he had been descended from the angels. He broke loose in a profusion of Bible quotations in which the word "damnation" occurred oftenest. Then he ran after Jack, vowing that he would knock every bit of spirit out of his villamous little body.

"Mr. Walker, I exclaimed severely, "how can you speak so of the dear

"Child!" he cried. "Hellion, rather!" "Mr. Walker," I continued in a dignified tone, "I am disappointed. I supposed that your disposition was as gentle as a lamb's. I find that you are easily angered and when angered not only fierce, but vindictive. How fortunate that I should have discovered the true acerbity of your makeup: Our engagement is at an end. Had I married a man with such a temper I should have looked forward to the rest of my life with horror."

These las' words were the same as he had used to me, but he didn't remember them.

"And had I married you," he retorted, forgetting himself in a new burst of anger, "one in whose veins flows the blood of that little viper, I

I walked straight into the house and shut the door after me.

Where he stayed that night I didn't know, but the next morning he came to me and on bended knee begged me to forgive him. I asked him if he wished to test my disposition any further, and he said he was quite satisfied with it. Then I forgave him.

"Observer's" personalities and smart innuendoes I refuse to notice further than to say that if anybody believes I am such a fool as to think myself big enough to hobnob with persons of title, why, he is welcome to believe it. I may be a cad but I am supremely unconscious of it.

If "Observer" will apologize for his crass violation of the rules of debate, for his mountain of distortion and innuendo, and sign his name to the apology, I will be glad to attempt an answer to his mite of argumentation. Till then he is beneath further notice from me. Meanwhile, however, I will gladly defend my thesis against any gentleman or gentlewoman who will sign his or her name to what they write. #### Short Crop of Cow Peas.

Prices Are Going Up.

The enormous demand for Cow Peas last year carried the price very high, and as the crop is very short and the acreage is rapidly extending, there are many indications which point to much higher prices as the sowing season approaches.

#### Whip-Poor-Will Cow Peas.

The Whip-poor-wills are generally preferred in the Central and Southern States. They are bush form, early maturing and especially de-sirable for Peas.

New Era Cow Peas.

Wonderfuls, Clay and Mixed Cow Peas.

Black Cow Pess are a little later in maturing than the Clays, they make a good growth of vine, are exceptionally good for medium or poor land and will stand almost any amount of wet weather without injury. We can also supply Shinney Peas, Red Rippers, Blackeye Peas and Soja Beans.

#### PLOWING WITH DYNAMITE.

Bang, Bang! Will Resound Over the Farm as Gee-haw Once Did.

In places where irrigating is carried on extensively, says the booklet "Increase the Crop," got out by the sometimes becomes so saturated that the water level rises close to the surface. This makes the land practically worthless for vegetation of any kind other than pasturage. If alkali exists in the soil or is deposited by irrigation no crops can be raised when the ground water reaches the level of the plant's roots.

In some parts of the country ridges or dikes are run at regular intervals over all of the higher ground to keep the thin surface soil from being washed away. Considerable time and labor are required to make these dikes as well as to keep them in shape, and they take up ground that should be bearing crops. On land of this kind drainage. irrigation, dikes, late plowing and rotting seed could all be done away with if the subsoil or hardpan were properly

There is only one practical way to upturn and aerate these lower soils or to shatter hardpan, and that is by blasting

Subsoil and hardpan can be plowed just as effectively with explosives as

[From "Increase the Crop."]

surface soil can be with a plow, and just as cheaply, too, for it is only necessary to do this subsoil plowing once in a number of years.

Blasting subsoil has been practiced for some years by a few progressive farmers in different parts of the country. These men have had wonderful results in the way of increased crops on land already under cultivation and in transforming into excellent growing land that which would have been worthless without dynamite.

It is only lately, however, that the benefits from plowing with dynamite have become generally recognized. The department of agriculture, the various agricultural colleges and men prominently identified with farming in different parts of the country are a now making a careful study of this question in order to determine the strength, quantity and kind of explo sives, the most effective way of using them and the depth and spacing of the holes for best results. Farmers everywhere are experimenting on their own account. Many are already claiming that subsoil plowing with explosives will be a common custom in a few vears and will represent millions of dollars in increased crops from lands already under cultivation and more millions from land now producing nothing but weeds and considered entirely worthless.

\*\*\*\*\* The man who provides himwith everything new and useful for carrying on the farm work and leaves the household with implements that date back to pioneer days is not deserving of larger success. 

#### About Live Stock.

Stuffing the colt with hay or straw or any coarse feed will spoil its looks Keep this ration down by the use o some grain and less coarse feed.

Steers fed on clover hay will not only consume more roughage, but also more grain, than those fed on timothy hav if both grain and roughage ar fed according to appetite.

It is the farmer who keeps sheep for a number of years that finds them most profitable. Some years they will return a much better profit than others, and it is hard to sell and buy at just the right time.

The ration of the driving horse should be different from that of the average work horse. This is due in a large measure to the peculiar demands of such an animal. It should be fed much less roughage in proportion to Its size than a horse at ordinary work. The roughage should also be of dif-

ferent nature. The ram should not run with the ewes during the winter. He will worry them, and one bunt might kill a lamb. He should have a box stall, not large, with a good, strong yard attached, where he can be out of doors on all fine days. Never leave him out in a storm so that his fleece will become wet, as it might mean death. Feed him regularly and enough to keep him | than I am." In good, thrifty condition.

#### FARMER AND GLAD OF IT.

Mr. Van Wagenen on Seventy-sixth Birthday Sends Cheery Greeting.

groove in life this beautiful optimistic letter, first published in the Country Pennsylvania railroad, the ground Gentleman, is optimistically recom-

I wish to extend to my coworkers in agriculture everywhere my seventy-sixth birthday greeting. This anniversary finds me hale and hearty. I do not know that I ever felt less of pain or disease except it be a mild indication of general debility, which surely is to be expected. This desirable condition of health I attribute in great measure to temperate and regular habits of life. All my life as a farmer I have been accustomed to rise at 5 and under all ordinary circumstances to retire at 9. I deem this sort of life conducive to the highest health. I was not born a Samson in strength, but rather, like Paul, with "a thorn in the flesh." We have with "a thorn in the flesh." We have never had any use for alcohol or tobacco in the family. The only pipe we ever used was the Indian pipe of peace, and this all were encouraged to use freely, as its smoke was offensive to no one, but rather a sweet smelling savor, filling the whole house with its perfume. This custom has made it possible for a large family—never less than seven or eight, sometimes nearly twice that—to live together with very little jar or friction. From many years of experience I can heartily recommend the pipe of peace in all families at the earliest indications of any need of it.

I am sure that the farm is no place for

those who have ambitions to become suddenly rich, but as a life of sturdy independence no other equals it. Probably it is true that the farmer could get along without the millionaire, but the rich man could not do without the products of the farm. Still, all classes are needed, and their aim should be to work together for the best good of all. After a lifetime spent on one farm I call myself a rich man, not in money, it is true, but in a life satisfied with an abundance of the things that I really need. What we have beyond this tends to make us poorer. The only desire I have for more than my needs would be for the pleasure it would afford me to give it to those in want.

Fifty-two years ago last November I brought my wife to the home where we now live. We have never known or cared to know any other home. We have been of one mind in thinking that there was as much enjoyment in farm life as we could find anywhere in the world. Nearly all of our neighbors have sought more congenial surroundings, but I regret to say that apparently few have bettered their condition. Not that our life has been all sun-shine, yet we have no reason to think there would have been more if we had tried a change. What gives me most pleasure of all to relate is that my dear pleasure of all to relate is that my dear wife's health is apparently as good as my own, and we are accounting our last days among our best. JARED VAN WAGENEN.

Those Wedding Celebrations. "It's a ridiculous idea," a man who has been married eleven months tomorrow confided to us, "to celebrate your diamond wedding when you have been married seventy-five years. I'm going to have it reversed. The diamond wedding should come first, then the golden, and so on. Let's have these things while they do us some good."

He is right at that. And yet social custom is going to compel this impecunious couple to celebrate their paper wedding next month. They need a few rugs and gold pieces, but somebody will bring 'em writing paper and a new deck of cards.-Cleveland Plain

#### An Exchange of Compliments. A charming story is told of Pasteur,

the scientist, and Victor Duruy, who was minister of public instruction under the second empire. The author of To the farmer dissatisfied with his the "Histoire des Romains" was a

great friend of Pasteur, Moreover, they were near neighbors, one residing in the Rue d'Ulm and the other in the Rue de Medicis. One Thursday, the day of the sittings of the academy, the two friends met at a cab stand by the Luxembourg. "Are you going to the institute?" asked the minister. "Yes." answered the savant, and they both entered the same cab. Arrived at their journey's end, Duruy tendered a five franc piece to the cabman, who, of course, had no change. Then said Duruy: "Keep the coin as a souvenir of this memorable ride. You have driven the greatest savant of the century." Next came Pasteur's turn. He put his hand in his pocket and withdrew a five franc piece, which he handed to the "cocher" with the remark: "Take care of it. You have driven the greatest minister of the second empire."-London Globe.

A Bit Thick. Parisians drink scarcely any water other than mineral water. The Seine water has a shocking reputation.

John Raphael, Paris correspondent for several London papers, said that one afternoon a pretty actress met her doctor at a dress rehearsal in a boulevard theater.

Bert In His Pajamas Searching the Sofa

Bert's Dream Found His Mother's Diamonds

O you believe in dreams, daddy?" asked Evelyn. "Not so very much," said daddy, "because dreams usually go by contraries, don't you know, but I know of one case where a drear came true and where it saved a poor family from being thrown out

"Please tell us," said the children. "Well," said daddy, "this was where some real nice persons were at the last limit in a money way. The father had died, leaving all his business tangled up, and they had nothing to do but sell everything they had and go to some little place in the country.

"They called in the auctioneer and advertised in all the newspapers, but the evening before the auction Bert, the eldest boy, had a dream. "In the parlor was a queer old haircloth sofa that his father had brought

from Mexico many years before. Bert dreamed that there was something precious hidden in the lining of that sofa. He didn't know what, and the dream didn't tell him, but he made up his mind to look. "So early on the morning of the sale he sneaked downstairs in his little blue striped pajamas and started to search that sofa.

"He went all over it from arm to arm and from top to bottom, but he found nothing. But he was a 'sticker,' and he said to himself, 'Suppose I look into those little spaces back of the cushion seat?'

"And he did, and when he got through he had two diamond earrings that his mother had lost twenty years before and had always believed her maid

"His mother sold the jewels at once, and then they had enough to get theru the little country home they wanted." "Didn't Bert get anything for himself?" asked practical Jack. "Sure he did," said daddy. "He got a kiss from his mother. Wasn't that

OLD FAVORITES.

"THE WASHERWOMAN'S SONG."

N a very humble cot, In a rather quiet spot, In the suds and in the soap Worked a woman full of hope, Working, singing, all alone, In a sort of undertone, "With the Saviour for a friend, He will keep me to the end.'

Sometimes happening along, I had heard the semisong, And I often used to smile More in sympathy than guile, But I never said a word In regard to what I heard As she sang about her friend Who would keep her to the end.

Not in sorrow nor in glee Working all day long was she, As her children, three or four, Played around her on the floor, But in monotones the song She was humming all day long, "With the Saviour for a friend, He will keep me to the end."

It's a song I do not sing, For I scarce believe a thing Of the stories that are told Of the miracles of old, But I know that her belief Is the anodyne of grief And will always be a friend That will keep her to the end.

Just a trifle lonesome she, Just as poor as poor could be, But her spirits always rose, Like the bubbles in the clothes, And, though widowed and alone, Cheered her with the monotone Of a Saviour and a friend Who would keep her to the end.

I have seen her rub and scrub On the washboard in the tub, While the baby, sopped in suds, Rolled and tumbled in the duds Or was paddling in the pools With old scissors stuck in spools, She still humming of her friend Who would keep her to the end.

Have their root in human needs. And I should not wish to strip From that washerwoman's lip Any song that she can sing, Any hope that songs can bring, For the woman has a friend Who will keep her to the end.

-Edmund Clarence Stedman.

THE SMILE. HUMAN smile—how beautiful! Sometimes its blissful presence Sweet as the gentle airs which To sleep the holy flowers of Gul,

Which blossom in the Persian's dreams, A lovely light whene'er it beams On beauty's brow, in beauty's eye, And not one token lingers nigh, On lip or eye or cheek unbidden, To tell of anguish vainly hidden! But, oh, there is a smile which steals Sometimes upon the brow of care And, like the north's cold light, reveals But gathering darkness there! You've seen the lightning flash at night Play briefly o'er its cloudy pile, The moonshine tremble on the height, Where winter glistens cold and bright, And like that flash and like that light Is sorrow's vain and heartless smile!

THE VIOLET.

In glen or copse or forest dingle.

THE violet in her greenwood bower, Where birchen boughs with hazels May boast itself the fairest flower

THOUGH fair her gems of azure hue, Beneath the dewdrop's weight reclin-

I've seen an eye of loveller blue, More sweet through watery luster shin-

THE summer sun that dew shall dry, Ere yet the day be past its morrow. Nor longer in my false love's eye Remained the tear of parting sorrow -Walter Scott
