Have been built and actually delivered to retail buyers

Have been built and actually delivered to retail buyers since August 1, 1916.
These figures—320.817—represent the actual number of cars manufactured by us since August 1st, 1916, and delivered by our agents to retail buyers.

This unusual fall and winter demand for Ford cars makes it necessary for us to confine the distribution of cars only to those agents who have orders for immediate delivery to retail customers, rather than to permit any agent to stock cars in anticipation of later spring sales.

We are issuing this notice to intending buyers that they may protect themselves against delay or disappointment

may protect themselves against delay or disappointment in securing Ford cars. If, therefore you are planning to purchase a Ford car, we advise you to place your order

and take delivery now. Immediate orders will have prompt attention. Delay in buying at this time may cause you to wait sev-

eral months. Enter your order today for immediate delivery with our authorized Ford agent listed below and don't be disap-

pointed later on.

Prices: Runabout \$345, Touring Car \$360, Couplet \$505 Ford Motor Company **Emmitsburg Motor Car Company**

Attention Is Called To Our

VAULT

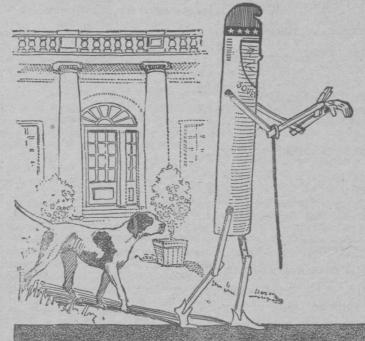

It is built from the ground up, of re-inforced Concrete and Steel, and completely isolated, top, sides and bottom. Built for strength and security, and protection from fire disaster. In it are located our SAFE DEPOSIT BOXES, which rent as low as \$1.00 a year.

Safeguard Your Valuables

No one supposes for a moment that the ordinary house is proof against the up-to-date cracksman or a destructive fire. The safe deposit box supplies the sure protection. And the cost is small.

FREDERICK COUNTY.

Frederick is next to the largest the counties of Maryland. In pulation and wealth it ranks next to Baltimore county. In the fertilto Baltimore county. In the fertility and productiveness of its lands it ranks among the first in the Union, and especially in the production of wheat. The area of this great county is 633 square miles. The great body of the people are of German, English and Scotch-Irish descent, the progeny mostly of the descent, the progeny mostly of the early settlers. The land is mostly of fine limestone quality, and the greater part of the county is a valley of rolling lands lying between Linganore Hills and the Catoctin Mountain. This splendid valley is drained by the Monocacy river, and is one of the best farmed and most highly improved and productive areas of the Union. The great crops are wheat and corn.—Mary-land Manual issued by Board of Public Works.

EMMITSBURG.

In all Western Maryland-the beauty spot and the garden spot of the State-there is no town more attractive than Emmitsburg.

No people are more wide-awake. more knowable, more courteous to strangers than Emmitsburgians.

The location of Emmitsburg is ideal; the surrounding scenery is unmatchable; the climate is notedly healthful; its water-pure mountain spring water-cannot be surpassed. It is within easy access of Baltimore, Hagerstown, Frederick; eight miles from the National Battlefield at Gettysburg, near to the Mountain Resorts, and is surrounded by fertile farms and productive orchards.

Mount Saint Mary's College and Ecclesiastical Seminary-with an enviable reputation extending over 108 years-is located here; St. Joseph's College and Academy for young ladies-equally as noted during its 107 years of splendid acheivement-is also here.

There are excellent Schools-Public and Parochial-in Emmitsburg; two sound Banks, five Churches, a live Newspaper, modern Hotel accommodations, adequate Fire Department, progressive merchants, splendid physicians, good liveries, auto garages, many fraternal organizations, good railroad accommodations. There are four or five mails a day, telegraph, express and telephone service connecting all points; electric light and power, oiled streets.

There is business to be had in Emmitsburg; there are Factory Sites availabe. If you contemplate changing your place of residence-come to Emmitsburg, Frederick County,

SUPPORT THE GOVERNMENT.

To stand behind the President and uphold him at this juncture is the call of true patriotism. "Bryan's idea of 'getting' behim from the rear," says the Philadelphia North American. Goethe at Weimar, toiling to the last, Also it is the idea of otherspartisans, mostly.

The President has done everything in his power to avert war; enough, one would think, to satisfy even the most rabid pacifist, but not enough to gratify the jingoes, so it would appear, and there has been a division of sentiment as to these factions.

But the majority of the people, the preponderence of press opinion, the sentiment of the brave but patient—these favor that brand of patriotism defined by "love and devotion to one's country" and the "support and defense of its existence."

Truly, as the Boston Transcript says, "The time has arrived when support should be given the Government, not merely by tacit acquiescence in the steps already taken, but affirmatively through resolutions and other public declarations, by letter and in every permissable form of expression."

ENDS.

What is the matter with American men and women that so few, comparatively, attain a ripe, old age? One who has just turned the twenties at times presents a sad picture of infirmity, fagged out mentally and physically. The

contrasts to those youths of whom ment, but at best it leaves a bitter we read in the pages of ancient after taste. history? Those of the olden time lived sober, well-ordered, regular In His Head."-We've heard of lives. Rigid military training, white mice and bats and wheels ing luxuries, produced a sturdy gent takes the palm. Next we'll race; while gymnastics were hear of a set of Queen's ware in tempered with esthetic, mental some gink's scrambled brains. and moral development. Each power of body, each faculty of mind was cultivated, and the well-rounded man was the result.

In American life is it that energy, power to achieve, is squandered by the enormous waste due to the sensational fads or strenuous amusements that leave your thirst behind when prevail?

The laws of nature cannot be violated without injury, sooner will be as dry as punk on the 5th. or later, to the offender. Comnating with daily inactivity, lack |-but no, that's impossible. of fresh air exercises, irregularity of life, excessive indulgence in rich foods have played havoc fruit fear the erstwhile opprobius with the physical constitution. Excitement, feverish rush, intense nervous strain accentuate the evils that prey upon the mind. Youth requires regular life, hearty exercise, plenty of open air indulgence and balanced diet. Neglect these essentials and the protest of outraged nature is not only meatless but eatless

The trouble with the American is he would live too fast; impa- Taking down the stovepipes is tient of nature's cautious ways, he would rather live an intensive life than await natural development. Americans forget that the zenith of achievement is sometimes reached between the ages of sixty and eighty years. As Longfellow says:

HIS LOVE FOR HIS DEAD.

He Made It a Power to Gladden Some of the Needy Living. A little old man came into the office

of the Chicago Charities the other day and laid down \$150, "to help out some needy families." Then he told them a

"Years ago, when all of my folks were living, I couldn't afford to give presents. Things are different now, but most of my folks have gone. went shopping, just as if my folks were alive. I picked out a shawl for an aunt of mine. She's dead and so I didn't buy it, but I put down the amount of money I would have spent Then I went and got some things for my dead brother and for my father and mother and for a few old friends of mine. I didn't really get them, you know, but I priced the things I thought they would like. When I added up all the money I would have spent it came to almost \$150, so I added a little to it. and here it is.

Has any one heard of a finer, more beautiful way of showing a man's love for his dead? The things he had wanted to do it was too late to do now He might, it is true, have spent money on stone to make more artificial and melancholy the quiet hillside where 'his folks" rest. He found a better way to spend his affection, to remember in fancy those he could no longer reach and then to see that his loving memory of them went to make others happier. He made his love for his dead a power to gladden the living He laid tribute on grief and made it a blessing. It is not a sad story. We need not pity him. But we cannot help loving him.-Milwaukee Journal.

SHELL SHOCK IN BATTLE.

A Curious Fact That Only Unwounded Men Suffer From It.

By the methods of modern war no inconsiderable proportion of battlefield casualties are due to shell shock-a new terror of battle and one that was unknown before the advent of later lay high explosives.

It is a curious fact that only unwounded men suffer from shell shock. Eminent surgeons say that a wound neutralizes the psychic sense-in plain English that nerves do not affect a wounded man in the same way as an inwounded one

For shell shock is nothing more or less than a nervous breakdown-a terribly intensive breakdown that physicians find most difficult to cure. It is entirely a mental cause, and though it is called shell shock it has very little to do with shells.

There are men, brave men, too, who find the strain of war too great for their mental stamina. They see terrible sights and hear terrible things, and these react upon them temperamentally and physically. Gradually, perhaps un consciously, their ability to resist is overborne. Their mental power is exhausted. They become afraid-dreadfully, terribly afraid—and the end is only a matter of time.

A certain cure has yet to be found though severe electrical treatment has had some effect.—London Answers.

Where the Laborer Is King. The day laborer, as opposed to the employer and to other workers, is king in Australia. The unions, through the labor party, practically control the exover enthusiastic about capital ecutive, legislative and judicial machinery of the cities, the states and the commonwealth. Forty-eight hours is the recognized maximum for a week's work, but in certain occupations forty-four, forty-two, forty, and even thirty-six hours are considered full time. Some of the larger building trades have a forty-four hour week and it is probable that this figure will become the recognized standard for all labor. Of the "four sacred eights" in the original slogan-"eight hours' work, eight hours' play, eight hours' rest and eight bob a day"—only the portion re-

Self reverence, self knowledge, self control, these three lead life to sovereign power.—Tennyson.

FOR WOMEN MOTORISTS.

Some Things a Good Driver Should and Should Not Do.

The good driver of a motorcar never applies brakes swiftly except in an When drawing up at a street side she cuts off ignition early and allows momentum to carry the car to the stopping place, using the service brake gradually. The good driver thus saves gasoline and wear upon brakes, coasting to a stop with the smoothness of operation of an easy

A good driver never uses the emergency brake, because she never has emergencies. She sees and avoids the emergency before it arrives. The poor driver rushes into touble and depends upon quickness in grabbing the emergency lever to save life. More than one accident has followed a futile at tempt to find the seldom used emergency lever in a hurry.

The good driver rounds sharp corners to the right and goes over extremely rough stretches of road or hits unexpected "thank you ma'ams" with clutch disengaged, to save the rear axle mechanism.

The good driver uses the wheel with the least possible motion. She does not drag it suddenly from side to side, but turns it so gradually that passengers are unconscious of the fact. In rounding a corner she commences to straighten the car up before it is halfway around. - Woman's Home Com-

RECORD COAL LOADING.

Uncle Sam's Plant at Cristobal Is the Fastest In the World.

The good work of the Cristobal coal loading plant at the isthmus of Panama is the subject of a report received at the war department from one of its boards, whose conclusions are that the plant fully meets the plans of the engineers and is probably the most efficient loading plant in the world. It was found that the minimum performance during the test was 1.950 tons an hour and the maximum 2,486 tons. The minimum occurred when one of the four diggers was temporarily out of commission, due to a defective bucket.

At 2,400 tons an hour the plant far exceeds the work of any other known plant for loading steamships or even of railroad leading plants. The canal collier Ulysses was loaded at the rate of 1,650 tons an hour, and 12,000 tons were put on her in eight hours. Merchant ships cannot be loaded at this rapid rate, as their hatches are too small and their bunkers are not arranged to admit of such work. This is a feature in shipbuilding that is being carefully taken care of nowadays in constructing ships that are to pass through the canal. All new United States naval colliers are so built that they can be loaded at high speed.

Garment Making In New York. The garment making industry in

New York, much before the public nowadays by reason of the efforts of the save New York committee to move its base from the retail shopping district in the Fifth avenue section, is really one of the biggest assets the city has. Some 16,000 factories are operated for tailoring, millinery, laun dering and other branches of work upon garments, employing more than 300,000 persons. Their output exceeds aiding materially in making New York the leading manufacturing center of this country, Chicago, Philadelphia, St. Louis, Boston and Cleveland following in the order named.

Join the Pay Up Crowd.

John D. Rockefeller often referred proudly to the fact that when he was making \$25 a month he made it a point to pay all his bills promptly. He also managed to save a little money that later became the foundation of his great fortune. When you pay your bills promptly you know just where you are at. Pay up is becoming a na tional slogan. Cities and states have inaugurated pay up days and pay up weeks. The man who pays his bills when they are due feels better for it. There is no doubt that he makes the man he owes feel better. Do your part in the pay up campaign. Pay now.

Pays His Men Each Day.

Contractors in central Pennsylvania have solved the problem of keeping labor on the job. The force of one contractor who began paying his men off every day instead of at the end of the week was so pleased with the arrangement that it stuck by him, and other contractors have adopted the same plan. According to reports, the plan has met with success wherever tried .-Engineering Record.

HORRORS OF WAR.

As They Were Depicted by a Minister In Cromwell's Time.

That war has horrors and is to be avoided like a pestilence is no new discovery. Modern war is probably worse than any that preceded it, but from the beginning thoughtful, observing mankind has protested against the suffering and wastefulness caused by battle.

Here, for instance, is Rev. William Hooke, a New Haven minister, who later became a chaplain to Oliver Cromwell, writing in 1640 about war. The death dealing instrument of that day might now seem almost harmless by comparison with the implements used in these advanced times, but the New Haven man was keenly alive to the saddening aspect of their use. "Warre," he writes, "is the conflict

of enemies enraged with bloody revenge. The instruments are clashing swords, rattling spears, skull dividing Halberds, murthering pieces and thundering Cannons, from whose mouths proceed the fire and smell and smoke and terror, death, as it were, of the very bottomless pit."

The preacher's description of battle has all the vigor of early pulpit rhetoric. "Here ride some dead men swaggering in their deepe saddles," he pictures; "there fall others alive upon their dead horses; death sends a message to those from the mouths of the muskets; these it talks to face to face and stabs them in the fifth rib."

War becomes more terrible as man's ingenuity brings forth new instruments of torture.—Cleveland Plain Dealer.

"DRINK STORM" VICTIMS.

New Study of Why Soma Men Go on Periodlo Debauches.

There has recently been organized in Hartford, Conn., a foundation for a new line of research work relating to the alcoholic question. This research will have for its object the explanation of "drink storms," which attack men who are not regular drinkers, but suddenly plunge into a debauch and use liquor to excess for a limited period. after which they resume their usual condition of temperate living.

This subject is treated by Dr. T. D. Crothers of Hartford, Conn., in the New York Medical Record. He says: 'What condition of body and mind furnishes the soil, plants the seed and favors the growth in inebriety and alcoholism is yet to be studied. What laws of growth, heredity, culture, surroundings, nutrition and mental impression favor the development of the drink evil are questions for the future.

"Why the degeneration from the use of alcohol is in one instance slow, concealed and breaking out only after a lifetime in various diseases; in another rapid, positive and most emphatic, and in a third concentrated on the brain and nervous system or on the organs of nutrition, and so on through a long list of questions as to why and how this or that particular phase of disease breaks out, are questions for future

study. "This is the new scientific field where exact study is called for, groupings of facts and studies of their meanings, to show the causes of alcohol addiction."

His Name Was "Ike."

I venture to assert that no one has the nerve to say that he ever hailed the late Wayne MacVeagh as "Ikey." But Ike he was in his boyhood.

His parents christened him Isaac Wayne MacVeagh, and his first law sign in West Chester read, "I. Wayne MacVeagh.'

But, like Thomas Woodrow Wilson and Stephen Grover Cleveland, he long ago amputated what annoyed him as a superfluous name-improved it, too, and made it sound far more distinguished.

Those of us who only knew the steel eyed, sharp tongued, witty, brilliant and eloquent MacVeagh, lawyer, statesman and politician, cannot possibly think of him as Ike. - Philadelphia Ledger.

Literature and Life.

The distinctive characteristic of literature is not extent, but quality of knowledge; not range, but vitality; not scope of activity, but depth of life. is, in a word, the process by which a man takes the world into his nature and is fed, sustained and enlarged by natural, simple, deep relations and fellowship with the whole order of things of which he is part.—Hamilton W. Ma

For a Postage Stamp, \$670. The highest price paid lately for a

postage stamp was \$670, a sum given at a New York auction the other day for a five cent Hawaiian missionary stamp of the issue of 1851. When the early missionaries went from New England to Hawaii they looked ahead to many things, but hardly to the sale of their postage stamps at prices higher than their salaries for a year.

Masons from Local Lodge Attend Banquet.

About one hundred and fifty Masons from the Frederick and visiting lodges attended the annual celebration of the birthday of George Washington last week in the Masonic Temple, Frederick, by Lynch Lodge, No. 163, A. F. and A. Masons. Several addresses bearing on the life of the prominent Mason, George Washington, were delivered and also a number of musical selections. These celebrations have been held for a number of years, and are always looked forward to with pleasure, and an enjoyable evening is spent. Delegations from neighboring lodges were present, there being delegates from the following lodges: Thurmont, Brunswick, Point of Rocks, Emmitsburg, New Market, Unionville, Taneytown and York, Pa. Following the meeting in the lodge room a banquet was served on the fourth for of the temple.

Are You Dealing in Goods That People Really Want? If So Why Don't You Tell Them About It?

The buying public is not composed of mind readers. People go where they are invited—where they know they will find what they need.

There is only one practical way of telling them about your goods—to ADVERTISE.

Advertising does not mean jumbling a lot of words together and "letting it go at that"-it does not mean calling attention to Winter goods in Summer or the reverse.

Advertising,—the kind that brings results-requires attention, it requires frequent change, truthfulness and regularity of insertion.

County Asked To Take Over Roads.

About one hundred residents of the vicinity of Woodsboro and Creagerstown, petitioned the County Commissioners this week to take over three turnpikes, embracing about sixteen miles of highway.

The highways are the Woodsboro and Creagerstown pike, four miles in length; the Woodsboro and Double Pipe Creek pike, five miles long and the Woodsboro and Frederick pike, the latter runand the plan is to have the county own from guard has been felt but the return the roads in order that the gates may be abandoned.

The county already owns two fifths of the stock in the Woodsboro and Creagerstown pike and three-fifths of the stock in the Woodsboro and Double Pipe Creek road. The remaining stockholders, it is understood, have offered to give their stock free of charge if the county will take over the highways. give up their stock to have the county lis, Miller 3. Referee Carney. take over and maintain that road. The stockholders of the latter road agreed to call a meeting at once to act upon this proposition and will immediately report back to the commissioners.

ACADEMY DOWN TO DEFEAT sent.

The Game Throughout Was Exceeding-

ly Close.—The Score Was 27-22.— Lineup.

On Washington's Birthday the Juniors of Mt. St. Mary's College, sent Gettysburg Academy down to defeat in a game of basketball, the score being 27-22. It was a close game all the way through to the whirlwind finish.

Miller scored first from the foul line and the Juniors held the lead by a slender margin until the close of the first half when the Academy caged two field goal, and to the lead of 9-7.

In the second half the work of the Juniors was much better. Led by Captain Costello they took the lead at the start and were never headed. Captain Cable made a great bid to even matters near the close of the game but with the score 22 to 20 the locals sprinted ahead | mals when Costello made his fifth goal of the period from a difficult angle and Miller followed with another and scored again on a free throw.

Besides the sterling performance of Costello and Miller, Fisher at center and Cain also contributed some clever ning from Woodsboro to Ceresville, work. Fisher is an important and effiabout seven miles in length. The three cient factor in all the Juniors team highways have six tollgates, two each, play. BREEDING DAIRY AND BEEF CATTLE

SHOULD BE KEPT SEPARATE TO SECURE GREATEST PROFITS.

PREVENT CROSS BREEDING

Pure Bred Animals Should Be Kept For Breeding Purposes and Not Be Vealed.

College Park, Feb. 22.-The importance of keeping the different types of grade and pure bred animals separate is set forth in an article recently issued to the breeders of dairy and beef cattle by S. S. Buckley, Animal Industry Extension Specialist. Among other things in this article, he says: "Breeding of dairy cattle and dairying, and breeding of beef cattle and feeding, represent two legitimate and distinct industries in Maryland. Each has its individual and circumscribed sphere, yet each is handicapped by a merging or fusion of the one with the other, The result is that neither industry represents the greatest degree of efficiency, nor returns the greatest amount of profits possible through a more distinct separation of the two.

"To this end there should be recognized by the breeders of each class of animals, the distinct and definite fields of the other.

"The practice of using animals of recognized beef characters for dairy purposes and the use of animals of dairy characters for beef production is detrimental to the breeders of each and to the industries which they repre-

"Breeders of each class should get together by separating their work. "Dairymen in their own interest, should never allow a grade, male dairy

bred calf to live longer than necessary to produce veal. "Breeders of dairy animals should never sacrifice to slaughter any promising or proven valuable pure bred bull, if there is any way in which

it can be disposed of for breeding dairy animals. "Breeders of beef animals, in their own interests, should never allow a grade, male beef bred calf to become mature unless castrated, nor should

they allow any such calf to be vealed, if possible to prevent it. "Breeders of both classes of cattle for their mutual interests and the industries which they represent, should discourage in every way possible the crossing of dairy and beef bred ani-

"The two industries are well defined, though closely related. Strict adherence to the legitimate spheres of each will benefit the breeders of both, and rapidly place the breeds in the positions where the energies of the breeders are striving to place them."

PREPARATION OF SEED BED.

College Park, Feb. 22.—Included in a series of articles recently written for the County Demonstration Agents, for use in connection with local Boys' Agricultural Clubs throughout the State, S. B. Shaw, Specialist in Horticultural Extension, treats the subject very thoroughly. He advocates frequent harrowings in the spring to preserve moisture and keep out weeds. Mr. Shaw says: "It is advisable to plow deeply at least several weeks before planting, preferably the fall be fore. The depth of plowing will, of course, depend upon the way in which the soil has previously been treated. While it is desirable to have as deep a seed bed as possible, it will not do to break up too much of the subsoil at one time. A safe rule to follow is to go about an inch deeper each time the land is plowed. In this way the depth of the seed bed will be increased without bringing too much of the subsoil to the surface at any one time.

"While potatoes do best in well drained soil, they require plenty of moisture for their full development. In addition to having the seed bed hoping for a switch to Joseph D. Ba- New York in reports that the Cunard deep, it should contain plenty of huker, of Frederick. One of the best ways to put plenty of this material in the seed bed is to select a piece of sod land the year before and after covering pretty thoroughly with stable manure, plow it in the fall to a depth that will bring up about an inch or two of the subsoil. In plowing do not turn the furrow completely over, but set it on its edge, with enough The first volume of The Maryland slant to cover all the sod and as much Almanac has made its appearance and of the manure as possible with soil After staying this way over winter the land may again be plowed in the ally say and hence the explanations re- vantages of a reference book of this harrow.
