BY ABIGAIL

I'm firmly convinced that unless something is done in the near future about the type of movies being shown our youth these days, parents are going to be shocked at the tragic fate, that must inevitably befall these young people. While I am far from being a prude, I must decry the absolute lack of conventions, moral code or what have you that is so evident in most of the motion pictures being made today.

I recently had occasion to see a film that shocked me to the extent that when I left the theatre I was so incensed I wanted to lash out in all directions, both verbally and physically. As I said before, I'm no babe-in-the-woods and I've seen shows before that were suggestive, off-color and had their share of innuendoes, but never have I seen such a flagrant and complete disregard for all that's decent as this particular show. I saw the other night. Marriage was made to look like something that is completely antiquated and passe, something that is strictly for the birds—if the birds are fools enough. Marriage is no beautiful, sacred alliance,—rather it's a shackle that prevents us from indulging in a giant orgy of sex, promiscuous affairs laissez-faire. For those who are stupid enough to be ensnared in a marriage, the solution then is to capitalize on its protective cloak and still continue to go your own devious ways and continue to "live it up" in as many illegitimate and illegal ways as you can get away with. Yes, these are the lessons in living that are being beamed to your teenagers from the giant movie screens in beautiful warm colors and 3-D, cinemascopes, etc. Frightening, isn't it—But wait, you haven't yet heard the rest of the lessons we were taught in that same film. It was just a check full of slimy, shady things to do—things that parents teach their youth are absolutely tabu. Parents obviously are real "squares" who don't know where-of they speak.

For instance, if you're a winsome young lass with the proper assets, you might completely disregard any and all traffic signals when you're driving in your car. Go through red lights and stop signs and if you get hailed over to the curb by a cop remember, he's only a man and a few sexy gestures will get you off scott free and on your way in a jiffy. All law-enforcement officers are mere duds according to the lessons taught in some of the movies, and as for other drivers and pedestrians—Poof, simply nuisances to be shushed out of the way so you can pursue your own interests.

And then there were the scenes where the beautiful star so nearly completely disrobed herself, plus the ones where the leading man did it for her. Modesty? What's that? That went out with button shoes, it says here. And the conversation that accompanied the disrobing? Shucks, they weren't veiled hints, not by a long shot. It was plain unvarnished language that any young person, male or female over twelve, would understand, especially when the remarks were coincidental with appropriate kisses and caresses that somehow just suited the occasion.

And now, how do you like the things your children are being taught via some of your movies? In all fairness, all movies are not like this. There are still some that are educational, very entertaining and well - worth seeing, but which ones are your children seeing? After seeing unbridled filth like the film I recently saw I can't help but be frightened about the effect films like this can have on the young people who see them. They are not mature enough mentally to know how to cope with emotions that suddenly seem to run rampant within them. They do not have our age, our experience, our knowledge to handle situations that are brought into sudden focus by exposure to such intimate, passionate displays like the ones in question.

Parents for your own sake—may for our CHILDREN'S sake, help them by finding out what shows they are seeing. Insist on knowing, and laying down the law to them as to what is on and off viewing limits. Obviously the Board of Censors is not doing enough. Only by

13 Injured In 2-Car Crash Near Here

Two cars were completely demolished and 13 persons were removed to the Warner Hospital at 12:30 o'clock Saturday morning when the vehicles collided four miles north of Emmitsburg on Rt. 15.

State police said James R. Fortner, 20, Taneytown R2, was driving north with five other young men in his car and attempted to pass another northbound vehicle between Sprigg's Garage and the Truck Stop restaurant.

As Fortner's vehicle swung into the west lane of the highway, it collided head-on with a Florida-bound auto operated by Louis C. Hillman, 35, Rochester, N. Y. There were four adults and three children in the Hillman auto.

After the impact, the Hillman car burst into flames which spread to the Fortner auto. All of the occupants of the vehicles had been removed however before the fire.

Gettysburg and Greenmount fire companies were called to fight the flames and help direct traffic held up by the crash. The injured were taken by ambulance to the Gettysburg Hospital.

Following treatment for his injuries, Fortner was taken by state police before Justice of the Peace John Whitman, Gettysburg R. D., where he entered pleas of guilty and paid fines of \$10 on each charge and costs for making a bad pass and driving without an operator's license. Police said he had not had a license for two years.

Most seriously injured were two occupants of the Fortner car. Floyd T. Misner, 16, Thurmont R1, suffered a fracture of the right hip and lacerations of the upper right eyebrow. Norman F. Anders, 22, Thurmont R1, has fractures of both legs, fractures of the jaw, lacerations of the right elbow and ankle, contusions of the chest and a puncture wound of the right upper stomach. He was removed to the Frederick Hospital.

Fortner suffered lacerations of the right hand and left arm and bruises of the head. He was treated and then discharged.

Others in his car who were injured and treated and then discharged included Roy E. May, 17, Thurmont R1, who had lacerations of the left forearm and left hand; Richard Clabaugh, 16, Thurmont R1, who had multiple lacerations of the right eyebrow, and Robert R. Wilhide, 17, Thurmont R1, who had bruises of the body.

Sportsmen's Club Admits New Members At Meeting

President James Kemp presided at the regular monthly meeting of the Indian Lookout Conservation Club held Tuesday evening at Community Field.

The committee in charge of the annual Carnival gave a progress report and stated that plans to date for the affair which will be held Labor Day week, are progressing nicely. An honorary membership for 1959 was granted to Edward D. Storm, Albert Powell, regional hatchery supervisor, Game Warden Robert Abraham and Richard Jacques, Guy R. Gearhart, Samuel C. Hays, State Senator Samuel W. Barrick and Congressman John R. Foley. The auditing committee, chaired by Harold M. Hoke, filed its report which was accepted as presented. Membership was granted to 25 individuals at the meeting. President Kemp announced the names of the new standing committees during the business meeting. An invitation was extended the local Sportman's Club by the Associated Sportman's Clubs of Central Maryland, to attend a meeting at the Crow's Nest Lodge, Thurmont, on Sunday, June 28 at 2 p. m.

FOOD SALE SATURDAY

A food sale for the benefit of Tom's Creek Methodist Church will be held in the Emmitsburg Fire Hall Saturday morning starting at 10 a. m.

On sale will be the usual delicacies, including sandwiches, cake, candy, soup, potato salad, etc. The general public is cordially invited.

Announce Birth

Mr. and Mrs. Hugh F. Rocks, Mt. Lebanon, announce the birth of a son Friday at St. Clair Memorial Hospital, Mt. Lebanon, Pa. Mrs. Rocks is the former Patricia Fitzgerald, daughter of Mr. and Mrs. Frank Fitzgerald.

NEW SEWER SYSTEM SHOULD BE IN OPERATION IN ABOUT A MONTH

Pictures above are the component parts of Emmitsburg's new sewerage system which will cost the town an estimated \$300,000 and is expected to go into operation within a month: No. 1 is the pumping station, \$38,000; (2) clarifier; (3) biofilter; (4) secondary tank; (5) control building and chlorinator; (6) sludge beds. Nos. 2, 3 and 4 are mammoth tanks where the sewage is reduced to sludge and fluid. W. F. Wilson & Son, Brookville, Maryland is the general contractor on the project.

Road Commission Payouts High

The State Roads Commission announced this week it paid out a record \$12,447,543 to contractors for highway construction during the first five months of 1959.

That is the highest January through May construction outlay the Commission has ever made, according to Norman M. Pritchett, Chief Engineer of the State Roads Commission.

The figure is even more remarkable, Mr. Pritchett said, because the heaviest period of construction activity has yet to come.

Here is the month-by-month breakdown of construction outlays: January—\$2,134,260; February—\$1,610,631; March—\$2,004,

Garden Club Meets

Miss Liza Carpenter was hostess to the Silver Fancy Garden Club, June 18 at her home in Taneytown.

The officers elected for the coming year were as follows: Mrs. John O'Donoghue, president; Mrs. A. A. Koswick, vice president; Mrs. George Thompson, treasurer; Miss Liza Carpenter, secretary; and Mrs. Louis Michea, recording secretary.

Two new members joining the club were Mrs. Donald Coover and Mrs. Margaret Wehler.

Dice are thought to have been invented about 1,244 B.C.

976; April—\$2,516,643; and May—\$4,181,028.

Miss McKee Becomes Bride of George M. Springer At Church Wedding

In a very pretty wedding solemnized Saturday, June 20 at 2:30 p. m., at Four Square Gospel Church, Gettysburg, Miss Alice McKee, daughter of Rev. and Mrs. Jacob Warrenfeltz, Akron, O., became the bride of George Milton Springer, son of Mr. and Mrs. Glen B. Springer, R2, Emmitsburg. The double ring ceremony was performed by the Rev. Harold Myers and the bride was given in marriage by her father. The church altar was decorated with palms, candelabra, white orchids and sweetheart roses. During and preceding the ceremony a number of vocal selections including "Because," "Whither Thou Goest" and "The Lord's Prayer," were sung by Lloyd Fuss, accompanied by his wife on the organ.

The bride was attired in a gown of ivory satin with a chapel train, illusion neckline with a fitted bodice and long sleeves that came to a point over the hands. She carried a cascade bouquet of white carnations and stephanotis. The gown was worn over a hoop and the neckline trimmed in antique lace.

The bride's maid of honor was Miss Barbara Myers of Gettysburg and she was dressed in a gown of lavender silk organza over lavender taffeta of ballerina length and lavender headpiece and matching mitts. She carried a semi-cascade bouquet of pink carnations, rosebuds and lavender mums. The bridal attendants were Mrs. Robert McKee and Miss Joan Thomas, both of Gettysburg and Miss Janet Springer, sister of the bridegroom, Emmitsburg. They wore gowns of pink silk

organza over pale pink taffeta, ballerina-length with taffeta cummerbunds and matching headpieces and mitts. They carried semi-cascade bouquets of pink carnations and rosebuds. Best man was Robert Fuss of Taneytown. Ushers were John Springer, Warrenfeltz, Akron, O., and Charles McNair, Washington, D. C.

The bride's mother was dressed in a dusty rose lace gown with scalloped neckline and beige accessories, and wore a Talisman rosebud corsage. The bridegroom's mother wore a black silk organza dress with matching accessories. The ring-bearer was Michael Myers of Gettysburg and the flower girl was Miss Linda Appar, also of Gettysburg.

For her going away costume, the bride chose a powder blue sheath dress with matching dustier and white accessories. Following the reception, which was held in the church social room, the couple left for a honeymoon to the Pocono Mountains and Cape Cod for two weeks. Upon their return home, they will reside in their newly-furnished apartment on W. Main St., Emmitsburg.

The bride is a graduate of Gettysburg High School, Class of 1958. The bridegroom is a graduate of Emmitsburg High School, 1954, and Mount St. Mary's College, 1959. He is employed as an accountant by The Farmers State Bank, Emmitsburg. Guests were present at the wedding from Ohio, Harrisburg, York, Washington, Gettysburg, Carlisle, Baltimore and Emmitsburg.

GIANTS WIN

The Giants picked up single runs in each of the first two innings to edge the Yanks 2-0 Tuesday evening in Emmitsburg Little League play and moved into undisputed possession of first place. A combination of a walk, a hit batsman, an error and one of the Giants three hits proved Charley Bower's undoing as the Yank hurler tangled in a fine pitching duel with Giant twirlers Bell and Stahley. Pitchers for both sides were extremely effective with men on base.

Denny Stahley and Don Byard helped check the Yanks in the clutch. Stahley saved a run and snuffed a rally in the third with a fine save on an overthrow at third, while Byard did the same thing in the fourth as the Yanks Mike Topper appeared safe in a rundown.

Few people will argue with you when you're telling them how smart they are.

Local Graduate Gets Scholarship

Miss Rebecca Nail, daughter of Mr. and Mrs. Daniel Nail, Taneytown, R2, was recently awarded a four-year teachers' preparation scholarship given by the Rotary Club of Frederick. Miss Nail plans to enter Frostburg State Teachers College this fall. She was recently graduated from Emmitsburg High School where she participated in a number of extra curricular activities as well as maintaining a high academic average. She served as president of the student council, president of the glee club, vice president of the senior class, cheerleader, member of the school newspaper staff and member of the Future Teachers of America. During her senior year, Miss Nail had the honor of being chosen chapter sweetheart of the Future Farmers of America, the local Betty Crocker Home-maker of Tomorrow and the May Queen.

Pontifical Mass Celebrated At St. Joseph College As Portion Of Anniversary Year Card

The Most Rev. John A. O'Shea, C.M., D.D., bishop of Kanchow, Kiangsi, China, celebrated a solemn pontifical Mass Thursday at 11 a. m. on the campus near the Student Center as the Sisters of Charity at St. Joseph College and Central House, Emmitsburg, continued the celebration of the sesquicentennial anniversary of their founding by Mother Elizabeth Seton in 1809.

Thursday's celebration marked the association between the Sisters of Charity and the priests of the Congregation of the Mission, the spiritual fathers of the community. In 1850 the Sisters of Charity founded by Mother Seton were united to the Daughters of Charity, a religious community of women founded by St. Vincent de Paul and St. Louise de Marillac in 1633. Earlier in 1625 St. Vincent de Paul had founded the order of priests called the Vincentians, who are the spiritual directors of the 45,000 Daughters of Charity. The two communities, termed the Double Family of St. Vincent, have a common superior general, at present an American, Very Rev. William M. Slattery, C.M., residing in Paris.

Delegates were invited to attend Thursday's program from each of

the establishments of the Vincentian Fathers and the Daughters of Charity in the eastern part of the United States.

Besides the mass at which Vincentian priests and seminarians from Mary Immaculate Seminary, Northampton, Pa., assisted and furnished the music, and at which Rev. Fr. John Conway, C.M., of St. Vincent de Paul Novitiate, Ridgefield, Conn., delivered the sermon, other activities were also held.

A dinner was served at 1 p. m. in the college dining room followed by a pageant in De Paul auditorium at 2:30 o'clock at which the students of St. Joseph College depicted incidents from the history of the Sisters of Charity.

The cornerstone of the new Immaculate Juniorate, a seminary for postulants to the sisterhood, was laid followed by benediction at the seminary pavillion offered by the Rev. Fr. Cornelius Ryan, C.M.

The day's activities closed with dinner in the college dining room at 5:30 p. m.

On July 31, the anniversary of the foundation at Emmitsburg in 1809, representatives of the hierarchy, clergy, religious orders and laity have been invited to attend another of the sesquicentennial functions.

New Sewer System Nears Completion

Emmitsburg's ultra-modern, multi-thousand dollar sewer disposal plant will be in operation in about a month, officials of the town estimated this week. Started last August the new system is about completed and property owners will be notified, possibly in late July, to begin the task of tapping into the new line just as soon as the cut-over is made.

Elmer St. C. Maxwell, engineer on the project, says the plant is one of the finest in the state of Maryland and has been designed by the engineering firm of Knecht & Maxwell, Pikesville, Md., to take care of Emmitsburg's proposed growth for years to come. The system has been mapped out strategically so that expansion can be accommodated in all four directions of the town. The capacity of the filtering plant, with its component parts, will handle sewerage for at least 350,000, better than twice as many inhabitants as the town has presently. Engineers estimate that the average sewerage in gallons per person, is 100 per day. Should the town double its size, or population, the plant could treat 350,000 gallons on a daily basis.

When complete the system will give Emmitsburg, including Emmitt Gardens, a complete and modern sewerage system. One of the main component parts of the system is the new pumping plant located where the old disposal plant was situated, on Creamery Road. The station will force sewage a distance of 1800 feet changing then to gravity flow for another 1500 to the main treatment plant which enters into Tom's Creek, near the confluence of Flat Run and Tom's Creek. The engineers on the project say there is 30 miles of water shed feeding into Tom's Creek and about 12 miles feeding Flat Run. The combined total flow of these two streams will be more than ample to dispel any affluent coming from the disposal plant.

Emmitsburg has had a real "break" on the cost of the project which will run a trifle over \$300,000, in as much as the Federal Government and State have borne about 40% of the cost of a great many items. In all there are some 25 separate items on which grants have paid 40% of the cost. These include legal fees, advertising fees, engineering fees, entrance road to plant, filtering plant, pumping station, manholes and pipe, over eight inches.

The new pumping station was built at a cost of \$38,000, the filtering plant in the Harry Swomey meadow, \$116,000, the balance of the cost of the project made up the remaining \$154,000. Interjected through the pipeline system are a series of 63 manholes. The figure, when broken down, represents the following types: 16 water-tight; 35 standard; nine terminal and three A-drop. The complete system is comprised of 13,103 feet of 6, 8, 10, 12 and 15-inch pipe and spans from Tom's Creek to the Waynesboro Road west of town. The pumping station is located a distance of 5,372 feet from Tom's Creek.

In explaining the more or less complicated system of operation, authorities in charge of the project relate it operates as follows: The pumping station is the first piece of equipment to go into action, picking up the sewage and sending it a distance of 2800 feet to the heart of the system, the disposal plant, where the first piece of equipment there is the clarifier-gestner, a huge reinforced concrete tank 30 feet in diameter and 25 feet deep. There two sets of agitators break up the sewage and sending in on to the next step which is another large reinforced concrete tank called the biofilter. This tank is 42 feet in diameter and is 7 feet deep. This structure is partly filled with a special stone called trap rock, imported from Virginia and which is resistant to acids, etc. From this operation the third step in the process of breaking up the solids is still another large circular tank called the secondary tank eight feet high and 30 feet in diameter. The sewage by this time is practically reduced to fluid state and is re-pumped and circulated through the three tanks a second time where the solids are relegated to the drying beds (five of them) and the liquids are sent through chlorination at the control house. It is claimed that the fluids leaving the system after chlorination, are 88% pure and cannot possibly harm humans or livestock.

Final completion steps to be made include the blacktopping of

Boonsboro Downs Locals, 5-0

All visiting teams gained victories in the Pen-Mat Baseball League Sunday afternoon. Fairfield pulled closer to second place with a 4-2 triumph at Hanover in a 10-inning affair. Boonsboro's league - leaders blanked Emmitsburg 5-0, while Blue Ridge Summit downed Taneytown 10-6 in a free-scoring contest.

Table with columns: Team, W, L, Pct. Boonsboro 7 1 .875, Hanover 7 3 .700, Fairfield 5 4 .556, Blue Ridge 4 6 .400, Taneytown 3 6 .333, Emmitsburg 2 8 .200

Effort To Be Made To Register State's Arthritics

The first concentrated effort to register all arthritics in Maryland in order to supply them with medically approved information and to aid them with advice and information concerning treatment facilities available to them will be conducted during the month of July by the Maryland Chapter of the Arthritis and Rheumatism Foundation.

Tilton H. Dobbin, President of the Maryland Chapter, said this week, "Too many arthritics are needlessly crippled because they lack understanding and proper treatment. Medical science, with its present knowledge, can prevent serious crippling in three out of four persons afflicted with arthritis if symptoms are recognized early and treatment is begun promptly."

HEALTH HORIZONS

New Tasty Liquid Pain Reliever - Child's Boon

Since ancient times the salicylates have occupied an important place in the physician's armamentarium as pain reliever and fever reducing agents.

Hippocrates, the father of medicine, used salicylate-bearing bark from a willow tree to ease pain more than 2350 years ago.

Indeed, in more recent years, the salicylates have been used more than ever by physicians as the preferred analgesic, anti-fever and anti-inflammatory agents.

However, a marked disadvantage of previously available salicylates is their lack of adaptability to administration in liquid form. Aspirin is not only relatively insoluble in aqueous vehicles, but is unstable.

There has long been a need for a satisfactory and accepted liquid form for the administration of salicylates. This is quite apparent, since infants and young children do not readily accept tablets and capsules as they have a tendency to "gag" and reject the medication. It is possible, of course, to crush up tablets or empty the contents of the capsule and add either to liquids, but precise dosage is rendered either difficult or impossible.

The effectiveness of the salicylates as a pain reliever or fever reducer greatly depends on the dosage level and the rapid concentration of the drug into the bloodstream. Therefore, the above method accomplishes little or nothing for the patient.

Recognizing the need for a drug that would surmount these problems, medical scientists have researched and developed a new cherry flavored drug; Actasal Pediatric Drops, which overcomes to a great degree most of the disadvantages associated with other salicylates.

The major ingredient of Actasal Pediatric Drops is choline salicylate, a newly synthesized chemical compound which acts 5 times faster than aspirin, enabling it to be absorbed more quickly and sustained in the bloodstream for a longer period, thus making it more effective.

Clinical tests were recently conducted at a selected group of large medical centers on approximately 300 male and female infants and children (ranging in age from 3 months to 16 years) to determine the acceptability and therapeutic effectiveness of the drug. The diseases treated were acute respiratory infections, tonsillitis, headaches, malaise, pain associated with menstrual cramps, tooth extractions and following immunization procedures.

PERSONALS Miss Yvonne Topper, Baltimore, visited over the weekend with her parents, Mr. and Mrs. Louis Topper.

Mr. and Mrs. Jerome Peters and children, Baltimore, were weekend visitors at the home of Mrs. Peters' parents, Mr. and Mrs. Guy A. Baker Sr.

Mr. and Mrs. Charles Peters and daughter, Anna Marie, Philadelphia, have returned home after spending the past week with Mr. Peters' mother, Mrs. Gertrude Peters, and his brother-in-law and sister, Mr. and Mrs. Kenneth Vaughn and family, here.

Rev. Fr. Charles Stouter, C.M., Brooklyn, N. Y., is visiting for a time at St. Vincent's Rectory.

Mr. and Mrs. Richard Fitz, of Gettysburg, visited during the weekend with Mr. and Mrs. Maurice Fitz and family.

Mrs. Joseph Labert, Utica, N. Y., is visiting her son-in-law and daughter, Mr. and Mrs. Charles Edmund Baker, W. Main St., this week.

Mrs. Matt J. Paidakovich and children, and Mrs. Otto C. Weigand, Silver Spring, Md., are visiting this week with their mother, Mrs. Genevieve R. Elder.

Mr. and Mrs. Carmel Kelly and family, Gettysburg, spent the past weekend with Mr. Kelly's mother, Mrs. Rose Kelly, E. Main St.

Those attending the Fourth Degree Knights of Columbus picnic held Monday evening in Frederick were Mr. and Mrs. Guy A. Baker Jr., Mr. and Mrs. Joseph M. Haley, Mr. and Mrs. Robert L. Koontz and Mr. and Mrs. C. Arthur Elder.

Mr. and Mrs. Paul Keepers and children, and Mrs. Ralph Long and daughters, visited Mr. and Mrs. James Nickoles and family, Westminster, Friday evening.

Mrs. Ann G. Roger and Mr. and Mrs. Eugene Kraemer visited last Sunday with Sister M. Vestina, Mrs. Roger's sister, at St. Mary's Convent, Scranton, Pa.

Mr. and Mrs. Richard Florence and family, Jamestown, N. Y., spent the weekend with Mr. Florence's parents, Mr. and Mrs. Romanus Florence and daughter.

Master Tommy Combs, Camp Hill, Pa., is visiting his grandparents, Mr. and Mrs. C. C. Combs.

Miss Octavia Troxell, Westminster, visited with her parents, Mr. and Mrs. Henry Trorell, over the weekend.

Mr. Patrick Haley recently moved from an apartment on W. Main St., to his newly purchased house trailer, located near Fairfield.

Mrs. Alton Edwards, Baltimore, spent the weekend with her mother, Mrs. Margaret Topper.

Mr. and Mrs. Harold Ditzler and daughters, Biglerville, visited with Mrs. Ditzler's parents, Mr. and Mrs. Clarence Sanders, over the weekend.

Mr. and Mrs. J. H. Elliott and family and Mrs. Euphemia Rotering moved last week to Baltimore.

Allen Sanders, Bethesda, visited his parents, Mr. and Mrs. Clarence Sanders, over the weekend.

Mrs. Jack Besash and children, Philadelphia, visited her parents, Mr. and Mrs. Fred Timmerman, during the weekend.

John Roddy, Falls Church, Va., visited in town Saturday evening.

Mr. and Mrs. George Wilhide, Mr. and Mrs. Clarence Frailey, Mrs. Alice Shorb, Mrs. Marie Ro-

ensteel, Frank Weant and George Springer attended the meeting and banquet of the Blue Ridge Conference of National Association of Bank Auditors and Comptrollers held at the Peter Pan Inn, Urbana, last week.

Mr. and Mrs. Rodgers Topper, Mt. Airy, visited Sunday with Mr. Topper's parents, Mr. and Mrs. Robert Topper.

Mr. and Mrs. Charles Gutshall and daughter, Vickie, Waynesboro, visited Sunday with Mrs. Maude Harbaugh and Mr. and Mrs. Robert Orner and family.

Mr. and Mrs. William Umbel and family, Waynesboro, visited Saturday with Mr. and Mrs. Wilbur Umbel and with Mrs. Edna Tressler.

Miss Theresa Kelly spent a few days in Hagerstown this week, visiting her brother and sister-in-law, Mr. and Mrs. James R. Kelly.

OVER THE GARDEN-WACCS

Let Nature take its course? That's what a friend of ours decided this spring. Organic gardening, he called it. No fertilizer. No insecticides. No fungicides.

At least, that's what he thought. But when the bugs began to nip his yellowed beans, he decid-

ed it'd be better if he'd step in and lend Mother Nature a helping hand, with fertilizer and insecticides.

And sure enough, his garden perked up, even after a slow start! Garden Husbandry

Husbandman. That's what a good gardener is. The dictionary says this about the verb, husband: "To direct and manage with frugality; to use or employ to good purpose and the best advantage..." It goes on for a couple more lines, but we think you'll get the idea.

We don't want to pick any fights with the organic gardeners. They're good folks. But we figure that Mother Nature needs a helping hand. And she shows her appreciation by blessing us with greater bounty.

Plants do not care where they get their food. But they do need

food. If you could supply all they need through organic sources, as easily and inexpensively as you can from chemical sources, go to it. Because adding organic matter will certainly help the soil. One of the first things a good gardener needs is know-how. This will help him with all the rest: good soil, good varieties, good insect, disease, and weed control, good cultural methods and good equipment. Put them all together, and you've got a good garden. That's husbandry.

Fact Or Fancy? There's a lot of gardening facts and fancies floating around. But given the choice between fancies and facts, the wise gardener will choose facts.

Most of the facts about vegetable and fruit varieties, ornamentals, plant culture and pest control have been carefully proven through research. The University of Maryland Agricultural Experiment Station has contributed many new varieties, and a lot of other helpful information on culture and care. So have other state experiment stations, the U. S. Department of Agriculture, and the many private research organizations of pesticides equipment and seed companies.

By applying science to the art of home horticulture, these experiment stations have added, and are continuing to add, much new knowledge to make gardening—as a matter of fact, all our living—more economical, better and more enjoyable.

And so the next time you hear some garden advice, ask yourself, or the other fellow, "Is it fact or fancy?" If you don't know, you might experiment with it yourself, before going all out on the new practice.

Control Weeds A weed is a plant that's growing where you don't want it. And nobody wants poison ivy anywhere.

This is a good time to control poison ivy or other woody-type weeds, like honeysuckle or greenbrier. Amino Triazole, Ammate, or Brushkilled (2, 4, 5-7) are all effective, if applied right.

If there are broadleaf flowers, shrubs or vegetables around that might be hurt by the 2, 4-D class weedkillers, best use Amino Triazole or Ammate. But even yet, be careful, so that you kill only the unwanted brush.

Read and carefully follow directions on the can, or for more

SPORTS AFIELD

By Ted Kesting

Just a few years ago, if you told anyone there was a radio telephone on your boat, it was just another way of saying you owned a yacht. Such instruments just weren't used on lesser craft. In those days radio telephones were not the slim, efficient, simple-to-operate instruments that are available today, which are suitable for yachts and outboards alike. Now many efficient models are even smaller than a master angler's tackle box, says Willard Crandall, Boating Editor of Sports Afield Magazine.

Almost a necessity as they are for yachts, marine radio telephones can be even more valuable for outboards. Radio direction finders, another new development, are of equal importance to large and small boats, while depth sounders, last of the trio of new electronic marvels for boats, even the score by being most useful for larger craft. But when the sounders are used to search for fish, their value is just as great with a standard outboard as with a 35-foot glass enclosed cruiser.

A radio telephone is as simple to operate as an ordinary dial telephone. It clicks to the right channel, as easily as a television set. Turn the receiver switch on and listen over the speaker (a few sets have headphones instead) to be sure there's no con-

versation going on you'd interrupt. Then flip the transmitter switch and talk into the microphone, which is usually on a flexible cord. There is no need to be mystified by the "lingo" of talking over the air.

Radio direction finders are simply radio receivers with such extras as are essential and helpful in determining as exactly as possible the direction of any radio broadcast or signal being received. Chief of these extras is a rotating loop aerial. It is spun, automatically on more expensive sets, to whatever point gives the strongest signal. This shows the exact line the broadcast is traveling to reach the boat, but does not in itself show which end of this line the station is on. Ordinarily the set has an additional, fixed antenna to tell which of the two exactly opposite directions is the correct one.

Depth sounders merely transmit sound or similar waves straight down, then measure the length of time it takes for them to bounce or echo back. A pointer, dial or substitute indicates the depth, or on more elaborate models it is sketched on a graph. Outboarders usually have little concern about depth; the larger the inboard the more concern. Of course, the sounder does not distinguish between the bottom and any solid object, such as an old wreck, above the bottom; but the inboard doesn't want to bend a propeller on twisted steel any more than on a rock.

and Camp Woodrow Wilson near Lorton, Va. All three camps opened Sunday and will run for nine weeks, closing August 15. Over 6,000 boys have made reservations to attend one of the three camps. R. Glenn Singleton, Scout Executive of the National Capital Area Council stated that this was a record attendance.

Each Scout attending camp will spend his time swimming, boating, fishing, hiking and boning-up on the Scouting skills that will qualify him for a higher rank. Camp Roosevelt, located on the

Chesapeake Bay, will feature a new swimming pool, just completed. The bay will still be used for boating and canoeing.

Camp Directors are John Gronemeyer, Camp Roosevelt; Richard Kubier, Camp Wilson; and Col. Beldon Lidyard, Camp Thunderbird. All three men are members of the Executive Staff of the National Capital Area Council.

George Barnett, twelfth Commandant of the Marine Corps, was the first Commandant to be appointed to a four-year term.

TOTS and TEENS

By Mrs. Joan Cameron

With school nearly over, we Camerons have been buzzing with vacation plans. The other day, we decided it would be fun and educational, too, if the whole family piled into the car and got better acquainted with this glorious country of ours.

Our plans call for two months of car travel and camping. We're going to catch fish, cook 'em outdoors and have the stars for our ceiling some nights. We'll be "free as birds" because my husband's partner has generously consented to handle the business this summer if Jim will do the same for him next year.

This will be our first try at roughing it. Other times, we've worried over what to wear where. But, on this trip, we don't want "tons" of luggage and packing problems so we're taking lots of "drip-drys" and crease-resistant togs that will do for more than one day. We'll have a small first-aid kit to handle any minor mishaps. It'll contain baking soda for tummy troubles, burn and bruise soothing Vaseline Petroleum Jelly, aspirin, anti-motion sickness pills, bandages and antiseptic. Jim says that he'll be strict about overloading the

On the Road

car. He wants an unobstructed view of the highway and he does not want us to get irritated because we're too crowded.

We're marking our road map with black crayon to make it easy to read. But, we won't stick rigidly to our route. When we feel car-weary, we'll take jaunts to spots that are off our beaten path. And each day, we'll stop around 4 p. m. before dusk and fatigue set in.

Looking Ahead

...by Dr. George S. Benson
DIRECTOR - NATIONAL
EDUCATION PROGRAM
Searcy, Arkansas

Profits And General Motors
A wise economist, Dr. Howard Kershner, explaining the vital role of profits in the American way of life, recently said: "Profit might be said to be a commission paid to the person who renders an important service to another." This definition may be applied to an individual profit-maker, or to a company, or any one of America's big industrial corporations. Since General Motors is one of the biggest, and since the profit system is such a vital element in the welfare of all Americans, let's look at General Motors' profit statement.

First the figure published in big type in newspapers recently: "General Motors in 1958 made a profit of \$633 million." That's a lot of money! But let's see some other figures. This profit came from sales totaling \$9 1/2 billion. The percentage of profit on the sales dollar was 6.7. Your corner druggist or hardware dealer will tell you this isn't very high profit. When

the total 1958 dollar profit of General Motors was spread out among the common stockholders, each made just 4 per cent on his investment. There are more than 750,000 GM stockholders in all, including many GM wage earners.

Where Income Went
When the GM sales dollar is broken down, we find that 51 1/2 cents out of each dollar of income went to GM suppliers—approximately \$5 billion. This means that about 30,000 other companies, with millions of employees, has a share in the business done by GM in 1958. The next biggest slice of the sales dollar—30 cents—went to GM employees—520,925 of them! To provide tools for these job holders, the 750,000 owners of GM have invested an average of 015,000 for tools, plant, and working capital for every job. The hourly-wage employees in GM plants throughout the nation, living and working in hundreds of cities and communities, earned \$2.82 an hour on the average in 1958—\$107.38 a week for 38 hours' work (the average). In addition, pensions, hospitalization, life insurance, unemployment and other benefits were provided.

General Motors in 1958 paid 8 cents of each sales dollar in taxes—\$759 million in local, state and federal taxes. This meant that each of the 750,000 owners of GM paid more taxes per share of stock owned than they retained as profit on their investment. For each \$2 earned by the common stockholders, \$2.72 was paid in taxes. "Commission" For Service
These facts certainly show that the profit "commission" which Americans paid to General Motors in 1958 brought forth important service to the nation—employment of more than a half million people at exceptionally good wages; supplying business for thousands of other firms with millions of employees; paying big amounts in taxes to help finance all kinds

of local, state and federal governmental services; providing a variety of acceptable products to make life better for millions; and, lastly, exploring into the amazing industrial future.

My wise economist friend said: "Profit might be said to be the fertilizer that stimulates the imagination, the initiative, and the efforts of men to find better ways of doing things." With one-half cent from each of its sales dollars, General Motors in 1958 built new plant facilities, kept its working capital fund of adequate size to handle the business, and conducted research "to find better ways." One example: After 10 years of extensive research, GM introduced in 1958 its new Acrylic Lacquer (Magic Mirror) finish for passenger automobiles. This, the company confidently says, will save car owners much 'elbow grease because it keeps its brilliant shine for years without polishing.

Cars Of Future
Still another example of service to the people in constantly improving products is GM's experimental Firebird III, shown at the New York auto show last October. It has an amazing "Unicontrol," a control system operated by a single stick which replaces the conventional steering wheel, brake pedal and accelerator. Also, Firebird III is powered by a gas turbine engine which in the auto of to-

OUR STATE UNIVERSITY

Maryland students who wish to

morrow will probably use lower cost fuels and have many performance advantages over the conventional motor of today. It should be noted too that GM research and production constitute a tremendous security factor in America's national defense—its know-how, its vast complex of industrial techniques, its organizational resources are priceless assets in our defense system which holds back the Communist juggernaut.

This brief look at profit and General Motors doesn't mean that we are GM stockholders. We aren't. And in our organization we also use Chrysler and Ford and other competitive products, and like them just as well as those from GM. We have reviewed these facts about GM because it is big, and well-known, and because it performs, we think, a great service to the American people, as do its competitors, as do most American privately owned enterprises operating within the great system of American capitalism.

take graduate training in library science may do so at the University of North Carolina, under a newly completed arrangement between the University of Maryland and the Southern Regional Education Board.

The program calls for students who are accepted by the University of Maryland, recommended to the University of North Carolina, and accepted in the Graduate School of North Carolina, to take the necessary work for a master of science degree in library science at Chapel Hill, N. C.

Under the arrangement, out-of-state fees will be paid from a regional education fund that is appropriated to the University of Maryland by the General Assembly.

Assistance on out-of-state fees is available to a Maryland resident for a maximum of three semesters or four summer sessions, following recommendation by the University of Maryland and acceptance by the University of North Carolina. Final decision on the student's acceptance for admission will be made by the University of North Carolina.

Maryland students who are qualified for this advanced training should contact the University of Maryland director of admissions at College Park.

An Indian puts it this way: "When they smoked the peace pipe in 1918, nobody inhaled."—Gospert, Pensacola, Fla.

DOG OWNERS!

BUY YOUR LICENSE BY JULY 1, 1959

The law provides a fine of from \$5.00 to \$25.00 on any owner of a dog, six months of age or over, which is not licensed after July 1, 1959.

LICENSES ARE AVAILABLE AT THE
County Treasurer's Office, Frederick, Maryland

You can fill in this form and mail \$1.00 for Male or Spayed Female, \$2.00 for Female; \$10.00 for Kennel not (more than 25); \$20.00 for Kennel (more than 25), to JAMES H. FALK, County Treasurer, Courthouse, Frederick, and your license will be mailed to you.

COUNTY TREASURER,
FREDERICK, MARYLAND

Please send me tag for my dog described as follows:

Owner
Postoffice
Election District
Male..... Female..... Age..... Spayed.....
Breed Name

If dog is not six months of age by July 1, 1959, license must be bought when dog becomes six-month-olds.
Failure to buy your dog a license will mean not only your arrest, but your dog may be picked up and impounded.
The license does not give the dog the right to trespass on anyone's property without the permission of the owner.

HORACE M. ALEXANDER,
Sheriff of Frederick County, Maryland
The County Dog Deputy will canvass the County to ascertain if all dogs have been licensed.

TV TODAY AND TOMORROW

BY RALF HARDESTER
Feature Editor TV GUIDE MAGAZINE

THE HALLMARK HALL OF FAME PRODUCTION of "Ah! Wilderness," scheduled for late spring, will star Helen Hayes, Burgess Meredith and Lloyd Nolan . . . A series called Magic Carpet is being prepared for Jackie Coogan . . . Lee Bowman's upcoming Miami undercover series will feature Rocky Graziano in a running role . . . Film reruns of last year's Suspicion series are slated to serve as summer replacements for the Steve Allen Show . . . Playhouse 90 scheduling a play about the Nuremberg trials, to star Maximilian Schell, brother of actress Maria Schell . . . There are still several shopping months until Christmas, but there's a Christmas special in the works already—Burl Ives in "Santa Claus Is Coming to Town." The producers see it as a yearly affair . . . A comedy series based on the "Beetle Bailey" comic strip being submitted to comedian Mort Sahl.

NOVELISTS JOHN P. MARQUAND AND THOMAS B. COSTAIN will undertake the Second and Ninth Commandments, respectively, in script form for NBC's planned 90-minute Ten Commandments series of specials . . . John Daly and the ABC News staff will investigate the Congressional investigating committees in a one-shot documentary . . . Comedian David King, described as British TV's Sid Caesar, tapped to replace Milton Berle on NBC starting in late May. He'll bring his own company from England, but will also feature American guests . . . "Gunshy," the Maverick spoof of Gunsmoke, will be repeated this June . . . Writer Rod (Playhouse 90) Serling's first half-hour film series, Twilight Zone, has been bought by a sponsor and will be fitted into the CBS fall schedule . . . Bob Hawk, long-time radio emcee, has taped a test show for a new panel series, What a Coincidence.

BOB (ELLIOTT) AND RAY (GOULDING), ABSENT FROM TV for several years except for their Piel brothers commercials in the East, mapping a new half-hour comedy series in association with Sylvester (Pat) Weaver . . . ABC is boasting that it's the first to schedule shows on our two new states—The Alaskans and James Michener's Adventures in Paradise, to be set partly in Hawaii. Both set for next fall . . . Gene Kelly's NBC contract calls for a minimum of one special a year that he'll star in, produce and direct. He's to deliver each show on a budget of \$200,000 . . . Van Johnson, Keenan Wynn, Neville Brand and Bill Williams to star in Desilu Playhouse's two-part story of the Al Capone era . . . All-star musical show in the works for the summer will have Celeste Holm as hostess, plus Imogene Coca and Shirley Jones and Jack Cassidy. It's now being pitched to networks and sponsors.

Amazing New Lawn Discovery

ROBOT GARDENER

- * FERTILIZES AS YOU WATER
- * SAFE ON ALL TYPES OF GRASS
- * RESULTS IN 72 HOURS
- * WILL NOT BURN YOUR LAWN
- * KILLS WEEDS AND CRABGRASS
- * KILLS SOIL INSECTS

WITHOUT HARD WORK!

The Robot Gardener Kit gives you everything you need to make lawn care or gardening easy! The Robot Gardener Kit will fertilize your lawn; kill weeds and crabgrass; destroy ants, mosquitoes, grubs and other soil insects easier, faster and more efficiently than ever before. Just insert the specially formulated chemical cartridges in the chamber, attach to the proper watering system and turn on the water. That's all there is to it! In 72 short hours your lawn will become greener, more luxuriant, and the envy of all your neighbors!

Here's everything you get in the Kit to make gardening easy:

2 lbs. Fertilizer; (25-20-11) enough to cover 2000 square feet. Automatic Robot Gardener Chamber. Weed and Crabgrass killer (64% Potassium Cyanate—18.4% 2-4-D)—enough to cover 2800 square feet. Insecticide (16% Chlordane)—enough to cover 1200 square feet.

WEEDS — Robot Gardener weed cartridges kill ugly crabgrass, and varieties of broad-leaf weeds such as plantain, chickweed, dandelions.

FEEDING — To fertilize, you merely fill the Robot Gardener with the high-potency fertilizer cartridges and turn on water. Enjoy a rich green lawn!

INSECTS — Spray your lawn, porch, or terrace with Robot Gardener insect killer to kill mosquitoes, ants and other pesty, destructive soil insects.

Complete KIT ONLY \$4.95
KIT \$6.45 value

THE WORLD'S MOST WIDELY USED DEVOTIONAL GUIDE

Read Acts 9:26-31.
He (Barnabas) was a good man, full of the Holy Spirit and of faith. (Acts 11:24).
Is the New Testament we have reference giving insight into the life and character of Barnabas. Luke says of him, "He was a good man." Only a good man would sell his land and lay all the money at the apostles' feet. In the early days of the church it took a good man to see that the gospel was meant for the Greeks as well as for the Jews. It took a man of spiritual insight

to see the capabilities of Saul, the new convert to the faith. Barnabas was "full of the Holy Spirit." The apostles surnamed him Barnabas, meaning "son of encouragement." They sent him out to tell others of Christ and teach and encourage the believers. Barnabas was a man "of faith"—faith in God and in the church. He had faith in others. He convinced the apostles that Saul of Tarsus was worthy of acceptance into their fellowship. Later on, Barnabas remained steadfast in his faith in Mark when Paul had

lost confidence in him. Luke has paid deservedly high tribute to Barnabas in his simple statement: "He was a good man, full of the Holy Spirit and faith." Prayer
Our Father, we thank Thee for godly persons of the past and of the present. We thank Thee that by Thy grace we, too, can walk in the light of Christ amid the darkness of this world. In Christ's redeeming name we pray, Amen. Thought For The Day
Godliness begins in us with our acceptance of Christ as our personal Saviour.
Russell Q. Chilcote, Editor, (Tennessee)

New Wheat Allotments July 1

A farmer who desires to be considered for a "new farm" wheat allotment for the production of winter wheat in 1960 must apply for it not later than July 1, 1959 according to Julius P. Parran, Chairman of the Maryland Agricultural Stabilization and Conservation Committee. The application should be filed in writing at the county ASC office.
In general, if the farm does not already have a wheat allotment and has not produced wheat in the past three years, it is regarded as a new farm for allotment purposes. Factors considered in determining whether a farm is eligible for a new farm allotment will include the tillable acreage, type of soil and topography of the farm. The operator's farming system is studied and the extent to which his livelihood depends on his farming operations. He is also asked the reason wheat was not planted on the farm in past years.
Farmers who already have wheat allotments on their farms are not required to make application and will receive their 1960 wheat allotment in advance of the wheat referendum scheduled for July 23.

HEALTH COLUMN

The Wonderful World of Vitamins
You don't usually expect to find news about health—and especially

food—back on the sports page. But not long ago the Philadelphia Eagles, the Pennsylvania city's professional football team, made some news that had nothing to do with field goals and end runs.
The doctor of the football team reported that he has been feeding the boys special citrus fruit derivatives. One of them is Vitamin C. Another is called hesperidin. Taking these vitamins in three capsules every day, the doctor claims, has helped the players avoid the big bruises that usually trouble them after a rough, tough game. The doctor thinks the citrus derivatives strengthen the capillaries, preventing the wholesale breakage of tiny blood vessels that make up a bruise.
This is one instance when the taking of vitamins for a special purpose is probably a good idea. For the most part, though, medical scientists insist that you don't have to take special vitamin preparations—pills, liquids, or anything else—if you eat a normal balanced diet.
It's possible to suffer deficiencies in the nutritive values you need, even when you eat what appears to be a full diet. Some children, for example, have been found to suffer from a lack of proteins for a very simple reason. Proteins are not found in generous amounts in sweet foods—and children reach for sweets more often than meats.
But if your diet is well-rounded, with a good selection from the three main food groups, you should never be deficient in any vitamin. The three groups are, first: milk, eggs, lean meats, and fish; second: fruits and green and yellow vegetables; and third: enriched or whole grain bread and cereals. Three meals a day of these foods in reasonable amounts make any kind of supplementary feeding out of a bottle of pills quite unnecessary.
This column is a Christmas Seal service of your tuberculosis association.

PTA Group Convenes At Salisbury Monday-Tuesday

More than 300 delegates from all sections of the state are expected to attend the annual Summer Conference of the Maryland Congress of Parents and Teachers to be held June 29-30 at the Salisbury State Teachers College. The Conference, held each summer to provide leadership instruction to everyone active in PTA work, has been held at the University of Maryland in previous years.
Addresses of welcome will be given by Mayor Jeremiah Valliant of Salisbury, Dr. Wilbur Devilbiss, president of the Salisbury State Teachers College, and Mr. Royd Mahaffey, superintendent of Wicomico County schools. Dr. Frederick George Livin-good, head of the Department of Education and Psychology, Washington College, will be the keynote speaker. The title of his address will be "Leadership—Its Qualities and Responsibilities."
Scheduled for both days of the Conference are panel discussions of various phases of PTA work, ranging from the conduct of meetings to the presentation of legislative proposals. These discussions will be led by Maryland Congress Board members: Mrs. Fred L. Bull, Mrs. A. K. Romoser, Mrs. William F. Robie, Mr. Harry Ocker, and Mr. Bruce Bowman. The Conference will conclude following a report by panel discussion leaders to Mrs. Cecil E. Ewing, President of the Maryland Congress of Parents and Teachers.

Gettysburg College Receives Gifts

GETTYSBURG, Pa.—Gettysburg College has received three gifts totaling over \$22,000, W. S. Paul, president, announced.
Gettysburg's share in a grant by the Foundation for Independent Colleges, Inc., Harrisburg, amounted to \$13,088. The Foundation, embracing 42 colleges and universities in Pennsylvania, is designed to interpret the significant role of independent colleges to society. The participating institutions present a joint annual appeal to business and industry for funds to better their educational services.
Gettysburg College also received a bequest of \$9,250 from Samuel P. Caltrider, Westminister, executor of the estate of the late Effie E. H. Belt. An 1898 Gettysburg graduate, Mrs. Belt willed the sum for establishment of a scholarship fund. She was a retired teacher.
A third grant came from Aircraft Marine Products, Inc. The Harrisburg industrial firm gave \$500 for the college's general fund.

Civil Service Jobs Available

Approximately 50 librarians are needed in Veterans Administration Installations located throughout the United States (except in Alaska and Hawaii) and Puerto Rico, the United States Civil Service Commission announces. The vacancies are in patients' libraries and medical record libraries, and pay entrance salaries of \$4,980 a year.
To qualify, applicants must have completed a full college course which included at least 24 semester hours in library science. In addition, they must have had 1 year of experience as a librarian or 1 year of graduate study in library science.
For full information regarding the requirements and instructions on applying, applicants should see Announcement No. 197B which may be obtained at many post-offices throughout the country or from the U. S. Civil Service Commission, Washington 25, D. C. Applications will be accepted until further notice.

It's sometimes hard to realize it, but the current crop of high school and college graduates doesn't remember the depression of the thirties at all.

"Well, first you get some decent fishing tackle... then..."

No matter how tough the problem, do something then try again!

Bragging Drivers Cause Accidents

By Martha Johnson
Dodge Safety Consultant

Do you have to show off the power of your new car? Do you have to demonstrate your skill in making time through traffic?

The National Safety Council warns that this kind of "YOU" causes accidents.

You may be an experienced driver, but if you have the competitive urge to pass cars even when you're not in a hurry—then you're asking for trouble.

If you have to beat everyone away from the light, and insist on keeping the other fellow in his lane—you are in danger of becoming a traffic statistic.

The over-confident driver causes many accidents. He gets a sudden feeling of power when he takes the wheel. This power-complex leads him to take chances. And, when you take chances, you frequently don't win.

Try to remember that the other driver pays highway taxes too. It's his road as much as it's yours.

The other driver has just as much right to the road as you have. Don't try to compete with—just try to live with him.

Give him part of your share of the road, and be safe.

"Phone us if you need us"

A girl's best friend is often her telephone—whether she's twenty-five or five.

When you're twenty-five, the mother of a five-year-old, and going out for the evening—it means a lot to know that your favorite baby sitter can call you by phone should anything unusual occur to worry her.

That silent phone says, as clearly as words, that all's well at home.

Sometimes the calls that aren't made (because they aren't needed) add as much to living as those we like to make. Perhaps that's what makes a phone worth so much more than it costs.

What Is Fallout?

There are always certain amounts of Strontium-90 in the atmosphere, but usually not to any dangerous extent. Every nuclear test, however, produces more Strontium-90. Hence, there is a strong movement to suspend further nuclear tests. Even Russia pretends interest in doing so. The reason for this is that the contamination of the atmosphere by these tests is cumulative; that is, it does not pass away for a long period of years. Thus, Strontium-90 keeps on building up to a dangerous amount.

Just now there are differences of opinion between the Atomic Energy Commission and the U. S. Public Health Service as to the danger of this fallout. All parties agree that it can become very dangerous, but they disagree as to the amounts. The medical profession believes that sufficient amounts may cause cancer of the bones, leukemia, and certain other incurable diseases, as well as sex changes. It may be absorbed by children and not mature to a dangerous disease until some years after.

Every State Has Advantages And Disadvantages
In my years of travel I have been unable to decide which of our 49 states has the most ad-

vantages. If I were able to choose which of our states I would prefer to have been born and brought up in, I would be unable to make a selection. The South has a warmer climate, which I certainly enjoy in winter; New England is the place I like in summer, although we have hot days here; while the Central States, the West, and even the Pacific Coast have their distinct advantages.

Even the differences in rainfall among the various states create advantages and disadvantages. The normal rainfall for most of the states is 40 inches or more a year, while for New Mexico and Arizona the normal annual rainfall is only about 6 inches. This is a great handicap for agriculture, which can now be carried on only by expensive irrigation. I, however, was told something in this connection which I desire to pass on to readers this week. That is that the states subject to the lowest annual rainfall are those which would be freest from fallout danger.

The same mountains which surround New Mexico and Arizona and prevent the rain from falling in those states will, I am told, prevent the fallout from settling in any serious amount. Thousands now afflicted

with arthritis, bursitis, and similar rheumatic difficulties are flocking to these states for the dryness of the atmosphere. If the above theory about fallout is true, the population of New Mexico and Arizona and other states with very little rainfall should rapidly multiply.

No Defense Against Fallout

For cities in the East, South, and Central West, there is no known defense against fallout. The Civil Defense Authority is experimenting with evacuation of cities and the use of basements and other protections from the immediate crash of the bomb when it falls. An atom bomb would immediately slaughter people within 5 miles of the point of the explosion. The fallout, however, might not occur for some days after the bomb exploded. Furthermore, the direction of the wind is an important factor in the damage caused by fallout. Of course, if a bomb should be "dropped" in New Mexico or Arizona, the fallout would be as dangerous there as anywhere else; but probably this would not occur.

Let me close with one interesting fact: That the oldest continuing occupied city in the United States, namely Oraibi—which dates from more than 1000 years ago—is in Arizona;

the cliff dwellers of Walnut Canyon lived near here 1200 years ago while the more progressive Navajo Indians were centered in and about Northern Arizona. It seems strange, although entirely possible, that the great cycle of population for the United States may come back to Arizona where it started over 1000 years ago. In case of World War III, there could be a "gold rush" to Arizona equaling that of 1849 to California.

Soldier Promoted

MUNICH, Germany—David C. Wivell, 18, son of Mr. and Mrs. Roy J. Wivell, R2, Emmitsburg, recently was promoted to specialist four in Germany, where he is a member of the 24th Infantry Division.

A driver in Company C of the division's 31st Transportation Battalion in Munich, Specialist Wivell entered the Army in February 1958, completed basic training at Fort Jackson, S. C., and arrived in Europe last July. He attended St. Joseph's High School, Emmitsburg.

Common Firefly Being Used In Cancer Research

BALTIMORE—The Johns Hopkins University, which uses fireflies for important scientific research and ships them all over the world to other research institutions, is looking for more of the valuable bugs this year.

Dr. William D. McElroy, director of the Johns Hopkins University's McCollum-Pratt Institute for Firefly Research, is asking that anyone interested in organizing firefly collection teams contact the Institute immediately.

Chemicals in the firefly which cause its tail to light up have been used by Hopkins in basic research connected with such diseases as cancer and muscular dystrophy since 1948.

Hopkins is the only distribution center for fireflies. As many as 500,000 of the lightening bugs have been caught in a season by youngsters in Baltimore, but this year Dr. McElroy says twice as many are needed.

Local collectors are paid 30 cents a hundred, and the bounty to out-of-town collectors will be slightly higher. Sub-stations where fireflies will be collected and shipped to Hopkins are being organized all over the country this year.

Two of these are in Maryland. One at Washington College, at Chestertown, supervised by Edgar Gwynn. Another, in Bethesda, by David Chen of 4413 Montgomery Avenue.

Dr. McElroy points out that collectors outside of Baltimore must catch the fireflies alive and keep them in cold storage. Then they must be carefully packed in dry ice and shipped express to the University.

He warns that no one should ship fireflies without first contacting the McCollum-Pratt Institute to make arrangements for collection and handling. Because the bugs are found only in areas with a hot and humid climate, their supply for research purposes is limited. The season here in Maryland runs from the middle of June to the first week in August.

Waste Space Chased

Old Screened Porch Now Family Room

Award-winning porch enclosure in Darien, Conn., features special installation of ponderosa pine windows to create more space, plus heat pump for winter heating, summer cooling.

Complete, year-around comfort and making full use of wasted space were the principal aims of Loyd Dunning in converting an old screened porch into a family room for his home in Darien, Conn.

Dunning did such an excellent job that his porch enclosure is featured in the current issue of House Beautiful's Building Manual. It is one of the first homes to win the electrical industry's Modernized Home Medallion.

Among its many features is a heat pump that cools the room in summer and heats it in winter. Another feature is a bank of awning windows of ponderosa pine installed slanting outward to add more spaciousness.

Other features include the most modern electrical system and lighting available, natural wood paneling, built in closets, movable shelving, and an acoustical tile ceiling.

Extra-thick insulation and double-glazed wood windows are the keys to economical heating and cooling. Mineral wool batts six inches thick were installed in the ceiling and batts three inches thick were installed in walls, according to specifications for electric heating and air conditioning. The floor, above an unheated, two-car garage, also was insulated with mineral wool six inches thick.

This insulation, because it keeps heat inside in winter and

out in summer, made it possible to heat and cool the room with a smaller, less expensive heat pump, which operates with greater economy.

Wood windows and a combination storm and screen entrance door of ponderosa pine were chosen for two reasons: wood is a natural insulator, and it could be stained to match the wood paneling used on the walls and wainscoting.

In connection with the porch modernization, Dunning also equipped the house with a new electrical service entrance to handle present and future needs. Electrical modernization of the entire house is planned for the future.

STRENGTHEN AMERICA'S PEACE POWER

You'd give him the world if you could—a peaceful world. But the problem is keeping the peace. Peace costs money. Money for strength to keep the peace. Money for science and educa-

tion to help make peace lasting. Money saved by individuals to keep our economy strong. So every Bond you buy helps strengthen America's Peace Power. Are you buying enough?

THIS 'N THAT

By George W. Wireman

Editor's Note: This is the fourth and final article in a series dealing with crime and the many problems it creates in our modern society.

Crime In The United States

The extent of crime for the country as a whole is determined by the statistical bulletins issued semi-annually by the Federal Bureau of Investigation and known as Uniform Crime Reports. In this report are found the many categories of offenses known to the police. In addition may be found the number of offenses cleared by arrest, the number held for prosecution, released for want of evidence, or found guilty.

About eighty-five per cent of all offenses may be labeled traffic or city ordinance violations; about twelve per cent are misdemeanors and about three per cent, serious crimes. These percentages, however, vary from year to year. In reading our daily papers we find that the number of serious crimes committed should be more than three per cent of the total, and at the present rate, three per cent will no doubt cover them.

On an average, there are about ten thousand homicides committed in this country annually, but of these only about four thousand constitute outright murder. And of this number only a relatively few may be considered premeditated. Homicides, serious though they are, are much fewer than suicides, and appear to be insignificant compared to deaths caused by automobile accidents.

The extent of crime for more limited areas such as states or cities may be ascertained by examining statistical data compiled in local jurisdiction. But, even at best, crime statistics are none too satisfactory in appraising the amount of crime in the country. For instance, rural crime has for many years been considered insignificant but due to better reporting it has been found to be more prevalent than was originally thought.

The public and the police are traditionally more concerned about crimes of violence than about crimes against property. Because of this and also because crimes against property are committed through stealth, the police make a better record in clearing up crimes against the person. It is interesting to note that about 80 per cent of the crimes of violence are cleared, but not more than 30 to 40 per cent of the robberies

and burglaries.

One of the most serious problems today is the amount of syndicated crime committed by professional gangs who control many commercial operations as well as vice. Because of this trend, which began during the days of Prohibition, traditional crime, such as murder, robbery, aggravated assault, and the like, appear less significant. As a general estimate traditional crime amounts annually to about \$500,000,000; organized crime under control of the syndicates at around \$7,500,000,000. This big-business crime represents one of this country's greatest menaces, primarily because of its alliance with corrupt public servants. Every once and a while, such corruption is brought to light and a public servant is exposed. An efficient and alert police system and a courageous, graft-free city administration are necessary to control this type of crime. White-collar crime is also being recognized more realistically today than formerly. Research has shown that considerable criminal activity exists among business and pro-

fessional men.

No understanding of crime can overlook the importance of the steps in criminal prosecution. The arrest, the preliminary hearing before the trial magistrate, the indictment in more serious offenses, the function of the prosecutor and the roles of judge and defense attorney are conventional elements in Anglo-Saxon jurisprudence. Fair trial is essential to a proper criminal procedure and represents one of the proud and possessions of western civilization. Rising essentially out of common law it involves briefly: (1) a precise definition of the charge against the suspect; (2) the right to be confronted by accusers and witnesses; (3) the right of legal defense; and (4) the right to appeal against any substantial irregularity in the trial.

Just recently I made a survey of two daily newspapers, and here are the headlines which pertain to crime and its many activities: 106 Psychiatric Patients Seize Guards, Take Over Hospital; Two Guilty Of Cheating Employment Security; Man Rapes Six Women Within 8 Block Area In Last Four Months; Bank Manager Disarms Man, Foils Robbery; Man Beaten By Three Youths; Man Held In Fatal Beating; and Gas Station Worker Robbed.

In concluding this series of articles on crime and of the many problems it creates in our modern society, we must remember that crime cannot be eliminated, but it can be controlled and reduced. This can come about only through understanding of the intricate causes that produce it and by developing an adequate law-enforcement system working in conjunction with free and untrammelled court processes. Added to these ingredients must be a system of rehabilitation that will accept those convicted of crime and thru meaningful techniques, change their attitudes in such a manner that they will find it more expedient to be social assets than social liabilities. To sum it up in a nut shell, "Crime Does Not Pay."

Mr. and Mrs. Gene Myers and daughter, Patty; Mrs. Samuel Sager, and Francis Rummel, visited relatives and attended the wedding of George Middleton and Betty Vance in Strausburg, Va., on Saturday.

In the little town of Emmitsburg, Where peace and love abide, You will find within a rare welcome

As down the street you stride, With mountains for a background, and rolling fields below, You'll find a thriving country town that's set

And rearin' for to go, The Mayor in his capacity Upholds traditions of democracy

The Lions Club is truly king, Of every single civic thing, Within its limits you'll surely mend

For it holds the church you attend If for art and literature you burn with fire

Emmitsburg's two colleges will quench that fire, The Women's Club and Entrepreneur

Over the Tea Cups welcome you, The Masons are in there with a swing,

They stand for the best of everything, The 4-H Club and the FFA Really know how to bring in the hay,

The Grange is in there pitching too To bring the best of the land to you,

The VFW at the top of the list Is made up of fellows who'll insist

In seeing the things they fought for Abounding in Emmitsburg more and more,

The American Legion is beginning to grow It has its Auxiliary too, you know

The VFW not to be outdone Has an Auxiliary too — a peach of a one,

Emmitsburg of a Library boasts, And to it we give a hearty toast

Through the years the librarian has stood, For all things that are fine and good,

The Firemen your home will protect, Watch out or the K. of C. will get you yet,

The boys and girls to the Scouts belong And the PTAs help youth along,

Now if you think this kind of corny A poet I never claimed to be, I'm merely passing on to you

The town of Emmitsburg I see.

Hospital Report

Admitted
Mrs. Robert Wantz, Emmitsburg, R2.
Mrs. Paul Beale, Emmitsburg, R2.
William Sparklin, Emmitsburg.

Discharged
Mrs. Norman Turner, Emmitsburg.
Constance Houck, Emmitsburg, R3.
Timothy Keilholtz, Emmitsburg, R2.

Mrs. Joseph Wivell, Emmitsburg.
Mrs. Roy Smith and infant son, Rocky Ridge.

Births
Mr. and Mrs. Clyde Tøpper, Emmitsburg, R2, daughter, Monday.

Mr. and Mrs. Earl S. Kugler, Thurmont, daughter, Friday.
Mr. and Mrs. Raymond Springer, Emmitsburg, son, Friday.

Hold Picnic

An outdoor picnic lunch was held Sunday evening at the home of Mr. and Mrs. Carroll Frock, Sr. Those attending were: Mr. and Mrs. George Albert and children, Dennis, Connie and Brent, and Mr. and Mrs. Walter Albert, Brunswick; S.P./4 and Mrs. Richard Frock and daughter, Tammy, Fort Knox, Kentucky; Mr. and Mrs. Carroll Frock Jr. and children, Carolyn, Janet, Mike, Tony and James, and Mrs. Charles Glacken, of Emmitsburg. Other visitors were Dorothy McBride, John Gartrell, Mrs. Alice Showalter and William Fuss and son, Billy.

Promoted

Pfc Richard H. Frock has been promoted to the grade of SP/4. He is stationed at Fort Knox, Ky., where he is an assistant instructor at The Armored School.

SP/4 Frock and wife, Arlyne and daughter, Tamara Jeanne, are currently spending a 20-day leave at the homes of their parents, Mr. and Mrs. George Albert and family, Brunswick, and Mr. and Mrs. Carroll E. Frock Sr., Emmitsburg.

Tax Stamp Due

Taxpayers are reminded by Ellis R. Rodgers, Acting District Director of Internal Revenue for the Baltimore District, which comprises Maryland and District of Columbia, that Special Tax Stamps are due on or before July 1, 1959. Taxpayers no longer have until the end of July to file as in prior years.

Rogers said, taxpayers filing after July 1 may be subject to penalties and interest. File now and avoid that last minute rush.

Office Boy to Chairman Is Tale of Plywood Head

U.S. Plywood chief planned law career

By LOUIS JAMES

Politics lost a hot possibility when S. W. Antoville dropped the study of law for a career in selling.

A man with an IBM memory for names and faces, Antoville gave up the idea of becoming a lawyer and began selling wood instead.

He started 38 years ago, soon becoming the country's top plywood salesman. Now he heads the world's largest company in the field—United States Plywood Corporation.

Found an office job
Tall and affable, Antoville is known as "Tony" throughout the industry.

On the road half the year—he'll breeze into an office at any point from coast to coast—inspiring employees, greeting customers, getting head to head with executives. All are astounded at his memory of their names, problems, families and needs.

Antoville got into plywood in 1921 when he was barely out of his teens. A New Yorker, he planned on a law career (his mother's fond wish) when, seeking a summer job, he found one as office boy.

The business happened to be plywood, relatively new in this country and on the verge of a big expansion following its wide usage in World War I airplanes. Antoville really took to selling

Men Who Make America Great

He's always working, say his associates

S. W. ANTOVILLE

and became the company's top salesman.

In those days plywood was still a hard sell. But when prospective customers came face to face with Antoville's big, smiling personality—he's 6'1" and weighs 230 lbs.—they yielded readily to his persuasion.

In 1929 Antoville was sent to Europe to investigate plywood resources and returned a few months later to head the company's growing sales staff.

Thirty-two years after he joined the firm as office boy, Antoville became its president (in 1953), Chairman in 1958.

A dedicated worker
On first assuming the Presidency he promptly delegated broad areas of responsibility to

his executives and managers, hopped on to his own assigned role as director of sales with the full mass of his energy and personality.

Antoville's entire adult life has been involved with plywood. He, literally, grew up with the product. He never seems to leave it either.

"Tony's always working", one of his associates remarked. "You'll find him at the office late at night. On trips he often starts his day with a breakfast meeting. He never passes a city where he has a branch without popping in."

When he does, he invariably greets managers, warehousemen—even secretaries—by their first names. And he asks knowing questions about their families, children and personal affairs.

He's an avid reader
Wherever he goes, the latest company report is always in his portfolio. A local newspaper and a copy of the Wall Street Journal, also there, help him keep posted.

With their two children married, he and his wife recently deserted suburbia and moved back into their New York Fifth Avenue apartment.

Antoville is an avid reader—likes history and fiction. He plays golf, bridge and enjoys good cigars. But his ears really perk up when he hears his favorite word—"plywood."

Celebrate 61st Anniversary
Mr. and Mrs. George C. Naylor quietly celebrated their 61st wedding anniversary June 23 at their home on E. Main St.

Party Held

A party was held at the home of Mr. and Mrs. Robert Joy on Saturday in honor of the sixth birthday of their daughter, Gloria Rose. Those present were: Bruce Martin, Robert Henke Jr., Clarence and Rodney Springer, Kathy and Johnny Ott, Gloria Rose, Lee, Donna, David, Daniel and Sherry Joy.

Advertising is not something to take your money without results; if necessary, make a study of what you have to offer customers.

WILKINSON—SWOPE
Margaret Loden Swope, Emmitsburg, daughter of Mr. and Mrs. Charles Motter, Emmitsburg, became the bride of James Roland Wilkinson, son of George Wilkin-son, Baltimore, Saturday evening at 6 p. m. in the Elias Lutheran Church, Emmitsburg. The ceremony was performed by the Rev.

Philip Bower, pastor of the church. The bride wore an ice blue lace and satin dress with matching accessories and carried a colonial bouquet of red roses and baby's breath. Mrs. Mary V. Needy, Emmitsburg, sister of the bride, was matron of honor. She wore a dress of shrimp pink with match-

ing accessories and a corsage of white gardenias. Gilmore Needy, Emmitsburg, was best man. Immediately following the ceremony a reception was held in the parish hall. After the reception, the couple left for a wedding trip to Virginia Beach, Va. The bride chose for traveling a pink linen suit. The bride attended Emmitsburg High School and is employed at the Gettysburg Shoe Co. The bridegroom attended Baltimore City College High School, served in the U. S. Navy and is employed as a carpenter in Baltimore.

Air Force Chaplain

Rev. Fr. David W. Shaum, professor of music at Mt. St. Mary's College, and director of the college glee club, choir and Seminary Schola, left this week for Oscoda, Mich., where he will serve as auxiliary chaplain at the Wurth-smith Air Force Base for the summer. Following his tour of duty he will spend a few days vacation at Mackinac Island and

Sault Ste. Marie. He will return to the Mount after Labor Day.

GEORGE PEDDICORD

George Peddicord, 77, St. Anthony's, died Friday at the Frederick Memorial Hospital after an illness of two days. He was a life-long resident of Frederick County and was a son of the late John and Ellen (Butt) Peddicord. The deceased was a member of St. Anthony's Catholic Church.

His only survivor is a nephew, John Peddicord, Baltimore.

Funeral services were held on Monday morning at St. Anthony's Church with the Rev. Fr. Vincent J. Tomalski, officiating. Interment was in the Church Cemetery.

Pallbearers were Allen Kreitz, Edward Seltzer, Cecil Krietz Jr., Allen Kreitz and Thomas H. Martins. The Wilson Funeral Home, Emmitsburg, had charge of arrangements.

Lions Club Will Improve Scouthouse

Two applications for member-

ship were received at the regular meeting of the Emmitsburg Lions Club held Monday evening at Fitzgerald's Mason-Dixon Inn, President Ralph D. Lindsey presiding with 18 members and one guest in attendance. The guest was Lion Thomas of the Glade Valley Club. Scoutmaster Edward Houck appeared before the group and asked for support for the Scouts in making certain improvements to the Scout Clubhouse. Applications for membership were received from Delbert Piper and William J. Kershaw. Dr. D. L. Beegle, co-chairman of the Horse Show to be held Sept. 13, made a progress report.

Visitors at the home of Mr. and Mrs. George Naylor were Mrs. George Simon and grandson, George Grothouse, York; Mr. Norman Baumgardner, Taneytown; and Lt. Patricia Sullivan, of the Navy Hospital, Philadelphia.

New Station OK'd

Communications Commission Examiner Basil P. Cooper Tuesday recommended a grant to the Price Broadcasters Inc., for a new daytime radio station at Frederick to operate on 1320 kilocycles, one kilowatt. The examiner proposed denials of competing applications by the Monocacy Broadcasting Co. for a new unlimited time 1320 kilocycle station at Gettysburg, Pa., and by the Times and News Publishing Co. to shift Gettysburg station WGET from 1450 to 1320 kilocycles and increase power.

Son Born

Mr. and Mrs. Edward Craft of Pittsburgh, Pa., are receiving congratulations on the birth of their first child, a boy, born June 20th in Pittsburgh. Mrs. Craft is the former Joan Elder, daughter of Mr. and Mrs. Lawrence Elder.

ABIGAIL

(Continued from page One)

not patronizing these indecent pictures can we show our disapproval and our rebuff. How many articles written by doctors have I read where decent, moral teen-age girls have cried in anguish when told they were going to have a baby. When asked by the doctor, or their parents, "Why, honey, Why? You knew better". Do you know what their rejoinder was between sobs—"I know, mother, but when we left the theatre after seeing that movie we couldn't help ourselves".

Think about it—long and hard. It could be your son or daughter . . . THINK and then go to work on it.

Archibald Henderson, fifth Commandant of the Marine Corps, received a salary of about \$75 per month.
