EMMITSBURG, CHRONICLE, EMMITSBURG, MARYLAND, FRIDAY, OCT. 2, 1959

Weekend

Weather Forecast

Rain over weekend will average about one-half inch. Highs range from 68-74, lows from 50-56.

SINGLE COPY, 7c

## Most Anything At A Glance

BY ABIGAIL

Hurricane Gracie's powerful wallow was reduced to a mere sprinkle as she passed our area Wednesday. Intermittent rain and mild gusts of wind were all that the previously powerful and violent hurricane could muster as she blew by us. For this we can be mighty thankful recalling others and the damage they did as they wreaked havoc here several years ago. This is the season for these phenomena of nature and we won't be exactly safe for a few more weeks yet.

An alarming number of cases of sleeping sickness has plagued the state of New Jersey but to date none has been reported in our own fair state. Better than a dozen fatalities have been reported in New Jersey and it really is something to worry about. It is believed the disease is caused by a mosquito bite. The mosquito contracts the disease from birds and gives it to both humans and horses. Not all mosquitoes are carriers, just the comparatively rare culex manura.

Oldtimers here report the mosquito crop the heaviest they ever saw but no cases of the dreaded disease have been reported either here or in the state of Maryland. Numerous complaints have been received of the condition of Flat Run here. Reports indicate the mosquitoes so thick it is almost impossible to breathe and walk near the stream at certain times. The creek is perhaps the most highly polluted stream in the entire state, with almost half the sewage of the town being emptied into it, totally untreated. Efforts to get the new sewer system into operation have failed to date and I do hope that nothing happens here in the nature of what New Jersey is now undergoing. There really doesn't seem any sense to having a quarter of a million dollar plant for sewerage disposal ready for use but for the exception of a few minor details, but actually little if any work has been done on the system for a number of months.

Farming to the most of us appears to be a non-hazardous occupation but with a bit of recapitulation one can readily ascertain that it really is hazardous. Almost any week one can read of fatal accidents such as corn pickers chewing off an arm or grinding up a body, silos toppling over and kill or maim individuals, mowers cut off legs or tractors upset killing the drivers. I don't have the statistics but I'd gamble a guess that at least half a dozen fatalities caused by farming mishaps have occurred around and near here during the past 12 months. So you see farming really can be dangerous and I urge precaution while at work around your farms.

Complaints have been coming in steadily concerning bicycle riders who would rather use the sidewalks instead of the highway. This practice is prohibited by a town ordinance and some one could be fined. Chief Law advises that cyclists are governed by the same legal code as automobile drivers and that they must be operated on the highway. The same hand signals for turns, stops, etc., must be used and in addition the vehicles must be equipped with a red reflector type of light in the rear and a white light in front. A flashlight or regular attachment will suffice but they are mandatory. Let's see that the kiddies have the proper equipment, for their own safety, folks, and you'd better admonish them to stay off the sidewalks before some older person, or the rider himself, gets injured.

## Attends Program

Paul W. Claypool, representative of Nationwide Insurance in Emmitsburg, was one of 40 agents attending the training program conducted by his companies at the Francis Scott Key Hotel, Frederick.

Claypool had qualified to attend this program, which according to Walter W. Falck, Regional Manager, was designed to help him render better service to his policyholders.

This program, one of a series of training courses held periodically by the companies, began on Monday, Sept. 28 and continued through Wednesday, Sept. 30.

## Col. Paxson Succumbs To Heart Attack

George Denver Paxson, a former resident of Emmitsburg, died suddenly Friday at Fort Mason, Calif. Mr. Paxson who made the Army a career, died of a heart attack while on a fishing trip in California, on his 53rd birthday.

Enlisting in the armed forces at an early age, the deceased had risen to the rank of colonel at the time of his demise.

Colonel Paxson was born at Denver, Col., on September 25, 1906, a son of the late George O. and Rosalie Hickman Paxson, a well-known family in Frederick some years ago, the elder Mr. Paxson having been engaged in the electrical contracting business. Prior to that time, they lived in Denver where the father pursued his profession as an electrical engineer.

As a youth and high school student, Colonel Paxson was actively identified with sports and was popular among a wide circle of friends here and in Frederick. He enlisted in the National Guard while in his teens and he made the military his career.

Having participated in the D-Day invasion of Europe, he remained on active duty abroad for a number of years following the close of the war, he and his family having resided at Bremerhaven, Germany, during this period of assignment. In 1949, the then Lt. Col. Paxson, his wife and their three children returned to the states and spent a period of leave in Emmitsburg visiting relatives and friends.

His promotion in the service was steady and, having been advanced to the rank of full colonel, he had been assigned to posts at the Pentagon, also at Seattle, Wash., and more recently to Fort Mason, San Francisco, where his immediate family has also resided.

Colonel Paxson was stricken while on a boating trip with his son-in-law and daughter, Mr. and Mrs. Larry C. Boone, of Fort Worth, Texas. He was in apparently excellent health and his fatal attack came as a distinct shock.

Surviving are his widow, Mrs. Alice K. Kerrigan Paxson; two daughters, Mrs. Boone, who was with him when he died; Miss Sarah Redford Paxson, at home, and who just graduated as an honor student from the University of San Francisco; and one son, George D. Paxson Jr., also at home. Two sisters also survive: Mrs. Alan S. (Margaret) DeLand, Pleasant Hills, Pittsburgh, Pa., and Mrs. George J. (Mary) Phillips, Baltimore.

## Birthday Party Held

A party was held Sunday evening, Sept. 20 at Toms Creek Church Social Room in the honor of the 16th birthday of Miss Judy M. Valentine. Given by her parents, Mr. and Mrs. Franklin L. Valentine, Mrs. Maurice Fuss, and Mrs. Cora Moser, the party was attended by a large group of friends and classmates. Flowers and crepe paper in pink and green were used as decorations. Many gifts were received.

Refreshments, including a birthday cake of pink and green trimmings, were served to the following: Betty, Pat and Dorothy Moser; Barbara Kelly, Martha Baumgardner, Patty and Nancy Glass, Grace Gross, Janet Andrews, Linda and Lona Frock, Lois Saylor, Sharon Pittner, Kathy Springer, Maureen and Ronald Stouter, Pat and Bill Zimmerman, Wendell and Wilmer Shank, Art Elder, Leroy Valentine, John and Paul Stonifer, Margo Emrich, Allan and Robert Beale, Fred Phillips, Rev. and Mrs. Johnson, Kevin Johnson, Violet Kefauver, Clyde Knipple, Mr. Franklin L. Valentine, Mr. Maurice Fuss, and Mr. Maurice Moser. Those sending gifts but not able to attend the party were: Mr. and Mrs. Harry Null, Mr. and Mrs. Richard Valentine, Fred Grimes, Sally Miller and Linda Knox.

Mr. J. Earl Elder, Pittsburgh, Pa., has returned to his home after spending the weekend here visiting his mother, Mrs. Genevieve R. Elder. While here, he was met by his wife, Ruth, and daughter, Avalon, who arrived Tuesday after a five-week trip to Europe.

The State Dept. of Motor Vehicles this week announced the reissuance of a driver's license to John Albert Portner, Thurmont, Md.

## College Announces Series Of Lectures And Concerts

Sister M. Hilda, president of St. Joseph College, this week announced a series of concerts and lectures to be held at the college during the winter months. The series is sponsored jointly by St. Joseph and Mount St. Mary's Colleges.

The initial lecture will be given on October 6 at 7:30 p. m. in DePaul Auditorium and will feature a talk by Ernest K. Lindley. Succeeding concerts and lectures are as follows:

Concert by the Ralph Hunter Dramatic Chorus, October 9, 1959, 7:30 p. m.; Concert by Michel Senechal, French Tenor, October 26, 7:30 p. m.; Lecture by Senator Eugene J. McCarthy, November 2, 7:30 p. m.; Organ concert by Bill Thomson, November 12, 7:30 p. m.; Play reading by Mr. and Mrs. Donald J. Waters, December 13, 1959, 7:30 p. m. in the Student Center; Concert by Stecher and Horowitz, January 5, 1960, 7:30 p. m.; Lecture by the Rev. Harold C. Gardner, S.J., February 6, 7:30 p. m.; Concert by the Don Cossack Chorus and Dancers, February 24, 1960, 7:30 p. m.; Lecture by the Rev. Alan Keenan, O.F.M., March 8, 7:30 p. m.; Drama by Players Incorporated, March 22, 7:30 p. m.; Lecture by the Rev. Gustave Wegel, S.J., March 29, 7:30 p. m.; and "Die Liedermäus" by The National (Grass Roots) Opera Company, April 25, 7:30 p. m.

## ADULT EDUCATION CLASSES WILL START OCTOBER 5

Duval W. Sweadner, Dean of the Frederick Community College and Supervisor of Adult Education has announced that registration for adult education classes will be held during the week of October 5 and classes will start the week of October 12.

During the past school year, approximately 53,500 were enrolled in adult education classes in Maryland and national figures indicate that more persons are enrolled in classes outside of grades 1 through 12 than are currently enrolled in grades 1-12. Last year Frederick County had twenty-four classes in adult education with an enrollment of 450 students. This year it is hoped that more adults will avail themselves of the opportunity to enroll in evening classes.

Each year more adults are taking advantage of the courses being offered in the evening schools. Courses may be scheduled this year in the following areas:

High School Subjects — Art, Business Education, Rug Making, Clothing Construction, Parent Education, Home Furnishings, Foods, Electricity, Woodworking, Upholstering Furniture, Agriculture.

Classes will as a rule meet one evening a week from 7-9 p. m. for approximately twenty-five weeks and the only cost other than materials of instruction is the \$2.00 registration fee.

Mr. Sweadner points out that if an adult needs a high school diploma, is interested in personal development, or desires to further explore his avocational interests, there is a course to fit his needs.

The following list indicates the registration centers which will be open from 7-9 p. m. on the date indicated:

Frederick High School—Oct. 5; Lincoln High, Oct. 5; Thurmont High, Oct. 6; Middletown High, Oct. 7; Walkersville High, Oct. 8; and Brunswick High, Oct. 9.

Each person who registers will be sent a complete schedule of classes as soon as the registrations have been tabulated and the schedule is completed.

## To Have State-wide Observance

"More people were injured in the home last year than at any other single site," according to T. J. Kelly, chairman of "Emergency Don't Wait Week" in Maryland.

The safety week will be observed October 9 to 17 and is sponsored by members of the pharmaceutical associations, the Red Cross, the Civil Defense organization, the Boy Scouts, and other groups interested in promoting safety. It is designed to help eliminate the toll of home accidents and promote first aid preparedness.

"Home accidents injured 4,000,000, compared with a figure of 4,350,000 injuries resulting from motor vehicle accidents. Accidents in the home killed 27,000 last year. The only accident category to exceed this was death by motor vehicle, with a total of some 37,000," Mr. Kelly pointed out. "Check today to make sure that your home is really safe," Mr. Kelly urged.

## TANEYTOWN FARMER KILLED BY SHREDDER

Harry Oscar Fogle, a 62-year-old Route 1, Taneytown farmer, was mangled to death Tuesday morning about 11:30 o'clock when a corn stalk shredder which he was operating fell on top of him, State Police say.

Fogle was operating the corn chopper on the farm of his son, Oscar A. Fogle, on Rood Road in the Keysville area when the accident happened.

The corn shredder apparently toppled over on top of him, killing Fogle instantly. His family physician, Dr. Edward A. Thompson of Taneytown, pronounced Fogle died at the scene of the accident. He said he was mangled by the machine.

Dr. Thompson indicated that he had been treating Fogle for some time for a kidney condition and that the man might have suffered a sudden attack and fallen under the shredding machine to his death, State Police added.

Fogle was alone in the field when the accident occurred but his son, who was working nearby, quickly came to his assistance and summoned the Taneytown ambulance.

Fogle is survived by his wife, Alva Sara Agherine Fogle, and by nine children, Oscar Fogle, for whom he was working at the time of the accident; Marie Fogle, Taneytown; Mrs. Ralph Valentine of Ladiesburg; Mrs. George Warner of Taneytown; William E. Fogle of Taneytown; Floyd Fogle of Taneytown; Mrs. Roger Buffington of New Midway; Mrs. Benjamin Burrows of Taneytown and Thomas D. Fogle of Emmitsburg. Also surviving are 16 grand-children, one great-grandchild, and two sisters, Mrs. Sara W. Leckins of Westminster and Mrs. Orville Stitley of Frederick.

Fogle was a member of the board of the Southern States Cooperative in Taneytown and of the Holstein Cattleman's Association and the Farm Bureau.

Funeral services were held on Thursday afternoon at 2 o'clock in the Foss Funeral Home, Taneytown, with the Rev. William M. Brown officiating. Interment was in the Rocky Hill Cemetery near Woodsboro.

## New Gas Tax Brings Total To 10c Per Gallon

With the \$541 million a year increase in the Federal gasoline tax that went into effect on Thursday, October 1, Maryland car owners will be paying 46 cents in tax on every dollar's worth of gasoline they buy.

This was brought out this week by C. A. Newland, Chairman of the Maryland Petroleum Association, who noted that the new 4-cent federal tax added to Maryland's 6-cent State tax rate adds up to the \$1.00 in taxes on every ten-gallon purchase, which he said is equivalent to a 46 per cent federal tax added to Maryland's 6-cent State tax rate. Newland asserted that the so-called "penny increase" will raise the average tax on gasoline in this State to \$80.00 a year per vehicle. Total motor fuel tax collection in the state will climb to an estimated \$81 million a year, of which \$32.6 million will go to the federal government.

"The constantly mounting tax burden on gasoline tends to obscure the fact that this is one product on which the national average consumer price has advanced no more than 6 per cent over the past ten years, although official indexes show that retail prices generally have gone up 21 per cent," Newland said.

"The only real inflation with regard to motor fuel costs has been the 55 per cent increase in average gasoline tax rate that has taken place nationally since 1949."

Mrs. Mae Campbell and Mrs. Agnes Joy Kerrigan, Baltimore; Mrs. Frances Stinson, Mr. and Mrs. J. Ward Kerrigan and Guy A. Baker Jr., attended the funeral of Colonel George D. Paxson Wednesday at Arlington Cemetery.

## Engagement Announced

Mr. and Mrs. Albert C. Kane, Biglerville, announce the engagement of their daughter, Florence C., to Robert W. Baker, son of Mr. and Mrs. Wilmer Baker, Emmitsburg.

Miss Kane is a graduate of Biglerville High School and is employed by the United Telephone Co., Biglerville.

Mr. Baker is serving in the U. S. Navy at Norfolk, Va., and is stationed aboard the USS Forrestal.

No date has been set for the wedding.

## Homemakers Hear Civil Defense Director

The regular meeting of the Emmitsburg Homemakers Club was held in the VFW Annex on Sept. 25 at 7:30 p. m.

The meeting was open to the public and the Frederick County director of Civil Defense, Lawrence Crickenberger, was a guest. Mr. Crickenberger spoke chiefly on a Disaster Program and explained to his audience what requisites were necessary to care for one person for one week, during an emergency. Provisions include food, heat, sleeping arrangements, clothing, sanitary facilities and medications. The defense director also demonstrated the newest method of preparing a shelter for protection during a raid and outlined what preparatory steps were necessary should an atomic attack be made on Baltimore and it was necessary that civilians be evacuated.

The Homemakers Club regrets the apathy on the part of the public concerning a disaster program. Mrs. Paul Beale, chairman of the program for the evening had prepared a very interesting and comprehensive program.

The next afternoon of games will be held at the home of Mrs. George S. Eyster on October 8 at p. m.

## State Observing Fire Prevention Week

The week of October 4 to 10, 1959 has been designated as Fire Prevention Week throughout the state of Maryland by Governor J. Millard Tawes. This makes the 37th anniversary of Fire Prevention Week as a State-wide observance. A family project to locate and eliminate potential fire hazards in the home has been recommended by F. Douglas Sears, State Fire Marshall of Maryland. "Home fire prevention is the responsibility of each family, and it is especially important to check for home fire hazards at this time of the year" says Fire Marshall Sears.

"Records indicate that 40 per cent of the annual fire losses occur during the September to December period. When you call the fire department, it then is too late to worry about fire prevention" the fire marshal observes.

Improper housekeeping methods and poor maintenance have kept the home fires burning throughout the State at an alarming rate. Last year these fires were responsible for 94 deaths in Maryland. Many other persons suffered painful injuries. Fire loss figures as reported by insurance companies amounted to \$10,211,369.50. This does not take into consideration losses that were not covered by insurance or losses to natural resources.

Keep your home from being added to this growing total by searching out and correcting all fire hazards. The family search for home fire hazards should begin in the basement and continue room-by-room and close-by-closet right up into the attic, fire precaution experts advise. They offer the following danger-spots to be checked in the search:

Basements: Stoves, furnaces and all heating and hot water equipment; old papers, rags, waste materials; flammable cleaning liquids, paints; fuse boxes.

Living and Dining Rooms: fireplaces, closets, and ash trays.

Kitchen: gas stove, valves and connections; electrical appliances; replace frayed cords; don't overload wall plugs with extensions.

Attic: chimney; old papers, rags, and waste materials.

Outside: Clean, litter-free yard; adequate trash burner; easy accessibility for fire department in case of emergency.

## State Troopers Promoted

The Maryland State Police this week announced the promotion of Trooper First Class Hiram J. Brown, Thurmont, to the rank of corporal and Corporal John E. Koontz, brother of Robert L. Koontz, to the rank of sergeant.

Sgt. Koontz has been transferred from Leonardtown to the Frederick Barracks. Corporal Brown remains on his present assignment.

## Hospital Report

Discharged

Thomas Harbaugh, Emmitsburg. Mrs. Joseph Freeze and infant daughter, Emmitsburg.

Mrs. Joseph Wivell and infant son, Emmitsburg.

Births

Mr. and Mrs. Walter Gembe, Fairfield R2, son, Sunday.

Mr. and Mrs. William Barrett, Emmitsburg, daughter, born on Wednesday.

## Cong. Foley Has Congressional Appointments

Congressman John R. Foley (D. Md.) this week announced that he will nominate candidates for one vacancy next summer at the U. S. Naval Academy, one for West Point, and one for the U. S. Air Force Academy under a competitive system, which will include a competitive Civil Service Commission Examination.

This examination, set up by the Civil Service Commission, specifically for Representatives and Senators to use as one of their criteria in nominating men for the Academies, will be held at various locations throughout the nation at 8:30 a. m. on Saturday, November 7. He urged all prospective candidates to contact him as soon as possible so they can receive pertinent information on the November 7 examination.

Congressman Foley said that candidates from his Congressional District, which includes Montgomery, Frederick, Washington, Allegany, and Garrett Counties in Western Maryland, must notify him by October 16 of their desire to compete for one of the three vacancies.

"The competitive method of nomination is preferred by the Academies and will remove all partisan politics from the appointments," he said.

Congressman Foley also announced that he is allowed to nominate the candidates to compete on a state-wide basis with other Congressional and Senatorial nominees for Maryland's allotments of 5 vacancies at the Merchant Marine Academy at Great Neck, Long Island. These candidates must also take the CSC exam on November 7 and should apply by October 16.

## LOCAL SOLDIER AWARDED GOOD CONDUCT MEDAL

The Good Conduct Medal has been awarded to Specialist 4th Class John W. Springer, son of Mr. Margaret Edna Springer of Emmitsburg, prior to his separation from the active Army.

Specialist Springer, a graduate of the Emmitsburg High School, is a Radar Console Operator in Missile Master at Fort Meade. Missile Master provides for the integration of various Nike batteries in the 35th Brigade area.

The 35th Artillery Brigade provides for the air defense of the Washington-Baltimore area. It is the duty of the Brigade to maintain a ring of Nike sites protecting the nation's capital on a 24 hour basis.

Specialist Springer was allowed a 37 day early release because of the recent unexpected death of his father.

## LIONS CLUB CHARTER NIGHT OCTOBER 29

Twenty-two members were in attendance at the regular meeting of the Emmitsburg Lions Club held Monday night at Fitzgerald's Inn, President Ralph D. Lindsey presiding. Present also was District Governor Lawrence Dorsey, Woodsboro, who gave a brief resume of the club's activities during the past year. Other guests present were Harry Dougherty, Taneytown, William Benjamin and William Houck, Thurmont. Lion Houck, a member of the Maryland House of Delegates, made brief remarks.

Edward Fitzgerald, chairman of a committee to make arrangements for safety instructions for youngsters using rifles and shotguns, gave a report on the activity to date and stated that it was agreeable with the local Boy Scouts and possibly the Thurmont troop, to take these instructions, probably starting on Oct. 17. The classes would be held at the Sharpe & Hart Inc. shooting range on the Tract Road.

During the meeting it was announced that final plans had been made for the joint observance of the Emmitsburg and Thurmont clubs of their annual charter and ladies' night which will be held this year in Thurmont at the American Legion Home on Thursday evening, Oct. 29. Bud Cordi's Orchestra has been engaged for the occasion. An advertisement was authorized for the Grange Community Show program.

President Lindsey appointed the following committee to study the possibility of issuing a monthly club bulletin: Philip B. Sharpe, Paul W. Claypool and Arthur Elder. The safety instructions would be given under sponsorship of the Sporting Arms and Manufacturers Institute, New York.

(Continued On Page Eight)

## Grange Show's Premium List Announced

The Emmitsburg Grange's Annual Community Show has been set for Friday and Saturday, October 9 and 10, it has been announced.

The committee in charge reports the show all in readiness and has many interesting features. It also issued for publication the rules governing the show and the following premium list: General Rules

Exhibitors are solicited from all residents of the Emmitsburg Community. All fruits and vegetables should be in clear glass containers. The show is striving for uniformity by requesting the use of quart containers, but pints will be accepted. Labels and markings will be handled upon presentation for entry. Only exhibits grown or made by the exhibitor shall be eligible for a prize. No more than one entry per person is permitted in each class under each department. Example: Each individual may exhibit under Dept. 3, clover, alfalfa, lespedeza and mixed hay, but two exhibits of alfalfa, etc., from one individual will not be permitted.

Exhibitors from out of the community and also antiques, will be welcome and displayed, but will not be judged or be eligible for a prize. No exhibit that has won in a former Emmitsburg Community Show will be eligible for a prize again this year. They may be placed on display, however.

Entries will be received on Friday, October 9, from 8 until 11:30 a. m. Judging will be Friday from 1 to 5 p. m. Exhibits may be removed after 10 p. m. Saturday, Oct. 10 and must be claimed by 3 p. m., Sunday, October 11.

The placings of the judges must be accepted as final. The show committee reserves the right to pass on any decisions not covered by these rules.

## Exhibit List

Dept. 1—Corn, 10-ear samples, open pollinated varieties, hybrid varieties, popcorn and sweetcorn.

Dept. 2—Small grains and seeds, displayed in quart jars, wheat, barley, oats, rye, clover seed and timothy seed.

Dept. 3—Hay: Three-pound samples, neatly tied, of the following: Clover, alfalfa, lespedeza, mixed timothy.

Dept. 4—Fresh fruits, plate of five. Apples: Pink, Imperial, Delicious, Winesap, Grimes Golden, etc. Pears: Plate of five.

Dept. 5—Fresh vegetables. Best collection of 16 potatoes: Irish Cobbler, Green Mountain, Katahdins, etc. Best collection of 16 sweet potatoes, six turnips, one cantaloupe, one apple, one cauliflower, one pumpkin, one head cabbage. Plate of 5: Beets, tomatoes, peppers, onions, carrots, string beans, lima beans, one squash.

Dept. 6—Canned fruits and vegetables, should be in a colorless quart container. Red cherries, whole or seedless; yellow cherries, whole or seedless; white cherries, whole or seedless; corn, peaches, lima beans, tomatoes, sauerkraut, tomato juice, peas, carrots, applesauce, pears, vegetable mixture, string beans, beets, berries, kale, spinach, peppers, crab apples, rhubarb, plums, asparagus and broccoli.

Dept. 7—Jellies, preserves and pickles, colorless containers. Jelly: Grape, apple, raspberry, blackberry, peach, cherry, crab apple, and quince. Preserves: Strawberry, peach, pear and plum. Pickles: cucumber, bread and butter, beet, pepper mustard, chili sauce, catsup, watermelon, peach, dill, vegetable relish and mixed pickles.

Dept. 8—Meats (canned and home-cured). Should be in colorless quart containers. Canned chicken, beef, sausage, tenderloin, pudding, one home-cured ham, one home-cured bacon, spareribs and mince meat.

Dept. 9—Baked Products: (Home-made) loaf of bread, six rolls, six drop cookies, six rolled cookies; cakes, all kinds; pies, all kinds; donuts and biscuits.

Dept. 10—Sewing, crocheting, needlework, embroidery, knitting and quilts. Crochet work: Best quilt, best home-made garment, best garment made from feed sacks; embroidery.

Dept. 11—Flowers: Any suitable container may be used but will not be judged. Best flowering potted plant, best arrangement of dried flowers, best display of roses, best display of dahlias, best display of asters, best display of chrysanthemums, best floral arrangement.

FOR RENT—4 unfurnished rooms, private bath; front and side entrances; parking space. Chronicle Building. Apply Mrs. G. R. Elder. tf

## No Encephalitis Cases Reported In Maryland

There have been no proven human cases of eastern equine encephalitis in Maryland so far this year, according to Dr. Charlotte Silverman, Chief, Office of Planning and Research, Maryland State

Department of Health. During the past 15 years only two human cases of the disease have been reported in the State. These occurred in 1956 on the Eastern Shore.

Ten horse cases of encephalitis have been reported from the Eastern Shore this year, Dr. Silverman said. Blood tests in two of these horse cases are suggestive of eastern equine encephalitis, but the laboratory work involving the isolation of the virus has not yet been completed.

In New Jersey the virus has been found in several horse cases. The 23 human cases which resulted in 13 deaths in New Jersey have occurred mainly in the rural sections of Cape May, Ocean, and Atlantic counties, where there is much woodland and the mosquito density is high. Laboratory work on the human cases is still in progress, but blood tests from two patients suggest the presence of the eastern equine type of encephalitis.

The Atlantic City region is free of the disease, and New Jersey health officials state that people can safely come and go to this resort town.

Eastern equine encephalitis is a mosquito-borne virus disease affecting the central nervous system. It occurs in the eastern part of the United States sporadically. Although it is primarily a disease of horses, occasionally there are human cases. The disease is generally transmitted by specific types of mosquitoes which are not very common and are not the ordinary mosquitoes so plentiful at this season. It is not transmitted to humans by horses.

This type of encephalitis is a late summer disease, usually occurring around the latter part of August and early September. When cold weather sets in, infection stops. The New Jersey cases have occurred quite late in the year and, hopefully, because a change of weather can be expected shortly, there should soon be a drop in new cases.

Preventive measures against this disease include mosquito control programs and the vaccination of horses. There is, as yet, no vaccine for humans.

In Maryland, for several years, many agencies have worked together in studying this disease. This cooperative work is being done by the departments of Entomology and Veterinary Science of

Department of Health. During the past 15 years only two human cases of the disease have been reported in the State. These occurred in 1956 on the Eastern Shore.

Ten horse cases of encephalitis have been reported from the Eastern Shore this year, Dr. Silverman said. Blood tests in two of these horse cases are suggestive of eastern equine encephalitis, but the laboratory work involving the isolation of the virus has not yet been completed.

In New Jersey the virus has been found in several horse cases. The 23 human cases which resulted in 13 deaths in New Jersey have occurred mainly in the rural sections of Cape May, Ocean, and Atlantic counties, where there is much woodland and the mosquito density is high. Laboratory work on the human cases is still in progress, but blood tests from two patients suggest the presence of the eastern equine type of encephalitis.

The Atlantic City region is free of the disease, and New Jersey health officials state that people can safely come and go to this resort town.

Eastern equine encephalitis is a mosquito-borne virus disease affecting the central nervous system. It occurs in the eastern part of the United States sporadically. Although it is primarily a disease of horses, occasionally there are human cases. The disease is generally transmitted by specific types of mosquitoes which are not very common and are not the ordinary mosquitoes so plentiful at this season. It is not transmitted to humans by horses.

## Looking Ahead

...by Dr. George S. Benson  
DIRECTOR - NATIONAL  
EDUCATION PROGRAM  
Searcy, ArkansasMr. Congressman, Now  
Look Here

Senator Harry F. Byrd of Virginia, chairman of the Congressional Joint Committee on Reduction of Nonessential Federal Expenditures, informs me that another sad milestone in the growth of government has

been reached. The cost of civilian employment in the Executive Branch of the Federal government reached an all-time high in fiscal 1959. There are 2,352,242 people (not counting the armed services) on the Federal payroll, and the bill being footed by the groaning taxpayer of America in this category alone is more than \$12 billion a year for the first time in history.

With the first session of the 86th Congress ended, and most of the Congressmen back in their districts attending to their political fences, it is a good time for citizens to register their

pleasure or displeasure with the way our national government is being operated. Surely there are reasons to be grateful to our Congressmen. But, it is doubtful that any taxpayer is pleased with the continuing, whopping expansion of the Federal payroll and its cost. Senator Byrd, who for years has been the outstanding voice in Congress against waste, inefficiency and Federal payroll expansion gives us some documented figures with which to approach our Congressmen.

Too Many?

There are 1,266,566 people now working in civilian jobs in the Executive Department, and 1,085,676 civilians working in the Department of Defense (not counting armed services personnel). In addition there are 851,182 citizens of other countries receiving pay from the U. S. Federal government at the rate of \$287,000,000 a year. This boosts the payroll costs to \$12,617,000,000, the highest expenditure in the history of the Executive Department.

With taxes of all kinds—open and hidden—taking about one-third of everybody's income, the continuing increase in the Federal payroll should move every citizen to make direct contact with his Congressman and register disapproval. No one can adequately justify having 2,352,242 civilians working for the Federal Government. No one can shrug off the danger of this ever-expanding bureaucracy, the danger to our freedom and our material well-being.

Coast To Coast

Twelve billion dollars is a lot of money. It breaks down to about \$252 for every family in America. And, this is just to pay the salaries of Federal employees. The total Federal expenditures this year was \$80.7 billion. Two and a half million that's a lot of people! If on Thanksgiving Day Federal civilian employees were to stage parades in every city in America with 250 thousand population

(or more), each city simultaneously would have a parade many miles long, with a solid phalanx of marchers, 10 abreast which would require nine hours to pass a given point!

If all the Federal employees were to stand in a single line, arms outstretched, hands touching, the line would extend eastward from the Washington Monument, to the Empire State building in New York City, circle New York's West Side, cross Long Island and head west; the line would continue through Washington; Charleston, West Virginia; Frankfurt, Kentucky; Memphis, Tennessee; Little Rock . . . Dallas . . . Tucson . . . and on to San Diego, California!

A Serious Situation

Perhaps this sounds silly. It really isn't. Somehow we must dramatize the huge and con-

stantly expanding Federal payroll. Somewhere we must call a halt, and begin cutting. We side-by-side with the row of Federal employees stretching across the country a row of silver dollars were to be laid, each dollar touching the next, from Washington to New York and thence westward to San Diego, by the time the last of the 12 billion salary dollars had been placed in line, there would be 83 solid rows of them, coast to coast. Or instead of laying the dollars out in rows, if you wanted to give each employee standing in the long transcontinental column a sheaf of currency equal to the average salary paid to each of the 2,330,000, you would hand each a bundle totalling \$5,242.00.

This isn't to be considered as criticism of the people who work

for the Federal Government. They are equal in character and ability to people employed in other occupations. The point is, there are too many of them; all of the two million, three hundred thousand are not needed! Half that many probably could do the really necessary work of the Federal government. With the gradual cutting down of the huge force, we'd have better government, a safer future, and at least, some re-

lief from the heavy tax burden.

Recent visitors at the home of Miss Alice Kelly were: Mr. and Mrs. Leo Eckenrode, Levittown; Louis Eckenrode, of Philadelphia; Mr. and Mrs. Charles Eckenrode, College Park; Mr. and Mrs. Girard Eckenrode and son, of Baltimore; Mr. and Mrs. Pius Kelly and daughter, Becky, and Mrs. Paul Hetrick, all of Newry, Pa., and Mrs. Louise Jacobs and Mrs. Cleve Hoke, all of Baltimore.

## She's Back On TV

"THE DONNA REED SHOW," which firmly established itself in its first year on TV, returns for its second season this October in a new time period. Donna, her TV husband—Dr. Alex Stone—and the two personable youngsters, Mary and Jeff, will be back with their brand new series and some exciting comedy plots. The show will be seen on Thursdays this season, on the ABC-TV network.

## Long Hot Summer Calls For Quick WARM Showers!

One way to beat the mid-summer heat is to hop in and out of a shower or tub several times a day. But it's more a matter of degree than frequency at this time of year, the makers of Mum advise. Warm water is better than cold for keeping you cool in hot weather because it makes your blood vessels dilate and the inside heat comes to the surface. That's what cools you off. Cold water keeps the body heat sealed in. When you're drying off after a bath or shower, don't rub your

skin, pat yourself dry. Then dust yourself with a fragrant powder to help you slip into clothes more easily. Keep that after-bath freshness by applying an effective deodorant like Mum as soon as you step from the tub. It's particularly important after each bath or shower in the summer — when everyone tends to perspire more. As a finishing touch, spray a mist of cologne or perfume about you — and you're as refreshed and glowing as a mid-summer night's dream!

## PUBLIC SALE

We, the undersigned, having sold our farm, will sell at Public Sale on our premises located on the Emmitsburg and Keyville Road, two miles southeast of Emmitsburg, Md., on

**SATURDAY, OCTOBER 3, 1959**

At 10:30 O'clock Sharp (DST)  
the following Personal Property to-wit:

### 30 HEAD OF DAIRY CATTLE

Of which 23 are registered Cattle, consisting of 16 head of milch cows, 7 bred Heifers (of which some will be fresh or close by sale day. There will be at least six fresh by sale day. This herd is all home-raised. Dairy Herd has DHIA records and will be tested within 30 days of sale. Can go anywhere and can be inspected anytime; all artificially bred. Registration papers and health certificates will be with each head. All calf-hood vaccinated.

### FARMING MACHINERY

Farmall H Tractor, fully equipped, Ferguson Tractor No. 25; New Holland Baler Super 66; 13-disc Ontario Drill; International 28-disc Harrow; I. H. Corn Planter, power-lift; New Idea Manure Spreader on rubber; 90-bu. single Cultipacker; cultivators for Ferguson Tractor; 2 tractor plows, both 12'; New Idea side-rake, 4-bar; Bradley 5-ton rubber-tired Wagon with grain bed; Hay Elevator; steel-tired Wagon; I. H. Power Mower, 7' cut; Trailer for car or tractor; 3-section Springtooth Harrow. All the above is in first class condition. Wood Saw; hammermill and 48"x30" belt; corn sheller; smoothing harrow; Log Chains; Platform Scales; 4-hole Hog Feeder; 2 Electric Brooders, 500 size; Grindstone; Wheelbarrow; 2 blockfalls; 40' Extension Ladder; Stepladder; lot of Posts; Clover seed sower; 2 sets of stilyards, clippers, 2 electric fences, chicken equipment. Two Brood Sows with pigs by side of sale.

### 200 Laying Hens and Hogs DAIRY EQUIPMENT

Wilson 6-can Milk Cooler; 2-unit DeLaval Milkers, complete; DeLaval Water Heater; double wash tank sterilizer; 15 ten-gallon Milk Cans; 1,000 or more bales of alfalfa and timothy; hay by the bale; 306 bales of straw; 40 barrels of corn. BUTCHERING EQUIPMENT—Hog Scalders; large kettles, stirrers, stuffer.

### HOUSEHOLD FURNITURE

Francis Brown Piano; white enamel Home Comfort Range; 5 Diningroom Chairs; 2 Bed Springs; Bed Linens; 2 Box Springs; Livingroom Suite; General Electric Washing Machine; Jarred Fruit; Music Stand; 6 good pairs of Curtains; Coal Oil Heater; Electric Egg Washer. Swedish People Have Security  
Stockholm—the capital—is a beautiful city with wide streets and handsome buildings. It has large supermarkets with co-operative managements. Railroads, utilities, and telephones are mostly government owned. The people have old-age assistance, free medical care, and many other things which give them "security." They seem happy, contented, and not overworked. They have only one complaint, namely, that "taxes are very high."

Not only is real estate heavily taxed, but excise taxes exist on most products used by the people from the "cradle to the grave." There also is an expensive bureaucracy of government employees. Even though these are poorly paid, they have "security." Rather than compete in private work or business, people seek these government jobs. Until well after World War I the heavy taxes were cheerfully accepted, as Sweden was very prosperous from 1912 to 1927. But World War II was a different story. Sweden then got little trade, there was much unemployment, and the country went heavily into debt.

## Cannot Balance The Budget

We all know what happened to Germany, Poland, and many other European countries during World War II. They completely defaulted on their national debt and the value of their "dollars" declined greatly. The Swedish "dollar"—called a KRONA—is now worth only about 19c.

Sweden has not balanced its budget since 1952. In fact, the budgetary deficit has been in a decided uptrend, and in the year 1958 the deficit had risen to 1.5 billion Kronor, or to the equivalent of \$290 million in American funds.

Sweden's Economic System  
Discouraging To Executives

All the above is disappointing to me, especially as the Swedes do not admit that they are operating under a Socialistic Government. They talk only of a co-operative government. It is true that the Swedish people buy almost everything from the great "Co-operatives" which operate most of the factories and many of the farms and other producers.

Then what is the trouble? I hear no complaint of dishonesty; the workers are faithful and there is less "leaning on shovels" than in the United States. The difference is that the able Swedish executives leave the country, going largely to the United States where they can learn much more. Because of Sweden's economic system the country cannot get efficient managers; and this applies to the banks and all officers which receive high salaries in our country. The lid on executives' salaries is the great handicap to the Swedish Co-operatives, railroads, steamships, and utilities.

Our Capitalistic System  
Needs More Competition

I am sorry to find this state of affairs in Sweden. Government-operated businesses need the competition of privately owned, fairly taxed competition. But our privately owned companies also need more competition as they become bigger. This is especially true of the "Dow - Jones Industrial" concerns, which have recourse to unlimited capital. We further can get the world's best managers, since we can pay very high salaries. This, however, is not healthy. Our nation needs "small businesses," just as a church needs a Sunday School. Yet our good executives are being forced into the professions and government jobs because of the very high taxes levied on "big business."

Not only does the Swedish system lack the income to attract good managers, but Sweden is losing its best mechanics and artisans. Khrushchev may see this danger ahead for Russia. It may be his reason for keeping his workers at home and not letting them see how much better they could live in the United States than in Russia. This may be one reason why the Communist nations want to make the whole world communistic, — namely, to prevent the moving of their best people to a so-called capitalist country where business is privately owned.

## OVER THE GARDEN

## WALLS

A COLUMN FOR

HOMEOWNERS

Impulse buying—it can wreck your budget as well as your landscaping.

Folks who have the nicest landscaping planned it that way. They didn't just plant it and let it grow. It took planning, as well as planting. And then care, to keep it looking nice.

## What's Your Plan?

Not that you have to get fancy, but you really need a plan before you can start. Your best guide will be your lot itself, and how you use it. There's still plenty of opportunity for originality.

There are three areas to plan for: foundation (close to your house), border (around your lot's edge), and trees (to "frame" and shade your house).

Foundation plantings can be varied and simple. They have one main job: to tie your house in with the old—to make it look like it grew there.

Border plantings help set your property off from your neighbor's. Or they help divide one section (like your front lawn) from another (like your play area in the back).

Trees take more time. That's why early planning—and planting—is needed. But they really tie your whole lot together. They

also provide shade and wind-shelter.

## What's First?

By now, you may be ready to give it all up as too much work. If that's so, take the family for a ride through the neighborhood, and see which houses look best. And why?

Landscaping ranks high every time. It not only makes them look better, it makes them more livable—and worth more money.

Now you're ready to begin.

Try to make a plan, showing how you'd like to make your lot look. There are several sources of help: your local Garden Club, your library, your local nurseryman, your county extension agent. They all either have personal help they can give, or useful publications.

One of the things you'll need to know is: What kind of plants will look best? Here's where your advisors can help you most. Maybe one of your neighbors with the well-planned yard might help.

You'll also need to know how much all this is going to cost. By this time you're ready for the nurseryman. He may be able to suggest less expensive substitutes. Together you can work out what comes first.

You don't have to get it all done at once. Especially if you plan it. You can usually use annuals or perennials while your waiting for your foundation or borders to develop.

The tree planting is what will take time (before they're large enough to do any good). And there's no substitute so this is often a good starting place. But get in some border and foundation plantings, too, so you can see some immediate progress.

## Planting Suggestions

There are a couple of guides

for planting shrubs and trees.

Prune back the top to balance the roots. When the plant was dug at the nursery, it was balled with a good ball of earth around its roots. But some of the roots were pruned off. Prune off some of the top, too, to keep it in balance with the roots.

Dig your planting holes twice as big as the root ball, and fill them with topsoil mixed with peat. If your ground is clay, mix equal parts of soil, sand and peat. This is especially important in areas where there is much fill or grading. Topsoil can be fertilized to help establish a good root system quickly. Foliar fertilizers will help give a quick recovery, too.

Plant the shrub or tree at the same level it grew in the nursery.

If it's a tall shrub or tree, staking it the first year or two will help get it established in an upright position.

Water frequently until roots get established.

Protect it from winter injury or drying out due to wind or sun.

Work? Sure it is. But it's worth it. Ask the man who owns the well-landscaped house.

## Garden Notes

Time to dig and prepare soil for fall planting of roses. Select a well-drained location. Add lots of organic matter, plus a complete fertilizer (5-10-10) at the rate of 3 to 4 pounds per 100 square feet. This bed will be in good shape to plant roses in November.

Treat lawns with heptachlor, aldrin, chlordane, dieldrin, toxaphene or DDT to kill Japanese beetle grubs before frost drives them deeper into the soil.

days 1:30-2:00 p. m.

Oldest Gasoline  
Dealer Sought

The Maryland Petroleum Association is conducting an intensive search for the "oldest retail gasoline dealers" in the State of Md., it has been announced by Charles A. Newland, chairman of the oil association.

Oil companies, distributors, jobbers, dealers, and the general public are being asked to submit the names and addresses of any-

one they think may qualify for the title.

According to Mr. Newland, "the oil man who has been an active retailer for the longest time will be given special recognition and an award on October 21 when the Baltimore Advertising Club pays homage to the oil industry on its 100th anniversary."

Names and addresses of candidates along with their total years of service should be sent to the Maryland Petroleum Association, 604 Maryland Trust Building, Baltimore 2, Maryland no later than October 10.

The Maryland State Police, one of only five police departments in the nation selected for this honor have been presented an Outstanding Achievement Award by the National Safety Council for excellence in traffic supervision during 1958. Governor J. Millard Tawes and Col. Carey Jarman superintendent of the department, were presented the award by Col. Russell A. Snook, (right) Director of the International Association of Chiefs of Police at the Governor's Safety and Health Conference in Baltimore, Maryland.

ON DISPLAY! TODAY! SPACIOUS! POISED! BEAUTIFUL! LIVELY!

DISTINCTIVE! SATISFYING! ENDURING! SLENDID! SPIRITED! JOYFUL! SWEET!

Elegant Impala 4-Door Sport Sedan—one of 16 spanking new Chevrolets you can choose from.

## THE SUPERLATIVE '60 CHEVY

This is the one that says '60 like no other car. From its clean-thrusting grille to its dapper rear deck, there's so much that is new and different about this superlative Chevrolet it stands out from the rest like a fresh-minted coin. And you'll be just as wide-eyed over what's inside—the relaxing roominess, tasteful trim, hushed elegance, all comfortably cradled by Full Coil springs at all four wheels. Yet, sumptuous as this new Chevy is, you'll find new economy of operation, new dependability, new longer life. Here, then, we're confident both you and your budget will joyously agree, is the nearest to perfection a low-priced car ever came!

Here's the car that introduces a whole new decade of design—with so much that's new and different that the other ones can only hope to come close.

It's the superlative '60 Chevrolet—with new space inside, new spirit under the hood, new splendor in every clean-etched line.

Freshly shaped contours rake back from the unified new grille to the jaunty rear deck, fitted with craftsmanship you'd expect only on the most expensive makes. Inside, there's room to sprawl in, room to sit tall in—generously provided by Chevy's sofa-wide seats and

extra margin of hat space. And there's even more leg room for the man in the middle—thanks to the way Chevrolet engineers have shaved down the transmission tunnel.

Out on the road, as Chevy's Full Coil ride will persuade you most gently, there's not a car near the price that comes close to the hushed comfort of this one. And, adding to your sense of silence and solidity are thicker, newly designed rubber body mounts that do an even more efficient job of filtering out road shock, tire hum and vibration.

Quiet, quick-responding power is provided by a choice of two standard engines—Chevy's famed Hi-Thrift 6 and a new Economy Turbo-Fire V8 that gets up to 10% more miles out of a gallon of regular while delivering greater engine torque at normal speeds.

Chevy's accent on comfort and convenience even extends back to its easier-to-load (and tremendous) luggage compartment. You'll also find a convenient new parking brake that automatically returns to normal height after application, a new clutch linkage that filters

out even the smallest engine impulses more effectively than ever and a trim new two-toning motif that's available on all 16 fresh-minted models.

But, impressive as all this may look in print, there's really only one way to tell how near to perfection this superlative '60 Chevrolet actually comes... and that's to drop in on your dealer and drive one!

## Soil Bank Changes Are Explained

The Maryland Agricultural Stabilization and Conservation Committee today announced two important changes in the 1960 Conservation Reserve of the Soil Bank, as follows:

- (1) Basic annual rates will be established by the same method used for 1959 contracts; and
- (2) Farmers will have until October 9 (rather than Sept. 30) to take the first step in applying for the 1960 program.

These changes have been made following enactment of a new law passed shortly before the recent adjournment of Congress and signed by the President Sept. 21. The added time will enable farmers to study the new rate arrangement and determine the advisability of coming into the program.

The new law, according to William E. Dudley, Chairman of the Maryland ASC Committee, removes the legal requirement that the annual payment rate must depend on actual crop production

during the period 1955-59 on the land placed in the reserve. Many farmers regarded such rates as unfair because of the effect of drought and other natural disasters on crop yields during one or more of those years.

Under the new law basic annual rates for 1960 will be determined chiefly on the basis of the productivity and value of the land for agricultural purposes, just as they were for 1959. The basic rate may not exceed 20 per cent of the value of the land offered and may not be higher than the basic annual rate that would have been established for the same farm in the 1959 program.

In every case where a farmer has already been informed of his basic 1960 rate and where the change will result in a different rate, the farmer will be notified and will have an opportunity to submit an application for a contract on the basis of his new rate.

This year, for the first time, some Maryland farmers are facing the question of what to do with land that has been held out of production in the Conservation Reserve. That's because quite a number of contracts entered into in 1956 and 1957 will be expiring at the end of this year.

For the farmer who wants to keep that land in the Soil Bank, Mr. Dudley tells, there are two choices.

One choice is to request extension of the existing contract, with the annual payment continuing at the present rate. The other is to offer the land for a new contract beginning in 1960.

Some farmers may prefer to offer the land for a new contract, hoping to get higher payments because of the generally higher level of rates now than in the

## YOUR PERSONAL HEALTH

### Things To Come

If you're a science fiction fan, as we are, you've read at least one of those stories in which people live to be hundreds of years old without any of the disadvantages which go with being elderly today. In the last two decades, fiction has had a tough time keeping ahead of fact in many respects. But the aging process is still an unsolved puzzle. Perhaps some day scientists will be able to prevent or reverse aging. Meanwhile, we must help ourselves.

There is much we can do right now to prolong our lives and ensure a happy health and active old age.

Perhaps most important is to make a habit of an annual physical checkup. Many of the ailments which rob oldsters of the joy of living would never become disabling if they were detected and dealt with early. And some, like tuberculosis, cancer, glaucoma, high blood pressure and diabetes give rise to no apparent symptoms in the early stages. Only a doctor can detect them.

Healthful eating habits are important to later well-being, too. It has been said that we in the earlier years of the program. However, such land must be offered in competition with all other land offered under the regular procedure for the 1960 program.

Farmers who have not previously requested a rate determination but now believe that the program will be of interest to them or farmers who wish to continue their existing contracts should visit the county ASC office as soon as possible to obtain full information, Mr. Dudley said.

U. S. are both overfed and poorly nourished. That's because some of us eat too much of the wrong kind of food and not enough of the right kind. An adequate diet includes, every day: Dairy products; meat, fish or poultry; green and yellow vegetables; bread and cereals. A diet including all of these foods will not add unwanted pounds if rich cakes, pies and pastries are omitted.

Boredom and loneliness are hazards of the later years. Both can be avoided if we start now to develop hobbies which involve other people — chess and bridge clubs, volunteer welfare work, music and art groups, for instance.

It's said that we begin to age as soon as we are born. Certainly it is never too soon to prepare to enjoy what can be the best years of our lives. This column is sponsored in the interest of better health by your Tuberculosis Association.

## Free Eyesight Tests Scheduled

Free glaucoma detection tests for relatives of known glaucoma patients will begin this week under the sponsorship of the Prevention of Blindness Society of Metropolitan Washington. This will be the first program in the United States designed specifically for those with a family history of the disease. Tests will be conducted every Wednesday and Thursday throughout the fall at the offices of the Society, 1025 Vermont Avenue N. W. Appointments may be made by calling REpublic 7-0378.

Glaucoma, called "the sneak thief of sight," usually gives no warning symptoms when it strikes.

It is an eye disease in which sight is gradually destroyed by increased pressure or tension within the eye. According to Miss Helen Curtis Demary, Executive Director of the Society, approximately 1900 people in the Washington Metropolitan Area are partially or totally blind from glaucoma and most of this blindness could have been prevented.

Two out of 100 people over 40 have glaucoma, although many of them do not know it. When discovered early, glaucoma can be arrested. When discovered late, however, the best treatment is often ineffective. Glaucoma is a disease of middle and later life and has a tendency to run in families, Miss Demary reports.

The Society has a new booklet on glaucoma which is available without charge.

In the past three years the Prevention of Blindness Society has given glaucoma detection tests to over 5000 people. Fifty-nine of them were found to have unsus-

pected glaucoma. Forty-two others have been referred for complete eye examination and reports are pending. Most are early cases, however, and can expect to keep good sight through life with proper treatment.

The Prevention of Blindness Society is able to offer the glaucoma detection tests as a free public service because the Society shares in the United Givers Fund. Last year the Society's budget was increased by \$2200, thanks to the large number of UGF donors who specifically designated the Prevention of Blindness Society in making their contributions.

Educational processes, like other modern activities, have reached the stage where they cost a great deal of money; whether we like the idea or not.

Parents, in seeking to help their children, might remember the fact that responsibility often develops unsuspectedly.

## The "Terrible Twenties"

"Goodyear Theater," winner of last season's coveted Emmy Award, premieres its new fall schedule on Monday, September 28, 9:30 p.m., NYT, over NBC-TV with "Hello, Charlie," written by Ben Hecht, one of the nation's outstanding men of letters. Hecht will also do the narration for this program which is based on an incident in the life of his late friend and collaborator, Charles MacArthur. Tony Randall will portray MacArthur. "Hello, Charlie" is the rousing story of the "Terrible Twenties" in the newspaper business.

QUIET REVOLUTION! ON DISPLAY TODAY! HOORAY! SMALL WONDER!

CORVAIR BY CHEVROLET! SMALL MIRACLE! THREE COMPACT CHEERS! TODAY!

# THE REVOLUTIONARY Corvair

There's nothing like a new car—and no compact car like this de luxe Corvair 700.

Here's the car created to conquer a new field—Chevrolet's low-priced compact Corvair.

The product of nine years of research and development at the auto industry's most advanced facilities, it's America's first truly compact, economical car that retains the ride and 6-passenger comfort you're used to in a big one.

The key to this small miracle: America's first and only modern rear-mounted aluminum engine—a lightweight 6 that's so revolutionary it can be packaged with the transmission and drive gears as one compact unit.

By putting the engine in the rear, Chevrolet has made the floor practically flat, front and rear. There's plenty of foot room for everybody, including the passengers in the middle.

Shifting engine weight to the rear also makes for smoother, easier compact car handling and gives glued-to-the-road traction on ice, mud or snow.

Corvair's size—some 5 inches lower, 2½ feet shorter and 1,300 pounds lighter than conventional sedans—makes it a joy to jockey through busy streets, a pleasure to park (no need for power assists). Its revolutionary Turbo-Air 6 gets up to 30% more miles on a gallon of regular (a real magician on mileage). And, because the

America's only car with an airplane-type horizontal engine! America's only car with independent suspension at all 4 wheels! America's only car with an air-cooled aluminum engine!

The engine's in the rear where it belongs in a compact car!

engine's air-cooled, you never have to fuss with antifreeze, you get quicker warmup with less wear on parts even on the coldest mornings (even heat for passengers comes quicker—almost instantly—from an airplane-type heater).

Yet, wonderfully practical as all this sounds, you'll find the most practical thing of all about this new Corvair is its remarkably low price. Your

dealer's the man to see for all the short, sweet details.

**REVOLUTIONARY TURBO-AIR 6** Gets up to 30% more miles on a gallon, needs no antifreeze, provides quicker warmup with less wear on parts.

**ONE-PACKAGE POWER TEAM** Wraps rear engine, transmission and differential together into one compact lightweight unit. Takes less room, leaves you more.

### STYLING—PURE AND SIMPLE

Clean, uncluttered lines shape both 4-door models—the de luxe Corvair 700 and the standard Corvair. Each has its own distinctive trim, and you get more visibility area than in many full-sized cars.

### FOLD-DOWN REAR SEAT\*

Works easily, instantly, adding to Corvair's versatility by enlarging rear seat cargo space to 17.6 cu. ft.

### FLAT FLOOR

Corvair is America's only compact car with a practically flat floor, the only one with the kind of relaxing room that U.S. motorists are used to.

### UNISTRUT BODY BY FISHER

Does away with conventional frame, incorporating all structure into a rigid body-frame unit that gives you more inside room with less weight.

### UNDER-HOOD LUGGAGE COMPARTMENT

Trunk's up front (like an elephant's) where it's convenient for groceries, luggage.

### 4-WHEEL INDEPENDENT SUSPENSION

There's no conventional axle—front or rear. Wheels, cushioned by coil springs, take bumps independently of each other, for smooth, road-hugging ride.

\*Optional at extra cost

## SPEAKING OF CARDS

"FASTEST DRAW GETS FIRST DEAL."

## COLOR IN THE HOME

By Jacquelin L. McConaughy Du Pont Color Stylist

Styles in home decoration change as completely, although not as rapidly, as women's fashions. The all-white "sanitary" kitchen, for example, is as out-of-date as the hobbie skirt. Color is rightfully recognized as an important ingredient in the modern kitchen, functionally as well as aesthetically.

Family living centers more and more around the activities of the cooking area. And by proper use of color, it may be transformed into a bright, inviting place for meal preparation, eating and informal entertaining.

Just what colors you choose for kitchen redecoration is, of course, an entirely personal decision. But remember that certain colors are appetizing colors, while others have unpleasant associations with food.

Du Pont color experts have established that among light

colors, those with the most appetite appeal are peach (and soft pink), orange, red-orange, clear yellow, light blue and pale, cool green. In deep shades, brown and tan seem best related to foods, and rich green, red and blue also complement foods. In general, dark colors are not as appetizing as light shades, and should be used sparingly.

Dismal, depressing hues, such as drab gray and black, should be avoided. Deep yellow, with a mustard or olive cast, is the least appetizing color of the spectrum. Lavender shades are almost as distasteful.

A few suggestions: refrigerator and stove in a lustrous pale green. For cabinets choose a luscious candy pink gloss. To accent interior, cabinets and drawers, try a brilliant jade green.

Whatever, put colors—the appetizing colors—to work for you.

**THE WORLD'S MOST WIDELY USED DEVOTIONAL GUIDE**

Read Luke 18:1-8.

He (Jesus) spoke a parable unto them to this end, that men ought always to pray, and not to faint. (Luke 18:1)

During World War II a soldier said to me, "I didn't pray when things got tough. I never prayed to God when I was safe. It wouldn't be fair to start now."

This soldier had discovered part, but not enough, of the meaning of prayer. He had come to feel that prayer was more than a selfish cry for help.

Indeed, prayer is more than asking help and comfort for ourselves. Prayer is a means of worship and fellowship. It is a means of helping others as well as ourselves.

The soldier was wrong in not praying. Prayer is, first of all, the means we have of talking with our heavenly Father. We are heard, but not because we are worthy and our prayer habits right. God hears us because He loveth us. Therefore, we ought always to pray. The sooner we start the better—even if we start just because we are scared!

**Prayer**

Father, we cannot come to Thee worthily but we can always come. Hear our prayer and help us to pray better. Lead us that we may through Christ overcome all sin and unrighteousness and stand before Thee and in the presence of Christ our Saviour. In His name we pray. Amen.

**Thought For The Day**

What ever my need, I can always pray.

J. B. Dawson (New Zealand)

**OUR STATE UNIVERSITY**

"Although everyone might not agree that man is a descendent of the monkey, few would dispute the importance of a chemical constituency, hemagglutinin, found in the blood of the rhesus monkey which can forecast danger during pregnancy."

Tests for this chemical constituency, or Rh factor, found also in the monkey, are made each year for about 18,000 pregnant women at the Baltimore Rh Typing Laboratory on the University of Maryland campus.

Results of the tests establish the positive or negative characteristic of the blood, and for 15% of all pregnant women eliminate the hazard of serious disease or death for her child because of blood incompatibility.

Women with an Rh negative factor can become sensitized to the factor and produce antibodies against Rh positive blood which the infant may either inherit from the father or obtain through a transfusion given to the mother. When this occurs the incompatible fetal cells enter the mother's circulation, encounter the antibodies, and then go back into the baby's blood where the antibodies attack red blood cells.

The Rh factor tests foretell the danger and an exchange transfusion soon after birth can save the infant's life, by removing the Rh positive cells and replacing them with Rh negative cells which cannot be damaged by maternal antibodies.

Tests are also made by the laboratories for the husband and children of an Rh negative woman so that proper precautions might be taken.

Established in 1945, the university laboratory is sponsored by the Maryland Obstetrical and Gynecological Society as a nonprofit community service.

take better care of their craft than ever before—what they have is now well worth protecting.

There are only a few ways which modern boats can be seriously damaged while they are on the water. Rule No. 1 is: Treat solid objects with respect. Piers are probably the most obvious hazard. Approach a pier from the lee side if at all possible. This not only gives the driver better control while he is easing in close, but will permit his boat to swing away once it is tied up. This applies to boats with nonscratchable finishes too. Any boat should be held away from a dock, not against it. A sudden heavy wash can dash an unguarded boat against a pier. Fenders are a good precaution.

However, not all solid objects are above the surface of the water. Rocks, pilings and logs that cannot be seen offer added hazards of undetermined size and location. Charts and local information will help the small boat skipper keep to water free from such obstruction.

There are two sorts of banging damage. One is the obvious big crash. The other type is repeated banging of less intensity. Boats can be loosened and weakened in this manner without the knowledge of the owner.

Whacking waves can be hard on a boat. Water is solid when hit at high speeds. Even if your passengers don't mind the jolting, take it easy. When you cross a bad wave, slow down in time so that you go off plane before you meet it.

After a sudden throttle cut with a powerful outboard, don't advance again at once. Wait until the lower unit has had a chance to settle back against the transom of its own accord—it probably tilted up when you cut throttle. Powerdriving the motor out of tilt will give the transom a real shock.

If you pull water skiers, fasten the tow rope so that when it goes taut the force of the pull is distributed, not received by one spot.

**SOCIAL SECURITY NEWS**

Beginning in October 1959 farmers will have social security disability protection for the first time. That date can be as important one for any farmer who becomes severely disabled in October or later months.

Although many severely disabled people in this area are now receiving disability insurance benefits under social security, farmers have not been able to qualify up until this time, according to W. S. King, Manager of the local social security office.

A disabled person has to have social security credit for five years in the 10 years immediately before he became disabled. Because farmers were not covered under the law until January, 1955, they could not meet this test. By now, however, most farmers will have earned five years or 20 quarters of coverage under social security beginning with the month of October.

This does not mean that farmers can be paid disability benefits for the month of October because the law still requires that a person be disabled for six months or more before payments can be made. But it does mean that the farmer who becomes disabled in October or later can meet the work requirements of the law and become eligible for benefits after six months.

**STATEMENT OF OWNERSHIP**

Statement required by the Act of August 24, 1912, as amended by the Acts of March 3, 1933, and July 2, 1946 (Title 39, United States Code, Section 233) showing the ownership, management, and circulation of the Emmitsburg Chronicle published Fridays at Emmitsburg, Maryland for October, 1959.

The names and addresses of the publisher, editor, managing editor, and business managers are: Charles Arthur Elder, Emmitsburg, Maryland.

The owner is: Chronicle Press Incorporated, Emmitsburg, Maryland.

The known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities are: None.

The average number of copies of each issue of this publication sold or distributed, through the mails or otherwise, to paid subscribers during the 12 months preceding the date shown above was: 1050.

(My commission expires May 1, 1961).

**State Teachers Meet Saturday In Baltimore**

Clayton E. Rose, director of public relations for the New York State Teachers' Association and newly elected president of the National School Public Relations Association, will be the keynote speaker for a public relations institute on Saturday, October 3, at the Hotel Stafford in Baltimore. Mr. Rose has chosen "You and Public Relations" as his topic, according to Harry C. Hendrickson, director of communications, Maryland State Teachers' Association, coordinator of the institute.

Sponsored by the MSTA public relations committee, the institute is designed to aid local public relations chairmen and committee members in planning an effective program of public relations for schools. In addition to the keynote address, the program will include group discussions, displays of public relations materials, a coffee hour in honor of Mr. Rose and a showing of the latest NEA film produced by the National Education Association.

Author of the six-book series, Air Age Readers, Mr. Rose has also written numerous articles for School Executive magazine, School Board Journal, New York State Education and New York Parent-Teacher. He has served as consultant and speaker at state and national conventions, lectured before education classes and forums at several collegiate institutions, and conducted the public relations seminar in 1956 at State University Teachers College at Plattsburgh, New York. Mr. Rose is nationally known as an expert in school public relations and is a dynamic speaker.

Thomas Johnson, president-elect of MSTA and supervisor of elementary schools in Prince George's County, will greet the institute participants at the opening session at which Miss Shirley E. Parsons, teacher at the Prince Street Elementary School in Salisbury, will preside. Others of the planning committee who will assist as group discussion leaders include Miss Rose Kinney, Baltimore City; Miss Martha Seaman, Hagerstown; and John Woodfield, Easton. Thomas G. Bush of the Mergenthaler Vocational High School in Baltimore will be in charge of displays.

Harry C. Hendrickson, MSTA director of communications, is serving as staff consultant to the MSTA public relations committee and as coordinator of the institute.

Issues are vastly more important than men, but it requires men to make issues.

**State Income Tax Identification Cards Are Changed**

State Comptroller Louis L. Goldstein announced today that new identification cards had been given the employees of his office. He stated that the new cards bear the employee's photograph and description.

Mr. Goldstein stated that there had been a number of cases brought to his attention where the taxpayer had doubts that the person calling on him was a bona fide representative of the Comptroller. In a few instances, there have been imposters both with respect to Federal and State offices.

Comptroller Goldstein said that

all of his field representatives have been instructed to show their identification cards when they introduce themselves to the taxpayer. Taxpayers should not, he continued, deal with any person representing himself to be a representative of the State Comptroller's Office until he has examined the identification card and assured himself that the person is a bona fide agent of that office.

Peace will come to the world when and if the people of the world are willing to do as much for the cause of peace as they do for the sake of war.

The ways of mankind demonstrate very clearly, that it does not take much hokum to elate the vanity of men or women.

**RHYME and REASON for the SWEATER SEASON**

**WASHING**

A frequent bath in mild suds and lukewarm water will actually help preserve the life and softness of your nice sweaters. Before washing: turn the sweater inside out; button cardigans and open-necklines to retain shape. Then follow washing instructions on hang-tags attached to the sweater when you buy.

**WEARING**

A tip for that Tailored-Look popular this season: turn the cuff on your long sleeves under at the wrist—it's a neat, trim effect. To keep sweaters fresh and ready-to-wear, an effective deodorant is essential. Mum cream deodorant, safe for you and your nice cashmeres, is a good choice.

**AIRING**

Because sweaters cling to the body, and fit close to the underarm area—give them a good airing after each wearing. First shake out, then air overnight if possible. Wear shields and use a good deodorant like Mum for full protection. Put sweaters away separately; give them room to breathe in an uncrowded space.

**CARING**

Care in folding a sweater helps retain its shape: lay front down, fold sleeves back at shoulder line and parallel behind, smooth out creases, then fold sweater neatly in half and slip into its own case. Taking off a pullover, avoid stretched necklines; remove arms from sleeves, ease sweater over head with hands.

**SPORTS AFIELD**

By Ted Kestr

Modern boats and motors have reached a new high in indestructibility—but this doesn't mean they have no vulnerable points at all warns Willard Crandall, Boats Editor of Sports Afield Magazine. Any boat can be severely damaged by a single blow if that blow is hard enough, and there are many more subtle ways to undermine seaworthiness. Nevertheless, the modern boat is tough and will last if the proper precautions are taken. Owners should be encouraged by these recent nautical advancements and should

## THIS 'N THAT

By George W. Wireman

## When Tragedy Strikes:

Last weekend, while the world's interests were focused on Camp David and awaiting the outcome of the talks between President Eisenhower and Soviet Premier Khrushchev, tragedy came to the Marker family in the Waynesboro area. Like most tragedies, this one came without warning. Their young son Mike, only sixteen years old, lost his life in an automobile accident. This is not the first time that such an accident has happened, nor will it be the last one. It happens every day and is taken for granted by most of us until it happens to someone we know and love. Then we ask ourselves this question: "Why did it have to happen?" Only God knows the answer to this question. The accident of which I speak, happened on Saturday evening and is but one of several set-backs which the Marker family has experienced in recent years and I take this means of paying tribute to this fine family for their strong faith in, and their deep devotion to God. I know of no finer words to express my feelings of sorrow and of encouragement than those of Edgar A. Guest, as he wrote of "Departed Friends".

The dead friends live and always will;

Their presence hovers round us still.

It seems to me they come to share

Each joy or sorrow that we bear,

Among the living I can feel

The sweet departed spirits steal,

And whether it be weal or woe,

I walk with those I used to know.

I can recall them to my side

Whenever I am struggle-tried;

I've but to wish for them, and they

Come trooping gayly down the way,

And I can tell them my grief

And from their presence find relief.

In sacred memories below

Still live the friends of long ago.

Back To Normal?

Now that our Soviet friend has

returned to his native land, things

in this country are slowly getting

back to normal. One can sit down

and enjoy TV of an evening without

having their favorite programs

interrupted for the latest news

on the Khrushchev visit. But are they

really back to normal? It appears that a lady

known as Grace has taken over where

Khrushchev left off, and as this is

being written, she is lashing the

South Carolina coast. Then too, during the

Khrushchev visit, the steel strike was

all but forgotten, and is now back in

the news. Each day, its effects are

being felt more and more throughout

the nation and many thousands are

finding themselves without a job. So

when we begin to look about us, we find

that things are far from being normal.

Sleeping Sickness:

Already this dreaded disease has

claimed twelve lives in New Jersey

and a drive is now on to rid this

area of mosquitoes. Let's hope that

this drive is a success and that no

real outbreak occurs, which might

prove to be hard to control.

Next, The World Series:

It is that time of year again

when most of us take time out to

watch the climax of the baseball

season by way of the world series.

In the National League it has been

a busy season right up to the last

minute, and again proves that

baseball is still America's favorite

pastime.

New Cars Coming Out,

What's Your Pick?

The time has arrived for the

displaying of the new 1960 models

in the auto industry. There have

been many changes on some models and little changes on others. You have without a doubt noticed that a number of manufacturers have come out with small models to compete with the foreign cars, which have been flooding the market for a number of years. All are designed to catch your eye and priced to flatten your pocket-book. I remember shortly before the start of World War II, you could purchase a brand new car for \$800 to \$1,000, fully equipped. Today, this would just about cover the frame work. Time has a way of changing things as this and other items have proved when you compare the prices of today with those of twenty years ago.

## Pen-Mar League Finals Continue

Fairfield and Taneytown will meet Sunday afternoon at Fairfield in the first of the best-of-three series for the playoff championship of the Pen-Mar Baseball League.

Taneytown gained the right to meet Fairfield by blasting out a 10-1 victory over Hanover in the deciding game of a semi-final series. The winners wrapped up the decision via six unearned runs in the fourth.

Fairfield had previously swept two games from Boonsboro, regular season champs, to advance to the finals.

## College Eligible For Student Loans

Mt. St. Mary's College Emmitsburg, was named among the 16 Maryland colleges which this year can participate in a federal student loan fund of \$432,716.

Mt. St. Mary's is eligible for \$11,268 in aid application.

The funds are provided by the colleges under a 30 million dollar program provided by the Defense Education Act.

The loans to students are designed to encourage continued studies in the sciences and mathematics.

Masses at 7:00 and 9:00 a. m.

### New Chevrolets Now On Display

The Chevrolet Motor Division, which earlier released details of its highly original Corvair, announced the rest of its 1960 passenger car line this week.

A distinctive new appearance, added comfort and increased economy of the most popular V8 engine are among outstanding features.

Nineteen models (including the Corvair and the spirited Corvette sports car) will be included in the first public showing by Chevrolet dealers this week.

All passenger car series have been completely re-styled. There is a fresh new appearance to the exteriors. The interiors are roomier and offer new elegance of upholstery and sidewall treatment.

The most notable design changes occur in frontal and rear areas.

An oval-shaped grille spans the hood and encloses widely spaced twin headlamps at the outer edges. The wing overhang at the rear has been revamped to widen the trunk opening and lower the loading sill. An ensemble of circular tail-lamps replaces the former tear-drop configuration.

Side-trim moldings establish distinctive appearance for the Impala, Bel Air and Biscayne series.

The front compartment transmission tunnel has been significantly reduced in width and height to benefit roominess. The frame has been reinforced and new rubber-insulated body mounts give a quieter ride.

In addition to the new economy in the Turbo-Fire V8, the power packages include a six and six other V8 choices. To improve overall economy and engine performance in the normal driving ranges, a low-lift camshaft with reduced valve overlap, and recalibrated carburetor are featured on the new economy Turbo-Fire V8.

New tires are more durable. Tread life has been increased 12 per cent by new synthetic rubber and a change in the proportion of synthetic and natural rubber. The higher energy-absorbing tread material also promises less impact on bumps, reduced tire squeal on turns and surer traction.

Brakes have been improved and require less pedal pressure. The parking brake now carries a pop-out release lever.

Color choices in the 1960 conventional passenger car line include 13 solids and 10 two-tone combinations.

Body types offered include:  
Impala: four-door sedan and sport sedan; sport coupe and convertible. Bel Air: Two-and-four-door sedans; sport coupe and sport sedan. Biscayne: Two-door and four-door sedans and a utility sedan. Station wagons: Nomad, Parkwood, Kingswood and two choices of Brookwood.

### School Menu

The school lunch menu for the Emmitsburg Public School for the week beginning October 5, has been announced as follows:

Monday—Spaghetti with beef, buttered spinach, sliced tomatoes, cornmeal muffins, fruit, bread, butter and milk.

Tuesday—Ham and green beans, buttered potatoes, peanut butter cracker, celery and carrot strips, pumpkin custard, milk, bread and butter.

Wednesday—Macaroni and cheese, stewed tomatoes, molded vegetable salad on lettuce, fruit cup and iced graham, milk, bread and butter.

Thursday—Fruit on roll, baked beans, potato chips, applesauce, gingerbread, milk, bread and butter.

Friday—Salmon loaf, buttered parsley potatoes, sliced tomatoes, assorted desserts, milk, bread and butter.

Notice—Effective October 1, milk will cost the student 3c when purchased separately.

### PREMIUM LIST ANNOUNCED

(Continued From Page One)

Department.  
Dept. 12—Best collection of home-grown nuts, plate of 12: English walnuts, black walnuts, and shellbarks.

Dept. 13—Home products display. This display will be judged on the arrangement and quality of the articles. Any type container or arrangements may be used. A 24x24-inch table space will be provided for this display. The display must consist of any

five of the following items. The number specified in front of each item must be used: Five apples, five carrots, five beets, five tomatoes, one pumpkin, six ears of corn, 12 nuts, 3-lb. sample hay, six potatoes, two jars of canned fruits or jellies, two jars canned vegetables or meats, one flower arrangement, one baked product and one quart of grain.

Dept. 14—Eggs: One-half dozen white or one-half dozen brown.

Dept. 15—Antiques, for exhibit only; not in competition.

Dept. 16—Miscellaneous. Best plate of candy, best plate of home-made soap (3 pieces). Arts and Crafts: Largest pumpkins; miscellaneous fresh fruit; miscellaneous fresh vegetables; miscellaneous canned fruits; miscellaneous canned vegetables; miscellaneous jellies, pickles and preserves; unclassified products.

Dept. 17—Commercial, for exhibit only; not in competition.

The show will be open to the public on Friday, Oct. 9, at 6:30 p. m. and on Saturday, Oct. 10 from 2 until 10 p. m. A door prize will be drawn at 9 o'clock Friday and Saturday nights.

The Emmitsburg Community Show is sponsored by the Emmitsburg Grange. The organization puts a lot of time and work into the production of the show and it asks everyone to cooperate in making it a success and a credit to the community, as in former years.

The Community Show is being put on under the rules, and with the aid of the Maryland State Fair Assn. Approximately \$200 will be offered in prizes to exhibitors. Programs are being published with paid advertising to help meet part of the promotion expenses.

Everyone is invited and encouraged to come and see the Show at the Emmitsburg High School on Friday and Saturday, October 9 and 10.

### INTEREST ON SAVINGS BONDS INCREASED

On September 22, 1959, President Eisenhower signed legislation passed by Congress and approved the Treasury's recommendations to increase the interest on U. S. Savings Bonds from 3 1/2 per cent to 3 3/4 per cent, retroactive to June 1, 1959.

Improvements in Series E and H Savings Bonds. Effective June 1 New Series E bonds with issue dates of June 1, 1959, and thereafter, will earn 3 3/4 per cent

compounded semiannually if held until maturity 7 years, 9 month, from issue date.

New Series H bonds with issue dates of June 1, 1959, and thereafter, will earn 3 3/4 per cent if held until maturity 10 years from issue date. It still remains a current income bond issued at par, redeemable at par.

**Yields On Old Bonds Increased**  
All outstanding E and H bonds purchased prior to June 1, 1959, will earn at least 1/2 per cent more than before, starting with the first semiannual interest period beginning on or after June 1, 1959, and held to maturity.

The President, in approving the legislation, took the opportunity to reaffirm his "enthusiastic support of the Savings Bonds Program."

"This is one of our country's finest and most worthwhile activities," he continued. "It contributes to the sound management of the nation's finances. It gives millions of American families the opportunity to save safely and regularly—while investing in the nation's future. To my mind there is no better way of saving, no more effective way of strengthening our power for peace, than to own United States Savings Bonds. To buy these bonds is to express faith in America. It helps provide the economic strength in both our Government and in individual families on which our freedom depends. I hope that the making of both old and new savings bonds even more attractive will serve as a renewed invitation to every citizen to buy and hold these 'Shares in America.'"

### Society Meets

The Women's Society of Christian Service of Toms Creek Methodist Church, met in the social room Monday evening with 17 members present. The meeting was opened with prayer by Mrs. Ethel Fuss.

The Devotions, in charge of Mrs. Dorothy Valentine, were as follows: opening hymn, Watchman tell us of the Night. Theme for the evening was, There's a light upon the mountain. Several scripture verses were read from Isaiah, St. Luke and St. Matthew and prayers read from the church hymnal.

The theme song for winter programs was sung, before Mrs. Johnson spoke of an inspiring talk she heard at a meeting she had attended in Annapolis. Then followed a written synopsis on St. Luke, which the society will study this winter. Mrs. Johnson offered the closing prayer. Mrs. Ethel Fuss favored us with an

accordion solo. A short business meeting followed.

Hostesses for the evening refreshments were, Mrs. Cora Moser and Mrs. Anna Dickour, who served to members and the men of the Official Board which met at the same time.

### Permits Issued

Three permits totalling \$11,000 were approved this week in Frederick for the Emmitsburg district. These include a \$7,000 brick residence with five rooms, bath and basement on U. S. 15 at the Old Frederick Road, a \$2,000 ranch house on the Hampton Valley Road and a \$2,000 private garage on Maryland 76 at Four Points Road.

The \$7,000 home will be completed next year by Herbert Rohrbaugh of R3, Emmitsburg. The ranch house will be built this year by Henry Springer for Elva Marie Springer Hahn of Glen Dale, Emmitsburg.

The private garage, which will include a utility storage room, a cistern and a workshop, will be completed this year by and for John D. Kaas of Rocky Ridge.

## "PLEASE, OPERATOR, WHAT TIME IS IT?"

Every five minutes the little boy would call and ask the same question... "Please, Operator, what time is it?"

But something about the little boy's voice told Operator Lola Caldwell that this was no childish prank. Finally, she asked him to call his mother to the phone.

"She can't come to the telephone," he said. "My little sister swallowed a button this morning, and my mother had to take her to the hospital. And she told me not to dare leave the house till twenty after eight. I looked and looked, and honest, Operator, I don't see any twenty on that clock. And I'm afraid I'll miss my school bus."

"Don't worry, young man," said Mrs. Caldwell. "I'll call you when it's time to leave." At 8:20 she rang and sent the little boy off to meet his bus.

To Lola Caldwell, this was all part of a day's work. Another example of the personal interest telephone people take in their customers. This instinctive desire to help is one of the things that make your telephone service so valuable.
