EMMITSBURG CHRONICLE, EMMITSBURG, MARYLAND, FRIDAY, MAY 15, 1959

Weekend

Weather Forecast

Colder Friday and Saturday, then warmer by Monday. Spotty precipitation anticipated.

SINGLE COPY, 7c

## Most Anything At A Glance

BY ABIGAIL

A privilege that had been extended to a number of incorporated towns throughout the County was rescinded this week when it was decided by the County Roads Board that no more work on roads or streets would be permitted in the future. The Roads Board had previously saved small towns thousands of dollars by lending a helping hand and Emmitsburg has been one of the recipients of this proffered assistance. For a number of years the town's alleys have been repaired at little cost other than that of labor and material involved. There was no profit involved between the two parties and that's what made it so economical for both sides and that's just the straw that broke the camel's back, so to speak. Private companies quickly entered complaints that the setup was damaging to their business and naturally the Board had to yield to the pressure. So now, I'd venture to say, any future local projects will just about cost the town double.

While on the subject of roads, repairing, building and resurfacing, we note this week the State Roads Commission has announced a cut-back in the letting of bids for new road construction. Claims are being made that the cost of erecting the roads are rising so rapidly year after year that many of them might never become an actuality. As we all are aware, Maryland started on a 12-year building program about five years ago. A large portion of this program most undoubtedly will have to be side-tracked due to the constantly advancing costs of construction. No mention of specific projects was made in the announcement by the Commission and there naturally was no reference to the proposed by-pass of Emmitsburg, which was tentatively scheduled for next year.

Pressure being applied for guards for school children during school hours is a bit belated but naturally welcome and more effective than that of two years ago when I plugged for the same thing. At that time I urged local ladies' auxiliaries as well as the counterpart organizations, but the plea fell on deaf ears. Now the plan has been revived and it is hoped that some individuals or groups will consider doing their bit to the welfare and safety of our local school children. Neighboring cities have uniformed lady guards at most school crossings, and I feel that now is the time to make preparations to meet this situation for next year's school term.

The effort by the state to Keep Maryland Beautiful should be a cue to Emmitsburgians to do the same thing locally. The Town Council has designated clean-up days the end of the month and all trash will be hauled away free of charge. There are a number of eyesores about town which could be removed with little effort or expense on the part of the property-owner so now is the time folks to remove all these small blemishes and to put our fine little town into a state of A-1 readiness and cleanliness.

## Appreciates Paper's Assistance

Editor, Emmitsburg Chronicle:

Now that the current income tax filing period is behind us, your newspaper has been most helpful in bringing it to a successful end. I would like to take this opportunity to express my sincere thanks to all news services for the time and space they so generously allotted to this office, so that we could inform the tax-paying public about the services and information the Internal Revenue had at their disposal. I am confident if it had not been for the news outlet our job here at the Internal Revenue would have been more difficult. Again let me express my thanks for the cooperation and effort your office put forth in this enormous operation.

Sincerely yours,  
Irving Machiz  
District Director

In 1877 the first telephone line was installed in Baltimore from 47 Holiday Street to Highlandtown.

## Ralph Lindsey New President Of Lions Club

Ralph D. Lindsey became the 27th president of the Emmitsburg Lions Club Monday night when the annual election of officers was held. The meeting was held in Fitzgerald's Mason-Dixon Inn, President Charles F. Stouter presiding. The club was organized in November of 1929 and was sponsored by the Frederick Lions Club. J. Ward Kerrigan was the group's first president.

Other officers elected at Monday's meeting were: First vice president, Ralph F. Irelan; second vice president, William G. Morgan; third vice president, John J. Hollinger; secretary-treasurer, J. W. Strickhouser; Liohtamer, Joseph Fitzgerald; tailwister, Joseph W. Sullivan and director, Charles Stouter. Holdover directors are Paul W. Claypool and Cloyd W. Seiss.

Plans for the coming rodeo were discussed and publicity chairman Dr. D. L. Beegle, gave a report on the progress of promoting the show. A communication from the Glade Valley Lions Club was received inviting the local group to attend a chicken barbecue to be held in the Woodboro Fire Hall on May 24.

Paul Claypool reported on the installation of a water line from the telephone building to the Southouse, Playground and Little League Field. Lion Claypool represented the club on the installation and the group also made a financial contribution, along with a number of other organizations. A number of local business men and individuals also made donations to make the project possible. During the evening a biography of a member was given orally by a member and each meeting a member will be called to give a short biography of himself. Ralph D. Lindsey led off the series Monday night, giving a brief talk on his life and the operation of farmer cooperatives.

## Tour of Amish Land

On May 9, 23 members of the Ladies' Bible Class of Tom's Creek Methodist Church, made their annual trip. This year it was an Amish Tour. They visited the tulip gardens at Hershey, then went to "Roadside America, Pa.," the world's greatest indoor miniature village. They visited the "Our Lady of Lourdes" shrine and chapel at the village.

Then they drove through the Dutch country to Ephrata to see the Cloisters, founded in 1732 by Conrad Beissel and a group of German pietists, who established a protestant monastery known as the German Seventh Day Baptist, who sought to serve God in medieval fashion through lives of austere self-denial and pious simplicity.

Next they drove to Litz to visit a pretzel factory. Then they went to Landis Valley Museum where they saw items two hundred or more years old, from mouse traps to covered wagons. Then they moved to Lancaster for a Dutch dinner at the Brunswick Hotel, after which they drove about 15 miles to the Philadelphia road to see the really plain people. In truth, they are no plainer than we were some 50 years or less ago. This was the end of our tour and the trip home was completed with 250 miles covered. The trip was made via George Rosensteel's bus.

## Number Of Local Men To Graduate From Mount

Twenty-two Maryland residents will receive degrees from Mount Saint Mary's College, Emmitsburg, at the 151st annual commencement exercises on Wednesday, June 3. The commencement address will be delivered by J. Francis Reilly, prominent Washington, D. C. lawyer. The Rev. Thomas S. Barret, pastor of Our Lady of Fatima Church in Schenectady, New York, will deliver the Baccalaureate address on June 2. Both speakers will receive honorary LL.D. degrees from the college, as will Rt. Rev. Msgr. Francis A. Costello, Wilkes-Barre, Pa.; John V. Morgan, New York City, New York; and Thomas L. Golibart, Detroit, Michigan.

Among the Maryland graduates are: George M. Springer, R2 Emmitsburg, Magna cum laude, Bachelor of Science in Business Administration; Leo M. Boyle, Emmitsburg and John M. Breth, Taneytown, Bachelor of Science in Social Studies; Frederick D. Boni, and William D. Greco, Emmitsburg, and John F. Bailey, Thurmont, Bachelor of Science in Education.

## LOCAL COUPLE OBSERVES 50TH ANNIVERSARY

Mr. and Mrs. J. Clarence Sanders, N. Seton Ave., celebrated their 50th wedding anniversary Saturday. Open house at their home followed a solemn high mass at 10 a. m. in St. Joseph's Catholic Church.

The Rev. Fr. George Ryder, St. Louis, Mo., a first cousin of Mr. Sanders, celebrated the mass. The Rev. Joseph Ryder, Chester, Pa., a nephew of Mrs. Sanders, was deacon and the Rev. James Twomey, pastor of St. Joseph's Church, was sub-deacon. Altar boys were Terrence, Donald and Michael Byard and Joseph Eckenrode.

Among the visitors at their home Saturday were all but two of the Sanders' children. Those present were Mrs. Paul Freshman, Thurmont; Anthony O. Sanders, Essex; Allen Sanders, Bethesda; Mrs. Harold Ditzler, Biglerville; Mrs. James Brady, Jacksonville, N. C., and James Sanders, Silver Springs. Not present were Sister Patricia of the Sisters of Charity, Jacksonville, Fla., and SP/2 Harold Sanders, Germany.

In addition to their eight children the couple have 16 grandchildren and four great-grandchildren.

These brothers and sisters of Mrs. Sanders were also present: Walter Ryder, Washington; Robert Ryder and Mrs. John Lawson, Philadelphia; Allen and Fred Ryder and Mrs. Oliver Sanders, Gettysburg.

Mr. and Mrs. Sanders, she was formerly Mary Ryder, were married May 12, 1909, in St. Joseph's Church by the Rev. J. O. Hayden. Witnesses were Joseph Myers and Mary Cotolus.

For the celebration Saturday, Mr. Sanders wore the suit in which he was married. It was tailored by J. D. Lippy, Gettysburg. Mr. Sanders is now retired, having formerly worked at St. Joseph's College.

Guests were present from St. Louis, Mo., Philadelphia, Gettysburg, Bonneauville, Chester, Blue Ridge Summit, Biglerville, Pa.; Dundalk, Emmitsburg, Bethesda, Silver Springs, Thurmont, Essex and Taneytown, Md.; North Carolina and Washington, D. C.

Among the many gifts and flowers received was a Papal Blessing presented to the couple by the Rev. George Ryder.

## Commend Local Town Fathers

Editor, Emmitsburg Chronicle:

At the regular town meeting held last Monday the Burgess and Commissioners approved the use of adult road guards at school crossings. Within the next few days this plan should be in action. It was reported one more child was hit by a car within the past week. The girl was only bruised and shaken but it could have been more serious. The fast action of the town on this problem is to be commended. The problem now is getting names of those persons who would be willing to act as crossing guards.

Anyone interested in acting in this capacity is urged to contact the Burgess and, or Commissioners as soon as possible.

Are you willing to help save a life?

Sincerely  
Junior Citizens Committee

## State Income Tax Estimate Runs True

The gross receipts of the Maryland Income Tax Division as of May 12, 1959 are \$92,214,160, according to an announcement just made by Maryland State Comptroller, Louis L. Goldstein.

Receipts from corporations now total \$16,788,273 and from individuals the total is \$75,425,887.

Mr. Goldstein pointed out that these figures are gross receipts and some four and one-half million dollars had already been paid out in refunds.

The estimate of income tax revenue for the fiscal year ending June 30, 1959 is net receipts of \$96,483,000.

Comptroller Goldstein stated that there was every reason to believe that the estimate would be reached.

Treated At Hospital  
Patrick Topper, 11, son of Mr. and Mrs. Curtis Topper, Emmitsburg, received treatment at the Warner Hospital, Gettysburg, for a puncture wound of his left foot suffered when he stepped on glass last Saturday.

During the Revolutionary War the pay of a United States Marine was a little over seven dollars a month. Today a Marine private's pay starts at \$78 a month.

## Hollinger Heads Local Firemen

The annual election of officers of the Vigilant Hose Company was held at the regular meeting of that group Tuesday evening in the Fire Hall. President John J. Hollinger presided over the meeting with 35 members in attendance.

Heading the organization for another year is John J. Hollinger who was re-elected president of the organization. Other subordinate posts filled were: vice president, Guy A. Baker Sr.; secretary, J. E. Houck; treasurer, Guy R. McLaughlin; chief, John S. Hollinger; assistant chief, Sterling White; second assistant chief, Charles F. Stouter; directors, William Martin and Charles Hartdagen.

Other business transacted during the meeting included the assignment of rural routes to collectors for the annual canvas for the financial drive. The canvassers will start to cover their routes immediately. A banquet in honor of the graduating class of fire fighting trainees was held at Fitzgerald's Inn, north of town last week. Present at the affair with fire company officials also were members of the Town Council.

## Man Is Killed Sunday On Sunshine Trail

A former Thurmont man was killed instantly when hit by a car on Pennsylvania Route 16 in Washington Township, Franklin County, Sunday morning at 1:15 a. m., Pennsylvania State Police reported.

Ray I. Fraley, 34, of 30 East North Street, Waynesboro, Pa., was pronounced dead at the scene of the accident by Franklin County Coroner J. D. Goshen.

Pennsylvania State Police at Chambersburg reported that Fraley apparently appeared suddenly in the middle of the road, waving his hands and attempting to get a ride on the Sunshine Trail between Waynesboro and Blue Ridge Summit early Sunday morning.

A 1954 Chrysler sedan, driven east on Pa. Rt. 16 by Harold Ray Hull, a 27-year-old television salesman of Blue Ridge Summit, swerved and hit four guard rails in an attempt to avoid hitting the man but could not, police explained.

The car, which skidded on the shoulder of the road for 288 feet before hitting the guard rails had \$215 in damages in the accident and destroyed \$60 worth of railing, police reported. No one was injured in the automobile.

A coroner's inquest into the traffic death is awaited before any charges are considered by the State Police.

Fraley, after moving from this area, was a carpenter in the Waynesboro area. He moved to that place from Thurmont 12 years ago. At one time he had worked on the Fisher farm near Rocky Ridge.

The accident victim is survived by a father, two sisters and a brother, all living in Thurmont, and by a brother in Hagerstown.

Surviving are Baker Fraley, the father of the deceased, two sisters, Mrs. Lee Fisher and Mrs. Chester Brice, and a brother, Harold Fraley, all of Thurmont, and another brother, Carroll Fraley, Hagerstown.

Funeral services were held at the Grove Funeral Home in Waynesboro on Tuesday afternoon. Interment was in the Blue Ridge Cemetery, Thurmont.

It was reported that Fraley was born in Sabillasville and spent most of his youth there and in Thurmont before moving to Waynesboro 12 years ago.

He was the son of Lucy Ann Spielman Fraley and is survived by his wife, Bertha Morrow Fraley, and a step-daughter, Rose Marie Wade, both of Highfield, in addition to his relatives in Thurmont and Hagerstown.

Fraley had gone to Highfield to give a wagon he made as a birthday present to his step-grandchild on Saturday night and was returning home by hitch-hiking when the fatal accident occurred.

## Hospital Report

Admitted  
Charles Sharrer, Emmitsburg.  
Mrs. Ernest Dubel, Emmitsburg.  
Mrs. Andrew Eyster, Emmitsburg.

Discharged  
Kathleen Shriner, Emmitsburg.  
Miss Ella Knipple, Emmitsburg.

Miss Ellen Myers, Emmitsburg.

Births  
Mr. and Mrs. Ralph L. Hankey, Emmitsburg R3, son, Friday.

## Benefit Rodeo Saturday-Sunday

Spills and thrills galore are in store for those attending the big Wild West Rodeo to be held in Emmitsburg Saturday night at 8 p. m. and again on Sunday afternoon at 2 p. m.

The scene of action will be the horse show ring at the Civic Grounds, a mile east of town and the rodeo will feature the famous Circle X Ranch. The affair is being sponsored by the Emmitsburg Lions Club for the benefit of its child welfare fund. The Haley Construction Company is busy erecting seats at the field and it is planned to make the seating arrangement permanent.

On hand for the entertainment of the spectators will be exhibitions of plunging bareback bronc riding, saddle bronc riding, split-second bulldogging, bull-fighting by clowns, death-defying Brahma bull riding and fast-action calf roping. There'll be cowboys and cowgirls galore. The admission price is \$1 for adults and 50c for children. Refreshments will be on sale during the show.

Last year's rodeo was well-attended and it is the anticipation of the local club that this show will be more well patronized than ever before due to the fact that those present at last year's performance are familiar with the entertainment provided by this type of show and have urged their friends to see it. Many of last year's spectators plan to again see the show and bring friends.

A rain date has been scheduled for Monday and Tuesday, May 18-19. Tickets are on sale by members of the Lions Club and will also be available at the gate. The club gains a better percentage of the receipts from the advance sale of tickets.

## Western Maryland Plans Dedication Of New Building

Western Maryland College, at Westminster, will dedicate a new student union building on Saturday, May 30 at 3:30 p. m.

The \$275,000 brick building has been named the Winslow Student Center in honor of Trustee William R. Winslow of Washington, D. C. Mr. Winslow is a member of the Building and Grounds Committee of the Board.

Student lounges and recreation rooms, offices of student publications, the Student Government and Student Christian Association, the post office, bookstore and a faculty lounge will be housed in the air conditioned, two story structure. The building is 118 feet long, 62 feet eight inches wide at the larger end and 44 feet eight inches wide at the narrow end. Its entrance is halfway between the upper and lower floors giving a split-level effect. All mechanical equipment for the air conditioning and heating units is located in a third, lower level.

The Grille section of the new building is equipped with a modern stainless steel kitchen, the table area will seat over 100 with room for dancing. In the student and faculty lounges, which have fireplaces, the furnishings are Danish modern. A self-service policy will be inaugurated in the bookstore which has been equipped with special shelves and cabinets.

The May 30th dedication will be part of Western Maryland's Commencement weekend.

## Fatal Accident Driver Gets Sentenced To Workhouse

A 32-year-old Fairfield R1 bartender, Lewis D. Sheeley, who was found guilty of involuntary manslaughter by a jury last week, was sentenced Saturday by Judge W. C. Sheeley to from one and one-half to three years in the Allegheny County Workhouse.

Judge Sheeley told the defendant 'the court recognizes that you did not intend to kill the five people who were fatally injured in the accident you caused, but there is no doubt in the court's mind that you were under the influence of intoxicants and all persons who drive while under the influence are potential killers. I wish also to note that the sentence given you is the maximum that can be given.' One of the victims of the fatal accident was an Emmitsburg woman, Mrs. M. F. Keil-holtz.

On May 11, 1943 an amphibious force led by Rear Admiral F. W. Rockwell captured the Japanese stronghold of Attu in the Aleutians, thus wrecking Japan's hope for conquest of Alaska.

## OBITUARIES

JOHN KROM  
John Krom, well-known retired farmer of the Motter's Station vicinity, died Monday at the home of his son-in-law and daughter, Mr. and Mrs. James Long, Motter's Station. He was aged 80 years and had been in poor health for about two years. He was a son of the late John and Lydia Hesson Krom. His wife, Mrs. Maggie I. Hollins Krom, died 24 years ago. He was a member of the Keysville Reformed Church of Christ.

Surviving are these children: Mrs. Theodore Long, Detour; Mrs. James Long, Motter's Station; J. William Krom, Emmitsburg; George S. Krom, Baltimore; and Guy Krom, Emmitsburg; seven grandchildren, one brother, George Krom, Rocky Ridge, and a sister, Mrs. Mary Mount, Monrovia.

Funeral services were held on Thursday afternoon at the Creager Funeral Home, Thurmont, with his pastor, Rev. Morgan Andreas officiating. Interment was in the United Brethren Cemetery, Thurmont.

JOHN ANNIS TURNER  
John Annis Turner died at his home near Emmitsburg Sunday morning at the age of 84. He was the husband of Margaret A. Miller Turner.

Mr. Turner was a son of the late David and Mary Ferguson Turner. He is survived by six children: Norman Turner, Stanley Turner, Mrs. Melvin Stouter, John Turner, and Samuel Turner, all of near Emmitsburg; and Mrs. Harry Wetzel of Fairfield.

Also surviving is a sister, Mrs. Charles Turner; 19 grandchildren, and 19 great-grandchildren.

Funeral services were held on Wednesday afternoon at the Friends Creek Church of God, conducted by the Rev. William Herpeck. Interment was in the adjoining cemetery. Funeral arrangements were in charge of the Wilson Funeral Home, Emmitsburg.

## EMORY M. FROCK

Emory M. Frock, 82, Baltimore, a former resident of Carroll County and for 33 years an employee of the Baltimore Transit Company, died in Baltimore Sunday morning after a critical illness of one week. He had been in failing health for some time. Mr. Frock died at the home of his granddaughter, Mrs. William R. Klima, 2203 Smith Ave.

The deceased was a son of the late John W. and Laura Frock. His wife, Catherine Frock, died two years ago.

Surviving are these children: Mrs. Fred Heiser, Littlestown; Mrs. Olive Whaley, of Baltimore; Clyde F., Taneytown; Carroll E. Emmitsburg; Mrs. Joseph Cummins, Baltimore, and a stepson, Earl Lawrence, Baltimore. There are 20 grandchildren and 34 great-grandchildren.

These brothers and sisters also survive: John, Taneytown; C. H. Frock, Westminster; Mrs. Upton Dayroff and Mrs. Alice Deberry, Keysville, and Mrs. Clarence Hahn, Thurmont.

Funeral services were held on Wednesday afternoon at the Fuss Funeral Home, Taneytown, with the Rev. Morgan R. Andreas officiating. Interment was in the Keysville Cemetery.

## WILLIAM F. ZURGABLE

William F. Zurgable, a native of Emmitsburg, died Tuesday at the home of his daughter, Mrs. Nellie Crew, Baltimore, after a lingering illness. He was 87 years of age.

The deceased was the beloved husband of the late Mary (McGrath) Zurgable, and son of the late George and Rebecca Brown Zurgable. Survived by one sister, Mrs. Margaret Kirby and the following sons and daughters: William F., Romeo, Mich.; James L., and Mrs. Lillian Newton, Baltimore; Mrs. Louise Sell, Taneytown; Mrs. Nellie Crew and Mrs. Elsie Topper Baltimore. Twenty-six grandchildren and 12 great-grandchildren also survive.

For the past twelve years he has been a member of St. Thomas Aquinas Church. Before moving to Baltimore, he had been a faithful member of St. Joseph's Catholic Church, Emmitsburg, a member of the Holy Name Society and charter member of Brute Council, Knights of Columbus, and a Fourth Degree Knight of the Maryland Council.

Funeral services will be held Monday morning with a requiem Mass to be celebrated at St. Joseph's Catholic Church, Emmitsburg, at 10 a. m. Interment will be made in the church cemetery. Friends may view the body at the Moran Funeral Home, York Rd., Baltimore, from now until the time of the funeral.

Gettysburg College is the oldest Lutheran college in America.

## Council Sets New Operating Time For Meters

A change in parking meter operation for the town was discussed at a special meeting of the Burgess and Commissioners of Emmitsburg held Monday night in the town office. A full board was in attendance and Chairman of the Board of Commissioners C. R. Fuss presided over the meeting.

Discussed, and passed, after a lengthy discussion, was a change in time of operating the meters. It was decided and passed that effective on June 15 all parking meters will be in operation during weekdays from 9 a. m. to 6 p. m. and on Friday and Saturday from 9 a. m. to 9 p. m. Newly-elected Commissioner J. Norman Flax sat in on his first meeting and voted on the change of time. Heretofore the parking meters were in operation only from 8 a. m. to 6 p. m. daily. New instruction plates for the meters have been ordered and the new time will be come effective on June 15, Mayor Fraley announced this week.

The annual town clean-up days will be held on May 27-28-29 this year, Mayor Fraley reports. All trash must be placed in containers and set in the rear of properties. This gives the local property-owners an extra day in which to tidy up their premises it was pointed out. In previous years only two days for the clean-up period were allotted. The expense of the removal of the trash from property lines will be borne by the town.

In other action taken at the special meeting the Town Fathers decided to employ a traffic patrolman for duty at the Mother Seton School to escort the children across the road during the school hours. It was decided that perhaps next year a number of lady patrolwomen would be employed for the task of handling both the local schools. Permission to patrol the area has been granted by the State Roads Commission, after communication with District Engineer Thomas Mohler, Frederick. Registration of voters is still in effect through this month and those wishing to register should contact the registrar, Charles D. Gillelan. The next regular meeting of the town Council will be held the first Monday in June which will be June 1.

## Legion Auxiliary Meeting Held

The regular monthly meeting of the Francis X. Elder Post 121, Ladies' Auxiliary was held last Tuesday in the Post Home. Twenty-two members were present.

It was announced that the annual State Convention would be held this year at the Emerson Hotel in Baltimore beginning July 15 and continuing through the 18.

It was also announced that May is Poppy month and that they are on sale the entire month. A \$2 donation was given to the Ways and Means Dept. \$5 was donated to each of the high schools for a history prize, and \$2 was donated to the local fire company.

The Refreshment Committee for the month of June is Nettie Ashbaugh, Melva Hardman and Loretta Hardman.

It was announced that nominations for officers will be held at the next meeting, and everyone is requested to attend. Anyone not having paid her dues can do so by contacting Madeline Harner. New members are also welcome and the Auxiliary would be very proud to have you.

## Mrs. Combs Hostess To Local Church Group

Mrs. Cooley Combs entertained the Woman's Society of Christian Service of the Trinity Methodist Church at her home on Tuesday evening.

Mrs. Elliott had the devotions for the evening. She gave a very timely and interesting reading fitting into the program. Mrs. G. L. Wilhide had charge of the meeting.

The guests for the evening were the members of the Woman's Society of Christian Service from Tom's Creek Methodist Church.

Refreshments were served by the hostess. The next meeting will be held in June with Mrs. Francis Matthews in charge.

Enrollment at Gettysburg College is 1,537, including 455 women. The faculty numbers 115.

pointed a budget committee whose job it will be to determine the final goal for the 1959 fund drive. Glenn T. Swisher, retired Potomac Edison official is chairman, serving with Dr. James A. Senzenbaugh, superintendent of public schools; John Ed. Schell, Frederick city businessman; Benjamin L. Shuff, Guy W. Nusz, Glenn E. Biehl and W. Meredith Young, bankers.

Several of the agencies from the Chest have gone county-wide in scope, in programs started last year. This includes the Boy Scouts and the Girl Scouts. Both are organizations which are now being well-received by the county youngsters.

Last year's drive fell some \$5,000 short of the announced goal. It is hoped, a chest spokesman said, to overcome the deficit this year.

Agencies and the amounts each received from the 1958 drive are listed below: The Red Cross, asked for \$30,000, received about \$25,000; Boy Scouts, \$14,125; Girl Scouts, \$12,039; Childrene's Aid Society, \$12,000; YMCA, \$15,000; Federated Charities, \$1,600; Estehar Grinage Kindergarten, \$1,000; Salvation Army, \$10,700; and USO, \$938.

All of the agencies but the Red Cross and the USO were originally members of the Community Chest.

A publicity committee was recently named by Mr. Hooper. Members are: Mrs. Joseph Klina,

Between 1713 and 1745, the growth of literacy in early America was spurred by the founding of 22 newspapers. Today, newspapers educate, entertain and inform 100,000,000 people daily.

Charles Dickens' "A Christmas Carol" was first published in London in 1843. The American public first became familiar with his works when they were published in U. S. newspapers.

Mrs. Beale Is Hostess To Local Homemakers

Mrs. Paul Beale was hostess to the Emmitsburg Homemakers, April 30 at 1:30 p. m. Mrs. Robert Fitez, president, opened the meeting with a homemaker's prayer from an earlier year book. The club sang one verse of Amer- ica.

After the business meeting, Miss Fehr, County Home-Demon- stration Agent, gave a talk on "We don't know what we can do until we try." Posters illustrat- ing "values," "ideas" and "listen- ing," were shown. Each member told what she thought she did best.

Five dollars was given each high school for prizes and \$5 was donated to the Maryland League for Crippled Children.

The April afternoon of games was held at the home of Mrs. Ed. Meadows, and the May games at the home of Mrs. Robert G. Fitez.

The last council meeting of the club year was held in the council

rooms in Frederick on Tuesday. Plans for a party in June are under way for delegates to the Short Course and the Thurmont women are to be invited. It was suggested that the club give \$5 to a deserving student for the outdoor school at Camp Geentop. This will be taken up at the September meeting.

THOUGH OFTEN CALLED AN ICE CREAM SAUCE, this Instant Butter Rum Sauce is also excellent poured over baked custards and other favorite puddings. It's a quick "no-cook" sauce made with evaporated milk and butterscotch instant pudding.

- INSTANT BUTTER RUM SAUCE 1 package butterscotch instant pudding mix 3/4 cup dark corn syrup 3/4 cup evaporated milk 1 tablespoon rum 1 tablespoon melted butter, cooled slightly

Combine the pudding mix and corn syrup in a bowl. Mix until smooth. Gradually add the milk, rum and butter and stir to blend. Allow to stand about 10 minutes to thicken sauce. Serve on ice cream, cake or other desserts. Makes about 1 1/2 cups of sauce.

HOMEMAKERS HEALTH NOTE: DO YOU KNOW what to do in an EMERGENCY and have you the necessary first aid essentials to meet it? The average home- maker faces approximately 14 emergencies a year—more than one a month. Often she can prevent injuries from developing into major problems with the proper equipment and knowledge. There is a valuable BOOKLET on the subject available FREE OF CHARGE called "HOW TO BANDAGE FOR FASTER HEAL- ING." Write "Good Living," P.O. Box 1649, New York 17, N.Y., for your FREE copy today. Every homemaker should have one for her family's well-being.

What Japan can offer us by JOHN VAN KOERT This beautiful, charcoal-fired vessel permits my guests to cook strips of beef, chicken, shrimp, bean curd, spinach, etc. to their own taste in bubbling chicken stock. It's festive, and we use chopsticks! We are apt to think that everything Japanese is small and delicate, but I was impressed with the great timbered farm houses (left) and the robust handicrafts that the country people make for their own use. Their masterfully shaped bowls, huge in scale, decorated boldly in rich blacks, browns and whites, with wonderful textures, are comfortably at home with my collection of contemporary European and American stoneware. (Designer, scholar and taste- maker John Van Koert is a world-wide talent scout for American living. Director of the famous "Design in Scandi- navia" exhibit that started a na- tion-wide trend in '53, Mr. Van Koert is equally expert in furni- ture, home furnishings, archi- tecture and housewares.) Almost everything Japanese makes a direct appeal to the senses: taste, touch, sight, sound and smell. Incense, for example, is used generally and is less sweet than the kinds we are familiar with. I use Japa- nese incense to spice the air- conditioned atmosphere of my office. I like the traditional burners—and speaking of burn- ers, my most useful acquisition is something which the Japa- nese call a Mongolian cooker. Then, too, the thoughtful visitor can usually acquire works of art from Japan's long cultural past. A 15" carved figure in wood dating back to the 9th century, shown here with in- cense burner, is a favorite pos- session. It sums up for me the sensitivity to form and texture that the Japanese possess— Japan can offer us an infinite variety of ideas to enrich our lives. ©JETRO, Japan Trade Center 393 Fifth Avenue, N. # SPORTS AFIELD

By Ted Kesting

In the last couple of generations the black bass has become the American game fish, so much the favorite of our more serious anglers that his nearest finny competitors are no better than also-swams, says Jason Lucas,

Angling Editor of Sports Afield Magazine.

Practically every one of these serious anglers holds that it's more fun to catch one bass on a surface lure than at least two on an underwater. Some say they'd rather catch one on a topwater then ten on deep runners.

In the first place, just why is a topwater more sport to use than an underwater? It's partly because you see the strike—and, no matter how intently you've

been watching for it, it always seems to come as a surprise to send a tingle along your spine. And it's partly because, as about everybody knows, a bass hooked on the surface generally fights near the surface, with some wild leaps to stir your blood, while one hooked in deep water generally fights there, which isn't so exciting.

We always hear a lot of the terrific splash a bass makes in striking a topwater. He certainly can do that—but he usually does it only about a third of the time. Another third, he'll come under it and suck it down as gently as a trout can take down a dry fly; if you're not watching closely you don't see it disappear.

The rest of the time he'll use a very odd strike all his own: he'll slip, comparatively quietly, from the water and high into the air some distance from the lure. Then his body curved, he'll come straight down on top of the thing with his mouth wide open. To us, this would seem like doing it the hard way, that it would be much easier for him to take it from below, but he probably has some good reason for it.

Where is surface fishing for bass most consistently successful?

In a cool, shallow river with a fairly strong current—which means that they're about sure to be smallmouths. Here, topwaters will practically always get some and will very often get most. Too, no other bass caught anywhere will, for their size, put up so game a fight. Sometimes one will make as many as three or four long, flying leaps, tumbling over and over, barely touching the water between.

He'll probably fight longer, faster and harder than a bass of his size hooked elsewhere. But there's a little catch in this: He's using the current to do much of his fighting for him.

It's pretty safe to say that the fly rod will about invariably catch most bass on surface lures—it's the one type of fishing for which it's peculiarly suitable. This is partly because small fly-rod poppers will get a lot of rather small bass that larger lures wouldn't—but they're big enough to be good sport, played with a fly rod; and at the same time you'll probably get as many larger ones as you would with anything else. However, if you prefer, you can do fine and have plenty of sport, with casting or spinning tackle.

## OUR STATE UNIVERSITY

It has been estimated that of the 511,000 school age children in the State of Maryland 12.4 per cent, or approximately 61,320, have intellectual, physical, social or emotional deviations and are classified as exceptional children.

The Maryland State Department of Education reports that 8500 exceptional children are being helped throughout the State in special schools and classes and through home and hospital teaching. An additional 7500 are receiving speech therapy.

Due to a serious lack of adequately trained teachers, the remaining 45,000 of Maryland's exceptional children receive no specialized training or help.

Exceptional children authorities realize that it will take more than sufficient financing to solve Maryland's special education problems. It will be necessary, they report, to develop the interest of high school seniors who are entering college, in order that more trained personnel will be available.

In light of the teacher shortage, the University of Maryland has taken the lead in setting up a program in special education within the College of Education. In addition, high school students are being encouraged to consider the opportunities which are available in this field.

Special training is available at

the University in the areas of mental retardation, central nervous system disorders, as well as in working with children with high intellectual abilities.

The U. S. Navy's newest air-sea base, now under development at Rota, Spain, is 60 air miles west of the historic Rock of Gibraltar.

## A MODEL GIRL—A MODEL WIFE

As one of New York's most successful models, Mary Jones plays many roles for the camera. But when the day's posing is ended, she assumes her real role, that of the model wife. Here she is doing the family marketing, taking advantage of the best buys in food, household supplies and tobacco. Her husband says it's good to have a model wife who is not only pretty, but can watch the budget and even remember to buy his nouches of pipe tobacco.

## ARE YOU A LITTERBUG?

### Outdoor Chicken, Good Indoors, Too

Although Chick-N-Que is as American as the Fourth of July, here it is given an Oriental touch by being cooked on a Japanese hibachi. For barbecuing, select broiler-fryer chicken.

#### Chick-N-Que

**Outdoor method:** For the slow cooking that is best for chicken, set the grate, if possible, 12 inches or more from the heat source. Use charcoal briquets but before adding the chicken wait until the flame is gone and the briquets are covered with a white ash. Brush the chicken pieces with tomato barbecue sauce and place on grill. Turn and baste frequently, cooking until done, 35 to 60 minutes, depending on wind conditions,

distance and intensity of heat. When done, thickest parts should be fork tender.

**Indoor method:** Place chicken, skin side down, in shallow baking pan lined with Reynolds foil. Baste with sauce. Place in a preheated hot oven (450° F.) until lightly browned, cooking about 25 minutes. Reduce heat to 325° F. Turn skin side up; baste. Continue baking 25 to 35 minutes, basting often.

#### Tomato Barbecue Sauce

- |                         |                                   |
|-------------------------|-----------------------------------|
| 1/2 cup Mazola corn oil | 1 tablespoon Worcestershire sauce |
| 1/4 cup vinegar         | 1/4 cup ketchup                   |
| 1/4 cup water           | 1/4 cup chili sauce               |
| 1 teaspoon dry mustard  | 1 tablespoon lemon juice          |
| 1 teaspoon Accent       | 1 small onion, minced             |
| 1 tablespoon sugar      | 1 small clove garlic              |

Combine all ingredients in a heavy saucepan. Heat to boiling, then simmer for about 1/2 hour to blend flavor. Keep hot for basting. Mix thoroughly before each basting. Makes 2 cups. Extra sauce may be served as a sauce.

## KNOW YOUR NAVY

**Aviation Structural Mechanic**

AIRCRAFT WINGS, BODIES AND CONTROL SURFACES REQUIRE SKILLED MAINTENANCE AND REPAIR FOR SAFETY IN FLIGHT. THE AVIATION STRUCTURAL MECHANIC IS RESPONSIBLE FOR THIS WORK. HE IS THOROUGHLY FAMILIAR WITH THE METALS, TUBING, RUBBER, PLASTICS AND WOODWORK OF ANY PLANE AND SKILLED IN THE FABRICATION AND WORKING OF EACH MATERIAL.

### Wool Growers

#### Make Effort

#### To Expand Market

Wool growers of Maryland, through their participation in the national wool incentive program, are helping finance an advertising and sales promotion program to increase demand for lamb and wool. That is the purpose of deductions made from individual farmer's wool incentive payments, now being received, according to Agricultural Stabilization and Conservation Committee Chairman, Julius P. Parran.

The deductions, amounting to 1c per pound on shorn wool and 5c per hundredweight on unshorn lambs, were authorized by the wool growers of the country in a referendum in 1955. The American Sheep Producers Council was organized by wool growers to conduct the program.

Sheepmen from every State are represented on the Council by delegates who elect a board of directors to govern the organization. Representation is based on the amount of money paid into the promotion fund from each State.

According to a report made by the Council on its activities, Parran said, there are three main features of the program: (1) advertising to create consumer interest in wool and lamb; (2) promotion and merchandising work to urge cooperation by all segments of related industries, such as packers, processors, retailers, and manufacturers; and (3) a program of educational films, and other promotional aids.

Women were first admitted to Gettysburg College in 1888.

"SUNDAY" DRIVERS BEWARE!

On a television safety panel discussion recently, Mr. Charles Adler Jr., a member of the Maryland Traffic Safety Commission and a nationally-known inventor stated: "At long last something has been done to save the motorist from that menacing pest, the slow poke driver. He's the guy

who drags along the road at 20 miles an hour or less when the normal flow of traffic is 35 m.p.h. This scourge of the highways is responsible for some pretty bad accidents. He won't speed up, and he won't pull over to the side of the road. Attempt to pass him and the chances are you'll be hit head-on by a car coming

from the opposite direction. People have been killed in this attempt. "The slow poke may be ambling along in a passenger car, engaged in scintillating dialogue and sparkling repartee with his girl. Now don't get me wrong, I'm all for romance, but not on the highway. Or sir slow poke, the square, may be driving an overloaded truck up a hill, groaning along at 4 miles per. Pass him at your peril!

"But now, thanks to the Maryland State Legislature, the slow poke driver will either accelerate to conform to the prevailing speed or pay a fine as a traffic violator. Now, thank goodness, it's against the law to be a slow poke."

Mr. Rolf Hertzguard, interviewing Mr. Adler on WBAL-TV, discussed House Bill 393, which is as follows:

An act of repeal and re-enact, with amendments, section 212 of article 66 1/2 of the Annotated Code of Maryland (1959 edition), title "Motor Vehicles," sub-title "Operation of Motor Vehicles Upon Highways," authorizing the State Roads Commission to establish minimum speed limits under certain conditions and providing penalties for the violation thereof.

That section 212 of article 66 1/2 of the Annotated Code of Maryland (1959 edition) title "Motor Vehicles," sub-title "Operation of Vehicles Upon Highways," be and the same is hereby repealed and re-enacted, with amendments, to read as follows:

212. (a) No person shall willfully drive a motor vehicle at such a slow speed as to impede or block the normal and reasonable movement of traffic except when reduced speed is necessary.

(b) Whenever the State Roads Commission determines on the basis of an engineering and traffic investigation that slow speeds on a highway or any part thereof consistently impede the normal and reasonable movement of traffic, the Commission may determine and declare a minimum speed below which no person shall drive a vehicle except when necessary for safe operation or in compliance with the law, except nothing herein shall apply to antique motor vehicles as said term is defined in article 66 1/2, section 8.

(c) Violation of this sub-section shall be deemed a misdemeanor and upon conviction shall be punishable by a fine of \$1.00 to \$100.00.

Sec. 2. And be it further enacted, that this act shall take effect June 1, 1959.

Looking Ahead

...by Dr. George S. Benson DIRECTOR - NATIONAL EDUCATION PROGRAM Secoy, Arkansas

The Truth About Socialism

With each new concentration of economic power in the federal government—now completely controlling about 20% of the national income—the long range economic future of the American citizen diminishes. Concentration of economic power in the federal government is Socialism. This isn't an accusation or a charge—it simply is the stating of an indisputable fact. And the American people need to clearly understand this fact—and all its implications. We must all act as citizens to halt the continuing concentration of economic power in government.

We have the figures available in America on what Scandinavian and European Socialism—the concentration of economic power in the government—has brought the citizens of those nations. None has full, totalitarian Socialism. Yet the official statistics show that the citizens of those nations have living standards one-third to one-sixth as good as ours in America. And the amount of Socialism in the way of life over there is from 50% to 65%. An examination of the facts on these Socialistic nations will show that the more Socialism a nation has—the greater concentration of economic power in the government—the lower the living standard.

Under Total Socialism

There is, of course, an available example of total Socialism. Communist Russia's system is total Socialism. And the nation's economic power is concentrated in the central government. The government owns and controls everything. Somewhere in the distant future, its leaders say, the Soviet system will be converted to a Communist economic system. They say the present total Socialism is a "transition stage" toward Communism. It is well for us to understand that the living standard in Russia, under totalitarian Socialism, is a pattern that may be expected by any Socialist nation as an end result.

My figures have been gathered by the Assembly of Captive European Nations, an organization of outstanding former citizens of nations that have been taken over by the Communists. They may be accepted as accurate. They are contained in the Assembly's documented publication, "Soviet Empire: 1817-1958."

A Few Are Rich

In Russia's total Socialism there are 25 people in the ruling Polit-bureau, with Khrushchev having dictatorial control at the moment. These 25 people have free access to the entire wealth of the nation. Their income is unlimited. They may have any material possession they desire. Under them in the scale of income is the Central Committee of the Communist Party, the high government ministers, and the most important scientists and artists of value to the Party. There are approximately 2,000 of these. Their income ranges from \$40,000 to \$65,000 a year (converting the rubles not at the "official" exchange rate but to actual dollar purchasing power). These people have special stores containing food delicacies from throughout the world, automobiles, yachts, villas.

The next economic group consists of leading bureaucrats, army generals, industrial managers, secret police officials and

Effort Expended To Beautify State Highly Successful

All Maryland seems to have responded to the call to help make April, 1959, proclaimed by Gov. J. Millard Tawes as "Keep Maryland Beautiful Month," a success. A survey showed that over one million Marylanders were reached during that month.

Elementary, junior high and high schools, both public and private, in Baltimore City and throughout the twenty-three counties, sent in so many requests for posters, literature, project suggestions, litterbags, and other materials that the Keep Maryland Beautiful staff at 8 East Mulberry Street, Baltimore, had to work overtime to keep the mailings up to date.

On April 15, designated as "Keep Maryland Beautiful Day," all State Departments cooperated by having their personnel add to their regular greeting, when answering telephones, the words,

important scientists and artists. There are 300,000 of these people. Their income ranges from \$6,000 to \$8,000 a year, and they too have special stores, drive government-owned cars, and enjoy the luxury of private villas.

Most Are Poverty-Stricken The next economic group contains civil servants, the party bureaucracy, professionals—doctors, lawyers, professors—and stakhanovite workers (workers who have set individual production records). There are 31,000,000 in this group. Their income ranges from \$600 to \$900 a year. Beneath these are the wage-earners and peasants, the great mass of the able-bodied citizenry—160,000,000. The average income of this group is about \$500 a year. There is still a lower group on the economic ladder of total Socialism—forced laborers—the slaves.

The Assembly of Captive European Nations has estimated there are 6,000,000 Russians in the slave labor camps. Other estimates range much higher. John Noble, who spent 9 years as a prisoner-slave in Russia said he obtained authentic information placing the number of slaves at 28,000,000! Most of these get nothing but a starvation diet and forced labor. Some, however, are paid. In the last few months in Vorkuta, John Noble was paid \$25 a month, but he was forced to pay \$18 of this for room and board (in prison) and \$1.25 withholding tax. "Those who didn't fill their 'norms,'" he reports, "were paid nothing and were put on killing punishment rations besides."

This is the record of total Socialism. We must halt its growth in America. We must stop the expansion of our federal government. At stake are both our economic welfare and our individual freedom.

"Keep Maryland Beautiful." Hundreds of Baltimore and Maryland business firms did likewise.

Newspapers, radio and TV stations cooperated extensively in publicizing Keep Maryland Beautiful Month. As a result, offers of active participation have been coming in from Board of Education representatives, garden clubs, city councilmen, apartment house owners, volunteer fire departments, mayors of Maryland towns, women's clubs, automobile dealers, improvement associations, leaders of cub scouts, brownies, girl scouts, campfire girls, landscaping and beautification committees, business firms, highway departments, oil companies, service stations, breweries, civic clubs, libraries, drive-in theaters, roadside restaurants, and private citizens.

Over 5,000 litterbags have been distributed from the Keep Maryland Beautiful office. The State Police are giving litterbags to every motorist stopped for any traffic violation. The Harundale Merchants Association gave out 3,500 litterbags at the Harundale Mall Fair on April 15. A leading Baltimore Dairy (Green Spring) has placed litterbags in all delivery trucks.

"The public's tremendous response to the theme of our 1959 campaign—'only you can do your part to Keep Maryland Beautiful'—is gratifying and encouraging to all the community leaders who are working so hard to make Maryland a cleaner and more beautiful place in which to live," states John E. Clark, chairman, Governor's Committee to Keep Maryland Beautiful.

IN THIS WORLD AMERICA'S OLDEST CITY 16 ST. AUGUSTINE, FLA. FOUNDED IN 1565 BY THE SPANISH 55 YEARS BEFORE THE PILGRIMS LANDED AT PLYMOUTH. PONCE DE LEON THOUGHT HE HAD FOUND THE "FOUNTAIN OF YOUTH" IN ST. AUGUSTINE IN 1513. SINCE THAT TIME "FOUNTAINS OF YOUTH" HAVE BEEN FOUND ALL OVER FLORIDA. "Taxes, that's what's wrong with this country -- too stinkin' many taxes!"

Remodeling 'Smart' Investment For TV Announcer Dick Stark

"One of the smartest things I've ever done," says Dick Stark, nationally-known television announcer, "was to buy that old house and remodel it." "That old house" was a 160-year-old tumbledown farm home on ten acres in Sag Harbor, L. I., N. Y., purchased for \$6,000 by Stark and his magazine fashion editor wife, Jane Troxel Stark, in 1949.

Today, as the photographs show, remodeling has changed the old house into a luxurious Colonial-style home which the Starks occupy the year around. He estimates the house and land now are worth more than \$60,000.

Amazing transformation from tumble-down shack, below, to handsome, comfortable home above was made by television announcer Dick Stark in remodeling 160-year-old farm home for his personal residence on Long Island, New York.

"When Jane and I first saw the house," Stark recalls, "we were dubious. The property at one time had been used as a town dump, and the house seemed to be rotting away.

The old country kitchen was divided into a compact, modern kitchen and dining room. Stark, now a graduate architect, credits modern building materials and careful planning with making the remodeling a success. As an example, he cites the roof of asphalt shingles. "These not only add color and charm, but are giving us excellent protection from the fierce weather we get here near the ocean."

"But we liked the location, and a closer examination of the house showed its beams and timbers were in sound structural condition. We bought it and went to work."

"Inside," he adds, "we used gypsum board for the walls, and you can't tell they aren't finished with the finest plaster. Stock French doors of ponderosa pine between the living and dining rooms add to the authentic Colonial charm of the house, as do the early American-style panel doors and wood windows."

Today the new wing downstairs has a large living room, a study, bedroom, and bath. Upstairs is the master bedroom and bath, with two more bedrooms in the old portion. Downstairs

wool helps keep the house more comfortable through the severe Long Island winters, and saves considerably on fuel. Stark's success at remodeling was no surprise to his friends. Among them he is known as "the man who does everything well." Illustrative of this is the fact that Stark today works actively as an architect in addition to his TV and radio appearances, and in his "spare time" owns and operates a booming dealership in foreign cars in Bridgehampton, L. I., N. Y.

Every parent wants to send his children to college, to prepare them for a richer, finer life. And wise parents make sure they're able to do so. How? ## TODAY'S Meditation

THE WORLD'S MOST WIDELY USED DEVOTIONAL GUIDE

Read John 18: 33-38.  
 Jesus saith unto him, I am the way, the truth, and the life. (John 14:6.)  
 When teaching in another state, I left my first grade classroom for only a few moments one day. Upon returning to it I found all the children's hands raised high in the air. When I looked around in wonder at what was going on, I saw a precious blue-eyed child sitting in my seat at the front of the room.  
 Quickly I said, "What is this? What's the matter?"  
 With a most sincere face—angelic with childlike faith—he said, "Oh I was just asking the children how many love Jesus."  
 Here was a simple testimony given by a child in the presence of all his classmates in the first

grade.  
 I smiled at him as he left my desk and returned to his place. I offered a silent prayer to God for his testimony that indicated his love for Jesus.  
**Prayer**  
 Lord, give us faith to trust Thee, as little children trust Thee. We thank Thee for giving to us little ones who show forth Christ in heart and life. We pray in the name of Jesus who said, "Whosoever shall not receive the kingdom of God as a little child shall in no wise enter therein." Amen.  
**Thought For The Day**  
 Through faith in God we become instruments of His love to others.  
 Mrs. Clarence W. Harris, Homemaker (S. C.)

## OVER THE GARDEN WALLS

Spring In May  
 Keep a jump ahead of insects and plant diseases. You'll be rewarded with better looking flowers, unblemished, larger fruit and vegetables, and greener foliage on your ornamentals.  
 As powdery mildew begins to appear on roses and other ornamentals, spray with Karathane at

7-10 day intervals. Black spot on roses can be controlled by spraying with Phaltan 75% wettable powder or one of the general-purpose rose sprays or dusts, applied at weekly intervals.  
 If Botrytis blight strikes peonies or tulips, remove the damaged plant parts and keep the foliage protected with a copper fungicide. You can also control leaf spot on mountain Laurel, ivy and Virginia creeper with copper fungicides.  
 Crysanthemums sometimes are infested with leaf nematodes. There are two ways to protect them: mulch the plants, or apply malathion or Nemagon 10% granules or liquid.  
 Even lawns are apt to be stricken with fungus-caused diseases, such as leaf spot, dollar spot, red thread or fading out. To protect your lawn: don't let piles of wet grass accumulate, and spray with one of the broad-spectrum (this just means it'll protect against a lot of diseases) fungicides, such as Kromad.  
 Sooty, or black mold may show up on ornamentals. The fungus lives in the residue left by aphids feeding on the plant. You can kill two birds with one stone: control the aphids with malathion and you automatically control the sooty mold.  
**Use A System**  
 It might sound like it's a lot of work to protect all your plantings against insects and diseases. We won't kid you: it is work. You've got to spray (or dust) with the right pesticide at the right time.  
 This means you'll have to know your plants, the diseases or insects you're trying to control, and the best means of control. One thing is for sure: prevention is easier than curing (or even controlling) the diseases or insects if they get started. This means you'll have to spray regularly.  
 There is a lot of help available, to help you know what to do: see your county agent and ask him for Fact Sheet 73, "Diseases and Insects of Roses and their

Control," Bulletin 168, "Control Insects of Ornamental Trees and Shrubs," and Bulletin 125, "Sprays for Home Fruit Plantings." Your county agent has lots of other helpful publications and advice to offer, so why not stop in and see him?  
**Control Weeds**  
 It might seem early to worry about crabgrass, but it started germinating in April. One of the best ways to keep this pesky lawn weed in check is to mow the grass high—that is, at least 1½ to 2 inches. This will keep your desirable grasses more vigorous and will help shade out crabgrass seedlings.  
 2, 4-D will knock out dandelions, wild garlic, and buckhorn. Two cautions—don't use the same sprayer for weed killers that will be used to spray vegetables or ornamentals; use caution around flowers and vegetables. Your county agent has directions, in Agronomy Mimeo 21, "Weed Control in Established Lawns."  
**Planting Flowers**  
 Succession plantings can help you spread your supply of fresh vegetables, or cut flowers through the summer. Glads, for instance,

can be planted now, up through the end of June. Different annual flowers can be chosen to provide blooms up to fall frost.  
 Now that the danger of frost has passed, you can plant dahlias, tuberous begonia, canna and calladium outdoors.  
 You can get more vigorous, bigger blooms on peonies by fertilizing and disbudding flower stems so that only the tip bud remains. If they grow too large, better stake them. Mums, too, can be made more vigorous by pinching off the tips, so that your

plants will be bushier, and flowers larger.  
**Transplanting Tips**  
 Give plants in the seedbed or flats a good watering the night before you transplant them. Then keeping as much soil as possible around the roots transplant them the next evening or on a cloudy day, using a starter solution. This will prevent shock and keep the plants from wilting too much.  
 Lt. Gen. (Ret.) W. S. Paul is serving as the ninth president of Gettysburg College.

**ASSIGNEE'S SALE OF VALUABLE REAL ESTATE**  
 Situate One Half Mile West Of Emmitsburg, Frederick County, Maryland  
 By virtue of a Power of Sale contained in a Mortgage executed by Albert R. Smith and Margaret M. Smith, his wife, dated the 10th day of May, 1933, and recorded in Liber 387, Folio 580, one of the Land Records of Frederick County, Maryland, which Mortgage has been duly assigned to the undersigned for foreclosure, the undersigned Assignee of said Mortgage will sell at Public Sale in front of the Post Office in Emmitsburg, Frederick County, Maryland, on  
**WEDNESDAY, JUNE 3, 1959**  
 at the hour of 11 a. m. (D.S.T.) all that tract or parcel of land situate, lying and being in Emmitsburg District, Frederick County, Maryland, on the South side of the Waynesboro Road, about one-half mile west of Emmitsburg, being the same tract or parcel of land which was conveyed to Albert R. Smith and Margaret M. Smith, his wife, by deed from J. Meade Patterson and wife, dated the 21st day of March, 1932, and recorded in Liber 386, folio 542, one of the Land Records of Frederick County, Maryland.  
 This lot is improved with a five room frame house and other buildings.  
 TOGETHER with all the rights, ways and appurtenances thereunto belonging or in any wise appertaining.  
**TERMS OF SALE:** A deposit of \$750.00 will be required of the purchaser or purchasers at the time of sale, balance to be paid in full upon the ratification of sale when purchaser or purchasers will be entitled to full possession of the property. All conveying including U. S. and State Revenue Stamps to be at the expense of the purchaser or purchasers.  
 All taxes and water rent to be adjusted as of date of ratification.

BABSON

Writes . . .

BY ROGER W. BABSON

Babson Discusses Cape Canaveral

BABSON PARK, Mass., May 14—My last few days in Florida were spent at Cape Canaveral, which is located on the East Coast of Florida some 150 miles south of Jacksonville. From here the tests are being made of the various intercontinental missiles, by which

World War III, if it ever comes, will be fought. I understand there are three other "proving grounds"—in Alabama, in Arizona, and on the Pacific Coast. Leading Corporations Producing Missiles These missiles are contracted for by the Department of Defense with various important corporations such as the Douglas Aircraft Company which builds the "Thor," the Northrop Aircraft Company which makes the "Snark," the Martin Company which builds the "Titan" and "Vanguard," General Dynamics' Convair division which constructs the "Atlas," Boeing Aircraft which is building the "Bomarc," and the Chrysler Corporation which makes the "Jupiter." These companies compete for the best engineers, metallurgists, and other scientists. Such specialists are not under the bureaucratic restrictions of government workers, hence can be paid higher salaries. The work is under the able direction of General Donald N. Yates.

I was much impressed with what I saw, including the launching of three of these missiles. They vary in length from twenty-five to sixty-three feet, each divided into three stages, and cost from \$1 million to \$1.5 million each. Of the three launched while I was there a section of one failed to ignite, and only the first section went into the air. A second missile blew up into a thousand pieces. But the third was successfully launched and traveled 1500 miles, striking the ocean very close to its target.

Tracking These Great Missiles While at Cape Canaveral, I was briefed, together with the Honorable Paul H. Spaak, Secretary General of NATO, by some of the more important officers on how these missiles are tracked. (I was warned not to ask any questions.) The proving course was between Cape Canaveral and Ascension Island off the West Coast of Africa, which I saw on my trip last year. The course covers several islands in the Atlantic, between which are stationed U. S. ships. Thus, the missile is constantly in sight, so that not only can its speed be observed, but the nose cone can be located when it comes to the end of its arc. Within these cones are important data and the intricate machines which process such data and log the results. I am sure we will be able to build and put into production intercontinental missiles that will go over 1500 miles and hit a target with an accuracy of within one mile. They will be shipped to launching stations in Italy, France, England, Norway, and other nations, with the purpose of annihilating enemy cities within thirty minutes after the first nuclear missile or bomb fired at the U. S.

If Russia should decide to attack us, she would first attempt to destroy our launching bases in these friendly countries, after which she would perhaps destroy our ten largest cities. Even if twenty-million American citizens were killed within the first few hours of such an attack, we would still have 150 million people left, with an underground system of communications and much of our transportation continuing to operate.

What About The Anti-Missile Missiles? My great disappointment at Cape Canaveral was to learn that no anti-missile missiles have been perfected. Hence, though Russia, or the United States, or certain other countries, will soon be in a position to destroy, none of them now have the necessary means of defense against an enemy missile. Once in a while the engineers feel they are on the right track; but the targets which they use move very slowly compared with the speed of an enemy missile. My days at Cape Canaveral convince me of what I have said before—that there will be no World War III until some country discovers and has in production a dependable anti-missile missile. Our defense Department feels that our engineers will be successful in producing such and we are now erecting stations around our large cities for firing such anti-missile missiles when they are perfected and in production.

Stock Market Round-Up

Prepared by The Investment Research Department of Hemphill, Noyes & Co. Members of the New York Stock Exchange March 25, 1959

Iron Ore Stocks — Good Values In The Market Today

The sharp recovery in the steel industry suggests that now is a good time to consider the purchase of common stocks in iron ore mining companies. These appear attractive at the present time not only because of the possibility of substantially increased earnings in 1959 but also because of the long range potential. It is generally conceded that the steel industry will continue to grow with the economy and in the next fifteen years the demand for iron ore is expected to increase between 25 and 30%. Furthermore stocks of companies owning ore properties should be good inflation hedges as in the past the price of iron ore has gone up with the inflation cycle. In fact, during good years of business activity it seems unlikely that there will be any serious over-supply of iron ore as there has been for some time of crude oil.

The Lake Superior area still remains the prime source of supply for iron ore in spite of the fact that there has been much conjecture over the years as to how long the reserves would last there. It should be pointed out that new reserves are being uncovered each year and that companies have been somewhat reluctant to develop and report these new reserves until such time as absolutely necessary due to the taxes imposed by the State of Minnesota on proven deposits. Furthermore the technology has made it possible to use considerably lower grade ores than had ever been anticipated in the past. Today new techniques have

Checks Flow

State Comptroller Louis L. Goldstein stated this week that in view of the fact thousands of State income tax refund checks were now being mailed out each day, the time seemed opportune to issue a word of caution with respect to the cashing of these checks.

He said that last year a number of State refund checks fell into the hands of persons other than the taxpayers, and as a result approximately 40 retail merchants accepted checks with forged endorsements. Moreover, he continued, many other merchants had the same experience in connection with other types of governmental checks.

Mr. Goldstein said that the theft of such checks usually comes to light when a taxpayer advises the Income Tax Division that his refund check has not been received and the resulting investigation discloses that the check was mailed to the taxpayer and has cleared the State's bank. Thus, he said, many months have passed since the fraudulent transaction and the "trail is cold" insofar as apprehending the guilty party is concerned.

The State, Mr. Goldstein said, is not again liable for the refund but assists the taxpayer in the proper procedure to obtain his money. When the proper investigation has been made and the affidavits filed, the bank first receiving the check will call upon the person who presented it to them, usually a retail merchant, to make it good. In due time the taxpayer receives the amount due him.

This is a costly matter, Mr. Goldstein said, as in most cases purchases were made with the check and the cash exchange given. This means that the merchant loses the merchandise, the cash exchange and the full amount of the check again. Rarely are these imposters apprehended and the merchant usually makes no recovery.

All of this could be avoided, the Comptroller concluded, if proper care were used in accepting checks. If the merchant is not acquainted with the customer he certainly should insist on full and complete identification.

Farm Vacation Plan Gaining Popularity

Here's welcome news for the farm housewife with one or more spare bedrooms, as well as for the family who wants a more restful and less costly vacation

on an approved farm. This year the makers of One-Spot Flea Killer at Jessup, Md., have greatly expanded their national advertising to include the formation of Farm Vacations Club in which the memberships are investigated to screen out undesirable and vacationers are introduced to farmers wanting to board them for \$5.00 a day per person. (More or less, as arranged directly between themselves.)

The scope is national, including Alaska, Canada, Mexico and Hawaii, and the attempt is made to match guest and host as to religion, etc., for the sake of compatibility.

The guest members say where and when they want to go and one or more farms in that part of the country is named for their consideration. Then they contact their prospective host directly and make their own arrangements. Maybe they want to take their dog along; are particularly interested in fishing, etc. Nice to know their exact destination and that they will be welcome.

This season will top all records in vacationers. Facilities for their travel and entertainment will be overtaxed and priced higher than ever. Farm vacations enable city people to explore a new way of life and the kids to play with the baby animals on the farm to gain experience for writing those themes next winter in school.

School Menu

The lunch menu at the Emmitsburg Public School for the week beginning Monday, May 18, is as follows:

Monday, May 18 — Meat loaf, escalloped potatoes, carrot strips, cole slaw, baked apple slices, milk, bread and butter.  
Tuesday, May 19 — Spaghetti with beef, green beans, sliced

cheese, cherry crisp or custard, milk, bread and butter.  
Wednesday, May 20 — Baked beans with chopped franks, cheese filled celery, fruit cup, iced Graham, milk, bread and butter.  
Thursday, May 21—Baked ham (sliced), buttered roll, sliced tomatoes, potato salad, apple or lemon pie, milk, bread and butter.  
Friday, May 22—Grilled cheese sandwich, cream of tomato soup, pear and pineapple salad, gingerbread, milk, bread and butter.

In May, 1775, lumberjacks with muskets, axes and pitchforks, under Jeremiah O'Brien, captured a British war-schooner off Machias, Maine. The Yankees and their sleep are on record as the first sea battle of the American Revolution.

The one millionth Bell Telephone in Maryland was installed in the office of Governor Theodore R. McKeldin in Annapolis on November 20, 1956.

DAYBREAKS

Oddities about people, places and things you'll see on the shows that comprise ABC-TV's "Operation Daybreak" (Mondays thru Fridays)

Peter Lind Hayes, TV's funniest hat wearer, wants hats for his "March of Hats Contest."

Old hats, beat up hats, new hats, funny hats — no hat is too old to enter the contest. If you have the right hat it can win you a trip to New York to appear on the "Peter Lind Hayes Show."

Peter started his appeal for hats on his show of March 2. Contest hats are to be submitted to stores in 22 cities. Each local winner will be awarded a hat certificate. Six regional winners will get a trip to New York and appear on Peter's show. The New York winner will get a trip to Nassau. The contest will be on throughout the month of March.

Friday, March 13th, has no terrors for Liz Gardner, Emcee Merv Griffin's helper on the "Play Your Hunch" ABC-TV daytime. And just to prove that she is not superstitious she went through a series of stunts including breaking a mirror, opening an umbrella indoors and sitting under an open ladder. "I'm just a fatalist," she opined. "If it happens, it happens. I just play my hunch."

Not the usual "Lost, Stolen or Strayed," but just mislaid! That is the problem Bud Collyer and

his staff of "Beat the Clock" are faced with. Bud has been emcee of the show since its inception nine years ago and on the show's birthday, March 23, he wants the contestants who appeared on the first show to do their original stunts again. But the names and locations of the contestants were missing. Now "Beat the Clock" is asking for information as to their whereabouts.

Louise O'Brien is the lovely new singer on "The Liberace Show." By sheer coincidence, she is the third songstress named O'Brien to appear on Lee's five-times-weekly daytime TV series—her predecessors being Joan O'Brien and Erin and Erin

Louise O'Brien. A vivacious brunette, Louise is an alumna of many network TV programs.

Larry Robertson, director of the "Day in Court" TV series, was asked to account for the current popularity of Westerns. "They are popular because they satisfy a basic need," he said. "They restore people's faith that good will conquer evil, as it does in every Western plot. 'If people don't believe that good will conquer evil,' he added, 'what is there left for them to believe in?'"

On January 1, 1879, the first telephone exchange was put in service in Baltimore.

# THIS 'N THAT

By George W. Wireman

On March 18, 1959, President Eisenhower signed legislation that permitted Hawaii to vote itself into the United States as our 50th State.

This new State is made up of eight main islands, none reachable from the other except across deep water of the Pacific Ocean, plus a string of atolls and reefs that shoot 1,400 miles westward toward Asia.

Hawaii, known as the first "Island State," is located in the Central Pacific, some 2,400 miles southwest of San Francisco, and when finding it on a map, it appears to be almost half way between the United States and Red China. It is comprised of some 585,000 civilians and about 60,000 military personnel.

The climate of these tropical islands is mild and the average temperature is 75 degrees.

Hawaii has often been called the "melting pot" of the races, and here's why. Its population is made up of the following; 20% Caucasians; 15% part-Hawaiians; 13% Filipinos; 7% Chinese; 3% true Hawaiians; 2% Puerto Ricans; and 1% of all others.

The first settlers in the Hawaiian Islands were probably Poly-

nesians, who may have arrived there from Asia by way of the Malay Peninsula, Java, and Samoa about 500 A.D.

Historians tell us that until discovered by Capt. James Cook, the English navigator and explorer, on January 18, 1778, the history of the Hawaiian Islands was made up of wars and rebellions among the nobility for power and position.

The nobility and priesthood constituted the ruling class; the common people were oppressed and enslaved.

Kamehameha I, a striking figure in Hawaiian history, ruled one of the four kingdoms, which had been established in the islands, from 1782 until 1810, when he defeated the other rulers and became the sole king. His descendants and members of the other princely houses variously ruled until 1893.

In 1893 a provisional government was set up with annexation to the United States as its aim, but this failed and on July 4, 1894, a republic was established, with Sanford B. Dole as president. Finally in 1898 the annexation of Hawaii to the United States was accepted by a joint resolution of Congress.

On June 14, 1900, the territorial government took office and Dole was the first governor. Thereafter, Americans showed an increasing interest in the islands, moving there to live, investing capital in pineapple and sugar plantations, and generally increasing the importance of the territory.

The economic situation in the 50th State is directly related to the fact that it is a tropical area integrated in the economy of the United States. The total land area is 4,099,840 acres, but only 309,290 acres are cultivated. Forest reserves comprise 1,070,000 acres, and cattle and sheep graze on 1,592,000 acres. The balance is parks, cities, roads, military reservations, and waste land.

The sugar industry comprises some 28 cane sugar plantation companies located on four of the islands. The normal annual raw sugar production totals slightly more than one million short tons. This is about one fourth the sugar produced under the American flag, and about 3 per cent of the world's sugar production.

Hawaii produces approximately 70 per cent of the world's supply of canned pineapple products. Pineapple ranks next to sugar in agricultural importance. Hawaii packs annually about 17,000,000 cases of canned pineapple and 12,500,000 cases of pineapple juice.

Coffee ranks third among the principal agricultural products ex-

ported from the islands. Truck farming, market gardening, and the raising of fruit and nuts are other aspects of Hawaii's diversified agriculture.

In speaking of Hawaii, we are reminded of that fateful day, Sunday, December 7, 1941, while in the midst of peace talks in Washington, Japan made a devastating surprise air attack on the naval base at Pearl Harbor and thus forced the United States into World War II.

Today Hawaii is of great military importance to the United States. It is the largest U. S. base in the Pacific, and is packed with U. S. air and naval power, and is located in the center of an area bounded by four continents — North America, South America, Australia and Asia.

Hawaii's people are famed for their hospitality and varied racial backgrounds. Hawaii has few Negroes. Yet whites are a minority, only about one-fifth of the entire population.

The United States would do well to study and follow in Hawaii's footsteps on racial integration. With all races present on the islands integration is not an issue in Hawaiian politics. There are no race riots, or race problems that compare anywhere near those facing the Northern cities of the United States today. It is most interesting to note that the entire population of the Hawaiian Islands is approximately

585,000, not counting some 60,000 military personnel and their dependents. Chicago has more Negroes than that, as well as many other large nationality groups.

Basically, Hawaii will be known as the resort State. In 1958 it had about 175,000 visitors from the mainland which was about seven times as many as in 1948. Tourist business is going up 10 to 20 per cent a year and with jet planes, to be introduced next year, these figures will go even higher. There is a hotel-building boom in Honolulu. A steel-scrapping mill and an oil refinery are now under construction and a paper mill, using sugar-cane waste, may be built.

The unexpected speed of final congressional approval for Hawaii's Statehood is seen in Washington as a sign of declining power of the Southern bloc in Congress, and of the rising power of the Western States.

When the final test came, the vote was 76 to 15 in the Senate, and 323 to 89 in the House, for Hawaii. As a State, Hawaii will send two Senators and one Representative to Congress.

Hawaii has often been called "the pearl of the Pacific," but due to special legislation of Mar. 18, this title is giving way to a new one. The Chronicle joins with me in extending the hand of welcome to Hawaii—"our 50th State."

at Westminster, 20-12.

Fielding was particularly weak by both teams to contribute to the scoring as the Terrors were charged with seven miscues and the Mount with four.

Luke Fannon led the Mountaineer's attack with five hits, a homerun, two doubles and a pair of singles. Bob Segrell collected four hits and each batted in a trio of runs.

Al Stewart started on the mound for Western Maryland and was knocked out after three innings. He switched to centerfield and wound up with six hits in as many times at bat, including two extra base hits.

Lose Final Game Mt. St. Mary's couldn't hold onto a 4-1 lead built up in the first three innings and lost its final game of the season Friday to the University of Baltimore 9-5 at Echo Field. The Mountaineers finished the season with an overall 3-10 record.

Fran Steedman, who went the route for Baltimore, fanned 11 and gave up seven hits, three of which were off the bat of Luke Fannon.

Vadas, starting Mount hurler, gave up seven runs and yielded nine hits in five innings and was

charged with the loss.

Three homeruns were smacked during the game. Frank Derosa poled one for the Mountaineers while George Politz and Fred Brocklander each connected for one for the Bees.

Baltimore finished fourth in the Northern Division of the Mason-Dixon Conference while the Mountaineers were relegated to fifth place.

## PERSONALS

Mr. and Mrs. Lewis E. Hahn, Union City, N. J., were weekend visitors of their parents, Mr. and Mrs. Arthur Elder and Mr. and Mrs. Clarence Hahn.

Mr. and Mrs. J. Ward Kerrigan spent the weekend visiting their son and daughter-in-law, Mr. and Mrs. Joseph W. Kerrigan, St. Joseph's, Mich.

Mr. and Mrs. Irvin Diefenderfer, New Holland, Pa., were weekend visitors of Mr. and Mrs. Arthur Elder.

Mrs. George E. Martins and daughter, Susan, returned home after visiting a week in Oxford, Pa., with Mrs. Charles Hemler and Mr. and Mrs. Sterling Hemler and family.

## Stock Market Round-Up

Prepared by The Investment Research Department of Hemphill, Noyes & Co. Members of the New York Stock Exchange

February 18, 1959

### Opportunities in the Smaller Steel Companies

Steel shares have performed excellently in the rising market of the past year. This reflected the industry's maintenance of a fair measure of earning power even when the operating rate declined substantially (at one point below 50% of rated capacity). As might be expected the industry leaders' profits held up best and their stocks have now regained or surpassed former price levels in many cases. At present a number of the leading steel issues have reached prices where there appears to be little room for further near-term appreciation.

Among the smaller companies on the other hand the opportunities appear more promising. Their earning power slumped more sharply and the prices of their stocks, despite good recovery in recent months, are in many instances still well below 1957 levels. Earnings have been improving steadily since the summer and should be at attractive levels during the first half of 1959. The producers of specialty and stainless steels are likewise now enjoying expanding operations and even greater operating rates are indicated in the coming months. The stainless and alloy producers, while having a changeable earning picture, have demonstrated an impressive growth pattern in recent years, easily double the growth in usage for the normal grades of steel.

Wheeling Steel: Close to \$3 per share was earned in 1958 and current operations are at a high rate. \$2 a share for the first quarter appears to be a possibility, with galvanized, tin plate, and cold rolled sheet lines in good demand.

Colorado Fuel & Iron: Earnings plummeted sharply in 1958 but a

good recovery is taking place. Granite City Steel: St. Louis has become a substantial automobile assembly and parts manufacturing center in recent years, and Granite City has profited by this development as the only steel plant in this locality.

Pittsburgh Steel: This steel company has been rebuilt to a great degree in the past decade. First of all, their product mix was altered and now finishing facilities have been expanded and are in better balance.

Allegheny-Ludlum: This is the leading stainless steel concern, having also perhaps the leading position in titanium via its 50% interest in Titanium Metals of America in partnership with National Lead.

Copperweld Steel: The company's earning power recovered sharply in the fourth quarter of 1958 when \$1.22 per share was earned. \$6-\$8 a share appears a good possibility for 1959.

Universal Cyclops: Universal produces alloy, stainless, and high temperature electric steels, and has also done considerable work in vacuum melting. In 1960, with most new facilities running, the company could earn \$6 given a fair operating rate.

Eastern Stainless Steel: Volume has expanded rapidly in the past few years, and profitability was above the industry average. New melting and rolling facilities have strengthened the company's competitive position and increased the earnings potential. **INS**

## People, Spots In The News

**BIG BLOW-UP** on coast of France was inflating of hydrogen balloons for stratosphere weather-observing flight by Audoin Dollfus. He soared eight miles, had hoped to reach 13.

**GASP** of surprise escapes Pat Williams, 18, as she's named Miss Sacramento, first step toward Miss America. She won over 9 other finalists, all white.

**DARLING DOTTER**, Sydney McAllister, has spots before eyes, but is no dizzy blonde. She couldn't be and insert those plastic white dots at 610 per hour in top-line Sheffer pens!

**PAIR OF HOODS**—Hooded seals, that is, newly arrived at Coney Island zoo. Three weeks old in this picture, they'll weigh about 1,000 pounds when full grown. This is first time since 1912 that any have been in captivity in the U.S.A.

**MISS MARY L. MOTTER**  
 Miss Mary Louise Motter, Frederick, for many years office secretary at the Frederick YMCA, died Sunday evening at the Frederick Memorial Hospital, after an illness of a week.  
 A daughter of the late Joshua S. and Leathy Stokes Motter, she was born in Emmitsburg. She was a member of Grace United Church of Christ.  
 Miss Motter is survived by a sister, Miss Ruth Motter, of the home address, and a number of cousins.  
 Funeral services were held on Wednesday afternoon at the Etchison Funeral Home, Frederick. Interment was in Mountainview Cemetery, Emmitsburg.

**EHS Senior Class Activities**  
 The senior class of Emmitsburg High School will present their senior play on Thursday, May 21, at 8 p. m. The play, a three-act comedy, is entitled, "The Daffy Dills," by Jay Tobias, is presented through the courtesy of T. S. Denison and Co. The play is under the direction of Mrs. Hazel Caldwell. An evening of entertainment and laughs is promised to those who attend.  
 On May 23, the Jr.-Sr. Prom will be another delightful and memorable occasion for the Jrs. and Srs. of EHS. We will dance

to the lure of Bill Krantz's orchestra. Afterwards we will go in groups to the places of our choice.  
 The Baccalaureate Service will be held in the United Church of Christ on May 31, at 10:30 a. m. Dr. John Howes will deliver the message.  
 The senior class announces its Commencement Exercises in the High School auditorium on June 5 at 8 p. m. Several of the senior class officers will give sohrts talks, after which the diplomas will be presented.

**New Workers Must Apply For Social Security**

Every year about this time many young people start to work for the first time. It is important that each such person have a social security account number card.  
 Your social security account number card is the key to future benefits. Each pay-day your employer will deduct 2½% from your pay. At the end of each calendar quarter your employer will report your name, account number and the amount of your earnings to the Federal Government. He will send with his report the amount he deducted from your wages with an equal amount he is required to pay.  
 All earnings reported for you will be credited to your account. The number of your account is that number on your own social security card.  
 All old-age, survivors and disability insurance benefits are based on the amount of earnings posted to the individual's account. Therefore, it is very important that you show your account number card to each employer when you go to work.

**Cow Bloating Prevalent This Time Of Year**

Researchers are getting closer to the answer to the problem of bloat in cows, but the Maryland State Veterinary Medical Association today said there is still no simple way to prevent this most troublesome of non-infectious cattle diseases.  
 The veterinarians are giving special attention to bloat this month because spring is the major danger season for the condition.  
 "Experiments with penicillin, vegetable oils and some of the new detergents have provided some answers to the problem that costs American farmers nearly \$50,000,000 a year," according to Dr. J. Walter Hastings Jr., of Cambridge, president of the association. "But, unfortunately, there is still no foolproof way to prevent bloat."  
 In bloat there is an excessive accumulation of gas in the stomach which the cow cannot get rid of by belching. Bacteria in the rumen produce the gas.  
 The big bloat producers seem to be legumes such as ladino clover, alfalfa and white clover, but occasionally a cow will bloat on a grass pasture like rye grass.  
 Symptoms include a swelling of the paunch on the left flank of the cow, a stop in grazing, pen mouth, distressed appearance, excessive drooling, standing with feet wide apart, and kicking at the abdomen and rapid breathing.  
 Two of the old preventive standbys are feeding cows a coarse material before pasturing them on bloat producers and maintaining pasture mixtures which contain less than 50 per cent legumes.  
 Although there is considerable disagreement concerning treatment, everyone agrees that the important element in saving the animal is time. Farmers are urged to call their local veterinarian as soon as they spot a bloat case.  
 While waiting for the vet, the farmer can give first aid by placing a gag in the animal's mouth and standing it in a position so that the rear legs will be lower than the fore legs.

**Alumni Group Will Observe 10th Anniversary**

The St. Joseph's High School Alumni Association will celebrate its 10th anniversary by holding its annual banquet and dance on Saturday, May 30 in the VFW Annex. The banquet will be served at 7 p. m. by the Ladies' Auxiliary to the VFW. Honored guests for the gala celebration will be the graduating class of 1959 and members of the Class of 1949.  
 Following the banquet, dancing will be held from 9-12 with music furnished for your listening and dancing pleasure by the Ralph Thomas Orchestra.  
 Alumni members desiring to make reservations for the banquet can do so by contacting Mr. Robert C. Gelwicks, 111 DePaul St., Emmitsburg. All reservations for the celebration must be made prior to Wednesday, May 20.

**ENGAGED**  
 Mrs. Charles D. Hemler, Oxford, Pa., formerly of Emmitsburg, announces the engagement of her son, Charles David Hemler Jr., to Ruth Dooley, of Aberdeen, Md. The wedding will take place some time in September.  
 The Canadian Dionne quintuplets born in 1934 and the Diligent set, born in Argentina in 1943, are the only two cases of quintuplets known to have survived infancy.

**Bi-Lingual Montreal Birds**

Photo: Courtesy Canadian National Railways  
 Both of these fellows speak French better than they do English. They are two of the latest additions to the Garden of Wonders in Montreal's LaFontaine Park. "Blue Boy" on the left, is a Hyacinthine Macaw, equipped with one of the most formidable beaks of any living bird. "Robert," on the right, is a blue and yellow macaw; a species whose feathers are highly treasured. While neither "Blue Boy" nor "Robert" can speak English fluently, both can say a few words in English and quite a few words in French. FNS

**Neat and Sweet, Nice to Meet ... SPRING DATE-LINES**

We're out of winter doldrums and into a more light-hearted season! The heady perfume of lilacs and lilies-of-the-valley fills the air, and young men's fancies turn toward you-know-what. Have you a date at 8:00? Well, on with the preparations.  
 First step is a bath or shower for basic cleanliness and daintiness. A warm, leisurely soak will relax you too, and bring a glow to your skin. Out of the tub, don't forget to use a deodorant like Mum, for instance, to keep you nice to be near all evening long.  
 When it comes to make-up, try the new, pale cosmetics, but experiment a bit beforehand to find what looks best on you. Now, with a swish, into your dress. It could be one of the new Swiss embroideries which are so delicate and feminine. Of course, you've made sure in advance that it is ready to wear—clean and pressed and free of perspiration odor—so all that remains is to step right out—looking your best!

Gettysburg College opened in students and 2 full time professed quarters in 1832 with 23 sors.

**MORE PROOF...it pays to feed PURINA**  
  
 George Harrison herd at Yadkinville.

**1,357 lbs. more milk per cow**  
 George Harrison, Yadkinville, milk producer, has good cause to be a firm believer in the Purina Dairy Program. His 20 cows jumped from an average of 9,726 lbs. milk per cow in 1957 to 11,083 lbs. in 1958.  
 "This shows exactly how much the Purina Program has helped me and my herd," says Mr. Harrison. "And, since these are DHIA records, I know they tell the whole story."  
 "Purina's Program is good for a cow from the time she's born until she leaves the herd," Mr. Harrison adds. "Calves on Purina get off to a good start. Heifers grow up in a hurry, freshen young, and start right in producing like grown cows."  
 See us for details of Purina's Dairy Program. Learn how successful dairymen like George Harrison are raising large, high-producing herd replacements and increasing per-cow production the research-proved, four-square PurinaWay.
