tinued Mr. McClung, "I have been in-

ng Anderson to name a date for his hearing. This means that it will be fixed shortly and that the hearing part of the local option fight will soon be ovvote itself.

The Newman letter was as follows: "The Temperance Committee has before it Mr. Clift's bill, providing for lo- dency. cal option throughout the State of Maryland, in which you are interested as superintendent of the Anti-Saloon League. If you will inform me upon about what time the interests you represent would like to appear before the committee, I will endeavor to fix a day of the committee and yourself."

In reply to Speaker Trippe's charges, Superintendent Anderson said:

"The Speaker omitted to specify wherein the statements contained in my letter were false. He has not denied that he is opposed to the Local Option bill. He admitted in an interview that he had packed the Temperance Committee two to one against it, and his attitude toward the unseating of the local dend of 2,900 per cent. option men elected in Baltimore city is a matter of recent public record. We are curious to know just what he claims was untrue.

"We have stated facts, and demanded our rights, and will leave to anybody who wants it a monopoly of the use of epithets."

LaFollette Abuses Public Press.

Senator LaFollette, in a speech delivered at Philadeiphia at a banquet given by the Periodical Publishers Association, took occasion to abuse the press of the country. By this attack, many have stated, the Wisconsin Senator has eliminated himself as a Presidential possibility.

Indict Forty Labor Men.

formed that in the Shenandoah valley the banks rarely make loans on real estate unless it is located on a 'pike,' so closely has the idea of a good road and good security become associated. A phase of the road situation but little noticed was brought out some years ago by R. G. Dunn & Co. in a review of trade conditions, in which they stated that the stringency in the money market was more largely due to slow collections because of impassable roads. rather than any form of commercial unsoundness."

Western Maryland After New Cars.

The Pittsburg Iron and steel situation took on new life on Saturday when formal requests from two railroads were received asking for bids on 5000 new cars.

The roads asking for bids on cars are the Western Maryland, and the Bessemer & Lake Erie. The former wants 2,750 cars and the latter 2,500. The bids are to specify cars of various designs, and this is an indication that the order will be pretty widely distributed. Of the cars wanted by the Western Maryland, 1,000 are to be steel underframe boxcars, 1000 gondolas, and 750 of mixed types, including flat cars and hoppers.

To Honor Papal Delegate.

Mgr. Giovanni Bonzano, received last week by the Pope as papal delegate to the United States, to succeed Cardinal Falconio, is expected to arrive in Washington about March 15. His reception into this country will be marked by numerous festivities.

Mgr. Bonzano is the fourth representative the Vatican has sent to Washington, the first being Cardinal Satolli, who was succeeded by Cardinal Martinelli, who in turn gave way to Cardinal Falconio. All were archbishops while residing in Washington, being elevated to the cardinalate on leaving.

POEMS FOR PUBLIC SCHOOL CHILDREN.

The following poems have been prepared for use in the first three grades of the public schools of the county, by Miss Ella V. Kreig, primary supervisor:

Marching Song.

Bring the comb and play upon it! Marching, here we come! Willie cocks his highland bonnet, Johnnie beats the drum.

Mary Jane commands the party, Peter leads the rear; Feet in time, alert and hearty, Each a Grenadier!

All in the most martial manner Marching double-quick; While the napkin like a banner Waves upon the stick!

Here's enough of fame and pillage, Great commander Jane!

Let's go home again. -ROBERT L. STEVENSON.

The Little Artist.

Oh, there is a little artist Who paints in the cold night hours Pictures for wee, wee children, Of wondrous trees and flowers, -

Touching the snow-white sky; Pictures of distant oceans Where pigmy ships sail by;

Pictures of rushing rivers, By fairy bridges spanned; Bits of beautiful landscapes, Copies from elfin land.

The moon is the lamp he paints by, His canvas the window-pane, His brush is a frozen snowflake; Jack Frost is the artist's name.

-SELECTED.

Our Heroes.

Here's a hand to the boy who has courage

To do what he knows to be right; When he falls in the way of temptation He has a hard battle to fight.

Who strives against self and his comrades Will find a most powerful foe;

All honor to him if he conquers, A cheer for the boy who says "No!"

There's many a battle fought daily The world knows nothing about; There's many a brave little soldier Whose strength puts a legion to rout. And he who fights sin single handed Is more of a hero, I say,

Than he who leads soldiers to battle, And conquers by arm in the fray.

Stand firm by the colors of manhood, And you will o'ercome in the fight, 'The right," be your battle cry ever In waging the warfare of life, And God, who knows who are the heroes

Will give you the strength for the strife.

-PHOEBE CAREY.

Our Flag. Red like the rays of morning, When comes the dawn's first gleam,

Within our glorious banner Seven brilliant stripes are seen.

Pure as the snowflakes falling Upon the mountain's side, Amid the streaks of crimson Six stripes of white abide.

And as the sky at evening Enfolds the stars at night, The blue field of "Old Glory" Bears all its stars of white.

Give we our grand old banner The honor that is due To freedom's sacred emblem, The Red, the White, the Blue.

Curriculum Changes at Gettysburg.

The Announcement Bulletin of Get-The Announcement Bulletin of Get-tysburg College just published shows the addition of several new elective subjects on which entrance credit will be allowed in the future. This will prove especially advantageous to candidates desiring to take an engineering course

During the last week, Prof. Kirby, head of the engineering department, gave a course of lectures at Yale University on "Engineering Specifications" in which field he is an acknowledged expert. Prof. Kirby's book on cement testing is just out of press.

The Class of 1907 Gettysburg College have agreed to pay for wiring the old Pennsylvania Hall for electric light. This historic building is intimately as-sociated with the events connected with the Battle of Gettysburg. Before the battle opened Generals Buford and Rey-nold's of the Union forces used the tower of the building for observation purposes and later General Lee of the Confederates did the same. After the first day's battle this building was used as a Confederate hospital. Hundreds of amputations and other surgical operations were performed in the

rooms now occupied by the students of Gettysburg College. The Gettysburg Battlefield Commission are preparing an historical tablet to place on this building.

FREDERICK COUNTY.

Frederick is next to the largest of the counties of Maryland. In population and wealth it ranks next to Baltimore county. In the fertility and productiveness of its lands it ranks among the first in the Union, and especially in the production of wheat. The area of this great county is 633 square miles. The great body of the people are of German, English and Scoth-Irish descent, the progeny mostly of the early settlers. The land is mostly of fine limestone quality, and the greater part of the county is a valley of rolling lands lying between the Linganore Hills and the Catoctin Mountain. This splendid valley is drained by the Monocacy river, and is one of the best farmed and most highly improved and productive areas of the Union. The great crops are wheat and corn.-Maryland Manual issued by Board of

Public Works.

acting in matters literary, it is PUBLISHED EVERY FRIDAY AT EMMITS- suggested that Charles Dickens' novels be subjected to a critical analysis to prove that they were the work of one who was not a 'first-class creative artist' etc. Mr. Arnold Bennett, whoever he is, sees the wisdom of thus disillusioning those who are in future years to read after the author of "Dombey and Son," "The Tale of Two Cities" and the

ands who treasure the writer whose centenary has just been celebrated. Mr. Bennett is entitled to his opinion and he and his co-critics have the right to go and the scenes he painted, the

traits with which he endowed the children of his brain and situations he so cleverly brought Detroit Free Press. about for our delectation will still amuse and satisfy.

by the banishment of many of his prominent followers and supporters. Among them were generals and other officers of high rank, and ladies who had figured prominently in court circles. One group of them came to America, with the idea of establishing a little community of their own, but subject to the jurisdiction of the United States. Congress granted them, by act of March 3 1817, four townships of land, to be selected by them in the state of Alabama: the conditions being that they should cultivate the vine on one acre in each quarter section, and the olive on another, and at the end of 14 years pay the government \$2 an acre for the land. About 400 men and women came over, under the leadership of Marshal Grouchy and General Lefebre.

St. Andrews' Bottle Dungeon. St. Andrews is perhaps the most dis-

tincrive of the old castle towns of Scotland. It was built early in the thirteenth century, and it was here inat Bishop Kennedy showed James ii. how to break the power of his nopies by taking a bundle of arrows, separating them and siapping them one by one. In Stewart Dick's "The Pageant of the Forth" the author says 'Under the sea tower, in the heart of the rock where it juts into the sea, is a grewsome dungeon known as the 'Bottle dungeon,' so called from its shape. In the floor of the lower room in the tower is a hole five feet in diameter. Down it goes for nearly twelve feet. The neck of the bottle then widens out to form a chamber nearly twenty-four feet in breadth. exit of any kind but the neck of the bottle. A prisoner there had no more creel."

A Hindu Dinner Party.

A Hindu ladies' dinner begins at 12 clock and lasts two hours. But the guests begin to assemble some time before the dinner, for the simple reason that they have to go into the garden and choose their own fruit and vegetables. Meat, by the way, is forbidden. The chief dish at a dinner party is composed of rice and maize. The guests sit on the floor in two rows, facing one another, and eat with ow lady present hands round the dishes, and this service is considered a great honor. Cocoanut milk and various kinds of sherbet are drunk. When the meal is over the ladies take a small portion of betel nut wrapped in "pan" leaves. Pan is a green leaf in no fewer than eighty different

ways. Each of those ways is supposed to give a different emotion to the eater.

The Decline of Winchester. Winchester for five centuries was

the active rival of London, and for 400 years English parliaments occasionally sat in the castle, which contains the round table of King Arthur. It was a city with great temples and the site of the first Christian church in Britain. Its buildings were of the most magnificent character, and pilgrims flocked from far and near to the magnificent cathedral which contained the body of St. Swithin and where many miracles were worked.

William the Conqueror and Charles II. had palaces here, and within the monastery were buried King Alfred, his queen and two sons. Winchester has indeed fallen upon evil days, for at the present time its population is Henry II.-Sheffield (England) Telegraph.

Arctic Marine Plants. The inhabitants of the ocean, like those of the land, are affected by the climate. Arctic land plants cannot flourish at the equator, and in the arctic and the antarctic oceans marine plants are found that are unable to survive in warm water. Among the longest climbing plants of the tropical hat they never advance farther from The genial warmth destroys them just as a polar blast shrivels tropical flowers.

Whistler's Tart Comment.

Whistler one afternoon called on a young painter of his acquaintance who did the pretty little sort of things that are popular. In the course of the conversation that followed the young artist turned to a little head he was painting and, daintily balancing a square palette by one corner between wo finger tips, took a fine sable brush and as daintily began to tickle a piece of bad drawing into a "sweet expression," saying:

"A pleasant art, ours, isn't it, Jimmy?"

"Yes," was Whistler's response, "but what are you doing, Frank?'

"Oh," said the young artist, "I am painting a replica of a little thing some one liked because, you know, I can always sell two or three of the same subject, if it's a taking one."

"Ah!" commented Whistler, "you must be a genius, Frank, and I. alas. am like the simple minded hen who when asked to do so, protested that she could not lay the same egg twice!'

A Grave Discussion. The late Joseph Jefferson and his sister, Mrs. Cornelia Jackson, famous as Tilly Slowboy in "The Cricket on

the Hearth," were standing at a studio window on Beacon street, Boston, overlooking the Old Granary burying ground. They had been discussing the famous persons whose graves were spread below them, when, breaking a short interval of silence, Jefferson said in the most mournful of tones, "Connie, my dear, that is the best place for me, after all,'

With a horrified expression on her face, as her brother always avoided grewsome subjects, she asked, "What do you mean, Joe?'

With the twinkle in his eye that three generations of the world have known, the actor remarked blandly, "I said 'after all,' Connie."

In a flash his sister retorted, "No, Joe, dear, that's no place for you. There are too many deadheads there.' -Boston Post.

What Hichens Heard.

While still a student of music Robert Hichens wrote many short stories, verses and songs. In one year, he says, he earned over \$500 by writing scores and lyrics for music. One song, "A Kiss and Goodby," was sung by Mme. Patti in Albert hall, London. "In the natural pride of my heart," Mr. Hichens said with reference to this occasion, "I took a seat in the stalls and waited in a fever of excitement to hear how it would go off. It was received with so much enthusias tic applause that I was lifted into a delicious heaven of delight, but was suddenly tumbled headlong by hearonly the same as it was in the days of ing two voices from the seats immediately behind me.

"'What a lovely song that was,' one exclaimed rapturously.

"'Yes,' the other grudgingly agreed, 'but what awful rot the words of these songs always are.' "-Exchange.

Cleaning an Ocean Liner.

Probably few people are aware that during the few hours a great ocean liner remains in dock she is cleaned most remarkable of these cold water thoroughly inside and out. The hull plants are the laminariaceae, a kind of is repainted, the funnels scraped and seaweed, which sometimes attains a cleaned and every piece of exposed gigantic size, exceeding in length the metal polished. Meanwhile all carpets are taken up and beaten, the floors forests and developing huge stems like scrubbed and repainted and tables rethe trunks of trees. Investigation has polished, chairs regilded and stained, shown that these plants flourish in the in every part of the ship. On the great coldest waters of the polar seas and boats there are more than 30,000 pieces of linen to be counted, sorted, their frigid homes than to the limits prepared and laundered. Then there of "summer temperature" in the ocean. are 15,000 pieces of silverware, 25,000 pieces of glassware, some 60,000 dishes, plates, cups, saucers, etc. As soon as a piece shows signs of wear it is discarded and replaced, and all this work has to be done in a few hours .-Pearson's Weekly.

Baffling Boston.

After ten days we were able to find our way around Boston, but not across it. If you start to walk out in Boston you always come back to the place from which you started unless you try to; then it is almost impossible.

The transportation is fine, after you have committed it to memory. The hospitality of Boston we shall always remember, but not its street car directions. A Boston street car acts like a broncho. You never know whether it is going through the air like a bird, under the ground like a mole or beneath the bay like a fish. The motorman seems to make up his mind as he goes along

The Boston language is sibilant and stylish. The Boston people love the soft boiled "r." Out west folks pronounce "r" a good deal like a dog chewing a bone. In Boston they deal as gently with it as they can, as if it were not to blame for being in the language, although it doesn't belong there.-Horseshoers' Journal.

The Old Oaken Bucket's Gone.

One day's excursion out of Boston is southward through the birthplace .and ancestral home of the brilliant essayist Quincy to the boyhood haunts of Woodworth and the scenes which inspired his sweetest lyric. In Scituate, by the village of Greenbush, we find the well of "The Old Oaken Bucket" remaining at the site of the dwelling where the poet was born and reared. Most of the "loved scenes" of his child. hood-the wide spreading pond, the venerable orchard, the flower decked meadow, the deep tangled wildwoodmay still be seen, little changed since he knew them, but the rock of the cataract has been removed and the cascade itself somewhat altered by the widening of the highway; the "cot of his fathers" has given place to a modern farmhouse, and the "moss covered bucket that hung in the well" has been supplanted by a convenient but unpoetical pump.-Theodore E. Wells, "Literary Shrines."

A Poor Robin Almanac.

One of the scarcest and most amusing of the early English almanacs is entitled "Poor Robin, an Almanack of the Old and New Fashion * * * containing a twofold Kalendar-viz, the Julian, English or Old Account, and the Roundheads, Fanatics, paper-scull'd or Maggotheaded New Account," etc. It is a pamphlet of sixteen pages and is dated London, 1690.

The dedication is "to the world" and in it Poor Robin says: "With Pipers, Ballad-singers and Fiddlers it is a merry World: with Prisoners, Sick-people and Money-less persons it is a sad World: with a Soldier it is a hard World; with a Divine a wicked World; with a Lawyer a contentious World: with a Courtier a slippery World; with most men a mad World, and with all men a bad World." Some of the earlier of these "Poor Robin Almanacks' have been attributed to Robert Herrick.

She Learned the Lesson.

A Baltimore lawyer had an office boy who was given to telling in other offices what happened in that of his chief. The lawyer found it necessary to discharge him, but, thinking to keep him from a similar fault in the future, he counseled the boy wisely on his departure.

"Willie, you must never hear anything that is said in the office," he said. "Do what you are told to do, but turn a deaf ear to cont that does not include you.' A happy inspiration! He would see that the stenographer learned the same lesson in passing, so, turning to her, he said: "Miss Brown, did you hear what I said to Willie? "No. sir," she returned promptly .-Lippincott's.

ost of them settled in lages, Demopolis and Eaglesville, in what is now Marengo county. Here they lived for several years in quietness and simplicity. But the vine and the olive did not prosper, and the leaders became discouraged. The colony gradually melted away, though it is said the descendants of some of these aristocratic French settlers are still to be found in that region.

DIET AND HEALTH HINTS By DR. T. J. ALLEN Food Specialist

THE QUESTION OF ENDUR-ANCE.

"The vegetable diet seems to be giving Warren Buffum a slight advantage over his brother, Jesse, who eats meat, in their hike across the continent," says a report from Kansas City on the walking contest under the direction of Prof. Sargent of Harvard University. In all the contests held in Germany, England and America, non-flesh-eaters have shown greater endurance. While the exclusion of flesh from the diet does not give an ideal system and while meat may under some circumstances be beneficial. it is now well determined that greater endurance in physical work can be maintained without it, and it is reasonable to suppose that the same is true of mental endurance. All physicians now agree that too much meat is eaten, and as the industrial conditions clearly indicate that the American people must learn to do with less flesh food it is well that such demonstrations should be made. Many sanitariums exclude flesh from their bill of fare.

(Copyright, 1911, by Joseph B. Bowles.)

The End of the World.

Although our earth cannot in any vital sense last longer than the sun, it may last less long for intrinsic cause. Life is dependent not only on the sun, but on the presence of air. When this air departs life will depart too. Now the earth's air is going slowly, but surely, evaporating into space. If it all goes before the sun becomes extinct the earth's surface life will lapse while the sun still shines. Both processes-the evaporation of the air and the cooling of the sun-will require long eras of time, but the second process will be much the slower of the two. So we may expect the last inhabitants of the earth to die of lack of breath rather than from want of warmth.-Percival Lowell in Youth's Companion.

Slips of the Tongue.

In a case tried before a magistrate in Glasgow the defending agent made reference to a verbal agreement between the parties. "Let's see yer verbal agreement," the magistrate said. "Hand it up here."

At a parish council meeting, when a petition for some increase of wages was under consideration, the chairman said peevishly: "A canna mak' heid nor tail o' this dockyment. It's jist like Alphy and Omegy-it's got neither beginning nor end."--Glasgow Herald.

The Steeplechase.

The first steeplechases were literally "chases to a steeple." The earliest we can discover was a match in 1752 between Edmund Blake and Mr. O'Callaghan over four and a half miles of stiff country between the church of Buttevant and St. Leger church spire London Tatler.

Next Thing to It.

Ity .- New York Press.

Vegetables and Character.

A Paris contemporary states that a well known doctor read a paper before a meeting of medical men on the influence of vegetables upon the character, the brain and the senses. According to the doctor, the potato develops an evenness of temper and calmness of thought. The carrot acts as a stimulant to the character and is recommended for biliousness and to peevish or jealous persons. Spinach develops ambitious dreams and energy. Sorrel. despite its acidity, induces sadness and provokes nightmare. All workers should eat white haricots. - London Globe.

A Thrifty Spouse.

A man whose illness threatened to develop into typhoid was taken to the hospital. Instead of growing worse he improved, and at the end of the fourth day, when his wife visited him, he asked to be taken home.

"But you have paid for a week," replied his thrifty sponse. "They won't refund the money. You had better stay your week out."-New York Herald.

Proving His Own Medicine. "That man Biffers was neatly punished the other day." "How was that?"

"Why, when he gets mad he always kicks something, and when he got mad the other day he kicked the revolving door and nearly knocked his head oft."-Cleveland Plain Dealer.

Hard Lines.

"In financ'al trouble? What is it?" "Oh. I promised to pay Brown \$10 today, and I've got it, and he knows I've got it, and he knows I know he knows I've got it!"-Puck.

Health. Health is so necessary to all the duties as well as pleasures of life that the crime of squandering it is equal to the folly.-Johnson.

Long Sessions In the Commons. A recent nineteen hours' sitting of the house of commons created a sensation. But it is almost a trifle compared with what happened in the spacious days before the closure was introduced. There was the Irish "night" of July 31 and Aug. 1, 1877, when the chaplain, arriving to read prayers at noon for the Wednesday sitting, found the Tuesday sitting still in progress "Ah," said Erskine May to him, "we are past praying for." But the record was achieved by the forty-one hours'

sitting of Jan. 31 to Feb. 2, 1881. Uses of Time. "I saved ten minutes a day at lunch

for twenty years.' "What of it?"

"Oh, it was well that I saved all this time, for now I spend two hours daily in the anteroom of a dyspepsia specialist."-Seattle Post-Intelligencer.

Striving Vainly to Please.

"I suppose those garden seeds I sent saved you quite a little money," said the affable statesman.

"No," replied Mr. Growcher; "1 hadn't the heart to waste 'em, and the result is that I'm in debt for garden implements."-Washington Star.

Afraid.

"Yes, I proposed, but she said I'd have to ask her mother first." "And did you?"

"No; I was afraid the mother might accept me."-Judge.

Ho Kept Quiet.

Heartfelt Appreciation.

A tourist was being conveyed through a rough country by a driver who boasted of his knowledge of all the roads, saying that he knew every stick and stone along the highway. After they had passed over a smooth piece of road they began to go bumpty-bump for several miles. Just as the buckboard came out of a hole about two feet deep the driver turned and said: "How do you like riding on a buckboard?"

At that instant the tourist happened to be about six feet in the air, and remarked: "I wouldn't miss it for the world."

-Metropolitan Magazine.

Too Late to Change.

"A man can no more change his reputation than he can change his face or his arms," said Senator La Follette at a banquet in Madison.

"There was once a wicked old Madison millionaire, who took his pastor aside and said:

"'I am going to retire, Doctor Thirdly. I'm going to devote the remainder of my life to doing good.'

"Doctor Thirdly, an outspoken man,

"'Do you mean John H. Good, the wealthy farmer, or young Sam Good, the socialist millionaire?""

Experienced Mabel.

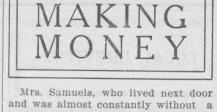

"John," said the sweet young thing about to get married, "I hope you won't be like all the other married men."

"What do you mean, my dear?" "Mabel says they're all alike. She was over this afternoon giving me the benefit of her experience. You know she knows all about men.' "She does? And when was Mabel

"Last June."

NOT SERIOUS.

cook, suggested to Mrs. Henshaw that she might lay the foundation of a fortune by making cakes, pies and doughnuts for her friends. Mrs. Samuels had known a woman who had made hundreds of dollars by filling small orders for such things.

"Why don't you try it?" she had wound up enthusiastically. "I'd order a dozen doughnuts and two pies from you every week myself, and I'd gladly pay 20 cents a dozen for the dough-nuts and 25 cents apiece for the pies." Mrs. Henshaw's eyes opened wide.

"And I could get orders from other people, couldn't I?" she queried. "I do believe I'll try." Thus it was that Henshaw, coming

home rather late Saturday afternoon, found his wife up to the elbows in cookery for the neighbors.

"Whew-ew-ew!" he whistled. "Have you undertaken to supply the whole town?"

Mrs. Henshaw sighed a little wearily. "I do begin to wish I hadn't tried to do so much she said, "but I think it's going to be a great success. I have orders for five dozen doughnuts and 12 pies. That means four dollars, just in one day."

"Did you take out the cost of your materials?" asked Henshaw with disheartening practicability.

His wife's face fell. "I never thought about that," she faltered. "Do you suppose that will make very much difference?" There was a suspicion of tears in

her eyes and Henshaw kissed the tip of a floury ear.

"Don't bother about that," he said. 'Count it all clear gain, but don't make yourself sick over it."

Tuesday night, when he came home, Mrs. Henshaw was rather subdued during the early part of the dinner. and when the time for serving dessert arrived Henshaw was surprised to see her rise to clear away the dishes. "Where's Sophy?" he asked.

"Sophy's gone," Mrs. Henshaw explained. "She said she wasn't used to working for people who ran bakeries."

Henshaw said nothing. He merely looked at his wife whimsically, and when she returned from her second trip into the kitchen she looked back at him bravely and laughed. "I think I'll give it up," she said.

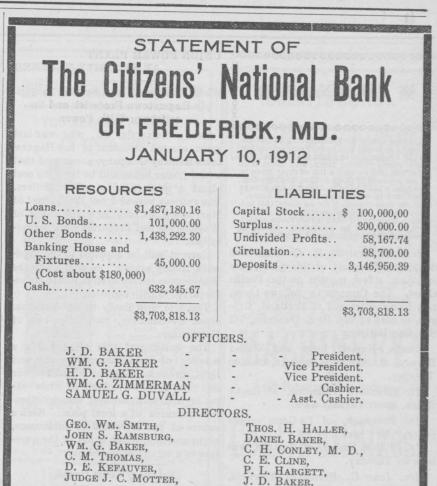

There are difficulties in the way that I didn't take into account." For some weeks Mrs. Henshaw was

too busy cooking for her own family to worry very much about the future. but by the time she had paid for the extra groceries which had been required to carry on the bakery business she was once more anxious to join the great ranks of the working women. One evening her husband came home to find her poring over a book about squabs.

"We have the space, Howard, dear," she explained, "and all we need is a coop and some squabs." "All right," said Henshaw. "I'll sup-

ply the coop if you'll provide the squabs and the brain work for the enterprise.' The coop that Mrs. Henshaw had

him buy seemed large to Henshaw, but she explained that it was cheaper

Address, VERY REV. B. J. BRADLEY, A. M., Emmitsburg, Maryland.

A FAIR EXCHANGE

MANY people have things that they no longer have use for, but keep them in the house taking up room and doing no one any good.

Better sell or trade off things you don't want. Advertise them and you will find that there are people ready to take them and pay cash, or trade for them. You will find it easy through the Columns of

THE CHRONICLE

Mr. Askitt-Do you think marriage is a failure? Mrs. De Vorsay-No; merely a temporary embarrassment.

> At the Picture Show. The hero strove, My seat I gripped; Just then, by jove! The "fillum" slipped!

How He Found Out.

"I should think you would be afraid to take those things home. How can you tell whether they are mushrooms or merely toadstools?"

"Why, you see, Inever eat 'em myself, but my step-children are very fond of 'em, so we find out what they are by lettin' the youngsters test 'em."

Irrepressible.

"I wonder what has become of the man who was going to flood the country with noiseless soup spoons?" "I don't know. He seems to have dropped out of view temporarily, but it is impossible to keep a philanthropist like that down."

Regretful.

"Confound it! You came within an inch of running me down!" exclaimed the irate pedestrian.

"Ah, me, so I did," sighed the chauffeur. "And a miss, they say, is as good as a mile. My driving is not what it used to be."

Shade of Shakespeare! "I presume your visit to Stratford gave you great pleasure?" "Well, I should say so! A man from Chicago told me one of the funniest stories there I think I ever heard."

An Easy Solution. "How can I make both ends meet?" "Easy. Pot roast beef at one end of the table and fried chicken at the other. That's one way to make both ends meat."

Contrary. "'Tis queer about a chauffeur." "What's queer?" "His walk in life is to ride."

in the end to buy a large one, as they would need all the room they could get within a few weeks. Shortly afterward she bought six pairs of pigeons

"They were nice birds," Henshaw said sadly to a friend some weeks later, "and they bore up wonderfully considering all the experiments tried on them in the way of food. However, at last they got discouraged and died. We never knew what was the matter with them. They just died, quietly and inconspicuously, one after another.'

The sight of that empty coop cut Mrs. Henshaw to the heart every time she looked at it. It was full not only of the ghosts of departed squaps but of dead hopes as well. However, after the lapse of several weeks she decided to fill the coop with chickens and sell the eggs and young broilers, and her hopes sprung up as lively as

The hens laid with such generosity that Mrs. Henshaw's purse actually grew perceptibly fatter. Her first brood of chicks were the pride of her heart. As they gradually lost their infant fluffiness and developed from mangy horrors into plump little broilers, she could almost hear the coins rattling into her savings bank. One Saturday morning she announced to Henshaw that she had made her first sale.

ever.

"Mrs. Samuels wants Brownie for her Sunday dinner," she said triumphantly. "Will you kill him?" "Of course," said Henshaw. "I'll do it as soon as I get home to-night."

But Brownie was not destined to be eaten by the Samuels family. Mrs. Henshaw met her husband on the front steps that evening, looking rather pale and dejected.

"Howard," she said, "I'll have to let you make the money for this family. I went out to look at Brownie just now and he came running to me just like a baby almost, and—and I haven't the heart to have him killed. He is such a dear little chicken." She fingered the lapels of Henshaw's coat nervous-"I thought at first I'd have you kill one of the others, but I couldn't choose one. I'm too fond of them all. Don't you think it would be nicer to keep them?"

"I do for a fact," said Henshaw.

isirict could increase t this extra expense. thing along the lines road law, which the Virginia Caldwell, Carrie and Grace Bollinger, Bessie Baumgardner. At eleven o'clock all were invited to the dining room where the table was ners would not take as a contractor think just as good roads can be built for less money. I believe our county authorities made a very serious blunder when they did not take advantage of this law, even if the roads were expensive, as we are paying our part of the taxes to build these same roads, in other counties whose ideas of progressiveness are more advanced. The amount our county has lost by not getting its full share of this fund is certainly more than fifty thousand dollars. This with the same amount from the county would have given us some good roads and bridges, and the money would have been spent and kept in our own county for labor and material, besides the conveniences and time saved traveling a good road. It has a tendency to stimulate the neighborhood and many improvements are sure to follow, this would mean an increase in our tax basis, and help meet the extra cost of building modern roads. Our County Commissioners oppose the Shoemaker road, this is so much more the reason why we should change our road system and have a competent engineer to take care of our bridges and roads, to see that they are properly located, drained, graded and built.

The sick boy was a home in Baltimore on Monday. pupil in Miss Hattie McGrew's room in the same building.

antine regulations and went out on the to the cattle. streets. Dr. Steward was notified and Health Officer Wm. Waivil was at once sent to interview Mr. Menchey who said that he had been out and intended going out again in the evening. He was told that if he did not obey the quarantine regulations legal action would be taken against him.

Extraordinary measures are being taken by the School Board to assist the Board of Health in their efforts to prevent a further spread of the contagion. The High Street building has been closed until further notice to allow complete fumigation of the entire buildiug. Some delay has been caused in getting sufficient materials for this work and this has made it necessary to suspend work for a longer period than was at first thought necessary. In three of the rooms in this building members of the Menchey family were enrolled and in two of the other rooms there were children from the Bell family so that it was necessary to take in the entire building in the fumigation. May Menchey was a pupil in Miss Ruth Hamilton's room.

SOME MISTAKES IN POULTRY

Too Many Beginners Start on Too Large Scale-Most Common Error Is "Learning Too Fast."

It is well for the beginner to adopt the advice of men who are veterans in the service, in order that they may avoid many of the stumbling blocks, says the Poultry Journal.

Too many novices start on too large a scale. They are not content to begin at the bottom round of the ladder and gradually climb to the top. That is too slow for them. If blessed with sufficient capital they are pretty sure to start on a large scale. Without experience, is it any wonder that they do not succeed?"

But this is not the only cause of failure with the beginner. The others might briefly be stated as having too much land; buildings too scattered, entailing too much unnecessary labor; the breed or breeds selected not being suitable for the purpose intended; house not built upon the sanitary plan; too much changing of the bill of fare; unmindful of small details; harboring too much unprofitable stock; carelessness in caring for ailing birds; relying too much on hired help, and learning too fast.

It is a waste of money to buy too much land. From 5 to 10 acres is sufficient for the largest kind of plant.

A general mistake is the continual changing of the bill of fare. There should be one system of feeding and that regularly followed. The bill of fare should contain the greatest variety possible, but the system should not be changed. New articles of food should not be given to the exclusion of others until the fowls have had a chance to become acquainted with All additions or changes them. should be gradually made. If the fowls are doing well on what they are getting, no change should be made at all.

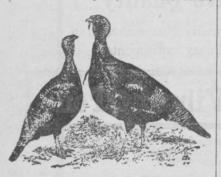

Probably the most common error is "learning too fast." It is a noteworthy fact that, as a rule, by the close of the first year the beginner forms the opinion that he knows it all. Thirty years spent in the poultry yard has taught the writer that he has much yet to learn. There is always something new turning up.

The wise man reads, studies, practices and investigates, thus daily adding to his store of knowledge.

SUCCESS IN TURKEY RAISING

Inadvisable for One to Attempt to Rear Large Fowls Unless Abundance of Space Available.

It is inadvisable for any one to attempt turkey rearing unless they have abundance of space, for these birds.

"I've seen her off the stage," said the girl with the new mop coiffure, addressing the others at the bridge table, "and she is a perfect sight. is th Her complexion is painfully made up. It's my deal, I believe. I hope it will past. be a no trumper.

"Well, she sat next to us in a box at the theater the other night and of all the conceited people!" declared the girl with the Russian blouse. "She acted as if everybody in the place had

ing the dummy hand. "It seems too bad that it is a work of art instead of a work of nature. She has it done at the same beauty parlor, I do-I mean where I have my hair shampooed."

"Why, I heard it was a perfectly beautiful wig," said the girl with the mop coiffure. "She fixes all the braids and curls first, and then just draws it on.'

"Pardon me; you revoked on that trick," politely said the girl with the Russian blouse. "I should think it would show around the edges or that it would slip. I think she has the most wonderful eyes and eyelashes of any actress on the stage."

"Yes, but they are dyed," declared the girl with the velvet shoes. "They say her eyes were very small and she had some kind of wonderful operation in Germany and the corners of her eyes were slit and that made them big and long. I wonder how she dyes her eyelashes?"

"Dips them into the ink bottle, probably," flippantly suggested the girl who was pivoting as dummy because she didn't know the game. "Did you ever hear what made her feet so small?"

No one had heard.

"She was born that way," solemnly declared the girl who didn't know the game. "She never had slices taken off them.'

"What a humorist!" sniffed the girl with the mop coiffure. "It's too bad that some people we know weren't so fortunate. I think I'll try this a heart, for we must win this rubber, partner."

"It is almost sad to think that anybody with such a refined face could have such a dreadful cigarette habit," mourned the girl with the Russian blouse. "Why, do you know," lowering her voice and looking carefully around the room for possible eavesdroppers, "I heard the other day that she refused to go on when it was her cue the opening night because somebody has mislaid her cigarette case She insisted that the show would have to wait until she found her cigarettes. Maybe that's what makes her so droopy and languid in that last act where everybody just has to cry. I wept bucketfuls."

"Well, when she wasn't smoking or dyeing her eyelashes or pulling on her wig did you ever hear what she was inquired the girl who didn't doing?" know the game, with a little steely glint in her eyes. "My cousin's chum has been her understudy for the past year and her closest friend. She told me that this dreadful person was the most lovable woman she had ever known. Every Sunday she makes the round of certain charitable institutions and sings for the cripples and orphans and they all adore her. SHE WAS SURPRISED the the the

As Mrs. Jennings had arranged the settings the library looked precisely HAVE but one lamp by which like a magazine illustration of a hap my feet are guided, and that up of experience. I know no py evening at home. On one side of the big table sat Jennings, in slipway of judging of the future but by the pers and smoking jacket, hedged in by -P. Henry. newspapers and magazines and cigars; on the other sat Mrs. Jennings prettily attired and industriously em-Don't fail to put up some quince broidering. Between them was the honey. Pare and grate five large artistic drop light, at their feet the quinces. To one pint of boiling water family cat.

> "Isn't it lovely Henry?" Mrs. Jennings broke the silence. "What?" demanded Jennings.

> She smiled at him sweetly. "Why, this quiet evening at home, dear," she said. "I'm so glad we both take enjoyment in such simple, real pleasures! It must be perfectly awful to be like some people-never content unless they are racing about from one thing to another! It's dreadful!"

> "Uh, huh," agreed Jennings, deep in his paper. "It certainly is!"

"I'm sure," pursued Mrs. Jennings with a pretty frown of horror, "that I don't know what I should do if you were like Mr. Klibbell!" "What's Klibbell done?" inquired

her husband, with some interest. "He always seemed a pretty nice sort."

"Oh, I suppose he's all right," conceded Mrs. Jennings with reluctance. as most men go. Doubtless his wife thinks he's the finest man in the world. But he isn't-not by a good I guess I ought to know, bedeal! cause I'm pretty well satisfied with my own husband. Not that I want to flatter you, Henry; but there aren't many men like you! Why, Mr. Klibbell hasn't done anything disgraceful -I didn't mean that-but he is such a restless man. He always has to be doing something. Since they got their automobile it's been worse, too, for they are out all of the time, and it must cost them an awful lot of money. I should think they'd consider that they have children growing up and that they ought to be more sensible!'

"Uh huh," said Jennings. Mrs. Jennings paused in her work and pensively regarded the bookcase "I was talking to Mrs. Klibbell today," she went on. "She asked if you and I didn't want to join an automobile crowd to-night for a ride and supper some place, but I declined. I said you didn't care for such things, and I agreed with you."

"Oh!" ejaculated Jennings. "Why-I don't remember ever saying-"

"Why, Henry!" cried Mrs. Jennings. 'You know you've often expressed your opinion of automobiles and their reckless drivers and said that you couldn't see how any sensible man could fool around with one of the things. That's what I told Mrs. Klibbell. I said my husband was a man who preferred staying home with his family and improving his mind. Of course, I explained that I meant no reflection on Mr. Klibbell. I said you naturally had no taste for machinerv and-

"Why, the idea!" protested Jen-

This jacket is made with the novel cut, in double-breasted effect and closing quite high on the bosom. The opening of the neck is outlined with a shawl collar and the fitting is accomplished by long French seams ending at the shoulder in both front

and back. Broadcloth, satin, taffetas, tweed, cheviot and the new tailor mixtures are used for these coats.

The pattern (5573) is cut in sizes 32 to 42 inches bust measure. Medium size requires 31/8 yards of 44inch material.

To procure this pattern send 10 cents to "Pattern Department," of this paper. Write name and address plainly, and be sure to give size and number of pattern.

From Lucile's Diary

Sometimes I think that mother fairly revels in house cleaning. The semiannual unheavals that she insists upon do not seem in the least necessary to me. Still, as I wish to help her in any way I can, I usually leave home during the siege, for I know it is easier to clean house when there is not a large family to take care of.

Last week, when the calciminers appeared, therefore, I went out to Uncle John's farm. When I arrived I was naturally annoyed to find Aunt Anna in the midst of putting up grape juice and making pickles.

"You see, we are in quite a mess," said Aunt Anna in greeting me, "but we shall be through in a day or two and then we can have a good time riding in your Uncle John's automobile.'

"Why, has Uncle John got a car?" I asked. "I'm so glad. I wonder if he will give me a little ride in it today?"

"No, he can't," said Aunt Anna, "because he's over at May's farm, helping fill the silo. Tomorrow, too, there's a lot of work to do, but by Thursday he'll have time to take us to the county fair."

"The county fair!" I echoed. "I don't believe I care about county fairs. I'm not particularly interested in pumpkins.

"Well, you don't have to go if you don't want to," remarked Aunt Anna, rather sharply. "I suppose you're not interested in grape juice and pickles. either."

"I should love to help you, aunty, if I had time," I replied, pleasantly, "but I must work while here on the paper I have to write for our club, the Dix Amies.

"What's the subject of your pa- . per?'

"'The Theory of Household Economics.' "

"It's a good thing it's the theory," commented Aunt Anna.

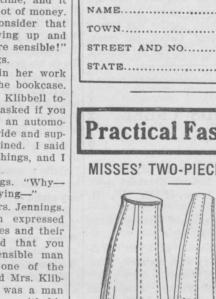

Thursday, at breakfast, Uncle John said to Aunt Anna, "I saw Luke Wright at the creamery this morning and I told him to tell Lucy to be ready and we'd take her to the fair. I know she'll be interested in the automobile races."

"Automobile races!" I repeated. "Then I'm glad I've decided to go. You see, Aunt Anna, I've got as far along on my essay as I can get without more reference books."

Aunt Anna did not look as pleased as I had expected and as I hurried up stairs to change my frock I could hear Uncle John's voice raised in argument.

"No, Anna, you shall not stay home, nor shall Nan," he was saying. "The first time I go to the county fair in my own machine my wife and daughter shall go along."

When my 15-year-old cousin Nan and I got into the back of the little car and Aunt Anna sat down by Uncle John we filled it so completely that I naturally thought Uncle John would Lucy Wright, but he drove not take straight to her house. "You sit in there with the girls," he said as Lucy, who must weigh at least 160 pounds, came out to the car. I think I was never so uncomfortably crowded in my life before. Soon I told Uncle John that I simply couldn't stand it.

Gobbler and Hen.

more perhaps than any other denizens of the poultry yard, are unable to bear confinement. Sundry attempts have been made to rear them in limited runs, but as yet the effort has not met with success. Those who are favored with space will find turkey rearing profitable, provided that they can secure attention being given to the birds.

COMBATING LICE IN CHICKS

Small Quantity of Olive Oil Rubbed on Fowl's Head Will Prove Quite Effectual.

If fowls are healthy, the premises kept clean, and a dust bath or ashes provided, lice rarely get the upper hand, it being through the brood hens, transmitting them to the chickens, that most harm ensues. A hen with many or few lice on her when sitting transmits them to the chickens immediately they are hatched. They are to be found stationary on the chicken's head, above the beak and eyes, and in a few days when they get more plentiful, are to be found behind and on top of head and throat. A simple and effective treatment adopted by the government station in New South Wales is to place a small quantity of olive oil in a saucer, and the day after hatching dip the finger in the oil and thoroughly rub it into the fluff of the chicken's head and under the throat. This will kill the lice if present and if repeated the second or third day there will be little fear of any escaping. When a week or ten days old the chickens should be examined again and if any of the vermin are found at this age a little kerosene can be added to the olive oil. It is best to annoint all chickens with the oil immediately after they are hatched, such being a sure preventive of the scourge.

Care of Poultry Runs. Plowing and liming the poultry runs purifies the soil.

through the season.' "It's just what I should have ex- the introduction of the canape. Canpected of her," declared the girl with apes are made from white, graham the Russian blouse, ardently. "I've and brown bread, sliced very thin always adored her and I'm going to and cut in various shapes. They may have my evening gown made like that ' be toasted, buttered or fried and covapricot gown of hers."

"The hairdresser vowed and declared that my hair was done exactly cular piece of but ared toast place a the way she has hers done," affirmed slice of cucumber and in the center the girl with velvet shoes.

"Let's all go down to see her again," suggested the girl with the mop slices one-quarter of an inch thick, coiffure. "I've done nothing but rave cut in circles, dip in melted butter, over her since I saw her. I'm so sprinkle with salt and cayenne; sorry, partner, that I trumped your ace.

"You might take your opera glasses next time and sit in the front row,' sweetly advised the girl who didn't in crescents. Fry in deep fat. Mix know the game.

New Use for Liquid Air. Certain diseases of the skin have been treated by the application of the bread, spread with butter. Cut slices intensely cold liquid air. Cotton wool, wound lightly on the end of a rod, is dipped into the double-walled glass flask of liquid air and then pressed lightly on the affected part of the skin. The skin freezes and becomes inflamed and in from ten to twenty days the morbid growth sloughs off. But liquid air is expensive and it also acts too energetically.

Australians the Tea Drinkers. The figures showing the amount of tea annually consumed a head of the population indicate that the tea drinkers of Great Britain must give way to those of Australasia, who use no less than 7.1 pounds a person every year. In the United Kingdom the amount is about a pound less-namely: 6.03 pounds a head-and then we have Canada, 4 pounds; Holland, 1.4 pounds; United States, 1.3 pounds .-Magazine of Commerce.

BEGINNINGS.

The dinners of occasions are always begun with an appetizer of some kind, year she would be able to get out of other pungent foods, for the purpose debt if she could manage to keep up of appeasing his appetite and conserving his health. Thus came about ered with any number of mixtures.

Cucumber and Caviare .- On a cirof the cucumber put a little caviare.

Anchovy Canapes.-Cut bread in spread with anchovy paste and indulge ourselves if we want sprinkle with a few drops of lemon juice.

Nut and Olive Canape.-Cut bread equal quantities of chopped nuts and garnish with small diamonds of pimentoes.

Tongue Canapes.—Toast triangles of of cooked tongue in small pieces. Mix with creamed butter; add two tablespoonfuls of capers to a half cup of tongue. Spread on the bread. Sprinkle with salt, cayenne and gar nish with water cress.

Sardine Canapes.-Cut brown bread in circles, spread with butter and heat chanic! Mr. Klibbell has had their in the oven. Pound sardines to a paste. Mix with an equal amount of chopped hard eggs, season with lemon juice and Worcestershire sauce Spread on the bread and garnish with one slice of cucumber and hard cooked white of egg cut in petal shape, to represent a daisy.

Nellie Maywell.

Horse Sense. "He has plenty of horse sense." "Why so?" "He never bets on one."

nings, laying down his paper. "When it comes to that I guess I know as much about machinery as a dozen Klibbells!" "Do you actually care about en-

gines and things?" asked Mrs. Jennings, apparently in great surprise. "I know that if you put your mind to it you could master them, but I thought autos and engines were not of interest to you. Mrs. Klibbell is so excited over theirs, now that they really own one. It's so funny. That sort of thing doesn't appeal to me-I'm perfectly content to stay at home. Of course, if you do own your own machine, I suppose you meet lots of pleasant people and get out more. But I told her I never longed for things I couldn't have and at present we should not feel in the least justified in putting that amount of money into something just for pleasure, even if we really did want a machine. I told her that I didn't in the least mind going to the theater on street cars.

She acts now as though she never had done such a thing in her life and i so condescendingly sympathetic with me, as though I wanted to be sym pathized with!" "I guess my income is as big a Klibbell's," said Jennings, with some

heat. "I don't think we are exactly so poverty-stricken that we couldn' ed to! They needn't take that atti tude." "Oh, it just amused me!" declared

Mrs. Jennings. "I thought it was ridiculous. She remarked to-day that Mr. Klibbell was so much more progressive and generous than some men she could name. Of course, she may not have intended it to sound that way. If you choose to stay home evenings and read instead of bothering with a machine and running over people it's your right and I'm perfectly satisfied. It just makes me furious to have people misjudge you! You can't help it if you aren't a natural mecar just a month and he understands it perfectly-it really is wonderful-Henrietta," interrupted her husband, "I've been thinking for some time about getting a machine, though you may not have suspected it. The Klibbell's make me tired! I guess l am capable of running a toy engine myself, and as for affording it-you meet me downtown for lunch to-morrow and we'll begin to pick one out!" "Why, Henry!" cried Mrs. Jennings,

letting her work fall. "Why Henry I was never so surprised in my life! How perfectly lovely!"

5604 0

By using this design a two-piece skirt can be made and the panels may be of the same or of contrasting material. It is simple to make the panels detachable so that they can be worn with a short jacket and omitted under a long coat.

All the novelty woolens, plaids and above all stripes can be used for this skirt, and velveteen, serge and other soft weaves.

The pattern (5604) is cut in sizes 14, 16 and 18 years. Medium size requires 31/4 yards of 44-inch mate. rial.

To procure this pattern send 10 cents to "Pattern Department," of this paper. Write name and address plainly, and be sure to give size and number of pattern

Geography and Temperament. 'There are lots of puzzles in geography," said the geographer. 'Why, for instance, has the northern part of most countries got a repu-

tation for being harder headed and in the Norman, who is distinguished for his phlegm, his energy, and his Wright, who must have felt very business qualities, and rather pities the lazier and more hot-headed south. Similarly, the Prussian is the Scotsman of Germany. Northern Italy is silly little thing that carries only four a hive of industry, and the man from Milan regards his compatriot from Naples as a lazy and fractious child. And it always is really so-but why? bile, Lucile; that's the last straw," "And why, when a city stands on a river, is the northern half always far mined to go home at once, even if more important than the southern? Look at London, Glasgow, Newcastle, Bristol and Liverpool. The great streets and business and fashion and theater districts are always on the north bank.

"Why, too, have all the great migrations in the world's history gone westward, and none east?"-Answers, Lon don.

"Yes, the seat's only intended for two," he remarked. "But what's to be done?"

"Some one might sit on the floor of the car in front," I suggested.

Lucy Wright, who seemed a very good-natured person, immediately placed her ponderous self at Aunt Anna's feet.

"I'm afraid we have too much weight on one side of the car," said Uncle John.

Just then we came to a muddy stretch of road, into which he went slowly, instead of putting on more force and getting quickly through it, as I should have done. Suddenly the wheels on the heavy side of the car plunged deep into the mud and we stopped with a jerk. No amount of effort on Uncle John's part would make the car stir.

At last he said, "We'll have to get out and push her out of this mudhole.'

Of course I could not step into the mud in my white buckskin shoes, but the others pushed and pushed until finally the car was on comparatively dry land. But. try as he would. Uncle John simply couldn't make it go. He grew more and more angry as farmers kept driving by in their wagons, each asking what was the matter.

We women decided to walk home, a more businesslike than the south? The distance of three miles! Aunt Anna Scotsman and the Yorkshireman we said so much about the foolishness of know. France has their counterpart overloading a car that I was really sorry for that dreadfully heavy Miss guilty and uncomfortable. Still, I do not see why Uncle John did not buy a large touring car instead of that people. I told Aunt Anna what I thought about it.

"Kindly don't criticise our automoshe said, so unpleasantly that I deterthe house cleaning was not done.

Uncle John, with his machine towed in by a larger car, reached home just as the hired man was driving me to the station

"Good-by! Better luck next time," I called gayly, but he scarcely looked up

I often regret that Uncle John's manners are so unpolished.
