

Learning Council Announces Beginning Of Five Courses

The Lifelong Learning Council of Emmitsburg announces that five courses in continuing education will begin this month.

Would you like to get your high school diploma?

It doesn't matter how old you are or why you want it. You may be 20 and working toward a better job. You may be 50 and want that diploma simply for personal satisfaction.

evening from 7-9 p.m., starting January 22.

The only charge to the student is \$3 for a high school equivalency workbook. Instruction and all other materials are provided by the Frederick County Board of Education under its adult education program.

Three students from the Emmitsburg area took their GED tests in December and received their high school certificates a few days after Christmas. If you start attending class now you may find a diploma under your Christmas tree, next year.

If you feel you aren't ready

for high school work you will find instruction also given at Seton Center to improve ability in basic reading, writing and arithmetic. Same nights, same time, no charge. Registration for both the above classes is accomplished by being present at 7 p.m. on January 22.

Instruction in typing will be given at St. Joseph High School on Thursday evening from 7-9 p.m., beginning January 25. Fee of \$8. For further information phone 447-6247, Sister Mary Rose.

Intermediate shorthand will begin at St. Joseph College on Monday, Jan. 22, from 7-9 p.m., in the basement of Vincent Building. This course is suitable for students who took shorthand first semester and for anyone who wishes to brush up on shorthand skills. It will include intensive review of theory, speed dictating with use of records, dictating, timed writings and transcription (Diamond Jubilee Series). The course runs 12 weeks and the fee is \$8.

Sister Anna Mae will again teach Ceramics at St. Joseph College starting Monday night, Jan. 29, from 7-9 p.m. There is an \$8 registration fee for Ceramics and supplies cost \$12. Registration in this course is limited.

For additional information on any of the above courses, phone 447-6102. Several short courses are being planned by the Lifelong Learning Council and will be scheduled later in the spring.

Zip Column

A special stamp for someone special, 'LOVE'—8c, will be first issued at Philadelphia, Pa., January 26, 1973.

This Special Stamp for Someone Special is for those people of all ages, sexes, colors and creeds who have been touched by the magic of love.

It will appear on many a valentine. Letter carriers serve as Dan Cupids for the day and deliver some half billion valentines each year.

Professional writers, wrestling endlessly with the subject, are not at all in accord on just what love is. Culled from the index of Bartlett's "Familiar Quotations", love is: . . . like the measles . . . like a dizziness . . . like a red, red rose something so divine . . . that orbit of the soul . . . the enchanted dawn . . . the jewel that wins the world . . . the sweetest thing on earth . . . the lord and slave of all . . . a sickness . . . a frailty of the mind.

This stamp will be placed on sale at our office, Saturday, January 27, 1973.

The official Internal Revenue Service Guide, "Your Federal Income Tax," is on sale again this year, at our business counter. The price is seventy-five cents.

The booklet provides assistance to taxpayers filing separate or joint returns. It contains sample completed forms with entries keyed to appropriate pages and many clear examples of allowable expenses, deductions and contributions.

George E. Roensteel, P.M.

Your Maryland Tax . . .

Income Tax Vital To State

By LOUIS L. GOLDSTEIN, Comptroller of the Treasury. As one of the 1,500,000 Marylanders whose income tax payments last year provided \$456.5 million of revenue for our State's vital General Fund, you should know where your money goes and what it accomplishes.

Other services that benefit communities and all citizens. In addition, Baltimore City and 23 counties received over \$209 million for local income taxes imposed by them and collected from you by your State Income Tax Return.

These counties, in turn, paid to the 160 incorporated cities, towns, and taxing areas within their jurisdiction an amount equal to .37% of the net tax-

FLOWER OF THE YEAR

When America's leading seedsmen, meeting at Penn State University, Pennsylvania, were asked to name a "Flower of the Year" based on popularity among home gardeners, the Giant Cactus-Flowered Zinnia won the title.

By far the most popular flower among home gardeners is the zinnia, and when leading seedsmen — meeting at Penn State University, Penna. — were asked to name a "Flower of the Year" according to popularity among their customers and performance in their own trial gardens, the Giant Cactus Flowered Zinnia got the vote.

It's easy to understand why these spectacular giant flowers are so universally grown among home gardeners. They grow with ease throughout the United States, the seeds are easy to handle and grow rapidly planted directly into the garden.

Giant Cactus Flowered Zinnias come in a magnificent range of colors — from snow white through shades of yellow, orange, pink, red, and purple. They make beautiful flower arrangements, and last a long time in water. The giants withstand hot summers, humidity and drought, and just a few plants will create an impressive splash

of color. About the only demand of these lovely flowers is a sunny location. Seeds planted after danger of frost will usually germinate within 10 days, and the first flowers will appear in 8 weeks, keeping up a continuous display until fall. The huge flower heads, measuring up to 5 inches across, often carry hundreds of quilled petals—hence the name "cactus flowered." Fifty years ago you would have had difficulty finding zinnias, and the giants did not even exist until modern hybridizers and flower breeders made tens of thousands of selections to improve the flower size and color.

Emmitsburg Chronicle

Established 1879 Successor to the Emmitsburg Banner, Established 1840 EMMITSBURG, FREDERICK COUNTY, MARYLAND Published weekly on Thursday by COLONIAL NEWSPAPERS INC., 107 South Seton Avenue, Emmitsburg, Maryland 21727. Telephone 301-447-2333

ROBERT B. WENTWORTH, PUBLISHER KAREN E. KING, EDITOR

Copy for Advertisements must be received in this Office not later than Tuesday morning to insure publication in the current week's edition. Advertising rates furnished upon request. Subscription rate, \$4.00 per year in advance. All Communications and Checks intended for this Paper should be addressed and made payable to EMMITSBURG CHRONICLE, Emmitsburg, Maryland 21727.

Entered as Second Class Matter at the Postoffice at Emmitsburg, Md., under the Congressional Act of March 3, 1879.

Member NATIONAL PAPER Association - Founded 1895 Maryland-Delaware-D.C. Press Association Inc.

able income of each taxpayer from each municipality as reported in his return. Needless to say, this revenue is vital to the maintenance and development of these communities.

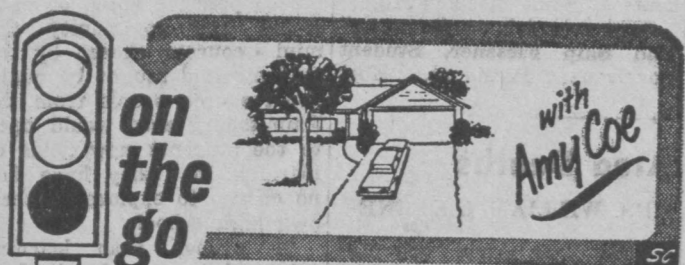

So you can see, the Income Tax Division of the State Comptroller's Office not only provides essential funds needed by our State, but also saves Maryland taxpayers considerable money by collecting taxes for Baltimore City, all of our counties and their municipalities, as well as our State.

And most remarkable, this is all accomplished at the amazing low cost of only 52 cents for each one hundred dollars collected, or just over one-half of one per cent.

In fact, the Maryland Comptroller's Office which collected and disbursed tax revenue of over \$1 billion last year is acclaimed by other states for

the outstanding job it is doing, an achievement of which we can all be proud.

You can help us maintain this record and serve you even better by filing your income tax return early. This will also benefit you because you will receive any refund quickly.

Tips on Saving Money by Conserving Energy

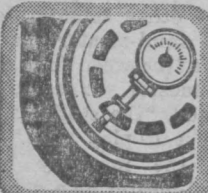

You can do something to help conserve our nation's vital energy sources; and you'll save money at the same time. With demand for fuels beginning to outstrip supply in some areas, simple conservation of electricity, heating oil and gasoline will not only help you cut costs, but can assist in halting the drain on our energy supply.

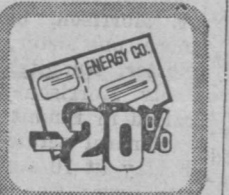

Make sure your furnace is working efficiently. Have it cleaned periodically, lower the thermostat before going to bed, and maintain proper humidity. This not only saves you money, but helps conserve fuel.

Better home insulation has been cited as vital to fuel conservation. An investment in storm windows will pay off in the long run, and weatherstripping and caulking around doors and windows can drastically reduce fuel bills.

Good driving habits can markedly decrease gasoline consumption, according to the Amoco Oil Company. Avoid jackrabbit starts, drive at moderate speeds, and keep your car well-tuned. Properly inflated tires, believe it or not, can also help conserve gasoline.

You'll be surprised at the kilowatts you can save simply by turning off lights and appliances when not in use. Concerted home electrical conservation can cut monthly utilities bills 20% and more.

If we start conserving energy today, there will be enough for everyone tomorrow.

For free booklet on saving energy dollars, write: "Energy," Room 1654, 910 S. Michigan, Chicago, Ill. 60605

ABIGAIL

(Continued from Page 1)

the committee will have to study the matter and what the effects of termination would be on various offices and agencies of the federal government—and they have until Feb. 28, 1974 to make their final report. So, until at least 1974, 200 powers which really belong in the hands of the Congress of the United States will be left in one man's hands, let us hope that he uses them well and cautiously, if he uses them at all.

VFW AMBULANCE

Esther Kemper, R2, Fairfield; A. D. Stonesifer, Charnita; Mrs. Charles F. Stouter, R2, Emmitsburg; Mrs. Roy H. Little, Creamery Rd.; and Ernest Fredrick, R2, were transported recently to the Warner Hospital, Gettysburg, in the VFW ambulance. Philip Fox, Emmitsburg, was taken to the Frederick Memorial Hospital; Mrs. Mary Hankey, Mt. View Rd., was taken from the hospital to her home; Mr. Thomas E. Ott, Federal Ave., was transferred from the Hershey Medical Center to his home; and Mrs. Ruth Kelly, E. Main St., was taken from the Warner Hospital to her home in the vehicle. Drivers were Charles Champlain, Jack Hoke, Sam Cool, Dave Copenhaver, Leo M. Boyle, and Larry Little.

Nighttime Nursery Magic

There's no question that babies see things differently from adults. The mundane chain with its string of keys that means opening door to us, become a magical to in the eyes of a baby. And in the nursery, too, a baby's field of view is unlike ours.

At first, the baby's eyes are usually fixed on the ceiling. In consideration of this, lighting should be from a center ceiling fixture that's well shielded. A pan fixture or an indirect perforated metal fixture will do nicely. Never use bare bulbs. Directional fixtures aimed right at the baby, since the glare will be too uncomfortable for him.

The mother, too, needs to see well in the nursery. Other than admiring the new member of the family, she has to change him, groom him and dress him, while he's constantly in motion. A useful addition to the center ceiling fixture is a valance bracket mounted low on the wall between 44" and 54" from the floor. With a glass shelf on top, if it, it become a storage and display shelf for dolls or toys. The shield board should be 5" deep and 6" from the wall.

A night light is also recommended to give the child a sense of security and let the mother see her way around the room. Night lights that plug into a convenience outlet are practical. Small shielded GTE Sylvania 7-watt or 7½ watt bulbs cast a soft glow across the floor. Panel-scent Nite Lites are unbreakable and operate for pennies a year — they require no shielding and supply a dependable safe glow for years.

Special features like dimmer control can be used in the nursery, too. Rather than an abrupt change from dark to light or vice versa, the lighting level can be lowered or raised gradually, allowing the eye to adapt in easy stages. When checking on the baby at night only a low level is required, so no need to make him up.

Bringing up baby may not be easy — but there is a bright ray to do it! With plenty of light.

# FREDERICK COUNTY BACKGROUNDS

BY SAMUEL CARRICK  
The Deilmans, Jourdans, And Moores  
"When I Clasp —  
An old book in my hands,  
I can journey again  
Into known and loved  
lands!  
Gladness there grows more  
dear,  
Beauty there shines more  
bright,  
In a book where each page  
Holds remembered de-  
light!"  
The Deilman family with its many intermarriages is a most fascinating puzzle and the solving thereof—if it can be done—an historical and genealogical feat of no small merit. It must be stressed, however, that this series of articles does not pretend to be the "last word" on the subject—but only additional spadework to the work already done.  
Last week data pertaining to Adelaide (2) Deilman, the wife of Professor Charles Jourdan, is continued at this time.  
Both Professor Jourdan, his wife, and one of their daughters are interred in the "old Mountain Cemetery." The inscriptions follow:  
10. In memory of Professor Charles H. Jourdan, born February 24, 1830, died April 28, 1913. A native of France. Entered the faculty of Mt. St. Mary's as Professor of Mathematics in the Physical Sciences.  
11. In memory of Adelaide

J. (Deilman) Jourdan, wife of Professor Charles H. Jourdan, born July 24, 1852, died January 20, 1911.  
The Jourdan graves are located near the Tiers' family vault. A small modern marker in the plot marks the grave of a daughter of Professor and Mrs. Jourdan. Another daughter, Frances Jourdan, died while her parents were in Mexico and is apparently buried there.  
The files of the "Emmitsburg Chronicle" give many interesting facts regarding many of the "old" families of Emmitsburg and vicinity. The following, pertaining to the Deilmans, was obtained from this source.  
It will be remembered that Rebecca (2) Deilman, daughter of Dr. Henry and Emily (Dawson) Deilman, was twice married and three children were born to each union. The first husband, Bernard Quinn, who became the wife of Harry F. Manning, died in the second year of her age; a son, H. A. Quinn, who emigrated to the West; and Nina Quinn, who became the wife of Harry F. Manning.  
12. Married, February 11, 1896, at Mt. St. Mary's Church, by the Rev. John B. Manley, Harry F. Manning to Miss Nina Quinn, both of this District.  
Charles Augustus Manning, the father of Harry F. Manning, died in 1909. He was married to Emily Tiers, the daughter of Edward Tiers.

His wife was the sister-in-law of George Miles, the "Mountain Poet." At the time of Charles A. Manning's death, his son was already dead for in the obituary it is stated: "A son, Harry F. Manning, married Nina Quinn, of Emmitsburg, who, with a daughter survives him."  
Dr. Henry Deilman named his home, located near Mt. St. Mary's College, "Andorra." After his death his estate was "settled up" by his only son, Lawrence Deilman. It would appear that "Andorra" came into the possession of Dr. Deilman's son-in-law, John Henry Cretin, for, under date of February 23, 1894, the "Chronicle" states:  
13. "John H. Cretin and family moved from Hagers-town, Maryland, to 'Andorra,' the late residence of Dr. Henry Deilman, near the College."  
Emily (2) Deilman, the 4th child and third daughter of Dr. Henry and Emily (Dawson) Deilman, married John Thomas Cretin, a cousin of her sister, Mary Deilman's husband.  
The obituary of Emily (Deilman) Cretin appeared in the "Chronicle" under date of Mar-

6, 1914:  
"Died, February 27, 1914, Mrs. Emmeline Cretin, the widow of John T. Cretin and daughter of the late Dr. Henry C. Deilman, the great musician, also of Mt. St. Mary's, aged 80 years, 7 months, and 3 days. Mrs. Cretin died at her home at Clairvaux. She is survived by one brother and one sister—Lawrence Deilman and Mrs. Rebecca (Deilman) Moore—both residing near this place. Burial took place in the 'Old Cemetery on the Hill'.  
Dr. Henry Deilman, of Mt. St. Mary's College, had a half-brother, Lewis Deilman, who also emigrated to America and left his mark "in the sands of time." The obituary of Louis Deilman, of New Windsor, Maryland, appeared in the "Chronicle" on January 6, 1911:  
13. "Louis Deilman, one of the most widely known citizens of Carroll County, Maryland, died at his home in New Windsor, December 31, 1910—from the infirmities of age. He was born in the free city of Frankford-on-the-Main, Germany. In 1843 he left his native country to seek his fortune in America. He landed in Philadelphia, where his older brother, Henry Deilman, was conductor of a theatre orchestra. In 1846 both brothers came to Mt. St. Mary's

### Perspectives In Learning By H. Brown

**Dropping Out Is Still "In"**  
Will the school dropout problem continue to increase during the 1970's? There has been much discussion about this very serious problem. Some programs have been effective but the results are not helping to lessen the seriousness of the problem. The question will be asked many times.  
The present national rate of dropout is about 0 per cent. This phenomenon is not new; twenty years ago, the rate was 0 per cent. The reason the concern is so serious now is that the adult world has changed greatly during the past 20 years. The world of work available to the dropout today is totally different.  
College, where Henry became professor of Music. Louis Deilman taught at Calvert College in New Windsor, Maryland. In July 1864, Mr. Deilman purchased the Hotel New Windsor. On October 15, 1895, Mr. Deilman's wife died and from that time his health declined . . .  
The historical and genealogical data pertaining to the Deilman family, of Mt. St. Mary's College, and New Windsor, Maryland, will be continued in this series next week.

onstration guidance projects are constructive, remedial and corrective projects. All well and good, but what is needed are preventive programs.  
As long as dropping out is still "in", the rehabilitation programs will be cured for the symptoms of a very serious illness. The task at hand is to find the causes of the problem and to work with them. Early identification of potential dropouts or problem children must be developed so that school careers are not interrupted.  
We must get behind the development of positive programs which emphasize learning as a pleasurable experience. Let's make learning be "in".  
Family tradition is a fine thing only when used to set a course in life—not an anchor.

### The Make Yourself Over Clinic

BY DOLLY REED WAGEMAN, Director, The Carnation Fashion Office

Q: Dear Dolly: The holidays make me feel my worst when I want to look my best. Any suggestions?  
A: The problem is that all of us are trying to do twice as much as usual. Lots of partying means lots of rich food and lots less sleep. No wonder the effects show up in disposition and complexion, not to mention waistline!  
First, the lack of sleep. You're just going to have to find time for a catnap during the day. Soak cotton pads in ice water, wring them out and place over eyes while you lie down for half an hour. You don't need to sleep, but turn off the world. The idea is REST.  
As for irregular eating — some is inevitable, but there are controls. Perhaps you don't usually eat dessert, but now you're served Christmas goodies everytime you sit down. Go ahead and eat dessert when you go out, but continue to skip these high-calorie treats at home.  
If you're really smart, you'll keep yourself in shape throughout the holidays by saving up calories during the day. This way, you can splurge at party-time — and still keep your total calories at the right level. How? Make breakfast and lunch each a Mini Meal of Slender diet food from Carnation. One packet of Slender mixed with 6 oz. nonfat milk is just 164 calories. Keeps you going and keeps your figure too. Could be the best present you give yourself this year!

## Curbing Your Child's Cold

NEW YORK (ED) — There's nothing common about a cold when it strikes your child. Though doctors still haven't found a cure, their standard advice is worth following: Keep the child warm, make sure he drinks plenty of liquids (soups, water, fruit juices) and eats moderately. Most important, teach him how to blow his nose properly. One powerful blow to clear the nasal passages is not the answer—it can force infection into the sinuses and canals which lead to the ears. "Blow gently" is the cue. And remember, it's not necessary for a child to stay in bed when he has a cold. Let him continue his normal activity as much as possible—taking care to divert him if activity becomes too strenuous or the child begins to get hot.  
The most difficult hours will be nighttime, especially if a cold is accompanied by fever. Aspirin is necessary to combat fever, and the aches of colds and flu. But use a children's medication. St. Joseph Aspirin For Children, long a favorite in the nursery, helps relieve these symptoms . . . so you can both sleep. (Be sure all medicines are kept out of the reach of children, and buy only those with safety-lock caps.)  
Are your child's colds very frequent? They could be an allergy masquerading as a runny nose. If his cold is accompanied by an earache and high or persistent fever, call the doctor at once to avoid ear infection or more serious complications.  
But if his "cold" is just a cold — with a little care and attention, he'll be back to normal before you know it.

## BANANA NOTES

From Dole

Here's the sure answer for mothers who are tired of being told: "You never fix what I like," while their conscience tells them delectable goodies are often not good for their kids. Bridge that generation gap forming across your dining room table by whipping together the often-asked-for and wonderfully nutritious combination of bananas and peanut butter. Your kids will sing your praises. Your own good sense will applaud you, as well, for the wholesome ingredients you put into these treats are good for everybody — lunchbox sporters, slumber party gigglers or midnight munchers — all your favorite people will cheer. Better yet, let the kids bake them. Then they can enjoy them right after the baking session when Banana Peanut Butter Top Hats are at their best. For the rest of the family, keep the cookies in an air-tight container where they'll keep for days after.

### BANANA PEANUT BUTTER TOP HATS

1/2 cup butter or margarine	1 teaspoon baking powder
1/2 cup chunk style peanut butter	1/2 teaspoon baking soda
1 cup brown sugar	1 cup uncooked quick-cooking rolled oats
2 eggs	2 Dole bananas, peeled and sliced
1 teaspoon vanilla extract	
1 cup all purpose flour	

Combine butter, peanut butter and sugar; beat well. Beat in eggs and vanilla. Add flour, baking powder and soda, mixing until well blended. Stir in rolled oats. Set aside 1 cup of dough. Drop remaining dough from a teaspoon onto cookie sheet. Lightly press banana slice on top of each cookie; then cover with small amount of the reserved dough. Bake at 375° for 10 minutes. Makes about 3 dozen.

## FOR SAFETY'S SAKE: USE YOUR HEAD

Why wear a helmet? In sports it could prevent a serious injury!

If your head strikes a hard surface in a fall of only 32 to 36 inches, the impact may be sufficient to fracture the skull and cause a massive brain concussion.

If an object, such as a hockey stick, strikes your head, the force behind the blow does not need to be great to cause extensive damage since the impact is concentrated in one small area.

Sports related head injuries happen; but wearing a well-fitted and well-designed helmet, molded from a quality material, goes a long way in helping to prevent these injuries. Of course, sound safety practices also must be present — at all times!

Most helmets have a two-part protective system — a hard outer shell and a soft liner or suspension. The outer shell resists the impact of the blow, prevents penetration and absorbs or distributes the shock. The remaining force is distributed over the inner liner.

Many of today's protective helmets — football, baseball, hockey, motorcycle, etc., have shells molded from LEXAN polycarbonate, a registered trademark of the General Electric Company. These helmets have extremely high impact strength and resiliency, important criteria for safety.

From an impact standpoint, helmets molded from LEXAN resin have been demonstrated to exceed current impact standards established by organizations such as the American National Standards Institute.

The LEXAN resin molded shell is able to bounce back into its original shape. Resiliency becomes critical when there is a possibility of more than one impact. After all, if the initial impact cracks the outer shell, any following impact could cause severe damage to the head, as when a motorcyclist is thrown into a tree and then hits the ground.

The Canadian Standards Association, in an article published in the Canadian Medical Association Journal states, "The ideal (hockey) helmet should be able to protect the players against blows and falls. The shell and the suspension apparatus of the helmet should be of impact cushioning enough to absorb falls and blows to reduce the transmitted accelerating or decelerating velocity of the head below the 30-foot-per-second danger threshold and below 425 pounds per square inch . . . The helmet also should be light," (helmet shells molded from LEXAN resin weigh about 20% less than helmets molded of competitive materials), "and compact in size to avoid further weight to an already top-heavy human head and to avoid shifting the center of gravity upwards and forward which could in turn increase the shear stresses and create a whiplash effect."

The human brain is protected by fluid and bone — adequate for normal conditions. However, there is much that can be done to insure that under non-typical conditions — hockey, football, motorcycling, etc., an accident that shouldn't have happened doesn't.

For a free copy of "Selecting A Protective Helmet" write: Plastics Department, General Electric Company, One Plastics Avenue, Pittsfield, Massachusetts, 01201.

Capitol Comment

By Charles Mc Mathias U.S. Senator

U.S. Troops In Europe

In considering future force levels, the President must not only negotiate with our NATO allies but he must also consult and coordinate his negotiations with the United States Senate. While only 33 Senators supported Senator Mike Mansfield's proposal in the 92nd Congress for an immediate unilateral reduction of American troops in Europe, an additional 22 supported the Mathias Amendment calling for more gradual changes after agreed collective decisions within the NATO alliance. Thus the majority of the Senate is on record as favoring a move away from the status quo toward lower United States troop levels in Europe.

In addition, advance warning has been given by some stalwart supporters of current American force levels, such as Senator Byrd of Virginia, that they will not automatically respond to another demand to extend our commitment indefinitely. The Administration can not ignore such significant signs of changing attitudes.

The Administration must understand the nature of the sentiment within the Senate which has led to this state of affairs. One is reminded of the old saw that "it isn't the money, but the principle of the thing." In this case the money matters since the estimated cost of maintaining troops in Europe runs well over \$1.5 billion annually. But the question is also one of principle.

Senator Mansfield has become the foremost spokesman for those who want to see an early reduction of the level of troops in Europe. In this, as in most things, he is motivated by his high degree of

patriotism and by his veneration for the United States Senate as an integral part of our Constitutional system. He voices a concern which transcends those of the professional budget cutters and Pentagon pettifoggers. His concern is shared by many Senators, including myself.

Commitments made by the United States, even within the NATO Treaty which has been ratified by the Senate, become a part of the foreign policy of the United States in which the Senate has a continuing Constitutional responsibility. While I believe that the current Senate supports the principles of the NATO Treaty as firmly as did the Senate which ratified that treaty, I also believe that the current Senate must be consulted upon the present plans to carry out the purposes of the treaty if it is to have the support of the present generation of Americans.

Beyond that there is, of course, the long shadow of Viet Nam. President Johnson's interpretation of the powers granted him in the Gulf of Tonkin Resolution have led many Members of Congress to view with suspicion, if not with alarm, any similar opportunities that might be available to a future Chief Executive.

Thus it would seem that the key to the President's success in negotiating new arrangements with Europe may lie at home in the Senate which shares very much to find a warranted policy, a real and genuine accommodation with the President, but which will not do so on terms that are inconsistent with its sense of its responsibilities to the Constitution and to the Nation.

BUSINESS AND THE STOCK MARKET

Prospects For The Petroleum Industry

By Babson's Reports Inc., Wellesley Hills, Mass., January 18, 1973 — Over recent months changes have taken place within the oil industry that will have far-reaching repercussions in future years. For one thing, no longer will oil companies operate abroad as sole proprietors, making royalty payments to their host countries on oil produced. The picture of supply and demand in oil and natural gas is also undergoing change, and it would appear that steps must be taken if an adequate supply of energy fuels is to be ensured for the years ahead. Exporters of Petroleum

The Organization of Petroleum Exporting Countries is a group of eleven nations producing substantial amounts of oil within their borders. Foreign firms are usually involved, with many major U.S. companies holding concessions, either singly or in consort. For many years, oil-rich countries were content to permit foreign operators to extract crude oil against payment of per-barrel royalties or taxes. But as material wealth transformed economies, particularly in the Mideast, the winds of nationalism brought a shift in attitude. Libya imposed strict terms relating to oil output, exploration, and even the personal lives of oil company personnel. The OPEC group began to stir restlessly, and about a year ago member countries began to demand permission to become part owners of internal oil operations.

Business Partners The Arab countries accounted for some 30% of Free World Petroleum output and were thus in a strong bargaining position. Negotiations were begun and continued for nine months before a settlement was reached in October 1972. The agreement was between five OPEC members and certain U.S. and foreign companies. Undoubtedly this first pact will set the tone for agreements with other member countries. Although not fully revealed, provision has been made for five Persian Gulf states to pay about \$1 billion to nine U.S. and foreign oil firms for 25% ownership of petroleum production. In ten years this will be increased to 51%. The effect on the companies involved could be many-faceted. As output of many declines, more will be made to buoy

Wider Scope For OPEC

There is also the possibility that the OPEC Arab nations could become active in other industry phases. Saudi Arabia has indicated that it would guarantee the U.S. enough oil to meet future demands in return for removal of import restrictions, with profits from this arrangement to be invested in the U.S. domestic oil industry. Another proposal would have OPEC refined products sold to independent U.S. marketers, bypassing the large international oil concerns. Supply And Demand

At home, there has been increasing uneasiness over the rising demand for energy fuels in the face of declining reserves. The huge demand stems from expanding industry, power generation, and an estimated 113 million motor-driven vehicles — nearly 50% more than were in use ten years ago. The big question of fuel reserves is the measure of time it would take to use

earnings from other sources, such as refining and marketing. Up known reserves at present consumption rates. A decade or two ago, natural gas reserves were rated adequate for twenty years; now the ratio is estimated at about eleven years. The crude oil of reserves to production has dipped from about twelve years to less than nine. This does not include Alaskan North Slope oil, which is unavailable until a pipeline is built. The answer to the short-fall in petroleum reserves is more exploration and production in this country, and/or removal of import allocations to permit entry of greater quantities of foreign oil. There is some concern over a possible East Coast fuel shortage this winter in the event of prolonged severe weather, and revision of oil import rules may be necessary to alleviate this situation.

Don't expect your wife to get into heaven just because she was so successful in keeping you out of jail.

Vacationers Advised To Reserve Space Now In Md. Parks

Those wishing to reserve the limited cabin facilities available at three Maryland State Parks this year should submit their applications to the Park Service of the Department of Natural Resources by January 22, it was announced.

Rental season for the 39 cabins at New Germany, Herrington Manor and Elk Neck State Parks will extend from the second Saturday in June through the third Saturday in September. They are available on a one-week occupancy basis.

Rates for the 1973 season will range from \$45.00 for a non-electric cabin for four at Elk Neck to \$110.00 for a fully equipped cabin accommodating six at New Germany and Herrington Manor. These rates represent an increase of from \$5.00 to \$10.00 over last year's rental fees, reflecting increased operating costs.

Prospective cabin renters are reminded that prompt remittance of a \$10.00 deposit after confirmation of their reservations is essential. Reservation applications should be addressed to the Park Service, Department of Natural Resources, Taves State Office Building, Annapolis, Maryland 21401.

Applications for reserved camp sites at five State Parks where such a system is in effect are now being received by the Park Superintendents at Assateague, Shad Landing, Elk Neck, Point Lookout, and Deep Creek Lake State Parks. Reservation season runs from Memorial Day weekend to the Labor Day weekend, and use of the reserved sites is limited to one week.

Addresses for the five State Parks offering reserved camp sites are: Assateague State Park, Rt. 2, box 246, Berlin, Md. 21811; Shad Landing State Park, Rt. 1, Snow Hill, Md. 21863; Elk Neck State Park, Rt. 2, North East, Md. 21901; Deep Creek Lake State Park, Rt. 2, Ewanton, Md. 21561; and Point Lookout State Park, Scotland, Md. 20687.

Opportunity seldom catches you dressed and waiting.

GOOD PSYCHOLOGY If a child consistently misbehaves in spite of punishment, increasing the punishment may not be the answer. Psychologists say that such misbehavior may be a bid for attention, and that some children would rather be spanked than ignored.

TASTE-TINGLING PUNCH After a day of skiing or skating, a tart, tangy, spicy hot cranberry punch is a taste treat that is sure to be the hit of the party. Home economists at the Corning Glass Works test kitchens suggest this non-alcoholic recipe for cranberry punch—ideal for holiday entertaining.

What Does "Totalled" Really Mean?

By Larry Schwartz The approaching car suddenly went out of control. There was nothing you could do to avoid the impending crash. It was a real "smash up", as they say.

Your insurance company unhesitatingly declared the automobile a total loss. Adjustors said it would cost entirely too much for repairs. Finally, the wreck was towed to the junkyard.

Is this the ignoble end of your blue beauty with shiny vinyl top, the one car you truly loved? No — not really.

Before the battered frame is lifted by crane and dumped unfeeling into hydraulic presses, a salvage team of mechanics will systematically strip the vehicle. Many basic components are thus saved for future use. Water pumps, fuel pumps, brake shoes, carburetor, clutch assembly, and the electrical parts, such as alternator, starter, generator, voltage regulator and distributor, can easily be remanufactured. And, surprisingly enough, remanufacturing of the components is performed in conformity with the original manufacturer's specifications.

Remanufactured automobile replacement parts are customarily recycled to large jobbers and warehouse distributors who in turn sell to the local garage and repair shop. Finally, these remanufactured parts once more resume the functions for which they were designed and first installed in new factory built cars.

Today, the remanufacturing of automotive parts is an industry that's growing larger every year, with present manufacturing revenues exceeding \$500 million.

It's the lining that wears out and needs to be replaced. Why throw away a good old shoe? Why not take advantage of the fact that it's a perfectly usable part? Save and conserve, in essence, is the whole premise of the remanufactured automobile parts industry.

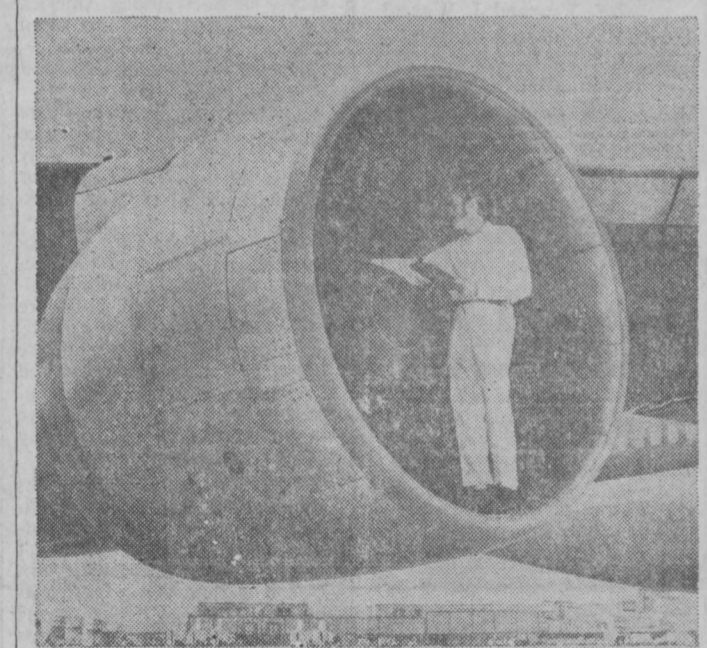

As the country's population rate continues to grow, so does the demand for automobiles. In 1971, total nationwide motor vehicle registration reached a whopping 110 million units. Based on these figures, the automobile replacement parts market might be considered huge. And, a sizable portion of this market is serviced with remanufactured, recycled parts.

Mr. Lloyd believes that the family auto becomes a candidate for replacement parts after its second year on the road. The average age of most automobiles on U.S. highways today is approximately five and one-half years. Cars grow older, parts wear out, hence the steady demand for both new and remanufactured replacements.

"In our business, we not only offer car owners less expensive, high quality replacement parts, we are also involved in the country's environmental clean-up campaign," Mr. Lloyd said. "It is our long-term aim to help eliminate those unsightly auto junkyards that continue to blot the landscape."

So, take a second look at the next car you see crawling down the street. It just might be operating on those recycled parts Safeguard salvaged from the blue beauty with the shiny vinyl top.

THE AIRPLANE AND THE ENVIRONMENT

(especially vexing to those who live near large airports) has also been reduced. The new engines have virtually eliminated the highly objectionable turbine whine by design changes in the front part of the engine. Also, the amount of noise is being curtailed by extensive soundproofing of both the engine and the housing into which it fits on the airplane.

Another innovation making the environment a cleaner, quieter place: the new wide-bodied planes. Because they can carry up to three times the passenger loads of first-generation jets, fewer take-offs and landings (therefore less smoke and noise) are necessary.

Although airplane emissions never amounted to more than one percent of the total air pollution in metropolitan areas, the formidable jets, with their telltale smoke and engine noise, were highly conspicuous culprits. Now, we'll have to look for other scapegoats! By the end of 1973, 13 percent of the nation's airline fleet will have new, advanced-technology jets that neither scream nor smoke.

NEW YORK, N.Y. (ED) — Despite the increasingly important role of commercial aviation in modern life, the wild, blue yonder is now becoming cleaner and quieter with every passing month. Grey skies may be less rainy, but they don't mean that a jet is polluting the sky.

Significant changes in engine design during the past fifteen years have resulted in a marked decrease in the smoke- and-noise producing capabilities of modern airplanes. According to the Air Transport Association, the engines power the newest commercial planes (Boeing 747, DC-10, L-1011) burn less air in the combustion chamber than earlier equipment. This improved combustion efficiency means less smoke... and also, there are less invisible emissions to pollute the air.

The noise pollution problem (important, because there are still many pre-1972 planes in the air). In total, 64 percent of the airline fleet of 1974 will be powered by environment-respecting engines — compared to less than one percent in 1969. The result of these industry efforts? The smoke plume and whine usually associated with jet engines will soon become as much of an anachronism as the Wright Brothers' first plane.

### OPEN LINE

By Congressman Goodloe Byron Maryland—Sixth District

The following questions were typical of the kind asked of me in recent weeks. Letters should be sent to me, c/o U. S. House of Representatives, Washington, D.C. 20515.

I read recently about some legislation that would allow Park Rangers to make on-the-spot arrests of individuals in our National Parks. What is it all about?

You are probably referring to legislation introduced in Congress which would allow members of the U. S. Park Police and National Park Service Rangers to make arrests without a warrant for any felony or misdemeanor committed in their presence in a National Park. The measure is pending before the Interior and Insular Affairs Committee, but no hearings have been scheduled at this time.

When will people under 65, who are now getting social security disability payments, be eligible for Medicare coverage?

Disabled persons who have been getting social security disability benefits for at least two years will be eligible for Medicare beginning in July.

I understand that astronaut Wally Schirra has been appointed to the National Parks Advisory Board. What does this Board do and how much will Schirra be paid?

The 11-member Advisory Board on National Parks, Historic Sites, Buildings and Monuments makes recommendations on programs and proposed additions to the National

al Park System and the National Registries of Natural, Historic and Environmental Education Landmarks. Members of the Board serve without compensation other than traveling expenses and a per diem allowance when engaged in the discharge of their duties. The Board meets three times annually, twice in Washington and once in a field area of the National Park System.

What is the Environmental Quality Corps? A bill was introduced in the House last year to establish an Environmental Quality Corps as an independent agency within the executive branch. Under the proposal, Corps volunteers (consisting of 18 to 26-year-olds) would "provide manpower for projects designed to better the environmental quality for all Americans". The bill, H.R. 11537, is currently pending before the Education & Labor Committee.

Last August my doctor said I could not work anymore and would have to sell my business. I applied for disability benefits but was turned down. Can you help?

Upon receipt of your letter my office contacted the Bureau of Disability Insurance. As you are now aware, based on additional evidence, your claim for social security disability benefits has been approved. Citizens experiencing similar difficulty in receiving government benefits justly due them may feel free to contact my office for assistance.

### AMERICA'S TOP-TEN VEGETABLES

After tomatoes, bush beans are the most widely grown garden vegetable. Topcrop, Tenderpod and Tendergreen are some popular varieties.

The top-ten home garden vegetables grown from seed, from a survey of sales among America's leading seedsmen are: 1—Tomatoes, 2—Beans, 3—Sweet Corn, 4—Cucumbers, 5—Peas, 6—Lettuce, 7—Radish, 8—Squash, 9—Melons, and 10—Beets. Peppers would be high on the list if we counted all those bought as plants from garden centers.

In tomatoes, gardeners are looking for disease resistance and extra firmness—especially among the hybrids. Good flavor is also high on the list of essentials.

Bush beans are very productive for the space that they occupy. Green beans outsell yellow wax beans, but both are extremely popular. Pole beans are more productive, and are considered to be better flavored than bush beans, but the majority of gardeners don't like the extra trouble of providing poles or wire for support.

In sweet corn everyone looks for sweet flavor first and earliness second. Yellow corn outsells white corn, but it didn't use to be that way. At the turn of the century, yellow corn was considered to be "horse corn" and only the white kind was eaten by humans—until along came Golden Bantam, which changed people's prejudice against yellow corn.

It doesn't take many cucumber plants to grow enough for summer salads, and although they tend to take up a lot of room in the garden, many gardeners are growing them up trellis as a means of saving space.

Among pea varieties sweet flavor and earliness again rank high when gardeners choose varieties to grow, but the dwarf varieties that don't need supports are in biggest demand.

Leaf lettuce outsells head lettuce because it's easier and

Knights Squeak By Younger Squires 60-59 In Annual Game ● St. Joseph's High

The Knights of Columbus, Brute Council 1860, squeaked by the Columbian Squires, Guy A. Baker, Sr., Circle 2290, by a score of 60-59 in the first annual Knights-Squires game held on Jan. 7. It was a most exciting and close game up to the very end. Over 50 people came to see these two organizations play.

The Knights were lead today against the taller Knights. The Squires would like to thank all who attended and/or helped in any way, especially St. Joseph's High School for the use of the gym, and also Mrs. William Topper, Mrs. George Danner, Miss Sharon Danner and Doug Hollinger.

Members of the Columbian Squires team are shown, front row, left to right: Curtis Ray, Rev. Joseph Sannino, Father Prior, Mike Lupinski, Mike Rosensteel, Rick Rosensteel, Bruce Hollinger and Steve Hollinger. Back row, left to right: Kevin Topper, Tom Keilholtz, Tim Keepers, Nevin Topper, Jeff Keilholtz, Pat Dillon, John Sanders, and Butch Myers, Athletic Counsellor.

Beginners, Lynn Phelan '75, Susan Walter '76, and Colleen Devlin '75, pick up bridge pointers from Mrs. John Devlin.

(Continued From Page One) Charity from Ecuador who studied fine arts at the Colegio San Carlos in Quito.

Again, girls only are signed up for the "Powder Puff Shop," a mini-course being taught by Dr. Robert Marshall, Professor of Classical Languages and Linguistics at Mount Saint Mary's.

Boys only elected the course in criminology taught by Mr. Donald Tierney from Blue Ridge Summit. Mr. Tierney, a retired Criminal Investigator, is the father of Kevin '74, and Daniel '73.

Community relationship and a sense of interdependence that is part of the overall objective of the two-week program at Saint Joseph's High is demonstrated by the twenty-eight students who elected the Child Care course offered by Sister Grace Calvisi, Program Director at Seton Center.

Other mini-courses such as Black History taught by Mr. Robert Custer, German with Mrs. Ann Fuscick as instructor, Spanish with Mrs. Viktor Antolin, Alaskan tour under the guidance of Mrs. Alma Jones and interior decorating presented by Sister Madeline Wheeler, Associate Professor of Home Economics at Saint Joseph College, are deepening the interests and broadening the challenge for future studies among the Saint Joseph's High students.

Don't take chances in traffic—be cautious and stay alive. Good resolutions often strike a man when he's down and out.

Town Library Features New Selection Of Childrens' Books

Every so often we get a new group of children's books that appeal to the kindergarten set and upwards, some of them even appeal to parents who usually have to read them. "More Potatoes!", by Millicent E. Selsam, is a Science I Can Read book. Millicent Selsam's fact-finded story tells how Sue and her friends set out on a scientific investigation to find out how potatoes get from the farm to the warehouse to the store to their dinner tables.

Starting with a breakfast menu, Brendan Lewis and Mark Maas hope to prepare dinner with Sister Mary Frances' help.

Presents Talk On Cattle Breeding

The Tom's Creek Dairy 4-H Club held its first meeting of the new year on January 8, at the Gregg residence at Motter's Station.

The new president, Charles Kaas, called the meeting to order, which was followed by the pledges to the flags. George Kaas led the pledge to the American flag and Alan Bassler to the 4-H flag.

The name of a sire was given for roll call by sixteen members. Also present were the two leaders.

The president was presented a gavel by the leaders and then the new officers were installed. The chairmen for various committees were named as follows: banquet, Cathy Wivell and George Kaas; Christmas Party, Naomi Weimer; Fair, Stanley Gregg; Fund Raising, Cathy Wivell, Bobby Wivell and Phil Wivell; Posters, Dairy Month, National 4-H Week, Naomi Weimer and Mike Weimer; and Program, Ronnie Kling.

A feed chart was presented to each member to use as references for their record books. Other materials were also available. It was announced that the County Council is having a ski trip for senior members on January 25 at Ski Roundtop.

A talk on Artificial Breeding was given by Stanley R. Gregg. We learned that selecting of a sire is valuable in strengthening one's herd management.

The highlight of the evening was a demonstration talk given by Mr. James R. Hill on Artificial Insemination. This was very interesting and informative, because Mr. Hill had with him the equipment used in the breeding of cattle. With drawings of animals, Mr. Hill informed the group of the procedures used in insemination.

After the meeting adjourned, the Fair chairman, Stanley Gregg, called a brief meeting, electing a member from each family to serve on this committee.

Everyone enjoyed refreshments served by the hostess for the evening, Mrs. Gregg.

THE WORD is AFFIRMATION By Ralph Rhea

To find contentment in the heart and a sense of fulfillment in the mind, we must learn to affirm life and the goodness of living. Not by hating others, but by loving them, not by despairing, but by hoping do we find the strength and courage to give to life and receive from life. It is not the final goal that is so important but, rather, the journey. There will always be something to tempt you to deny the worthwhileness of life, but affirmation is much more powerful than denial. For a free copy of "The Word" series for this month write: Unity Newspaper, Unity Village, Missouri 64063.
