INCREASE CADETS WEST POINT PLAN

Superintendent's Report Outlines Needs of 1,300 Body.

MAY DOUBLE SIZE OF CORPS

In Event Congress Authorizes That Increase It Should Appropriate \$1,900,-000, Colonel Townsley Believes. Would Bring Into Army 300 West death. Pointers Every Year.

West Point, N. Y.-That a rerious ef fort will be made in the next congress to increase the number of cadets at the Military academy here to 1,200 or 1,300. which would increase the corps to the peace strength of a regiment and would bring into the army about 300 anew as in youth. West Pointers every year, about twice as many as is now the case, is indicated in the annual report of Colonel C. P. Townsley, the superintendent of the academy, just sent to the war depart-

is the maximum strength to which the West Point corps can be increased, disintegration. and he points out that in the event congress authorizes that increase it should appropriate the money needed sues affected, and this regeneration to house and care for the increased makes those tissues young again. number of cadets, which would be about \$1,900.000.

If the corps is increased a new mess hall, a new barracks building, a new hospital, new quarters for officers and their families, who will be ordered here as instructors, are among the structures that will be imperatively needed and immediately. The plans for these buildings and the enlargement, reconstruction or rearrangement of others, it is understood, can be available at

whether the corps is increased or not, Colonel Townsley recommends that an appropriation of \$350,000 be made for a new hotel on the government reservation, to take the place of the present "three bath" structure, which has the the Hudson valley.

"If an increase of the corps of cadets be gradual and distributed over a pecultivating intelligent thought. flod of four years, so as not to have the increase occur all in one class."

Colonel Townsley directs attention to the fact that many candidates for caobserves, however, that the physical tion. requirements are none too rigid for strenuous life in field service.

extended to 1923, in force and the present standards for entrance maintained," says the report, "I believe that the academy can secure enough cadets to keep up its capacity of 700 very closely. The desire of the academy being to secure the best and most promising material for officers in the regular army, there should be no lowering of its standards for entrance or of its requirements as to discipline or academic

MY! HE'LL BE BUSY.

Weds Widow With Eighteen Children; Grandfather of Thirteen Others.

.

Camden, N. J.—George Washington Henry, fifty-five, a Hurffville blacksmith, married Mrs. Henrietta Verfillee, sixty-four, a widow, of Gloucester from services will attend because of City, and the wedding increased the number of his near relatives by eight een—the children of his wife. Mrs. Verfillee kept a little store in Gloucester City, and it was there that the couple met.

Not convent with stepfathering all the young Verfillees, Henry will also take up that job of step-grandfathering thirteen other young people. The cere mony was performed in Gloucester City's cit- hall by Mayor Anderson. Henry is thinking of starting a card index system to keep all his new relatives in order, it is said.

RICH WIDOW ADOPTS PASTOR.

Young Preacher With Family An-

nounces News From Pulpit. Ashland, Ore.-The Rev. Arthur R. Blackstone, pastor of the Baptist church here, has been adopted by a wealthy widow, Mrs. Aurelia Ferguson, who has made him her heir. His benefactress' estate is estimated at \$100,000.

The minister retains the name of Blackstone. He is a young man with the next apartment to ours ever toucha family. To forestall criticism he announced the news from his pulpit.

The youth who does not look up will look down and the spirit that does not soar is destined perhaps to grovel.-

CRACKED HEAD THAT HEALS HELP TO BRAIN

Results in Regeneration of Tissues, Says Professor.

Chicago.-For fifteen years Charles Manning Child, associate professor of zoology in the University of Chicago, has been experimenting on plants and animals to solve the problem of youth and age. As the result, in his "Senescence and Rejuvenescence." Professor Child turns upside down a lot of current notions about growth and

He prescribes regular fasts, provided no organic disease exists. He suggests vacations or changes in mental occupation after long continued mental labor in a particular field. The effect of change is the rejuvenation of the nerve cells, he finds, and this means the nerve cells are built up

Professor Child utters a warning against overeating. Overnutrition, he says, increases the rate of senescence. All life, he points out, is a development toward senescence and death. Nature's idea is to build up a man Colonel Townsley believes that 1,300 have him do his duty toward increasing the species and then move on to

Injuries, when death does not follow, result in the regeneration of the tis-

A cracked pate that heals is good for the brain. From this comes the explanation of the old familiar story of the man who, recovering from an almost fatal injury or a serious illness, becomes healthier, more vigorous and youthful than before. It also confirms the old one about the idiot who, being hit a terrific blow on the head, regains his reason.

CENSURE HARVARD BOYS' TALK

In addition to improvements and It's Slander, Vapid War Chat and Personalities, Says College Paper.

Cambridge. — Harvard students are accused of being frivolous, if not worse, in their table talk by the Harvard Crimson, every one of the thousand distinction of being the oldest hotel in who eat in Memorial hall being included in the criticism. The editorial says: "One thousand men are each wasting to 1,200 or 1,300 is authorized," Colonel three hours a day in intellectual dejec-

Townsley adds, "this increase should tion which might profitably be spent in

"Women, the war, athletics and personalities comprise the range of subjects. Among the first named virtue is detships are rejected because of phys. apparently unknown. The weaker sex ical defects, eighty of the 483 exam- is subject to slandering remarks whose ined the past year having failed. He sole aim is to fill a gap in the conversa-

Even on athletics, where the interest is keenest, desultory remarks and blasphemies on Yale are the main element. Interspersing everything are biting personalities on another's physical or mental qualities. A tone of affected cynicism crowns the whole."

GIRL USHERS IN CHURCH.

Bridgeport Pastor Believes They Will Be Attraction.

Bridgeport, Conn.—For the first time in the history of the state girl ushers served in the Washington Park Methodist Episcopal church here. The Rev. Everett A. Burns, the pastor, said the girls will act in that capacity every Sunday evening.

"I hope that the young men who might otherwise absent themselves missing link!" the girl ushers," he said. The girls, all from well to do families, are Helen Clinton, Mildred Curtis, Anna Rackmyer. Emma Smith. Ella Crabtree Irene Chapman and Clarice Bray. Mrs. Julia Griffin also is an usher.

HAS LONELY SUPPER AT 105.

Centenarian Is Said to Be the Daughter of Napoleon's Chef.

Jeffersonville, Ind.-Mrs. Susan Quinlan, 105 years old, spent her birthday quietly at her home with only her son, Charles, sixty years old, a carpenter, with whom she lives, sharing the sup-

Mrs. Quinlan has been married three times. She was born in France, the daughter of Franz Antoine, who is said to have been chef to the Emperor Napoleon. She came to this country when twenty-six years old. Her last husband, who died several years ago. was Patrick Quinlan, a cafe proprietor.

"I don't believe the woman who has es her parlor carpet."

"My dear, that's a sweeping arraignment."-Baltimore American.

It is better to believe that a man does possess good qualities than to assert that he does not .- Chinese Maxim. | Mr. Underwood's petition was 113.

FUELLESS ENGINE

Galled by Death After Working on It Seventy Years.

TAKES SEGRET TO GRAVE.

Before Dying Would Be Inventor of Minneapolis Destroyed All Charts or Mechanical Contrivances He Had Sand. Made In Search For Perpetual Motion Machine.

Minneapolis, Minn.-When John Laney, ninety-three years old, was laid to rest in Crystal Lake cemetery a seventy year quest for the secret of "perpetual motion" came to a fruitless end. So close did he think himself to the expectancy. For seventy years, despite his disappointments, his mind aflame with ambition, Laney worked, thinkng, experimenting.

Meanwhile this man, a Scotchman by birth and a stonemason by trade, whose only relaxation was reading the works of Bacon, Shakespeare, Coleridge and Wordsworth, smashed and destroyed contrivance after contrivance when it failed. Then with intensified energy he concentrated on a new idea.

"It almost worked." These three words tell the life story of a man gifted in some ways beyond his fellow men. John Laney wanted his name to go down in history, but always when he fancied he was at the very edge of accomplishment it was only to find the something missing in a contrivance that "almost worked."

"When I was just a little girl father used to have the kitchen table cleared for him when supper was over," said Mrs. Lizzie Welton, at whose home the aged man spent his last days. He had a groove in the table and a round stone ball that he made himself. He would roll this round and round. and often mother would have to get up late at night and beg him to stop

"Father had a good education, mosty self acquired. He loved the poets, and he wrote several songs, one for the St. George guards of St. George, New Brunswick, where we once lived. He was a sculptor also."

Outside the steps of the cosy cottage where Mrs. Welton lives are two pieces of granite. One has on it figures of Hiawatha and Minnehaha; the other has on it a bear and two cubs. Inside the house, highly treasured, is a chain five feet long, with many links and an anchor at the end, that was cut out with a jackknife from a solid piece "When the talk wanders to the war of wood. Many small mementoes re-

> But before he died John Laney de stroyed all charts or mechanical contrivances he had made in his search for perpetual motion. One day he said to his daughter:

"Perpetual motion will yet be found. There is no doubt of it. When it is found the world will be astonished not alone by the stupendous changes that it will bring in all industrial life, but by the simplicity of it. Millions will wonder why no one ever thought of it

"I am an old man," he would often say. "I saw the coming of the railroads, the telegraph, the automobile and the more wonderful things of later years. I predicted back in 1850 that the world would one day see the horseless wagon, and it is here. if I could only just get the one little

MAKE MUDHOLES FOR LIVING.

Missourians Cultivate Traps For Autoists, Official Charges.

Jefferson City, Mo.-That mudholes in the road are carefully nurtured in many communities in Missouri by persons who find it profitable to pull automobiles out of them when they get stuck is charged by State Highway Commissioner Buffum in a road bul-

The issuance of this bulletin followed the action of a Callaway county farmer, who refused to pull the automobile of Mrs. James Houchin out of a creek bed until she gave him \$25.

THIRTEEN EXPLAINS DEFEAT!

Unlucky Number Was Also Aided by Killing Black Cat.

California, Pa. - T. J. Underwood, comptroller of Washington county, ascribes to "thirteens" his defeat as candidate for sheriff at the primaries. In the first place his name, Tom J. Underwood, contains thirteen letters. he license number of his yellow campaign car was 113. On Friday, Aug. 13, while riding in his car with another candidate now numbered among the also rans, he ran over and killed a black cat. The number of signers on

CAN RUN TRUCK FARM AND YET USE NO LAND

Says He Found Way to Grow Plants on Chemical Diet.

Cleveland, O.-J. A. Smith, manager of a drug store here, claims to have growing in his greenhouse healthy sweet corn planted in absorbent cotton which has been treated only with the proper chemical food the corn requires In another greenhouse, he declares, he has tomatoes thriving in washed lake

Mr. Smith has worked on his discovery for seven years. He believes he has learned just what food each plant requires and in just what proportions to feed it nitrogen, potash and the other necessary chemicals. He claims to have a diet formula for almost every

known plant and vegetable. Having made an analysis of the soil, he introduces the chemicals in which secret at times that he trembled with that soil is weak for the production of a given plant. Any kind of soil will do. Even cinders will suffice. The only use for the soil in Mr. Smith's process is to support the plant stalk just as a trellis

supports the grapes or sweet peas, This is why, Mr. Smith contends, it is possible to grow plants in absorbent cotton. He merely saturates the cotton with a solution of the natural food for the plant it is intended to grow.

Mr. Smith is negotiating with men who, he declares, are planning to commercialize his discovery. He would establish service stations in Cleveland and other cities.

Does your lawn refuse to become green in a soil of hard clay? Send for Mr. Smith and let him put the grass of a diet. De you own a greenhouse, and is it expensive to haul fertile soil from a distance? Send for Mr. Smith. He'll show you how to raise carnations in lake sand. "It's easy," he says, with a smile. "when you know the food carna tions need."

ENFORCE GRASS WIDOW RULE

Civil Service Examiners Bar All Applicants of This Type.

Washington.-The rule of the post office department that "no grass widows need apply" was adhered to by the examiners of the civil service commission in examining applicants for new rule, but it is being enforced more strictly now than ever before.

regulation for several years that barred from its civil service roll married womarried, but divorced women are not and therefore are eligible.

Recently the postoffice department and the civil service commission let up on the grass widows somewhat. Women who were separated from their husbands without fault of their own and were struggling for a living were admitted, but the drawing of the line between those who were grass widows for cause and those who were grass widows by no fault of their own became a bone of contention, and all grass widows were barred.

MAD DOG CALLS POLICE.

Upsets Telephone In Rampage and Central Does the Rest.

Danville, Ill. - A dog afflicted with rabies indirectly called the police department and thus brought about its own destruction. Before it was killed it overturned much of the furniture at the home of Louis Smith, its owner,

and badly scared the servant. In its rampage it upset a desk on which the telephone rested and as the receiver fell from the hook central asked for the number. The operator heard the howling of the dog and, believing that something was wrong, called the police department.

BABE TRAVELS IN BASKET.

Young Father Makes Long Journey With Motherless Child.

Eagle, Ariz.-With a clothes basket as a cradle for his month-old motherless babe R. E. Hiatt made the journey from Eagle to Sidney, Ia., to place the infant in the care of its grandmother. Mrs. Hiatt died just a month ago following the birth of twins, one of which died at birth.

A woman on the train volunteered to assist the young father, and the infant reached its destination safely.

Owns Wrong Land Twelve Years. McMinnville, Ore.—Twelve years ago Josef Henrich bought eight acres of school land from the state, located, paid taxes and improved the place. N W. Smith, who recently purchased thirteen acres from the state, discovered that Henrich had been living on his land and had paid taxes on another tract one mile south similar in description. In the twelve years Henrich had built a home on the Smith place, cleared some of the timber and cultivated the land. The Henrich tract in the meantime has not been touched,

SEEN BY TESLA

Thinks "World System" Will Allow Many to Talk at Once.

ENDS STATIC DISTURBANCE Inventor Also Hopes to Transmit Pic-

tures by Same Medium Which Carries the Voice-Declares It Will Be Possible to Hold Secret Conversation

New York.—Nikola Tesla announced that he had received a patent on an invention which would not only eliminate static interference, the present bugaboo of wireless telephony, but would enable thousands of persons to talk at once between wireless stations and make it possible for those talking to see one another by wireless, regardless of the distance separating them. He said also that with his wireless station now in the process of construction on Long Island he hoped to make New York one of the central exchanges in a world system of wireless telephony.

The inventor, who has won fame by his electrical inventions, dictated this that necessary to buy his clothes, which statement:

"The experts carrying out this brilliant experiment are naturally deserving of great credit for the skill they have shown in perfecting the devices These are of two kinds-first, those serving to control transmission, and second, those magnifying the received impulse. That the control of transmis

sion is perfect is plain to experts from the fact that the Arlington, Mare island and Pearl Harbor plants are all ineffective and that the distance of tele phonic communication is equal to that of telegraphic transmission. It is also perfectly apparent that the chief merit tion of the microphonic impulse. It Texas. must not be imagined that we deal here with new discoveries. The improvement simply concerns the control

of the transmitted and the magnification of the received impulse, but the wireless system is the same. This can never be changed. "It is claimed that static disturbance government positions. This is not a will fatally interfere with the trans here. Mrs. Ledbetter, a widow, brought mission, while as a matter of fact there is no static disturbance possible in designed transmi sion and re.

described in a patent circuits which are appeal to the circuit court. Eighteen men. Grass widows are considered absolutely immune to static and other interferences, so much so that when a telephone is attached there is absolute silence, even lightning in the immediate vicinity not producing a click of the diaphragm, while in the ordinary tele marketed at 50 cents each. phonic conversation there are all kinds

> "Another contention is that there can be no secrecy in wireless telephone conversation. I say it is absurd to raise this contention, when it is positively demonstrated by experiments that the earth is more suitable for transmission than any wire could ever be. A wireless telephone conversation can be made as secret as a thought. "I have myself erected a plant for

the purpose of connecting by wireless telephone the chief centers of the world, and from this plant as many as a hundred will be able to talk absolutely without interference and with absolute secrecy. The plant would simply dent, be connected with the telephone central exchange in New York city, and any subscriber will be able to talk to any other telephone subscriber in the world, and all this without any change in his apparatus. This plan has been called my 'world system.' By the same means I propose also to transmit pictures and project images, so that the subscriber will not only hear the voice, but see the person to whom he is talking. Pictures transmitted over wires is a perfectly simple art practiced today. Many inventors have labored on it, but the chief credit is due to Professor Korn of Munich.'

\$2,000 Awaits Lost Cat.

Chicago.-John H. Warder used to think a great deal of his pet angora cat, Boyse. In his will he provided that \$2,000 be set aside in a trust fund for the care of Boyse at a cat paradise in Massachusetts. The will has just been filed for probate, and Mrs. Warder, to whom the whole estate is left, was asked what she intended to do in regard to Boyse. "Goodness!" she exclaimed. "we gave Boyse away a year ago. I don't even know where he is now."

Makes Squirrels Work.

Clarkesville, Ga.-John D. Kesler, a popular barber of this city, is believed to be the first man to put squirrels to work. He has a pair in front of his shop, and they turn the usual barber's colored sign. The little animals keep the cylinder turning almost as continuously as a motor, and the irregularity of the movement attracts greater attention.

TEXAS COWPUNCHER DIES WORTH MILLION

As Boy Asked For Cattle In Lieu of Pay.

El Paso, Tex.-Wert Love, who has died at Warfa, started as a cowboy without even a horse that he could call his own and became millionaire owner of vast herds and a ranch that was a domain in itself.

A resident of West Texas since 1885, Wert Love was known to every cowman from Fort Worth to El Paso. He had his peculiar characteristics, and thrift was one of them. But while he was frugal, he never allowed a genuine case of distress to go unrelieved.

When other cowboys were drawing their wages in gold back in the eighties and riding to El Paso or San Antonio to spend the money in riotous living or over the gaming table, Wert Love was putting his earnings into cows. His start was seven cows. At his death he could not have counted all the cattle in his herd if he had ridden hard for a month at the task.

His first work after coming west was for Jim Powell, a cousin, near Fort Davis. He was a mere boy and received but \$25 a month and his board. He refused to take any money except were few, and asked to be paid in cows. In 1889 he had 150 head. After the start it seemed easy to those who watched Wert Love, but they knew he

was working hard all the time. He always picked the best cattle when he bought, and he always picked the best range for them. The result was that he lost few cattle by disease or drought. He watched the markets and sold right and invested the money again.

The result was that when he died 200 men were on his payroll and his estate was worth more than \$1,000,000. A son nine years old will get most of it of the application lies in the magnifica and will probably be the richest boy in

THREE GEESE-COSTS \$100.

Widow Wins Long Lawsuit, and Birds Sell For \$1.50.

Pocahontas, Ark.—A goose case has finally been disposed of in circuit court a replevin suit against a man named Starr for three geese that she claimed belonged to her. The trial in the jusceiving circuits. Quite recently I have tice of the peace's court resulted in the

witnesses were in attendance. Mrs. Ledbetter was awarded the geese. The total cost to the litigants amounted to more than \$100, besides the cost to the county. The geese were

WILSON AND CABINET PRAYED

Bishop Tells of Incident at White

House-Informed by Senator. Indianapolis.-How President Wilson went down on his knees and led his cabinet in prayer at a recent meeting was told here by Bishop William F. Anderson of Cincinnati at a session of the Indiana Methodist Episcopal conference. A United States senator told the bish-

op of the incident. The senator had

heard it from one of the cabinet members who had prayed with the presi-"When the president arrived at the cabinet meeting," said Bishop Ander-

son, "his face was solemn. It was evident that serious affairs of the nation were on his mind. He said to the cabinet members: "'I don't know whether you men be-

lieve in prayer or not. I do. Let us pray and ask the help of God.'

'And right there the president of the United States fell upon his knees, and the members of the cabinet did the same, and the president offered a prayer to God."

RATTLER'S FANGS MISS HIM.

Snake Strikes Negro's Overalls and Can't Get Loose.

Jefferson City, Mo .- A negro farm hand cutting corn felt several sharp tugs at his overalls and thought he had become caught in briars. Glancing over his shoulder, he saw a rattlesnake five feet long. Reaching around with his corn knife, he managed to sever the snake just back of the head.

The snake had buried its curved fangs, nearly an inch in length, in the slack of the negro's overalls and could not disengage them.

At Eighty-three Drives 400 Miles.

Glen Easton, W. Va.-George W. Grant, eighty-three years old, who drove 400 miles with a thirty-six-yearold horse from here to Wilmington, Del., has returned to this city by rail. It required sixty-one days to make the drive. Mr. Grant drove to Delaware to see his children, whom he had not seen in forty-six years.

HARP GETS SIX YEARS.

Leatherman Sentenced To Seven Years In Maryland Penitentiary.

Earl. Harp, convicted of Manslaughter for killing his stepfather, and Foster Leatherman, found guilty of an assault on Alice A. Wolfe, a child, were sentenced Tuesday morning to serve six and seven years respectively in the Maryland penitentiary.

The sentences were announced by Judge Glenn H. Worthington in the absence of Chief Judge Hammond Urner and Associate Judge Edward C. Peter. Judge Worthington said that the court had come to an agreement at Rockville on Monday.

The court plainly showed that it doubted the story of the murder of Charles V. Harp as told by the mother.

"Whether the shooting occurred the way your mother said or not, it is a serious crime," said Judge Worthing ton prior to announcing Harp's sentencing. "There is a question in the mind of the Court if it did occur that way. The offence is quite a serious one and no light penalty is proper. The sentence of the Court is that you be confined in the Maryland Penitentiary for the period of six years.'

Leatherman's crime was referred to as a particularly unfortunate one. "Children walking along the highways should not be molested in the manner in which the jury found you assaulted this little girl," said the court. Then Judge Worthington fixed Leatherman's term to 7 years in the Penitertiary.

S. E. S. Celebrates Columbus Day.

The pupils of St. Euphemia's parochial scoool rendered a most fitting programme in honor of Columbus Day on Monday afternoon at 2 o'clock in St. Euphemia's Hall, to a most interested

The entire entertainment was exceptionally well given by the pupils and they are to be congratulated upon their excellent work.

Following is the programme: Chorus, America" by School; Can you Guess? little Ones; Act 1, Columbus Gets Help From Spain; Instrumental Selection, M. Saffer; Act 2, The Discovery of Land; Chorus, "Hills and Vales," by School; Act 3, Columbus Returns after His First Voyage; Chorus, "Columbia," by School; Act 4, Columbus a Prisoner; Chorus, "Holy God," by School.

TO THE VOTERS OF EMMITSBURG DISTRICT.

In my campaign for County Treasurer four years ago I appealed directly to the people and promised them, if elected, I would devote my entire time to the office, keep the office open during the noon hour, visit the distant districts with the tax books, allow the taxpayers to pay their taxes at their local banks and distribute the County funds equitably among the County banks. These pre-election promises I have constantly kept in mind and tried to strictly fulfill.

Now I have been nominated for Clerk of the Circuit Court and I want to tell you just what you can expect me to do and why I believe it would be to your interest to elect me. A Clerk of the Court who has the qualifications and the disposition can be very useful and of great help to the people. My greatest pleasure is to make friends and to do a favor for someone else whenever I can. To be frank my ambition and purpose is to give the people of Frederick County one of the best and most accommodating administrations they have had in the Clerk's Office.

I am personally acquainted with practically every taxpayer in the County. I know most of the people who will have business with the Clerk's Office and I believe it will be some satisfaction to you to feel that you know the Clerk with whom you will transact your

I have had good training and experience for this work, having graduated from the Frederick High School, Washington and Lee University and the Law School of the University of Maryland. I also spent one year working in the several Baltimore City courts in the employ of the Title, Guarantee & Trust Co. I have since had ten years practical experience and am familiar with the records in the Clerk's Office.

I feel I owe my nomination to the people, and if elected, I am free from any political restraints or influences to serve the best interests of all the people of Frederick. County, regardless of political affiliations.

I will select the best and most compe tent ment obtainable for deputies, realizing the importance of capable assistants to any administration. In appointing these deputies I will give due consideration to all twenty-six districts and not select all of them from Frederick City as is now the case under the present administration.

I will be Clerk in fact as well as in name, performing the duties of the office as well as drawing the salary.

I hope you will encourage me with your support and influence in the election on Tuesday, November 2nd, and I will give you in return a progressive, economical, up-to-date, accommodating business administration. I wish to thank the people of Emmitsburg District for their splendid and much appreciated vote in the recent Primary Election. I will try to please you and merit your continued confidence.

Respectfully, FREDERICK W. CRAMER. Gettysburg, Pa. Gettysburg, Pa. Gettysburg, Pa.

GOODS DEPARTMENT STORE

These October days are the days of fruitfulness of well laid plans. The results being a store stocked as never before---with merchandise that is in every instance the best of its kind--- and with more coming in every day.---They are also days of joy to us not alone in the fullness and completeness of this great stock but of the eager demands and the pleasure of serving that this stock offers.

Take Suits and Coats

In which we show exceptional assortments this Fall—The store that sells Wooltex, measures all its Ready-To-Wear lines by the Wooltex Standard, for instance Suits at

\$9.75, \$12.00 and \$15.00 or Coats at \$5.00, \$7.50 or \$10.00

must be as carefully made, as stylishly cut as to lines &c., as the best of Wooltex or it cannot pass into our stock. Fabrics for suits are

Broad Cloths, Poplins, Serges, Gabardines, Mixtures, &c., for Coats are every kind of Mixtures--Plain and Fancy weaves in solid colors and Pile Fabrics.

Plush, Velours, Corduroys and Other Pile Fabrics resembling Fur,

will show increased use this season, because Fashion so decreed. They are very rich, most durable and very warm. We are showing a wonderful assortment in the different fur fabrics and the unusual demand has made duplicating orders very difficult besides adding considerable to the price. - So let us advise early purchase, if you had thought of this kind of a coat.

Coats For The Miss or Small Woman

for all purposes, of Cord U Roys in all Colors and mixtures, Plush Broadtail and Pony Skin Fur Cloth, Fancy Mixtures in such variety of cut, grades, &c., as to suit all fancies and your ideas of cost. In many instances at less than you'd expect.

IUNIOR COATS

For girls with shoe top skirts.

The Junior Size Coats

fill in a want for the growing girl who needs a coat longer than those that come in Children's sizes 12 and 14 and yet not so long and mature as those that come under the Misses' sizes 14 to 18. We are showing such a splendid assortment that we have a coat for every Miss in just the style that will be most becoming and in the fabric that she will like best.

Up-To-Date Coats for Girls 6 to 14 Years

Fabrics and prices acceptable and styles such as make them of special interest to the young Miss who likes more than mere warmth in

COATS for CHILDREN

FREDERICK COUNTY.

Frederick is next to the largest of the counties of Maryland. In population and wealth it ranks next to Baltimore county. In the fertil-ity and productiveness of its lands it ranks among the first in the Unit ranks among the first in the Union, and especially in the production of wheat. The area of this great county is 633 square miles. The great body of the people are of German, English and Scotch-Irish descent, the progeny mostly of the early settlers. The land is mostly of fine limestone quality, and the of fine limestone quality, and th greater part of the county is a valley of rolling lands lying between the Linganore Hills and the Catoctin Mountain. This splendid valley is drained by the Monocacy river, and is one of the best farmed and most highly improved and productive areas of the Union. The great crops are wheat and corn.—Mary-land Manual issued by Board of Public Works.

EMMITSBURG.

In all Western Maryland-the beauty spot and the garden spot of the State-there is no town more attractive than Emmitsburg.

No people are more wide-awake, more knowable, more courteous to strangers than Emmitsburgians.

The location of Emmitsburg is ideal; the surrounding scenery is unmatchable; the climate is notedly healthful: its water-pure mountain spring water-cannot be surpassed. It is within easy access of Baltimore, Hagerstown, Frederick; eight miles from the National Battlefield at Gettysburg, near to the Mountain Resorts, and is surrounded by fertile farms and productive orchards.

Mount Saint Mary's College and Ecclesiastical Seminary-with an enviable reputation extending over 106 years-is located here; St. Joseph's College and Academy for young ladies-equally as noted during its 105 years of splendid acheivement-is also here.

There are excellent Schools-Public and Parochial-in Emmitsburg; two sound Banks, five Churches, a live Newspaper, modern Hotel accommodations, adequate Fire Department, progressive merchants, splendid physicians, good liveries, auto garages, many fraternal organizations, good railroad accommodations. There are four or five mails a day, telegraph, express and telephone service connecting all points; electric light and power, oiled streets.

There is business to be had in Emmitsburg; there are Factory Sites availabe. If you contemplate changing your place of residence-come to Emmitsburg, Frederick County, Md.

COUNTY FAIRS.

County fairs have ever been popular and their educational

ment, but the keen interest dis- sesses. The same rule naturally played by the solid farming ele- applies to every state, and in this ment of our communities in all particular Maryland is rapidly that bears upon or is in any way pushing to the front. The inconnected with agriculture. There crease in Maryland's treasury, seems practically to be no limit due to automobile licenses, the to the fine, the interesting, the increase in business due to the instructive displays of farm pro- sale of new machines and accesducts nor to the showing of field, sories and the money brought machinery made by the most im- visiting motorists-all this is to portant manufacturers in the be credited to good roads of which country. The modern fair-like Maryland cannot have too many. that held under the auspices of the Frederick County Agricultural Society, for instance—is a miniature university, with lecture features, scientific demonstrations by experts and the free distribution of literature bearing upon every phase of rural life. fourteen page form last Friday. Really does it seem that not one feature whereby the farmer and his family may profit-from the cattle and poultry exhibits to fruit and needlework, from laborsaving devices to luxuries-is overlooked. There is something worth while for even the retired farmer and for the youngest child in the household; the women's sphere is catered to, and for the active soil tiller there is an abundance of practical knowledge to be gained-all in one enclosure, all free. To attend a modern fair is to be instructed; to seek enof our people.

AFTER THE WAR IS OVER.

After the war is over there'll be ruin and wreck galore, but the mation of many lawyers, is one fields now bare will be once more that is durable enough to last fair—enriched by dead men's several years. gore. There'll be widows and orphans a plenty, and a dearth of inscribed tombstones; but in every ditch the ground will be rich from crumbling dead men's bones. There'll be taxes and pensions and hardships and long will continue the grind; but the soil will be bedded with shells that beheaded and mowed down humankind. There'll be hardships that thousands will suffer for ages and ages to roll; but the grass will be clodded with sword points that prodded the life spark from many a soul. Down in the earth they will find it-all nothingness, side by side—the dust of the gold and of lives that were sold for the sake of fanatical

THE NATIONAL GAME.

Attendance at the games, the unusual amount of newspaper space given over to special and highly paid sport writers and the genuine enthusiasm displayed in the World's Series by old and young and in all parts of the country-this goes to show that in very truth baseball is still the "national game" and that considerably more than fifty per cent. of the people are "fans." That the game is clean and that "commercialism" has been minimized within the last few years is evident. There has been no suggestion of "throwing the game" or of prolonging the series. The schedule has been fairly played, the arbiters have been impartial, the large amount of money spent the birds is, indeed, in the country one for admission to the parks has been cheerfully paid, and surface indications prove that the best team has won.

A BIG ASSET.

The finished State roads of New value has more than kept pace York would, if extended in a with the attendance. The high single line, reach from New York character and the number of ex- City to San Francisco. It is conhibits at nearby fairs in recent ceded that New York's completed years shows not only the wise highways constitute the greatest where there is gold."

Sox populi!

A Short Lived Island. In 1867 a new shoal was discovered in the group of the Tonga or Friendly islands. In 1877 smoke was seen over the shoal. In 1885 the shoal had become a volcanic island more than two miles long and 240 feet high, and a fierce eruption was taking place with in it. In 1886 the island had begun to shrink in dimensions. In 1889 its height had diminished one-half, and the ocean close around it was more than a mile deep. In 1892 the island rose only about twenty-six feet above sea level, and in 1898, under the action of the waves, its complete disappearance was reported.

"In what way?" "He always manages to take the sting out of his unfavorable com-

"For instance?" "His bride made him a shortcake the other day, and when she asked him how he liked it he replied, 'It isn't as good as your mother used to make." "-Detroit Free Press.

Birds and Lightning.

Birds are sometimes struck by lightning. Darwin records the case of a wild duck that he saw struck by a bolt while flying. It was killed instantly and fell to the ground. But birds seem to know instinctively that lightning is to be feared. That perhaps is why they seek shelter in thunderstorms. The sudden disappearance of of the surest signs of an approaching

Italics.

Italics are letters formed after the Roman model, but sloping toward the right, used to emphasize words or sentences. They were first used about 1500 A. D. by Manutius, a Venetian printer, who dedicated them to the Italian states; hence the name.

Gold In the Bible. The earliest book which mention gold is the Bible. In the second chapter of Genesis, eleventh verse, occur Faire-What's that got to do with it?the words, "the whole land of Havilah. St. Louis Post-Dispatch.

An Artist's Criticism.

Falguiere, the sculptor, told a capital story of Henner, the great artist, who although he lived in Paris all his life, never lost his Alsatian peasant accent or his country manners. But Henner was a very keen critic and had a clever way of showing his dislike of wordy enthusiasm. Falguiere whose talent as a sculptor is known all the world over, was very fond of paint ing, but he did not paint particularly well. One day Henner was in his studio, and Falguire showed him some of his pictures

"What do you think of this one? asked Falguiere.

"Superb!" said Henner, with his A) sation accent. "Marfelous!"

"And this one?" "Broditchous!"

"And this one?"

"Suplime!"

Then the old man picked up a little bust which his friend had just finished: "Ah!" he said. "Now, dat's good!" "I never painted after that," said

Wellington's Coolness.

The Duke of Wellington was one day sitting at his library table when the door opened and without any announcement in stalked a figure of sin-

"Who are you?" asked the duke in his short and dry manner, looking up without the slightest change of countenance upon the intruder.

"I am Apollyon. I am sent here to kill you."

"Kill me? Very odd." "I am Apollyon and must put you to

"'Bliged to do it today?"

"I am not told the day or the hour. but I must do my mission.

"Very inconvenient; very busy; great many letters to write. Call again or write me word. I'll be ready for you.' The duke then went on with his correspondence. The maniac, appalled probably by the stern, immovable old gentleman, backed out of the room and in half an hour was in an asylum.

Story of a Bunch of Keys.

After Mary, queen of Scots, had suc ceeded in effecting her escape from the grim old fortress of Lochleven her de liverer, William Douglas, threw the keys which had brought her her free dom into the waters of the lake. There they lay till the parching summer of 1805, when a boy named William Honeyman, while strolling on its banks, picked up a bunch of five keys of antique workmanship fastened by an iron ring. These the boy carried to the parish schoolmaster, who for warded them to the Earl of Morton hereditary keeper of Lochleven castle near Edinburgh, where they still re main. They are without doubt the old keys which William Douglas threw into the loch on the eventful night when the queen escaped, only to be taken again and consigned to life long

Trick of the Lemon Growers. By an interesting yet simple method two crops of lemons are obtained in Sicily during the year, though the second is in every way inferior. The abnormal fruit is known as the Verdelli lemon and is marketed during the summer months. The Verdelli lemon, green in color, grows contemporaneousor yellow lemon of commerce and is obtained by the following method: The lemon tree, which flowers in April, is kept without water from that period until July, when the roots are heavily flooded for a time. This results in a second set of blossoms, from which will come the Verdelli lemons. The ordinary lemon crop is picked in the months beginning with October, but the Verdelli lemons do not mature until the next May .- Argonaut.

How He "Looked."

Two young men were standing in a hotel where they had gone to use the free comb and the free brush. One of them seemed to think he looked rather nifty. He had on a new suit of clothes and he turned and twisted as he admired himself in the glass. Finally he could not resist the temptation to hear the spoken word of commenda-

"How do you think I look?" he asked his companion.

The other looked at him and sniffed. "You look like an accident going out somewhere to happen," was his retort. -Indianapolis News.

Barcelona's Leather.

In the Barcelona district of Spain alone there are from 10,000 to 12,000 tanned and finished sheepskins pro duced daily and probably as many goatskins. The sheepskins in particlar find their way into the shoe trade as well as the goatskins. Both kinds. converted into morocco leather, the goatskin being the genuine article and the sheepskin the imitation, are used extensively in the bookbinding trade.

Big Bells.

The world's greatest bells include the king of bells, Moscow, weight, 443,732 pounds; St. Ivan's, Moscow, 127,830; Peking, 120,000; Vienna, 40,200; St Paul's, London, 38,470; "Big Ben," Westminster, 30,354; Montreal, 28,500. and St. Peter's, Rome, 18,600.

It Can Be Done.

Lester-Say, pa, what is diplomacy Pa-My son, diplomacy is the art of making people apologize to you after you have done them an injury.-Woman's Home Companion.

No Barrier.

Miss Playne-You can't marry Jack because I'm engaged to him. Miss

Georges Brandes, writing in Vanity Fair about August Strindberg, declares that the famous Swedish writer's belief in magic was deep rooted and cites the following conversation in proof. Strindberg once said to Brandes:

"You have an enemy. A newspaper enemy. I want to do something for you. Let me kill your enemy.'

"You're very kind. But I should pre-

"But no one would know about it." "So all criminals think. Besides, don't you feel it would be rather unjust to kill a man on account of an unkind newspaper article?"

"Well, let's not kill him. We'll simply blind him.'

"I still have my doubts. However, how would you go about it?"

"If you will give me the man's photograph I will, with my magic, blind him by driving a needle through his eves.

"In that case you could easily deprive me of my eyesight, too, if you wished? "Hardly. It must be done with ha-

tred." "Granted. But if a man who hates

me tears my picture into pieces will I fall to the ground in bleeding bits?" This remark seemed to put him out, and he did not answer me.

Where Pigs Climb Trees.

Presumably the walrus and the carpenter never did settle the discussion as to whether pigs had wings, and there are persons who seriously think it was a foolish theme for an argu-

And yet is it any stranger than the undisputed fact that in Morocco pigs climb trees in search of nuts-not only pigs, but goats too? The puzzle is not in the pigs and the goats, however. They are of the common variety that we see in the back lots in our own communities. It is the tree that is strange. It is called the argan nut tree and grows near Agadir. Usually it shoots out from a steep hillside. The trunk is broad and flat and almost horizontal, and so are the main branch es, forming ample and solid foothold for any animal which may be tempted by the olive shaped nuts growing with in easy reach of the main branches.-New York Sun.

Recovered Manuscripts.

The Magna Charta manuscript is not the only one that was found by acci dent. The "Diary of John Evelyn' was found by William Upcott among the waste paper in the lumber room at Wotton, while the tutor of the Marquis de Ronville when playing tennis found that the drum of his racket was formed of some parchment upon which was written a fragment of the lost "Second Decade" of Livy.

One of the oldest fragments of Anglo-Saxon poetry, "The Fight at Finnsburg," was found pasted inside the covers of a book of homilies in Lambeth library, and twelve volumes of the manuscript journal of the house of lords were found in the Walworth road in a cheesemonger's shop about to be used as wrapping paper for butter and

The curator of the New York zoo was praising the intelligence of mon-

"A Philadelphia man," he said, "was hurrying out Powelton avenue one afternoon when all of a sudden an organ grinder's little monkey dropped dead. The poor grinder's grief was pitiful. The Philadelphian, touched, gave him a half dollar and hastened away. An hour later, returning through Market street, he saw the same organ grinder, and just as he passed the monkey again dropped dead, and the grinder's grief was even more pitiful than before. The Philadelphian gave a loud laugh. The grinder, recognizing him, also laughed, but made no motion to return the half dollar."

Great Age of Halley's Comet.

While Halley's comet has been identified as a member of our system for over 2,000 years, certain characteristics of its orbit lead us to believe that it has been with us at least ten or a hundred times as long as that. According to all accounts, it was a magnificent object at the time of the Norman conquest in 1066. Its head was equal to the full moon in size. and its tail increased to a wonderful length.—Century.

Languid Larry's Luck.

Gentleman-What would you do with a nickel if I gave you one? Tramp (sarcastically)-Git a new rig, mister, an' some supper an' a night's lodgin an' breakfast an' dinner termorrow. Gentleman-My good fellow, take this quarter and support yourself for the rest of your life.—Boston Transcript.

Expensive Outlook. "My wife is named Hattie, and, by

jiminy, she wants a new hat every month. "Gosh! Prospects look bad for me."

Homing Instinct of Bees.

In the fortnightly Review Henri Fabre, the naturalist, tells a characteristic story about Darwin and himself. Darwin wished to explain the homing instinct of bees, and he induced Fabre to begin a series of experiments with that purpose in view. A regular plan of campaign was drawn up. Marked bees were placed in a dark box and were carried away from the hive in an opposite direction from that in which they were finally liberated. The box was repeatedly turned about, so that the inmates should lose all sense of direction. Every possible means was taken to render useless any known or conceivable method of ebtaining their bearings. The bees were even placed within an induction coil in the effort to confuse them. The long and elaborate series of tests was without value, so far as getting any explanation of the homing power was concerned. In every case from 30 to 40 per cent of the bees found their way home without apparent trouble, no matter how confusing the trip away from home had been made.

Plant Leaves.

It is a fact that, to the casual observer, all trees look pretty much the same, in some respects at least. But if one looks carefully at the twigs of almost any tree, or, still better, at the young shoots of some rapidly growing plant, they are pretty certain to discover that no two leaves occupy the same position.

The fact is, however, that a leaf does not keep always in one position. Everybody knows that they will droop and stand erect again, and that some plants sleep at certain times of the day. A house plant, moreover, grows toward the light, and if the pots are turned about so that the leaves face away from the window, it takes only a day or so for them to assume their old positions.

If now one looks carefully for the joints where this bending is done one can see at once that nearly all the leaves have two.—Exchange.

The Faithful Horse.

I don't know who wrote this teast to the horse, but I'd rather read it than Vest's dog speech:

"Here's to that bundle of sentient nerves, with the heart of a woman, the eye of a gazelle, the courage of a gladiator, the docility of a slave, the proud carriage of a king and the blind obedience of a soldier; the companion of the desert plain that turns the moist furrows in the spring in order that all the world may have abundant harvest. that furnishes the sport of kings, that with blazing eye and distended nostril fearlessly leads our greatest generals through carnage and renown, whose blood forms one of the ingredients that go to make the ink in which all history is written and who finally, in black trappings, pulls the humblest of us to the newly sodded threshold of eternity."-St. Louis Post-Dispatch.

Grit Always Wins. Grit is the thing that counts. We all know young men who are hanging around waiting for father to slip out of his old shoes. As if a pair of old shoes ever made a man out of a loafer! Why, father's shoes are ten sizes too big for any man that thinks money somebody else has earned will make

him a gentleman! Grit is what these young chaps need, whether they know it or not. The day will come when the only man the world will count worthy of its respect will be the man who does things, even if he is forced to shut his teeth hard to keep back the groan of pain.

Folks used to think that the only real soldier was the man who marched away to the sound of fife and drum, to shoot and kill and destroy. It is not so.—E. L. Vincent in Farm Life.

Bulls and Bears.

The Stock Exchange use of the term "bear" is with reference to the animals pulling down. The bear pulls down prices; so in the other direction the bull tosses them up. Originally the expression was "a bearskin jobber," applied to a person who sold a bearskin before he had caught his bear. The bearskin jobber was a person who sold stocks which he did not own. Of course he was interested by the fact of his sale to have prices come down and schemed to pull them down. In that way he became called simply a bear without reference to the original proverb.-Philadelphia Press.

Prevention of the Flight of Birds.

To prevent birds from flying without the barbarous and injurious system sometimes of cutting their wings it will be found sufficient to tie together with a thread three or four of the largest feathers of one wing. This destroys the balance, the wings do not act symmetrically in the air, and flight is rendered impossible. Fowls. pigeons, etc.. may be kept within bounds in this simple fashion.

Serious Affliction.

"Bliggins is always reading up on germs and worrying about his health." "Yes. There's not much hope for him. Germs are bad enough if you get 'em in your system, but they're worse if you get 'em on your mind."-Washington Star.

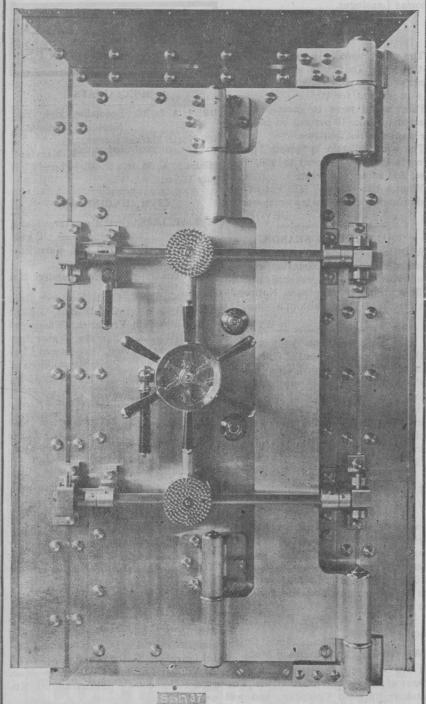

The Roc.

The roc, a fabulous bird often referred to in the "Arabian Nights," was believed to be of such enormous size and strength as to be able to carry even elephants in its talons.

Office and Home, An office is a place where women do what men want done. A home is a place where men do what women want

ANNAN, HORNER & CO.

BANKERS EMMITSBURG, MARYLAND

New Polished-Steel Burglar-Proof Vault Door.

The above illustration is from a photograph of our new Vault Door, recently installed by the York Safe and Lock Co., York, Pa.

The specifications of the door and new vault equipment

Six inch thick steel door which is absolutely drill proof, explosive proof and non-burnable. This door is locked by twenty-two (22) bolts, each 21-inch diameter, and the bolt work is checked by three movement Sargent and Greenleaf 72-hour time lock, also two bank four tumbler

The lining of the vault consists of 11 inch thick steel, built up of alternating layers of 5-ply Chrome steel and Bessemer, which is drill proof. The Safe Deposit Boxes are of the best construction, each box is fit-

ted with bronze case high grade safe deposit box lock, supplied with two renters' keys. These locks are master key locks, being necessary to use a guard or preparatory key to operate same. Each box is also supplied with tin bond box on the inside.

This vault is considered absolutely burglar-proof, and as an extra safeguard, is equipped with burglar-proof chest on the inside. The finish of the vault front is natural polished steel.

This equipment is the best security known to modern ingenuity.

ATTORNEY AND COUNSELOR AT LAW

WINTER OATS RECOMMENDED FOR MANY SECTIONS.

Invariably Outgrow Spring Oats and Often Thrive Better Than Wheat. NICHOLAS SCHMITZ,

Maryland Agricultural Experiment Station.

Oats require a comparatively dry and cool atmosphere for the best growth and development. The past season was comparatively cool and as a result spring oats made from fair to excellent crops in most all sections of the State. Such a season, however, in Southern Maryland and on the Eastern Shore can not be expected much oftener than once in seven or eight years. In these sections of the State the climate in an average season is too hot and muggy along about wheatharvesting time for the best development of oats or any of the cereals. It is obvious therefore that in these sections a type of oats that would succeed fairly well every season must be one maturing before the weather turns hot and muggy. Winter oats will mature much earlier than spring oats, some varieties being ready to harvest before wheat. And it is for this reason that they almost invariably outyield spring oats. The difficulty thus far with the growing of winter oats has been the lack of understanding on the part of the farmer as to the best types and when and how to sow them.

The difficulty of getting good seed has been another factor militating against the growing of this crop, farmers often getting more cheat than oats in the seed they buy, which has in many sections given the erroneous idea that oats will turn to cheat.

The best varieties for the Eastern Shore and Southern Maryland are Virginia Gray, also known as Turf, Virginia Turf and Winter Turf, and two varieties, distributed by the State Experiment Station, Culberson and "206" The Virginia Gray is commonly found on the market but Culberson and "206" can seldom be secured except through farmers who may be growing them. The Culberson and "206" mature 10 days or more before the Virginia Gray, and since early maturity is so important they usually outyield the Virginia Gray. On the other hand, the past season has demonstrated that the Virginia Gray is not quite as susceptible to winter-killing as the other two.

The kind of soil required and the place in the rotation should be the same as that for wheat. The fertilizer for winter oats is the same as for wheat, excepting that ordinarily it should be applied a little heavier, 3 to 4 hundred pounds per acre, and if sown on comparatively poor or sandy land the oats should be top dressed early in the spring, the last of March or the first of April, with 75 pounds of nitrate of soda and 150 pounds of acid rock

The time of seeding should ordinarily be about 2 weeks before the ideal time for beginning to seed wheat; in other words, they should be sown the last week in September or the first in October. The Virginia Gray, being a little later in maturing, is not so apt to joint in the fall as Culberson or the "206," and therefore may be sown much earlier; in fact, it may be sometimes sown the middle of September, but the Culberson and "206," if sown the middle of September, are almost certain to be killed. The rate of seeding should be from 11/2 bushels bushels per acre, and the best implement for this is the wheat drill: in fact, winter oats will often come through the winter without winter-killing when sown with the wheat drill, where they would winter-kill if broadcasted and worked in with a cultivator or harrow.

On a soil producing 8 to 10 barrels per acre of corn, there should be no difficulty in growing 35 to 50 bushels of winter oats per acre by properly fertilizing. As yet there are no varieties which are hardy enough to make the growing of winter oats fairly certain anywhere north and west of a line running from Washington through Baltimore to Elkton.

THE CONCRETE SILO WILL WITH-STAND FIRE.

Last August, D. G. Harry, of Pylesville, built a concrete silo 12x30 feet. In September, the silo was filled. About the middle of November, his barn, together with his hay and wheat was destroyed by fire. The concrete silo withstood the fire. The contents were not damaged, except in small amounts where the wooden doors were burned out. A stave silo which stood around the corner of the barn was destroyed. The column of silage can be seen standing to the right of the concrete silo. Fortunately, most of this

silage could be used. The advantage of having 28 feet of silage left wnen all other roughage, except stover, had been destroyed, can be appreciated only by those who have found it necessary for one reason or another to feed through the winter Will be in Emmitsburg Tuesday of each week from 9 A. M. to 4 P. M. Office at Public Library Room. Frederick office telephones and the state of the s with a shortage of rough feed.-G. E iune 3-10-tf periment Station.

4,900 MILES BY WIRELESS TELEPHONE

Speech Flashed From Virginia to Honululu, on the Pacific Ocean.

American Telephone and Telegraph Co. Engineers, Working With Representatives Of United States Navy Accomplish Wonderful Feat.

Following close on the heels of the news of a 2,500-mile talk by wireless telephone, on September 29, came an announcement a few hours later which has set the public to thinking and the scientific world to rejoicing. The announcement contained the news that the human voice had been flashed by wireless telephone from Washington D. C., to Honolulu, in the Pacific Ocean, 4,600 miles away.

The human voice was transmitted by wireless telephone on September 29 from Arlington, Va., to the Mare Island Navy Yard, near San Francisco, California, a distance of about 2,500 miles, creating a new world's record in wireless telephony.

This remarkable feat was brought about by the engineers of the American Telephone and Telegraph Company working in conjunction with the officials of the United States Navy. The first message was sent by Theodore N. Vail, President of the Company, by wire to Arlington and from Arlington to Mare Island by wireless. This makes the demonstration still more wonderful. The message jumped from wire to wireless without a break. Seated in his office at 15 Dey street,

New York, Mr. Vail lifted the receiver of his telephone and spoke in an even tone of voice to John J. Carty, Chief Engineer of the American Telephone and Telegraph Company, who was at Mare Island.

"Hello, Carty. This is Mr. Vail." Almost instantly came back Mr. Carty's voice over the line.

"This is fine. This is wonderful." Owing to the fact that the equip-ment at Mare Island at present consists of a receiving station only, Mr. Carty's reply came across the continent by way of the trans-continental telephone line.

Listeners at the naval stations at San Diego, California, and Panama also caught Mr. Vail's words and their corroboration of the success of the experiment was wired later. Following Mr. Vail came Union N. Bethell, senior vice-president of the Company, John I. Waterbury, one of the directors, Bancroft Gherardi, engineer of plant, and each of them talked across the 2,500 miles of space-unbridged, save by the wireless flashes—and each of them was plainly heard on the other side of the continent, Ex-Senator Murray Crane was present at the time

For several months the engineers of The American Telephone and Tele-Company and the United States Navy have been quietly working on this new and startling wire-and-wireless idea and they were out in force to see it given a public try-out.

On the evening of the same day, Mr. Carty, to whom most of the credit be-longs, in the offices of the telephone company at San Francisco granted a trans-continental telephone interview to several newspaper men in New

"It is hard to say precisely," said Mr. Carty over the long line, "what will be the commercial value of the deelopment. The wireless telephone will never be relied upon to do the work of the wire. It will be chiefly useful in extending telephone communcation to out-of-the-way placesdeserts, great heights and on the sea."

Mr. Carty was asked over the wire by one of the reporters in New York if it would be possible to talk over a wire, then a gap of wireless, and then a wire at the other end.

'Oh, yes," he replied, "I might as

"Oh, yes," he replied, "I might as well have sat here in the San Francisco offices today and received the message by wire from Mare Island. You will, for instance, be able to call London from your New York office and be connected with your London correspondent, who will sit in his office at his regular wire there."

The same evening, Mr. Vail sent the following telegram to Secretary of the Navy Daniels:

"Personally, and as President of The American Telephone and Telegraph Company, I wish to express to you my thanks for the courtesy of the Navy Department in extending to us the privilege of connecting special wireless telephone apparatus to the Navy Department wireless telegraph towers. By means of this special apparatus we have today successfully carried on wireless telephone communication from the Atlantic to the Pacific Coast." munication from the Atlantic to the

Pacific Coast."

Secretary Daniels gave out a statement in which he stated that he was pleased to announce the successful outcome of the experiments and that the feat was successfully accomplished in the presence of officials and engineers of the telephone company and the electric company, a representative of the Signal Corps of the Army, and representatives of the Navy. He further stated that every official taking part was enthusiastic about the results.

The wireless call to Honolulu on the night of September 29 was made by John Mills, an electrical engineer, from the United States radio tower at

Arlington, Va.

Far away, out in the Pacific Ocean, at Pearl Island, near Honolulu, Hawaii, 4,600' miles in a straight line, was Lloyd Espenschied, an engineer of The American Telephone and Telegraph Company, waiting with received. graph Company, waiting with receivers at his ears for the message.

A cablegram from Honolulu arrived

at the company's offices in New York the next day announcing that Espen-schied had heard Mills counting: "One, two, three, four!" and then from one to seven, and from one to nine. These were the exact figures Mills had spoken.

spoken.
When Mr. Vail and other officials of the Company received the glad tid-ings they pointed out that in the near future wireless telephone conversation may be expected with Paris, London, Berlin and other European cities.

The distance covered by the message to Honolulu is as great as the distance to any of these cities, but owing to the unsettled conditions on the other side on account of the war, experiments will not be tried at present in Europe.

Baltimore's Best Store is Your Store--Thanks to the Parcel Post System

Have you ever wished that you could enjoy the shopping advantages that are enjoyed by the women of the large cities?

The Parcel Post System has made this possible--it places you on precisely the same footing as if you lived in Baltimore.

You can shop by mail at Baltimore's Best Store, and your purchases will be delivered to you by Parcel Post, without a cent of additional expense. This applies to purchases of any amount from 1c to \$5.00, and within the limits of the First and Second Zones. Purchases of \$5.00 or over will be sent by Parcel Post anywhere within the United States.

We will gladly furnish information about any merchandise which you wish to buy. Write us and be sure to pay the store a visit when you come to Baltimore.

Hochschild, Kohn & Co., Baltimore, Md.

The four designs of Cortright Metal Shingles as shown above are made in any of the following ways:

1. Stamped from Tin-plate and painted Red.

Stamped from Tin-plate and painted Green.
Stamped from Tin-plate and Galvanized by a hand-dipping process. 4. Stamped from special tight-coated Galvanized Sheets.

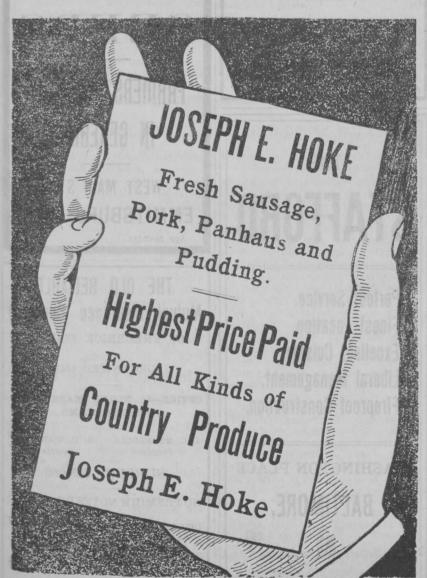

Each and every genuine Cortright Metal Shingle is embossed with this Trade-mark, "Cortright Reg. U. S. Pat. Off."

investigation and progress was indeed the work. slow until Experiment Stations were established as well.

that the money being spent by Govern. salaries of the County Agents. Counaccomplishing wonderful results.

The Experiment Stations have worked out and made available a world of information. The government has exveloping scientific knowledge relating to agriculture. These Stations have gained enough agricultural information if it were applied to double our farm yield and triple the farmers income.

During the past twenty-five years the Experiment Stations have offered the farmers the results of years of research in published bulletins, but the great mass of the farmers have remained practically unchanged. The most progressive of our farmers have profited by these bulletins, but the majority of our farm population has seldom been touched by modern methods. The men in the field making the crop have gotten very little real benefit from the Experiment Station.

the nation were forced to the conclusion ing in many other crops, such as cotfrom actual experience, that the inforton, alfalfa, potatoes, also poultry, pigs mation obtained by Experiment Sta- and baby beef. The Girls' Club Work tions could not be delivered to the great was started in 1910. Agent, and the Agents appointed after This money is allotted annually to him, cooperated with the Experiment each State in the proportion which the Stations, the Agricultural Colleges, U. rural population of each state bears to S. Department of Agriculture, Farmers' the total rural population of all the Clubs and othe Farmers' Organizations states. The act provides that no payto re-adjust agriculture and rural life on ment shall be made in any year to any a higher plane of profit by taking the state until an equal sum has been apaccumulated information to the men be- propriated for the work for that year

Thirteen counties in this state have As the work grew in magnitude it made the necessary appropriations to also broadened in scope. Its aim was assist in paying the salaries of County not as many still seem to think, just Agents. Twelve well qualified men simply to show farmers how to grow have been appointed and are now showbetter crops. Increased production was ing, as well as telling, the farmers how sought only as a necessary means of to increase their earning capacity and improving general rural conditions. Dr. thereby enable them to build magnificent homes and properly equip their

These County Agents realize the fact that the average farmer is a natural (3) To broaden and enrich rural life. doubter and dearly loves to be shown

cate from the top, but the County of "Souvenir Views of Emmitsburg" Agents in this State, and in other States, are guiding the hards as it were of the been reduced one half. are guiding the hands as it were, of the average farmer while he learns to write the new and magical letters of science the great mass of farmers how to keep records of milk cows and get rid of the unprofitable ones. They are showing the farmers how to prune, spray and otherwise care for orchards and so on. They are showing the farmers bow to inoculate hogs against hog cholera and save hundreds of thousands of dollars to the state.

It is often stated that the average farmer is hard to reach and impress. Since 1904 County Agents have found this to be a big mistake. They have have found the farmer is hard to reach and impress. Since 1904 County Agents have found this to be a big mistake. They have have found the farmer is hard to reach and impress. Since 1904 County Agents have found the farmer is hard to reach and impress. Why not become one of our customers? It will pay you. found that the great mass of farmers are the most tractable of people if you have anything substantial to offer. They have found that the farmers do not take kindly to pure theory, and that no class aug 23-1yr can more quickly discriminate between money making farmers and bookish farmers than the men who till the soil.

The twelve County Agents in this State are getting wonderful results. Within the next year or two we will have an efficient County Agent in every County in the State. Each Agent will begin at the bottom to teach the best methods of securing the largest yield of crops with the greatest economy. Thus we will soon have prosperity throughin the general prosperity and intelligence of all the people.
