Most Anything At A Glance

BY ABIGAIL

It was funny in a way but then again it wasn't so funny to the individuals involved. Seems as though a farmer in the southern part of Frederick County noticed his cattle acting in a peculiar manner. Upon close investigation by a veterinarian it was determined that the cattle were dead drunk, imagine! Puzzled and perplexed as to where the cows were getting the booze, the farmer engaged the aid of the sheriff. Sure enough the cows went to the exact location of a still, hidden near the farm and being operated by two Washingtonians. The sheriff and his men were close behind and apprehended the liquor law violators. Apparently the cattle had been eating the mash from the still for quite some time. Now there's peace and sobriety at this gentleman's farm once again.

Housewives and husbands too are becoming right irate over the actions of a "Peeping Tom" reported active in several sections of the town. Latest reports indicate that he has been confining his nefarious activities in the Emmitsburg area. Other reports indicate he has been active in the West End for quite some time. Anyway the chase is getting hotter and hotter and I understand that someone even shot at the critter.

By now every house within the corporate limits of Emmitsburg should be hooked onto the sewer line. June 1 was set as the deadline, however extenuating circumstances have made it impossible for a number of property-owners to comply with the town's edict by the first of the month. However I feel certain there will be no penalty exacted on the parties concerned because they are acting in good faith and are making an attempt to comply with the local sanitation law, however plumbers and diggers have not as yet had the time to connect all properties. This will be remedied within the next week, it is hoped.

Dear Abby:

The writer was very much interested in your comment on mail carrier service in Emmitsburg. I find upon investigation that it is just a question of buck passing between the Post Office Department and our Congressman.

When we were informed that it was turned down because all the houses were not numbered, and in some places no sidewalks, I made a trip to a nearby town that has been approved, and found that some of the houses had numbers on a small sheet of note paper and fastened on with a thumb tack.

As I have wondered for many years why we have not had this service which would cost nobody any money, and certainly be a great convenience, especially if we had a few mail boxes scattered about town, in order that a letter could be mailed at night, without parking your car in the middle of a busy highway, or walking about a quarter of a mile.

I see local deliveries in many places where no sidewalks exist. Every week I pass through Reisterstown and from the main street out toward Westminster, they deliver mail. I have checked the same thing in Hagerstown, and the same condition exists, also checked Damascus, Boonsboro, and other places.

Perhaps with an election coming up in the fall, we can get some definite action from our prospective congressman.

Yours very truly,
E. L. ANNAN

Injured In Wreck

Two women were injured when cars collided early Monday morning in Gettysburg.

Borough police said Nathaniel Bailey, 27, York, was driving west on E. Middle St. and ran into a car being operated north on Baltimore St. by Doris J. Sunday, 31, Gettysburg R3.

Doris Sunday suffered a contusion of the left hip. A passenger in her car, Doris Cool, Emmitsburg, had sprained left ribs and an abrasion of the right knee.

Police estimated damage to the Bailey car at \$500 and to the Sunday vehicle, \$150.

A charge of failing to stop at a red blinker light was brought against Bailey before Justice of the Peace Anna Thompson.

Zoning Changes Planned; Public Hearing Slated

The Frederick County Planning and Zoning Commission has released a list of proposed changes to the County Zoning Ordinance. These changes will be presented at a public hearing scheduled for Friday, June 3, 1960, at 7:30 p. m. in the Hiram Winchester Room, Winchester Hall, Frederick. If, after this meeting, these changes appear acceptable, it is likely that the Commission will recommend them to the Board of County Commissioners for adoption by the governing body. A representative of the Board of County Commissioners today stated that these recommendations, if approved by the Planning and Zoning Commission, will be heard at an early date, probably the latter part of June. As is the case in most zoning matters, these two hearings are required procedure for the adoption of any changes in the ordinance. This summary covers only the most vital subjects included in the list which also contains minor corrections in spelling, incorrect words, etc. It also is not intended to be a legal interpretation of these changes.

One of the problems which the Planning Commission has wrestled with for many months is that of the proper location of trailers within the county. Recent studies by national organizations such as the American Society of Planning Officials, have indicated that the basic concept regarding trailers, or mobile homes as they are now sometimes called, has changed considerably in the past ten years. The Commission has studied court proceedings of cases in many other states and has made a vigorous effort to determine what the citizens of our county have in mind in regard to this very acute problem. Many county citizens have appeared before the Commission at recent meetings requesting a change to the ordinance which would permit a trailer to be located as a permanent structure on a lot in the Agricultural District.

A mobile home, under the proposed changes, is defined as a trailer designed to be used as living quarters and equipped with bathroom and kitchen facilities. A limitation is therefore placed on the use of other types of trailers such as automobile trailers, truck trailers, old buses, street cars and similar conveyances. Heretofore, trailers have been permitted only in trailer parks, on farms when occupied by a farmer, worker tenant, or a member of the immediate family actually engaged in work on the farm, or temporarily on a lot in the "A-1" Agricultural District pending the completion of a permanent dwelling. With that in mind the essential changes proposed for the local Ordinance contain provisions which would allow one mobile home to be located on a lot in the Agricultural District; provided it meets all the requirements of the Health Department, the wheels are removed, and it is placed on a solid masonry foundation, subject to the lot requirements for a dwelling and provided it has the approval of the County Board of Appeals. The use of a trailer as a temporary structure is still permitted but is required to be removed upon the completion of a permanent dwelling. Another proviso of the changes would be to limit trailers used as dwellings on farms to be 200 feet from the nearest residence, not including the farm dwelling. Trailers would still not be permitted use in any Residential, Conservation, or "B-1" or "B-2" Commercial Districts. The changes, if adopted, would allow for the erection of a mobile home as a permanent dwelling in the large agricultural area of our county under the broader powers granted to the County Board of Appeals, applying the guides and standards of that organization.

A Commission source recently stated that this condition appears to be more desirable than the present interpretation of the Ordinance. Another change which liberalizes the existing rulings on accessory buildings constructed in rear yards would permit these accessory structures to be placed within 3 feet of side lot lines and 6 feet of rear lot lines in all agricultural and residential districts. Previously this provision has included only residential districts. Another change which has the interest of local developers and builders is the proposed reduced lot size for lots in approved and

Rev. W. Mervel Weaver, pastor of the First Presbyterian Church, Frederick, will be guest speaker at the commencement service at Emmitsburg High School on June 8 at 8 p. m.

Twenty seniors will receive diplomas this year as compared with 28 last year. Dr. James A. Senenbaugh, Superintendent of Frederick County Schools, will present the diplomas to the graduates.

Invocation will be given by Rev. Philip Bower, pastor of Elias Ev.

Lutheran Church, Emmitsburg. Rev. Weaver will give the Benediction.

The program includes: Processional "Grand March," followed by the Invocation. Selections by the glee club, "The Heavens Are Declaring" and "Lift Thine Eyes."

Rev. Weaver will then speak. Selections will then be offered by the junior-senior band followed by the presentation of the class by Arvin P. Jones, principal.

Dr. Senenbaugh will present the diplomas followed by two se-

lections by the glee club, "Barcarolle" from "Tales of Hoffman" and "Your Land and My Land" from "My Maryland."

The Benediction will then be given followed by the recessional, "War March of the Priests."

Miss Ruth E. Stull is director of vocal music while Miss Kathy Springer serves as accompanist and Calvin J. Wacker directs the band.

The list of graduates: Academic course, John Dinwiddie White Jr., Leonard Patrick

Zimmerman, Lois Celeste Fisher, Anna Peninah Gingell, Shirley Ann Hahn, Sandra Marie Hartle, Frances Marie Saylor and Carolyn Mae Wastler.

General course, George Michael Fisher, Ronald Lloyd Fisher, Charles Thomas Jones Jr., Robert Philip Keilholtz, James Edward Miller, Larry Wayne Pittinger, Richard Eugene Swomley, Irvin Charles Tokar Jr., Clarence Wilford Umbel, Robert Nathan Valentine, Violet Louise Kefauver and Marie Margaret Sanders.

Teachers' Wages Status Quo

Frederick County is financially unable to grant a raise to the county school teachers for the calendar year of 1960 it was announced by the County Commissioners at their regular meeting held Tuesday this week in Frederick. The Commissioners sent a notice to Dr. James A. Senenbaugh, superintendent of schools, informing him of their most recent decision. They said they reviewed the requests for the salary increase but can find no money available for such requests.

However the Commissioners did inform the superintendent that they already are studying the possibility of providing an increase in the initial salary for new or starting teachers, for the school year beginning Sept. 1961.

The latest answer by the County Commissioners is a repetition of others pertinent to the teacher pay increase. The Commissioners say the money for the increase was not included in the "tight" budget of 1960 and they contend there is no extra fund from which they can draw additional revenue for the proposed increase.

Members of the School Board and representatives of the Frederick County Teachers Assn. have appeared before the group requesting a salary raise for the September through December period of the current year. The School Board requested a \$200 increase for beginning teachers, making their starting salary \$4200 in Frederick County. The request included a scale which would put the maximum reached in the 11th year of teaching at \$6300. The educators claim the county is suffering a critical teacher shortage and the requested raise would alleviate, to some degree, this shortage. At a recent meeting with the Commissioners Dr. Senenbaugh stated that \$28,400 would actually be needed for the September through December raise and that he had been able to find the remainder of the some \$40,000 needed in funds he already had.

BREAKS ANKLE

Michael Joy, 21, pitcher for the Emmitsburg baseball team, was treated Thursday evening at the Warner Hospital, Gettysburg, for a fracture of the right ankle and minor lacerations of the right knee suffered while sliding into a base during a game at Fairfield.

Migration habits of seals are traced through the use of Monel nickel-copper alloy tags attached to their flippers.

PHONE SURVEY BEING CONDUCTED

Telephone subscribers in the Emmitsburg District were mailed questionnaires this week by the Chesapeake and Potomac Telephone Co. to determine the amount of sentiment, if any, existing locally for a new wide-range calling service.

It was announced recently that a number of local patrons were interested in obtaining free calling privileges to Frederick and Taneytown and the phone utility in an effort to sound out the general public mailed questionnaires to all subscribers in this area.

Should the majority of subscribers here favor the plan it would be inaugurated by the company in the near future, just as soon as the necessary equipment could be installed in the exchange.

At the present time toll-free calling exists here only to Thurmont. Under the present set-up local subscribers have access to only about 2200 phones between the two towns. Should the new system be adopted subscribers would have availability to nearly 23,000 phones covering Emmitsburg, Thurmont, Frederick and Taneytown.

The company has announced the following increase in rates should the patrons vote in favor of the new service.

	Increase Per Month	Business Residence
Individual Line	\$3.00	\$.75
2-Party	2.50	\$.75
4-Party	—	\$.75
Rural Line	.75	\$.75
P.B.X. Trunks	4.50	—

GIRL SCOUTS PLAN PARADE

The five troops of Girl Scouts in Emmitsburg, (three troops of Brownie Scouts and two troops of Intermediate Scouts) will hold a Flag Day parade in Emmitsburg on Tuesday, June 14 at 6:00 p. m. Complete plans are not available at this time but they hope to have the cooperation of other organizations of the town.

They do make the request that on this day every house and business establishment that owns a flag will have it prominently displayed. This is one way of showing our loyalty to our Flag and "the country for which it stands, one nation, under God, indivisible, with liberty and justice for all."

The "charge it" habit gets to be expensive, in time.

Buying power is just as important as production power.

The man who loafs at his work doesn't need a vacation.

CITES RISING COST OF EDUCATION

Editor, Emmitsburg Chronicle:

I am writing this letter to you in behalf of the Frederick County Fact Finding Inc., of which I am chairman, in the hope that it, and other such letters, will be published in your excellent paper and thus bring to the attention of voters and taxpayers of Frederick County, matters of vital interest.

Many people have either joined or will be joining this group because of the alarming increase in taxes in Frederick County during the past four years. We know that taxation is necessary but also we feel that the reasonable limit to the amount any individual can stand is either here or soon will be.

Since taxes are adjusted or levied according to the need for money and since there are just a few agencies accounting for the expenditure of nearly all our tax dollars, it would seem that the question of higher or lower taxes lies within the jurisdiction of just a few. Of course the School system consumes the lion's share of the tax dollar (approximately 75 per cent), so indirectly the Frederick County School System is responsible for our taxes, whether they be high or low. Our first effort then will be directed toward the Frederick County School System. A general survey reveals administration supervisory and clerical costs are two and one half times greater today than they were in 1956. This increase would be equivalent to giving each teacher in Frederick County no tax increase at no additional cost to the taxpayers.

School expenditures in all categories (other than repairs and improvements to buildings now included in outlay) have risen from \$2,979,025 in 1956 to \$5,034,353 in 1960. School enrollment actually has increased less than 14%.

Total Budget (excluding repairs and capital outlay)	\$2,979,025	\$5,034,353
Administration	45,450	118,788
Supervisors salaries and expenses	40,350	106,600
Clerks in school	25,000	64,984
Other cost of Supervision	500	22,558
	111,300	312,930

Very truly yours,
Samuel C. Hays, Chairman

By 1960 almost 2,000 miles of United States turnpikes will be paved with petroleum asphalt.

Education is not complete if all that the students get is a trained mind.

Book Published By Local Author

Detailing a tiny nation's fight for freedom from foreign domination, Gilbert L. Oddo, Ph.D., associate professor of social studies at St. Joseph College, Emmitsburg, has just published "Slovakia and Its People."

In presenting the Slovak side of events leading up to World Wars I and II, Doctor Oddo has written the first English history of Slovakia.

Controlled by aliens longer than any other European people, the Slovaks have seen feudalistic Hungarians, chauvinistic Magyars, hated Czechs and Communists rule their country. Doctor Oddo's description of Slovakia's plight, a problem similar to that of so many other small European countries, aids the West's understanding of the problems of Central Europe. He warns that neglect of the intrinsic rights of this and to her small nations will result in trouble and ruin for western civilization.

Published In April

Although the book appeared in April, 1960, Professor Oddo actually began work on it in July of 1957, two months after he addressed a convention of the American Slovak League in Cleveland, O. Following his speech, the League, under the leadership of Slovak Publisher Philip A. Hrobak, approached Doctor Oddo and entreated him to write a history of Slovakia, a country largely ignored by Western historians. The League provided documents and translations and after finding and examining the facts, Dr. Oddo completed the book in November, 1959. Robert Speller & Sons, Publishers, Inc., of New York, who specialize in Eastern European affairs published the book.

At the time of release, "Slovakia and Its People" had sold 6,000 copies. Doctor Oddo has begun another book, a constitutional history of the United States and already has completed four chapters. In addition he has written "Justice Douglas and the Roosevelt Court," 1951; "These Came Home," 1955, and has contributed articles to the Encyclopedia of Religious Knowledge and various Catholic journals and magazines.

Dr. Oddo is married to the former Marion Solberg and is the father of four children, Kristine, Cathleen, David and James.

Quality nickel plating provides durable and attractive metallic finishes on metals which are subject to tarnish and corrosion.

Gov. Lawrence Commencement Speaker

Pennsylvania's Governor David L. Lawrence at the 152nd commencement exercises held Wednesday at Mount St. Mary's College, reminded the graduates they must be prepared to give something substantial to the life they find around them while striving for individual success. Eighteen residents of Maryland were among the 150 students who received degrees.

Immediately preceding the exercises the cornerstone for the new college library was laid by Rt. Rev. John L. Sheridan, P.A., president of the college. In his address to the graduates Governor Lawrence said:

"Can we draw relentlessly, upon the resources of the free world without putting something back? This is the question facing us during the next decade. This is the question in whose answer today's college graduate must participate."

"There is a balance to be achieved between private acquisition and public improvement. Striking that balance is the great civic challenge to the rising generation. We cannot continue amassing greater and greater private wealth while we let the public plant become shabby and rundown. We complain bitterly when school taxes go up \$50 a year; yet we feel compelled to buy a new car when the new models are off the assembly line and pay \$50 to \$70 a month for it."

"These are curious by-products of the central failure of our time—our preoccupation with material success and the subtle, but undeniable decay it has brought about in our moral fiber. At some point we must balance our economic position with our national philosophical convictions—and we have to become firm in our resolve."

Receiving honorary degrees at the commencement, along with Governor Lawrence, were Dr. William F. Preston, an alumnus now practicing in Wilmington, Del., and Gerard E. Sherry, managing editor of The Catholic Review, official archdiocesan newspaper, Baltimore and the Rev. Francis J. Dodd, director of the Eastern Province of the Sisters of Charity. Five Emmitsburg young men received diplomas at the exercises.

The Most Rev. Francis Patrick Keough, archbishop of Baltimore, presided at the commencement exercises. He then presided at a similar ceremony at St. Joseph College.

Taneytown Man Is New Lions Club District Governor

Mr. Harry B. Dougherty, Taneytown, Maryland, was elected District Governor of the forty Lions Clubs in District 22-W at the annual Multiple District 22 Convention in Atlantic City, N. J., which closed on May 28. Mr. Dougherty will succeed Mr. Lawrence Dorsey of Woodboro, who is the present executive officer of the Lions District comprising Allegheny, Carroll, Frederick, Garrett and Washington Counties.

Mr. Dougherty is owner and operator of Dougherty's Superette in Taneytown.

Mr. and Mrs. Walter Topper and daughter, Baltimore, spent the weekend with Mr. Topper's mother, Mrs. Stella Topper and family, DePaul St.

Mr. and Mrs. Richard Florence and family, Jamestown, N. Y., visited during the weekend with Mr. Florence's parents, Mr. and Mrs. Romanus Florence and daughter.

A Dream Comes True

Robert Hill, 13, son of a U. S. Army sergeant, stationed in Italy, read about Dr. Albert Schweitzer's hospital in Africa.

He wrote to his father wondering if there was some way the Allied Air Force could deliver a bottle of aspirin at the hospital. An Italian radio station broadcast the lad's appeal. The response was heart-warming. The boy, with four and a half tons of medical supplies worth about \$400,000, was flown in to Schweitzer's hospital.

Here again is proof that Americans are eager to help whenever and wherever possible, and our youth, when given a chance, prove that they too, play an important part in our everyday life.

Jet Speed Brings The World Closer Together

A commercial U. S. jet airliner covered the 4,800 miles between New York and Moscow recently in the record time of eight hours and fifty-three minutes. This flight cut more than an hour off of the previous record held by Russia's turbo-prop TU-114. This plane, a Boeing 707 flew at times at 610 miles an hour. It carried seventy-three newsmen and government aids accompanying Vice President Nixon on his recent history-making trip to Russia. This flight is a reminder that in this modern age the introduction of jet transportation brings the countries of the world closer than ever before.

Prevention Of Tooth Decay
The use of phosphorus has been revealed as a new approach to the prevention of tooth decay. Dr. Robert S. Harris, who made the discovery, found that hamsters, when fed four times the amount of phosphorus naturally found in Texas' foods, resisted all tooth decay. He received as a result of a number of tests, 100% effectiveness in decay prevention. In addition, he says, "the teeth grew in pearly white, lustrous and better shaped." Experiments showed that hamsters fed on Texas corn and milk developed 40% less dental decay than those raised on foods in New England. A Swedish dentist, Dr. Allen Strafford, has obtained 50% reduction in decay in the first human trial on some 2,000 children by giving them extra doses of phosphorus which will play an important part in our daily lives. And so the search continues for ways to improve our living standards and thus make the world a better place in which to live.

The Great Cost Of Communism
The Dalai Lama believes that about 80,000 persons have lost their lives in Tibet's struggle against Communist domination. In March of last year, during the unsuccessful revolt against the Peiping regime, the young godking of over a million Tibetans fled from his homeland in India. "With more Chinese than Tibetans now in my country," he declared on August 23, "the complete extermination of the Tibetan race in its own motherland is now in progress." He stated that "inhuman" torture was being inflicted upon his countrymen and said that masses of them had been deported to Communist China. Some sources report that many Tibetan Buddhist monks have been forced to sing Communist Chinese national songs and to replace regular prayers with studies of Communist ideology. If this is the way that Russia builds her Communist empire, then we as freedom loving people must unite and do all in our power to prevent such methods from being used again and again. The cost of fighting Communist domination is great, and yet it is the price we must pay if we are set on living in a world of freedom and wish to continue to enjoy the fruits of "... a government of the people, by the people, and for the people."

How Old Is Our Universe?
British astronomer Dr. Fred Hoyle has concluded that the universe is at least 10 billion years old. Previously, its age has been fixed at 6 billion years. With the aid of an IBM 704 electronic computer, Hoyle studied the Milky Way Galaxy, of which the earth and the sun are a part. He based his calculations on the life histories of two types of stars, young hot stars known as Population I, and older stars called Population II.

Couples Marrying Younger Today
The U. S. Census Bureau probed into the question, Why couples are marrying younger today? and have come up with these reasons and possible causes: (1) economic prosperity and increased job security; (2) widespread practice of birth control; and (3) wives start working at a younger age today than before. The average male marries shortly after he reaches twenty-one. The average female marries soon after her twentieth birthday.

25,000,000 Dead Letters A Year
In the year 1959 there were some 25,000,000 dead letters stacked up in U. S. post offices. These dead letters are a result of carelessness on the part of the sender. Here are a few tips to help reduce these figures. Always plainly print your address and always see to it that every piece of mail you send has your return address on it. Postmen are efficient workers, this we know, but as a rule they are not mind readers or handwriting experts.

World Wide Television
A plan is now under way for round-the-world television. Undersea cables are being installed. The first link, from Canada to Britain, will be completed in 1961. The cost for the global cable has been estimated at around \$230,000,000. Here again is another project, when completed, will bring the peoples of the world still closer together.

Prepared For Another Blockade
Since the Berlin blockade of 1948-49, when Allied airlift kept the city alive, Berliners have been stock-piling their goods in the event of another such attempt, since the failure of the "summit" talks. Today some 4,000,000 tons or reserve stock is on hand, an estimated \$360,000,000 worth ready to feed and clothe the city's 2,200,000 inhabitants in any eventuality. Berlin's Mayor Willy Brandt stated that the stock-piling would render "a new Communist blockade ineffective." These people are prepared and it would be well if we took a lesson from this and began to prepare ourselves for the months that lie ahead. It is my guess that rough times are ahead of us in regards to international relations so be prepared to expect most anything.

One Little Dog And \$11,000
Just recently I learned of the story of a little dog who wanted to cross the Santa Ana Freeway through speeding traffic. The result was one of the worst traffic disasters in years. First one crash, then another, and another in a chainlike reaction that continued for some three miles. Forty cars were banged in. 11 persons were injured, and damages resulted at an estimated value of \$11,000. Only one life was lost, that of the little dog, who never made it to the other side of the freeway.

A Mountain Beneath The Sea
Each day we learn of new discoveries and from these discoveries we gather many interesting facts about the world in which we live. Just recently an undersea mountain, 15,980 feet high was found in the South Atlantic off Africa. The top of the seamount is 210 feet below sea level and is covered by coral.

Cancer Takes The Lead Over TB
Once tuberculosis was a leading killer of middle-aged men; now it is reported that cancer is twice the threat. TB can now be cured in a majority of cases but, sad to say, lung cancer is rarely cured.

Wives, Keep Your Husbands Alive
Not many wives set out deliberately to kill their husbands. Many do it quite unintentionally though. A British physician, Dr. Kenneth Hutchin, says, "The wife who always insists on having the last word, often has it." He advised wives to watch their husband's waistlines more closely than their bank accounts, not to nag their husbands and to stop finding "little jobs" for their men to do. He suggested that wives humor their husbands a little; anger and frustration are dangerous emotions for middle-aged men with coronary problems.

Nine Seniors Receive Awards At Honors Convocation

Nine seniors were cited for academic distinction at a special Honors Convocation on May 31 at Mount St. Mary's College, Emmitsburg, in conjunction with graduation exercises.

John M. Clark II, Palmyra, Pa., a math major to be graduated summa cum laude, was awarded the John C. Pangborn prize for the highest scholastic average in the English philosophy course and the McGraw Memorial Prize for the highest average maintained through the course in Analytical Mathematics.

Francis P. Devlin, Wildwood, N. J., an English major to be graduated summa cum laude, received the Bishop Allen Memorial Prize for the highest scholastic average through four years of college and the Monsignor Flynn Memorial Prize for the highest scholastic average in the English course. He also received the Thomas W. Pangborn Prize for the highest scholastic average during senior year.

Edward J. Lukic, Hanover, Pa., was awarded the Bradley Memorial Prize for the highest average in the Business Administration Course. He will be graduated cum laude.

Jameh J. Murphy, Danbury, Conn., class valedictorian and a magna cum laude science graduate, was awarded the Seton Memorial Prize for the highest average in Biology.

Lawrence P. Urban, Westmont, N. J., was awarded the Cogan Memorial Prize for the highest average in the Latin philosophy course.

Matthew F. McHugh, Brooklyn, N. Y., graduated magna cum

laude, was awarded the Flanagan Memorial Prize for the highest average in the pre-legal course. McHugh, class salutatorian, will attend Villanova Law School.

John S. Gunn, Mineola, N. Y., was awarded the Flanagan Memorial Prize, as a member of the senior class who best represents the ideals of Mount St. Mary's. William A. Wood Jr., Suffolk, Va., graduated cum laude, was awarded the Watterson Memorial Prize for excellence in oratory and skill in debating as a member of the Forensic Council.

The Rt. Rev. John L. Sheridan, P.A., president of the college presided at the convocation. Following the honors convocation the Rev. Lawrence E. Skelly, Litchfield, Conn., preached the baccalaureate address in the college chapel.

Fr. Skelly urged the graduates not to "talk great things but to live them."

"You must be," he said, "men of courage and conviction, boldly, openly, and firmly declaring your stand on the vital moral problems of the day. Yes, the Church this country, this world of ours, needs men and women who find their inspiration and determination in the group of immortals, the first Christians, who found the friendship of Christ of more value than their very blood."

Miss Pearl Neiman and a friend from New York, spent Monday in Washington.

LEGALS

Nancy Elizabeth Anderson

vs.

Avery T. Anderson

No. 19424 Equity in the Circuit

Court for Frederick County,

Maryland

ORDER OF PUBLICATION

The object of the Bill of Complaint filed in this cause is to procure a Divorce A Vinculo Matrimonii by the complainant Nancy Elizabeth Anderson from the defendant Avery T. Anderson, and for the custody of a minor child.

The Bill states in substance that the parties were married on July 14, 1951 at Elkton, Maryland, by Rev. Walter Hern, a regularly Ordained Minister of the Gospel; that one child was born as the result of said marriage, namely, Nancy Katherine Anderson, age 8, whose custody the complainant herein seeks and requests; that the complainant is a resident of Frederick County, Maryland, where she has resided for more than one year last past; that the defendant is believed to be a non-resident of the State of Maryland, although the last known address of the defendant was Wilkins Ave., No. 13 Oaklee Village, Baltimore, Maryland, and that the complainant and the defendant have voluntarily lived separate and apart without co-habitation for more than three consecutive years prior to the filing of this Bill of Complaint, and that the said separation is beyond any reasonable hope or expectation of reconciliation.

And the Bill prays for the following relief:

(c) That the complainant may be divorced A Vinculo Matrimonii from the defendant, Avery T. Anderson.

(b) That the complainant may have custody of said minor child.

(c) That the complainant may have such other and further relief as the nature of her case may require, and for process and Order of Publication against said non-resident defendant.

It is thereupon this 27th day of May, 1960, by the Circuit Court for Frederick County, Maryland, sitting as a Court of Equity and by the authority thereof, Ordered that the complainant give notice to the said non-resident defendant to this cause of the object and substance of this Bill, by causing a copy of such to be published in some newspaper published in Frederick County, once a week for three successive weeks prior to the 2nd day of July, 1960, commanding him to be and appear, in person or by solicitor, in said Court on or before the 2nd day of August, 1960, to show cause, if any he has, why a Decree should not be passed as prayed.

Murray H. Fout,
Solicitor for complainant

Ford To Replace Community's Vehicles

FLORA, Illinois—Next fall, this southern Illinois city of more than 5,000 persons literally will become "Ford Town — U.S.A." Plans are to replace every car and truck in the community with a new Ford vehicle for a week-long pre-introduction test.

From Falcons to tilt-cab heavy duty trucks, Flora residents will have the opportunity personally to drive and test more than three million dollars worth of 1961 Ford products prior to their public in-

roduction. Newspaper, magazine and radio-TV reporters will be invited to Flora for the experiment to be held the week of September 12.

The unique plan was revealed in a joint announcement by Ford Division officials and Flora's Mayor Norman Bryden.

Flora, 100 miles east of St. Louis, was selected because it is the city closest to the present population center of the United States.

George H. Brown, Ford Division market research manager, said the program would serve a four-fold purpose.

1. Provide a massive and unprecedented pre-introduction test involving hundreds of typical car and truck owners.

2. Dramatize the social and economic roles played by cars and trucks in a community's life, and show how Ford dealers are equipped to meet the full range of transportation needs in a typical U. S. community.

3. Give the country's information media a first hand opportunity to observe and report an entire community's reaction to new car and truck models.

4. Provide sufficient vehicles to test the effect on increased car and truck population will have on present day streets and parking facilities and on a community generally.

Mayor Bryden said city officials and business and civic leaders are elated over the Ford program. He announced that a committee of leading citizens has been appointed to help Ford implement its plan.

Ford said it would place more than 1,000 cars and trucks in Flora for the experiment, with the intention of replacing all private, commercial, and municipal vehicles now registered within the city limits.

The Flora program will replace the Ford division new car press and radio-TV preview usually held in Detroit.

To Give Concert Saturday

GETTYSBURG—A massed choir of 185 voices will feature a Gettysburg College choir reunion festival Saturday, June 4, climaxing the 25th anniversary year of the choir's founding by its director, Professor Parker B. Wagnild.

Distemper In Dogs Hard To Recognize

One of the biggest threats to the health of a dog is distemper, but the average dog owner may not easily recognize the symptoms, the Maryland State Veterinary Medical Association reported recently.

Distemper, one of the most highly contagious diseases affecting dogs, is caused by a virus similar to the one that causes influenza and polio in humans.

Birds, flies and other insects oftentimes are guilty of spreading it, or it may be transmitted by the sick dog coming into contact with healthy dogs.

The dog owner himself may bring the disease home to his dog by merely walking across an area where a diseased animal has recently been.

The disease is regarded as a complicated one because the virus condition often is complicated by other germ infections that may prove fatal.

It is not easy for the dog owner to recognize the early stages of distemper. Generally, the dog just doesn't feel 100 per cent, the veterinarians added. His appetite will drop off some, he may develop diarrhea, the eyes and nose may show a discharge of watery fluid and the animal's temperature will be very high with fevers of 105 to 107 degrees.

This phase usually lasts only one or two days and may pass unnoticed by the pet owner.

In the second stage, the temperatures generally are lower but the dog continues to be listless and the discharge from the eyes and nose is heavier. It is during this period that the dog is most vulnerable to other germs and diseases.

Veterinary scientists estimate that about 50 per cent of the cases that develop typical signs of distemper terminate in death. With the advent of newer drugs and antibiotics, however, more of the animals are being saved, although the percentage of deaths is still quite high.

Distemper can be prevented, the association reported, through a procedure of vaccination in which the dog's body is stimulated to produce distemper antibodies.

ADMINISTRATRIX'S NOTICE

This is to give notice that the subscriber has obtained from the Orphans' Court of Frederick County, in Maryland, letters of Administration on the estate of

LEONA V. PEARRE late of Frederick County, Maryland, deceased. All persons having claims against the deceased are warned to exhibit the same, with the vouchers thereof, legally authenticated, to the subscriber on or before the 9th day of November, 1960 next; they may otherwise by law be excluded from all benefit of said estate. Those indebted to the deceased are desired to make immediate payment.

Looking Ahead

...by Dr. George S. Benson
DIRECTOR - NATIONAL
EDUCATION PROGRAM
Searcy, Arkansas

Warning From F.B.I.

In a number of recent public statements J. Edgar Hoover, director of the Federal Bureau of Investigation, has sought to arouse the whole population to the disturbing facts about our national security. Mr. Hoover recently has issued a statement addressed specifically to "All Law Enforcement Officials" in the nation. It is of such importance it should be read by every citizen. Here it is:

"It is an incontestable fact that our country, the symbol of the free world, is the ultimate, priceless goal of international communism. The leaders of international communism have vowed to achieve world domination. This cannot be until the Red flag is flown over the United States. In, for a moment, the grandiose Red plan is scoffed at as being fantastic, consider that one-fourth of the land surface of the world and one-third of the people of the

earth are now controlled by the worldwide Communist bloc. . .

The Unalterable Goal

"The Communist plan is to conquer the United States, if not today, then tomorrow; if not tomorrow, then the next day, next month, next year. . . This is evident in the machinations of the Communist Party, U.S.A., as shown by the analysis of its 17th National Convention.

"It is indeed appalling that some members of our society continue to deplore and criticize those who stress the Communist danger. What these misguided 'authorities' fail to realize is that the Communist Party, U.S.A., is an integral part of international communism. As the world-wide menace becomes more powerful, the various Communist parties assume a more dangerous and sinister role in the countries in which they are entrenched. Public indifference to this threat is tantamount to national suicide.

Marked For Liquidation

"Lethargy leads only to disaster. The Communists have a savage plan of liquidation for a vanquished America. The blueprint can be found in the words of Mao Tse-tung, Chairman of the Chinese Communist Party, who reportedly said that

it was necessary to liquidate 800,000 'enemies' to solidify communism in China. Another pattern is the plight of countless families in satellite countries who were torn apart and transported to the oblivion of Soviet labor camps.

"Under Communist domination in America, the first campaign of liquidation would engulf the lawyers, champions of due process of law; newspapermen, whose ageless fight for freedom of expression would have no place under totalitarianism; law enforcement officers, guardians of individual rights; governmental leaders, local, states and national; and everyone falling in the so-called 'capitalist' category. Occupations and professions which the Communists term 'useless and parasitic' would be abolished—clergymen, wholesalers, jobbers, real estate salesmen, stockbrokers, insurance men, advertising specialists, traveling salesmen—the list for purging is endless. No citizen would escape from some form of suffering under a Communist regime.

Priority On Death

"One need but to compare his own worth, his own ideals, his own religious beliefs with the atheistic doctrines of communism to determine his priority on the list of liquidation. The defense of the cherished freedoms secured and handed down to us by our forefathers is the responsibility of each American. Knowledge of the enemy, alertness to the danger, and everyday patriotism are the brick and mortar with which we can build an impregnable fortress against communism. Only the intelligent efforts of all Americans can prevent the decay of public apathy from laying open our nation to the

Many Helped Through CARE

The fifties, a decade of change across the world, marked a major shift in CARE's work among the needy. While food gifts helped the hungry survive, the decade saw development of CARE's Self-Help Program to give people tools to feed and otherwise help themselves in the future. Results are illustrated in records released by CARE's Baltimore headquarters. As 1960 began, the totals of package deliveries include these items:

Enough modern plows, hoes, rakes, shovels and other farm implements to help an estimated 225,000 farmers and their sons learn and practice up-to-date farming techniques to increase crop yields and family incomes. Enough school kits to open the doors of education for 191,517 refugee and orphan children in Hong Kong, India, Korea and

Red menace.

In the non-profit, public service National Education Program workshop in Searcy, Arkansas, we have sufficient educational material on American capitalism, and on socialism and communism to provide individuals and groups with a graphic, dramatic lesson in American citizenship each week, month after month, for a year. Write for more information about it.

Vietnam alone.

Enough sewing machines to help at least 74,000 girls, women and young men learn to sew and earn a living as seamstresses and tailors.

Enough midwifery supplies to safeguard the lives of 131,220 newborn babies, plus the obstetrical instruments for thousands of additional births.

With such tools, in the world's broadest sense, CARE donors boosted human progress in the key areas of health, education, productivity. During the decade, Self-Help contributions totalled \$13,690,000 (biggest year, 1959, with \$2,526,000). Though still a relatively small part of the \$342,000,000 total worth of aid delivered since CARE's founding, the impact of this equipment has been greatly multiplied by cooperative use. On a per capita average, an estimated 37 million people have been helped to improve their lot.

Intensified tool deliveries are planned for the next six months, as spring and summer crops permit reduced food distribution in many areas. Currently, the people of 24 countries of Asia, Europe, the Middle East and Latin America can be helped by donations sent to CARE Self Help, Baltimore 15, Md. There are now 57 different Self-Help packages, from \$1 school kits to \$100 machines that ram earth into sturdy blocks to build houses, schools, village centers. In addition, funds are needed for a host of special purchases: livestock irrigation

pipes, rigs to dig water wells, technical books, vocational training machines, mobile health units. Under usual CARE procedure, all supplies are delivered in the names of the senders, to bring a personal expression of friendship from Americans and America.

Participate In Air Exercise

Army PFC William J. Matthews Jr., whose parents live on Route 2, Thurmont, and PFC Ronald R. Messner, son of Mr. and Mrs. Ralph L. Messner, R2, Emmitsburg, recently participated with other personnel from the 8th Division's 26th Infantry in Operation Triple Threat, a special air mobility exercise in Ger-

many. During the exercise, 44 Army and Air Force aircraft were employed in a three-phase air movement of infantry personnel and equipment from Grafenwohr to Baumholder.

Matthews, a wireman in the infantry's Mortar Battery in Baumholder, and Messner, an engineer in the infantry's headquarters Company, entered the Army in October 1958 and they received basic combat training at Fort Riley, Kan. They arrived overseas in April 1959.

Matthews, 18, attended St. Joseph's High School, and Messner, also 18, attended Emmitsburg High School.

When the world entirely fits your notions, you will be the only person in it.

WASHINGTON AND "SMALL BUSINESS"

By C. WILSON HARDER

A most interesting bill has been placed before Congress by Rep. William Tuck of Virginia.

This measure, if passed, would make it illegal to force on an employer a greater number of employees than he thinks necessary, and would thus stop the union "featherbedding" that has become a most serious problem.

Actually, labor leaders who are forcing unneeded workers on employers are in effect creating the same type of socialism that Benito Mussolini saddled on an unfortunate Italy. In fact, there are perhaps more parallels to the prewar Italian situation than it is palatable to dwell upon.

Then, and now, the economy of Italy had drifted into a monopolistic control where a few big cartels owned practically everything.

This, of course, did not serve the best interests of the bulk of the population, and lacking a small independent class of business to furnish employment, there was a scarcity of jobs.

So the Italian system, started by Mussolini, was for the government to run down the list of employers and arbitrarily telling each employer how many additional employees he should put on the payroll.

Naturally, this raised the cost of Italian goods and services with the result Italy was not very competitive in the Euro-

pean trade circles, and this in turn resulted in strong inflationary trends in Italy.

As a matter of fact, when Benito Mussolini plunged his nation into war, first in Ethiopia, then into World War II he adopted perhaps the only course that was open to him to stay in power and keep the Italian socialist economy from a complete collapse.

Now, of course, in this nation, the government does not actually order railroads to put more men on train crews than there is any need for; neither does government, either federal or local, issue edicts such as those in many areas forbidding painters to use any brush wider than four inches to make a job last longer.

But powerful union leaders, not held in check by government, and in fact supported by National Labor Relations Board, does issue these edicts, and in some areas, these labor leaders have the power on the legislative level to get some of these "featherbedding" measures made into law.

So it gets more or less down to the basis that it is not so important to find out who killed Cock Robin. He was killed, and the important thing is to prevent this from happening again.

Thus, Rep. Tuck's bill is important in many ways. It is high time that business management is restored to its rightful management. It is also high time that unions are prevented from using their government smelter upon bulldozing of business to create still further socialism in the United States. One Mussolini was enough for the world for quite some time to come.

Speaking of PUBLIC SAFETY

"Where there is no vision the people perish."

Residential Modern Street Lighting Chases Crime

CLEVELAND, OHIO — Years ago, street attacks and assaults were pretty much confined to the bad neighborhoods, but now a mobile population brings danger to our very doorsteps.

Police officers agree that the possibility of being seen is the most powerful deterrent to crime. Modern street lighting provides this protection, for it leaves no shadowy places between spots of light. It gives the potential criminal no dark place to hide and spring on an unsuspecting victim. It leaves no dark landscaped areas to serve as cover for robbery, rape or murder.

Darkness attracts some very strange birds, but the penetrating power of modern street lighting sends them on their way.

Neighborhood street crimes are headlined all over the United States, but they don't occur in lighted situations. Muggings in the dark neighborhoods of Washington, D.C.; Rape in a dark Chicago apartment alleyway; Murder under the uncertain lighting conditions of Norfolk; Assault in the dark by-ways of Camden.

"We can't patrol every area of every city every moment," say police. Modern street lighting is a partner of the law.

The Ice Story

Early man quickly discovered the advantages of using mountain snow, preserved in deep pits, as a refrigerant for food and drink. Aristotle recognized the principle that water in an earthen jar buried in snow pits soon turned to ice!

The term "freeze" applied to local anesthetic is no accident. Before amputation, an arm or leg is often surrounded with ice to eliminate pain. Ice is also valuable in the treatment and prevention of shock.

Manufactured ice is really "Ice Man's Ice" made by experts who specialize in making crystal clear, pure, hard frozen and slow melting ice that has many advantages over refrigerator ice.

There are innumerable uses for ice—industry, medicine, and especially the home! Ice keeps food appetizing, salads crisp, drinks cold. For special occasions, 24-hour vending machines supplement home supplies—provide cubes, chips or blocks packed in sanitary paper bags. Also available during regular hours at local retail stores and at your local ice manufacturer.

FAMOUS AMERICAN TAVERNS

—Marlborough Tavern in Marlborough, Conn.—

He Would Not Go to See "That Old Rascal"

Nearly two centuries and a quarter ago, beginning around 1740, two, and at times three, four-horse postcoaches arrived each day at the Marlborough Tavern to change teams on their way to New London or Hartford. Then, to the notes of the post-boy's bugle, the distinguished travelers descended from the coach for a New England meal or a tankard of ale or a glass of toddy, or all three.

Visits of President Monroe (1817) and President Jackson (1833) are on record. The town officials were in session when word came that President Jackson was dining at the tavern. One official moved "a recess and a short call on the President of the United States." Another objected, saying he "would not go a rod to see that old rascal." Party feeling ran high in those days.

Earlier still, tradition has it, General Washington passed through Marlborough and stopped at the tavern to water his horse and quench his own thirst with a "small beer." Washington was a fancier of the malt beverage and had his own private recipe which he brewed on his estate at Mount Vernon. Throughout its history, Marlborough Tavern has been famous for its beer and ale and today claims the largest selection of beers in the east.

Marlborough Tavern is redolent of the atmosphere of colonial and Revolutionary days. At the close of the war for independence, when the Marlborough men received

their discharge, they stacked their guns in the old taproom. Whether it was an intentional part of the ceremony or not, the ceiling was peppered with small dark holes, a tally of the number of men present. The holes can be seen to this day. All the original flooring, fireplaces, bar, cupboards, etc., are still intact and in working order. All furnishings are original antiques. In the old kitchen are the big stone fireplace with its large oven, iron kettles, skillets, dutch oven broilers and other utensils used in cooking on the open hearth. Here many old-fashioned dishes are still prepared, though modern kitchen equipment has been installed in the ell of the house. Famous original specialties, including rare and delicate herbs, include roasted pheasant, guinea hen, squab turkey, wild turkey and frogs legs, all served with wild rice.

Built into the stone foundation of the tavern under the main floor of the house is a hidden chamber. This is believed to have been an "escape hatch" in case of Indian raids. It is worth seeing.

'Modern' Kitchen Outmoded Today? Remodel to Save Time, Add Beauty

Many a so-called modern kitchen is actually outmoded. Continual improvement in electric appliances, a host of new decorating products, and scientific kitchen planning have sparked a new era in kitchen efficiency and beauty.

The Midas touch of a kitchen designer recently transformed an outmoded "modern" kitchen in Byram, Conn., by combining new electric appliances with gold-trimmed French Provincial cabinets. Designed by Cox Kitchens of Port Chester, N. Y., the remodeled kitchen has a new electric refrigerator-freezer and built-in automatic dishwasher.

The new refrigerator-freezer holds many more pounds of fresh and frozen food than the old unit did, but it occupies no more floor space. The slim walls and squared-off design of new refrigerator-freezers blend with built-in contemporary kitchens.

Swing-out shelves and special compartments keep meat, dairy products and vegetables at the correct temperature and humidity to preserve their freshness up to a week. Zero zone freezing sections hold large quantities of frozen foods for months. The extra space in this new refrigerator-freezer makes it possible for the owners to shop once a week instead of three or more times. They save both time and mileage.

From outmoded "modern," this kitchen was transformed to contemporary French Provincial by tasteful use of gold-trimmed cabinets and new electric appliances. A new built-in automatic dishwasher replaced an older portable one, and a spacious electric refrigerator-freezer was recessed in a wall of cabinets. Its thin, straight walls give it a built-in look. These photos show the old kitchen, right, and two views of the handsome new kitchen, above.

ator-freezer makes it possible for the owners to shop once a week instead of three or more times. They save both time and mileage. Antiqued-white cabinets trimmed with gold molding and knobs, and white louver doors of ponderosa pine point up the French Provincial theme of this kitchen. Louver doors like these, which can be bought from lumber dealers all ready to install, add warmth and texture to contemporary kitchens decorated in any period. Kitchen designers have found. A similar French Provincial effect can be achieved by the home handyman with stock moldings of ponderosa pine.

The owners of this kitchen were so pleased by the extra hours their old portable dishwasher had saved them that they installed a new, built-in, automatic dishwasher when they remodeled. They can save at least an hour a day by stacking dirty dishes out of sight in the dishwasher and doing them all at once with just a twist of the dial. Since the automatic dishwasher goes through several wash and rinse cycles using very hot water, and then a hot-air drying cycle, dishes and cooking utensils are more sanitary than if they had been painstakingly washed by hand.

HERE ARE MY REASONS FOR OWNING A FREEZER:

SEASONAL TREATS are available all year 'round — right at my finger tips.

SAVES WORK — Unnecessary shopping trips are avoided. Quantity buying in season, often at bargain prices, saves time and money.

BETTER tasting meals every time! Greater variety and quality make meals more nutritious — better balanced.

Insurance Company To Adopt Rating Plan

The Travelers Insurance Companies will introduce its own Driver Record Rating Plan in Maryland effective June 20, it was announced by officials of the companies this week.

The announcement follows closely on the heels of word from the State Insurance Commission that approval had been granted for safe driving plans submitted by two national rating organizations.

The National Automobile Underwriters Association and the National Bureau of Casualty Underwriters.

Maryland will be the eighth state in which The Travelers have

Plan A New House-Dress

In budgeting for your new season's wardrobe, include the price of a new house-dress — not a checked gingham number for cooking and cleaning, but fabric to dress-up your home. New draperies can do more than anything else to bring freshness and life to tired rooms — they can, inexpensively, provide the new color, texture, design that your bored eyes cry out for.

Take a tip from the young homemaker who decorated the living-room on the right. She solved the problem of a big picture window in a small room by using ready-made Fiberglas draperies to cover the entire window and window-wall. The muted champagne color of the fabric, the horizontal stripe in the weave, and the wide expanse of drape, gave breadth and importance to the small room. The semi-sheer fabric allows light to softly filter in, but provides privacy from the street.

Besides flattering window areas, glass fiber fabric can be used elegantly as a canopy for a bed, functionally as a room divider or, as on the left, can be used to dress up an awkward and uninteresting corner to make it the "conversation piece" of your family room.

introduced their new auto insurance plan that features discounts for good drivers and new packaging concepts.

"Although it is still too early to accurately gauge underwriting results of our plan in those states," a spokesman for the companies said, "we are hopeful they will be favorable. Obviously the public reaction has been excellent and our agents have reported wide-spread acceptance—otherwise we would not be coming into Maryland with our own plan."

It was explained that The Travelers new plan features completely refined classifications. "The new policy is an individually tailored plan, designed according to the driving record and insurance needs of the individual or family," the spokesman said. "Discounts will vary according to the driving records."

"This is in line with our program of innovation in the automobile insurance field," he said. "We feel insurance rates should be established not only on the use of the automobile but also on who is using it."

"In our new safe driver plans," he continued, "we have been determined to explore new methods of establishing automobile insurance rates which more accurately reflect driver-experience. It is obviously unfair to penalize the large number of good drivers who have never had an accident or a moving traffic violation by making them pay for the careless few. We will reward the good drivers with substantially lower rates. At the same time, those drivers with records of accidents and traffic convictions will have to pay more. We feel this is only equitable."

Other states in which individual safe driver plans have been introduced by The Travelers include Nebraska, Michigan, Pennsylvania, Missouri, Iowa, Ohio, and California.

"It is appropriate," the spokesman concluded, "that the company which 'invented' automobile insurance should pioneer in the establishment of these new concepts which are so necessary." He explained that The Travelers was the first company in the United States to write automobile insurance. The first known policy was issued in 1897 to Gilbert J. Loomis of Rutherford, N. J., a mechanic who built his own one-cylinder motorcar in 1896. That first policy provided \$1,000 liability at a cost of \$7.50.

Social security disability payments at age 50 to age 65 are the same as those payable to retired workers 65 and over, according to Mr. W. S. King, Manager of the Hagerstown office.

A disabled or retired worker's benefits range from at least \$33 a month to about \$120.00 a month, depending on the worker's average monthly earnings over the years. For example, if the average earnings are \$200 per month, the benefit to a disabled or re-

tired worker would be \$84.00 per month.

Wives and dependent children of disabled workers are eligible for monthly benefits the same as wives and dependent children of retired workers. These benefits are in addition to the benefits paid the disabled worker.

Mr. King further states that disability benefits, like other social security benefits, are not automatic, but a formal application must be filed. Disability benefits are in most respects the same as those paid retired workers, except that they are payable as early as age 50. Anyone interested in more information about the disability provisions or any phase of the social security program is urged to get in touch with the Hagerstown social security office for current and correct information. The office is located at 59 North Cannon Avenue.

More than 1,650,000 oil wells have been drilled in this country during the last century.

NOTICE OF MUNICIPAL CHARTER AMENDMENTS FOR THE BURGESS AND COMMISSIONERS OF EMMITSBURG

Pursuant to the Charter Amendment Resolution No. 3, passed by the Burgess and Commissioners of Emmitsburg on May 4, 1960, the following is published as a fair summary of the proposed amendments.

The proposed amendments make an entirely new charter for the municipality and changes the name of THE TOWN OF EMMITSBURG. The limit of \$10,000 on property which the Town may own has been removed. Boundaries are not changed. Property qualifications for Commissioners are required and for the Burgess are raised, both set at \$1,000 and technical changes made in old section 153 and other sections of the Charter. The old Charter is Sections 161 to 184, inclusive, of the Code of Public Laws of Maryland—1930 Edition. Voting by machine is allowed in addition to voting by ballot. Many obsolete provisions and sections which have not been followed have been omitted. Sections 157, 158, 165, 166, 167, 173, 174, 176, 177, 178, 179, 180, 182 and Chapter 188 of the Laws of the General Assembly of 1939 have all been included although the wording and organization or placement of these sections have been changed. The Board of Commissioners have retained all of their specific powers and their general powers have been expressed in more general terms, thus broadening their overall powers. The Commissioners are allowed to meet as they decide; limitations on their taxing power have been eliminated; provisions regarding the constable, town treasurer and tax collector have been expressed in more general terms and financial information and requirements have been amplified and made more specific and detailed. Tax collection powers have been changed to agree with modern state law; the borrowing power has been enlarged and generalized; the town is enabled to codify its ordinances and the entire charter has been reorganized under a modern type charter so that specific provisions may be more easily found. The NEW CHARTER shall become effective on July 4, 1960, unless a proper Petition for a Referendum thereon shall be filed as provided by Section 13 of Article 23A of the Annotated Code of Maryland, and provided that the other provisions of Article 23 A of said Code applying in such cases are all followed.

This summary is published by authority of Clarence G. Frailey, Burgess.
Edward D. Storm, Attorney.
5/6/5t

1950 Homes May Need Modernizing

The year 1960 is the 10th anniversary of the biggest home-building year in American history. More than 1,350,000 houses were built in the U. S. during 1950—the peak year of the post-war construction boom.

This means that soon these 1,350,000 homes will be 10 years old, ready to start their second decade of service.

If you are living in one of these 1950 homes, chances are you've been thinking seriously of expanding to add space or making improvements to bring the house up to date.

New Roof Beautifies
Fortunately, most homes of this age can be modernized quickly and without undue expense, thanks to today's improved building materials and construction techniques.

If additional space isn't a requirement, such decorative improvements as a new roof of asphalt shingles, fresh paint inside and out, and a new kitchen appliance or two can give any house a new lease on life.

Color Adds 'Personality'
Many houses can be given a new personality with color alone. A new roof in one of the many colors available in asphalt shingles, plus a color scheme on sidewalls and trim to harmonize with the roof, can completely renew the appearance of any home, as well as add protection from weather.

When a family has outgrown a house, adding one or more rooms, or enclosing a porch, breezeway, or carport is a logical solution.

Costs Can Be Low
Many home owners have discovered that adding new space costs less than they imagined. One reason for this is that many building materials available today are designed to be installed by even the most inexperienced handyman.

Batts and blankets of mineral wool insulation, for example, can be installed by the home handyman in walls and ceilings during construction of the new room. This added protection against heat loss often makes any additional heating equipment unnecessary. The home owner also can increase insulation protection in the attic ceiling with pouring wool that comes in bags.

Units Save Labor
Door and window units of ponderosa pine also help save costs. These come from the factory with frames and sash pre-assembled, ready to be nailed into the door or window opening. These units come in styles to blend with any type of architecture and can be painted or stained to harmonize with any color scheme.

Read I John 4:1-6.

I have fought a good fight, I have finished my course, I have kept the faith. (II Timothy 4:7).

When Christopher Columbus started out "against wind and the high seas" on his expedition to the New World, he ventured forth with three small ships. He conquered all opposition and all difficulties, including the mockery of his contemporaries, for he had faith that the world was round.

Just before the Apostle Paul lost his life, he wrote a letter to Timothy. In it we find one of Paul's finest phrases: "I have kept the faith." He was referring to his faith in Jesus Christ. Today we can have hope if we keep the faith. Christ offers to each one of His faithful servants the crown of righteousness and eternal life.

Our Lord Jesus recommended that we have faith, even if it is as small as a grain of mustard seed, for even that much faith is capable of great things. Without faith we can do nothing; but through faith in our Lord, we can do what He would have us do, for faith is the very essence of life.

Prayer

O Lord, our God, increase daily our faith. Give us the assurance that we are Thy faithful servants. Help us to reveal our faith through personal dealings with others. In the Saviour's name. Amen.

Thought For The Day

By keeping his faith, the Christian lives a useful and victorious life.

Leticia G. Hidalgo, Educator (Bolivia)

Dependents Eligible For Pension

G. Ernest Lipps, Assistant State Service Officer of the Maryland Veterans Commission, Winchester Hall, Frederick, Md., announces that there will be a change in the pension law for widows and minor children of veterans of World War II and the Korean Conflict.

Previously to July 1, in order for a widow or child of the veteran to qualify for benefits, the veteran had to be receiving compensation benefits for a service-connected disability at the time of his death.

Starting July 1, the widow or dependent children of any de-

ceased veteran of World War II or the Korean Conflict who had an honorable discharge can qualify if she can meet the income limitations.

The children of the deceased veteran will be eligible for benefits if they meet the requirements even though the widow has remarried or if her income is over the limitation and the child or children meet the income bracket they can still qualify.

It is suggested that the widow or the guardian of any minor children of deceased veterans contact the Maryland Veterans Commission Office in Winchester Hall, Frederick, Monday through Friday from 9:00 a. m. until 4:00 p. m. The office is located on the third floor of the East Wing.

'61 Wheat Allotment To Be Mailed Soon

Farmers will receive notice of their 1961 farm wheat allotments well in advance of the July 21 marketing quota referendum, William L. Dudley, Chairman, Maryland Agricultural Stabilization and Conservation Committee, has announced. The overall wheat allotment for Maryland for 1961 is 175,370 acres, as compared to 179,179 acres for the 1960 allotment.

The 1961 national wheat acreage allotment is 55 million acres—the minimum fixed by law. If the allotments had been determined solely on the basis of the law's supply formula, the 1961 al-

lotment would have been zero acres. The allotments apply in 39 States designated as "commercial."

As directed by law, marketing quotas must be proclaimed for the next wheat crop when the available supply is more than 20 per cent above the normal supply. The supply for 1960-61 is estimated at 2.5 billion bushels—92 per cent more than normal.

If at least two-thirds of the farmers who vote in the referendum approve the 1961 quotas, then quotas with penalties on "excess" wheat will be in effect, and price support will be available on the crop at not less than the minimum support to be announced before the referendum.

If more than one-third of the votes oppose the quotas, there will be no quotas or penalties in effect, and price support will be available at 50 per cent of parity to farmers who comply with their allotments.

This is the eighth successive year for which wheat marketing quotas have been proclaimed. They have been approved in a referendum for each of the past seven years.

House Needs An Inspection In Springtime

Houses, like humans, need a thorough physical examination at least once a year, and spring is an ideal time for it.

Harsh winter weather can bring on many "ailments" around the house. Frost in the ground can damage foundations, extremes in temperatures can open up cracks around windows and doors, and winds may have loosened shutters and television aerials, and caused damage to wires.

The area that deserves the closest inspection is the roof. It takes more punishment from winter ice, snow, rain, wind, and temperature changes than any other part of the house.

The most important flaws to look for in a roof inspection are leaks, especially in a roof that is old and weather-worn. Water can cause serious damage if it seeps into rafters, ceilings, and other structural components. This moisture also can cause dangerous short circuits if it gets into electrical wiring.

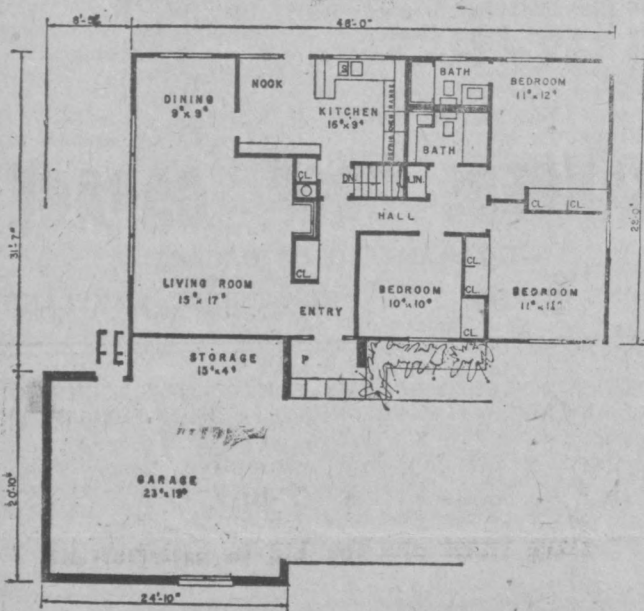

One way to find roof leaks is to take a flashlight into the attic after a rainstorm. Look along rafters and deckboards for tell-tale dark areas in the wood. If these are damp to the touch, it usually means a leak.

If there's one leak in a worn roof, there undoubtedly are others, or soon will be, since a roof wears out uniformly. This is the time to call a roofing contractor, not to try patching leaks. Walking on an old roof to repair it may open new leaks and lead to an endless patching process.

If there are no signs of leaks, go outside and look carefully at the roof. If it looks shabby, it's time to replace it before leaks do occur.

A new roof of asphalt shingles provides not only trouble-free protection for years, but adds cash value to any home by improving its appearance with color and rich, glare-free texture. Reroofing is a home improvement that is eligible for an FHA Title I loan, and asphalt shingles are low in applied cost because they go in place quickly when applied by a skilled roofer.

GOOD DESIGN MAKES THIS HOUSE ATTRACTIVE

The major problem of satisfactorily orienting a house, that is adjusting it by compass direction to the most favorable exposure, often is solved more readily by accommodating design. Designer Richard B. Pollman has achieved that end with this one-story L shaped home. Attractive from all points of view, it may be built upon almost any terrain and occupy a lot of any shape. It has 1,344 square feet of livable floor area.

This house has a large living room with fireplace, dining area, kitchen, three bedrooms, two bathrooms, seven closets and tremendous storage space in the two-car fireproof brick garage. A side door in the garage invites protected storage of lawn, garden and sports equipment.

The front and back windows of this house assure full ventilation and cooling in summer. Its compact design reduces winter heating costs.

An unusual feature is Luxtrol light control for the lighted valances in the living-dining area. By turning a dial, intensity of illumination can be had from off to full-bright. This house may gleam for parties, yet at other times help you relax with subdued light. The chandelier over the table in the dining area is also Luxtrol controlled. Light can be bright for table setting and clearing, but every dinner can be festive with candle glow. Women love dimmed lights at dinner. It makes the silverware, crystal and conversation sparkle. And it makes them look more attractive, too.

Professional construction blueprints for Plan HP-902 may be had for \$20 from Home Planners, Inc., 16310A Grand River Avenue, Detroit 27, Michigan. The price includes material list and specifications outline.

An Oasis For Motoring Nomads

GRAMERCY, LA. — Motoring and service stations have come a long way since Grandpaw bounced down a rutted road to fill the tank of his gas-buggy at a crossroads blacksmith's shop. Tomorrow's motorist will see many more changes. This new service station, which is operated by Esso Standard on the Airline Highway here, has a nursery for

Baby; a playground for Junior; five maids and hostesses; air-conditioned lunch-and-lounge, sales and rest room areas; patios for outdoor dining, and a bank of vending machines that dispense hot or cold food—soup to sundaes. Ideas and programs tested at this station, called the Moto-Mat, could influence future stations from coast to coast.

Telephone diary shows
phone calls saved \$19⁰⁰...48 hours...
313 miles of traveling in two weeks

Lieutenant Veditz checks what's cooking for dinner as Mrs. Veditz takes a call on her kitchen phone. She also has a phone in her bedroom.

Mrs. Veditz of Salisbury, Maryland, is the busy wife of a Maryland State Police officer, mother of three youngsters, cub scout den mother, treasurer of her church group and active in the P.T.A.

Her telephone is almost as much a part of her active life as her family. The telephone diary

she kept for two weeks proved the time, money and traveling a telephone can save.

Keeping the diary was fun. Looking through it later reminded her of the ease with which a telephone reaches others, the extra hours it gives a person for activities—and the money it saves.

If you think the experience of Mrs. Veditz and her family unusual, why don't you keep a telephone diary of your own? See if your phone doesn't pay for itself in convenience alone—and in money savings as well.

THE C & P TELEPHONE COMPANY OF MARYLAND

ing Company 2 3/4 % coupon due in 1985. These are selling around 71 and yielding about 3.85%.

The above examples include the leading telephone company, two railroad companies, and two excellent utility companies.

Personally, I would rather buy the bonds of an electric power company which serves smaller communities than one which is primarily located in a large city that might be bombed in case of World War III. As investors usually buy bonds to keep for a considerable length of time, it is well to give some consideration to the possibility that World War III could start before most good bonds mature. Other Attractive Considerations

The properties of the tele-

phone company, and also of certain railroads, are so well diversified over large areas, and in many cases own such valuable mineral and oil rights, that they should be attractive possibilities for investment. Even if their terminals were temporarily disrupted, or even destroyed, they would be quickly restored. Hence, I again cite the American Telephone & Telegraph and the Northern Pacific bonds as offering excellent security and add as further impartial examples a number of other railroad and utility issues.

These are listed according to Moody's rating, by which most banks rate their bonds. All are selling at substantial discounts from par:

	Rating	Price	Current Yield
American Tel. & Tel. 2 3/4 % of 1986	AAA	72	3.65%
Illinois Bell Tel. 2 3/4 % of 1981	AAA	76	3.62%
Socony-Vacuum 2 3/4 % of 1976	AAA	78	3.21%
Southern Bell Tel. 2 3/4 % of 1985	AAA	73	3.77%
Virginian Railway 3s of 1995	AAA	73	4.11%
Metropolitan Edison 2 3/4 % of 1974	AA	76	3.78%
Niagara Mohawk Power 2 3/4 % of 1980	AA	75	3.67%
Northern States Power 2 3/4 % of 1977	AA	75	3.50%
Ohio Edison 2 3/4 % of 1975	AA	78	3.53%
Pacific Gas & Electric 2 3/4 % of 1981	AA	75	3.67%
Cities Service 3s of 1977	A	80	3.75%
Southern Pacific 2 3/4 % of 1996	A	59	4.68%

I wish to take this opportunity to express my sincere thanks to my many kind friends for their cards, visits and other acts of kindness shown me during my recent hospitalization. Also to the VFW and American Legion.
Thomas C. Harbaugh

YOUR PERSONAL HEALTH

You may have always thought, like most of us, that the fuel you will burn in your home this fall and winter will keep your body warm by heating it. It isn't so, according to the U. S. Department of Agriculture, as published in its recent booklet No. 142-1 under the title, "Electric House Heating."

It's the food you eat that keeps you warm, and the heating system in your home is just there to keep your body from getting overheated too fast. This is how the Department of Agriculture explains it:

"The primary source of heat for human beings is the heat generated inside the body. The human body is a heat generating unit adjusted so as to maintain a blood temperature of 98.6 F. as long as the physical functions of the body are normal. Therefore, the function of a heating system in the home is not to heat the body but to keep the environment at such a temperature that the body will not be dissipated too fast for human vitality and well being. Heat energy is transferred from points of higher to lower temperature."

"The heating system warms the house and air, but it does not warm the body, since the temperature of the walls and air is

about 70 degrees F. while the surface temperature of the body is approximately 85 degrees F. Because of this difference in temperatures, the transfer of heat is out of the body and not inward."

The introduction of the Department of Agriculture booklet has this comment about the latest in house heating:

"Electric house heating is happily growing in popularity and acceptance. All indications are that it will gain still greater momentum in the future. Electricity for house heating was first adopted in the low-cost power areas such as Tennessee Valley and the Pacific Northwest. In recent years, added experience in the use of new heating equipment and techniques, and further knowledge of insulation, have made it possible for electricity to be competitive with fuels in many areas of the United States."

The electric utility industry predicts that by 1967 it will have twice the generating capacity that it now has, so many more Americans will be able to have this very simple type of heating at reasonable cost.

SPORTS AFIELD
By Ted Kestner

To any fisherman, a pond contains a thousand wonders. To a small boy it is also likely to be a fishing primer where lessons are learned from schools of yellow perch, calico bass, saucy sunfish or a lively encounter with Mr. Pickerel.

Maury Delman, a feature writer for Sports Afield Magazine, says many fathers take their sons to a pond in hopes of furthering a wonderful relationship and introducing them to the world of angling. Unfortunately, many men start their youngsters off in the wrong direction simply because of a lack of knowledge of the boy's capabilities and available equipment.

Let's take a look at an average father outfitting his son with tackle. The reel will probably look like a large coffee grinder and the rod stiff enough to snub the run of a frantic salmon. Believing that the boy will be unable to handle a fairly big fish on a light line, he will load the reel with 16-pound-test and usually overload it. Though Dad will be able to handle this gear with ease, Junior's efforts are sure to result in near disaster.

The outside rod and reel are just too much for any lad. He will be forced to cast by grasping the rod butt with both hands in the manner of a surfcaster heaving for a distant breaker. The heavy line, an underloaded spool and the boy's need to 'force' his casts will prevent the lure from going beyond a rod's length from the boat.

What is the right tackle for Junior? Believe it or not, ultralight is made to order. Get him a 4½-foot ultralight spinning reel—its weight will usually be only a few ounces. Fit it with a diminutive spinning reel and load it with three-pound-test monofilament; this line could be cast effortlessly and still safely handle pickerel not horsed or lifted without the aid of a net. Lures to match this outfit will weigh about ½ ounce.

Watching a youngster use ultralight tackle will make you realize it is not the exclusive tool

of experts. It's the perfect tool for all young anglers. It's their size. It's their speed. It's fun.

After all, if it can give a youngster the impression that he's battling a tuna when a sunfish is really on the other end, ultralight has created an inspiring illusion. From such incidents, anglers are spawned.

Alumni Banquet
Saturday, June 11

The annual banquet and dance of the Emmitsburg High School Alumni Assn. will be held Saturday, June 11 in the school cafeteria. During the business meeting new officers will be elected. Principal speaker at the affair will be CWO Rudy E. Meyers, Letterkenny Ordnance Depot, Chambersburg, Pa. Following the business meeting dancing will be held in the VFW Annex with music being furnished by Jay Chamberlain's Orchestra from Shippensburg, Pa.

ACCOUNT FILED

The \$36,102.63 total personal property estate of Edith C. Keilholtz was recorded with Register of Wills Thomas M. Eichelberger recently. The estate also included \$68,650 in real estate.

The estate was recorded by the administrator, Raymond E. Keilholtz, consisted of \$31,162.76 in debts due received, \$2,300.69 in current money, \$2,293.68 in stocks and bonds and \$345.50 in personal property.

The total personal property estate was reduced by payments and disbursements of \$18,329.57 to a net estate of \$17,773.06 from which lineal inheritance taxes of \$177.73 were deducted.

A tax of \$686.50 on real estate valued at \$68,650 was deducted from the remainder, leaving a balance of \$16,908.83.

4-H CLUB MEETS

The regular meeting of the Emmitsburg Girls' 4-H Club was held at the home of Mrs. Beale on May 24, 1960. The meeting was opened in the usual way.

The first thing on the program of discussion was the bake sale. Each member put down what they would bring and promised to contact others. Next, the group talked about Demonstration Day. The girls plan to give demonstrations this year.

Diane Keaver gave a demonstration on embroidery stitches and Mrs. Beale gave hers on Kitchen Care.

Refreshments were served after the meeting was adjourned.

Hospital Report

Discharged

Mrs. Lloyd Vaughn and infant son, Emmitsburg.

Mrs. Donald Topper, Emmitsburg.

Francis Arnold, Emmitsburg.

James Kelly, Emmitsburg.

Norman Shriver Jr., Emmitsburg.

Mrs. Carroll Little and infant daughter, Thurmont R2.

Births

Mr. and Mrs. John Studds, Emmitsburg, son, Wednesday.

Mr. and Mrs. Clarence Wivell, Emmitsburg R2, son, Tuesday.

Mr. and Mrs. Mearl McGlaughlin, Emmitsburg, daughter, Friday.

Christian Service

Group Meets

The Woman's Society of Christian Service of Toms Creek Methodist Church met Monday evening in the social room of the church with 16 members and one visitor in attendance. Mrs. Pauline Watkins was in charge of the devotions. The title for the evening devotions was Jesus, the Light of the World. The opening hymn, Walk in the Light, was followed by recitation of the Lord's Prayer, in unison.

The Scripture reading for the meeting was from St. John, Chapter 1 to 14, read by Mrs. Emily Moser.

During the program readings were given by Mrs. Pauline Watkins, Mrs. Carrie Keilholtz, Anna Rickour and Cora Moser.

The president, Elizabeth Fuss, presided over the business meeting which was closed by the singing of a hymn, We Give Thee But Thine Own. The closing prayer was offered by Mrs. Cameron Johnson. Refreshments were served to the members and the men of the official board which met the same evening with Mrs. Pauline Seabrooks and Mrs. Emmer Glash in charge of the serving.

TO PRACTICE MONDAY

The Yankees of the Emmitsburg Little League will practice Monday evening, June 6 at Little League Field at 6 p. m. All players on the roster are requested to report.

The Old Timer

"Most folks would be getting ahead if they could just manage to stay even."

St. Joseph College Campus Elections Are Held At

Saint Joseph College students
concluded political preparations
this week for the fall semester
with the election of officers for
both the Children of Mary So-
ciety, leading campus activities
organization, and the Cooperative
Government Assn., the student
council on campus.

Top honor on the college cam-
pus, the presidency of the Chil-
dren of Mary Society, went to
Miss Monica Deihl, a junior from
St. Petersburg, Fla. Eugenia La-
pura gained the vice presidency,
Carol Dor was named secretary,
and the responsibilities of treas-
urer were assigned to Carolyn
Nalley.

Councillors for the various
classes also were named in the
recent election. Representing the
senior class are Gail Commer-
ford and Mary C. Kratzer; jun-
ior membership includes Diane
Balden and Mary Maloney while
the officers from the sophomore
class will be Loretta Byrne, Cath-
erine Gillis and Mary L. Williams.
Councillor for the college's nurs-
ing division will be Mathilde

Zambaka.

The Cooperative Government
Assn., responsible for the inter-
pretation of student rules, named
Marie Karl as president for the
1960-61 academic year. Assisting
Miss Karl will be Carol Dor,
vice president; Ann Depenbrook
as secretary; and Ann Marie Can-
talupo, treasurer. The incoming
sophomore and junior representa-
tives to the CGA will be Joanne
Barkley and Mary Maloney, re-
spectively, while Lynn Durning
will serve as nursing representa-
tive.

Two delegates to the National
Federation of Catholic College
Students were also elected. Sen-
ior delegate named is Eileen Cal-
lahan and the post of junior de-
legate was accepted by Ellen Krie-
ger.

WILL PROBATED

The will of Mrs. Mae K. Camp-
bell who died May 10, was prob-
ated this week in Frederick and
leaves several monetary bequests
to members of her family, some
of which are directed to be used
for Masses at St. Joseph's Cath-
olic Church, Emmitsburg.

Bequests include \$500 each to
Robert V. Kerrigan and to J.
Ward Kerrigan; \$500 to Lefevre
Kerrigan to be held in trust by
the executrix, Mrs. Frances Ker-
rigan Stinson, to be used in case
of illness or death; \$500 each to
her sisters, Mrs. O. H. Stinson
and Alice Paxson; \$500 to Tillie
Kerrigan and also General Motors
shares held jointly by the deces-
sated and Mrs. Kerrigan; \$200 to
Annie Rosensteel; \$500 to St.
Joseph's Church for Masses once
a month and to be announced for
Frank and Mae Campbell; \$500
each to Maurice and Margaret
Kerrigan; \$100 for a Mass to
be said and announced each month
for Julia Wadsworth. She direct-
ed that the Stief silver go to a
niece, Harriett Stinson Norris,
for her "many acts of kindness."
She says that her insurance is
payable to Frances K. Stinson
and also directs that she be given
15 shares of the GM stock, a
trunk and chest which contains
a mink scarf, persian lamb cape,
cashmere coat and two diamond
rings.

Books go to Virginia Kerri-
gan and Mrs. Stinson gets the
remainder of the estate. The will
was dated February 12, 1956
and was witnessed by Mrs. Ruth Mc-
Carthy and William J. McCarthy
Sr.

ZONING

(Continued From Page 1)

recorded subdivisions in residential
districts. This change would pro-
vide for a lot size of 15,000
square feet with 85 feet of front-
age, if the lot is located in a re-
corded subdivision, if it has no
immediate vehicular access to a
principal highway and if the
Health Officer of Frederick Coun-
ty has approved the lot for water
supply and disposal of sewage
wastes. The present Ordinance
now permits this only in an Agri-
cultural District.

Another of the proposed major
changes concerns an interpreta-
tion of the expansion of a non-
conforming use by the Board of
Appeals. As presently written the
Ordinance allows the Board to
permit expansion of a non-con-
forming building by 100% of the
floor area of existing buildings
or 20% of the area of the lot de-
voted to this non-conforming use,
whichever is greater. The change
requests striking that portion
which applies to the 20% figure.
The study requests of more than
sixty Board of Appeals cases
heard under both County Ordin-
ance reveal that the floor area
figure is adequate to provide for
most of the reasonable expansions
in this County. Also, included
in the changes is a proposal to
permit the Board of Appeals to
place conditions upon the expan-
sion of non-conforming uses and
to authorize no expansion in ex-
cess of basic non-conforming uses
and to authorize no expansion in
excess of basic requirements for
the district where the use is first
permitted.

Daniel E. Wight, Chairman of
the Planning Commission has said
that the general overall effect
of the changes upon the Zoning
Ordinance is to definitely liber-
alize that Ordinance, in most
cases, without effecting the origi-
nal and basic concepts. "We
hope the citizens of Frederick
County will study these changes
and feel free to make individual
observations." Copies of the pro-
posed changes are available for
distribution to the public at the
Planning and Zoning Commission
office in Winchester Hall. It was
emphasized that both public hear-
ings will be limited to the pro-
posed changes to the Ordinance.

ALUMNI GROUP ELECTS OFFICERS

St. Joseph's High School Alumni
Assn. held its annual banquet
and election of officers Saturday
evening in the VFW Annex.

James McKeon, Westfield, N. J.,
was the principal speaker at the
banquet and discussed the modern
trend to school consolidation. His
interesting and informative talk
was warmly received by the large
attendance. Following the busi-
ness meeting dancing was held.
Guy A. Baker Jr., was emcee of
the evening. New officers elected
were as follows: President, Rob-

ert Gelwicks; vice president, Ed-
ward L. Stouter; secretary, Ag-
nes Scott; treasurer, Philip Top-
per.

Vacation Bible School To Open

The Daily Vacation Bible
School for all the Protestant
Churches of the community is be-
ginning planned for the two weeks
beginning June 20 and closing
July 1. The school will be held
in the Elias Lutheran Parish Hall,
every day, Monday through Fri-
day from 9:00 to 11:30 a. m. The
course of study this year is fol-
lowing the theme "Teachings of
Jesus." Classes will be held for
children in the Nursery, Kinder-
garten, Primary, Junior and Jr.
High Departments. Teachers for
the various departments are mem-
bers of the cooperating churches.
Rev. Philip Bower and Rev. John
Chatlos are the co-directors of the
school. All children of Emmits-
burg and surrounding areas are
invited to attend this school.

Lions Elect New International Director

Mr. G. Robert Lyles of Hag-
erstown, was selected by the Lions
of Multiple District 22 to be a
candidate for International Di-
rector of Lions International at

the International Convention in
1961. Mr. Lyles is a member of
the Hagerstown Lions Club, hav-
ing served as president. In 1955-
56 he was District Governor of
District 22-W.

Mr. Lyles is owner and oper-
ator of Concrete Products with
plants in Hagerstown, Frederick,
and Winchester.

Physician Receives Honorary Degree

Dr. Willard F. Preston, a well-
known Wilmington, Del., physi-
cian, received an honorary
LL.D. degree at the 152nd annual
commencement at Mount St.
Mary's College, Emmitsburg, on
June 1 at 10:30 a. m. in Memori-
al Gymnasium.

Dr. Preston was graduated from
Mount St. Mary's in 1919 and re-
ceived his M.D. from Georgetown
University in 1925. Following a
residency at Providence Hospital,
Washington, D. C., he did post-
graduate training at St. Louis
Maternity Hospital, the New York
Post Graduate Hospital and the
Mayo Foundation, Rochester,
Minn. He is a fellow of the Ameri-
can College of Surgeons, a Cer-
tified Fellow of the International
College of Surgeons, and a Diplo-
mate American Board of Obstet-
rics and Gynecology.

He is an incorporator of Blue
Cross Hospital Service, Inc., Del-
aware; an organizer of the Catho-
lic Physicians' Guild, Wilming-
ton; a member of the Board of
Examiners of Physicians for Li-
censure, State of Delaware, and
former chairman of the Depart-
ment of Obstetrics and Gynecol-
ogy at Delaware Hospital, Wil-
mington General Hospital, and
St. Francis Hospital.

Dr. Preston served with the
Student Army Corps during World
War I, and as a lieutenant colonel
in the Medical Corps during World
War II. He was chief of surgical
service, 80th Station Hospital;
commanding officer, 49th Field
Hospital. He served in France,
Belgium and Germany. He also
served as a member of the Presi-
dential Appeal Board, Selective
Service System and received a
certificate of appreciation in May
1958 for ten years of service
from President Eisenhower.

He has made many contribu-
tions to medical literature.

Graduation exercises began
May 31 at 3:45 p. m. with an
honors convocation. The Rev.
Lawrence Skelly, Litchfield, Conn.,
delivered the baccalaureate ad-
dress at 4:30 p. m. following the
honors gathering. Graduation fol-
lowed the cornerstone laying
ceremony on June 1. Fr. Skelly,
Gov. Lawrence and Fr. Francis
Dodd, C.M., will receive honorary
degrees in addition to Dr. Pres-
ton.

Baltimore Raceway Opens Monday

Baltimore Raceway's 11th an-
nual harness racing meet opens
Monday night, June 6 and will
extend through July 2. There will
be nine races nightly—Monday
through Saturday—with post time
set at 8:20 and the daily double
closing at 8:10 p. m.

Memorial Day Services Held

Memorial Day services were
held Sunday at 11 a. m. in the
Presbyterian Church, Emmitsburg.
Preceding the church services,
members of the color guard, the
American Legion, Legion Aux-
iliary and VFW members met at
the Legion Home where a wreath
was placed at the Honor Roll by
Everett Chrismer. Then they pro-
ceeded to the Honor Roll for the
deceased at the VFW Home where
William Topper, commander of
the VFW, placed a wreath.
Marching to the doughboy at the
west end of town a third wreath
was placed at the monument by
Fern Ohler. The group then went
to the Presbyterian Church where
services were conducted by Rev.
William M. Hendricks, pastor.

Excess Grain To Be Sold

In the biggest surplus food
deal on record, the United States
has agreed to sell India 17 million
tons of grain in the next four
years.

The price is 1.3 billion dollars,
and the United States will be
paid in Indian rupees, under Pub-
lic Law 480, which was sponsored
by Farm Bureau. Most of the ru-
pees will be loaned back to India
for purposes of development but
200 million dollars worth will be
used to defray the expenses of
the United States Embassy and
other American agencies in India.

The Indian deal will really make
a dent in the tremendous U.S.
surpluses of these crops. Under
the agreement signed by Presi-
dent Eisenhower recently in Wash-
ington, India will receive 587
million bushels of surplus wheat
over a 4-year period. The current
U.S. wheat surplus is 1.3 billion
bushels at this time.

Over the four years, India will
also buy 22 million bags of rice,
which is just about as much as
the U.S. has left over for export
purposes, after the domestic
needs are met, in a single year.

Milk Producers To Purchase Receiving Plant

The Board of Directors of the
Maryland Cooperative Milk Pro-
ducers, Inc., last Friday voted to
acquire the can milk receiving
plant at Unionville, Frederick
County. Starting July 1, it will
be operated by the Cooperative
for can shippers, mostly in Car-
roll, Frederick and Montgomery
Counties and areas of Pennsylvania
and West Virginia, whose milk
has been going to a plant in
Westminster.

"By visits of fieldmen and by
letter, members will be consulted
and advised as to hauling ar-
rangements and other details in-
volved in this change," stated
Business Manager W. P. Sadler.

"The operator of the West-
minster plant had sought an al-
lowance for receiving can milk
which did not seem in the best
interests of all MCMP members,"
Mr. Sadler continued, "Later we
were advised that after July 1,
the dairy would prefer to receive
only tank milk there."

"A substantial part of our con-
tract with our members is that
we take care of their saleable
milk under any circumstances.
When we were notified that the
Westminster plant would not be
available to can shippers, we be-
gan negotiations for the Union-
ville plant, which had long been
operated as a receiving station
by a Baltimore dairy but which
had been closed early this year.
Last Friday's action by the Board
made this announcement possible."

"The plant is being refurbished
and additional storage capacity
added, bringing its total to 14-
000 gallons. While designed pri-
marily for can milk, it can also
be used as a holding and reload-
ing plant for tank milk should
the necessity arise," Mr. Sadler
Concluded.

Thurmont Carrier Service To Start Soon

Home delivery mail service in
Thurmont will begin June 25, ac-
cording to information received
this week from U. S. Senator J.
Glenn Beall.

Thurmont Postmaster Lee Mun-
shower said that June 11 had
originally been set as the target
date for the inaugural of the
home delivery service but he has
now been advised of the new date.

Two new employees will be ad-
ded to provide the home service
but they have not yet been se-
lected, Munshower said.
One employee will be a "foot"
carrier while the other will make
deliveries by vehicle.

According to Munshower, there
will be about 225 stops for the
mounted carrier and 380 points
for the foot carrier to deliver.

Included in this mail delivery
service will be the delivery of
parcel post items.

Deliveries by the two carriers
will be made once daily six days
a week.

Public speaking is easy. It's the
thinking before you speak that's
hard.

NOTICE APPLICATION FOR PERMIT TO APPROPRIATE AND TAKE GROUND WATER

In compliance with the provi-
sions of Chapter 526 Acts of
1933, Veterans of Foreign Wars
Post 6658, Emmitsburg, Md., has
made application for a permit
to use a minimum of 20 gallons,
a maximum of 100 gallons, and
an average of 30 gallons of water
daily during six months of the
year from (one) well, having a
diameter of six inches and depth
of about 50 feet, located on the
premises of the applicant about
one and one-half miles northeast
of Emmitsburg, Md., on the
Kump's Dam or (Dr. Cadle prop-
erty).

The water will be used for the
following purposes: Drinking and
general clean-up of picnic facili-
ties.

A public hearing on this appli-
cation will be held at the Depart-
ment of Geology, Mines and Wa-
ter Resources, Room 102 Latrobe
Hall, Johns Hopkins University,
Baltimore 18, Md., at 11 a. m. on
