SAYS HIS TRIAL WAS A FARCE

Looks at the Impeachment Proceedings From Many Different Viewpoints.

William Sulzer, the deposed Governor of New York, was scarcely out of office 24 hours before he was nominated for the Assembly, and hardly had the process server delivered to the ex-Governor the official paper formally commanding him to vacate the Executive Mansion, when a procession of admirers presented Sulzer with a loving cup and called upon him for a speech.

"Had I obeyed the boss, instead of my oath of office. I would still be the Governor and the 'organization' would be patting me on the back and telling the people that I was a second Andrew Jackson," he said. "Tammany Hall, Catlin, U. S. M. C., the fleet marine has succeeded in taking away the office through the agency of Chief Murphy, the people gave me by the largest plurality of votes any candidate for Governor ever received in the history of the State; but Tammany Hall cannot succeed in taking away my manhood, my self-respect, and my determination to keep up the struggle, day in and day out, for honest government, which should be the hope and the aim of every decent citizen.

"My trial from beginning to end, so far as the Tammanyized part of the court was concerned, was a farce, a a deep-laid political conspiracy to oust me from office."

Following are the views and opinions of the press of New York City and State: The World said: William Sulzer was impeached by Murphy's Assembly not for what he had done but for what he had refused to do.

The Parcel Post Shopping By Mail Offers Advantages.

One of the greatest movements for the benefit of women, in the past decade, is the steady growth and near-

perfection of the mail--order business. The woman in a smaller town with the same refinement of taste, the same love of the beautiful, a like enjoyment of feminine apparel, and who even a few years ago found it impossible to gratify her clesires, has now a world of new beau y open to her.

Whatever the woman writes for is selected by a woman! And this one is especially trained to select merchandise with peculiar aptness, to read between the letter's sentences the personality of its writer and her probable preferances; it is not exaggeration to say that her knowledge, gained from daily experience, is superior to that of the writer herself, an advantage which her city-sister is without.

Perhaps the most important qualification of a store which supports a mail-order section is RELIABILITY. Selections may be carefully made, delivery of the promptest but if there is not back of that store a KNOWN reputation for dependability-!

The Hutzler Store is in personal touch with the fashion authorities of New York and Paris, as well as the best of English houses; and its materials, trimmings, and all merchandise is received by its customers with the satisfying knowledge of their authority.

The variety of the mail-order service of The Hutzler Store is remarkable. Many an out-of-town woman has requests she would make of some of her in-town friends, but there is a reti-cence, a disinclination to disturb others, that prevents. For just such emergen. cies The Hutzler Store offers its facilities. The correct costume for an afternoon call is quite as vital to the up-towoman, as are political questions to her husband:

Now that the Christmas season ap proaches, the Hutzler Service is doubly valuable. Last Fall, hundreds of women disposed of irksome shopping by a check and a list of friends sent to the Mail-Order Section of this store; and the delightful part of the arrangement was the unvaring and personal care taken in the selection of the gifts, the interest that was evidenced in each order. This store will assume the responsibility of your shopping, and what you do not like you may send back:

The most important point to The Hutzler Store is CUSTOMER SATIS-FACTION.

#### FREDERICK COUNTY.

Frederick is next to the largest of the counties of Maryland. In population and wealth it ranks next to Baltimore county. In the fertility and productiveness of its lands it ranks among the first in the Union, and especially in the production of wheat. The area of this great county is 633 square miles. The great body of the people are of German, English and Scoth-Irish descent, the progeny mostly of the early settlers. The land is mostly of fine limestone quality, and the greater part of the county is a valley of rolling lands lying between the Linganore Hills and the Catoc-. tin Mountain. This splendid valley is drained by the Monocacy river, and is one of the best farmed and most highly improved and productive areas of the Union. The great crops are wheat and corn.-Maryland Manual issued by Board of Public Works.

# For Equal Taxation.

One of the most important steps in painted breath is nothing but a fossil; the history of taxation in this State just try a drink of liquid death-just has just been taken by the completion of the report of the Commission for words may not avail, they but offend the Revision of the Taxation System of and fret him, but I keep camping on Maryland. The report covers many divisions of the subject and is far too voluminous to be treated exhaustively glory in the reaping; I feel that in a single editorial, but one feature is death, and death alone, can take him of vital interest to every taxpayer in from my keeping. He's mine to do the State, and that is an earnest recomwith as I will, he's mine, both soul and mendation that control of all matters body; his one ambition is to fill his outaffecting taxation be vested in a State cast form with toddy. At first I take board. away his pride, destroy his sense of

All taxation is, of course, burdensome, but when it is unequal it is, in addition, unjust. There are many defects in our system, but the most serious is the variation in the ratio of assessment to the true value of property. mints. I place a mortgage on his Not only do different counties have shack, despise his feeble ravings, I put widely varying rules, but the method of valuation differs widely in various sections of the same county. Doubtman, here in your Christian city, and less there is hardly a taxpayer in this county who is not aware of instances of unequal assessment in his own neighborhood.

To formulate and apply a perfectly just system of taxation is the work of a specialist-one who has given much time to the study of the subject. With million feet I lead estray, between the the short time the Legislature has at dawn and gloaming. With sparkling its command to act upon a great variety of matters it is next to impossible for it to frame laws which will accurately solve the problem. County Commissioners and local assessors are seldom experts in finance, and without the control of a central authority they cannot act uniformly throughout the State. The Tax Commission has in course of preparation a bill to remedy this difficulty and it ought to be passed Prof. Izoulet, one of the savants of promptly by the next General Assem-France, has a leading article in La bly.-Towson Union-News.

#### The Passion for Haste.

It is seldom that one takes passage on a street car that one does not observe, in the course of a mile's travel, gramme. He is not an opportunist from one to a half dozen narrow escapes. #### Winged Creatures of Borneo.

In Borneo winged creatures are encountered where one would least expect them. Flying fish the size of herrings are found in all the waters, and there is the flying fox, the well known fruit eating bat, which the Malays call "kruang." They may be seen almost any evening winging their steady flight often at a great elevation well out of range of a shotgun. The flying squirrels as evening twilight comes are also seen. They glide down from one lofty tree to the base of another, up which they scramble to the level they started from. Wide expansions of skin between the fore and hind limbs act in parachute fashion and sustain them in their glide. They are of some size, but are quite harmless. The flying lizard is seen in the heat of the day in the jungle gliding down with a flash in much the same manner as the squirrel. But he is much smaller and it requires a quick eye to detect him. The natives kill him with a clay ball shot from their blowpipes .-North Borneo Herald.

#### Spiders That Hunt Fish.

There are certain large sea spiders two feet from toe to toe, called Collosendeis gigas, that live in the water and feed entirely upon mollusks and worms

The carnivorous wolf spider, an amphibious inhabitant of the tropical regions of South America, is said to prefer a fish diet, though it is not averse to eating mice, young birds and even snakes, resembling in this respect the theraphosidae, or bird catching spiders, of India and Queensland, some of which equal a rat in size.

The collosendeis is the most formidable specimen of the spider family. measuring six inches around the body and possessing twelve long, hairy legs, with which it grips its finny prey. It attacks fish several times larger than itself and after biting them through the back and stinging them to death gluts itself by sucking the juices from the bodies of its victims.

#### Enterprise.

A well known business establishment recently sent out a circular to the trade with which it has dealings announcing the death of the head of the firm. To the astonishment of the firm. there was received from a printing house the following reply to the circular:

"Gentlemen-It is with deep regret that we learn by your circular of recent date of the great loss sustained by your firm, and we respectfully beg to express our heartfelt sympathy.

"In this connection we observe that your circular is printed by Messrs. Blank & Co. We feel confident that had you placed this order with us we could have quoted you cheaper and better terms than any other firm; consequently in the deplorable event of a future bereavement we trust that you will afford us an opportunity to make you an offer in this regard."-Exchange.

#### How Caterpillars Build.

Many clever caterpillars which dwell habitually in company build a common nest for the common benefit. Of these is the famous American tent caterpillar. The tents are really nests of silk spun among leaves and twigs. In them lied species which pass through the winter in the caterpillar state construct winter sleeping quarters which the bookish folk call hibernaculums. These are often conspicuous among the branches during the cold months of the year. If torn open they reveal a surprising thickness of spun silk, forming a dense nonconductive wall. At the center of the mass lie from thirty to fifty tightly packed caterpillars waiting for the return of the warm weather. when they will resume their feeding.

Among the list of premiums offered by the Gettysburg business men for Farmers' Day, appeared this statement -"To the best lady singer and the best gentleman singer, \$2.50 each-Walter's Theatre." There was a gentleman went from this place for the special purpose of competing for this prize. When he arrived there he could not find the theatre people, but after looking around for some time he finally located them. They would not hear him, offering numerous poor excuses. The gentleman finally became discouraged and left the place without a and "Katy didn't?" How charmed chance to win the prize. If the management of the Farmers' Day allow a practice of this kind, it will not be long until the people will not respond as they did the past two years.
