Most Anything At A Glance - By Abigail -

Wouldn't East and West Main Street look nice with trees lining the streets? When I drive through other small towns, it's always the trees that seem to create the atmosphere and the personality of the towns. I always feel that people who want to live with lots of trees, are the people I would like to live with.

Now I know these are fighting words to the Water Commissioner and the Streets Commissioner, as tree roots tend to disrupt sewerage lines and create havoc with sidewalks, but I still feel there may be a way around it.

From what I've been able to gather, there are trees that do not root deep and will not become entangled in sewerage lines, and if they are placed in dirt plots like those in front of Dr. Cadle's office, do not play havoc with sidewalks.

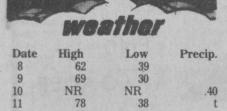

As well as cutting down on noise, trees also clean the air. In the fall, nothing makes better mulch than cut up tree leaves, and it's free mulch at that. They keep your homes cool in the summertime and are very easy

I look at the pictures of days gone by and wonder what happened to all our trees. Can you think of anything better for our town than trees? The flowers placed around the square certainly improve things. Wouldn't trees look good too?

The back of the Hotel certainly has improved recently. The fence created a obstruction on that corner. Now it's nice that we can see traffic coming from both directions.

I noticed visitors to St. Joseph's couldn't find a place to eat in Emmitsburg over this past weekend. No place in town is able to accommodate a crowd. I sure wish we had a restaurant that could accommodate buses and then maybe we could cash in on the tourist trade.

Every first Monday of the month, a Town meeting is held in the town office. I notice the same people there, month after month, yet I constantly hear comments about the subject matter discussed, from citizens all over town. The Burgess and commissioners are here to serve us, and they can't do that unless they know how we citizens feel about things. What happens in that meeting affects all of us. Let's all turn out for these meetings, and let the town Fathers know we're behind them 100%. And while I'm on the subject, the Planning and Zoning Commission meet in the town office every third Wednesday of the month. Anything that happens there has a bearing on all of so Let's make those meetings, Huh? After all, it is OUR town.

VHC Fund Drive Report

Chairman Larry Little of the Vigilant Hose Co.'s 1976 Fund Drive announces that donations are still being received. The Firemen request that our people send their donations to us as soon as possible as plans are being made to publish rural route solicitors. Aslo, a date will soon be set for our door to door canvass of the town. This information will be published at a later date.

The firemen wish to thank you for our out of town people and the local property owners for their very generous donations. Keep up the good work. If you haven't mailed your doantion yet, please consider as soon as possible. Above all, please be

Plan Community Day Celebrations

be celebrated July 3rd and 4th, this Bicentennial year, with the Emmitsburg Historical Society in charge of Saturday's events and the Social Ministry Committee of the Emmitsburg Council of Churches in charge of the events on Sunday.

Highlighting Saturday's events will be a walking tour of Emmitsburg, starting with a slide presentation of some of the older buildings of Emmitsburg to be shown in the former Senior Citizens' building on Center Square at 10:00 A.M. A guide, giving historical facts about these buildings, may be gotten at the same place, and each person may go at his own pace on a tour through the town, with inside tours of some of the homes. (Persons having information about their buildings, which could be used in this guide, should contact Mrs. Chata Carr).

The churches of Emmitsburg are also requested to have their doors open, with old artifacts on display, and hosts available to show the guests around and answer questions.

It is hoped that the people of Emmitsburg will bring out any old pictures of buildings, streets, etc. of "way back when", and have them on display in their windows, on their porches or in their yards, and be dressed in clothing of "by-gone days" or the Bicentennial clothes they may have used for the Town's Bicentennial Celebration, for this week-end.

Church groups and non-profit organizations within the Emmitsburg

Emmitsburg Community Days will community are invited to set up stands and/or tables, displaying their wares. Especially welcome will be tables displaying "items of yesteryear", no longer found in the modern homes. People or organizations desiring a location for this should contact Mrs. Chata Carr, (447-2782) for further information.

An All-star Little League Ball game will be played at 3:00 P.M., and a Band concert is scheduled for 6:30 P.M. in Center Square. Anyone wishing to play in this band - contact Rev. W. Ronald Fearer.

Saturday's events will close with a Bicentennial Ball, sponsored by the Frederick County Landmarks Foundation. The Ball will be held at forty different sites in Frederick County. with the Emmitsburg site being Mount Saint Mary's College from 9:00 P.M. until 1:00 A.M. Tickets for the Ball will go on sale this weekend at Myer's Radio and T.V., E. Main Street, Emmitsburg, or may be gotten from Mrs. Norman J. Shriver, Sr., ticket chairman. The price of the tickets are \$3.50 for all advance sales. or \$5.00 at the door the night of the Ball. One ticket will admit the holder to any or all of the forty different

Sunday's events will begin with the Church services Sunday morning. There will be an All-Star Soft Ball game at 4:00 P.M. and a parade is scheduled for 6:30.

The weekend will close with an Ecumenical Worship Service at the Community Park at 7:00 P.M.

Commander-in-Chief Thomas C. Walker, of the Veterans of Foreign Wars of the United States has announced that V.F.W. Post 6658, of Emmitsburg, Md., has won two Awards of Honor given by the organization for community service.

Walker praised the Post and its Ladies Auxiliary on winning the two awards and gold plaques. "Local V.F.W. members can be proud of this unique accomplishment. Through their activities they clearly de-monstrate the V.F.W.'s concern of helping others."

The Post received one Award of Honor for its support of construction of a community swimming pool and the other for sponsorship of an ambulance service for use by local

To assure the building of the pool, Wastler, Mrs. Charles the Post donated \$40,000 to meet the city's commitment. The State of

Maryland provided the remaining funds.

The National Board of Judges said, 'The local V.F.W. members saw the need for the recreational facility and were able to provide the funds required to assure its construction. Much good-will and recognition was denerated through this project.

The other winner for the Post and its Ladies Auxiliary involved the organization and running of a community ambulance service. Started in 1947, the Post has purchased four am-bulances which are manned by V.F.W. members. The judges were impressed, "By

the magnitude of this project. Many manhours were spent not only in answering the thousands of calls for service but also in the training required in members to become part of the crews manning the ambulances. The local V.F.W. can be proud of this very worthy program.

Crapster To Address Historical Society

The noted Historian, Dr. Basil Crapster will speak on the Emmitsburg Militia of the Revolutionary War period and the history of the Emmitsburg area, at the Emmitsburg Historical Society monthly meeting, scheduled for Thursday, May 27th at 7:30 p.m. in the Emmitsburg Community Center.

Those interested in hearing this enlightening talk are cordially in-

Dr. Crapster is Professor of History and Chairman of the History Department at Gettysburg College. He was born in Taneytown, Md., and received his A.B. at Princeton University, his M.A. and Ph.D. in History at Harvard University and is presently researching the early history of the Tanevtown area, the valleys of Pipe Creek and Upper Monocacy.

troduced his long expected measure on Medicare and Medicaid reform. In his introductory remarks to the Senate, Talmadge said, "It is time in fact...that fact is exactly what this bill seeks to avoid." Talmadge's proposal (S.3205),

which is co-sponsored by 10 Senators, is intended to cope with the rising cost of Medicare and Medicaid. It calls for significant reforms in administration, reimbursement of hospitals and physicians and includes provisions intended to prevent fraud, abuse and excessive payments. The measure is very complex and has major implications for hospitals. In

summary, the legislation: 1) Creates a separate unit in HEW

On March 25, Senator Talmadge in- known as Health Care Financing Administration which would be under the direction of an assistant secretary. This new administration would have responsibility for the Bureau of Health Insurance (Medicare), the Bureau of Quality Assurance (PSROs), the Medical Services Administration (Medicaid).

> 2) Mandates a uniform system for the allocation of costs and for the determination of operating and capital costs. Under this sytem, hospitals would be classified as to bed size. type of hospital (teaching, geriatric, short-term general, etc.) and other criteria as the Secretary deems ap-

3) Initiates a performance-based reimbursement system for routine

Talmadge Introduces Health Bill hospital costs. If a hospital's costs are equal to or exceed the allowance for its particular category, payment would equal actual per diem up to 120 per cent of the costs. Costs exceeding this limit would not be covered. Hospitals with costs below the categorical average would be paid actual costs plus one-half the difference between actual costs and the average for their category. The changeover would be phased in over a three year period beginning July 1, 1979.

4) Provides for an experimental project under which a small number of short-term, not-for-profit hospitals would be reimbursed for capital and increased operating costs incurred in the elimination or conversion of underutilized beds.

Man Charged With Assault

A Thurmont man has been charged with assault with intent to rape a young Emmitsburg woman 1 a.m. the morning of May 10.

The man, Daniel C. Misner, 24, of Rt. 1 of Thurmont, is being held in Frederick County Jail in lieu of \$5,000

Investigation by Emmitsburg Police Officer James Fuss and Tfc. Carl R.

Valentine revealed that Misner allegedly assaulted the young woman in front of the Farmers and Mechanics Bank on the square, after trying to get her into a car parked in front of

Further information as well as the identity of the woman were not released by police.

Limited Help For Elderly On Rents

The efforts of the Maryland Office on Aging to alleviate the problem of increased rents at housing projects for the elderly have resulted in a somewhat limited nationwide Department of Housing and Urban Development program of assistance.

The new program will broaden the present federal Section 8 Housing Assistance program, which provides rent subsidies in eligible housing projects to people whose incomes are below a certain level. These people pay a maximum of 25% of their incomes for rent, with a Section 8 subsidy making up the difference.

Until now, Section 8 subsidies have been available to only 20% of the tenants in existing elderly housing projects with HUD-insured or HUD-held mortgages, even though up to 80% of the tenants may have qualified. The new program will make subsidies available to all qualified tenants in these projects, including residents of moderate-income housing, thereby increasing the number of elderly people who will be able to get help with higher rents.

HUD Area Offices are now in the process of inviting housing owners who meet certain selection criteria to submit applications for Section 8 Assistance, and will evaluate the applications on a case-by-case basis. The Maryland Office on Aging feels that the selection criteria need clarification, and has requested a meeting with the directors of the HUD Area Offices in Baltimore and Washington, D.C.

Another important limitation on the effectiveness of the new program is that the contract authority for Section 8 through September 30, 1976, has been allocated for only a limited number of units nationwide. If this limit is reached, HUD will not be able to accept any more applications until new funds become available.

The problem of increased rents for the elderly was first brought to the attention of the Office on Aging in September 1975 by the administrators of several HUD-financed or insured housing projects, who had discovered that some of their elderly tenants were skimping on health and nutrition needs in order to meet rising rent payments caused by abnormal increases in the cost of utilities. Rather than pass on more increases to their tenants, the owners tapped their repair and replacement funds; but with these depleted, they faced the choice of raising rents further or defaulting on their HUD mortgages.

Dr. Matthew L. Tayback, State Director on Aging, asked Senator Charles McC. Mathias to convene a meeting of the Maryland Congressional delegation and HUD officials, at which the HUD representatives agreed that the problem was nationwide in scope and severe enough to receive immediate atten-

Independent Colleges Get Relief

Independent colleges got financial relief when Governor Mandel signed an education bill introduced by Delegate Bert Booth, 11th District, Baltimore County.

Delegate Booth's bill would allow independent colleges which are eligible for state aid, to purchase supplies and equipment through the state Department of General Services.

"This aid," said Delegate Booth, "will substantially lower the cost of supplies without adding to the tax-

With financial burdens skyrocketing the very existence of the independent college, an important institution for providing innovated approaches to education as well as fulfilling special needs for its students, is threatened. Tuition barely covers expenses; many have been forced to close. Being able to purchase supplies through an existing state structure will help to ameliorate some of the college overhead and will be

of no additional cost to the state.

"Independent schools are essential for a well rounded educational system in a democratic society," asserted Delegate Booth. "We need to encourage them through our public policies, but we also need to allow them indepedence in their administration and curriculum. Sharing savings that the state realizes through bulk purchasing responds to both needs.'

U.S.: The World's Worst Record?

worst fire-loss record in the world. Our annual toll: about 12,000 deaths; some 300,000 serious burn injuries; approximately three-billion dollars in property damage.

Yet, our fire protection is better than ever - and improving.

Why the paradox?

"It's our environment that's becoming more flammable," explains physicist Howard Emmons of Harvard University. "We have a high living standard, with an array of appliances, materials, and conveniences that are, collectively, potential fire sources.

This constantly increasing environmental flammability is in lockstep with our improving fire protection. Result: a steady fireloss record of tragic proportions.

Dr. Emmons holds that long-range fire prevention measures should start with consideration of entire systems — a building or room, for example - not individual items. One highly flammable item in an office might be perfectly safe if other materials had a low flammability rating. Yet, several items of low flammability in close proximity could well be highly dangerous. 'Every Boy Scout knows

that one log won't catch fire by itself. You have to have two, preferably more, to start a campfire. You have to create a flammable system. Unfortunately, that's what we often do to buildings," Emmons states.

The control of environmental flammability logically lies with building codes. Yet, laments Dr. Emmons, few adequate tests exist that ascertain the materials which, safe themselves, become hazardous when assembled with other materials. "Flammability is a quality duced.

The United States has the of an entire room or building, not single materials, Dr. Emmons states. "Ultimately, building codes will have to be rewritten to rate rooms and buildings as a whole, as an entire

system.' Dr. Emmons presented his views at the Spring meeting of The American Physical Society in Washington, D.C. in a paper titled "The Physics of Fire." His research points to several practical suggestions that would almost certainly save lives. For example, over-window transoms that automatically open during a fire would allow superheated gases to escape and retard the blaze's spread. Such transoms, Emmons expects, would add precious minutes for escape and arrival of firefighters.

Another suggestion is to add moisture-absorbing chemicals to wallboard and other construction materials, thus increasing their heat capacity. With increased heat capacity ability to absorb heat without a large rise in temperature - materials burn more reluctantly, much as a newly cut tree needs more coaxing to ignite than a seasoned log.

Fire retardants added to drapes and other materials would also reduce a system's flammability, cutting chances of ignition while enhancing fire retardation if a blaze does oc-

Among Dr. Emmons' pleas is that more sophisticated methods for testing fire-safe materials be devised and that further research be conducted about what constitutes a fire-safe and fire-retardant environment. Such continued research, he believes, is a vital necessity if this country's terrible fire-loss record is to be re-

Do vou really feel that citizens want the government to forego new programs to cut back on federal spending?

Yes, I do. Based on letters, phone calls and faceto-face meetings in Central and Western Maryland, I sense a heightened feeling Congress must reduce federal spending and seek to balance its budget. In fact, a solid majority of Sixth District citizens have voiced this very viewpoint on every questionnaire sent them over the past five years. In short, I believe families want Congress to stop voting for expensive programs and to

Delegate Booth Will Chair Study Group

Delegate Bert Booth has been elected to chair the Legislative Study Group, a bipartisan organization composed of members of Maryland House of Delegates. In late 1974 a group of newly elected delegates seeking a better understanding of issues, banded together and formed the Legislative Study Group. By means of forum, issue reports, and discussion these delegates better prepared themselves to form rational decisions on vital issues. This year the forum dealt with

Maryland tax structure and its comparison with that of other states. Members found to their surprise that Maryland's balance of taxes is probably the best in the country. Issue reports this year covered medical malpractice, mass transit, visible pricing, and executive budget. The Legislative Study Group membership has steadily grown to include approxmately one-third of the delegates.

At the conclusion of the session elections were held for next year's officers,

who were installed on May 1, 1976. Chairperson, Del. Bert Booth (R), 11 Dist., Baltimore Co.; 1st vice chairman, Del. Steven V. Sklar (D) 42nd Dist, Baltimore City; 2nd vice-chairperson, Del. Nancy J. Kopp (D) 16th Dist, Montgomery Co.; secretary, Del. Thomas D. Cuminskey (D) 1st Dist. Allegheny Co.; treasurer, Henry Hergenroeder, Jr., (D) 43rd Baltimore City. Dist Board members are Del Gerard F. Devlin, (D) 24th Dist., Prince Georges Co., Del. Howard J. Needle (D) 12th Dist., Baltimore Co., and Del. Catherine I. Riley (D) 6th Dist, Harford Co. Before the end of May the Legislative Study Group will meet to decide next year's thrust.

"For our members the Legislative Study Group offers an opportunity to share information and expertise in an informal setting," explains Delegate Booth. 'Sharing experiences enables us to identify common problems and to make recommendations to the leadership which will benefit the entire General Assembly. During the next continues Del. Booth, "we will continue issue studies, continue efforts to improve legislative procedures, and study how legislators can best utilize their staff. This is the first time that rank and file members of the Legislative House have joined together to solve their own problems.

Marks 2nd Anniv. Maryland's Motor Fuel Testing Laboratory is marking its second formal anniversary in its Jessup, Maryland facility, and is offering expanded services to various state and federal agencies, including Maryland's own 're-venooers'. The Laboratory is staffed by chemists and technicians of the State Comptroller's Gasoline Tax Division. Maryland State Comptroller Louis L. Golds-

tein notes that the facility has tested more than 836,128,439 gallons of gasoline since its dedication May 16, 1974, and has uncovered more than 52,317,490 gallons of gasoline that did not meet various state or federal quality standards. "We are keeping this gasoline from the marketplace by stopping the sale of the product until the problems are corrected. The Lab is our early warning system for the protection of con-Mr. Goldstein sumers,

In addition to gasoline, the Laboratory performs quality tests on diesel fuel, home heating oil, and kerosene. During the past year, the Alcohol Tax Enforcement Unit of the State Comptroller's Office has also made use of the facility. The Alochol Tax Agents are taking advantage of the chemical "fingerprinting"

technique used to de- also provided essential termine the true composition of gasoline, especially the presence or absence of advertised additives. Liquors also have unique chemical "fingerprints, enabling the agents to determine if expensive liquor bottles have been refilled with cheaper brands.

Md's Fuel Testing Lab

The chemical fingerprint analysis was used in a Dorchester County, Maryland case soon after the Laboratory opened and provided important evidence in convicting an alleged gasoline thief.

The Laboratory analysis also played a significant role in preventing an alleged unleaded synthetic gasoline from being marketed in Maryland. The fuel, which was touted as a combination of water and a "secret ingredient," was tested, found to have a high lead content, and not approved for sale in Maryland

Recently, the highly adversised "Powertron Gas Saver Pills" were analyzed and found to be approximately 33 percent lead. Because Maryland law prohibits injecting lead into gasoline after it is sold. Comptroller Goldstein requested the known retailers to remove the pills from their shelves. The stores complied with his request, preventing possible damage

to automotive engines. Laboratory analysis has

evidence in cases involving rebranding of gasoline. brand "X" where a gasoline is found in the storage tanks of a brand Y" retailer.

'The Laboratory is also a part of our investigation of consumer complaints,' Mr. Goldstein said. "During the last 9 months, we have investigated 122 of these complaints concerning fuel quality.'

Comptroller Goldstein also called attention to the participation of his office in compact with the Environmental Protection Agency of the federal government. "During the past 9 months, our motor fuel inspectors have uncovered 830 violations of the federal regulations concerning lead in gasoline, proper nozzles for unleaded pumps and appropriate labels for unleaded gasoline pumps. In addition, our Laboratory notifies the Environmental Protection Agency of fuel samples found to contain illegal amounts of lead."

The Laboratory has hosted visiting chemists and technicians from government and industry who have come to Maryland to observe and compliment the facility. Currently, representatives of the State Tax Commission of New Jersey are making close inspection of the Laboratory and the Maryland Motor Fuel Inspection Program.

Mount Saint Mary's News

Mount Saint Mary's College will be a Test Center for the Law School Admission Test to be held on the Emmitsburg, Md., campus on October 9, 1976, February 6, 1977 and April 16, 1977, according to Scheerer, Michael Director of Counseling Services at the college.

The Law School Admission Test, required of candidates for admission to most American Law schools will also be given at other centers in the United States, Puerto Rico. Canada, and the Canal Zone on October 9, 1976, December 4, 1976, February 5, 1977, April 16, 1977 and July 23, 1977. The tests are also offered at other foreign test centers on the December and April

The test is administered by the Educational Testing Service under the policy direction of the Law School Admission Council, an organization consisting of one representative from each of the 163 law schools accredited by either the American Bar Association or the Association of American Law Schools. The test was taken last year by over 130,000 candidates, whose scores were sent to over 200 law schools.

Candidates are advised to make separate application to each law school of their choice and to ascertain from each whether it requires the Law School Admission Test. Since many law schools select their freshman classes in the spring preceding entrance, candidates for admission to next year's classes are advised to take either the October or the December Test. Candidates for admission to law school in 1978 may wish to take the April or July 1977 test.

The half-day objective test is given in the morning. It is designed to measure certain mental abilities deemed important in the study of law, and thus aid law schools in assessing the academic promise of their applicants. The Law School Admission Bulletin, which includes sample questions, registration information, a list of centers, and a

be obtained by candidates in the United States at least six weeks in advance of the desired testing date. The Registration form and fees must be postmarked thirty days before the test date to avoid an additional late registration and to guarantee being tested. Late registration closes on the postmark 23 days before the desired testing date. (Candidates in foreign countries must observe earlier deadlines.)

Registration materials and information on the Law School Admission Test may be obtained after August 1, 1976 from The Office of Counseling Services, Mount Saint Mary's College, Emmitsburg, Maryland, 21727.

Dr. Charles E. Robinson, a 1962 summa cum laude graduate of Mount Saint Mary's College, Emmitsburg, Md., and Associate Professor of English at The University of Delaware, will have two books published during May by the Johns Hopkins University Press in Baltimore.

Dr. Robinson is the editor "Mary Shelley: Collected Tales and Stories" and the author of "Shelley and Byron: The Snake and Eagle Wreathed in Fight".

"Mary Shelley" is a new, corrected, annotated and complete edition of her stories, the first such collection to be published in almost 80 years. Original engravings that accompanied the stories when they first appeared are reproduced in this edition.

Chiefly remembered as the author of "Frankenstein" and as the wife of English poet Percy Bysshe Shelley, Mrs. Shelley wrote many tales which were published in "The Keepsake," the most enduring and popular of the 19thcentury annual gift books. Other authors published in "The Keepsake" included Wordsworth, Coleridge, Byron, Dickens and Ten-

Mixing elements of the Gothic and the Romantic, Mrs. Shelley's stories involve pirates, smugglers, damsels in distress, villains and knights, and mark a high point in the Gothic storytelling art.

Plot summaries of some of the stories demonstrates her imagination: to avoid being shot, a girl changes clothes with her sister, a nun, and inherits a lifetime of seclusion behind convent walls; so that she may dream of the future, a heroine dares to sleep on St. Catherine's couch, a narrow rock ledge hanging over a raging river; and a man's aging process is suspended by alchemy, and he encounters not immortal bliss but the torments of living with a wife who ages into a jealous old woman

while he remains young and handsome. Mrs. Shelley's stories reveal the new sensibility of her age, the overflowing emotion, the enthrallment with legend and romance and the sense of wonder before the supreme works

of nature. In his introduction and notes, Dr. Robinson provides a critical appreciation and elucidation of the

In "Shelley and Byron" Dr. Robinson examines the friendship between Percy Bysshe Shelley and poet George Gordon Byron. Their relationship is wellknown literay history, but the effects of the friendship on their work has never before been fully analyzed. He traces the effects of their association in chronological sequence from the date of their first meeting in May 1816 until

Dr. Robinson looks at the poets' changing responses to each other's ideas and recreates the metaphysical and poetical debate between Shelley, portrayed as the positive "snake" and Byron, as the Fatalistic "eagle". He analyzes the effects of their literary and personal friendship on their works.

Shelley's death in 1822.

From his comparative analysis and textual criticism, Dr. Robinson is able to redate some of Shelley's poems, correct errors in the arrangements of Byron's essays, provide new texts for Shelley's and Byron's poetry and offer fresh interpretations of many of their major works. He shows how the ultimately negative influences

between the two eventually

led Byron and Shelley to use their major writings to debate their philosophical

Dr. Robinson joined the University of Delaware in 1965 as an instructor in English. He was appointed assistant professor in 1967 and associate professor in

A native of Farmington, W.Va., he received his doctorate from Temple

A guest professor at Padagogische Hochschule in Essen, West Germany in 1972, Dr. Robinson received a grant-in-aid the same year from the American Council of Learned Societies to study Percy Bysshe Shelley's manuscripts at Bodleian Library at Oxford, England.

He is a member of the Keats-Shelley Association of America, the Byron Society, Anglo-American Associates and the Modern Language Association

Listed in the International Scholars Directory and the Directory of American Scholars, Robinson has written several articles for professional journals.

Junior Class elections were held Monday, May 3, at the Cogan Union Building on the campus of Mount Saint Mary's College. Results were posted at 7 p.m. that evening with the nomination of Gary L. Brant as president, and Maureen E. Fahy, vice president.

Gary is the son of Mr. and Mrs. Albert E. Brant, 713 St. Mary's Ave., Cumberland, Md. He is a member of the Ring Committee and was vice president of his class for one semester in his Sophomore year. He is a graduate of Bishop Walsh High School, in Cumberland.

Maureen, the daughter of Mr. and Mrs. Francis M. Fahy, 51 Harwood Rd., Waterbury, Conn., was a first semester Dean's List student. She is a member of the Ring Committee and ty Y.M.C.A.

of the Pep Club on campus. She is a graduate of Waterbury Catholic High School, Waterbury, Conn.

The twentieth annual Mount Saint Mary's Parents Guild Luncheon was held in the Cogan Union on Wednesday, May 12, with representatives from the Baltimore, Washington, and Pen-Mar Chapters in attendance.

As a special feature of this year's luncheon, the Mount Saint Mary's Glee Club under the direction of Rev. Dr. David W. Shaum entertained with a lively rendition of spring music. The musical program included arrangements from the repertoire with which the young men and women have entertained audiences throughout the East and Southeast this season.

Dr. John J. Dillon, Jr. college president, spoke briefly to the luncheon ensemble about the future of private higher education and the importance of the role of parents if such education is to continue as an alternate to the public sector

Chapter officers and those ladies in attendance were presented with floral gifts and in turn each group presented the President with an unrestricted cash gift.

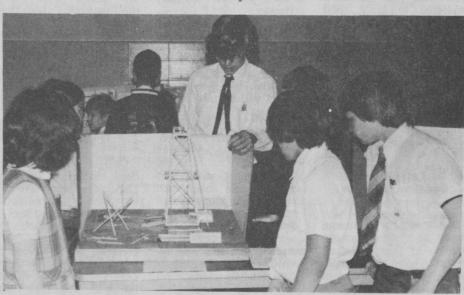

The Baltimore Chapter, was the original chapter founded in October, 1955, is headed by Mrs. Arlene Herb, 16 Thornhill Rd., Lutherville, Md. whose son, Robert is a member of the class of 1978 and a member of the Mount LaCrosse team. Mrs. Herb's elder son, Paul, class of 1968, is president of the Baltimore Alumni Chapter.

The Washington Chapter is headed by Mrs. Rita Bilz, 12010 Hitching Post Lane, Rockville, Md. Her daughter Jackie is a senior at the Mount; member of Sock and Buskin drama society; a dean's list honor student and is completing her Social Welfare Practical at the Frederick Coun-

The general public can see the United States Space Program in action right here in Maryland with the May 18, 1976 opening of a new Visitors Center at NASA's Goddard Space Flight Center, Greenbelt, Maryland.

A self-guided tour will take visitors past the control hubs of NASA's global tracking and communications networks which serve as an electronic lifeline for manned and unmanned spacecraft alike. Here, voices in Australian, Cockney English, and Spanish accents permeate the air as controllers busy themselves with the task of keeping ground stations operational around the world.

Visitors will see huge computer complexes which literally hum as they automatically process and distribute masses of information flowing into Goddard from dozens of earth satellites, space probes, and instruments on the Moon.

Inside the Visitors Center, an operating space weather station will record "live" satellite photos for

will show the current weather systems over the Washington-Baltimore area, other parts of the U.S., and areas of South America. All of the weather photos will be radioed to Goddard from research or operational meteorological satellites developed by Goddard people.

For several hours a day, a communications research satellite, the Applications Satellite-3 Technology (ATS-3), will be available for public use. Visitors can relay their own voices some 45,000 miles roundtrip through the satellite which is positioned 22,000 miles overhead in a stationary orbit. The ATS-3 is but one of a number of communications research satellites developed at Goddard.

In another unique exhibit, a brush recorder will display information radioed from an instrument deposited on the lunar surface by American astronauts. After travelling a quarter of a million miles from the Moon, this information is received by a NASA ground station and instantly relayed to Goddard over the global tracking and data

world problems. The Goddard Space Flight Center is in the background behind the 96-foot tall Delta Rocket, NASA's workhorse launch vehicle which has a

It's Time to Plant Warm Season Crops

The average last-frost date of the season has now passed for most of Maryland. So the "alclear" signal is flying for home gardeners to get their warm-season vegetable crops planted.

Included in the warmseason category are lima and snap beans, cantaloupes (or muskmelons), cucumbers, okra, pumpkins, squash, sweet corn, eggplant, peppers, sweet potatoes and tomatoes.

Transplants are advisable with the latter four crop categories. And you should try to be selective when shopping for them, advises Dr. Charles A. McClurg, Extension vegetables specialist at the University Maryland in College Park.

In the case of tomatoes, choose plants that are 8 to 10 inches tall and dark green in color, with a thick stem and no yellow leaves. The plants should be free of both disease and insects.

If the plants are growing in small plastic or peat pots, pick off any fruit that may have formed. Those few tomatoes will sap a plant's energy supply, thus

causing normal plant after transplanting. growth and total yield to suffer. Nearly mature plants in

large patio-type containers are sometimes seen in supermarkets and garden centers. Occasionally, they have already formed fruit. In this case, the fruit need not be removed, since transplanting is not necessary.

When transplanting tomatoes, choose a cloudy day — or do the job in late afternoon or early evening so that those tender plants have time to adjust before getting hit by a daylong dose of bright sunshine.

If your tomatoes came in peat pots, break off the top edges of the pot before sinking pot and plant into the soil. And, if there are no roots protruding, break off the bottom of the pot as well.

Dr. McClurg also advises digging holes deeper than the height of the pots, so that the tomato plants will be farther into soil in the garden than when they were growing in pots in a greenhouse or garden center. Each plant should

A weak starter solution

of soluble fertilizer, high in phosphorus, can help to get transplants off to a good start. Use it according to directions on the label.

The three major tomato varieties recommended by the Cooperative Extension Service at the University of Maryland for home gardeners are Jet Star, Supersonic and Better Boy.

Regardless of the variety selected, Dr. McClurg warns gardeners to plant only those that are wiltresistant. Wilt is one of the major diseases affecting tomatoes in Maryland, he pointed out. If there is any question whether the plants you select are wiltresistant, be sure to ask before you buy.

In the general area of planting vegetable seeds, the Maryland Extension specialist reminds everyone to follow directions on the seed packet or recommendations in gardening books for correct planting depths and row spacings.

Most seed packets contain fewer seeds for the same price as a year ago. so it's not smart to be

Maryland Crop Reporting Service, a USDA agency cooperating with the Maryland Department of Agriculture. In Maryland some 1,500

farmers and farm operators are scheduled for interviews by a team of 28 men and women who will visit on the farm to gather the information

"The goal of the survey," Y.D. Hance, Secretary of Maryland Department of Agriculture, said, "is to provide farmers with current reliable and impartial information to assist them liable set of estimates for with production and use by all farmers and marketing plans. Present farm prices and production costs, the economy, and export situation have created more than the usual number of uncertainties in agriculture," Hance pointed "Producers are especially vulnerable at times like these without the market stabilizing influence provided by official crop and livestock estimates. Rumors and trade guesses can upset delicate marketing situations," Hance said.

The survey, using a representative sample of agriculture, will include personal interviews with some 70,000 producers, and

With a population of some 1600, Emmitsburg plays host to over 400 ball players, including Little League, Babe Ruth League, Senior League, Women's Softball, Slo-Pitch Softball, and the SJHS Boys and Girls nines. That's 25% of the population. Remarkable sports participation isn't it. Let's take our hats off to the managers, coaches, sponsors, and league officials who give so much time to these programs. Special kudos to Bob Saylor and Dick Wivell, league presidents of the Little League and Slo-Pitch, respectively.

the Trojans knocked off St. Maria

Goretti, Greg Adelsberger ting two home runs in one threw a no-hitter at Prospect Hall to keep the SJHS Trojans undefeated at 6-0 in league play.

The SJHS Trojan girls have a lock on second "Big Game" against league champions St. Maria Goretti of Hagerstown by a score of 8 to 6. Big hits for our gals were a 2 run homer by Elaine Hobbs and a 2 run single by Laurie Harris.

In the first "Big Game" of the Little League season, the Giants edged the Yankees 22 to 20 to grab a solo hold on first place. In other Little League action, Billy Topper set a local. Little League record by hit-

inning. He added another to total three for the game. According to Bob Saylor, both Mike Wivell and Dennis Ott hit four homers in one game in recent years. Butch Myers told me that place after dropping their someone hit five in one game back when he was playing. That'd be around

> In the first head-to-head confrontation between last years playoff finalists, Myers Radio & TV squeezed by Freeman Shoe 6 to 5 in what was reportedly a crackerjack game. Apparently, Myers is now atop the American Division with Freeman still kingpin of the National Division. Our condolences

to all of the Slo-Pitch managers who have broken dialing fingers and therefore find it impossible to call in their game scores to Roy Wivell Jr.; telephone 447-2881.

BOO OF THE WEEK! Umpires who force pitchers to groove the ball. It makes for high scores, games, astronomical ERAs, and bad pitching habits. Rule is "any part of the ball in any part of the strike zone.

DOUBLE BOO OF THE WEEK! Little League mothers who bad mouth anything and everything at games. They not only set a poor example for the kids. but make it impossible for other fans to enjoy the games. Boo and double boo!

Mrs. Violet Wastler

Mrs. Violet Wastler, 75, of 210 E. Main St., Emmitsburg died Saturday, May 15, at the home of her daughter. Mr. and Mrs. Ronald Welker, Annapolis.

She was born in Emmitsburg, Sept. 15, 1900, a daughter of the late Herbert and Delta Gelwicks Ashbaugh. She was a lifelong resident of Emmitsburg.

She was the wife of the late Lester R. Wastler, who died Aug. 27, 1973.

Surviving are three sons, Lester G. Wastler, Emmitsburg; M. Allen Wastler, Rt. 1, Littlestown, Pa., and Franklin E. Wastler, Frederick; two daughters, Mrs. Doris V. Delmonico, Lancaster, Pa., and Mrs. Carolyn M. Welker, Annapolis; 20 grandchildren and 20 greatgrandchildren; one sister, Mrs. Ada Myers, Em-

mitsburg.

Mrs. Wastler was a member of St. Joseph's Catholic Church, Emmitsburg, the American Legion Auxiliary and the Senior Citizens Club, both of Emmitsburg.

Many Vilgrims Come To Lourdes Grotto

The National Shrine Grotto of Lourdes, oldest replica in the United States of the world famous Lourdes Shrine and a public oratory, located on the campus of Mount Saint Mary's College, will be the scene of thousands of religious pilgrims and other tourists during this the Bicentennial summer, according to Msgr. Hugh J. Phillips, Grotto Director.

Among those scheduled to come to the Grotto are organized groups from over two dozen Catholic Dioceses across the fifty states.

Combining the dual celebrations of the Bicentennial and Eucharistic Congress to be held in Philadelphia, groups are also expected from Europe. A special one-day tour has been planned which will bring groups from the Congress to tour Washington, D.C. and stop at historic Emmitsburg to visit the Seton Shrines Mount Saint Mary's and St. Joseph's where the first native born American saint of the Catholic Church labored and died. Msgr. Phillips stated that special arrangements are being made for continuous services at the Grotto during the summer months to accommodate the large influx of visitors. The Grotto is open without charge to all visitors

The new 500 seat open pavilion which is being constructed through donations will be completed for the convenience of visitors during inclement weather.

daily from sunrise to sunset.

There is a legend that Father John Dubois on one of his many journeys around this area, was attracted by a light on the mountain and upon finding the spot of the grotto, erected a rude cross. Later on, in 1805, he built St. Mary's Church at site of the present campanile, and a statue of the Blessed Virgin was placed in the church tower.

next holy person to come to the Grotto in 1809. She and her little band of Sisters lived near the Church and the Grotto for six weeks. After moving to the valley, the Grotto was still her most loved spot on the mountain and she and her Sisters often returned to recite their prayers, teach catechism and enjoy nature at her best.

Father Simon Gabriel Brute' came to the mountain in 1812 and finding in the Grotto untamed beauty, sought to "smooth the frown from nature's er-ring face." Springs were cleaned out, covered and named for saints; terraces and paths found their way up the rugged mountainside to the church and grotto.

Today, the same paths are traveled and the stone walks remain. He attached crosses to the trees on the path so that one could make the Stations along the path to the grotto.

Bruce' built a bower as an entrance to the Grotto and this was enlarged and kept in repair through the years.

The Seminary Sodality, formed in 1819 and reorganized in 1868, listed in it's Rule "Keeping the Grotto in

Through the years this care of the

Grotto continuea; each generation of changed. Mountaineers adding their contribu-

In 1861, Father Leonard Obermeyer, aided by two seminarians, James Dunn and Martin Fallon, constructed the stone dam cleared to open up a vista of the above the present Lourdes Shrine.

The ancient Grotto was further enhanced in 1875, when Father John A. Waterson began construction of the Lourdes Shrine. The building of the Shrine was the idea of Patrick L. Duffy, a Seminarian. In material situation, proportions and construc-tion, the Shrine is the most exact duplicate of the original Grotto in this country.

The new Lourdes Shrine did not immediately displace the original Grotto. A Corpus Christie celebration was centered at the new stone Grotto in 1879, but return was soon made to the old wooden shrine originally raised by Brute'. It was in 1879 the statue of Our Lady was placed in a niche in the Grotto.

In 1898, Bishop Thomas McGovern of Harrisburg had the old wood chapel rebuilt. The Bishop died shortfter this and his relatives gave a gift for construction of a memorial chapel which would permanently mark the spot of the original Grotto. This chapel was built in 1906. The statue of Our Lady, in this Chapel, is possible the original statue from the ancient Grotto.

The present statue of Our Lady of Lourdes in the new Grotto was presented in 1891.

For the next fifty years the Grotto had been almost exclusively a shrine for students and faculty of the college and of the Sisters and students at St. Joseph's College.

The only access to the Grotto for the outside world was a mountain road, which in the passing of the years, had become an almost impassable gully. In 1958, the road was paved and a trickle of visitors soon increased until in 1959, 30,000 pilgrims visited the Shrine.

The old Church burned in 1913, but the Grotto remains.

Were John Dubois to visit the Grotto today, he would basic ideas for the Grotto unchanged. The site of his Church is cleared and paved as a large parking lot, thus the unrivalled view of the valley remains almost un-

Brute's crosses on the trees are replaced by artistic Stations of the Cross set in native stone. Our Lady of the Lake presides over the reservoir. the surroundings of which have been ravine. St. Francis of Assisi finds a setting in front of the Grotto Chapel.

Seats for 500 pilgrims have been provided for the convenience of all.

In place of Dubois' first humble cross, there is now a striking Calvary

Thus the Grotto has now taken its proper and public place as one of the greatest historic shrines of America. (Photos by Mary Johnson)

A memorial chapel was built in memory of Bishop Thomas McGovern of Harrisburg to permanently mark the spot of the original grotto.

ومممى

Built by Count Thomas W. Pangborn in 1965, this campanile marks the spot

of St. Mary's Church which burned in 1913.

This Calvary group replaced Father Dubois' first humble cross placed in the Grotto.

The Lourdes Shrine was the idea of a Seminarian, Patrick L. Duffy and is the most exact duplicate of the

original Grotto in this country.
